ECONOMICS (ECON)

Degrees Offered: M.A, Ph.D.

This program is offered in Durham.

The Department of Economics (hereafter the Department) at Paul College offers two of the most distinctive graduate Economics programs in the country.

Our Master of Arts (M.A.), Analytical Economics is an intensive, STEM designated, one-year program that provides rigorous training in economic theory and applied econometrics. Students also pursue applied course work in data management and visualization, predictive and prescriptive analytics, and artificial intelligence.

At the doctoral level, our program has a dual emphasis on developing both research economists and college teachers. Beyond its strengths in the fields of International Economics, Health Economics, and Environmental Economics, the department is known for its emphasis on the History of Economic Thought and Economic Methodology.

Both M.A. and Ph.D. students participate in the department’s high quality weekly research seminar, which attracts leading economists and researchers from around the country.

Admission Requirements

In addition to requirements established by the Graduate School, applicants must submit current scores (within five years) from the general test of the Graduate Record Exam (GRE). The graduate programs seek students whose undergraduate experiences provide evidence of superior ability and promise of independent scholarship. At a minimum, undergraduate preparation should include undergraduate courses in economics at the intermediate level, as well as in calculus and statistics. Coursework in econometrics is strongly encouraged.

Programs

- Analytical Economics (M.A.) (http://catalog.unh.edu/graduate/services/programs-study/economics/analytical-economics-ma)
- Economics (Ph.D.) (http://catalog.unh.edu/graduate/services/programs-study/economics/economics-phd)

Courses

Economics (ECON)

ECON 825 - Mathematical Economics

Credits: 4

Principal mathematical techniques and their application in economics. Topics covered: matrix algebra, derivatives, unconstrained and constrained optimization, linear and nonlinear programming, game theory, elements of integral calculus.

ECON #847 - Multinational Enterprises

Credits: 3

The internationalization of economies. Growth and implications of the multinational corporation at the level of systems. Theories of imperialism, international unity/rivalry; theories of direct investment; the exercise of influence and conflict, technology transfer, bargaining with host country; effects on U.S. economy.

ECON 868 - Seminar in Economic Development

Credits: 3

An advanced reading seminar. Topics include methodologies underlying economic development theory, industrialization and post-import substitution, state capitalist development, stabilization policies, appropriate technologies, the capital goods sector, agricultural modernization schemes, and attempts at transition to socialism.

ECON 908 - Environmental Economics: Theory and Policy

Credits: 4

Applies microeconomic tools to issues in environmental economics. Considers the role of government, externalities, public goods, property rights, and market failure. Identifies and compares different policy instruments such as administrative regulation, marketable permits, tax incentives, and direct subsidies, along with consideration of complicating factors such as information, uncertainty and risk. These tools are applied to various policy issues such as air pollution, solid waste management, and recycling. Prereq: ECON 926 and ECON 976.

ECON 909 - Environmental Valuation

Credits: 4

Focuses on the theory and methods for estimating the economic values of environmental resources and public goods (such as clean air and water, preservation of wetlands or coastal resources, etc.) many of which are not exchanged in established markets and therefore do not have prices associated with them. The valuation of environmental resources is an important component in benefit-cost analyses which are used in policy making. Provides a blend of theory and hands-on applications of methods and real data sets. Prereq: ECON 926, ECON 927, ECON 976.

ECON 926 - Econometrics I

Credits: 4

Application and theory of statistical and econometric methods to problems in economics. Topics: basic statistical theory, simple and multiple regression, violations of the basic assumptions, generalized least squares, and introduction to simultaneous equation models. Prereq: undergraduate statistics course.

ECON 927 - Econometrics II

Credits: 4

Asymptotic theory, likelihood estimation, simultaneous equations, panel data analysis, binary and multiple choice models, count data analysis, selection models, survival analysis. Prereq: ECON 926.

ECON 928 - Time Series Econometrics

Credits: 4

Basic and advanced time series models with up-to-date empirical techniques with emphasis on the application of econometric tools to economic issues. Selected topics include stationary ARMA models, unit roots and cointegration, VAR, ARCH dynamic panel data models, structural break models, and non-linear time series models. Prereq: ECON 926 and ECON 927 or equivalents.

Equivalent(s): ADMN 842, ECON 828
ECON 929 - Advanced Econometrics  
Credits: 4  
Advanced nonlinear Econometrics and an introduction to the asymptotic theory of nonlinear regression. A summary of selected topics include nonlinear least squares (NLLS), generalized method of moments (GMM), numerical optimization, bootstrap, maximum likelihood (MLE), quasi-maximum likelihood (QMLE), nonparametric and semiparametric regression, cross-validation.  
Equivalent(s): ECON 898

ECON 941 - Survey of Health Economics  
Credits: 4  
An Introduction to the health care sector of the economy designated to provide students with: an overview of the scope of issues covered in the field; a basic analytical and empirical "tool kit" that will enable them to ask and answer questions as a health economist; and an understanding of the most important institutional features of the United States health care system. Topics include market failures in health care, demand for health, public and private insurance programs, health behaviors, and the relationship between health, income, and inequality. Prereq: ECON 926 and ECON 976 (ECON 927 recommended).

ECON 942 - Selected Topics in Health Economics  
Credits: 4  
Covers broad range of health-care-related issues and analytical tools with the aim of helping students to successfully compete for career opportunities in health care education, research, and policy and to initiate possible dissertation essays. Topics vary each year in response to specific student interests and current events may include cost-benefit and cost-effectiveness analysis, comparative health systems (international institutions) and pharmaeconomics. Prereq: ECON 926 and ECON 976 (ECON 927 recommended).

ECON 945 - International Trade  
Credits: 4  
Contemporary issues in international economic theory and policy. Analysis of trade theory, dynamics of world trade and exchange, and international commercial policy.  
Equivalent(s): ECON 845

ECON 946 - International Finance  
Credits: 4  
Topics include the macroeconomics of open economies, balance of payments, international financial markets, exchange rate fluctuations and puzzles, currency crises, and exchange rate policy.  
Equivalent(s): ECON 846

ECON 957 - History of Economic Thought  
Credits: 4  
Traces the development of economic thought, with careful examination and critical appraisal of the contributions made by important figures and schools of thought.

ECON 958 - Topics in Economic Thought and Methodology  
Credits: 4  
Advanced seminar in a selected topic in economic thought or methodology.

ECON 970 - Advanced Economic Theory  
Credits: 3  
Advanced topics in both microeconomic and macroeconomic theory. Topics covered may include cooperative and non-cooperative game theory, general equilibrium models, and dynamic optimization. Prereq: ECON 972 and ECON 976.

ECON 972 - Macroeconomics I  
Credits: 4  
Development of the major macro models and approaches to macroeconomics: classical, Keynes' "General Theory," Keynesian, Monetarists, New Classical, and New Keynesian models and views. Introduction to open economy macro and growth models.

ECON 973 - Macroeconomics II  
Credits: 4  

ECON 976 - Microeconomics I  
Credits: 4  
Survey and applications of modern microeconomic theory. Analysis of households, firms, product and resource markets, and behavior under uncertainty.

ECON 977 - Microeconomics II  
Credits: 4  
Analysis of stability, cooperative and non-cooperative game theory, information economics, exhaustible resources, disequilibrium, public goods, public choice, and input-output analysis. Prereq: ECON 976.

ECON 978 - Teaching Economics  
Credits: 4  
This seminar-style course helps prepare graduate students to become effective teachers of economics at the college level. Emphasis is on teaching at the principles level. Students study and discuss key issues, including the learning process, the objectives of principles classes and of the economic major, heterogeneous learning styles, chalk and talk, vs. active learning, testing and the testing effect, homework, and the role of textbooks. Students also write teaching philosophies, lead discussion sessions, present research on teaching, and deliver short lectures to the class on specific topics at the principles level.

ECON 979 - Research Skills  
Credits: 3  
Aids students in completing their master's paper for which they conduct research on a particular economic problem or issue using the knowledge and skills they have gained from their other classes. While the use of data and econometric analysis is encouraged, students may choose a topic that contains neither, such as a paper on the history of thought or on economic theory. Students meet regularly with their faculty advisor throughout the term. They also present their work at various stages of completion. Presentations of students' topics and final papers are made to the faculty. Prereq: ECON 926, ECON 972 and ECON 976.

ECON 988 - Graduate Economics Seminar  
Credits: 2-12  
Attend weekly graduate economics seminars; write reviews and critiques of seminar papers; participate in discussion at seminars. May be repeated up to a maximum of 6 credits for Masters students and up to 12 credits for Ph.D. students.  
Repeat Rule: May be repeated for a maximum of 12 credits.
ECON 992 - Field Workshop
Credits: 3
Provides a platform for students to become well read in their chosen major field. Students receive a field-specific reading list at the beginning of the term, which they are expected to work through independently. Students present papers and chapters from their reading lists in class. They also write a literature review on a topic in their chosen field and present this research at various stages of completion. Presentations of students’ final papers are made to the faculty. Prereq: One approved field class.

ECON 995 - Independent Study
Credits: 1-6
Prereq: permission of adviser and instructor.

ECON 996 - Research Workshop
Credits: 2
Present research papers in the graduate economics seminar series; serve as a discussant for seminar presentations; write reviews and critiques of seminar papers; participate in discussion at seminars. May be repeated up to a maximum of 4 credits for Ph.D. students. Cr/F.
Repeat Rule: May be repeated for a maximum of 4 credits.

ECON 999 - Doctoral Research
Credits: 0
Cr/F.
