NURSING: PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER (M.S.)

https://chhs.unh.edu/nursing/program/ms/psychiatric-mental-health-nurse-practitioner

Description

The Master’s in Nursing degree specialty track option in Psychiatric-Mental Health Nurse Practitioner (PMHNP) will prepare the experienced Registered Nurse (RN) with the knowledge, skills, and competencies to assess, diagnose, and manage mental healthcare patients across the lifespan. Foundational core coursework to prepare the advanced practice nurse is completed prior to transitioning into specialty content.

Courses are competency based, founded on evidence-based approaches to care management and learning strategies with commitment to student success and continuous quality improvement embedded within the process. Synchronous, asynchronous, low and high-fidelity simulation, on campus intensives, and clinical immersion will reinforce didactic content and afford the student the opportunity to transition to an active member of a collaborative mental health care team.

Upon successful program completion, graduates will be eligible to sit for the ANCC board certification exam for Psychiatric-Mental Health Nurse Practitioner Across the Lifespan (PMHNP-BC).

Admission Requirements

1. Unencumbered, active RN license in the United States.
2. Baccalaureate degree in Nursing and/or another field.
3. One full year of Registered Nurse experience minimum (Psychiatric experience not required).
4. 3 professional letters of reference—academic and/or professional.
5. Personal statement. Prepare a brief but careful statement regarding:
   a. This is a graduate program that requires a high cognitive load, explain in detail how you are going to prepare yourself for that and manage throughout the program?
   b. Discuss the Master’s PMHNP program, what experiences have contributed to your interest and how do you visualize yourself in this role after graduation?
   c. Where do you visualize yourself in 3 years, 5 years, and 7 years?
6. Resume

Non-BSN Admission Requirements: RNs whose baccalaureate degree is in a discipline other than nursing may apply to the Master of Science degree in nursing (M.S.) program PMHNP track option and will be considered for the track that is commensurate with their clinical experience based on faculty discretion.

Total Credits: 50

* Clinical hours are completed through the following required courses: NURS 986, NURS 987, NURS 988, NURS 989.

Student Learning Outcomes

The Psychiatric-Mental Health Nurse Practitioner builds upon the skills of the baccalaureate prepared generalist nurse.

At the completion of the Master’s nursing program, the graduate student is prepared to:

- Serve in a healthcare leadership and change agent role as part of a diverse, complex, and patient-centered health care system.
- Act as a practice scholar to design, direct and evaluate system changes to promote safe, timely, effective, efficient, equitable and patient-centered care.
- Use data analytic methods, information systems and technology to evaluate, integrate and apply knowledge that will improve programs of care, outcomes of care and care systems.
- Use translational science and analytic methods to develop, identify, implement, and evaluate best practices to improve health care and health care systems.
- Design and implement health promotion and clinical prevention strategies across the health/illness continuum to optimize health and disease management.
- Systematically use improvement methods to monitor and evaluate care processes and outcomes and applies data for continuous improvement and safety
- Advocate for social justice through policy, professional and political engagement.
- Applies leadership principles that support inter-professional practice.

In addition to the Master’s Outcomes above, the Psychiatric-Mental Health Nurse Practitioner graduate will:
• Utilize advanced practice knowledge, skills, and competencies to assess, diagnose, and coordinate and manage mental health care patients across the lifespan
• Recommend and prescribe evidence-based developmentally appropriate treatment modalities to manage psychiatric conditions in patients across the lifespan defined by shared decision-making and patient concordance within state and federal scope of practice regulations
• Engage in professional, bias-free, quality, safe, collaborative, and ethical, evidence-based practice across all mental healthcare practice settings
