

SUPPLY CHAIN MANAGEMENT (GRADUATE CERTIFICATE)

Description

Supply chain management, broadly defined, encompasses the coordination of business activities from sourcing raw materials to delivering finished goods. The graduate certificate in supply chain management is designed for working business professionals who are interested in expanding their knowledge and skills in the field. Specifically, the program focuses on developing skills in managing operations, data analysis and forecasting, optimizing global supply chains, and project management.

Requirements

Credits: Students complete four courses (12 credits) for the certificate.

GPA: Students must have a minimum 3.0 GPA at certificate completion, and earn a B- or better in all courses.

Code	Title	Credits
Required Courses		
ADMN 845	Supply Chain Management	3
