## **SCM 805 - Supply Chain Management**

**Credits:** 2

In this course, students explore the management and flow of materials in a typical enterprise supply chain, be it within a production facility or the health care industry. Students examine a complete overview of material flow, from internal and external sources, to and from the enterprise, and the impact a global supply chain can have on an organization's success in meeting demands. Topics covered include basic elements of a supply chain, enterprise resource planning (ERP), demand planning, capacity management, and inventory control.

**Equivalent(s):** SCM 805G

**Grade Mode:** Letter Grading
