NURSING: PRIMARY CARE FAMILY NURSE PRACTITIONER (M.S.)

https://chhs.unh.edu/nursing/program/ms/family-nurse-practitioner

Description

Primary Care Family Nurse Practitioner

This program prepares family nurse practitioners (FNP) who are clinically competent and practice with cultural humility as advanced practiced registered nurse (APRN). FNPs provide patient centered health care to individuals, families, and communities across the lifespan. Clinical practice includes health promotion, disease prevention, teaching, counseling, and acute and chronic disease management. At the completion of the program, students are eligible to sit for national certification as a family nurse practitioner. Upon licensure, FNPs may practice autonomously as well as in collaboration with other health professionals.

Graduate Program in Nursing Admission Requirements

Applicants are required to have an unencumbered RN license in the United States, degree in nursing or outside nursing, and successful completion of undergraduate statistics and research to be eligible to apply to this program.

1. Unencumbered, active RN license in the United States
2. Baccalaureate degree in nursing or another field
3. Cumulative GPA of 3.0 or higher in associate and baccalaureate programs
4. Minimum one year nursing experience preferred.
5. Successful completion of undergraduate statistics course and undergraduate research course
6. 3 letters of recommendation. Recommendation letters submitted by relatives or friends, as well as letters older than one year, will not be accepted. References should be substantial with one academic, if available, and two current nursing professionals with graduate education background.
7. Personal Statement. Prepare a brief but careful statement regarding:
   a. Reasons you wish to do graduate work in this field, including your immediate and long-range objectives.
   b. our specific research or professional interest and experiences in this field.

Non-BSN Admission Requirements: RNs whose baccalaureate degree is in a discipline other than nursing may apply to the master of science degree in nursing (M.S.) program and will be considered for the track that is commensurate with their clinical experience based on faculty discretion.

Student Learning Outcomes

The Family Nurse Practitioner builds upon the skills of the baccalaureate prepared generalist nurse. Students entering the Masters of Science Family Nurse Practitioner program are expected to:

- Synthesize core knowledge from the liberal arts, sciences, and nursing as the foundation of professional practice.
- Integrate knowledge and skills to assess, design, implement, and evaluate nursing care in a safe, compassionate, culturally sensitive, evidence-based manner.
- Engage clients, families, and communities in collaborative decision-making incorporating evidence-based knowledge and anticipatory guidance.
- Employ team leadership and collaborative skills with other health professionals to optimize client and system outcomes.
- Recognize the influence of complex health systems on health care practice and advocate for policies that promote a socially just, patient centered healthcare system.
- Engage in scholarly inquiry to identify, evaluate and integrate the best current practice.
- Integrates health promotion, clinical prevention strategies when providing care at the individual or population level.
- Incorporates principles of patient safety and risk mitigation when using healthcare technology and therapeutics in the provision of care.
- Uses effective written, verbal, and nonverbal communication strategies when engaged in professional practice.
- Embrace professional values embodied in the ANA code of ethics.

At the completion of the Master’s nursing program, the graduate student is prepared to:

- Serve in a healthcare leadership and change agent role as part of a diverse, complex, and patient-centered health care system.
- Act as a practice scholar to design, direct and evaluate system changes to promote safe, timely, effective, efficient, equitable and patient-centered care.
- Use data analytic methods, information systems and technology to evaluate, integrate and apply knowledge that will improve programs of care, outcomes of care and care systems.
- Use translational science and analytic methods to develop, identify, implement, and evaluate best practices to improve health care and health care systems.
Design and implement health promotion and clinical prevention strategies across the health/illness continuum to optimize health and disease management.

Systematically use improvement methods to monitor and evaluate care processes and outcomes and applies data for continuous improvement and safety.

Advocate for social justice through policy, professional and political engagement.

Applies leadership principles that support interdisciplinary practice.

In addition to the Master's Outcomes above, the Family Nurse Practitioner graduate will:

Utilize advanced assessment, diagnostic reasoning, and evidence-based practice when partnering with individuals, families, and communities to optimize health

Judiciously prescribe treatment modalities to manage acute and chronic conditions within state and federal scope of practice regulations

Function as an independent practitioner to manage comprehensive primary care across the lifespan.
