

# HEALTH CARE MANAGEMENT (M.S.)

<https://cps.unh.edu/online/program/ms/health-care-management>

## Description

The Master of Science in Health Care Management (MSHM) is designed to prepare individuals to make a career change or seek promotion to a mid-level or upper-level management position in the private or public sector of the health care industry, including hospitals, health system management, position practices, and government and non-government agencies. The MSHM program emphasizes strategic and analytical skills required to understand and manage in today's health care organizations. Students will have the opportunity to understand and master the organizational, legal, financial, political and managerial aspects of health systems management.

## Student Learning Outcomes

Students will have the opportunity to:

- Identify and analyze the organizational, economic, political and legal components of health care delivery systems in the United States;
- Evaluate ethical issues relevant to the policies, practices, and management of health care ethics;

- Acquire functional knowledge of current health care management policies, practices and theory and develop, and communicate design solutions that guide health care organizations to change and adapt to future challenges;
- Conduct financial analysis, explain financial and accounting information for a health care organization;
- Synthesize and assimilate an understanding of the environmental factors and management skills required to be innovative and successful in the health care field;
- Apply project management and quality improvement tools to evaluate and improve health care delivery.
