PHYSICS (PH.D.)

https://ceps.unh.edu/physics/program/phd/physics

Description

The Physics Ph.D. program prepares students for a career in industry, education, research or academia. Students will progress from studying a core curriculum encompassing fundamental areas of physics to taking elective classes in their area of interest. They will then conduct original research in a particular research area, leading to their PhD dissertation and defense.

For more details, please consult the physics graduate student handbook.

Applying

Please visit the Graduate School website for detailed instructions about applying to the program.

Cognate in College Teaching

The Cognate in College Teaching is essentially a minor in college level teaching; this minor is given in association with a PhD degree only (not with a Master’s); it is not a stand-alone degree. The purpose of the Cognate is to prepare future faculty for their role as teachers. For more information please see the College Teaching program page in this catalog.

Requirements

Ph.D. Degree Requirements

<table>

Select four additional 3+ credit elective courses, of which 2 may be at the 800 level ¹

Total Credits 38

¹ For Space Science students, these courses must include Plasma Physics (PHYS 951), Magnetohydrodynamics of the Heliosphere (PHYS 953), and one of Magnetospheres (PHYS 987), Heliospheric Physics (PHYS 954).

Students are required to

• demonstrate proficiency in teaching,
• pass the written comprehensive exam, and
• pass an oral qualifying exam on a thesis proposal.

Degree candidates are required to

• register for a minimum of two semesters of PHYS 999 Doctoral Research,
• pass the oral dissertation defense, and
• successfully submit the final dissertation to the Graduate School.
