COMMUNITY DEVELOPMENT POLICY AND PRACTICE (M.A.)

https://carsey.unh.edu/macdpp

Description

The Community Development Policy and Practice program prepares you to tackle complex community development issues by engaging with leading experts and academics in a program designed for working professionals like you. You will learn from seasoned practitioners in subjects ranging from economics and finance to organizational management and environmental factors in development.

- Gain hands-on learning through an applied yearlong capstone project in your community
- Connect with respected field experts across disciplines, including faculty and peers
- Graduate in 14 months (full time) or 24 months (part time), whichever works best for your schedule

Program Delivery & Location: Academic courses are offered in person on the UNH Durham campus over two brief summer terms and online fall through spring, allowing students to carry out their capstone projects at the location of their chosen community.

Requirements

Students enrolled in the Carsey School’s Community Development Policy and Practice program are required to complete a thirty-nine (39) credit program, consisting of:

- Seven (7) CORE Curriculum Courses
- Four (4) EXPERIENTIAL LEARNING Courses
- Three (3) ELECTIVE Courses

These provide the foundational analytic, strategic, and practical skills for a successful career in community development, all levels of government, nonprofit and nongovernmental organizations, foundations, businesses, and research institutes. This program will examine each of the core disciplinary areas within the cross-cutting lenses of theory, policy, data collection and analysis as students directly apply what they learn through a yearlong, capstone project in their communities. Further opportunities for depth and specialization are provided through a variety of elective courses which vary each year.
