COMMUNITY DEVELOPMENT POLICY AND PRACTICE (M.A.)

https://carsey.unh.edu/community-development-policy-practice-ma

Description

The online MA in Community Development Policy and Practice program (MCD) prepares you for a career in community and economic development. While earning this online, cohort-based community development degree, you will tackle real-world situations through a capstone community project and engage with leading experts and academics in a program designed for working professionals just like you. Through coursework and experiential opportunities, you will learn from seasoned practitioners in subjects ranging from economics and community financing to community organizing and public health.

- The MCD program is fully online and is ideal for working professionals
- Gain effective community development skills and tools through an applied four-term capstone project in your community
- Connect with respected field experts across disciplines, including faculty and peers
- Start in the fall or spring and graduate in 14 to 24 months
- The GRE is not required to apply to this degree program.

Program Delivery & Location: Core academic courses for the MCD degree are offered online with choices for selecting optional elective courses online or in person on UNH campuses. Students are free to carry out their capstone projects in their chosen community.

Requirements

Students enrolled in the Carsey School's MA in Community Development Policy and Practice program (MCD) are required to complete a 36-credit program, consisting of 12 courses including a four-term capstone project:

- Five (5) CORE Curriculum Courses
- Four (4) EXPERIENTIAL LEARNING Courses
- Three (3) ELECTIVE Courses

These provide the applied foundational community and economic development skills in strategy, practice, and analysis for a successful career in community development. In this program, students will examine each of the core interdisciplinary areas within the cross-cutting lenses of public policy, data collection, and analysis as students directly apply what they learn in the classroom through a capstone project centered on community engagement for sustainable development. Further opportunities for depth and specialization are provided through a variety of elective courses which vary each year as well as the opportunity to conduct independent studies to delve deeper into a specific aspect of a student’s community or capstone project.
