UNH Affirmative Action and Equity Statement

The University of New Hampshire (UNH) is a public institution with a long-standing commitment to equal opportunity for all. It does not discriminate on the basis of race, color, religion, sex, national origin, age, veteran's status, gender identity or expression, sexual orientation, marital status, disability, genetic information, or pregnancy in admission or access to, or treatment or employment in, its programs, services, or activities. Sexual harassment and sexual violence are types of sex discrimination. Inquiries regarding discriminatory harassment (including sexual harassment or violence) should be directed to Donna Marie Sorrentino, dms@unh.edu, Director & Title IX Coordinator, Affirmative Action and Equity, Room 305, Thompson Hall, 105 Main Street, Durham, N.H. 03824, phone (603) 862-2930 (voice), 7-1-1 (Relay NH), (603) 862-2936 (fax); or to the Office for Civil Rights, U.S. Department of Education, 8th Floor, 5 Post Office Square, Boston, MA 02109-3921, phone (617) 289-0111, fax (617) 289-0150, e-mail OCR.Boston@ed.gov.

There are various grievance procedures to provide for the resolution of complaints under this policy. See the UNH Discrimination and Discriminatory Harassment Policy (http://www.usnh.edu/olpm/UNH/V.Pers/B.htm) and Grievance and Complaint Procedures (http://www.unh.edu/vpsas/handbook/grievance-and-complaint-procedures) in UNH Student Rights, Rules, and Responsibilities. Further information may be obtained at the Affirmative Action and Equity Office or via e-mail afirmaction.equity@unh.edu.

About the Catalog

The University provides information pertaining to the Family Educational Rights and Privacy Act of 1974 (the "Buckley Amendment") in the annual student handbook. Information is also available from the office of the Senior Vice Provost for Student Life and Dean of Students. The annual student publication, Student Rights, Rules, and Responsibilities (https://www.unh.edu/student-life), also contains University regulations and policies regarding student conduct.

The University will supply information about the employment of its graduates who have graduated from our degree and/or certificate programs. This information may be obtained upon request from the University's Office of Career and Professional Success and is available by university, college, or school to current and prospective students. Information on employment outcomes depends on student self-reporting. The University does not guarantee employment to its graduates. Chances for employment are enhanced if students have begun career planning early in their degree programs.

Program descriptions may vary from the actual content or requirements because of advancements in the discipline or the active nature of academic planning and decision making. Accordingly, the University reserves the right to make whatever changes are deemed necessary in schedules, course content, requirements, academic programs (including their termination), calendar, tuition and fees, services, or any other aspect of the University's operations, giving whatever notice thereof is reasonable under the circumstances. Therefore, the provisions of this catalog are not an irrevocable contract between the students and the University. The University is also not responsible for failure to provide or for delay in providing expected services and/or facilities when such failure arises from causes beyond the reasonable control of the University.

All aforementioned publications are available in alternate formats upon request.

GENERAL INFORMATION

The University

UNH offers 200-plus degree programs across 11 schools and colleges to some 15,000 undergraduate and graduate students. There are thousands of courses to choose from, and 83 percent of them enroll no more than 50 students, meaning experiential learning and thoughtful classroom discussions reign. What's more, with an 18:1 student-to-faculty ratio, UNH students have direct access to award-winning (Pulitzer, Guggenheim, MacArthur “Genius”) faculty.

The core academic experience for every UNH student is the Discovery program. It starts with an Inquiry course (analysis, writing, questioning), expands into an exploration across disciplines and ends with a senior capstone experience. The goal is to help each student become the kind of person the world most needs. It's working: the UNH Class of 2018 boasts a 95 percent success rate, with 74.5 percent of students employed six months after graduation and another 20.5 percent seeking further education. And the good news isn't limited to UNH's youngest alumni; a Gallup study found that UNH graduates thrive in their professional and personal lives to a greater degree than their peers from other large public universities, and they're employed at a rate much higher than the national average.

UNH students and faculty have been collaborating to make the world a better place for more than 150 years, and not just in the classroom — from the uncharted ocean depths to edge of our solar system to the Earth we call home, our research transforms lives and delivers solutions to global problems. Powered by more than $110 million in competitive external support, in 2018 UNH became just one of 130 doctoral-granting universities in the country — and one of only 43 without a medical school — to earn the "very high research activity," or R1, designation from the Carnegie Classification of Institutions of Higher Education, securing our place among the top research universities in the country. Undergraduates in every academic discipline enjoy broad access to research experiences and can even get funding to pursue them through the university's Hamel Center for Undergraduate Research. Many boost their resumes by conducting independent inquiries, an experience that gives them a leg up on graduate school and employment applications.

We know that students who graduate with hands-on, real-world experience are more likely to have successful careers, so in addition to all the classroom learning and research, UNH offers 500+ study abroad programs, a dedicated career and internship center and a dedicated fellowships office, all of which help students find opportunities that bolster their academic and career goals. Our entrepreneurship center helps aspiring business owners make their dreams reality.

Ready to dive in? We'll supply the world-class academics, the outstanding faculty and an atmosphere of creative invention. You bring the burning desire to bend your mind on some of society's most pressing problems.

Mission

UNH offers a broad array of undergraduate, graduate, professional, and research programs. Nearly 90 percent of the full-time faculty hold doctoral or terminal degrees, and many have earned national and international reputations.

The University of New Hampshire has a threefold mission of teaching, research and public service.

Teaching. All undergraduate programs of instruction at the University are built on a specialized program of general education known as Discovery. The objectives of the Discovery Program carry through the undergraduate subject major as students refine and apply their skills and discover the relationships among fields of study. At every level, students enjoy close contact with individual faculty members who are dedicated to research and scholarship; this is an advantage for students because active scholars and researchers teach by sharing their own learning.

Research. The activity of research embraces all the arts and sciences at the University; it is an integral part of both undergraduate and graduate programs. In doctoral study and in many master’s programs, thesis research is a primary mode of learning. As a land-, sea-, and space-grant institution, the University of New Hampshire has a particular obligation to conduct applied research in the areas of agriculture, marine sciences and engineering, and to disseminate the findings to the state and nation.

Public Service. The University fulfills its special responsibility for the welfare of the state through UNH Cooperative Extension, and through research and consultation on particular needs of New Hampshire citizens. The University is dedicated to collaborative learning in and outside the classroom.

University System of New Hampshire Trustees and Administrative Officers

https://www.usnh.edu/trustees

The University System of New Hampshire is governed by a 29-member board of trustees that includes the Governor of the State, the President of the Senate, the Speaker of the House, 10 members appointed by the Governor and Executive Council, 7 alumni-elected members, 2 student-elected members, the Commissioner of Education, the Commissioner of Agriculture, the presidents of the University System’s four colleges and universities, and the Chancellor. The Chancellor is the chief executive officer of the University System.

Accreditation

The University of New Hampshire is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.).

Accreditation of an institution of higher education by the Commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary
resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Commission is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the Commission should be directed to the administrative staff of the institution. Individuals may also contact:

New England Commission of Higher Education
3 Burlington Woods Drive, Suite 100, Burlington, MA 01803-4514
(781) 425 7785
E-Mail: info@neche.org

Specialized programs of study are also accredited by various professional organizations.

Veterans and their eligible dependents may apply for educational benefits before the start of each semester. For information, contact the UNH veterans coordinator at UNH.Veterans@unh.edu or by phone at (603) 862-0643.

The University supports the efforts of secondary school officials and governing bodies to have their schools achieve regional accredited status to provide reliable assurance of the quality of the educational preparation of their applicants for admission.

Admission

UNH welcomes campus visitors year-round. Campus tours are led by student admissions representatives who provide a general overview of academic programs and campus life opportunities. Professional staff members are available to provide information about the criteria used by the admissions committee in reviewing candidates and to address specific concerns. For further information or to schedule a campus and/or group information session, visit the Admissions website at http://admissions.unh.edu/visit-campus. Registration is strongly recommended. Complete information and instructions regarding the application process to UNH are found at http://admissions.unh.edu/apply.

Admission Criteria

Admission to a bachelor's degree program is based upon successful completion of a strong secondary school program of college preparatory coursework. Primary consideration is given to the academic record, as demonstrated by the quality of the candidate's secondary school course selections and achievement; recommendation; and the results of the SAT and/or ACT exam. Consideration is also given to character, initiative, leadership, and special talents.

Candidates must, at a minimum, present at least four years of English, three years of mathematics (algebra I, geometry, and algebra II), three years of laboratory science, three years of social science (2 must be laboratory sciences), and two years of study in a single foreign language. Three years of a single foreign language are preferred. Recommended mathematics preparation includes the equivalent of algebra I, geometry, algebra II, and trigonometry/advanced math.

Students who plan to pursue a major in engineering, biological/physical science, mathematics, or forestry should present at least four years of mathematics including trigonometry, as well as laboratory coursework in chemistry and/or physics. Note that students are required to have a math and science in their senior year to be competitive for admission to an engineering major. Students pursuing business-related studies also should have completed four years of mathematics including trigonometry. For students planning to major in health-related disciplines, four years of math, as well as laboratory courses in biology and chemistry, are strongly recommended. Students interested in nursing must complete high school chemistry.

Applicants may indicate their first and second choice majors on the application for admission. An undecided applicant may apply for admission into a bachelor's program as an "undeclared" student to any one of the University's five college divisions in Durham or at UNH Manchester. For information concerning bachelor and associate degree programs offered through UNH Manchester, visit http://manchester.unh.edu/; for information concerning the associate degree programs at the Thompson School of Applied Science, visit https://colsa.unh.edu/tsas.

UNH students may request a change in major during their undergraduate years. While most are approved, some majors are more restrictive than others and require the completion of specific coursework and an additional application. Change of major requests are considered after a student has been at the University for at least one semester and has permission from the appropriate college dean and department chairperson.

Admission Test Requirements

All candidates for admission to bachelor's degree programs are required to submit the results of the SAT or ACT exam. Scores must be submitted electronically to UNH by the testing agency. SAT subject tests are not required, but a foreign language subject test may satisfy the foreign language requirement of the bachelor of arts degree. Required scores vary by test.

International students whose primary language is not English must submit the results of a Test of English as a Foreign Language (TOEFL). The recommended minimum TOEFL score is 213 (computer version) or 550 (paper version) or 80 (Internet version). UNH also accepts the International English Language Testing System (IELTS) English Language proficiency examination in lieu of TOEFL; the minimum acceptable proficiency grade is 6.5. International students who earn a 500 or higher on their ERBW (Evidence-Based Reading and Writing) section of the SAT will be waived the English proficiency test requirement.

Music Candidates

Candidates applying for programs in the Department of Music must make arrangements with the department chairperson for an audition by calling (603) 862-2404. Details regarding audition requirements may be obtained from the department, or may be found on the Department of Music website at http://cola.unh.edu/music.

Admission Deadlines

The Admissions Office welcomes high school students who are interested in being considered for admission to UNH as a first-year
student in the fall to apply any time after August 1 at the start of their senior year. The application deadline for Early Action is November 15 and Regular Decision is February 1. Admission notifications are provided on a continuous basis through April 15.

Accepted candidates are required to confirm their intention to enroll with the payment of an enrollment deposit fee by May 1, National College Decision Day. An additional deposit to reserve on-campus housing is also required by May 1.

The review of first-year candidates begins as soon as a complete application (including official grade reports through the first marking period of senior year and a confirmed course schedule, the results of the SAT or ACT, and a letter of recommendation) is on hand. To apply as an early action applicant, candidates must submit an admission application and supporting documents by November 15. In some cases, the admission committee will request senior mid-year grade reports in order to make a final admission decision. Students accepted to UNH through the early action program are not obligated to enroll at UNH.

All offers of admission are considered conditional and are subject to the verification of satisfactory senior year achievement when final high school transcripts are reviewed by the admission committee.

Deferral Admission
The University considers applicants for deferred admission, which enables students to reserve a space at the University while taking time off from school for work or travel. With few exceptions, UNH will not approve deferral requests in which the student will be taking college coursework elsewhere. Requests for deferrals must be put in writing and sent to the Admissions Office (admissions@unh.edu). The University may not be able to offer deferred admission in certain program areas.

Advanced Standing
The University recognizes outstanding secondary school work by means of advanced placement and credit for those who have taken enriched or accelerated courses before entering college. Applicants qualify for such credit by successfully completing coursework for college credit and satisfactory achievement on University-approved placement examinations, including the College Board Advanced Placement (AP) Tests, International Baccalaureate (IB) Higher Level Examination Test Results, or through the College Level Examination Program (CLEP). Students should have official results sent directly to the Office of Admissions from the testing agency.

The University accepts AP Tests in every subject area, with credit and course equivalency based on the score achieved. Visit https://admissions.unh.edu/accepted/first-year-students/advanced-placement-credit for further information.

The University awards 8 semester credits for each IB Higher Level Examination Test Result of 5, 6, or 7. The University recognizes up to 32 semester credits of CLEP General Examination tests, which may be awarded as elective credit only. Scores must be 500 or better in the humanities, natural sciences, and social sciences-history exams. The minimum score for mathematics is 500 and for the English exam with essay, 500. Subject exams, when applicable, may be used to satisfy either departmental or general education requirements. UNH does not accept all CLEP subject exams.

Maximum credit accepted toward a bachelor’s degree for all credit by exam and advanced placement testing is 64 semester hours.

Associate Degree Candidacy
The University accepts candidates who have demonstrated ability and motivation for learning through academic achievement, work experience, and/or military service for associate in applied science degree programs.

Students may be considered for admission to associate in applied science degree programs offered by the University's Thompson School of Applied Science in Durham as well as associate in arts or science degrees at the Manchester campus. Candidates applying as high school seniors must submit the application, secondary school record, and results of the SAT or ACT. Students granted first-year admission to the Thompson School are eligible to live in a University residence hall.

Eligibility for Degree Candidacy
Applicants may be candidates for any undergraduate degree offered by the University. However, applicants having a bachelor of arts (B.A.) degree will not be admitted into a program of study that awards the same degree (e.g., B.A. History and B.A. Zoology). Applicants can earn more than one bachelor of science (B.S.) degree, provided that each degree is in a different field. Applicants may also be admitted into a program awarding a different degree (e.g., B.A. History and B.S. Biology; or B.A. History and A.A.S. Applied Animal Science).

Readmission
An undergraduate who withdraws, does not register for UNH coursework in a given semester, or is suspended or dismissed from the University thereby terminates degree candidacy and must apply for readmission by the following deadlines: fall semester, June 1; spring semester, November 1. Readmission applications are processed in the Office of Admissions; however, decisions regarding readmission are made in consultation with the Division of Student and Academic Services and the dean’s office of the University college division to which the student is applying.

Before seeking readmission, students on academic suspension must remain away from school for at least one semester. Suspended students should include a statement about their readiness to resume University work with their application.

Only under extraordinary circumstances will students be readmitted after dismissal for academic reasons. Applications submitted by dismissed students are reviewed by the University’s Academic Standards and Advising Committee.

It may not be possible for readmission applicants to enroll in programs with established enrollment limitations.

Transfer Students
UNH encourages applications from transfer students. Admission consideration includes review of course selection, academic achievement, and the extent to which that selection addresses the University’s general education requirements. Transfer credit is awarded for completed courses taken at an institution that is fully accredited by one of the regional accrediting associations with a grade of C or better, provided those courses are comparable to courses offered at UNH. Each course must carry at least 3 semester credits and receive a letter grade to qualify for general education consideration.

The application deadline for fall semester admission is April 1; October 15 is the application deadline for spring semester. Some programs have enrollment limitations and may not be open to transfer students. Students enrolled in one of the University’s associate degree programs...
who desire admission to a bachelor’s degree program at UNH must apply as transfer students through the Office of Admissions.

Transfer students may contact the Department of Housing at (603) 862-2120 to determine the availability of on-campus housing, or the Office of Commuter Services for assistance with off-campus housing. In most situations, on-campus housing is not guaranteed to transfer students.

New England Regional Student Program

The University participates in the New England Regional Student Program, in which each state college and university in New England offers certain undergraduate majors to students from other New England states. Under this program, admitted students from other New England states pay a reduced tuition rate. Students must indicate on their admissions application the specific major for which they are applying. Information about the curricula may be obtained from:

The New England Board of Higher Education
45 Temple Place
Boston, MA 02111
www.nebhe.org (http://www.nebhe.org), or (617) 357-9620.

Visit http://admissions.unh.edu/tuitionfees/new-england-regional-student-program/ for available UNH majors through this program.

Full-Time Special Student Status

UNH offers a special student classification for persons who wish to participate in University coursework on a full-time basis without entering a degree program. In evaluating requests for special full-time status, the Office of Admissions generally applies the same criteria used in the review of applicants for admission to degree candidacy. Full-time special students have full access to academic support services but are not eligible for University-based financial aid. Students must maintain satisfactory achievement to continue with University coursework. Full-time special (non-degree) students register for coursework through the Registrar’s Office.

Resident Status

All students attending any division of UNH in any capacity shall be charged tuition at a rate to be determined by their primary, legal domicile. Those domiciled within the state of New Hampshire pay the in-state rate. Those domiciled elsewhere pay the out-of-state rate.

Students are classified as residents or nonresidents for tuition purposes at the time of admission to the University. The decisions, made by the Office of Admissions, are based upon information furnished in students’ applications and any other relevant information.

All enrolling students living in New Hampshire are required to submit a notarized statement to the effect that they, if financially independent, or their parents, if financially dependent, have been legally domiciled in New Hampshire continuously for a period of at least twelve months immediately prior to registering for the term for which they are claiming in-state status. Students admitted from states other than New Hampshire or from foreign countries are considered nonresident throughout their attendance at the University unless they have acquired bona fide domicile in New Hampshire.

If students maintain residency apart from that of their parents, they must clearly establish that they are financially independent and that their residence in New Hampshire is for some purpose other than the temporary one of obtaining an education at the University. To qualify for in-state status, students must have been legally domiciled in New Hampshire continuously for a period of at least twelve months prior to registering for the term for which in-state status is claimed.

The burden of proof in all cases is upon the applicant. The University reserves the right to make the final decision concerning resident status for tuition purposes.

A copy of the rules governing residency may be obtained from the Office of Admissions and on the following website: https://www.unh.edu/policy/bot/iv-financial-policies/e-classification-students-tuition-purposes-residency-rules

Campus Life, Programs and Services for Students

The University offers programs and services to help every student get the most out of their college experience.

Advising Services

Every UNH student is assigned an academic advisor, who provides help in choosing courses and planning a program of study. Other sources of help, for academic or personal problems, are described below.

Career and Professional Success (CaPS)

With an uncommon commitment to personal and professional development, Career and Professional Success (CaPS) empowers all UNH students to proactively build the knowledge and skills they need to adapt and succeed in an ever-changing future. We are coaches, connectors, and champions for students and alumni in the Wildcat community. In partnership with faculty, staff, employers, and our global alumni network, we orchestrate opportunities for students to build personal and career awareness, build a personal brand, build professional experiences, and build professional relationships, equipping all with the tools to thrive throughout their lives.

For more information about programs, services and opportunities, call (603) 862-2070, visit www.unh.edu/career (http://www.unh.edu/career), or follow UNH Career and Professional Success on all major social media platforms.

Internships

Career and Professional Success supports students in locating pre-professional internships in settings ranging from traditional business and research facilities, to more uniquely tailored environments that reflect academic and career interests. Students who wish to engage in career-oriented work experiences for university credit should consult with an appropriate faculty sponsor in their department regarding established programs and the possibility of receiving academic credit. Many academic departments list internship opportunities and programs on the department website.

Additional paid and unpaid internship postings can be found through UNH’s job and internship board, Handshake (https://www.unh.edu/career/handshake).

For more information on internships at UNH, call (603) 862-2070 and/or visit www.unh.edu/career (http://www.unh.edu/career).
Center for Academic Resources (CFAR)

The Center for Academic Resources (CFAR) offers a comprehensive range of academic-related services to undergraduate students. Students work on an individual basis or in small group seminars to improve their academic performance and enhance their educational experience. CFAR offers individualized academic peer mentoring in learning strategies such as time management, test-taking, organization, note-taking, and reading; course information; clarification of academic goals; personal advising; and referrals.

As part of the University’s commitment to improving access and student success, CFAR hosts a national TRIO/Student Support Services (SSS) program, partially funded by the US Department of Education*. Student Support Services is for students whose parents do not have a college education, students with a high financial need, and students with disabilities. Intended for students whose parents do not have a college education, students with a high financial need, and students with disabilities.

For more information call (603) 862-3698, e-mail cfar.sss@unh.edu or visit http://www.unh.edu/cfar

*UNH TRIO SSS is funded by the US Department of Education and the University of New Hampshire. In 2017-18 federal funding totals $336,998. The University of New Hampshire contributes an additional $85,673.22 in matching funds. The project is funded to serve 200 students in 2017-18.

Honor Societies

The University of New Hampshire has a long and strong valued tradition of recognizing outstanding student academic achievement through election to a variety of honor societies. Some of these national societies recognize performance in any academic field while others are limited to specific disciplines.

Honor societies are most prevalent in colleges and universities. Based on varying criteria of high academic achievement and leadership, students are invited to join most commonly in their junior or senior year. Although initiated into the campus chapter, students become members of the national society for life. For more information visit https://www.unh.edu/honors-program/national-honor-societies.

In order to achieve our mission, our services include:

- **Processing** military educational benefits in an accurate, efficient, and timely manner in accordance with federal and state law, VA regulations, and USNHI Board of Trustees policy
- **Providing** a comfortable space for student Veterans, Service Members, and other military-affiliated students to study and socialize, to include Veteran-only on-campus housing
- **Supporting** the UNH Student Armed Forces Association, the primary student organization for student Veterans, Service Members, and other military-affiliated students
- **Coordinating** a wide range of events for our students, including:
  - On-campus appointments with VA representatives
  - Veteran-specific informational sessions for opportunities such as the Fulbright program
  - Veteran-specific orientation for incoming Veterans and members of the National Guard or Reserves
  - Ice cream, hot chocolate, and pizza socials
- **Advising** students on how to use their military educational benefits, make the most of their time at UNH, transition from military to civilian employment, and plan for life after college
- **Ensuring** student Veterans achieve their academic and professional goals by providing priority course registration, meaning student Veteran register during the initial registration period of their class

We subscribe to and follow PL 113-146 Section 702, The Veterans Access, Choice and Accountability ACT of 2014. A summary of this act can be found here https://www.va.gov/opa/choiceact/documents/Choice-Act-Summary.pdf.

Veterans have priority registration. This means that Veteran students register during the initial registration period of their class.

For more information call (603) 862-0643, visit our website at www.unh.edu/veterans (http://www.unh.edu/veterans), or email us at UNH.Veterans@unh.edu.

**Psychological and Counseling Services**

Psychological and Counseling Services (PACS) is the primary mental health facility on campus. We are fully funded by student fees. Our confidential services are designed to help students who are enrolled in full-time study to achieve their personal and academic goals. PACS utilizes a brief, solution-focused counseling model, which may include individual and group therapy, workshops, consultation with a psychiatrist, or counseling during a crisis. Students needing longer term service are offered referrals to other university and community agencies.

We also aim to serve the community while being part of the community. As community members with specialized training in working with the university population, we are knowledgeable about the special needs of students, faculty, staff. A large part of our community work focuses on prevention; we believe that increased awareness of healthy ways to cope with stress can help the UNH community and its individual members achieve their professional and personal goals.

All information about a student’s visits to PACS is confidential and cannot be released without the written permission of the student. The University of New Hampshire Psychological and Counseling Services has been accredited by the International Association of Counseling Services since 1978.

For more information, call (603) 862-2090 or visit http://www.unh.edu/pacs.

**Student Accessibility Services**

Student Accessibility Services (SAS) is committed to establishing a community that ensures full participation for students, and providing assistance that will facilitate independence and academic progress. The office is responsible for determining and ensuring academic and housing accommodations. In addition, we are a source of information and referral; a resource and collaborative partner for the campus community; and a point of support and advocacy regarding access issues in general.
Self-identifying with SAS is the first step in both gathering useful information—what SAS offers and what other resources exist—and establishing accommodations. You will need to provide documentation, make an appointment to review/discuss it, and identify appropriate accommodations. Creating a faculty accommodation letter is part of that process. Please see the Documentation Guidelines for direction on what to provide. If you are unsure, submit/bring whatever you may have so we can review and evaluate it.

There is no deadline to make contact, complete an intake, or provide documentation. The process of identifying and determining accommodations is an ongoing conversation. Students should provide additional documentation and/or talk with SAS as concerns and needs arise, or as the condition of the disability changes.

For more information call (603) 862-2607 (voice), 711 (TTY) or 800-735-2964 (Relay NH); (603) 862-4043 (fax); e-mail SAS.office@unh.edu (SAS.office@unh.edu?subject=SAS webpage inquiry); or visit http://www.unh.edu/studentaccessibility. Student Accessibility Services is located in Smith Hall, Room 201.

**General Information for Students with Disabilities**

Students seeking academic accommodations, services, and accessibility should contact Student Accessibility Services (SAS): voice (603) 862-2607; TTY Users: 7-1-1 or 800-735-2964 (Relay NH); SAS.office@unh.edu (SAS.office@unh.edu?subject=SAS webpage inquiry);

Most major buildings have ramps and many have elevators and adapted restroom facilities. Contact SAS, (603) 862-2607, or Affirmative Action, (603) 862-2930, with questions about building facilities.

Students with disabilities may use state-issued accessible parking permits in visitor lots and at metered parking (free). State permits are available through a student’s home state (Department of Motor Vehicles [DMV]). Please note: on-campus parking in restricted lots (“permit required”) requires BOTH the state-issued accessible permit and a UNH campus permit. Questions about temporary accessible parking should be directed to Parking Services at (603) 862-1010.

For information about dietary restrictions and needs as an accommodation, visit http://www.unh.edu/dining/nutrition.

Students with disabilities who need accessible UNH housing should contact SAS early to allow for identification of appropriate accommodation(s) and notification from SAS to Housing. Wildcat Access Van is a demand-response system that operates within the service area of the Wildcat Transit routes. All of the fixed route buses are lift-equipped. For information on this service or for the special arrangements possible during periods of inclement weather, contact SAS, (603) 862-2607.

All B.A. candidates must fulfill the University’s foreign language requirement by the end of their sophomore year. A student with a documented disability may petition the foreign language board for course substitutions on the basis of that disability. Contact SAS to learn about the process.

No otherwise qualified individual may be excluded from or denied access to any program, course of study, or any other offering of the University solely on the basis of a disability. Concerns regarding the institution’s compliance with the Americans with Disabilities Amendments Act (ADAAA) of 2008, or Section 504 of the Rehabilitation Act of 1973 should be addressed to the ADA/504 Compliance Officer in the Affirmative Action Office at (603) 862-2930 (Voice/TTY).

**University Advising Center**

The University Advising Center provides academic advising to undeclared students in the College of Liberal Arts. The center’s professional staff provides assistance to students in clarifying their interests and skills as they relate to developing a program of study at the University and declaring a major, offering opportunities to explore career possibilities.

The center is the primary academic advising resource for non-degree students and assists all students in identifying and connecting with other resources across campus.

For more information call (603) 862-2064 or visit www.unh.edu/uac. (http://www.unh.edu/uac)

**University Writing Programs**

The University Writing Programs (UWPs) were created to promote, support and assess writing at the University of New Hampshire. The UWPs are housed in Academic Affairs and report to the Senior Vice Provost for Academic Affairs. The UWPs are contained in a single unit that includes responsibility for the Writing Committee, Writing Across the Curriculum (WAC), the Connors Writing Center (CWC), and the Online Writing Lab (OWL). The curricular component of WAC, consisting of the writing-intensive (WI) courses, is situated within academic departments.

We work with academic units, departments, allied programs, individual faculty, and students to advance the culture of writing at UNH. This approach values and encourages writing as an “activity and subject of study,” not only in writing intensive (WI) classes but wherever writing occurs. Through frequent guided practice, UNH students become accustomed to negotiating the writing process, are more self aware and able to transfer positive writing habits, and can adjust to differing genre conventions. We offer a wide array of services and resources to support students and faculty with their writing-based endeavors in the curriculum.

For more information call (603) 862-3272 or visit www.unh.edu/writing (http://www.unh.edu/writing).

**Connors Writing Center**

The Connors Writing Center offers free, one-on-one writing conferences to members of the UNH community: students, faculty and staff. We work with writers from all disciplines on many different kinds of academic writing. Our 50 minute conferences are conducted by trained writing assistants, who are UNH undergraduate and graduate students.

We work with writers on all types of writing, from analysis essays to lab reports, conference proposals to dissertations. Our conferences are not limited to one specific type of writing or a single academic field—we collaborate with writers from across the university on a large range of academic writing.

Typically, the writers who visit are working on projects for courses. But we also see writers who are working on personal projects, statements of purpose and personal statements for graduate school, and so on.

For more information about resources and services available call (603) 862-3272 or visit www.unh.edu/writing (http://www.unh.edu/writing).
Cross Campus Registration

Students at the University of New Hampshire and the University of New Hampshire at Manchester may take courses on a space available basis at either campus. Students from either campus should consult with their advisor regarding which courses are appropriate for registration. Please note: students will need special approval to register for cross-campus courses which have campus, college or major restrictions or require special permission. Students can view a full listing of courses at each campus, including restrictions online at courses.unh.edu (https://courses.unh.edu).

Fees and Expenses

The expected cost for 2019 - 2020 at the University will average about $31,000 for residents of New Hampshire and about $47,000 for nonresidents. See the UNH Business Services website (http://www.unh.edu/business-services/tuitionfees) for the most up-to-date listing of rates.

UNH bills are sent electronically only. Bills are posted to student Webcat (https://my.unh.edu/task/durham/webcat-task) accounts. Students are notified through UNH assigned e-mail addresses when new bills are posted.

Tuition

Students are permitted to enroll for more than 20 credits only with the approval of their college or school dean. Persons carrying more than 20 credits will be billed a per-credit fee for each credit above 20 credits, whether or not a student has obtained the dean's approval. Courses taken for audit are charged at the same rates as for-credit registrations. Undergraduates registering for fewer than 12 credits pay the per-credit hour charge, plus a registration fee of $20 per semester. Undergraduates registered for fewer than 12 credits are charged 50 percent of the usual mandatory fees. Students registered for fewer than 5 credits pay the technology fee but are not charged for the other mandatory fees. The minimum charge for any recorded course is the per-credit charge of 1 credit hour.

Tuition differential charges apply to some majors. Students in the College of Engineering and Physical Sciences (CEPS), including engineering and computer science, and the Peter T. Paul College of Business and Economics (PAUL) will be charged a tuition differential. The differential is the same rate for both N.H. residents and nonresident students. CEPS and PAUL students who register for fewer than 12 credits pay a differential per-credit hour. Music majors are charged an applied music fee of $450 each semester.

All admitted students must pay an enrollment fee. The fee is $350 for residents and nonresidents. If a student decides not to attend the University, these payments may be refunded on a prorated basis until August 15, according to the guidelines set by the Office of Admissions.

Tuition and mandatory fee charges will be refunded to students withdrawing or dropping courses by the second Friday of the semester; one-half after the second Friday and until the fifth Friday; and none thereafter (see the University Calendar). Students receiving federal financial aid will have their return of unearned aid calculated in accordance with the U.S. Department of Education regulations in effect at the time of their withdrawal. For more information concerning withdrawal, call Business Services, (603) 862-2230. A degree candidate who withdraws from UNH and subsequently enrolls as a special student within the following year will be billed for tuition and fees on the same basis as degree candidates. Students with outstanding financial obligations to the University must clear their accounts before their registration will be confirmed.

Fees

Expected mandatory fees for 2019 - 2020 include a Memorial Union fee for the use and administration of the student union; a recreational fee for support of recreational facilities; a student activity fee for support of the undergraduate newspaper, yearbook, student government, student radio station, and other student organizations; a technology fee; a student athletic fee to provide support for athletic programs; a health and counseling fee to provide general health care through University Health & Wellness; a career and professional success fee; and a transportation fee to provide student transportation services.

There are no waivers of these fees. The services and facilities are available to all—the extent to which each student uses them cannot be the factor by which assessment is determined. Students who withdraw or drop to part-time after classes begin are eligible for refund of fees at the same rate as tuition refunds listed previously.

As a condition of enrollment, all full-time UNH students will be required to carry health insurance. Students may elect coverage under the University's student health benefits plan, or may waive the requirement by providing proof of adequate coverage through another plan. International students with F1 or J1 visas are required to purchase the UNH-sponsored coverage. There are no exceptions to this policy.

Mandatory Fees Include

Recreation Fee
- Use of indoor pool at the field house
- Use of athletic facilities at the Whittemore Center, which includes:
  - Aerobics
  - Saunas
  - Locker rooms
- With an additional fee:
  - CPR/first aid course
  - Ballroom dancing
  - Lifeguard instruction

Health & Wellness Fee
For information, see Health & Wellness (p. 21).

Memorial Union Fee
For information, see Memorial Union (http://www.unhmub.com).

Athletic Fee
- Admittance to all home games of organized sports at UNH
- Financial support for athletes and athletic teams

Activity Fee
Support for the following organizations:
- The undergraduate newspaper
- Yearbook
- Student government
- Student radio station
- Movies at reduced rates
For more information, check the “Get Involved” guide available at the Memorial Union Building.

**Career and Professional Success**
Helps prepare students for successful lives after graduation.
- internships
- career advising and resources
- assessments
- employer relations
- interview preparation
- mentoring

**Technology Fee**
Support for the following:
- Student computing clusters
- Walk-in Help Desk services
- Technology-enhanced classroom infrastructure
- Academic technology liaisons
- Technology-enhanced learning

**Transportation Fee**
Student transportation services:
- Campus Connector
- Wildcat Transit
- Safe Rides
- Amtrak Quik Ticket trip
- Non-emergency rides

**Room and Board**
New first-year students accepting a space on campus must include a $200 housing deposit with their housing application. For returning students, no deposit is required; instead, a cancellation fee will apply if the housing agreement is cancelled. Written notification of cancellation of the room application or assignment received by Housing before June 1 will result in a $250 cancellation fee applied to the student’s account. Written notification of cancellation received by Housing between June 2 and July 1 will result in a $375 cancellation fee applied to the student’s account. Written notification of cancellation received by Housing between July 2 and August 15 will result in a $500 cancellation fee applied to the student’s account. Written notification of cancellation received by Housing between August 15 and before Friday of the first week of fall semester will result in a charge of one-fourth of the full semester’s housing fee.

If by Friday of the first week of fall class the student fails to occupy the assigned room or cancels the agreement by mutual consent, or if for disciplinary or nonrenewal actions the agreement is canceled, the student will receive a 75 percent refund of the semester’s housing fee. Cancellation after the first Friday of fall classes and before 30 days after registration will result in a 50 percent refund of the semester’s housing fee. Cancellation 30 days after registration will result in no refund of the housing fee. Students who check in or move in to a hall or apartment, move out, and do not withdraw from the University are charged the full housing fee. If the agreement is cancelled, any refund of the housing deposit will first be applied against any unpaid University charges.

Refunds of meal plans will be granted only with approval or upon withdrawal from the University. If a refund is approved for an Unlimited access meal plan, the refund will be prorated by the number of weeks and partial weeks the student attended classes or used the meal plan. Block meal plans will be prorated by the number of meals consumed and charged at the highest prevailing meal rate. Unspent dining dollars will be refunded.

**Rebates**
Any amount owed to the University will be deducted from any rebate due to a student.

**Deposits and Course Fees**
Refundable deposits may be required to cover locker keys or loss or breakage in certain departments. A semester charge will be made for individual lessons in music, as noted in the description of applied music courses. (Non-music majors taking music courses or sections will be charged an applied music fee). A charge will be made for riding lessons and SCUBA, as noted in the sections on animal sciences and physical education. Some courses carry special fees to cover the costs of special equipment, field trips, etc.; these are noted in the course descriptions. Students will be charged a computer-use fee for courses requiring computer access and/or common access accounts. For certain courses, there are also lab fees.

**Other Expenses**
Books and classroom supplies cost approximately $800 to $1,000 annually. These may be purchased at the University Bookstore.

Personal expenses vary considerably with individual students and include clothing, laundry, recreation, incidentals, and travel.

**Payment**
All bills for tuition, fees, room and board, and other semester charges are due in full on the payment due date for each semester. A late fee may be assessed to student accounts not paid in full by the payment due date. Student accounts not paid in full within 30 days after the payment due date may be assessed additional late fees, default charges, interest and/or collection costs, and the student may be subject to deregistration from classes.

Parents and students who wish to make periodic payments for tuition, fees, room and board, and other semester charges should contact UNH Business Services well in advance of the semester payment due date for information on approved payment plans.

Undergraduate bills are sent electronically through posting to students’ Webcat (https://my.unh.edu/task/durham/webcat-task) accounts. Tuition bills are posted twice a year, in mid-July for the fall semester and in mid-November for the spring semester. Monthly statements are also posted as needed. E-mails are sent to students’ UNH-assigned e-mail addresses notifying students when new bills have been posted. Students may set up Parent Portal accounts to allow parents or others to access their student accounts.

Through the online system, students can view a history of electronic bills and payments and access a real-time view of their accounts. Payment may be made online, or the bill may be printed and mailed with payment. Credit card transactions will be charged a nonrefundable 2.75 percent service fee.
VA Educational Benefit

In accordance with 38 USC §3679(e), students using VA Chapter 33 Post-9/11 GI Bill® or VA Chapter 31 Vocational Rehabilitation will not accrue late fees for unpaid bill items covered by their VA educational benefit while waiting for disbursement of the aforementioned funds to UNH. Furthermore, students certified as using these VA benefits will not be precluded from attending classes, utilizing library or other institutional facilities, or be required to borrow additional funds because of their inability to meet their financial obligations to UNH due to delayed disbursement of funds from VA under Chapters 31 or 33. However, students may accrue late fees as applicable to unpaid bill items other than tuition and fees covered by Chapters 31 or 33. Moreover, UNH reserves the right to impose a late fee if the difference between the amount of the student’s financial obligation and the amount of the VA education benefit disbursement remains unpaid after student bills are due. Differences may be a result of, but not limited to, charges for housing, meal plans, parking permits, or if the student is not entitled to 100% of Chapter 33.

Financial Aid

The University Financial Aid Office (https://www.unh.edu/financialaid) assists students who are unable to meet educational expenses entirely from their own family resources. Aid is available in the form of grants and scholarships, loans, and part-time employment. The financial aid website gives program information, application procedures, and deadlines.

In many communities, scholarships and loans are available locally. School principals and guidance counselors have information about these sources of assistance, which are available to both high school seniors and adult students.

Before applicants may be considered for assistance by the University, they must submit the Free Application for Federal Student Aid (FAFSA) (https://studentaid.ed.gov/sa/fafsa).

The financial aid application priority consideration deadline for aid awarded by the University is March 1. In order to receive a timely award this is the date by which your fully completed FAFSA should be received by the federal processor.

It is the University’s position that the student applicant is accountable for the accuracy and timely submission of the FAFSA. We realize that in most cases a student’s parent(s) also participates in completing the form. However, it is the student who is ultimately responsible for monitoring the application process. Students should not wait until being admitted to the University before applying for financial aid.

In order to be considered for need-based assistance, students must submit a FAFSA each year.

Note: There is reference on the FAFSA to a “deadline” of June 30. Do not be misled by this date. It is not the financial aid deadline at UNH or most other colleges.

Grants and Scholarships

Admitted undergraduate degree candidates who will attend UNH on a full- or part-time basis may be considered for tuition grants and University scholarships. The basic consideration is financial need, although some scholarships are awarded on the basis of scholastic attainment, participation in extracurricular activities, or meeting specific requirements of a donor.

The University participates in the federally sponsored Federal Supplemental Educational Opportunity Grant Program, which is designed to assist needy students who are admitted degree candidates.

Federal Pell Grant Program

Students may apply directly to the federal government for a Pell Grant using the FAFSA.

Loan Programs

Matriculated students enrolled on a full- or part-time basis who have completed the financial aid process will be reviewed for the federal government’s Direct Student Loan Program.

Part-Time Employment

The Federal Work-Study Program, both academic year and summer, assists students who, as determined by the Financial Aid Office, need financial assistance for their educational expenses. Admitted undergraduate and graduate degree candidates attending at least half time are eligible for consideration.

Students who do not qualify for the Work-Study Program may find part-time employment on or near campus.

ROTC Scholarships

Reserve Officer Training Corps scholarships are offered on a competitive basis by both the Army and the Air Force. Entering freshmen may compete for four-year scholarships during the last year of high school. A variety of scholarships are also available to students already attending the University.

Scholarships pay up to full tuition, all mandatory fees, and for required textbooks. In addition, all scholarship recipients receive a tax-free monthly subsistence allowance. Finally, students with a four-year or three-year ROTC scholarship compete for a room and board grant for the entire time they are on the scholarship.

For more information, contact the Admission Officer: Army ROTC at (603) 862-7075, or Air Force ROTC at (603) 862-1480.

Health & Wellness

The University has a nationally accredited (aaahc.org) health and wellness program.

Health and Counseling Fee

All UNH students who take five or more credit hours/semester are required to pay the UNH health and counseling fees. These fees allow students to access services at Health & Wellness and/or Psychological and Counseling Services on campus, and cover many services at no or reduced cost. When combined with a student’s health insurance coverage, the health and counseling fees provide for a complete health care package. A student’s health insurance is never billed for services covered by the UNH health and counseling fee.

Health Insurance

UNH requires health insurance as a condition of enrollment for full-time degree students at its Durham, Manchester, and Concord campuses.
Students who already have health insurance are able to waive coverage under the University-sponsored plan, if their insurance plan meets or exceeds the established UNH waiver criteria, by completing a waiver prior to the deadline. International students with F-1 and J-1 visas are required to purchase the UNH Student Health Benefits Plan.

**Health Record Requirement**

Undergraduate students who have been formally accepted to a degree program are required to have health information on file with UNH Health & Wellness. The three requirements to be completed and submitted by the student online are:

1. a physical assessment,
2. immunization form, and
3. a health history form

Read more about health record requirements (https://www.unh.edu/health).

Documentation of proof of immunity to MMR (measles, mumps, and rubella) is required (UNH Academic Policy 02.14) and is typically shown on the immunization form. It is the responsibility of students to provide the documentation before attending any classes. Any student failing to complete these requirements may be prevented from registering for future classes.

**Medical Services**

UNH Health & Wellness provides comprehensive, student-focused, primary medical care through a team approach. The clinical staff consists of board-certified physicians, nurse practitioners/physician assistants, nurses, and medical assistants who are committed to prevention and holistic care. Primary medical care is provided for a large variety of common concerns. Examples include respiratory illnesses including asthma, infections, injuries, skin concerns, digestive disorders, and mental health. Sexual/reproductive health services include family planning/contraceptive services, cervical cancer (Pap smears) screening/prevention, testing and treatment for sexually transmitted infections, pregnancy testing and counseling, limited sexual assault services, and more. Health resource nurses provide chronic illness support, and assist with problems arising from hospitalization, health leave of absence, and subsequent return to campus. Other services include allergy/immunization services and travel health consultation. Students may speak by telephone with a health resource nurse for advice at any time, and after-hours nurse consultation is available when UNH Health & Wellness is closed. On-site clinical support services include laboratory, radiology, and pharmacy. Not all services are available during the summer or breaks. Read more about medical services (https://www.unh.edu/health).

Well-staffed and well-equipped community hospitals are nearby, and emergency ambulance service is available in Durham at all times.

**Health Leave of Absence**

All undergraduate students seeking assistance with health-related (physical or mental) leaves of absence from the University, or those who will be out for extended periods of time due to health issues, should be in touch with the Executive Director of UNH Health & Wellness at (603) 862-1098. Read more about Health-related leave information (https://www.unh.edu/health/leave).

**Living Well Services**

Living Well Services coordinates health promotion activities on campus. Services provided include educational programs/workshops, individual and group support to promote healthy lifestyle choices, alcohol and other drug counseling, tobacco cessation services, nutritional counseling, wellness coaching (e.g. stress, sleep, behavior change, etc.), biofeedback, light therapy, massage therapy and a resource library. Read more about living well services (http://www.unh.edu/health/ohep).

**Library**

The UNH Library supports the educational and research activities of the students, faculty, and staff of the University of New Hampshire as a research-level library. Experienced research assistance along with group and individual instruction support students learning how to efficiently research and critically evaluate information on the way to becoming effective lifelong learners.

The Library provides access to an extensive collection of electronic resources (e-books, digital collections, an institutional repository, indexes in many subject areas, statistical data sets, and databases supplying full-text periodical and newspaper articles) 24/7 at library.unh.edu (https://www.library.unh.edu). The Library also has approximately 2.7 million print and electronic items and more than 104,000 print and electronic serial subscriptions and is active in digitizing, preserving, and making accessible materials in its collections.

Dimond Library houses collections in the social sciences, humanities, business, health and human services, education, earth sciences and is the regional depository for federal government publications (including maps). Dimond Library is also home to the Connors Writing Center, the Academic Technology Support Center, the Parker Media Lab, and Zeke’s Cafe. The UNH Museum and Special Collections and Archives house rare books, manuscripts, and University publications and papers. In addition to the main Dimond Library, there are three branch libraries for physical sciences and engineering that offer customized services for the UNH scientific and engineering communities.

The library’s holdings are supplemented by access to the collections of the Boston Library Consortium members as well as libraries across the country through interlibrary loan. The UNH Library shares resources with the campus library at the University of New Hampshire at Manchester and collaborates with the UNH School of Law library.

All library locations offer wireless Internet access, computer workstations, individual study areas, and collaborative group work spaces. Dimond Library offers seating for more than 1,200 in a variety of settings.

For additional information about UNH Library resources, services, and people, please visit library.unh.edu (https://www.library.unh.edu).
UNIVERSITY ACADEMIC REQUIREMENTS

Degree Requirements

Degree Requirements for Undergraduates

Requirements in this catalog apply to students who enter the University between July 1, 2019 and June 30, 2020. Students who entered the University at an earlier time but who wish to change to the requirements of this catalog must apply to the appropriate office for the change. Students will be held responsible for all work required for graduation and for the scheduling of all necessary courses.

Credit Requirement

To be eligible for graduation from the University of New Hampshire, a student must obtain a passing grade in a minimum of 128 semester hours; for associate degree graduation, 64 semester hours. The student must also meet the curricular, departmental, scholastic, and other requirements that have been sanctioned by the proper authorities.

To be eligible for graduation, all baccalaureate, associate in applied science and associate in art students enrolling for academic year 2019/20 must fulfill four types of University requirements: Writing, Discovery (or General Education for associate degree students), degree, and major.

Minimum Graduation Average

A cumulative grade-point average of 2.0 in University of New Hampshire courses is the minimum acceptable level for undergraduate work in the University and for graduation. In addition, some majors require a grade-point average greater than 2.0 in certain courses or combinations of courses. The Academic Standards and Advising Committee examines the records of students periodically and may place academically deficient or potentially deficient students on warning, or may exclude, suspend, or dismiss those who are academically deficient.

Residence

“Residence” is being enrolled in University of New Hampshire courses after admission to and matriculation in a degree program. Students who are candidates for bachelor’s and associate degrees must attain the last one-fourth of their credits toward the degree in residence unless granted permission by the Academic Standards and Advising Committee to transfer part of this work from other accredited institutions.

Certification of candidate for graduation

Degrees are awarded three times a year: December, May and September. Candidates for graduation shall be certified as to their college requirements by the several college faculties to the Registrar, who shall recommend them to the president for their appropriate degrees provided they have satisfied all University requirements for graduation.

Modifications tend to occur in major programs during the period of students’ undergraduate careers. Students are expected to conform to these changes insofar as they do not represent substantive alterations in their course of study.

Note: Although the University will try to provide sufficient facilities so that students may pursue any major or curriculum for which they meet the requirements, such a privilege cannot be guaranteed, since rapidly increasing enrollment sometimes results in the overcrowding of required specialized courses. On occasion, students may remain in a crowded curriculum if they are willing to take certain courses during the summer session.

Quota of Semester Credits

Students registering for more than 20 credits must receive the approval of the college dean. Additionally, students taking more than 20 credits in a single term will pay a per-credit surcharge.

Baccalaureate and associate in arts undergraduates are assigned class standing on the basis of semester credits of academic work completed with a passing grade, as follows: to be a sophomore, 26 credits; to be a junior, 58 credits; to be a senior, 90 credits.

Grades

Grading and honors policies as stated in this catalog apply to all undergraduate students.

Instructors assign grades as listed below; grade points per credit are indicated in parentheses. For all undergraduate courses, grading standards established by the Academic Senate are that a C indicates competent, acceptable performance and learning; B indicates superior performance and learning; and A indicates excellent performance and learning. These standards apply to all undergraduate courses, instructors, departments, subjects, and colleges. The University reserves the right to modify grading and honors practices.

- A (4.0) Excellent
- A- (3.67) Intermediate grade
- B+ (3.33) Intermediate grade
- B (3.0) Superior
- B- (2.67) Intermediate grade
- C+ (2.33) Intermediate grade
- C (2.0) Satisfactory, competent
- C- (1.67) Intermediate grade
- D+ (1.33) Intermediate grade
- D (1.0) Marginal grade
- D- (0.67) Intermediate grade
- F (0.0) Failure, academic performance so deficient in quality as to be unacceptable for credit
- AF (0.00) Administrative F (usually indicates student stopped attending without dropping the course); is included in grade-point average
- CR—Credit, given in specific courses having no letter grades, designated credit/fail
- P—Passing grade in a course taken under the student pass/fail grading alternative
- W—Withdrawal, assigned if withdrawal is later than fifth Friday of classes (but not after midsemester); is not included in grade-point average
- WP—Withdrawal, assigned if withdrawal is after mid-semester and if student is passing; is not included in grade-point average
- WF—Withdrawal, assigned if withdrawal is after mid-semester and if student is failing; is included in grade-point average
- AU—Audit, no credit earned
- IC—Grade report notation for student’s incomplete coursework
Performance, internships, and practica. Additional academic activities include, but are not limited to, readings, reflections, essays, reports, inquiry, problem solving, rehearsal, collaborations, theses, and electronic interactions. Student work reflects intended learning outcomes and is verified through evidence of student achievement.

**Academic Honesty**

Academic honesty is a core value at the University of New Hampshire. The members of its academic community both require and expect one another to conduct themselves with integrity. This means that each member will adhere to the principles and rules of the University and pursue academic work in a straightforward and truthful manner, free from deception or fraud. The academic policy can be found in the annual publication, Student Rights, Rules, and Responsibilities (https://www.unh.edu/student-life).

**Course Descriptions**

**Credits**

The University of New Hampshire is in compliance with the federal definition of a credit hour. For each credit hour, the university requires, at minimum, the equivalent of three hours of student academic work each week. Academic work includes, but is not limited to, direct faculty instruction, e-learning, recitation, laboratory work, studio work, field work, performance, internships and practica. Additional academic activities include, but are not limited to, readings, reflections, essays, reports, inquiry, problem solving, rehearsal, collaborations, theses, and electronic interactions. Student work reflects intended learning outcomes and is verified through evidence of student achievement.

The number of credits listed is the number of semester credits each course number will count toward graduation (except in the case of variable credit courses). Students must register for the number of credits shown or, if the course is variable credit, within the range of credits shown.

"Cr/F" following the course description indicates that no letter grade is given but that the course is graded Credit or Fail.

**Course Offerings**

The pound sign "#" denotes any course which has not been offered in the past three academic years.

For up-to-date information about when a course is offered; who teaches the course; the number of recitations, lectures, labs, and such, students are referred to each semester’s Time and Room Schedule (https://courses.unh.edu).

**Equivalent(s)**

Credit cannot be earned for more than one equivalent course (unless repeat rules (https://www.unh.edu/student-life) are present).

**Labs**

In courses that are not designated by title as laboratory courses, the notation "Lab" or "Course has a lab component" in the course description indicates that laboratory sessions are a part of the course. For example, CHEM 403 General Chemistry I.

---

**Pass/Fail**

While earning a bachelor's degree, students may choose the pass/fail grading alternative for a maximum of 4 credits per semester up to a total of 16 credits toward the degree.

Pass/fail cannot be used for Discovery requirements, for writing-intensive courses, for courses required by a student's major or second major, for option or minor requirements, for ENGL 401 First-Year Writing, or for repeated courses. In addition, B.A., B.F.A., and B.M. degree candidates may not use pass/fail for courses taken to meet the foreign language requirement, and no Paul College course may be taken on a pass/fail basis by a student majoring in administration, economics, or hospitality management.

The minimum passing grade for credit is a D- (0.67); any grade below this minimum is a fail. All grades will be recorded on the grade roster as A, A-, B, B-, C, C-, D, D-, or intermediate grades. The pass/fail marks will be placed on students' transcripts and grade reports by the Registrar's Office. The course will not be included in the grade-point calculation, but the pass or fail will be recorded, and in the case of a pass, the course credits will be counted toward degree requirements. Associate in arts students, see the University of New Hampshire at Manchester.

**Honors**

An undergraduate degree student, after completion of at least 12 graded credits in University of New Hampshire courses, is designated as an honor student for a given semester if the student has

1. completed at least 12 graded credits for that semester and earned at least a 3.50 semester grade-point average; or
2. earned at least a 3.50 cumulative grade-point average and at least a 3.50 semester grade-point average regardless of the number of graded credits that semester.

Bachelor's degree candidates who have earned honors for their entire work at the University will be graduated with honors based on the final cumulative grade-point average, provided that a minimum of 64 graded credits have been completed in University of New Hampshire courses. The Latin equivalent of the honors classification will appear on the student's academic record and diploma. The student's honors classification will be noted in the commencement program.

Students graduating in academic year 2015-2016 and subsequent years will be graduated with honors according to the following categories: 3.50 to 3.64 (honors); 3.65 to 3.84 (high honors); and 3.85 to 4.00 (highest honors).

**UNH Credit Hour Policy**

The University of New Hampshire is in compliance with the federal definition of credit hour. For each credit hour, the University requires, at minimum, the equivalent of three hours of student academic work each week. Academic work includes, but is not limited to, direct faculty instruction, e-learning, recitation, laboratory work, studio work, field work, performance, internships, and practica. Additional academic activities include, but are not limited to, readings, reflections, essays, reports, inquiry, problem solving, rehearsal, collaborations, theses, and electronic interactions. Student work reflects intended learning outcomes and is verified through evidence of student achievement.
Mutual Exclusion
Courses are mutually exclusive when course content is too similar to earn credit for both. Students may not enroll if they have completed any mutually exclusive courses with a passing grade.

Numeric System
The University of New Hampshire’s system of numeric designation is as follows:

- 200–299 Courses in Thompson School of Applied Science.
- 300–399 Associate in arts /associate in science courses. Courses may be taken for credit only by associate’s degree or nondegree students. Credits may not be applied to baccalaureate degrees.
- 400–499 Introductory courses generally not carrying prerequisites and courses generally falling within University and college requirements.
- 500–599 Intermediate-level courses for undergraduate credit only.
- 600–699 Advanced-level undergraduate courses. Entrance to courses numbered 600 and above normally requires junior standing.
- 700–799 Advanced-level undergraduate courses. Ordinarily not open to freshmen and sophomores.
- 800–999 Courses that carry graduate credit only and therefore are open only to admitted or special graduate students.

Prerequisites and Corequisites
Prerequisites are courses that must be taken before another course. For example, CMN 456 Propaganda and Persuasion is a prerequisite of CMN 505 Analysis of Popular Culture. Each prerequisite for a course is separated from the other prerequisites by a semicolon; e.g., Prereq: CMN 455; CMN 456.

Corequisites are courses that must be taken in the same semester. For example, BMCB 658 General Biochemistry and BMCB 659 General Biochemistry Lab are corequisites.

Degrees
Bachelor of Arts
At least 128 credits in courses numbered 200-799, with a cumulative grade-point average of 2.0 for all courses taken at the University in which a grade is given.

Completion of Discovery Program (University core curriculum) requirements (p. 26).

Completion of the University writing requirement (p. 30).

Proficiency in a foreign language. This requirement may be fulfilled by completing the equivalent of a full-year elementary-level course in a language not previously studied, or by completing the equivalent of a semester of a course in a foreign language at the intermediate or higher level, or by earning credit through an approved Advanced Placement or College Board foreign language achievement test (minimum scores vary). The proficiency in a foreign language requirement must be satisfied by the end of the sophomore year. No credit is awarded for elementary year college coursework if the student has had two or more years of that language in high school. It is strongly advised that students check with academic departments to identify department-advised specific foreign language proficiency options.

Note: A student with a documented disability who wishes accommodation on the basis that the disability will prevent him or her from successfully mastering a foreign language requirement, or whose foreign language requirement was waived in high school because of a documented disability, must contact Student Accessibility Services, Smith Hall, (603) 862-2607 (Voice/TDD).

Bachelor of Fine Arts, Bachelor of Music
Requirements for the B.F.A. degree are outlined in the Department of Art and Art History (p. 40), College of Liberal Arts; for the B.M. degree, go to the Department of Music (p. 101), College of Liberal Arts.

Bachelor of Science
At least 128 credits in courses numbered 200-799, with a cumulative grade-point average of 2.0 for all courses taken at the University in which a grade is given.

Completion of Discovery Program (University core curriculum) requirements (p. 26).

Completion of the University writing requirement (p. 30).

Dual Degrees
The opportunity to pursue two undergraduate degrees simultaneously enhances and broadens the education of certain students. The program is only for those students who can adequately handle the requirements for two different degrees and who can reasonably allocate the additional time and effort needed for the program.

Except for specific five-year degree programs, a student may not pursue two different degree levels simultaneously.

Requirements
Students desiring dual degrees must petition the college dean or deans involved for permission. Students must have a minimum 2.5 cumulative grade-point average. Students planning to take one degree in a highly prescribed curriculum should register as freshmen in the appropriate school or college for that curriculum. It is expected that candidates for two degrees will complete 32 credits beyond those required for the first degree. Students can earn more than one bachelor of science (B.S.) degree, provided that each degree is in a different field. Students cannot earn more than one bachelor of arts (B.A.) degree. Transfer students already holding a baccalaureate degree from another accredited
institution may pursue an additional baccalaureate degree at the University of New Hampshire provided they fulfill the previously listed requirements. The degree received at the first institution will be accepted by UNH as awarded by that institution.

**Supervision**

As soon as a student is accepted as a candidate for two degrees, the appropriate dean(s) will appoint supervisors for each of the proposed majors. The supervisors and the student will work out a basic course plan for the two degrees and inform the appropriate dual degree dean(s) of the plan. The supervisors will maintain joint control over the student’s academic program. The college offices and the supervisors will receive copies of grade reports and other records for students pursuing two degrees.

**Accelerated Master’s Eligible Programs - Undergraduate Seniors**

Qualified senior students at the University of New Hampshire may be admitted to the Graduate School provided they have followed normal application procedures. Students in the accelerated master’s program must be admitted to the Graduate School before they may enroll in courses for graduate or dual credit. A 3.20 cumulative grade-point average is normally required to be considered for admission to the accelerated master’s program.

Such seniors are normally admitted prior to the start of their last undergraduate semester, but may be eligible to apply for admission the first semester of their senior year. Seniors who have been admitted under early admission may register for a maximum of 12 credits of graduate-level courses prior to completing their bachelor’s degree. Such courses may upon recommendation of the department and approval of the Graduate School count toward both a bachelor’s and master’s degree.

When seniors admitted to the accelerated master’s program have registered for graduate courses, they must maintain a grade-point average of 3.20, complete their undergraduate degree as planned, and pass graduate courses taken for credit with a grade of B- or better. If these conditions are not met, admission is withdrawn.

Not all graduate programs participate; each program’s faculty retain discretion regarding whether their program admits students under the accelerated master’s program, as well as the maximum number of graduate credits permitted (not exceeding 12; e.g., some programs will accept one course, others two). Applicants are strongly encouraged to meet with the graduate coordinator in the program’s faculty to discuss specifics. Dual-credit forms must be completed and approved by the dean of the Graduate School at the beginning of the semester for which dual credit is sought.

**Discovery Program**

**Discovery Program (Core Curriculum Requirement)**

The Discovery Program provides the intellectual framework for students in any major. It represents the faculty’s collective belief in what constitutes and contributes to essential knowledge of the world. Together, students and faculty attempt to understand fully and use ethically that knowledge, both in the present and as a reservoir from which to draw in the future. These intellectual skills, knowledge, and ethical grounding will help prepare students to contribute to the creation of a more verdant, healthy, just, and prosperous world.

“He who learns but does not think is lost. He who thinks but does not learn is in great danger.” Confucius.

**Discovery Program Student Learning Outcomes**

After completing the Discovery Program at UNH, students should be able to:

1. Communicate effectively by applying skills in reading, writing, speaking, and listening.
2. Acquire and use information appropriately and effectively to research, organize, and present knowledge.
3. Apply mathematical concepts and/or statistical models to understand phenomena and/or solve problems in multiple contexts.
4. Formulate and evaluate open-ended questions that lead to empirical/researchable investigations of complex problems and issues.
5. Analyze and synthesize ideas and perspectives from diverse traditions from around the world.
6. Analyze and synthesize ideas and perspectives from more than one academic or intellectual discipline.
7. Clarify connections between their academic learning and their own ethical values.
8. Demonstrate the integration of learning they have achieved in their major field of study.
9. Exercise imagination in grappling with complex problems of both the natural and human created worlds, and understand the centrality of imagination to all human endeavors.
10. Make connections among the various branches of human knowledge and endeavor.

**Discovery Program Requirements**

**Discovery Foundation Skills**

Inquiry course. This course may fulfill a Discovery category and/or a departmental requirement. It should be taken during a student’s first or second year or prior to completion of 57 credits. For students who transfer in with 26 or more credits, the Inquiry requirement is waived automatically.

One course in writing skills. Most students will satisfy the first-year writing requirement with ENGL 401 First-Year Writing. This course should be taken during a student’s first year or prior to completion of 32 credits.

One course in quantitative reasoning. This course is normally completed by the end of the first year or 32 credits.

**Discovery in the Disciplines**

Students must take one course from each Discovery category at the 400-600 levels. Inquiry courses that carry Discovery category designations may be used to satisfy this requirement.

- One course in Biological Science (BS);¹
- One course in Physical Science (PS);¹
- One course in Environment, Technology, and Society (ETS);
- One course in Fine and Performing Arts (FPA);
- One course in Historical Perspectives (HP);
- One course in Humanities (HUMA);
- One course in Social Science (SS); and

¹ Inquiry courses that carry Discovery category designations can fulfill a Discovery category if appropriate.
Discovery and Integrative Understanding

One senior capstone experience, supervised and approved within the major.

The capstone experience is typically completed by senior students within the major and is designed to elicit opportunities for educational reflection and synthesis of knowledge and skills; however, students who have completed 90 credits at the end of their junior year may complete their capstone during the summer prior to their senior year. The capstone may be met with approved experience (as described below). It is not necessarily a course.

Suggested ways of meeting capstone may include: McNair research theses, Hamel Center Programs (IROP, SURF USA, SURF Abroad, URA, INCO 790 Advanced Research Experience), and senior honors theses. Examples of capstone experiences include courses, projects, independent research, internships, artistic expression, or community and service learning opportunities.

The senior capstone experience must meet one or more of the following criteria:

- The capstone synthesizes and applies disciplinary knowledge and skills. The capstone fosters reflection on undergraduate learning and experience. The capstone demonstrates emerging professional competencies. The capstone applies, analyzes, and/or interprets research data or artistic expression. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement will vary across departments and colleges and may be satisfied through a course, thesis, created work or product, mentored research project, or some form of experiential learning (e.g., fieldwork). The capstone should occur during the student’s senior year. Departments designate capstones as appropriate to their respective disciplines following the usual administrative procedures for their college or school. Departments are responsible for certifying that graduating seniors have met the capstone requirement for their majors.

Additional Information

Discovery Program requirements shall not be waived on the basis of special examinations or placement tests, except for the College Board Advanced Placement tests and the College Level Examination Program (CLEP) tests. All students transferring to UNH in academic year 2019-20 will come in under Discovery Program requirements. For students who transfer in with 26 or more credits, the Inquiry requirement is waived automatically.

Note to Faculty: Waiver of requirements in the Discovery Program. Students may petition the Discovery Committee to waive or replace a requirement. The student’s petition must be approved by the student’s major adviser and forwarded to the Dean of the student’s college.

The required courses cannot be taken on a pass/fail basis. No single course may be counted in more than one Discovery discipline category. Academic departments may or may not permit Discovery courses to count toward requirements for a major. TSAS courses may not be used for general-education (1984-2009), writing-intensive, or foreign language requirements. TSAS courses that are 400-600 level and Discovery-approved may count for Discovery requirements. All Discovery courses carry 3-4 credits.

The most current list of Discovery courses may be found on the Registrar’s Office (https://www.unh.edu/registrar/discovery-inquiry-writing-intensive-courses) website.

Discovery Foundations

Inquiry

All Inquiry courses must contain four individually necessary and collectively sufficient features:

- Inspire curiosity: an Inquiry student will compose open-ended questions that lead to further investigation into increasingly focused problems and issues.
- Develop understanding and perspective: an Inquiry student will explain a central issue or question of the course using at least two unique perspectives.
- Clarify standards of thinking: an Inquiry student will be able to identify, compare, and evaluate different interpretations (hypotheses, explanations) of a given phenomenon.
- Create effective communicators: an Inquiry student will present in clearly organized form the results of the investigation into questions or problems the student has posed.

A complete list of Inquiry courses can be found on the Registrar’s Office (https://www.unh.edu/registrar/discovery-inquiry-writing-intensive-courses) homepage.

Writing Skills

Please refer to the University Writing Requirement (https://catalog.unh.edu/undergraduate/university-academic-requirements/writing) section for complete information about this Discovery Foundation.

Quantitative Reasoning

Quantitative reasoning refers to the ability to think critically and analytically using abstract formal methods with broad application. Mathematics is the foundation for the physical sciences and, increasingly, for the biological sciences. Its principles and processes illuminate significant aspects of the social sciences as well. In its most precise forms, it enables the design of bridges and the orbiting of satellites. Mathematics discloses invisible truths about the world, makes sense of patterns of which we may or may not be aware, and introduces some order to chaos. In its purest form, it creates its own world of beauty and logic. In its more applied forms, it attempts to make sense of individual and collective human behaviors and complex systems. Many courses listed under this category will help students appreciate the principles of mathematics and gain some skill in its applications to realistic situations, while other courses will introduce kindred subjects including symbolic logic, information theory, statistics, and computer science.

Student Learning Outcomes - Quantitative Reasoning

- Demonstrate proficiency in carrying out college-level mathematical procedures.
- Use college-level mathematical thinking to analyze situations and data to solve

Discovery in the Disciplines

Biological Science

Biology is a branch of science that investigates the structure and function of living organisms. Scientists investigate ideas and observations that solidify our understanding of the diversity of life from
single cells to complex organisms. Biology has deep relations with agriculture, chemistry, psychology, and many other fields of study, and it is the foundation of our knowledge of health and disease. Courses under this category deal with the basic structure and function of organisms, the interaction of organisms with their environment, human health, biotechnology, and the concepts and mechanisms of evolution as a fundamental biological paradigm. All courses will provide some understanding of the methods of scientific inquiry and seek knowledge about the living world.

Student Learning Outcomes - Biological Science (BS)
- Learn about aspects of the living world as described in the course description.
- Demonstrate an understanding of fundamental concepts in biological science.
  - Additional Student Learning Outcomes for BS Discovery Lab (DLAB) courses
- Communicate scientific material effectively in written and oral formats.
- Summarize, analyze, and evaluate scientific data.
- Explain how scientific hypotheses are tested or rejected.
- Master appropriate laboratory and field techniques commonly used in biology.

Environment, Technology, and Society
The exponential growth of the sciences and engineering has bred an equally dramatic growth in technological advances. From the flint arrowhead to the latest communication device or weapon, human beings have been inventing things and transforming their lives, their societies, and their environments as they do. But they seldom foresee all the transformations and consequences their inventions bring about. This category stresses the interplay between at least two of these three realms: environment, technology, and society. Topics might include, but are not limited to, the history of a particular kind of technology (such as transport, fuel, writing, or weaponry), how technological change comes about in general, the scientific and/or social bases for a given technology, its impact for good or ill on human society and the natural environment, the effects of a changing environment on the arts and literature, and/or the ethical questions these topics raise.

Student Learning Outcomes - Environment, Technology, and Society (ETS)
One or more of the following:
- Explore the social consequences of technological and/or environmental change.
- Master a technology described in the course description and evaluate its human impact.
- Consider the impact of various technologies on the environment.
- Understand the way the environmental challenges shape the development of technology.

Fine and Performing Arts
The arts communicate through the intellect, the emotions, and the body, sometimes all at once, in ways simple and subtle, direct and subliminal, gentle and soul shaking. Understanding and appreciating the arts enriches our lives and preserves our cultural heritage for the future. Through its performances, publications, and exhibits, UNH offers many artistic experiences for students and the larger community, some of which are linked to courses under this category. Such courses, which may be about painting, sculpture, architecture, music, dance, theater, or film, will often include learning through practical experience.

Student Learning Outcomes - Fine and Performing Arts (FPA)
One or more of the following:
- Develop an understanding and appreciation of differing forms of art expression such as music, visual art, theatre, or architecture.
- Develop skills in creative writing.
- Produce art in the studio, workshop, or theatre.

Historical Perspectives
Even though we are faced daily with evidence of change in our social world and technology, we easily forget that how we live, where we live, and what we see around us are transient states of affairs. It is important to be able to look on one’s own world with an imaginative grasp of its history and the forces behind that history. Courses under this category will give students the opportunity to learn about major historical developments and how these developments have shaped contemporary life in all its complexity. Through the study of particular periods and places, students will gain both “historical perspective” and some skill at the methods of historical inquiry. Common to all courses in historical analysis is the presumption that the categories of social analysis are themselves historical and historically contingent, and that to understand the past requires entering imaginatively into languages, institutions, and worldviews quite different from those of the present day.

Student Learning Outcomes - Historical Perspectives (HP)
- Study the signature events that occurred within the time and geographical expanse specified in the course description.
- Explore the way primary sources reveal the ideas and values of people living in a different time and place.
- Appreciate human diversity through examination of class, race, and/or gender hierarchies of the past.
- Interpret the way past events and belief systems have contributed to and differed from the values and intuitions of the present.

Humanities
The humanities arose in Renaissance universities as an alternative to theology and consisted mainly of Greek and Latin literature, which dealt with any and every aspect of human life; they became central to the liberal arts. Since the nineteenth century, the humanities also have embraced modern literature, the creative arts, philosophy, and history. They focus on questions about meaning, ethics, aesthetics, and the foundations of knowledge; they are as concerned with form as with content. Courses under this category explore major works, ideas, and traditions that have shaped our understandings of the world and our sense of self at different times and places while examining the distinctive methods of humanistic inquiry.

Student Learning Outcomes - Humanities (HUMA)
- Engage with literary, philosophical, artistic and/or cinematic works that explore some aspect of the human condition.
- Pose questions about the nature of being, ethical imperatives, aesthetics, or epistemology.
- Write a critical essay investigating a focused question raised by a literary, philosophical, or artistic work.

Physical Science
The physical sciences seek to discover the components, structures, properties, and laws of the material world from subatomic particles to the entire universe. Through them, we appreciate both the wondrous complexity of the world and its order. The traditional domains of chemistry, physics, astronomy, cosmology, and Earth sciences are the foundations of knowledge in numberless arenas of human activity, while
the intersections between these domains and the biological sciences yield astonishing discoveries about living organisms. All courses will provide some understanding of the methods of scientific inquiry, seek knowledge about the physical universe, and evaluate claims in both technical literature and popular media.

**Student Learning Outcomes - Physical Science**
- Learn about aspects of the physical world specified in the course description.
- Demonstrate an understanding of fundamental concepts in the physical sciences.
- Use mathematical models and computational thinking to understand the physical world.
- Additional Student Learning Outcomes for PS DLAB courses
- Communicate scientific information effectively in written and oral formats.
- Summarize, analyze, and evaluate scientific data.
- Explain how hypotheses are tested or rejected.
- Master appropriate laboratory and field techniques commonly used in physical science.

**Social Science**
The social sciences investigate human beings and their societies from the smallest bands of hunter gatherers to huge nations and global institutions. Everything from marriage and kinship to law and crime, from ceremonial gift giving to mortgage derivatives, from witchcraft to health insurance, from ancient ritual to modern communication, is a subject of a social science. Courses under this category will explore different theories, methods, and data-gathering techniques as they apply to different social issues. They also will examine how individuals create, interact with, and are shaped by social groups and institutions, including those associated with politics, economics, religion, family, the arts, health, and education.

**Student Learning Outcomes - Social Science (SS)**
- Apply quantitative and/or qualitative data to investigate the dynamics of social interactions.
- Develop testable hypotheses regarding the social and cultural world they examine.

**World Cultures**
Living in a world of many cultures has created both cooperation and conflict across borders, between and within nations. This category, which includes intermediate language courses and approved study abroad programs, encourages students to become cosmopolitan citizens by gaining knowledge and understanding of cultures other than those of the United States. Students will learn to recognize others’ values and, ultimately, accept the many ways in which we all are human. They are thus encouraged to see their own culture with fresh eyes and know the sheer diversity of human outlooks.

**Student Learning Outcomes - World Cultures (WC)**
- Explore human diversity by studying societies and cultures outside the United States.
- Recognize the diversity and validity of unfamiliar cultural values.

**Discovery Lab (DLAB)**
A course that fulfills the laboratory requirement in the Discovery Program should provide students with hands-on experience that reinforces, supports, and/or augments the material presented in other formats throughout the course. It should teach them how the discipline uncovers and validates knowledge; how phenomena are understood through observation, experimentation, and quantitative analysis; how data are collected and interpreted; and how hypotheses are created, tested, modified, confirmed, or invalidated. These experiences also are likely to provide insights into how scientific theories and models are constructed. A significant portion of specified course time must be devoted to laboratory and laboratory-related activities. For example, a conventional model for a 4-credit laboratory course consists of three 50-minute (or two 75-minute) weekly lecture periods plus one 80-minute weekly laboratory period. However, courses may include different and/or innovative laboratory experiences provided the total amount of course and laboratory time is comparable.

**Student Learning Outcomes - Discovery Lab (DLAB)**
- Explain phenomena through observation, experimentation, and quantitative analysis.
- Collect and interpret data.
- Create, test, modify, confirm or invalidate hypotheses.
- Master appropriate laboratory and field techniques used in the biological and physical sciences.
- Communicate scientific material effectively in written and oral formats.

**Discovery Program courses**
The complete list of Discovery courses can be found on the Registrar’s Office [website](https://www.unh.edu/registrar/discovery-inquiry-writing-intensive-courses) website.

** Majors, Minors, and Options**
Majors and interdisciplinary minors are described at the college and department locations in this catalog.

**Student-Designed Majors**
Under special circumstances, students may design their own majors. This option is offered for highly motivated and self-disciplined students who seek a course of study that is not available through existing programs at the University. It allows students, with the close supervision of faculty members, to cross department and college lines and to create educational experiences on and off campus as part of individual programs of study.

Student-designed majors are administered by a committee of elected faculty that operates through the Office of the Provost and Vice President for Academic Affairs. Students who want to design their own majors are required to give the committee evidence of careful thought and planning in a proposal.

Fall submissions are due by October 15 of the student’s junior year. Proposals are only reviewed once a semester. Spring submissions are due by February 25. The committee will convene soon after the deadline to review the proposals. Under no circumstances will the committee consider a senior year proposal.

Proposal guidelines are available in the Office of the Provost and Vice President for Academic Affairs and on the Academic Affairs website, [www.unh.edu/academic-affairs/student-designed-major-sdm](http://www.unh.edu/academic-affairs/student-designed-major-sdm). Click on “Academic Enrichment.”
Second Majors

Bachelor's degree students may choose to fulfill the requirements of two dissimilar major programs, provided they obtain the approval of the second major department and the dean of the college in which the second major is offered, and comply as follows:

If the two majors are offered in different schools or colleges within the University, the admissions requirements of each must be satisfied.

If the two majors have two distinct degrees; e.g., B.A., B.S., or some other designated degree, students must choose which of the two degrees is to be awarded and fulfill all requirements for that degree.

No more than 8 credits used to satisfy requirements for one major may be used as requirements for the other major.

Minors

Bachelor's degree students may earn a minor in any undergraduate discipline designated by the University. A list of minors is available from the advising coordinator in each college or school (or see the program descriptions for each college or school in this catalog). Students must consult with their major adviser and also the minor supervisor. A minor typically consists of 20 credits with C- or better and a 2.0 grade-point average in courses that the minor department approves. Courses taken on a pass/fail basis may not be used for a minor. No more than 8 credits used to satisfy major requirements may be used for the minor. During the student's final term, an application should be made to the dean to have the minor shown on the academic record.

Options

Some degree programs offer a selection of options (e.g., art history and art studio through the Department of Art and Art History). These options allow students to specialize within a discipline. The choice of option is recorded on the student’s transcript.

University Writing Requirement

In 1995, the Academic Senate established the Writing Program as an expression of the following fundamental values and goals for writing at UNH: As the cornerstone of any higher education, academic and disciplinary literacy is the concern of the entire faculty and the whole University curriculum. Understanding that literacy is a long-term development process, the University community is committed to the following goals for student writing and learning:

- Students should use writing as an intellectual process to learn material and to discover, construct, and order meaning.
- Students should learn to write effectively in various academic and disciplinary genres for professional and lay audiences.
- Students should learn to display competence with the generic features and conventions of academic language.

In order to help realize the above goals, writing intensive (WI) courses were established as well as the University Writing Requirement (UWR).

Writing-Intensive (WI) Courses

WI courses are identified by "Writing Intensive Course" in the "Attributes" section of the course descriptions. See CEP 795W below for an example:

CEP 795W (01) - Investigations

Credits: 2.0 to 4.0
Term: Fall 2017 - Full Term (08/28/2017 - 12/08/2017)
Class Size: 5
CRN: 12453
Special assignments in readings, investigations, or field problems, or teaching experience. May be repeated. Prereq: permission. Writing intensive.
See instructor for permission then sign up in the dept office before registering through WEBCAT.
Attributes: Writing Intensive Course
Instructors: STAFF

Some courses have both writing-intensive and nonwriting-intensive versions, such as HIST 405 History of Early America and HIST 405W History of Early America. In these cases, only the sections with the "W" in the course number are writing intensive.

A periodically updated master list of WI courses (https://www.unh.edu/registrar/discovery-inquiry-writing-intensive-courses) is available. Course attributes can change, so students should make sure to consult the course description for real-time information on WI status when they enroll. Not all courses are offered every semester, so for advance course planning students should consult with their advisors or the owning department.

University Writing Requirement (UWR)

All bachelor's degree candidates are required to complete four writing-intensive courses, which must include ENGL 401 First-Year Writing and three additional writing-intensive courses, one of which must be in the student's major, and one of which must be at the 600 level or above.

Frequently Asked Question: "Can the same course satisfy the course-in-the-major requirement and the 600-level or above requirement?"

Answer: Yes, one course can satisfy both of these requirements (see pattern B below), but the course would only count as one of the three WI courses needed. In this case, the student would need to take two other WI courses (in addition to ENGL 401) to satisfy the requirement. Thus, a complete WI sequence would conform to one of the two generic patterns below:

A) Separate Courses for the 600+ Level and in the Major Requirements

1. ENGL 401
2. WI in the Major (any level)
3. WI @600+ level (any)
4. WI (any)

B) The Same Course for the 600+ Level and in the Major Requirements

1. ENGL 401
2. WI in the Major @600+ level
3. WI (any)
4. WI (any)

Note: the numbers in the above examples are for reference and don’t reflect a required sequence. A particular major may have more specific requirements that may depart from the above models.
The Rationale for Writing and Learning at UNH acknowledges that the WI course structure provides a minimum framework for writing in the curriculum and that there will be writing in non WI-designated courses. The Writing Committee's position is that WI Course Attributes are definitive and that only courses bearing the WI Attribute will count for the WI requirement. In short, students are expected to enroll in UNH WI-designated courses to satisfy the WI requirement.

https://www.unh.edu/writing/
COLLEGE OF LIBERAL ARTS

Michele Dillon, Dean
Brett M. Gibson, Associate Dean
Reginald A. Wilburn, Associate Dean
Brigitte Bailey, Senior Faculty Fellow

It is the purpose of the College of Liberal Arts, as a center of learning and scholarship, to help students achieve an understanding of the heritage of civilization and to educate them in the tradition of the past and realities of the present so they may recognize and act upon their obligations to the future.

The college seeks to meet the educational needs of each student through the development of interests and skills, which, combined with the individual's potential, make possible a richer, more useful life.

Degrees

Bachelor of Arts

These programs primarily provide a broad liberal education along with depth in a major. Requirements for the bachelor of arts degree and information regarding the majors that lead to a bachelor of arts are presented under Degrees (p. 25) and Programs of Study (p. 36).

Bachelor of Fine Arts

This curriculum provides training for students who plan to enter a professional graduate school. Requirements for the bachelor of fine arts degree are outlined under Programs of Study/Art and Art History (p. 42).

Bachelor of Music

This curriculum provides professional training in performance, composition, music education, and music pre-teaching and allows students to develop their talent to a standard equivalent to the one achieved at conservatories of music. Requirements for the bachelor of music degree and information regarding the curriculum are presented in Programs of Study/Music (p. 101). Degrees include Music Education, Pre-Teaching, Performance and Composition.

Bachelor of Science

This curriculum provides strong preparation for entry into graduate programs in neuroscience, behavior, pharmacology and medicine. Requirements for the bachelor of science degree and information regarding this major are presented under Degrees (p. 25) and Programs of Study/Neuroscience and Behavior (p. 111).

Combined Programs of Study

In addition to pursuing a single major, students may combine programs of study as follows (See University Academic Requirements (p. 23) for details):

Minors: Students may pursue one or more minors, each typically comprised of 5 courses. Minors are available in nearly every discipline within the College of Liberal Arts.

Cognates: Students may pursue one or more cognates, each typically comprised of 3 courses and intended to develop career-oriented skills. Cognates in the College of Liberal Arts are:

- Digital Writing and Literature (p. 49)
- Intercultural Communication for the Professional World (p. 50)
- Philosophy of Business, Innovation and Technology (p. 117)
- Skills and Perspectives for the Digital World (p. 50)
- Technical Writing and Public Speaking (p. 51)

Second majors: Students may choose to fulfill the requirements of two dissimilar major programs.

Dual majors: Students may choose to fulfill the requirements of a dual major, typically comprised of 8 courses. Dual majors are designated programs that must be paired with another major of any discipline. Dual majors in the College of Liberal Arts are:

- Educational Studies
- Humanities
- International Affairs
- Justice Studies

See Special University Programs (p. 363) for information about the Sustainability dual major.

Student-designed majors: Under special circumstances, students may design their own majors.

Dual-degree programs: Students may choose to fulfill the requirements of two separate degrees, such as a B.A. and a B.S.

Interdisciplinary opportunities: See the Interdisciplinary Studies (http://cola.unh.edu/interdisciplinary-studies) web page for the complete list of interdisciplinary programs within the College of Liberal Arts.

Proficiency in a Foreign Language

Please see the explanation of this University requirement under Degrees (p. 25): Bachelor of Arts.

Within the College of Liberal Arts, only those students majoring in linguistics, psychology, theatre and dance, or women's studies may use American Sign Language (ASL) to fulfill their foreign language proficiency requirement. English teaching majors who plan to pursue deaf studies may petition the English department to use ASL to fulfill their foreign language proficiency requirement.

Center for Study Abroad

cola.unh.edu/center-study-abroad (http://cola.unh.edu/center-study-abroad)

The College of Liberal Arts offers a number of managed study abroad programs that are administered by college faculty and the College of Liberal Arts Center for Study Abroad. These programs provide opportunities for liberal arts students as well as students in other colleges to experience and learn about different cultures and, in non-English-speaking countries, to increase proficiency in a foreign language.

Because the college administers these programs, registration, finances, and other logistics are streamlined and simple. Students pay UNH tuition and a single program fee, which covers housing, excursions, and, in some cases, board. Most UNH student fees are waived with the exception of the technology fee, a study abroad administration fee, and an international travel insurance fee. Students students are eligible for federal financial aid for the semester-long programs.
Please see the list of eligibility requirements under Study Abroad Programs (p. 355).

To learn more about any of the following programs, contact cola.studyabroad@unh.edu or go online to cola.unh.edu/center-study-abroad (http://cola.unh.edu/center-study-abroad).

**Semester Programs**

**Chengdu, China:** Spring semester study of Chinese language and culture at Chengdu University. **Faculty Director:** Yige Wang, yige.wang@unh.edu, (603) 862-3356, 104 Huddleston Hall.

**London, England:** Spring courses in British studies, the arts, humanities, social sciences, business and a wide range of other subjects at Regent's University, London. **Faculty Director:** Sue Hertz, susan.hertz@unh.edu, 110 Murkland Hall.

**Dijon, France:** Academic year, spring, or summer study of French language and other liberal arts courses (in French) at the Université de Bourgogne, Dijon. **Faculty Director:** Nadine Bérenguier, nadine.berenguier(nadine.berenguier@unh.edu)@unh.edu (claire.malarte-feldman@unh.edu), (603) 862-1690, 210 Murkland Hall.

**Legon, Ghana:** Spring-term program in a wide range of courses at the University of Ghana, one of West Africa's most prestigious universities.

**Budapest, Hungary:** Spring-term program focusing on the Humanities and Justice Studies, and modern Hungarian and Central European history and culture at Corvinus University. **Faculty Directors:** Stephen Trzaskoma, s.trzaskoma@unh.edu, (603) 862-3648, 306 Murkland Hall. Susan Siggelakis, susan.siggelakis(susan.siggelakis@unh.edu)@unh.edu (charles.putnam@unh.edu), (603) 862-1780, 318 Horton.

**Granada, Spain:** Spring semester Spanish language immersion program with courses focusing on Spanish language and other disciplines at the Centro de Lenguas Modernas of the University of Granada. **Faculty Director:** Lina Lee, llee@unh.edu, (603) 862-3123, 210H Murkland Hall.

**Summer Programs**

**Athens, Greece:** Five-week program focusing on classics, Greek history, and culture. **Faculty Director:** Stephen Trzaskoma, s.trzaskoma@unh.edu, (603) 862-3648, 306 Murkland Hall.

**Belize:** Four-week summer Archaeological Field School in Belize. **Faculty Director:** Eleanor Harrison-Buck, belize.fieldschool@unh.edu, (603) 862-4742, 311 Huddleston Hall.

**Chengdu, China:** Three-week summer program in Chinese language study at both the beginner and advanced levels at Chengdu University. **Faculty Director:** Yige Wang, yige.wang@unh.edu, (603) 862-3356, 104 Huddleston Hall.

**Costa Rica:** Six-week summer program in Spanish language and culture at the Institute of San Joaquin de Flores. **Faculty Director:** Lina Lee, llee@unh.edu, (603) 862-3123, 210H Murkland Hall.

**Cambridge, England:** Six-week summer program offering courses in history, literature and humanities at Gonville and Caius College, Cambridge University. **Faculty Director:** Monica Chiu, monica.chiu@unh.edu (dennis.britton@unh.edu), (603) 862-1313, 122 Hamilton Smith Hall.

**Berlin, Germany:** Five-week summer immersion program in German language and culture at the BSI Private Language School in central Berlin. **Faculty Director:** Charles Vannette, charles.vanette@unh.edu (mary.rhiel@unh.edu), (603) 862-1690 G10A, Murkland Hall.

**Russia:** Four-week or eight-week summer program in Russian language, culture, mythology and propaganda in Moscow, St. Petersburg, and on the Trans-Siberian Railway. **Faculty Director:** Arna Bronstein, arna.bronstein@unh.edu, (603) 862-3445, 304 Murkland Hall.

**January Term and Short-Term Programs**

**Belize:** Three-week January term course in archaeological survey and mapping in Belize. **Faculty Director:** Eleanor Harrison-Buck, belize.fieldschool@unh.edu, (603) 862-4742, 311 Huddleston Hall.

**Cuba:** January term course featuring 10 days of travel in Cuba with a focus on Cuban culture and the arts. **Faculty Director:** Lina Lee, lina.lee@unh.edu (lina.lee@unh.edu), (603) 862-3123, 210E Murkland Hall.

**London, England:** January term course, the London Experience, a ten-day experience of the theatre of London with insights into its politics, society and culture as reflected in the arts. **Faculty Director:** David Kaye, london.experience@unh.edu, (603) 862-0667, M313 Paul Creative Arts Center.

**London, England:** Three-week January term course on travel writing with two weeks in London. **Faculty Director:** Susan Hertz, susan.hertz@unh.edu, 210 Murkland Hall.

**Rome, Italy:** January term course on ancient Roman architecture and society at the Intercollegiate Center for Classical Studies in Rome. **Faculty Director:** R. Scott Smith, scott.smith@unh.edu, (603) 862-2388, 301 Murkland Hall.

**Career and Professional Success**

cola.unh.edu/careers (https://cola.unh.edu/careers)

The College of Liberal Arts is committed to helping students achieve success in their career and professional endeavors. From one-on-one career counseling appointments to internship placements and employer visits to campus, the Career and Professional Success office supports students with the tools and resources to secure meaningful, impactful, and rewarding careers.

The Career and Professional Success office is located at 102 McConnell Hall. The director is Raul Bernal, raul.bernal@unh.edu, (603) 862-1280.

**Research Centers and Institutes**

**Center for the Humanities**

cola.unh.edu/center-humanities (http://cola.unh.edu/center-humanities)

The Center for the Humanities fosters excellence in the humanities, broadly conceived, at the University of New Hampshire. Center resources and programs support faculty research, encourage reflection and inquiry across the University community and beyond, create interdisciplinary initiatives in many forms, and undertake special projects to raise the visibility of the humanities. To accomplish this, the center endeavors to support the highest quality work by UNH humanities faculty, to build productive collaboration among faculty, to create singular projects that advance its goals, and to be a center of innovation, planning and inspiration for the humanities at the University of New Hampshire. By pursuing its goals, the center supports the University’s research mission in particular, as well as its academic plan.
The center is the sponsor of the Saul O Sidore Memorial Lectures and the James H. and Claire Short Hayes Chair in the Humanities.

**Crimes Against Children Research Center**
[www.unh.edu/ccrc](http://www.unh.edu/ccrc)

The Crimes Against Children Research Center (CCRC) is concerned with all forms of crimes against children and adolescents, from birth through age 17, both within and outside the family, both known and unknown to law enforcement. These include criminal acts as defined by law, such as sexual assault, abduction, theft, robbery and aggravated assault against children. But it also includes child abuse in all its forms—physical, sexual, emotional—and child neglect, as well as child-to-child violence, such as peer and sibling assaults and bullying. It also includes indirect victimization, where children witness or are affected by the crime victimization of a family member or friend.

The CCRC, created in 1998, grew out of and expands upon the work of the UNH Family Research Laboratory, which has been devoted to the study of family violence and related topics since 1975. Associated with the center is an internationally recognized group of experts who have published numerous books and articles concerning the incidence and impact of violence against children.

CCRC staff has contributed to many pioneering national crime studies, including National Incidence Study of Missing, Abducted, Runaway and Thrownaway Children; National Family Violence Survey; National Youth Victimization Prevention Survey; National Survey of Sexual Abuse in Day Care; Developmental Victimization Survey; Youth Internet Safety Surveys; and Multisite Evaluation of Children’s Advocacy Centers.

The CCRC is directed by David Finkelhor, who is also the director of the Family Research Laboratory and professor of sociology at the University of New Hampshire. Finkelhor has been researching criminal violence against children since 1978 and is the author and editor of 12 books and more than 100 articles on the subject.

**Family Research Laboratory**
[cola.unh.edu/family-research-laboratory](http://cola.unh.edu/family-research-laboratory)

Since 1975, the Family Research Laboratory (FRL) has devoted itself primarily to understanding family violence and the impact of violence in families. As public and professional interest in family violence has grown, so has the need for more reliable knowledge. The FRL seeks to fill that need through comprehensive literature reviews, new theories and methodologically sound studies. Researchers at the FRL pioneered many of the techniques that have enabled social scientists to estimate directly the scope of family violence. These efforts have brought international recognition to the FRL.

The FRL is unusual among research centers in the field because it addresses all aspects of the family, violence and abuse. Topics undertaken by the FRL include physical abuse of children, corporal punishment of children, sexual abuse of children, physical abuse of spouses, dating violence, abuse of the elderly, intra-family homicide, rape and marital rape, violence between siblings, peer victimization of children, pornography, and missing and abducted children. This variety of topics is a result of beliefs that have guided FRL research: that various forms of family problems are interrelated, that conflict is as basic to family life as are love and cooperation, and that much of the conflict and violence in the world outside the family can be traced to roots within the family. This holistic view of family violence has contributed both diversity and richness to the FRL’s work.

The FRL’s prominence in the field is in part a result of the large number, variety and scope of its publications. In a span of 10 years, FRL staff members have published more than 45 books and more than 740 articles on family violence.

The FRL is housed in a suite of offices in McConnell Hall The FRL is directed by David Finkelhor, professor of sociology and director of the Crimes Against Children Research Center.

**The Survey Center**
[cola.unh.edu/survey-center](http://cola.unh.edu/survey-center)

The UNH Survey Center is a full-scale, non-partisan academic survey research center, committed to providing university researchers, government and business leaders, and private organizations with reliable information about public attitudes concerning important policy matters. It is nationally known for its public opinion and political polling for CNN, Fox News and WMUR-TV.

The UNH Survey Center has conducted survey research projects at the University of New Hampshire since 1986: state, regional and national general population surveys based on probability sampling; surveys that target specific populations; surveys that utilize complex stratified sampling techniques; and panel studies. The Survey Center conducts telephone, mail and web surveys, as well as focus groups and other qualitative research projects.

The UNH Survey Center is located at 9 Madbury Road, Suite 401 and features a 41-station Computer-Assisted Telephone Interviewing (CATI) system. The Survey Center is directed by Andrew E. Smith, who is also associate professor of practice in political science. Students interested in employment as interviewers can contact Martha Belanger at martha.belanger@unh.edu.

**Related Research Centers**

**Carsey School of Public Policy**
[carsey.unh.edu](http://carsey.unh.edu)

The Carsey School of Public Policy at the University of New Hampshire is a nationally acclaimed resource for research, leadership development and engaged scholarship relevant to public policy. The school’s activities address the most pressing challenges of the twenty-first century, striving for innovative, responsive and equitable solutions at all levels of government and in the for-profit and nonprofit sectors. Faculty and students throughout the College of Liberal Arts serve as staff, fellows, researchers and assistants in the school.

**Prevention Innovations Research Center**

Prevention Innovations Research Center: Ending Sexual and Relationship Violence and Stalking is a research center at the University of New Hampshire made up of researchers and practitioners who work collaboratively to develop and evaluate prevention strategies, evidence-based measures to document the problems of sexual and relationship violence and stalking, and comprehensive community tools to effectively address the causes of violence. The Prevention Innovations Research Center aims to assist high schools, postsecondary institutions, the U.S. Military, and federal, state, and local researchers and practitioners to develop, evaluate and implement model policies, procedures and programs to end sexual and relationship violence and stalking. The
The Prevention Innovations Research Center provides campuses, communities and the U.S. Military with training and technical assistance (TA) to prevent and effectively respond to sexual and relationship violence and stalking. We provide TA through regional trainings, one-on-one consultations and serving as subject matter experts. Our TA work is funded through federal grants, individual consultations and support from the Campus Sexual and Relationship Violence Prevention Consortium. This annual membership program provides support, technical assistance and training for a cohort of institutions of higher education from across the United States, building both capacity and knowledge across the cohort to improve the efforts of their individual campuses in prevention and response of sexual and relationship violence and stalking.

The Susan Schechter Domestic and Sexual Violence Social Justice Laboratory (Schechter Lab) is an interdisciplinary research laboratory within the Prevention Innovations Research Center. Undergraduate and graduate students associated with the Schechter Lab earn academic credit for their role as research assistants and work with members of Prevention Innovations Research Center on their research, report writing and publications. The Sharon B. Murphy Scholarship supports undergraduate and graduate student scholarship in the fields of domestic and sexual violence and stalking for work within the Schechter Lab.

The Prevention Innovations Research Center members are UNH faculty members and practitioners from diverse disciplines and colleges across the UNH landscape, including the College of Liberal Arts, the College of Health and Human Services, and the Law School, who work with graduate and undergraduate students from across the University’s colleges and law school. Practitioners are from local and state organizations. The goals of the Prevention Innovations Research Center are to:

1. generate evidence-based knowledge aimed at preventing sexual abuse, relationship violence and stalking;
2. promote creative and collaborative partnerships between practitioners and researchers; and
3. transform community norms and climates through the dissemination of commercialized products that result from the center’s research.

**Academic and Cultural Centers and Institutes**

**Confucius Institute at UNH**
[cola.unh.edu/confucius-institute](http://cola.unh.edu/confucius-institute)

The Confucius Institute at UNH (CI-UNH) is a partnership between the University of New Hampshire and Chengdu University in China that engages the life of the University with the larger community, both locally and globally. The institute offers a full curriculum in Chinese language and culture as well as three study abroad programs in China. It also provides opportunities for cultural learning and exchange for regional schools—primary through post-secondary. At a time when China is the third largest trading partner for New Hampshire, CI-UNH can provide unique opportunities for business and industry in the state. CI-UNH is co-directed by Yige Wang of the UNH Department of Languages, Literatures, and Cultures; and Yaling Liu, associate professor of anthropology at Chengdu University.

**ESL Institute**
[cola.unh.edu/esl-institute](http://cola.unh.edu/esl-institute)

The ESL Institute at the University of New Hampshire has been involved in teaching international students English since 1976. The Institute provides high-quality instruction in English as a second language (ESL) and orientation in U.S. culture to international students who are non-native speakers of English. ESL courses are offered at the elementary level, the intermediate level and the advanced level. Students at these levels receive intensive English instruction for four and a half hours per day, four days per week, in the areas of reading, writing, listening and speaking, as well as pronunciation and contextualized grammar instruction. For students who have a TOEFL score of 60 or above (Internet-based) or 500 or above (institutional paper-based or ITP, administered by the ESL Institute), the ESL Institute provides "bridge" courses where students can simultaneously enroll in one to two UNH academic classes while continuing to study English intensively from four to ten hours per week. At these "bridge" levels, students have the opportunity to "try out" academic courses in a supportive environment. In addition to its focus on ESL instruction for international students, the Institute aspires to serve as a resource for international education to the faculty, staff and students of UNH. For more information: [cola.unh.edu/esl-institute](http://cola.unh.edu/esl-institute).

**Museum of Art**
[cola.unh.edu/museum-art](https://cola.unh.edu/museum-art)

The Museum of Art serves as the New Hampshire Seacoast's premier public art museum and, for more than 50 years, has remained a vital resource for the visual arts, serving the University, local, and regional communities. Visitors and members gather to enjoy a wide variety of changing exhibitions, as well as annual exhibitions featuring UNH studio faculty and student work. Exhibitions of outdoor sculpture by regional artists are shown regularly in the Mills Courtyard. Accompanying programs include gallery talks, lectures, concerts, family programs and special events. The museum's summer Art Camp provides K-12 students with quality hands-on visual arts and instruction.

The museum's diverse permanent collection includes more than 1,800 works of art, from prehistoric to contemporary. The works are exhibited in the galleries and the Collection Study Area on a regular basis and are also used by faculty, students and scholars for teaching, research and interdisciplinary study.

Located in the Paul Creative Arts Center, the museum is open to students, faculty, museum members and the general public free of charge. For more information, call (603) 862-3712 or visit [cola.unh.edu/museum-art](https://cola.unh.edu/museum-art).

Africana and African American Studies Minor
https://cola.unh.edu/interdisciplinary-studies/program/minor/africana-african-american-studies

Description

The Africana and African American studies minor provides students with an interdisciplinary approach to central issues in African, African Diaspora, Caribbean and African American history, literature and culture. The minor permits students to concentrate in one of these areas or to combine courses from among the many offerings to create a distinctive program.

The Africana and African American studies minor encompasses the multidisciplinary and comparative study of African history and culture, and the study of the African Diaspora throughout the world, from Europe to Asia as well as to North and South America. The program recognizes the global and transnational dimensions of contemporary African Diasporic experiences in the United States, the Caribbean and Latin American nations. It thus offers a wide variety of courses that are taught across several disciplines in the University. Students are strongly encouraged to select courses reflecting the breadth of offerings in the minor across the University of New Hampshire’s undergraduate curriculum.

The program presents strong offerings in Africana studies because an understanding of Africa is central to the study of the African Diaspora. The program also features many courses in African American Studies because many aspects of African American history and culture have been central to the development of the United States, highlighting both the nation’s problems and its promise, and affecting virtually all areas of academic study through the years, from the humanities and social sciences to the physical sciences. Students are encouraged to take courses from a variety of departments and disciplines. The minor is therefore designed to serve the needs of all students, regardless of their ethnic or cultural background, complementing their work in their major fields of study while serving also as a focused corrective to traditionally marginalized approaches to Africana, African Diasporic, Caribbean and African American experiences.

Africana and African American studies consists of five 4-credit courses, including one course from a list of introductory courses related to the student’s choice of concentration and four other approved offerings. Students must take at least one course at the 600 or 700 level. The required introductory course provides students with a general
understanding of the broad and diverse spectrum of Africana and African American subjects. Electives enable students to develop their understanding in more focused courses (listed below) in various fields of study. There is an opportunity to earn credits toward the minor through a study abroad experience in Ghana in West Africa. There is also an independent study option under the AFAM 795 Independent Study designation, which allows a student to work closely with a faculty member on a research project and/or internship relevant to any aspect of Africana and African American Studies. Students must earn a C- or better in each course, and maintain a 2.0 grade-point average in courses taken for the minor. Electives may include special topics courses as approved by the program, a senior seminar, internship or study abroad credits.

Students interested in minoring in Africana and African American studies should contact:

1. Electives are approved for the minor and announced each semester on the Africana and African American studies website. Courses that are partly devoted to the concerns of Africana and African American studies may count for the minor, if the instructor will allow the student to focus a significant amount of coursework on this field of study. Approval by both the minor coordinator and the course instructor is required for such courses.

**American Studies (AMST)**

**Programs**

- American Studies Minor (p. 37)

**American Studies Minor**

https://cola.unh.edu/interdisciplinary-studies/program/minor/american-studies

**Description**

American studies is the interdisciplinary examination of American life and culture at regional, national, and international scales. It integrates perspectives from a wide variety of disciplines, including history, English, communications, political science, geography, sociology and the arts.

At UNH, the American studies minor is an individualized program of study that allows each student to choose from a broad range of courses offered by several different departments that best match their interests and needs. It is intended to encourage students with particular interests in the United States to develop those interests and learn more about the country from a variety of perspectives.

**Requirements**

To earn a minor in American studies, students must complete five courses approved to satisfy minor requirements. At least one of those courses must concentrate on issues of race, gender, or ethnicity. No
more than three courses may be at the 400 or 500 level, and no more than two courses may be taken in the same department. Students must earn a C-minus or better for a course to count toward minor requirements and must maintain a 2.0 grade point average in all courses taken for the minor.

Courses
A list of courses that can be used to satisfy minor requirements is posted on the program website in advance of the course registration period for each semester. The list of courses is different every semester and includes courses offered by multiple departments. Below is a partial list of approved courses taught in recent semesters (see the program website for complete lists):

Anthropology (ANTH)
Anthropology is a field of visionaries, makers and collaborators, taking a critical, creative and holistic approach to the study of humankind. We teach hands-on courses in archaeology and socio-cultural, applied, biological and forensic anthropology, reflecting our faculty members’ research in the Americas, Europe, Africa, and Central and Southeast Asia. Through coursework, fieldwork and study-abroad experiences, you’ll gain life-long learning skills that prepare you for success in cross-cultural understanding and communication, working for diverse organizations and tackling complex social issues in today’s global world. Our students are employed in a range of areas such as public health, business, international development, museums and education.

Anthropology Major (B.A.)

https://cola.unh.edu/anthropology/program/ba/anthropology-major

Description

Anthropology asks the question: What does it mean to be human? We answer this fundamental query with a global perspective on the human condition as students explore both the similarity and diversity of human experience. Through courses that cover a wide range of societies throughout the world, we investigate the human condition, past and present. Introductory courses provide an overview of the fields of anthropology: social and cultural anthropology, archeology, physical anthropology and linguistics. More advanced courses provide the opportunity for students to pursue intensive study of particular topics in cross-cultural perspective. The department emphasizes critical thinking and writing skills and encourages close faculty/student contact in seminar courses and at the upper level. Students, in consultation with their academic adviser, have the opportunity to take courses in other departments that complement specific foci in anthropology.

At this time of increasing globalization, anthropology provides students with a broad overview of diverse peoples and cultures. Majors are therefore well prepared to live in a rapidly changing world. The major both prepares students for graduate-level studies and serves as a foundation for a wide range of careers. With backgrounds in anthropology, our students become teachers, social workers, public policy experts, forensic investigators, health practitioners, primatologists, international business
majors must complete a minimum of 40 credits in anthropology with grades of C or better and in accordance with the following requirements:

**Code** | **Title** | **Credits**
---|---|---
ANTH 411 | Global Perspectives on the Human Condition: An Introduction to Anthropology | 4
or ANTH 412 | Broken Pots and Buried Cities: Adventures in Archaeology | 4
or ANTH 415 | The Human Story: Evolution, Fossils and DNA | 4
ANTH 500 | Peoples and Cultures of the World | 4
or ANTH 501 | World Archaeological Cultures | 4
ANTH 511 | Core Concepts in Anthropology | 4
ANTH 513 | Ethnographic Methods | 4
or ANTH 514 | Method and Theory in Archaeology | 4
ANTH 611 | History of Anthropological Theory | 4
One additional course numbered 500 or above | 4
Three additional courses numbered 600 or above | 12
Complete capstone requirement | 4

Total Credits | 40

(Note: While 8 credits, ANTH 699 Senior Thesis; ANTH 699H Honors Senior Thesis; and ANTH 675 Archaeological Field School in Belize, count only as one ANTH 600-level course requirement.)

The Discovery Program capstone requirement may be fulfilled by completing one 700-level course (seminar format). Seminar courses include:

**Code** | **Title** | **Credits**
---|---|---
ANTH 705 | Topics in Mesoamerican Anthropology | 4
ANTH #730 | Anthropological Thinking on Education | 4
ANTH #740 | Teaching Race | 4
ANTH 750 | Islam and Gender: Gendered Lives of Muslims | 4
ANTH 785 | The Anthropology of Dreams and Dreaming | 4
ANTH 797 | Advanced Topics | 4

Other courses, internships, or experiences may be substituted with the permission of the student's adviser and anthropology department chair.

The required minimum overall GPA in major coursework is 2.0.

Anthropology majors may use one major-required course to satisfy one Discovery category requirement. Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement. American Sign Language may not be applied toward the foreign language requirement.

Honors-in-major and senior thesis options are available.

Students who declare a major in anthropology are expected to make steady progress toward fulfillment of major requirements. Normally, this means taking at least one anthropology course per semester until all of the requirements have been met. A student who has fulfilled most of the major requirements may request an exception to this policy from his or her adviser.

Students wishing to major in anthropology should consult with the anthropology chairperson.

### Anthropology Minor

https://cola.unh.edu/anthropology/program/minor/anthropology

**Description**

Anthropology asks the question: What does it mean to be human? Anthropologists, as scholars, collaborators, public figures and activists, take a critical, creative and holistic approach to the study of humankind. In our relatively small program in the College of Liberal Arts, students have the opportunity to take hands-on courses in archaeology and sociocultural, applied, medical, biological and forensic anthropology, reflecting our faculty members’ academic and applied research in the Americas, Europe, Africa, and Central and Southeast Asia.

Through coursework, fieldwork and study-abroad experiences, students gain life-long learning skills that prepare them for success in cross-cultural understanding and communication, as well as the ability to think comparatively about diversity and inequality on a local and global level.

A Minor in Anthropology provides many opportunities for cross-disciplinary collaboration, as students are encouraged to apply anthropological methods, perspectives and theories to the world around them, and to their other areas of study. Upon graduation, our majors and minors work for a diverse set of organizations, and are employed in a range of areas such as public health, business, law, international development, non-profit organizations, museums and education.

You do not need to declare a minor; however, it might be wise to meet with a faculty member from the Anthropology Department to discuss your minor plan.

At the beginning of your final semester of study, you should complete a certification of completion of minor form (http://www.unh.edu/registrar/forms/minorform.pdf), obtain the necessary signatures, and submit it to your Dean's Office.

**Requirements**

A minor consists of five 4-credit courses (20 credits) in Anthropology, with a C or better in each course.

**Code** | **Title** | **Credits**
---|---|---
Select one ANTH course numbered 600 or above | 4
Select four elective ANTH courses | 16

Total Credits | 20

To declare a major in anthropology, students must have completed at least one introductory level anthropology course at the 400 or 500 level with a grade of C or better.

anthropology chairperson.

Students wishing to major in anthropology should consult with the anthropology chairperson.

Art and Art History (ARTS)

The courses offered by the Department of Art and Art History provide an opportunity, within the liberal arts framework, for students to acquire a thorough knowledge of the basic means of visual expression, to study intensively the history of art, or to prepare themselves for a career in art teaching. In addition, these courses offer foundation experience for students who are interested in art but are majoring in other departments in the University. The Department of Art and Art History offers programs leading to a bachelor of arts degree in the arts with options in studio art, studio art/art education or art history and a bachelor of fine arts degree in studio art. Certification for art teaching in the public schools is offered in cooperation with the Department of Education (see Education, under Programs of Study).

The University reserves the right to retain selections from a student’s work for a period of not more than two years.

Double Option in The Arts

Students may earn a B.A. degree in the arts with both a studio art option and an art history option provided the requirements for each option are met. No more than 8 credits used for one option may be used for the second option. These 8 credits will be in Introductory Drawing and Introduction to Art History.

Minors in the Department of Art and Art History

Students must receive a minimum grade of C- in all required courses. For art majors, only two courses from the art and art history major requirements can be applied toward the minor.

A maximum of two courses (8 credits) may be transferred from another accredited institution, provided UNH has accepted them as transfer credits. Transfer courses must be a minimum of three credits. Students with transfer courses that are accepted with less than four semester credits must still meet the credit requirement for completion of the minor.

Arts Major: Art History Option (B.A.)

https://cola.unh.edu/art-art-history/program/ba/arts-major-art-history-option

Description

The art history curriculum provides a comprehensive, in-depth study of Western art from the ancient world to the present as well as some exposure to non-Western cultures and artistic traditions. All courses in the program teach basic skills of interpretation and critical analysis within the framework of broad cultural perspectives that connect the visual arts to larger historical developments. They also teach good writing and research skills. In addition, art history majors typically branch out into other fields, such as history, literature and foreign languages. By the time they graduate, most majors are well equipped to pursue such traditional careers in the field as museum and gallery work, teaching, publishing or librarianship. But because art historical education is so broad, it also prepares students for a variety of other, more flexible options, such as law, business or architecture.

Requirements

Students must complete a minimum of 10 courses (40 credits). The following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 480</td>
<td>Introduction to Art History</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 532</td>
<td>Introductory Drawing</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 795</td>
<td>Understanding Art History. An In-depth Overview</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 799</td>
<td>Seminar in Art History</td>
<td>4</td>
</tr>
</tbody>
</table>

Select six 600- or 700-level art history courses: 24

Select one each from Pre-Renaissance, Renaissance/Baroque, and Modern areas

Select three in any area

Total Credits 40

These courses must be completed with a minimum grade of C-. Art history students receive preferential placement in ARTS 532 Introductory Drawing. Students contemplating graduate school should learn German, and, if possible, either French, Italian, or another language relevant to their areas of interest.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Art history majors may use two major-required courses to satisfy two Discovery category requirements.

Arts Major: Studio Art Option (B.A.)

https://cola.unh.edu/art-art-history/program/ba/arts-major-studio-art-option

**Description**

The B.A. in art - studio art option provides a strong fine arts education and solid foundation that prepares students for a life in the arts, whether it be as a professional or commercial artist, a teacher, an architect, a designer or a museum director. We offer courses in painting, drawing, photography (both digital and wet lab techniques), printmaking, sculpture (all media: steel, aluminum, bronze casting, clay, and wood), furniture design and fabrication, ceramics and design. A degree in studio art provides a foundation for diverse professional achievement.

**Requirements**

Students selecting to work toward a bachelor of arts degree in studio art must complete a minimum of 14 courses (56 credits), with a minimum grade of C in each course. The following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 480</td>
<td>Introduction to Art History</td>

<td><strong>56</strong></td>
</tr>
</tbody>
</table>

While these courses represent the minimum departmental requirements for the studio art option, students may wish to plan a program involving greater depth in one or several of the studio areas.

The Discovery Program capstone requirement may be fulfilled by completing a 600 level or above course in the studio concentration. The student will work with the course’s instructor to complete a mutually agreed upon capstone project associated with the course’s medium.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Studio art majors may use two major-required courses to satisfy two Discovery category requirements.

Arts Major: Studio Art/Art Education Option (B.A.)

https://cola.unh.edu/art-art-history/program/ba/arts-major-studio-art-art-education-option

**Description**

The program in art education is organized into a five-year, teacher-education sequence. This curriculum is designed to prepare teachers of art in the public schools. The satisfactory completion of the B.A. studio art curriculum for art education students and required education courses, in conjunction with the fifth-year internship, will satisfy the initial certification requirements for teachers of art in the public schools of New Hampshire and in most other states. These requirements may change by the time students apply for certification and the students are required to fulfill the then-current requirements. Art education students may take accredited crafts courses at other institutions as art electives.

A portfolio is required for acceptance to the studio art/art education option.

**Requirements**

Students selecting to work toward a bachelor of arts degree in studio art/art education must complete a minimum of 14 courses (56 credits), with a minimum grade of C in each course. The following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 480</td>
<td>Introduction to Art History</td>
<td>4</td>
</tr>
<tr>

<td>Art Education (Secondary)</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 12

The Discovery Program capstone requirement may be fulfilled by completing a 600-level or above course in the studio concentration. The student will work with the course's instructor to complete a mutually agreed upon capstone project associated with the course's medium.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Studio art/art education majors may use two major-required courses to satisfy two Discovery category requirements.

**Fine Arts Major (B.F.A.)**

https://cola.unh.edu/art-art-history/program/bfa/fine-arts

**Description**

Incoming first-year and transfer applicants wishing to enter the bachelor of fine arts (B.F.A.) degree program must first apply for, and be admitted to, the bachelor of arts (B.A.) in The Arts: Studio Art option. Students may submit a B.F.A. portfolio after they begin their studies at UNH, as early as the spring semester of their first year. A full faculty review is held each spring semester.

The B.F.A. curriculum provides advanced training for students who plan to enter professional graduate school or pursue careers as professional artists.

**Requirements**

Students selecting to work toward a B.F.A. degree must complete a minimum of 17 courses and 72 credits, with a minimum grade of C in each course. The following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 480</td>
<td>Introduction to Art History</td>
<td>4</td>
</tr>

<td>Intermediate Drawing</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 798</td>
<td>Seminar/Senior Thesis</td>
<td>8</td>
</tr>
<tr>
<td>ARTS 501</td>
<td>Introductory Ceramics</td>
<td>4</td>
</tr>
<tr>
<td>or ARTS 525</td>
<td>Introductory Woodworking</td>
<td>4</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 551</td>
<td>Introduction to Darkroom Photography</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 552</td>
<td>Introductory Digital Photography</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 536</td>
<td>Introduction Printmaking: Intaglio</td>
<td>4</td>
</tr>
<tr>
<td>ARTS #537</td>
<td>Introduction to Printmaking: Lithography</td>
<td>4</td>
</tr>
<tr>
<td>ARTS 596</td>
<td>Special Topics in Studio Art (Intro Graphic Design)</td>
<td>4</td>
</tr>
</tbody>
</table>

Select four courses in one of the major program areas of the department (two must be at the advanced 700-level or the third and fourth workshops of the same medium)

Select two additional art electives (studio or art history); 2D should take at least one 3D elective and 3D should take at least one 2D elective

Select two additional 600-level or above art history courses

Total Credits 72

The possible areas of concentration within the department are painting, sculpture, ceramics, drawing, printmaking, photography, and furniture design. Proposals for individualized programs are accepted only by permission of the departmental chairperson, the major adviser, and the departmental bachelor of fine arts committee. Candidates applying for the bachelor of fine arts program are required to submit a portfolio to the B.F.A. committee, which meets each spring semester.

The Discovery Program capstone requirement may be fulfilled by completing ARTS 798 Seminar/Senior Thesis.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program.

Fine arts majors may use two major-required courses to satisfy two Discovery category requirements.

**Architectural Studies Minor**

https://cola.unh.edu/art-art-history/program/minor/architectural-studies

**Description**

The minor in architectural studies provides students with an interdisciplinary introduction to the history, theory and methods of architecture and its symbolism. The program allows students who are interested in this field to receive programmatic recognition of their work. It is designed to assist those who are contemplating enrollment at a school of architecture; are particularly interested in architectural history; want to supplement their technical majors (e.g., civil engineering) with strong academic minors; or plan to pursue careers in preservation, education, community service and public relations.

For more information, contact the minor coordinators: Ivo van der Graaff, ivo.vandergraaff@unh.edu, art and art history, or Raymond Cook, ray.cook@unh.edu, civil engineering.
Requirements

Five courses (18-20 credits), which consist of the following:

Art History Minor

https://cola.unh.edu/art-art-history/program/minor/art-history

Description

The art history minor offers those majoring in other fields (including studio art) the chance to gain a serious knowledge of aspects of the history and meanings of Western art from antiquity to the modern world. Particularly for those working in history and the humanities, a minor in art history will provide new interdisciplinary perspectives on their major fields.

Requirements

The minor consists of five courses (20 credits).

<table>

Art Minor

https://cola.unh.edu/art-art-history/program/minor/art

Description

The art minor is an appropriate option for students who do not want to take the specific requirements for the art history or studio art minors, but who are still interested in taking art history and/or studio classes.

Requirements

The minor in art consists of five courses (20 credits) chosen from the offerings of the department. Courses can be all studio art, all art history, or a combination of both.

Design Studies Minor

https://cola.unh.edu/art-art-history/program/minor/design-studies

Description

Situated within the studio arts program, the interdisciplinary minor in design studies brings together the formal and conceptual principles of design in the visual expressions of the fine arts (painting, sculpture, photography, etc.), the commercial arts (graphic design, illustration, etc.), the industrial arts (engineering) and the performing arts (stage, costume and lighting design).

Course options in communication, marketing, English and art history offer the opportunity to contextualize the principles and products of design in a broader historical, sociological and cultural context.

Course requirements and options within the design studies minor enable students to develop a common skill set of literacy and fluency in a range of design software programs (Photoshop, InDesign, Light Box, Fuse, etc.), the utility of which has become increasingly more essential to a range of fields of study and vocations.

Requirements

Five courses (20 credits) are required.

### Asian Studies

#### Programs

- Asian Studies Minor (p. 44)

**https://cola.unh.edu/interdisciplinary-studies/program/minor/asian-studies**

#### Description

The aim of the interdisciplinary Asian studies minor program is to foster teaching and learning as well as research in all areas of Asia. The minor offers opportunities to develop proficiency in Asian languages and to study the histories, politics, literatures, cultures and religions of East Asia (China, Japan, Korea and others) and South Asia (India, Pakistan, Sri Lanka, Bhutan and others). Courses offered provide students the chance to explore a wide range of contemporary subjects such as foreign policy, language use, education, environment, the Asian-American experience, ethnic and religious conflict, literary and cultural production, and cross-border movements of industry and ideas.

For further information, please contact Lawrence C. Reardon, associate professor of political science, chris.reardon@unh.edu, (603) 862-1858.

#### Requirements

To complete the minor in Asian Studies, students are required to take five courses (20 credits) or their equivalent, and no more than three can be counted from any one of the following disciplines:

- Anthropology (ANTH)
- Asian American or South Asian Literature (ENGL)
- Geography (GEOG)
The following are a list of courses that count toward the minor. Please note additional courses may also count. Visit the program website for the most up-to-date information.

**Chinese (CHIN)**

**Programs**

- Chinese Minor (p. 45)

**Chinese Minor**

https://cola.unh.edu/languages-literatures-cultures/program/minor/chinese

**Description**

The Chinese minor provides students with linguistic skills and cross-cultural competence that will complement their studies in many other disciplines, such as business, international affairs, education, hotel management and social service. It prepares students for future academic and professional opportunities in which proficiency in Chinese is required or preferred. Students who have studied Chinese at UNH have gone on to use Chinese for a variety of career paths in both domestic and international settings.

**Requirements**

**20 credits** which consist of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 503</td>
<td>Intermediate Chinese I</td>
<td>4</td>
</tr>
<tr>
<td>CHIN 504</td>
<td>Intermediate Chinese II</td>
<td>4</td>
</tr>
<tr>
<td>CHIN 631</td>
<td>Advanced Chinese Conversation and Composition I</td>
<td>4</td>
</tr>
<tr>
<td>CHIN 632</td>
<td>Advanced Chinese Conversation and Composition II</td>
<td>4</td>
</tr>
<tr>
<td>CHIN 425</td>
<td>Introduction to Chinese Culture</td>
<td>4</td>
</tr>
</tbody>
</table>

Choose one of the following Chinese culture and literature courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIN 425</td>
<td>Introduction to Chinese Culture</td>
<td>4</td>
</tr>
<tr>
<td>CHIN 521</td>
<td>What does it Mean to be Modern? Lenses of Modern Chinese Literature and Film</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 20

1 Or another Chinese culture or literature course approved by the faculty.

Up to two courses from our study abroad program in Chengdu (https://cola.unh.edu/center-study-abroad/programs/china-chengdu-spring-program) may count towards the Chinese minor.

At the beginning of your final semester of study, please complete a Certification of Completion of Minor form (https://unh.app.box.com/v/minor-form), obtain the necessary signatures, and submit it to your Dean’s Office.
Cinema Studies

**Programs**

- Cinema Studies Minor (p. 46)

## Cinema Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/cinema-studies

### Description

The minor in cinema studies offers a variety of opportunities to study a predominant contemporary form of narrative, aesthetic and social discourse: the moving image. Film is the primary medium of study for the minor, but the cinematic practices of video and television also may be included as potential areas of interest. Courses consist of interdisciplinary approaches to the analysis of cinema, covering works from the early cinema to the present, from the U.S. and other nations. Students learn the aesthetics, history, technology, economics and theory of cinema, while also acquiring the language for analyzing its forms and practices. The minor allows for organized and meaningful study of the moving image from a wide range of scholarly interests and approaches that complement the increasingly significant place of cinema in many major disciplines and other programs. Students enrolled in the cinema studies minor will become articulate and critical spectators in the larger cultural contexts of film and media studies.

Cinema studies students are required to take five courses. Students must earn at least a C- in each course and maintain a 2.0 grade-point average in courses taken for the minor. "Double counting" of minor course credits with major course credits will be left to the discretion of existing major departments, with the exception that no more than eight credits, if approved, will "double count."

Interested students should contact the cinema minor coordinator, Matt Konzett, Department of English, matthias.konzett@unh.edu, (603) 862-0261.

Total Credits 20

1 Electives are drawn from an approved list of courses for the minor, which is compiled and announced every semester. Students also may choose from the advanced and/or focused courses. Elective courses have a significant cinema studies component and may have another disciplinary focus as well. Contributing departments and/or programs include: American studies, anthropology, arts, communication, English, French, geography, German, history, humanities, Italian, music, philosophy, political science, psychology, Russian, sociology, Spanish, theatre and dance, and women's and gender studies. Students should check with the cinema minor coordinator each semester for approval of the elective.

## Classics (CLAS)

Classics encompasses the interdisciplinary study of the Greeks and Romans, as well as the ways in which the ancient world’s influence extends to the Medieval Period, the Renaissance and the modern world. Studying classics, therefore, is to investigate several thousand years of material through the study of languages, literature, history, politics, law, archaeology, art, mythology and folklore, gender and sexuality, religious studies, philosophy and more—all with methods derived from a variety of humanistic and social science perspectives. This breadth provides an excellent liberal arts education that prepares students for a variety of careers, as well as for further study. Classics majors from UNH have gone on to law school, medical school, and graduate school in classics and many related disciplines and have taken up careers in teaching, government service, the military and business.

Classics majors have many opportunities at UNH to pursue their own interests in the ancient world while completing their requirements. Along with Greek and Latin, the Classics program offers Hittite and Sanskrit, the ancient languages of Anatolia and India. Students are encouraged to take courses offered outside the department that relate to the field of classics, such as those in ancient history, archaeology, ancient philosophy, classical art, modern languages, linguistics and English literature. Some of these courses can even count for major requirements; a current list of approved courses is available from any departmental adviser. Study abroad is another way that many majors broaden their studies. Students have frequently spent semesters at many study abroad sites, including the Intercollegiate Center for the Classical Studies in Rome. (UNH is part of the consortium of Universities that supports this program.) The Department of Classics, Humanities and Italian Studies regularly runs its own popular January Term course in Rome and manages study abroad programs in Ascoli Piceno, Italy; and Budapest, Hungary, that may be appropriate for classics majors, depending on their interests.

The program offers three different options for the classics major. In brief, the differences are:

- The Classical Languages and Literatures (CLL) option allows for the most in-depth study of the ancient languages and requires knowledge of both Ancient Greek and Latin. It thus provides the strongest preparation for students considering graduate study in classics or related areas, and can also be an appropriate choice (with careful planning) for those thinking about teaching Latin in secondary schools. At the same time, it is designed for any student who desires a solid liberal arts education.
• The Ancient Mediterranean Civilizations (AMC) option balances language study with the opportunity for students to select from a wide range of courses covering many aspects of the Greek and Roman worlds, as well as the neighboring peoples in Europe, North Africa and the Near East. The flexibility of this option makes it especially attractive for students who wish to double major in another subject. It is generally not suitable, however, for those who wish to pursue related graduate study or a career in teaching Latin. AMC majors can, however, supplement the requirements with additional coursework to keep these options open.

• The Latin and Latin Teaching (LLT) option is designed to provide a good foundational liberal arts education centered on Latin and the Roman world, but it also includes specific elements that make it particularly appropriate for students who are considering careers teaching Latin in secondary schools after graduation. This option does not lead directly to state certification, which can be pursued during a fifth year of study in the Department of Education.

Requirements
To complete the AMC option of the classics major, a student must complete 10 courses (40 credits), distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td></td>
<td>Approved internship</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Approved semester study abroad focused on the classical world</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>40</td>
</tr>
</tbody>
</table>

1 No more than 8 credits may come from CLAS courses at the 400 level, with up to an additional 8 credits from LATN and GREK courses at the 400 level. There are also courses taught outside of the program that are approved substitutes for CLAS courses, and the department will accept up to 8 credits from such courses. An up-to-date list of these courses is available from departmental advisers and additional exceptions are allowed with the written approval of the adviser.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Classics majors may use two major-required courses to satisfy two Discovery category requirements.

The required minimum overall GPA in major coursework is 2.0.

Classics Major: Classical Languages & Literatures Option (B.A.)

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/classics-major-classical-languages-literatures-option

Description
The Classical Languages and Literatures (CLL) option allows for the most in-depth study of the ancient languages and requires knowledge of both Ancient Greek and Latin. It thus provides the strongest preparation for students considering graduate study in classics or related areas,
and can also be an appropriate choice (with careful planning) for those thinking about teaching Latin in secondary schools. At the same time, it is designed for any student who desires a solid liberal arts education.

**Requirements**

To complete the CLL option of the classics major, a student must complete 10 courses (40 credits), distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Language Courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select at least 12 credits at the 503 level or above</td>
<td>12-24</td>
<td></td>
</tr>
<tr>
<td>Including:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select at least one class at the 700 level in the primary language (GREK or LATIN)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select at least one class at the 504 level or above in the secondary language (LATN or GREK)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Non-Language Courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select at least 16 credits in CLAS courses. As many as 28 credits may be counted toward this option.</td>
<td>16-28</td>
<td></td>
</tr>
</tbody>
</table>

**Capstone**

Select an approved capstone experience of the following:

- Senior thesis
- Honors thesis
- CLAS capstone course at the 600 or 700 level
- At least 8 credits in 700-level LATN or GREK courses
- Approved internship
- Approved semester study abroad focused on the classical world

**Total Credits** 40

1. No credits from language courses at the 400 level may be counted toward this option.
2. Students may count as many as 24 toward the CLL major option.
3. No more than 4 credits may come from courses at the 400 level. There are also courses taught outside of the program that are approved substitutes for CLAS courses, and the department will accept up to 8 credits from such courses. An up-to-date list of these courses is available from departmental advisers and additional exceptions are allowed with the written approval of the adviser.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Classics majors may use two major-required courses to satisfy two Discovery category requirements.

The required minimum overall GPA in major coursework is 2.0.

**Classics Major: Latin & Latin Teaching Option (B.A.)**

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/classics-major-latin-latin-teaching-option

**Description**

The Latin and Latin Teaching (LLT) option is designed to provide a good foundational liberal arts education centered on Latin and the Roman world, but it also includes specific elements that make it particularly appropriate for students who are considering careers teaching Latin in secondary schools after graduation. This option does not lead directly to state certification, which can be pursued during a fifth year of study in the Department of Education.

**Requirements**

To complete the LLT option of the classics major, a student must complete 10 courses (40 credits), distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Latin Language Courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select at least 20 credits of LATN courses at the 504 level or above</td>
<td>20-24</td>
<td></td>
</tr>
<tr>
<td>Other Courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CLAS 401 Classical Mythology</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>CLAS 406 Introduction to Roman Civilization</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>Select 4-8 credits of electives</td>
<td>4-8</td>
<td></td>
</tr>
<tr>
<td>Select one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CLAS 601 Classical Myth II: The Power and Persistence of Myth</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>CLAS 604 Golden Age of Rome</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Capstone Experience**

Select an approved capstone experience of the following:

- Senior thesis
- Honors thesis
- CLAS capstone course at the 600 or 700 level
- At least 12 credits in 700-level LATN courses
- Approved external internship
- CLAS 694 Supervised Practicum (4-credit internal Latin teaching internship)
- Approved semester study abroad focused on the classical world

**Total Credits** 36-44

1. At least 4 credits must come from LATN 631 Latin Prose Composition and at least 4 credits must come at the 700 level.
2. An up-to-date list of these courses is always available from departmental advisers, and these advisers can also approve exceptions in writing. (At present, the following CLAS courses do not count: CLAS #402 Hellenic and Roman Institutions, CLAS 405 Introduction to Greek Civilization, CLAS 411 Elementary Hittite I–CLAS 412 Elementary Hittite II–CLAS 413, CLAS #414 Elementary Sanskrit II, CLAS #506 Introduction to Comparative and Historical Linguistics, CLAS 525 Greek and Latin Origins of Medical Terms, CLAS 595 Topics/CLAS 596 Topics, CLAS 694 Supervised Practicum.) Besides CLAS 401 Classical Mythology and CLAS 406 Introduction to Roman Civilization, no other 400-level courses may count. No Greek language courses are required for the LLT option, but students are encouraged to complete at least the introductory sequence (401–402).

There are also courses taught outside of the program that are approved substitutes for CLAS courses, and the department will accept up to 8...
Credits from such courses. An up-to-date list of these courses is available from departmental advisers and additional exceptions are allowed with the written approval of the adviser.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Classics majors may use two major-required courses to satisfy two Discovery category requirements.

The required minimum overall GPA in major coursework is 2.0.

Please note that the LLT option does not by itself meet New Hampshire state certification requirements. Those who intend to pursue this certification should enroll in EDUC 500 Exploring Teaching as early as possible and then apply early in the fall of their year of graduation for a fifth year of internship and study through UNH's Department of Education. Students are also encouraged strongly to consider taking some EDUC electives during their period of undergraduate study.

Classics Minor

Cognates
- Digital Writing and Literature Cognate (p. 49)
- Intercultural Communication for the Professional World Cognate (p. 50)
- Skills and Perspectives for the Digital World Cognate (COLA) (p. 50)
- Technical Writing and Public Speaking Cognate (p. 51)
- Philosophy of Business, Innovation, & Technology Cognate (p. 117)

Digital Writing and Literature Cognate
https://cola.unh.edu/english/program/cognate/digital-writing-literature

Description
Many jobs nowadays require not only solid reading and writing skills; but also the ability to deploy and adapt these skills in a variety of electronic, professional, public and semi-public platforms. This cognate builds students’ ability to comprehend and interpret difficult texts (including complex instructions); to edit, proofread and frame their work for different audiences and contexts; and to navigate rudimentary markup (code) and varied electronic interfaces with confidence and independence.

In consultation with a program advisor, students may choose to pursue a "track": e.g., courses like ENGL 623 Creative Nonfiction and ENGL 712 Multimedia Storytelling may serve as a "creative" track for students interested in honing their digital storytelling and audio skills; while ENGL 693 Special Topics in Literature and ENGL 739 American Indian Literature may offer students a way in to cultural heritage management or nonprofit careers. Alternatively, students already focused on a particular course of study (e.g., journalism) may wish to learn how digital tools work in parallel fields (thus taking ENGL 631 Digital Reporting to enhance their digital reporting skills while also taking ENGL 739 American Indian Literature to learn how to edit Wikipedia).
Contact the Department of English, 230F Hamilton Smith Hall or (603) 862-1313, with questions.

</tbody>
</table>

Total Credits: 12

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

### Intercultural Communication for the Professional World Cognate

https://cola.unh.edu/languages-literatures-cultures/program/cognate/intercultural-communication-professional-world

**Description**

This cognate is designed to provide students with the means to develop a global perspective, intermediate communication skills and an understanding of the dynamics of intercultural communication. Research has linked study abroad experience with students’ future employability, and “intercultural/global competence” in particular is a skill valued by employers in a wide range of fields. This cognate provides students a means to attain these valuable, marketable skills, as well as a means to demonstrate this to potential employers.

Contact the Department of Languages, Literatures and Cultures with questions at (603) 862-3121.

Total Credits: 12

¹ Taught in English, fulfills WC Discovery, no prior knowledge assumed

Students can petition for an alternate experience, such as The Washington Center Program, as long as the internship placement involves foreign language use. Preferably, this will relate to the same region covered in the professional culture course and the language skills course, but that is not required.

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

### Skills and Perspectives for the Digital World Cognate (COLA)

https://cola.unh.edu/interdisciplinary-studies/program/cognate/skills-perspectives-digital-world

**Description**

Engage with and reflect on the technology associated with the digital world. This cognate provides a foundation for the development of technical and critical skills aligned with one of the 21st century’s defining areas: information technology. A recent statement by General Electric’s CEO asserts that if you join the company today, as opposed to 20 years ago, you’re going to learn to code even though you may be in sales, finance or operations. This cognate gives students and future employees a fundamental introduction into technologies that are necessary for high functioning in today’s world, both in the workplace and beyond.

The curriculum consists of three courses: one to strengthen understanding of the technologies that drive the World Wide Web, one course to explore computer programming, and one course to consider the impact of the technologies on society.

Communication (CMN)

The Department of Communication at UNH emphasizes a range of studies in human communication, including rhetoric, media and interpersonal communication. Students are taught to analyze verbal, nonverbal and mediated messages from a variety of perspectives including historical, critical, interpretive and empirical approaches. Students explore connections and interrelationships among the people, environments, technologies and messages that comprise the social world.

The communication major prepares students well for a wide variety of careers in business, media, marketing, government, education, health, advocacy and social services. While offering access to a cutting-edge media lab and courses that teach students multi-media production skills, the department's primary focus is analytical rather than vocational.

We do not train students to do specific communication tasks, such as managing social media profiles or creating promotional content. Rather, we help students develop an understanding of how communication works the way it does, and how different modes of communication shape understanding and social relations. Students grapple with such "how" and "why" questions as they study real-world political issues, news events, cultural phenomena and communication between friends, family members, colleagues, community members and strangers.

The department is committed to providing a strong liberal arts orientation that helps students develop their abilities to think — to describe, analyze, critique, explore, integrate, synthesize and create ideas. The department's faculty members believe that these are the skills and abilities that will be the most useful resources in students' professional, civic and personal lives after leaving UNH. The program trains students to understand, adapt to and participate in social change. These educational efforts lead to the kind of fundamental understanding that identifies the communication professional and also provides a firm foundation for advanced, graduate study in communication and related fields.

The department's faculty members have a strong national and international reputation for their research and publications. In addition, the department is recognized on campus for its commitment to teaching. About half of the department's tenure-track faculty members have won awards for teaching excellence. The faculty is also very active in university, community and professional service.

The department offers a business applications option for communication majors who want to augment the liberal arts focus of their major with professional training in such areas as marketing, advertising and organizational behavior.

The department offers a media practices option for communication majors who want to augment their major with training in media production and applied media communication through courses at UNH-Manchester Communication Arts Department.

The department also offers internships, which are designed to integrate classroom study and supervised practical experience in a work setting. Internship credits do not count toward completion of the communication major, but they do contribute to the total number of credits needed for graduation.

https://cola.unh.edu/communication

Technical Writing and Public Speaking Cognate

https://cola.unh.edu/english/program/cognate/technical-writing-public-speaking

Description

The cognate in technical writing and public speaking (TWPS) offers intensive instruction in oral and written communication as important means of addressing technical, professional or practical problems whose solutions require others' cooperation. Students learn practical precepts for analyzing those "communication situations" and for making informed, strategic decisions when composing oral and written responses in response to them. Students also undergo extensive practice creating standard and, thus, widely applicable forms of spoken and written communication. All students acquire a foundation in effective expression by taking introductory courses in public speaking and in professional and technical writing. Students then build upon that foundation and complete the cognate with one advanced course in either public speaking or professional and technical writing. This cognate is attractive to students who recognize that effective expression is valued in nearly any field of endeavor they are likely to pursue in their postgraduate lives.

Please contact the Liberal Arts Dean's Office for additional information, (603) 862-2062, 110 Murkland Hall.

Total Credits 12

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.
The purpose of the communication major is to prepare students to engage more knowingly with the communicative patterns, problems and practices that they will encounter in their personal, professional and civic lives. This purpose requires that students learn to move beyond commonplace and conventional understandings of "communication" and acquire sophisticated perspectives — workable orientations — for describing, analyzing, reflecting upon and engaging with those patterns, problems and practices. Accordingly, the major not only acquaints students with a variety of empirical, critical, historical, theoretical and pragmatic perspectives on communication phenomena, but encourages them to formulate workable orientations of their own for engaging with communication issues and questions. Students who graduate with a communication major are prepared to become thoughtful and proficient "communication decision-makers" during their postgraduate lives.

Students wishing to declare communication as a major should contact the department's academic adviser, Andrew Sharp (andrew.sharp@unh.edu), for application information and requirements.

**Requirements**

Majors must complete ten courses (40 credits) with a 2.0 overall average in the major. The distribution of required courses for the major is as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 455</td>
<td>Introduction to Media Studies</td>
<td>4</td>
</tr>
<tr>
<td>CMN 456</td>
<td>Propaganda and Persuasion</td>
<td>4</td>
</tr>
<tr>
<td>CMN 457</td>
<td>Introduction to Language and Social Interaction</td>
<td>4</td>
</tr>
<tr>
<td>Select three 500-level communication analysis courses</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>Select four upper-division courses</td>
<td>16</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>40</td>
</tr>
</tbody>
</table>

1. Majors must earn a grade of C or better in each introductory course.
2. Students must complete the 400-level prerequisite before taking a 500-level course.
3. At least two of the three 500-level courses must have different 400-level prerequisites.

A maximum of 8 credits of independent study (CMN 795 Independent Study) may be counted toward the major. CMN 799H Honors Thesis and CMN 796 Comm-Entary Journal cannot be used to fulfill an advanced course requirement. The Discovery Program Capstone requirement may be fulfilled by completing any 700-level communication course except CMN 796 Comm-Entary Journal. CMN 795 Independent Study can only fulfill the capstone requirement with department approval and can be repeated for a maximum of 8 credits.

Transfer students must complete 20 credits of their communication coursework at UNH to complete the major satisfactorily. Exchange students may transfer no more than 10 approved credits from another institution to be applied toward completion of the communication major at UNH.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second or dual major.

**Thematic Concentrations**

1. **Histories and Traditions in Communication**

Students who pursue this concentration examine the history of thought about communication and its practices with attention to its applicability in the contemporary world. Select from:

Communication Major: Business Applications Option (B.A.)

https://cola.unh.edu/communication/program/ba/communication-major-business-applications-option

Description

The Department of Communication in collaboration with the Department of Marketing and the Department of Management in the Peter T. Paul College of Business and Economics offers a business applications option for communication students. The objective of the business applications option is to offer a select group of communication students the opportunity to augment the liberal arts focus of their major with professional training in such areas as marketing, advertising and organizational behavior. Qualified students who meet all requirements will
graduate with a B.A. degree in communication: business applications, an achievement which will be recorded on their official transcripts.

**Minimum Requirements for Option Eligibility**

1. Declared communication major.

2. Completion of CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction with a C or better.

3. Completion of at least one CMN 500-level course with a C- or better.

4. Maintain minimum in-major GPA of 2.5.
   - Student enrollment in the Business Applications Option will be contingent upon space availability.
   - Overall, total enrollment should not exceed twenty students in any given academic year.

1 Students admitted to the option must earn a minimum 2.5 cumulative grade point average in major courses at graduation or they will, by default, graduate with a BA in Communication without the special option designation on their diplomas.

**Requirements**

### Major Courses

Completion of all Communication major requirements.

Majors must complete ten courses (40 credits) with a 2.0 overall average in the major. The distribution of required courses for the major is as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 455</td>
<td>Introduction to Media Studies</td>
<td>4</td>
</tr>
<tr>
<td>CMN 456</td>
<td>Propaganda and Persuasion</td>
<td>4</td>
</tr>
<tr>
<td>CMN 457</td>
<td>Introduction to Language and Social Interaction</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Select three 500-level communication analysis courses</td>
<td>8</td>
</tr>
<tr>
<td></td>
<td>Select four upper-division courses</td>
<td>12</td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>40</td>
</tr>
</tbody>
</table>

1 Majors must earn a grade of C or better in each introductory course.

2 Students must complete the 400-level prerequisite before taking a 500-level course.

   - At least two of the three 500-level courses must have different 400-level prerequisites.
   - Majors must earn a grade of C- or better in all three analysis courses.

3 CMN 500 Public Speaking, CMN 599 Internship, and CMN 575 Research Practicum cannot be used to fulfill an analysis course requirement.

### Option Courses and Internship

<td>16</td>
</tr>
</tbody>
</table>

1 Students undergo a business applications internship experience that must be completed in one semester. (Prerequisites: CMN 455, CMN 456, CMN 457)

A maximum of 8 credits of independent study (CMN 795 Independent Study) may be counted toward the major. CMN 799H Honors Thesis and CMN 796 Comm-Entary Journal cannot be used to fulfill an advanced course requirement. The Discovery Program Capstone requirement may be fulfilled by completing any 700-level communication course except CMN 796 Comm-Entary Journal. CMN 795 Independent Study can only fulfill the capstone requirement with department approval and can be repeated for a maximum of 8 credits.

Transfer students must complete 20 credits of their communication coursework at UNH to complete the major satisfactorily. Exchange students may transfer no more than 10 approved credits from another institution to be applied toward completion of the communication major at UNH.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second or dual major.

**Communication Major: Media Practices Option (B.A.)**

[https://cola.unh.edu/communication/program/ba/communication-major-media-practices-option](https://cola.unh.edu/communication/program/ba/communication-major-media-practices-option)
The Department of Communication in collaboration with the Communication Arts Department at the UNH Manchester campus offers the media practices option. This option is designed for qualified students who want to augment their communication major at Durham with training in media production and applied media communication through courses in the Communication Arts Department at the Manchester Campus.\(^1\) Qualified students who meet all requirements will graduate with a B.A. degree in communication with a media practices option, an achievement which will be recorded on their official transcripts.

Minimum Requirements for Option Eligibility

1. Declared Communication Major.
2. Completion of CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction with a C or better.
3. Maintain minimum in-major GPA of 2.5.

Students may arrange to take Media Practices (CA) courses at any time during the course of their academic programs after they have satisfactorily completed the three 400-level introductory courses. Thus, students may take the 500-level CA courses before, concurrently with, or after completion of CMN 500-level courses and/or CMN 600-level courses.

A maximum of 8 credits of independent study (CMN 795 Independent Study) may be counted toward the major. CMN 799H Honors Thesis and CMN 796 Comm-Entry Journal cannot be used to fulfill an advanced course requirement. The Discovery Program Capstone requirement may be fulfilled by completing any 700-level communication course except CMN 796 Comm-Entry Journal. CMN 795 Independent Study can only fulfill the capstone requirement with department approval and can be repeated for a maximum of 8 credits.

Transfer students must complete 20 credits of their communication coursework at UNH to complete the major satisfactorily. Exchange students may transfer no more than 10 approved credits from another institution to be applied toward completion of the communication major at UNH.
Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second or dual major.

Any combination of five communication courses is acceptable. Please see exceptions below.

- Communication minor students are not able to count both CMN 500 Public Speaking and CMN 600 Public Speaking as a Civic Art toward the minor.
- CMN 575 Research Practicum and CMN 599 Internship do not count toward the minor.
- No more than two transfer courses from other institutions can be applied to the minor and all transfers are contingent upon departmental approval.
- No more than 4 credits of independent study can count toward the minor.
- No pass/fail or credit/fail courses can count toward the minor.

Students majoring in music, mathematics, pre-K-3rd grade and physical education have the option of participating in a five-year program leading to licensure and a graduate degree. Or they may choose the four-year option in those majors, which leads to licensure at the undergraduate level. Students interested in the four-year option in these areas should contact the departments for information.

Elementary teaching and most secondary areas require completion of a minimum of a one-year graduate program, which leads to a master’s degree and teacher licensure. Most students who plan to teach in elementary and secondary schools apply to the graduate school to complete a five-year program. In the five-year program, students begin preparation for teaching at the undergraduate level with a semester of field experience (EDUC 500 Exploring Teaching) and professional coursework in education. Students complete a baccalaureate degree outside of education and move into a fifth year of study and a full-year internship leading to the M.Ed. or M.A.T. degree and licensure in teaching.1

There also are opportunities for study or certification at the graduate level in administration, elementary and secondary teaching, early childhood and special education. The department encourages students interested in graduate study or in relevant undergraduate courses to meet with these graduate program coordinators in the Department of Education.

Students at the undergraduate level who are interested in special education or early childhood education can begin to complete prerequisite coursework for the graduate program leading to certification in special education (K-12) or early childhood education. For students seeking the M.Ed. in special education or early childhood education without certification in general education, it is not necessary to complete EDUC 500 Exploring Teaching. For coursework that can be taken at the undergraduate level, students should see program advisers in the Department of Education.

1 Students in the five-year program may combine their program for teacher licensure with a master’s program in their major field of study.

Accelerated Master’s Program

UNH undergraduate seniors with a minimum of a 3.2 cumulative grade-point average at the end of the first semester of their senior year and undergraduate juniors with a minimum of a 3.2 cumulative grade point average at the end of the second semester of their junior year can apply for "early admission" to the Graduate School (November for seniors, February for juniors). Such candidates may register for a maximum of 12 credits of dual-credit coursework (undergraduate/graduate level course work, e.g., 700/800) prior to completing their bachelor's degree. A student must be admitted to the Graduate School before the start of the semester in which the course(s) will be taken in order to receive graduate credit. Once accepted, a student must maintain the minimum
3.2 cumulative grade point average until their undergraduate degree is awarded. A student would apply for early admission on the regular Graduate School application available at www.gradschool.unh.edu (http://www.gradschool.unh.edu).

Program Philosophy and Mission Unit Mission Statement
The following conceptual framework guides all of the programs that prepare professionals in education at the University of New Hampshire:

The professional education unit at the University of New Hampshire seeks to prepare practitioners who will become leaders in their own practice settings and within their profession, applying knowledge to improve education for all students and enrich the lives of clients. Immersion in subject matter, research, theory and field-based experience provides a base for our graduates to make well-reasoned judgments in complex situations, render informed decisions, model exemplary practice and take initiative for planned change.

Students learn to establish caring environments that celebrate individual differences and backgrounds while fostering cooperation and educational improvement. We stress reflective critical inquiry as a mode of study and community-building as a means for promoting change. We value and support both our students’ local practice and their broader leadership within the profession.

Mission of Programs in Teacher Education
The following mission statement gives direction to the basic and advanced programs in teacher education:

We seek to prepare beginning teachers who demonstrate excellence in classroom practice and who will become educational leaders. Our graduates will possess the knowledge, skills, and dispositions required for outstanding classroom practice and eventual leadership within the local school community and the larger education community.

Undergraduate Work toward Teacher Certification in Elementary and Secondary Education
Step I. Enroll in Exploring Teaching: Education 500
Students are encouraged to take EDUC 500 Exploring Teaching, as a sophomore, but completion during junior or senior year also can leave enough time for other education course requirements.

Step II. Professional Coursework in Education at the Undergraduate Level
Education 500 is a prerequisite to further work in the teacher education program. An undergraduate receives a co-adviser in the Department of Education (usually the Exploring Teaching instructor). Along with the major adviser, this co-adviser works with the student to plan the undergraduate portion of the five-year teacher education program.

Students majoring in music, mathematics, pre-K-3rd grade or physical education at the undergraduate level must take four credits in each of the areas. Students who intend to pursue the five-year program leading to licensure and a graduate degree are encouraged to take the courses listed below as an undergraduate, although each course is also offered at the graduate level.

Total Credits 16

EDUC 707 Teaching Reading through the Content Areas is required for some secondary subject licensure areas (arts, life sciences, chemistry, earth science, middle school science, physics and social studies). Elementary education students are required to have four methods courses: one each in the teaching of reading, mathematics, science, and social studies. Those who do not intend to use this coursework for initial licensing may enroll with instructor permission. All 700-level education courses at UNH are restricted to students with junior or senior standing. These courses may also be taken at the graduate 800 level.

Any course taken in the Department of Education that will be used to fulfill a teacher licensure requirement must be completed with a grade of B- or above.

Step III. Admission to the Internship and Graduate Phase of the Teacher Education Program
Undergraduate seniors should apply to the Graduate School in early November in the first semester of the senior year for the final phase of the teacher education program. Students with an undergraduate grade-point average of 3.2 or better admitted into the accelerated master’s program may be allowed to begin the program in the second semester of the senior year, earning a maximum of 12 graduate credits.

Undergraduate juniors with an undergraduate grade-point average of 3.2 or better should apply to the Graduate School in early February in the second semester of the junior year for the final phase of the teacher education program. Students with an undergraduate grade-point average of 3.2 or better admitted into the accelerated master’s program may be allowed to begin the program in the first semester of the senior year, earning a maximum of 12 graduate credits during the senior year.

The final phase of the program includes a full-year internship, electives, and a program portfolio and colloquium. This phase normally takes an academic year plus a summer to complete.

The yearlong internship (EDUC 900A Internship and Seminar in Teaching/EDUC 901A Internship and Seminar in Teaching) is part of the final stage of the five-year program. It meets the goals of increased clinical experience and better integration of theory and practice. The elementary internship year also includes two required graduate level literacy courses (EDUC 808, EDUC 809).

The internship is a teaching and learning experience in which the intern is involved in an elementary or secondary school over the course of an entire school year. Interns become a part of the school staff, sharing(273,558),(996,819) appropriate instructional tasks and often carrying the full instructional duties in one or more classes.

Interns are mentored and supervised by a school staff member who is designated as a “cooperating teacher.” A UNH faculty member collaborates in intern supervision and conducts a weekly seminar for all interns with whom he/she is working.
The internship is a full-time experience for 6 graduate credits each semester. It typically begins in September and runs through May or June. Due to the intensive time commitment, it is recommended that, at most, only one course be taken in addition to the internship each semester.

Before the internship, all students will have completed a bachelor’s degree with a major outside of education. Because of this, they will possess a depth of knowledge in a subject area and a broad general education, in addition to substantive preparation for teaching. Secondary education candidates must have completed an approved major, or its equivalent, in the subject that they intend to teach. Elementary education candidates may pursue an undergraduate major in any area; however, majors in the core disciplines taught in elementary schools are desirable.

Undergraduates should apply for internship in September of their senior year. At the same time, it is advisable to begin the application process for graduate school. Arranging an appropriate placement is a time-consuming process. Starting early will facilitate finding the best setting for students’ needs and goals. The director of field experiences in Durham and the associate director of teacher education in Manchester play a major role in identifying internship sites and should be consulted regarding the placement process. Internship applications are available at the Department of Education, Durham, and the Office of Teacher Education, Manchester. Admission to the internship requires a completed application to the internship, admission to the graduate school, and a consultation with the director of field experiences. Please note: Undergraduates interested in the master’s degree in early childhood education, the early childhood special education option, and special education do not apply for internships in their senior year. Internships for this program are arranged with program faculty once core graduate requirements are met.

Admission to the Program

Step 1. Exploring Teaching is open to all students, subject to available space. Approximately 150 students are accepted each semester.

Step 2. Continuation in professional coursework is dependent upon positive recommendations from EDUC 500 Exploring Teaching.

Step 3. Admission to the internship and the graduate program requires acceptance to the Graduate School. The process is competitive because of high admissions standards and limited space in the program. Approximately 80 percent of applicants for Phase III are accepted.

In determining admission of students to teacher education graduate programs, several criteria are used:

1. Undergraduate Grade-Point Average
   Average undergraduate GPA for student accepted is currently 3.52

2. Passing scores on the Praxis Core Exam (Reading, Writing and Math)
   https://www.ets.org/praxis/nh/requirements

3. Three letters of recommendations and positive recommendations from EDUC 500 Exploring Teaching, or the equivalent and from those able to relay information about a candidate’s performance in teaching situations or related areas are important.

In the admission process, the program seeks evidence that candidates have the following knowledge, abilities and dispositions:

1. motives to teach that include a strong social commitment to contribute to society through education;
2. a disposition to care for students — each and every one;
3. the ability to interact positively with children and adults;
4. the capacity to win the respect of their peers and be effective in group interaction, showing openness to the needs and views of others;
5. well-developed communication skills, including speaking, writing, and listening skills as well as an ability to engage others in both the giving and receiving of information and feelings;
6. perceptiveness: the ability to identify and process the relevant details in a given environment, especially in the context of a classroom;
7. the ability to make reasonable judgments in the context of complex situations that change from moment to moment;
8. the capacity for clear thinking and an ability to translate complex thoughts into simple and clear explanations;
9. superior academic skills: extensive knowledge of at least one major discipline, intellectual curiosity and the ability to be open to the unknown;
10. a disposition to take charge of one’s own learning, which includes the active pursuit of feedback and the willingness to take thoughtful risks.

A minimum 2.8 cumulative grade-point average at the time of application to student teaching is required. Students in music, mathematics, and physical education need to apply by March 1st of the junior year and October 15th of the senior year for spring semester to the Department of Education for student teaching. An unofficial transcript and a current resume; must accompany the application. Return applications to the Department of Education Office, 207 Morrill Hall, attention Liz Arcieri.

### Educational Studies Dual Major

https://cola.unh.edu/education/program/educational-studies-dual-major

### Description

The educational studies dual undergraduate major provides an opportunity for students to broaden their disciplinary education through focused exploration and application of educational studies, acknowledging the inherent educational aspect of many professions that communicate information and work for social change at any scale. The dual major in educational studies emphasizes experiential learning in transdisciplinary learning communities, research with faculty, corporate and K-12 engagement and community service. The dual major does NOT lead to a teaching certification.

### Requirements

The dual major in educational studies requires (32 credits) each completed with a C+ or better. Any education course to be applied for a future teacher licensure requirement must be completed with a grade of B- or better. The dual major cannot be declared until after a first major has been declared and students must have a UNH undergraduate GPA of a 2.50 or better at the time of declaring. The required minimum overall GPA in major coursework is 2.50.

- EDUC 761 Inclusive Curriculum for Young Children with Special Needs

### Critical and Diverse Perspectives

- EDUC 444B Public Issues, Democratic Schooling & Active Citizenship in a Global Context
- EDUC 520 Education, Poverty, and Development
- EDUC 525 Teaching Race
- EDUC 625 Anthropological Thinking on Education
- EDUC 718 Critical Social Justice in and Beyond Education

### Law and Educational Policy
Special Education Minor

https://cola.unh.edu/education/program/minor/special-education

Description

Explore the field of special education. Five courses (20 credits) comprise the minor in Special Education.

A Certification of Completion of Minor form needs to be completed at the beginning of a student’s final undergraduate semester at UNH. Forms are available from the Registrar’s Office or the Department of Education Office.

For more information, contact Cindy Glidden, Department Coordinator, cindy.glidden@unh.edu, 209 Morrill Hall, (603) 862-2311.

Requirements

A minor consists of 20 credits in Education Department courses. The specific courses required for the minor are:

English Literature Major (B.A.)

https://cola.unh.edu/english/program/ba/english-literature

Description

The English literature major serves those students who want to focus
particularly on the study of literature — its many forms and styles, its

rich history and the range of approaches to its analysis. The English
literature track is an especially attractive major for those who plan to go
on to graduate school in English or other fields in the humanities, but it
is also an excellent program for those who want to develop an in-depth
knowledge of literature in English in all its formal, historical, cultural and
theoretical dimensions.

As an English literature major, a student will learn about various literary
traditions, both British and American literature as well as traditions
organized around other principles, such as post-colonial literature,
women’s literature, African-American literature and genres like poetry
and drama. Courses are designed to expose students to many different
sorts of works and to help them develop questions and strategies of
critical thinking that will make all kinds of literary expression meaningful.
And the works students will study will provide many ways of looking
at the world and enrich their quality of life. What’s more, students have
many opportunities to hone critical writing and research skills and to
practice the art of presenting research findings to a group, all skills in
high demand in today’s workplace. The English literature major is an
excellent way to combine development of interpretive and writing skills
with an exciting, in-depth encounter with some of the very best writing
ever produced in the English language.

With the exception of ENGL 533 Introduction to Film Studies

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

The required minimum overall GPA in major coursework is 2.0.

English literature majors may use one major-required course to satisfy one Discovery category requirement.

Majors may only count one online course toward their English major requirements.

Students interested in majoring in English literature should consult Carla Cannizzaro, Coordinator of the Department of English, 230F Hamilton Smith Hall, (603) 862-1313 or the director of the English literature program.

English Major (B.A.)

https://cola.unh.edu/english/program/ba/english

Description

Our general English major has two objectives: provide our students with a common core of literary experience and expertise, and offer them opportunity to shape a course of study suited to their personal interests. By offering flexible requirements, we encourage students to devise a path through coursework that has an intelligent rationale. If students have a special interest in writing, for example, they can take the minimum number of literature courses (five) and complete the major by taking offerings in fiction, creative nonfiction and poetry writing; if students’ interests are in literary studies, they can focus on offerings in that arena; or they can match up courses from different arenas in the department (say, literature and writing courses focused on poetry). All the undergraduate courses we offer in the English department are open to English majors so students can sample a range of courses in literature, linguistics, creative or nonfiction writing, and English teaching, according to how particular interests may change and grow.

The guiding principle of the general English major, then, is that it is open and liberal by design. It allows students to sample a variety of courses in order to study the operation of language from many perspectives.

Requirements

As an English major, you must complete a minimum of 40 credits of major coursework with a grade of C- or better, the one exception is ENGL 419 Writing About Literature, which must be completed with a grade of C or better. You cannot use ENGL 401 First-Year Writing, ENGL #403 Exploring Literature, ENGL 415s, “Literature and...” courses, and ENGL 444s to satisfy major requirements. Note that any one course may satisfy more than one requirement.

Option B:

ENGL/LING 405 Introduction to Linguistics

One 500-level course

Select six courses numbered 600 and above

Credits
Select one additional 500-, 600-, or 700-level English course of their choosing

Capstone:

One 700-level class in addition to the 10-course major

1 This must be completed with a minimum grade of “C.” ENGL 419 Writing About Literature is the only 400-level class that may count towards the English major. ENGL #403 Exploring Literature, ENGL 415s, “Literature and...” courses and ENGL 444s will NOT count towards this major.

2 ENGL 501 Introduction to Creative Nonfiction may be included here.

3 You may include any advanced-level courses even if taken to fulfill literature requirements above.

All writing courses numbered 600 and above may be included here. [ENGL 620 English Major Internship and ENGL 788 Senior Honors (previously numbered ENGL 695), cannot be used to satisfy major requirements.]

4 Minimum grade required: C. The course you select for your Capstone may not be double-counted toward English major requirements. At the time of registration, you must submit a Capstone Declaration form indicating the English course you’re taking for capstone credit at the time of registration. You can pick up a capstone Declaration form in the English Department main office.

Pre-1800 Literature Courses

Either two advanced courses (600-level and above) or one advanced course and either ENGL 512 British Literature I Age of Heroes: Beowulf to Dr. Faustus or ENGL 513 British Literature II Age of Revolutions: Shakespeare to Austen. Choose from the following:

<table>

English Major/Text, Business Writing and Digital Studies Option (B.A.)

https://cola.unh.edu/english/program/ba/english-majortext-business-writing-digital-studies-option

### Description

The modern workplace requires that employees be adaptable. The Bureau of Labor Statistics conducted a long-term study that showed people held 11.7 jobs between the ages of 18 and 48, and those numbers are increasing with people moving between jobs more frequently every year. It is crucial that we prepare our students not just for one industry, but rather arm them with the transferable skills of critical reading, writing, analysis, production, theory and aesthetics of new forms in digital media and business. Students will leave this major option with the skills that are in the highest demand in all fields today.

This major option addresses the growing demand for graduates who are well-versed in a combination of humanistic and digital skills and able to work in a variety of professional environments. In particular, graduates of this option will be prepared for careers at cultural and historical institutions, as well as in emerging job markets of information management and online content delivery. This specialization complements areas requirements for the English major but it is not limited to English majors. Double majors are encouraged. Small classes, a great sense of community and a diversity of faculty specializations create an atmosphere that propels students toward success. Students will receive real-life work experience through our internship class, and they will also leave this major with a digital portfolio that contains a collection of professional projects that can be used on the job market.

In this English major option, students are trained in the critical reading, analysis, production, theory and aesthetics of new forms in media and business. These forms include but are not limited to social media, business writing conventions, modes of digital storytelling (i.e. audio and video essays, podcasts and wikis), digital archives, web design, and online communities and interaction. Students are also trained in analysis through traditional humanistic literature and they are expected to fulfill the core learning objectives shared by all English major tracks. These include:

- the ability to communicate and debate effectively with others, both orally and in writing,
- the ability to closely examine a variety of texts (including modern digital artifacts and archival materials)
- developing the ability to use a variety of media and communication platforms;
- experience and practice in dynamic critical thinking and creativity

### Requirements

#### Eleven courses (44 credits)

Completed with a minimum grade of C- (with the exception of ENGL 419, which must be completed with a grade of C or better).

Students must meet the following distribution requirements. Note that any one course may satisfy more than one requirement:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 419</td>
<td>Writing About Literature</td>
<td>4</td>

</tr>
<tr>
<td>ENGL 796</td>
<td>The Internship Experience</td>
<td></td>
</tr>
</tbody>
</table>

### Digital Portfolio

- Must be completed with a minimum grade of “C” to count towards the major.
- Students may include any advanced-level ENGL courses in which 20% of student assessment/work includes a digital humanities, digital research, or digital production component (even it taken to fulfill literature requirements). ENGL 602 may not be double counted for this requirement. Look for the ‘DH’ designation in the course descriptions during registration.
- The Internship Experience: Experiential learning course that allows students to apply all of the writing, speaking, and critical thinking skills into an on-the-job experience, enabling them firsthand practice with writing documents at work, peer collaboration, public speaking opportunities/presentations, and supervision and evaluation. Students must have JR or SR status to enroll in this course. Students should submit a Capstone Declaration form indicating the ENGL course taken for Capstone credit at time of registration. Capstone Declaration forms can be picked up in the main English office.
- Digital Portfolio: A minimum of six polished projects represented in a digital portfolio started in ENGL 602 and expanded over your career at UNH. A reflective essay will accompany this portfolio. This is a non-credit degree requirement.

### Pre-1800 Literature Courses

Either two advanced courses (600-level and above) or one advanced course and either ENGL 512 British Literature I Age of Heroes: Beowulf
to Dr. Faustus or ENGL 513 British Literature II Age of Revolutions: Shakespeare to Austen. Choose from the following:

<table>

Other courses may count. Please see your advisor if you have questions about other courses that might fulfill this requirement.

**Notes:**

To graduate from UNH, a student must earn a total of 128 credits.

E-COURSE RULE: Majors entering the department in Fall 2012 and beyond may only count one online course towards their major requirements.

English 403 'Exploring Literature', English 415 'Literature and...' and English 444 classes may NOT be used to satisfy ENGL major or minor requirements.

English majors may use one major-required course to satisfy one Discovery category requirement.

**English Major: Law 3+3 Option (B.A.)**

https://cola.unh.edu/english/program/ba/english-major-law-33-option

**Description**

The 3+3 program offers highly motivated UNH undergraduate students of English the possibility to earn both a bachelor’s degree and a law degree in six, rather than seven, years of study. After completing three years as an undergraduate and gaining admission to the UNH Law School through the approved process, the 3+3 program participant will become a full-time first-year law student. Upon successful completion of the first year of law study, the credits earned will be counted toward the JD degree and as elective credits sufficient to complete UNH’s requirements for the bachelor’s degree.

**Eligibility and Admission Process**

**STEP ONE: Application to the 3+3 English/Law B.A./JD option**

Students apply to the program either when they submit their applications to UNH, selecting the English/JD option on the online application, OR after they are admitted to UNH, by applying directly to the English Department’s "English/Law 3+3 Committee." In both cases,
undergraduate applicants must fulfill the general requirements for admission to the English major.

Students applying at the time of admission to UNH will typically present the following high school credentials:

- A 3.5 GPA in high school (UNH recalculates high school GPA’s to a 4.0 weighted scale)
- A rigorous high school curriculum defined as the following:
  - 4 years of college prep (CP) or higher English
  - 4 years of CP or higher mathematics
  - 4 years of CP or higher social studies/history
  - Completed at least level 3 of a foreign language
  - 3 or more years of CP or higher laboratory sciences.

- A recommended score of 1200 or better (combined Math and Verbal) on the SAT or a 29 on the ACT.

Currently enrolled UNH students applying to the program must:

- Have a 3.5 GPA in college courses at the time of application. The English Department committee governing admission to the 3+3 program will also consider past SAT scores, maturity, and the ability to complete a highly demanding program of study based on performance thus far.

- For both groups, it is important to note that satisfying these requirements does not guarantee admission to this program. The review process is holistic (meaning all parts of the application carry weight and influence the final decision) and other components of the application will influence any admission decisions. Available space within the program will also influence who is admitted and how many students can be accepted.

**STEP TWO: Application to UNH Law school**

To be eligible, students must:

- Complete all Discovery and major requirements, and accrue at least 98 credits before beginning law school in their Senior year.
- Maintain at least a 3.5 GPA (including transfer credits) at time of application to law school, and at the end of their Junior year.
- Take the LSAT no later than December of the final undergraduate year (i.e. the Junior year) and earn a score of 157 or above.
- Submit the law school application through the Law School Admissions Council by January of the year in which the student wishes to enroll in law school.

**Requirements**

Students in the English/law 3+3 option complete the requirements of the English major. See the Degree Plan for the recommended path through the English major.

 Participation requires that students:

- Complete all discovery and major requirements and at least 98 credits before beginning law school
- Maintain a 3.5 or above grade point average, including transfer credits
- Take the LSAT no later than December of the final undergraduate year and have a score of 157 or above.

- Submit the law school application through the Law School Admissions by January 1 of the year in which the student wishes to enroll in law school.

As an English major, you must complete a minimum of 40 credits of major coursework with a grade of C- or better; the one exception is ENGL 419 Writing About Literature, which must be completed with a grade of C or better. You cannot use ENGL 401 First-Year Writing, ENGL #403 Exploring Literature, ENGL 415s, “Literature and...” courses, and ENGL 444s to satisfy major requirements. Note that any one course may satisfy more than one requirement.

**Code** | **Title** | **Credits**
---|---|---
ENGL 419 | Writing About Literature | 4
Select two pre-1800 literature courses (select from list below) | 8
Select two post-1800 literature courses (select from list below) | 8
Select one course that addresses race, the construction of race, and racial theories (select from list below) | 4
Select one of the following options: | |
| Option A: | |
| Two 500-level courses | |
| Option B: | |
| ENGL/LING 405 | Introduction to Linguistics | |
| One 500-level course | 2
Select six courses numbered 600 and above | 24
Select one additional 500-, 600-, or 700-level English course of their choosing | 4
Capstone: | |
| One 700-level class in addition to the 10-course major | 4

1. This must be completed with a minimum grade of “C.” 2. ENGL 501 Introduction to Creative Nonfiction may be included here. 3. You may include any advanced-level courses even if taken to fulfill literature requirements above. All writing courses numbered 600 and above may be included here. [ENGL 620 English Major Internship and ENGL 788 Senior Honors (previously numbered ENGL 695), cannot be used to satisfy major requirements.] 4. Minimum grade required: C. The course you select for your Capstone may not be double-counted toward English major requirements. At the time of registration, you must submit a Capstone Declaration form indicating the English course you’re taking for capstone credit at the time of registration. You can pick up a capstone Declaration form in the English Department main office.

**Pre-1800 Literature Courses**

Either two advanced courses (600-level and above) or one advanced course and either ENGL 512 British Literature I Age of Heroes: Beowulf to Dr. Faustus or ENGL 513 British Literature II Age of Revolutions: Shakespeare to Austen. Choose from the following:

### Law School Requirements

The following summarizes the required curriculum and bar recommended curriculum. 85 credits are required for graduation.

**Required courses include:**
- Administrative Process
- Criminal Procedure
- Professional Responsibility
- Upper Level Writing Course
- Upper Level Skills Course

**Bar recommended courses include:**
- Personal Taxation
- Business Associations
- Wills, Trust & Estates
- Evidence

Questions about the English/law 3+3 undergraduate program should be directed to Carla Cannizzaro, coordinator of the Department of English, 230F Hamilton Smith Hall, (603) 862-1313.

Questions about UNH Law School entry should be directed to Kevin Sousa, UNH Pre-Law Advisor, 110 Murkland Hall, (603) 862-2062.

<td>4</td>
</tr>
<tr>
<td><strong>Credits</strong></td>
<td></td>
<td>16</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td>98</td>
</tr>
</tbody>
</table>

**TOTAL:** 98 Credits (40 Discovery, 44 English, 4-8 Foreign Language, 4-8 Elective)

**NEED:** Beyond ENGL 401 First-Year Writing, 3 more WI courses, one in major, one at 600 level.

**LAW 475:** Students should take LAW 475 Getting Ready to Succeed in Law School at some point during their Sophomore year but no later than the first semester of their Junior year. This course, taught by a UNH Law School faculty member, will teach students how to prepare for a legal education. The course will instruct students on the LSAT exam and offer valuable strategies on how to improve LSAT scores. Such instruction will include administration of practice test questions as well as explanations for answers. This two-credit course will also explain the necessary study skills to excel in law school.

**HONORS:** It is not necessary to complete the honors program, but it is possible: Honors in Discovery + Honors in Major with Thesis (See addendum I).

**SEQUENCE:** With the exception of ENGL 419 Writing About Literature and ENGL 787 English Major Seminar, English courses don’t need to be taken in any specific order; the guide above is only a suggestion. In general,
500-level courses should be taken before 600-700 level ones. However, a student could take a class that satisfies the Race Requirement in Semester I of Junior year rather than Semester II, or a pre-1800 600-700 level literature course in Semester II of Junior year. As long as all the categories listed above are met, students have the flexibility to choose the courses that best meet their interests and schedules. There are some writing and journalism courses that have prerequisites, and students should be careful to note these before choosing upper-level courses in those fields.

**ADVISING:** It is very important that students progressing through the 3+3 English/Law program maintain close contact with their degree advisor. This will help students remain "on track" to complete degree requirements, and the advisor will guide the student into the next phase of the program, admission to the Law school. Students who plan early and work closely with their advisor may find it possible to include study abroad and participation in other University programs, if desired, but only with careful planning.

All students participating in the English/Law 3+3 program are strongly encouraged to consult with the pre-law advisor on campus: Kevin Sousa, kevin.sousa@unh.edu (paula.dinardo@unh.edu); 603-862-2062, 110 Murkland Hall.

**The Path Through UNH Law School**

This is a possible Law School course outline. Variations to this suggested path of courses may be undertaken with the approval of the student’s Law school advisor.

**Senior/First Year Law (31 credits)**

The schedule and track of the second and third years of law school are directed by each student with careful advising from the law faculty.

**English Teaching Major (B.A.)**

https://cola.unh.edu/english/program/ba/english-teaching-major

---

### Description

Are you passionate about serving your community? Do you enjoy reading, writing, creative thinking and imagination? Are you eager to shape the future? The English teaching major could be a wonderful choice for you!

English teaching majors synthesize knowledge across areas — literature, language, composition, speaking, listening, identity, linguistics and education, just to name a few. We think critically and collaborate. We spark learning and we study it. We evaluate texts and resources, examine literacy skills, consider appropriate media, and design reading and writing opportunities and instruction in a variety of contexts. In particular, the English teaching major focuses on preparing future teachers and educational leaders, but the skills students learn are valuable in many settings, from the classroom to the workplace to the broader world.

The goal of the English teaching major is to prepare informed, thoughtful, and skilled English teachers who will become educational leaders in their own communities and in the teaching profession. In the English Department, students learn about literature, cultural theories of race and identity, composition, grammar, a variety of textual and digital media, and instructional practices appropriate to grades five through twelve. In the Education Department, students learn about human development, the history of schooling, and many philosophical perspectives on learning and education.

Finally, students who choose to complete our master’s program will complete a yearlong teaching internship where they collaborate with a teacher to apply their knowledge in a classroom and fulfill the requirements for teacher certification in the state of New Hampshire. Students who complete this program are uniquely well prepared to become leaders in the profession over the long term. State certification is transferable to most other states, and, after five years, 88.7% of UNH master’s program graduates report that they are teaching or employed in an education-related job. Join the English teaching major and turn your passion for English into a fulfilling career serving your community!

### Requirements

Completion of the undergraduate teaching major does not in itself meet state certification requirements. Students should enroll in the undergraduate major and:

Pass the following courses with an average of 2.5 or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 419</td>

Two additional literature courses numbered 600 or above

---
One course that addresses race, the construction of race, and radical theories ²
Any English department course in writing, linguistics, critical theory, film, or literature ³
Complete the Discovery Program capstone for English Teaching majors:
ENGL 789 Special Topics in English Teaching ⁴
EDUC 500 Exploring Teaching ⁴

1. ENGL 512 British Literature I Age of Heroes: Beowulf to Dr. Faustus or ENGL 513 British Literature II Age of Revolutions: Shakespeare to Austen may be substituted for one of the two required literature courses numbered 600 or above.
2. Choose from a department-approved list (other courses may count, when relevant and with prior written approval of the student’s adviser). The course used to fulfill this requirement may be double counted within the ‘Two literature courses 600 or above’ OR ‘Any English Department course...’ requirement area.
3. Except ENGL 401 First-Year Writing, ENGL #403 Exploring Literature, ENGL 415s, "Literature and..." courses, and ENGL 444s

English teaching majors should apply for the fifth-year teaching internship and master’s degree program by fall or spring of their senior year (usually September 30 for the internship and November 1 or February 1 for the master’s program). Students with a GPA of 3.2 or better can apply for the master’s degree program in their junior year. If accepted early, the student can earn graduate credit for up to three undergraduate English or education courses.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of Arts candidates must also satisfy the foreign language proficiency requirement.

English teaching majors may use one major-required course to satisfy one Discovery category requirement.

Majors may only count one online course towards their English major requirements.

Students interested in majoring in English teaching should consult Carla Cannizzaro, coordinator of the Department of English, 230F Hamilton Smith Hall, (603) 862-1313, or the director of the English teaching program, Prof. Alecia Magnifico.

English/Journalism Major (B.A.)

https://cola.unh.edu/english/program/ba/englishjournalism-major

Description

In our digital age, the ability to evaluate, edit, package and communicate information has become crucial to many, if not most, careers. Founded on the study of literature, the oldest form of story-telling, our English/journalism major prepares students for success in the media or any vocation that requires strong research and communications skills. Learn the basics: interviewing, fact gathering, verification and writing in both news and feature styles. Then broaden your repertoire by producing stories for digital platforms using audio, photo, video and data visualization.

Requirements

English/journalism majors must complete ENGL 401 First-Year Writing before taking the first journalism course, ENGL 534 21st Century Journalism: How the News Works. After completing ENGL 534 21st Century Journalism: How the News Works, majors may move on to ENGL 621 Newswriting.

1. With a B or better, or the AP or transfer credit equivalent
2. This must be completed with a minimum grade of C. ENGL 419 Writing About Literature is the only 400-level class that may count towards the English/Journalism major. ENGL #403 Exploring Literature, ENGL 415s, "Literature and..." courses, and ENGL 444s will NOT count towards this major.
3. Because media outlets expect even entry-level staff to have an area of expertise, English/Journalism majors must take a three-course concentration in another field, such as sociology, German, environmental science, criminal justice, or other English disciplines (e.g., African American studies). Courses taken for a minor will count toward the three-course concentration.

</tr>
</thead>
<tbody>
<tr>
<td>ENGL 517</td>
<td>Introduction to African American Literature and Culture</td>
<td>4</td>
</tr>
</tbody>
</table>

Other courses may count. Please see your advisor if you have questions about other courses that might fulfill this requirement.

(Notes: the course used to fulfill this requirement may be double counted as one of the pre-1800 and post-1800 literature courses required for this major.)

Certain courses publish student writing digitally, at times in collaboration with professional news outlets. Students are also encouraged to write and edit for student publications such as The New Hampshire and Main Street. Beyond these requirements, majors work at one media internship for a semester (ENGL 720 Journalism Internship). Students must get a B or better in ENGL 621 Newswriting, complete ENGL 631 Digital Reporting and have permission of the ENGL 631 instructor to do the internship. A faculty member supervises the internships, which are central to the English/journalism major, requiring students to use their new skills in a professional environment.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

English/journalism majors may use one major-required course to satisfy one Discovery category requirement.

Majors may only count one online course toward their English major requirements.

Students interested in the English/journalism major should see Carla Cannizzaro, coordinator of the Department of English, 230F Hamilton Smith Hall, (603) 862-1313, or the director of the Journalism Program.

English Minor

https://cola.unh.edu/english/program/minor/english

The English minor offers students the opportunity to develop critical thinking, writing and research skills that will enrich both their personal lives and their professional careers. Students draw upon courses in literature, creative writing, journalism and linguistics to craft their own course of study.

Students interested in minoring in English may contact Carla Cannizzaro, coordinator of the Department of English, 230F Hamilton Smith Hall, (603) 862-1313 with any questions.
Requirements

To minor in English at UNH, students complete five courses (20 credits).

1 Elective courses: at least three courses at the 600 level or above.

ENGL 401 First-Year Writing and ENGL 415s, "Literature and..." courses cannot be applied toward the English minor.

No more than two transfer courses may be applied toward the English minor.

The minimum acceptable grade for each course is C-.

Writing Minor

https://cola.unh.edu/english/program/minor/writing

Description

With employers stressing the importance of writing skills and the writing demands of all professions increasing, the writing minor is designed to serve students who want to demonstrate sustained work with writing. Students take a concentration of courses in creative writing or journalism, focusing on the creative and practical uses of writing. The completion of a writing minor will enhance the job prospects in fields where the demands for writing is higher than ever. The writing minor also serves students who want to use the imagination to develop stories, poems, essays and screenplays.

Requirements

Students must complete at least five 4-credit courses (20 credits) from the list of approved courses. At least three of the courses must be at the 600 level or higher. ENGL 415s, "Literature and..." courses cannot be applied toward the English minor. The minimum acceptable grade for each course is C-. No more than two transfer courses can be applied toward the English writing minor. English literature and English teaching majors may declare a writing minor with the approval of their faculty adviser. A maximum of two English courses (8 credits) are allowed to double-count toward the literature or teaching major and writing minor. Other English Department majors are not eligible to declare a writing minor.

At the beginning of your final semester of study at UNH, please fill out a Certification of Completion of Minor form and obtain signatures from your major advisor, the English department coordinator, and the Dean of your college.

Students interested in minoring in English writing may contact Carla Cannizzaro, coordinator of the Department of English, 230F Hamilton Smith Hall, (603) 862-1313 with any questions.

French (FREN)

Study Abroad in Dijon

The department offers a junior year and semesters abroad at the University of Burgundy in Dijon, France (see FREN 690 Study Abroad in Dijon France). This program is open to all qualified students at the University of New Hampshire who have completed, FREN 631 Advanced French: Reading and Writing-FREN 632 Advanced French: Listening and Speaking and FREN 651 Love, War, and Power in French Literature-FREN 652 Greatest Hits of French by the end of the semester preceding their departure. Early consultation with the director of the program is necessary to participate. Study in Dijon can satisfy the language requirement. Consult faculty of the French program to ensure proper placement. For French majors, the summer course can only satisfy the non-credit orientation meetings are required during the semester prior to departure.

Summer Study in Dijon

This program is open to all students interested in an immersion program during the summer. It provides four to eight weeks of intensive courses in French at the CIEF (Centre International des Etudes françaises) at the Université de Bourgogne in Dijon, France. A minimum GPA of 2.5 is required. Special fee. 4 to 8 credits. No previous study of the language is necessary to participate. Study in Dijon can satisfy the language requirement. Consult faculty of the French program to ensure proper placement. For French majors, the summer course can only satisfy the study abroad requirement of those who have documented academic reasons preventing them from studying abroad for an entire semester. By petition only.

Teaching Assistantship in France

Each year the French government offers teaching assistantships in French elementary or secondary schools for graduating students who
have studied French. The application process begins during the fall semester of the senior year.

French Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/french-major

Description

The undergraduate major in French offered by the Department of Languages, Literatures and Cultures is centered on the study of the French language and the literatures and cultures of France and the French-speaking world. Students who complete the requirements for the major can expect to become proficient in French at a level that would allow them to communicate with native speakers, to develop an in-depth critical appreciation of French and Francophone cultures and literatures, and to be culturally sensitive members of society.

The program offers courses devoted to authors, works, and literary and cultural movements that span ten centuries and four continents. The curriculum also includes interdisciplinary courses on relations between literature and other areas of study such as history, law, religion, politics and the arts. All courses are conducted in French, and majors are expected to write papers and examinations in that language.

French can be taken either as a primary major or as one of two majors, in consultation with the director of undergraduate studies. Appropriate majors to combine with French might include, but are not limited to, international affairs, political science, English, education, film and media studies, history, music, philosophy, theater studies, women’s studies, business and communication.

The French major may interest students desiring a general humanistic education based on the language and literature of the French-speaking world; students planning to teach French at the elementary or secondary level; students who intend to pursue graduate work in preparation for teaching and research at the college level; and students preparing for careers in such areas as international law, business, journalism, international organizations, and public or government service, which require both training in a major foreign language and/or a general background in a humanistic discipline.

Requirements

A major consists of 40 credits in courses numbered 631 or above, in which readings are in French. Coursework for the French major must be completed with a grade of C or better. Majors are required to take:

<table>

Total Credits 40

Students are required to enroll in at least one course each semester in their major program and to spend at least one semester abroad in a French-speaking country. The UNH-managed program in Dijon is highly recommended and offers year- and semester-long options. Other options are available, but non-UNH programs must be chosen in consultation with a major adviser and the UNH Global Education Center. (https://www.unh.edu/global/about) Students in majors with inflexible curricula (like engineering, some sciences, and health care) who wish to complete a second major in French should consult with a French advisor about possible alternative means of satisfying the study abroad requirement.

Transfer students must earn a minimum of 12 major credits at the Durham campus. Of these 12 credits, one course must be FREN 790 Cultural Encounters: A View from Abroad and at least one 700-level course in French/ Francophone literature.

The Discovery Program capstone requirement may be fulfilled by completing FREN 790 Cultural Encounters: A View from Abroad.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

French majors may use two major-required courses to satisfy two Discovery category requirements.
French Studies Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/french-studies

**Description**

This major gives students a variety of perspectives not only on French and Francophone literature but also on a variety of other issues pertaining to the Francophone world. A major in French studies prepares graduates to negotiate successfully the economic reality of an increasingly international job market, and provides them with a wide range of career prospects after they leave the University.

**Requirements**

The major consists of 44 credits in French courses numbered 631 or above and of cross-listed courses in other departments, including the following requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

French studies majors may use two major-required courses to satisfy two Discovery category requirements.

French Minor

https://cola.unh.edu/languages-literatures-cultures/program/minor/french

**Description**

The minor in French provides students with the components of a well-rounded education: a solid understanding of grammar and pronunciation, intercultural awareness, exposure to Francophone literatures and cultures, and a sufficient command of the language to enhance their chosen field of study, and countless career opportunities across the public, private and nonprofit sectors, including government, international development, journalism, law, communications and business.

Students in the French minor program at UNH are encouraged to complete some portion of their undergraduate study abroad through the Study Abroad in Dijon. Given the increasing globalization of our world, living abroad enhances cross-cultural awareness, competency, and adaptability. Students find that living and studying abroad expands their perspective, improves critical thinking, increases independence and better prepares them for a career in an increasingly global marketplace.

**Requirements**

A minor in French consists of 20 credits in French courses numbered FREN 503 Intermediate French I and above.

<table>

Total Credits 20

- No fewer than three courses have to be taken at UNH.
- No more than one course conducted in English (e.g., FREN 525 A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond) will be counted toward the minor, although students may elect to take more than one such course provided they earn more than 20 credits.
- Those entering the minor at FREN 504 Intermediate French II or higher will be expected to complete FREN 651 Love, War, and Power in French Literature or FREN 652 Greatest Hits of French.
- After completing the five required courses, students submit a Certification of Completion of Minor (https://unh.app.box.com/v/minor-form).

1 These are to be chosen in consultation with a faculty adviser from among the following departments: history, geography, or anthropology, one 600- to 700-level course; art history or music, one 600- to 700-level course; economics, political science, or education, one 600- to 700-level course.

Coursework for the French studies major must be completed with a grade of C or better. French Minor

https://cola.unh.edu/languages-literatures-cultures/program/minor/french

**Description**

The minor in French provides students with the components of a well-rounded education: a solid understanding of grammar and pronunciation, intercultural awareness, exposure to Francophone literatures and cultures, and a sufficient command of the language to enhance their chosen field of study, and countless career opportunities across the public, private and nonprofit sectors, including government, international development, journalism, law, communications and business.

Students in the French minor program at UNH are encouraged to complete some portion of their undergraduate study abroad through the Study Abroad in Dijon. Given the increasing globalization of our world, living abroad enhances cross-cultural awareness, competency, and adaptability. Students find that living and studying abroad expands their perspective, improves critical thinking, increases independence and better prepares them for a career in an increasingly global marketplace.

**Requirements**

A minor in French consists of 20 credits in French courses numbered FREN 503 Intermediate French I and above.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select 5 French courses numbered 503 and above</td>
<td>20</td>
</tr>
</tbody>
</table>

Total Credits 20

- No fewer than three courses have to be taken at UNH.
- No more than one course conducted in English (e.g., FREN 525 A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond) will be counted toward the minor, although students may elect to take more than one such course provided they earn more than 20 credits.
- Those entering the minor at FREN 504 Intermediate French II or higher will be expected to complete FREN 651 Love, War, and Power in French Literature or FREN 652 Greatest Hits of French.
- After completing the five required courses, students submit a Certification of Completion of Minor (https://unh.app.box.com/v/minor-form).
French Studies Minor

https://cola.unh.edu/languages-literatures-cultures/program/minor/french-studies

Description

Students who minor in French or French studies learn to perfect their communications skills, explore works of imaginative literature in French, and investigate dimensions of historical and contemporary civilization and culture in one or more French-speaking countries.

Requirements

The minor in French studies consists of 20 credits numbered FREN 503 Intermediate French I or above.

Geography (GEOG)

Geography, as the study of place, space and environment, addresses the "why of where" by uniting social and biophysical sciences, humanities and technology to examine the factors that make a place or environment unique. Connecting academic inquiry to real-world problem solving, you will develop critical thinking skills and be prepared to transfer classroom and field experience into a wide range of careers. With interests ranging from globalization to climate change and sustainability, urbanization to community development at home and abroad, UNH geography graduates have gone on to careers in urban, regional and transportation planning, community development, environmental conservation and natural resources management, sustainability science, geographic information science, market research, locational analysis, population studies, foreign aid, international diplomacy and education.

Requirements

To earn a bachelor of arts in geography, students must complete 10 geography courses with a minimum grade of C-minus:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<tr>
<td></td>
<td>Select five elective courses.</td>
<td></td>
</tr>
</tbody>
</table>

Foundation Courses

Foundation courses are intended to provide students a basic understanding of human, physical, and world regional geography. It is recommended they be taken as early as possible in a student’s program.

All geography majors must complete three foundation courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>
**Elective Courses**

Elective courses may be any additional four geography courses, excluding 401 or 402, PLUS one 600+ writing intensive course (Discovery Program Capstone).

Independent study courses including GEOG 695 Internship, GEOG 795 Special Project, and GEOG 799 Honors Thesis may be applied to the major elective requirement once if taken for a total of four credit hours.

To minor in geography, you must complete any five geography courses (at least 20 credit hours) with a grade of at least C-.

</tbody>
</table>

**Geotechniques**

Students interested in geographic information systems, remote sensing, locational analysis and other geographic techniques may specialize in Geotechniques by completing three 700-level methods courses in Geography (GEOG 750-769).

**Additional Requirements**

Major department courses may be used to satisfy two Discovery category requirements excluding courses taken for foundation course credit and unlimited in the case of a second major.

The university’s foreign language requirement may not be fulfilled by American Sign Language except by petition.

Students intending to major in geography should consult with the department chairperson.

---

**Geography Minor**

https://cola.unh.edu/geography/program/minor/geography

**Description**

The geography minor allows undergraduates to explore one or more of the three main areas of geography — human geography, environmental geography and geotechniques. Studying geography prepares students to pursue a wide variety of careers or enter graduate school.

**Requirements**

To minor in geography, you must complete any five geography courses (at least 20 credit hours) with a grade of at least C-.

**Course 4**

Select five geography courses

Total Credits 20

Courses taken Pass/Fail cannot be used for the minor. All minor courses can be used to fulfill Discovery Program requirements.

At the beginning of your final semester at UNH you should complete a Certification of Completion of Minor form (http://www.unh.edu/registrar/regforms/minorform.pdf). The minor must be approved by your major and minor supervisors. The completed form is then presented to the college dean for approval and, finally, forwarded to the Registrar.

Please direct questions about minoring in geography to Mary Stampone (mary.stampone@unh.edu), Chair.

**German (GERM)**

German is the most widely spoken language in Europe, and Germany plays a leading role in a number of areas: EU and global trade and policy, fine arts, alternative energy and sustainability, engineering, philosophy. With their rich cultural and intellectual history, as well as one of the world’s primary export-driven economies, the German-speaking countries offer unique career opportunities point for globally minded students and citizens.

**Summer Study in Berlin, Germany**

The UNH German Program manages a summer program in Berlin, Germany. During their study in Berlin, students can earn between 4 and 12 credits. The program provides students with an immersion experience in the German language and culture. Students receive language instruction at the appropriate level (elementary, intermediate, or advanced) at the BSI Private Language School in central Berlin. No prior German language study is required. On designated weekday afternoons, students participate in cultural excursions and discussions with the on-site UNH faculty member. Through the UNH Berlin summer program, students receive UNH credit and can fulfill the World Cultures Discovery requirement. In line with UNH’s goals to educate students to become global citizens, this immersion program gives students insight into what it means to experience a different culture and language. For more information, contact Charles Vannette (https://cola.unh.edu/person/charles-m-vannette) or visit the COLA Center for Study Abroad. (https://cola.unh.edu/center-study-abroad/programs/germany-berlin-program)
Other Programs
The University allows students to attend approved study abroad (https://www.unh.edu/global/programs?country%5B%5D=565&city=&field_program_courses_value=&program_type=&provider=8&term=All) programs for UNH credit at schools in Germany and Austria. Students may attend accredited one- or two-semester programs at universities in cities like Munich, Vienna, Berlin, Heidelberg, Freiburg or Salzburg. Most study abroad programs require a minimum of two years of college German. For details, see the German coordinator of the foreign studies coordinator at the UNH Global Education Center (https://www.unh.edu/global/about). Internships with a German firm or organization may also be taken for credit (see GERM 595 Internship (p. )). Internships must be approved ahead of time in collaboration with an advisor in the German program. Financial aid applies to all approved programs.

https://cola.unh.edu/languages-literatures-cultures

Programs

• German Major (B.A.) (p. 80)
• German Minor (p. 81)

Faculty

https://cola.unh.edu/languages-literatures-cultures/faculty-staff-directory

German Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/german-major

Description

The German major is offered by the Department of Languages, Literatures and Cultures. This program is of interest to the following groups of students:

• Those who have a special interest in the German language, literature and culture.
• Those who intend to enter fields in which a background in foreign languages and cultures is desirable, such as business, engineering, the sciences, law, international affairs, government service and international service.
• Those who plan to teach German in secondary schools. Since most secondary schools require their teachers to teach more than one subject, students planning to enter teaching at this level should plan their programs carefully. They should combine a major in one culture and language with a minor or at least a meaningful sequence of courses in another subject. Dual majors also are possible. For certification requirements, see the section coordinator.

All German majors are strongly encouraged to double major or include a relevant minor in their studies.

Requirements

A major consists of 10 courses in German beyond GERM 402 Elementary German II. Courses required for the major (or their equivalents):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 503</td>
<td>Intermediate German I</td>
<td>4</td>
</tr>
<tr>

</tr>
<tr>
<td>GERM 525</td>
<td>Introduction to German Culture and Civilization</td>
<td>4</td>
</tr>
<tr>
<td>GERM 631W</td>
<td>Advanced Communications Skills I</td>
<td>4</td>
</tr>
<tr>
<td>GERM 632</td>
<td>Advanced Communications Skills II</td>
<td>4</td>
</tr>
<tr>
<td>Select four courses, taken at the 600 or 700 levels</td>
<td>16</td>
<td></td>
</tr>
<tr>
<td>Capstone: Select one course at the 700 level</td>
<td>4</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 40

1 A successful IROP or SURF application may count as one of the 700-level courses. One upper-division German course can be replaced with one of the following courses:
   GERM 500 Selected Topics in World Literature
   GERM 521 Major German Authors in English
   GERM 524 German Cinema
   LLC 535A Professional Culture in European Union -- Case Study: Germany
   LLC 551 Comparative Literature: Masterpieces of World Literature I
   LLC 552 Comparative Literature: Masterpieces of World Literature II
   LLC 642 Theory and Practice of Translation
   HIST #602 Holocaust: The War on Europe's Jews
   HIST #669 Germany from 1918 to Present
   ENGL 693 Special Topics in Literature
   PHIL 496 Topics
   ARTS 680 Iconoclasm and Collecting: The Art of Early Modern Northern Europe
   POLT 552 Contemporary European Politics

Student are strongly encouraged to take a GERM or LLC course to complete their major. Students must petition the German Program for the acceptance of non-GERM or LLC courses towards the German major. Courses not listed above must be discussed ahead of time with a German faculty member.

2 Including GERM 797 Special Studies in German Language and Literature and GERM 798 Special Studies in German Language and Literature

A grade of C- or better is required in all major coursework. Majors are required to spend a minimum of one semester in an approved German-speaking study abroad program, or at least eight weeks in a summer study program. For students spending one semester abroad, two or three of the five upper-level courses are normally taken in Durham. For students spending a whole academic year abroad, one or two of the five upper-level courses are normally taken in Durham. LLC 791 Methods of Foreign Language Teaching does not count for major credit; LLC 791 Methods of Foreign Language Teaching is recommended as an elective and required for teacher certification.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.
German majors may use two major-required courses to satisfy two Discovery category requirements.

**German Minor**

https://cola.unh.edu/languages-literatures-cultures/program/minor/german

**Description**

The German minor is offered by the Department of Languages, Literatures and Cultures. This program is of interest to the following groups of students:

- Those who have a special interest in the German language, literature and culture.
- Those who intend to enter fields in which a background in foreign languages and cultures is desirable, such as business, engineering, the sciences, law, international affairs, government service and international service.

**Requirements**

A minor consists of five courses in German numbered 503 and above.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Five electives selected from GERM 503 or above</td>
<td>20</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>20</td>
</tr>
</tbody>
</table>

The minor may include one course taught in English but not LLC 791 Methods of Foreign Language Teaching.

Students wishing to minor are expected to meet with a faculty member from the German program to discuss their course of study.

At the beginning of your final semester of study, you should fill out a certification of completion of minor form (http://www.unh.edu/registrar/regforms/minorform.pdf), obtain the necessary signatures, and submit it to your Dean’s Office.

**History (HIST)**

The Department of History is one of the top history departments in the country, with an internationally recognized faculty in American, European, and World and Ancient history. History professors have won some of the most important prizes in the profession, and they often appear on television and other media outlets. But what really distinguishes the department’s faculty is that we love to teach. Our courses cover a wide range of times, places and subjects, from ancient history to the history of the modern world.

History is a flexible major, which makes it a good choice for students who want to complete a double major in another discipline. Popular double majors include communication, justice studies, economics and international affairs.

The Education Department’s 4+1 graduate program is also available to history majors. Students who complete that program receive their social studies teacher certification in five years and graduate with a B.A. and M.Ed. or M.A.T.

The Department offers a major and minor in history. We also administer two interdisciplinary minors: the social studies of science and technology minor and the religious studies minor.

The History Department at UNH has approximately 200 undergraduate majors; about 50 students graduate with a history major every year.

https://cola.unh.edu/history

**Programs**

- History Major (B.A.) (p. 81)
- History Major: Law 3+3 Option (B.A.) (p. 82)
- History Minor (p. 85)
- Religious Studies Minor (p. 85)
- Social Studies of Science and Technology Minor (p. 86)

**Faculty**

https://cola.unh.edu/history/faculty-staff-directory

**History Major (B.A.)**

https://cola.unh.edu/history/program/ba/history

**Description**

The study of history gives students the analytical and communication skills necessary to succeed in today’s workplace. It is also essential for being an informed citizen. The history major covers an array of subjects: the Roman Empire, modern U.S. foreign policy, China’s Cultural Revolution, medieval Islam, the American Revolution and many, many others. Every major takes an introductory seminar on historical writing and analysis, and the major concludes with a senior colloquium that allows students to conduct in-depth research on a topic of their choosing. History is a flexible major. That makes history an excellent choice for students who plan to study abroad or who want to complete a double major in another discipline.

Students sometimes ask, “what can you do with a history major?” The answer is practically anything you want. History majors have attended some of the top graduate programs in the country. Many become teachers, but history majors also go into law, medicine and business, as well as careers in technology, international relations, politics and the media. Majoring in history prepares students well for the intellectual flexibility and ability to think outside the box that today’s job market demands.

**Undergraduate Awards for Majors**

The Philip M. Marston Scholarship, an award of $500, is available to students who are interested in colonial or New England history and have demonstrated financial need. There are course requirements for this scholarship. More details are available from the history office.

Each spring, the members of the departmental undergraduate committee choose history majors to receive the following prizes in history:

- The William Greenleaf Prize is given for the best senior colloquium paper. Award candidates must have a minimum grade-point average
A student's program of study must include two parts:

1. An area of specialization. A student must select at least four courses to serve as an area of specialization within the major. Up to two courses (each four credits or their equivalent) in the area of specialization may be taken in other departments; such courses must be 500-level or above and have the approval of the student's advisor. The area of specialization may be in a nation, region, a time period, global history, or one of the following:
   * ancient and pre-modern worlds
   * cultural and intellectual history
   * empires and colonialism
   * international and diplomatic history
   * politics, law, and government
   * race, gender, and sexuality
   * religion
   * revolution and social change
   * science, technology, medicine, and the environment
   * war and society
   * world economy
   * design your own (with advisor’s permission)

2. Complementary courses. A student must select, in consultation with his or her advisor, at least three history courses in fields outside the area of specialization, chosen to broaden his or her understanding of the range of history. Each major should take at least one course from each of Groups I, II, and III. Group I contains all American history courses, Group II contains all European history courses, and Group III contains all other history courses.

The program must be planned in consultation with an advisor. A copy of the program, signed by the advisor, must be placed in a student’s file no later than the second semester of the student’s junior year. Courses at the 700-level will be judged by the advisor as to their applicability for area of specialization. The program may be modified with the advisor’s approval.

Only one HIST 695 Independent Study may be used to fulfill the 600-level requirement, and no more than two Independent Study courses may count toward the ten-course requirement. No more than two 400-level courses may be counted toward the major requirements. Students must receive at least a C in HIST 500 Introduction to Historical Thinking and at least a C- in the other nine courses. Majors must maintain a 2.0 or better in all history courses.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of Arts (B.A.) candidates must also satisfy the foreign language proficiency requirement.

History majors may use history courses to fulfill Discovery category requirements but may not double-count history courses for major and Discovery category requirements.

History majors must satisfy the language requirement for the B.A. degree in an international language that they could use for historical research. That list includes Arabic, Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students may petition the department curriculum committee for exceptions.

For transfer students, a minimum of five (5) of the semester courses used to fulfill the major requirements must be taken at the University. One upper-level course may be transferred to satisfy the requirement that a major must take at least three courses numbered 600 or above. Transfer students must complete both HIST 500 Introduction to Historical Thinking (or its equivalent) and HIST 797 Colloquium.

Students intending further work in history beyond the bachelor’s degree are urged to take HIST 775 Historical Methods. Students intending to major in history should consult with the department administrative assistant. Suggested programs for students with special interests or professional plans are available in the department office.

**History Major: Law 3+3 Option (B.A.)**

https://cola.unh.edu/history/program/ba/history-major-law-33-option

**Description**

The Law 3+3 option offers highly motivated UNH undergraduates the opportunity to complete their bachelor’s degree (B.A.) with a history major and their law degree (J.D.) at UNH in six years, rather than the usual seven years. It promises significant savings in both time and money. Students apply to the UNH Law School in their junior year (by Jan. 1), following the approved process below, and after taking the LSAT exam.
Eligibility and Admission Process

1) Phase I: applying to the Law 3+3 option. Students apply to the program either when they submit their applications to UNH by selecting the History/J.D. option on the online application, or after they are admitted, applying directly to the History Department's History/Law 3+3 Committee. In both cases, undergraduate applicants must fulfill the general requirements for admission to the History major.

   a. Students applying at time of admission to UNH will typically present the following high school (HS) credentials:
      - a 3.5 GPA in HS
      - a rigorous HS curriculum defined as the following:
        - 4 years of college prep (CP) or higher English
        - 4 years of CP or higher mathematics
        - 4 years of CP or higher social studies/history
        - Completed at least level 3 of a foreign language
        - 3 or more years of CP or higher laboratory sciences
        - a score of 1200 or better (combined Math and Verbal) on the SAT or a 29 on the ACT

   b. Currently enrolled UNH students applying to the program must:
      - have a 3.5 GPA in college courses at time of application.
      - The History/Law 3+3 Committee governing admission to the program will also consider past SAT scores, maturity, and ability to complete a highly demanding program of study based on performance thus far.

For both groups, it is important to note that satisfying these requirements does not guarantee admission to this program. The review process is holistic (meaning all parts of the application carry weight and influence the final decision) and other components of the application will influence any admission decisions. Available space will also influence who is admitted to the program and how many students can be accepted.

2) Phase II: applying to UNH Law School. To be eligible, students must:

    - Complete all Discovery and major requirements, and accrue at least 98 credits before beginning law school in their senior year
    - Maintain at least a 3.5 grade point average (including transfer credits) at time of application to law school, and at end of junior year
    - Take the LSAT no later than December of the final undergraduate year (i.e. the junior year) and have a score of 157 or above
    - Submit the law school application through the Law School Admissions Council by Jan. 1 of the calendar year in which the student wishes to enroll in law school
    - If, for some reason, students are not admitted to UNH Law, they will complete their final, fourth year at UNH, following the typical undergraduate program.

Requirements

Students in the History/Law 3+3 option complete the requirements of the history major. See the Degree Plan for the recommended path through the major.

To complete a major in history, students must take ten (10) 4-credit history courses or their equivalent. Students who enter the University as history majors, or who declare a major in history, should take the first required course, HIST 500 Introduction to Historical Thinking, as soon as possible. To declare a major in history, students must have completed or be enrolled in two history courses. HIST 500 Introduction to Historical Thinking is a prerequisite for the second required course, HIST 797 Colloquium, which fulfills the Discovery Program capstone requirement for history majors and is taken during the senior year. Students should consult the list of topics for HIST 797 Colloquium advertised each semester.

History Major Requirements

<table>
<thead>
<tr>
<th>Code</th>

</thead>
<tbody>
<tr>
<td>HIST 500</td>
<td>Introduction to Historical Thinking</td>
<td>4</td>
</tr>
<tr>
<td>HIST 797</td>
<td>Colloquium</td>
<td>4</td>
</tr>
</tbody>
</table>

At least eight (8) additional courses, following the guidelines below.

No more than two (2) may be at the 400-level and a minimum of three (3) must be at the 600-level or above.

| Total Credits | 40 |

A student’s program of study must include two parts:

1. An area of specialization. A student must select at least four courses to serve as an area of specialization within the major. Up to two courses (each four credits or their equivalent) in the area of specialization may be taken in other departments; such courses must be 500-level or above and have the approval of the student’s advisor. The area of specialization may be in a nation, region, a time period, global history, or one of the following:
   * ancient and pre-modern worlds
   * cultural and intellectual history
   * empires and colonialism
   * international and diplomatic history
   * politics, law, and government
   * race, gender, and sexuality
   * religion
   * revolution and social change
   * science, technology, medicine, and the environment
   * war and society
   * world economy
   * design your own (with advisor’s permission)

2. Complementary courses. A student must select, in consultation with his or her advisor, at least three history courses in fields outside the area of specialization, chosen to broaden his or her understanding of the range of history. Each major should take at least one course from each of Groups I, II, and III. Group I contains all American history courses, Group II contains all European history courses, and Group III contains all other history courses.

The program must be planned in consultation with an advisor. A copy of the program, signed by the advisor, must be placed in a student’s file no later than the second semester of the student’s junior year. Courses at the 700-level will be judged by the advisor as to their applicability for
area of specialization. The program may be modified with the advisor’s approval.

Only one HIST 695 Independent Study may be used to fulfill the 600-level requirement, and no more than two Independent Study courses may count toward the ten-course requirement. No more than two 400-level courses may be counted toward the major requirements. Students must receive at least a C in HIST 500 Introduction to Historical Thinking and at least a C- in the other nine courses. Majors must maintain a 2.0 or better in all history courses.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of Arts (B.A.) candidates must also satisfy the foreign language proficiency requirement.

History majors may use history courses to fulfill Discovery category requirements but may not double-count history courses for major and Discovery category requirements.

History majors must satisfy the language requirement for the B.A. degree in an international language that they could use for historical research. That list includes Arabic, Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students may petition the department curriculum committee for exceptions.

For transfer students, a minimum of five (5) of the semester courses used to fulfill the major requirements must be taken at the University. One upper-level course may be transferred to satisfy the requirement that a major must take at least three courses numbered 600 or above. Transfer students must complete both HIST 500 Introduction to Historical Thinking (or its equivalent) and HIST 797 Colloquium.

### Degree Plan

#### Undergraduate Courses

Below is a suggested course outline. There might be other possible plans.

**NOTE:** Students should plan early and work closely with their advisors if they want to pursue the fast track program. It may be possible to include study abroad and other programs, if desired, but only with careful planning. They are also strongly encouraged to consult with the pre-law advisor on campus (Paula DiNardo, paula.dinardo@unh.edu, 603-862-2064.)

**TOTAL UNDERGRADUATE CREDITS REQUIRED - 98 cr.**

40 total Discovery Program credits; 40 history credits; 4-8 foreign language credits; 8-12 elective credits; and two 1-credit courses OR one 2-credit course. Additionally, to fulfill the Discovery Program and history major requirements, students need to fulfill the Bachelor of Arts foreign language requirement and take four (4) writing intensive courses. HIST 500 Introduction to Historical Thinking and HIST 797 Colloquium fulfill two (2) WI courses.
Clarification: to earn 98 credits in 3 years, students will need to take one (1) 2-credit course or two (2) 1-credit courses. The 2-credit course, LAW 475 Getting Ready to Succeed in Law School, is recommended and is best taken in the spring semester of sophomore year or the fall semester of the junior year as it will include LSAT prep. Other 2-credit options include JUST 550 Mock Trial and JUST 551 Mock Trial. For other possible 1-2 credit courses, see the Time & Room Schedule. The 1-2 credit courses can be completed at any point in your first 3 years at UNH-Durham. You can also complete them during the January term [see, e.g., THDA 531 The London Experience: Discovery, a 2-credit study abroad program] or in the summer.

LAW SCHOOL COURSES

After completing the first year courses (above), the schedule and track of the second and third years of law school are directed by each student with careful advising from the law faculty. The following summarizes the required curriculum and bar-recommended curriculum. 85 credits are required for graduation.

Required courses include:
Administrative Process
Criminal Procedure
Professional Responsibility
Upper Level Writing Course
Upper Level Skills Course

Bar-recommended courses include:
Personal Taxation
Business Associations
Wills, Trusts, and Estates
Evidence

History Minor
https://cola.unh.edu/history/program/minor/history

Description
The study of history is an essential element of the liberal education. Studying history provides both an awareness of the past and the tools to evaluate and express one’s knowledge.

Requirements
A minor in history consists of 20 semester credits with C- or better and at least a 2.0 grade-point average in courses that the Department of History approves.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

- Courses taken on a pass/fail basis may not be used for the minor.
- No more than 12 credits in 400-level courses may be used for this minor.
- For transfer students, no more than two transfer courses, or 8 transfer credits, may be used toward the minor.

Religious Studies Minor
https://cola.unh.edu/history/program/minor/religious-studies

Description
The religious studies program at the University of New Hampshire currently offers an interdisciplinary minor, bringing together courses in several fields that address religion as a cross-cultural and experiential phenomenon. Topics include beliefs, rituals and the meaning of life as explored in a variety of religious traditions. A religious studies major is available through the self-designed major program.

For more information, consult the director:
Funso Afolayan
Department of History
415 Horton Social Science Center
(603) 862-3026
e-mail funso.afolayan@unh.edu.

Total Credits 20

Students especially interested in religious studies are encouraged to combine the minor with further pertinent coursework in one of the established departments contributing to the program: history, philosophy, anthropology, and English. The religious studies self-designed major involves seven courses beyond the minor requirements, at least five of which are 600 level or higher. The program director can aid in advising such a major program.

Courses ordinarily have some degree of focus on issues related to the academic study of religion, conceptualizing religion, or religious influences as a principal problem, asking comparative questions, and/or developing models of cross-cultural usefulness. Courses listed here generally are offered at least once every two years:

- **Historical-Cultural**
  - RS 483W History of World Religions 4
  - HIST 483 Medieval Islam 4
  - HIST 585 History of Africa from the Earliest Times to 1870 4
  - HIST 587 Islam in Africa 4
  - HIST 642 Saints, Sinners, and Heretics: Europe in the Age of Religious Reform 4

- **Theoretical**
  - PHIL 417 God, Religion, and the Meaning of Life 4
  - ANTH 616 Religion, Culture, and Society 4
  - RS 699 Seminar in Religious Studies 4

- **Textual**
  - ENGL 518 Bible as Literature 4
  - RS/HIST 601 Seminar in Religious Texts 4

Interested students also should be alert for special topics courses in history (HIST 600 Explorations), English, anthropology (ANTH 500 Peoples and Cultures of the World), religious studies (RS 600 Special Topics), and other disciplines that might be relevant to the study of religion.

Students interested in the religious studies minor should see the director to fill out an intent-to-minor form by the beginning of their junior year.

### Social Studies of Science and Technology Minor

https://cola.unh.edu/history/program/minor/social-studies-science-technology

#### Description

How are our lives being changed by technology? Why is science so influential in our society? Is modern science superior to traditional ways of knowing nature? Are science and technology doing more harm than good? The minor in social studies of science and technology enables students to seek answers to such questions through the perspectives of the humanities and social sciences. In this minor, students select courses from a range of disciplines, including anthropology, history, communication, sociology and philosophy, all of which shed light on the role of science and technology in modern society.

The minor presupposes no specialized scientific background and may be combined with any undergraduate major. Students must pass five 4-credit courses, chosen from the list of approved courses, with a grade of C- or better. No more than three courses should be chosen from any one department.

Students interested in taking the minor should contact the coordinator, Fredrik Meiton, Department of History, Horton Social Science Center, e-mail Fredrik.Meiton@unh.edu.

#### Requirements

To complete a minor in social studies of science and technology, students must complete five courses (20 credits) with a grade of C- or better, choosing no more than three courses from a single department.

<table>
<thead>

- HIST 622 History of American Thought
- HIST 652 Topics in European Intellectual History
- HIST 654 Topics in History of Science
- HIST 690 Seminar: Historical Explo
Students combine our curriculum with another, disciplinary major that allows them to pursue a narrower field of study in some depth. The dual major in interdisciplinary humanities offers students a set of tools and skills so they can understand and forge our 21st century world. Its curriculum provides structure, progression, and rigor. Citizens of the 21st century need to know how to analyze texts and navigate cultures. That is why the humanities are essential to the lives of educated people.

Requirements

The humanities dual major consists of a minimum of 32 credits of academic work, with a minimum grade of C-. Students cannot declare the dual major until they have declared a primary major. They must have a GPA of 2.75 to be accepted to the dual major program.

</tbody>
</table>

Additional Requirements (16 Credits)

Select four area courses in HUMA (500 level or above) from at least three of five areas of disciplinary focus

1. Students will be made acquainted with the methods and technology required for research in humanities.
2. This seminar provides an opportunity for in-depth reading, viewing, and/or listening to texts and artifacts. The emphasis is on the multiple perspectives and methodologies that can be brought to bear upon these works from several humanistic disciplines.
3. Each student participates in the research tutorial (for a total of 6 credits) throughout the senior year. The tutorial provides a context within which students may discuss and receive direction in the course of completing a major research paper, the senior thesis. At the end of the second semester, students present their research to the faculty and their fellow students.
Selected with the advice and approval of each student’s major adviser or the program coordinator. These offerings should bear some relation to the student’s particular interests and senior research paper, as seems appropriate in each individual case.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

**Humanities Minor**

https://cola.unh.edu/classics-humanities-italian-studies/program/minor/humanities

**Description**

There has never been a more exciting time to be human—or has there? What exactly does it mean to be a human being in the twenty-first century? How can you get the most out of your humanity? Find out by minoring in the humanities. It can help prepare you for a life you may not have considered, in ways you’ve never imagined.

**International Affairs (IA)**

The international affairs program offers undergraduate students the opportunity to pursue a dual major or a minor in international affairs (IA). The dual major and minor pair with any primary major in any college at UNH. The IA program adds an international dimension to the primary major and expands career opportunities in a global, interdependent world. IA courses core courses are interdisciplinary, taught by faculty with expertise in international studies from around the university. Required IA courses and IA elective courses help students appreciate complex interconnections among nations and peoples and equip them with the analytical skills, cultural competence, and global perspectives needed for careers in the public, private and nonprofit sectors.

**International Affairs Dual Major**

https://cola.unh.edu/international-affairs/program/international-affairs-dual-major

**Description**

The international affairs (IA) dual major can complement and add a global dimension to any other major at UNH. The completion of the dual major requires no additional credits for graduation beyond the 128 required of all UNH students. All coursework required for international affairs must be completed with a grade of C or better. For information, contact the International Affairs Program Assistant (https://cola.unh.edu/international-affairs/contact-us).

Students who wish to declare international affairs dual major must earn a C or better in IA 401, have declared a primary major, and have a 2.5 cumulative grade-point average. Students are expected to maintain at least a 2.5 grade-point average, the minimum required for study abroad at UNH.

**Note:**
Participation in the international affairs dual major and minor is open to ALL students at UNH. For instance, the Department of Civil Engineering has developed a dual-major program in civil engineering and international affairs. Students do not need to have pre-existing skills in a foreign language before coming to UNH. For more information about the civil engineering/IA program, contact Ray Cook at ray.cook@unh.edu.

**Requirements**

Electives - see list below
Select one course from each category list, plus one more course from 12 either category (3 courses total):

Politics, Culture, & History
Science, Environment, Economy, & Health

1 International Affairs Language Requirement
IA majors must demonstrate functional reading, writing, and speaking ability equivalent to a second-year, second-semester college level (504). Students may take placement tests to establish proficiency. Native second language speakers are exempt from this requirement - speak to an IA advisor. Language study may be pursued at UNH; through study abroad in the summer, J-term, or academic year; or through transfer credits from other institutions with the permission of an IA advisor.

2 International Experience - Study Abroad
Minimum of eight weeks. The IA international experience is typically conducted in a country or region that uses the student's second language. Students may pursue their international experience elsewhere after consultation with an IA advisor. The international experience (usually completed in the junior year) is completed before taking IA 701 in the senior year. Students may spend an academic year, semester, or summer in an academic institution, in an internship with a private or public organization, or in purposeful travel/research. Students must meet with the Study Abroad advisors at the Global Education Center (https://www.unh.edu/global/education-abroad) to plan their international experience, typically a year in advance of study abroad.

Electives (three total)
IA Dual Majors take three electives, one course from each category list: Politics, Culture, and History and from Science, Environment, Economy, and Health. IA dual majors choose their 3rd elective from either list. IA electives are offered across the university and may be used to fulfill Discovery, Honors Program and/or other minor requirements. Up to 8 credits may be double counted between your primary major and IA. Additional courses taken in the primary major may count for IA if these courses do not count towards your primary major requirements. Electives may be taken at UNH, on the international experience, or transferred from another university with permission of your IA advisor.

**International Affairs Minor**

https://cola.unh.edu/international-affairs/program/minor/international-affairs

**Description**

The international affairs (IA) minor adds a recognized distinction and global context to any primary major in any college at UNH. It was developed for those students who, due to the demands of their primary majors, are unable to complete the more rigorous requirements of the IA dual major.

Students who wish to declare the international affairs minor must earn a C or better in all IA course requirements and have a 2.5 cumulative grade-point average. The minor is declared when the fifth course is being taken. The student should obtain the declaration form from the IA program assistant.

**Requirements**

International Affairs Language Requirement  
Functional reading, writing, and speaking ability equivalent to a first-year, second-semester college level (402). Students may take placement tests to establish equivalency, include language study on the international experience, or transfer credits from other institutions.

International Experience - Study Abroad  
Minimum of three weeks (or 4 credits). The international experience may include study (https://www.unh.edu/global/education-abroad), directed research, internship or service/volunteer experience abroad. Students should plan with the Study Abroad Advisors to plan for their international experience well in advance.

Electives  
Choose one course from each category list (2 courses total):

| Politics, Culture, & History |
| Science, Environment, Economy, & Health |

Total Credits 20

1 International Affairs Language Requirement  
Functional reading, writing, and speaking ability equivalent to a first-year, second-semester college level (402). Students may take placement tests to establish equivalency, include language study on the international experience, or transfer credits from other institutions.

2 International Experience - Study Abroad  
Minimum of three weeks (or 4 credits). The international experience may include study (https://www.unh.edu/global/education-abroad), directed research, internship or service/volunteer experience abroad. Students should plan with the Study Abroad Advisors to plan for their international experience well in advance.

3 See elective category lists under IA dual major heading. Elective courses may count towards Discovery, Honors, Writing Intensive and major requirements.

Italian Studies (ITAL)  
The Italian studies program offers courses in Italian language, culture, literature, history and cinema, as well as courses on Italian American culture. Italian courses can also be used to fulfill Discovery Program requirements and the Bachelor of Arts foreign language proficiency requirement. In addition to the Italian studies major, an Italian studies minor is available.

The program provides opportunities both to achieve high competence in Italian language and culture and to apply these knowledge skills to other disciplines. The Italian studies program encourages independent and innovative thinking and research so that students may pursue and achieve individualized goals while they prepare for the challenges of thriving in the world community.

Study Abroad  
The Italian studies program allows students to register for approved study abroad programs through the University.

Italian Studies Major (B.A.)  
https://cola.unh.edu/classics-humanities-italian-studies/program/ba/italian-studies-major

Description  
The Italian studies program offers courses in Italian language, culture, literature, history and cinema, as well as courses on Italian American culture. Italian courses can also be used to fulfill Discovery Program requirements and the Bachelor of Arts foreign language proficiency requirement. The program provides opportunities both to achieve high competence in Italian language and culture and to apply these knowledge skills to other disciplines. The Italian studies program encourages independent and innovative thinking and research so that students may pursue and achieve individualized goals while they prepare for the challenges of thriving in the world community.

Requirements  
The Italian studies major curriculum consists of 10 courses (40 credits) that include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITAL 632</td>
<td>Advanced Conversation and Composition II (or equivalent proficiency 0-24)</td>
<td>4</td>
</tr>
</tbody>
</table>

Select sixteen credits minimum at 600-level or above (including ITAL 631 and ITAL 632)  
Select a minimum of one semester approved immersion experience abroad

Select two complementary courses from approved complementary disciplines of classics and humanities (courses from other disciplines must be approved by advisor)  
Select one of the following Discovery capstone requirements:

Thesis:  
ITAL 795 Independent Study in Italian Language and Literature  
or ITAL 796 Independent Study in Italian Language and Literature

Seminar:  
Select one 700-level ITAL course

Internship:  
ITAL 595A Practicum

Select any additional ITAL courses needed to reach 40 credits  
Total Credits 40

Additional Requirements  
• The minimum grade for each major course is a C.
• Once students declare the Italian studies major, they must maintain a 2.5 cumulative grade point average in order to fulfill the study abroad requirement.

Programs  
• Italian Studies Major (B.A.) (p. 93)
• Italian Studies Minor (p. 94)
Italian studies majors may use two major-required courses to satisfy two Discovery category requirements.

**List of POTENTIAL Complementary Discipline Elective Courses**

This list of electives is not exhaustive. Courses from other departments can only be used to satisfy the Italian Studies major requirements after consultation with and subject to the approval of the student’s advisor.

**Italian Studies Minor**

https://cola.unh.edu/classics-humanities-italian-studies/program/minor/italian-studies

**Description**

The Italian studies minor provides students with the opportunity to explore the language, culture, and society of Italy through an interdisciplinary program. The minor is advantageous for applicants to graduate and professional schools in Italian, modern languages, linguistics, film, history, theater, philosophy and law. It is also a valuable asset for careers in economics, international affairs, international business, fashion, teaching, communications, translation, interpretation, government and Foreign Service.

The Italian studies minor is offered by the Department of Classics, Humanities and Italian Studies.

**Requirements**

The minor consists of five courses.

<table>

</tbody>
</table>

† One course from a related field of study may be counted towards the minor, subject to the approval of the Italian studies advisor.

- All courses for the Italian studies minor must be completed with a minimum grade of C.
- New students will be assigned to the proper course in consultation with the section coordinator.

**Justice Studies (JUST)**

Justice studies students think critically about issues that are part of the national conversation concerning justice: race and policing, cybercrime, the opioid crisis, juvenile delinquency, sexual and interpersonal violence, immigrants and refugees, wrongful convictions and bullying. All majors do applied or research internships in New England or Washington. Many spend a semester studying in Budapest and participating in Mock Trial. Our graduates excel in various positions including FBI agents, federal probation and patrol, police officers from local to federal levels, victim/witness advocates, prison wardens, police prosecutors, attorneys and juvenile justice advocates.

### Justice Studies Dual Major

https://cola.unh.edu/justice-studies/program/justice-studies-dual-major

#### Description

The justice studies dual major is an interdisciplinary area that blends topics from humanities departments (e.g., philosophy), social science departments (e.g., psychology, sociology, women's and gender studies), departments that include both humanities and social science faculty (history, political science), and professionally oriented departments (education, family studies, social work). Topics studied include courts, family violence, rights, substance abuse, juvenile justice, school law, children as witnesses, hate crimes and community policing. Students will be required to choose a first major before they will be able to declare justice studies as a second major. The goal is to produce graduates who have a higher level of knowledge about law and justice in American society and in the world so that they will mature into more knowledgeable and effective citizens. The justice studies dual major is intended for students who are looking for careers in the justice system or who seek graduate training in law or social sciences and humanities related to the law.

#### Requirements

The dual major in justice studies requires students to take a minimum of eight courses (32 credits), each completed with a grade of a C- or better. Students are required to have a grade-point average of a 2.5 or better before they can be accepted into the program. The dual major cannot be declared until after a first major has been declared. Students can count no more than two courses for both the first major and dual major, and students are not allowed to take more than two courses from any one department (except for JUST). An unlimited number of dual major courses can be used to satisfy Discovery requirements.

### Elective Courses

This list is approved and published yearly by the Justice Studies Executive Committee.
PHIL 701  Topics in Value Theory 4
PHIL 740  Advanced Topics in the Philosophy of Law 4
POLT 440A  Honors/Global Justice (Global Justice) 4
POLT 444B  Cruel and Unusual in a Federal System 4
POLT 508  Supreme Court and the Constitution 4
POLT 513  Civil Rights and Liberties 4
POLT 520  Politics, Justice, and Morality 4
POLT #547  Race and Justice in the Americas: Insights from Film, Literature, and Politics 4
POLT 548  Drug Wars 4
POLT 568  Introduction to Intelligence (only when taught by Professor MacPherson) 4
POLT 701  Courts and Public Policy 4
POLT 765  Security Intelligence Study 4
POLT 798B  Seminar in American Politics (only topic: Security Intelligence) 4
PSYC 591  or JUST 591  Special Topics (Forensic Psychology) 4
PSYC 755  Psychology and Law 4
PSYC 756  Psychology of Crime and Justice 4
RMP 772  Law and Public Policy in Leisure Services (must have junior/senior status) 4
SOC 450  Contemporary Social Problems (only when taught by Professor Abbott) 4
SOC 525  Juvenile Crime and Delinquency 4
SOC 535  Homicide 4
SOC 620  Drugs and Society 4
SOC 655  Sociology of Law and Justice 4
SOC 656  Terrorism 4
SOC 657  or POLT 570  Counterterrorism: Nation states' responses to terrorist activity 4
SOC 715  Criminological Theory 4
SOC 720  Sociology of Drug Use 4
SOC 780  Social Conflict 4
SW 705  Child and Adolescent Risks and Resiliency: Program, Policy and Practice 4
WS 595  Special Topics (Only topics Violence Against Women and Gender and the Law) 1-4

The required minimum overall GPA in major coursework is 2.5.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Students who are interested in a dual major in justice studies will need to file an Intent to Dual Major form. The form is available in the justice studies office or can be downloaded from the program website at cola.unh.edu/justice-studies. Program offices are located in Room 206 of Huddleston Hall and are open Monday through Friday from 8 a.m. to 12 p.m. and 1 p.m. to 4:30 p.m. For more information, please contact Ellen Cohn at (603) 862-3197, e-mail ellen.cohn@unh.edu; or Deb Briand at (603) 862-1716, e-mail deborah.briand@unh.edu.

Justice Studies Minor

https://cola.unh.edu/justice-studies/program/minor/justice-studies

Description

The justice studies minor is an interdisciplinary program that blends topics from humanities departments (e.g., philosophy), social science departments (e.g., psychology, sociology, women's and gender studies), departments that include both humanities and social science faculty (history, political science) and professionally oriented departments (education, family studies, social work). Topics studied include courts, family violence, rights, substance abuse, juvenile justice, school law, children as witnesses, hate crimes and community policing.

Requirements

The minor in justice studies requires students to take a total of five courses (20 credits) each with a grade of C- or better in order to complete the program. Students are allowed to "double count" no more than two courses toward their major and minor, and are not allowed to take more than two courses from any one department (except for justice studies).

For program information on the forensics minor, see the Forensics Minor program page.

Forensics Minor

https://cola.unh.edu/justice-studies/program/minor/forensics

Description

The forensics minor provides students with the opportunity to explore the different components of forensics through the interdisciplinary study of biology, psychology, sociology, and justice studies. This well-rounded curriculum will enable students to build upon their interests in justice studies by specializing in an area of increasing importance. Once students have decided to pursue the minor, they are required to meet with the coordinator, academic counselor, or their affiliated faculty.
adviser at least once per semester for regular review and assessment of their program, learning outcomes and progress toward the degree.

## Requirements

The forensic minor requires five courses (20 credits) drawn from a list of approved courses. Students must receive a grade of a C- or better for a course to count toward the minor requirements. The five courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JUST 401</td>
<td>Introduction to Justice Studies</td>
<td>4</td>
</tr>
<tr>

- Latin American, Latinx and Caribbean Studies Minor (p. 97)

## Latin American, Latinx and Caribbean Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/Minor/Latin-american-latinx-caribbean-studies

### Description

Latin American, Latinx and Caribbean studies is an interdisciplinary minor encompassing anthropology, communications, economics, geography, history, linguistics, political science, Spanish and Portuguese. Knowledge of Latin America is especially valuable for students who plan to work in education, international organizations, government, social services, and business or for graduate studies related to Latin America.

For more information on the Latin American, Latinx and Caribbean studies minor (LALACS) contact: Lori Hopkins, L (lori.hopkins@unh.edu) or Hopkins@unh.edu (lori.hopkins@unh.edu)

### Elective Course List

Students should consult with an advisor or the course instructor to ensure that the majority of this coursework concentrates on Latin America.

**Linguistics (LING)**

Linguistics is the study of one of the most important characteristics of human beings—language. It cuts across the boundaries between the sciences and the humanities. The program is an excellent liberal arts major or preprofessional major for education, law, medicine, clergy and others. It is a particularly appropriate major for students who want to teach English as a second language. Dual majors with a foreign language, international affairs, business administration and the like are quite feasible.

Students interested in the major or the minor should consult with the program coordinator or with any professor who teaches linguistics courses. To declare a major in linguistics, a student must meet with the linguistics coordinator to design a course of study. Information is available from the Undergraduate Advising Center, 101 Hood House, and at cola.unh.edu/linguistics (http://www.cola.unh.edu/linguistics).

Two years of college study (or equivalent) of one foreign language 4-16

Select one of the following cognate specialties: 8

- One year study (or equivalent) of a second foreign language from a different language family or subfamily
- PSYC 712 Psychology of Language 2

Select two elective courses from list below, one of which must be a 600- or 700-level LING or ENGL course 3

Discovery Program Capstone Experience:

- LING 779 Linguistic Field Methods 4
- or LING 695 Senior Honors

Total Credits 44-56

1 Old English may count as the second foreign language if the first foreign language is not in the Germanic family.
2 With its prerequisite, either PSYC 512 Psychology of Primates or PSYC 513 Cognitive Psychology
3 History of the English Language or Sociolinguistics can be used as an elective if the other one is used for the Variation/Historical requirement.

</tbody>
</table>

Other courses may be substituted, with the permission of the student’s adviser and the linguistics committee, when they are pertinent to the needs of the student’s program.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Linguistics majors may use one major-required course to satisfy one Discovery category requirement.

### Linguistics Minor

https://cola.unh.edu/linguistics/program/minor/linguistics

#### Description

Linguistics is the study of one of the most important characteristics of human beings—language. It cuts across the boundaries between the sciences and the humanities. Students interested in the minor should consult with the program coordinator or with any professor who teaches linguistics courses.

#### Requirements

<td>Introduction to Linguistics</td>
<td>4</td>
</tr>
</tbody>
</table>

Select any four linguistics courses approved by the linguistics coordinator

Total Credits: 20

### TESOL Minor

https://cola.unh.edu/linguistics/program/minor/tesol

#### Description

The TESOL minor is a set of courses that are related to teaching English to speakers of other languages. This minor primarily is for students who are interested in teaching English to speakers of other languages, whether that be teaching English abroad or teaching ESL students in U.S. public schools (K-12). It is also appropriate for students who are going into social work or other professions that require regular interaction with nonnative English speakers.

The TESOL minor will not certify students to teach in New Hampshire public schools (K-12). For that purpose, students must complete the ESL certification program that is offered at the graduate level by the Education and English departments. However, the coursework in this minor will provide a very good foundation for students who want to later pursue ESL certification or an M.A. in TESOL at UNH or another institution. English Teaching majors may double-count ENGL 719 towards both their teaching major and the TESOL minor. Teaching majors who intend to later get dual certification in English and ESOL may use ENGL 719/LING 719 and its pre-requisite ENGL 405/LING 405 to satisfy their race requirement.

1 Students may count either PSYC 512 Psychology of Primates or PSYC 513 Cognitive Psychology toward the linguistics major or minor, but not both.
Requirements

The TESOL minor requires the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 715</td>
<td>Teaching English as a Second Language: Theory and Methods</td>
<td>4</td>

<td></td>
</tr>
<tr>
<td>ENGL 752</td>
<td>History of the English Language (WI)</td>
<td></td>
</tr>
<tr>
<td>ENGL/LING 790</td>
<td>Special Topics in Linguistics (when offered on a TESOL-related topic (WI))</td>
<td></td>
</tr>
<tr>
<td>LLC 791</td>
<td>Methods of Foreign Language Teaching</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Special topics courses that are related to TESOL</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits 20

1 Whichever was not taken before
2 The TESOL coordinator can provide you with a list of available courses for a particular semester.

Students must receive a C- or better in each course and achieve a 2.0 GPA in the five courses.

No more than eight transfer credits will be accepted.

For more information about the TESOL minor, please contact Soo Hyon Kim, soohyon.kim@unh.edu, 603-862-5290.

Middle Eastern Studies

Programs

- Middle Eastern Studies Minor (p. 100)

Middle Eastern Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/middle-eastern-studies

Description

The minor in Middle Eastern studies introduces students to the many facets of Middle Eastern cultures and societies through the interdisciplinary study of languages, history, politics, geography, and anthropology. Minor coursework enables students’ understanding of the Middle East as a dynamic region in a global and comparative context.

This minor therefore encompasses not only the study of the region itself, but also the flows and circulation of migration, diasporas, refugees, ideas, literatures, social movements, war and natural resources that make the region pivotal to world history and the global economy. In addition, participation in the minor prepares students for study abroad experiences, helps them acquire skills and qualifications for graduate study, and enhances employment opportunities.

Students interested in the minor should contact the coordinator and/or affiliated faculty to discuss their program of study. The coordinator, Sara Wolper, may be reached at esw@unh.edu, (603) 862-3884.

Requirements

The Middle Eastern studies minor requires five courses (20 credits) drawn from the list of approved courses or from exceptional courses and opportunities approved by the affiliate faculty in respective disciplines. The five-course requirement will include one general introductory course.

Total Credits 20
Students must receive a grade of C- or better for a course to count toward the minor. Courses for the minor may not be taken on a pass/fail basis.

Foreign Language Study: The study of a Middle Eastern language or language relevant to Middle Eastern studies is strongly encouraged but not required. Students are encouraged and permitted to count Arabic toward the five-course requirement. Students who have studied Hebrew, Turkish, Farsi, or other Middle Eastern languages at other institutions may apply for transfer of their credit toward the minor. Through petition to the minor coordinator and with support of affiliate faculty in the respective discipline, students may apply for European languages, such as French and Italian, to count toward minor requirements, provided these are relevant to their research and study interests in the region.

Transfer or Articulation Agreements with other Institutions: Transfer of credits may be approved by the coordinator to count toward the minor if the transfer is accepted by the University and fits within the scope of the minor.

Students interested in the minor should contact the coordinator and/or affiliated faculty to discuss their program of study. At the beginning of their final semester of study at UNH, students should fill out a completion of minor form and submit it to their Dean’s Office.

Music (MUSI, MUED)

The Department of Music offers two degree programs: the bachelor of arts in music and the bachelor of music.

The University of New Hampshire Department of Music is an accredited institutional member of the National Association of Schools of Music.

Prospective majors in music are advised to contact the department for information on acceptance into the major.

All music students must earn grades of C- or better in all required music and music education courses. The required minimum overall GPA in required music and music education coursework is 2.0.

Bachelor of Arts in Music

The bachelor of arts in music program offers students an opportunity to major in music within the liberal arts curriculum. This program is intended for those who wish to pursue the serious study of music and to acquire at the same time a broad general education; it is recommended for those considering graduate study leading to master’s or doctoral degrees.

To be admitted formally to the B.A. program, students must give evidence of satisfactory musical training by taking an admission audition. Students must declare music as a major before the beginning of the junior year, but it is highly recommended that they declare as early as possible, considering the large number of required courses.

The bachelor of arts degree is offered with three options: music liberal studies, performance study and composition.

Bachelor of Music Degree Program

The bachelor of music degree program is offered to students who wish to develop their talent in performance, composition or music education to a high professional level. The program is recommended to those considering graduate study leading to the M.M. or D.M.A. degrees. The music education option is part of the undergraduate certification program (see the Department of Education).

To be admitted to the B.M. program, students must demonstrate a high degree of musical competence or significant creative ability during an audition or examination. Selection is made on the professional requirements appropriate to each option. Students must formally declare the B.M. as a degree program before the beginning of the sophomore year. Continuation into the upper level of the program is subject to review by the department faculty.

Four degrees are offered in the bachelor of music curriculum: bachelor of music in music education, bachelor of music in performance, bachelor of music in composition, and bachelor of music pre-teaching.

1 Degree program has final approval from the National Association of Schools of Music.
2 Degree program has plan approval from the National Association of Schools of Music.

Music Major: Composition Option (B.A.)

https://cola.unh.edu/music/program/ba/music-major-composition-option

Description

Students wanting to declare composition as their option must submit a music portfolio in addition to an audition on their major instrument.

The Discovery Program capstone requirement is fulfilled by a final project or a public performance given during the senior year. For students in the composition option, there is a choice of completing a half lecture, half lecture-recital or a half recital including at least one original composition.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.
Major department courses may not be used to satisfy Discovery category requirements except in the case of a second major. B.A. in music majors may use MUSI 502 History and Literature of Music (a required core course for the major) to satisfy the Inquiry Discovery requirement.

Total Credits: 28

Students in the composition option, if not in a lesson studio, will attend composition seminar.

### Music Major: Music Liberal Studies Option (B.A.)

https://cola.unh.edu/music/program/where/arts/music-major-music-liberal-studies-option

#### Description

Students enrolling in the B.A. music liberal studies program — a program that stresses the development of skills in analysis, writing and critical thinking about a wide variety of music and the larger connection with history, culture and society — are required to submit a writing sample and interview with one of the music liberal studies program faculty members. The writing sample should be non-fiction, preferably an assignment for a course in English, history or a similar subject, 500 words or more in length.
The Discovery Program capstone requirement is fulfilled by a final project or a public performance given during the senior year. For students in the music liberal studies option, there is a choice of completing a half recital or comparable final project.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second major. B.A. in music majors may use MUSI 502 History and Literature of Music (a required core course for the major) to satisfy the Inquiry Discovery requirement.

1 2 credits per semester

The language requirement for a student in the vocal performance option is satisfied by taking ITAL 401 Elementary Italian I-ITAL 402 Elementary Italian II, GERM 401 Elementary German I-GERM 402 Elementary German II or FREN 401 Elementary French I-FREN 402 Elementary French II.

Composition Major (B.M.)

https://cola.unh.edu/music/program/bm/composition-major
All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

- For students in the composition option, a full lecture, lecture-recital or recital including at least one original composition is required.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.M. in music majors may use MUSI 502 History and Literature of Music (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement.

**Total Credits**: 52

1. This is in addition to the other 700-level theory classes outlined above.

2. This is in addition to the core required 700-level music history class.
Students in the bachelor of music in composition degree program may use a maximum of 8 ensemble credits toward graduation.

Students in the bachelor of music in composition degree are required to attend 8 semesters of composition seminar.

**Music Education Major (B.M.)**

[https://cola.unh.edu/music/program/bm/music-education-major](https://cola.unh.edu/music/program/bm/music-education-major)

**Description**

The B.M. music education is the traditional program of choice for students seeking a career as a school music teacher. The bachelor of music degree in music education provides a route to undergraduate certification leading to state of New Hampshire teacher certification in music, grades K-12 (cert. #612.13). New Hampshire also participates in a reciprocal agreement with many other states: the Interstate Certification Compact.

Successful applicants must demonstrate a high degree of musical competence and promise of future growth as a performer. A firm commitment to leading school musicians to artistic success is expected, as is a willingness to acquire the breadth of skills required for K-12 music certification. Continuation in the B.M. music education program is made with the recommendation of the appropriate faculty members and contingent upon personal commitment to the teacher licensure program.

Students interested in a five-year, bachelor/masters degree program typically complete the B.M pre-teaching (described elsewhere) as an undergraduate and apply to the UNH Department of Education for admission to the Master of Arts in Teaching (Secondary) degree program.

Students in music education must maintain an overall minimum 2.8 grade-point average at the time of application for student teaching (February 15 of junior year). Any education course taken for a teacher licensure requirement must be completed with a B- or better.

B.M. music education majors may use MUSI 501 History and Literature of Music (a required core course for the major) to satisfy the Fine and Performing Arts Discovery category requirement. In addition, they may use MUSI 502 History and Literature of Music (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement.

All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

- For students in the music education option, a half recital is required.

The four-year bachelor of music in music education curriculum is highly structured due to the number of required courses to complete. In the table below is the list of additional classes required to earn a degree and a certificate to teach. Students may elect a vocal/choral or instrumental emphasis. See curriculum chart for differing requirements.

Total Credits: 66-67

1. Vocal track students take 2 credits. Instrumental track students take 3 credits.
2. Required for Vocal track.
3. Required for Instrumental track.
4. Required for Vocal track.

Students in the bachelor of music in music education degree program may use a maximum of 8 ensemble credits toward graduation. Of the 8 credits in ensemble performance (MUSI 441 Concert Choir-MUSI 464 Guitar Ensemble) required during the course of study, it is required that at least 4 credits will be from the following: Concert Choir (MUSI 441 Concert Choir), Symphony (MUSI 450 Symphony), Wind Symphony (MUSI 452 Wind Symphony), Symphonic Band (MUSI 453 Symphonic Band), and/or Concert Band (MUSI 451 Concert Band). At least 1 credit of performance in a jazz ensemble (MUSI 460 Jazz Band) and 1 credit of Marching Band (MUSI 454 UNH Marching Band) are highly desirable.

## Performance Major (B.M.)

https://cola.unh.edu/music/program/bm/performance-major

### Description

All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

- For students in the performance option, a full recital is required.
- Students in the bachelor of music in performance degree program are required to perform a half junior recital.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.M. in music majors may use MUSI 502 History and Literature of Music (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement.

### Pre-Teaching Major (B.M.)

https://cola.unh.edu/music/program/bm/pre-teaching-major

### Description

The B.M. pre-teaching degree is the program of choice for most students seeking a five-year, combined bachelor’s and master’s degree program that includes certification to teach music in the public schools. Students will complete all of the skill and knowledge content requirements in this undergraduate program leaving a year-long internship and some advanced study in music and education for the fifth year.

Students applying to the Master of Arts in Teaching program need a cumulative undergraduate grade point average of 3.2 or better to ensure admission to the graduate school. Therefore, students typically apply first to UNH as a B.M. music education major and switch to this B.M. pre-teaching degree in their junior or senior year.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.M. in music majors may use MUSI 502 History and Literature of Music (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement. Additionally, B.M. music education and pre-teaching majors may use MUSI 501 History and Literature of Music to satisfy the Fine and Performing Arts Discovery category requirement.

All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

- For students in the pre-teaching option, a half recital is required.

### Music Minor

[https://cola.unh.edu/music/program/minor/music](https://cola.unh.edu/music/program/minor/music)

#### Description

A music minor is a great option for students who are passionate about the discipline of music but choose to major in another field. The minor includes required coursework in music theory and literature.

#### Requirements

All students wishing to receive a minor in music must complete a minimum of 20 credits of coursework in music, of which the following are required:

Neuroscience and Behavior (NSB)

Neuroscience is one of the fastest-growing scientific fields, and the discoveries that are being made today are having an immediate and significant impact on our society. The importance of understanding animal behavior is likewise increasing, particularly in the face of a rapidly-changing environment. The B.S. in Neuroscience and Behavior is a great way for students to combine interests in neurobiology and animal behavior. The curriculum prepares students for various post-graduate degrees, including medical, veterinary, and graduate school, and we offer students a variety of opportunities to get hands-on research experience.

https://cola.unh.edu/psychology/program/bs/neuroscience-behavior-major

Requirements

Students majoring in NSB are required to take foundation courses in basic science, core courses, and five electives from an extensive list of courses, including some offered by other departments including biochemistry, molecular and cellular biology, and natural resources. Finally, a capstone experience is required. This may be independent research, an advanced seminar, or other special student activity. It is meant to integrate prior experience and take the student to a new level in an area of special interest.

College of Life Sciences & Agriculture Faculty
https://colsa.unh.edu/biological-sciences/people

Description

The major in neuroscience and behavior (NSB) offers an interdisciplinary approach to human and non-human behavior, focusing on the evolution and adaptiveness of certain behaviors, as well as their underlying neural mechanisms. Students who have always been fascinated by how the brain functions will be well served by this major, as will those who love wild animals and wish to better understand their behavior. The B.S. in neuroscience and behavior is based on a solid foundation in biology, chemistry, physics, statistics, and genetics (foundation courses). These are followed by a two-semester course sequence that covers the fundamentals of neuroscience and behavior. Students can then pick five or more electives focusing on areas of interest.

NSB students are encouraged to take advantage of research experiences in the laboratories of the psychology and biology faculty in the program. This provides valuable experience with cutting-edge equipment and techniques. Some students may share aspects of a larger project, whereas others may be relatively independent and design their own project under supervision. In either case, important skills are gained by the discipline of gathering data, analyzing and interpreting it, and presenting it to a broader audience.

The curriculum provides most of the requirements and recommended courses for students seeking admission to graduate school and to professional schools in medicine and veterinary medicine. Students who might choose not to go on to advanced degrees are well-prepared for employment as skilled technicians in research laboratories or, if their interests are in animal behavior, as field research assistants or animal trainers. With additional courses in education, the B.S. in NSB also qualifies graduates to teach at the elementary, junior high, and high school levels.

Faculty participating in the NSB major combine a love of teaching and student mentoring with a passion for research, and encourage student participation. Research facilities that students can use include the Integrative Animal Behavior and Ecoacoustics laboratory, the confocal imaging center, the Hubbard Center for Genomic Studies, and the many marine, freshwater, and estuarine laboratories associated with UNH programs. Students can also take summer courses at the Shoals Marine Laboratory.

Philosophy (PHIL)

Philosophy has always been at the heart of liberal education, deepening and enriching the lives of those who pursue it. The philosophy major provides students with the opportunity to confront a wide variety of questions, especially those that cannot be dealt with in the framework of other disciplines. Such questions include those about the ultimate nature of reality. Does God exist? Are minds distinct from bodies? Are there more things between heaven and Earth than are dreamed of in science? Other questions probe what it is to know: Do we know that material bodies external to our minds exist? What does it mean to justify a belief? Still other questions are about how we ought to be or act: What is a good person? Are there moral rules? How are they justified? Must we obey them?

Philosophy also concerns itself with other disciplines: What makes something a work of art? What distinguishes a scientific theory from a religious theory or myth? Is capitalism amoral? Is legal authority moral or political?

The Department of Philosophy offers a wide range of courses exposing students to the full scope of philosophical activity. Grappling with major primary texts from the history of philosophy is an important emphasis of the program, for philosophy today is the continuation of a conversation that extends back to the ancient Greeks and the Vedic scriptures.

Philosophy also always has wrestled with cutting-edge topics emerging in the current culture. Some recent examples are: What are the prospects for machines with mental lives? What are the implications of new views in cosmology? How do we handle the pressing ethical dilemmas brought on by emerging medical technologies, or by the historically unparalleled rate of destruction of the Earth's environment? Are gender and race socially constructed concepts rather than biological concepts?

Options in the Major

Students may select one of two options for the philosophy major, but are not required to do so. The options do not add additional requirements to the general philosophy major, but rather focus philosophy electives in a specific area.

- The ethics and social responsibility (ESR) option provides official recognition for those who choose to emphasize concern with moral responsibility in personal and social contexts, including the political and corporate arenas. You will choose courses in environmental ethics, law, evolution, social and political philosophy, and feminism.
- The business, innovation, and technology (BIT) option provides official recognition for those who choose to emphasize the study of the relationships between markets, technology, and human well-being. You will choose courses in the philosophy of artificial intelligence, evolution, neuroscience, biotechnology, business ethics, economic policy, environmental ethics and other high impact subjects.

Research

Students are strongly encouraged to consider the possibility of presenting research at the Philosophy Department Undergraduate Research Conference (https://www.unh.edu/urc/event-descriptions/#collapse-1-14) and/or fulfilling an undergraduate research grant (https://www.unh.edu/undergrad-research/programs). This is especially encouraged for students considering graduate school in philosophy.

Graduate Preparatory Emphasis

This emphasis is strongly recommended for students who plan to do graduate work in philosophy. Beyond the ten (10) courses required for the major, such students should select, with their advisers’ approval, two additional philosophy courses above the 400-level, for a total of twelve (12) courses. Consult the Department of Philosophy website for further details.
additional graduate school planning information. (https://cola.unh.edu/philosophy/resources/graduate-school-planning)

**Honors in Philosophy**

To graduate "With Honors" in Philosophy, students will be expected to pursue a philosophy curriculum that demands greater depth and rigor than what is required by the major; they will be expected to complete the curriculum at a consistently high level of achievement; they will be expected to have an overall GPA of 3.5 or above; they will engage in independent study and research (under the supervision of a faculty member) beyond the requirements of their coursework; and they will be expected to present and defend a culminating project that synthesizes aspects of their study. Students can demonstrate these expectations in either of two ways: a thesis option or a portfolio option. Consult the Department of Philosophy website for more details. (https://cola.unh.edu/philosophy/academics/undergraduate-information/departmental-honors)

**Distinction on Senior Thesis**

Distinction on Senior Thesis is granted by a unanimous determination of the student's committee that the thesis exceeds A-level work and is worthy of special recognition.

- Philosophy Minor (p. 116)
- Philosophy of Business, Innovation, & Technology Cognate (p. 117)

**Faculty**

https://cola.unh.edu/philosophy/faculty-staff-directory

**Philosophy Major (B.A.)**

https://cola.unh.edu/philosophy/program/ba/philosophy-major

**Description**

UNH philosophy majors acquire the ability to think systematically and imaginatively about fundamental and enduring issues such as morality, justice, happiness, beauty, gender, race, nature, artificial intelligence, space, time, and the meaning of life and death. Our internationally-renowned professors emphasize discussion, debate and writing in our courses. Wrestling with the "big questions" from diverse and global perspectives will prepare you exceptionally well for a variety of fulfilling careers. A lively and nurturing community personally invested in the success of our high achieving students, we take pride in watching our graduates excel in top law and graduate schools, innovative social justice programs, and various positions from Wall Street to Silicon Valley and beyond (https://cola.unh.edu/spotlight/philosophy) that seek hard workers who can think rigorously and communicate clearly.

**Requirements**

Majors must take a minimum of ten (10) philosophy courses, for a total of 40 credits. A single course can satisfy multiple requirements for the major. The required minimum overall GPA in major coursework is 2.00. Candidates for a degree must satisfy additional University requirements for graduation, such as:

1. University "Writing Intensive" Requirements,
2. Liberal Arts Foreign Language Requirement (B.A. candidates only),
3. minimum number of credits (128 credits for B.A. degree), and
4. University Discovery Requirements.

Consult with your adviser early and often to plan the optimal path for fulfilling major and University requirements.

**Discovery Capstone Requirement**

Select two 700-level seminars of the student’s choice, at least one of these should be taken in the senior year.

**Electives**

Any two additional philosophy courses

**Total Credits**

40

1 As with all courses counting for the major, a grade of C- or better is required.

PHIL 495 Tutorial Reading and PHIL 795 Independent Study normally do not count toward fulfilling major requirement credits; exceptions may be granted by special permission.

Note that it is in the nature of 700-level seminars to presuppose by default that students have completed the main 400-level and 500-level core requirements (PHIL 412 Beginning Logic, PHIL 500 Workshop, PHIL 530 Ethics, PHIL 570 Ancient Philosophy, PHIL 580 Modern Philosophy from Descartes to Kant) and so free reference is made to materials, views, techniques, etc. covered in those lower-level core requirements.

**Discovery Requirements**

For students majoring in **only** philosophy: philosophy majors may "double count" any two courses toward the major and also to satisfy Discovery requirements. For example, a philosophy major can count (1) PHIL 412 Beginning Logic toward the major requirement as well as using this course to satisfy the Quantitative Reasoning Discovery Category and (2) they can also count PHIL 421 Philosophy and the Arts toward both the
major and the Fine and Performing Arts Discovery Category. Because PHIL 412 Beginning Logic and PHIL 570 Ancient Philosophy are required for the major and also satisfy Quantitative Reasoning and Humanities Categories, respectively, all majors could simply count these two courses toward their Discovery requirements. In various circumstances—for instance if a student already satisfied those Discovery requirements before becoming a philosophy major—one might prefer to count other philosophy courses toward different Discovery Categories, and they are free to do so.

For students double majoring with philosophy: The Department sets no limits on how many courses students may "double count" toward both the philosophy major and Discovery categories if philosophy is your second major. A double major with philosophy as the second major could in principle count any of the following courses toward the major while satisfying five Discovery Categories:

1. Quantitative Reasoning (QR) Discovery Category could be satisfied by PHIL 412 Beginning Logic.
2. Fine and Performing Arts (FPA) Discovery Category could be satisfied by PHIL 421 Philosophy and the Arts.
4. World Cultures (WC) Discovery Category could be satisfied by PHIL 440C Honors/The Copernican Lens: Finding a Place for Humanity or PHIL 520 Introduction to Eastern Philosophy.

**Philosophy Major: Business, Innovation & Technology Option (B.A.)**

https://cola.unh.edu/philosophy/program/ba/philosophy-major-business-innovation-technology-option

**Description**

While completing the philosophy major, students may select the option in Philosophy of Business, Innovation and Technology. This option provides official recognition for those who choose to emphasize the study of the relationships between markets, technology and human well-being. Students will choose courses in the philosophy of artificial intelligence, evolution, neuroscience, biotechnology, business ethics, economic policy, environmental ethics and other high impact subjects.

**Requirements**

Students must fulfill the requirements of the philosophy major plus the requirements of the option. Majors must take a minimum of ten (10) philosophy courses, for a total of 40 credits. A single course can satisfy multiple requirements for the major. The required minimum overall GPA in major coursework is 2.00. Candidates for a degree must satisfy additional University requirements for graduation, such as:

1. University "Writing Intensive" Requirements,
2. Liberal Arts Foreign Language Requirement (B.A. candidates only),
3. minimum number of credits (128 credits for B.A. degree), and
4. University Discovery Requirements.

Consult with your adviser early and often to plan the optimal path for fulfilling major and University requirements.

PHIL 495 Tutorial Reading and PHIL 795 Independent Study normally do not count toward fulfilling major requirement credits; exceptions may be granted by special permission.

---

**Ethics and Social Responsibility Option Requirements**

This option requires **four courses (for a total of 16 credits)** from those listed below, with one PHIL 530 Ethics already strictly required for the major. Students may “double count” these courses toward the general requirements of the philosophy major, for example by counting these courses toward the ten (10) total courses required for the major.

1. As with all courses counting for the major, a grade of C- or better is required.

**PHIL**

For students majoring in **only philosophy**: philosophy majors may "double count" any two courses toward the major and also to satisfy Discovery requirements. For example, a philosophy major can count (1) PHIL 412 Beginning Logic toward the major requirement as well as using this course to satisfy the Quantitative Reasoning Discovery Category and (2) they can also count PHIL 421 Philosophy and the Arts toward both the major and the Fine and Performing Arts Discovery Category. Because PHIL 412 Beginning Logic and PHIL 570 Ancient Philosophy are required for the major and also satisfy Quantitative Reasoning and Humanities Categories, respectively, all majors could simply count these two courses toward their Discovery requirements. In various circumstances—for instance if a student already satisfied those Discovery requirements before becoming a philosophy major—one might prefer to count other philosophy courses toward different Discovery Categories, and they are free to do so.

For students double majoring with philosophy: The Department sets no limits on how many courses students may "double count" toward both the philosophy major and Discovery categories if philosophy is your second major. A double major with philosophy as the second major could in principle count any of the following courses toward the major while satisfying five Discovery Categories:

1. **Quantitative Reasoning (QR)** Discovery Category could be satisfied by PHIL 412 Beginning Logic.
2. **Fine and Performing Arts (FPA)** Discovery Category could be satisfied by PHIL 421 Philosophy and the Arts.
4. **World Cultures (WC)** Discovery Category could be satisfied by PHIL 440C Honors/The Copernican Lens: Finding a Place for Humanity or PHIL 520 Introduction to Eastern Philosophy.

**Philosophy Minor**

https://cola.unh.edu/philosophy/program/minor/philosophy

---

**Description**

UNH philosophy minors acquire the ability to think systematically and imaginatively about fundamental and enduring issues such as morality, justice, happiness, beauty, gender, race, nature, artificial intelligence, space, time, and the meaning of life and death. Our internationally-renowned professors emphasize discussion, debate and writing in our courses. Wrestling with the “big questions” from diverse and global perspectives will prepare you exceptionally well for a variety of fulfilling careers. A lively and nurturing community personally invested in the success of our high achieving students, we take pride in watching our graduates excel in top law and graduate schools, innovative social justice...
programs, and various positions from Wall Street to Silicon Valley and beyond (https://cola.unh.edu/spotlight/philosophy) that seek hard workers who can think rigorously and communicate clearly.

Requirements

A philosophy minor consists of five (5) philosophy courses (for a total of 20 credits) with a grade of C- or above. At least one of the philosophy courses must be at the 500-level or higher.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL course at 500-level or higher</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>Four elective PHIL courses</td>
<td></td>
<td>16</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>20</td>
</tr>
</tbody>
</table>

PHIL 495 Tutorial Reading and PHIL 795 Independent Study may be used towards the minor only with special approval.

You do not need to declare a minor; however, it might be wise to meet with a faculty member from the Philosophy Department to discuss your minor plan.

At the beginning of your final semester of study, you should complete a certification of completion of minor form (http://www.unh.edu/registrar/forms/minorform.pdf), obtain the necessary signatures, and submit it to your Dean’s Office.

Philosophy of Business, Innovation, & Technology Cognate

https://cola.unh.edu/philosophy/program/cognate/philosophy-business-innovation-technology

Description

Our internationally renowned philosophy professors emphasize discussion, debate, and writing in our courses. Wrestling with big questions prepares our students exceptionally well for highly successful careers in business and cutting-edge technology. As a lively and nurturing faculty personally invested in the success of our high achieving students, we take pride in watching our graduates go on to excel in top law schools, elite graduate programs, and prestigious positions from Wall Street to Silicon Valley. (https://cola.unh.edu/spotlight/philosophy)

For students unable to major or minor in Philosophy, students may select the three course cognate in Philosophy of Business, Innovation, and Technology. This cognate provides official recognition for those who choose to emphasize the study of the relationships between markets, technology, and human well-being. Students will choose courses in the philosophy of artificial intelligence, evolution, neuroscience, biotechnology, business ethics, economic policy, environmental ethics and other high impact subjects.

Contact the Philosophy Department with questions at (603) 862-2060 or philosophy@unh.edu.

Requirements

For a cognate in Philosophy of Business, Innovation, and Technology, a student must complete three (3) philosophy courses (for a total of 12 credits) from the following list.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL 421</td>

</tr>
</tbody>
</table>

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

Political Science (POLT)

The study of political science includes the study of politics, power and governance, from local municipalities to other countries and the international system. Students study both formal and informal institutions of government, political behavior, civil society, the role of the media, individuals and the factors that shape policy. Political science clarifies political involvement and contributes to informed citizenship.

The course of study is particularly valuable to students planning to enter local or national government, the Foreign Service, those who intend to study law and enter the legal profession, as well as careers in the security/intelligence sector. The major also enhances cognitive abilities, writing, public speaking and analytical skills that translate into careers in journalism, international organizations, public affairs and the private sector.

Internships and Advanced Study

In addition to the courses regularly offered, the department could have available selected topics, advanced study in political science and
The study of government and politics, to which the courses and seminars of the Department of Political Science are devoted, includes the development of knowledge of political behavior by individuals and groups as well as knowledge about governments: their nature and functions, their problems and behavior, and their interactions—at the national and international levels and at the local, state and regional levels.

Much of the learning offered by the Department of Political Science also can be regarded as essential for good citizenship, since political knowledge helps to explain the formal and informal institutions by which we are governed and the forces that lead to policy decisions, and also seeks to clarify the issues and principles that encourage people toward political involvement. It contributes to the store of knowledge necessary for informed citizenship. In addition, such learning is especially valuable to students planning to enter local or national government or other public service, including the Foreign Service, and it will be of great help to those who intend to study law and enter the legal profession. For teaching, particularly at the college level, and for many types of government service, graduate work may be indispensable. An undergraduate major in political science will provide a helpful foundation for any further study of politics and related fields in the social sciences and humanities. Such an emphasis also will be valuable for students seeking careers in journalism, international organizations, and the public affairs and administrative aspects of labor, financial and business organizations.

Requirements

The major program in political science consists of at least 10 courses (40 credits) and not more than 12 courses (48 credits). The minimum grade requirement is C- per course. Any grade lower will not count toward major. Courses are to be distributed in the following way.

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>40</td>
</tr>
</tbody>
</table>

1. Once they declare the major, students must complete these three courses within the first calendar year. POLT 407 Law and Society and any of the 444’s do not count toward the major.
The political science minor consists of five courses (20 credits total). Students may use a microeconomics course (ECON 402 Principles of Economics (Micro) or ECON 605 Intermediate Microeconomic Analysis) or macroeconomics course (ECON 401 Principles of Economics (Macro) or ECON 611 Intermediate Macroeconomic Analysis) to count as the fifth or sixth electives in this sequence. Additional economics courses will be considered by petition. Only one economics course can count toward this requirement.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second major. If students substitute an economics course for a POLT 500-level course, this economics course cannot be used to satisfy Discovery category requirements.

Political Science Minor

https://cola.unh.edu/political-science/program/minor/political-science

Description

The study of government and politics, to which the courses and seminars of the Department of Political Science are devoted, includes the development of knowledge of political behavior by individuals and groups as well as knowledge about governments: their nature and functions; their problems and behavior; and their interactions— at the national and international levels and at the local, state and regional levels.

Much of the learning offered by the Department of Political Science can also be regarded as essential for good citizenship, since political knowledge helps to explain the formal and informal institutions by which we are governed and the forces which lead to policy decisions, and also seeks to clarify the issues and principles that encourage people toward political involvement. It contributes to the store of knowledge necessary for informed citizenship. In addition, such learning is especially valuable to students planning to enter local or national government or other public service, including the Foreign Service, and it will be of great help to those who intend to study law and enter the legal profession.

Requirements

The political science minor consists of five courses (20 credits total).

<td>20</td>
</tr>
</tbody>
</table>

• These courses may be taken in any combination of the four subfields and levels (400-700) offered. The fields to choose from are: American politics, political thought, comparative politics, and international politics.

• The minimum grade requirement is C- per course. Any grade lower than a C- will not count toward the minor.

Students wishing to use transfer credits from abroad or other universities should meet with a political science adviser to determine eligibility toward the minor.

Psychology (PSYC)

The Department of Psychology focuses on the scientific study of human and non-human behavior. Our bachelor of arts program in psychology is broad, with an emphasis on technical skills and the opportunity to specialize in areas that interest you. Courses cover such topics as clinical and counseling, social psychology, personality, psychological development, cognition in humans and non-humans, neuroscience, sensory psychology and the history of psychology. Opportunities abound to work informally in laboratories or to participate in both clinically-oriented and non-clinical internships.

The program in neuroscience and behavior, shared between Liberal Arts and Life Sciences and Agriculture, focuses on the scientific study of the brain and its relationship to behavior. This Bachelor of Science program is structured around a rigorous core sequence of courses that incorporates an extensive laboratory experience, with the opportunity for specialization. Courses include such topics as endocrinology, genetics, neurology, animal behavior, neuroscience and philosophy, drugs, sensory systems, mood disorders and ecology. A large number of laboratories are available that routinely incorporate undergraduate students.

Advising System

Undergraduate advising in the department is conducted jointly by the department coordinator and the full-time faculty. The department coordinator has primary responsibility for advising freshman and sophomore psychology majors and is the initial contact for all majors in a state of transition including readmitted, transfer, and newly declared students. The department coordinator assists students in all phases of educational planning and decision making, including registration, long-range academic planning, degree and program requirements, and career selection and planning. Continuing junior and senior psychology majors are assigned to a faculty adviser with appropriate consideration for student preferences. The advising relationship with a faculty member is designed to encourage refining career and educational decisions.

Undergraduate Awards for Majors

Each year the faculty chooses psychology undergraduates as the recipients of the following awards: the Herbert A. Carroll Award for an outstanding senior in psychology, the George M. Haslerud Award for an outstanding junior in psychology, and the Fuller Foundation Scholarship for an outstanding junior in psychology with demonstrated interests in clinical psychology. Psychology majors with at least a 3.2 grade-point average are eligible for these awards. Faculty nominate students from the eligibility list and final selection of recipients is made by vote of the full-time psychology faculty.

Honors Program in Psychology

The Department of Psychology sponsors an honors program for outstanding students in the major. Students may apply to the honors program in psychology in their sophomore or junior year.
Eligibility criteria include
1. Overall grade-point average of 3.5 or above and 3.5 in major courses
2. Completion of PSYC 401 Introduction to Psychology, PSYC 402 Statistics in Psychology and PSYC 502 Research Methods in Psychology with a grade of B or above in each.

Requirements of the program include
1. Designate three of the four 700-level psychology courses as honors or equivalent
2. PSYC 797 Senior Honors Tutorial (fall of senior year)
3. PSYC 799 Senior Honors Thesis (spring of senior year)

Students interested in applying to the honors program should contact the department coordinator by the end of their sophomore year.

Undergraduate Research Conference
The Department of Psychology sponsors the annual George M. Haslerud Undergraduate Research Conference each spring. Undergraduate honors students present their theses at the conference. Contact the department coordinator for more information.

Psychology Major (B.A.)

https://cola.unh.edu/psychology/program/ba/psychology-major

Description

The psychology major provides students with a broad education, while also allowing some specialization. The program exposes students to the scientific study of behavior and encourages an increased understanding of the behavior of humans and animals.

Students who wish to declare psychology as a major after enrolling in the University should consult with the department’s academic counselor for application procedures and criteria.

Requirements

Students majoring in psychology must complete 44 credits with a minimum grade of C- in each course and a 2.0 overall average in all major requirements.

</thead>
<tbody>
<tr>
<td>PSYC 401</td>
<td>Introduction to Psychology</td>
<td>4</td>
</tr>
</tbody>
</table>
Additional Notes

Specific course selections should be discussed with advisers. Exceptions to the requirements for the major require compelling circumstances and a petition to the department.

Psychology majors planning to go on to graduate study in psychology are advised to include PSYC #702 Advanced Statistics and Research Methodology and/or PSYC 705 Tests and Measurement among their courses.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Psychology Minor

https://cola.unh.edu/psychology/program/minor/psychology

Description

Psychology is the study of the mind and human and animal behavior – what motivates us to do the things that we do? In this program, you’ll have the opportunity to learn scientific research and analysis methods while studying how we learn and develop, how we interact socially, how our minds affect the way we perceive things, and how we identify and define abnormal behavior. Optional areas of study include counseling, the effects of both recreational and therapeutic drugs, the psychology of crime and justice, and the psychology of consciousness.

See the department coordinator for details on the minor in psychology.

- No more than 4 credits of PSYC 795 Independent Study may be applied to the minor.
- A maximum of 9 approved psychology transfer credits can be applied to the UNH psychology minor.
- Transfer courses must be evaluated for their equivalency. Only courses taken in a psychology department can be applied towards the minor.
- Three credit transfer courses can be applied as only three credits. Students must make up the credit deficit created by acceptance of transfer courses, with one exception: one three-credit course accepted in transfer may be applied for a total of 19 credits.
- AP Psychology transferred into UNH is equivalent as PSYC 401.

Transfer Students

Transfer students who elect to major in psychology must complete at least 24 credits in the program at UNH to qualify for the degree in psychology. Transfer students must earn a total of 44 approved credits for completion of the psychology major. The distribution of these credits will be determined by the department’s academic counselor. Transfer students should note that courses are allotted only the number of credits granted by the original institution (after adjustments for semester-hour equivalents). Thus, students transferring from an institution at which courses carry less than four credits each must make up for any credit deficit created by acceptance of transfer credits into the psychology major. Only courses taken in a psychology department can be transferred into the psychology major. Of the four 700-level courses required for the major, at least three must be taken at UNH.
Queer Studies

Programs

• Queer Studies Minor (p. 122)

Queer Studies Minor

https://cola.unh.edu/womens-gender-studies/program/minor/queer-studies

Description

The queer studies minor provides students with opportunities to research and understand a rapidly growing field whose focus is the study of lesbian, gay, bisexual, trans and allied peoples, their histories and cultures. Queer studies is a method of inquiry that explores the role of same-sex desire and constructions of gender across and among cultures and histories. In these classes, students will consider sexualities and genders as identities and social statuses, as categories of knowledge, and as lenses that help to frame how we understand our world. The minor consists of interdisciplinary coursework in queer studies and is open to all students. Students who wish to pursue the queer studies minor should consult with Holly Cashman at holly.cashman@unh.edu or (603) 862-3123.

Requirements

The queer studies minor requires 5 courses (20 credits) from the queer studies course offerings list below. A grade of C- or better is required in all queer studies courses. One pre-approved elective from the electives list below may count toward the minor. Courses taken Pass/Fail may not be used for the minor. No more than 8 credits used to satisfy the requirements for a major may be used for the queer studies minor. If you wish to substitute a different course, consult with a queer studies faculty advisor.

Queer Studies Course Offerings

Please note that additional courses may count. Please visit the program's website for the most up-to-date information.

Race and Ethnic Studies (RES)

Programs

- Race and Ethnic Studies Minor (p. 123)

Race and Ethnic Studies Minor
https://cola.unh.edu/interdisciplinary-studies/program/minor/race-ethnic-studies

Description

The race and ethnic studies (RES) minor examines how racial and ethnic categories are created and maintained — politically, socially, and culturally. RES uses critical, interdisciplinary and comparative approaches to study race relations as they intersect with factors including gender and sexuality, class, religion and immigration status. The minor prepares students for life and work in a world increasingly characterized by difference derived from racial and ethnic identities.

Learning Outcomes

Facilitate understanding of how the social constructions of race affect the social fabric of our historical and contemporary world; enhance students’ abilities to appreciate differences and to actively and critically engage in civic responsibilities, especially with respect to social justice; prepare students to negotiate an increasingly interconnected world and apply their education in a wide range of occupations; gain exposure to the theories and methods of ethnic studies; and compare representations of borderlands, hybridity, migration and diaspora from different cultures to comprehend how national boundaries, as well as local, national, and transnational cultures and politics, affect the constitution of racial and ethnic categories.

Classes for the RES minor are housed in a variety of departments in the College of Liberal Arts, offering students a truly interdisciplinary experience.

Requirements

The race and ethnic studies minor consists of five courses or 20 credits. To complete a minor, students are required to:

1. Enroll in an introductory-level course. (These are listed on the minor website each semester.)
2. Enroll in at least one course at the 600/700-level.
3. Understand that no more than 8 credits used to satisfy the requirements for a major may be used for a minor.
4. Earn a C- or better in each course and maintain a 2.0 grade-point average in courses taken for the minor.

Russian Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/russian-major

Description

The Russian program provides students with an opportunity to study one of the world's most important languages, its literature and its culture. In addition to the intrinsic value of Russian language, literature and culture as a liberal arts experience, majoring in Russian leads to a number of careers, such as teaching, translation and interpreting, government and the Foreign Service. The knowledge of the language and cultural proficiency is also a valuable asset in preparing you for careers in law, economics and international trade. All Russian majors are strongly encouraged to double major or include a relevant minor in their studies.

If you would like more information please contact the program coordinator Arna.Bronstein@unh.edu. (Arna.Bronstein@unh.edu)

Requirements

New students will be assigned to the proper course after consultation with the Russian faculty. A student may not receive UNH credit for elementary Russian courses if he or she has had two or more years of secondary school Russian; however, a student may petition the Russian program to be admitted to the 400-level courses for credit. In the 503-790 range, a grade of C or better is required to advance to the next course in the language series (503, 504, 631, 632, 790).

The Russian major consists of a minimum of 40 credits above RUSS 402 Elementary Russian II. Specific course requirements are:

One Culture Course

Select one of the following:

- RUSS #425 Introduction to Russia: Contemporary Society and Culture
- RUSS 425M Topics in Russian Culture and Society in Moscow
- RUSS 525 Russia: Mythology and Propaganda
- RUSS 525M Russia: Mythology and Propaganda in Moscow

Two Literature Courses

Select one of the following:

- RUSS 691W Readings in Russian Literature 1-4
- RUSS 500 Selected Topics in World Literature
- RUSS 521W Devils, Deities, and Madness in Russian Literature
- RUSS #522W Morality, Sex and Revolution in Russian Literature

Capstone Course

Select one of the following:

- 4

Additional Information

Courses taken pass/fail may not be used toward a minor. A relevant internship may be substituted for one of the electives.

After completing the 20-credit sequence, the student submits the Certification of Completion of Minor form, available online or from the RES coordinator. Once this certification is approved by the RES coordinator and major adviser, the form goes to the college dean and the registrar to be recorded on the transcript. The certification form must be completed by the beginning of the student's final semester at the University.

Russian (RUSS)

The Russian program provides students with an opportunity to study one of the world's most important languages, its literature and its culture. In addition to the intrinsic value of Russian language, literature and culture as a liberal arts experience, majoring in Russian leads to a number of careers, such as teaching, translation and interpreting, government and the Foreign Service. It is also a valuable asset in preparing you for careers in law, economics and international trade, and it can serve as a double major with business administration, international affairs, homeland security, the natural and physical sciences, and other liberal arts fields such as English, history, political science, sociology, philosophy, theatre, communication, linguistics and other foreign languages.

### Russian Studies Minor

[https://cola.unh.edu/languages-literatures-cultures/program/minor/russian-studies](https://cola.unh.edu/languages-literatures-cultures/program/minor/russian-studies)

**Description**

The Russian studies minor offers students an opportunity to pursue area study of Russia and the new states through an interdisciplinary program.

**Requirements**

The minor consists of a minimum of 20 credits (five courses) with a minimum grade of C.

Total Credits: 20

In addition to the required courses, students must demonstrate a Russian language proficiency at the level of RUSS 504 ([https://catalog.unh.edu/search/?P=RUSS%20504](https://catalog.unh.edu/search/?P=RUSS%20504)) Intermediate Russian II or an equivalent.

### Security Studies

[https://cola.unh.edu/political-science/program/minor/security-studies](https://cola.unh.edu/political-science/program/minor/security-studies)

**Description**

The security studies minor will provide students with the opportunity to explore the many dimensions of security through the interdisciplinary study of political science, anthropology, communication, geography, history, humanities, justice studies, sociology, women’s and gender studies, economics and aerospace studies. This well-rounded curriculum will enable students to build upon their interest in political science by specializing in an area of increasing importance — domestic and global security.

The field of security studies has always been important within the discipline of political science, but the concept of security has broadened and become more problematized in recent years. Following the terrorist attacks of 9/11, federal, state and local governments created thousands of jobs that require knowledge of security issues and the ability to conduct research. Leaders at all levels count on staff with analytical skills to design and conduct research to support decision-making, and communicate the results of this research effectively to policy-makers. Individuals who understand the national security environment and have
the ability to design and conduct research are in critical demand in the 
public sector, private sector and not-for-profit entities.

For more information, contact Madhavi Devasher, 
madhavi.devasher@unh.edu, 603-862-8020.

## Requirements

1. Five courses (20 credits)
2. Students must receive a grade of C or better for a course to count 
toward the minor requirements.
3. No more than 8 credits may double count between majors and 
minors. Thus, political science majors pursuing the security studies 
minor can only double count up to two of the three required political 
science courses below. The third required course must be taken in 
addition to courses taken to fulfill major requirements.

### Required Courses

Select one core POLT course of the following: 4

Other POLT courses can be approved by the core faculty upon request.

Once students have declared the minor, they are required to meet with the coordinator or appropriate affiliated faculty adviser at least once per semester for regular review and assessment of their program, learning outcomes, and progress toward the degree.

Transfer credits may be approved by the coordinator to count toward the minor. If the transfer credit is accepted by the University and fits within the scope of the minor, it will be considered.

## Sociology (SOC)

Sociology is the study of social life, social change, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations and societies, and how people interact within these contexts.

Since human behavior is shaped by social factors, the subject matter of sociology ranges from the intimate family to the hostile mob; from organized crime to religious cults; from the divisions of race, gender and social class to the shared beliefs of a common culture.

Sociology Major (B.A.)
https://cola.unh.edu/sociology/program/ba/sociology

Description

Majoring in sociology provides a solid, multifaceted foundation in the liberal arts, including analytical thinking and writing, and skills in collecting and analyzing data. Students learn diverse theoretical approaches to the social world and acquire tools for conducting and understanding social science research. The wide range of substantive areas taught in the UNH Department of Sociology include courses concentrating on family and work; environmental sociology; social policy; inequalities of race, class and gender; criminology, social control and deviant behavior; medical sociology; and religion.

Undergraduate training in sociology is an excellent background for a variety of careers, including the business world, where majors might work in marketing and sales or human resources; government and nonprofit services, where majors might work in education, health services, social welfare or criminal justice; and research. An undergraduate degree in sociology is also excellent preparation for graduate work in law, social work, criminal justice, counseling, public administration, public health, business administration, urban planning or further studies in sociology.

To declare a major in sociology, students must have completed at least one introductory-level sociology course with a grade of C or better. New students who declare the major upon admission to UNH must enroll in SOC 400 Introductory Sociology during their first semester and earn a grade of C to maintain status in the program.

Conjoint minors (allowing double-counting of one or two courses) are available for justice studies; gerontology; American studies; race and ethnic studies; women’s and gender studies; and other approved minors. Students also have the opportunity to pursue a second major, including justice studies. Students interested in social work or teaching can develop programs in conjunction with the appropriate departments. The departmental honors program is recommended for students with cumulative grade-point averages over 3.4, and especially for those anticipating graduate study.

Requirements

Majors must complete a minimum of 40 semester credits in sociology courses with grades of C- or better in each course and a GPA of 2.0 or better in sociology courses.

SOC 599 Sociological Analysis 1 4
SOC 601 Methods of Social Research 2 4
Discovery Program Capstone Requirement:
SOC 611 Sociological Theory 3 4
Select five additional major courses, at least two must be at the 600 or 700 level (upper-level electives)

Total Credits 40

1. SOC 599 Sociological Analysis must be completed no later than the junior year and is a prerequisite for majors taking 600- and 700-level courses.
2. Both SOC 402 Statistics and SOC 599 Sociological Analysis are prerequisites for SOC 601 Methods of Social Research.
3. Complete SOC 611 Sociological Theory during senior year.

SOC 595 Independent Reading and Research can be used to fulfill one lower-level elective or SOC 799 Senior Thesis can be used to fulfill one upper-level elective. Sociology majors may use two major-required courses to satisfy two Discovery category requirements. In addition, SOC 599 Sociological Analysis can be used to satisfy both a major requirement and the Inquiry Discovery requirement. (Statistics courses taken in other disciplines are generally not acceptable as a substitute for SOC 402 Statistics.)

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.A. candidates must also satisfy the foreign language proficiency requirement.

Students interested in majoring in sociology should consult with the chair of the undergraduate committee in the sociology department for guidance. It is the responsibility of all sociology majors to obtain the latest information from the department office.

Sociology Language Requirement

The bachelor of arts degree at the University of New Hampshire requires that students satisfy the foreign language proficiency requirement. The requirement may be met by demonstrating language proficiency equal to a one-year college-level course (401 and 402, 403 and 503, 501 [Latin only], or 503 and above in a spoken language). American Sign Language courses do not meet the foreign language requirement for sociology majors.

The Department of Sociology requires all students declaring the major after fall 2006 to choose from one of the following languages: Arabic, Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian and Spanish. Exceptions to this list must be petitioned and approved by the Department of Sociology’s Undergraduate Committee and a student’s adviser.

Sociology Minor
https://cola.unh.edu/sociology/program/Minor/sociology

Description

Sociology is the study of social life, social change, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations and societies, and how people interact within these contexts.
Since human behavior is shaped by social factors, the subject matter of sociology ranges from the intimate family to the hostile mob; from organized crime to religious cults; from the divisions of race, gender and social class to the shared beliefs of a common culture.

Requirements

A minor consists of any five 4-credit courses in sociology with a C- or better in each course and a grade-point average of 2.0 or better in these courses.

Spanish (SPAN)

The Spanish program major and minor in the Department of Languages, Literatures and Cultures helps students develop Spanish language proficiency and an enhanced knowledge of the cultural and literary achievements of Hispanic societies around the globe. This dual emphasis on communication and cultural analysis prepares students to live in communities where Spanish is increasingly important professionally and personally.

In addition, the program offers courses in Portuguese. Students also have the option to complete honors in the major providing they complete the necessary classes and a senior thesis in Spanish.

The UNH study abroad program in Granada, Spain, open to majors and nonmajors, offers students the opportunity to live and study abroad for a spring semester. A six-week summer immersion program in Costa Rica also is available to students. Financial aid is available for eligible students. Visit cola.unh.edu/granada (https://cola.unh.edu/center-study-abroad/programs/spain-granada), cola.unh.edu/costa-rica (https://cola.unh.edu/center-study-abroad/programs/costa-rica-san-joaquin-de-flores), or contact the departmental program directors for further information.

Accelerated B.A./M.A. Program

The dual-degree B.A./M.A. program in Spanish in the Department of Languages, Literatures and Cultures offers high-achieving students the opportunity to earn both an undergraduate and a graduate degree during their time at UNH. Qualified students may be accepted into the program late in the first semester of their junior year and begin to take graduate courses in the spring of their senior year. Students graduate with a B.A. upon completion of 128 credits (including all University, College and Program requirements), and then complete graduate work (30 credits) the following year. After only five years of study, students earn both degrees.

Spanish Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/spanish-major

Description

When you major in Spanish you are opening your opportunities to a variety of fields in which proficiency in the Spanish language and knowledge of Hispanic cultures are desirable or required. Such fields might include international relations, business administration, government, social service and communications. In addition, students can prepare to teach Spanish at the elementary and secondary levels and in bilingual education programs through UNH’s foreign language teacher education program. The undergraduate major also provides a basis for graduate study in preparation for scholarly research and teaching at the college level. When combined with coursework or a dual major in other disciplines, the major prepares students for work in Spanish-speaking areas of the world as well as in bilingual regions of the United States.

Requirements

The major consists of a minimum of 40 credits. All coursework required for the Spanish major must be completed with a grade of C or better. Specific course requirements are:

<table>

</tbody>
</table>
SPAN 525 Introduction to Spanish Cultures or SPAN 526 Introduction to Latin American Cultures may be used to satisfy one of these electives. Students are strongly encouraged to select courses taught in Spanish to meet their major requirements. Only one course taught in English may be counted toward the Spanish major.

An approved foreign study experience in a Spanish-speaking country of a minimum of one semester is required; a full academic year is highly recommended. The Discovery Program capstone requirement may be fulfilled by completing SPAN 797 Topics in Hispanic Literary and Cultural Studies (topic R only) in the fall semester or any 700-level Spanish course in the spring semester. Students completing their Discovery capstone in the spring semester must designate one class as their capstone and present their final work in that class at the Undergraduate Research Conference that semester.

Please note that the required minimum overall GPA for study abroad and the Spanish major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Spanish majors may use two major-required courses to satisfy two Discovery category requirements.

**Spanish Minor**

https://cola.unh.edu/languages-literatures-cultures/program/minor/spanish

**Description**

When you minor in Spanish you are expanding upon opportunities and opening doors to careers in your field of interest. Many other disciplines such as social service, nursing, teaching and business require Spanish as a second language since Spanish is the second most spoken language in the United States. Increasingly, employers in government at municipal, state and federal levels and business as well as related careers, are viewing such experience and language skills favorably.

**Requirements**

At least three courses must be taken in residence at UNH. All coursework required for the Spanish minor must be completed with a grade of C or better and may not be taken pass/fail.

**Theatre and Dance (THDA)**

There is no area of human endeavor that theatre does not touch. To study theatre is to learn a great deal about yourself and about the world in which you will live. No course of study will prepare you better for life in a rapidly changing world.

The award-winning faculty at the University of New Hampshire provide theatre and dance majors with superlative training within a broad liberal arts context. Students may take courses in acting; voice and movement; dialects; directing; choreography; design and theatre technology; the history, theory and criticism of drama and theatre; youth drama; secondary theatre education; playwriting; storytelling; puppetry; ballet; theatre dance (jazz and tap); aerial dance; and musical theatre. Students interested in performance, technical and historical aspects are trained to step into professional careers while still broadening the scope of their preparation through a rich liberal arts education. The program encourages students to explore their interests through independent studies and internships, special projects and active personal involvement in lecture and laboratory classes, with the possibility for integration with other departments. To assist with financial needs, the department awards scholarships to selected majors each spring.

The Department of Theatre and Dance offers over 25 performance opportunities every year in either musicals, plays or dance concerts. In addition to performing, students are given the opportunity to direct, stage manage, design, choreograph or write scripts for the work done in our department. We offer jazz, tap and ballet studies. In addition, UNH was the first university to add Aerial Dance to course offerings. Students study with faculty who have worked locally, nationally and internationally, and we offer the opportunity to interview for a technical assistant scholarship wherein students take on important backstage roles to build up their resumes and experience. In return, students receive half off of in-state tuition.

In addition to general liberal arts preparation, six specific course sequences are available within the theatre major:

1. courses leading to a theatre major with an option in acting & directing;
2. courses leading to a theatre major with an option in dance: ballet, theatre dance (tap and jazz) and aerial dance. Students also have the option of pursuing dance education leading to K-12 dance teacher certification. To achieve certification, the dance education option should be combined with requirements of the Department of Education, in conjunction with a fifth year master of arts in teaching (M.A.T.) or master of education (M.Ed.) program;
3. courses leading to a theatre major with an option in design & theatre technology;
4. courses leading to a theatre major with an option in musical theatre;
5. courses leading to a theatre major that, if desired, may be combined with requirements of the Department of Education, in conjunction with a fifth year master of arts in teaching (M.A.T.) or master of education (M.Ed.) program, to prepare students for secondary school certification with an undergraduate option in secondary theatre education;
6. courses leading to a theatre major that, if desired, may be combined with requirements of the Department of Education, in conjunction with a fifth year master of education (M.Ed.) program, to prepare students for elementary school certification with an undergraduate option in youth drama.

Auditions are required for the acting, dance and musical theatre options. Interviews are strongly encouraged for all other areas. The audition session will last approximately two and a half hours. In addition to the audition, students will have an opportunity to ask questions during a comprehensive department overview. Please note that entrance into Department of Theatre and Dance options is contingent upon acceptance into the University of New Hampshire. Prospective students who live...
more than 250 miles away may contact the department to discuss other audition options. Audition dates, as well as detailed entrance requirements, can be found at the Department of Theatre and Dance website.

Minoring in Theatre and Dance
A minor acknowledges a level of competence and academic focus without the depth a major requires. Students may pursue a minor while majoring in another subject when the demands of that major prevent the possibility of a double major.

Theatre Major (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major

Description

The general theatre major provides a well-rounded course of study which encourages inquisitive students who have a wide range of theatre/dance interests to tailor a program that will challenge but also broaden their intellectual horizons. Its lower required credit load also makes it ideally suited to students who want to combine their theatre studies with another major, such as business administration, international studies or social work. Contact David Richman, Paul Creative Arts Center, (603) 862-2218, david.richman@unh.edu.

Requirements

In the freshman and sophomore years, students should enroll for at least two major and two Discovery courses per semester. The minimum grade requirement for major courses is C- per course. Any grade lower than C- will not count toward the major. Under department policy, students who complete both COMM 401 American Sign Language I and COMM 502 American Sign Language II satisfy the bachelor of arts language proficiency requirement. All majors must take courses in the following areas: performance, design/theatre technology and theory/history as well as fulfill between four and eight practicums and complete a capstone course. Although timing will vary with each option, it is strongly suggested that all introductory courses be taken prior to the end of the student’s sophomore year.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Theatre department majors may use one major-required course to satisfy one Discovery category requirement.

All UNH B.A. degrees require a minimum of 128 credit hours.

Theatre Major: Acting and Directing Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-acting-directing-option

Description

Created for students with a passion for acting and/or directing, this option is designed to develop the actor and the director as an interpretive, creative and self-sufficient artist. Award-winning faculty working in the profession challenge students to strive for excellence in the art and craft of acting and directing through highly challenging coursework, performance projects and productions, as well as special workshops with acclaimed guest artists.

Total Credits 58-62

1 The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.

2 Includes those in Sections II, III, and IV
**Description**

The dance option offers a diverse program that is designed to give the dance teacher, choreographer and/or performer the skills needed to embark on a successful career. Technique courses in ballet, pointe, tap, jazz and the aerial arts are at the core of this program. Courses in history of dance, composition, choreography and dance pedagogy aid dancers in preparing for a variety of employment opportunities in the dance field. In addition, dancers are introduced to the technical aspects involved in staging a full-scale performance. Performance opportunities include yearly faculty-directed dance concerts and student-created dance showcases each semester. Dancers may focus on one or all dance forms.

Students may choose to combine the dance option with requirements of the UNH Department of Education, in conjunction with a fifth year Master of Arts in Teaching (M.A.T.) or Masters in Education (M.Ed.) program. This path will prepare students for dance teaching certification or elementary school teaching certification with an undergraduate specialization in dance. They also have the option of pursuing dance education leading to K-12 dance teacher certification.

Contact Gay Nardone, Newman Dance Studio, (603) 862-1728, gay.nardone@unh.edu.

**Requirements**

In the freshman and sophomore years, students should enroll for at least two major and two Discovery courses per semester. The minimum grade requirement for major courses is C- per course. Any grade lower than C- will not count toward the major. Under department policy, students who complete both COMM 401 American Sign Language I and COMM 502 American Sign Language II satisfy the bachelor of arts language proficiency requirement. All majors must take courses in the following areas: performance, design/theatre technology and theory/history as well as fulfill between four and eight practicums and complete a capstone course. Although timing will vary with each option, it is strongly suggested that all introductory courses be taken prior to the end of the student’s sophomore year.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Theatre department majors may use one major-required course to satisfy one Discovery category requirement.

All UNH B.A. degrees require a minimum of 128 credit hours.

**Performance**

Select 16 credits of the following:
- THDA 462 | Ballet I |
- THDA 463 | Theatre Dance I |
- THDA 562 | Ballet II (May be repeated to 16 cr) |
- THDA 563 | Theatre Dance II (May be repeated to 16 cr) |
- THDA 576 | Pointe |
- THDA 662 | Ballet III (May be repeated to 16 cr) |
- THDA 663 | Theatre Dance III (May be repeated to 16 cr) |
- THDA 665 | Aerial Dance (May be repeated to 16 cr) |

Total Credits | 56-60

1. The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.

**State K-12 Teacher Certification**

Certification in Dance is part of the pre-service programs in teacher education, which seek to prepare teachers who demonstrate excellence in classroom practice and who will become educational leaders. The basic program to achieve these ends is the five-year program in which students begin preparation for teaching at the undergraduate level with field experience and professional course work in teaching. Students complete a baccalaureate degree in Theatre with a Dance Option and move into a fifth year of study and a full-year internship which lead to either the Masters in Education (M.Ed.) or a Master of Arts in Teaching (M.A.T.) degree and licensure for teaching. Students who have already completed a baccalaureate degree with dance as an option or major may also be able to enter the teacher preparation program at the graduate level. With a GPA of 3.2 or better, you may be eligible for early admission to the graduate program, allowing up to twelve credits to dual count for both undergraduate and graduate degrees. Successful completion of the Praxis Core test is required for UNH graduate school admission. With no prior course work in education, this program will normally require two years to achieve licensure and either the M.Ed. or M.A.T.

The kindergarten through 12th grade certification in the dance education program provides the foundation for public school teaching certification through the Five-Year Teacher Education Program at UNH. This program...
integrates a general education background with dance training in a variety of dance styles, dance history, choreography, and dance pedagogy for the purpose of understanding content, process, and methodologies of dance as an art form. All five-year candidates must meet requirements for admission to graduate school. All K-12 Education in Dance students must receive a “C-” grade or better in all Theatre and Dance courses required in the program and a “B-” or better in the graduate level courses. New Hampshire also participates in a reciprocal agreement with many other states, the Interstate Certification Compact. For further clarification regarding fifth-year certification options, contact Assaf Benchetrit, Paul Creative Arts Center, (603) 862-4485, assaf.benchetrit@unh.edu.

### Theatre Major: Design & Theatre Technology Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-design-theatre-technology-option

#### Description

Design and theatre technology students who show significant progress and ability may earn the opportunity to demonstrate practical application of their studies through the department’s main stage production design assignments. Through classwork, production assignments and problem-solving, this option prepares students for both practical skills and aesthetic sensibilities needed for the creation of visual and technical elements for the performing arts. The challenging coursework provides both fundamental knowledge and critical thinking practice, which are skills that help students pursue a successful profession in theatre and related fields; the core principles of hard work, problem-solving and creativity are transferable to other career paths as well. UNH-trained graduates hold careers across the nation as designers, technical directors, stage managers, property masters, head electricians and scenic artists.

Contact Szu-Feng Chen, Paul Creative Arts Center, (603) 862-4445, szu-feng.chen@unh.edu.

#### Requirements

In the freshman and sophomore years, students should enroll for at least two major and two Discovery courses per semester. The minimum grade requirement for major courses is C- per course. Theatre Major: Musical Theatre Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-musical-theatre-option

Description

The musical theatre option is designed to cultivate and nurture the creative artistry of those highly motivated students who wish to develop their combined talent as singers, actors and dancers. Students in the musical theatre option will thrive in this intense and dynamic program of coursework, practical application, performance-based projects, faculty- and student-directed productions, and special workshops with guest artists and instructors. Students will be expected to fully integrate their vigorous training as actors, dancers and singers with the outstanding liberal arts education they will receive at UNH to become well-rounded and marketable musical theatre artists.

Theatre Major: Secondary Theatre Education Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-secondary-theatre-education-option

Description

Candidates interested in passing on their love of theatre to future generations will find that the secondary theatre education option offers practical and theoretical training for teachers. As one of a few programs...
in the country, UNH’s Secondary Theatre Education option boasts a robust offering with six courses specifically focused on how to teach theatre. Through comprehensive course and laboratory work, students obtain hands-on theatre teaching experience, so that by the time they reach graduation, they have spent significant hours working with the K-12 age group. Students are provided with extensive training and practical teaching experience specifically geared towards the goal of being a theatre teacher, either in a traditional classroom or as a teaching artist. Whether pursuing the fifth year graduate certification program or entering the professional theatre education world directly after the undergraduate degree, students can expect to leave UNH prepared for the rigorous task of teaching.

Theatre Major: Youth Drama Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-youth-drama-option

Description

Anyone interested in teaching elementary-aged students would benefit from the youth drama option. Consider pairing this with family studies or early childhood education. Youth drama is for those students who wish to use dramatic arts as a teaching tool, either in the elementary classroom or as a teaching artist. Our comprehensive curriculum is specifically designed to train teachers to use storytelling and creative drama to enrich the classroom. Work with our master puppeteer to take Introduction to Puppetry as well as Advanced Puppetry. Through comprehensive class and laboratory work, students obtain hands-on theatrical teaching experience so that, by the time they reach graduation, they have spent significant hours teaching children. Whether pursuing the fifth year graduate certification program or entering the professional theatre education world directly after the undergraduate degree, students will leave UNH with sound theoretical training in addition to practical instruction on how to use drama to enhance learning outcomes, address classroom discipline issues and, of course, bring the arts to life in the classroom.

Contact Raina Ames, Paul Creative Arts Center, (603) 862-3044, raina.ames@unh.edu.

Requirements

In the freshman and sophomore years, students should enroll for at least two major and two Discovery courses per semester. The minimum grade requirement for major courses is C- per course. Any grade lower than C- will not count toward the major. Under department policy, students who complete both COMM 401 American Sign Language I and COMM 502 American Sign Language II satisfy the bachelor of arts language proficiency requirement. All majors must take courses in the following areas: performance, design/theatre technology and theory/history as well as fulfill between four and eight practicums and complete a capstone course. Although timing will vary with each option, it is strongly suggested that all introductory courses be taken prior to the end of the student’s sophomore year.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Theatre department majors may use one major-required course to satisfy one Discovery category requirement.

All UNH B.A. degrees require a minimum of 128 credit hours.

EdUCation

State Teacher Certification

Youth Drama options often pursue elementary education certification. In order to obtain state licensure, students must apply to either the UNH Department of Education or another university for acceptance into a fifth year masters of education (M.Ed.) degree program, which fulfills state requirements for certification. Students who are accepted into early graduate admission may take up to 12 credits toward the masters degree while finishing their undergraduate degree. For further clarification regarding fifth-year certification options, contact Raina Ames, Paul Creative Arts Center, (603) 862-3044, raina.ames@unh.edu.

Arts Administration Minor
https://cola.unh.edu/theatre-dance/program/minor/arts-administration

Description

The minor in arts administration is designed to give students in the fine and performing arts a base knowledge and skill set that can be applied to a wide range of job opportunities related to arts management and administration. It has also been created for students enrolled in the Peter T. Paul School of Business, as well as majors in other disciplines, to expand their knowledge base in the fine and performing arts area of their greatest interest. These courses are combined with specific classes in arts administration to prepare students for opportunities within the non-profit and for-profit arts sectors. Students who major in theatre or one if its theatre or dance options may minor in arts administration provided no more than 8 credits are used to satisfy both major and minor requirements.

Dance Minor
https://cola.unh.edu/theatre-dance/program/minor/dance

Description

Students minoring in dance keep open the option of pursuing a career in dance by cultivating and maintaining a high level of dance skill while still having the opportunity to major in another area of interest outside the Department of Theatre and Dance. Minors are encouraged to audition for all performance opportunities including faculty-directed dance concerts as well as student-created dance showcases. In addition, students who major in theatre or one of its theatre options may minor in dance provided no more than 8 credits are used to satisfy both major and minor requirements.

Musical Theatre Minor
https://cola.unh.edu/theatre-dance/program/minor/musical-theatre

Description

The musical theatre minor offers the student basic knowledge of the history and canon of this uniquely American art form while providing for hands-on experience in both singing and dancing. Students who major in theatre or one if its theatre or dance options may minor in musical theatre provided no more than 8 credits are used to satisfy both major and minor requirements.

Youth Drama Minor

https://cola.unh.edu/theatre-dance/program/minor/youth-drama

Description

Anyone with an interest in theatre for young audiences, either in acting or as a way to augment teaching strategies, will benefit from this minor, which utilizes activated and arts-infused methodology to enliven work with K-12 students. The youth drama minor is ideal for those who wish to explore the dramatic arts through an educational lens.

Women's and Gender Studies (WS)

Women's and gender studies provides students with an understanding of the status of women in various cultures and historical eras, in the nexus of race, class, sexuality, religious and disability studies. Students learn the use of gender as a category of analysis and increase their knowledge of women's contributions to many fields. Women's and gender studies courses offer students critical perspectives on such basic questions of the social order as assumptions about gender roles and gender identity.

As a relatively small department in the College of Liberal Arts, we provide students with a sense of community and opportunities to contribute directly to changing the campus climate. In a rigorous academic environment, women's and gender studies offers students a springboard for activism. Our internship program enables students to gain first-hand work experience across many fields.

A major or minor in women's and gender studies or social justice leadership prepares students for careers where the changing roles of women are having a perceptible impact. Women's studies graduates go on to law school and graduate school in a variety of disciplines. Some have taken positions with social change or family service agencies, while others have found work in such fields as health care, journalism, education, human rights, social and environmental justice, and the arts.

Women's and Gender Studies Major (B.A.)

https://cola.unh.edu/womens-gender-studies/program/ba/womens-gender-studies-major
Description

Women's and gender studies provides students with an understanding of the status of women in various cultures and historical eras, in the nexus of race, class, sexuality, religious and disability studies. Students learn the use of gender as a category of analysis and increase their knowledge of women's contributions to many fields. Women's and gender studies courses offer students critical perspectives on such basic questions of the social order as assumptions about gender roles and gender identity.

As a relatively small department in the College of Liberal Arts, we provide students with a sense of community and opportunities to contribute directly to changing the campus climate. In a rigorous academic environment, women's and gender studies offers students a springboard for activism. Our internship program enables students to gain first-hand work experience across many fields.

A major in women's and gender studies prepares students for careers where the changing roles of women are having a perceptible impact. Women's and gender studies graduates go on to law school and graduate school in a variety of disciplines. Some have taken positions with social change or family service agencies, while others have found work in such fields as health care, journalism, education, human rights, social and environmental justice, and the arts.

Students who wish to major in women's and gender studies should consult with the Department Chair or Associate Coordinator in 203 Huddleston Hall.

Requirements

The women's and gender studies major requires students to complete 40 credits of major-approved coursework with grades of C- or better and an overall grade point average in major courses of 2.00 or higher.

505 Surveys

WS 505 Survey in Women's Studies

Examples of course topics include:

- Sustainability & Spirituality
- Fashion This!
- Race, Gender, and Environmental Justice
- Intro to LGBTQ+ Studies
- The Care Economy
- Queer Cinema
- Queer Sustainability

WS 510 Framing Feminism: Gender Politics in Film

WS 515 Game Girl: The Social Construction of Gender Identities in Video Games

798 Colloquiums

WS 798 Colloquium

Examples of course topics include:

- Feminist Studies in Film
- Jewish Feminism, Politics, and Culture
- Global Feminist Issues
- Transgender Feminism
- Theater as a Provocative Act
- Native and Indigenous Women
- Queer Sustainability

For a list of currently-approved cross-counted offerings from other departments, please check: cola.unh.edu/womens-gender-studies/cross-counted-courses-ws-schedule.

A practicum, internship course, and/or research with faculty is strongly recommended.

Women's and gender studies majors may use two major-required courses to satisfy two Discovery category requirements. First and second majors may double count no more than two courses between the WS major and another major or minor.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement. ASL: COMM 401 American
Sign Language I and COMM 502 American Sign Language II may be used to satisfy the language competency requirement.

## Social Justice Leadership Minor

https://cola.unh.edu/womens-gender-studies/program/minor/social-justice-leadership

### Description

The minor in social justice leadership engages students in an exploration of policies, power dynamics, institutions and structures that promote and hinder equity and processes of change required for social justice. Students will examine various forms of injustice such as sexism, racism, classism, ableism and environmental degradation. The minor is grounded in three pillars — a theory component, a leadership component and experiential learning activities. The minor is interdisciplinary in nature, drawing on disciplines such as anthropology, education, English, history, philosophy, political science, social work and sociology. After completing the curriculum, students will have gained a historical perspective, theoretical understanding and applied leadership skills. The minor certifies students' knowledge regarding, and commitment to, social justice leadership, which will be useful in postgraduate pursuits.

NURS #595  Women's Health  4
OT 513  Stressed Out: The Science and Nature of Human Stress  4
SW 697  Special Topics in Social Welfare (Exploring Social Justice & Cultural Competency)  4
SW 715  Practice with Gay, Lesbian, Bisexual, and Transgender People  4

Courses in the Paul College of Business and Economics

ECON #669  Women and Economic Development  4

The women's and gender studies core faculty will consider approving other courses that include more than 50% of content related to social justice leadership.

Once students have declared the minor, they are required to meet with the associate coordinator at least once per semester for regular review of progress towards the degree.

Transfer credits may be approved by the coordinator to count towards the minor. If the transfer credit is accepted by the university and fits within the scope of the minor, it will be considered.

Women's and Gender Studies Minor

https://cola.unh.edu/womens-gender-studies/program/minor/womens-gender-studies

Description

Women's and gender studies provides students with an understanding of the status of women in various cultures and historical eras, in the nexus of race, class, sexuality, religious and disability studies. Students learn the use of gender as a category of analysis and increase their knowledge of women's contributions to many fields. Women's studies courses offer students critical perspectives on such basic questions of the social order as assumptions about gender roles and gender identity.

As a relatively small department in the College of Liberal Arts, we provide students with a sense of community and opportunities to contribute directly to changing the campus climate. In a rigorous academic environment, women's studies offers students a springboard for activism. Our internship program enables students to gain first-hand work experience across many fields.

A major or minor in women's studies prepares students for careers where the changing roles of women are having a perceptible impact. Women's studies graduates go on to law school and graduate school in a variety of disciplines. Some have taken positions with social change or family service agencies, while others have found work in such fields as health care, journalism, education, human rights, social and environmental justice, and the arts.

Students who wish to minor in women's studies should consult with the Department Chair or Associate Coordinator (https://cola.unh.edu/womens-gender-studies/faculty-staff-directory) in 203 Huddleston Hall.

Requirements

For the women's and gender studies minor, students must complete 20 credits of women's and gender studies courses with a grade of C- or better. Courses taken pass/fail may not be used toward the minor.

No more than eight credits used to satisfy the requirements for another major may be used for the women's and gender studies minor. Students electing the women's and gender studies minor must complete:

COLLEGE OF ENGINEERING AND PHYSICAL SCIENCES

Charles K. Zercher, Dean
Sharon McCrone, Associate Dean for Academic Affairs

The College of Engineering and Physical Sciences (CEPS) provides an opportunity for students to achieve educational objectives appropriate to their interests in engineering, computer science, information technology, mathematics, the physical sciences, and the teaching of mathematics and physical sciences. The college offers an education in each of its primary disciplines leading to the bachelor of science, as well as bachelor of art degrees with majors in mathematics and each of the three physical sciences. All programs include an opportunity for study in the arts, humanities, and social sciences.

The key to an undergraduate program in the college is flexibility, with a strong emphasis on personal and individualized education. In addition to specific programs, a wide range of options within several majors are available. Special programs can be developed to meet the specific interests of individual students.

Degree Requirement
MATH 425 Calculus I and MATH 426 Calculus II or the equivalent in transfer credits or advanced placement approved by the Department of Mathematics and Statistics are required by all departments of the college. The exception is the information technology major, which only requires MATH 425 Calculus I. The prerequisites for calculus are three years of college-preparatory mathematics, including a half-year of trigonometry. Before students can register for MATH 425 Calculus I, they are required to take the Mathematics Placement Test or to have taken MATH 418 Analysis and Applications of Functions (or its equivalent) and received a grade of C or better.

Mathematics Placement
First-year students arrive with a wide range of mathematical skills based upon their high school preparation. The college wants students to have a solid mathematics foundation so that they will enjoy an enriched first-semester experience. A student’s mathematics development will be assessed as part of the June orientation program. Based upon the Mathematics Placement Test, students are enrolled in the mathematics class that will allow them to continue that development. The initial mathematics entry course is MATH 418 Analysis and Applications of Functions. However, a student is placed into MATH 425 Calculus I if he or she demonstrated a certain level of proficiency in algebra and precalculus through the Mathematics Placement Test. Students with AP credit for Calculus I and/or Calculus II may elect to accept those credits and continue with a math course at the next level.

Accreditation
The baccalaureate-level programs in chemical, civil, computer, electrical, environmental, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, Inc. The baccalaureate-level program in computer science and bioinformatics is accredited by the Computing Accreditation Commission of ABET, Inc. ABET contact information:

111 Market Place
Suite 1050
Baltimore, MD 21202-401
(410) 347-7700.

The Department of Chemistry’s undergraduate bachelor of science program is approved by the American Chemical Society.

Degrees
Bachelor of Arts
Programs leading to a bachelor of arts degree are offered in the departments of chemistry, earth sciences, mathematics, and physics. These programs provide a broad liberal education along with a major in one of these fields.

Bachelor of Science
The programs leading to the bachelor of science degree, offered in each of the departments of the college, emphasize students’ preparation for a professional career and continuing or graduate education.

The degree requirements for the bachelor of science include the University Academic Requirements and the specific departmental requirements for graduation. A minimum grade-point average of 2.0 must be achieved. Graduation credit requirements established by the departments range from 128 to 134. There are entrance requirements in some programs, and it is not possible to guarantee all change-of-major requests.

Interdisciplinary Programs
Bachelor of Science in Environmental Sciences
The environmental sciences program is offered jointly with the College of Life Sciences and Agriculture (COLSA).

Minors
Interdisciplinary minors enable students to obtain experience in a specialized area and to retain identification with their major professional area.

Other Programs
Independent Study and Projects
All departments within the college offer independent study opportunities and projects. The content of these courses varies and is based upon current scientific and technological needs in addition to the interests of the student and faculty involved.

Permission of the faculty member and/or department chairperson is required. One should review the course descriptions for the independent study and project courses for specific requirements. Students interested in working with a faculty member on a project or independent study should discuss this with the faculty member and their academic adviser prior to registering for the course.

Research Opportunities
The talents and expertise of the faculty in all departments are reflected in the number of ongoing research projects. Undergraduates are included in many of these research projects with the intent that they will discover and foster their creative talents. When involved with a funded research project, students may have an opportunity to receive pay while learning about the research area.

The college has world-class laboratories and computer facilities in many areas. A few of these are coastal and ocean mapping, space science,
environmental engineering and science, fluid dynamics, wind turbulence, information systems, materials science, nanotechnology, sustainability, and medical imaging. These and other ongoing research areas within the college are described on the college's website: https://ceps.unh.edu/research-facilities.

Students have the opportunity to acquire applied experience by working with faculty members who undertake sponsored professional projects in technical and managerial areas for business, industry, and federal, state, and local governments.

Special Provisions
The requirement of a given topic/course prescribed to meet the requirements of major curriculum may be waived by the faculty of a student's department. This rule offers students the opportunity to develop a somewhat individualized plan of study with intellectual incentives and opportunities in addition to those found in a regular curriculum. The student's petition must be approved by his/her major adviser and the dean of the college. This power usually will be delegated by the faculty to the dean or to a committee (Senate Rule 05.21(s): Waiver of Requirements in a Prescribed Curriculum).

A student with senior status and a grade point average of 3.2 may petition to take a graduate course for undergraduate credit. In addition, upon the recommendation of the department chairperson, a superior student may be allowed to count credits from up to two 800-level courses toward both a bachelor's degree and a master's degree, provided that the student has been admitted to the master's program.

Study Abroad Programs
Scotland, Heriot-Watt University Exchange Program
College of Engineering and Physical Sciences students are eligible to participate in a spring semester exchange with Heriot-Watt University in Edinburgh, Scotland. The current program is designed for civil and environmental engineering majors. For more information, contact Ray Cook at (603) 862-1411 or the Global Education Center, Conant Hall. Details on the program can also be found at study.abroad@unh.edu.

Global E3 Exchange Programs
Engineering and computer science majors are eligible to participate in international exchange programs through the Global E3 program. Programs are offered in the fall, spring, and summer, as well as for the full academic year. For more information on Global E3, please refer to www.iie.org/programs/globale3 (http://www.iie.org/programs/globale3). For more information on eligibility as student in the College of Engineering and Physical Sciences, contact Catherine D’Auteuil at catherine.dau@unh.edu

Preparing for Teaching
Students interested in mathematics education (elementary, middle/junior high, or secondary) or Earth science teaching should refer to the appropriate department for a description of the program requirements.

Combined Programs of Study
In addition to pursuing a single major, students may combine programs of study as follows:

Minors: See University Academic Requirements; see also Degrees and Major Programs of Study and Departmental Programs of Study.

Second majors: See University Academic Requirements.

Interdisciplinary majors: Many departments in the college offer programs that combine a major with another field of interest. See the descriptions that follow.

Dual-degree programs: See University Academic Requirements.

Student-designed majors: See Special University Programs.

Other combined and interdisciplinary opportunities: See Special University Programs.

Bioengineering (BENG)

Bioengineering, as defined by the NIH, is "the application of life sciences, mathematics, and engineering principles to define and solve problems in biology, medicine, health care, and other fields."

Mission

Our Bioengineering program empowers students with broad preparation for pursuing careers related to biotechnology, biomedical and engineering fields.

Program Educational Objectives

The bioengineering program seeks to provide an environment and opportunities that enable students to pursue their goals in an innovative program with a diversity of offerings that is rigorous and challenging.
The program has the following major educational objectives with the expectation that our alumni will have successful careers in the many diverse areas of bioengineering profession. Within a few years of obtaining a bachelor's degree in bioengineering, we expect our graduates to have the following attributes:

**Depth:** To be effective in applying life science concepts and bioengineering principles in engineering practice or for advanced study.

**Breadth:** To have productive careers in the many diverse areas of bioengineering or in pursuit of graduate studies in engineering, law, medicine or business.

**Professionalism:** To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

Bioengineering Major (B.S.)

https://ceps.unh.edu/chemical-engineering/bioengineering-bs

Description

Bioengineering, as defined by the NIH, is “the application of life sciences, mathematics, and engineering principles to define and solve problems in biology, medicine, health care, and other fields.”

The bioengineering program will train graduates in biology and physiology as well as engineering. The program will provide graduates with capabilities in advanced mathematics (including differential equations and statics), science, and engineering. Graduates will be conversant with solving problems at the interface of biology and engineering that may arise in the fields of biotechnology and pharmaceuticals, as well as medicine and biofuels. By graduation, students will have experience measuring and interpreting data from living systems and addressing the interactions between living and non-living materials.

Students are required to obtain a minimum 2.0 grade-point average in CHE 501 Introduction to Chemical Engineering I/CHE 502 Introduction to Chemical Engineering II and in overall standing at the end of the sophomore year in order to continue in the major. Study abroad (Exchange) students are required to have a cumulative GPA of 3.0 or better in math, physics, chemistry, and other required courses at the end of the semester prior to their exchange semester.

For more information on the bioengineering program, please contact Russell Carr, professor and chair, Russell.Carr@unh.edu.

2 CHEM 405 Chemical Principles for Engineers satisfies the Discovery Physical Science (with lab) category.
3 ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.

34 credits engineering, 16 credits math, 14 credits chemistry, 16 credits life science

Five electives: 15 to 16 credits engineering; 4 credits science, math, or engineering

Chemical Engineering (CHE)

The Department of Chemical Engineering currently offers the undergraduate degree program in chemical engineering with options in bioengineering, energy engineering, and environmental engineering.

The B.S. program in chemical engineering is accredited by the:

Engineering Accreditation Commission of ABET
111 Market Place
Suite 1050
Baltimore, MD 21202-4012
(410) 347-7700

Chemical engineering is concerned with the analysis and design of processes that deal with the transfer and transformation of energy and material into products of high value.

The practice of chemical engineering includes the conception, development, design, and application of physicochemical processes and their products; the development, design, construction, operation, control, and management of plants for these processes; and activities relating to public service, education, and research.

The curriculum prepares students for productive careers in industry or government and provides a foundation for graduate studies. The college’s program emphasizes chemical engineering fundamentals while offering opportunities for focused study in energy, environmental, or bioengineering.
Traditional employment areas in the chemical process industries include industrial chemicals, petroleum and petrochemicals, plastics, pharmaceuticals, metals, textiles, and food. Chemical engineers are also working in increasing numbers in the areas of energy engineering, pollution abatement, and biochemical and biomedical engineering; in addition, they are employed by many government laboratories and agencies as well as private industries and institutions.

Mission
The department strives to prepare students for productive careers in industry or government as well as to provide a foundation for graduate studies. The program emphasizes chemical engineering fundamentals while offering opportunities for focused study in energy, environmental, or bio-engineering.

Program Educational Objectives
The chemical engineering program seeks to provide an environment that enables students to pursue their goals in an innovative, rigorous, and challenging program with a diversity of offerings.

The program has the following major educational objectives with the expectation that our alumni will have successful careers in the many diverse areas of the chemical engineering profession. Within a few years of obtaining a bachelor’s degree in chemical engineering, we expect our graduates to have the following attributes:

- **Depth.** To be effective in applying chemical engineering principles in engineering practice or for advanced study in chemical engineering.
- **Breadth.** To have a productive career in the many diverse fields of chemical engineering such as bio-engineering, energy, and the environment, or in the pursuit of graduate education in disciplines such as chemical engineering, medicine, law, or business.
- **Professionalism.** To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

### Chemical Engineering Major (B.S.)

https://ceps.unh.edu/chemical-engineering/program/bs/chemical-engineering-major

### Description
Chemical engineering is concerned with the analysis and design of processes that deal with the transfer and transformation of energy and material.

The practice of chemical engineering includes the conception, development, design, and application of physicochemical processes and their products; the development, design, construction, operation, control, and management of plants for these processes; and activities relating to public service, education, and research.

The curriculum prepares students for productive careers in industry or government and provides a foundation for graduate studies. The program emphasizes chemical engineering fundamentals while offering opportunities for focused study in energy, environmental, or bioengineering.

Traditional employment areas in the chemical process industries include industrial chemicals, petroleum and petrochemicals, plastics, pharmaceuticals, metals, textiles, and food. Chemical engineers also are working in increasing numbers in the areas of energy engineering, pollution abatement, and biochemical and biomedical engineering; in addition, they are employed by many government laboratories and agencies as well as private industries and institutions.

Graduates from the program have the ability to apply knowledge of mathematics, science, and engineering to identify, formulate, and solve chemical engineering problems as well as to design and conduct experiments safely and analyze and interpret data. They are prepared to pursue advanced studies in chemical engineering. Program graduates gain a sense of professional and ethical responsibility with the ability to apply environmental, safety, economic, and ethical criteria in the design of engineering processes. They learn to function in individual and group working environments, and learn skills in written and oral communication and the effective use of computers for engineering practice, including information search in the library and on the Internet. They also understand the need for lifelong learning and the significance of societal and global issues relevant to chemical engineering.

A minimum of 129 credits is required for graduation with the degree of bachelor of science in chemical engineering. There are ten electives in the chemical engineering curriculum. Six of these are for the Discovery Program requirements. The remaining four electives should consist of three chemical engineering electives and one additional technical elective.

Students are required to obtain a minimum 2.0 grade-point average in CHE 501 Introduction to Chemical Engineering I-CHE 502 Introduction to Chemical Engineering II and in overall standing at the end of the sophomore year in order to continue in the major. Study abroad (Exchange) chemical engineering students are required to have a cumulative GPA of 3.0 or better in math, physics, chemistry, and CHE courses at the end of the semester prior to their exchange semester.

Chemical Engineering Major: Bioengineering Option (B.S.)

https://ceps.unh.edu/chemical-engineering/program/bsche/chemical-engineering-major-bioengineering-option

**Description**

Under this option, the required courses deal with the application of basic biological sciences and chemical engineering principles to the design and operation of large-scale bioprocesses for the production of high-value medicinal, food and beverage, pharmaceutical, biomedical, genetic engineering, and health care products. The elective courses permit the student to study topics of special interest in more depth or gain a broader perspective on energy and some closely related subjects such as biochemistry or biotechnology experience in manufacturing or research. These courses are required, and a minimum of two additional courses of at least three credits each should be selected from the electives list. Students interested in the bioengineering option should declare their intention to the department faculty during the sophomore year. They may consult with Russell Carr, (603) 862-1429.

1. ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.
2. MATH 425 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.
3. PHYS 407 General Physics I or CHEM 405 Chemical Principles for Engineers satisfies the Discovery Physical Science (with lab) category.
4. CHE 502 Introduction to Chemical Engineering II satisfies the Discovery Inquiry requirement.
5. MATH 740 Design of Experiments I or MATH 644 Statistics for Engineers and Scientists is the recommended technical elective.
6. CHE 708 Chemical Engineering Design satisfies the Discovery Capstone Experience/Course.
7. CHE students do not have to take a course in the Discovery ETS category since they satisfy this requirement through a combination of courses in the CHE curriculum.

Chemical Engineering Major: Energy Option (B.S.)

https://ceps.unh.edu/chemical-engineering/energy-option

**Description**

This option covers the major areas of current interest in the energy field. The required courses provide students with a general background knowledge of fossil fuels, nuclear power, solar energy, and other alternative energy resources. The elective courses will permit the student to study topics of special interest in more depth or gain a broader perspective on energy and some closely related subjects. Three courses are required, and a minimum of two additional courses of at least three credits each should be selected from the electives list. Students interested in the energy option should declare their intention to the department faculty during the sophomore year. They may consult with Russell Carr, (603) 862-1429.
### Chemical Engineering Major:

#### Environmental Engineering Option (B.S.)

https://ceps.unh.edu/chemical-engineering/environmental-engineering-option

### Description

The chemical engineering program, with its substantial requirements in chemistry, fluid dynamics, heat transfer, mass transfer, unit operations, and reaction kinetics, provides students with a unique preparation to deal with many aspects of environmental pollution problems. The option gives students a special focus on the application of chemical engineering principles and processes to the solution of problems relating to air pollution, water pollution, and the disposal of solid and hazardous waste. Three required courses must be selected, plus two electives from the electives list. Each course must carry a minimum of three credits. Students interested in the environmental engineering option should declare their intention to the department faculty during the sophomore year. They may consult with Russell Carr, (603) 862-1429.

---

1 This requires approval of the department; students should check with their advisor. Courses offered in the past include Renewable Electrical Power, Renewable Energy, and Peak Oil.
Chemistry (CHEM)

Chemistry is a dynamic, an extremely creative, and yet also a practical discipline. Chemists analyze and quantitate, like when testing environmental or forensic samples; they measure specific characteristics of substances, like the defects present in a material, or the optical properties of atmospheric particles; they design and synthesize new substances, like antibiotics, catalysts for hydrogen production, and polymers for flexible electronics; they also generate models and theories that can explain what happens in the laboratory or in Nature. Chemistry is integral to modern science and, ultimately, most phenomena in biology, engineering, environmental science, geology, materials science, and medicine can be described in terms of the chemical and physical behavior of atoms and molecules—because of this, chemistry is often called “The Central Science”. Chemists are vital members of the interdisciplinary teams tackling the complicated problems facing our world, including issues in energy, health, security, and defense. Chemists are essential in developing the technologies and materials that support modern life!

The study of chemistry provides students with the critical thinking and problem-solving skills necessary to be successful in a wide variety of careers. You’ll find chemists in many industries, including agricultural/food products, biotechnology, coatings, materials, paper, personal care products, petrochemicals, pharmaceuticals, plastics, renewable energy, semiconductors, and solar cells. Chemists are also involved in environmental and health-related sciences, making public policies, patent law and intellectual property, and educating future generations of scientists.

Students are also well-prepared for graduate-level work in chemistry, chemical biology, chemical physics, biochemistry, biophysics, materials chemistry, and other related fields. Students who excel in undergraduate chemistry coursework are often able to obtain funding for their graduate work through teaching or research assistantships and fellowships. Chemistry majors have also been successful in a variety of professional programs where they have studied medicine, pharmacy, dentistry, veterinary medicine, business, or law.

The chemistry program at The University of New Hampshire is small enough to be personal, but broad enough to provide excellent opportunities for challenge and growth. Students interested in pursuing chemistry as an undergraduate degree have two options available to them. These are the Bachelor of Science in Chemistry (B.S.) degree and a Bachelor of Arts (B.A.) degree. The B.S. Chemistry degree is certified by the American Chemical Society (https://www.acs.org/content/acs/en/about/governance/committees/training/acsapproved.html); the B.A. degree may also lead to ACS certification, depending on program plan. Since the required courses for each degree program are very similar in the first and second years, it is easy to change from one program to another. A chemistry faculty adviser is assigned to a student once she/he enters the program. The student’s adviser provides academic guidance concerning the choice of courses to meet both major and university requirements.

Chemistry Major (B.A.)

https://ceps.unh.edu/chemistry/program/ba/chemistry-major

Description

Chemistry Major (B.A.) Description

The B.A. degree exposes students to the major fields of chemistry but provides more flexibility in course selection than the B.S. degree. The curriculum offers a comprehensive introduction to chemistry’s traditional subdisciplines (analytical, inorganic, organic, and physical chemistry) via foundational classroom and laboratory experiences. Undergraduate research is an option, but not a requirement for this degree. The B.A. degree is directed towards students who have interdisciplinary interests and are not planning to either attend a traditional graduate program in chemistry or find immediate employment in the chemical industry. Instead, this degree is geared toward students who plan to attend graduate school in an interdisciplinary field where chemical knowledge will be beneficial, and students who are interested in chemistry but plan to pursue post-graduate degrees in the health sciences, education, business, or other pre-professional programs. With careful selection of elective courses, the B.A. degree may also lead to American Chemical Society certification (https://www.acs.org/content/acs/en/about/governance/committees/training/acsapproved.html).

Chemistry Major (B.S.)

https://ceps.unh.edu/chemistry/program/bs/chemistry-major

Description

Chemistry Major (B.S.) Description

The B.S. Chemistry degree is certified by the American Chemical Society (https://www.acs.org/content/acs/en/about/governance/committees/training/acspacertified.html) and provides a deep, rigorous experience that prepares students for graduate work or a career in chemical industry and related fields. The curriculum offers thorough training in the major fields of chemistry, covering analytical, inorganic, organic, and physical chemistry, as well as biochemistry. Students gain laboratory experience in molecular synthesis and characterization, analytical and instrumental methods, physical chemical measurements and data analysis, and spectroscopy. At the same time, the program requires students to participate in scientific inquiry, via both advanced laboratory experiences and independent research.

### Chemistry Minor
https://ceps.unh.edu/chemistry/chemistry-minor

**Description**

If you are interested in obtaining a Chemistry Minor, please contact the Undergraduate Coordinator in the Chemistry Department Office at (603) 862-1550. He/she will meet with you to discuss your plans to minor in Chemistry.

**Requirements**

1. Complete a total of 20 credit hours in Chemistry (CHEM) courses.¹
2. Chemistry courses for the minor cannot be completed on a pass/fail basis.
3. Grade of C- or better is required in all chemistry minor coursework.
4. A cumulative GPA of 2.00 is required for all chemistry minor coursework.
5. Biochemistry (BMCB) courses do not count toward a chemistry minor.
6. Transfer credits can only be applied to the minor with permission of the Chemistry Department Undergraduate Coordinator or Chair. Maximum of 8 transfer credit hours. Transfer courses must meet minimum grade requirements.
7. The following courses can NOT be applied to the Chemistry minor: CHEM 400, CHEM 408, CHEM 409, CHEM 411, CHEM 496, CHEM 501, CHEM 502, CHEM 503 and CHEM 798.

¹ Student's who have completed CHEM 683 (https://catalog.unh.edu/search/?P=CHEM%20683) Physical Chemistry I and CHEM 685 (https://catalog.unh.edu/search/?P=CHEM%20685) Physical Chemistry Laboratory, may complete the minor with a total of 18 credit hours.

No more than 10 credit hours of chemistry coursework required by the student’s major may be counted toward the chemistry minor. Any remaining credits must come from CHEM courses that are not required for the student’s major.

### Civil and Environmental Engineering (CEE)
https://ceps.unh.edu/civil-environmental-engineering

**Overview**

Civil and Environmental Engineering involves the sustainable planning, design, and construction of public works for the benefit of society.
while minimizing environmental impact. Civil Engineering concerns
the design of buildings, bridges, roads, dams, water transmission
systems, water treatment systems, tunnels, and more. Environmental
Engineering specializes in environmental cleanup, drinking water
systems, wastewater treatment systems, and solid and hazardous waste
disposal systems, environmental remediation, all with consideration
of the triple bottom line. Resulting infrastructure facilities must
provide efficient service, be cost effective, and be compatible with the
environment. Moreover, civil and environmental engineers work under
a code of ethics in which their primary, overriding responsibility, is to
uphold the public’s trust by working to plan, design, build, and restore
safe, sustainable, and environmentally responsible public works.

The Department of Civil and Environmental Engineering has two degree
programs: one resulting in a Bachelor of Science in Civil Engineering (the
BSCIVE) and another resulting in a Bachelor of Science in Environmental
Engineering (the BSENVE). Both programs are accredited by ABET.

As civil engineering is such a broad field, it is traditionally divided into
sub-disciplines. At the University of New Hampshire, multiple courses
are offered in six: civil engineering materials, environmental engineering,
geotechnical engineering, structural engineering, sustainable engineering,
and water resources engineering.

Environmental engineering focuses on environmental pollution and public
health protection; water; wastewater, reuse and stormwater technology;
solid and hazardous waste engineering and remediation; engineering
sustainability; environmental microbiology and chemistry; contaminant
transport and fate, hydraulics, and hydrology.

Students may readily transfer between the BSCIVE and BSENVE
programs within the first three semesters. Transferring between the two
programs is also possible later on in the programs, but additional courses
may be necessary.

Both engineering degrees provide a firm base in mathematics
and engineering, and all majors are expected to develop excellent
communication and computer skills. Graduates are prepared to enter
the profession and to pursue advanced study. Because of the broad technical
background attained, some graduates also successfully pursue further
education in business, architecture, education, and law.

Mission
The mission of the Department of Civil and Environmental Engineering
at the University of New Hampshire is fourfold:

• To pursue and disseminate knowledge through teaching, scholarship,
  and public service.
• To provide excellent undergraduate and graduate education.
• To conduct research and engagement activities, advancing the state
  of the art in science and engineering.
• To enhance the quality of life for people in New Hampshire and
  beyond.

BSCIVE Program Overview
Civil engineers work as private consultants, for large contracting firms,
and for government agencies in a wide variety of indoor and outdoor
settings around the world. There is a strong and constant market for civil
engineers due to the demands placed on the profession to construct,
maintain, and repair the infrastructure.

Educational Objectives
In accordance with its University, College, and Department missions,
the faculty of the Department of Civil & Environmental Engineering has
established clear educational objectives for our BSCIVE graduates, five
years after obtaining the degree:

1. Professional employment, primarily in the civil and environmental
   engineering disciplines.
2. Commitment to continuous learning through graduate and post-
   graduate education, coursework, and research.
3. Being resourceful in finding solutions, and retaining ownership and
   accountability for their work.
4. Positions of leadership, directing the work of others.
5. Professional licensure or certification in civil and environmental
   engineering disciplines and other professions.
6. Positions and active participation in community, public, and
   professional service.

Student Outcomes
To enable our graduates to achieve our educational objectives, the
BSCIVE program is designed to provide the following student outcomes
at the time of graduation:

1. To have obtained a working knowledge\(^1\) in the civil engineering areas
   of environmental, geotechnical, materials, structural, sustainability,
   and water resources.
2. To be able to locate, assess, and compile data, to design and perform
   experiments to gather data, and analyze data to draw conclusions.
3. To have an ability to use and learn techniques, skills, or software
   necessary for engineering practice.
4. To be able to effectively contribute as a member of multi-disciplinary
   teams.
5. To be able to effectively communicate and support ideas in
   documents and presentations to a variety of audiences.
6. To be able to apply principles of mathematics, science, and
   engineering to identify, formulate, and solve problems.
7. To have been prepared for the Fundamentals of Engineering
   examination.
8. To have the broad education necessary to have an understanding of
   contemporary issues and the interaction between sustainable and
   ethical engineering practice and global, social, economic, political,
   and environmental issues.
9. To have a recognition of the need for leadership, and an ability to
   engage in life-long learning and to understand the importance of
   professional licensure.
10. Given realistic economic, environmental, social, political, and ethical
    constraints, be able to critically analyze and design equipment,
    structures, systems, or processes to meet society’s current needs
    without compromising the ability of future generations to meet theirs.

\(^{1}\) A “working knowledge” is defined as understanding and being able
to apply a sub-discipline in analysis and design as demonstrated by
successful completion of two or more courses with a substantial focus in
at least four sub-disciplines.

BSENVE Program Overview
Environmental engineers work as private consultants, in industry
and for government agencies in a wide variety of indoor and outdoor
settings around the world. There is a strong and constant market for environmental engineers due to the demands placed on the profession to construct, maintain, and repair the drinking water, wastewater, water reuse and stormwater, and solid and hazardous waste management infrastructure. The curriculum prepares students to plan, using triple bottom line considerations, and design systems to minimize the impact of human activity on the environment and protect human health.

**Educational Objectives**

In accordance with its University, College, and Department missions, the faculty of the Department of Civil & Environmental Engineering has established clear educational objectives for our BSENVE graduates, five years after obtaining the degree:

1. Professional employment, primarily in the environmental engineering discipline.
2. Commitment to continuous learning through graduate and post-graduate education, coursework, and research.
3. Being resourceful in finding solutions, and retaining ownership and accountability for their work.
4. Positions of leadership, directing the work of others.
5. Professional licensure or certification in environmental engineering discipline and other professions.
6. Positions and active participation in community, public, and professional service.

**Student Outcomes**

To enable our graduates to achieve our educational objectives, the BSENVE program is designed to provide the following student outcomes at the time of graduation:

1. To have obtained a working knowledge[1] in environmental engineering areas of water and wastewater treatment, environmental health and safety, solid and hazardous waste management, sustainability, and water resources.
2. To be able to locate, assess, and compile data, to design and perform experiments to gather data, and analyze data to draw conclusions.
3. To have an ability to use and learn techniques, skills, or software necessary for engineering practice.
4. To be able to contribute as a member of multi-disciplinary teams.
5. To be able to effectively communicate and support ideas in documents and presentations to a variety of audiences.
6. To be able to apply principles of mathematics, science, and engineering to identify, formulate, and solve problems.
7. To have been prepared for the Fundamentals of Engineering examination.
8. To have the broad education necessary to have an understanding of contemporary issues and the interaction between sustainable and ethical engineering practice and global, social, economic, political, and environmental issues.
9. To have a recognition of the need for leadership, and an ability to engage in life-long learning and to understand the importance of professional licensure.
10. Given realistic economic, environmental, social, political, and ethical constraints, to be able to critically analyze and design systems or processes to meet society's current needs without compromising the ability of future generations to meet theirs.

[1] Approved by the CEE Department Faculty on 12 December 2016.

[2] Approved by the EnvE Faculty on 2 March 2018 and by the CEE Department Faculty on 20 March 2018.

[3] Approved by the EnvE Faculty on 2 March 2018 and by the CEE Department Faculty on 20 March 2018.

[4] A “working knowledge” is defined as understanding and being able to apply a sub-discipline in analysis and design as demonstrated by successful completion of two or more courses with a substantial focus in that sub-discipline.

**Faculty**

https://ceps.unh.edu/cee/faculty-staff-directory

**Civil Engineering Major (B.S)**

https://ceps.unh.edu/civil-environmental-engineering/program/bs/civil-engineering-major

**Description**

Matriculating students should have strong aptitudes in mathematics and science along with imagination, spatial and graphic abilities, communication skills, and creativity. Students then follow a four-year program that conforms to the guidelines of, and is accredited by the Engineering Accreditation Commission of ABET, the global accreditor of college and university programs in applied and natural science, computing, engineering and engineering technology. ABET accreditation assures that programs meet standards to produce graduates ready to enter critical technical fields that are leading the way in innovation and emerging technologies, and anticipating the welfare and safety needs of the public.

The first two years of the program provide the necessary technical knowledge in mathematics, chemistry, and physics, while introducing and developing problem-solving techniques in eight courses tailored to civil engineering students. The junior year provides courses in each of the civil engineering sub-disciplines, providing students with skills in each and allowing students to determine which they wish to pursue further. The senior year is flexible, allowing students to choose where to focus...
attention by selecting from more than forty elective courses in civil and environmental engineering.

The required curriculum includes seven writing-intensive courses, thereby not only satisfying but exceeding the University’s writing requirement. (See University Academic Requirements.)

Additional opportunities exist for study abroad, cognates, minors, and dual majors, a three-year accelerated track, and early admission into two masters of science degree programs.

Requirements

More than half of the major’s total credits and nearly all of the senior-level courses are elected by the student. Of these, there are Discovery Program electives required by the University and other electives required by the department in order to satisfy departmental objectives and accreditation requirements.

The Discovery Program is described in University Academic Requirements. Courses required by the BSCIVE program fulfill Discovery requirements in Inquiry and Environment, Technology, and Society, Writing Skills, Quantitative Reasoning, Physical Sciences and Discovery Lab and Capstone.

To graduate with a bachelor of science in civil engineering, a student must achieve the following: 129 or more credits, credit for the civil engineering program’s major and elective courses, satisfaction of the University’s Discovery Program requirements, satisfaction of the engineering program’s major and elective courses, satisfaction of the University’s writing-intensive course requirements, a cumulative grade-point average of 2.0 or better for all courses, and a cumulative grade-point average of 2.0 or better in all CEE courses.

Electives

Choose seven courses from the ‘700-level CEE Electives Course List’ below with the following restrictions:

1. Courses must be taken in four of six different areas (sustainability, environmental, materials, water resources, geotechnical, structural).
2. At least three design courses; including one Project-based Design Elective PDE course.
3. One of the seven 700-level courses is a senior technical elective.

Design/Area Elective (Project-based Design Elective PDE) 3-4
Design/Area Elective 3-4
Design/Area Elective 3-4
Area Elective 3-4
CEE Elective 3-4
CEE Elective 3-4
Senior Technical Elective (choose a course from the ‘700-level CEE Electives Course List’ below, CEPS 700-level course, GEOG 757, NR 757, TECH 750, or TECH 780).

700-Level CEE Electives Course List

Project-based Design Elective (PDE) courses:

CEE 733 Public Infrastructure Asset Management
CEE 734 Bioenvironmental Engineering Design
CEE 749 Pavement Design and Analysis
CEE 748 and Pavement Design Project
CEE 755 Design of Pressurized Water Transmission Systems
CEE 758 Stormwater Management Designs
CEE 759 Stream Restoration
CEE 778 Foundation Design I
CEE 791 Reinforced Concrete Design
CEE 793 Structural Design in Steel

Additional Design courses:

CEE 719 Green Building Design
CEE 730 Public Health Engineering for Rural and Developing Communities
CEE 731 Advanced Water Treatment Processes
CEE 732 Solid and Hazardous Waste Design
CEE 779 Foundation Design II
CEE 789 Timber Design
CEE 790 Structural Design in Masonry
CEE 792 Pre-stressed Concrete
CEE 794 Bridge Design

Structural Engineering (STR) area courses:

CEE 780 Matrix Structural Analysis and Modeling

Undergraduate Academic Catalog 2019-2020

MATH 425 Calculus II 4
MATH 527 Differential Equations with Linear Algebra 4
MATH 539 Introduction to Statistical Analysis 4
or MATH 644 Statistics for Engineers and Scientists 4
PHYS 407 General Physics I 4
PHYS 408 General Physics II 4
CEE 402 2D Computer Aided Design 3
CEE 797 Introduction to Project Planning and Design 1
CEE 798 Project Planning and Design (Capstone Experience) 3
Program Policies and Requirements

To transfer into the BSCIVE major, a student must satisfy the following:

1. Be a CEPS major or have at least 12 credits of graded work at UNH along with Calculus I, and either chemistry or calculus-based physics.
2. Have an overall UNH grade-point average of 2.33 or greater.
3. Have an overall grade-point average of 2.33 or greater in all CEE courses taken to date;
4. Have a grade-point average of 2.33 or greater in courses taken to date at UNH of MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525 , and CEE 501 or ME 526 .
5. Have a grade-point average of 2.33 or greater in courses taken to date of CEE 500, CEE 501, ME 525, ME 526.

At the time of transferring into the BSCIVE program, only CEE 600-level and CEE 700-level classes with a grade of C- or better may be transferred in.

BSCIVE majors wishing to participate in domestic or international exchange programs must achieve a cumulative grade-point average of 2.50 or better in all CEE courses taken to date at the time of application to the exchange program.

To begin taking the required CEE 600-level courses in the junior year, students must meet the following requirements:

1. MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525, and CEE 501 or ME 526 must have been completed with passing grades.
2. The student must have a grade-point average of 2.00 or greater in all CEE courses.
3. The student must have a grade-point average of 2.00 or greater in MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525, and CEE 501 or ME 526.
4. The student must have a grade-point average of 2.00 or greater in CEE 500 or ME 525 and CEE 501 or ME 526.

Environmental Engineering Major (B.S.)

https://ceps.unh.edu/civil-environmental-engineering/program/bs/environmental-engineering-major

Description

The Environmental Engineering program is accredited by the:

Engineering Accreditation Commission of ABET
111 Market Place
Suite 1050
Baltimore, MD 21202-4012,
(410) 347-7700
http://www.abet.org

Environmental engineers graduating with a B.S. EnvE degree will plan, design, and construct public and private facilities to minimize the impact of human activity on the environment and to protect human health. For example, environmental engineers design and build drinking water treatment systems, municipal and industrial wastewater treatment plants, solid waste management facilities, contaminated ground water remediation systems, and hazardous waste remediation facilities. These facilities must meet regulatory requirements, be cost effective to build and maintain, be safe to operate, and have minimal environmental impact. EnvE students can also focus on sustainable engineering with a required course (CEE 705 Introduction to Sustainable Engineering) in junior year and two or three senior year electives, including design electives.

In CEE 420 Environmental Engineering Lectures I, students are introduced to the full spectrum of environmental engineering projects that they will subsequently explore in design teams during their degree program. In (CEE 520 Environmental Pollution and Protection: A Global Context), students tour field sites and through junior and senior year classes and student organizations (ASCE, EWRI, EWB, SWB), they interact with engineers who talk about engineering consulting and design practices applied to local projects. As part of these projects, students:

1. analyze treatment alternatives;
2. recommend a system that meets regulatory operational needs, and is sustainable; and
3. prepare an implementation schedule and project budget.

Design projects are performed in CEE 731 Advanced Water Treatment Processes and a minimum of two design electives. CEE 797 Introduction to Project Planning and Design/ and CEE 798 Project Planning and Design/ serve as a capstone design experience where students work on a multi-disciplinary environmental engineering project and apply skills learned in other courses while working with real-world problems/ clients. EnvE students do not have to take a course in the Discovery Biological Science category since they satisfy this category with CEE 724 Environmental Engineering Microbiology.

At the end of the sophomore year, students are required to have a minimum overall grade-point average of 2.00 and a minimum grade-point average of 3.00 in the following to be permitted to enroll in junior-level courses:

---

1 A course satisfying one each of the Discovery Program categories of Biological Science, Humanities, Fine and Performing Arts, Historical Perspectives, Social Science and World Cultures, preferably taken in this order.

2 Satisfies capstone requirement for Discovery.

3 Approved list available in the CEE office.

CEE 798 Project Planning and Design 3
Elective Area Elective 3 3
Elective Area Elective 4 3
Elective Civil Engineering 3
Elective Senior Technical Elective 3

Credits 15

Total Credits 129

---
To qualify for graduation, an ENE major must: have satisfied the previously specified course requirements, have satisfied the University’s Academic Requirements, have a minimum cumulative grade-point average of 2.00, and have a minimum grade-point average of 2.00 in engineering courses.

Requirements

These are the required major courses. For a full listing of the requirements within the four years of study please refer to the degree plan tab.

A minimum of two elective ENE courses.

Choice of elective courses should be made in consultation with the minor area advisor, Nancy Kinner. Students normally start this program in the junior year and should declare their intention to enter the program as early as possible during the sophomore year. During the final semester, students must apply to the dean to have the minor appear on the transcript.

**Computer Science (CS)**

Undergraduate students may choose from one of three degree options: the B.S. in computer science, which is intended for students interested in the design and implementation of software systems, the B.S. in information technology, which focuses on the application of existing computing technologies to meet the information needs of organizations and individual computer users, or the B.S. in and analytics and data science. Students may choose between two options within the B.S. in analytics and data science major. The analytics option, which emphasizes the application of data science in business and industry or the data science option, which focuses on the theoretical and computational underpinnings of modern data science.

Program Objectives

This program has been designed to prepare students for professional careers working with data, with an emphasis on the extraction of meaning from data. The program is not targeted to any one industry; rather, it provides a flexible, practical skillset that can be applied widely. This skillset includes elements of computer science, applied mathematics and statistics, communication skills, and business savvy. Graduates of the bachelor of science in analytics and data science program are expected to have:

- An understanding of the role of data in guiding decision-making in industry
- An understanding of how data is generated, stored, and accessed
- An understanding of data security
- An understanding of the ethical use of data
- An understanding of structured vs. unstructured data
- An understanding of the methods, statistical and other, used to derive actionable information from data
- Experience with multiple programming languages
- Experience with multiple statistical and data analysis software programs
- The ability to communicate detailed, technical information to a variety of audiences clearly and concisely, without the use of jargon
- The ability to work effectively, both as an individual or as a member of a team
- The ability to successfully lead a team
- The ability to adapt to a dynamic, rapidly changing work environment
- Completed projects and other work experiences on a larger scale than is typical in a bachelor’s degree program.

During the course of the program, students will demonstrate their acquisition of these skills by successfully completing their program coursework, their internship experience, and their capstone project.

Requirements

Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University’s Discovery program, completing all of the 24 required courses in the major as listed below, including the capstone course, the internship preparedness course, and a three-credit internship. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

Select three electives

Total Credits = 91

1 Must be 600 or 700-level and approved by advisor.

For additional information about the Analytics and Data Science: Analytics Option, contact Wheeler Ruml, program co-director (Durham campus), at wheeler.ruml@unh.edu or Jeremiah Johnson,
program co-director (Manchester campus), at (603) 641-4127 or jeremiah.johnson@unh.edu. (jeremiah.johnson@unh.edu)

Analytics and Data Science Major: Data Science Option (B.S.)
https://ceps.unh.edu/computer-science/program/bs/analytics-data-science-major-data-science-option

Description
The option in Data Science is intended for students interested in pursuing advanced degrees and conducting original research in data science. The option in data science places its emphasis on a rigorous introduction to the theoretical mathematical and computational underpinnings of modern data science.

Program Objectives
This program has been designed to prepare students for professional careers working with data, with an emphasis on the extraction of meaning from data. The program is not targeted to any one industry; rather, it provides a flexible, practical skillset that can be applied widely. This skillset includes elements of computer science, applied mathematics and statistics, communication skills, and business savvy. Graduates of the bachelor of science in analytics and data science program are expected to have:

- An understanding of the role of data in guiding decision-making in industry
- An understanding of how data is generated, stored, and accessed
- An understanding of data security
- An understanding of the ethical use of data
- An understanding of structured vs. unstructured data
- An understanding of the methods, statistical and other, used to derive actionable information from data
- Experience with multiple programming languages
- Experience with multiple statistical and data analysis software programs
- The ability to communicate detailed, technical information to a variety of audiences clearly and concisely, without the use of jargon
- The ability to work effectively, both as an individual or as a member of a team
- The ability to successfully lead a team
- The ability to adapt to a dynamic, rapidly changing work environment
- Completed projects and other work experiences on a larger scale than is typical in a bachelor’s degree program.

During the course of the program, students will demonstrate their acquisition of these skills by successfully completing their program coursework, their internship experience, and their capstone project.

Requirements
Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University’s Discovery program, completing all of the 20 required courses in the major as listed below, including the capstone course, the internship preparedness course, and a three-credit internship. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

Analytics Minor
https://ceps.unh.edu/computer-science/program/bs/analytics

Description
The objective of this minor is to provide a basic background in analytics for those interested in applications.
Requirements

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C- grade. Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval. Some preparation in MATH 425: Calculus I and programming (CS 414: From Problems to Algorithms to Programs, CS 415: Introduction to Computer Science I, or COMP 425: Introduction to Programming) is required.

Computer Programming Cognate

https://ceps.unh.edu/computer-science/program/cognate/computer-programming

Description

The Cognate in Programming is designed so that students who wish to go beyond an introductory computer programming course are able to meet the challenges that technology imposes.

This cognate is for UNH students who are interested in acquiring skills beyond just a basic programming language. This cognate would be an alternative to students who are not going to pursue a minor in Computer Science or Information Technology but still want to have the opportunity to partake a coherent, if short, curriculum that gives them a foundation to participate in programming activities as applicable to their technical areas.

The cognate consists of three courses in total, with one required course and two courses selected from four different sequence options. The Cognate will appear on each student's transcript.

Requirements

Required Course:

Code | Title                                           | Credits |
-----|-------------------------------------------------|---------|
IT 403 | Introduction to Internet Technologies           | 4       |

Choose one of the following two-course sequences:

Code | Title                                           | Credits |
-----|-------------------------------------------------|---------|
Sequence one: | | |
CS 415 | Introduction to Computer Science I              | 4       |
CS 416 | Introduction to Computer Science II             | 4       |
or IT 505 | Database Programming                           |         |

Sequence two: | | |
CS 414 | From Problems to Algorithms to Programs         | 4       |
CS 417 | From Programs to Computer Science               | 4       |
or IT 505 | Database Programming                           |         |

Sequence three: | | |
CS 410 | Introduction to Scientific Programming          | 4       |
CS 417 | From Programs to Computer Science               | 4       |
or IT 505 | Database Programming                           |         |

Code | Title                                           | Credits |
-----|-------------------------------------------------|---------|
CS 405 | Introduction to Applications Programming        | 4       |
IT 505 | Database Programming                           | 4       |

Computer Science Major (B.S.)

https://ceps.unh.edu/computer-science/program/bachelor/computer-science

Description

Computer science focuses on problem solving with a particular emphasis on the design of computer-efficient solutions. Within a few years of obtaining a bachelor's degree alumni will have:

1. Engaged in successful careers in diverse areas of software development and will be pursuing advanced education in computer science or related fields;
2. Applied the full range of core computer science concepts and techniques to fill software development needs of an organization;
3. Adapted to changing directions of computing technology and used state-of-the-art techniques to confront new problems effectively;
4. Navigated the complex interconnections between software and the goals and constraints of the organization served;
5. Participated responsibly in the pervasive and changing role of computing technology in global society as both software engineers and citizens;
6. Operated collaboratively in a team environment and assumed leadership roles.

The B.S. in computer science program is accredited by the:

Computing Accreditation Commission of ABET
111 Market Place
Suite 1050
Baltimore, MD 21202-4012
# Requirements

Computer science majors must complete the following coursework in computer science, mathematics, computer engineering, and science. (all courses are 4 credits unless indicated otherwise):

</tbody>
</table>
Other Courses
Discovery requirements not already covered by required courses 3
Total Credits 104-105
1 Professional electives must either be chosen from the list of approved courses or another non-introductory CEPS course with significant science and/or engineering focus approved on a per-course basis by the undergraduate studies committee.
2 Courses must carry the Discovery attributes of Biological Science or Physical Science and include Discovery lab (DLAB).
3 One of these courses must be writing intensive.

Computer science majors must maintain an overall grade-point average of 2.0 or better in all required computer science, mathematics, and computer engineering courses in order to graduate. If at the end of any semester, including the first, a student’s cumulative grade-point average in these courses falls below 2.0, the student may not be allowed to continue as a CS major.

The following courses must be passed with a grade of C- or better: CS 410, CS 414, CS 415, CS 416, CS 417, CS 515, CS 520, IT 403

If a student wishing to transfer into the computer science major has any coursework that is applicable to the major, the grades in those courses must satisfy the minimum grade requirements for the B.S. degree in computer science. The student must have an overall grade-point average of 2.0 or better in all courses taken at the university.

Degree Plan

Recommended Plan of Study

Course | Title | Credits
--- | --- | ---
**First Year**
**Fall**
CS 400 | Introduction to Computing | 1

Computer Science Major: Algorithms Option (B.A.)
https://ceps.unh.edu/computer-science/program/ba/computer-science-major-algorithms-option

Description

The B.A. in Computer Science will allow students to combine the study of computer science with the study of another field. Given the emergence of computational approaches to virtually all areas of scholarship and creative expression, it is important to offer this flexibility. The three tracks in the B.A. program contain the same computer science core as the B.S. program, but give more control to the student to choose the complementary and advanced courses.

1 Advanced CS course pool consists of the following:
   • CS 671 Programming Language Concepts and Features
   • Any CS course at the 700 level
   • One professional elective from the list of B.S. in Computer Science

2 Courses must carry the Discovery attributes of Biological Science or Physical Science and include Discovery lab (DLAB).

3 Must include the foreign language requirement as defined by the University for all B.A. degrees.

## Computer Science Major: Cybersecurity Option (B.A.)

https://ceps.unh.edu/computer-science/program/ba/computer-science-major-cybersecurity-option

### Description

The B.A. in Computer Science will allow students to combine the study of computer science with the study of another field. Given the emergence of computational approaches to virtually all areas of scholarship and creative expression, it is important to offer this flexibility. The three tracks in the B.A. program contain the same computer science core as the B.S. program, but give more control to the student to choose the complementary and advanced courses.

### Requirements

### Computer Science Classes

Select of of the following:

<table>
<thead>

   • CS 671 Programming Language Concepts and Features
   • Any CS course at the 700 level
   • One professional elective from the list of B.S. in Computer Science Electives (https://catalog.unh.edu/undergraduate/engineering-physical-sciences/programs-study/computer-science/computer-science-major-bs/#requirementstext)
2 Theory Intensive CS courses are as follows: CS 723 Performance Evaluation of Computer Systems, CS 745 Formal Specifications and Verification of Software Systems, CS 750 Machine Learning, CS 757 Mathematical Optimization for Applications
3 Courses must carry the Discovery attributes of Biological Science or Physical Science and include Discovery lab (DLAB).
4 Must include the foreign language requirement as defined by the University for all B.A. degrees.

## Computer Science Minor

https://ceps.unh.edu/computer-science/program/minor/computer-science

### Description

The minor in computer science is designed for students in other majors who want to learn the fundamentals of designing and implementing computer software.

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean of the student's major college to have the minor shown on the academic record. Students must consult with their major adviser and also the minor supervisor.

### Requirements

Select one of the following:
Data Science Minor

https://ceps.unh.edu/computer-science/program/minor/data-science

Description

The objective of this minor is to provide a basic background in data science for those who are more interested in the theoretical underpinnings of analytics and data science.

Requirements

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C-. Transfer course approval for the minor is limited to at least two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval. Some preparation in MATH 425: Calculus I and programming (CS 414: From Problems to Algorithms to Programs, CS 415: Introduction to Computer Science I, or COMP 425: Introduction to Programming) is required.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 515</td>
<td>Data Structures and Introduction to Algorithms</td>
<td>4</td>

<td>Introduction to Computer Science II</td>
<td>4</td>
</tr>
<tr>
<td>COMP 525</td>
<td>Data Structures Fundamentals (Manchester Students)</td>
<td>4</td>
</tr>
</tbody>
</table>

Select three courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 730</td>
<td>Introduction to Artificial Intelligence</td>
<td>4</td>
</tr>
<tr>
<td>CS 750</td>
<td>Machine Learning</td>
<td>4</td>
</tr>
<tr>
<td>CS 753</td>
<td>Information Retrieval</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 20

1. Must select at least one CS and one MATH course. Must select CS 750: Machine Learning or MATH 738: Data Mining and Predictive Analytics.

For more information, contact Wheeler Ruml, program coordinator and minor supervisor, at wheeler.ruml@unh.edu.

Information Technology Cognate

https://ceps.unh.edu/computer-science/program/cognate/information-technology

Description

The Toolbox Cognate in Information Technology is designed to provide students with knowledge and skills required by essentially any job today. With introductory level options, including courses from outside the department, the cognate is of value to students who wish to get a firm foundation in areas related to computing and information technology. The cognate also gives students considering study of Information Technology or Computer Science an opportunity to sample a broad range of courses in the field.

The Cognate will appear on each student's transcript.

Requirements

The cognate consists of three courses with no more than two courses to be taken from the same category (some courses may have prerequisites).

Information Technology Major (B.S.)

https://ceps.unh.edu/computer-science/program/bs/information-technology

Description

Information technology is concerned primarily with the application of existing computing technologies to the information needs of organizations and individual computer users. The IT program aims to provide graduates with the skills and knowledge to take on appropriate professional positions in information technology upon graduation and grow into leadership positions in the field. Potential careers include network administrator, database developer, system administrator, and webmaster.

The broad objectives for B.S. in information technology graduates are:

1. Apply the full range of core IT concepts and techniques to fill the IT needs of an organization and be prepared to assume managerial and other advanced responsibilities;
2. Confront new problems effectively and anticipate the changing directions of technology;
3. Communicate effectively with diverse stakeholders as well as function appropriately in a team environment;
4. Navigate within the complex relationships between IT and larger organizational goals, and
5. Understand the pervasive and changing role of computing technology in global society, and participate responsibly as both IT professional and citizen.

The B.S. in information technology program is accredited by the:

Computing Accreditation Commission of ABET
111 Market Place
Suite 1050
Baltimore, MD 21202-4012
Phone: (410) 347-7700

**Second discipline (see below for details)**

Total Credits 98

Information technology majors must maintain an overall grade-point average of 2.0 or better in all required information technology and computer science required courses in order to graduate. If at the end of any semester, including the first, a student's cumulative grade-point average in these courses falls below 2.0, the student may not be allowed to continue as an IT major. The following courses must be passed with a grade of C- or better in order to meet IT major requirements CS 414, CS 415, CS 416, CS 417, IT 403, IT 502, IT 505, IT 520.

If a student wishing to transfer into the information technology major has any coursework that is applicable to the major, the grades in those courses must satisfy the minimum grade requirements for the B.S. degree in information technology. The student must have an overall grade-point average of 2.0 or better in all courses taken at the University.

In addition to the core IT requirements, each student must complete a complementary set of courses in a particular domain outside of IT to which the student's IT skills can be applied. This set of courses can be completed in one of the following ways:

- **Technology-related Fields**
  - CS 400 Introduction to Computing 1
  - IT 403 Introduction to Internet Technologies 4
  - CS 501 Professional Ethics and Communication in Technology-related Fields 4
  - IT 502 Intermediate Web Design 4
  - IT 505 Database Programming 4
  - IT 520 Computer Architecture 4

- **Science 1 and 2 (two-course sequence)**: Select one of the following sequences:
  - CS 415 Introduction to Computer Science I 8
  - CS 416 Introduction to Computer Science II 8
  - CS 414 From Problems to Algorithms to Programs 8
  - CS 417 From Programs to Computer Science 8
  - CS 410 Introduction to Scientific Programming 8
  - CS 417 From Programs to Computer Science 8

- **Second discipline (see below for details)**

Total Credits 98
1. A pre-defined second discipline*;
2. A self-defined second discipline approved by the IT Program Coordinator;
3. An approved minor**;
4. A second major or UNH dual degree.

*Four (4) second disciplines have been defined by the CS department, requiring (4) courses in such areas as business administration, entrepreneurship, health management and policy, and justice studies.

**An approved list of minors (https://ceps.unh.edu/sites/default/files/media/2019/03/information_technology-approvedminors.pdf) is available from the CS Department and requires (5) courses to be completed.

### Degree Plan

The following is a sample schedule depicting the necessary requirements and the layout of the curriculum. Students must consult with their advisers in order to come up with the proper schedule for themselves.

### Information Technology Minor

https://ceps.unh.edu/computer-science/program/minor/information-technology

**Description**

The information technology (IT) minor is a way for students in non-technical majors to bridge the gap between a primarily non-technical education and a technical world. Graduates from a variety of fields are discovering that there is a great need to have computer competency in addition to the knowledge they gain in their major; the IT minor, which is tailored to grow students’ understanding of computer and information technology applications, helps prepare students for the future.

Students who minor in IT must complete a minimum of 20 credits of IT courses. All students must take IT 520 Computer Architecture as well as an approved introductory programming course. The other three courses may be chosen from the Options list below.

Credit toward the minor will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean (of the student’s major college) to have the minor shown on their academic record. Students must consult with their major adviser and also the minor coordinator.
Skills and Perspectives for the Digital World Cognate (CEPS)

https://ceps.unh.edu/computer-science/program/cognate/skills-perspectives-digital-world

Description

Engage with and reflect on the technology associated with the digital world. This cognate provides a foundation for the development of technical and critical skills aligned with one of the 21st century’s defining areas: information technology. A recent statement by General Electric’s CEO asserts that if you join the company today, as opposed to 20 years ago, you’re going to learn to code even though you may be in sales, finance or operations. This cognate gives students and future employees a fundamental introduction into technologies that are necessary for high functioning in today’s world, both in the workplace and beyond.

The curriculum consists of three courses: one to strengthen understanding of the technologies that drive the World Wide Web, one course to explore computer programming, and one course to consider the impact of the technologies on society.

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

Earth Sciences (ESCI)

The courses offered in the Department of Earth Sciences cover the broad spectrum of geosciences, with emphases on climate, geochemistry, geology, geophysics, hydrology, and oceanography. The curriculum encompasses a group of related disciplines concerned with an understanding of Earth and its environment. Studies of the processes that shape the continents and oceans, drive the hydrologic cycle and ocean circulation, and affect climate change and the evolution of life are based on a foundation of basic mathematics, physics, and chemistry.

The need for people trained in the Earth and environmental sciences has been increasing in response to growing societal demands for sound environmental and resource management. Issues of particular concern include global climate change impacts, management of water resources, development of energy and mineral resources, waste disposal, and the assessment of natural hazards. In addition, the demand for well-trained secondary school teachers of Earth sciences has been steadily increasing.

The Department of Earth Sciences offers four majors: B.S. Earth sciences, B.S. Environmental sciences (interdisciplinary with the College of Life Sciences and Agriculture), B.A. Earth sciences, and B.A. Earth sciences teaching. These programs prepare students for advanced study in the geosciences; for secondary-school teaching of Earth sciences; and for entry-level professional employment in public or private institutions concerned with environmental and resource management, including consulting firms, government agencies, energy- and resource-extraction firms, utilities, and nonprofit organizations; and for secondary-school teaching of Earth sciences.

The Department of Earth Sciences also offers a minor in Earth sciences, as well as an interdisciplinary minor in oceanography.

Descriptions and requirements for the majors and minors are arranged alphabetically.

https://ceps.unh.edu/earth-sciences

Programs

• Earth Sciences Major (B.A.) (p. 172)
• Earth Sciences Major (B.S.) (p. 173)
• Earth Sciences Minor (p. 177)
• Earth Sciences Teaching Major (B.A.) (p. 178)
• Environmental Sciences Major: Geosystems Option (B.S.) (p. 179)
• Environmental Sciences Major: Hydrology Option (B.S.) (p. 181)
• Oceanography Minor (p. 182)

Earth Sciences Major (B.A.)

https://ceps.unh.edu/earth-sciences/program/ba/earth-sciences-major

Description

The bachelor of arts in Earth sciences is offered through the Department of Earth Sciences. This program provides students an opportunity to obtain a broad education and a general background in the Earth sciences with a greater degree of freedom in choosing electives than in the bachelor of science programs. Through careful choice of electives, students can prepare for business, industry, public service, the non-profit sector or graduate school.

Capstone

Total Credits 39-44

Note that ESCI 401 Dynamic Earth, ESCI 402 Earth History, ESCI 405 Global Environmental Change, ESCI 409 Geology and the Environment, ESCI 420 Our Solar System, ESCI 501 Introduction to Oceanography cannot be taken to fulfill Discovery Program requirements for majors in the Department of Earth Sciences.

It is strongly advised that students complete, as early as possible, a year each of college chemistry and physics.

Earth Sciences Major (B.S.)

https://ceps.unh.edu/earth-sciences/program/bs/earth-sciences-major

Description

The bachelor of science in Earth sciences is offered through the Department of Earth Sciences. The program represents a strong concentration in the Earth sciences and is especially well-suited for students who plan to continue their studies in graduate school. Beyond a central core of courses, there are several possible specializations (climate, geology, geophysics, oceanography, petroleum geology) from which students must choose in order to develop depth in a particular area of Earth sciences. Students are encouraged to attend a summer off-campus field experience, for which scholarship funds may be available.

Capstone Experience

A capstone experience is required of all undergraduate Earth sciences majors during their senior year. All capstone experiences at UNH must meet one or more of the following criteria:

1. The capstone synthesizes and applies disciplinary knowledge and skills.
2. The capstone fosters reflection on undergraduate learning and experience.
3. The capstone demonstrates emerging professional competencies.
4. The capstone applies, analyzes, and/or interprets research or data or artistic expression.
5. The capstone explores areas of interest based on the integration of prior learning.

Examples of Department of Earth Sciences capstone experiences include Senior Thesis (ESCI 799 Senior Thesis), UROP/SURF projects, environmental or geologic field camps, or Earth sciences education and outreach activities. Additional experiences may qualify (e.g., ESCI 795 Topics/ESCI 796 Topics field courses, INCO 590 Student Research Experience, INCO 790 Advanced Research Experience, internships) if they are designed according to the above criteria. Students should work closely with their advisers to define the most appropriate capstone experience for the Earth sciences degree option and all capstone experiences must be approved by the Department of Earth Sciences undergraduate coordinator. Presentation of projects or experiences developed for the capstone is encouraged at the annual UNH Undergraduate Research Conference or other appropriate venue.

¹ One course must be taken in each of the remaining Disciplinary Groups of the University Discovery Program (Biological Sciences; Environment Technology & Society; Historical Perspectives; World Culture; Fine & Performing Arts; Social Science; Humanities).
² Three science electives must be approved in consultation with departmental advisor.

Earth Sciences Minor

https://ceps.unh.edu/earth-sciences/program/minor/earth-sciences

Description

The Department of Earth Sciences offers a minor in Earth sciences available to all University students. The Earth sciences minor provides an opportunity for students to complement their major field of study with foundational knowledge and essential skills in the geosciences. As with all minors offered at UNH, the Earth sciences minor adheres to the following University requirements:

The minor consists of at least 20 semester hours of credit. For the Earth sciences minor, the 20 credits typically come from five ESCI courses and may include research credits supervised by an Earth sciences faculty member. A grade of C- or better must be earned in each course, and an overall 2.00 grade point average must be maintained for all courses applied toward the minor. Courses taken on a pass/fail basis may not be used for the minor. No more than two courses (8 credits) can be used to satisfy simultaneously requirements for a student’s major and minor, or two minors. No more than two courses (8 credits) may be transferred from another accredited institution and applied toward the minor, provided UNH has accepted them as transfer credits.

Requirements

Courses in the Earth sciences minor must include both introductory and more advanced ESCI courses. Strongly recommended introductory courses include ESCI 401 Dynamic Earth or ESCI 409 Geology and the Environment (students may not receive credit for both ESCI 401 Dynamic Earth and ESCI 409 Geology and the Environment) and ESCI 402 Earth
History. More advanced courses must include at least one at the 600 or 700 level. Specific courses in the program are selected in consultation with a minor adviser in the Department of Earth Sciences, with flexibility in approved courses to accommodate interests in different aspects of the geosciences. Interested students should contact the Department of Earth Sciences (earth.sciences@unh.edu) to arrange to complete an Intent to Minor form no later than their junior year. Forms can be picked up in the Earth sciences main office, 214 James Hall.

**Earth Sciences Teaching Major (B.A.)**

https://ceps.unh.edu/earth-sciences/program/ba/earth-sciences-teaching-major

**Description**

The bachelor of arts in Earth sciences teaching program is offered by the Department of Earth Sciences in coordination with the Department of Education. The program is specifically designed to prepare students to teach Earth sciences in secondary school. With careful planning, upon graduation from this program, qualified students are prepared to complete a M.A.T./M.Ed. degree in education with an additional year of graduate study, which includes a year-long internship (EDUC 900A Internship and Seminar in Teaching/EDUC 901A Internship and Seminar in Teaching). After completing this typically five-year program, students receive full teacher certification for New Hampshire, which is recognized in many other states.

**General Science Certification**

Students majoring in animal sciences, biochemistry, biology, Earth sciences, environmental conservation studies, environmental sciences, forestry, microbiology, plant biology, wildlife management, or zoology may seek certification to teach science at the middle, junior, or high school level.

For further information, contact the coordinator of teacher education in the Department of Education.

Environmental Sciences Major: Geosystems Option (B.S.)

https://ceps.unh.edu/earth-sciences/program/bs/environmental-sciences-major-geosystems-option

**Description**

The College of Engineering and Physical Sciences (CEPS) and the College of Life Science and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.
Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.

The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soils and watersheds options are both managed by the Department of Natural Resources and the Environment in the COLSA. The geosystems option provides students with a solid grounding in quantitative reasoning, with an emphasis on geochemical and geospatial systems.

### Requirements

In addition to the Discovery Program and University writing requirements, all students will take Introduction to Environmental Science NR 403 Introduction to Environmental Science and Professional Perspectives in Natural Resources (NR 400 Professional Perspectives in Natural Resources), plus one other elective introductory environmental science course. Foundation courses include introductions to biology, physics, chemistry, geology, calculus, and statistics.

Total Credits 28-32

Some students enroll in the EcoQuest program (a study abroad opportunity in New Zealand), which satisfies the policy requirement, and capstone requirement if taken senior year.

Students must complete additional courses for the hydrology option to total 88 credits in the major.

For further information about the hydrology option or to discuss alternative elective courses, students may contact earth.sciences@unh.edu. (earth.sciences@unh.edu)

**Oceanography Minor**

https://ceps.unh.edu/earth-sciences/program/minor/oceanography

**Description**

The minor in oceanography is available to all students in the University interested in obtaining a broad background in oceanography. The minor consists of a minimum of five courses with grades of C (2.00) or better and no pass/fail courses. No more than 8 major requirement credits may be used. All courses in the program are selected in consultation with the oceanography minor adviser, Dr. Jamie Pringle, (603) 862-5000, jpringle@unh.edu. Students must complete an Intent to Minor form no later than their junior year. Forms can be picked up in the Earth Sciences departmental office, 214 James Hall.

Computers have become embedded in virtually every engineering system, including everyday items ranging from watches to automobiles. Computer engineering, traditionally a subset of electrical engineering, is a rapidly growing field that emphasizes the design, interfacing, hardware/software tradeoffs, and real-time applications of embedded computers. Students who elect this major will gain a knowledge of both hardware and software concepts, and will learn to design, build, and test systems containing digital computers.

ECE Department Mission

The mission of the department is to foster and advance knowledge in electrical and computer engineering.

The mission involves:

- teaching courses in electrical and computer engineering and related fields at the bachelor's, master's, and doctoral levels;
- advancing knowledge through research and scholarship;
- serving the state and nation by making the department’s intellectual resources available to industry and government agencies. The undergraduate EE and CE programs shall provide a firm foundation in electrical and computer engineering theory and practice, with a mix of laboratory and design experiences. The programs also shall foster teamwork and project management skills.

The graduate ECE program shall lead to the degrees of master of science in electrical and computer engineering and the doctor of philosophy in electrical and computer engineering. Research and scholarship are core components of the department’s mission and they directly impact undergraduate and graduate education. Success in obtaining funds to procure equipment and support research efforts is therefore an essential objective for the department.

The department recognizes the need to conduct periodic reviews and adjustments to meet the current and projected needs of the state and nation according to its mission objectives. The current mission was approved by the ECE faculty in March 2001 and again on October 27, 2009, approved by the ECE Student Advisory Board in October 2001, and ratified by the ECE Industrial Advisory Board in April 2002. The mission was reaffirmed by the ECE Industrial Advisory Board in November 22, 2004 and on October 26, 2009.

Electrical Engineering and Computer Engineering Program Educational Objectives

The Department of Electrical and Computer Engineering has adopted a set of program educational objectives that consists of statements describing the expected accomplishments of graduates during the first several years following graduation from either program:

**Electrical Engineering Program Educational Objectives**

- **Depth**: To be effective in applying electrical engineering principles in engineering practice or for advanced study in electrical engineering.
- **Breadth**: To have a productive career in the many diverse fields of electrical engineering such as analog engineering, bioengineering, communications, and electromagnetics and waves, or in the pursuit of graduate education in disciplines such as electrical engineering, medicine, law, or business.

### Electrical and Computer Engineering (ECE)

The Department of Electrical and Computer Engineering offers a B.S. in electrical engineering and a B.S. in computer engineering. Both degree programs are accredited by the:

**Engineering Accreditation Commission of ABET**

415 N. Charles Street

Baltimore, MD 21201

Telephone (410) 347-7700

Electrical engineers design, develop, and produce the electrical and electronic systems upon which modern society has come to depend: basic infrastructure, such as the electric power grid and fiber optic communication lines; public conveniences, such as maglev transporters and LED signs; consumer products, such as iPods and MP3 players; personal communication devices, such as smart phones; military systems, such as rail guns and laser weapons; instruments that can image the ocean floor or analyze the Earth's atmosphere from satellites; and medical diagnostic machines like CAT and MRI scanners. Almost every facet of modern life is touched by the work of electrical engineers.

At UNH, the cornerstone of the electrical engineering program is the involvement of students in the solution of real-world problems. Students electing this major gain knowledge of advanced electronic circuit and system design through the use of computer-aided design tools, hardware circuit prototyping, and hands-on laboratory testing.
**Professionalism:** To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

**Computer Engineering Program Educational Objectives**

**Depth:** To be effective in applying computer engineering principles in engineering practice or for advanced study in computer engineering.

**Breadth:** To have a productive career in the many diverse fields of computer engineering such as digital engineering, bioengineering, security, communications, and embedded systems, or in the pursuit of graduate education in disciplines such as computer engineering, medicine, law, or business.

**Professionalism:** To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

The electrical and computer engineering educational program objectives were approved by the ECE faculty and the ECE Student Advisory Board in September 2017 and then ratified by the ECE Industrial Advisory Board in October 2017.

**Electrical Engineering and Computer Engineering Program Educational Outcomes**

The Department of Electrical and Computer Engineering has adopted a set of program educational outcomes that consists of statements describing what students are expected to know and be able to do by the time of graduation, the achievement of which indicates that the student is equipped to achieve the program objectives. The current electrical engineering program educational outcomes and computer engineering program educational outcomes are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet desired needs;
- an ability to function on multidisciplinary teams;
- an ability to identify, formulate, and solve engineering problems;
- an ability to communicate effectively;
- an understanding of professional and ethical responsibility;
- the broad education necessary to understand the impact of engineering solutions in a global and societal context;
- a recognition of the need for, and ability to engage in, lifelong learning;
- a knowledge of contemporary issues;
- an ability to use techniques, skills, and modern engineering tools necessary for engineering practice.

Electrical and computer program educational outcomes were last approved by the ECE faculty in September 2017, approved by the ECE Student Advisory Board in October 2017, and ratified by the ECE Industrial Advisory Board in October 2017. The program educational outcomes were reaffirmed by the ECE Industrial Advisory Board in October 2017.

Students contemplating a decision between the electrical engineering and computer engineering degree programs should consider both the similarities and differences of the two programs. The two curricula require the same foundational courses in mathematics, physics, analog and digital electronic circuits, and a capstone senior design project. The computer engineering degree program requires additional fluency in software development and advanced computer system and hardware design. The electrical engineering degree program requires advanced study in analog and mixed-signal electronic circuit and system analysis and design. Discovery Program requirements are identical for both degree programs.

### Programs

- Computer Engineering Major (B.S.) (p. 184)
- Electrical Engineering Major (B.S.) (p. 186)
- Electrical and Computer Engineering Minor (p. 187)

### Faculty

Electrical and Computer Engineering Faculty (https://ceps.unh.edu/electrical-computer-engineering/faculty-staff-directory)

### Computer Engineering Major (B.S.)

https://ceps.unh.edu/electrical-computer-engineering/program/bs/computer-engineering-major

### Description

In addition to the university’s mandatory Discovery Program requirements, degree candidates must complete our core program (freshman through junior years). In the senior year, students select professional technical electives in the areas of their interest. They also carry out a student-designed project to acquire both breadth and depth of study and to integrate knowledge across course boundaries.

For a detailed semester by semester list of requirements for the four years of study, please refer to the Degree Plan tab.

### Requirements

In addition to Discovery Program requirements, the department has a number of grade-point average and course requirements:

1. Any computer engineering major whose cumulative grade-point average in ECE and computer science courses is less than 2.0 during any three semesters will not be allowed to continue as a computer engineering major.
2. Computer engineering majors must achieve a 2.0 grade-point average in ECE and CS courses as a requirement for graduation.

To make an exception to any of these departmental requirements based on extenuating circumstances, students must petition the department’s undergraduate committee. Mindful of these rules, students, with their adviser’s assistance, should plan their programs based on the distribution of courses found in the Degree Plan tab.

**Electrical Engineering Major (B.S.)**

https://ceps.unh.edu/ece/electrical-engineering-bs

**Description**

In addition to the university’s mandatory Discovery Program requirements, degree candidates must complete our core program (freshman through junior years). In the senior year, students select professional technical electives in the areas of their interest. They also carry out a student-designed project to acquire both breadth and depth of study and to integrate knowledge across course boundaries.

For a detailed semester by semester list of requirements for the four years of study, please refer to the Degree Plan tab.

**Requirements**

In addition to Discovery Program requirements, the department has a number of grade-point average and course requirements.

1. Any electrical engineering major whose cumulative grade-point average in ECE courses is less than 2.0 during any three semesters will not be allowed to continue as an electrical engineering major.

2. Electrical engineering majors must achieve a 2.0 grade-point average in ECE courses as a requirement for graduation.

To make an exception to any of these departmental requirements based on extenuating circumstances, students must petition the department’s undergraduate committee. Mindful of these rules, students, with their adviser’s assistance, should plan their programs based on the distribution of courses found in the Degree Plan tab.

**Required Courses**

MATH 426  Calculus II  4

---

---
Students who wish to preserve the option of transferring to the computer engineering major without incurring a delay in graduation should consult with their academic adviser before electing these courses. It is recommended that such students take CS 415 Introduction to Computer Science I in the fall semester and CS 416 Introduction to Computer Science II in the spring semester in place of the listed courses.

2 Four professional electives must be selected from the following categories of courses:
   • At least two from: ECE 7XX not including ECE 795 Electrical and Computer Engineering Projects and ECE 796 Special Topics
   • Any of these: ECE 795 Electrical and Computer Engineering Projects, ECE 796 Special Topics
   • No more than one from: MT 647 Complex Analysis for Engineers and Scientists, ECE 648 Complex Variables and Applications
   • Honors students who complete ECE 791H Senior Honors Project I and ECE 792H Senior Honors Project II satisfy one professional elective requirement as well as the requirements for ECE 791 Senior Project I and ECE 792 Senior Project II.

3 ECE 791 Senior Project I and ECE 792 Senior Project II fulfill Discovery Program Capstone Experience.

Students are required to take either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives to fulfill the Social Science Category of the Discovery Program.

Fulfilling the EE Program curriculum automatically meets Discovery Program, "Environment, Technology and Society."

Electrical and Computer Engineering Minor

https://ceps.unh.edu/electrical-computer-engineering/program/minor/electrical-computer-engineering

Description

The Department of Electrical and Computer Engineering encourages highly motivated students to consider a minor in Electrical and Computer Engineering. A university-wide GPA of at least 2.8 is required in all but the most compelling of cases, along with an appropriate reason for desiring the minor. Interested students should complete the provided application (https://ceps.unh.edu/sites/ceps.unh.edu/files/departments/electrical_and_computer_engineering/eece_minor_application_rev.doc) form and submit it to the ECE Undergraduate Curriculum Committee (Kingsbury W201) during his/her sophomore or, at the latest, junior year. After it is approved, the student will need to fill out an “Intent to Minor” form, available from the Associate Dean's office (Kingsbury W283) in order to make entry into the minor program official. It is also the student's responsibility to submit a "Minor Certification of Completion (http://www.unh.edu/registrar/forms)" form after all the minor courses have been taken, but before graduation. The ECE Minor Application Form can be downloaded here (https://ceps.unh.edu/sites/ceps.unh.edu/files/departments/electrical_and_computer_engineering/eece_minor_application_rev.doc) or obtained in the ECE office.

For additional information please contact the ECE Department. Our ECE Minor Faculty Advisor (https://ceps.unh.edu/electrical-computer-engineering/contact-us) will be glad to answer any of your questions and help you select courses that best fit your career goals.
Environmental Sciences

The College of Engineering and Physical Sciences (CEPS) and the College of Life Sciences and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.

The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soil and watershed management options are both managed by the Department of Natural Resources and the Environment in COLSA.

Requirements

Requirements for the ECE Minor:

1. You must take a minimum of five ECE courses (at least 18 credits), each with a grade of C- or better.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECE 541</td>
<td>Electric Circuits (or ECE 537 with grade of A/A-)</td>
<td>4</td>
</tr>
<tr>
<td>ECE 548</td>
<td>Electronic Design I</td>
<td>4</td>
</tr>
<tr>
<td>ECE 543</td>
<td>Introduction to Digital Systems</td>
<td>4</td>
</tr>
</tbody>
</table>

Two additional approved ECE courses.

2. You must achieve at least an overall 2.0 average in all courses taken for the minor.

3. Courses taken credit/fail may not be used for the minor.

4. No more than eight credits of courses that the student's major specifies by number may be applied to the ECE minor.

5. No more than two courses completed prior to acceptance into the ECE minor may be counted toward the minor.

CEPS faculty: https://ceps.unh.edu/directory/all

Materials Science (MS)

Programs

- Materials Science Minor (p. 188)

Materials Science Minor

https://ceps.unh.edu/materials-science/program/minor/materials-science

Description

Materials science is an interdisciplinary field that involves the research, development, and design of new materials. In the past century, materials scientists have enabled major technological advances in areas such as electronic materials for semiconductors, new metal alloys for aircraft and automotive applications, and new polymers for a host of medical and consumer applications. In order to prepare students for continuing growth and innovation in materials science, the materials science program offers this minor, which is open to all students as UNH.

The minor offers a broad introduction to materials science, which reflects the interdisciplinary nature of the field. Students must complete at least 18 credits and a minimum of five courses, as described below, with C- or better and a minimum 2.0 grade-point average. No more than 8 credits used to satisfy the student’s major requirements may be used toward the minor. Students interested in the minor should contact the director of the materials science program (Prof. James Krzanowski, james.krzanowski@unh.edu) as early as possible and preferably before the end of their sophomore year.

Requirements

To complete the minor in materials science, students must take the following courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ME 561</td>
<td>Introduction to Materials Science ¹</td>
<td>4</td>
</tr>
</tbody>
</table>

Group A: Thermodynamics, Kinetics and Structure of Materials

¹ Group A is required.
Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 683</td>
<td>Physical Chemistry I</td>
</tr>
<tr>
<td>&amp; CHEM 685</td>

<td>Introduction to Finite Element Analysis</td>
</tr>
<tr>
<td>ME 735</td>
<td>Mechanics of Composite Materials</td>
</tr>
<tr>
<td>ME 795</td>
<td>Special Topics</td>
</tr>
</tbody>
</table>

Select two to three additional courses from either Group A or Group B: 4-6

Total Credits: 16-20

1. It is strongly recommended that students take this course during their sophomore year.
2. Students cannot receive credit towards the minor for both PHYS 508 Thermodynamics and Statistical Mechanics and CHEM 683 Physical Chemistry I/ CHEM 685 Physical Chemistry Laboratory.
3. Students cannot receive credit towards the minor for PHYS 508 Thermodynamics and Statistical Mechanics if they have taken ME 503 Thermodynamics.
4. As needed to reach the required 18 credits.

Mathematics and Statistics (MATH)

The Department of Mathematics and Statistics offers a variety of programs leading to five different degrees:

- B.A. degree: mathematics major;
- B.S. in mathematics degree;
- B.S. in applied mathematics degree;
- B.S. in mathematics education degree; and
- B.S. in statistics degree.

These programs provide flexibility through elective choices and are designed to maximize educational and employment opportunities. Each student must enroll in one specific program; however, changes between programs usually can be accommodated.

The first two years of all programs are similar. In the first year, students are expected to take MATH 425 Calculus I and MATH 426 Calculus II, as well as an introductory programming course (either MATH 445 Mathematics and Applications with MATLAB or CS 410 Introduction to Scientific Programming). A sophomore typically takes follow-up calculus courses in MATH 527 Differential Equations with Linear Algebra and MATH 528 Multidimensional Calculus, MATH 539 Introduction to Statistical Analysis, and MATH 531 Mathematical Proof. The senior capstone experience is fulfilled by a variety of designated courses in each of the degree programs; specific details are given in each program’s course listing below.

For more information about the department’s undergraduate programs, visit http://ceps.unh.edu/mathematics-statistics

Standards for Graduation

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

Minoring in Mathematics

The Department of Mathematics and Statistics offers three minor programs: mathematics, applied mathematics, and statistics. These programs, which are open to all students enrolled at the University, require a minimum of five MATH courses as detailed below. Students whose major program requires more than two courses required by the minor program must substitute additional courses from the list of elective courses to meet the five-course minimum.

https://ceps.unh.edu/mathematics-statistics

Programs

- Applied Mathematics Major: Computation Option (B.S.) (p. 189)
- Applied Mathematics Major: Dynamics and Control Option (B.S.) (p. 191)
- Applied Mathematics Major: Economics Option (B.S.) (p. 192)
- Applied Mathematics Major: Fluid Dynamics Option (B.S.) (p. 193)

Math Education Major: Elementary/Middle School Education K-8 Option (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/mathematics-education-elementarymiddle-school-option

Description

This professional degree program prepares students for teaching mathematics at the elementary and/or middle school level. The program is coordinated with the education department’s teacher certification programs. For the elementary option, full certification requires the five-year program. Students may complete the degree requirements for middle school option with full teacher certification in either four or five years.

Students electing the four-year option leading to middle school certification must plan for one semester of student teaching (EDUC 694C Supervised Teaching/Mathematics) in their senior year; this requires careful planning with your program adviser to accommodate the scheduling of required MATH courses. Requirements for admission to student teaching include receiving credit for EDUC 500 and a minimum cumulative 2.8 GPA.

The five-year program for either option includes a year-long teaching internship in the fifth year. The internship requires admission into a UNH Department of Education graduate program that leads to certification. See Education, College of Liberal Arts. (https://catalog.unh.edu/graduate/programs-study/education)

Graduation Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

For teacher licensure a grade of B- or better is required in all Education courses.

Credits 16

Spring
EDUC 701 Human Development and Learning: Educational Psychology 4
Discovery Course 4
Elective Course 4
Elective Course 3
Credits 15
Total Credits 128

Description
This professional degree program prepares students for teaching mathematics at the secondary level. The program is coordinated with the education department’s teacher certification programs. Students may complete the degree requirements for the secondary option with full teacher certification in either four or five years.

Students electing the four-year option leading must plan for one semester of student teaching (EDUC 694 Courses in Supervised Teaching) in their senior year; this requires careful planning with your program adviser to accommodate the scheduling of required MATH courses. Requirements for admission to student teaching include receiving credit for EDUC 500 and a minimum cumulative 2.8 GPA.

The five-year program includes a year-long teaching internship in the fifth year. The internship requires admission into a UNH Department of Education graduate program that leads to certification. See Education, College of Liberal Arts. (https://catalog.unh.edu/graduate/programs-study/education)

Graduation Requirements
In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

For teacher licensure a grade of B- or better is required in all Education courses.

Mathematics Major (B.A.)

https://ceps.unh.edu/mathematics-statistics/program/ba/mathematics

**Description**

The bachelor of arts degree with the mathematics major may offer a broader liberal arts program than the bachelor of science degree programs. By a careful selection of electives, students can shape this major into a preparation for graduate school, business, or industry.

**Graduation Requirements**

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

Mathematics Major (B.S.)
https://ceps.unh.edu/mathematics-statistics/mathematics-bs

Description
This program offers the strongest concentration in mathematics, requiring courses that are intended to prepare the student for graduate work in mathematics. Through a judicious choice of electives, students may design stronger pre-graduate programs, a program in applied mathematics, or slant the program toward a career in business or industry.

Graduation Requirements
In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

MATH 788 Complex Analysis 4
MATH Elective 2 4

Select two elective courses from the following: 8

- MATH 765 Introduction to Commutative Algebra and Algebraic Geometry
- MATH 768 Real Analysis II
- MATH 769 Introduction to Differential Geometry
- MATH 770 Foundations of Number Theory
- MATH 772 Combinatorics

Capstone 2 - 4

- MATH 797 Senior Seminar or MATH 799 Senior Thesis

Other Required Courses

- PHYS 407 General Physics I 4
- PHYS 408 General Physics II 4

Total Credits 74-76

1 MATH 525 Linearity I may be substituted for: MATH 645.
   MATH 525 - MATH 526, Linearity, may be substituted for: MATH 527, MATH 528, and MATH 645.

2 Students should work with their advisor to identify the MATH course that will be used to fulfill this elective requirement.

**Applied Mathematics Minor**

https://ceps.unh.edu/mathematics-statistics/program/minor/applied-mathematics

**Description**

This minor program introduces students to variety of fields and research specializations in which mathematics plays a critical role in the solution of important scientific and technological problems.

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean of the student’s major college to have the minor shown on the academic record. Students must consult with their major adviser and also the minor supervisor.

It requires a minimum of five MATH courses as detailed in the minor requirements. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor.
Additional courses from the list of course electives may be utilized to meet the five-course minimum.

For further information please contact Professor John McClain.

- MATH 647 Complex Analysis for Applications
- MATH 746 Foundations of Applied Mathematics II
- MATH 747 Introduction to Nonlinear Dynamics and Chaos
- MATH 755 Probability with Applications
- MATH 757 Mathematical Optimization for Applications

**Total Credits**: 20

This requirement may be satisfied by MATH 525 Linearity I - MATH 526 Linearity II

---

### Statistics Major (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/statistics

**Description**

The program prepares students for employment and/or graduate study in a variety of fields and research specializations in which statistical analysis and its applications play a critical role. In addition to its degree programs, the department has an active interest in the actuarial profession. Those interested in actuarial science should seek the advice of departmental coordinator of the actuarial program, Professor Linyuan Li.

**Graduation Requirements**

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

### Statistics Minor

https://ceps.unh.edu/mathematics-statistics/program/minor/statistics

#### Description

The minor in statistics is designed for students in other majors who want to learn the fundamentals of statistical analysis and its applications.

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean of the student’s major college to have the minor shown on the academic record. Students must consult with their major adviser and also the minor supervisor.

It requires a minimum of five MATH courses as detailed in the minor requirements. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor. Additional courses from the list of course electives may be utilized to meet the five-course minimum.
For further information please contact Professor Ernst Linder.

</tr>
</tbody>
</table>

### Electives

Select three courses from the following: 12

- MATH 736 Advanced Statistical Methods for Research
- MATH 737 Statistical Methods for Quality Improvement and Design
- MATH 739 Applied Regression Analysis
- MATH 740 Design of Experiments I
- MATH 741 Survival Analysis
- MATH 743 Time Series Analysis
- MATH #744 Design of Experiments II
- MATH 755 Probability with Applications
- MATH 756 Principles of Statistical Inference

Total Credits: 20

¹ This requirement may be substituted for MATH 525 Linearity I.

### Mechanical Engineering (ME)

The Mechanical Engineering Program at UNH is accredited by the:

Engineering Accreditation Commission of ABET, http://www.abet.org

### Mission

In support of the University and college missions, the Department of Mechanical Engineering is dedicated to educating the highest quality engineering professionals and leaders. Graduates will be prepared to creatively solve engineering problems through the use of analysis, computation, and experimentation. Students completing the program should be well-informed citizens who have the ability to grow intellectually and are able to solve new, challenging problems with self-confidence. It is the department's intent to maintain a general and flexible curriculum that prepares students for both industrial practice and graduate education.

### Educational Objectives

The objective of the UNH Mechanical Engineering Program is to produce graduates who are ethical professionals and good citizens. As they progress in the first several years following graduation, they are expected to:

1. Use their engineering education and communication skills for success in:
   - a. Technical careers in industry, academia, government, or other organizations;
   - b. Graduate school in engineering or physical sciences;
   - c. Nontechnical careers or education in areas such as law, medicine, business, public policy, secondary education, service industries, etc.;
   - d. Careers involving management or entrepreneurship.

2. Exercise lifelong learning to:
   - a. Pursue professional development opportunities in their disciplines;
   - b. Develop new knowledge and skills;
   - c. Pursue new areas of expertise or careers.

3. Use their engineering background to:
   - a. Solve technical problems for societal benefit;
   - b. Develop new knowledge and products that will promote sustainable economic and environmental developments to improve the quality of life;
   - c. Promote the practice of engineering.

Mechanical engineering is a challenging profession and has two major emphases. The first is the general area of mechanical design, which involves all types of mechanical motion and the forces and energy that drive it. The other emphasis deals with energy generation and conversion and is grounded in the principles of the thermal and fluid sciences. Other subject areas, which support both emphases and are frequently part of designs and products, are the materials sciences, manufacturing, and control systems. All of these areas are included in the education and training of mechanical engineers. Ocean engineering is another focus area in our department which emphasizes solving engineering problems associated with the sustainable utilization of ocean resources and the scientific exploration and study of the ocean environment. Mechanical engineering requires significant study in mathematics, engineering computing, and basic sciences such as chemistry and physics, as well as basic engineering courses, before reaching the more specialized courses. Additional information can be found at the mechanical engineering website.

### Mechanical Engineering Major (B.S.)

https://ceps.unh.edu/mechanical-engineering/program/bs/mechanical-engineering-major

### Description

The B.S.M.E. curriculum provides students with a solid engineering core and prepares students for professional engineering careers or for graduate study. The department has a four-course mechanics sequence, a four-course thermal/fluid sciences sequence, and a two-course systems and controls sequence. Modern experimental methods are taught in a two-course sequence starting in the junior year. The two-semester senior design project requires students to utilize the skills they
have learned in their courses and function in an engineering team. The five technical electives required in the program give the students the opportunity to focus on advanced technical areas of their choice.

With their advisers’ assistance, students should plan a program based on the following distribution of courses that totals not less than 128 credits. Note: mechanical engineering graduates typically exceed this requirement depending on what elective courses they select in the curriculum. The degree plan outlined below is typical only in format. Within the constraints of satisfying all the requirements and having all the necessary prerequisites, schedules may vary because of scheduling needs or student preference. Curriculum flexibility allows students to pursue a co-op experience or a minor, if interested which will potentially delay graduation. Some mechanical engineering elective courses may not be offered every year.

**Requirements**

**Technical Elective Requirements:**

Of the five technical elective courses, at least three of these courses must be taken in mechanical or ocean engineering, and these must be at least three credits and at the 600 or 700 level. At most, two may be selected from other 600- or 700-level courses in the College of Engineering and Physical Sciences (CEPS), which can include CS 410 Introduction to Scientific Programming (equivalent to a 600 level technical elective), ESCI 501 Introduction to Oceanography, ECE 543 Introduction to Digital Systems, or a course approved by the department. Only one technical elective is allowed at the 400 or 500 level. Courses that cover nearly identical material to core mechanical and ocean engineering courses, but in another CEPS department, will not be accepted as technical electives, e.g.,

</tbody>
</table>

Students should consult with their academic advisor before selecting technical electives outside of mechanical/ocean engineering. With departmental approval, the two technical electives outside of mechanical/ocean engineering can be used for studying a focused area/minor, with the restrictions that only one course can be at the 400 or 500 level and the focused area/minor must be in a bachelor’s degree program.

**Discovery Program Requirements:**

Students must satisfy the University’s Discovery Program requirements. The following features are unique to students in the Mechanical Engineering Program:

As is the case across the University, all students are required to take an Inquiry course or an Inquiry Attributes course during their first two years. This can be satisfied with ME 441 Introduction to Engineering Design and Solid Modeling. Students who are exempt from ME 441 Introduction to Engineering Design and Solid Modeling due to prior engineering design and computer-aided design (CAD) experience must select an Inquiry 444 course or a course with an Inquiry Attribute and enroll in ME 477 Introduction to Solid Modeling. The Discovery Environment, Technology, and Society category requirement is met upon receiving a B.S. degree in mechanical engineering. The Discovery Social Science category must be satisfied with either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives. The Discovery senior capstone experience is satisfied with either ME 755 Senior Design Project I and ME 756 Senior Design Project II or TECH 797 Undergraduate Ocean Research Project.

**Grade-Point Average Requirements:**

In order to graduate with a mechanical engineering B.S. degree, students must have at least 2.0 grade-point average in all engineering and science courses, including required technical electives, normally taken as department requirements after the start of the junior year as defined in the degree plan below.

**Predictor courses:** To enter the sophomore year, students must achieve a greater than (but not equal to) 2.00 GPA in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C.

To enter the junior year, students must achieve a minimum GPA of 2.00 in ME 525 Statics, ME 526 Mechanics of Materials, and ME 503 Thermodynamics with only one C- grade allowed and no grades below C-.

Students are allowed two repeats of these predictor courses to achieve the predictor rule requirements before being removed from the Program. This can be a single class repeated twice or two classes repeated once. Students are also removed from the program if they obtain a semester GPA below 1.5 three times. Students may petition to be reinstated after one year out of the program.

**Transfer Policy for UNH Students into the Department of Mechanical Engineering:**

**CEPS Students:** To transfer into the freshman or sophomore year, students must earn a combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C in these two courses.

If students are enrolled in ME 525 Statics (or CEE 500 Statics for Civil Engineers), ME 526 Mechanics of Materials (or CEE 501 Strength of Materials), or ME 503 Thermodynamics, they must earn a combined GPA of 2.00 with no grade below a C- in two of these courses with only one C- grade allowed to transfer into Mechanical Engineering. Note: A combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C is also required.

**Non-CEPS Students:** To transfer into the Department of Mechanical Engineering from another college at UNH, students have to satisfy the CEPS college transfer policy as well as the Department of Mechanical Engineering transfer policies listed above according to their status.

**Total Credits**: 129-134
ME 441 Introduction to Engineering Design and Solid Modeling satisfies the Discovery Inquiry requirement. Note: ME 477 does not satisfy the Discovery Inquiry requirement. An alternative Discovery Program Inquiry course or Inquiry Attributes course is required. Permission is required to take ME 477 in place of ME 441.

CHEM 405 Chemical Principles for Engineers or CHEM 403 General Chemistry I and CHEM 404 General Chemistry II, or PHYS 407 General Physics I satisfies the Discovery Physical Science (with lab) category.

MATH 425 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.

ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.

MATH 525 Linearity I and MATH 526 Linearity II also counts as a 600 level technical elective course typically completed in the senior year of the program. Permission is required to take Linearity I and II.

ME 755, ME 756 and TECH 797 satisfy the Discovery Senior Capstone Experience category.

### Mechanical Engineering Minor

https://ceps.unh.edu/mechanical-engineering/program/minor/mechanical-engineering

**Description**

The minor, administered by the Department of Mechanical Engineering, is open to all students of the University and offers a broad introduction to mechanical engineering.

**Requirements**

Students must complete a minimum of six courses as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ME 441</td>
<td>Introduction to Engineering Design and Solid Modeling</td>
<td>4</td>

<td>Thermal System Analysis and Design</td>
<td>4</td>
</tr>
</tbody>
</table>

¹ Physics Major Required Courses.

² The total number of credits to complete the Physics Minor will be either 18 or 19 depending on what course is selected.

Interested students should contact the Mechanical Engineering Chair at (603) 862-1353 and file an intent to minor form. During the last semester, students must complete a completion of minor form for it to appear on their transcript.

**Ocean Engineering (OE)**

**Mission**

The undergraduate program in ocean engineering emphasizes ocean engineering fundamentals while offering interdisciplinary opportunities for focused study in civil, electrical, environmental, or mechanical engineering, as well as marine sciences.

**Program Educational Objectives**

The ocean engineering program seeks to provide an environment that enables students to pursue their goals in an innovative, rigorous, and challenging program with a diversity of offerings. The program has the following major educational objectives, with the expectation that alumni will have successful careers in the many diverse areas of the ocean engineering profession. Within a few years of obtaining a bachelor’s degree in ocean engineering, we expect our graduates to have the following attributes:

*Depth.* To be effective in applying ocean engineering principles in engineering practice or for advanced study in ocean engineering.

*Breadth.* To have a productive career in the many diverse fields of ocean engineering such as coastal engineering, ocean acoustics, offshore structures, and marine renewable energy, or in the pursuit of graduate education in disciplines that include marine science, engineering, medicine, law, or business.

*Professionalism.* To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

https://ceps.unh.edu/ocean-engineering/academics
Ocean Engineering Major (B.S.)

https://ceps.unh.edu/ocean-engineering/program/bs/ocean-engineering-major

Description

Ocean engineering is a field of study that seeks to solve engineering problems associated with the ocean, including those problems associated with the sustainable utilization of ocean resources and the scientific exploration and study of the ocean environment. Ocean engineering is an interdisciplinary field with roots in mechanical, electrical, civil, and environmental engineering, with strong ties to physical, chemical, biological, and geological oceanography. Students of ocean engineering are best served when they are formally trained inside a framework that fuses the expertise of these often-disparate fields.

The BSOE curriculum provides students with a solid engineering core and prepares students for professional engineering careers or for graduate study. The BSOE starts with foundational classes in math, physics, chemistry, and engineering computing, along with introductions to ocean engineering through seminars and oceanography coursework. Students develop their engineering acumen through coursework and laboratory studies that are focused on analysis, experimentation, and design. Students proceed to increasingly advanced coursework in ocean instrumentation, waves and tides, the design of ocean structures, coastal engineering, ocean measurements, and ocean acoustics. Opportunities exist for at least four technical electives, which help students gain further competence in an area of their choice. Students finish their curriculum with a two-semester senior capstone design project. Elective courses in the arts, humanities, and the social sciences are included to provide a well-rounded education.

Students work with an adviser to plan a program that is based on the courses shown in the ocean engineering degree plan below that totals not less than 128 credits. The degree plan is considered a guideline and may be modified to suit student needs and desires within the constraints of meeting minimum credit hours, course prerequisites, and non-major elective course requirements. Some ocean engineering elective courses may not be offered every year.

Requirements

Technical Elective Requirements:

The ocean engineering program curriculum requires four technical electives that are CEPS 600-level or higher courses that have been approved by the OE undergraduate curriculum committee. Sequences have been identified that will provide students more in-depth opportunities in one of the ocean engineering sub-areas. One of the technical electives needs to be a program-approved statistics course (OE 764, MATH 644, or ESCI 701).

Discovery Program Requirements:

Students must satisfy the University’s Discovery Program requirements. The following features are unique to students in the Ocean Engineering program:

As is the case across the University, all students are required to take an Inquiry course or an Inquiry Attribute course during their first two years. This is satisfied with ESCI 501 Introduction to Oceanography. The Discovery Environment, Technology, and Society category requirement is met upon receiving a B.S. degree in ocean engineering. The Discovery Social Science category must be satisfied with either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives. The Discovery senior capstone experience is satisfied with TECH 797 Undergraduate Ocean Research Project.

Grade-Point Average Requirements:

In order to graduate with an ocean engineering B.S. degree, students must have at least a 2.0 grade-point average in all engineering and science courses, including required technical electives, normally taken as department requirements after the start of the junior year as defined in the degree plan below.

Predictor courses: To enter the sophomore year, students must achieve a greater than (but not equal to) 2.00 GPA in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C.

To enter the junior year, students must achieve a minimum GPA of 2.00 in ME 525 Statics, ME 526 Mechanics of Materials, and ME 503 Thermodynamics with only one C- grade allowed and no grades below C-.

Students are allowed two repeats of these predictor courses to achieve the predictor rule requirements before being removed from the Program. This can be a single class repeated twice or two classes repeated once. Students are also removed from the program if they obtain a semester GPA <1.5 three times. Students may petition to be reinstated after one year out of the program.

Transfer Policy for UNH Students into the Department of Mechanical Engineering:

CEPS Students: To transfer into the freshman or sophomore year, students must earn a combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C in these two courses.

If students are enrolled in ME 525 Statics (or CEE 500 Statics for Civil Engineers), ME 526 Mechanics of Materials (or CEE 501 Strength of Materials), or ME 503 Thermodynamics, they must earn a combined GPA of 2.00 with no grade below a C in two of these courses with only one C- grade allowed to transfer in and advance to the junior year. Note: a combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C is also required.

Non-CEPS Students: To transfer into the Department of Mechanical Engineering from another college at UNH, students have to satisfy the CEPS college transfer policy as well as the Department of Mechanical Engineering transfer policies listed above according to status.

1 MATH 425 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.
Ocean Engineering Minor

https://ceps.unh.edu/ocean-engineering/program/minor/ocean-engineering

Description

The ocean engineering minor allows undergraduate engineering students to acquire a nucleus of knowledge about engineering pertaining to the ocean and the coastal zone.

Requirements

To meet the University minor requirement, students must satisfactorily complete a minimum of five courses from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 501</td>
<td>Introduction to Oceanography</td>
<td></td>
</tr>
<tr>
<td>ESCI 752</td>
<td>Chemical Oceanography</td>
<td></td>
</tr>
<tr>
<td>ESCI 758</td>
<td>Introductory Physical Oceanography</td>
<td></td>
</tr>
<tr>
<td>ESCI 759</td>
<td>Geological Oceanography</td>
<td></td>
</tr>
<tr>
<td>OE 490</td>
<td>Introduction to Ocean Engineering</td>
<td></td>
</tr>
<tr>
<td>OE 710</td>
<td>Ocean Measurements Lab</td>
<td></td>
</tr>
<tr>
<td>OE 744</td>
<td>Corrosion</td>
<td></td>
</tr>
<tr>
<td>OE 754</td>
<td>Ocean Waves and Tides</td>
<td></td>
</tr>
<tr>
<td>OE #756</td>
<td>Principles of Naval Architecture and Model Testing</td>
<td></td>
</tr>
<tr>
<td>OE 757</td>
<td>Coastal Engineering and Processes</td>
<td></td>
</tr>
<tr>
<td>OE 765</td>
<td>Underwater Acoustics</td>
<td></td>
</tr>
<tr>
<td>OE 771</td>
<td>Geodesy and Positioning for Ocean Mapping</td>
<td></td>
</tr>
<tr>
<td>OE 795</td>
<td>Special Topics</td>
<td></td>
</tr>
<tr>
<td>CEE 722</td>
<td>Introduction to Marine Pollution and Control</td>
<td></td>
</tr>
<tr>
<td>TECH 797</td>
<td>Undergraduate Ocean Research Project</td>
<td></td>
</tr>
</tbody>
</table>

Select five of the following:

Students typically take ESCI 501 Introduction to Oceanography, TECH 797 Undergraduate Ocean Research Project, and OE 490 Introduction to Ocean Engineering plus two additional engineering courses from the above list to complete the minor.

Students wishing to take the ocean engineering minor should indicate their interest to the ocean engineering minor adviser, Diane Foster, (603) 862-3089 or diane.foster@unh.edu (Kenneth.Baldwin@unh.edu) no later than the beginning of the junior year and file an intent to minor form.

During the final semester, students must complete a completion of minor form for it to appear on their transcript.

Physics and Astronomy

Physics is concerned with the properties of matter and the laws that describe its behavior. As a fundamental science, its discoveries and laws are basic to understanding in nearly all areas of science and technology. Advances in such diverse fields as medical instrumentation, solid state electronics, and space research have relied heavily on the application of basic physical laws and principles.

Students interested in the study of physics at the University of New Hampshire will find a strong interaction between research and academic programs. Undergraduates frequently participate in research studies ranging from nuclear scattering experiments at major particle accelerators to astrophysical studies of the solar system using space probes. These experiences have proven beneficial to engineering and physics students alike. The department is located in DeMeritt Hall (completed in 2008) and Morse Hall. Both buildings are equipped with state-of-the-art research facilities and laboratories. DeMeritt Hall also houses the physics library, classrooms, and a number of open and comfortable meeting areas, which provide an inviting atmosphere for study, interaction, and collaboration.

The suggested programs that follow are indicative of the flexibility available to students, whether they are preparing for graduate work in physics or astronomy, industrial opportunities, governmental research, secondary-level teaching, or a general education that might utilize the fundamental knowledge of physics.

Several undergraduate degree programs are offered through the department of physics. The B.S. degree is designed for students who wish to work as professional physicists or engineers; the interdisciplinary options in chemical physics, materials science, and astronomy allow students to combine physics with other disciplines. The B.A. degree is designed for students who want a strong background in physics but also want a broad liberal arts education. A minor in physics allows a student to combine an interest in physics with another major.

Physics-related degrees are also offered in other departments. For those students with strong interests in both math and physics, the Department of Mathematics offers a B.S. interdisciplinary option in physics.

Interested students are encouraged to contact the department for further information. More detailed information is also on the physics department website.

Programs

• Astronomy Minor (p. 210)
• Engineering Physics Major (B.S.) (p. 210)
• Physics Major (B.A.) (p. 213)
• Physics Major (B.S.) (p. 214)
• Physics Major: Astronomy Option (B.S.) (p. 216)
• Physics Major: Chemical Physics Option (B.S.) (p. 217)
• Physics Major: Materials Science Option (B.S.) (p. 217)
• Physics Minor (p. 218)
Faculty

https://physics.unh.edu/people/faculty

Astronomy Minor

https://ceps.unh.edu/physics/program/minor/astronomy

Description

This minor program introduces students to the fundamentals of astronomy and astrophysics and also allows students some flexibility in their choice of more focused coursework. The required courses cover the following topics: planets, stars, galaxies, cosmology, and modern astronomical tools. We have two flavors of the minor, one for those also getting a physics degree, and another for students outside of the physics major.

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During their final term, students must fill out an intent to minor and have it signed by the appropriate faculty.

The minor requires a minimum of five courses as detailed in the minor requirements. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor. Additional courses from the list of course electives may be utilized to meet the five-course minimum.

For further information please contact Professor Mark McConnell.

</tr>
</tbody>
</table>

Electives in major: choose three from the following 12

- ECE 634  Electronic Materials Science
- ME #762  Electronic Materials Science
- ME 561   Introduction to Materials Science
- ME 670   Systems Modeling, Simulation, and Control
- ME 706   Renewable Energy: Physical and Engineering Principles
- ME 712   Waves in Fluids
- ME 743   Satellite Systems, Dynamics, and Control
- ME #770  Design with Microprocessors

A student must have a minimum grade of C in each 400- or 500-level courses that are part of the core requirements and an overall grade-point average of 2.33 in these courses in order to continue in the program.

物理专业（B.A.）
https://ceps.unh.edu/physics/program/ba/physics-major

描述

这个项目提供了一个广泛和自由的教育机会，在某些情况下，这可能对研究生工作来说是足够的。该项目还可以为中学和高中物理教师、医学院和法学院的学生，以及那些希望追求技术职业的学生提供良好的准备。因为所需课程的总数少于学士学位，所以你有更多的时间来追求其他学术兴趣。明智的选择在选修课中也可以为学生准备跨学科项目，这些项目需要在特定的物理领域有专业的知识。

1 注明没有物理课程可以满足这些要求。这一理由是，课程在物理专业的身份不会扩大教育的物理专业。
2 论文结束经验对所有物理专业学生在他们的最后一年是必需的。物理系鼓励学生参加论文结束（PHYS 799（https://catalog.unh.edu/search/?P=PHYS%20799）Thesis）的课程作为他们的论文结束经验。其他选项包括独立研究研究项目（PHYS 795（https://catalog.unh.edu/search/?P=PHYS%20795）Independent Study or INCO 590（https://catalog.unh.edu/search/?P=INCO%20590）Student Research Experience）或他们作为高级研究实验室的一部分的研究经验（PHYS 705（https://catalog.unh.edu/search/?P=PHYS%20705）Experimental Physics II）。所有论文结束经验都必须经过本科委员会的批准。

注意数学 425（https://catalog.unh.edu/search/?P=MATH%20425）Calculus I, MATH 426（https://catalog.unh.edu/search/?P=MATH%20426）Calculus II, and MATH 525（https://catalog.unh.edu/search/?P=MATH%20525）Linear Algebra, MATH 526（https://catalog.unh.edu/search/?P=MATH%20526）Linear Algebra II or MATH 527（https://catalog.unh.edu/search/?P=MATH%20527）Differential Equations with Linear Algebra, MATH 528（https://catalog.unh.edu/search/?P=MATH%20528）Multidimensional Calculus 都是某些课程的先决条件。

### Physics Major (B.S.)

https://ceps.unh.edu/physics/program/bs/physics-major

#### Description

The bachelor of science degree in physics prepares students for professional work as physicists, and is the first step toward graduate work in physics. It is also excellent preparation for graduate programs in medicine, law, or engineering, as well as for technical jobs in industry. The required courses are those typically necessary for admission to graduate study in physics or astronomy. The interdisciplinary options require fewer physics courses combined with a concentration in another area (chemistry or materials science). The astronomy option emphasizes courses that help prepare a student for advanced studies in astronomy.

</table>

1. Note that no physics course can satisfy these requirement for a physics major. The rationale behind this is that a course in physics does not broaden the education of a physics major.
2. The Department generally recommends MATH 645 Linear Algebra for Applications over MATH 545 Introduction to Linear Algebra for physics majors.
3. A capstone experience is required of all physics majors during their senior year. The Physics Department encourages students to write a senior thesis (PHYS 799) for their capstone experience. Other options include independent study research projects (PHYS 795) or a special project as part of senior lab (PHYS 705).

By the end of the spring semester of the sophomore year, a student must have a minimum grade of C in each 400- or 500-level course specifically required for the B.S. degree and an overall grade-point average of at least 2.33 in these courses in order to continue in the B.S. program.

### Physics Major: Astronomy Option (B.S.)

https://ceps.unh.edu/physics/program/bs/physics-major-astronomy-option

### Description

The astronomy option prepares students for professional work as a physicist or astrophysicist, and is the first step towards graduate work in astronomy or physics. It takes full advantage of the wide range of research that UNH has to offer in astrophysics and space science.
Note that no physics course can satisfy these requirement for a physics major. The rationale behind this is that a course in physics does not broaden the education of a physics major.

2 The Department generally recommends MATH 645 Linear Algebra for Applications over MATH 545 Introduction to Linear Algebra for Physics majors, but the best option, when possible, is MATH 525 Linearity I-MATH 526 Linearity II.

By the end of the spring semester of the sophomore year, a student must have a minimum grade of C in each 400- or 500-level course specifically required for the B.S. degree and an overall grade-point average of at least 2.33 in these courses in order to continue in the B.S. program.

Physics Major: Chemical Physics Option (B.S.)
https://ceps.unh.edu/physics/program/bs/physics-major-chemical-physics-option

Description
This option in the physics degree program combines courses from the physics and chemistry departments to provide training in chemical physics. It includes most courses that are required for a regular Bachelor of Science degree in physics, adding several courses in physical chemistry/analytical chemistry. The option prepares you for research into the structure of matter using a wide range of spectroscopic and computational methods, and for graduate studies in chemical physics, physical chemistry and atomic and molecular physics.

¹ Note that no physics course can satisfy these requirement for a physics major. The rationale behind this is that a course in physics does not broaden the education of a physics major.

² The Department generally recommends MATH 645 Linear Algebra for Applications over MATH 545 Introduction to Linear Algebra for physics majors, but the best option, when possible, is MATH 525 Linearity I-MATH 526 Linearity II.

By the end of the spring semester of the sophomore year, a student must have a minimum grade of C in each 400- or 500-level course specifically required for the B.S. degree and an overall grade-point average of at least 2.33 in these courses in order to continue in the B.S. program.

Physics Major: Materials Science Option (B.S.)
https://ceps.unh.edu/physics/program/bs/physics-major-materials-science-option

Description
This option combines courses from the Physics and other departments to provide training in physics and materials science, an area that has proven industrial demand. In addition to the core courses in classical and modern physics, the students will take six courses in which they will study materials synthesis and properties and get
hands-on training in materials characterization techniques, such as
diffraction, electron microscopy, scanning probe microscopy, and
photoelectron spectroscopy. Two semesters of thesis work in a research
lab complement the training in the classroom. Students completing this
program will have a wide variety of career opportunities to pursue, for
example, in microelectronics, advanced materials synthesis and design,
and thin film engineering. Alternatively, they are qualified for postgraduate
programs in condensed matter physics or materials science.

1 Select a four-credit physics course, chosen in consultation with the
student’s physics minor advisor.
COLLEGE OF HEALTH AND HUMAN SERVICES

Michael S. Ferrara, Dean
C. Anne Broussard, Associate Dean

The College of Health and Human Services (CHHS) prepares students for professional health-related careers, through hands-on, experiential learning. Taught by profession and field experts, CHHS provides undergraduate instruction that leads to the bachelor of science degree in communication sciences and disorders, health management and policy, human development and family studies, kinesiology (with majors in athletic training, exercise science, health and physical education, outdoor education and sport studies), nursing, occupational therapy, recreation management and policy (with options in program and event management and therapeutic recreation), and social work. Each program enables students to acquire the knowledge and skills needed to practice in their chosen professions and to obtain a broad cultural background in the humanities and social sciences.

Undeclared Major

A limited number of well-qualified first-year students who have expressed an interest in a health-related career but who are undecided about a specific major may enter the College of Health and Human Services as undeclared students. All CHHS undeclared students participate in our ACE (Academic and Career Engagement) Program.

The ACE Program in the College of Health and Human Services provides our first year undeclared students with an environment that encourages academic success in the transition from high school to college. Through personalized academic and career coaching, this first-year experience program assists students with navigating academic and co-curricular resources, developing skills in active learning, reflection, and decision making, and exploring vast career options and alumni connections - all while fostering a community of belonging and involvement within CHHS and UNH.

Members of the ACE Program participate in a two-credit ACE seminar. The seminar helps students learn about CHHS majors and explore career choices, goals, and the resources and opportunities available to students at UNH, such as academic guidance and support for your personal well-being. Every CHHS undeclared student has an ACE peer mentor and an ACE academic coach, who are available to meet on a regular basis. Upon declaration of a specific major, each student is assigned a faculty advisor within the major department.

Degrees Offered
Bachelor of Science (B.S.)

Degree Requirements
Candidates for the Bachelor of Science (B.S.) degree must satisfy all University requirements for graduation, earn at least 128 credits, successfully complete the courses required in one of the majors described in this section, and achieve the required minimum grade-point average in the chosen curriculum. Generally, courses are to be completed in the sequence in which they are arranged. Degree candidates must satisfy all of the University and Discovery Program requirements in addition to satisfying the requirements of an individual major program, which includes a senior capstone course/experience.

Applied Human Anatomy and Physiology

- Applied Human Anatomy and Physiology Minor (p. 219)

Applied Human Anatomy and Physiology Minor

https://chhs.unh.edu/kinesiology/program/minor/applied-human-anatomy-physiology

Description

The minor is designed to provide students with an opportunity to develop knowledge and skills necessary for pursuing degrees in medicine and allied health.
Admission to the applied Human Anatomy & Physiology minor is based on successful completion of BMS 507 Human Anatomy and Physiology I & BMS 508 Human Anatomy and Physiology II or ANSC 511 Anatomy and Physiology and ANSC 512 Anatomy and Physiology (or equivalent accepted by minor adviser) with a grade of C or better and a minimum GPA of 2.75.

### Athletic Training

#### Programs

- Athletic Training Major (B.S.) (p. 220)

### Athletic Training Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/athletic-training-major

#### Description

Athletic trainers are health care professionals who collaborate with physicians. The services provided by athletic trainers are comprised of prevention, emergency care, clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. The athletic training major is accredited by the Commission on Accreditation of Athletic Training Education (CAATE) and prepares professionals qualified to attend to the athlete, the fitness-conscious runner, the skilled professional athlete, or anyone engaged in physical activity. Students gain clinical experience within the UNH Department of Athletics, at local high schools, and at off-campus clinical sites. Successful completion of the entire program, including supervised clinical experience, qualifies students to take the Board of Certification (BOC) certification exam.

Students are admitted to the UNH athletic training major with conditional status. Specific competitive criteria must be met during the student’s first year before he or she may apply for full-time status in the major, which is awarded only to students demonstrating exemplary performance in classes and directed observation. Detailed criteria may be found at the program webpage under “Earning Full-Time Status”. Additionally, athletic training major technical standards establish the qualities considered necessary for students to achieve the knowledge, skills, and competencies associated with the program. Candidates for full-time status will be required to verify they understand and meet these technical standards or that they can meet them, with reasonable accommodation.

Interested students should consult with undergraduate program coordinator, Dan Sedory, regarding entry criteria and the technical standards.

Students must earn a grade of C (2.0) or better in all major required courses and BMS 507 Human Anatomy and Physiology I, BMS 508 Human Anatomy and Physiology II.

Students in athletic training complete AT 718 Career Preparation in Athletic Training, as the capstone course for the major. This course is designed to provide students with a means to integrate and augment concepts, skills, and knowledge gained in all previously completed major course requirements. Prerequisites include AT 665 Laboratory Practicum in Athletic Training, sections A-D.

#### Senior Capstone Experience

| AT 718             |       | Career Preparation in Athletic Training     | 4       |

Total Credits 91

1 Must complete five sections of AT 665 Laboratory Practicum in Athletic Training, sections: A, B, C, D, E, 2 credits each. Sections must be completed in a specified sequence, see Degree Plan.
## Degree Plan

### Recommended Major Sequencing of Courses

This list only includes major classes. Students should be registered for, and taking an average of 16 credits per semester to be 'on track' to graduate in 4 years. In most semesters, this means a student will be taking Discovery or elective course, to meet this 16 credit 'load'.

</table>

1. AT 665 Laboratory Practicum in Athletic Training
   The five sections (A-E) of this course serve many purposes, but the two main goals are to provide the students with athletic training clinical experiences to (1) learn and build foundational behaviors of professional practice and (2) synthesize and integrate their knowledge, skill and clinical decision-making into actual patient care. As such, the five sections represent a continuum of learning, skill and experience acquisition that occur over the five semesters of this course.

   An integral part of this sequential learning is based on the fact that the student is normally taking certain athletic training classes prior to or concurrently with certain sections of AT 665, so that the student has a specific, defined knowledge-base available to apply while in each section. When a student takes a laboratory practicum ‘out-of-sequence’ they may be expected to apply skills or asked for knowledge they have not yet learned in a class or lab. It is critical for the safety of the patients the student is interacting with that students MUST take the laboratory practicums in sequential order (A-E) based on the prerequisites noted in the course description.

2. AT 718 Career Preparation in Athletic Training, is the capstone course. As required by the University’s Discovery Program, this course is designated as the “Capstone Experience” for the Major. To meet the standards and conditions of the Discovery Program as the Capstone Experience, it is the last required Athletic Training Major course. Following the criteria of the UNH Academic Affairs Committee, the course provides a student with the means to integrate and augment concepts, skills, and knowledge gained in all previous courses.
A student taking an average of 16 credits per semester will still need to return to UNH for the Spring Semester of their Senior Year to complete the final 16 credits needed to earn the 128 credits required for graduation. As there are no athletic training classes or clinical experiences required during this semester, the student can concentrate their efforts and energies on studying for the Board of Certification Exam during this semester in preparation for becoming a Certified Athletic Trainer and entering the profession — many students take the Exam in January/February or April during this Spring Semester.

Coaching

• Coaching Minor (p. 222)

Coaching Minor

https://chhs.unh.edu/kinesiology/program/minor/coaching

**Description**

The Department of Kinesiology offers a coaching minor. The coaching minor is an interdisciplinary curriculum designed to provide students interested in coaching at the youth, high school, or college levels with basic knowledge and skills necessary for competence in coaching. The minor consists of courses offered by majors within the Department of Kinesiology and Recreation Management and Policy. The coursework lays a theoretical and practical framework for students interested in coaching.

Admission to the minor is based on successful completion of SPST 565 Principles of Coaching (grade of C or better), and a minimum GPA of 2.0.

Total Credits: 18-20

Students will not be permitted to enroll in SPST 650D Internship in Coaching, until they have completed SPST 565 Principles of Coaching; KIN 505 Activity, Injuries and Disease and at least one theory of coaching class.

To graduate with a coaching minor, individuals must earn a grade of C or better in all courses associated with the minor (not including SPST 565 Principles of Coaching, which will require a C or better).

Individuals will not be permitted to count coaching minor classes toward their major regardless of the major/degree program.

Communication Sciences and Disorders (COMM)

Communication Sciences and Disorders (CSD) is devoted to helping people overcome disabilities of speech, language, and hearing. The study of Communication Sciences and Disorders may begin in the freshman or sophomore year. Students learn about speech, language, and hearing disorders in the classroom and are involved in clinical observation in the on-campus Speech-Language-Hearing Center and can participate in research projects. Students are encouraged to take elective courses in linguistics, human development, learning theory, early childhood, health administration, special education, and various aspects of rehabilitation.

As this is a pre-professional degree, students generally pursue graduate studies in speech-language pathology or audiology at colleges or universities offering graduate programs leading to a master’s or doctoral degree and to subsequent certification by the American Speech-Language-Hearing Association (ASHA). Certified clinicians find employment opportunities in hospitals, schools, community speech and hearing clinics, and private practice. Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of the Communication Sciences and Disorders major.

Communication Sciences and Disorders Major (B.S.)

https://chhs.unh.edu/communication-sciences-disorders/program/bs/communication-sciences-disorders-major

**Description**

The Department of Communication Sciences and Disorders offers a bachelor of science degree in communication sciences and disorders.
Communication Sciences and Disorders is the profession devoted to helping people overcome disabilities of speech, language and hearing. The study of communication sciences and disorders may begin in the freshman or sophomore year. Students learn about speech, language, and hearing disorders through a combination of classroom instruction and observations in the on-campus Speech-Language-Hearing Center and elsewhere. Candidates for a bachelor's degree in Communication Sciences and Disorders must satisfy all departmental as well as University Discovery and Writing Intensive requirements.

**Requirements**

Students must earn a grade of C or better in all COMM courses.

**Deaf and Hard of Hearing Studies Minor**

https://chhs.unh.edu/communication-sciences-disorders/program/minor/deaf-hard-hearing-studies

**Description**

The minor in Deaf and Hard of Hearing Studies is intended to provide students with courses leading to specialized knowledge related to the fields of deafness and hearing loss. It will be of interest to students who intend to engage in teaching, counseling, rehabilitation, social work, and other professions in which contact with individuals who are deaf or hard of hearing may be expected. There may be some interest as well on the part of students majoring in TESOL and linguistics due to the bilingual aspect of the field. Finally, it will be an option for those students who wish to move on to graduate study in the fields of deaf education, rehabilitation counseling, speech-language pathology, and audiology.

**How many credits are required?** The minor in Deaf and Hard of Hearing Studies requires a minimum of 20 credits, five courses. Students in the minor must earn a grade of C or better for any course to count towards the required 20 credits. A maximum of 8 credits may be accepted in transfer from another institution if approved by the Minor Coordinator, Dr. Mary Jane Sullivan. Course substitutions are not allowed.

**How long does it take to earn a minor in Deaf and Hard of Hearing Studies?** It is important to plan ahead as not all of the minor courses are offered both fall and spring semester. In order to complete the minor generally a minimum of 4 semesters would be needed.

Please note that minor requirements are different depending if the student is a Communication Sciences and Disorders Major or another major.

**Requirements**

The minor in Deaf and Hard of Hearing Studies requires a minimum of 20 credits (5 courses). The number of required and elective courses will vary depending upon a student's major. Students in the minor must earn a grade of C- or better for any course to count towards the required 20 credits. A maximum of 8 credits may be accepted in transfer from another institution if approved by the Minor Coordinator, Dr. Mary Jane Sullivan. Students are advised to take the Required Courses in the order listed below.

**Note:** Communication Sciences and Disorders majors may not use a course required of their major to fulfill both major and minor requirements. Course substitutions are not allowed. It is important to plan ahead as not all of the minor courses are offered both fall and spring semesters.

Exercise Science

Programs

- Exercise Science Major (B.S.) (p. 224)

Exercise Science Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/exercise-science-major

Description

This curriculum prepares students for careers in health and fitness promotion and education programs in hospitals, sports medicine centers, wellness clinics, universities, and rehabilitation facilities. Students are also prepared for advanced degree programs in the health professions, basic biology fields, medicine, or other health-related fields. Students must earn a grade of C (2.0) or better in every required course. Successful completion of early and prerequisite courses is required before advancing to sequenced and higher-level coursework. All required courses must be completed before enrolling in EXSC 650A Internship in Exercise Science. Interested students should consult with the undergraduate major coordinator, Dain LaRoche, Dain.LaRoche@unh.edu.

Total Credits 12-16
These courses give students practical experience in evaluating health and fitness and prescribing exercise to a wide range of clients. Specifically, students assess a number of disease risk factors, including blood pressure, blood chemistry, and body composition measures, and perform maximal graded exercise tests complete with electrocardiogram monitoring, as well as measure strength and flexibility. Students ultimately develop individualized exercise prescriptions for their clients and work with them one-on-one to improve their health and fitness. The internship experience is an off-campus, 10-week, 40-hours per week, full-time experience and can only be taken after all University and departmental courses are completed. Typically, this is taken during the summer after the student’s senior spring academic term.

- Health and Physical Education Major (B.S.) (p. 225)

### Health and Physical Education Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/health-physical-education-major

**Description**

The health and physical education (HPE) major provides a foundation for teaching through a four-year program (BS), or the UNH Department of Education fifth-year program leading to a masters of arts in teaching (MAT). Graduates become certified to teach kindergarten through grade 12 (K-12) health and physical education in the state of New Hampshire. This licensure is transferable to all other states in the U.S. Extensive supervised practicum experiences that provide teaching skills, including adaptive physical education programming, offers an excellent foundation for preparing high-quality teachers. The combination of health with physical education and adaptive physical education makes graduates highly marketable.

Internal UNH undergraduate transfer candidates must have a minimum GPA of 2.67 before admission to the major. The coursework for students choosing the four-year or five-year path to teaching certification is exactly the same until the final semester of the undergraduate program. The
culminating experience for students in the four-year teaching program is student teaching (EDUC 694D/HPE 694 Supervised Teaching in Health and Physical Education). Students choosing to do the fifth-year program complete a year-long internship, in lieu of student teaching. Students also have the option of completing a concentration in adapted physical education through additional coursework designed to enhance teaching strategies and the programmatic needs of students with disabilities.

Admission to the fifth year program requires a minimum GPA of 3.0. Students admitted early to the masters program (required GPA of 3.2 or greater) are eligible for dual credit at the undergraduate/graduate levels for up to 12 credit hours. This enables undergraduates to begin the masters program in their junior or senior year. For questions about the program, contact the undergraduate program coordinator, Steve Wright, at (603) 862-4408, or steven.wright@unh.edu.

#### Recommended Major Sequencing of Courses

This list only includes major classes. Students should be registered for, and taking an average of 16 credits per semester to be ‘on track’ to graduate in 4 years. In most semesters, this means a student will be taking Discovery or elective courses to meet this 16 credit ‘load’.

Health Management and Policy (HMP)

Health management and policy is an interdisciplinary program, that provides students with a broad view of health and health care and policy, while developing analytical skills which are integrated within computer laboratories throughout the curriculum. Students are prepared to pursue careers in a wide range of healthcare organizations focusing on the business aspects and public health aspects of healthcare. Graduates work in private practice, long-term care, rehabilitation, hospitals, nursing homes, and other managed care organizations in such areas as finance, information systems, management, marketing, and operations, project management, as well as public health departments, community health, community-based and home-health agencies, mental health facilities, regulatory bodies, consulting companies, and insurance companies.

The department’s undergraduate program maintains full certification by the Association of University Programs in Health Administration (AUPHA). Students have the opportunity to become student members in the American College of Healthcare Executives (ACHE), the Health Care Financial Management Association (HFMA), and the American Public Health Association (APHA), all of which are represented by student chapters at the University. The Health Management and Policy curriculum is approved under the New England Regional Student Program.

Health Management and Policy Major (B.S.)

https://chhs.unh.edu/health-management-policy/program/bs/health-management-policy

### Description

#### Academic Program

The Health Management and Policy (HMP) curriculum includes a variety of health, healthcare, and policy courses. Students work closely with their advisor and faculty to develop an academic and career plan. Students are required to complete a core of introductory courses prior to their junior year in the HMP major. Upper-division (junior and senior) HMP courses are planned in a two-year sequence, (see course sequence) and includes a 400-hour three credit internship. Along with completing major courses, students will be guided to complete the University requirements for writing intensive courses and Discovery courses to obtain the required 128 credits to graduate. This degree prepares students for a variety of positions within healthcare after graduation. It is important to note that internal transfer students may require an extra year in the major due to the prescribed course sequence.

Internal Applications for HMP Major

Students interested in additional information or in applying for admission to the health management and policy major should attend an HMP information session, and/or contact the academic department coordinator. Efforts should be made to complete this process during the freshman year or early in the sophomore year to ensure sufficient time to complete the required courses (HMP 401, HMP 403, HMP 501, MATH 420, and Statistics). Admitted UNH students can apply to the major once the student meets the application requirements, a minimum cumulative GPA of 3.00 and at least two of the required courses completed with a B- or higher; however all HMP required courses must be completed with a B- or better to progress in the major.

Honors in Major

The department offers an honors-in-major program. Students must meet the department’s requirement of having an overall 3.7 grade-point average at UNH and a 3.7 grade-point average for required HMP courses taken by the end of the spring semester sophomore year to be invited to Honors-in-Major. Honors-in-major students take a total of three honors designated major courses during the junior year and senior year, as well as completing an honors thesis project during the senior year, HMP 798H and HMP 799H. Students work on the honors thesis with a faculty member within the HMP department who has knowledge in the specific topic. Students should contact the academic department coordinator for further information.

Health Management Minor

https://chhs.unh.edu/health-management-policy/program/minor/health-management

Description

The department of Health Management and Policy (HMP) offers an integrated minor in health management designed for students in majors outside of HMP. All courses must be completed with a C- or higher to be counted toward the minor. Students seeking to minor in health management should meet with the academic department coordinator to discuss the requirements.

Requirements

The health management minor includes the following courses:

Public Health Minor

https://chhs.unh.edu/health-management-policy/program/minor/public-health

Description

The department of Health Management and Policy offers a minor in public health. Public health deals with the health of populations and focuses on health promotion and disease prevention, as well as access to the medical system. The minor introduces students to many of the foundation areas of public health and provides basic exposure to key concepts and skills in the five core disciplines of public health, as articulated by the Council on Education for Public Health. The minor is open to any baccalaureate student outside of the Health Management and Policy major at UNH. Students interested in this field may decide to continue their education with the Master of Public Health (MPH), which is also offered through HMP.

Requirements

The public health minor includes the following courses:

<table>

Health Sciences

- Health Sciences Major B.S. (p. 229)

Health Sciences Major B.S.

https://chhs.unh.edu/kinesiology/program/bs/health-sciences-major

Description

The Health Sciences program is for those students who are concerned with the well-being of others; and who also possess a strong science aptitude. As healthcare has evolved in the U.S., degree programs in the
allied health professions (athletic training, physical therapy, physician assistant, etc.) have moved to post-baccalaureate education. Individuals with career interests in allied health professions must, first, attain prerequisite knowledge to be prepared to study in these advanced degree programs. This rigorous academic program meets requirements for entry into graduate school for a career in athletic training, physical therapy, or physician assistant. The U.S. Bureau of Labor Statistics anticipates a much faster than average job growth for most careers in health care.

Requirements

1 Any UNH statistics course satisfies the requirement with adviser approval.

Required University Courses
Candidates for a degree must satisfy all of the University Discovery requirements in addition to satisfying the requirements of their selected Health Sciences concentration.

Athletic Training Concentration

This concentration is intended for students interested in pursuing a career as an athletic trainer. Students in this concentration develop knowledge and skills to prepare them for graduate study in a CAATE Accredited Master’s Degree in Athletic Training. This concentration provides the prerequisite coursework to study in the (proposed) Master of Science in Athletic Training at the University of New Hampshire.

Human Development and Family Studies (HDFS)

HUMAN DEVELOPMENT AND FAMILY STUDIES MAJOR (B.S.)

As a human development and family studies major at UNH, you’ll learn to promote the health and well-being of children, adults, and families through research, teaching and service. The program curriculum embraces diversity and emphasizes service excellence and innovation, preparing you for a variety of in-demand careers in education, social services, and healthcare. Three separate concentrations allow students
to focus on early childhood development and education, family support or lifespan development.

As a major public research university, UNH emphasizes hands-on experience and research opportunities. Students in the human development and family studies program have multiple opportunities to put theory into practice through the Child Study and Development Center, Family Connections Center and Marriage and Family Therapy Center. Students in the Child Development Concentration may apply to the Early Childhood Education Teaching Preparation Program, while students in the Family Support Concentration are encouraged to pursue provisional status as a Certified Family Life Educator, preparing them to work in areas such as social services, health services, family support, and youth program.

Human Development and Family Studies (https://chhs.unh.edu/human-development-family-studies/program/bs/human-development-family-studies-major) offer three areas of concentrations

- **Family Support** - for students interested in working with children, adolescents, adults, and families
- **Lifespan Development** - for students with a broad interest in working with families
- **Child Development** - for students who have a broad interest in working with children ranging in age from birth to age eight.

Two optional full-year internship opportunities (https://chhs.unh.edu/human-development-family-studies/program/bs/opportunities/interships) Students can apply for either internship during their junior year

- **Early Childhood Education** teacher preparation (ECE) internship
- **Family Support** concentration offers an internship working in fields involving family, gender and cultural differences. This internships can also be taken by Lifespan Development students

Three Minors (https://chhs.unh.edu/human-development-family-studies) The Human Development and Family Studies department offers three complementary undergraduate minors: Human Development and Family Studies, Adolescent and Youth Development, and Child Life. An undergraduate minor allows students to demonstrate a special area of interest, focus, or expertise and supports their academic major and future educational and career goals. Each HDFS minor highlights key aspects of individual and family development.

The Human Development and Family Studies minor is only available to non-HDFS majors; however, HDFS majors may choose to minor in Adolescent and Youth Development or Child Life. A completed minor at UNH typically consists of 20 credits, or 5 classes, completed with a C or better.

- **Child Life**
- **Adolescent and Youth Development**
- **Human Development and Family Studies**

Human Development and Family Studies The Child Life minor may also be taken by HDFS students interested in working with families and children in a hospital setting.

https://chhs.unh.edu/hdfs/
• Child Development (p. 232) focuses on infancy through childhood with an emphasis on learning, education, and developmentally-appropriate practices and activities.
• Family Support (p. 233) focuses on development within the context of families, close relationships, and communities.
• Lifespan Development (p. 233) focuses on understanding and supporting development across the entire lifespan.

Internship Opportunities
Internships are not required for students to complete their degree in HDFS; however there are exciting opportunities to gain hands on experience. Students who want to take part in an internship apply during their junior year for an internship experience that spans their full senior year. An Early Childhood Education (ECE) Teacher Preparation internship is available for qualified students within the Child Development concentration. The Family Support and Lifespan concentrations offer an internship that introduces high-performing students to careers in human services, advocacy, and policy through placements in the Seacoast Region of New Hampshire.

Undergraduate Minors
The HDFS department also offers three complementary undergraduate minors: Human Development and Family Studies, Adolescent and Youth Development, and Child Life. An undergraduate minor allows students to demonstrate a special area of interest, focus, or expertise and supports their academic major and future goals. Each HDFS minor highlights key aspects of individual and family development. Although the Human Development and Family Studies minor is only available to non-HDFS majors, HDFS majors may choose to minor in Adolescent and Youth Development or Child Life. A completed minor at UNH typically consists of 20 credits, or 5 classes, completed with a C- or better.

• Human Development and Family Studies (https://chhs.unh.edu/human-development-family-studies/program/minor/human-development-family-studies) minor complements undergraduate majors in the social sciences, health professions, and related disciplines by providing students with the opportunity to learn about individual and family development, interpersonal relationships, and the ecological contexts of development.
• Adolescent and Youth Development (https://chhs.unh.edu/recreation-management-policy/program/minor/adolescent-youth-development) minor is an interdisciplinary minor that allows students to gain specialized knowledge and skills for working with adolescents and emerging adults in school, after-school, and community settings.
• Child Life (https://chhs.unh.edu/human-development-family-studies/program/minor/child-life) minor introduces undergraduate students to the Child Life profession, which involves working with children, adolescents, and families facing challenges associated with hospitalization, medical procedures, illness, and disability.

CHILD DEVELOPMENT CONCENTRATION
This concentration is intended for students who have a broad interest in working with children ranging in age from birth to age eight. The Child Development concentration has four major foci: child development, teaching methodology and curriculum development, developmentally appropriate learning environments for young children, and home-school-community relations.

Child Development: Early Childhood Education (ECE) Teacher Preparation Program
The Early Childhood Education (ECE) Teacher Preparation program prepares students for a career in teaching young children. Course work for this program is designed to maximize in-classroom mentorship and to provide a broad range of exposure across the pre-kindergarten to 3rd-grade levels. This program within the Child Development concentration of the Human Development and Family Studies Department is approved by the New Hampshire State Board of Education.

Requirements and instructions for the application process for this program are detailed below. Students who wish to be considered for the ECE program must indicate their interest at the time of application to the major so that an appropriate plan of study can be arranged.

Juniors in the Child Development concentration who have maintained a minimum overall GPA of 3.2 and a departmental GPA of 3.2 are eligible to apply. Please note that this is a competitive program with limited enrollment. Those accepted into the program must maintain this level of academic achievement throughout the program. Students must be prepared to have their own transportation for off-campus internship placements as needed.

Applications are available through the HDFS department website opportunities>Internships (https://chhs.unh.edu/human-development-family-studies/opportunities/internships), and forms are due by March 1st of each year. Completed applications will be reviewed by Child Development faculty. Admission decisions will be made by mid-March. Provisional admission may be given to those who have not yet taken and passed the Praxis Core Academic Skills for Educators test (or who have not received approval from the New Hampshire Department of Education for a Praxis Core Waiver Request) at the time of application in mid-February. Final admission will be given pending the submission of a passing Praxis Core test score (or approved waiver) by the last day of final exams at the end of the junior year.

A Note about Obtaining State Teacher Certification
For detailed information about the State of New Hampshire Department of Education Certification requirements, please visit the State of NH, Department of Education, Bureau of Credentialing (https://www.education.nh.gov).

Although students may graduate from UNH with a bachelor’s degree in Human Development and Family Studies, having completed the ECE coursework along with all student teaching requirements, they will not be eligible to apply for the New Hampshire State Teaching Certification without the required set of passing test scores. This is a state of New Hampshire requirement; not a condition for graduation from UNH. In order to fulfill a teaching contract with a public school district, a prospective teacher must be certified by the state in which he/she is to be employed.

In addition to the Praxis Core, all ECE teacher program candidates are expected to take the Praxis II for Education of Young Children (5024) and the New Hampshire Foundations of Reading test prior to graduation.

Early Childhood Education (ECE) Internship Course Descriptions
The ECE Internship course (HDFS 785 Seminar for Student Teachers) is a fall semester seminar-based course intended to prepare students, as teacher candidates, for the student teaching experience that takes place in the spring semester. This course emphasizes students' continued development as learners, researchers, and collaborators. Discussions and projects focus on the ways in which these three roles are developed within the classroom and school community. Students meet as a cohort
in weekly/bi-weekly seminars on campus. Students should expect to spend a minimum of five hours per week in their assigned classroom (60+ hours). Other expectations for this course include, but are not limited to: preparing a resume observing at other sites, attending professional conferences, starting a professional portfolio to document their achievement of professional teaching standards, and completing additional assignments and readings.

HDFS 786 Seminar for Student Teachers and HDFS 788 Student Teaching Young Children: provide the student teaching experience in the spring semester of the senior year. Students should expect to spend a minimum of twenty-five hours per week (a minimum of 325+ hours total) in their assigned classrooms, gradually assuming increasing teaching responsibilities, culminating in the assumption of two to three lead-teaching weeks. Additional hours outside of actual classroom/program operation hours are expected for meeting and planning with cooperating teachers, preparing for teaching, and attending parent conferences and other school functions, as well as attending professional conferences. Seminars provide continued opportunity for reflection on students’ development as teacher candidates, reflecting on classroom practices, identifying teaching strengths and weaknesses, and planning their first professional appointment as teachers of young learners. Students should be prepared to meet weekly after school hours and to complete and present their professional portfolio to faculty and related professionals in the field.

Back to Top (p. 231)

FAMILY SUPPORT CONCENTRATION

This concentration focuses on individual and family development across social and cultural contexts. Students in the Family Support concentration develop knowledge and skills that prepare them to work with individuals and families to support healthy development and well-being across multiple settings including schools, social service agencies, and non-profit organizations.

Students in this concentration can apply for the status of Provisional Certified Family Life Educator (CFLE) through the National Council on Family Relations. Our HDFS program is a CFLE-approved undergraduate academic program through the National Council on Family Relations. Our students can become certified by applying and demonstrating the completion of our curriculum along with completion of our full-year, senior internship.

Family Internship

The Family Internship program introduces students to careers in human services through placements in the Seacoast region of New Hampshire. By working alongside professionals in after-school programs, non-profit organizations, and other local agencies, students will have opportunities to hone their professional skills and focus their goals for their future careers.

In the Family Internship (HDFS 782 Family Internship), students will apply knowledge gained from their academic studies at an approved internship site. The internship involves a commitment of 16 hours per week for two semesters, plus a 2-credit seminar (HDFS 792 Family Internship Seminar), which meets every other week for a full academic year. Some internship sites may require additional applications or a criminal background check before placement is finalized. Arrangements for criminal background checks are the responsibility of the student and the requesting organization, not the Department of Human Development and Family Studies. Students apply for the internship during the spring semester of their junior year. Internship applicants must have completed 20 credits of departmental coursework prior to their senior year. Internship courses (HDFS 782 Family Internship/HDFS 792 Family Internship Seminar) count toward the 20 credits required in supporting courses. Lifespan Development students who want to participate in the Family Internship should plan to take HDFS 760 Family Programs and Policies during their junior or senior year. Click here for additional internship information.

Certified Family Life Educator

Students in the Family Support concentration who are accepted to the Family Internship are encouraged to apply for provisional status as a Certified Family Life Educator (CFLE). Family life educators work in a variety of settings including social services, health services, child care, family support, youth programs, parent education, junior and senior high schools, and universities and colleges. The CFLE certification demonstrates expertise in a broad range of topics and increases professional credibility by validating students’ education and experience. The National Council on Family Relations (NCFR) has approved the Department of Human Development and Family Studies’ Family Support concentration as meeting the standards and criteria required for CFLE certification. Students may apply to NCFR for provisional CFLE designation upon completion of required coursework (see marked courses in the table below.) Upon meeting additional requirements listed on the NCFR website, students can apply for full certification after graduation.

Back to Top (p. 231)

LIFESPAN DEVELOPMENT CONCENTRATION

This concentration focuses on learning about developmental tasks and developmentally-appropriate practices across the entire lifespan. Students in the Lifespan Development concentration take courses in each of the development periods: childhood, adolescence, adulthood and aging. Students also gain expertise in contexts of development, like families and communities, but the focus is on the full range of life stages and an emphasis on system dynamics, diverse family systems, gender, and cultural differences. Students in the Lifespan Development concentration may also apply to take part in the full-year, senior, Family Internship program.

Back to Top (p. 231)

Requirements

Major Requirements

The core curriculum required of each Human Development and Family Studies student is designed to give a broad introduction to individual and family development and interpersonal relationships across the lifespan. Building off this curriculum, each student will select an area of concentration in Child Development, Family Support, or Lifespan Development that will guide further required coursework. With assistance from faculty advisors, students also choose supporting courses that allow them an individualized component to the major, tailored to their specific interests and career objectives. Lastly, the senior year culminates in the required capstone experience and optional internship opportunity.

Candidates for the Human Development and Family Studies degree must satisfy all of the University Discovery requirements (https://
www.unh.edu/discovery/discovery-courses) in addition to satisfying the requirements of their HDFS concentration.

Selected Concentration (Requirements listed below) 24
Capstone experience (Requirement listed by concentration below) 4
Supporting Courses (applies to all concentrations) 1 20

1 Supporting courses are intended to provide an individualized component to the HDFS curriculum. Because HDFS is interdisciplinary, this allows students to explore related areas that contribute to their academic and professional goals. A supporting course may be any course, inside or outside of the HDFS department, that is:
1. At the 500-level or above
2. Approved by an HDFS adviser

Any non-required HDFS courses (including internships) may serve as supporting coursework. Other classes meeting supporting course criteria are often found in the psychology, sociology, social work, women's studies, education, and communication sciences and disorders departments.

### Adolescent and Youth Development Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/adolescent-youth-development

**Description**

The departments of Recreation Management and Policy and Human Development and Family Studies offer an interdisciplinary minor designed to give students an opportunity to develop knowledge and skills regarding adolescence and youth development. The two required courses offer a foundation in theory, research, and practice, and students choose three additional courses in order to better prepare students to work with this age group.

Interested? Contact one of the Minor Coordinators: Dr. Cindy Hartman (cindy.hartman@unh.edu) in Recreation Management and Policy or Dr. Erin Hiley Sharp (erin.sharp@unh.edu) in Human Development and Family Studies.

**Requirements**

The Adolescent and Youth Development minor requires students to complete 20 credits.

<table>

</tr>
</tbody>
</table>

Other adolescent or youth-based courses as approved by minor coordinator.

- RMP majors may use RMP 668 Youth Culture and Programs to meet both major and minor requirements.
- The Adolescent and Youth Development Minor follows UNH’s policy on minors. Following University policy, students must complete 20 semester hours with a grade of C- or better and a 2.00 grade point average.
- No more than 8 credits used by a student to satisfy major requirements may be used for the minor.
- Students must submit a Certification of Completion of Minor form during their final semester to one of the Minor Coordinators: Dr. Cindy Hartman (cindy.hartman@unh.edu) in RMP or Dr. Erin Sharp (erin.sharp@unh.edu) in HDFS.

### Child Life Minor (HDFS)

https://chhs.unh.edu/human-development-family-studies/program/minor/child-life

**Description**

The department of Human Development and Family Studies offers a minor in Child Life. The minor introduces undergraduate students to the Child Life profession, which works with children, adolescents, and families facing challenges associated with hospitalization, medical procedures, illness, and disability. You will gain insight on how to support children and their families to effectively cope with the stress and anxiety of hospitalization using developmental play and normalized activities in their environment.

The Child Life minor may also be taken by HDFS students.

**Requirements**

The Child Life minor requires students to complete 20 credits.

</table>

Note: Only 8 credits can count towards both your major and minor.
1. Offered every other spring.
2. Internship under the supervision of a CCLS. Contingent on approval from instructor and securing an internship site.

Human Development and Family Studies Minor

https://chhs.unh.edu/human-development-family-studies/program/minor/human-development-family-studies

Description

The Human Development and Family Studies minor complements undergraduate majors in the social sciences, health professions, and related disciplines by providing students with the opportunity to learn about individual and family development, interpersonal relationships, and the ecological contexts of development.

Requirements

<table>
<thead>
<tr>
<th>Code</th>

Total Credits 20

Kinesiology (KIN)

The mission of the Department of Kinesiology is to create, share, and apply knowledge in the promotion of health, physical activity, sport, and well-being. We achieve this through high quality teaching and mentoring of our students, conducting scholarly activity, and engaging in community outreach. Our programs purposefully blend theory, research, and practice to support the professional needs of our students in all stages of their careers.

The department offers five areas of study for majors: athletic training, exercise science, health and physical education, outdoor education and leadership, and sport studies. Candidates for degree requirements in any of the department majors must satisfy all University Discovery Program requirements in addition to satisfying specific program requirements.

Kinesiology Minor

https://chhs.unh.edu/kinesiology/program/minor/kinesiology

Description

The Department of Kinesiology offers an interdisciplinary curriculum for nonmajors, which is designed to provide students with the basic knowledge of human movement and sport sciences. The minor consists of courses offered by several options within the department.

Requirements

Kinesiology Minor Requirements

1. Complete a minimum of 20 credits approved by the department minor advisor. Credits towards the minor come from courses in AT, EXSC, HPE, KIN, OUT, and/or SPST.
2. Must have a C- (or better) in all graded courses. Pass/Fail option may
NOT be used. Courses designated Credit/Fail MAY be used.
3. No more than 8 credits may satisfy BOTH major and minor
requirements.
4. No more than 6 of the 20 credits may be in activity or coaching
courses.

Please note: The designation of the completed minor will be
"Kinesiology" which means that you cannot minor in any of the majors
(i.e. athletic training, exercise science, health and physical education,
outdoor education, or sport studies). However, you may create an
emphasis by carefully selecting appropriate courses so that anyone
looking at your final UNH transcript will be able to see the emphasis.

Nursing (NURS)

The undergraduate nursing program is nationally accredited by:

The Commission on Collegiate Nursing Education

The Department of Nursing reflects the mission and goals of the
University and focuses on the uniqueness of each individual. The
department’s mission is to enhance the health of individuals, families,
groups, and communities. The philosophy expresses the beliefs of the
curriculum in a precepted clinical
facilities, community health agencies, and a state-of-the-
practicum, art simulation laboratory. The senior year culminates in a capstone
area health facilities, community health agencies, and a state-of-the-
emphasize relationship-based care, reflective thinking, clinical decision
and skills essential to the present and future practice of nursing.
Graduates are prepared to provide care to individuals and groups, help
people identify and meet their health care needs, be effective colleagues
on the health care team and shape the future of health care.

• Nursing Major (B.S.) (p. 237)

Faculty

https://chhs.unh.edu/directory/all

Nursing Major (B.S.)

https://chhs.unh.edu/nursing/program/bs/nursing-major

Description

The curricula are divided into biological, social sciences, and humanities
as a foundation for courses in the major, and nursing courses, which
emphasize relationship-based care, reflective thinking, clinical decision
making, and the application of evidence-based guidelines to develop
quality and safe clinical skills. Clinical experiences are offered in
area health facilities, community health agencies, and a state-of-the-
art simulation laboratory. The senior year culminates in a capstone
practicum, NURS 721C Integrating Professional Nursing Practice Clinical,
in which students apply curricular concepts in a precepted clinical
experience. Candidates for the nursing degree must satisfy all of the
University Discovery Program requirements in addition to satisfying
major requirements.

The nursing program faculty believe learning is a creative process
wherein students are active participants in their education, growth, and
development as professional nurses. Faculty members are facilitators
and mentors to students within a supportive, scholarly environment.

A grade of C or better in high school chemistry is required as well as
biology or physics. The following prerequisite courses must be completed
successfully prior to enrollment in NURS 500 Introduction to Professional
Nursing:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 401</td>
<td>First-Year Writing</td>
<td>4</td>

<tr>
<td>BMS 501</td>
<td>Microbes in Human Disease</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits 20

1 Must be taken prior to or concurrent with NURS 500 Introduction to Professional Nursing

A course in statistics must be completed prior to, or taken concurrent
with, NURS 641 Translating Research for Practice.

Prerequisite courses require grades of C or better and only one
prerequisite course may be repeated one time in order to progress. Most
of the prerequisite courses also meet Discovery requirements. Major
courses require a minimum grade of C. Nursing courses may not be
repeated. A cumulative grade-point average of 2.5 must be maintained
throughout the program.

Students are responsible for their own transportation to clinical agencies,
uniforms, professional equipment, health insurance coverage, yearly
criminal background checks, drug and alcohol screening, fingerprinting,
yearly health assessment, and select immunizations and titers.
Students must maintain certification in cardiopulmonary resuscitation
at the American Heart Association Basic Life Support for Healthcare
Professionals level. All clinical documents must be received by July 1st
before the sophomore year, except flu vaccine, which is due by October
15th, and remain up to date until graduation. Clinical documents cannot
expire during the academic year; documents that must be submitted
yearly must be dated between May 1 and June 30. Students will be
assessed a late fee if clinical documents are not received by the due date.
Students will be dropped from nursing courses if documentation is not
received by the first day of class. Additional costs associated with the
program include, but are not limited to, simulation laboratory fees, fees
associated with program requirements, and attendance at professional
meetings.

Honors-in-Major Program

The Honors-in-Major Program is offered to interested junior nursing
students who achieve a minimum grade-point average of 3.75 in NURS
courses and cumulative GPA of 3.4 at the end of the sophomore year
in nursing and/or junior nursing students who are members of the
University Honors Program. A total of 18 credits taken at the honors level
is required for the Honors-in-Major Program. Orientation to the Honors-in-
Major Program is held at the beginning of junior nursing year. In addition
to NURS 641 Translating Research for Practice, 4 credits taken at the
honors level, students must successfully complete with a grade of B or
better 8 additional credits of honors coursework drawn from the following
courses:
Select two courses from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

These self-directed learning experiences, related to the student’s interests, are designed to help students acquire advanced knowledge and skills to undertake inquiry or scholarly projects. Students must submit a project description to a faculty adviser at the beginning of the senior year. Students present the results of this study at the Nursing Inquiry Day.

Occupational Therapy (OT)

Occupational therapy enables individuals of all ages to engage in everyday activities across the life span in the areas of work, self-care, home management, and leisure. The main goal of occupational therapy is to support people as they gain or regain skills and abilities to participate effectively within their natural context. This process often involves adapting tasks or an environment to optimize a person's ability to fulfill his/her social roles and engage in those activities that are meaningful and support health and wellbeing. A program of studies in occupational therapy includes a foundation in the liberal arts; biological, behavioral, and health sciences; and discipline-specific studies in occupational science and occupational therapy.

The occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE).

Graduates from an accredited program are eligible to sit for the certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy, Inc. (NBCOT). After successful completion of this exam, the individual will be a registered occupational therapist (OTR). Most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT certification examination.

Occupational Therapy Major (B.S.)

https://chhs.unh.edu/occupational-therapy/program/bs/occupational-therapy-major

Description

Combined Bachelor of Science/Master of Science Program

The University of New Hampshire Department of Occupational Therapy offers a combined bachelor’s degree/master’s degree program. The Professional Master’s Degree Program is accredited by the Accreditation Council for Occupational Therapy Education (mailing address: ACOTE, C/o Accreditation Department, American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449; telephone: 301-652-6611 X2914; website: www.acoteonline.org (http://www.acoteonline.org). Students must complete the professional master’s degree in occupational therapy to be eligible to take the National Board Certification of Occupational Therapists examination, which is required to practice as an occupational therapist. Students may enter as first-year students or transfer within UNH into the BS/MS program during the sophomore year, space permitting in the program. Students interested in transferring into this program should contact the Department of Occupational Therapy for information about transfer requirements and application deadlines.

Requirements

Students begin the BS/MS curriculum with preprofessional courses, which include courses in biological and social sciences as well as occupational therapy. In addition to meeting the University Discovery Program requirements, students take the following courses during the first three years of the program.

Total Credits 47-48

1 This course also fulfills the writing intensive in major course.

At the end of the senior year, students are awarded a bachelor of science degree in occupational science. Students then apply to the Graduate School as advanced-standing students in the professional master’s program. An overall minimum grade point of 3.0 is required for admission to the master’s degree program, and students must attain a minimum grade of B- in all OT classes, and meet professional behavior expectations. Students must have no more than 8 credits of B- coursework in OT 700-level courses. Please refer to the Graduate Catalog for additional information about the master’s program and the final 1.5 years (three semesters) of the professional occupational therapy curriculum including fieldwork requirements.

Students entering as first-year undergraduate students have 5.5 academic years (11 semesters) to complete the professional curriculum, including level II fieldwork. They then will be eligible to sit for the certification examination administered by the National Board of Certification of Occupational Therapists (NBCOT). A felony conviction may affect a graduate’s ability to complete fieldwork, sit for the NBCOT certification examination, and/or obtain state licensure.

Students are responsible for transportation to off-campus practicum and fieldwork locations.

Curriculum review and revision is undertaken annually. The department works closely with students during academic advising sessions and shares information about any policy and requirement changes during registration periods as well as throughout the academic year. Students also are expected to take an active role in verifying expectations and should check with their department advisers each September for updated policies and requirements. Program requirements and policies for retention in the major are in the OT Department Policy and Procedure Manual, which is available online.

(Details on satisfying these requirements are provided by the student’s academic adviser and are outlined in the OT Department Policy and Procedure Manual. All students receive a copy of the manual in their first year, and it is also available on the OT student organization site online.)

Volunteer or work experience in a health and human service organization is recommended, although not required.

Students should work with their advisor to identify an experiential learning/occupation-based learning course. This is a course that requires cognitive learning that is translated into a motor skill. Many courses can meet this requirement.

### Professional Curriculum

Students in the BS/MS curriculum with a GPA of 3.0 or higher transition into the professional program during their undergraduate education. The following courses are required.

Disabilities Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/disabilities

Description

About the Program

The purpose of the interdisciplinary disability minor is to prepare undergraduate students to apply their unique disciplinary skills to work with and support individuals with disabilities and their families to become fully engaged members of their communities, and to improve their quality of life. The minor also helps to prepare students to work in an interdisciplinary service delivery environment. A secondary purpose is to create a core group of interdisciplinary faculty to work collaboratively with students on issues related to disability. The 20-credit hours curriculum consists of five to eight courses including a writing-intensive course from the student’s major. The minor offers students a unique opportunity to explore disability from several vantage points, including an overview of the disability experience, societal barriers individuals face, service delivery systems, disciplinary perspectives, current research, and relevant legislation.

Outlook

- Outdoor Adventure Leadership Minor (p. 241)

Outdoor Adventure Leadership Minor

https://chhs.unh.edu/kinesiology/program/minor/outdoor-adventure-leadership

Description

Outdoor Adventure Leadership Minor:

The purpose of the minor in Outdoor Adventure Leadership is to complement major courses of study that prepare students for professional fields that work in outdoor environments across human service, natural resources, educational, or recreation sectors. It will provide an orientation to the technical, risk management, and leadership skills required for personal preparedness and program organization involving backcountry and facilities-based adventure activities. In addition, the minor seeks to improve the standards for fieldwork in professional fields that use the outdoors by offering high-quality training that employs current risk management principles that govern engagement in outdoor activities.

Program Objectives:

- Provide the highest quality professional preparation in outdoor technical skills
- Surpass national standards so students can pursue certifications if desired
- Cultivate life-long learners who are motivated to seek continuous improvement

Please note: Additional elective courses may be added in the future as deemed appropriate and approved by disabilities studies coordinator.

Also note: Students must achieve C- or better and a 2.00 grade-point average in courses that the minor department approves. Courses taken on a pass/fail basis may not be used for a minor. No more than 8 credits used to satisfy major requirements may be used for a minor. There is no limit on the number of overlapping credits allowed between minors. Students should declare the intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean to have the minor shown on the academic record.
• Improve quality and help to reduce risks across professional fields that depend on a common skillset
• Expand participation in outdoor activities both on campus and in public and private sectors
• Enhance the experiences of future participants by emphasizing best practices that validate a range of life experiences, identities, and goals

Total Credits: 26-28

Students must earn grades of C or better in all courses. No more than 8.0 credits used by the student to satisfy major requirements may be used for the minor. At the beginning of his/her final semester, students must complete and submit a Certification of Completion of Minor form to their college dean's office.

Prerequisite: Participation in one of UNH's pre-orientation programs (CONNECT, PAWS, PROVES, Marine Immersion, etc.) is a recommended experience when taking OUT 444C AMPED UP: Social and Psychological Perspectives on Adventure in the fall semester.

Outdoor Education & Leadership

• Outdoor Education & Leadership Major (B.S.) (p. 242)

Outdoor Education & Leadership Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/outdoor-education-leadership-major

Description

The outdoor education and leadership major is an accredited, award-winning, internationally recognized program preparing students for careers in outdoor education, adventure programming, wilderness therapy, outdoor programming, and other educational/organizational settings. In addition to providing rich course content, this interdisciplinary program gives ample opportunity for practical application and field experience in the New Hampshire seacoast and White Mountains areas. Students must earn a grade of C (2.0) or better in every major course. In addition, they must complete 50 days of documented leadership experience prior to beginning a required internship. Interested students should contact the undergraduate coordinator, Nate Fitch, nate.fitch@unh.edu.

Students in outdoor education complete OUT 650B Internship in Outdoor Education & Leadership as the capstone course for the major. This course integrates the knowledge and skills learned in all previous major courses and experiences into practical applications students will use as they prepare to enter the profession. Students complete their internships at regional and national organizations upon completion of all other courses and prerequisites.

Degree Plan

Recommended Major Sequencing of Courses
This list only includes major classes. Students should be registered for, and taking an average of 16 credits per semester to be ‘on track’ to graduate in 4 years. In most semesters, this means a student will be taking Discovery or elective courses, to meet this 16 credit ‘load’.

2 Internship
The final requirement for a degree in Outdoor Education is the completion of OUT 650B Internship in Outdoor Education & Leadership, which is an internship that is a minimum of 400 hours in duration. Students will typically complete this requirement after their final semester. We encourage students to seek paid professional positions to fulfill this final requirement. Often, students’ internships lead directly to full-time jobs with their host organizations.

Recreation Management and Policy (RMP)
As the fabric of life in contemporary society grows in complexity, people are increasingly turning to leisure and recreation services to find meaning, renewal, and enrichment. Recreation services can improve public health
and wellness, promote sustainable environments, develop a sense of community, and enhance the quality of life of all citizens. Recreation professionals work in diverse settings, including human services, health care, natural recreation resource areas such as parks, and commercial recreation businesses. Population and economic projections suggest that recreation service industries will continue to expand and thereby continue to provide numerous professional career opportunities.

The Department of Recreation Management and Policy maintains two national accreditations. Our core is nationally accredited by the Council on Accreditation of Parks, Recreation, Tourism, and Related Professions (COAPRT). Further, our therapeutic recreation option is accredited by the Commission on Accreditation of Recreational Therapy Education (CARTE). CARTE is an approved accreditation program under the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The Department’s curriculum supports a broad-based education and an opportunity to acquire specialized professional knowledge and skills. Graduates are employed in a broad range of settings, such as community recreation agencies, resorts, conference centers, youth services agencies, hospitals, rehabilitation centers, and long-term care facilities.

**Curriculum Structure**

Students entering the major may choose either an option in Program and Event Management ("PEM"), which includes the professional core and required courses related to Program and Event Management, or the Therapeutic Recreation option ("TR"), which includes the professional core and required courses in Therapeutic Recreation. Candidates for a degree in Recreation Management and Policy must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major option.

**Professional Internship**

A supervised internship (RMP 764 Internship) is required of all majors and serves as their major capstone requirement. The internship is designed to create a bridge between theory and practical application. Students, working with their advisers and the internship coordinator, select an appropriate setting based on their professional and career interests. They must register for a 10-16 credit full-time internship that ranges from 10 to 16 weeks and is under the supervision of a qualified professional. Specific requirements are identified in the Internship Manual available from the Department of Recreation Management and Policy.

**Declaring a Major**

First-year students entering UNH who wish to apply to the Bachelor of Science (B.S.) program in Recreation Management and Policy with an option in either Program and Event Management or Therapeutic Recreation should contact the Office of Admissions. (https://admissions.unh.edu) The admissions web site contains complete campus visit information and an online visitor registration. It also contains admission criteria and important dates, as well as an online application form.

**How to apply for students transferring from within UNH**

Program and Event Management: This option prepares students for supervisory or middle management positions and emphasizes planning, leadership, and administrative concepts in settings such as youth sport organizations, recreation resource management, business and entrepreneurial recreation, municipal recreation, campus recreation, residential communities, festivals and events planning, employee services recreation, recreational sports agencies, youth service agencies, and resorts. Admission decisions are made after the student completes the online application (https://unh.az1.qualtrics.com/jfe/form/SV_3xwh78dQKCqddwx) process and has a meeting with the PEM option coordinator. If you have questions about the program and event management option, please contact Sean McLaughlin. (sean.mclaughlin@unh.edu)

PEM online internal transfer applications (https://unh.az1.qualtrics.com/jfe/form/SV_3xwh78dQKCqddwx) are accepted throughout the year and decisions are made on a rolling admission basis.

**Therapeutic Recreation:** The Therapeutic Recreation option prepares students for work primarily in clinical, allied health facilities such as hospitals, rehabilitation centers, mental health programs, and extended care facilities as well as inclusive community recreation programs. Admission decisions are based upon the content of the online application as well as a personal interview with the therapeutic recreation option coordinator. Students must have a minimum cumulative grade point average of 2.75 to be considered for admission into the major and it is highly recommended that students have completed or are enrolled in BMS 507 Human Anatomy and Physiology I or BMS 508 Human Anatomy and Physiology II at the time of application. If you have questions about the therapeutic recreation option, please contact Matt Frye (matt.frye@unh.edu).

To apply, we ask students to go through a short informational meeting with the TR Option Coordinator Matt Frye (matt.frye@unh.edu) prior to completing the online internal transfer application form (https://unh.az1.qualtrics.com/jfe/form/SV_3xwh78dQKCqddwx). TR online internal transfer applications (https://unh.az1.qualtrics.com/jfe/form/SV_3xwh78dQKCqddwx) are accepted throughout the year and decisions are made on a rolling admission basis.

**Recreation Management and Policy Major: Program and Event Management Option (B.S.)**

https://chhs.unh.edu/recreation-management-policy/program/bs/recreation-management-policy-major-program-event-management-option
## Description

This option prepares students for managerial positions in commercial, public, and nonprofit organizations that provide recreation and leisure services. Curriculum design emphasizes the effective and efficient planning, delivery, and evaluation of leisure-based programs, services, and enterprises. Applied experience is a component of most courses, in addition to a required practicum and the 10-16 week full-time internship under professional supervision. Depending upon the RMP electives and the career support emphasis or minor chosen, students may expect to find employment in a broad range of settings. Recent graduates have found employment in the areas of conference and event planning, municipal park and recreation services, recreational sports, commercial and entrepreneurial recreation businesses, youth-serving agencies, resorts, camps, and natural resource management positions in state and federal agencies.

## Core Requirements

All majors must complete a core curriculum of seven courses.

### Code | Title | Credits
--- | --- | ---
RMP 490 | Recreation and Leisure in Society | 4
RMP 501 | Recreation Services for Individuals with Disabilities | 4
RMP 557 | Program and Event Design | 4
RMP 563 | Recreation Management and Policy Practicum | 2
RMP 654 | Professional Development and Ethics | 2
RMP 724 | Grantsmanship, Evaluation, and Research | 4
RMP 764 | Internship | 10-16

1. RMP majors cannot count RMP 490 Recreation and Leisure in Society toward the University Social Sciences requirement.
2. TR Students must complete a 14-16 credit hour internship.

## Program and Event Management Option - Course Requirements:

### Code | Title | Credits
--- | --- | ---
RMP 559 | Program and Event Marketing | 4
RMP 661 | Recreation and Event Leadership | 4
RMP 663 | Recreation and Event Management | 4
RMP 772 | Law and Public Policy in Leisure Services | 4

### Statistics - select one of the following:

- **Code | Title** | **Credits**
- PSYC 402 | Statistics in Psychology | 4
- SOC 402 | Statistics | 4
- ADMN 420 | Business Statistics | 4
- MATH 439 | Statistical Discovery for Everyone | 4

### RMP Electives - select three of the following:

- **Code | Title** | **Credits**
- RMP 511 | Issues of Wilderness and Nature in American Society | 4
- RMP/OUT 515 | History of Outdoor Pursuits in North America | 4
- RMP 560 | Recreational Sport Management | 4
- RMP 593 | Special Topics (as offered) | 2-4

## Minor or Emphasis requirement

Students complete 18-20 credits of either a Minor or emphasis area of courses approved by their advisor or faculty mentor.

### Description

Therapeutic recreation utilizes recreation to assist people with disabilities or illnesses to develop and use their leisure in ways that enhance health, independence, and well-being. Therapeutic recreation recognizes the importance of quality of life and uses activities to remediate or rehabilitate functional abilities. Therapeutic recreation services are provided in a variety of settings, including hospitals, long-term care facilities, residential treatment facilities, schools, home health care, community recreation, correctional facilities, rehabilitation centers, camp and outdoor education centers, and adult day programs. Observation and applied experience is a component of several courses. Students complete a 14-16 week full-time clinical internship under the supervision of a certified therapeutic recreation specialist (CTRS). The Bureau of Labor Statistics occupational outlook reports the "employment of recreational therapists is projected to grow 13 percent from 2012 to 2022, about as fast as the average for all occupations. As the large baby-boom generation ages, they will need recreational therapists to help treat age-related injuries and illnesses, such as strokes. Recreational therapists will also be needed to help patients manage chronic conditions such as diabetes and obesity (Bureau of Labor Statistics). A CNN Money report diaries..."
identifies recreation therapy among the top ten "best jobs for saving the world." In particular, they note the profession's high benefit to society and high personal job satisfaction (CNN Money Magazine). On the job front, interested readers may also wish to review an article on Recreational Therapy published on Monster.com at https://www.monster.com/career-advice/article/recreational-therapists-help-patients-play-to-win-0615 (2015).

Upon successful completion of this option, students are prepared to meet sitting requirements for the National Council for Therapeutic Recreation Certification Examination. Students/graduates who pass the NCTRC exam and attain the CTRS are eligible to seek licensure to practice in the state of New Hampshire.

Students may be required to submit to a criminal background check.

Professional Internship

A supervised internship RMP 764 is required of all majors and serves as their major capstone requirement. The internship is designed to create a bridge between theory and practical application. Students, working with their advisers and the internship coordinator, select an appropriate setting based on their professional and career interests. They must register for a 14-16 credit full-time internship that ranges from 14 to 16 weeks and is under the supervision of a qualified professional. Specific requirements are identified in the Internship Manual available from the Department of Recreation Management and Policy.

Adolescent and Youth Development Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/adolescent-youth-development

Description

The departments of Recreation Management and Policy and Human Development and Family Studies offer an interdisciplinary minor designed to give students an opportunity to develop knowledge and skills regarding adolescence and youth development. The two required courses offer a foundation in theory, research, and practice, and students choose three additional courses in order to better prepare students to work with this age group.

Interested? Contact one of the Minor Coordinators: Dr. Cindy Hartman (cindy.hartman@unh.edu) in Recreation Management and Policy or Dr. Erin Hiley Sharp (erin.sharp@unh.edu) in Human Development and Family Studies.

Requirements

The Adolescent and Youth Development minor requires students to complete 20 credits.

The Outdoor Recreation Management (ORM) minor requires students to pursue a program that encompasses the professional social work academic standards to retain this accreditation. Social work majors must meet rigorous requirements. The Department of Social Work's undergraduate program is accredited by the Council on Social Work Education (CSWE) and must meet rigorous academic standards to retain this accreditation. No credit transfers may be used toward the minor. Courses taken on a Pass/Fail basis may not be used for the minor. No more than 8 credits used by a student to satisfy major requirements may be used for the minor. Capacity in courses may be limited. The Adolescent and Youth Development Minor follows UNH's policy on minors. Following University policy, students must complete 20 semester hours with a grade of C- or better and a 2.00 grade point average.

**Outdoor Recreation Management Minor**

https://chhs.unh.edu/recreation-management-policy/program/minor/outdoor-recreation-management

**Description**

The Department of Recreation Management and Policy offers a minor in Outdoor Recreation Management (ORM). The ORM minor is designed to provide an opportunity for students outside of the RMP major to acquire well-rounded knowledge related to the management of outdoor recreation resources and services. The ORM minor offers students a social science focused curriculum with a recreation management emphasis. The three required minor courses offer a solid foundation in recreation and leisure, outdoor recreation, and recreation resource management. Students select two additional courses from a variety of tailored and specialized offerings that allow students to focus on specific area(s) of knowledge and interest.

**Questions about the minor may be directed to:**
Dr. Michael D. Ferguson michael.ferguson@unh.edu

**Requirements**

The Outdoor Recreation Management (ORM) minor requires students to complete five total courses (20 credits).

Other adolescent or youth-based courses as approved by minor coordinator.

- RMP majors may use RMP 668 Youth Culture and Programs to meet both major and minor requirements.
- The Adolescent and Youth Development Minor follows UNH's policy on minors. Following University policy, students must complete 20 semester hours with a grade of C- or better and a 2.00 grade point average.
- No more than 8 credits used by a student to satisfy major requirements may be used for the minor.
- Students must submit a Certification of Completion of Minor form during their final semester to one of the Minor Coordinators: Dr. Cindy Hartman (cindy.hartman@unh.edu) in RMP or Dr. Erin Sharp (erin.sharp@unh.edu) in HDFS.

Please note:

- To complete the ORM minor, students must submit a Certification of Completion of Minor during their final semester at UNH to Dr. Michael D. Ferguson (michael.ferguson@unh.edu), Assistant Professor, Recreation Management and Policy.
- RMP 490 Recreation and Leisure in Society is a pre-requisite for some ORM courses.
- Students are responsible for checking prerequisite course requirements.
- Capacity in courses may be limited.
- The Outdoor Recreation Management Minor follows UNH's policy on minors. Following University policy, students must complete 20 semester hours with a grade of C- or better and a 2.00 grade point average.
- Courses taken on a Pass/Fail basis may not be used for the minor.
- No more than 8 credits used by a student to satisfy major requirements may be used for the minor.
- No transfer courses may be used toward the minor.

**Social Work (SW)**

The Department of Social Work's undergraduate program is accredited by the Council on Social Work Education (CSWE) and must meet rigorous academic standards to retain this accreditation. Social work majors pursue a program that encompasses the professional social work
competencies of professional identity, critical thinking, knowledge of diversity and human rights, social, environmental and economic justice, social welfare policy and services, social work practice with all client system sizes, human behavior in the social environment, research, and ethics.

According to the National Association of Social Workers (NASW), “The social work profession provides ethical, practical, and compassionate leadership to help people confront and resolve personal and social challenges” through their work with individuals, families, small groups, organizations, and communities. All social work majors complete a field internship under the direction of a qualified supervisor.

**Faculty**

https://chhs.unh.edu/directory/all

**Social Work Major (B.S.)**

https://chhs.unh.edu/social-work/program/bs/social-work-major

**Description**

The Department of Social Work’s undergraduate program is accredited by the Council on Social Work Education (CSWE) and must meet rigorous academic standards to retain this accreditation.

The Department of Social Work’s undergraduate program offers both a major and a minor in social work. It is a specialized degree that prepares graduates for generalist social work practice with a solid foundation in the liberal arts and in the knowledge, skills, and value base of social work. Through the mastery of core competencies, social work graduates apply their education working with individuals, families, groups, organizations, and communities. In addition, the program prepares qualified students to pursue graduate education in schools of social work and related fields.

To connect the theoretical and conceptual content of the classroom with the practice world, students must complete:

- 40 hours of volunteer service in an approved agency/program setting by the end of the semester prior to applying to the field. Twenty of the forty hours must be in the same agency/program. The remaining hours may be across multiple sites/programs. This experience may be paid or volunteer and must be pre-approved by the student’s faculty adviser. The service hours must be completed post high school and by the end of the semester prior to field application.
- Students complete a 450-hour internship over two semesters during the senior year. This is the senior capstone experience. The field placement in the final year of the baccalaureate program is arranged between the student and the field education coordinator. Students are required to pay a liability insurance fee for their off-campus field education experience. In compliance with CSWE accreditation standards, the B.S. in social work program does not grant social work course credit for life or work experience.

Social work majors earn a B.S. degree in social work. Graduates are eligible for practice in a variety of social work settings throughout the United States. In addition, qualified graduates are eligible to apply for advanced standing in M.S.W. programs that offer advanced standing. Depending upon the program, this can mean earning the M.S.W. in one calendar year versus two academic years.

**Requirements**

**Academic Program**

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of the social work major. Social work majors are required to take:

**Total Credits**  64

Students must maintain a 2.0 and earn a C or better in the 12 social work major courses. In addition, students are expected to successfully complete four additional courses as part of a liberal arts foundation for the major. Students choose one course from an approved list of courses in two different categories: anthropology/sociology and zoology and then must choose two additional courses from an approved list of diversity courses. These four courses may also satisfy University Discovery requirements. Lastly, students are required to complete 40 hours of advisor approved volunteer community service hours by junior year.

**Social Work Minor**

https://chhs.unh.edu/social-work/program/minor/social-work

**Description**

The department offers a minor in social work.

Students interested in a minor in social work should consult with the undergraduate program coordinator, Gretchen Bean, Pettee Hall, Room 241, (603) 862-4551.

---

**Requirements**

Students wishing to minor in social work are required to take:

Select any three other courses offered by the department  12

**Total Credits**  20

**Gerontology Minor**

https://chhs.unh.edu/social-work/program/minor/gerontology

**Description**

The gerontology interdisciplinary minor provides students with the opportunity to examine and evaluate the aging process as it affects the individual and society within the United States. Through a multidisciplinary course selection, students develop an understanding of aging from a variety of perspectives with a focus on how people age physically, cognitively, emotionally, and socially. Students are encouraged to analyze the historical and philosophical foundation from which policies, programs, and professional activities affecting the aged are developed, implemented, and evaluated. The purpose of this minor is to prepare students as they enter their career fields on the effects that the growing elderly population will have in every component of modern life.

**Requirements**

To complete a minor in gerontology students are required to take a minimum of 20 credits (five courses).

<table>

GERO 795 Independent Study, is not a required course but is used by students and faculty as an option for creating an individual experience relating to aging. A faculty member must approve and oversee (mentor) the student's work in GERO 795 Independent Study. Additionally, the GMM coordinator must also approve of the proposal and retain a copy. A copy of the proposal and the final copy will be kept in the student’s major academic folder.

Students who wish to discuss or find out more about the minor may contact GERO Minor Coordinator, BoRin Kim, Social Work Department (https://chhs.unh.edu/person/bo-rin-kim), Pettee Hall 317.

Sport Studies

Programs

• Sport Studies Major (B.S.) (p. 250)

Sport Studies Major (B.S.)
https://chhs.unh.edu/kinesiology/program/bs/sport-studies-major

Description

Sport Studies is an interdisciplinary major that provides a foundation for careers in the sport industry. Students may prepare for careers in school, college, and professional athletic administration/management, coaching, marketing, and sports media. The program also prepares majors for graduate study in areas such as sport law and sport psychology. Sport Studies students are encouraged to pursue a second major or minor in a complementary discipline, such as business, communications, English/journalism, or psychology.

Majors take a core of foundation courses as well as electives in applied areas such as sport marketing, athletic administration, and sport psychology. Majors must earn a grade of B- or better in SPST 565 Principles of Coaching and SPST 580 Sport Industry, and a grade of C or better in each required University and Sport Studies course. All majors must complete a minor or 20 credits of prior-approved coursework in supporting areas such as business, psychology, or education. In addition, a targeted internship experience or independent study is required. An internship experience is strongly recommended since it is often critical to career development. Interested students should consult with the undergraduate major coordinator, Heather Barber, Heather.Barber@unh.edu.

Total Credits  72

1  Select a minimum of 20 credits from other departments. All courses must be approved in advance by faculty adviser.
2  Majors must complete a minimum of 150 hours of industry experience before they can take SPST 761 Senior Seminar in Sport Studies. Students must be enrolled as a sport studies major for one full semester before taking SPST 761 Senior Seminar in Sport Studies. See adviser for details.
3  Include 4 credits of SPST 650C Internship in Sport Studies or SPST 696 Independent Study.

Internal transfers to sport studies must have a 2.5 GPA as well as a minimum grade of C in PSYC 401 Introduction to Psychology, Statistics (PSYC, SOC, DS) and a minimum grade of B- in both SPST 565 Principles of Coaching and SPST 580 Sport Industry.

Degree Plan

Recommended Major Sequencing of Courses

This list only includes major classes. Students should be registered for, and taking an average of 16 credits per semester to be ‘on track’ to graduate in 4 years. In most semesters, this means a student will be taking Discovery or elective courses, to meet this 16 credit ‘load’.

COLLEGE OF LIFE SCIENCES AND AGRICULTURE

Jon M. Wraith, Dean
Kimberly J. Babbitt, Associate Dean
Theodore E. Howard, Associate Dean

The College of Life Sciences and Agriculture (COLSA) provides students a fundamental education in the agricultural, biological, life, natural, and social sciences. Advanced technical and professional courses are offered to prepare students for graduate school or entry-level positions in their chosen field. Preparation can vary from fundamental studies of cancer cells to community service planning, resource protection to genetic engineering, and molecular biology to biotechnology.

A blend of Discovery and foundational science courses, careful selection of supportive upper level courses, and ample opportunities to engage in internships, research, and study abroad experiences ensures graduates develop the background and experiences necessary to be competitive in the job market. Potential employers include federal, state, and local governments, consulting firms and industrial organizations. Graduates are employed as watershed, soil, and natural resource managers, associates in biomedical and agricultural research laboratories, marketing analysts and extension specialists, nutrition supervisors and environmental regulators, and information educators and communication experts. Community governments employ graduates as service planners and land-use specialists, teachers in traditional education, public health technicians, and urban pest control specialists. Positions are available in private and commercial organizations in production agriculture, food processing, landscaping, agribusiness, sales, and private planning. Graduates may also pursue entrepreneurial careers.

Additionally, COLSA prepares students for advanced study in their chosen field of interest where graduate study is required for attaining their career goals.

Degrees

The college offers three undergraduate degrees: the bachelor of arts, the bachelor of science, and the bachelor of science in forestry. Some of the courses prescribed in these degree programs partially fulfill the University’s Discovery requirements. Students should see their advisers for specific information.

General Science Certification

Students majoring in biochemistry, molecular and cellular biology, biomedical science, biology, environmental conservation and sustainability, environmental sciences, forestry, wildlife and conservation biology, or zoology may seek certification to teach science at the middle, junior, or high school level.

For further information, contact the coordinator of teacher education in the Department of Education.

Academic Advising

A member of the faculty whose area of interest is closely related to the student’s is appointed as an adviser to assist the undergraduate in planning his or her academic program. Further advising is also available in the dean’s office, Rudman Hall.

Undeclared Status

Students may select a major upon entering the college or wait until registration for the sophomore year. Students who are uncertain about choosing a specific major may remain undeclared during their freshman year. In most cases, they should take the following courses, after which they should be ready to declare a major.

<table>

Undeclared freshmen should explore possible majors by taking courses in the areas or programs that interest them most. They should talk to faculty, students, and their adviser concerning requirements, job opportunities, etc. in the various programs and should be prepared to declare a major when they register for the first semester of the sophomore year.

UNH-EcoQuest New Zealand Study Abroad Program

The Department of Natural Resources and the Environment offers highly motivated students the opportunity to study abroad through the UNH-EcoQuest New Zealand applied field studies program. Students engage in a unique multidisciplinary, research-oriented program and receive grade-point average credit for a semester abroad. Four fully integrated courses (NR 660 Ecology and Biogeography of New Zealand, NR 661 Restoration Ecology and Ecosystem Management in New Zealand, NR 662 Environmental Policy, Planning and Sustainability in New Zealand, and NR 663 Applied Directed Research in New Zealand) focus on the ecological, resource management, and conservation and sustainability issues important to the natural environment, economy, and culture of New Zealand. Alternatively, students may participate in a two-course (NR 660 Ecology and Biogeography of New Zealand, NR 662 Environmental Policy, Planning and Sustainability in New Zealand for 8 credits hours) summer session. Contact Donna Dowal, (603) 862-2036.

Degrees

Bachelor of Arts

The bachelor of arts degree is available in Sustainable Agriculture and Food Systems, and Zoology. Students must accumulate 128 credits, attain a 2.0 cumulative grade-point average, satisfy Discovery requirements, and complete a foreign language requirement (see University Academic Requirements for specific B.A. language...
requirements). Check individual departmental listings for specific major requirements and minimum acceptable grades in major courses.

**Bachelor of Science**

The bachelor of science degree is available in all departments or programs. University requirements are the same as for the bachelor of arts degree, except that a foreign language is not required and minimum acceptable grades may differ in some programs. Check individual departmental or program listings for specific major requirements.

**Agribusiness**

**Programs**

- Agribusiness Minor (p. 253)

**Agribusiness Minor**

https://colsa.unh.edu/natural-resources-environment/program/minor/agribusiness

**Description**

The agribusiness minor is designed to provide students in disciplines other than environmental and resource economics with training in the economics and management of agricultural and other natural resource business firms. This program prepares students to work for private companies, governmental agencies, or nonprofit, nongovernmental organizations. Students who are interested in operating their own businesses will also find this minor very useful. The courses in the agribusiness minor emphasize the applications of economic and business management principles.

For additional information, contact John M. Halstead, Environmental and Resource Economics Program Coordinator, 168 James Hall, (603) 862-3914.

**Animal Science (ANSC)**

The undergraduate program in animal science is designed to prepare students for a variety of careers by providing strong fundamental and applied education in animal nutrition, reproduction, genetics, physiology, health, and large animal management. On-campus animal facilities available to provide practical experience with agricultural animals include the Fairchild Dairy Teaching and Research Center, the Lou and Lutza Smith Equine Center, the nearby organic dairy housed at the Burley-Demeritt Farm, two hoop barns for small livestock species, and aquaculture facilities. Program graduates may be employed in farm ownership, management, marketing, the pharmaceutical industry, agribusiness, finance, manufacturing, public relations, extension, vocational education, or consulting. The animal science B.S. is
designed for students interested in animal agriculture. Students who are considering continuing their studies through graduate school or veterinary school are advised to take the recommended additional courses in chemistry, math, and physics.

Animal Science Major (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/animal-science-major

Description

The Animal Science B.S. is designed for students interested in animal agriculture. Students who are considering continuing their studies through veterinary school are advised to take the recommended additional courses in Chemistry, Math and Physics. The Animal Science B.S. is one of many pathways for admission to veterinary school. Because admission to veterinary school is highly competitive due to the limited number of available spaces and the high standards for admission, students are advised to choose an academic program that deeply interests them. Simply taking the prerequisite courses required by veterinary schools without considering alternate career goals is not advisable.

Requirements for All Animal Science Majors

- AAS 439 Fundamentals of Animal Health 2 credits
- ANSC 406 Careers in Animal Science 1 credit
- ANSC 421 Introduction to Animal Science 4 credits

Reproduction Course

Select one of the following:

- ANSC 701 Physiology of Reproduction
- ANSC 715 Physiology of Lactation
- ANSC 724 Reproductive Management and Artificial Insemination
- BMS 702 Endocrinology

Major Electives

Select 3 electives from the following list. At least 2 electives must be at the 500 level or above. Electives less than 3 credits must be combined to equal 3 credits or more to count as 1 elective. At least one elective must be from the Experiential category.

- AAS 402 Introduction to Livestock and Poultry Management
- AAS 421 Large Animal Behavior and Handling Techniques
- AAS 423 Dairy Selection
- AAS 425 Introduction to Dairy Herd Management
- AAS 432 Introduction to Forage and Grassland Management
- AAS 434 Equipment and Facilities Management
- AAS 527 Companion Animal Diseases
- AAS 574 Dairy Cattle Disease Seminar
- ADMN 502 Financial Accounting
- ANSC 426 Equine Conformation and Lameness
- ANSC 437 Equine Handling and Care Techniques
- ANSC 504 Equine Science
- ANSC 507 Survey of Equine Training Techniques
- ANSC 510 Integration of Culture and Agriculture in Ireland: Past, Present, and Future
- ANSC 546 Animal Business Applications
- ANSC 547 Applied Equine Management
- ANSC 548 Agricultural Business Management
- ANSC 600 Field Experience
- ANSC 605 Poultry Production and Health Management
- ANSC 620 Equine Diseases
- ANSC 635 Nonprofit Management for Agriculture Business
- ANSC 650 Dairy Industry Travel Course
- ANSC 695 Supervised Teaching Experience (Course can only be used once for elective credit)
- ANSC 698 Cooperative for Real Education in Agricultural Management (CREAM) (Each semester counts as 1 elective. However, if taken in the senior year >90 credits, 1 semester can count as the capstone and 1 as an elective.)
- ANSC 701 Physiology of Reproduction
- ANSC 708 Ruminant Nutritional Physiology
- ANSC 710 Dairy Nutrition
ANSC 715  Physiology of Lactation
ANSC 724  Reproductive Management and Artificial Insemination
ANSC 725  Equine Sports Medicine
ANSC 727  Advanced Dairy Management I
ANSC 728  Advanced Dairy Management II
ANSC 750  Collaborative Farm Design and Development
ANSC 795  Investigations
ANSC 796  Equine Senior Seminar
ANSC 799  Honors Senior Thesis
BMCB 753  Cell Culture
BMS 602  Pathogenic Microbiology
BMS 623  Histology: Microscopic Cellular Structure and Function
BMS 655  Human and Animal Parasites
BMS 702  Endocrinology
BMS 703  Infectious Disease and Health
BMS 704  Pathologic Basis of Disease
BMS 705  Immunology
BMS 706  Virology
BMS 711  Toxicology
BMS 712  Grand Rounds
BMS 718  Mammalian Physiology
BUS 410  Introduction to Entrepreneurship
CMN 500  Public Speaking
CMN 600  Public Speaking as a Civic Art
EREC 411  Environmental and Resource Economics Perspectives
EREC 680  Agricultural and Food Policy
MATH 424B  Calculus for Life Sciences
PHYS 401  Introduction to Physics I
PHYS 402  Introduction to Physics II

Experiential Electives 4

ANSC 600  Field Experience
ANSC 605  Poultry Production and Health Management
ANSC 698  Cooperative for Real Education in Agricultural Management (CREAM)
ANSC 727  Advanced Dairy Management I
ANSC 728  Advanced Dairy Management II
ANSC 750  Collaborative Farm Design and Development
ANSC 795  Investigations
ANSC 799  Honors Senior Thesis

Total Credits 83

1 Students interested in graduate school should take 2 semesters of Organic Chemistry (CHEM 651/CHEM 653 and CHEM 652/CHEM 654) and one semester of General Biochemistry (BMCB 658/BMCB 659) in place of BMCB 501.

2 ENGL 501 Introduction to Creative Nonfiction, ENGL 502 Professional and Technical Writing, ENGL 503 Persuasive Writing or ENGL 419 Writing About Literature

Capstone Experience

The capstone requirement must be completed during the senior year, and may be satisfied through a course (e.g., ANSC 698 Cooperative for Real Education in Agricultural Management (CREAM), ANSC 728 Advanced Dairy Management II, ANSC 750 Collaborative Farm Design and Development, ANSC 797 Equine Capstone Experience, or ANSC 799 Honors Senior Thesis) or some form of experiential learning (e.g., mentored research projects and other special student activities).

GPA Requirements for All Students in Animal Science

Students will be required to earn a C- or better in all required courses for the animal science major to receive credit toward graduation. Students failing to do this will need to retake the course in order to receive credit.

Animal Science Major: Dairy Management Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/animal-science-major-dairy-management-option

Description

The ANSC: dairy management option is designed to provide students with solid training in areas important to the successful management of a dairy enterprise, for employment in related agribusinesses (e.g., pharmaceutical and feed industries), or for those wishing to pursue additional training leading to the M.S. or Ph.D. degree in dairy science or its related disciplines. Dairy management students receive training in areas such as nutrition, reproduction, diseases, genetics, lactation physiology, forages, agribusiness finance, personnel management, computer science, and public relations. The Fairchild Dairy Teaching and Research Center and the Burley-DeMerritt Organic Dairy Research Farm are modern dairy facilities. The Fairchild Dairy houses 85 lactating Holstein cows plus a similar number of non-lactating animals. The Burley-DeMerritt Farm houses 50 lactating Jersey cows plus a small number of non-lactating animals. For additional information and answers to questions regarding the option in dairy management, email Dr. Peter Erickson.

Animal Science Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/animal-science

Description

A minor in Animal Science consists of a minimum of 20 credits of Animal Science (ANSC) courses. No more than 7 credits may be taken in the Thompson School of Applied Science (AAS) and at the 400-level. Students must receive a minimum grade of C- in any course used for the minor. Students failing to do this will need to retake the course in order to receive credit. No courses taken on a pass (credit)/fail basis may count toward the minor. Students who transfer from other institutions may petition the animal science program faculty for course approval. No more than eight credits used to satisfy major requirements may be used for the minor.

Students wanting to declare a minor in animal science must meet with animal science minor coordinator Dr. Elizabeth Boulton DVM, DACVS as early as possible and no later than first semester of their junior year.

Students must complete a minor completion form during their final semester at UNH.

Biochemistry, Molecular and Cellular Biology Minor (BMCB)

The curriculum provides most of the required and recommended courses for students seeking admission to graduate schools and to professional schools in medicine, dentistry, veterinary medicine, or pharmacy. Students obtaining a B.S. in BMCB enjoy excellent job prospects immediately upon graduation, due to high demand for skilled research technicians in biotech and pharmaceutical companies, government agencies, academic research laboratories, and medical diagnostic laboratories. Graduates also have knowledge and skills that are valuable in the fields of management, sales, marketing, regulatory affairs, technical writing, and science journalism. Students who major in BMCB can also use their training in conjunction with advanced degrees in law and business. With additional courses in education, the B.S. degree in BMCB also qualifies graduates to teach at the elementary, junior high, or high school levels.

Faculty participating in the BMCB major combine a passion for teaching and student advising with strong expertise and achievements in their research areas. BMCB faculty are committed to providing independent research experiences for undergraduate students, and most faculty have active and well-funded research programs utilizing state-of-the-art techniques and instruments. On-campus facilities that students can use to enhance their research experience include the Hubbard Center for Genome Studies, the University Instrumentation Center, and the Center of Integrated Biomedical and Bioengineering Research.

Biochemistry, Molecular and Cellular Biology (BMCB)

The field of biochemistry, molecular and cellular biology (BMCB) encompasses a wide range of life sciences, from biophysics and biochemistry to applied biology and medicine. The B.S. in biochemistry, molecular and cellular biology is designed for students to gain a solid foundation in biology, chemistry, physics and mathematics, along with advanced knowledge in molecular biology, biochemistry, cell biology, and genetics. BMCB students have plenty of exposure to cutting-edge techniques and frontier research topics through inquiry-based learning and hands-on research opportunities. The program offers research opportunities with program faculty in the areas of structural biology, cell signaling pathways, cancer biology, gene regulation, neurobiology, cellular structure and function, proteomics and glycomics, and lipid metabolism. Graduates are "profession-ready" and well-prepared for entry-level positions in biomedical research or in the biotechnology and pharmaceutical industries, for graduate education, or for post-baccalaureate professional programs (e.g., medical school, veterinary school, dental school, etc.).

For a list of BMCB affiliated faculty, click here (https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/biochemistry-molecular-cellular-biology-major), scroll down to Explore Program Details, and view Faculty Directory.

Programs

- Biochemistry, Molecular and Cellular Biology Major (B.S.) (p. 259)
- Biochemistry, Molecular and Cellular Biology Minor (p. 262)

Faculty

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biochemistry-molecular-cellular-biology-major
The Biochemistry, Molecular & Cellular Biology (BMCB) major provides you with conceptual competence, analytical skills, and laboratory experiences to understand life at the molecular and cellular level. Your BMCB degree will prepare you for immediate employment as a research associate or for entry into graduate or professional programs in medicine, dentistry or other allied health professions, as well as other career tracks.

The BMCB program offers advanced coursework and laboratories in diverse research areas of modern biology

- Cancer biology
- Cell biology
- Cell culture & tissue engineering
- Endocrinology
- Molecular biology techniques
- Pharmacology
- Physical biochemistry
- Protein structure, function & proteomics

BMCB majors participate in experiential learning activities

- Many courses have integrated laboratory experiences to foster inquiry-based learning and to train creative and critical thinkers
- Independent research experiences are available in faculty research laboratories
- Many courses provide exposure to cutting-edge techniques and instrumentation
- Job preparation can be enhanced by internships with regional biotechnology and pharmaceutical companies
- Summer undergraduate research fellowships at U.S. or international academic institutions combine travel with research opportunities outside UNH

BMCB graduates have been successful in many careers

- Research associates and laboratory technicians
  - Biotechnology and pharmaceutical companies
  - Government agencies
  - Forensics laboratories
  - Academic research laboratories
  - Hospitals
- Science journalists and technical writers
- Healthcare
- Scientific supply companies
- Sales and marketing
- Regulatory agencies
- Primary and secondary school education (with additional coursework in education)

BMCB graduates are well prepared for post-baccalaureate education

- Masters and doctoral programs in a wide variety of disciplines
- Professional health programs
  - Medical
  - Dental
- Pharmacy
- Physician’s Assistant and other allied health programs

Note: The BMCB major is designed so you can complete all of the prerequisite courses needed to seek admission to graduate schools or health professional schools in four years.

**Requirements**

Students in the Biochemistry, Molecular and Cellular Biology (BMCB) major take eight Foundation courses, four Bioscience Core courses, five BMCB Core courses, and three Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other University academic requirements must be completed, including those for the Discovery Program (https://catalog.unh.edu/undergraduate/university-academic-requirements/discovery-program) and the University Writing Requirement. (https://catalog.unh.edu/undergraduate/university-academic-requirements/writing)

A grade of C-minus or better is required in Statistics and in all Bioscience Core, BMCB Core, and Major Elective courses.

**Biochemistry, Molecular and Cellular Biology Minor**

**Description**

Students who wish to develop focused competencies in biochemistry, molecular biology, and/or cell biology can complement their major academic program with a minor in biochemistry, molecular and cellular biology (BMCB).

**Requirements**

Complete 20 credits from the courses listed below, with a grade of C- or better. A C average (2.00) is required in courses that the minor program approves.

- No more than 8 credits used to satisfy major requirements may be used for the minor.
- 4 credits of BMCB 795 (Investigations) may be used toward the minor.
- Pass/fail courses may not be used for the minor.
- It is the student’s responsibility to complete a Certification of Completion of Minor form (http://www.unh.edu/registrar/forms/minorform.pdf) during their final semester at UNH.

**Biology**

https://colsa.unh.edu/biological-sciences

**Description**

UNH’s location and facilities provide unique opportunities for the study of biology due to its access to the seacoast, the Shoals Marine Laboratory (http://marine.unh.edu/SML), the lakes region of NH, and White Mountain National Forest. The Biology faculty strongly believe in a hands-on approach to teaching and active involvement of undergraduates in research. We have a wide range of faculty expertise, including freshwater, estuarine, ecology, physiology, neurobiology, and behavior. A Biology degree provides the background for a variety of professional positions in the public and private sectors, and provides an excellent foundation for students seeking to apply for graduate, medical, or veterinary school.
Programs

• Biology Major (B.S.) (p. 263)
• Biology Minor (p. 265)
• Plant Biology Minor (p. 265)

Faculty

https://colsa.unh.edu/biological-sciences/people

Biology Major (B.S.)

https://colsa.unh.edu/biological-sciences/program/bs/biology-major

Description

Biology is one of the most popular science majors since it provides a broad background in the biological sciences while allowing flexibility and specialization within the major. It integrates theoretical and practical (hands-on laboratory and field work) courses in different aspects of the biology of multi cellular life. It encompasses the study of structural and functional relationships of living organisms at the molecular, cellular, and organismal level, the interactions of living systems with the environment and with each other, and the evolutionary relationships of life. Our goal is to create an environment for those with a scholarly interest in the biological sciences, and to extend their understanding, awareness, and appreciation of the diversity inherent in the biological sciences. Our major is aimed at promoting an excellent education in biological sciences by involving undergraduate students in a strong interaction with faculty both in the classroom and in research laboratories.

The biology major prepares students for post graduate degrees in the biological and medical fields, and for job opportunities in industry (environmental, biomedical, pharmaceutical, and biotechnological) and governmental research, and secondary school teaching. Completion of the four-year undergraduate program plus a fifth-year internship will be necessary for biology teaching certification. Students who plan to enter medical, dental, or related professional schools are advised to confer with their faculty adviser to work the requirements for these programs into their academic majors.

Core courses in the biology major are from departments that contribute to the biological sciences community at UNH. The core curriculum consists of introductory and upper-level science courses plus seven additional courses in the biological sciences; three of these must be selected from course lists in three broad categories.

While students are advised to declare the biology major as incoming first-year students to assure adequate program planning, transfer into this major at a later stage is also possible. Several of the other biological science majors share the same biology core curriculum. For the first to two years, it is quite easy to change to or from these other majors.

Requirements

Biology Core Curriculum

The biology courses in the core curriculum constitute an integrated sequence that train students in the basic skills and concepts of knowledge inherent in the biological sciences. The biology core allows a student to obtain a broad background in biology, and in the related physical sciences and math that provide a foundation for success in understanding biological principals.

Total Credits 56

1 BIOL 400 Professional Perspectives on Biology is required only for first-year biology majors.
2 Students exploring pre-health professions should take a full year of Organic Chemistry (CHEM 651/653 and CHEM 652/654).

Biology Electives

In addition to the biology core curriculum, students must complete seven biology elective courses. One course must be taken from each of the three categories/disciplines; the other four electives can be chosen from the category lists or can be any other biological sciences course with approval of the student’s adviser. At least two of these must be courses with labs. The last four courses must be 500-level or above. There must be one animal-identified course (A) and one plant-identified course (P). One capstone experience, supervised and approved within the major, is required of all seniors. The capstone requirement is completed in the senior year, and may be satisfied by a course (C), created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). A complete list of approved courses in each category/discipline is available from the student’s adviser, the Department of Biological Sciences office, and the biology website at colsa.unh.edu/dbs/biology. (http://colsa.unh.edu/db/s/biology) Corequisite lecture and lab courses count as one course.

ZOOL 628 Marine Invertebrate Evolution and Ecology (A) 5
ZOOL 690 Evolution (C) 4
ZOOL 708 Stream Ecology 4
ZOOL 710 Elasmobranchs and Bony Fishes (A) 4
ZOOL 733 Behavioral Ecology (A, C) 4

Other Elective Options
BIO 633 Data Analysis for Life Science 4
BIO 675 Medical Botany 4
BIO 700 Current and Controversial Issues in Biology 4
BIO 711 Experimental Design & Analysis 4
BMCB 753 Cell Culture 5
BMS 602 Pathogenic Microbiology 5
& BMS 603 Pathogenic Microbiology Laboratory 4
BMS 655 Human and Animal Parasites (A) 3
BMS 703 Infectious Disease and Health 4
BMS 706 Virology 5
& BMS 708 and Virology Laboratory 4
BMS 711 Toxicology 4
HMP 501 Epidemiology and Community Medicine 4
MEFB 631 Ecotoxicology and Quantitative Reasoning 4
NSB 727 Animal Communication (A) 4
NSB 728 Research Methods in Animal Behavior (A) 4
PSYC 531 Psychobiology 4
SAFS 651 Plant Pathology (P) 4
ZOOL 610 Principles of Aquaculture 4
ZOOL 726 Conservation Behavior 4
ZOOL 750 Biological Oceanography 4

Note: It is strongly recommended that students participate in an exchange semester at another university, or in a field-oriented program or internship. There are many exchange opportunities available in which a full semester of credits toward the major may be earned. It is further recommended that students explore possibilities of one or more semesters of independent investigation (research projects). For details, students should contact their adviser. Financial support is available for most of these programs. In addition, students can explore the courses at the Shoals Marine Laboratory (SML), which provides an excellent setting for several "field-oriented" courses during the summer. Often there is financial support available for the SML programs. (See the SML website at https://marine.unh.edu/SML or the Cornell website at http://www.shoalsmarinelaboratory.org for details.)

One 600, 695, 795, or 796 experience totaling three or more credits or any two 795-796 experiences of two credits each can fulfill one course requirement in any category with adviser approval. A Petition for Academic Variance approved by the chair of the Department of Biological Sciences is required to count 795-796 experiences for more than one major-required course. Students should check the biology website.
The Minor in Plant Biology is designed to provide a broad introduction to plant biology and why plants are important to humans, while providing a framework for understanding plant diversity, function, and behavior. Two electives allow the opportunity to choose a specialized area of plant biology that is of interest. Five courses are required for completion of the minor, of which no more than two can overlap with major requirements.

**Requirements**

The requirements for the plant biology minor are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 409</td>
<td>Green Life: Introducing the Botanical Sciences</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Choose one of the following two 400-level courses that deal with plant value to humans:</td>
<td></td>
</tr>
<tr>
<td>BIOL 408</td>
<td>Plants and Civilization</td>
<td>4</td>
</tr>
<tr>
<td>SAFS 421</td>
<td>Introductory Horticulture</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Course dealing with plant biodiversity:</td>
<td></td>
</tr>
<tr>
<td>BIOL 566</td>
<td>Systematic Botany</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Choose two additional plant-based courses at the 500 level or higher, including BIOL or MEFB 795 (must be taken for 4 credits).</td>
<td>8</td>
</tr>
</tbody>
</table>

The minimum acceptable grade in these courses is a C; the average grade for these courses must be a C or better.

**Biomedical Science (BMS)**

The Biomedical Science (BMS) major focuses on fundamental concepts in biological sciences as they apply to human and animal health, medicine, and disease. Students attracted to Biomedical Science have a profound interest in human and animal physiology and diseases. The BMS major encompasses three options: Medical Laboratory Sciences (MLS), Medical Microbiology (MM), and Medical and Veterinary Sciences (MVS). Each of the options in the BMS major is based on foundational and advanced courses in chemistry and the biological sciences.

BMS:MLS focuses on the laboratory diagnosis of human disease, BMS:MM focuses on infectious agents and host response, and BMS:MVS focuses on health and manifestations of disease in animals, including humans.

Faculty in the BMS major have expertise in many areas of biomedical science, including physiology, cell biology, infectious diseases, veterinary pathology, and laboratory medicine. The biomedical science faculty strongly encourage students to complement their academic courses with experiential learning opportunities through internships, field experience, and independent research projects conducted with biomedical research faculty. On-campus facilities include state-of-the-art research and teaching laboratories and the New Hampshire Veterinary Diagnostic Laboratory (https://nhvdl.unh.edu) (NHVDL) that provide unique learning opportunities for students interested in veterinary medicine, pathobiology, and laboratory diagnostics.

There is high demand for skilled biomedical scientists as research technicians in biotechnology companies, pharmaceutical companies,
government agencies, forensics, academic research laboratories, and hospitals, so BMS majors enjoy excellent job prospects upon graduation. The BMS curriculum also provides graduates with the required and recommended courses for admission to most graduate schools and professional schools of medicine, veterinary medicine, dentistry, public health, and pharmacy, as well as to physician assistant and pathologist’s assistant programs. BMS graduates have a knowledge base that is valuable in the fields of sales, marketing, regulatory affairs, technical writing, patent law, and scientific journalism. With additional courses in education, the B.S. in biomedical science also qualifies graduates to teach at the elementary, junior high, or high school levels.

Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions (e.g., medical, dental, physician’s assistant, pharmacy, etc.) should visit the Pre-Professional Health Programs Advising Office (https://colsa.unh.edu/academics/pre-professional-health-advising) in Rudman Hall, Room G02. Students interested in veterinary medicine should consult the Pre-Veterinary Medicine Program (https://colsa.unh.edu/molecular-cellular-biomedical-sciences/pre-veterinary-program). While many of the prerequisite courses required by professional schools are also requirements of the biomedical science major, students should consult with their faculty advisor to create a plan of study that best prepares them for pursuing a career in one of these health professions.

- Biomedical Science Major: Medical Laboratory Sciences Option (B.S.) (p. 269)
- Biomedical Science Major: Medical Microbiology Option (B.S.) (p. 272)
- Biomedical Science Minor (p. 275)

Faculty

Biomedical Science affiliated faculty. (https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biomedical-science-major-medical-veterinary-sciences-option/#collapse_640)

Biomedical Science Major: Medical and Veterinary Sciences Option (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biomedical-science-major-medical-veterinary

Requirements

Students in the Medical and Veterinary Sciences (MVS) option take eight Foundation courses, six Bioscience Core courses, three MVS Core courses, and six MVS Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other university academic requirements must be completed, including those for the Discovery Program (https://catalog.unh.edu/undergraduate/university-academic-requirements/discovery-program)
and the University Writing Requirement (https://catalog.unh.edu/undergraduate/university-academic-requirements/writing).

A grade of C-minus or above is required in all courses within the major, which includes Foundation courses, Bioscience Core, BMS-MVS Core and BMS-MVS Major Electives.

Students applying to health profession schools need a full year of English. ENGL 415C, ENGL 419, ENGL 501, ENGL 502 or ENGL 503 should be taken in addition to ENGL 401. For further details, visit the Pre-Professional Health Program Advising Office (https://colsa.unh.edu/academics/pre-professional-health-advising) on-line or in person (Rudman Hall, Room G02).

### Foundation Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

BMS: MVS Capstone

The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other special student activity). The capstone requirement can only be fulfilled once a student has senior standing in the major.

**Biomedical Science Major: Medical Laboratory Sciences Option (B.S.)**

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biomedical-science-major-medical-laboratory

### Description

The Biomedical Science: Medical Laboratory Science (BMS:MLS) program provides you with the medical knowledge and understanding of diagnostic technology needed for a fulfilling career in the biomedical sciences, including as an American College of Clinical Pathology-certified Medical Laboratory Scientist.

As a Biomedical Science: Medical Laboratory Science major, you will:

- learn to determine the presence, extent, or absence of human disease through understanding the diagnostic testing that medical professionals use to make these determinations (70% of physician decisions are based on diagnostic testing results)
- obtain hands-on experience by performing immunological, biochemical, molecular, and microbiological procedures that aid in the diagnosis, treatment, and prevention of disease

Unique features of the MLS option include:

- the only 4-year degree program in NH that includes a path for students to become certified as Medical Laboratory Scientists (MLS) by the American Society of Clinical Pathology (ASCP (http://www.ascp.org)), and is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS (http://www.naacls.org))
- Certified Medical Laboratory Scientists are in high demand and easily find employment in hospitals and medical centers throughout the country
- the MLS program is affiliated with Dartmouth Hitchcock Medical Center and NorDx/Maine Medical Center

Careers or post-baccalaureate education of previous Medical Laboratory Science graduates include:

- certified medical laboratory scientists (ASCP) in diagnostic testing laboratories in hospitals and industry
- research scientists/laboratory technicians
  - biotechnology and pharmaceutical companies
  - biomedical research facilities
  - forensic laboratories
  - hospital reference laboratories
  - government public health laboratories
- secondary school educators (with additional coursework in education)
- diagnostic product development
- sales and marketing
- state and federal government agencies (e.g., U.S. Food and Drug Administration).
- professional health programs
  - medical school (https://www.unh.edu/uac/premed-advising/explore-medicine)
  - allied health programs (physician assistant (https://www.unh.edu/uac/premed-advising/explore-physician-assistant),

Total Credits: 129

---

1 GEN 604, BMS 503 & BMS 504, and BMCB 605 may be taken in other semesters, but all should be completed by the end of Fall semester in junior year.
The Medical Laboratory Sciences (MLS) program is NAACLS accredited and follows accreditation requirements. Students in this option take four Foundation courses, five Bioscience Core courses, six BMS:MLS core courses, and five Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. In addition, all other University academic requirements must be completed, including those for Discovery Program (https://catalog.unh.edu/undergraduate/university-academic-requirements/discovery-program) and the University Writing Requirement (https://catalog.unh.edu/undergraduate/university-academic-requirements/writing).

A grade of C-minus or above is required in BMS:MLS Core Courses.

### BMS-MLS Core Courses

1. CHEM 403 fulfills the Physical Science Discovery requirement
2. Students applying to health profession schools need a full year of English, a full year of Introductory Biology, and a full year of Organic Chemistry. ENGL 502 or ENGL 503 should be taken in addition to ENGL 401; CHEM 651/CHEM 653 and CHEM 652/CHEM 654 should be taken in place of CHEM 545/CHEM 546. See Pre-Professional Health Program Advising. (https://colsa.unh.edu/academics/pre-professional-health-advising)
3. Statistics fulfills the Quantitative Reasoning Discovery requirement
4. BMS 508 fulfills the Biological Science Discovery requirement, Discovery Laboratory requirement, and the Discovery Inquiry requirement
5. If BMS 721 is taken concurrently with BMS 720, it may count as one of the two required laboratory Electives. However, BMS 721 is not a Major Elective course, so five Major Electives must still be completed, at least one of which includes a lab component, plus four additional Major Electives with or without lab.

However, BMS 721 is not a Major Elective course, so five Major Electives must still be completed, at least one of which includes a lab component, plus four additional Major Electives with or without lab.

### BMS-MLS Major Electives

A total of five unique Major Electives is required. Two courses must have a Laboratory component.

The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other special student activity). The capstone requirement can only be fulfilled once a student has senior standing in the major.

## Biomedical Science Major: Medical Microbiology Option (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biomedical-science-major-medical-microbiology-option

### Description

The Biomedical Science: Medical Microbiology (BMS:MM) program explores the world of microorganisms and how they interact with both humans and animals. This major provides you with excellent academic training and laboratory experiences in the areas of microbiology, infectious disease, and public health. BMS:MM graduates are prepared for successful careers in biotechnology or public health, or entry into graduate school or health professional programs.

#### The BMS:MM program includes course work and laboratories in:

- infectious disease
- immunology
- epidemiology and community health
- molecular biology
- microbial ecology and evolution

#### Students in the BMS:MM program may participate in a variety of experiential learning activities including:

- independent research experiences in laboratories of UNH biomedical science faculty
- work at the NH Veterinary Diagnostic Laboratory located on the UNH campus
- internships at biotechnology companies in the Greater Boston area
- internships at the NH Department of Public Health Laboratories

#### BMS:MM graduates have been successful in attaining careers as:

- research scientists/laboratory technicians
  - biotechnology and pharmaceutical companies
  - academic biomedical research programs
  - brewing industry
- primary and secondary school educators (requires additional coursework in education)
- state and federal government employees
  - public health laboratories
  - regulatory agencies (e.g., U.S. Food and Drug Administration)

#### BMS:MM graduates are prepared for post-baccalaureate education in:

- professional health programs
  - medical school (https://colsa.unh.edu/academics/pre-professional-health-advising)
  - dental school (https://www.unh.edu/uac/premed-advising/explore-dentistry)
  - allied health programs (physician assistant (http://www.unh.edu/uac/premed-advising/explore-physician-assistant), pharmacist (http://www.unh.edu/uac/premed-advising/explore-pharmacy),
nursing, or pathologist’s assistant (http://www.pathassist.org) programs

- graduate programs
  - biomedical science
  - public health
  - forensic science

Requirements

Students in the Medical Microbiology (MM) option take seven Foundation courses, five Bioscience Core courses, four BMS:MM Core courses, and five BMS:MM Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other University academic requirements must be completed, including those for the Discovery Program (p. 26) and the University Writing Requirement (p. 30).

A grade of C- or better is required in all Bioscience Core, BMS:MM Core, and Major Elective courses.

</tbody>
</table>

A total of five unique major elective courses is required. At least one course must be taken in each of the following subject areas: Host-Microbe Interaction Electives, Molecular Biology Electives, and Community Electives. Two additional courses are taken from any of the major elective subject areas.

² Students applying to health profession schools need a full year of English, a full year of Organic Chemistry, and a full year of Introductory Biology. ENGL 502 or ENGL 503 should be taken in addition to ENGL 401; CHEM 651/CHEM 653 and CHEM 652/CHEM 654 should be taken in place of CHEM 545/CHEM 546.

³ MATH 424B fulfills the Quantitative Reasoning Discovery requirement.

⁴ PSYC 402 and SOC 402 are acceptable alternatives.

⁵ BIOL 411 fulfills the Biological Science Discovery requirement, Discovery Laboratory requirement, and the Discovery Inquiry requirement.

Biomedical Science Minor

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/minor/biomedical-science

Description

Students who wish to develop focused competencies in the broad area of the biomedical sciences can complement their major academic program with a minor in biomedical science (BMS).

Requirements

The minor consists of a minimum of 20 credits, no more than 8 of which can also be used to fulfill major requirements. A grade of C-minus or better is required for all courses counted towards the minor. A C average (2.00) is required in courses that the minor department approves. It is the student's responsibility to file an Intent to Minor form with the BMS minor advisor by the end of the junior year and to complete a Certification of Completion of Minor form during their final semester at UNH.

Required Courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

Community and Environmental Planning (CEP)

Community and Environmental Planning students have an appreciation for communities designed for people to live, work and play. Our students study a diverse and interconnected number of topics including perspectives in community development, fundamentals of land use planning, community economics, and natural resource conservation issues. If you want to help communities deal with problems associated with the intersection of our built and natural environments, such as economic development, transportation, affordable housing, green space and local agriculture, than a degree in Community and Environmental Planning may be the right fit for you.

https://colsa.unh.edu/natural-resources-environment

Programs

• Community and Environmental Planning Major (B.S.) (p. 276)
• Community Planning Minor (p. 277)

Faculty

https://colsa.unh.edu/natural-resources-environment/people
The Community and Environmental Planning (CEP) program is designed to provide students with the knowledge and skills to become effective community planners in the public or private sector. There are 16 courses required for the major. All of the courses are designed to give the student a diverse skill-set in planning for the sustainability of communities. CEP students are provided a solid planning background with planning courses covering local, state and regional planning topics and methods. CEP students also take foundational courses in natural resources, geographic information systems, economics, and statistics, as well as a political science course, and a social issues course. The internship requirement (CEP 794) allows the planning student to apply their knowledge in the real world for instrumental hands-on experience. Semester in the City is also an option for the internship experience. CEP students are encouraged to focus their remaining hours on skills that can enhance their CEP major such as a dual major, a minor, or study abroad.

Expected CEP Student Outcomes:

- The foundational education in planning, natural resources, economics and sustainability.
- The fundamental values of diversity, equity, justice, and protection of community and the environment.
- The ability to assess, discuss, and engage others in the problems and potential solutions associated with impacts of land use changes.
- The ability to work with community members and professionals in the design and implementation of community improvements in building and transportation while protecting natural and built resources.

Students may go on to work in the community development or community planning departments in local communities. They may also choose to work in regional planning agencies, or with a state or federal office. Other options include the private sector, such as architectural or development companies, or the non-profit sector, such as with community development corporations or conservation groups. The American Planning Association provides a certification process for community development corporations or conservation groups. The planning profession (American Institute of Certified Planners) after several years of planning experience. Students may also choose to go on to graduate studies in Community and Environmental Planning, Natural Resources Management, Public Administration, or a related field.

Courses with the prefix CEP must be completed with a C- or above (6 courses total). In addition to the CEP degree requirements (below), students must complete the University Discovery Program and the University Writing Requirements.

<tr>
<td>or INCO 505B</td>
<td>Social Innovator’s Toolbox</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credits: 64-72

1. INCO 505I Semester in the City Internship and INCO 505A Semester in the City Becoming a Problem Solver are taken as a 12-credit internship along with INCO 505B Social Innovator’s Toolbox, which fulfills the Social Issues course requirement.

CEP students are encouraged to have a study away/abroad experience, a dual degree, a minor, or focused area of study which add value to the CEP degree. Consider the following to complete the minimum of 128 credits:

- Semester in the City (if you have not done this in the CEP major)
- EcoQuest New Zealand (16 credits in electives - must qualify with EcoQuest)
- Study Away
- Study Abroad
- Minor as approved by the minor program
- Courses to round out a focus area. It is recommended that you choose upper level courses in NR and EREC.

Ecogastronomy

The Peter T. Paul College of Business and Economics and the College of Life Sciences and Agriculture offer undergraduate students the opportunity to pursue a dual major in EcoGastronomy. The dual major requires completion of the EcoGastronomy program and any other major.

The EcoGastronomy program prepares students for professions within our rapidly evolving food community—from farm to fork to nutrition and health outcomes—where ever-greater integration of agriculture, food, and nutrition requires a broad perspective and a specific blend of skills and knowledge. The dual major in EcoGastronomy is international by providing a context for studying “gastronomy” in Ascoli-Piceno, Italy.

International Experience

All students who declare the dual major in EcoGastronomy spend a full semester abroad, most likely during their junior year. Students will study in Ascoli Piceno, Italy, (spring, summer or fall semester).

Dual majors will complete a series of upper-level core courses such as history of cuisine and gastronomy, history of food, aesthetics, food law, food technology processes, cross-cultural comparisons, and language.

The study abroad credit requirement is 12 credits.

Portfolio

Students will be required to submit a portfolio annually to the director, and a cumulative portfolio to the instructor of their capstone course for final assessment.

The courses in the dual major program are multidisciplinary, taught by faculty from different departments in the University. They are designed to integrate UNH strengths in sustainable agriculture, hospitality management, and nutrition to offer a unique academic program emphasizing the interdisciplinary, international, and experiential knowledge that connects all three fields. The program is experiential by requiring students to work in the field growing food, in the kitchen preparing food, and developing the skills associated with both. They will also experience the local food cultures and get firsthand experience on the issues of food security locally, regionally, and globally.

Students who wish to declare a dual major in EcoGastronomy must have a cumulative grade-point average of 2.5; have declared, or be prepared to declare, a disciplinary major; and complete the Introduction to EcoGastronomy course (ECOG 401 Introduction to EcoGastronomy) with a grade of C or better.

ECOG 401 Introduction to EcoGastronomy is prerequisite for study abroad, ECOG 685 EcoGastronomy Study Abroad. All required classes and the elective are a pre/corequisite for the senior EcoGastronomy capstone course, ECOG 701 EcoGastronomy Capstone. Exceptions are possible with a late declaration of the dual major. All foreign experiences must be pre-approved by the EcoGastronomy director.

The completion of the dual major requires no additional credits for graduation beyond the 128 required of all UNH students. All coursework required for EcoGastronomy must be completed with a grade C or better. For information, contact the dual major in EcoGastronomy, PCBE 370Z, (603) 862-3327, ecog.info@unh.edu.

Description

The Dual Major in EcoGastronomy integrates UNH strengths in sustainable agriculture, hospitality management, and nutrition. EcoGastronomy offers a unique academic program emphasizing the interdisciplinary, international, and experiential knowledge that connects all three fields.

The EcoGastronomy Dual Major is a collaboration with the University of New Hampshire's College of Life Sciences and Agriculture, Peter T. Paul College of Business and Economics, and the Sustainability Institute.

Environmental and Resource Economics Major (B.S.)

https://colsa.unh.edu/natural-resources-environment/program/bs/environmental-resource-economics-major

Description

Students majoring in environmental and resource economics will normally concentrate in one of the following three areas: environmental and natural resource economics, agricultural economics, or community economics. One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). In addition, students must satisfy University requirements, including those for the Discovery Program.

Upon graduation, students are qualified for a wide variety of opportunities. Private business, public institutions, and government agencies currently have a strong demand for specialists trained in natural resource development; land and water use policy; natural resource and small business management; agricultural, fisheries, and forestry marketing; and community development. In many cases, students may wish to improve their qualifications by pursuing more specialized graduate studies.

https://colsa.unh.edu/natural-resources-environment/program/minor/environmental-resource-economics

**Description**

The Environmental and Resource Economics minor aims to provide students majoring in other disciplines with an understanding of environmental and resource economics, and their uses in personal, social, business and government decision-making. Students learn how to apply economic analyses in evaluating environmental and resource problems, identifying their causes and examining alternative solutions. The minor also offers courses that teach techniques useful for decision making by local and regional communities. Students also obtain skills in the management of agricultural and natural-resource business firms.

**Requirements**

**Minor Requirements**

- Complete 5 Courses with a minimum of 20 credits from the courses listed below, with a grade of C- or better.
- No more than 8 credits used to satisfy major requirements may be used for the minor.
- Pass/Fail courses may not be used for the minor.

</tbody>
</table>

1 EREC 411 cannot be used to satisfy the Social Science Discovery program requirement; or taken for credit if credit has been earned for ECON 402.

Students are encouraged to consider adding additional courses from the economics (ECON) department to their program. In special cases, students may petition to have these courses, particularly ECON 706 and ECON 726, substitute for major EREC electives.

Environmental Conservation and Sustainability

**Mission of the ECS Major**

Graduates of the environmental conservation and sustainability major understand the complexity of social-ecological systems and meet environmental challenges in innovative ways. ECS students understand ecological principles and comprehend the connections between natural resource and social systems (history, economics, law, policy, international perspectives). They integrate scientific information and human values and articulate problems in ways that point to solutions leading to a sustainable future.

ECS graduates have the theoretical, methodological, technical, and practical skills necessary to solve complex problems. They work collaboratively and across disciplinary boundaries and at all scales from the local to the international. Their critical thinking and communication skills allow them to serve as liaisons among diverse interest groups and to design, implement, and facilitate policy and action toward a sustainable future.

ECS graduates are environmental citizens, sustainability advocates, and leaders for constructive change. They typically serve as policy analysts, sustainability officers, resource managers, journalists, scientists, and teachers in business, non-profit organizations, and government agencies, including the Peace Corps and Ameri-Corps. Many ECS graduates attend graduate or professional programs following graduation.

Description

ECS Major Curriculum

The ECS major is comprised of 14 core requirements providing integrative courses in both environmental conservation and sustainability, along with a foundation in biology, ecology, physical and social science, and the basic tools and skills applied to problem solving. These core requirements are typically fulfilled in the first two years. Beginning in their junior year, ECS students, in consultation with their advisers, create a seven course focus area based on an ecological system or natural resource of their choosing. The focus area provides advanced study in ecology and natural resources; social sciences; tools, skills, and/or natural history and should reflect the student’s interests and future goals. Additionally, each ECS student completes a practicum experience and a capstone option.

The ECS major provides the opportunity for students to gain a common foundation of knowledge and skills emphasizing integration and critical thinking, while allowing for sufficient flexibility to pursue their interests and passions within a large and complex field of study. The design of the curriculum will allow each student at least four, and as many as six, free electives, which they may fulfill as they choose. Many students pursue international experiences, such as the UNH EcoQuest program in New Zealand, add a minor or dual degree (such as the dual degree in international studies), and/or pursue research opportunities with our faculty or through another of UNH’s undergraduate research opportunity programs.

BIOL 752 New England Mushrooms: a Field and Lab Exploration

Senior Capstone Options
The ECS major capstone experience may be filled by any one (1) of the following options:

Option 1:

NR 786 Leadership for Sustainability

Option 2: Both seminars must be scheduled. At least one must be taken in the senior year.
 NR 753 & NR 754 Critical Issues in Sustainability: Sustainability as an Abundance Paradigm and Critical Issues in Sustainability: Sense of Place

Option 3:

NR 663 Applied Directed Research in New Zealand (NZ Directed projects, if taken in the senior year)
Directed projects fulfilling one of the following: McNair Research Theses, Hamel Center Programs (IROP, SURF USA, SURF Abroad, etc.) may be applied in consultation with the adviser and ECS program coordinator.

Work Experience

<table>

Total Credits: 86

1. The focus area is based upon at least one course in the ecology and natural resources category, along with a combination of courses in the social sciences; tools, skills, and natural history categories; and any additional courses from the ecology and natural resources category reflecting the student's interests and future direction. Focus areas should be designed in close consultation with the adviser. Courses used to fulfill core requirements may not be used in the focus area.

2. If NR 663 Applied Directed Research in New Zealand is taken in the junior year or earlier, then one Critical Issues seminar (2cr) or Leadership for Sustainability must be taken in the senior year to fulfill the capstone requirement.

3. Each ECS major will engage in a practical experience reflecting their interests and goals. The choice of the experience will be made in conjunction with the adviser and may occur any time beginning with the sophomore year.

1. All choices for the Ecological Principles requirement except for SAFS 502 are fall courses.

2. The Statistics, Physical Science, Writing Skills and Presentation Skills requirements may be taken in either the Fall or Spring Semester of the second year.

3. Work experience, internship, etc may be scheduled any time beginning in the second year.

4. One of the 2 credit capstone seminars may be taken in either the fall or spring of the junior year.

5. One 2 credit seminar may be taken in each of the Fall and Spring semesters of the Senior Year OR NR 786 may be taken in the Fall semester of the Senior Year.
Environmental Conservation and Sustainability Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/environmental-conservation-sustainability

Description

The minor in Environmental Conservation and Sustainability allows students from diverse majors across all UNH colleges to incorporate the theory and practice of sustainable resource use into their 4-year baccalaureate studies. Students take required introductory courses in both conservation and sustainability and then can fill out their minor with choices from ecology, social science and management, and a range of advanced topics. As well, students who participate in the EcoQuest Study Abroad Program can apply their courses to the minor.

Requirements

20 credits total required

- A grade of C or better in each of the 5 courses.
- No more than 8 credits used to satisfy major requirements may be used for the minor
- Credit/fail courses may not be used for the minor.

1. NR 795 requires working with an individual ECS faculty member on a special problem/issue.

Environmental Sciences

The College of Engineering and Physical Sciences (CEPS) and the College of Life Sciences and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their advisor early if their goals include further study.

The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soil and watershed management options are both managed by the Department of Natural Resources and the Environment in COLSA.

Environmental Sciences Major: Ecosystems Option (B.S.)

https://colsa.unh.edu/natural-resources-environment/program/bs/environmental-sciences-major-ecosystems-option

Description

The College of Life Sciences and Agriculture (COLSA) and the College of Engineering and Physical Sciences (CEPS) jointly offer a bachelor of science degree in environmental sciences. Environmental science is an interdisciplinary field concerned with the interaction of biological, chemical, and physical processes that shape the environment, and control the response of natural systems to human activities. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, experience working in interdisciplinary teams to apply this understanding, and the ability to communicate effectively with both scientific and lay audiences. While in this program, students will acquire significant experience with field, laboratory and analytical methods appropriate for employment in professional environmental science positions as well as a basic understanding of environmental policy. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. Program faculty emphasize teaching and research in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, global change, hydrology, plant ecology, soil science, and water resource management among many other fields.

Employment opportunities include environmental consulting firms; educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants, the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment.

The Program has four options, and specific course requirements for the major vary by option. The ecosystems and soils and watersheds options are both managed by the Department of Natural Resources and the Environment in COLSA, and the geosystems and hydrology options are both managed by Earth Sciences in CEPS.

Environmental Sciences Major: Soil and Watersheds Option (B.S.)

https://colsa.unh.edu/natural-resources-environment/program/bs/environmental-sciences-major-soil-watersheds-option

Description

The College of Life Sciences and Agriculture (COLSA) and the College of Engineering and Physical Sciences (CEPS) jointly offer a bachelor of science degree in environmental sciences. Environmental science is an interdisciplinary field concerned with the interaction of biological, chemical, and physical processes that shape the environment, and control the response of natural systems to human activities. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, experience working in interdisciplinary teams to apply this understanding, and the ability to communicate effectively with both scientific and lay audiences. While in this program, students will acquire significant experience with field, laboratory and analytical methods appropriate for employment in professional environmental science positions as well as a basic understanding of environmental policy. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. Program faculty emphasize teaching and research in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, global change, hydrology, plant ecology, soil science, and water resource management among many other fields.

Employment opportunities include environmental consulting firms; educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants, the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment.

The Program has four options, and specific course requirements for the major vary by option. The ecosystems and soils and watersheds options are both managed by the Department of Natural Resources and the Environment in COLSA, and the geosystems and hydrology options are both managed by Earth Sciences in CEPS.

</tr>
</tbody>
</table>

Every student must complete a capstone experience senior year, or during the summer before senior year if at least 90 credit hours have been completed. A Contract form provided by the Program must be completed and signed by the student, the adviser, and the capstone mentor (faculty or off-campus) by the end of Junior Year.

Total Credits 84-85

NR 791 Preparation for Capstone - is offered every spring. While not required for graduation, it is recommended for second semester juniors who need guidance in terms of developing a capstone project and completing the Capstone Contract.
Chemistry: Choose one
CHEM 403 General Chemistry I
or CHEM 405 Chemical Principles for Engineers
or CHEM 411 Introductory Chemistry for Life Sciences

Physics: Choose one
PHYS 401 Introduction to Physics I
or PHYS 407 General Physics I

Calculus: Choose one
MATH 424B Calculus for Life Sciences
or MATH 425 Calculus I

Statistics: Choose one
BIOL 528 Applied Biostatistics I
or MATH 644 Statistics for Engineers and Scientists
or EREC 525 Statistical Methods and Applications

Geology: Choose one
ESCI 401 Dynamic Earth
or ESP 402 Earth History
or ESCI 409 Geology and the Environment

Core Courses
ESCI 534 Techniques in Environmental Sciences
NR 658 Introduction to Geographic Information Systems
ESCI 654 Fate and Transport in the Environment
or NR 602 Natural Resources and Environmental Policy
or GEOG 673 Political Ecology

Additional Requirements
40

Biology or Physics: Choose one
NR 439 Environmental Biology
or BIOL 411 Introductory Biology: Molecular and Cellular
or PHYS 402 Introduction to Physics II
or PHYS 408 General Physics II

Ecology: Choose one
NR 527 Forest Ecology
or BIOL 541 Ecology

Soils
NR 501 Studio Soils

Watersheds
NR 703 Watershed Water Quality Management

Ecosystems: Choose one
NR 751 Aquatic Ecosystems
or NR 750 Terrestrial Ecosystems
or NR 711 Wetland Ecology and Management

Soils II: Choose one
NR 761 Environmental Soil Chemistry
or NR 744 Biogeochemistry
or NR 706 Soil Ecology

Equine Studies
Mission Statement
The mission of the UNH Equine Program is to produce highly sought-after and employable graduates for the diverse equine industry; to provide students with a comprehensive, well-rounded, science-based, hands-on curriculum; and to honor our land grant heritage through offering outreach programs for the state and regional equine community.

B.S. in Equine Studies
The equine studies degree program at UNH offers a unique and well-rounded program of study to students pursuing a career in the horse industry. All students receive a background in science and business, as well as a common core of equine-specific courses that incorporate outstanding opportunities for experiential learning. Students then choose a specialization in one of three options: Equine Industry and Management, Equine Assisted Activities and Therapies, and Equine Science. This allows each student to focus on the courses most relevant to their individual educational and professional goals. Students in each option have a shared core of courses, and each student chooses 20 credits of approved electives, which allows them to further customize their studies to meet their individual needs and prepare for their personal career goals.

Equine Industry and Management
This option is designed for:

• Students interested in a traditional equine career, such as riding instruction, training, or stable management
• Students interested in a career in equine business, such as competition management, sales, marketing, or equine business management

Courses for this option include business classes and hands-on equine classes, such as teaching, training, stable management, and facility management

Equine Assisted Activities & Therapies
This option is designed for:

• Students interested in teaching therapeutic riding or other equine-assisted activities and therapies
• Students interested in an administrative career at a center conducting equine-assisted activities and therapies, such as fundraising, volunteer coordination, or management for a therapeutic riding center

This option includes classes in equine studies, equine-assisted activities and therapies, non-profit organizations, and topics related to human development and special needs. Students also prepare and test for
PATH International instructor certification, which allows them to teach therapeutic riding at any PATH International operating center.

**Equine Science**

This option is designed for:

- Students interested in a career in the scientific or technical fields within the equine industry, including nutrition, rehabilitation, reproduction, and research
- Students interested in pursuing graduate studies, including veterinary school

This option combines equine classes with a more intensive science curriculum, including animal behavior, reproduction, and nutrition.

**GPA Requirements for All Students in Equine Studies**

All students enrolled in the equine studies major will be required to receive a minimum grade of C- in all classes required for the major. Students failing to do this will need to retake the course in order to receive credit.

Equine Studies Major: Equine Industry and Management Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/equine-studies-major-equine-industry-management-option

**Description**

This option is designed for:

- Students interested in a traditional equine career, such as riding instruction, training, or stable management.
- Students interested in a career in equine business, such as competition management, sales, marketing, or equine business management.

Courses for this option include business classes and hands-on equine classes, such as teaching, training, stable management, and facility management.

In addition to the standard core courses for all Equine Studies majors, students in Equine Management take courses in anatomy and physiology, agricultural business management, nutrition, and forages. Students then select 20 approved credits to allow them to focus in the areas most relevant to their desired career. Those courses may include classes in equine and facility management, equine training, riding instruction, equine conformation, animal behavior, accounting, and marketing.

### Equine Studies Major: Equine Science Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/equine-studies-major-equine-science-option

#### Description

This option is designed for:

- Students interested in a career in the scientific or technical fields within the equine industry, including nutrition, rehabilitation, reproduction, and research.
- Students interested in pursuing graduate studies, including veterinary school.

This option combines equine classes with a more intensive science curriculum, which includes animal behavior, reproduction, and nutrition.

In addition to the standard core courses for all Equine Studies majors, students in Equine Management take courses in anatomy and physiology, chemistry, nutrition, reproduction, and statistics. Students then select 20 approved credits to allow them to focus in the areas most relevant to their desired career. Those courses may include classes in forages, equine training, animal behavior, animal rights, animal cognition, and infectious diseases. Students in this option may also use these 20 credits to take courses required to apply to veterinary school, including organic chemistry, microbiology, biochemistry, physics, and calculus.

### Dairy Program Courses

Some students pursuing veterinary school admission are interested in enrolling in courses with the UNH Dairy Program. In particular, the Cooperative Real Education in Agricultural Management (CREAM) program is a popular enrichment course. CREAM is highly competitive to get into, and equine students must take it before their senior year due to conflicts with required equine courses.

It is suggested that interested students apply to the CREAM program in their junior year. Advisors will work with selected students to modify the timeline for other courses in order to accommodate CREAM in the schedule.

Dairy Program Courses

Some students pursuing veterinary school admission are interested in enrolling in courses with the UNH Dairy Program. In particular, the Cooperative Real Education in Agricultural Management (CREAM) program is a popular enrichment course. CREAM is highly competitive to get into, and equine students must take it before their senior year due to conflicts with required equine courses.

It is suggested that interested students apply to the CREAM program in their junior year. Advisors will work with selected students to modify the timeline for other courses in order to accommodate CREAM in the schedule.
Equine Studies Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/equine-studies

Description

A minor in equine studies consists of a minimum of 20 credits of equine-related animal science courses. ANSC 402 may be counted only once for minor credit. Students MUST take either ANSC 504 Equine Science or ANSC 437 Equine Handling and Care Techniques. Students may count either ANSC 422 or ANSC 522 for minor credit, but they may not count both. Students may count either ANSC 548 or ANSC 635 for minor credit, but they may not count both. Students must receive a minimum grade of C- in any course used for the minor. Students failing to do this will need to retake the course in order to receive credit. No courses taken on a pass/credit/fail basis may count toward the minor. No more than 12 credits at the 400-level may be used for the minor. Students may petition the program faculty in their junior year to include a course that is not listed. Students must take at least one course at the 600- or 700-level. Students who transfer from other institutions may petition the program faculty for course approval. Students who choose both ANSC 500 and ANSC 643 as two of their courses toward the minor in equine studies will be eligible for PATH International therapeutic riding instructor certification.

Students interested in the minor in equine studies should contact Sarah Rigg (Sarah.Rigg@unh.edu).

Forestry

Forests are central to meeting today's challenges of climate change, biodiversity, and the sustainability of rural communities and economies. The forestry program at the University of New Hampshire prepares its graduates with the scientific and managerial knowledge and skills to address these environmental and resource management problems at local, regional, and global scales.

Forestry is the art and science of managing and understanding forests, their use, and their conservation. It embraces both natural and human dimensions of sustainability. Forestry education at UNH focuses on sustainable management of forests for biodiversity, productivity, and health, based on a multidisciplinary approach. The program's goal is to
provide a sound professional preparation, a broad general education, and the flexibility to cultivate special abilities and interests. Students are encouraged to develop an area of concentration or to complete a minor in consultation with their academic adviser. The Bachelor of Science in Forestry degree (B.S.F.) at UNH is accredited by the Society of American Foresters (SAF). The SAF is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting body for forestry in the United States.

A UNH forestry degree can be the gateway to a rewarding profession. UNH forestry graduates manage forests to provide wildlife habitat and recreation opportunities, care for soil and water resources, protect and restore forest ecosystems, and assure a sustainable supply of forest products. They are employed by private industry, public agencies, public interest groups, education institutions, research organizations, and consulting firms. Many students enter graduate school for advanced study in forest biology or management while others have found exciting international opportunities.

https://colsa.unh.edu/natural-resources-environment

**Programs**

- Forestry Major (B.S.F.) (p. 295)
- Forestry Minor (p. 296)

**Faculty**

https://colsa.unh.edu/natural-resources-environment/people

**Forestry Major (B.S.F.)**

https://colsa.unh.edu/natural-resources-environment/program/bsf/forestry-major

**Description**

Forestry is an interdisciplinary profession, embracing the sustainable management of forest ecosystems for productivity, biodiversity, and health. The Forestry program's goals are to provide a solid professional preparation with a strong field component, founded in a broad general education, and with the flexibility to allow students to pursue special abilities and interests. The Bachelor of Science in Forestry (B.S.F.) degree is accredited by the Society of American Foresters.

Forestry graduates help manage and conserve public and private forests, addressing major environmental challenges including climate change, biodiversity protection, and sustainable resource management. They use science, planning, and geospatial technology to protect and restore forest ecosystems, ensure a sustainable forest product industry, provide wildlife habitat and recreational opportunities, and conserve soils and watersheds.

**Program Mission, Goals and Objectives**

The mission of UNH's Department of Natural Resources and the Environment, of which the Forestry Program is an integral part, is to serve as an educational center for the scholarly study of environmental and social sciences, and their application to the policy and management of natural resources from local to global scales. This is accomplished through education, research and outreach. This mission reflects UNH's larger mission to provide comprehensive, high-quality undergraduate programs and graduate programs of distinction, including a strong commitment to serving the public good and promoting the excitement of discovery among faculty and students.

The goal of the Forestry Program is to train natural resource professionals to sustainably manage forested landscapes for diverse objectives and in ways that balance changing social, cultural, economic, and environmental interests and priorities.

Our educational objectives are to:

1. Develop a strong knowledge base about the ecology and dynamics of forest ecosystems, including interactions between trees, wildlife, insects, soils, water, humans, and other ecosystem components.
2. Understand how different policies and management decisions affect forest dynamics over short to long time scales, and on different spatial scales.
3. Cultivate the necessary skills to manage forests for diverse objectives and to assess, respect, and balance the interests of different groups to achieve societal benefits.
4. Be able to critically evaluate scientific information and integrate this with professional experience and changing societal values to support adaptive management of forest resources.

1 NR 745 Forest Management may be used to satisfy the University’s Capstone requirement. The Capstone may also be satisfied through created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). Departments are responsible for certifying that graduating seniors have met the capstone requirement for their majors.

All forestry majors must satisfy the B.S.F. requirements and all Discovery Program requirements. Students must satisfy the inquiry requirement of the Discovery Program by completing an inquiry or inquiry-attribute course. Seniors must also satisfy the capstone experience requirement of the Discovery Program. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course (NR 745 Forest Management), created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). Departments are responsible for certifying that graduating seniors have met the capstone requirement for their majors.

### Forestry Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/forestry

#### Description

The minor in Forestry serves as a concentrated study, beyond a student’s primary major, that allows students to explore their interest in forest ecology and management, and to build skills that can help launch a career in forest conservation.

Students interested in a minor in Forestry must complete a minimum of 5 courses and 20 credits with a grade of C- or better. Pass/Fail courses may not be used for the minor. Up to 8 credits can be used to satisfy both major and minor requirements.
Genetics (GEN)

Genetics and genomics are central to all aspects of the life sciences. Genetics is the branch of biology that deals with heredity, variation of genes among individuals in a population, and the expression and regulation of genes. Genomics focuses on determining the structure and function of genomes and includes the mapping of genes, high-throughput DNA sequencing, and investigating the molecular mechanisms by which genetic and environmental factors contribute to phenotypes. Every day, scientists are using the tools of genetics and genomics to make exciting discoveries in fields such as molecular medicine, cancer research, biodiversity, and sustainability.

The Genetics (GEN) major has two options: Genetics and Genetics:Genomics. The option in Genetics provides a solid foundation in biology, biochemistry, microbiology, chemistry, physics, math, and cell biology. Students also take advanced courses in molecular genetics, bioinformatics, molecular evolution, genomics, and laboratory techniques. There are many opportunities for interested students to gain research experience through formal or informal research projects in faculty members' laboratories. The Genetics:Genomics option provides additional training in genomics, evolutionary genetics, and computer programming for bioinformatics.

The genetics faculty conduct research on diverse topics such as evolution, gene structure and function, host-microbe interactions, genome sequencing and analysis, heredity, and diversity in populations. Faculty research areas encompass microbial, plant, and animal genetics. Genetics faculty are committed to mentoring undergraduate students in independent research experiences in their laboratories, which provide students with exposure to and training in cutting-edge research technologies.

Students with degrees in genetics or genomics are well prepared to apply to graduate schools (e.g., for training as genetic counselors or researchers) or professional schools, or to pursue careers in biotechnology companies, forensics labs, hospitals, university research laboratories, or government agencies. Two additional courses are needed for application to professional programs (e.g., medical or dental school). Graduates may also be employed in fields such as management, sales, marketing, regulatory affairs, technical writing, or science journalism. With supplementary courses in education, graduates with a bachelor's degree in genetics or genomics can teach at the elementary, middle, or high school level.

Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions should visit the Pre-Professional Health Programs Advising (https://colsa.unh.edu/academics/pre-professional-health-advising) website or visit the office in person (Rudman Hall, room G02). Requirements for specific types of professional schools (e.g., medical, dental, physician assistant, pharmacy, etc.) are available from Pre-Health Advising (https://colsa.unh.edu/academics/pre-professional-health-advising/explore-health-professions). Students interested in veterinary medicine should consult the Pre-Veterinary Medicine Program (https://colsa.unh.edu/molecular-cellular-biomedical-sciences/pre-veterinary-program). Many of the prerequisite courses required by professional schools are also requirements of the genetics major, but students should consult with their faculty adviser to create a plan of study that best prepares them for pursuing a career in one of these health professions.

Genetics affiliated faculty. (https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program-bs/genetics-major/#collapse_1489)

Genetics Major (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program-bs/genetics-major

Description

The Genetics and Genetics:Genomics programs (GEN) explore the world of genetics and genomics in plants, animals, and microbes. Genetics majors are interested in understanding how DNA, along with the environment, encodes simple traits like hair color, and more complex traits like high blood pressure, diabetes, and mental illness. The Genetics faculty strongly value hands-on learning and many GEN students conduct undergraduate research under the supervision of our faculty. GEN graduates are prepared for successful careers in the biotechnology fields or for entry into graduate school, genetic counseling, or health professional programs.
The Genetics program offers course work and laboratories in:

- molecular genetics
- bioinformatics
- human genetics
- comparative genomics
- plant genetics
- microbial genetics and evolution
- population and evolutionary genetics

Students in the Genetics program may participate in a variety of experiential learning activities including:

- independent research experiences in laboratories of UNH faculty
- work at the Hubbard Center for Genome Studies (https://hcgs.unh.edu) or Research Computing Center (https://www.unh.edu/research/support-units/research-computing-center)
- internships at biotechnology companies in the Greater Boston area
- internships with genetics counselors at area medical centers

GEN graduates have been successful in attaining careers as:

- research scientists and laboratory technicians in
  - biotechnology and pharmaceutical companies
- academic research programs
- forensics
- biomedical research centers & medical schools
- government agencies
- educators
- genetic counselors
- technical support associates

GEN graduates are prepared for further education in:

- professional health programs
  - genetic counseling
  - medical school (https://colsa.unh.edu/academics/pre-professional-health-advising)
  - dental school
  - allied health programs (physician assistant (https://colsa.unh.edu/academics/pre-professional-health-advising/explore-health-professions), pharmacist (https://colsa.unh.edu/academics/pre-professional-health-advising/explore-health-professions), nursing (https://chhs.unh.edu/nursing/direct-entry-masters-nursing) or pathologist's assistant (http://www.pathassist.org) programs)
  - veterinary school (https://colsa.unh.edu/molecular-cellular-biomedical-sciences/pre-veterinary-program)
- graduate programs
  - Genetics and Genomics
  - Integrative Biology
  - Neurogenomics
  - Molecular Biology
  - Microbiology
  - Environmental Sciences
  - Public Health
  - Computer Science

Requirements

Students majoring in genetics take seven Foundation courses, six Bioscience Core courses, four Genetics Core courses and four Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other University requirements must be completed, including those for the Discovery Program (p. 26) and the University Writing Requirement (p. 30).

A grade of C-minus or better required in Statistics and all Biological Science Foundation, Genetics Core, and Major Elective courses.

Approved GEN Capstone Courses

The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, a created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other approved student activity). The capstone requirement can only be fulfilled once a student has senior standing in the major.

### Major Electives

A total of five unique major electives is required: GEN 712, GEN 721, two courses from the population or evolutionary genetics elective group, and one course from the bioscience major elective group.

### Requirements

Students majoring in Genetics with the Genomics option take seven Foundation courses, six Bioscience Core courses, four Genetics Core courses and five Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. In addition, all other University requirements must be completed, including those for the Discovery Program (https://catalog.unh.edu/undergraduate/university-academic-requirements/discovery-program) and the University Writing Requirement (https://catalog.unh.edu/undergraduate/university-academic-requirements/writing).

**Approved GEN Capstone Courses**

The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other approved student activity). The capstone requirement can only be fulfilled once a student has senior standing in the major.

Genetics Minor
https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/minor/genetics

Description
Students in other majors who wish to develop a focus in the area of genetics and genomics can complement their major academic program with a minor in genetics.

Requirements

The minor consists of a minimum of 20 credits, no more than 8 of which can also be used to fulfill major requirements.

A C average (2.00) is required in courses that the minor department approves.

It is the student's responsibility to file an Intent to Minor (https://colsa.unh.edu/sites/default/files/media/2018/09/intent_to_minor_in_genetics-final_002.pdf) form with the GEN minor advisor by the end of the junior year and to complete a Certification of Completion of Minor (https://unh.app.box.com/v/minor-form) form during their final semester at UNH.

GeoSpatial Analysis

Programs

- Geospatial Analysis Minor (p. 303)

Geospatial Analysis Minor
https://colsa.unh.edu/natural-resources-environment/program/minor/geospatial-analysis
Description

The geospatial analysis minor is designed for students who wish to have more learning and experience using the tools of geospatial analysis such as statistics, aerial photography, satellite imagery, and geographic information systems (GIS) as they relate to their chosen field of study. Students interested in completing the geospatial analysis minor must complete a total of 20 credits. A grade of C- or better is required in each minor course and no course can be taken pass/fail. A total of not more than 8 credits from the student’s major requirements can be counted toward the minor.

Total Credits 20

Students with questions about the minor or who would like more information should contact Dr. Russell G. Congalton (russ.congalton@unh.edu) in the Department of Natural Resources and the Environment, (603) 862-4644.

Green Real Estate

Programs

- Green Real Estate Minor (p. 304)

Green Real Estate Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/green-real-estate

Description

The green real estate minor will include the basic fundamentals of real estate (a class which is accredited by the New Hampshire Real Estate Commission). Students will learn about local and regional planning, environmental economics and market forces, and environmental issues as they pertain to real estate. In addition, students may choose complementary classes, such as architecture, surveying, land design, soils, wetland delineation, law, etc. Students must complete five courses (18 to 20 credits), get a C- or better in each course, and maintain a 2.0 average or better.

Marine, Estuarine, and Freshwater Biology (MEFB)
The marine, estuarine, and freshwater biology (MEFB) B.S. program is designed to provide a broad background for undergraduates interested in marine, estuarine, and freshwater biology, aquaculture, and fisheries. The program integrates theoretical and practical (hands-on laboratory and field) courses. Students are encouraged to become involved in one or more of the numerous undergraduate research opportunities available in the marine, estuarine, and freshwater sciences.

UNH is located on a seacoast that provides an extraordinary diversity of marine and estuarine habitats. It is also only a short distance from mountain streams, rivers, marshes, bogs, ponds, and lakes. All of the habitats provide outstanding resources for field courses and research. The marine, estuarine, and freshwater faculty are spread across all four departments of the College of Life Sciences and Agriculture. UNH is a Sea Grant university and has an international reputation for teaching and research in aquatic sciences. UNH has aquaculture facilities, and coastal and estuarine research laboratories. In collaboration with Cornell, UNH jointly administers the summer undergraduate programs at the Shoals Marine Laboratory on Appledore Island, seven miles off the coast of New Hampshire and Maine.

Marine, Estuarine and Freshwater Biology Major (B.S.)
https://colsa.unh.edu/biological-sciences/program/bs/marine-estuarine-and-freshwater-biology

Description
The Major in Marine, Estuarine and Freshwater Biology is intended to give students interested in the fields of marine and freshwater biology the background to pursue careers, including potential advanced study, in this area of biology. The major builds on a broad set of basic scientific courses represented by a core curriculum in math, chemistry, physics and biology. The background in basic science is combined with a series of required and elective courses in the aquatic sciences from watershed to ocean. The goal is to provide a solid foundation of knowledge in freshwater, estuarine and marine biology while having the flexibility to focus on particular areas of scientific interest from molecular biology to ecosystem studies. Students will have the opportunity to specialize in areas of their own interest, such as aquaculture and fisheries, animal behavior or ecological restoration.

The University’s location and facilities provide unique opportunities for the study of aquatic organisms and systems due to its access to the seacoast and the lakes region of New Hampshire, White Mountain National Forest, and the presence of three coastal marine and estuarine laboratories, as well as estuarine and freshwater facilities. There is a strong teaching and research emphasis on ecological and physiological processes in aquatic plants, animals and ecosystems. A major strength of the program is the hands-on approach to teaching combined with an emphasis on involving undergraduate students in research.

Undergraduate Ocean Research Project (C)
Field Animal Behavior (SML)
Research in Marine Biology (SML, C)
Field Experience (C)
Undergraduate Ocean Research Project (C)
1 Courses used to satisfy MEFB major requirements may not also be used to satisfy the 3 required electives.
2 Primary focus of the project must be Marine, Estuarine and/or Freshwater. One 600 or 795 experience totaling three or more credits or any two 795 experiences of two credits each can fulfill one course requirement in any category with adviser approval. A Petition for Academic Variance approved by the chair of the Department of Biological Sciences is required to count 795 experiences for more than one major required course.
3 Year long course - 2 credits each semester
Students must complete a Capstone during their senior year. Students should consult with their advisor to determine coursework that may satisfy this requirement. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). Departments are responsible for certifying that graduating seniors have met the capstone requirement for their majors.

Courses marked with (SML) are courses taught in the summer at the Shoals Marine Laboratory.

Courses marked with (C) can be used to fulfill the Capstone requirement.

Courses listed in more than one category will satisfy requirements in only one category.

A minimum grade of C- is required in all biological science courses that are counted toward the requirements for a degree in MEFB. Students who expect to compete successfully for post-baccalaureate programs should attain a cumulative GPA of 3.0 or higher by the end of the sophomore year and maintain it at that level.

Note: It is strongly recommended that students participate in an exchange semester at another university or in a field-oriented program or internship. There are many exchange opportunities available in which a full semester of credits toward the major may be earned. In addition, students should explore the courses at the Shoals Marine Laboratory (SML), which provides an excellent setting for several "field-oriented" courses during the summer. Often there is financial support available for the SML programs (see the SML website for details http://marine.unh.edu/sml/ or the Cornell web site at www.sml.cornell.edu (http://www.sml.cornell.edu/)). It is further recommended that students explore possibilities of one or more semesters of independent investigation (research projects). For details, students should contact their adviser. Financial support is available for most of these programs.

Pre-health Professional Program
MEFB majors who wish to pursue postgraduate degrees in the health care professions should visit www.unh.edu/premed-advising (http://www.unh.edu/premed-advising). The following elective courses will be helpful in preparing for admission to post-baccalaureate programs in the health professions and for their required aptitude examinations: BMS 702, ZOOL 518, ZOOL 625 and ZOOL 626, BMCB 605, BMCB 751 and BMCB 752, ANSC 511 and ANSC 512.

Marine Biology Minor
https://colsa.unh.edu/biological-sciences/program/minor/marine-biology

**Description**

The Marine Biology minor is designed to provide a foundation in marine biology and related sciences to any UNH undergraduate student, with the exception of students majoring in marine, estuarine, and freshwater biology. It is offered through the Department of Biological Sciences. The minor consists of 20 credits with grades of C- or better and no pass/fail courses. No more than eight major requirement credits may be used to complete the minor. The minor consists of an introductory Marine Science course and 4 courses selected in consultation with the minor adviser.

**Requirements**

**Required**

Five courses (20 credits); two of the five courses (eight credits) can count toward the student’s major.

In addition, students are encouraged to become involved in a research project, either by working in a professor’s laboratory or by participating in the Undergraduate Ocean Research Project (TECH 797 Undergraduate Ocean Research Project).

**Neuroscience and Behavior (NSB)**

Neuroscience is one of the fastest-growing scientific fields, and the discoveries that are being made today are having an immediate and significant impact on our society. The importance of understanding animal behavior is likewise increasing, particularly in the face of a rapidly-changing environment. The B.S. in Neuroscience and Behavior is a great way for students to combine interests in neurobiology and animal behavior. The curriculum prepares students for various post-graduate degrees, including medical, veterinary, and graduate school, and we offer students a variety of opportunities to get hands-on research experience.

College of Life Sciences & Agriculture Faculty
https://colsa.unh.edu/biological-sciences/people

**Animal Behavior Minor**

https://colsa.unh.edu/biological-sciences/program/minor/animal-behavior

**Description**

This minor is designed for students who are interested in learning more about animal behavior, including the mechanisms that underlie behaviors...
and the evolutionary forces that may have shaped them. Students will also gain practical skills in the methods used to study animal behavior in laboratory and field settings.

If interested in or completing the minor, contact Dr. Daniel R. Howard in the Department of Biological Sciences, (603) 862-0242, daniel.howard@unh.edu to be included on the list of students working toward minor completion, to receive emails on special events and activities for Animal Behavior students, and/or to complete the Certification of Completion of Minor form (http://www.unh.edu/registrar/forms/minorform.pdf). This form should be completed at the beginning of your final semester. If a student is interested in using a course that he or she feels is relevant but that is not included on this list, contact Dr. Howard with details on the course and to request permission.

### Requirements

Students must earn a grade of C- or better in all courses taken for the minor. No more than 8 credits taken for the minor may be used toward a student's major.

### Neuroscience and Behavior Major (B.S.)

https://colsa.unh.edu/biological-sciences/program/bs/neuroscience-and-behavior-major

### Description

The major in neuroscience and behavior (NSB) offers an interdisciplinary approach to human and non-human behavior, focusing on the evolution and adaptiveness of certain behaviors, as well as their underlying neural mechanisms. Students who have always been fascinated by how the brain functions will be well served by this major, as will those who love wild animals and wish to better understand their behavior. The B.S. in neuroscience and behavior is based on a solid foundation in biology, chemistry, physics, statistics, and genetics (foundation courses). These are followed by a two-semester course sequence that covers the fundamentals of neuroscience and behavior. Students can then pick five or more electives focusing on areas of interest.

NSB students are encouraged to take advantage of research experiences in the laboratories of the psychology and biology faculty in the program. This provides valuable experience with cutting-edge equipment and techniques. Some students may share aspects of a larger project, whereas others may be relatively independent and design their own project under supervision. In either case, important skills are gained by the discipline of gathering data, analyzing and interpreting it, and presenting it to a broader audience.

The curriculum provides most of the requirements and recommended courses for students seeking admission to graduate school and to professional schools in medicine and veterinary medicine. Students who might choose not to go on to advanced degrees are well-prepared for employment as skilled technicians in research laboratories or, if their interests are in animal behavior, as field research assistants or animal trainers. With additional courses in education, the B.S. in NSB also qualifies graduates to teach at the elementary, junior high, and high school levels.

Faculty participating in the NSB major combine a love of teaching and student mentoring with a passion for research, and encourage student participation. Research facilities that students can use include the Integrative Animal Behavior and Ecoacoustics laboratory, the confocal imaging center, the Hubbard Center for Genomic Studies, and the many marine, freshwater, and estuarine laboratories associated with UNH programs. Students can also take summer courses at the Shoals Marine Laboratory.

### Requirements

Students majoring in NSB are required to take foundation courses in basic science, core courses, and five electives from an extensive list of courses, including some offered by other departments including biochemistry, molecular and cellular biology, and natural resources. Finally, a capstone experience is required. This may be independent research, an advanced seminar, or other special student activity. It is meant to integrate prior experience and take the student to a new level in an area of special interest.

Capstone 2

1. Both must be taken to count as one of the 5 required major electives
2. Courses that are eligible to fulfill the Capstone requirement are indicated with a (C) and must be taken senior year. You can:
   1) designate a course as a Capstone course, with additional requirements as determined by the instructor; 2) complete one semester of Capstone Research (BIOL 795, PSYC 796, or INCO 790); 3) do an honors thesis in Neuroscience (NSB 799H) or Biology or Psychology (BIOL 799 or PSYC 797/PSYC 799) or, 4) participate in an advanced graduate seminar.

NSB majors may use BIOL 411, BIOL 412, CHEM 403, CHEM 404, PHYS 401, PHYS 407 and either PSYC 402 or BIOL 528 to fulfill the Biological Sciences, Physical Sciences, Discovery Lab, and Quantitative Reasoning Discovery requirements.

Nutrition (NUTR)

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, or the biotechnology industry, or entry into post-baccalaureate professional programs such as dietetic internship, medical school, dental school, or graduate school. Nutrition faculty have expertise in clinical nutrition, sports nutrition, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult). Undergraduate students actively participate in ongoing research projects in these areas. The College Health and Nutrition Assessment Survey (CHANAS) (https://colsa.unh.edu/agriculture-nutrition-food-systems/college-health-nutrition-assessment-survey) is one resource that supports nutrition research at the University of New Hampshire.

Students pursuing the B.S. degree in Nutrition choose from one of three areas of specialization: Dietetics, Nutrition and Wellness, or Nutritional Sciences options:

The curriculum for the Dietetics option is accredited by the Academic Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). Students who complete the B.S. in Nutrition with the Dietetics option are eligible to apply for a dietetic internship, a prerequisite for becoming a registered dietitian.

Students who complete the Nutrition and Wellness option are prepared for jobs in agencies or businesses that have an emphasis on health and wellness, including schools, fitness centers, and non-profit or community organizations.

Students in the Nutritional Sciences option most often enroll in a post-graduate educational degree program (e.g., medical school, graduate school, physician assistant program, etc.) or enter the biomedical/biotechnology workplace.
Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions should visit UNH’s Pre-Professional Health Programs Advising Office. Requirements for specific types of professional schools (e.g., medical, dental, physician assistant, pharmacy, etc.) are also provided by the Pre-Professional Health Advising (https://colsa.unh.edu/academics/pre-professional-health-advising) Office. While many of the prerequisite courses required by professional schools are also requirements of the Nutrition major, you should consult with your faculty adviser to create a plan of study that best prepares you for pursuing a career in one of these health professions.

Nutrition Major (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/nutrition-major

Description

Nutrition is the study of food, the nutrients found in food, and the body’s metabolism of these nutrients to maintain and promote health. Nutrition is an interdisciplinary science based on biochemistry and physiology, but also integrates sociology, psychology, molecular biology, and genetics.

Students have three curriculum options within the major to pursue a bachelor’s degree in nutrition. The option is declared within the nutrition major after their second semester in the program. Options include:

- **Dietetics option** - is the first step to becoming a registered dietitian. The Didactic Program in Dietetics (DPD) curriculum is accredited by The Accreditation Council for Education in Nutrition and Dietetics (ACEND). It prepares you for a dietetic internship.
- **Nutrition and Wellness option** - provides a foundation in chemistry, anatomy, physiology and microbiology and includes courses on stress, wellness and exercise science. Students gain real-world experience providing hands-on nutrition and health guidance.
- **Nutritional Sciences option** - provides a comprehensive background in biology, chemistry, physiology, nutrition, biochemistry and physics, and includes courses on nutritional assessment, life cycle nutrition, nutrition and health and careers in nutrition.

The program prepares students for success by offering real-world learning opportunities throughout the curriculum. These opportunities include applied research, field experiences, internships, community engagement, and study abroad offerings. Our diverse group of faculty are dedicated to student success in and outside of the classroom. Coursework supports diverse postgraduate pathways including dietetic internships, allied health programs, medical and dental schools and graduate school. The rigorous curriculum is designed to offer a science-based foundation and foster critical-thinking and strong communication skills for future professional success of our students.

Requirements

Students take 16-18 credits per semester. All students complete foundational courses in the sciences, nutrition core courses, and additional option-specific requirements as noted in the program descriptions (i.e. Dietetics, Nutrition and Wellness, and Nutritional Sciences). Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well.

Nutrition Major: Dietetics Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/nutrition-major-dietetics-option

Description

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, sports nutrition, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult).

The curriculum for the Dietetics option is accredited by the Academic Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). Students who complete the B.S. in Nutrition with the Dietetics option are eligible to apply for a dietetic internship, a prerequisite for becoming a registered dietitian.
Requirements

A grade of C-minus or better must be earned in all NUTR courses required by the major.

Nutrition Major: Nutrition and Wellness Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems-program/bs/nutrition-major-nutrition-wellness-option

Description

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, sports nutrition, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult).

Students who complete the Nutrition and Wellness option are prepared for jobs in agencies or businesses that have an emphasis on health and wellness, including schools, fitness centers, and non-profit or community organizations.

Requirements

A minimum grade of C-minus or better must be earned in all NUTR courses required by the major.

Nutrition and Wellness Capstone Experience

One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Wellness students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 755 Treatment of Adult Obesity during their senior year.

NOTE: Both NUTR 720 Community Nutrition and NUTR 755 Treatment of Adult Obesity are required courses; one of these courses must be taken during the student’s senior year to fulfill the university’s capstone requirement.

# Nutrition Major: Nutritional Sciences Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/nutrition-major-nutritional-sciences-option

## Description

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, sports nutrition, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult).

Students in the Nutritional Sciences option most often enroll in a post-graduate educational degree program (e.g., medical school, graduate school, physician assistant program, etc.) or enter the biomedical/biotechnology workplace.

## Requirements

A minimum grade of C- or above is required in all NUTR courses required by the major.

### Nutrition Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/Minor/nutrition

#### Description

The nutrition minor is particularly suited to students interested in pursuing professional careers related to human health and wellness. The minor consists of a minimum of 20 credits, no more than 8 of which can also be used to fulfill major requirements. A C average (2.00) is required in courses that the minor department approves; a grade of C-minus or better is required in all courses to be counted toward the minor. Courses taken on a Pass/Fail basis may not be used for a minor.

Students declare the nutrition minor by submitting the Intent to Minor in Nutrition (https://colsa.unh.edu/agriculture-nutrition-food-systems/intent-minor-nutrition-form) form to the Nutrition minor advisor, preferably prior to the start of their junior year. Submission of the Intent to Minor form is required to gain registration preference in certain courses if space is available and by discretion of the instructor. To complete the minor, students submit a Certification of Completion of Minor (http://www.unh.edu/registrar/forms/MinorForm.pdf) form during their final semester at UNH.

#### Requirements

### Culinary Nutrition and Food Studies Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/Minor/culinary-nutrition-food-studies

#### Description

The Culinary Nutrition & Food Studies (CNFS) Minor provides students the ability to explore the foundation of nutritional sciences and gain a practical appreciation of the culinary arts while building an understanding of our food environment & culture as it applies to human health. The CNFS Minor offers students hands-on learning experiences in culinary arts and the flexibility to incorporate study abroad coursework via the UNH in Italy program.

The CNFS Minor may be of interest to students preparing for future careers in allied health or health promotion and who recognize the growing need for training in culinary nutrition. Dietitians, physicians, wellness coaches, nurses, and other health care providers with strong...
culinary skills will likely be better equipped to empower clients to choose and prepare healthier food choices.

1 HMGT 403 Introduction to Food Management will be considered an equivalent course to NUTR 403 Culinary Arts Skills Development

Sustainable Agriculture and Food Systems (SAFS)

The sustainable agriculture and food systems (SAFS) program offers a flexible curriculum to students seeking integrated knowledge and experiences in modern agricultural and food systems to prepare for varied careers in these fields.

Students in this program will obtain knowledge in a variety of topics including sustainable agricultural practices, the science and management of working landscapes, locally produced foods, value-added agricultural products, and the promotion of healthy eating through sustainable food production and food policies. SAFS graduates will be prepared to pursue careers in a wide range of fields including the production of food, fiber, and agricultural services; management and marketing of agricultural operations; management of working lands, landscapes and ecosystems; agriculture/food/nutrition/natural resources-related research; policy-making; and other current and emerging professions.

The program offers both a bachelor of science (B.S.) degree and a bachelor of arts (B.A.) degree. The B.A. degree offers more flexibility to take courses from a variety of disciplines or pursuing a dual degree, second major, or minor. The B.S. degree best serves those seeking a strong foundation in scientific and technical knowledge and/or who envision pursuing an advanced degree.

Sustainable Agriculture and Food Systems Major (B.A.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/ba/sustainable-agriculture-food-systems-major

Description

The Sustainable Agriculture & Food Systems B.A. provides students with a broad base of knowledge and experiences with modern agriculture and food systems. Sustainable Agriculture and Food Systems is an interdisciplinary field comprising the social, physical, and life sciences and beyond. Agriculture is key to solving many of the major challenges facing the world; such as producing food to meet the needs of an ever-growing population while conserving land, water, and soil resources.

Our students get hands-on experience in applied coursework, and we encourage our students to conduct research alongside faculty. Our students become practitioners and entrepreneurs of agricultural and food businesses, researchers and policy-makers at state/federal agencies and non-profit organizations, laboratory technicians, and agricultural educators. Some go on to obtain an advanced degree in the agricultural sciences.

Requirements

The SAFS B.A. program structure includes FOUR major components: foundation courses, courses in a student-designed emphasis area, program elective courses, and a capstone. You must earn a minimum grade of C- in all courses required for the major.

Foundation courses include 36 credits, which satisfy 5 of the University Discovery requirements.

Student-Designed Emphasis courses include 20 credits that make up a cohesive emphasis or focus area. Courses may be selected from the List of Approved Program Electives, but do not need to be on that list. An appropriate group of courses transferred from a completed 2-year program such as TSAS could serve as an emphasis area. Each student will define their emphasis area in consultation with their advisor and submit it to the SAFS program committee for approval prior to the start of their 6th semester.

Program Elective courses include 20 credits, chosen from the List of Approved Program Elective courses.

A Capstone experience must take place during the senior year. There are two capstone options: SAFS 733 Advanced Topics in Sustainable Agriculture or ANSC 750 Collaborative Farm Design and Development. Your capstone MAY be counted towards elective or emphasis credits.
Of the Student-Designed Emphasis and Program Elective courses, at least 16 credits (not counting the capstone) must be earned at the 600-700 level.

### Sustainable Agriculture and Food Systems Major (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/sustainable-agriculture-food-systems-major

#### Description

The Sustainable Agriculture and Food Systems B.S. provides students with a strong foundation in biological sciences and a broad base of knowledge and experiences with modern agriculture and food systems. Sustainable Agriculture and Food Systems is an interdisciplinary field comprising the social, physical, and life sciences and beyond. Agriculture is key to solving many of the major challenges facing the world; such as producing food to meet the needs of an ever-growing population while conserving land, water, and soil resources.

Our students get hands-on experience in applied coursework, and we encourage our students to conduct research alongside faculty. Our students become practitioners and entrepreneurs of agricultural and food businesses, researchers and policy-makers at state/federal agencies and non-profit organizations, laboratory technicians, and agricultural educators. Some go on to obtain an advanced degree in the agricultural sciences.

#### Requirements

The SAFS B.S. program structure includes FOUR major components: foundation courses, courses in a student-designed emphasis area, program elective courses, and a capstone. You must earn a minimum grade of C- in all courses required for the major.

**Foundation courses** include 36 credits, which satisfy 5 of the University Discovery requirements.

**Student-Designed Emphasis** courses include 20 credits that make up a cohesive emphasis or focus area. Courses may be selected from the List of Approved Program Electives, but do not need to be on that list. An appropriate group of courses transferred from a completed 2-year program such as TSAS could serve as an emphasis area. Each student will define their emphasis area in consultation with their advisor and submit it to the SAFS program committee for approval prior to the start of their 6th semester.

**Program Elective** courses include 20 credits, chosen from the List of Approved Program Elective courses.

A **Capstone** experience must take place during senior year. There are two capstone options: SAFS 733 Advanced Topics in Sustainable Agriculture and Food Systems and SAFS 795 Investigations.
Agriculture or ANSC 750 Collaborative Farm Design and Development. Your capstone MAY be counted towards elective or emphasis credits.

Of the Student-Designed Emphasis and Program Elective courses, at least 16 credits (not counting the capstone) must be earned at the 600-700 level.

At least 20 credits, proposed using the emphasis area declaration form (see your advisor) at least 1 year prior to planned graduation date.

Program Electives 20
Select 20 credits from the approved electives list

Senior Capstone Experience
Select one from the following:

- ANSC 750 Collaborative Farm Design and Development
- SAFS 733 Advanced Topics in Sustainable Agriculture

Total Credits 88

¹ Note: Some courses (e.g. genetics, microbiology) require CHEM 403 and CHEM 404 as a prerequisite. If you intend to take these courses, you should take CHEM 403 rather than CHEM 411.

**University Requirements**

In addition to meeting the SAFS major requirements, students must satisfy all University requirements including those that pertain to the minimum number of credits, grade-point average, writing-intensive courses, and the Discovery Program.

Brewing Minor

Description

Through completion of the brewing minor, students will gain a well-rounded knowledge of the brewing industry to complement their major field of study. This series of courses will encompass all aspects of beer brewing from agricultural production of raw ingredients to quality control and distribution of the final product. Undergraduates in any major field of study may minor in brewing.

Brewing is unique in that it requires a balanced knowledge of math, science, engineering, and business as well as an understanding of how and why the product plays an important role in society and culture. With this minor, you will learn how to integrate various fields of study together, a skill which can be applied to any career. You will also gain specific skills and knowledge for a fast growing industry.

Requirements

Minor Requirements

- Complete 5 Courses with a minimum of 20 credits from the courses listed below, with a grade of C- or better.
- No more than 8 credits used to satisfy major requirements may be used for the minor.
- Pass/Fail courses may not be used for the minor.

Code | Title | Credits
--- | --- | ---
SAFS 600 | Field Experience | 0
SAFS 601 | Fruit Crop Production | 4
SAFS 632 | Urban Agriculture | 4
SAFS 651 | Plant Pathology | 4
SAFS 670 | Systems Thinking: Land Use Capability and Sustainability | 4
SAFS 671 | Agroecology and Sustainable Land Management | 4
SAFS 672 | Pathways to Sustainable Agriculture and Food Systems | 4
SAFS 673 | Agricultural Production and Business Practice | 4
SAFS 679 | Food Production Field Experience I | 4
SAFS 680 | Food Production Field Experience II | 4
SAFS 689 | Greenhouse Management and Operation | 4
SAFS 733 | Advanced Topics in Sustainable Agriculture | 4
SAFS 740 | Aquaponics | 4
SAFS 760 | Insect Pest Management | 4
SAFS 795 | Investigations | 1-4
SAFS 799 | Honors Senior Thesis | 1-4
ZOOL 610 | Principles of Aquaculture | 4
ZOOL 772 | Fisheries Biology: Conservation and Management | 3

 breweries
Elective in Business/Finance: Choose one: 4
- ABM 407 Applied Marketing
- ABM 508 Managerial Accounting
- ACFI 501 Survey of Accounting
- ADMN 502 Financial Accounting
- ADMN 585 Marketing
- EREC 601 Agribusiness Economics and Management
- MKTG 550 Survey of Marketing
- MGT 598 Topics

Elective in Food/Culture: Choose one: 4
- HMGT 403 Introduction to Food Management
- HMGT 405 Introduction to Food and Service Management
- HMGT 771 International Wine and Beverage
- HIST 425 Foreign Cultures
- NUTR 550 Food Science: Principle and Practice

Total Credits 20

1 MGT 598 Topics: Thinking like an Entrepreneur - fulfills this elective requirement. Not offered every year.
2 HIST 425 Foreign Cultures: Beer in World History

Environmental Horticulture Minor
https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/environmental-horticulture

Description
By completing the minor in Environmental Horticulture, students will gain knowledge of several aspects of horticultural production systems. The required course provides theoretical and applied knowledge in plant science. Students will get more in-depth knowledge by taking additional coursework focused on botany, various crop production systems, or integrated pest management strategies.

Our environmental horticulture students study the science and art of cultivating plants, and the many ways that plants enhance the human experience. The cultivation of fruits, vegetables and ornamental plants is key to solving many of the major challenges facing the world; such as producing food to meet the needs of an ever-growing population while conserving land, water, and soil resources. An understanding of these challenges and potential solutions can enhance any career. A minor in environmental horticulture may complement any major field of study.

Interested students should contact Andrew Ogden in the Department of Agriculture, Nutrition, and Food Systems, (603) 862-4893.

Sustainable Agriculture and Food Systems Minor
https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/sustainable-agriculture-food-systems

Description
Upon completion of the minor in Sustainable Agriculture and Food Systems (SAFS), students will gain knowledge of several aspects of agricultural production systems. The required course provides an understanding of sustainable and organic agriculture practices, including an array of strategies to sustainably manage soil, nutrient, water, and genetic resources. Students will get more in-depth knowledge of additional aspects of sustainable agriculture by taking additional coursework focused on agricultural production, management, and/or policy.

Sustainable Agriculture and Food Systems encompasses a mixture of the natural sciences, social sciences, and business skills, plus much more. Agriculture is key to solving many of the major challenges facing the world; such as producing food to meet the needs of an ever-growing population while conserving land, water, and soil resources. An understanding of these challenges and potential solutions can enhance any career. Undergraduates in any major field of study (except SAFS) may minor in Sustainable Agriculture and Food Systems.

Certificate of Minor
During the student’s final semester, the student should fill out a Certification of Completion of Minor form and obtain the signatures of the student’s major advisor, minor advisor, and the student’s Dean’s Office.

**Total Credits** 20

1 Electives - 16 credits of elective coursework, 8 credits must be at the 600/700 level, selected from the courses listed.

Students are encouraged to discuss their intent to minor with the minor advisor as early as possible, typically no later than the end of the junior year. Not all classes are offered every year.

### Sustainable Energy Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/sustainable-energy

**Description**

The Minor in Sustainable Energy provides the flexibility and focus that allows for students to expand their exposure to the topic within the context of their own major. The goal of the program is to match the developing nature of the field with the skills needed to understand sustainable energy in the greater context of its opportunities and challenges. Courses in the minor will build on existing competencies and create an experience that provides an exposure to new the perspectives and conceptual framework that is at the core of the developing field of sustainable energy.

**Objectives**

The objectives of the Minor in Sustainable Energy are to provide students with the educational experience necessary to participate in one of the fastest growing fields of employment. Coupled with an ability to focus on meaningful employment, is our challenge to confront a changing climate; students will be given an opportunity to be a part of the solution.

**Curriculum and Requirements**

The curriculum and requirements for the minor are based on exposure to three competencies that reflect the exposure necessary to grasp the basic understanding of sustainable energy.

- **Technical** – Requires a basic understanding of the grid, energy flow, energy usage and the technologies of efficiency, generation and management of energy and generation sources.
- **Economics and Finance** – Requires a basic understanding of utility structure, energy markets and utility rate-making. An additional focus includes the business aspect of financing and projecting the cost-effectiveness of energy generation sources and fuels – including the development of innovative business models for deploying sustainable energy.
- **Policy** – Requires a basic understanding in policy-making and implementation, including a historic perspective of our utilities, incentives and subsidies and their impact on market forces. An additional focus includes the policy impacts of aspects related to sustainable energy deployment, including, interconnection, net metering and feed in tariffs and tax incentives.

**Contact Information**

Students with questions about the minor or who would like more information should contact Dr. Clayton Mitchell (clayton.mitchell@unh.edu) in the Department of Natural Resources and the Environment.

**Sustainable Energy**

- Sustainable Energy Minor (p. 322)
Tourism Management

Tourism Management Minor (p. 323)

https://paulcollege.unh.edu/hospitality-management/program/minor/tourism-management

Description

“Tourism” is the world’s largest and most diverse industry. Tourism is a composite of activities, services, and industries delivering travel experiences through transportation, accommodations, eating and drinking establishments, shops, entertainment, activity facilities (parks, sports, and amusement parks), historic sites, natural resources, among others.

The faculty of Recreation Management and Policy [RMP], Hospitality Management [HMGT], and Natural Resources and the Environment [NRE] Tourism [Tour] have bundled a number of courses for non-majors which, when combined with certain elective courses, can constitute a Minor in Tourism Management. Each of the courses offered for this minor are already offered in each of the three departments. These programs represent the three Colleges of College of Health and Human Services, Peter T. Paul College of Business and Economics, and the College of Life Science and Agriculture.

Questions about the minor may be directed to:

Recreation Management and Policy – Dr. Bob Barcelona, Bob.Barcelona@unh.edu (http://Bob.Barcelona@unh.edu)
Tourism Management – Dr. Rob Robertson, Rob.Robertson@unh.edu (http://Rob.Robertson@unh.edu)
Hospitality Management – Dr. Nelson A. Barber, nelson.barber@unh.edu (http://nelson.barber@unh.edu)

Approval of the Minor for Graduation, verification and sign-off must be coordinated with Dr. Rob Robertson.

Total Credits: 20

1 Identification of experiential learning courses.

Courses taken during study abroad maybe considered as part of the minor; prior approval of an advisor is required.

Please Note:

The courses may be taken in any order, and you are responsible for checking pre-requisites for the elective courses.

Following University policy, you must complete 20 semester hours with a grade of C- or better and a 2.0 grade point average.

Courses taken on a Pass/Fail basis may not be used toward the minor.
No more than 8 credits used by the student to satisfy major requirements may be used for the minor.

No transfer courses may be used toward the minor.

**Wildlife and Conservation Biology**

The Wildlife & Conservation Biology major provides students with the knowledge and tools to study, conserve, and manage wildlife and their habitats.

Our students combine science with their passion for nature and the outdoors. Our courses emphasize hands-on experience and place fundamental principles within an applied context. Students are encouraged to conduct research alongside faculty, and faculty actively assist students in obtaining internships.

Our students become research biologists and resource managers at state/federal agencies and non-profit organizations, conservation law officers, and environmental educators. Many go on to obtain an advanced degree.

**Description**

The Wildlife & Conservation Biology major provides students with the knowledge and tools to study, conserve, and manage wildlife and their habitats.

Our students combine science with their passion for nature and the outdoors. Our courses emphasize hands-on experience and place fundamental principles within an applied context. Students are encouraged to conduct research alongside faculty, and faculty actively assist students in obtaining internships.

Our students become research biologists and resource managers at state/federal agencies and non-profit organizations, conservation law officers, and environmental educators. Many go on to obtain an advanced degree.

**Requirements**

In addition to the Wildlife and Conservation Biology degree requirements (below), students must complete the University Discovery Program and the University Writing Requirements. Given the flexibility of this major, many students complete a minor or dual major in a second area of interest, or apply for certification by The Wildlife Society (http://wildlife.org/learn/professional-development-certification/certification-programs).

## Wildlife and Conservation Biology Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/wildlife-conservation-biology

### Description

The minor in Wildlife and Conservation Biology serves as a concentrated study, beyond a student’s primary major, that allows students to explore their interest in wildlife ecology and conservation and their passion for nature and the outdoors.

Students interested in a minor in Wildlife and Conservation Biology must complete a minimum of 5 courses and 20 credits. Up to 8 credits can be used to satisfy both major and minor requirements. A maximum of 2 EcoQuest courses may be used to satisfy requirements. Appropriate course substitutes from other study-abroad programs may also be used with permission.

Zoology (ZOOL)

The zoology majors (B.S. and B.A.) build on the common background of the biology core curriculum (two semesters of introductory biology, ecology, and genetics), with an additional six (B.A.) or seven (B.S.) courses that include morphology; physiology; three choices between courses in development, evolution, animal behavior and animal survey (ornithology, mammalogy, marine invertebrates); and one (B.A.) or two (B.S.) electives in a biological science. The B.A. also has a foreign language requirement. Zoology majors are required to achieve a 2.0 or better GPA and a minimum of C- in each biological science course. The zoology majors also require passing grades in chemistry (two semesters for the B.A. and four semesters for the B.S.), physics (one semester for the B.A. and two for the B.S.), and mathematics (calculus or biostatistics for the B.A. and both courses for the B.S.). Students will have opportunities in these majors to specialize in areas of their own interest, such as completing a minor in animal behavior.

The University's location and facilities provide unique opportunities for the study of aquatic and terrestrial animals due to its access to the sea coast and the lakes region of New Hampshire, White Mountain National Forest, and the presence of two coastal marine laboratories, as well as estuarine and freshwater facilities. There is a strong teaching and research emphasis on ecological and physiological processes in aquatic animals and ecosystems. Major strengths of the program are the hands-on approach to teaching and emphasis on involving undergraduates in research.

Zoology Major (B.A.)

https://colsa.unh.edu/biological-sciences/program/ba/zoology-major

Description

Built upon the common background of the biology core curriculum, the Bachelor of Arts (B.A.) in Zoology is designed for students to create an interdisciplinary or dual major, particularly if they want to pursue public relations, teaching, or other careers in combination with a liberal arts background. Students have more flexibility when choosing courses from the biology core and may enter this program as freshmen or transfer in from other liberal arts or science programs. Students must fulfill a foreign language requirement in lieu of one advanced elective.

New England Regional Student Program

The bachelor's degree in zoology is one of the specialized curricula recognized by the New England Board of Higher Education and participates in the New England Regional Student Program. Under this program, students from any of the New England states pay the UNH in-state tuition rate plus 75 percent.

Biological Science Electives

Select two courses

Capstone

1. Biological Sciences Electives (Biology, Zoology, BMS, BMCB, Genetics, and Natural Resources) can be used to satisfy elective requirements.

2. Students must complete a Capstone during their senior year. Students should consult with their advisor to determine coursework that may satisfy this requirement.

New England Regional Student Program

The Bachelor of Science (B.S.) in Zoology builds from the common background of the biology core curriculum to provide ample time for third- and fourth-year students to concentrate in specialized disciplines such as marine and freshwater biology, behavior, cell and developmental biology, ecology, evolution, fisheries, physiology, and neurobiology while giving students the foundation from which they can specialize in the area of zoology. Undergraduate students are encouraged to conduct field or lab-based research which helps determine advanced education disciplines for graduate studies. Many students ultimately work in the government, environmental agencies, education as well as agricultural, pharmaceutical, and biotechnology industries, where they conduct advanced research and/or teaching. Zoology majors had the second highest income and lowest unemployment rate according to data from the 2016 U.S. Census Bureau’s American Community Survey.

Biological Sciences Electives (Biology, Zoology, BMS, BMCB, Genetics, and Natural Resources) can be used to satisfy elective requirements.

2. Students must complete a Capstone during their senior year. Students should consult with their advisor to determine coursework that may satisfy this requirement.

Zoology Minor

The Zoology Minor is designed to provide a general introduction to animals and their ecology, while requiring in-depth knowledge of the diversity of at least one group (Animal Survey Course), a course dealing

Description

The Zoology Minor is designed to provide a general introduction to animals and their ecology, while requiring in-depth knowledge of the diversity of at least one group (Animal Survey Course), a course dealing
with animal structure, behavior, or physiology, and an additional animal-focused course at the 600 or higher level of the student's choice.

The Zoology minor requires five courses.

College of Life Sciences and Agriculture students: two courses in the major may be used toward the minor, as long as selected from the courses listed above.
PETER T. PAUL COLLEGE OF BUSINESS AND ECONOMICS

Deborah Merrill-Sands, Dean
Neil B. Niman, Associate Dean of Academic Programs
Victoria A. Parker, Associate Dean of Graduate Education and Faculty Administration

The Peter T. Paul College of Business and Economics (Paul College) empowers students to be mindful, dynamic leaders through rigorous academics and experiential-learning opportunities led by industry experts and researchers—creating an engaged academic and professional community. Paul College prepares students for careers in Business, Economics, and Hospitality Management. Each program has its unique disciplinary traditions and the simultaneous commitment to broad educational excellence in critical thought, communication, analytic skills, digital literacy, and ethical reasoning.

Paul College’s undergraduate curricula combine a breadth of liberal education with specifics of professional education in business administration, economics, and hospitality management. In tandem with their studies at Paul College, undergraduates enrolled in Paul College programs take part of their coursework in other colleges in the University in order to fulfill the Discovery Program requirements. Beyond those requirements, students are encouraged to elect additional courses in the arts, social sciences, humanities, mathematics, and sciences. Thus, students who complete the Paul College programs in business administration, economics, and hospitality management develop an impressive portfolio of marketable skills and knowledge base that may be applied to a variety of fields.

Accreditation

Peter T. Paul College of Business and Economics is accredited by the Association to Advance Collegiate Schools of Business (AACSB) for the degree programs of business administration and hospitality management.

Degrees

- Bachelor of Arts (B.A.) in Economics
- Bachelor of Science (B.S) in Business Administration, Analytical Economics, or Hospitality Management

For information concerning advanced degrees, see the Graduate Catalog.

Degree Requirements

Paul College degree candidates must satisfy all of the University Discovery Program requirements for graduation as well as the particular requirements of their individual major programs. Modifications tend to occur in major(option) programs during the four-year period of a student’s undergraduate career; Students are expected to conform to these changes. In addition, candidates must complete a math course (MATH 422 Mathematics for Business Applications, MATH 424A Calculus for Social Sciences, or equivalent) and an ethics course (PHIL 431 Business Ethics or equivalent). Bachelor of Science in Business Administration degree students are required to earn 136 credits. Economics majors must also satisfy specific requirements associated with the bachelor of arts degree (see bachelor of arts degree requirements).

In order to graduate, students must achieve a grade-point average of at least 2.3 (2.0 for the B.A. in economics) in the major courses and a minimum grade of C- (for ADMN 403 Computing Essentials for Business, students must obtain credit) in each major course. Course listings are provided by program, or in the case of business administration by department:

- Accounting and Finance (ACFI)
- Business Administration (ADMN)
- Decision Sciences (DS)
- EcoGastronomy (ECOG)
- Economics (ECON)
- Hospitality Management (HMG)
- Management (MGT)
- Marketing (MKTG)

Prior to attaining junior rank, students will be considered “provisional Paul” students. A minimum overall GPA of 2.3 at UNH must be maintained by all Paul students in order to remain in the College. If the minimum overall GPA drops below 2.3 during the provisional period, the student will be placed on Paul College probation for one (1) semester. Failure to achieve a minimum overall GPA of 2.3 after the probationary semester will require the student to change to a major outside Paul College.

Paul College courses may not be taken on a pass/fail basis by a student majoring in business administration, economics, or hospitality management. Any Paul College major required course (including ADMN 403 Computing Essentials for Business) in which a grade below C- is obtained must be repeated. No more than two Paul College courses may be repeated and each course may be repeated at most one time.

Students transferring into Paul College from other universities must have business, economics, and hospitality management courses reviewed and approved by the faculty through the Paul College Undergraduate Programs Office to be considered for major requirements. Transfer credit is normally granted only for 400- and 500-level courses, and normally only when the transferring institution is AACSB-accredited.

Paul College Programs

FIRE (First-year Innovation and Research Experience)

FIRE is an integrated, team-based, and game-like experience, developed for first-year students. Launched in the 2015-2016 academic year and under the direction of the Undergraduate Programs and Advising Office, this program was designed to expand upon the principles and mission of the Peer Advising program by engaging first-year students in developing habits and strategies for success. Students complete a one-credit, credit/fail course each semester (PAUL 405 Freshman Academic Experience I/PAUL 406 Freshman Academic Experience II), guided by peer mentors (selected upper-class students) and alumni. Students collaborate and compete, both individually and in teams, through academic challenges, research, and game scenarios culminating in participation at the Undergraduate Research Conference (URC).

More information can be found on the FIRE (https://paulcollege.unh.edu/fire-first-year-innovation-research-experience) webpage.

Independent Study/Internship

Juniors or seniors in high academic standing in the Paul College may elect the internship or independent study course for variable credit.
For either course, the student must secure a faculty sponsor in the area of interest and submit a written proposal prior to the start of the semester in which the project is to be undertaken. Independent study normally involves research, while internships are usually undertaken with cooperation of an off-campus organization and involve a non-routine but practical application of skills and concepts acquired in a student’s program.

Independent studies and internships require considerable self-direction and self-monitoring on the part of the student, who must be in high academic standing. Careful prior review of requirements with the undergraduate adviser and faculty sponsor is necessary. Students may earn no more than 16 credits combined in internships, independent studies, field experience, and supervised student teaching experience.

The Washington Center internship (https://www.unh.edu/washington), a semester of supervised work experience in Washington, D.C., as well as the Semester in the City internship (https://www.unh.edu/social-innovation/semesterinthecity), in Boston, are open to any major.

**International Programs**

International education is a high priority of Paul College with many Education Abroad opportunities available. Through semester abroad and short-term programs, students have the ability to immerse themselves in a variety cultural environments to better prepare for a career in a globalized business industry. Paul College students may engage in a diverse array of opportunities:

- Study abroad in countries including, but not limited to: Australia, China, Hungary, Ireland, Italy, Korea, Portugal, and Spain
- Faculty-led programs to destinations such as Ascoli Picenese, Italy; Budapest, Hungary; the Caribbean; Dominican Republic; and Dijon, France.
- International internships
- Research grant programs
- Volunteer or non-profit work

Students are encouraged to begin planning their international experiences early on in their academic careers by visiting the Paul College Undergraduate Programs and Advising Office. In most cases, students are able to take a semester abroad without losing any time towards graduation. Paul College students are highly encouraged to study abroad at schools accredited by the AACSB (Association to Advance Collegiate Schools of Business) and/or EQUIS (European Quality Improvement System). More information about international experiences can be found on the Paul College website (https://paulcollege.unh.edu/study-abroad) as well as by programs offered through UNH Global (https://www.unh.edu/global).

**Paul College Honors Program**

The Paul College Honors Program is designed to provide high achieving students with an enhanced academic experience. Students in the University Honors Program or current students in Paul College have the opportunity to apply to the program at the beginning of the second semester sophomore year. The application process is competitive and based upon grade point average, extra-curricular experiences, and student interests.

*The Program consists of the following elements:*

**Designation and Designation Workshop** (PAUL 790 Honors/The Workshop) — Students pick a course to designate as honors and work with the professor to create a special honors project related to the course. The Designation Workshop brings all honors students together to share, build upon, and ultimately present their designation work.

**Consulting Project** (PAUL 792 Honors/The Consulting Project) — Designed to broaden perspective and build a bridge to the real world, the Honors Experience matches students with small businesses across New Hampshire. With the help of the Small Business Development Center, we will identify real-world projects and give students a chance to apply their learning.

**Research Seminar** (PAUL 794 Honors/The Research Process) — The Research Seminar is dedicated to preparing students to write their honors thesis. The thesis process is broken into steps, and students complete a thesis proposal. Students will attend and discuss faculty research presented at the Paul Scholars series.

**Thesis** — The culminating experience of Paul Honors is the thesis. Students apply what they have learned and undertake their own research with the help of a faculty mentor.

**Five-Year Programs**

**Four-One Program: B.S.-M.B.A.**

After completion of the bachelor’s degree program, students may apply to the Paul College masters of business administration full-time program. This innovative curriculum is designed specifically to accelerate your progress through this highly-ranked AACSB-accredited MBA program. Details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

**Four-One Program: B.S.-M.S.A.**

The American Institute of Certified Public Accountants (AICPA), the national association of professional accountants, mandated that five years of university education be required for national certified public accountant (CPA) certification as of the year 2000. Most states have approved similar requirements for licensing/certification. The Paul College offers a five-year program designed for students who desire a professional accounting career. The program leads to the joint awarding of a bachelor of science in business administration and a master of science in accounting degree. Application for admission to this highly selective program is made in the senior year. Details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

**Paul College—Minors and Courses for Non-majors**

**Minors**

Paul College faculty has developed a group of courses for non-majors, which, when combined with certain other courses, can constitute a minor in business administration, economics, entrepreneurship, hospitality management, or leadership. A list of minor requirements is available at the Paul College Undergraduate Programs and Advising Office, Suite 101, Paul College.

**Non-majors**

Paul College also serves the needs of undergraduates elsewhere in the University, within the limits of its resources, for whom selected courses in business administration, economics, or hospitality management are desirable complements to their primary course of study. To the extent that space is available after majors have enrolled, a limited number of Paul College courses are open to non-majors who have the prerequisite...
the business program at the UNH-Manchester campus. Advance Collegiate Schools of Business (AACSB) and is separate from the program in business administration is accredited by the Association to complete University Discovery requirements. The Peter T. Paul College's a well-rounded education by selecting courses in the liberal arts and the two areas of business. At the same time, Paul College students achieve as option/major courses, which imparts students with expertise in one or their career paths. The curriculum consists of fifteen core courses as well as the honors programs.

Undergraduates are encouraged to develop an advisory relationship with one or more faculty members with whom they have mutual interests. By providing their own experience and expertise, faculty may provide additional support to students for course, program, and career selection. All students are urged to seek as much assistance as they need from appropriate sources, but are reminded that theirs is the ultimate responsibility for knowing and meeting the various academic requirements for a degree.

https://paulcollege.unh.edu/

Core Curriculum

The business administration’s core curriculum constitutes the fundamental theories, principles, concepts, and skill sets necessary for students to thrive in the professional business world. Each required core course equips students with the knowledge and skills utilized in key areas of business, while building upon their social, competitive, and analytical intelligence. The business administration program also augments its core curriculum with math, ethics, and economics.

In order to graduate, students must achieve a grade-point average of at least 2.3 in the major courses and a minimum grade of C- (for ADMN 403 Computing Essentials for Business, students must obtain credit) in each Paul College major course. Core courses are generally completed in the first five semesters of enrollment at Paul College, with the exception of ADMN 703 (capstone course):

- MATH 422 Mathematics for Business Applications, or MATH 424A Calculus for Social Sciences
- PHIL 431 Business Ethics
- ECON 401 Principles of Economics (Macro)
- ECON 402 Principles of Economics (Micro)
- ADMN 400 Introduction to Business
- ADMN 403 Computing Essentials for Business (1 credit)
- ADMN 410 Management Information Systems
- ADMN 420 Business Statistics
- ADMN 502 Financial Accounting
- ADMN 503 Managerial Accounting
- ADMN 570 Introduction to Financial Management
- ADMN 575 Behavior in Organizations
- ADMN 580 Quantitative Decision Making
- ADMN 585 Marketing
- ADMN 703 Strategic Management: Decision Making (Capstone course, satisfies capstone requirement for the University Discovery Program)

Additional requirements:

- PAUL 405 Freshman Academic Experience I
- PAUL 406 Freshman Academic Experience II
- PAUL 660 BiP-Social Intelligence Topics
- PAUL 670 BiP-Analytical Intelligence Topics
- PAUL 680 BiP-Competitive Intelligence Topics
- PAUL 690 BiP-Professional Intelligence Topics

Business Administration (ADMN)

The business administration program provides students with the pillars of a business education as well as specialized options to propel them on their career paths. The curriculum consists of fifteen core courses as well as option/major courses, which imparts students with expertise in one or two areas of business. At the same time, Paul College students achieve a well-rounded education by selecting courses in the liberal arts and the sciences from other colleges and schools in the University, including to complete University Discovery requirements. The Peter T. Paul College's program in business administration is accredited by the Association to Advance Collegiate Schools of Business (AACSB) and is separate from the business program at the UNH-Manchester campus.

Options in the Business Administration Program

As students advance, they declare an option within the business administration program. Bachelor of Science in Business Administration requires the completion of 136 credits total. Declaration of an option is occurs during their second semester sophomore year, thus focusing on a particular area of business during their last three semesters. The sophomore option declaration date is set by the Undergraduate Programs and Advising Office and usually by February of the sophomore year. Students are encouraged to discuss their interests with several faculty members and an academic adviser in this decision-making process. Options comprise a minimum of four courses, but requirements do vary
by option and are determined by the nature of the career field. Current business administration options are:

- Accounting
- Entrepreneurial Studies
- Finance
- Information Systems and Business Analytics
- International Business and Economics
- Management
- Marketing
- Student-Designed

Due to the dynamic nature of the business world, the portfolio of options offered may change from time to time. Students are expected to stay attuned to these changes through Paul College Undergraduate Programs and Advising Office. A change of option/major may only be made once per semester.

**Business in Practice (BiP) Program**

The Business in Practice (BiP) program enhances Paul College’s rigorous academics by bridging the gap between theory and practical application. Through experiential learning projects, you work directly with industry leaders and companies to acquire a deeper grasp of real business issues and responsibilities, giving you the tools, skills and know-how to launch a successful and meaningful business career. The program is designed to be flexible and optimizes your skill level in key intelligence areas most valued by employers.

**BiP INTELLIGENCES AND LEARNING GOALS**

You will take a minimum of four courses*, one in each of the intelligence areas:

- PAUL 660 BiP-Social Intelligence Topics - ability to navigate complex social relationships and environments.
- PAUL 670 BiP-Analytical Intelligence Topics - ability to analyze and evaluate ideas, solve problems and make decisions.
- PAUL 680 BiP-Competitive Intelligence Topics - ability to gather, analyze and distribute information and ideas about products, customers, competitors or the external environment.
- PAUL 690 BiP-Professional Intelligence Topics - ability to achieve professional success.

*Other Paul College courses or opportunities may be assigned with BiP Intelligence attributes and satisfy a BiP course requirement. Please check with Paul College Undergraduate Advising Office for other potential courses designated with a BiP Intelligence attribute.

**Faculty**

https://paulcollege.unh.edu/directory/all

**Business Administration Major (B.S.)**

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major

**Description**

A Bachelor of Science in business administration will help you build the skills, knowledge and experience to land a job and thrive in today's evolving economy. Graduates are in demand in a variety of industries including accounting, finance, information systems and business analytics, management and marketing. Whether you aspire to work for a high-powered firm, start-up or non-profit or launch your own business, a business administration degree opens the doors to many career opportunities.

At Paul College, students in the business administration major take foundation courses in their freshman and sophomore years that cover the fundamental theories, principles, concepts and skill sets in key areas of business, while building upon their social, analytical, competitive and professional intelligence. These foundation courses prepare you to move into a variety of fields and companies. You also must declare an option within your major during the second semester of your sophomore year that provides deeper expertise in a specific business area to propel you on your career path. Many students choose more than one! Options within the major include: accounting, entrepreneurial studies, finance, information systems and business analytics, international business and economics, management, marketing, and student designed.

**Requirements**

The following courses are major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted in those program descriptions. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted in those program descriptions. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

1 This is the capstone course in the business administration program, and satisfies the capstone requirement of the Discovery Program. Students may be required to concurrently enroll in ADMN 700 PAUL Assessment of Core Knowledge (zero credits) for AACSB accreditation purposes.

2 Students may satisfy PAUL 660, PAUL 670, PAUL 680, PAUL 690 requirements through other courses/experiences with approved intelligence attributes assigned.

Depending on the choice of option and the specific requirements thereof, students may be able to take PAUL or non-PAUL electives in their junior or senior year.

**Business Administration Major: Accounting Option (B.S.)**

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-accounting-option

**Description**

The Option in Accounting prepares students for careers in accounting and the qualifications to obtain certifications, such as certified public accountant (CPA), certified management accountant (CMA), and certified internal auditor (CIA). Accounting is called “the first language” of business for good reason: the fate of many products and marketing campaigns hinges on the financial officer’s final analysis. For this reason, successful accounting professionals often assume leadership roles within their companies.

Further, this option provides students with opportunities in a variety of fields, including internal audit, external audit, tax preparation and planning, and consulting. Demand for accountants is consistently strong. Students may also take advantage of the four-one (5 year) program to earn a M.S. in accounting at Paul College. Obtaining a master’s degree aids in preparation and eligibility for the CPA exam and is recommended for future career progression.

**Requirements**

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

### Business Administration Major: Entrepreneurial Studies Option (B.S.)

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-entrepreneurial-studies-option

**Description**

The Option in Entrepreneurial Studies is designed for students interested in entrepreneurship and creativity and who seek to learn about starting high growth business, working for a new venture, investing in start-ups or becoming involved in a new venture creation within an established organization. The ES option fosters an entrepreneurial culture throughout the program with a priority on applied learning in the dynamic environment of entrepreneurial ventures. Students apply what they’ve learned to a senior project and in conducting due diligence for investors. The ES option studies entrepreneurship from the entrepreneurs, employees and the investor's perspective.

**Requirements**

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

Business Administration Major: Finance Option (B.S.)

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-finance-option

Description

The Option in Finance provides students with the knowledge and analytical skills necessary to make informed financial decisions for themselves and their organizations. Business students interested in numbers, quantitative analysis, problem solving, utilizing creativity, and practical applications will appreciate this option. Opportunities exist in a variety of fields, including commercial and investment banking, insurance, corporate finance, money management, venture capital, risk management, and real estate.

The job outlook for finance students is strong, and starting and mid-career salaries are typically among the highest of all majors at a university. Many premier jobs in business, such as hedge fund manager, investment banker, and CFO, are in finance.

The goal of the finance option is to provide students with general exposure to the field while allowing them to specialize in one of three tracks: analytics and quantitative finance, financial analyst, and real estate. Tracks are not required; please inquire with the finance option coordinator for details.

Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. The Option in Information Systems and Business Analytics will appeal to students who wish to learn how to take advantage of contemporary technologies to solve complex business problems. Pivotal contributors to the success of any venture, Information Systems and Business Analysts must be able to understand and communicate both the business needs as well as the technical details of solutions. The option prepares students for a career in a wide range of industries by helping them master the fundamentals of information systems, as well as the ability to implement solutions or provide leading-edge, analytics-based solutions to real business problems. Students work on real-world industry projects and apply concepts and problem-solving skills learned in the classroom.

All students in the option develop functional knowledge and skills in information systems and business analytics. Beyond the required courses in the option, students choose between an emphasis in Information Systems or an emphasis in Business Analytics. The ISBA option can be completed as a single or dual options. In either case, the graduate will have tangible knowledge and skills. Regardless of one’s interest area or degree, employers look for people that can help them solve problems immediately. The ISBA option prepares students to do just that, and continue learning as technology and business continue to change.

### Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. **Business Administration Major: International Business and Economics Option (B.S.)**

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-international-business-economics

**Description**

The Option in International Business and Economics offers an interdisciplinary course of study, providing strong business training for students pursuing careers at organizations with an international focus, particularly in multinational corporations, international banks, and government agencies. It achieves this by combining general business training with in-depth knowledge in economics, finance, and management. Students are strongly encouraged to round out their education with either an internship at an international organization or by studying abroad for one semester.

**Requirements**

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

**Business Administration Major: Management Option (B.S.)**

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-management-option
The Option in Management provides students with opportunities to develop a substantial foundation in the principles of managing the human, organizational, technical, and financial resources of organizations to enhance strategic competitiveness. Courses emphasize critical thinking, problem-solving, planning, interpersonal skills related to ethical leadership in the global economy, managing innovation and technology, organizational change and sustainability, and international and cross-cultural issues in organizations.

The option emphasizes the generalist’s mindset in concert with a specialist’s functional understanding of the firm. This is an excellent option for students who see themselves as “big picture” people. Future career paths include an array of management, supervisory, entrepreneurial, human resources, and other positions in for-profit and non-profit organizations. The option is also recommended for students considering graduate education in management or law.

Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

The Option in Management

Required courses:

- MGT 614 Organizational Leadership and Structure 4
- MGT 701 Business, Government, and Society 4

Select two of the following:

1. MGT 647 Business Law I 2
2. MGT 713 Leadership Assessment and Development
3. MGT 732 Exploration in Entrepreneurial Management
4. MGT 755 International Management
5. MGT 798 Topics 3
6. INCO 505I Semester in the City Internship 4

Total Credits 16

1. Current offerings may change from year to year.
2. MGT option students can count at most one Business Law course toward the MGT option.
3. Topics will change from year to year.
4. INCO 505I may be applied as 4 credits (1 elective course) towards the Management Option.

Business Administration Major: Marketing Option (B.S.)

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-marketing-option

Description

The Option in Marketing focuses on how to develop, establish, and maintain products and services of high value for customers as well as how to deliver and communicate them, from both digital and traditional perspectives. The option addresses key linkages critical to effective customer and brand management, from understanding customer needs and problems to delivering appropriate solutions and services. It further examines decision choices facing managers concerning market selection, entry timing, positional advantage to be pursued, targeting, and executional approaches. The option emphasizes digital marketing and analytics across its courses.
Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

Option in Marketing

For additional courses, students are encouraged to meet with department faculty or with the Academic Advising Office for help in choosing a career track and additional courses.

Business Administration Major: Student Designed Option (B.S.)

https://paulcollege.unh.edu/business-administration/program/bs/business-administration-major-student-designed-option

Description

A Student-Designed Option in Business Administration is available for those students whose interests are not fully satisfied by any of the other currently available options in business administration. Students desiring a self-designed option must submit the application to the faculty coordinator. After approval by the Faculty Coordinator*, the proposal must receive approval from the Undergraduate Programs Office in Paul College.

Students considering this option should begin to plan for it no later than the second semester of their Sophomore year. The formal application deadline is October 15 of a student’s Junior year; students must have a cumulative grade point average of at least 3.0. The written proposal must contain an introduction to the option, the specific rationale for pursuing this program of study (including academic and career interests, and why none of the existing options are appropriate), and the specific program of study proposed (courses and schedule). The proposal will also include a current copy of the student’s UNH transcript.

A Student-Designed Option in Business Administration shall consist of at least five Paul College courses, at least three of which shall be from the Business Administration departments (currently Accounting & Finance, Decision Sciences, Management, and Marketing).

*The Faculty Coordinator is Dr. Carole K. Barnett (carole.barnett@unh.edu), 862-3307, Office: 360L.
Requirements

Student-Designed Option
A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

Business Administration Minor

https://paulcollege.unh.edu/business-administration/program/minor/business-administration

Description

The Minor in Business Administration offers students majoring in other disciplines the opportunity to develop a well-rounded business background. Students complete coursework in core business areas such as accounting, marketing, management, as well as economics. The minor enables students to enter their selected industries with skills and experience that distinguish them as professionals.

*Other courses may be approved by petition

Please note:

- The courses may be taken in any order; you are responsible for checking pre-requisites for elective courses.
- Capacity in most courses may be limited.
- ACFI 501, MKTG 550, and MGT 580 are for Business Administration minor only; they do not carry credit toward Paul College majors.
- The Business Administration minors must also follow UNH’s policy on minors.
- Following University policy, you must complete 20 semester hours with a grade of C- or better and a 2.0 grade point average.
The study abroad credit requirement is 12 credits.

### Portfolio

Students will be required to submit a portfolio annually to the director, and a cumulative portfolio to the instructor of their capstone course for final assessment.

The courses in the dual major program are multidisciplinary, taught by faculty from different departments in the University. They are designed to integrate UNH strengths in sustainable agriculture, hospitality management, and nutrition to offer a unique academic program emphasizing the interdisciplinary, international, and experiential knowledge that connects all three fields. The program is experiential by requiring students to work in the field growing food, in the kitchen preparing food, and developing the skills associated with both. They will also experience the local food cultures and get firsthand experience on the issues of food security locally, regionally, and globally.

Students who wish to declare a dual major in EcoGastronomy must have a cumulative grade-point average of 2.5; have declared, or be prepared to declare, a disciplinary major; and complete the Introduction to EcoGastronomy course (ECOG 401 Introduction to Ecogastronomy) with a grade of C or better.

ECOG 401 Introduction to Ecogastronomy is prerequisite for study abroad, ECOG 685 EcoGastronomy Study Abroad. All required classes and the elective are a corequisite for the senior EcoGastronomy capstone course, ECOG 701 EcoGastronomy Capstone. Exceptions are possible with a late declaration of the dual major. All foreign experiences must be pre-approved by the EcoGastronomy director.

The completion of the dual major requires no additional credits for graduation beyond the 128 required of all UNH students. All coursework required for EcoGastronomy must be completed with a grade C or better.

For information, contact the dual major in EcoGastronomy, PCBE 370Z, (603) 862-3327, ecog.info@unh.edu.

https://www.unh.edu/ecogastronomy/

#### Description

The Dual Major in EcoGastronomy integrates UNH strengths in sustainable agriculture, hospitality management, and nutrition. EcoGastronomy offers a unique academic program emphasizing the interdisciplinary, international, and experiential knowledge that connects all three fields.

The EcoGastronomy Dual Major is a collaboration with the University of New Hampshire’s College of Life Sciences and Agriculture, Peter T. Paul College of Business and Economics, and the Sustainability Institute.

- NR 620 Farm to Table: A Case Study in the Northern Beauce Region of France
- NR 701 Ecological Sustainability and Values
Economics (ECON)

Economics is the study of how societies organize themselves to produce goods and services and to distribute those products among the members of society. In the modern world, a combination of market forces, public policies, and social customs perform these basic economic tasks. Economists use concepts, models, and data to analyze efficiency of resource use, fairness of economic outcomes, and development of global and national economies. The economics programs are designed to introduce students to the tools of economic analysis and to show students how they can use those tools to analyze and better understand real-world situations.

Undergraduate training in economics is an excellent background for a variety of careers, including banking and financial services, journalism, international business, public service, the diplomatic corps, entrepreneurial ventures, and government administration. An undergraduate major in economics is also excellent preparation for those interested in graduate work in law, business administration, and international relations.

The department offers the choice of a B.A. degree in economics or a B.S. degree in analytical economics. The B.A. degree is designed to offer students maximum flexibility in designing a program of study. Students are encouraged to take a wide variety of courses, double major, and take advantage of study abroad programs. The B.S. degree differs from the B.A. degree in that it requires more quantitative and data analysis courses but does not require a foreign language. It provides more structure and direction than the B.A. degree and is more professionally focused. Please see Economics programs for further information.

Courses in economics are open to nonmajors on a space-available basis. An economics minor is also available, as students majoring in other programs have found that certain economics courses are useful supplements to their own majors and a help in gaining employment.

Students earning either the B.A. or the B.S. degree in economics may not use any of the following to satisfy Discovery Program requirements:

Analytical Economics Major (B.S.)

https://paulcollege.unh.edu/economics/program/bs/analytical-economics-major

B.S. in Analytical Economics emphasizes the predictive and prescriptive modeling skills that are in high demand in today's labor market. Prescriptive modeling is quantitative and strategic decision analysis geared toward corporate decisions. Predictive modeling emphasizes data analysis skills used to develop the information needed to make these decisions.

B.S. analytical economics majors must complete ten courses in economics with a grade of at least a C- (1.67) in each Paul College major course and an average grade of 2.3 or better in the major courses. In addition, majors must complete MATH 424A and ADMN 403, ADMN 410, ADMN 420, and an ethics course (PHIL 431 or equivalent). ECON 775 is the capstone course for the B.S. major and satisfies the capstone requirement of the University Discovery Program.

Requirements

B.S. analytical economics majors must complete ten courses in economics with a grade of at least C- (1.67) in each course and an average grade of 2.3 or better in Paul College major courses.

Total Credits 51

1. ECON 774 Senior Economics Seminar is the capstone course for the B.A. major and satisfies the capstone requirement of the University Discovery Program.

2. Specific electives for the BA Options must be chosen from an approved list of courses.

Coursework in accounting is recommended but not required. B.A. economics majors may choose to focus their major electives to satisfy the requirements of one of the three options defined by the Department of Economics.

Economics Major: Global Trade and Finance Option (B.A.)

https://paulcollege.unh.edu/economics/program/ba/economics-major-global-trade-finance-option

Description

The Option in Global Trade and Finance (B.A. degree) studies the global trade and financial systems and their importance for understanding macroeconomics and business activity, foreign direct investments and other international capital flows, globalization, economic growth and
development, international financial markets, and currency fluctuations and risk.

Students will learn about the role of the World Trade Organization (WTO), the International Monetary Fund (IMF), and other institutions undergirding the global economy. Students will develop institutional knowledge and analytical skills to study some of the most hotly debated issues of our day, including free-trade policies such as the North American Free Trade Agreement (NAFTA) and WTO, global financial crises, Basel III and other financial reforms, European monetary union, and international policy coordination.

The option is designed for students interested in careers at international organizations such as the IMF, WTO, World Bank, and Organization for Economic Cooperation and Development (OECD). This option also prepares students for careers in the financial services sector, including commercial and investment banking, financial trading, security analysis, portfolio management, and financial advising, and in the government sector, especially at the Federal Reserve System, U.S. Trade Administration, and U.S. State Department.

### Requirements

#### Economics Major (B.A.)

B.A. economics majors must complete nine courses in economics plus ADMN 420 Business Statistics with a grade of at least C: (1.67) in each Paul College major course and an average grade of 2.0 or better in major courses.

- ECON 655 Innovation in the Global Economy
- ECON 668 Economic Development
- ECON 726 Introduction to Econometrics
- ECON 746 International Finance
- ECON #747 Multinational Enterprises
- ACFI 703 International Financial Management
- POLT 546 Wealth and Politics in Asia
- POLT 561 Introduction to International Political Economy
- GEOG 582 Global Trade and Local Development

Other 600-level or 700-level course, must be approved by ECON department

Total Credits 12

1. Satisfies the requirement of the option, but does not count toward the four-elective requirement of the economics B.A. degree.

### Economics Major: Money and Financial Markets Option (B.A.)

https://paulcollege.unh.edu/economics/program/ba/economics-major-money-financial-markets-option

#### Description

The Option in Money and Financial Markets (B.A. degree) explores the complex and interdependent nature of money and financial markets. Students will develop institutional knowledge and analytical skills to understand the role of the financial system in society, fluctuations and risk in asset markets, including those for bonds, stocks, and currency, and how financial derivatives, such as futures, options, and swaps contracts, can be used to hedge risk. Students will also study the conduct and implications of monetary policy, exploring the merits of quantitative easing, macroprudential policy aimed at reducing systemic risk, and other key issues involving the role of the state in the financial system.

The option is designed for students wanting careers in the financial services sector, including commercial and investment banking, financial trading, security analysis, portfolio management, and financial advising, and in the government sector, especially at the Federal Reserve System, Securities and Exchange Commission (SEC), and the U.S. departments of Treasury, Commerce, and State.

Economics Major: Public Policy and Sustainability Option (B.A.)

https://paulcollege.unh.edu/economics/program/ba/economics-major-public-policy-sustainability-option

Description

The Option in Public Policy and Sustainability (B.A. degree) examines the factors that influence economic, social, and environmental outcomes, such as unemployment, poverty, economic inequality, health disparities, technological innovation, and pollution. Students will develop the institutional knowledge and theoretical perspective to understand the impact that decisions of individuals, firms, communities, and governments have on such outcomes. Students will analyze the impact of specific government policies and potential reforms, theoretically and empirically.

This option is designed for students seeking careers in policy analysis and research positions at government agencies; think tanks such as RAND Corporation, Urban Institute, and Mathematica Policy Research; consulting firms such as Abt Associates; and non-governmental organizations.

Requirements

Economics Major (B.A.)

B.A. economics majors must complete nine courses in economics plus ADMN 420 Business Statistics with a grade of at least C- (1.67) in each Paul College major course and an average grade of 2.0 or better in major courses.

Economics Minor

https://paulcollege.unh.edu/economics/program/minor/economics

Description

Economics is a social science that studies how people coordinate their wants and desires, given the decision-making mechanisms, social customs, and political realities of the society. The key words in economics are coordination and incentives.

For business students, a minor in economics provides an understanding of the foundational issues in business such as agency concerns, for liberal arts majors a minor can provide a tool kit for understanding and critically evaluating public policy issues. Economics is an excellent background for many careers including banking and financial services, consulting, public service, NGOs, entrepreneurial ventures and government. It is also excellent preparation for further study in law, business, and international relations.

Requirements

A minor in economics consisting of five courses is available. At least three of these courses must be taken at UNH. For more on the minor and options within the major, consult the Paul College Undergraduate Programs Office.

Entrepreneurship Minor

student through the entrepreneurial process. Paul courses are designed to follow a proscribed sequence that take the courses from a selective list offered by the other UNH Colleges. The three required courses offered by Paul and two students engage in successful careers in their respective disciplines. The focus of the minor is not about creating startups, although this may be an ancillary outcome, rather on entrepreneurial thinking that make the students creative thinkers, conceptualize and articulate problem statements, construct innovative solutions, and explore and seek opportunities. The minor consists of three required courses offered by Paul and two courses from a selective list offered by the other UNH Colleges. The three Paul courses are designed to follow a proscribed sequence that take the student through the entrepreneurial process.

Entrepreneurship Minor

https://paulcollege.unh.edu/business-administration/program/minor/entrepreneurship

Description

The Minor in Entrepreneurship in the Peter T. Paul College of Business and Economics is for non-business majors. The minor provides non-business students with concepts, tools and techniques to become creative thinkers, conceptualize and articulate problem statements, construct innovative solutions, and explore and seek opportunities. The focus of the minor is not about creating startups, although this may be an ancillary outcome, rather on entrepreneurial thinking that make the students engage in successful careers in their respective disciplines.

The minor consists of three required courses offered by Paul and two courses from a selective list offered by the other UNH Colleges. The three Paul courses are designed to follow a proscribed sequence that take the student through the entrepreneurial process.

- Entrepreneurship Minor (p. 347)

Hospitality Management (HMGT)

The program in hospitality management is an integral part of the offerings of the Peter T. Paul College. It is one of only a few programs worldwide accredited by the Association to Advance Collegiate Schools of Business (AACSB). The hospitality management program at UNH provides a world-class education, personal attention and support, and real-world and international experience, setting students apart from the competition and ensuring they are well prepared for a successful and meaningful career.

The hospitality management program develops graduates to be senior executives 15 to 20 years from graduation. This is accomplished through personal attention and support, a balanced foundation where students design one-third of their curriculum, training on cutting-edge industry-specific software and technology, career development, mentoring and placement, and the network connection of seasoned alumni in top industry positions. Graduates have accepted management positions in lodging and resorts, food service beverage, event planning and design, software companies, tourism, travel and recreation, among the many potential opportunities.

An important aspect of the program is the required professional development, which includes practical work experiences, career development, mentoring, and placement, preparing students to be more competitive in the job market and for a successful and rewarding career. Employers look for individuals with relevant industry experience, and this is provided through the required 400 hours of an approved work experience.

The hospitality management program offers a wide range of international education options to study abroad. We have partnered with business schools in countries such as Spain, Australia, Croatia, United Kingdom, and Italy.

https://paulcollege.unh.edu/hospitality-management

Programs

- Hospitality Management Minor (p. 348)
Hospitality Management Minor

Hospitality Management Minor is offered as a professional educational opportunity for students as an entree to the world’s largest industry, hospitality and tourism. Students pursuing the minor will have opportunities to interview with major hospitality companies for staff and management training positions. In addition, students will be better able to secure meaningful working experiences in the industry during their college career as they progress towards the minor.

The minor is comprised of five required courses. The courses have been selected to ensure all students have a well-rounded learning experience that will strengthen their ability to succeed.

Please note:

- Capacity in most of these courses may be limited.
- ACFI 501 is for the minor only; it does not carry credit toward Paul College majors.
- The HMGT minor also follows UNH policy on minors.
- Following University policy, you must complete 20 semester hours with a grade of C- or better and a 2.0 grade point average.
- Courses taken on a Pass/Fail basis may not be used for the minor.
- No more than 8 credits used by the student to satisfy major requirements may be used for the minor.
- No transfer courses may be used toward the minor.

Leadership Minor

Leadership Minor

Leadership Minor was designed for students motivated by a deep sense of passion and purpose. This program energizes them to mobilize resources which enable people to successfully fulfill their roles and responsibilities in their organizations. The Leadership minor course of study will help you to develop your leadership identity and skills such as effective communicating, inspiring and developing people, and awakening everyone’s passion for great accomplishments.

The Leadership program combines coursework from management and social sciences, along with an experiential learning requirement in leadership. The minor also allows students to pursue their leadership passions through the selection of two elective courses.

Requirements

The Minor in Leadership consists of specified courses: two(2) required management courses, one(1) behavior/society course, two(2) elective courses, one(1) leadership experience. Requirements and specified course options to satisfy the minor are listed below.

Additional courses by petition

**One required Leadership Experience from the following:**

- Leadership Camp
- ADMN 598 Topics (Leadership in Practice)
- HHS 798 Special Topics (Student Development Peer Educator)
- INCO 505B Social Innovator’s Toolbox
- INCO 682 Washington Internship
- INCO 795 Washington Center Course
- Resident Assistant
- Spark Leader
- AERO 301 Leadership Laboratory
- AERO 541 Team and Leadership Fundamentals I
- AERO 542 Team and Leadership Fundamentals II
- HHS 798 Special Topics
- JUST 410 Sexual Harassment and Rape Prevention (SHARPP) Peer Advocacy
- MILT 401 Leadership Laboratory I
- MILT 402 Leadership Laboratory II
- PAUL 696 Supervised Student Teaching Experience (Peer Advisor)
- RMP 593 Special Topics

Alternative leadership experience by petition

1 UNH Leadership camp in January or PAUL Leadership Camp during Spring Break

Please note:

- You are responsible for checking pre-requisites for all courses listed
- Pre-requisites and permissions vary by course and department. Students are responsible for checking and meeting pre-requisite requirements. Some courses may be restricted to certain majors and require permission.
- All transfer courses must be evaluated for equivalency
- No more than 2 transfer courses may be applied to the minor
- Capacity in courses may be limited
- Several of the listed courses are "special topics" (or equivalent). Please make sure that the course has the same title (not simply the same number) as the listed course in order for it to count for the minor.
- The Leadership Minor also follows UNH policy for minors

## Sales

- Sales Minor (p. 349)

### Sales Minor

https://paulcollege.unh.edu/business-administration/program/minor/sales

#### Description

**Minor in Sales** – The modern sales professional helps customers solve business problems through active listening, insightful questions, deep empathy, domain competency, and the understanding and communicating of value. The Sales Minor will prepare you to start your career journey into sales by teaching you to sell yourself first and giving you the skills and experience to succeed in your role. More college graduates will go into sales than any other profession. Why not be prepared and differentiate yourself for the best opportunities by earning a sales minor and developing skills that are transferrable to any profession.

#### Requirements

The **Minor in Sales** is open to both Paul College and Non-Paul College students. Please reference the required courses depending on college. The minor consists of three required courses (marketing, sales level-one, sales level-two), two elective courses, and one sales experience. Please contact the Paul College Undergraduate Advising and Programs Office for an up-to-date list of approved elective courses or sales experiences.

- Tourism Management Minor (p. 351)

Tourism Management Minor

Description

"Tourism" is the world's largest and most diverse industry. Tourism is a composite of activities, services, and industries delivering travel experiences through transportation, accommodations, eating and drinking establishments, shops, entertainment, activity facilities (parks, sports, and amusement parks), historic sites, natural resources, among others.

The faculty of Recreation Management and Policy [RMP], Hospitality Management [HMGT], and Natural Resources and the Environment [NRE] Tourism [Tour] have bundled a number of courses for non-majors which, when combined with certain elective courses, can constitute a Minor in Tourism Management. Each of the courses offered for this minor are already offered in each of the three departments. These programs represent the three Colleges of College of Health and Human Services, Peter T. Paul College of Business and Economics, and the College of Life Science and Agriculture.

Questions about the minor may be directed to:
Recreation Management and Policy – Dr. Bob Barcelona, Bob.Barcelona@unh.edu
Tourism Management – Dr. Rob Robertson, Rob.Robertson@unh.edu
Hospitality Management – Dr. Nelson A. Barber, nelson.barber@unh.edu

Approval of the Minor for Graduation, verification and sign-off must be coordinated with Dr. Rob Robertson.

¹ Identification of experiential learning courses.

Courses taken during study abroad may be considered as part of the minor; prior approval of an advisor is required.

Please Note:

The courses may be taken in any order, and you are responsible for checking pre-requisites for the elective courses.

Following University policy, you must complete 20 semester hours with a grade of C- or better and a 2.0 grade point average.

Courses taken on a Pass/Fail basis may not be used toward the minor.

No more than 8 credits used by the student to satisfy major requirements may be used for the minor.

No transfer courses may be used toward the minor.

Fellowship Office

The UNH Office of National Fellowships provides information, counseling, and editorial support to highly motivated and high-achieving students applying for national and international fellowships and scholarships. The office also assists faculty members who serve as mentors and recommenders, and arranges for members of the faculty to take part in interviews and serve on screening committees.

In recruiting, advising, and supporting students who excel in various areas, the office collaborates campus-wide with other offices and departments of the University, including the Office of Multicultural Student Affairs, the McNair program, the Honors Program, the Global Education Center, and the Hamel Center for Undergraduate Research, in support of the University’s Academic Plan.

The services of the Fellowships Office are available to undergraduates, graduate students, and alumni of the University. The Office of National Fellowships holds membership in the National Association of Fellowships Advisors. For more information, please contact Jeanne Sokolowski, director, Office of National Fellowships Office, Conant 118A; (603) 862-0733; e-mail: Jeanne.Sokolowski@unh.edu.

Global Student Success Program

The Undergraduate Global Student Success Program (GSSP) is equivalent to the first year of a bachelor’s degree program. The GSSP provides international students with an academic and cultural bridge from their high school experience to studying at the University of New Hampshire. No SAT or ACT scores are needed to apply.

Students who complete the GSSP earn a minimum of 28 credits, and upon successful completion of the program, will move directly into the second year of their undergraduate degree program at the University of New Hampshire.

Undergraduate GSSP course offerings include Business and Economics, Engineering and Physical Sciences and Liberal Arts. Students have to obtain a 3.0 GPA in Business and Economics and Engineering, and a 2.5 GPA in Liberal Arts to progress onto Year 2 of the bachelors program.

Interested international students can view admission criteria and apply online at unhgssp.com (http://unhgssp.com)

Should you have any further questions, please contact the UNH GSSP staff directly: admissions@unhgssp.com.

Hamel Center for Undergraduate Research

www.unh.edu/undergrad-research/ (http://www.unh.edu/undergrad-research)

The Hamel Center for Undergraduate Research encourages students to design and carry out research, scholarly, or creative projects in collaboration with faculty mentors. To facilitate this, the Hamel Center offers a variety of competitive research grants and fellowships specifically for undergraduate students. Research may take place during the academic year, January term, or over the summer, with a wide range of programs available to suit each student's particular needs:

- Research Experience and Apprenticeship Program (REAP) (https://www.unh.edu/undergrad-research/research-experience-and-apprenticeship-program-reap) offers Honors students the opportunity to apprentice with a UNH faculty mentor for ten weeks of full-time research in the summer after their first year.
- Undergraduate Research Awards (URAs) (https://www.unh.edu/undergrad-research/undergraduate-research-awards-ura) are available each semester (including January Term and summer) for students at all levels: freshman through senior year. The research time commitment is flexible.
- Summer Undergraduate Research Fellowships (SURFs) (https://www.unh.edu/undergrad-research/summer-undergraduate-research-fellowships-surf) for the U.S. offer support for ten weeks of full-time research in the summer following sophomore or junior year.
- SURF Abroad and the International Research Opportunities Program (IROP) (https://www.unh.edu/undergrad-research/international-research-opportunities-program-irop) offer support for rising seniors to conduct nine weeks of full-time summer research abroad.
- Also, by registering for INCO 590 Student Research Experience or INCO 790 Advanced Research Experience, students at any level can work directly with faculty members while receiving academic credit and support for research expenses.

Once projects are completed, student researchers may receive further support from a Research Presentation Grant (https://www.unh.edu/undergrad-research/research-presentation-grants) to present their work at a national or international conference. Students may also publish their research findings in UNH’s online undergraduate research journal, Inquiry (https://www.unh.edu/inquiryjournal) and/or present their research at UNH’s Undergraduate Research Conference (URC) (https://www.unh.edu/undergrad-research/under-grad-research-conference).

Hamel Center research opportunities are available to students across ALL disciplines.

By conducting research at the undergraduate level, students gain professional skills, hands-on experience, and the opportunity to present and publish their findings in professional venues. Grants from the Hamel Center for Undergraduate Research open doors on real-world disciplinary practice, graduate school, post-baccalaureate fellowships, and professional careers. For information about undergraduate research grants and programs, the Inquiry journal, or the URC, contact the Hamel Center for Undergraduate Research at 118 Conant Hall, (603) 862-4323,
or visit the website at www.unh.edu/undergrad-research (http://www.unh.edu/undergrad-research).

Honors Program
www.unh.edu/honors-program (http://www.unh.edu/honors-program)

The University Honors Program (UHP), established by the Academic Senate in 1983, recognizes the achievements and capabilities of outstanding students. The program enriches undergraduate education by offering a personal, intensive approach to learning through small classes of 20 or fewer students and individualized collaborations with faculty.

There are various categories of Honors recognition awarded at graduation. The four-year University Honors curriculum is comprised of Discovery Honors courses plus either Departmental or Interdisciplinary Honors experiences. Departmental Honors is a two-year curriculum of enriched work in an academic department, and can be pursued either as a part of the University Honors Program or on its own. Interdisciplinary Honors is made up of three high-impact experiences plus a thesis. No award is given for completion of Discovery Honors courses alone; either Departmental Honors or Interdisciplinary Honors work is required to graduate with University Honors.

Admissions
The Office of Admissions identifies a number of qualified incoming first-year students to be admitted to the Honors Program. In addition, first-years whose grades are in the top 10% of their year in each college are invited to join the program in January. Students may also petition to join the program if they have a GPA of at least 3.5. Admission to Departmental Honors is determined by each department; many require no invitation or application.

Required courses and experiences
1. Discovery Honors courses (16 credits)
   a. One course must be an Honors Inquiry Seminar, with the course number 444.
   b. [For students entering in or after Fall 2016 only] One course must be an Honors Symposium, with the course number 440.
   c. At most one course may be a "self-designated Honors course," in which students create their own Honors course in collaboration with a faculty member.
2. Departmental Honors OR Interdisciplinary Honors
   a. Departmental Honors requirements (https://www.unh.edu/honors-program/departmental-honors) differ by major.
   b. Interdisciplinary Honors (https://www.unh.edu/honors-program/interdisciplinary-honors) requires three approved high-impact experiences.
3. Honors Thesis of at least 4 credits
   a. Students must register for an Honors Thesis (https://www.unh.edu/honors-program/honors-thesis) course of at least 4 credits supervised by a faculty member.
   b. A grade of B- or better is required for the Honors Thesis.

Registering for Honors Discovery Courses
Honors courses can be found on the course schedule (https://courses.unh.edu) by selecting the attributes "Honors Courses" and "All Discovery Courses." Enrollment in these courses is restricted to members of the University Honors Program. Students who are not members of the University Honors Program, but who wish to take an Honors course, may email honors.program@unh.edu to request permission.

Departmental Honors
Currently, there are more than 50 different departments from all five of the University’s undergraduate schools and colleges offering departmental honors programs. Academic work for Departmental Honors usually requires a minimum of 16 credits, at least four of which will be devoted to a senior thesis project. Students should familiarize themselves with their department’s requirements and should meet with their departmental honors liaison (https://www.unh.edu/honors-program/requirements-contacts).

Interdisciplinary Honors
Students entering in the Fall of 2016 or later have a second option for completing University Honors. In lieu of completing Departmental Honors, they may complete three approved high-impact experiences as well as a thesis. Interdisciplinary Honors recognizes students who seek academic experiences that extend beyond their course curricula. At least one experience must be interdisciplinary. An interdisciplinary experience is defined as one that requires the use of two or more disciplines in order to produce a specifically interdisciplinary product or understanding. In other words, the interdisciplinary experience allows for new ideas, questions, products, or solutions that would be unlikely to emerge within a single discipline. Examples of such experiences can be found on the UHP website.

Approved high-impact experiences that count toward Interdisciplinary Honors include:

- Study abroad in a UNH managed, exchange, or approved program of at least 8 weeks
- Completing the application process for a major national fellowship
- An IROP, SURF, or other approved research experience
- Named co-authorship on a publication in a peer-reviewed journal
- A presentation at a regional or national academic conference
- A Social Innovation Summer Internship
- Study away at the Washington Center or Semester in the City
- Other approved high-impact experience (by petition)

Students should consult with Honors Program advisers before the beginning of Junior year to decide which track they will pursue.

GPA minimum
Honors Program members entering before the Fall of 2017 must maintain a GPA of 3.0 in the Freshman year and 3.4 thereafter. Members entering in or after the Fall of 2017 must maintain a GPA of 3.2 in the Freshman year and 3.5 thereafter. Students who do not reach the required GPA by the end of each academic year will be notified and offered an opportunity to petition to remain in the program. Students must meet the required GPA in order to graduate with University Honors.

For more information, contact the University Honors Program (https://www.unh.edu/honors-program), email honors.program@unh.edu, (603) 862-3928. The Honors Program is located in Conant Hall, Suite 115.

Pre-law Advising
The faculty and staff advisors of the UNH Pre-law Advising Committee work closely with students and alumni to identify interests and explore
Identifying as a pre-health student at UNH consists of the following: important events, opportunities, and deadlines regarding preparation for health professional graduate programs. There is no pre-health major at UNH. Health professional graduate programs take the OAT. The MCAT, DAT, and OAT are standardized, comprehensive exams that test students’ knowledge of biological and physical sciences as well as verbal reasoning and writing skills. Exams are usually taken once the student has completed prerequisite coursework. Students applying for physician assistant and physical therapy programs may be required to take the GRE, a more general exam similar to the SAT in structure and content.

Application Process
The Pre-Professional Health Programs Advising Office works with the Pre-Professional Health Advisory Committee, a group of 10-12 UNH faculty members and local healthcare providers, to provide students with comprehensive, confidential evaluation services at the time of application. An application information meeting is held each fall to outline the application process and establish timetables and deadlines. Students should note that the medical and dental school application process begins a full two years before matriculation; e.g., in the fall of a student’s junior year if they wish acceptance following graduation. However, a delay of a year or more between graduation and admission is neither unusual nor detrimental, and in many cases, students can use this time to improve their credentials by taking additional courses and/or gaining exposure to the profession.

It is important to understand that in order to gain admission to a health professional program they must not only satisfy the prerequisite requirements, they must satisfy these requirements at a high level of achievement. The Pre-Professional Health Programs Advising Office can provide students with information on competitive GPA and entrance exam scores for each of the postgraduate health professional programs.

The Pre-Professional Health Programs Advising Office is located in Rudman Hall and can be contacted by phone at (603) 862-3831 or by email at premed.advising@unh.edu. The office also has a website at https://colsa.unh.edu/academics/pre-professional-health-advising.

Pre-Professional Health Advising
The Pre-Professional Health Programs Advising Office in Rudman Hall provides advising for all students preparing for postgraduate careers in medicine, dentistry, optometry, chiropractic, podiatry, physical therapy, pharmacy, naturopathic medicine, and physician assistant programs. There is no pre-health major at UNH. Health professional graduate programs do not evaluate based on undergraduate major. Interested UNH students should register with the Pre-Professional Health Programs Advising Office online to be added to an email list and be kept informed of important events, opportunities, and deadlines regarding preparation for application.

Identifying as a pre-health student at UNH consists of the following:

1. **Taking the prerequisite courses for admission.** A list of the specific prerequisite courses for each intended health profession can be found on the UNH Pre-Health website.

2. **Gaining volunteer and healthcare experience.** Applicants to health professional programs will be expected to demonstrate a sustained involvement in volunteer and community service. It is also expected that applicants have shadowed healthcare providers. Many students volunteer in various healthcare settings and some students seek out licensure and certificates to provide hands-on patient care. These experiences often include working as an EMT, LNA/CNA, or phlebotomist.

3. **Preparing for entrance exams.** Students applying to medical school are required to take the MCAT exam. Students applying to dental programs are required to take the DAT, and applicants to optometry programs take the OAT. The MCAT, DAT, and OAT are standardized, mandatory fees, and required textbooks for college courses. Incoming students with either a four-year or three-year ROTC scholarship may compete for scholarships while already in college if they meet specific ROTC requirements. Scholarships may pay up to full tuition, mandatory fees, and required textbooks for college courses. Incoming students with either a four-year or three-year ROTC scholarship may receive a full or partial room and board grant for the entire time they are under the best possible preparation for legal education while also bringing the excitement of law to UNH students. The committee achieves this goal through careful consideration of the American Bar Association’s (ABA) statement on preparation for legal education (found on the web at www.americanbar.org/groups/legal_education/resources/pre_law.html). In that statement, the ABA explains why no single major or course is required or recommended for students wishing to explore or prepare for legal study. The ABA does, however, describe certain skills and values that are essential to success in law school and to life as a lawyer. These include analytic and problem solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, task organization and management skills, and the values of serving others and promoting justice.

Pre-law Advising implements the ABA statement by working with student interests and strengths to select UNH courses, internships, leadership opportunities, and experiences that will develop those skills and values. Programmatically, the committee offers individual appointments, sponsors visits to local law schools, and organizes discussions with law school students, admission and financial aid representatives, and with members of the legal community. The committee also provides advising support for LSAT preparation, law school search, writing personal statements, and the application and selection processes.

The Pre-law Advising Office is located in Hood House and can be contacted by phone at (603) 862-2064 or by email at prelaw.advising@unh.edu. Additional information is available at https://cola.unh.edu/academics/pre-law-advising/schedule-appointment.

Reserve Officer Training Corps Programs (ROTC)
Students attending the University of New Hampshire may enroll in the Air Force Reserve Officer Training Corps (AFROTC) or in the Army Reserve Officer Training Corps (AROTC) at the University.

The Army ROTC and Air Force ROTC offer programs leading to a commission as a second lieutenant in their respective services. Students in either ROTC program may pursue any University curriculum that leads to a baccalaureate or higher degree.

Two- and four-year programs are available. The four-year program is open to freshmen, sophomores, and transfer students. The two-year program is open to students who have at least two academic years remaining in their college/university degree program. In addition to on-campus course requirements, students must attend an officer-preparatory training session for a part of one summer.

ROTC scholarships are offered on a competitive basis by both the Army ROTC and Air Force ROTC. Entering freshmen may compete for four-year scholarships during their last year of high school. Additionally, incoming students may compete for scholarships while already in college if they meet specific ROTC requirements. Scholarships may pay up to full tuition, mandatory fees, and required textbooks for college courses. Incoming students with either a four-year or three-year ROTC scholarship may receive a full or partial room and board grant for the entire time they are students with either a four-year or three-year ROTC scholarship may compete for four-year scholarships while already in college if they meet specific ROTC requirements. Scholarships may pay up to full tuition, mandatory fees, and required textbooks for college courses. Incoming students with either a four-year or three-year ROTC scholarship may receive a full or partial room and board grant for the entire time they are
on an ROTC scholarship. In addition, all scholarship recipients receive a tax-free monthly subsistence allowance. Non-scholarship students in the last two years of the ROTC program also receive the tax-free monthly subsistence allowance.

Both ROTC programs have administrative and medical requirements, which must be met to qualify for a scholarship and a commission.

More specific information about ROTC programs may be obtained by contacting Army ROTC at (603) 862-1078 or Air Force ROTC at (603) 862-1480.

### Air Force Leadership Minor

1. Minimum GPA of 3.20 in Aerospace Studies courses.
2. Successful completion of 8 semesters of AERO 301.
3. Held at least two semester-long leadership positions, one of which was a leadership position in the AFROTC Group.
4. Successful completion of Field Training.

#### Code | Title | Credits
--- | --- | ---
AERO 415 | Heritage and Values of the United States Air Force I | 2
AERO 416 | Heritage and Values of the United States Air Force II | 2
AERO 541 | Team and Leadership Fundamentals I | 2
AERO 542 | Team and Leadership Fundamentals II | 2
AERO 671 | Leading People and Effective Communication I | 4
AERO 672 | Leading People an Effective Communication II | 4
AERO 681 | National Security Affairs/Preparation for Active Duty I | 4
AERO 682 | National Security Affairs/Preparation for Active Duty II | 4

**Total Credits**: 24

1. The program often has National Guard or Reserve men and women join the program to transition onto active duty with a commission. Students with this status are exempt from the first year of ROTC requirements because they have already gained this experience during their time in service. As such, AERO 415, AERO 416, and two semesters of AERO 301 are waived for these students in the pursuit of the minor.

### Study Abroad Programs

http://www.unh.edu/global/education-abroad

The University offers opportunities for full-time degree candidates meeting eligibility criteria to pursue a wide variety of education abroad experiences, including study, intern, service and research in many countries around the world. UNH-managed and exchange study programs are described in this section. Students may study abroad in other locations through UNH-approved programs by using the intercollegiate option (INCO). All students who study abroad pay a study abroad administration fee and an international travel insurance fee. For more information, contact the Global Education Center, (603) 862-2398 or visit http://www.unh.edu/global/education-abroad or the department identified in the UNH-managed program descriptions.

### Belize

**UNHM BSCI 620 (M1) - GLOBAL SCIENCE EXPLORATION**

This 4-credits course includes a spring break trip to Belize investigating living organisms in their natural habitat. Students will participate in pre-trip seminars on the country, local flora, fauna and habitats they will visit. Students will design a project to integrate their personal interests and objections with in-country investigation. Post-trip seminar will focus on preparation of project and its presentation. Prereq: BIOL 413 and 414, or BIOL 411 and 412. Permission required. For more information contact the faculty director, Patricia Halpin (Patricia.Halpin@unh.edu).

### UNH Archaeological Field School in Belize

Offered in the summer, the UNH Archaeological Field School in Belize is a four-week program where students excavate ancient Maya sites and are trained in archaeological field and lab techniques. Students register for ANTH 675 Archaeological Field School in Belize and earn 8 credit hours. Assisted by program staff, each student chooses a topic of original field research to focus on (e.g., analyses of a particular artifact class, architecture, excavation, or survey results from the project). The program is directed by Eleanor Harrison-Buck, assistant professor of anthropology, who has worked on archaeological projects in Belize and Guatemala since 1992. For more information, visit cola.unh.edu/belize-field (https://cola.unh.edu/belize-field).

### Archaeological Survey and Mapping in Belize

A January-term course, Archaeological Survey and Mapping in Belize (ANTH 674 Archaeological Survey and Mapping in Belize, 4 credits), offers students hands-on training in survey and mapping techniques, as well as digital cartography using ArcGIS mapping software. This program is also directed by Eleanor Harrison-Buck. For more information, visit cola.unh.edu/belize-mapping (https://cola.unh.edu/belize-mapping).

### Brazil

**University of Sao Paulo Ribeirao preto Exchange Program**

Focused studies in all aspects of music with immersion in Portuguese language and Brazilian culture. This exchange with University of Sao Paulo Ribeirao Preto grew out of collaborations between UNH's and USP-RP's Departments of Music, and offers small group interaction with professors and Brazilian students, and participation in extra-curricular activities, including Filarmonica, Jazz Band, Grupuri (percussion group), and several choirs. This is an ideal exchange for independent students wanting to travel abroad and continue work on their music major. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

### Canada

**National Student Exchange**

Students may spend one or two semesters at one of ten campuses in Canada, through the National Student Exchange (NSE) program. While having the opportunity to learn in a Canadian environment, participants maintain their status as UNH students, pay UNH tuition, and will be able to graduate from UNH on schedule. The exchange is open to students from all UNH majors. Participants must provide proof of proficiency in French for Francophone campuses in Quebec. Interested students should contact Paula DiNardo, Study Away USA office, Hood House, (603) 862-3485, or visit www.unh.edu/nse (http://www.unh.edu/nse).
Caribbean

Cruise Ship Management (HMGT 698 Topics)
Offered in January term, this 4-credit course explores through text and on-board experience key areas of cruise ship management: food and beverage, HR, finance, yield management, front office, housekeeping, safety, security, sanitation, and interoperating. Students will participate in a 12-14 day cruise that sails round trip from New York City, after brief class time in Durham during the fall semester. HMGT 698 Topics counts as an elective for majors and minors in hospitality management or any UNH student in proper standing. Students need to commit by the end of September with a deposit to satisfy Cruise Line requirements. For more information, contact Carl E. Lindblade (Carl.Lindblade@unh.edu), affiliate professor, Department of Hospitality Management.

China

Chengdu Spring Program
Semester study of Chinese language and culture at Chengdu University. Upper-level students in the Chinese language program as well students with little to no background in the Chinese language are able to spend a full semester in China learning Chinese language and culture first-hand. Chengdu has a population of 14 million! It is one of the most advanced metropolises in China's southwest. Students immersed in such a city for a semester will not only improve their language skills but will also gain insights beyond what they could learn in classrooms in the U.S. They will have a chance to see the challenges and opportunities facing Chengdu and to compare and contrast China policies and practices with those in U.S. The program faculty director is Yige Wang. For more information, visit cola.unh.edu/china (https://cola.unh.edu/china).

Chengdu Summer Program
This summer short-study program (just under three weeks long) includes travel and intensive Chinese language study at both the beginner and advanced levels at Chengdu University in China. The city of Chengdu is the economic hub for China’s southwest. Chengdu has a population of 14 million! It is one of the most advanced metropolises in China’s southwest. Students will have a chance to see the challenges and opportunities facing Chengdu and to compare and contrast China policies and practices with those in U.S. The program faculty director is Yige Wang. For more information, visit cola.unh.edu/china-summer (https://cola.unh.edu/china-summer).

Chengdu University Exchange Program
Chengdu University in Chengdu, Sichuan Province, China, is UNH's partner in the Confucius Institute, a non-profit educational institution housed in the College of Liberal Arts that offers a full curriculum in Chinese language and culture. Out of this partnership grew an undergraduate exchange program in which UNH students have the opportunity to study Chinese language and culture in an immersive setting by directly enrolling at Chengdu University. Located in the Shiling Historical and Cultural Scenic Area, the large, gated campus is beautifully landscaped with gardens, ponds, and tree-lined passages with easy access to downtown Chengdu. For more information, contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

Costa Rica

Costa Rica Summer Program (San Joaquin de Flores)
This six-week summer immersion program offers a variety of courses in language and culture taught by the Instituto San Joaquin de Flores. The program combines two Spanish courses, cultural field trips, and weekend trips. Classes meet daily Monday through Friday. Students live with Costa Rican families. Upon the completion of the program, students earn the equivalent of 8 credit hours. The program faculty director is Lina Lee. For more information, visit cola.unh.edu/costa-rica (https://cola.unh.edu/costa-rica).

SAFS 510 Agriculture and Development in the Neotropics
Course is designed as a three-week immersion into tropical agriculture and Costa Rican ecology and culture. Agriculture plays a pivotal role in Costa Rica’s history and in shaping current events. Production of horticultural and agronomic crops occurs on a variety of scales ranging from large export-based systems, to mid-sized operations for domestic sales, and sustenance-based home gardens. Examples of all systems will be visited and discussions will focus on their overall sustainability. Sustainability is a broad concept and requires consideration of socio-cultural, environmental, and economic factors. Agriculture and agricultural products infuse the culture as seen by large participation in farmers markets and appreciation for a wide variety of fruits and vegetables prepared in myriad ways. An appreciation for nature also informs the culture and is embodied by the country’s extensive system of national parks and protected reserves along with the national philosophy of “Pura Vida.” SAFS 510 is open to all UNH students and fulfills elective credit for the Sustainable Agriculture and Food Systems major as well as dual major in Sustainability.
Cuba

Discover cuba j-term

Discover first hand the rich cultural and artistic life of Cuba through this January-Term course. Led by Prof. Lina Lee, UNH Spanish Program, students will participate in an online academic component prior to a 10-day experiential learning trip to Cuba. The course (LLC 555: Discover Cuba: An Arts Experience, 4 credits, FPA Discovery) will illuminate the art, history, culture, music, and architecture of Cuba through lectures, tours, guided readings, and site visits. The program will be based in Havana in partnership with Spanish Studies Abroad and will include field trips to the colonial cities of Trinidad and Cienfuegos. All course and site work conducted in English - no knowledge of Spanish required. For more information, visit cola.unh.edu/cuba (https://cola.unh.edu/cuba).

Dominican Republic

Perspectives on the Business Environment in the Dominican Republic (MKTG 598 Topics in Marketing / MKTG 798 Topics)

Offered in January term, MKTG 598 Topics in Marketing/MKTG 798 Topics, Perspectives on the Business Environment in the Dominican Republic, is a 4-credit course open to all UNH students. Students will participate in a 13-day visit to Santo Domingo in the Dominican Republic, one of the commercial hubs of the Caribbean. The course will include two pretrip classes held in the fall, in which the students will learn about the business culture of the country, as well as a brief introduction to its history and current demographics. The group will travel to Santo Domingo where three to four hours of each weekday (32 contact hours) will be devoted to meeting with business owners and managers from a variety of industries who will discuss business practices. Upon return to Durham, a final three-hour class will be held in the spring semester to wrap up, assess the learning outcomes, and conclude the experience. Contact Audrey Ashton-Savage (Audrey.Ashton-Savage@unh.edu), the instructor for this course.

This course examines issues of culture, poverty, social development, and social justice in the Dominican Republic through direct service learning work and preparatory and reflective class sessions and discussions. Students will have the opportunity to examine development issues that have plagued the island nation for years and current efforts to address these concerns. During spring break, students and a UNH faculty member embark on a service learning adventure to work in the bateyes of the Dominican Republic. Past projects have included the building of schools, clinics, community centers, and residential houses. Additionally, students will be working in local schools, orphanages, and child welfare centers. Afternoons and evenings will be spent learning about social services in the DR from community leaders and activists, participating in cross-cultural activities with community members, learning about Dominican life and history, and reflecting upon the days’ activities. Students will visit other local Haitian immigrant communities (bateyes), spend an evening in Santo Domingo, spend a night with a local family, and much more. Contact Matthew Toms (matthew.w.toms@gmail.com).

France

Dijon Program

The Dijon Program offers students the chance to spend their junior year or a spring semester in Dijon, France. Students enroll directly in the Universite de Bourgogne (University of Burgundy), where they will take courses alongside French students, or at the CIEF (Centre International d’Etudes Francaises), which hosts students from around the world. Students generally live with French families in the heart of this historic city. Credit for all work completed successfully, up to 16 credits, will be automatically transferred to UNH. Though exceptions can be made by the program faculty, the semester program is generally open to those French majors who have completed:

<table>

This course is worth 8 credits and consists of eight weeks of intensive French language, literature, culture, and civilization courses at the CIEF at the Université de Bourgogne in Dijon, France. The program faculty director is Ileana Chirila. For more information, visit cola.unh.edu/dijon.

**Toulouse - A Culinary Exploration of Southern France**
Experience first-hand the rich cultural, historical, and culinary heritage of France with a focus on its southwestern regional capital, Toulouse. Students enroll in a 2-credit version of FREN 595 during the second half of the spring semester. On-campus class sessions will prepare students for travel and introduce them to the diversity of French cultural heritage. The program will culminate in a 2-week stay in Toulouse. Students will engage in daily activities, site visits, lectures, and day trips. While much of the in-country portion of the program will focus on the region's culinary diversity, students will also discover the city and region's historic highlights and engage with contemporary social and cultural topics.

The program faculty director is Ileana Chirila. For more information, visit cola.unh.edu/toulouse.

**Germany & German speaking countries**
Students may study for a semester or a full year through an approved study abroad program or, in special cases, by applying directly to universities in Germany, Austria, or Switzerland. Many programs require a minimum grade-point average of 3.0 and a B average in the major. Programs vary greatly in academic focus, size, language of instruction, living arrangements, services, and extra-curricular programming provided, and cost. Study abroad goals and requirements should be discussed with a German adviser as early as freshman year. Program and application materials may be obtained through the Global Education Center. For credit in the German major or minor, the program must be conducted in German. After consultation with the major adviser and the study abroad adviser to establish possible UNH course equivalents and fulfillment of major and/or Discovery Program requirements, students submit a planning form indicating the planned course of study abroad. To ensure proper credit transfer, especially if seeking to transfer credits directly from a university abroad without benefit of an Approved Program, students should keep syllabi, course descriptions, and all written work. Students planning study at a university in Germany, Austria, or Switzerland should note major differences in academic calendar (winter semester October-February, summer session April-July), which may be shortened by the Approved Program to accommodate U.S. academic calendars.

**Berlin Program**
The Berlin Summer Program offers students the chance to spend five weeks in Berlin, Germany. Students earn 4 or 8 credits through GERM 586 Study in Berlin, designed to give students an immersion experience in the German language and culture. Students will receive eighty hours of intensive language instruction at the appropriate level (elementary, intermediate, or advanced) at the BSI Private Language School in central Berlin. No prior German language study is required. On designated weekday afternoons, students will gather for cultural excursions and discussions with the on-site UNH faculty member. Students enrolling for 4 credits can receive the UNH German Program language course equivalent of one semester of language study. Students enrolling for 8 credits will receive the UNH German Program language course equivalent of one semester of language study as well as engage in additional UNH faculty-guided cultural study, fulfilling GERM 525 Introduction to German Culture and Civilization (Discovery World Cultures) or other pre-approved courses. Students may fulfill the bachelor of arts language requirement by taking the equivalent of Intermediate German at the BSI Language School or by taking the equivalent of the first semester of Elementary German with the program and then independently continuing language instruction at the BSI for three weeks beyond the program study period, for a total of 8 weeks. Required pre-travel meetings at UNH will prepare students for the Berlin experience. In line with UNH’s goals to educate students to become global citizens, this immersion experience will give students insight into what it means to experience a different culture and language. The program is administered by the COLA Center for Study Abroad, and the faculty director is Charles Vannette. For more information, visit cola.unh.edu/berlin.

**Intensive Language Courses through the Goethe Institut**
Students needing to advance rapidly in proficiency beginning at any level and at any time of year may enroll at a Goethe Institut center in Germany for courses ranging from eight to 16 weeks and receive UNH equivalent credit depending on level of exam passed upon completion of course. UNH’s faculty contact is Charles Vannette, (603) 862-0063, or the Global Education Center, (603) 862-2398, or study.abroad@unh.edu.

**German Internship**
Students who have completed GERM 504 Intermediate German II or equivalent may apply for a 4-8 credit internship placement in a German-speaking firm or organization. The internship does not alone fulfill the study abroad requirement for the major, but may count toward the minor and may be coupled with academic course work through UNH or any study abroad program to fulfill the major study abroad requirement. The faculty contact person is Charles Vannette, (603) 862-4005.

**Ghana**

**Ghana Program**
The Ghana Program is a spring semester program at the University of Ghana, one of West Africa's most prestigious universities. With more than 30,000 students at its campus in Legon, a suburb of Accra, Ghana’s capital city, the University of Ghana offers students a broad range of exciting educational and cultural opportunities. Politically stable, safe, and with English as its official language, Ghana provides an excellent vantage point for experiencing sub-Saharan Africa and for a rich and deep study-abroad experience. All courses are taught by University of Ghana faculty in English, and courses are available in a very wide range of fields. For more information, visit cola.unh.edu/ghana.

**Global E3 Engineering Exchange Program**
Global E3 allows engineering students to enjoy a fulfilling study abroad experience at one of 31 international member institutions. Through participation in the program, Global E3 graduates gain the necessary foreign language ability, cross-cultural skills, and professional experience to excel in the multinational/multicultural business environment of the 21st century. Global E3 students pay tuition at their home institution, and enjoy the benefits of attending an overseas one. Students can study abroad for the fall semester, spring semester, or the entire school year. At some member universities, Global E3 students are able to take on a supplemental internship after their study abroad experience. Member institutions include some of the best universities in Argentina, Australia, Austria, China, Denmark, France, Germany, Indonesia, Italy, Japan, Malaysia, The Netherlands, Singapore, South Korea, Spain, Sweden, and United Kingdom. For more information contact the Global Education
Greece
UNH in GREECE SUMMER PROGRAM
The UNH-in-Greece Program is open to any undergraduate at UNH who is interested in the long history of civilization in Greece, from the classical period to the present day. Athens is famous as the most important city-state in ancient times and as the site of some of the world’s most famous and influential architecture and art, but it is also the vibrant capital of modern Greece (The Hellenic Republic), and that combination of antiquity and modernity, as well as the city’s position between West and East, makes it an extraordinary location for on-site, experiential learning.

Students earn a total of 10 credits from courses taught by both UNH and Hellenic American University faculty. The program faculty director is Stephen Trzaskoma. For more information, visit cola.unh.edu/greece (https://cola.unh.edu/greece).

Hungary
Budapest spring justice studies and humanities program
The UNH Budapest Spring Program is open to any student interested in deepening their knowledge of modern European history, culture, and justice systems. Each spring semester a group of students, under the supervision of a UNH faculty member, study at Károli Gáspár University (https://english.kre.hu) of Budapest. Situated along the Danube River, Budapest is an exciting and cosmopolitan city, close to other beautiful European cities such as Prague and Vienna. Under the supervision of a UNH faculty member also in residence, students carry a four-course load, two of which are taught by the UNH faculty member. The program satisfies Historical Perspectives, World Cultures, and, depending on course selection, Humanities and Fine & Performing Arts Discovery Program Requirements. All courses are taught in English. The program is faculty directors are Sue Siggelakis and Stephen Trzaskoma. For more information, visit cola.unh.edu/budapest (https://cola.unh.edu/budapest).

Ireland
ANSC 510 Integration of Culture and Agriculture in Ireland: Past, Present, and Future
What was the worst natural disaster in 19th century Europe? What characterizes Ireland’s agriculture in the 21st century? In this interdisciplinary course, students examine the cultural, historical, political, economic, and religious influences on Ireland’s agriculture. The crowning experience of the course, a 10-day study abroad in late May, provides students with a window to the world as they experience the culture, agriculture, and topography of Ireland. Students will immerse themselves in local Irish history and culture as they tour working agricultural farms and significant landmarks. For more information, contact Patty Bedker (patty.bedker@unh.edu).

Study Abroad in Athletic Training
This UNH study abroad program is open to athletic training majors who are interested in expanding and enhancing their athletic training education while also gaining an appreciation of a different culture. Students will be taking courses in the bachelor of science (honours) in sports rehabilitation and athletic therapy program at the Institute of Technology at Carlow. The increased emphasis on manual therapy application and skill by therapists in Ireland will provide the visiting UNH student with a unique opportunity to develop abilities far-beyond what they may learn in the U.S. Students may earn up to 16 credits applicable to their UNH graduation requirements. Students pay their normal UNH tuition (in-state or out-of-state as appropriate) as the tuition to study in Ireland. Interested students should contact Daniel Sedory (Dan.Sedory@unh.edu), (603) 862-1831.

SW 785 Study Abroad: Comparative Social Welfare Systems / SW 885 Study Abroad
Students studying abroad on SW 785 Study Abroad: Comparative Social Welfare Systems/SW 885 Study Abroad, examine the historical development of social welfare in another country, including an analysis of the underlying values and attitudes that direct practice and policy decisions. This 4-credit class includes agency site visits, lectures, themed readings, and visits to important cultural sites. Prerequisites are SW 424 Introduction to Social Work and SW 525 Social Welfare Policy: History of Social and Economic Justice. Previous programs have visited Ireland, England, Scotland, and Latvia.

Italy
UNH-in-ITALY Program
Semester & Summer Programs. In partnership with the UNH Department of Agriculture, Nutrition & Food Systems, the UNH-in-Italy Program offers students the opportunity to experience living abroad in the medieval city of Ascoli Piceno, for either a four-course, 13-week semester or a two-course, 5-week summer session. The curriculum focuses on the links between food culture, sustainably-focused agriculture, and the policies and issues impacting the food system. Experiential activities, field trips, and group excursions encourage students to immerse themselves in the unique educational opportunity. Students live in apartments in the historic center of the city and take UNH courses taught in English. The program is open to all UNH students and fulfills the International Experience requirement of the EcoGastronomy Dual major. For more information, please contact Jesse Stabile Morrell (jesse.morrell@unh.edu).

EcoGastronomy International Experience, FALL Semester in ASCOLI PICENO, ITALY
All students who declare the dual major in EcoGastronomy spend a full semester abroad, most likely during their junior year. The table is set fall semester in Ascoli Piceno, Italy, where students will study the links between food cultures, sustainably-focused agriculture, and the policies and issues impacting the food system. EcoGastronomy study abroad programs are open to all UNH students.

Rome J-Term Program
The Rome Program provides the opportunity to take a January term course in Rome, Italy. Students earn 4 credits and the Fine and Performing Arts Discovery requirement through CLAS 510 Building Rome or 4 credits and the World Cultures Discovery requirement through ITAL 510: Rome: The Eternal City in Italian Culture. Experience the history, architecture, and art history of the ancient Romans the way they did—in Rome itself! Six days of study in the eternal city followed by two days in Pompeii and other sites will give students a sense of the majesty and miracle that was the ancient Roman Empire. A five-day online component prepares students for the on-site portion so that they will be ready to soak in the monuments of the past. The program faculty director is Scott Smith. For more information, visit cola.unh.edu/rome (https://cola.unh.edu/rome).
Japan
Saitama University Exchange Program
Accelerated Japanese language learning on Saitama University’s park-like campus, just outside Tokyo. With its moderate size (9,000 students), generous scholarship opportunities, dynamic student life and recreation facilities, Saitama is an ideal fit for UNH students interested in Japanese language and culture. The university also has a wide variety of courses taught in English, which draws students from around the world. Saitama is known as the “Oasis of Tokyo”—a historic city whose forests were planted centuries ago by peace-loving Samurais who nurtured the land instead of living by the sword. Saitama is the famous backdrop for Japanese animated films. Tokyo is less than an hour away by train. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

Waseda University Exchange Program
Study abroad at one of Japan’s "Ivy League" universities while paying UNH tuition. Spend a semester or academic year studying in central Tokyo, with over 50,000 students, including 5,000 international students from more than 100 countries. UNH students can enroll in a wide range of courses in English in the liberal arts, business, social sciences, political science and economics, and of course, Japanese language and culture. Waseda has a unique volunteer center, which combines lectures with hands-on activities in the field. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

The Netherlands
Utrecht University Exchange Program
Open to undergraduate and graduate students in all fields, Utrecht University is one of the top research universities in Europe, with the largest undergraduate population and the largest research budget in the Netherlands. The size, status, and international population of the university ensure that courses in all areas of study are offered in English; these include the humanities, social and behavioral studies, law, economics, governance, and geosciences. Utrecht is the fourth largest city in the Netherlands. It has a classically old-Dutch city center with 17th century buildings, a medieval church, several high-quality museums, and terraced canals that encircle the old city. A university town since the medieval period, Utrecht has long enjoyed a vibrant student culture. Utrecht is easily navigable by foot, bicycle, and bus; the center of the Dutch rail system, it enjoys easy access to other cities in the Netherlands and Europe (Amsterdam is 35 minutes away; Paris three hours; London a day trip by plane). Contact the Global Education Center, (603) 862-2398, e-mail international.exchange@unh.edu, or visit http://www.unh.edu/global/outgoing-international-exchange-students.

University College Utrecht Exchange Program
An honors exchange is available at the University College Utrecht (UCU), which is an international Liberal Arts and Sciences Honors College of Utrecht University. UCU’s mission is to offer ambitious students an academic environment aimed at transforming their broad academic and social interests and their international orientation into academic excellence, intellectual independence, and world citizenship. UCU specializes in undergraduate education and students choose from courses in humanities, science, and social sciences. Among the special characteristics are the college’s small classes and individual attention. Students have access to all academic, social, and recreational facilities that Utrecht University has to offer. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

New Zealand
UNH-EcoQuest, New Zealand
In partnership with the UNH Department of Natural Resources and the Environment, the EcoQuest Education Foundation offers an intensive program of applied field studies in ecology, resource management, and environmental policy. New Zealand offers an ideal context for multidisciplinary, field-oriented studies, with its rich cultural traditions, diverse ecosystems, expansive natural areas, and history of innovative approaches to resource management. EcoQuest students engage hands-on in New Zealand’s restoration ecology and sustainable resource management initiatives. Semester participants have the opportunity to carry out directed research projects while working closely with a faculty mentor and in association with New Zealand research partners. The rural seaside campus is located about an hour’s drive southeast of Auckland. Students travel throughout New Zealand’s North and South Islands to learn more about the unique ecosystems and local culture.

Students may choose either a four-course, 15-week fall or spring term for 16 credit hours, or a two-course, five-week summer session for eight credit hours. The UNH-EcoQuest Academic Program Coordinator is Kimberly Babbitt. Contact Donna Dowal, EcoQuest Director of Admissions, at (603) 862-2036 or ecoquest@unh.edu for more information.

Russia
Russia Program
This is a four-week summer program in Russian language, culture, mythology, and propaganda in Moscow, St. Petersburg, and on the Trans-Siberian Railway. Studying in the current and former capitals of Russia and the largest city in Europe gives students a profound image of the country, its language, and culture, as well as an overview of recent and ancient history. It is an opportunity for an intensive dose of authentic Russian culture. Prior to departure, students will work on Blackboard with readings and films. In Moscow and St. Petersburg, there will be field trip classes and special lectures. Upon return, students will complete their work on Blackboard and on a project. Students will earn 8 credits through RUSS #425 Introduction to Russia: Contemporary Society and Culture (Discovery World Cultures) and RUSS 525 Russia: Mythology and Propaganda (Discovery Historical Perspectives). The program faculty director is Arna Bronstein. For more information, visit cola.unh.edu/russia (https://cola.unh.edu/russia).

South Korea
Pusan National University Hong Kong Exchange Program
Study abroad in Busan, South Korea’s beautiful second city, known for its beaches, mountains, and temples. Pusan National University is one of Korea’s leading research universities and provides a full curriculum of 600 courses offered in English for UNH students of most majors. Pusan is particularly well known for business, STEM fields, and global studies, as well as its campus life and extra-curricular opportunities. Summer study is available. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.
Spain
Granada Program
The Granada Program is a spring semester program in Granada, Spain. The program is designed for those who have completed SPAN 631 Advanced Conversation and Composition I or its equivalent and have a B average in Spanish, but may be open to intermediate-level students by petition. Many of the courses taught by professors from the University of Granada fulfill requirements for the Spanish major and minor and UNH Discovery Program requirements. Students generally live with host families and take courses at the Centro de Lenguas Modernas at the Universidad de Granada. The program faculty director is Lina Lee. For further information, visit cola.unh.edu/granada (https://cola.unh.edu/granada).

Universidad Carlos III de Madrid Exchange Program
Study abroad in Madrid, Spain's historic and artistic capital that never sleeps. Universidad Carlos III de Madrid, named after a former king of Spain, offers a dynamic campus of 18,000 students and the largest offering of courses taught in English in Spain. Courses are available in the areas of engineering, business (AACSB accredited), finance, accounting, economics, and political science. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

U.S. Territories (Puerto Rico, U.S. Virgin Islands, and Guam)
NATIONAL STUDENT EXCHANGE
Students may spend one or two semesters at one of 12 campuses in the U.S. Territories of Puerto Rico, U.S. Virgin Islands, and Guam through the National Student Exchange (NSE) program. Participants maintain their status as UNH students, pay UNH tuition, and will be eligible to graduate from UNH on schedule. The exchange is open to students from all UNH majors. Participants must provide proof of proficiency in Spanish for all campuses in Puerto Rico. For more information contact, Paula DiNardo, Study Away USA office, Hood House, (603) 862-3485, or visit www.unh.edu/nse (http://www.unh.edu/nse).

United Kingdom
England
Cambridge Program
For six weeks each summer, students from across the United States have the opportunity to participate in the UNH Cambridge Summer Program held at Cambridge University in England. Program participants choose from courses in literature and the humanities taught by faculty from Cambridge University and UNH. Students live and study at Gonville and Caius College, one of the oldest colleges at Cambridge University, and travel on excursions throughout the UK. The program is open to students who have successfully completed at least one year of college. Participation fulfills UNH's Discovery Program requirement in World Cultures. Select courses also satisfy Humanities and Historical Perspectives Discovery Program Requirements. The program faculty director is Monica Chiu. For more information, visit cola.unh.edu/cambridge (https://cola.unh.edu/cambridge).

Lancaster University Exchange Program
Lancaster University is a comprehensive university similar to UNH in size, setting, and program offerings. The program allows students to spend a semester or a year in Lancaster while still making normal progress toward their UNH degree. Lancaster enjoys a diverse campus and is centrally located for travel to Scotland, Wales, Ireland, and London. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu, or visit http://www.unh.edu/global/outgoing-international-exchange-students.

London Program
The London Program offers students the chance to spend the spring semester at Regent’s University in the heart of London, choosing from courses in British studies, the arts, humanities, social sciences, business, and a wide range of other basic subjects. Taught by British and American faculty members, many of the courses are specifically concerned with British studies or have a special British emphasis. The program faculty director is Sue Hertz. For more information, visit cola.unh.edu/london (https://cola.unh.edu/london).

The London Experience
This course provides a wonderful opportunity to learn about one of the greatest cities in the world. Travel to the United Kingdom for nine nights/ten days during the January term. See the many amazing historical and cultural sights and take in some of the best theatre in the English-speaking world. The course offers insight into the politics, society, and culture of London and the United Kingdom as students walk, tube, and double-decker bus their way through 2000 years of history. The 4-credit class fulfills the Fine and Performing Arts Discovery requirement. This program faculty director is David Kaye. For more information, visit cola.unh.edu/london-experience (https://cola.unh.edu/london-experience).

London Travel Writing
Travel writing is for the adventurous. In three weeks, students will learn to navigate London, one of the world’s greatest cities, and craft compelling, vivid essays about what they’ve discovered. Through curiosity, research, and writing they will transcend from tourist to traveler, gaining a confidence in their ability to master the unfamiliar as well as pen publishable stories about place. Prerequisite of ENGL 501 Introduction to Creative Nonfiction or permission of instructor. This program faculty director is Susan Hertz. For more information, visit cola.unh.edu/london-writing (https://cola.unh.edu/london-writing).

Northern Ireland, Scotland, England
HLS 750, Emergent Topics in Homeland Security/ Homeland Defense / HIST 600, Emergent Topics
Students can combine their interests in security studies and history with travel this summer through a study broad course to Belfast, Edinburgh, Bath and London. The 17-day trip will explore homeland security challenges facing the UK. The course will focus on the Troubles in Northern Ireland during the late 20th century, including the struggle for Irish independence, and the broader responses of the UK to domestic security threats from World War II to present times. Students will spend the first two weeks of the summer term in class on the Manchester campus before traveling with the faculty to Northern Ireland, Scotland, and England. In addition to lectures, field trips and excursions, students will participate in a two-day British International Studies Association (BISA) conference in Bath. For more information contact James Ramsay (james.ramsay@unh.edu?subject=summer study abroad), professor
of security studies, or Kristen Woytonik (Kristen.Woytonik@unh.edu? subject=Summer study abroad information), history lecturer.

Scotland

Heriot-Watt University Exchange Program

College of Engineering and Physical Sciences students are eligible to participate in a spring semester exchange with Heriot-Watt University in Edinburgh, Scotland. Heriot-Watt is one of the UK’s leading universities for business and industry and has a reputation for innovative education, enterprise, and leading-edge research in science, business, engineering, and design. Often referred to as Scotland’s international University, a third of on-campus students in Scotland come from outside the UK, there are campuses in Dubai and Malaysia, and 50 international academic learning partners in 30 countries. The current program is designed for civil and environmental engineering majors. Contact the Global Education Center, (603) 862-2398, e-mail international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

Wales

Cardiff University Exchange Program

Study abroad at one of the UK’s “Ivy League” universities while paying UNH tuition. Founded in 1883, Cardiff University is recognized as one of the leading research and teaching universities in the UK and a member of the Russell Group, the UK’s “Ivy League” of world-class universities. Spend a semester or academic year studying at Cardiff and benefit from learning with professors who are pioneers in their fields. Over 27,000 students have been drawn to Cardiff University, coming from Wales, the rest of the UK and more than 100 countries. UNH students can enroll in a wide range of courses and are guaranteed housing in student halls of residence, living among British and other international students. Cardiff is an excellent match for majors in music, computer science, communications, and journalism. The University boasts over one hundred clubs, sporting teams, and societies. Cardiff University is located in the center of the capital of Wales, an exciting and diverse city and the heart of Welsh history, culture, street life, and politics. There is something for everyone in the Welsh capital, with the excitement of the small city campus located just minutes from the beautiful coastlines, hills, walking trails, and green countryside for which Wales is famous. Contact the Global Education Center, (603) 862-2398, email international.exchange@unh.edu or visit http://www.unh.edu/global/outgoing-international-exchange-students.

https://www.unh.edu/global/

New Hampshire Consortium (NHCUC) Student Exchange Program

Under the Student Exchange Program of the New Hampshire College and University Council (NHCUC), UNH students may be eligible to enroll for one course per semester, one full semester of courses, or a full year of coursework at a member school on a space-available basis. The NHCUC exchange allows matriculated undergraduates to use educational resources that are not available at the home campus and are considered appropriate for their degree programs. Approval of the UNH academic adviser and exchange coordinator is required, and students must meet all UNH Study Away eligibility standards. Institutions in the NHCUC consortium include Colby-Sawyer College, Franklin Pierce University, Hellenic American University, New England College, New Hampshire Institute of Art, Southern New Hampshire University, Rivier College, Saint Anselm College, UNH Durham, UNH Manchester, Keene State College, and Plymouth State University. Students will remain as degree candidates and continue to pay normal UNH tuition and fees, but must make their own room and board arrangements if they plan to spend a full semester at another consortium school. For more information and application forms, students should contact the Study Away USA office, Hood House, (603) 862-3485, National.Student.Exchange@unh.edu (national.student.exchange@unh.edu), or visit www.unh.edu/nse. (http://www.unh.edu/nse)

Further information and application forms, students should contact the Study Away USA office, Hood House, (603) 862-3485, National.Student.Exchange@unh.edu (national.student.exchange@unh.edu), or visit www.unh.edu/nse. (http://www.unh.edu/nse)

New England Land-Grant Exchange Program

In order to provide students at the New England land-grant universities with expanded access to unique programs and faculty expertise, the institutions have agreed to encourage student exchanges of one, but not more than two, semesters. To qualify, students must identify a course or combination of courses related to their area of academic interest and not available on their home campus, be degree candidates in good standing with at least a 2.5 grade-point average, be at least first-semester sophomores, and receive permission from the appropriate university exchange authorities at both the home and host institutions. Interested
students should contact the Study Away USA office, Hood House, (603) 862-3485.

Semester in the City
UNH offers eligible undergraduate students the opportunity to spend a semester in Boston in a rigorous 30+ hour per week internship with a leading social change organization (nonprofit, business, or public sector). Students are matched with internships in community development, social justice, health, education, environment, and other areas dedicated to the public good. This 16-credit study away program includes an intensive evening course that examines the theory and practice of various social change approaches, and a series of Friday seminars and reflective workshops, thereby equipping a new generation of leaders who understand both direct and systemic approaches to social and environmental change. Participants pay their UNH tuition, and pay housing costs to the host organization if they utilize their housing.

In order to apply, students should contact the UNH Center for Social Innovation and Enterprise, 603.862.3697 or visit www.unh.edu/semesterinthecity. (http://www.unh.edu/social-innovation/semesterinthecity)

The Washington Center for Internships & Academic Seminars
Since 1976, UNH has affiliated with The Washington Center (TWC), to offer a rigorous full-time substantive internship and academic opportunities in Washington, D.C. Students enroll in 16-credits in fall or spring semester, or 12-credits in summer. Students intern four days per week, enroll in one upper-level evening course, and attend a full-day professional development seminar and speaker series on Friday. There are countless internship and networking opportunities for all majors, including in the law, government, media, public policy, international affairs, the environment, health care, law enforcement, and much more. Participants pay their UNH tuition, and pay housing costs to The Washington Center, if they utilize their housing.

In order to apply, students must meet all UNH Study Away Eligibility Requirements including but not limited to being full-time undergraduate degree candidates in good standing with at least a 2.5 grade-point average (above 2.75 is strongly preferred). Interested students should contact the Study Away USA office, Hood House, (603) 862-3485 or visit www.unh.edu/washington (http://www.unh.edu/washington).

Sustainability
Sustainability is about balancing environmental stewardship, social well-being, and economic vitality to meet our present needs while ensuring the ability of future generations to meet their needs. At its core, sustainability is a collective commitment to valuing human dignity for all people and ensuring ecological integrity of places that support us.

Students from any UNH college or major can pair the sustainability dual major with their first major. You’ll learn to analyze, evaluate, and create new ideas and models around sustainability. As a cross-disciplinary and applied field of study and practice, you’ll make connections across issues of science and ethics, policy and technology, and culture and history to better understand and take action on pressing issues of our time. Solving real-life problems requires the skills and perspectives of people from multiple disciplines and backgrounds. A sustainability dual major provides the skills and knowledge needed to understand these systems, identify relevant environmental and social issues, and become agents of change in a complex world.

Sustainability dual major (SDM) students will:

Comprehend grand challenges
Students will gain knowledge of the fundamental aspects of sustainability challenges, such that they understand the problems and develop solutions to complex issues.

Think in systems
Students will have an ability to analyze and synthesize the interconnections among environmental, social, and economic aspects of complex systems, as well as how problems manifest at different scales (local to global) and at different times (connections between past, present, and future).

Advocate for values
Students will be able to identify, assess, respect, and navigate the diverse values, interests, and types of knowledge inherent in sustainability challenges, while simultaneously addressing power imbalances and promoting social justice.

Apply knowledge to a lifetime of action

Personal practice: Students will understand how sustainability impacts their lives and can assess how their actions impact sustainability at personal, institutional, and societal levels.

Professional practice: All students will, regardless of major, understand how their professional work contributes to sustainable communities, and can apply disciplinary and other forms of knowledge to contribute to sustainable solutions.

Interpersonal practice: Students will learn how to collaborate across disciplines and across stakeholder groups to jointly determine project goals, create knowledge, and develop solutions to sustainability challenges.

THOMPSON SCHOOL OF APPLIED SCIENCE

The Thompson School of Applied Science (TSAS), established in 1895, is an academic unit of the College of Life Sciences and Agriculture (COLSA) offering the associate in applied science degree in three program areas. Curricula comprise a balance of professional, science-related, and general education courses that prepare students to meet the specific demands of a technical or applied profession, continuing education, and the general demands of life.

The Thompson School of Applied Science offers dedicated professional faculty who deliver a career-relevant education for students who want an associate degree; students who value a college education combining hands-on experiences and academic knowledge in a small learning environment within the campus of the University of New Hampshire.

Thompson School faculty and staff are committed to educate, train, and retain students to be entrepreneurs, to be solid in their knowledge, to be competent in acquired skills and to be aware of the communities they impact. This is accomplished through the development of mentorships with faculty and advisors, business and industry partnerships, unique programs of study with relevant facilities, and excellent job placement.

**Thompson School of Applied Science Overview**

Faculty members at the Thompson School have significant work experience in industry and business; extensive and up-to-date knowledge of their specialties; ongoing contacts with practicing professionals; dedication to students and to excellence in teaching; and a commitment to practical, science-based education. They work closely with students, providing academic advising, career counseling, and special assistance, even outside the classroom, when needed.

Detailed information on our various program areas and concentrations follow.

- **Applied Animal Science** students with a concentration in animal agriculture prepare for a successful career in animal production and management, whether working on a farm or in a related business. Students handle farm animals starting week one, and develop a strong foundation in the science and business of animal agriculture, including breeding, feeding, health care, law and regulations, housing, and marketing. On-campus facilities include the Thomas P. Fairchild Dairy Teaching and Research Center (https://colsa.unh.edu/nhaes/fairchild) and UNH’s Organic Dairy Research Farm (https://colsa.unh.edu/nhaes/odrf).

  **Beginning in the 2018-2019 academic year, the Applied Animal Science: Companion Animal Science Concentration and Applied Animal Science: Equine Management Concentration programs will no longer be accepting new students. Current Thompson School students in these programs will continue to have access to the same high-quality education and resources until they graduate in 2019.**

- **Civil Technology**: Beginning in the 2018-2019 academic year, the Civil Technology: Construction Management Concentration, Civil Technology: Surveying and Mapping Concentration and Civil Technology: Sustainable Energy Management Concentration programs will no longer be accepting new students. Current Thompson School students in these programs will continue to have access to the same high-quality education and resources until they graduate in 2019.

- **Culinary Arts and Nutrition**: Beginning in the 2018-2019 academic year, the Culinary Arts and Nutrition: Baking and Pastry Arts Concentration and the Culinary Arts and Nutrition: Culinary Arts Concentration programs will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

- **Forest Technology** students integrate all aspects of forest management as they complete projects on more than 3,000 acres of University land (http://colsa.unh.edu/woodlands). Using the school’s sawmill and harvesting equipment, they contribute to the sustainable management of UNH lands. In the classroom and the forest, they develop skills and techniques critical to the future ecological and economic health and management of the natural resources of the state and region. Students are expected to enhance class work with an extensive work experience requirement. The educational program in Forest Technology leading to the Associate in Applied Science degree is accredited by the Society of American Foresters (http://www.eforester.org) (SAF). The Thompson School’s Forest Technology program was the first two-year program in the U.S. to complete the accreditation process.

- **Horticultural Technology**: Beginning in the 2018-2019 academic year, the Horticulture Technology: Landscape Construction and Management program and Horticulture Technology: Plant Production program will no longer be accepting new students. Current Thompson School students in these programs will continue to have access to the same high-quality education and resources until they graduate in 2019.

- **Integrated Agriculture Management**: Beginning in the 2018-2019 academic year, the Integrated Agriculture Management program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

- **Veterinary Technology** students have the unique opportunity to work with both small and large animals at UNH and have access to professional facilities both on and off campus. On-campus facilities include the Thompson School PAWS Veterinary Clinic, Thomas P. Fairchild Dairy Teaching and Research Center (https://colsa.unh.edu/nhaes/fairchild), UNH’s Organic Dairy Research Farm (https://colsa.unh.edu/nhaes/odrf), and UNH’s equine facilities (https://colsa.unh.edu/facility/equine-facilities). The program also partners with the New Hampshire SPCA (http://www.nhspca.org) (Stratham, N.H.), Cocheco Valley Humane Society (http://www.cvhsonline.org) (Dover, N.H.), and Pope Memorial SPCA (http://www.popememorialsPCA.org) (Concord, NH). The program is accredited by the American Veterinary Medical Association (https://www.avma.org/Pages/home.aspx) (AVMA). Students who graduate from an accredited program are eligible to take the Veterinary Technician National Exam (VTNE) to become a credentialed veterinary technician.

**Associate in Applied Science**

To graduate with an associate in applied science degree, a student must complete 20 credits of Discovery (general education) coursework with an overall grade-point average of no less than 2.0. In addition, students must earn a minimum of 64 credits (more than 64 credits may be required depending on the program of study).
Admissions

The Thompson School welcomes applications from both recent high school graduates and non-traditional (adult) students.

Admission to an associate in applied science degree program is based upon successful completion of a secondary school program of college preparatory coursework or its equivalent. Primary consideration is given to the candidate’s academic record, as demonstrated by secondary school course selections and achievement, recommendation, and the results of the SAT and/or ACT exam. Consideration is also given to the applicant’s personal motivation, demonstrated interest in a career field, and leadership roles.

For most programs, candidates must, at a minimum, present a solid college preparatory program including at least four years of English, three years of mathematics (one of which must be Algebra I, Geometry, and/or Algebra II), two years of science (biology with a lab, being one of them), and three years of social science. The majority of students are admitted with three years of both college-prep mathematics and science. Some programs have more specific requirements, which are included in the appropriate sections of this catalog.

For a non-traditional student who graduated from high school several years ago, the Office of Admissions will consider not only his or her academic record but also accomplishments since high school. Important factors include professional work and advancement and motivation to succeed in Thompson School courses. In addition, applicants will be considered on the basis of any available test scores such as General Education Development (GED), SAT or ACT, and College Level Examination Program (CLEP) exams; letters of reference; previous college study; and military record (if applicable). Non-traditional students who have been out of high school for a number of years may request the Office of Admissions waive the SAT requirement.

Transfer students are welcome at the Thompson School. Upon admission to UNH, the Office of Admissions will complete an official credit evaluation and inform the student of the total credits transferred and any general education requirements that have been fulfilled. Please note that it is up to each Thompson School academic program to determine which courses from other institutions will be accepted towards fulfilling major requirements. Transfer students often fulfill program or general education requirements by transferring in credits of unequal value (i.e. transfer in a 3-credit class from elsewhere to meet the requirements of a 4-credit UNH class). Students who do this must pay special attention to ensure they accrue at least the minimum 64 credits overall, meet general education requirements (20 credits), and meet technical concentration, grade point average, and elective requirements for their program.

How to Apply

Most first-year and transfer applicants to UNH’s Thompson School of Applied Science must submit the Common Application to be considered for admission. Veterans, non-traditional students, and N.H. community college transfer students have a slightly different application process.

Although UNH will accept the paper-version of the application, students are strongly encouraged to submit the application electronically through the Common Application website, www.commonapp.org (http://www.commonapp.org), as this expedites the process (99 percent of students submit their applications electronically). These same options are available to students applying from countries other than the United States.

The electronic version of the Common Application may be submitted from August, once the Common Application opens, through April 1. The Early Action due date is November 15. Notice of admission to the Thompson School will normally be sent within 30 days following receipt of all required information. Housing may not be guaranteed if application is received after February 1. When applying from April 2 through July 15, the PDF (paper) application must be submitted.

Please note that priority due dates for students requesting UNH residential housing are February 1 for the fall semester and November 1 for the spring semester. Housing assignments are handled on a space-available basis. The UNH Financial Aid due date is March 1 for the following academic year.

Campus Visits

Prospective students are encouraged to attend an open house, and/or take a tour of the Thompson School and the rest of the UNH campus. An open house/prospective student day is held in the fall, and campus tours can be arranged through the Office of Admissions.

Expenses, Financial Aid, and Scholarships

Costs for students include tuition, fees, room and board, books and supplies, and personal and travel expenses. These costs are the same for any student enrolled at the University of New Hampshire (see Fees and Expenses), and students majoring at the Thompson School have access to the same student services. (See also Campus Life, Programs and Services for Students, and Health Services.)

Information about scholarships, loans, and work-study is located at http://financialaid.unh.edu/ or by calling (603) 862-3600. A Free Application for Federal Student Aid (FAFSA) must be processed by the Financial Aid Office by March 1 of each year for a student to be considered for several scholarships for the following academic year. (See also Financial Aid.)

New England Regional Student Program

The Thompson School at UNH participates in the New England Regional Student Program of the New England Board of Higher Education, through which each state university system in New England offers a number of regional curricula to students from other New England states. Under this program, students pay in-state tuition plus 75 percent. See the following table for Thompson School programs that are eligible in 2017-2018. Eligibility under this program may vary from year to year, so it is suggested that you obtain further information by contacting:

The New England Board of Higher Education
45 Temple Place
Boston, MA 02111
(617) 357-9620

You may also contact the UNH Office of Admissions (http://www.unh.edu/main/admissions) for more information.

Transfer Opportunities
UNH invites Thompson School graduates to continue their education at the University. Many of the associate degree programs offered by the School have baccalaureate degree counterparts. Specifically, these counterparts include animal science, forestry, and sustainable agriculture and food systems. Many other baccalaureate majors also are available. A final cumulative grade-point average of at least 2.5 is required for transfer to most programs; some UNH baccalaureate programs require a higher cumulative grade-point average. Successful completion of a baccalaureate degree usually requires a minimum of two years of additional study at the University. Other colleges and universities, especially those within the University System of New Hampshire, also welcome graduates from the Thompson School.

Programs of Study
- Applied Animal Science (AAS) (p. 367)
- Civil Technology (CT) (p. 372)
- Culinary Arts and Nutrition (CAN) (p. 376)
- Forest Technology (FORT) (p. 379)
- Horticultural Technology (HT) (p. 380)
- Integrated Agriculture Management (IAG) (p. 383)
- Veterinary Technology (VTEC) (p. 385)

Applied Animal Science (AAS)
Applied animal science (AAS) provides students with hands-on practical skills combined with knowledge and understanding of the latest technology. The core program offers a solid background in anatomy, physiology, nutrition, health, and animal breeding. The curriculum is focused on animal agriculture and emphasizes decision-making, technologies, and processes that address the realities of modern agriculture.

Practical learning experience is provided at the Thomas P. Fairchild Dairy Teaching and Research Center (https://www.colsa.unh.edu/nhaes/fairchild) and the UNH Organic Dairy Farm (https://colsa.unh.edu/nhaes/odrf). The Thompson School also operates its own veterinary clinic and biology laboratories. The curriculum has a number of animal-related educational partnerships that include field trips to numerous animal-related businesses.

Programs
- Applied Animal Science: Animal Agriculture Concentration (A.A.S.) (p. 367)
- Applied Animal Science: Companion Animal Science Concentration (A.A.S.) (p. 369)
- Applied Animal Science: Equine Management Concentration (A.A.S.) (p. 371)

Faculty
https://colsa.unh.edu/thompson-school-applied-science/people

Applied Animal Science: Animal Agriculture Concentration (A.A.S.)
https://colsa.unh.edu/tsas/aas/animal-agriculture

Description
The production of meat, milk and fiber from animals is expected to continue to grow for decades to come. Students interested in working in the highly technical, rapidly changing field of farm animal production and management, must become well versed in the many species of farm animals, including breeding, feeding, health care, housing and marketing. In the animal agriculture concentration, students apply many of the skills learned in the classroom on farms in the first few semester of the program. Students learn to work safely with farm livestock and poultry. They visit farms and engage in hands-on activities with their instructors. Students will learn to balance rations, identify and treat diseases, learn to design appropriate buildings, fences, and properly take of the land and environment necessary to support farm animals. Students visit and interact with nearby farms with beef, sheep, goats and swine.

Students also have the opportunity to work and study at the University’s farms. UNH maintains two modern and well-equipped dairy teaching and research centers, and as an option students interested in dairy cattle can also collaborate to manage the CREAM (Cooperative for Real Education in Agriculture) (http://colsa.unh.edu/thompson-school-applied-science/cream) herd. All students will also study at the UNH Organic Dairy Research Farm (http://www.colsa.unh.edu/nhaes/odrf). Students will have the chance to also work with horses, sheep, and poultry on campus.

Students learn the business of farming through field exercises in land management, forage production, financial management, and computer use on a farm as well as through continued practical experience with farm livestock, poultry and dairy cattle. The program prepares students to work both on the farm and in related businesses.

The Thompson School’s Animal Agriculture program is in a unique position with the baccalaureate animal science major. Students may start with the Thompson School program, obtain their associate in applied science (A.A.S.) degree then transfer to a four-year major and obtain a B.S. in two to two additional years with a full-time course of study. This allows students to receive two degrees in as little as four years or obtain their A.A.S. degree and work in the field to later return for a B.S. Students wishing to follow this course of action need to work closely with their adviser and maintain a grade of C or better in key applied animal science courses.

Career Opportunities
Herd manager, agricultural sales and/or service employee, farm manager, artificial insemination (AI) technician, crop manager, farm owner, or farm-business owner.

Requirements
Applicants to the applied animal science program area must present four years of college preparatory English and at least two years, preferably three years of satisfactory work in college preparatory
science (one of the sciences being biology, with a lab). One year of laboratory college preparatory chemistry is highly recommended. Also required are three years of Social Science, and three years of college preparatory Mathematics, and SAT/ACT.

Applied Animal Science Curriculum Standards

Applied Animal Science (AAS) students must maintain a minimum 2.0 cumulative grade-point average in AAS classes after two semesters (minimum 26 credits) to take additional AAS classes. Students with AAS averages lower than 2.0 must repeat classes with lower grades and raise their average to the required 2.0 before taking additional AAS classes. Students must have a minimum cumulative 2.0 grade-point average in AAS classes to qualify for graduation from the program.

All Applied Animal Science students are required to take:

Applied Animal Science: Companion Animal Science Concentration (A.A.S.)

https://colsa.unh.edu/thompson-school-applied-science

**Description**

Beginning in the 2018-2019 academic year, the Applied Animal Science: Companion Animal Science Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

Animal companionship provides millions of people with an oasis in a hectic, impersonal world. Pet owners consistently seek quality professional services for pets that are often considered members of the family. The companion animal science concentration prepares students to work in specialized areas by choosing one of two tracks; Applied Animal Behavior or Veterinary Assisting and Animal Management. Both tracks focus on traditional companion animals such as dogs, cats, along with other domestic species. Actual field and work/volunteer experience takes place the second year along with academic coursework. Through local partnerships, all tracks complete a capstone course supporting the individual care and population management of community shelter animals.

Additionally, each track aligns with professional industry organizations’ learning objectives and skills for certification after graduation. Depending on the organization and student, additional applied hours may be required before a certification exam may be taken. Organizations include but are not limited to: Certification Council for Pet Dog Trainers and Behavior Consultants, International Association of Animal Behavior Consultants, International Professional Groomers, and the National Association of Veterinary Technicians in America that provide certification for veterinary assistants.

Companion animal science is a diverse career area that requires specialized knowledge and applied skills. We look forward to guiding students onto the correct career pathway and/or preparing for them to meet future academic goals.

**Career Opportunities**

Animal control, animal sheltering and rescuing, ownership or management of companion animal businesses, pet groomer, animal training and behavior, veterinary assistant, animal caregiver, animal-assisted activities/therapy volunteer and/or coordinator.

**Requirements**

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Applied Animal Science Companion Animal Science program.

Companion Animal Science, Applied Animal Behavior students are required to take:

Applied Animal Science: Equine Management Concentration (A.A.S.)
https://colsa.unh.edu/thompson-school-applied-science

Description

Beginning in the 2018-2019 academic year, the Applied Animal Science: Equine Management Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

The equine industry in New England encompasses many different types of facilities and disciplines. Students in the equine management concentration combine courses utilizing the most recent technical information with related practical experience. They gain hands-on experience in bandaging, selection, ration-balancing by computer, fitting and care of equipment, and farm and barn analysis. They also acquire decision-making and managerial skills through the organization and running of a combined test competition each spring. Graduates have a solid foundation to pursue either employment or additional educational opportunities upon completion of the program.

The riding focus at UNH is balance seat with schooling in dressage, cross country, and stadium jumping. Thompson School students in horsemanship classes ride in the UNH program and have the opportunity to try out for the award-winning Intercollegiate Horse Show Association (IHSA) (http://colsa.unh.edu/ihsa) or Intercollegiate Dressage Association (IDA) (http://colsa.unh.edu/ida) teams.

Students who plan to continue their college education in a four-year major are encouraged to express their interest to their advisor. Together, student and adviser can develop a sequence of courses that will assist with the transition from the two-year to four-year degree program.

Career Opportunities (directly out of the associate degree program)

Horse and farm manager, sales (tack shops, grain companies, among other industries), horse show manager, veterinary assistant/equine practice, or riding instructor (with additional studies), and several graduates have been employed in the insurance industry.

Graduates have become animal control officers, have worked with mounted police units, and have worked at the NHSPCA.

Several graduates have gone on and earned their Bachelor degrees in several different majors, and others have earned their Masters degrees. Several have dual majored in education and have become agricultural vocational educational teachers.

Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Applied Animal Science Equine Management program. Equine Management students are required to take:

Civil Technology (CT)

Beginning in the 2018-2019 academic year, the Civil Technology: Construction Management Concentration, Civil Technology: Surveying and Mapping Concentration and Civil Technology: Sustainable Energy Management Concentration programs will no longer be accepting new students. Current Thompson School students in these programs will continue to have access to the same high-quality education and resources until they graduate in 2019.

Civil technology is a dynamic educational opportunity offering skill-based learning through classroom instruction, extensive hands-on laboratory experience and fieldwork, as well as opportunities to develop a strong portfolio. Students choose from one or more of the following concentrations: Construction Management, Surveying and Mapping, or Sustainable Energy Management.

The cornerstone of the educational experience is instruction in computer-aided design (CAD) and parametric modeling using the Thompson School’s state-of-the-art CAD/GIS/BIM (building information management) labs. Students in surveying use the latest GPS and surveying equipment, and students studying geographical information systems (GIS) use the new GIS Instructional Lab. Additional coursework covers building science, building mechanical and electrical systems, construction contracting, materials, soils and foundation design, and methodologies of professional practice in the concentrations.

Admissions Requirements

Applicants to the construction management, surveying and mapping, and sustainable energy management concentrations must present college preparatory English and at least two years of satisfactory work in college preparatory mathematics.

Curriculum Fee

Civil technology, all concentrations: $102

1 This one-time curriculum fee is required to cover lab materials, specialized equipment maintenance, and transportation that are unique to the applied nature of the concentration. The curriculum fee covers the entire two-year course of study for one concentration. Any non-TSAS student may be assessed specific course fees, details of which are included in each semester’s Time and Room Schedule. All fees are subject to change.

Description

Beginning in the 2018-2019 academic year, the Civil Technology: Construction Management Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

In the Construction Management concentration, students prepare for careers in land development, construction contracting and management, and land-use planning. Students learn not only how to build well but how to build wisely. They study construction and its related technologies, dealing with material selection and design, and design of foundation and drainage systems. They also examine environmental and land development issues by studying residential and commercial septic, waste disposal, and municipal environmental systems, recycling, and effective energy management. Some graduates elect to continue their education in Bachelor of Science programs in civil engineering or community development.

Graduates of the construction management concentration find employment in a variety of building industry-related positions.

Career Opportunities

Construction supervisor, project manager, cost estimator, public-works employee, contractor, code-enforcement officer, construction-material tester, land-development planning employee, site evaluator for building components, construction product manufacturer, product representative, or DOT engineering technician.

Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Civil Technology Construction Management program. Construction Management students are required to take:

Civil Technology: Surveying and Mapping Concentration (A.A.S.)

https://colsa.unh.edu/thompson-school-applied-science

Beginning in the 2018-2019 academic year, the Civil Technology: Surveying and Mapping Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

As land values increase and the need to use our natural resources efficiently while protecting our environment becomes more critical, the role of surveyors is expanding. The Surveying and Mapping concentration contains a core sequence of six courses (from Introductory Surveying to the Legal Aspects of Surveying) that continuously challenge students to improve their technical knowledge, computer skills, and field competency. Using electronic field measuring equipment, computers to create and plot maps, satellite positioning technology, and laser scanning, the surveyors and mappers of today are at the forefront of acquiring, analyzing, and managing land information. Graduates are prepared to sit for the Fundamentals of Surveying exam (http://ncees.org/surveying/fs) as a first step in getting licensed as a land surveyor in New Hampshire.

Career Opportunities
Licensed land surveyor, DOT engineering technician, GIS technician, land-development planner, construction surveyor, or GPS technician.

Requirements
Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Civil Technology Surveying and Mapping program. Surveying and Mapping students are required to take:

Civil Technology: Sustainable Energy Management Concentration (A.A.S.)

https://colsa.unh.edu/thompson-school-applied-science

Description

Beginning in the 2018-2019 academic year, the Civil Technology: Sustainable Energy Management Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

Energy efficiency and renewable/sustainable energy sources are topics at the forefront of today's society. In the Sustainable Energy Management concentration, students learn the basics of sustainable and renewable energy sources, relevant energy management principles in the construction industry, minimizing our environmental impact, and the proper implementation of these energy options. Students will start with foundation courses to build a broad, interdisciplinary base of knowledge and skills in science, engineering, technology, design, analysis, and communication. From the first semester, students have access to state-of-the-art mapping and surveying gear, advanced CAD, GIS, and 3D modeling software, as well as significant facilities and equipment used in traditional construction. In keeping with the Thompson School's heavy emphasis on experiential and field work, the program offers numerous hands-on experiences to apply concepts learned in the classroom.

Graduates of the Sustainable Energy Management concentration will have the necessary skills and experience to fill the green energy jobs of the future.

Career Opportunities

Residential/commercial energy auditor, solar/wind/geothermal/biomass energy system sales, designer, installation and service technician, sustainable energy advocate, green building project manager

Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Civil Technology Sustainable Energy Management program. Sustainable Energy Management students are required to take:

## Culinary Arts and Nutrition (CAN)

**Beginning in the 2018-2019 academic year, the Culinary Arts and Nutrition: Baking and Pastry Arts Concentration and the Culinary Arts and Nutrition: Culinary Arts Concentration programs will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.**

The culinary arts and nutrition (CAN) program offers concentrations in culinary arts and baking and pastry arts. The culinary arts program is accredited by the American Culinary Federation Education Foundation Accrediting Commission (ACFEFAC).

### Admissions Requirements

Applicants to culinary arts must present college preparatory English and a minimum of two years of satisfactory work in college preparatory mathematics.

### Curriculum Fee

Culinary arts and nutrition, culinary arts: $588\(^1\)

\(^1\) This one-time curriculum fee is required to cover lab materials, specialized equipment maintenance, and transportation that are unique to the applied nature of the concentration. The curriculum fee covers the entire two-year course of study for one concentration. Any non-TSAS student may be assessed specific course fees, details of which are included in each semester's Time and Room Schedule. All fees are subject to change.

Culinary Arts and Nutrition: Baking and Pastry Arts Concentration (A.A.S.)

https://colsa.unh.edu/thompson-school-applied-science

Description

Beginning in the 2018-2019 academic year, the Culinary Arts and Nutrition: Baking and Pastry Arts Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

Educated consumers are building demand for real foods, moving away from processed, commercially prepared industrial baked foods into appreciation and recognition of artisan and skillfully prepared baked goods made using fresh, local products. This trend fits right into the renewed emphasis of farm to table and locally-sourced foods at the Thompson School. In addition, the increase in food allergies among consumers requires today's chefs and bakers to be skilled in the ability to substitute ingredients in order to meet these specific dietary needs. The Baking and Pastry Arts concentration starts with foundation courses to build a broad base of knowledge and skills in food science, nutrition, culinary arts, team work, and communication. Coursework offers ample opportunity for hands-on experiences, especially in the lab courses. Working collaboratively with culinary arts concentration students, baking and pastry arts students will prepare baked goods that will be served in 180 Blue and Stacey's Express, the Thompson School's two on-campus restaurants run by students. Additionally, students will apply their skills in the baking and pastry arts field with a required work experience and in externship to gain valuable real-world experience valued by employers.

Career Opportunities

Baker in diverse environments including commercial, retail, restaurants, hotels, catering operations, and entrepreneurs in small businesses.

Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Culinary Arts and Nutrition program. Baking and Pastry Arts students are required to take:

Culinary Arts and Nutrition: Culinary Arts Concentration (A.A.S)

https://colsa.unh.edu/thompson-school-applied-science
Description

Beginning in the 2018-2019 academic year, the Culinary Arts and Nutrition: Culinary Arts Concentration program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

Students who complete the requirements for the culinary arts concentration are prepared for a variety of positions working as chefs in the hospitality industry. In a program that combines classroom work with practical experience, students learn and explore career opportunities, menu development, cost control, food safety, baking, nutrition, management skills, and general education. Culinary arts students manage and operate two on-campus restaurants that are open to the public. 180 Blue, a fine dining restaurant, and Stacey’s Express, a lunchtime casual dining experience, serve as lab settings where students round out their culinary experience and build their skills as culinarians. Through a unique partnership with University Hospitality Services, students complete rotations in state-of-the-art production kitchens on campus at Holloway Commons. These rotations provide opportunities to develop proficiency in contemporary and classical culinary techniques and cooking methods related to a la carte, banquet, and quantity food production and service. The culinary arts concentration is annually reviewed by its own advisory committee of industry professionals, program faculty, and chef-instructors who revise the curriculum to meet changing industry needs. The culinary arts program is accredited by the American Culinary Federation Education Foundation Accrediting Commission (ACFEFAC). Students who join the American Culinary Federation become certified culinarians after graduating from the Culinary Arts and Nutrition program.

Career Opportunities

Chef in restaurants, hotels, private clubs, theme parks, catering and banquet facilities, destination resorts, cruise ships, corporate chains, and health care facilities.

Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Culinary Arts and Nutrition program. Culinary Arts students are required to take:

Forest Technology (FORT)

Students in the forest technology (FORT) program are uniquely prepared for careers in forestry, forest industries and natural resource management in New Hampshire and New England. Classroom lecture is supported by practical field work in each of the subject areas. The educational program in Forest Technology leading to the Associate in Applied Science degree is accredited by the Society of American Foresters (SAF) (https://www.eforester.org) (the first two-year program in the U.S. to complete the accreditation application process) and reviewed by an advisory committee representing the full spectrum of forestry organizations in the region. There is a strong emphasis on leadership, safety, communication skills, accuracy of field work, data collection, and professional presentation. Unique facilities for teaching and learning include centrally located classroom and shop facilities; 3,000+ acres of University-owned forest land (http://colsa.unh.edu/woodlands); a new sawmill and Forest Industries Training Center (FITC); logging equipment; technologically advanced navigation, data collection, and analysis equipment; and a faculty with vast field experience in the subject areas and who are dedicated to teaching.

https://colsa.unh.edu/thompson-school-applied-science

Requirements

Candidates for a degree must take 20 credits of Discovery courses in addition to satisfying the requirements of the Forest Technology program. Forest Technology students are required to take:

Career Opportunities

Forestry consultant, forest fire control and use technician, mapping technician, geographic information systems/global positioning systems (GIS/GPS) technician, timber and log buyer, log scaler, lumber grader, sawmill technician, arborist, urban tree care specialist, timber cruiser/forest inventory technician, or forestry equipment/products sales representative.
Horticultural Technology (HT)

*Beginning in the 2018-2019 academic year, the Horticulture Technology: Landscape Construction and Management program and Horticulture Technology: Plant Production program will no longer be accepting new students. Current Thompson School students in these programs will continue to have access to the same high-quality education and resources until they graduate in 2019.*

Horticultural technology (HT) students study applied plant science, preparing for environmentally attuned careers in “the green industry.” Rigorous first-year foundation courses in plant materials, plant growth and development, and soils support second-year concentrations in landscape construction management or plant production. Courses unique to the program include “pond-less” water features, lighting design/installation, rain harvesting, and hydroponics/aquaponics. Employment opportunities in these areas continue to be excellent. Graduates enter a rapidly expanding job market in plant production, nursery and garden center management, fruit and vegetable production, parks and grounds management, landscape construction and management. Many recent graduates have established their own horticulture enterprises, and others continue their education toward a four-year degree in areas such as environmental horticulture, greenhouse production, or landscape architecture.

### Admissions Requirements

Applicants to the horticultural technology program area must present college preparatory English and at least two years of satisfactory work in both college preparatory mathematics and science (one science being biology, with a lab).

### Curriculum Fee

Horticultural technology, both concentrations: $831

This one-time curriculum fee is required to cover lab materials, specialized equipment maintenance, and transportation that are unique to the applied nature of the concentration. The curriculum fee covers the entire two-year course of study for one concentration. Any non-TSAS student may be assessed specific course fees, details of which are included in each semester’s Time and Room Schedule. All fees are subject to change.

### Programs

- Horticultural Technology: Landscape Construction and Management Concentration (A.A.S.) (p. 380)
- Horticulture Technology: Plant Production Concentration (A.A.S.) (p. 381)

### Description

*Beginning in the 2018-2019 academic year, the Horticulture Technology: Landscape Construction and Management program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.*

Landscape construction and management has been projected to be one of the fastest growing service industries of the coming decade. It is a field that also offers unparalleled aesthetic satisfaction and meaningful reward. To succeed in the landscape industry increasingly requires a degree of technical and scientific expertise, as well as creativity, artistry, and problem-solving skills. Students in the landscape operation concentration gain a solid foundation by completing core requirements in the fundamentals of plant growth and development, soils, plant identification, pruning, and plant health care. They then complete a series of landscape maintenance, construction, and business courses. This combination prepares them to become successful members of the landscape industry. In their classes, students meld theory and practice, and then apply what they learn in weekly lab periods and on-site visits to area operations.

### Career Opportunities

Landscape construction specialist, garden center/nursery sales, or maintenance/management for golf courses, schools and parks, private and public grounds.

### Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Horticultural Technology Landscape Construction Management program. Landscape Construction Management students are required to take:

### Horticulture Technology: Plant Production Concentration (A.A.S.)

[https://colsa.unh.edu/thompson-school-applied-science](https://colsa.unh.edu/thompson-school-applied-science)

**Description**

**Beginning in the 2018-2019 academic year, the Horticulture Technology: Plant Production program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.**

Ornamental, food, and medicinal crop production, whether hydroponics or conventional field agriculture, are areas of great growth potential and life satisfaction. In the Horticultural Technology Plant Production Concentration, students will learn all aspects of plant crop production in controlled environments and in field production systems.

After learning the fundamentals of soil and plant science, students will develop an understanding of crop production in soil, soil-less and hydroponic systems. Other areas of study include crop scheduling, crop care, crop health management, plant production business operation, pricing and costing. Students will also learn about greenhouse design, construction, operation and management.
In addition to comprehensive classroom and field trip studies, students in this concentration will learn extensively by producing crops in the Thompson School’s fully functional greenhouse facility and potentially working in the College of Life Science and Agriculture’s high tunnel production system.

**Career Opportunities**

**Requirements**

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Horticultural Technology Plant Production concentration. Plant Production students are required to take:

Integrated Agriculture Management (IAG)

Beginning in the 2018-2019 academic year, the Integrated Agriculture Management program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

The course of study in integrated agriculture management addresses the critical importance of understanding the relationships among agriculture, forestry, business management and marketing, nutrition, food systems, the environment, and community. We live in a world where everything is connected. No one piece can be managed without some understanding of the other pieces and their connections. We also live in a world in which diversification—whether in biology or in business—is a necessary ingredient for rapid adaptation and continued survival.

Integrated agriculture management (IAG) guides students to examine ecological and cultural relationships, and to assemble a collection of coursework in a focus area while attending the Thompson School. The IAG program is truly interdisciplinary, drawing upon diverse course offerings across several of the academic programs at the Thompson School.

Graduates of IAG will be able to choose from a large number of opportunities across an array of fields, including sustainable agriculture, fruit and vegetable production, livestock production, community-supported agriculture (CSA), value-added agricultural products, sustainable forest management, soil/water/forest conservation, cooperative extension, organic certification, and diversified farm management, or in more specific areas such as greenhouse production, sustainable landscape construction and maintenance, forest technician, dairy management, and others. A number of current students plan to return to family farms with new information and insight to help determine the future of their lands and enterprises as the world changes.

Graduates are also encouraged to consider transferring into UNH’s baccalaureate program in sustainable agriculture and food systems.

Admissions Requirements

Applicants to integrated agriculture management must present at least two years each of satisfactory work in college preparatory mathematics and sciences. One of the science courses should be biology with a lab.

Curriculum Fee

Integrated agriculture management: $831

This one-time curriculum fee is required to cover lab materials, specialized equipment maintenance, and transportation that are unique to the applied nature of the program. The curriculum fee covers the entire two-year course of study. There may be additional fees for uniforms, specific high-cost courses, and/or professional equipment. Any non-TSAS student may be assessed specific course fees, details of which are included in each semester’s Time and Room Schedule. All fees are subject to change.

Career Opportunities

- Working on diversified farms where forestry, horticulture, and/or livestock and dairy might be a component
- Working for non-profit farm and forest education centers

- Managing New England farms based on dairy, horticulture, livestock, forestry, etc.
- Technicians working in pest control for commercial greenhouses, dairy and livestock farms, or forest operations
- Technicians for the Natural Resource Conservation Service
- Marketing farm products for New England farmers
- Operating community-supported agriculture (CSA) and farm stands
- Producing unique, local and/or organic products for direct marketing to consumers
- Partnering with horticultural growers and dairy producers to create high-end market opportunities

Integrated Agriculture Management (A.A.S.)

https://colsa.unh.edu/thompson-school-applied-science

Description

Beginning in the 2018-2019 academic year, the Integrated Agriculture Management program will no longer be accepting new students. Current Thompson School students in this program will continue to have access to the same high-quality education and resources until they graduate in 2019.

First-year students in IAG take a core of courses covering the basics of soils, plants, and animals. This provides a strong foundation for second-year study, during which the student may either specialize in one or two areas or take courses across the breadth of programs in horticultural technology, applied animal science, forest technology, civil technology, and culinary arts and nutrition. Working closely with a faculty advisor, and benefitting from a wide array of flexible concentration courses, the student in integrated agriculture management designs the path of study that aligns with his or her particular talents and interests.

Requirements

Candidates for a degree must satisfy all of the Thompson School of Applied Science General Education requirements in addition to satisfying the requirements of the Integrated Agriculture Management (IAG) program. IAG students are required to take:

Credits 16-20

Total Credits 64-77

1 Flexible Concentration Courses: Students select 20 credits from approved courses in the following program areas: horticultural technology, applied animal science, forest technology, civil technology, culinary arts and nutrition, technical practices, or applied business management by working with their faculty adviser. Refer to the Requirements section for a list of approved courses.

Veterinary Technology (VTEC)

Program Mission Statement

The program provides veterinary technology students with a broad understanding of veterinary medicine and the role of animals in society. Students are instructed in the methods and knowledge of veterinary technology such that they become veterinary technicians who are strong advocates for animals, capable of compassionate and accurate animal care; professional in their actions and judgments; and have a desire for lifelong learning and self-improvement.

The primary goal of the veterinary technology program is to provide students with exceptional technical and clinical reasoning skills and knowledge in veterinary technology such that graduates will be prepared to pass the Veterinary Technician National Exam (VTNE) and to be immediate and valuable members of a veterinary medical team. Additionally, the program aims to develop a firm foundation in both farm animal and companion animal veterinary practices. Courses in the program cover basic sciences, veterinary nursing, and veterinary practice management, with a strong focus on hands-on practical knowledge throughout the curriculum. Students gain basic knowledge and skills for the major domestic animal species (dog, cat, horse, and cow). Integration of knowledge in communication, veterinary ethical and legal issues, veterinary practice management, clinical reasoning skills, and hands-on technical skills allow students to become complete veterinary technicians, capable of providing high-quality, compassionate, and expert care to animals both small and large.

Practical learning experience is provided at the Veterinary Teaching Clinic, the UNH equine facilities (https://colsa.unh.edu/facility/equine-facilities), the Thomas P. Fairchild Dairy Teaching and Research Center (https://colsa.unh.edu/nhaes/fairchild) and the UNH Organic Dairy Research Farm (https://colsa.unh.edu/nhaes/odrf). The program has a number of animal-related educational partnerships, including those with the New Hampshire SPCA (http://www.nhspca.org) in Stratham, N.H., the Cocheco Valley Humane Society (http://www.cvhsonline.org) in Dover, N.H., and the Pope Memorial SPCA (http://www.popememoriaalspca.org) in Concord, N.H.. The veterinary technology curriculum also includes a service learning course where students provide wellness services to local pets in need.

The program is accredited by the AVMA (https://www.avma.org/Pages/home.aspx). Students who graduate from an accredited program are eligible to take the Veterinary Technician National Exam (VTNE) (https://www.aavsb.org/vtne) and pursue credentialing.

Admissions Requirements

Applicants to veterinary technology must present four years of college preparatory English, and a minimum of three years of social sciences, college preparatory mathematics, and college preparatory sciences. Two of the three should be college preparatory biology and chemistry with labs. It is recommended that applicants have some experience with animals in a professional setting, and applicants should include a statement in the student application describing their experience. Successful applicants have an overall minimum GPA of 3.0 on a weighted 4.0 scale as well as solid SAT/ACT scores.

Veterinary Technology (A.A.S.)

https://colsa.unh.edu/thompson-school-applied-science/program/aas/veterinary-technology

Description

Veterinary Technology

The primary goal of the veterinary technology program is to provide students with exceptional technical and clinical reasoning skills and knowledge in veterinary technology such that graduates will be prepared to pass the Veterinary Technician National Exam (VTNE) and to be immediate and valuable members of a veterinary medical team. Additionally, the program aims to develop a firm foundation in both farm animal and companion animal veterinary practices. Courses in the program cover basic sciences, veterinary nursing, and veterinary practice
management, with a strong focus on hands-on practical knowledge throughout the curriculum. Students gain basic knowledge and skills for the major domestic animal species (dog, cat, horse, and cow). Integration of knowledge in communication, veterinary ethical and legal issues, veterinary practice management, clinical reasoning skills, and hands-on technical skills allow students to become complete veterinary technicians, capable of providing high-quality, compassionate, and expert care to animals both small and large.

Practical learning experience is provided at the PAWS Veterinary Teaching Clinic (https://colsa.unh.edu/paws-veterinary-clinic), the UNH Equine Facilities (https://colsa.unh.edu/facility/equine-facilities) and the Thomas P. Fairchild Dairy Teaching and Research Center (https://colsa.unh.edu/nhaes/fairchild). The program has a number of animal-related educational partnerships, including those with the New Hampshire SPCA (http://www.nhspca.org) in Stratham, N.H., the Cochecho Valley Humane Society (http://www.cvhsonline.org) in Dover, N.H, and the Pope Memorial SPCA (http://www.popememorialsPCA.org) in Concord, NH.

The program is accredited by the AVMA (https://www.avma.org/Pages/home.aspx). Students who graduate from an accredited program are eligible to take the Veterinary Technician National Exam (VTNE) (https://www.aavsb.org/vtne) and pursue credentialing.

**Veterinary Technology Curriculum Requirements**

Students must demonstrate all of the following for retention in and graduation from the veterinary technology program:

1. A minimum grade of C+ in all AAS and VTEC courses, and CHEM 411.
2. A cumulative GPA of 2.5 in the courses listed above.

Students may repeat a major course only one time before dismissal from the major. Courses must be completed in proper sequence, according to prerequisites as listed in the course catalog.

All coursework in the veterinary technology curriculum should be completed within five years of matriculating into the program. If this cannot be accomplished, the student may be required to retake major courses where AVMA essential skills have changed significantly.

Students must successfully complete all required skills listed in the Veterinary Technology Essential and Recommended Skills List developed by the Committee on Veterinary Technician Education and Activities (CVTEA) of the American Veterinary Medical Association (AVMA), the accrediting body for this program.

Students must show proof of pre-exposure rabies immunization or adequate rabies titer prior to enrollment in practicum and internship coursework. Transportation is provided to students for practicum coursework. Students are responsible for providing their own transportation during internship experiences.

UNIVERSITY OF NEW HAMPSHIRE AT MANCHESTER

Mike Decelle, Dean
Kim DeRego, Associate Dean for Strategic Enrollment Management
Dan Reagan, Associate Dean of Academic Affairs

Welcome to the University of New Hampshire at Manchester—the university’s campus in the heart of Merrimack Valley. Our mission is to provide the world-class UNH education and diploma to students in southern New Hampshire. We offer an affordable avenue to earn a UNH degree, with smaller classes held at times that accommodate the schedules of students who are also working.

At UNH Manchester, we capitalize on our location in the revitalized millyard of New Hampshire’s largest city. Our campus on the banks of the Merrimack River is a few blocks from the heart of the state’s financial and corporate center and home to many of the region’s non-profit and government offices. Led by faculty who are experts in their fields, our programs prepare students for the opportunities of tomorrow in the region’s business, education, government, non-profit, service, and technology sectors.

UNH Manchester is uniquely equipped to support regional economic development, creating a campus environment in which students, faculty, business/industry, government, and non-profits collaborate on mutually beneficial projects and initiatives. As a community partner, we have a commitment to the region’s economic vitality; respond to educational and economic opportunities, and support innovation and student access to programs designed and delivered for the future.

Bringing together career-driven programs, faculty talent and a focus on experiential learning, UNH Manchester prepares students for success in their chosen field — and connects them to the wealth of opportunities in the region.

Accreditation

The University of New Hampshire at Manchester was established in 1985 as the sixth undergraduate college of the University of New Hampshire. The University of New Hampshire is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.), which accredits schools and colleges in the six New England states. Accreditation by the association indicates that the institution has been carefully reviewed and found to meet or exceed standards agreed upon by nationally recognized educators.

Faculty

The UNH Manchester faculty is its greatest asset. Residential faculty members have earned reputations for excellent teaching, scholarly achievement in their fields, and service to the community. They are recognized scholars and have acquired national and international reputations. Adjunct faculty members bring applied experience and a commitment to teaching to the classroom. Most importantly, UNH Manchester’s dedicated faculty members are outstanding teachers who care about each individual student. Faculty members work closely with students as advisers and help students define their goals, plan career objectives, and develop an individualized program of study within each major.

Analytics and Data Science

https://manchester.unh.edu/academics/degree-programs/analytics

Shaping the next generation of data revolutionaries

With an explosion of big data initiatives in organizations worldwide, the demand for data-savvy individuals has never been higher. Fully available on both campuses - Durham and Manchester, our Analytics and Data Science program is the only on-campus degree of its kind in the region, specifically designed to prepare the next generation of innovative data scientists and analysts.
You'll learn the cutting-edge technical skills you need to manage, distill, and interpret data for industries from finance to healthcare to marketing and advertising. You'll master programming languages like Python and R so you can derive actionable information from data.

Through hands-on learning and real-world experience, you'll get cutting-edge technical skills and a competitive advantage in a rapidly growing field.

Analytics and Data Science Major: Analytics Option (B.S.) Manchester

https://manchester.unh.edu/program/bs/analytics-data-science-major-analytics-option

Description

The option in Analytics is intended for students interested in either heading into industry immediately upon graduation, or pursuing graduate work in a professionally oriented program such as the Master of Science in Analytics at UNH. The option in Analytics places its emphasis on applications of data science in industry.

This program has been designed to prepare students for professional careers working with data, with an emphasis on the extraction of meaning from data. The program is not targeted to any one industry; rather, it provides a flexible, practical skillset that can be applied widely. This skillset includes elements of computer science, applied mathematics and statistics, communication skills, and business savvy. During the course of the program, students will demonstrate their acquisition of these skills by successfully completing their program coursework, their internship experience, and their capstone project.

Requirements

Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University's Discovery program, completing all of the 20 required courses in the major as listed below, including the capstone course, the internship preparedness course, and a three-credit internship. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

Analytic Minor (Manchester)

https://manchester.unh.edu/program/minor/analytics

**Description**

The objective of this minor is to provide a basic background in analytics for those interested in applications.

**Requirements**

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C- grade. Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval. Some preparation in MATH 425 Calculus I and programming (COMP 425 Introduction to Programming, CS 414 From Problems to Algorithms to Programs or CS 415 Introduction to Computer Science I) is required.
