BIOINFORMATICS (M.S.)

Description

A new Master's of Science in Bioinformatics has been approved for Academic Catalog year 2021/2022.

The Department of Molecular, Cellular, and Biomedical Sciences (MCBS) in the College of Life Sciences and Agriculture (COLSA) offers the professional M.S. in Bioinformatics. This non-thesis degree program addresses the growing workforce and educational needs of the life science industries (including biotechnology, environmental and agricultural sectors). The M.S. in Bioinformatics provides continuing and accessible graduate-level education for individuals from broad socioeconomic backgrounds currently in the workforce, as well as for UNH undergraduate students seeking to enroll in an accelerated Master's program, and to gain enhanced knowledge and specialized skills prior to entering the workforce.

Courses will be listed in the 2021/2022 Academic Catalog.
