

# STATISTICS (PH.D.)

<https://ceps.unh.edu/mathematics-statistics/statistics-phd>

## Description

The Ph.D. in statistics is a flexible program of coursework and research that meshes the faculty's expertise with the students' interests. Current faculty expertise are in Design of Experiments, Nonparametric Function Estimation, Model Selection, Time Series Analysis, Spatial Statistics, Bayesian Statistics, Data Mining and Large Data. Doctoral dissertations range from theoretical to applied. Interdisciplinary research is encouraged. Ph.D. students frequently work as research assistants in interdisciplinary studies, and also engage in statistical consulting.

## Admission Requirement

Applicants must have completed significant undergraduate coursework in mathematics and Statistics, including basic Statistics (for example, design of experiments), the standard Calculus sequence, and Linear Algebra.

## Applying

Please visit the Graduate School website (<http://gradschool.unh.edu/apply.php>) for detailed instructions about applying to the doctoral program.

## Requirements

Students are advanced to candidacy after meeting the following requirements:

Code	Title	Credits
<b>Required Courses</b>		
MATH 836	Advanced Statistical Methods for Research	3
MATH 839	Applied Regression Analysis	3
MATH 840	Design of Experiments I	3
MATH 855	Probability with Applications	3
MATH 856	Principles of Statistical Inference	3
<b>Advanced Coursework in Statistics</b>		
MATH 941	Bayesian and Computational Statistics	3
MATH 945	Advanced Theory of Statistics I	3
MATH 946	Advanced Theory of Statistics II	3
Select three of the following:		9
MATH 837	Statistical Methods for Quality Improvement and Design	
MATH 841	Survival Analysis	
MATH 843	Time Series Analysis	
MATH #844	Design of Experiments II	
MATH 944	Spatial Statistics	
MATH 969	Topics in Probability and Statistics I <sup>1</sup>	
MATH 979	Research Topics in Statistics <sup>1</sup>	
<b>Minor Coursework</b>		
Select one of the following analysis courses:		3
MATH 867	One-Dimensional Real Analysis	
MATH 953	Analysis I	

Select two courses in a focused minor area <sup>2</sup>	6
<b>Total Credits</b>	<b>42</b>

- <sup>1</sup> MATH 969 Topics in Probability and Statistics I and MATH 979 Research Topics in Statistics are topics courses and may be taken more than once.
- <sup>2</sup> To be selected in consultation with the program advisor.

Successful completion of written qualifying examinations in theory of statistics and in applied statistics.

Successful completion of a comprehensive exam in advanced theory of statistics and an elective comprehensive exam.

Participation in the one-credit statistics seminar during at least three semesters.

Successful completion of a dissertation proposal defense in the major field of statistics.

## Dissertation

Doctor of Philosophy in Statistics: A dissertation that includes original research in statistics.
