ENVIRONMENTAL EDUCATION
(ENED)

# Course numbers with the # symbol included (e.g. #400) have not
been taught in the last 3 years.

ENED 890 - Environmental Education Summer Institute: Field Ecology,
Human Communities, and Curriculum
Credits: 8
An intensive, team-taught experience that immerses students in a
process of inquiry explicitly designed to connect and integrate work in
the Environmental Education Program’s three focus areas: Pedagogy,
Environmental Science, and Environmental Values, Policy, and Planning.
A four week program, meeting four days/weeks for six-eight hours/
day, with out-of-class assignments make it a full-time commitment for
students. Classroom and field-based activities help students experience
the interdisciplinary nature of environmental education firsthand, while
giving students the opportunity to explore materials, research methods,
and instructional approaches appropriate to their specific educational
context. Prereq: a minimum of two prior life or physical science courses.
Permission required.

ENED 900 - Seminar and Practicum in Environmental Education
Credits: 4
This course is the capstone experience for students in the MA Program in
Environmental Education. It combines a field placement in environment
education with a Practicum Seminar to give students the opportunity to
put what they have learned into practice in a context that is appropriate
for their professional development and career goals. The Practicum also
provides students with support in completing the Program Portfolio
requirement for the master’s degree.
