UNDERGRADUATE ACADEMIC CATALOG

The Academic Catalog is intended to provide general information about the University of New Hampshire and program requirements. It is accurate at the time of publishing. The University reserves the right to change, modify, or correct any information contained herein without prior notice, at any time.

Degree and program requirements in the 2023/2024 Academic Catalog apply to students who enter the University between July 1, 2023 and June 30, 2024.

UNH Affirmative Action and Equity Statement

We are a public institution with a long-standing commitment to equal employment and educational opportunity for all qualified persons. We do not discriminate on the basis of race, color, religion, sex, age, national origin, sexual orientation, gender identity or expression, disability, veteran status, marital status, genetic information, pregnancy, or political orientation. This applies to admission to, access to, treatment within, or employment in UNH programs or activities. Sexual harassment and sexual violence are types of sex discrimination. Inquiries regarding discriminatory harassment (including sexual harassment or violence) should be directed to Nadine Petty, Associate Vice President and Chief Diversity Officer, Division of Diversity, Equity and Inclusion, Room 305, Thompson Hall, 105 Main Street, Durham, N.H. 03824, Nadine.Petty@unh.edu, phone (603) 862-2930 (voice), 7-1-1 (Relay NH), (603) 862-2936 (fax); or to the Office for Civil Rights, U.S. Department of Education, 8th Floor, 5 Post Office Square, Boston, MA 02109-3921, phone (617) 289-0111, fax (617) 289-0150, e-mail OCR.Boston@ed.gov.

See the UNH Discrimination and Discriminatory Harassment Policy and Student Code of Conduct & Student Rights, Rules, and Responsibilities for information about the resolution of complaints under UNH policy. Further information may be obtained at the Civil Rights and Equity Office or via e-mail unh.civilrights@unh.edu.

About the Catalog

The University provides information pertaining to the Family Educational Rights and Privacy Act of 1974 (the "Buckley Amendment") in the annual student publication, Student Rights, Rules, and Responsibilities. Information is also available from the office of the Senior Vice Provost for Student Life and Dean of Students. The annual student publication, Student Rights, Rules, and Responsibilities, also contains University regulations and policies regarding student conduct.

The University will supply information about the employment of its graduates who have graduated from our degree and/or certificate programs. This information may be obtained upon request from the University’s office of Career and Professional Success and is available by university, college, or school to current and prospective students. Information on employment outcomes depends on student self-reporting. The University does not guarantee employment to its graduates. Chances for employment are enhanced if students have begun career planning early in their degree programs.

Program descriptions may vary from the actual content or requirements because of advancements in the discipline or the active nature of academic planning and decision making. Accordingly, the University reserves the right to make whatever changes are deemed necessary in schedules, course content, requirements, academic programs (including their termination), calendar, tuition and fees, services, or any other aspect of the University's operations, giving whatever notice thereof is reasonable under the circumstances. Therefore, the provisions of this catalog are not an irrevocable contract between the students and the University. The University is also not responsible for failure to provide or for delay in providing expected services and/or facilities when such failure arises from causes beyond the reasonable control of the University.

- Transfer Credit (p. 40)

V
- Variable Credit (p. 40)

W
- Withdrawal from the University (p. 40)
- Writing Program & Requirements (p. 41)
Academic Integrity

Academic integrity is a core value at the University of New Hampshire. The members of its academic community both require and expect one another to conduct themselves with integrity. This means that each member will adhere to the principles and rules of the University and pursue academic work in a straightforward and truthful manner, free from deception or fraud. The policy can be found in the annual publication of the Student Rights, Rules, and Responsibilities.

Academic Petitions

Waivers or variances of academic policies and procedures are rare and made for documented, compelling, non-academic reasons. Requests are considered through a petition process (e.g., a suspension, extension of incomplete, curriculum requirements, etc.)

Academic Standing & Exclusion, Suspension or Dismissal

Minimum Acceptable Level

A cumulative grade-point average of 2.00 is the minimum acceptable level for undergraduate coursework in the University and for graduation from the University.

The Academic Standards and Advising Committee or Associate Deans examine the records of students periodically and take academic actions to warn academically deficient or potentially deficient students, or may exclude, suspend, or dismiss those who are academically deficient.

Academic Actions (Durham & Manchester Students)

Exclusion

Students whose academic progress is uncertain, as evidenced by a mixture of generally low grades, incomplete courses, and administrative failures, may, upon determination by the Academic Standards and Advising Committee or associate deans, be excluded from further attendance until such time as their academic standing can be clarified, usually by resolution of incomplete courses. In addition, exclusion may be necessary to resolve questions concerning major departmental requirements or University academic standards. Exclusion is a temporary action and will be changed to Degree Status Discontinued, suspension, or dismissal not later than mid-semester following the exclusion action unless the student resolves the situation. If exclusion is not promptly resolved, then the student's preregistration, registration, and University housing will be canceled.

Suspension

Students whose averages fall below the minimum required grade-point average for their class and/or who have demonstrated insufficient progress toward their degrees may be suspended. Students suspended from the University for academic reasons will not be readmitted as degree candidates until one regular UNH academic year semester (fall or spring) has elapsed from the time of suspension. Therefore, students will not be eligible to take courses in the regular session or through Continuing Education. In addition, students suspended in June may not enroll in any course in the Summer Session immediately following their suspension. Students on suspension for any reason will not earn transfer credit for courses taken while on suspension.

Dismissal

Students who have been suspended once and whose average remains substantially below the minimum grade-point average for their class and who continues to demonstrate insufficient progress toward their degree must be dismissed. Only under extraordinary circumstances will a student be readmitted after having been dismissed. However, students who are dismissed may take courses though Continuing Education after one regular UNH semester has elapsed.

Return after suspension or dismissal

Students who are suspended from the University and who wish to seek permission to return should request reactivation through the Office of the Registrar. When requesting reactivation, students must present reasons indicating that they can successfully resume college work. Suspension from the University shall be for not less than one semester. A second suspension is considered a dismissal. Only under extraordinary circumstances will a student be readmitted after having been dismissed for academic reasons.

Academic Actions (College of Professional Studies-Online Students)

Academic Notification

A student who has completed at least 8 credits in a CPS-Online program and has a cumulative GPA below 2.0 is placed on academic notification.

Academic Warning

If a student who is on academic notification still has a cumulative GPA of less than 2.00 after earning an additional 8 credits in a CPS-Online program (i.e., after earning a total of at least 16 graded credits at UNH), the student is placed on academic warning. A registration restriction is placed on the student's account and an academic success plan developed with their Academic Advisor is required to register for the next term.

Academic Probation

If a student who is on academic warning still has a cumulative GPA of less than 2.00 after earning an additional 8 credits in a CPS-Online program (i.e., after earning a total of at least 24 graded credits at UNH), the student is placed on academic probation. Again, a registration restriction is placed on the student's account and completion of an academic success plan with the respective Academic Advisor is required to register for the next term.

Academic Dismissal

If a student who is on academic probation still has a cumulative GPA of less than 2.00 after earning an additional 8 credits in a CPS-Online program (i.e., after earning a total of at least 32 graded credits at UNH), the student is academically dismissed from the College.

In most cases it is advisable for the student to repeat a course (p. 38) when a failing grade is earned.

Rescinding an Academic Standing Level

An academic standing level (i.e. academic warning) is in effect until it is rescinded or elevated to the point where the student is academically dismissed. The college rescinds the academic standing level in writing when the student's GPA returns to the good academic standing level. The Dean academically dismisses the student if the student's GPA does not return to a satisfactory level within the next 32 graded credits for the student.
Accelerated Master’s

Qualified senior students at the University of New Hampshire may be admitted to the Graduate School provided they have followed normal application procedures. Students in the accelerated master’s program must be admitted to the Graduate School before they may enroll in courses for graduate or dual credit. A 3.20 cumulative grade-point average is normally required to be considered for admission to the accelerated master’s program.

Such seniors are normally admitted prior to the start of their last undergraduate semester, but may be eligible to apply for admission the first semester of their senior year. Seniors who have been admitted under early admission may register for a maximum of 12 credits of graduate-level courses prior to completing their bachelor’s degree. Such courses may upon recommendation of the department and approval of the Graduate School count toward both a bachelor’s and master’s degree.

When seniors admitted to the accelerated master’s program have registered for graduate courses, they must maintain a grade-point average of 3.20, complete their undergraduate degree as planned, and pass graduate courses taken for credit with a grade of B- or better. If these conditions are not met, admission is withdrawn.

Not all graduate programs participate; each program’s faculty retain discretion regarding whether their program admits students under the accelerated master’s program, as well as the maximum number of graduate credits permitted (not exceeding 12; e.g., some programs will accept one course, others two). Applicants are strongly encouraged to meet with the graduate coordinator in the program’s faculty to discuss specifics. Graduate course credit (800 level) form must be completed and approved at the beginning of the semester for which graduate credit is sought.

Accelerated Master’s eligible programs

Adding Courses

Students may add a course to their schedule through the end of the add period. The addition may be made in Webcat. Some courses may be restricted or require permission, in which case students should consult with their advisor or the department, on feasibility and process to add that course. A student may add a course after the add deadline only for compelling reasons, which must be presented in a petition for variance in academic policy signed by the course instructor and approved by the student’s advisor and the student’s academic dean or their designee.

All registration deadlines can be found on UNH’s master academic calendar.

Attendance

General Policy

Students are expected to accept the responsibility for satisfactory attendance in each course for which they are registered. What constitutes satisfactory attendance shall be determined in each course by the instructor within the framework of rules below.

Absences from examination and laboratory periods

Any student who is absent without excuse from an announced test, quiz, examination, or laboratory period may, at the discretion of the instructor, be penalized for such absence or be allowed to make up the work missed.

Excused absences

The designation of excused absences and the assignment of any subsequent makeup work are the prerogative of the course instructor. It is expected that instructors will be reasonable in the exercise of this prerogative. In general, students may be excused for reasons such as (a) ill health, (b) participation in official intercollegiate events, (c) personal emergencies (d) instructional trips (e) jury duty (f) required military service and (g) important religious holidays and/or observances as discussed with the instructor, and they will then not be subject to academic penalty.

Absence on voting day

In order that UNH students may fully exercise their constitutional right to vote in New Hampshire state and federal elections, no examinations will be scheduled on the first Tuesday of November, and such should be designated in the University calendars. Opportunities for makeup of other scheduled exercises on those days should be provided where necessary. Faculty are requested to cooperate to the fullest extent with students from communities scheduling elections at other times.

Excessive absences

When students absent themselves from class to such extent that their own progress or that of the class or group is seriously impaired, they will be reported to the dean of their college by their instructor. When reports are received by a college dean, the dean will consider each student’s class standing, academic record, and other pertinent factors; the dean may then a.) warn the student against continued absences by letter or by interview, b.) place the student on scholastic warning or c.) report the student to the Academic Standards and Advising Committee for a decision as to whether the student shall continue in the University.

Auditing Courses

Any student of the University may, with the approval of their advisor and the continuing consent of the instructor, audit courses at the University.

- The deadline for designating a registered course to audit is the the last day to drop without academic liability.
- The instructor will determine requirements for attendance, participation, and any written work.
- Audits appear on the academic record with a grade notation of ‘AU’; no credits are earned.
- Students who do not meet the criteria set by the instructor will be dropped from the course.
- Subsequent requests for change to audit will be by petition for variance in academic policy signed by the course instructor and approved by the student’s advisor and the student’s academic dean or their designee.
- Tuition varies for audit courses; see Fees and Expenses for details.
- To request designation of a course to audit complete an Audit Course Form.

Change of College

An undergraduate degree candidate may change from one college in the University to another only with the approval of the academic deans and departments of the colleges involved by submitting a request through the online change of major process or by submitting a change of campus request. This change must be approved by the academic department of the major to which the student wishes to transfer. Degree candidates

Fees and Expenses
in undergraduate online programs and any associate degree candidate must apply through the Office of Admissions to change colleges.

**Change of Major**

Students may change their curriculum or major to another within the same college by submitting a request through the online change of major process. This change must be approved by the academic department of the major to which the student wishes to transfer.

Students with dual majors must maintain a 2.5 grade point average to continue as dual majors.

Degree candidates in undergraduate online programs must initiate a change of major with their academic advisor.

**Class Level**

University of New Hampshire undergraduate degree candidates are assigned class levels on the basis of credit hours of academic work completed with a passing grade as follows:

**Baccalaureate Degree Candidates:**
- Freshman 0-25 credit hours
- Sophomore 26-57 credit hours
- Junior 58-89 credit hours
- Senior 90+ credit hours

**Associate Degree Candidates:**
- Freshman 0-25 credit hours
- Senior Associate’s 26+ credit hours

**Cognate**

A cognate is a coherent set of courses in a discipline or interdisciplinary grouping aimed at enhancing career-oriented skills in high demand in the employment market. A cognate will typically consist of 12 or more credits with C or better and a 2.00 grade-point average in courses in the cognate.

**Cognate Programs**

**Commencement**

Commencement refers to the formal annual event ceremony held in May. Commencement is organized by University Ceremonies and Events. Walking in the Commencement ceremony does not mean your degree has been officially conferred. ¹

**Eligibility to Participate**
- Must be within 8 credits of completing degree requirements. *If not within 8 credits, students may petition their college dean for permission to participate.*
- Must have applied to graduate for May, or the following September or December.
- Previous September and December graduates will be invited to participate by the Commencement office.

**Register to Participate**

Students must register to participate in Commencement after applying to graduate with the Office of the Registrar. All details and information is available from University Ceremonies and Events.

¹ Degree Conferral refers to the official academic action processed by the Office of the Registrar after graduation certification confirming the successful completion of all degree requirements.

**Communications**

**Communication to Students**

University communications are sent to students through the following channels:

**WEBCAT**
Students receive billing statements, register, and view grades, student accounts, and financial aid awards through Webcat, a part of MyUNH.

**UNIVERSITY E-MAIL**
Important notifications are sent to students by many departments and offices via a UNH e-mail address that is assigned by the University. Students are responsible for checking this e-mail address on a regular basis.

**MYUNH**
Course material and University announcements are available through MyUNH, a student portal system.

**MAIL TO PERMANENT ADDRESS**
Some notifications are sent in the student’s name to the permanent mailing address.

**Core Curriculums**

**Discovery Program & Requirements** (p. 20)
**General Education Program & Requirements** (p. 32)
**Writing Program & Requirements** (p. 41)

**Corequisite**
Corequisites are courses that must be taken together in the same semester/term.

**Course Numbering System**

The University of New Hampshire’s system of numeric designation is as follows:

- **200–299** Historical courses in Thompson School of Applied Science.
- **300–399** Reflected in Aerospace Studies (AERO) courses.
- **400–499** Introductory courses generally not carrying prerequisites and courses generally falling within University and college requirements.
- **500–599** Intermediate-level courses for undergraduate credit only.
- **600–699** Advanced-level undergraduate courses. Entrance to courses numbered 600 and above normally requires junior standing.
• **700–799** Advanced-level undergraduate courses. Ordinarily not open to freshmen and sophomores.

• **800–999** Courses that carry graduate credit only and therefore are open only to admitted or special graduate students.

### Credit Hour Policy

#### Credit Hour Policy

The University of New Hampshire is in compliance with the federal definition of credit hour. For each credit hour, the University requires, at a minimum, the equivalent of three hours of student academic work each week assuming a 15-week semester (student workload for shorter length terms must be increased proportionally per week to maintain required approximately 45 hours of work per credit per term). Academic work includes, but is not limited to, direct faculty instruction, e-learning, recitation, laboratory work, studio work, fieldwork, performance, internships, and practica. Additional academic activities include, but are not limited to, readings, reflections, essays, reports, inquiry, problem solving, rehearsal, collaborations, theses, and electronic interactions. Student work reflects intended learning outcomes and is verified through evidence of student achievement.

### Credit Load

**Fall and Spring semesters**

Undergraduate degree students may enroll for a maximum of 20 credits. Students who wish to exceed 20 credits must petition their college dean and are subject to a tuition overload surcharge (p. 56).

Undergraduate degree student registration is limited to a maximum of 18 credits during the priority registration period (p. 38), except in majors requiring more than 18 credits. Students should consult with their academic advisor. Continuing students may add additional courses to register up to a maximum of 20 credits the Tuesday before classes begin. Minimum GPAs are required as follows PAUL 3.0, all other colleges 2.0.

**Part-Time Students** (enrolled in less than 12 credits): undergraduate degree students may attend on a part-time basis. No special permission is required, it is not necessary to withdraw or register through Continuing Education. Students must contact Student Accounts regarding billing adjustments.

**Summer Session**

Undergraduate students may enroll for a maximum of 12 credits. Students who wish to exceed 12 credits in the Summer must petition their college dean.

**January Term**

All students are limited to registering for one course and a maximum of 4 credits. Exception: Students may register for more than one course provided the courses DO NOT meet concurrently and the total credits do not exceed the 4 credit maximum.

### Cross Campus Registration

Eligibility of undergraduate students to register for courses offered by a UNH campus other than the students affiliated campus follows the general rules below.

#### General Rules

- **Durham Students**
  - May enroll in courses offered by the College of Professional Studies (CPS) Manchester campus.
  - May **not** enroll in courses offered by the College of Professional Studies (CPS) Online campus.

- **College of Professional Studies (CPS) - Manchester Students**
  - May enroll in courses offered by the Durham campus.
  - May enroll in courses offered by the CPS Online campus.

- **College of Professional Studies (CPS) - Online Students**
  - May enroll in courses offered by the CPS Manchester campus.
  - May **not** enroll in courses offered by the Durham campus.

#### Notes

- Affiliated campus is designated by the campus of the students primary major.
- Students should consult with their academic advisor to determine courses appropriate for cross campus registration.
- Cross campus registration is limited by space availability in courses.
- Courses may have additional campus, college, or major restrictions or require special permission to register.
- A comprehensive **schedule of course offerings** is published online and includes information about any additional registration restrictions.

### Degree Evaluation

Degree Works is the degree evaluation and audit tool available to students, faculty and advisors to view progress toward degree completion. It assists in planning coursework and includes a "what-if" feature to evaluate an academic record against other UNH majors when considering a change.

It is a student’s responsibility to monitor degree progress and ensure all requirements are met.

### Degrees & Requirements

*Requirements in this catalog apply to students who enter the University between July 1, 2023 and June 30, 2024.*

### Student Responsibility

A student is held responsible for all work required for graduation and for the scheduling of all the necessary courses. Either faculty or PAT (Professional, Administrative, and Technical) staff members may serve as academic advisors depending on departmental procedures. Academic advisors typically help students both schedule classes that meet university and departmental requirements and monitor their progress throughout their academic career. Either academic advisors or other staff of the associated department/college may assist students in various ways, for example to learn of internships and post-graduation opportunities, and they may direct students to relevant support services when appropriate.

### Academic Catalog Year

Students must follow the rules and policies of the academic catalog in effect at the time of their admission into a degree program for all University requirements. Students follow the major
requirements that are in effect during the academic catalog year the student entered the major program. A student may petition the academic department and dean’s office to follow a prior or, if applicable, future set of major requirements. The student’s Core Curriculum, Writing Program, and other graduation requirements remain in effect from the academic catalog year of matriculation. The Office of the Registrar will use the approved petition to update the student’s major or core academic catalog year.

**Associate Degrees**

- Associate in Applied Science (AAS)
- Associate in Arts (AA)
- Associate in Science (AS)

In addition to the particular requirements for specific degrees and the major, all candidates for an associate’s degree must obtain a passing grade in a minimum of 60 or 64 credits as indicated in the program degree requirements in courses numbered 400-799, must maintain a cumulative grade-point average of at least 2.00 for all courses taken at the University in which a grade is given, and must successfully meet the designated core curriculum (Discovery or General Education Program), and residence requirements as indicated in the degree requirements for the program.

**Baccalaureate Degrees**

- Bachelor of Arts (BA)
- Bachelor of Fine Arts (BFA)
- Bachelor of Music (BM)
- Bachelor of Science (BS)

In addition to the particular requirements for specific degrees and the major, all candidates for a bachelor’s degree must obtain a passing grade in a minimum of 120 or 128 credits as indicated in the program degree requirements in courses numbered 400-799, must maintain a cumulative grade-point average of at least 2.00 for all courses taken at the University in which a grade is given, and must successfully meet the designated core curriculum (Discovery or General Education Program), writing program, foreign language (required for Bachelor of Arts) and residence requirements as indicated in the degree requirements for the program.

**Discovery Program & Requirements**

**UNH Durham and Manchester Undergraduate Degree Programs**

The Discovery Program provides the intellectual framework for students in any major. It represents the faculty’s collective belief in what constitutes and contributes to essential knowledge of the world. Together, students and faculty attempt to understand fully and use ethically that knowledge, both in the present and as a reservoir from which to draw in the future. These intellectual skills, knowledge, and ethical grounding will help prepare students to contribute to the creation of a more sustainable, healthy, just, and prosperous world.

“He who learns but does not think is lost. He who thinks but does not learn is in great danger.” Confucius.

**Discovery Program Student Learning Outcomes**

After completing the Discovery Program at UNH, students should be able to:

1. Communicate effectively by applying skills in reading, writing, speaking, and listening.
2. Acquire and use information appropriately and effectively to research, organize, and present knowledge.
3. Apply mathematical concepts and/or statistical models to understand phenomena and/or solve problems in multiple contexts.
4. Formulate and evaluate open-ended questions that lead to empirical/researchable investigations of complex problems and issues.
5. Analyze and synthesize ideas and perspectives from diverse traditions from around the world.
6. Analyze and synthesize ideas and perspectives from more than one academic or intellectual discipline.
7. Clarify connections between their academic learning and their own ethical values.
8. Demonstrate the integration of learning they have achieved in their major field of study.
9. Exercise imagination in grappling with complex problems of both the natural and human created worlds, and understand the centrality of imagination to all human endeavors.
10. Make connections among the various branches of human knowledge and endeavor.

**Discovery Program Requirements**

**Discovery Foundation Skills**

Inquiry course. This course may fulfill a Discovery category and/or a departmental requirement. It should be taken during a student’s first or second year or prior to completion of 57 credits. For students who transfer in with 26 or more credits, the Inquiry requirement is waived automatically.

One course in writing skills. Most students will satisfy the first-year writing requirement with ENGL 401 First-Year Writing. This course should be taken during a student’s first year or prior to completion of 32 credits.

One course in quantitative reasoning. This course is normally completed by the end of the first year or 32 credits.

**Discovery in the Disciplines**

Students must take one course from each Discovery category at the 400-600 levels. Inquiry courses that carry Discovery category designations may be used to satisfy this requirement.

- One course in Biological Science (BS);\(^1\)
- One course in Physical Science (PS);\(^1\)
- One course in Environment, Technology, and Society (ETS);
- One course in Fine and Performing Arts (FPA);
- One course in Historical Perspectives (HP);
- One course in Humanities (HUMA);
- One course in Social Science (SS); and
- One course in World Cultures (WC) (also may be satisfied by approved study abroad programs).

\(^1\) One of these courses must have a Discovery lab component (DLab).

**Discovery and Integrative Understanding**

One senior capstone experience, supervised and approved within the major.
The capstone experience is typically completed by senior students within the major and is designed to elicit opportunities for educational reflection and synthesis of knowledge and skills; however, students who have completed 90 credits at the end of their junior year may complete their capstone during the summer prior to their senior year. The capstone may be met with an approved experience (as described below). It is not necessarily a course.

Suggested ways of meeting capstone may include: McNair research theses, Hamel Center Programs (IROP, SURF USA, SURF Abroad, URA, INCO 790 Advanced Research Experience), and senior honors theses. Examples of capstone experiences include courses, projects, independent research, internships, artistic expression, or community and service learning opportunities.

The senior capstone experience must meet one or more of the following criteria:

The capstone synthesizes and applies disciplinary knowledge and skills. The capstone fosters reflection on undergraduate learning and experience. The capstone demonstrates emerging professional competencies. The capstone applies, analyzes, and/or interprets research data or artistic expression. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement will vary across departments and colleges and may be satisfied through a course, thesis, created work or product, mentored research project, or some form of experiential learning (e.g., fieldwork). The capstone should occur during the student’s senior year. Departments designate capstones as appropriate to their respective disciplines following the usual administrative procedures for their college or school. Departments are responsible for certifying that graduating seniors have met the capstone requirement for their majors.

**Additional Information**

Discovery Program requirements shall not be waived on the basis of special examinations or placement tests, except for the College Board Advanced Placement tests and the College Level Examination Program (CLEP) tests. All students transferring to UNH in academic year 2019-20 will come in under Discovery Program requirements. For students who transfer in with 26 or more credits, the Inquiry requirement is waived automatically.

**Note to Faculty:** Students may petition the Discovery Committee to replace a requirement. The student’s petition must be approved by the student’s major adviser and forwarded to the Dean of the student’s college.

The required courses cannot be taken on a pass/fail basis. No single course may be counted in more than one Discovery discipline category. Academic departments may or may not permit Discovery courses to count toward requirements for a major. TSAS courses may not be used for general-education (1984-2009), writing-intensive, or foreign language requirements. TSAS courses that are 400-600 level and Discovery-approved may count for Discovery requirements. All Discovery courses carry 3-4 credits.

The most current list of Discovery courses may be found on the [Registrar’s Office](https://www.unh.edu/registrar) website.

**Discovery Foundations**

**Inquiry**

All Inquiry courses must contain four individually necessary and collectively sufficient features:

Inspire curiosity: an Inquiry student will compose open-ended questions that lead to further investigation into increasingly focused problems and issues. Develop understanding and perspective: an Inquiry student will explain a central issue or question of the course using at least two unique perspectives. Clarify standards of thinking: an Inquiry student will be able to identify, compare, and evaluate different interpretations (hypotheses, explanations) of a given phenomenon. Create effective communicators: an Inquiry student will present in clearly organized form the results of the investigation into questions or problems the student has posed.

A complete list of Inquiry courses can be found on the [Registrar’s Office](https://www.unh.edu/registrar) homepage.

**Writing Skills**

Please refer to the [University Writing Requirement](https://www.unh.edu/registrar) section for complete information about this Discovery Foundation.

**Quantitative Reasoning**

Quantitative reasoning refers to the ability to think critically and analytically using abstract formal methods with broad application. Mathematics is the foundation for the physical sciences and, increasingly, for the biological sciences. Its principles and processes illuminate significant aspects of the social sciences as well. In its most precise forms, it enables the design of bridges and the orbiting of satellites. Mathematics discloses invisible truths about the world, makes sense of patterns of which we may or may not be aware, and introduces order to chaos. In its purest form, it creates its own world of beauty and logic. In its more applied forms, it attempts to make sense of individual and collective human behaviors and complex systems. Many courses listed under this category will help students appreciate the principles of mathematics and gain some skill in its applications to realistic situations, while other courses will introduce kindred subjects including symbolic logic, information theory, statistics, and computer science.

**Student Learning Outcomes - Quantitative Reasoning**

- Demonstrate proficiency in carrying out college-level mathematical procedures.
- Use college-level mathematical thinking to analyze situations and data and to solve problems.

**Discovery in the Disciplines**

**Biological Science**

Biology is a branch of science that investigates the structure and function of living organisms. Scientists investigate ideas and observations that solidify our understanding of the diversity of life from single cells to complex organisms. Biology has deep relations with agriculture, chemistry, psychology, and many other fields of study, and it is the foundation of our knowledge of health and disease. Courses under this category deal with the basic structure and function of organisms, the interaction of organisms with their environment, human health, biotechnology, and the concepts and mechanisms of evolution as a fundamental biological paradigm. All courses will provide some understanding of the methods of scientific inquiry and seek knowledge about the living world.

**Student Learning Outcomes - Biological Science (BS)**

- Learn about aspects of the living world as described in the course description.
- Demonstrate an understanding of fundamental concepts in biological science.
Student Learning Outcomes - Fine and Performing Arts (FPA)

will often include learning through practical experience. Those might include, but are not limited to, the history of a particular kind of technology (such as transport, fuel, written language, or weaponry), how technological change comes about in general, the scientific and/or social bases for a given technology, its impact for good or ill on human society and the natural environment, the effects of a changing environment on the arts and literature, and/or the ethical questions these topics raise.

Environment, Technology, and Society

The exponential growth of the sciences and engineering has bred an equally dramatic growth in technological advances. From the flint arrowhead to the latest communication device or weapon, human beings have been inventing things and transforming their lives, their societies, and their environments as they do. But they seldom foresee all the transformations and consequences their inventions bring about. This category stresses the interplay between at least two of these three realms: environment, technology, and society. Topics might include, but are not limited to, the history of a particular kind of technology (such as transport, fuel, writing, or weaponry), how technological change comes about in general, the scientific and/or social bases for a given technology, its impact for good or ill on human society and the natural environment, the effects of a changing environment on the arts and literature, and/or the ethical questions these topics raise.

Student Learning Outcomes - Environment, Technology, and Society (ETS)

One or more of the following:

- Explore the social consequences of technological and/or environmental change.
- Master a technology described in the course description and evaluate its human impact.
- Consider the impact of various technologies on the environment.
- Understand the way the environmental challenges shape the development of technology.

Fine and Performing Arts

The arts communicate through the intellect, the emotions, and the body, sometimes all at once, in ways simple and subtle, direct and subliminal, gentle and soul shaking. Understanding and appreciating the arts enriches our lives and preserves our cultural heritage for the future. Through its performances, publications, and exhibits, UNH offers many artistic experiences for students and the larger community, some of which are linked to courses under this category. Such courses, which may be about painting, sculpture, architecture, music, dance, theater, or film, will often include learning through practical experience.

Student Learning Outcomes - Fine and Performing Arts (FPA)

One or more of the following:

- Develop an understanding and appreciation of differing forms of art expression such as music, visual art, theatre, or architecture.

Historical Perspectives

Even though we are faced daily with evidence of change in our social world and technology, we easily forget that how we live, where we live, and what we see around us are transient states of affairs. It is important to be able to look on one's own world with an imaginative grasp of its history and the forces behind that history. Courses under this category will give students the opportunity to learn about major historical developments and how these developments have shaped contemporary life in all its complexity. Through the study of particular periods and places, students will gain both "historical perspective" and some skill at the methods of historical inquiry. Common to all courses in historical analysis is the presumption that the categories of social analysis are themselves historical and historically contingent, and that to understand the past requires entering imaginatively into languages, institutions, and worldviews quite different from those of the present day.

Student Learning Outcomes - Historical Perspectives (HP)

- Study the signature events that occurred within the time and geographical expanses specified in the course description.
- Explore the way primary sources reveal the ideas and values of people living in a different time and place.
- Appreciate human diversity through examination of class, race, and/or gender hierarchies of the past.
- Interpret the way past events and belief systems have contributed to and differed from the values and intuitions of the present.

Humanities

The humanities arose in Renaissance universities as an alternative to theology and consisted mainly of Greek and Latin literature, which dealt with any and every aspect of human life; they became central to the liberal arts. Since the nineteenth century, the humanities also have embraced modern literature, the creative arts, philosophy, and history. They focus on questions about meaning, ethics, aesthetics, and the foundations of knowledge; they are as concerned with form as with content. Courses under this category explore major works, ideas, and traditions that have shaped our understandings of the world and our sense of self at different times and places while examining the distinctive methods of humanistic inquiry.

Student Learning Outcomes - Humanities (HUMA)

- Engage with literary, philosophical, artistic and/or cinematic works that explore some aspect of the human condition.
- Pose questions about the nature of being, ethical imperatives, aesthetics, or epistemology.
- Write a critical essay investigating a focused question raised by a literary, philosophical, or artistic work.

Physical Science

The physical sciences seek to discover the components, structures, properties, and laws of the material world from subatomic particles to
the entire universe. Through them, we appreciate both the wondrous complexity of the world and its order. The traditional domains of chemistry, physics, astronomy, cosmology, and Earth sciences are the foundations of knowledge in numberless arenas of human activity, while the intersections between these domains and the biological sciences yield astonishing discoveries about living organisms. All courses will provide some understanding of the methods of scientific inquiry, seek knowledge about the physical universe, and evaluate claims in both technical literature and popular media.

**Student Learning Outcomes - Physical Science**

- Learn about aspects of the physical world specified in the course description.
- Demonstrate an understanding of fundamental concepts in the physical sciences.
- Use mathematical models and computational thinking to understand the physical world.
- Communicate scientific information effectively in written and oral formats.
- Summarize, analyze, and evaluate scientific data.
- Explain how hypotheses are tested or rejected.
- Master appropriate laboratory and field techniques commonly used in physical science.

**Social Science**

The social sciences investigate human beings and their societies from the smallest bands of hunter gatherers to huge nations and global institutions. Everything from marriage and kinship to law and crime, from ceremonial gift giving to mortgage derivatives, from witchcraft to health insurance, from ancient ritual to modern communication, is a subject of study. The social sciences are shaped by social groups and institutions, including those associated with politics, economics, religion, family, the arts, health, and education.

**Student Learning Outcomes - Social Science (SS)**

- Apply quantitative and/or qualitative data to investigate the dynamics of social interactions.
- Develop testable hypotheses regarding the social and cultural world they examine.

**World Cultures**

Living in a world of many cultures has created both cooperation and conflict across borders, between and within nations. This category, which includes intermediate language courses and approved study abroad programs, encourages students to become cosmopolitan citizens by gaining knowledge and understanding of cultures other than those of the United States. Students will learn to recognize others’ values and, ultimately, accept the many ways in which we all are human. They are thus encouraged to see their own culture with fresh eyes and know the sheer diversity of human outlooks.

**Student Learning Outcomes - World Cultures (WC)**

- Explore human diversity by studying societies and cultures outside the United States.
- Recognize the diversity and validity of unfamiliar cultural values.

**Discovery Lab (DLAB)**

A course that fulfills the laboratory requirement in the Discovery Program should provide students with hands-on experience that reinforces, supports, and/or augments the material presented in other formats throughout the course. It should teach them how the discipline uncovers and validates knowledge; how phenomena are understood through observation, experimentation, and quantitative analysis; how data are collected and interpreted; and how hypotheses are created, tested, modified, confirmed, or invalidated. These experiences also are likely to provide insights into how scientific theories and models are constructed. A significant portion of specified course time must be devoted to laboratory and laboratory-related activities. For example, a conventional model for a 4-credit laboratory course consists of three 50-minute (or two 75-minute) weekly lecture periods plus one 80-minute weekly laboratory period. However, courses may include different and/or innovative laboratory experiences provided the total amount of course and laboratory time is comparable.

**Student Learning Outcomes - Discovery Lab (DLAB)**

- Explain phenomena through observation, experimentation, and quantitative analysis.
- Collect and interpret data.
- Create, test, modify, confirm or invalidate hypotheses.
- Master appropriate laboratory and field techniques used in the biological and physical sciences.
- Communicate scientific material effectively in written and oral formats.

Dropping & Withdrawal from Course

Drop Period
During the drop period, a student may unenroll from a course through Webcat or by working with their advisor. A course dropped during the drop period will not appear on the student transcript.

Withdrawal Period
Following the drop period, there is a withdrawal period. Withdrawal from a course during the withdrawal period will be recorded on a student transcript with a grade of W. The Withdrawal (W) grade is not included in GPA calculations.

Exclusion from a Course After Enrollment
A student may be excluded from any course after enrollment, with or without penalty, upon recommendation of the instructor and with the approval of the dean of the college in which the student is registered, as soon as it becomes reasonably apparent that such student is unqualified to carry the course successfully.

Refund Policies & Deadlines
For refund policies see Student Accounts and Financial Aid.

Deadlines for the drop and withdrawal periods vary by course duration and are posted on the UNH Master Academic Calendar. (Tip: filter by Event Type - Registration Deadlines)

Dual Degrees

General Policy
The option to pursue two baccalaureate degrees simultaneously enhances and broadens the education of certain students at the undergraduate level. The program is only for those students who can adequately handle the requirements for two different degrees and who can reasonably allocate the additional time and effort needed for the program. Except for specific five-year degree programs, a student may not pursue two different degree levels simultaneously.

Requirements
- Students must petition the college dean or deans involved for permission to pursue a dual degree.
- If the student is planning to take one degree in a highly prescribed curriculum, they should register as a freshman in the appropriate school or college for that curriculum.
- It is expected that a candidate for two degrees baccalaureate will complete 32 credits beyond those required for the first degree.
- It is expected that students will maintain a minimum 2.5 cumulative grade-point average.
- Students can earn more than one Bachelor of Science (B.S.) degree, provided that each degree is in a different field.
- Students cannot earn more than one Bachelor of Arts (B.A.) degree.

Supervision
As soon as a student is accepted as a candidate for two degrees, the appropriate dean(s) will appoint supervisors for each of the proposed majors. The supervisors and the student will work out a basic course plan for the two degrees and inform the appropriate dual degree dean(s) of the plan. The supervisors will maintain joint control over the student’s academic program. The deans’ offices and the supervisors will receive copies of the grade reports and other records for students pursuing two degrees.

Transfer Students
Transfer students already holding a baccalaureate degree from another accredited institution may pursue an additional dissimilar baccalaureate degree at the University of New Hampshire, provided they fulfill the requirements for the dual degree listed in the undergraduate catalog. The degree received at the first institution will be accepted by the University of New Hampshire as awarded by that institution.

College of Professional Studies-Online students: a student may only be fully accepted to one degree program at a time. Students nearing completion of an Associate Degree within CPS-Online and who have applied to graduate, may also apply for admission to one of the College’s Bachelor’s Degree programs. Students nearing completion of their Bachelor’s degree may apply for admission to a Graduate level or Post Baccalaureate program within CPS-Online through the existing application process.

Dual Majors
The University offers several designated Dual Major programs to students. Students that wish to pursue a dual major must declare a primary major first. A dual major cannot be a standalone major. One degree is awarded, that of the primary major.

Additionally, the University offers the opportunity for students to add a Second (Double) Major (p. 39).

Educational Reprieve
Upon petition to the Academic Standards and Advising Committee, a former UNH student who has taken no courses for five or more consecutive years may, prior to readmission to UNH, request “educational reprieve.” The procedure permits retention of the previous credit from all courses in which grades of C- or better were earned; but the former cumulative grade-point average, although retained for informational purposes on the academic record, will not be used. A new grade-point average will be started upon readmission. The notation “educational reprieve” will appear on the student’s academic record.

Note: Honors at graduation (p. 35) will be based on the restarted grade-point average, and provided the minimum graded semester hours have been completed at the University of New Hampshire subsequent to the reprieve.

Enrollment Status

Undergraduate Students

Degree candidate
A student who has been formally admitted into a program leading to a degree awarded by the University of New Hampshire.

Part time status
Enrolled in fewer than 12 credits in a given semester.

Full time Status
Enrolled in 12 or more credits in a given semester.
Special student status (Non-Degree Students)
A student who has not formally been admitted into a program leading to a degree awarded by the University of New Hampshire. Such students are usually restricted to part-time study unless permission is granted by the Office of Admissions.

Enrollment Verification
An enrollment verification is a document indicating student enrollment status and includes: enrolled status of full or part-time, credit hours, and expected date of graduation. The University of New Hampshire has authorized the National Student Clearinghouse to act as its agent for verification of enrollment status. Enrollment data is sent to the National Student Clearinghouse soon after the standard add/drop period. Students may print a certification of enrollment to send to health insurers and credit issuers. Students can view any electronic notification forms that the Clearinghouse has sent to their lenders, servicers, and guarantors, and may also link to real-time student loan information to determine outstanding balances and due date of their next payment.

Ordering instructions are available on the Office of the Registrar’s website.

1 For verification of a degree, order an official transcript.

Equivalent Courses
Courses are equivalent when the same course content is taught under different course subject prefixes and/or course numbers.

Equivalent courses may be applied interchangeably to satisfy degree requirements, unless otherwise prohibited by program (major, minor, program) specific rules.

The repeated course (p. 38) rule is applicable if a student takes two equivalent courses. Equivalent courses also include courses in the past taught under different subject prefixes, numbers, titles, or a writing intensive or honors course section.

Examinations
Final Exams
Final Examinations at the end of each fall and spring full semester may be given in any course. All such final examinations must be scheduled during the designated final exam period on the academic calendar and given at the time scheduled.

No announced oral or written test/exam may be given during the last five days of classes preceding the designated final examination period. The following are exceptions:

- Practical examinations covering laboratory work may be given during the last five days of classes preceding the designated final exam period.
- In courses of a modular nature with several instructors, the instructor of the final module may schedule a final exam during the last five days of classes preceding the designated final exam period. Approval must first be obtained from the college dean.

Priority of Final Examinations and Scheduling Conflicts
Students scheduled for three final exams on the same day during the designated final exam period may choose to take only two final exams on the same day. The final exam scheduled in the middle (second) will be rescheduled. The instructor, in consultation with the student, will schedule a makeup final exam.

Students enrolled in a Term 2 or Term 4 course that conflicts with a final exam scheduled during the designated final exam period, the final exam has priority.

Two final exams scheduled at the same time during the designated final exam period should not occur. But, if such a conflict occurs the following priorities are applicable:

- Final exams in courses required by the students major have priority.
- If neither final exam is for a course required by the students major, the student works with both instructors to determine which final exam is rescheduled.
- If an online and in-person final exam are scheduled at the same time, the in-person final exam has priority.
- If a conflict between campuses occurs, the final exam scheduled on the campus of the students major has priority.

Weekly Common Exam Hours
Weekly common exam hours are designated by the University as “free” hours, which are reserved for convocations or common exams for multi-section courses. Normally, classes and labs are not scheduled during these hours. The Registrar may allow some exceptions to this policy; however, any classes or labs scheduled during these hours must excuse without penalty all students whose attendance is also required for common exams.

Designated Weekly Common Exam Hours:
Tuesday - 12:40pm to 2:00pm
Thursday - 12:40pm to 2:00pm and 7:10pm to 9:00pm

Weekly common exam hours are not applicable to the College of Professional Studies (Manchester & Online divisions).

Foreign Language Requirement
The Bachelor of Arts degree requires proficiency in a foreign language. This requirement may be fulfilled by completing the equivalent of a full-year elementary-level course in a language not previously studied, or by completing the equivalent of a semester of a course in a foreign language at the intermediate or higher level, or by earning credit through an approved Advanced Placement or College Board foreign language achievement test (minimum scores vary). The proficiency in a foreign language requirement must be satisfied by the end of the sophomore year. No credit is awarded for elementary year college coursework if the student has had two or more years of that language in high school. It is strongly advised that students check with academic departments or academic centers to identify department-advised specific foreign language proficiency options.

A Student with a documented disability who wishes accommodation on the basis that the disability will prevent them from successfully
mastering a foreign language requirement, or whose foreign language requirement was waived in high school because of a documented disability, must contact Student Accessibility Services, Smith Hall, (603) 862-2607 (Voice/TDD).

**General Education Program & Requirements**

**UNH College of Professional Studies-Online Division, Undergraduate Degree Programs**

The general education program is founded on fostering intellectual curiosity and preparing people to realize their full potential in a complex and changing world. Students explore major fields of knowledge and engage with ideas through action and application. With commitment to and respect for adults of all ages, the general education program will offer students opportunities to:

**Communicate**, particularly
- Write with clarity.
- Create digital or visual content.
- Communicate interpersonally.

**Think critically and comprehensively**, particularly
- Evaluate information.
- Reason with numbers.
- Think analytically.
- Define complex problems.

**Apply knowledge to workplace and community**, particularly
- Engage with diverse individuals, groups, and cultural frameworks.
- Participate in citizenship and community.
- Solve challenging problems using disciplinary knowledge.
- Reflect on learning to guide professional practice.

**Communicate**

Three required courses.

In transfer, a minimum of 3 credits is required to meet each course requirement.

1. CRIT 602 Advanced Critical Analysis and Strategic Thinking is not required at the associate level. CRIT 602 Advanced Critical Analysis and Strategic Thinking will not be waived for transfer students holding associate degrees but will be waived for students with an earned bachelor’s degree in another field. CRIT 602 Advanced Critical Analysis and Strategic Thinking must be taken at Granite State College and cannot be satisfied through transfer credit, testing, or other forms of prior learning assessment.

**Apply Knowledge to Workplace and Community**

Four required courses. Select one course from each of the below areas.

In transfer, a minimum of 3 credits is required to meet each course requirement.

**Knowledge of Human Behavior and Social Systems: Social Sciences Disciplines**

Courses in this area recognize how changes occur in human development, behavior, social values, groups, and/or institutions.

Interdisciplinary Seminar

This upper-level seminar’s specific topic varies by individual course section.

Note: IDIS 601 Interdisciplinary Seminar should be taken after all other general education requirements are completed. IDIS 601 Interdisciplinary Seminar is not required at the associate level. IDIS 601 Interdisciplinary Seminar will not be waived for transfer students holding associate degrees but will be waived for students with an earned bachelor’s degree in another field. IDIS 601 Interdisciplinary Seminar must be taken at Granite State College and cannot be satisfied through transfer credit, testing, or other forms of prior learning assessment.

Grades

General Grading Policy

Grading policies as stated apply to all undergraduate students.

An instructor may assign grades as listed below. In general, these are letter grades. The intermediate grades are designated by adding a plus or a minus to the letter grade. Grade points assigned to plus grades are 0.33 higher than those assigned to the letter grade without the plus. Grade points assigned to minus grades are 0.33 lower than those assigned to the letter grade without the minus. In certain cases, where the format of the course creates difficulties for this type of grading, the course will be designated “credit/fail” if authorized by the faculty of the department in which the course is taught, the dean of the appropriate school or college, and the provost and vice president for academic affairs.

Students earning a semester or cumulative grade-point average less than 2.00 are placed on academic warning.

In an attempt to keep evaluation as objective as possible, instructors will assign a letter grade to a student exercising the pass/fail grading alternative. The instructor will not know that the student is exercising this alternative.

The credit hours or other work units covered by the F grade shall be considered in full in figuring the average, except that the F awarded in a pass/fail grading alternative or in a credit/fail course shall not be figured in the average. Courses covered by the CR or P grades shall not be considered in figuring the average. The number of grade points for a course is determined by multiplying the numerical equivalent of the grade times the semester hours of the course. The grade-point average is determined by the sum total of grade points divided by the sum total of graded credits (courses taken under the pass/fail grading alternative or credit/fail courses are not included in the divisor). The grade-point average is calculated to two decimal places. It is not rounded.

No course taken from another institution will be used in figuring the grade-point average.

The Faculty Senate recognizes that grade inflation exists at the University of New Hampshire. The senate, therefore, states that throughout this University the grade of C shall indicate competent, acceptable performance and learning in undergraduate courses; the grade of B shall indicate superior performance and learning; the grade of A shall indicate excellent performance and learning. These standards shall apply equally to all undergraduate courses, instructors, departments, subjects, and colleges.

</tr>
</tbody>
</table>

CR: Credit: given in specific courses having no letter grades, designated credit/fail

P: Pass: given in a course taken under the student pass/fail grading alternative

W: Withdrawn

AU: Audit: no credit earned

IC: Incomplete Coursework: grade report notation for student's incomplete coursework

IA: Continuing Course or Thesis: indicates "incomplete" in a thesis or continuing course of more than one semester; the grade earned will replace "IA" assigned in previous semesters

IX: Grade not reported by instructor

Administrative Failure (AF)

An AF grade is usually assigned to the student who stops participating in the course and has not completed course work sufficient for the assessment of course outcomes by the faculty member to issue a letter grade. The administrative failure is usually the result of a student’s failure to officially drop or withdraw from a course they stopped attending. An AF counts as an F grade in the calculation of grade point averages.

An AF grade can have financial implications for students utilizing Federal Financial Aid programs as well as Veteran and/or Military benefits.

Incomplete (IC)

A notation of incomplete (IC) shall be recorded on a student’s record only if a major portion of the entire work of the course has been completed and if the instructor approves the student’s request for additional time to complete the coursework. The initiation and responsibility for finishing the incomplete work rests with the student.

When the work of the course has been completed, a final grade for the term will be submitted to the student’s college dean. The form indicating completion of the work must be filed with the Registrar no later than the middle of the semester immediately following the one in which the incomplete was granted. A petition requesting an extension of time beyond mid-semester, if approved by the instructor, may be submitted to the dean of the student’s college. An extension will be granted by the dean only under unusual circumstances.

If the work is not completed within the specified time, the grade will be recorded as F.

An Incomplete (IC) grade in a student’s final semester will delay their graduation date even if the course is not required for graduation.

Pass/Fail Grading

See detailed policy information about Pass/Fail grading (p. 36).

Grade Appeals

Instructors must be prepared to discuss and to explain the basis for their evaluations of students. If, after consulting the instructor, students still believe that they were treated unfairly, they have the right to seek redress from the chairperson of the department or program in which the course is offered. Under exceptional circumstances, a final appeal may be made to the dean of the college in which the program is offered.

Grade Changes

Requested grade changes submitted before the middle of the semester immediately following the one in which the grade was granted may be approved by the student’s academic dean or their designee. After mid-semester, students must petition the Academic Standards and Advising Committee. Students in the College of Professional Studies Online Division petition the CPS Academic Exceptions Committee.

Graduation Certification

The graduation certification process is managed by the Office of the Registrar. Degrees are awarded three times a year: December, May and September. Candidates for graduation shall be certified as to their college requirements by the several college faculties to the Registrar, who shall recommend them to the president for their appropriate degrees provided they have satisfied all university degree requirements for graduation (p. 19). Students must formally apply to graduate within the published deadlines on the master academic calendar to initiate the graduation certification process. Coursework must be complete and graded by the graduation date for which applied. Incomplete grades in the final semester will prevent graduation.

Modifications tend to occur in major programs during the period of students' undergraduate careers. Students are expected to conform to these changes insofar as they do not represent substantive alterations in their course of study.

Note: Although the University will try to provide sufficient facilities so that students may pursue any major or curriculum for which they meet the requirements, such a privilege cannot be guaranteed, since rapidly increasing enrollment sometimes results in the overcrowding of required
specialized courses. On occasion, students may remain in a crowded curriculum if they are willing to take certain courses during the summer session.

**Confirmation of Graduation**

Approximately four weeks after the date of graduation, students may check their Academic Transcript on Webcat. View "Degrees Awarded", when the "Degree Date" displays the date of graduation, this confirms graduation. If no date of graduation is displayed, the Office of the Registrar will contact the student to resolve any issues.

**Honors**

**Classification**

An undergraduate degree student, after completion of at least 12 graded semester hours in University of New Hampshire courses, will be designated as an honor student for a given semester if the student has:

1. Completed at least 12 graded (not CR or P/F grades) semester hours for that semester and earned at least a 3.50 semester grade-point average or
2. Earned at least a 3.50 cumulative grade-point average and at least a 3.50 semester grade-point average regardless of the number of graded credits that semester.

**Honors at Graduation**

**Baccalaureate degree candidates**

Students who have earned honors for their entire work at the University will be graduated with honors based on the final cumulative grade-point average, provided that a minimum of 64 graded semester hours (30 for CPS-Online students) has been completed in University of New Hampshire courses. The Latin equivalent of the honors designation will appear on the student’s academic record and diploma. The student’s honors designation will be noted in the Commencement program.

**Honors Designation & GPA required:**

- Summa Cum Laude: 3.85-4.00
- Magna Cum Laude: 3.65-3.84
- Cum Laude: 3.50-3.64

**Associate degree candidates**

Students who have earned honors for their entire work at the University will be graduated with honors based on the final cumulative grade-point average, provided that a minimum of 32 graded semester hours (16 for CPS-Online students) has been completed in University of New Hampshire courses. The English equivalent of the honors designation will appear on the student’s academic record and diploma. The student’s honors designation will be noted in the Commencement program.

**Honors Designation & GPA required:**

- Highest Honors: 3.85-4.00
- High Honors: 3.65-3.84
- Honors: 3.50-3.64

**Leave of Absence**

Any student not subject to any academic or conduct action wishing to seek a leave of absence from their degree program may consult with their respective college dean’s office or the Office of the University Registrar. Reasons for requesting a leave of absence may include financial, academic, personal, or health reasons. Students who request a leave that begins while they are enrolled for a given semester will be subject to the rules governing refunds and the award of W. In most instances, however, leaves that are not health-related begin after the completion of a semester. Students on a Leave of Absence for any reason, except Military Leave of Absence, may not earn transfer credit for courses taken while on the leave of absence.

Any student taking a leave of absence from UNH for health reasons may consider the Health Leave of Absence process. More information about Health Leaves can be found at https://www.unh.edu/health-leaves. Students who are granted a Health Leave of Absence are prohibited from study away program participation during the duration of the leave, must remain on leave for one complete semester following the granting of the leave, and must submit a letter of support from a treatment provider to be reviewed by the Dean of Students prior to approval and reinstatement.

Students returning from a leave for a fall semester must notify the Registrar by June 1 of their intent to return and by November 1 when returning for spring semester. Students will be reinstated into the same major at the point of their leave’s start. Normally, leaves of absence may not exceed three academic years or six semesters, exclusive of J-Term and Summer Session. Military students who are deployed for longer than one year will be allowed to reactivate into original program requirements as long as they can provide official orders corresponding with their absence from the college. Exceptions to the leave of absence policy will be granted by the University Academic Standards and Advising Committee and only in unusual circumstances.

Until mid-semester, students may take a Leave of Absence from the University without academic liability. Students withdrawing from the University after the drop period will receive a “W” in all courses. Failure to return from a leave of absence or to formally withdraw is considered a lapse in a student’s degree status in the next semester after three academic years have elapsed and a transcript notation is recorded “degree status discontinued.” The student must subsequently apply for readmission.

**Majors and Options**

A student earns an undergraduate degree with at least one declared major. Students complete major, core curriculum (Discovery or General Education Program), Writing Program, and degree requirements.

Within majors of four-year programs, students often have choice among two or more ‘options.’ An option is generally a set of 15-24 required credit hours of related courses within a particular major. The term ‘option’ is reserved for baccalaureate degrees. Options allow students to specialize within a discipline. The choice of option is recorded on the student’s transcript.

1 College of Professional Studies-Online bachelor’s degrees require a minimum of 32 credits in the major/option.

**Military Accommodations**

The University of New Hampshire recognizes the importance of supporting our military students who are called to serve this country. Military students who have received orders that will interrupt their enrollment may be eligible for accommodations as follows:
For students who receive notice of orders prior to the start of an enrollment period:

- Due to the potential uncertainties that may come from military service obligations, it is strongly recommended that students who receive notice of orders prior to the start of an enrollment period take a military leave of absence for that enrollment period. This can be completed by contacting their college dean’s office or the Office of the Registrar.

For students who receive notice of orders after the start of an enrollment period:

- A student can elect to accept an incomplete grade, which will be recorded at the end of the term, provided that more than half of the class meetings have passed, and both the student and faculty agree to this option. A student selecting this option will have 90 days after the completion of their orders or the middle of the following semester, whichever is longer, to complete any missing assignments. Faculty of students electing the incomplete grade option must complete an incomplete grade contract that is an agreement of the terms and specifics about the deadlines and assignments. A student who does not complete the work within the 90-day period will need to repeat the course; in this case, the incomplete grade will be treated as an F and the student will not be refunded any tuition or fees. If completing course work within 90 days isn’t possible, students have the option to submit a petition to finish at a later date.

- A student can elect to withdraw from one or more courses with a grade of “W” if the official add/drop period for the college has passed. A student electing this option will have their tuition and fees refunded or credited, whichever is deemed appropriate, without credits awarded.

- Students who are called to serve for longer than one year will be allowed to reactivate into original program requirements as long as they can provide official orders corresponding with their absence from the College.

Students may not enroll if they have completed any mutually exclusive courses with a passing grade.

Petition for Variance in Academic Policy must be submitted for a mutually exclusive course to:

- Request permission to register due to exceptional circumstances.
- Request permission to exercise the repeated course (p. 38) rule.

Note: credit will not be awarded for the most recent course completed, unless approved by petition.

Pass/Fail Grading

An undergraduate student working toward a bachelor’s degree may elect to use the pass/fail grading alternative for a maximum of 4 credits per semester, not to exceed 16 credits during the student’s matriculation. An undergraduate student working toward an associate’s degree may elect to use the pass/fail grading alternative for a maximum of 4 credits per semester, not to exceed 8 credits during the student’s matriculation.

Students in their first term at the University have the option to change up to 4 credits from graded to pass/fail at any point prior to the Friday of the 10th week of the semester and must obtain the approval of their advisor.

All other students have the option to change up to 4 credits from graded to pass/fail prior to the end of the add period (the second Friday of classes) and must obtain the approval of their advisor.

The pass/fail grading alternative may not be used for the following types of courses:

1. Core Curriculum requirements (Discovery Program or General Education Program Courses)
2. Writing Intensive requirements
3. Major and minor requirements
4. To repeat a course previously taken
5. Foreign language requirement

The minimum passing grade requirement for a course taken pass/fail is D- (0.67). The course grade of a pass/fail course will not be calculated into the grade-point average of the student, but the pass or fail will be recorded on the student's transcript. In the event of a pass, the student will receive the course credits (credit hours) toward degree requirements. The undergraduate student may elect the pass/fail grading
alternative without permission or knowledge of the faculty member (course instructor). Upon request, the Registrar shall inform the instructor of any course of the percentage of students enrolled as pass/fail.

1 Peter T. Paul College of Business and Economics courses may NOT be taken on a pass/fail basis by a student majoring in business administration, economics, or hotel administration.

2 Students in bachelor’s degree programs within the College of Professional Studies, Online may not exceed 8 credits within a degree program. Advanced approval of the Assistant Dean of Curriculum or Dean of the School of Education is required prior to registration.

Prerequisites

Course prerequisites are those courses that are required to have been successfully completed prior to enrolling in another course and must be so described in the University catalog.

Before registering for a course, students should check the course catalog to determine course prerequisites.

Students who fail a prerequisite to a course for which they are registered must drop the course. This policy applies to degree and non-degree students. It is the responsibility of the student to ensure all prerequisites or other requirements for a course have been met.

Prior Learning Assessment (PLA)

UNH College of Professional Studies (CPS) Online Students

In addition to previous college courses, prior learning acquired through workplace training and/or other life experiences is acknowledged and recognized as the foundation on which to build a degree program. The College provides options to demonstrate how prior learning may satisfy degree requirements.

Preapproved PLA Options

National Training Programs

The American Council on Education (ACE) and the National College Credit Recommendation Service (NCCRS) have evaluated and made recommendations regarding college credit for many formal training programs from business and industry, government, and nonprofit agencies. Credit will be awarded based on the recommendations of the ACE National Guide to Educational Credit for Training Programs and the College Credit Recommendations Directory of the National College Credit Recommendation Service. Students must request an official transcript from ACE or documentation of successful completion from the training sponsor. Official transcripts are sent directly to the College Undergraduate Admissions Office.

Workplace Training Programs Evaluated by CPS

CPS awards credit for college-equivalent learning gained through training. Training that the College has evaluated includes the NH Police Standards and Training Academy, the State of NH Division of Personnel Management, NH Fire Standards and Training, Primex, as well as other training programs. The student must provide official documentation of successful completion of the training program; documentation must be sent directly from the training sponsor to the college.

To pursue credit for preapproved prior learning, see detailed information and FAQs for preapproved prior learning options accepted by the College of Professional Studies-Online Division.

Note: Students must be accepted and enrolled in an undergraduate online degree program with UNH College of Professional Studies-Online Division for prior learning credit to be awarded and transcripted.

Non-Collegiate Course Providers

Credit may also be earned for courses taken with non-collegiate course providers, such as Saylor Academy, Sophia.org, and StraighterLine, which have been evaluated by the American Council on Education (ACE) or the National College Credit Recommendation Service (NCCRS) and recommended for college credit. In order for credit to be awarded, the ACE or NCCRS-recommended score must be achieved on the proctored exam.

Examination Programs

ACE and the NCCRS have also evaluated certain tests to demonstrate college-level knowledge and earn credit. The College recognizes competency demonstrated through Advanced Placement (AP), American Council on the Teaching of Foreign Languages (ACTFL) proficiency testing, College Level Examination Program (CLEP), DSST, NOCTI Business Solutions, and UExcel. Students are responsible for any fees associated with testing options.

The College will award the number of credits and the subject area recommended by ACE or NCCRS. For credit to be awarded, the content of the exam must meet an outstanding degree requirement. Credits acquired through testing cannot duplicate credits earned from other sources. The College limits on credit awarded for examination programs are for all of the sources listed combined.

Contact a CPS Academic Advisor prior to taking any standardized examination to ensure that the examination selected is not duplicative of course work completed or projected, or of other tests.

CLEP (College Level Examination Program)

Students who take a CLEP exam and do not receive a passing score must wait 90 days before retaking the exam. Detailed information about exams, and list of available subjects is available on the CLEP website.

DSST Exams (Defense Subject Standardized Test)

Students who take a DSST exam and do not receive a passing score must wait 90 days before retaking the exam. List of DSST exams and related fees, College Code: 8478.

Excelsior College Examinations (UEXCEL)

UEXCEL exams must be taken with Pearson VUE. There are limitations to the total number of times an exam can be retaken, as well as a waiting period between attempts. Cost varies depending on exam. Credit will be awarded based on the recommendation of the American Council on Education at the time the exam was taken. Upper level credit may be awarded for some exams. List of Excelsior College Exams.

Portfolio Assessment Options

Portfolio options are available to demonstrate college-level learning acquired through training and/or life experiences. Credit can be requested for specific College courses, or based on courses from other regionally-accredited institutions, or developed by the student with college-level learning outcomes. The following degree requirements are not eligible for
Experiential learning portfolios are developed in CRIT 603 Critical Inquiry in Prior Learning Assessment. In the course, students will work closely with their instructor to develop a portfolio that demonstrates prior learning based on the learning outcomes of a specific course needed for a student’s degree completion. The portfolio will then be assessed by a trained evaluator and they will determine if the student has displayed evidence of prior learning and if credit may be awarded. After successful completion of the course, students may submit additional credit requests for evaluation. If submitted within one year of completion of the course, no portfolio evaluation fees will apply. If submitted after one year of completion of the course, an evaluation fee of $350 per course equivalent credit request will apply. All credit requests must be submitted within three years of successful completion of the course. CRIT 603 Critical Inquiry in Prior Learning Assessment can be repeated no more than once after withdrawal or failure. Portfolio assessment of prior learning is not available to students who are within 16 credits of degree completion.

If students have completed a prior learning portfolio and received credit at a regionally accredited college or university that isn’t a member of the Consortium for the Assessment of College Equivalency (CACE) they may submit their portfolio to the College for assessment. Students choosing this option will be given information about the required portfolio components, evidence validity criteria, and the standards for college-level equivalence. Once the portfolio has been submitted to the College, the Director of Liberal Arts will provide an initial assessment of whether the portfolio meets the minimum requirements to be sent to a faculty evaluator. The student will assume responsibility for any further development of the portfolio based on this initial review prior to sending the portfolio for faculty assessment. The prior learning assessment fee will be charged at the point the student notifies the college that they want the portfolio to be sent for evaluation.

**Prior Learning Credit Limits**

CPS will apply a maximum of 30 prior learning credits towards an Associate Degree and 60 credits towards a Bachelor’s Degree for any combination of the prior learning credit options. These credits do not count in the residency requirement for degree programs. Prior learning credit requests should be made within six months of acceptance to maximize potential credit awarded.

**Fees**

No fee is charged to award credit for standardized exams, training evaluated by the American Council on Education, or the National College Credit Recommendation Service or the Consortium on the Assessment of College Equivalents (CACE). A PLA fee of $350 is charged for credit awarded for workplace training and occupational credentials that the College has previously evaluated and preapproved for credit. For up to one calendar year after admission to the College, the PLA fee covers multiple submissions of documentation. After one calendar year, a fee of $350 per training experience or credential submitted will be charged.

Financial Aid may be used to pay the PLA fee if the student has financial aid eligibility, submits an Award Revision Request Form indicating their intent to use financial aid for this purpose, and completes the Federal Title IV Financial Aid Authorization Form.

**Progress Reports**

All undergraduates. In the week preceding the drop deadline, course instructors will provide early alert indicators on any students in their classes with below average performance as indicated through absences, missing/late assignments, or quiz/test results. Some faculty may not assess substantive progress until the Midterm Examination. Faculty members are able to issue an alert/referral on individual or groups of students by logging into myWildcat Success anytime during the semester or term.

**Registration**

Credit will be given only for those courses for which a student has properly registered.

**Priority Registration**

Priority registration is the period before open registration in which undergraduate degree students may begin course registration for an upcoming fall/spring semester or term. Dates and deadlines for priority registration are designated by class level (p. 18) and posted on the Academic Calendar. Registration access codes (RACs) are required to complete priority registration by Durham and Manchester undergraduate degree students.

**Early Priority Registration**

- Veteran students are assigned early priority registration. This means that Veteran students register during the initial registration period of their designated class level.
- Student athletes are assigned early priority registration. This means that student athletes register during the initial registration period for their designated class level.

**Registration Access Code (RAC)**

Registration access codes are assigned to avoid overloading the registration system during the high demand course registration periods for fall and spring courses. Registration access codes are assigned to eligible students based on their current class level (p. 18). RAC times are assigned randomly within class levels from earliest to latest and cannot be changed. RACs are released to students by their academic advisor.

- Durham and Manchester undergraduate degree students are assigned a RAC for fall and spring priority registration.

**Account Holds**

Certain holds on accounts will prevent registration. View holds in Webcat under the Registration menu.

**Repeated Courses**

Any student who is regularly registered for a course and who satisfies the requirements shall receive credit except that no student shall earn credit for the same course twice, unless otherwise noted in the catalog. When students repeat a course, the former credits and grade points shall be removed prior to the calculation of their cumulative grade point average and the repeated course information shall be added. Both grades are visible on the official transcript. A notation will be made on the student’s record beside the grade received on the repeated course indicating that it
is a repeat. In order for a course to be considered “repeated”, the course numbers and titles must match exactly. If the course numbers and titles do not match exactly, the student must obtain written permission from their academic advisor and the endorsement of their college dean on a Petition for Variance in Academic Policy form before the adjustment will be made to their transcript. Students may not use the pass/fail grading alternative to repeat a course. Both the original course and the repeated course must be UNH courses.

Residence Requirement

“Residence” is being enrolled in University of New Hampshire courses after admission to and matriculation in a degree program. Students who are candidates for bachelor’s and associate degrees must attain the last one-fourth of their credits toward the degree in residence unless granted permission by the Academic Standards and Advising Committee to transfer part of this work from other accredited institutions.1

1College of Professional Studies-Online students: academic residency begins on the date of application to a degree program. Prior Granite State College credits earned as a non-degree student will apply to the residency requirements if the credit is applicable to the student’s approved plan of study. For an Associate Degree, residency is 16 credits. For a Bachelor’s Degree, residency is 30 credits. A student who has completed a Granite State College Associate Degree must earn an additional 14 credits in residence in the Bachelor’s program.

Second (Double) Major

Bachelor’s degree students may choose to fulfill the requirements of two dissimilar major programs, provided they obtain the approval of the second major department and the dean of the college in which the second major is offered and comply as follows:

• If the two majors are offered in different schools or colleges within the University, the admissions requirements of each must be satisfied.
• If the two majors have two distinct degrees; e.g., B.A., B.S., or some other designated degree, students must choose which of the two degrees is to be awarded and fulfill all requirements for that degree.
• No more than 8 credits used to satisfy requirements for one major may be used as requirements for the other major.
• UNH Durham students may not pursue a second major offered by the College of Professional Studies-Online.

Student Designed Majors

Under special circumstances, students may design their own majors. This option is offered for highly motivated and self-disciplined students who seek a course of study that is not available through existing programs at the University. It allows students, with the close supervision of faculty members, to cross department and college lines and to create educational experiences on and off campus as part of individual programs of study.

Student-designed majors are administered by a committee of elected faculty that operates through the Office of the Provost and Vice Provost for Academic Affairs. Students who want to design their own majors are required to give the committee evidence of careful thought and planning in a proposal.

Proposals are only reviewed once a semester. Fall submissions are due by October 15 of the student’s junior year. Spring submissions are due by February 25. The committee will convene soon after the deadline to review the proposals. Under no circumstances will the committee consider a senior year proposal.

Proposal guidelines are available in the Office of the Provost.

The College of Professional Studies-Online, offers several bachelor’s degree programs in Individualized Studies within designated areas. Individualized Studies majors develop an approved program of study leading to a specific educational or professional goal. Students interested in the Individualized Studies major should contact their academic advisor. The student will work with their advisor and the Director of Liberal Arts to determine if an Individualized Studies degree is feasible. Once the student’s degree plan has been researched and finalized, the student must submit a proposal to Academic Affairs for approval.

Study Away Eligibility

Academic Eligibility

Students enrolled in UNH baccalaureate degree programs may participate in approved study away programs provided they meet the following eligibility criteria:

• Must have earned at least 32 credit hours, at least 12 of which must have been earned at the University of New Hampshire at the baccalaureate level.
• Must have a minimum 2.5 cumulative grade point average at the time of application to and at the time of departure for the study away program. Study Away Programs provided by UNH or approved institutions may have higher minimum GPA requirements.
• Must have a declared major.

Transfer students, including transfer students from Thompson School of Applied Science (TSAS) are not eligible to study away during the first semester of their baccalaureate program at UNH.

Students enrolled in the degree programs of the Thompson School of Applied Science may participate in approved study away programs appropriate for two-year degree candidates. TSAS students must meet the following eligibility criteria:

• Must have earned 32 credits, at least 12 of which must have been earned at the University of New Hampshire at the associate degree level.
• Must have a minimum 2.5 cumulative grade point average at the time of application to and at the time of departure for the study away program. Study Away Programs provided by UNH or other approved institutions may have higher minimum GPA requirements.

Special consideration will be given to those students who, although below the 2.5 cumulative GPA threshold, have demonstrated promise in the previous two semesters. Those who wish to be considered for academic variance must petition for an academic variance with the support of their advisor and their Dean’s Office. Petitions for academic variance are subject to approval by the Academic Standards & Advising Committee (ASAC).

Eligibility and Student Conduct Policy

Students sanctioned by the University Student Conduct System for a serious violation of the University of New Hampshire Student Rights,
Rules, and Responsibilities, including but not limited to academic dishonesty, repeated drunk and disorderly behavior, illegal drug activity, destruction or theft of property, or physical or sexual assault must satisfy the following conditions prior to consideration for participation in a UNH-managed or UNH-approved study away program:

- Students must have satisfied all conditions and/or sanctions imposed as a result of the infraction, including probation.
- Students must submit a statement for approval to the university’s Academic Standards and Advising Committee (ASAC) explaining why the University can be confident that they will behave appropriately during the study away program.

These same conditions will apply in instances where the conduct issue has been addressed through the court system rather than through the University’s Student Conduct system.

**Thompson School of Applied Science Courses**

Baccalaureate and Associate in Arts degree candidates may take 200-level Thompson School courses for credit with the following stipulations:

1. The TSAS course must be transferable to UNH at the time it is taken.
2. Grades received in 200-level courses will be recorded on the student's transcript but will not affect or be included in the student's GPA. Baccalaureate degree candidates cannot register for COM 209.
3. TSAS courses may not be used for writing-intensive, or foreign language requirements. Only TSAS courses that are at 400 - 600 level and Discovery approved may count for Discovery requirements. TSAS courses may be used for major or minor requirements only if specifically approved on a course-by-course basis by the department granting the major or minor and when the student meets the usual minimum grade requirements of that program. Note: TSAS transfers to the four-year program, COM 209 is accepted to fulfill the WS requirement and is considered a Writing Intensive course.
4. AA/BA/BS students must earn a grade of C or better to receive credit for a Thompson School course.

Transfer credit is awarded for courses that have been completed with a grade of C or better at another institution accredited by an accreditation agency recognized by the U.S. Department of Education, provided those courses are comparable to courses offered at the University of New Hampshire.

A comparable course passed with a C grade or better at another accredited institution may be accepted for credit with the approval of the department concerned and the dean of the college in which the student is registered. 

1. UNH students whose status are withdrawn, leave of absence, or suspended due to academic performance may not transfer credits earned during the period of required separation. Any UNH Student whose status is suspended due to a conduct violation may not transfer credits earned during the first semester of their suspension.

UNH students who are ineligible for participation in a UNH-managed/UNH-approved study away program due to their academic or conduct standing may not transfer credits earned in a study away program to their UNH degree. Students who are eligible must receive prior approval to transfer these credits from UNH Education Abroad/Away by the specified deadlines. Students should contact UNH Education Abroad for more information regarding eligibility.

Credits for a C grade or above are transferable from one institution to another within the University System (Keene State College, Plymouth State University, and the University of New Hampshire). Grades received in courses for which a student has been granted transfer credit will not appear on the UNH transcript and will not affect the student’s grade-point average.

1. Students are advised to complete a transfer credit prior approval form, before enrolling for such a course at another institution.
2. Grades received in courses for which a student has been granted study away transfer credit will appear on the UNH transcript and will not affect the student’s grade-point average.

**Variable Credit**

Credits in a variable credit course are established either by the student with departmental approval or assigned by the department at the beginning of the semester. In either case, the student may make the change in Webcat by the end of the add period.

**Withdrawal from the University**

A student may voluntarily withdraw from the University by obtaining, completing, and submitting a withdrawal form from the Registrar’s Office through the withdrawal period.

Failure to register in any regular semester or to formally withdraw is considered a lapse in a student’s degree status and a transcript notation is recorded “degree status discontinued.” The student must subsequently apply for readmission.

If a student receiving federal financial aid officially (W) or unofficially (AF) withdraws from coursework in a term or from a degree program, return policies designated by the U.S. Department of Education will apply.

A prorated schedule is used to determine the amount of federal aid a student has earned at the time of the withdrawal up to the 60% point of a student’s enrollment. Unearned aid will be returned to the U.S. Department of Education and the student is responsible to the college for the balance which results.

For students who unofficially withdraw from the term, federal financial aid regulations allow that a student’s aid be prorated based on presumed attendance through the half-way point.

If a student withdraws from a course, but is registered for a late start course in the same term (and the drop date has not passed for the late start course), then written confirmation of the student’s intent to
return is required to be provided to the Office of Financial Aid or a return calculation will be performed.

Students receiving aid through the Department of Defense's (DoD) Federal Tuition Assistance program are subject to the same prorated schedule of returning unearned aid if the student officially or unofficially withdraws from a course(s). The calculation will be based on the student's last date of attendance in the course(s). The unearned aid will be returned to the DoD. Students are responsible for any balances that results from the calculation. The only exception is when the student stops attending due to military obligation.

Writing Program & Requirements

In 1995, the Academic Senate established the Writing Program as an expression of the following fundamental values and goals for writing at UNH: As the cornerstone of any higher education, academic and disciplinary literacy is the concern of the entire faculty and the whole University curriculum. Understanding that literacy is a long-term development process, the University community is committed to the following goals for student writing and learning:

• Students should use writing as an intellectual process to learn material and to discover, construct, and order meaning.
• Students should learn to write effectively in various academic and disciplinary genres for professional and lay audiences.
• Students should learn to display competence with the generic features and conventions of academic language.

In order to help realize the above goals, writing intensive (WI) courses were established as well as the University Writing Requirement (UWR).

University Writing Program Requirements

All bachelor's degree candidates are required to complete four writing-intensive courses. In order to fulfill the University Writing Requirement, all undergraduates must complete the following four courses with a passing grade:

1. ENGL 401 First-Year Writing
2. One Writing Intensive (WI) Course in the Major
3. One Writing Intensive (WI) Course at the 600 Level or Above
4. One Additional Writing Intensive (WI) Course (any other)

Exceptions to the Writing-Intensive (WI) Requirement

Frequently Asked Question: “Can the same course satisfy the course-in-the-major requirement and the 600-level or above requirement?”

Answer: Yes, one course can satisfy both of these requirements (see pattern B below), but the course would only count as one of the three WI courses needed. In this case, the student would need to take two other WI courses (in addition to ENGL 401) to satisfy the requirement. Thus, a complete WI sequence would conform to one of the two generic patterns below.

A) Separate Courses for the 600+ Level and in the Major Requirements

1. ENGL 401 First-Year Writing
2. WI in the Major (any level)
3. WI @600+ level (any)
4. WI (any)

B) The Same Course for the 600+ Level and in the Major Requirements

1. ENGL 401 First-Year Writing
2. WI in the Major @600+ level
3. WI (any)
4. WI (any)

Note: the numbers in the above examples are for reference and don’t reflect a required sequence. A particular major may have more specific requirements that may depart from the above models.

The Rationale for Writing and Learning at UNH acknowledges that the WI course structure provides a minimum framework for writing in the curriculum and that there will be writing in non WI-designated courses. The Writing Committee’s position is that WI Course Attributes are definitive and that only courses bearing the WI Attribute will count for the WI requirement. In short, students are expected to enroll in UNH WI-designated courses to satisfy the WI requirement.

Writing-Intensive (WI) Course Identification

WI courses are identified by "Writing Intensive Course" in the "Attributes" section of the course descriptions and/or a W following the course number.

Example:

CEP 795W (01) - Investigations
Special assignments in readings, investigations, or field problems, or teaching experience. May be repeated.
Attributes: Writing Intensive Course
Instructors: STAFF

Some courses have both writing-intensive and nonwriting-intensive versions, such as HIST 405 History of Early America and HIST 405W History of Early America. In these cases, only the sections with the "W" in the course number are writing intensive.

Writing-Intensive Courses Master List

Not all courses below are offered every semester. See the course schedule for course offerings by semester.

General Information

The University

UNH offers 275-plus degree programs across 11 schools and colleges to some 14,000 undergraduate and graduate students. There are thousands of courses to choose from, and most enroll no more than 50 students, helping create a 16:1 student-to-faculty ratio that gives UNH students direct access to award-winning faculty. With three out of four undergraduates also completing at least one internship, experiential learning and thoughtful classroom discussions are hallmarks of the UNH experience.

The goal is to help each student become the kind of person the world most needs. And it’s working: The UNH Class of 2022 boasts a 94% success rate, with 77% of students employed within 12 months after graduation and another 17% seeking further education. Additionally, the significant majority of employed graduates — 89% — reported that their job was directly or somewhat related to their major. That kind of return on investment is what led UNH to be ranked the No. 1 best value public university in New England for the second consecutive year in 2022 and a top-10 best value public university in the country, according to the Best Value Schools rankings of National Universities by U.S. News & World Report.

UNH students and faculty have been collaborating to make the world a better place for more than 150 years, and not just in the classroom — from the uncharted ocean depths to the edge of our solar system to the Earth we all share, our research transforms lives and delivers solutions to global problems. Powered by more than $190 million in competitive external support, UNH is one of just 146 doctoral-granting universities in the country — and one of only 47 without a medical school — to earn the "very high research activity," or R1, designation from the Carnegie Classification of Institutions of Higher Education. Undergraduates in every academic discipline enjoy broad access to research experiences — two out of three professors mentor undergraduates on research — and can even get funding to pursue them through the university’s Hamel Center for Undergraduate Research. Many conduct independent inquiries, an experience that gives them a leg up on graduate school and employment applications.

We know that students who graduate with hands-on, real-world experience are more likely to have successful careers, so in addition to all the classroom learning and research, UNH offers 250+ study abroad programs, a robust career and internship center and a dedicated fellowships office, all of which help students find opportunities that bolster their academic and career goals. Our entrepreneurship center helps aspiring business owners make their dreams reality.

Academic excellence with an impact beyond the classroom. Top-ranked programs across a remarkable array of majors and disciplines. Inspiring professors who make a difference in the lives of their students. Research innovation changing the world. Prepared, successful graduates. You’ll find all of that and a lot more at UNH.

Mission

The University of New Hampshire is the state's flagship public research university, providing comprehensive, high-quality undergraduate programs and graduate programs of distinction. Its primary purpose is learning: students collaborating with faculty in teaching, research, creative expression and service. UNH has a national and international agenda and holds land-grant, sea-grant and space-grant charters. From its main campus in Durham, its college in Manchester and the UNH Franklin Pierce School of Law in Concord, the university serves New Hampshire and the region through continuing education, cooperative extension, cultural outreach, economic development activities and applied research.

UNH is distinguished by its commitment to high quality undergraduate instruction, select excellence in graduate education, relatively small size, a location in a beautiful and culturally rich part of the seacoast of New England and a strong sense of responsibility for this special place, a commitment to serving the public good and our emergence over the past decade as a significant research institution. The dedication of our faculty to the highest academic standards infuses all we do with the excitement of discovery.

Strategic Priorities

https://www.unh.edu/leadership/future

UNH President James W. Dean Jr. announced four strategic priorities in January 2019 that continue to guide UNH toward a bold, overarching aspiration — to be among the nation's top 25 public universities in the most important measures of academic performance. Drawing on input from thousands of UNH community members, each of the four priorities includes new and existing initiatives and metrics that will direct and measure progress in these important areas. The list of initiatives is not exhaustive. Rather, it brings attention to some of the leading efforts we are driving to move these strategic priorities forward.

Enhance Student Success and Well-Being

Aspiration

UNH will ensure that all students graduate on time and are engaged and ethical global citizens. They will be prepared to thrive in their first jobs and throughout their careers. UNH will become a national leader in designing the educational experience from the first year to graduation.

Expand Academic and Research Excellence

Aspiration

UNH will attract increasingly strong and diverse students and faculty from across the country and abroad. The university will be known and respected for the high caliber of teaching, research and advising in its academic programs. Its distinguished research, scholarship and doctoral
education will be recognized worldwide, including its contributions to global sustainability challenges.

**Embrace New Hampshire**

**Aspiration**
UNH will work hard to make everyone in New Hampshire incredibly proud of their flagship public university. Students will grow up here wanting to come to UNH, and it will be the first choice for the best and brightest students from New Hampshire and around the world. UNH will build collaborations that support New Hampshire's economy and quality of life, sustainability and resilience and will be a trusted, valuable and consistent partner.

**Build Financial Strength**

**Aspiration**
UNH will be a national leader in long-term cost management, sustainable investing and aligning its budget and resources with its strategic priorities. UNH will become more accessible and affordable for students by diversifying revenue sources and managing resource use and expenses. UNH will meet the full range of student needs by providing world-class faculty, facilities and organization.

**University System of New Hampshire**

**Trustees and Administrative Officers**

https://www.usnh.edu/trustees

The University System of New Hampshire is governed by a Board of Trustees comprising the Governor of the State, the President of the Senate, the Speaker of the House, members appointed by the Governor and Executive Council, alumni-elected members, student-elected members, the Commissioner of Education, the Commissioner of Agriculture, the presidents of the University System's colleges and universities, and the Chancellor. The Chancellor is the chief executive officer of the University System. The Board composition is stipulated by State law and is detailed in the USNH Charter, section 187- A: 13.
Academic and Support Services

The University offers programs and services to help every student get the most out of their college experience.

Advising Services

Every UNH student is assigned an academic advisor, who provides help in choosing courses and planning a program of study.

Career and Professional Success (CaPS)

With an uncommon commitment to personal and professional development, Career and Professional Success (CaPS) empowers all UNH students to proactively build the knowledge and skills they need to adapt and succeed in an ever-changing future. We are coaches, mentors, and champions for students and alumni in the Wildcat community. In partnership with faculty, staff, employers, and our global alumni network, we orchestrate opportunities for experiential learning, mentoring, networking, and personal growth, equipping students with the tools to thrive throughout their lives.

For more information about programs, services and opportunities, call (603) 862-2070, email caps@unh.edu, visit https://www.unh.edu/career, or follow @unhcaps on all major social media platforms.

Internships

Career and Professional Success supports students in locating pre-professional internships in settings ranging from traditional business and research facilities, to more uniquely tailored environments that reflect academic and career interests. Students who wish to engage in career-oriented work experiences for university credit should consult with an appropriate faculty sponsor in their department regarding established programs and the possibility of receiving academic credit. Many academic departments list internship opportunities and programs on the department website.

Additional paid and unpaid internship postings can be found through UNH’s job and internship board, Handshake.

For more information on internships at UNH, call (603) 862-2070 and/or visit https://www.unh.edu/career.

Center for Academic Resources (CFAR)

The Center for Academic Resources (CFAR) offers a holistic approach to our academic-related services for undergraduate students. Our dedicated team of professional educational counselors and student academic mentors are committed to enhancing students’ educational experience and academic success. We coach students on how to study smarter in their classes focusing on note taking and reading strategies, exam preparation and taking skills, approaches to problem-solving and language learning, organizational skills, time management, and ability to access and utilize online portals. Using an individualized approach, we bring our valuable academic experiences and specialized training to our student meetings. Our services are easy to access. Students can drop-in Monday through Thursday from 11 to 3 and meet with an academic mentor or educational counselor. Appointments are available Monday through Friday from 9 to 5 through https://unh.myconline.com/. Study tools and STEM resources can also be found on our website. For more information call (603) 862-3698, e-mail cfar.sss@unh.edu or visit http://www.unh.edu/cfar

TRIO Scholars - Student Support Services (SSS)

The TRIO Scholars (SSS) program is federally funded by the United States Department of Education to increase the retention and graduation rates of program participants. Students are eligible for TRIO Scholars (SSS) if neither parent or guardian has earned a bachelor's degree, if their family income is within program guidelines, or if they have a documented disability.

TRIO Scholars (SSS) participants work with a TRIO Academic Coach to create individualized success plans focusing on academic development, financial literacy, personal development, and professional development to help translate personal goals into action. The TRIO Scholars (SSS) program also includes educational workshops, cultural events, leadership development opportunities, and access to free ongoing, comprehensive tutoring.

The TRIO Scholars (SSS) program is located on the second floor in Smith Hall.

*UNH TRIO Student Support Services is funded by the US Department of Education and the University of New Hampshire. In 2022-23 federal funding totaled $379,979. The University of New Hampshire contributed an additional $88,636 in matching funds. The project was funded to serve 200 students in 2022-23.

Honor Societies

The University of New Hampshire has a long and strong valued tradition of recognizing outstanding student academic achievement through election to a variety of honor societies. Some of these national societies recognize performance in any academic field while others are limited to specific disciplines.

Honor societies are most prevalent in colleges and universities. Based on varying criteria of high academic achievement and leadership, students are invited to join most commonly in their junior or senior year. Although initiated into the campus chapter, students become members of the national society for life. For more information visit https://www.unh.edu/honors-program/national-honor-societies.

International Students and Scholars

The Office of International Students and Scholars (OISS) provides a wide range of services to international students, faculty staff, and exchange scholars. These services begin before the international visitors arrive on campus and often continue past the completion of their programs. OISS services include: Preparation of eligibility documents for visa issuance along with pre-arrival instructions and information; Preparation of applications to U.S. immigration offices to secure appropriate work authorization for international faculty and staff; In-depth and engaging orientation programs for new students and scholars covering a variety of issues such as immigration rights and responsibilities, adjusting to life in another culture, working in the U.S., adapting to the U.S. educational system, area attractions and services, and much more; A variety of workshops and seminars covering topics such as immigration and employment and career orientation seminars; Programming and events such as International Education Week, international student and scholar lunches, presentation series, graduation receptions, trips, and much more.

All international students are encouraged to maintain contact with the OISS and are required by law to report changes of address, academic program, or source of educational funds.

OISS also serves as a key liaison between international students, faculty and staff and various other UNH offices and departments. For more information visit www.unh.edu/global or call (603) 862-1288.

Military & Veteran Services

The mission of the Military & Veteran Services Office is to provide the highest quality service and support to Student Veterans, Service Members, and other military-affiliated students such as dependents, as outlined in the Veteran Administration’s Principles of Excellence and 8 Keys of Success. Furthermore, we strive every day to ensure that we exceed the University’s inclusivity standards as laid out by the University Commission on Community, Equity, and Diversity.

We subscribe to and follow PL 113-146 Section 702, The Veterans Access, Choice and Accountability ACT of 2014.

For more information, please contact:

- Durham Campus - UNH.Veterans@unh.edu, 603-862-0643
- College of Professional Studies, Manchester Division - jennifer.hashem@unh.edu, 603-641-4329
- College of Professional Studies, Online Division - karie.thomson@granite.edu, 603-513-1364

Or visit the Military & Veteran Services website.

Psychological and Counseling Services

Psychological and Counseling Services (PACS) is the primary mental health facility on campus. We are fully funded by student fees. Our confidential services are designed to help students who are enrolled
in full-time study to achieve their personal and academic goals. PACS utilizes a brief, solution-focused counseling model. We provide online interactive self-help therapy via WellTrack, individual and group therapy in person and via telehealth, workshops, and consultation with a psychiatrist. We offer crisis counseling in person, during business hours, and after hours, through ProtoCall. Students needing longer term service are offered referrals to other university and community agencies.

We also aim to serve the community while being part of the community. As community members with specialized training in working with the university population, we are knowledgeable about the special needs of students, faculty, staff. A large part of our community work focuses on prevention; we believe that increased awareness of healthy ways to cope with stress can help the UNH community and its individual members achieve their professional and personal goals.

All information about a student’s visits to PACS is confidential and cannot be released without the written permission of the student. The University of New Hampshire Psychological and Counseling Services has been accredited by the International Association of Counseling Services since 1978.

For more information, call (603) 862-2090 or visit http://www.unh.edu/pacs.

Student Accessibility Services
Student Accessibility Services (SAS) is committed to establishing a community that ensures full participation for students with disabilities by providing assistance that facilitates independence and academic progress. The office is responsible for determining a range of student supports, including but not limited to academic, housing and dining accommodations. In addition, we are a source of information and referral; a resource and collaborative partner for the campus community; and a point of support and advocacy regarding access issues in general.

All accommodation requests are considered through an interactive accommodations process. This consists of three important steps: (1) register with SAS, (2) submit documentation, and (3) meet with SAS. To learn more about our documentation requirements for both general and housing-only requests, please see our Documentation Guidelines pages on our website. There is no deadline to make contact, complete an intake, or provide documentation, but accommodations cannot be applied retroactively so timeliness of the request is important. Accommodations can also be reconsidered at any time. Should a student have the need to change their accommodations, students should contact SAS to discuss the request.

If you would like to request accommodations or would like to learn more about the services offered within SAS, please contact: For more information call (603) 862-2607 (voice), 711 (TTY) or 800-735-2964 (Relay NH); (603) 862-4043 (fax); e-mail SAS.office@unh.edu; or visit http://www.unh.edu/studentaccessibility. Student Accessibility Services is located in Smith Hall, Room 201.

General Information for Students with Disabilities
Students seeking academic or housing accommodations, services, and accessibility should contact Student Accessibility Services (SAS): voice (603) 862-2607; TTY Users: 711 or 800-735-2964 (Relay NH), e-mail SAS.office@unh.edu.

Students with disabilities who need accessible UNH housing should contact SAS as early as possible to allow for identification of appropriate accommodation(s) and notification from SAS to Housing. Please visit Accessibility & Disability Accommodations, Housing & Residential Life to learn more including information about priority housing deadlines.

For information about dietary restrictions, visit Nutrition, Dining. The UNH Hospitality Service Dietician can help students navigate the dining options and support access to inclusive services.

Most major buildings have ramps and many have elevators and adapted restroom facilities. Contact the Civil Rights & Equity Office (603) 862-2930, with questions about building facilities.

No otherwise qualified individual may be excluded from or denied access to any program, course of study, or any other offering of the University solely on the basis of a disability. Concerns regarding the institution’s compliance with the Americans with Disabilities Amendments Act (ADAA) of 2008, or Section 504 of the Rehabilitation Act of 1973 should be addressed to the ADA/504 Compliance Officer in the Civil Rights & Equity Office at (603) 862-2930 (Voice/TTY).

University Advising Center
The University Advising Center provides academic advising to undeclared students in the College of Liberal Arts. The center’s professional staff provides assistance to students in clarifying their interests and skills as they relate to developing a program of study at the University and declaring a major, offering opportunities to explore career possibilities.

The center is the primary academic advising resource for non-degree students and assists all students in identifying and connecting with other resources across campus.

For more information call (603) 862-2064 or visit www.unh.edu/uac.

University Writing Programs
The University Writing Programs (UWPs) were created to promote, support and assess writing at the University of New Hampshire. The UWPs are housed in Academic Affairs and report to the Senior Vice Provost for Academic Affairs. The UWPs are contained in a single unit that includes responsibility for the Writing Committee, Writing Across the Curriculum (WAC), the Connors Writing Center (CWC), and the Online Writing Lab (OWL). The curricular component of WAC, consisting of the writing-intensive (WI) courses, is situated within academic departments.

We work with academic units, departments, allied programs, individual faculty, and students to advance the culture of writing at UNH. This approach values and encourages writing as an “activity and subject of study”¹ not only in writing intensive (WI) classes but wherever writing occurs. Through frequent guided practice, UNH students become accustomed to negotiating the writing process, are more self aware and able to transfer positive writing habits, and can adjust to differing genre conventions. We offer a wide array of services and resources to support students and faculty with their writing-based endeavors in the curriculum.

For more information call (603) 862-3272 or visit www.unh.edu/writing.

Connors Writing Center
The Connors Writing Center offers free, one-on-one writing conferences to members of the UNH community: students, faculty and staff. We work with writers from all disciplines on many different kinds of writing. Our
50 minute conferences are conducted by trained writing assistants, who are UNH undergraduate and graduate students.

We work with writers on all types of writing, from analysis essays to lab reports, conference proposals to dissertations. Our conferences are not limited to one specific type of writing or a single academic field—we collaborate with writers from across the university on a large range of academic writing.

Typically, the writers who visit are working on projects for courses. But we also see writers who are working on personal projects, statements of purpose and personal statements for graduate school, and so on.

For more information about resources and services available call (603) 862-3272 or visit www.unh.edu/writing.

Accreditation

The University of New Hampshire is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.).

Accreditation of an institution of higher education by the Commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Commission is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the Commission should be directed to the administrative staff of the institution. Individuals may also contact:

New England Commission of Higher Education
3 Burlington Woods Drive, Suite 100, Burlington, MA 01803-4514
(781) 425 7785
E-Mail: info@neche.org

Specialized programs of study are also accredited by various professional organizations.

Veterans and their eligible dependents may apply for educational benefits before the start of each semester. For information, contact the UNH veterans coordinator at UNH.Veterans@unh.edu or by phone at (603) 862-0643.

The University supports the efforts of secondary school officials and governing bodies to have their schools achieve regional accredited status to provide reliable assurance of the quality of the educational preparation of their applicants for admission.

Admissions

Durham

unh.edu/main/admissions

UNH Durham Campus Degree Programs

UNH welcomes campus visitors year-round. In-person campus tours are led by student admissions representatives who provide a general overview of academic programs and campus life opportunities. Professional admissions staff are available to provide information about the criteria used by the admissions committee in reviewing candidates and to address specific concerns. For further information or to schedule a campus and/or group information session, visit the Admissions website at http://admissions.unh.edu/visit. Prior registration is recommended for all in-person visits and students are limited to two guests. More information and requirements regarding the application process to UNH can be found on the following website http://admissions.unh.edu/apply.

Admission Criteria

Admission to a bachelor’s degree program is based upon successful completion of a strong secondary school program of college preparatory coursework. Primary consideration is given to the academic record, as demonstrated by the quality of the candidate’s secondary school course selections, achievement in their secondary school courses and recommendation. Consideration is also given to character, initiative, leadership, and special talents. In fall 2020, UNH adopted a test-optional policy. Applicants are not be required to submit their SAT and/or ACT test scores for consideration as part of their admissions application. Due to COVID-19, NCAA Eligibility Center also implemented the test-optional policy to students recruited by our intercollegiate athletic programs.

Applicants for admission must, at a minimum, present at least four years of English, three years of mathematics (algebra I, geometry, and algebra II), two years of laboratory sciences (3 years preferred), two years of history or social science, two years of a single world language is preferred and 2 additional full-year college preparatory courses to total 15 units. Some programs may have additional requirements for admission.

Students who plan to pursue a major in engineering, biological/physical sciences, mathematics, or forestry should present at least four years of mathematics including trigonometry, as well as laboratory coursework in chemistry and/or physics. Note that students are required to have a math and laboratory science in their senior year to be competitive for admission to a major in our College of Engineering & Physical Sciences and College of Life Sciences & Agriculture. Students pursuing business-related studies should complete four years of mathematics through their senior year; including trigonometry. For students planning to major in health-related disciplines, four years of math, as well as laboratory courses in biology and chemistry, are strongly recommended. Students interested in nursing must complete high school chemistry.

Applicants may indicate their first and second choice majors on the application for admission. An undecided applicant may apply for admission into a bachelor’s program as an “undeclared” student to any one of the University’s five college divisions in Durham or at UNH Manchester. For information concerning bachelor and associate degree programs offered through UNH Manchester, visit http://manchester.unh.edu; for information concerning the associate degree
UNH students may request a change in major during their undergraduate years. While most are approved, some majors are more restrictive than others and require the completion of specific coursework and an additional application. Change of major requests are considered after a student has been at the University for at least one semester and has permission from the appropriate college dean and department chairperson.

Admission Test Requirements

Beginning fall 2020, first-year applicants have the option to submit SAT or ACT scores to be considered as a part of their admission application. Applicants are not required to submit SAT or ACT scores as part of the admissions application process at the University of New Hampshire. When submitting the admissions application, you will be asked “Would you like us to consider your standardized test scores in the admissions decision?” Please note, that once an admissions decision has been made on your application, you may not change your test score preference.

*If you enroll as a member of UNH’s Class of 2027, you may be asked to submit your test scores after the May 1 deposit deadline for university research purposes only.

International students whose primary language is not English must provide evidence of English proficiency by submitting the results of a Test of English as a Foreign Language (TOEFL), IELTS or Duolingo. The recommended minimum TOEFL score is 213 (computer version) or 550 (paper version) or 80 (Internet version). UNH also accepts the International English Language Testing System (IELTS) English Language proficiency examination in lieu of TOEFL; the minimum acceptable proficiency grade is 6.5; recommended Duolingo score is 105 or higher. International students who earn a 500 or higher on their ERBW (Evidence-Based Reading and Writing) section of the SAT will be waived the English proficiency test requirement.

Music Candidates

Candidates applying for programs in the Department of Music must make arrangements with the department chairperson for an audition. Details regarding audition requirements may be obtained from the department, or may be found on the Department of Music website at http://cola.unh.edu/music.

Admission Deadlines

The Office of Admissions welcomes high school students who are interested in being considered for admission to UNH as a first-year student in the fall to apply any time after August 1 at the start of their senior year. The application deadline for Early Action is November 15 and Regular Decision is February 1. Early Action applicants will receive an admissions decision prior to the end of January and Regular Decision applicants will receive an admissions decision prior to the end of March.

Students admitted to UNH are required to confirm their intention to enroll by submitting their enrollment deposit of $600 by May 1, National College Decision Day. The $600 enrollment deposit includes both the enrollment and housing fees. Undergraduate first-year and transfer students under the age of 21 are required to live on campus during their first two years.

The review of first-year candidates begins in November for those applications that are complete. A complete application includes official transcript or grade reports through the end of junior year and a confirmed senior course schedule, the results of the SAT or ACT (for students who indicate on their admissions application that they would like have their test scores included in the application review process), and a letter of recommendation. To apply as an Early Action applicant, candidates must submit and select the Early Action option on their admissions application by November 15. In some cases, the admission committee will request senior mid-year grade reports in order to make a final admission decision. Students accepted to UNH through the Early Action program are not obligated to enroll at UNH and have until May 1 to submit their enrollment deposit to reserve their space at UNH.

All offers of admission are considered conditional and are subject to the verification of satisfactory senior year achievement when final high school transcripts with a confirmed date of graduation are reviewed by the admissions committee.

Deferred Admission

Admitted students to the University may request to defer their admission for up to a year. Requests to defer admission enables students to reserve their space at the University while taking a semester or an academic year away from school for work or travel. With few exceptions, UNH will not approve deferral requests in which the student will be taking college coursework elsewhere. Requests for deferrals must be completed and submitted online using the form found on the admitted student website under the Deferral Information accordion on the bottom on of the page. The University may not be able to offer deferred admission in certain program areas.

Advanced Standing

The University recognizes outstanding secondary school work by means of advanced placement and credit for those who have taken enriched or accelerated courses before entering college. Applicants may qualify for such credit by successfully completing coursework for college credit and satisfactory achievement on University-approved placement examinations, including the College Board Advanced Placement (AP) Tests, International Baccalaureate (IB) Higher Level Examination Test Results, or through the College Level Examination Program (CLEP). Students should have official results sent directly to the Office of Admissions from the testing agency.

The University awards 8 semester credits for each IB Higher Level Examination Test Result of 5, 6, or 7. The University recognizes up to 32 semester credits of CLEP General Examination tests, which may be applied as elective credit only. Scores must be 500 or better in the humanities, natural sciences, and social sciences-history exams. The minimum score for mathematics is 500 and for the English exam with essay, 500. Subject exams, when applicable, may be used to satisfy either departmental or general education requirements. UNH does not accept all CLEP subject exams.

Maximum credit accepted toward a bachelor's degree for all credit by exam and advanced placement testing is 64 semester hours.

Music Candidates

Details regarding audition requirements may be obtained from the department, or may be found on the Department of Music website at http://cola.unh.edu/music.

Admission Deadlines

The review of first-year candidates begins in November for those applications that are complete. A complete application includes official transcript or grade reports through the end of junior year and a confirmed senior course schedule, the results of the SAT or ACT (for students who indicate on their admissions application that they would like have their test scores included in the application review process), and a letter of recommendation. The University awards 8 semester credits for each IB Higher Level Examination Test Result of 5, 6, or 7. The University recognizes up to 32 semester credits of CLEP General Examination tests, which may be applied as elective credit only. Scores must be 500 or better in the humanities, natural sciences, and social sciences-history exams. The minimum score for mathematics is 500 and for the English exam with essay, 500. Subject exams, when applicable, may be used to satisfy either departmental or general education requirements. UNH does not accept all CLEP subject exams.

Maximum credit accepted toward a bachelor's degree for all credit by exam and advanced placement testing is 64 semester hours.
Associate Degree Candidacy

The University accepts candidates who have demonstrated ability and motivation for learning through academic achievement, work experience, and/or military service for associate in applied science degree programs.

Students may be considered for admission to associate in applied science degree programs offered by the University’s Thompson School of Applied Science in Durham, as well as, associate in arts or science degrees at the Manchester campus. Candidates applying as high school seniors must submit the application and secondary school record. The submission of SAT and/or ACT exams are optional. Students granted first-year admission to the Thompson School are eligible to live in a University residence hall.

Eligibility for Degree Candidacy

Applicants may be candidates for any undergraduate degree offered by the University. However, applicants having a bachelor of arts (B.A.) degree will not be admitted into a program of study that awards the same degree (e.g., B.A. History and B.A. Zoology). Applicants can earn more than one bachelor of science (B.S.) degree, provided that each degree is in a different field. Applicants may also be admitted into a program awarding a different degree (e.g., B.A. History and B.S. Biology; or B.A. History and A.A.S. Applied Animal Science).

Readmission

An undergraduate who withdraws, does not register for UNH coursework in a given semester, or is suspended or dismissed from the University thereby terminates degree candidacy and must apply for readmission by the following deadlines: fall semester, June 1; spring semester, November 1. Readmission applications are processed in the Office of Admissions; however, decisions regarding readmission are made in consultation with the Division of Student and Academic Services and the dean’s office of the University college division to which the student is applying.

Before seeking readmission, students on academic suspension must remain away from school for at least one semester. Students suspended for academic reasons should include a statement about their readiness to resume University work with their application.

Only under extraordinary circumstances will students be readmitted after dismissal for academic reasons. Applications submitted by dismissed students are reviewed by the University’s Academic Standards and Advising Committee.

It may not be possible for readmission applicants to enroll in programs with established enrollment limitations.

Transfer Students

UNH encourages applications from transfer students. Admission consideration includes review of course selection, academic achievement, and the extent to which that selection addresses the University’s general education requirements. Transfer credit is awarded for completed courses taken at an institution that is fully accredited by one of the regional accrediting associations with a grade of C or better, provided those courses are comparable to courses offered at UNH. Each course must carry at least 3 semester credits and receive a letter grade to qualify for general education consideration.

The application deadline for fall semester admission is April 1; October 15 is the application deadline for spring semester. Some programs have enrollment limitations and may not be open to transfer students.

Students enrolled in one of the University’s associate degree programs who desire admission to a bachelor’s degree program at UNH must apply as transfer students through the Office of Admissions.

Transfer students over the age of 21 may contact the Department of Housing at (603) 862-2120 to determine the availability of on-campus housing. Please note that on-campus housing is not guaranteed to transfer students over the age of 21.

New England Regional Student Program

The University participates in the New England Regional Student Program, in which each state college and university in New England offers certain undergraduate majors to students from other New England states. Under this program, admitted students from other New England states pay a reduced tuition rate. Students must indicate on their applications the specific major for which they are applying. Information about the curricula may be obtained from:

The New England Board of Higher Education
45 Temple Place
Boston, MA 02111
www.nebhe.org, or (617) 357-9620.

Visit http://admissions.unh.edu/tuitionfees/new-england-regional-student-program/ for available UNH majors through this program.

Full-Time Special Student Status

UNH offers a special student classification for persons who wish to participate in University coursework on a full-time basis without entering a degree program. In evaluating requests for special full-time status, the Office of Admissions generally applies the same criteria used in the review of applicants for admission to degree candidacy. Full-time special students have full access to academic support services but are not eligible for University-based financial aid. Students must maintain satisfactory achievement to continue with University coursework. Full-time special (non-degree) students register for coursework through the Registrar’s Office.

Resident Status

All students attending any division of UNH in any capacity shall be charged tuition at a rate to be determined by their primary, legal domicile. Those domiciled within the state of New Hampshire pay the in-state rate. Those domiciled elsewhere pay the out-of-state rate.

Students are classified as residents or nonresidents for tuition purposes at the time of admission to the University. The decisions, made by the Office of Admissions, are based upon information furnished in students’ applications and any other relevant information.

All enrolling students living in New Hampshire are required to complete an electronic NH residency statement to the effect that they, if financially independent, or their parents/guardians, if financially dependent, have been legally domiciled in New Hampshire continuously for a period of at least twelve months immediately prior to registering for the term for which the student is claiming in-state status. The electronic NH residency form can be found as a required checklist item in their application portal after they submit their admissions application to UNH. Should you have issues accessing the NH residency form in your application portal, please contact the Office of Admissions via email at admissions@unh.edu.

Students admitted from states other than New Hampshire or from foreign countries are considered nonresident throughout their attendance at
the University unless they have acquired bona fide domicile in New Hampshire.

If students maintain residency apart from that of their parents/guardians, they must clearly establish that they are financially independent and that their residence in New Hampshire is for some purpose other than the temporary one of obtaining an education at the University. To qualify for in-state status, students must have been legally domiciled in New Hampshire continuously for a period of at least twelve months prior to registering for the term for which in-state status is claimed.

The burden of proof in all cases is upon the applicant. The University reserves the right to make the final decision concerning resident status for tuition purposes.

A copy of the rules governing residency may be obtained from the Office of Admissions and on the following website: https://www.usnh.edu/policy/bot/iv-financial-policies/e-classification-students-tuition-purposes-residency-rules

Manchester

manchester.unh.edu/admissions

Manchester Campus Degree Programs

First Year Students
Individuals that have never enrolled at a college or university, or have earned less than 16 credits in college coursework.

• Admissions Criteria, Application Requirements and Deadlines

Transfer Students
Individuals that have previously been enrolled at another college or university, or have earned more than 16 credits in college coursework.

• Admissions Criteria, Application Requirements and Deadlines

Additional Resources
• Application forms and deadlines
• Military & Veteran Students
• International Students
• Previously Enrolled UNH Students

CPS Online

cps.unh.edu/online/apply-register

College of Professional Studies (CPS) - Online Division Degree Programs

Applications to programs within CPS Online are free and reviewed on a rolling basis. Individuals can apply at any time and enroll in any term during the year.

Admission Requirements
Admission to associate and bachelor’s degree programs require a high school diploma, homeschool equivalent, or GED.

Students who have earned college credit at another institution and would like it evaluated for transfer credit should complete the appropriate information on the application. Official transcripts are required for each college indicated.

Some majors offered by CPS Online have additional admissions criteria. These programs include the RN to BSN, Allied Health Leadership, Applied Studies, and Fire Service Administration. See program pages for more information on specific admissions criteria.

Additional Resources
• Military & Veteran Students
• International Students
• Transfer Credit Evaluation
• Teacher Certification Programs

Degree Status

Inactivation and Withdrawal
CPS Online monitors the progress of degree candidates. A student who is not actively involved in learning experiences in a degree program for a period of three consecutive semesters (including summer) will be inactivated. A student may voluntarily withdraw from a degree program by notifying the College in writing. If requesting withdrawal from a degree program, a student will be considered inactive.

Reactivation/Readmission
Students who have been inactivated for a period of less than one year will complete a Request for Reactivation Form with their Academic Advisor and will be readmitted under original degree requirements, following all policies and procedures in effect at the time of inactivation.

Students requesting readmission one year or more after the date of inactivation must submit a new application.

To protect the privacy of student data, CPS Online follows a record retention schedule and transcripts from other institutions are periodically destroyed in that process. Students who return after an extended absence may be asked to resubmit official transcripts from any previously attended institutions.

States occasionally change their rules and regulations regarding professional licensure and certifications, which may affect the College’s authorization in a state. Students in professional licensure or certification degree programs may not be eligible to return to active status if the College is no longer authorized to offer a program in their state.

Fees and Expenses

The expected cost for 2023-2024 at the University can be found on the UNH Student Accounts website for the most up-to-date listing of rates.

UNH bills are sent electronically only. Bills are posted to student Webcat accounts. Students are notified through UNH assigned e-mail addresses when new bills are posted.

Tuition
Tuition and fees are established by a vote of the Board of Trustees. Approval normally occurs between April and July. The current academic year tuition rates are published annually on the University’s Tuition and Fees page.

Students are charged based on full-time registration (12-20 credits). Students registering for fewer than 12 credits must contact
student accounts for tuition and fee adjustments by emailing student.accounts@unh.edu. Undergraduates registering for fewer than 12 credits pay the per-credit hour charge, plus a registration fee per semester. Tuition can vary based on the program enrolled in and/or major. Please see the Student Accounts Tuition and Fees page for more information.

Courses taken for audit by degree students are charged at the same rates as for-credit registration. Undergraduate students who are already registered full time and are paying full time tuition may audit classes with no additional tuition charges (special fees will apply).

Students studying abroad are charged based on conditions outlined within their specific program. For more information see UNH Global.

Tuition Overload

Undergraduate students are permitted to enroll for more than 20 credits upon approval of their college or school dean. Persons carrying more than 20 credits thirty days after the semester has begun will be billed a per-credit fee for each credit above 20 credits unless auditing. For information, see Tuition Surcharge.

Tuition Differential

Tuition differential charges apply to some majors. Students in the College of Engineering and Physical Sciences (CEPS), including engineering and computer science, and the Peter T. Paul College of Business and Economics (PAUL) will be charged a tuition differential. The differential is the same rate for both N.H. residents and non-resident students. CEPS and PAUL students who register for fewer than 12 credits pay a differential per-credit-hour. Music majors are charged an applied music fee each semester. Please see the Student Accounts Tuition and Fees page for more information.

Account Adjustments

Students who withdraw or drop to part-time status may be eligible for a refund of tuition and fees. For most students refund is as follows; one hundred percent of tuition, mandatory fees and course fees will be refunded until the second Friday of the semester, one-half after the second Friday and until the fifth Friday; and none thereafter. Non-standard programs may have program specific refund deadlines, check the UNH Academic Calendar. The refund policy also applies to students reducing their credit load from full to part-time. This refund policy does not apply to students who withdraw from off-campus programs or programs which use non-standard semester calendars.

All registration, refund, and add/drop deadlines can be found on the UNH Academic Calendar. Student accounts will be adjusted based on course registration. Students who withdraw or drop to part-time status after classes begin may be penalized based on the drop date of the course(s). Refund of tuition, fees, and other charges associated with the course(s) drop are dependent upon the drop date of the course(s). Students will not be refunded tuition, fees or associated charges for courses dropped after the refund period.

Financial Aid on the student account may also be adjusted due to adjustments in course registration. For information, contact UNH Financial Aid Office. Students receiving federal financial aid will have their refund calculated in accordance with the U.S. Department of Education regulations in effect at the time of their withdrawal. Specific details regarding the regulations are available from the UNH Financial Aid Office.

Fees

Fees vary based on the program enrolled in and/or major. Students enrolled in courses on the Manchester campus are subject to campus based mandatory fees. For information see, UNH Manchester tuition and fees.

Undergraduate online programs are charged per credit hour with fees associated. For more information see the College of Professional Studies.

Continuing Education courses are charged per credit hour with fees associated. For information see Continuing Education Tuition.

Mandatory fees are not charged for students registered for 4 credits or fewer. However, those students will be charged a technology fee per term. For information see the Student Accounts Tuition and Fees page.

Mandatory fees for students participating in UNH Study Abroad Programs are waived through the billing process, with noted exceptions.

New undergraduate students are charged a one-time administration fee which supports first-year initiatives, transfer student programming and related undergraduate initiatives to support new students’ transition and success.

Registration Fee

Undergraduates registering for fewer than 12 credits pay the per-credit hour charge, plus a registration fee of $20 per semester.

Special Course Fee

A special fee is charged to students to recover the extra costs of materials and supplies not normally covered by the instructional budget and fundamental to the special instructional activities associated with a specific course. This fee may include the cost of labs/studios, special equipment, and/or field trips. These fees are noted in the course descriptions and are assessed to all students enrolled in the course.

Student Health Benefit Requirement

As a condition of enrollment, all full-time students will be required to carry health insurance, excluding those enrolled in a fully online program. Students may elect coverage under the University’s student health benefits plan or may waive the requirement by providing proof of adequate coverage through another plan. International students with F1 or J1 visas are required to enroll in the UNH-sponsored coverage. There are no exceptions to this policy. Any exceptions to this policy are at the discretion of the UNH SHBP Coordinator.

Mandatory Fees

The University assesses mandatory fees to support expenses associated with participation in an academic community. Mandatory fees are defined as fees that all students are assessed as a prerequisite for registration unless specifically exempt. Mandatory fees are not charged based on the extent of students’ usage of the facilities or services supported by the fees. It is recognized that not all students will use the benefits and privileges made available by fee-supported activities to an equal extent. Mandatory fee charges are based on registration status: full-/part-time, depending on the number of credit hours registered.

MANDATORY FEES INCLUDE

Technology Fee: for support of Informational Technology services
• Student computing clusters
• Walk-in Help Desk services
• Technology-enhanced classroom infrastructure
• Technology liaisons; Webcat, Student Email, Canvas
• Technology-enhanced learning

Memorial Union Fee- for the use and administration of the student union
For information, see Memorial Union.

Recreation Fee- support of programs and facilities to support an active lifestyle.
• Programs include:
  • Group Exercise
  • Intramural Sports
  • Aquatics
  • Outdoor Adventures
  • Instructional Programs and Sports Clubs
• Facilities Include:
  • Hamel Recreation Center
  • Swasey Indoor Pool and Outdoor Pool
  • Tennis Courts and other Outdoor Fields

Whittemore Center Fee- for the use and administration of the Whittemore Center
For Information, see Whittemore Center.

Student Activity Fee- for support of various undergraduate activities and events
• The undergraduate newspaper
• Yearbook
• Student government
• Student organizations
• Student radio station
• Movies at reduced rates

Transportation Fee- for support of student transportation via Wildcat Transit and Campus Connector.

Student Athletic Fee- for support of athletic programs
• Admittance to all home games of organized sports at UNH
• Financial support for athletes and athletic teams

Health & Wellness Fee
For information, see Health and Wellness.

Psychological & Counseling Services Fee (PACS)
For information, see PACS.

Sexual Harassment and Rape Prevention Program (SHARPP)
For Information, see SHARPP.

Career and Professional Success (CAPS)- support for success after graduation
• Internships
• Career Advising and Resources
• Assessments
• Employer relations
• Interview preparation
• Mentoring

Exceptions
Exceptions apply to only the fall and spring semesters. Exceptions do not apply to fees covering the following services: Technology Fee, Health and Wellness Fee, Career & Professional Success (CaPS) Fee, Psychological & Counseling Services (PACS)/Mental Health Fee, and SHARPP fee.

Students who are residing outside of the immediate geographic area for a semester and whose courses, fieldwork, internship(s), or other academic work are fully outside the immediate geographic area for a semester may petition for exception. The immediate geographic area referenced is defined as a 25-mile radius around the Durham or Manchester Campus. The University will use course registration information to verify remote status.

Students who meet criteria for exception must submit a Mandatory Petition Form each semester. The forms are available from UNH Student Accounts.

Any conflicts resulting from this procedure will be adjudicated by the Provost and Vice President for Academic Affairs and the Chief Financial Officer or their designee.

Food and Housing
Charges placed on the student account are dependent on the student’s housing agreement and housing and food selections. For more information, see Housing & Residential Life and Dining.

For returning students, no deposit is required; instead, a cancellation fee will apply if the housing agreement is cancelled. For information on how to cancel your agreement, see Housing & Residential Life.

Cancellation of the agreement due to failure to occupy, by mutual consent, by disciplinary, or non-renewal actions does not guarantee a refund. For information on how to cancel your agreement, see Housing & Residential Life.

If the agreement is canceled, any refund generated from cancellation of the agreement will first be applied to any unpaid University charges.

For more information students should refer to their food and housing agreement, see Housing & Residential Life.

Rebates
Any amount owed to the University will be deducted from any rebate due to a student.

Enrollment Deposit
New undergraduates in Durham and Manchester pay enrollment deposits. These funds will be applied to the first semester charges.

Billing & Payment
Electronic billing statements are sent monthly. Bills are available in Webcat. Students are notified through UNH assigned e-mail addresses.
when new statements are posted. Students are responsible for monitoring their UNH email address for billing notifications. Designated Parent Portal contacts are also emailed when new statements are generated and are available to view online through the Parent Portal.

Payment must be physically received (not postmarked) in full for tuition, fees, food, housing, and other semester charges by the due date. A late fee may be assessed to student accounts not paid in full by the payment due date. Student accounts not paid in full within thirty days after the payment due date may be assessed additional late fees, default charges, and/or collection costs, and the student may be disenrolled from classes.

UNH offers a monthly payment plan. Payment plans must be activated each semester; the payment plan does not extend to the following semester. An enrollment fee is required to participate in the payment plan. The first payment is due upon enrollment. Subsequent payments are due on the first of each month and are automatically deducted from the payment method designated. Adjustments to the payment plan are the responsibility of the plan holder, please check your monthly statement to determine if adjustments are required. Payment plans are accessible in Webcat and Parent Portal.

Students and Parent Portal users can view a history of electronic statements and payments and access a real-time view of their accounts online. Payment may be made online, or the bill may be printed and mailed with payment. Credit/Debit card transactions will be charged a nonrefundable service fee.

New Hampshire Residency

Each student is classified as a resident or non-resident for tuition purposes at the time of admission to the University. The decision is based upon information furnished by the student’s application and any other relevant information.

All applicants claiming New Hampshire residency are required to have been legally domiciled in New Hampshire continuously for at least twelve months immediately prior to registering for the term for which in-state status is claimed.

Students admitted from states other than New Hampshire or from foreign countries are considered nonresident throughout their entire attendance at the University unless they have acquired bona fide domicile in New Hampshire. Changes in residency for enrolled students as well as appeals are reviewed by the Registrar’s Office and will only occur if the student can clearly establish that his or her residence in New Hampshire is for some purpose other than the temporary one of obtaining an education at the University.

The burden of proof in all cases lies upon the applicant. In all cases, the University reserves the right to make the final decision as to resident status for tuition purposes. The University rules governing tuition rates are fully set forth in the application for admission package; all students are bound by them.

New England Regional Student Program

The University of New Hampshire participates in the New England Regional Student Program administered by the New England Board of Higher Education (NEBHE). Under this program, admitted students from New England may qualify for regional tuition rates.

To qualify, the program to which they are admitted must be one that is not available at any of their home state/public institutions. Inquiries about the NER program may be directed to the New England Board of Higher Education.

VA Educational Benefit

In accordance with 38 USC §3679(e), students using VA Chapter 33 Post-9/11 GI Bill® or VA Chapter 31 Vocational Rehabilitation will not accrue late fees for unpaid bill items covered by their VA educational benefit while waiting for disbursement of the aforementioned funds to UNH. Furthermore, students certified as using these VA benefits will not be precluded from attending classes, utilizing library or other institutional facilities, or be required to borrow additional funds because of their inability to meet their financial obligations to UNH due to delayed disbursement of funds from VA under Chapters 31 or 33. However, students may accrue late fees as applicable to unpaid bill items other than tuition and fees covered by Chapters 31 or 33. Moreover, UNH reserves the right to impose a late fee if the difference between the amount of the student’s financial obligation and the amount of the VA education benefit disbursement remains unpaid after student bills are due. Differences may be a result of, but not limited to, charges for housing, meal plans, parking permits, or if the student is not entitled to 100% of Chapter 33. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill.

Financial Aid

The University Financial Aid Office assists students who are unable to meet educational expenses entirely from their own family resources. Aid is available in the form of grants and scholarships, loans, and part-time employment. The financial aid website gives program information, application procedures, and deadlines.

In many communities, scholarships and loans are available locally. School principals and guidance counselors have information about these sources of assistance, which are available to both high school seniors and adult students.

Before applicants may be considered for assistance by the University, they must submit the Free Application for Federal Student Aid (FAFSA). The financial aid application priority consideration deadline for aid awarded by the University is March 1. In order to receive a timely award this is the date by which your fully completed FAFSA should be received by the federal processor.

It is the University’s position that the student applicant is accountable for the accuracy and timely submission of the FAFSA. We realize that in most cases a student’s parent(s) also participates in completing the form. However, it is the student who is ultimately responsible for monitoring the application process. Students should not wait until being admitted to the University before applying for financial aid.

In order to be considered for need-based assistance, students must submit a FAFSA each year.

Note: There is reference on the FAFSA to a “deadline” of June 30. Do not be misled by this date. It is not the financial aid deadline at UNH or most other colleges.
Grants and Scholarships
Admitted undergraduate degree candidates who will attend UNH on a full- or part-time basis may be considered for tuition grants and University scholarships. The basic consideration is financial need, although some scholarships are awarded on the basis of scholastic attainment, participation in extracurricular activities, or meeting specific requirements of a donor.

The University participates in the federally sponsored Federal Supplemental Educational Opportunity Grant Program, which is designed to assist needy students who are admitted degree candidates.

Federal Pell Grant Program
Students may apply directly to the federal government for a Pell Grant using the FAFSA.

Loan Programs
Matriculated students enrolled on a full- or part-time basis who have completed the financial aid process will be reviewed for the federal government’s Direct Student Loan Program.

Part-Time Employment
The Federal Work-Study Program, both academic year and summer, assists students who, as determined by the Financial Aid Office, need financial assistance for their educational expenses. Admitted undergraduate and graduate degree candidates attending at least half time are eligible for consideration.

Students who do not qualify for the Work-Study Program may find part-time employment on or near campus.

ROTC Scholarships
Reserve Officer Training Corps scholarships are offered on a competitive basis by both the Army and the Air Force. Entering freshmen may compete for four-year scholarships during the last year of high school. A variety of scholarships are also available to students already attending the University.

Scholarships pay up to full tuition, all mandatory fees, and for required textbooks. In addition, all scholarship recipients receive a tax-free monthly subsistence allowance. Finally, students with a four-year or three-year ROTC scholarship compete for a room and board grant for the entire time they are on the scholarship.

For more information, contact the Admission Officer: Army ROTC at (603) 862-7075, or Air Force ROTC at (603) 862-1480.

https://www.unh.edu/financialaid/

Health & Wellness
The University has a nationally-accredited health and wellness program.

Our Mission
Health & Wellness provides whole person-centered care and services, illness prevention and health promotion, co-curricular learning opportunities, and public health leadership and expertise. All are tailored to support our students’ health, well-being, and personal development, the health of the campus community, and the mission of our University.

Health & Wellness is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC).

Health & Wellness Fee
All UNH students who take five or more credit hours/semester are required to pay the UNH Health & Wellness fee. This fee allows students to access services at Health & Wellness on campus and covers many services at no or reduced cost. When combined with a student’s health insurance coverage, the Health & Wellness fee provides for a complete health care package. A student’s health insurance is never billed for services covered by the UNH Health & Wellness fee.

Health Insurance
University policy requires full-time degree students that are enrolled in at least one in-person course to have health insurance as a condition of enrollment. Some students have the option of waiving this requirement if they present proof of adequate coverage; alternatively, students can acquire an affordable health benefits plan sponsored by the University: the UNH Student Health Benefits Plan (SHBP). International students with F-1 and J-1 visas are required to purchase the SHBP. Learn more about the SHBP and the waiver process.

Health Record Requirement
Undergraduate students who have been formally accepted to a degree program are required to have health information on file with UNH Health & Wellness. The three requirements to be completed and submitted by the student online are:

1. a physical assessment,
2. immunization form, and
3. a health history form.

Immunizations
Prior to matriculation at UNH, all students that are enrolled in at least one in-person course at UNH are required to provide proof of immunization or demonstrate their immunity to specific vaccine-preventable diseases as outlined in the Student Rights, Rules, and Responsibilities Immunization policy.

Documentation of proof of vaccination or immunity is required and is typically shown on the immunization form. It is the responsibility of students to provide the documentation before attending any classes. Any student failing to complete these requirements may be prevented from registering for future classes.

These health forms are required before moving into residence halls and starting classes. Failure to submit forms may prohibit students from moving into their residence halls until they are compliant.

Learn more about incoming student health record requirements.

Medical Services
UNH Health & Wellness provides comprehensive, student-focused, primary medical care through a team approach. The clinical staff consists of board-certified physicians, nurse practitioners, nurses, and medical assistants who are committed to prevention and holistic care. Primary medical care is provided for a variety of common concerns. Examples include respiratory illnesses (including asthma), infections, injuries, skin concerns, digestive disorders, allergy/immunization services and travel health consultation, mental health, and gender-affirming care. Sexual/
reproductive health services include contraceptive services, cervical cancer (Pap smears) screening/prevention, testing and treatment for sexually transmitted infections, pregnancy testing and counseling, limited sexual assault services, and more. Health resource nurses provide chronic illness support and assist with problems arising from hospitalization.

Students may speak by telephone with a health resource nurse for advice at any time, and after-hours nurse consultation is available when UNH Health & Wellness is closed. On-site clinical support services include laboratory services, radiology, and pharmacy. Not all services are available during the summer or breaks. Read more about medical services.

For emergencies and after-hours care, well-staffed and well-equipped urgent care centers and community hospitals are nearby, and an emergency ambulance service is available in Durham at all times.

Living Well Services
Living Well Services coordinates health promotion activities on campus. Services provided include educational programs, workshops, and classes; individual wellness counseling and coaching to promote healthy lifestyle choices, including alcohol and other drug counseling, nicotine cessation services, nutritional counseling, wellness coaching (e.g., stress, sleep, behavior change, etc.); and integrative mind-body services, including biofeedback, light therapy, and massage therapy. Read more about Living Well Services.

Library
The UNH Library supports the educational and research activities of the students, faculty, and staff of the University of New Hampshire as a research-level library. Experienced research assistance along with group and individual instruction helps students learn how to efficiently research and critically evaluate information. The Library provides access to an extensive collection of electronic resources (e-books, digital collections, an institutional repository, indexes in many subject areas, statistical data sets, and databases supplying full-text journal and newspaper articles) 24/7 at library.unh.edu.

The Library has approximately 2.7 million print and electronic items and more than 140,000 print and electronic serial subscriptions and is active in digitizing, preserving, and making accessible materials in its collections. Dimond Library houses collections in the social sciences, humanities, business, health and human services, education, and earth sciences and is the regional depository for federal government publications (including maps). It is also home to the Connors Writing Center, the Academic Technology Support Center, and Zeke’s Cafe. Special Collections and Archives collects rare books, manuscripts, and University publications and papers. In addition to the main Dimond Library, there are three branch libraries for physical sciences and engineering that offer customized services for the UNH scientific and engineering communities.

The library’s holdings are supplemented by access to the collections of Boston Library Consortium member libraries as well as library collections around the globe through interlibrary loan. The UNH Library shares resources with the campus library at the University of New Hampshire at Manchester and collaborates with the UNH School of Law library. All library locations offer wireless Internet access, computer workstations, individual study areas, and collaborative group work spaces. Dimond Library offers seating for more than 1,200 in a variety of settings.

For additional information about UNH Library resources, services, and expertise, please visit https://www.library.unh.edu and for the latest Library information and news, follow us on Instagram, Facebook or Twitter @unhlibrary.

https://www.library.unh.edu

College of Engineering and Physical Sciences
Cyndee Gruden, Dean
Sharon McCrone, Associate Dean for Academic Affairs

The College of Engineering and Physical Sciences (CEPS) provides an opportunity for students to achieve educational objectives appropriate to their interests in engineering, computer science, information technology, mathematics, the physical sciences, and the teaching of mathematics and physical sciences. The college offers an education in each of its primary disciplines leading to the bachelor of science, as well as bachelor of art degrees with majors in mathematics and each of the three physical sciences. All programs include an opportunity for study in the arts, humanities, and social sciences.

The key to an undergraduate program in the college is flexibility, with a strong emphasis on personal and individualized education. In addition to specific programs, a wide range of options within several majors are available. Special programs can be developed to meet the specific interests of individual students.

Degree Requirements
MATH 425 Calculus I and MATH 426 Calculus II or the equivalent in transfer credits or advanced placement approved by the Department of Mathematics and Statistics are required by all departments of the college. The exceptions to this are the information technology major and the three computer science bachelor of arts majors, which only require MATH 425 Calculus I. The prerequisites for calculus are three years of college-preparatory mathematics, including a half-year of trigonometry. Before students can register for MATH 425 Calculus I, they are required to take the Mathematics Placement Test or to have taken MATH 418 Analysis and Applications of Functions (or its equivalent) and received a grade of C or better.

Mathematics Placement
First-year students arrive with a wide range of mathematical skills based upon their high school preparation. The college wants students to have a solid mathematics foundation so that they will enjoy an enriched first-semester experience. A student’s mathematics development will be assessed as part of the June orientation program. Based upon the Mathematics Placement Test, students are enrolled in the mathematics class that will allow them to continue that development. The initial mathematics entry course is MATH 418 Analysis and Applications of Functions. However, a student is placed into MATH 425 Calculus I if he or she demonstrated a certain level of proficiency in algebra and precalculus through the Mathematics Placement Test. Students with AP credit for Calculus I and/or Calculus II may elect to accept those credits and continue with a math course at the next level.

Degrees OFFERED
The college offers two undergraduate degrees: the bachelor of arts and the bachelor of science. Some of the courses prescribed in these degree programs partially fulfill the University’s Discovery requirements. There
are entrance requirements in some programs, and it is not possible to guarantee all change-of-major requests. Students should see their advisers for specific information.

**Bachelor of Arts**

Programs leading to a bachelor of arts degree are offered in the departments of chemistry, computer science, earth sciences, mathematics, and physics. These programs provide a broad liberal education along with a major in one of these fields.

**Bachelor of Science**

The programs leading to the bachelor of science degree, offered in each of the departments of the college, emphasize students’ preparation for a professional career and continuing or graduate education.

**INTERDISCIPLINARY PROGRAMS**

**Bachelor of Science in Environmental Sciences**

The Environmental Sciences program is offered jointly with the College of Life Sciences and Agriculture (COLSA).

**Architectural Studies Minor**

The Architectural Students Minor is managed jointly by the Civil Engineering Department, and Art & Art History Department in the College of Liberal Arts (COLA).

**OTHER Combined Programs of Study**

In addition to pursuing a single major, students may combine programs of study as follows:

- **Minors**: Students may pursue one or more minors, each typically comprised of 5 courses. Minors enable students to obtain experience in a specialized area and to retain identification with their major professional area. Minors are available in nearly every discipline within the College of Engineering & Physical Sciences.

- **Cognates**: Students may pursue one or more cognates, each typically comprised of 3 courses and intended to develop career-oriented skills. Cognates in the College of Engineering & Physical Sciences are:
  - Computer Programming
  - Information Technology
  - Skills and Perspectives for the Digital World

- **Second majors**: Students may choose to fulfill the requirements of two dissimilar major programs.

- **Dual majors**: Students may choose to fulfill the requirements of a dual major, typically comprised of 8 courses. Dual majors are designated programs that must be paired with another major of any discipline.

- **Student-designed majors**: Under special circumstances, students may design their own majors. Proposal guidelines are available in the Office of the Provost and Vice President for Academic Affairs and on the Academic Affairs website, [https://www.unh.edu/provost/student-designed-majors-sdm](https://www.unh.edu/provost/student-designed-majors-sdm).

- **Dual-degrees**: Students may choose to fulfill the requirements of two separate degrees, such as a B.A. and a B.S.

- **Accelerated Master’s programs**: Students with senior standing and a minimum 3.20 cumulative grade-point average are eligible to take up to 12 credits of graduate level courses prior to completing their undergraduate degree, provided they have been admitted to the Graduate School.

**Special Provisions**

The requirement of a given topic/course prescribed to meet the requirements of major curriculum may be waived by the faculty of a student’s department. This rule offers students the opportunity to develop a somewhat individualized plan of study with intellectual incentives and opportunities in addition to those found in a regular curriculum. The student’s petition must be approved by their major advisor and the dean of the college.

**Undeclared**

Students who are uncertain about choosing a specific major may remain undeclared in the College of Engineering & Physical Sciences during their freshman and sophomore year. All first year undeclared students in the college will take two 1-credit seminar courses, TECH 400 Introduction to CEPS Programs (fall) and TECH 402 Introduction to CEPS Career Exploration (spring) in addition to their other required courses.

**Special Programs**

**Research Opportunities**

The talents and expertise of the faculty in all departments are reflected in the number of ongoing research projects. Undergraduates are included in many of these research projects with the intent that they will discover and foster their creative talents. When involved with a funded research project, students may have an opportunity to receive pay while learning about the research area.

The college has world-class laboratories and computer facilities in many areas. A few of these are coastal and ocean mapping, space science, environmental engineering and science, fluid dynamics, wind turbulence, information systems, materials science, nanotechnology, sustainability, and medical imaging. These and other ongoing research areas within the college are described on the college’s website: [https://ceps.unh.edu/research-facilities](https://ceps.unh.edu/research-facilities).

Students have the opportunity to acquire applied experience by working with faculty members who undertake sponsored professional projects in technical and managerial areas for business, industry, and federal, state, and local governments.

**Innovation Scholars Program**

The Innovation Scholars Program is a research driven introduction to the university for first-year students. Students will be part of a cohort of students under the direction of a faculty member that guides them through a year-long research experience culminating in a presentation of research results at the Undergraduate Research Conference or equivalent activity. Participants will develop skills that will open doors of opportunity at UNH and more broadly, and experience the interconnectedness of UNH scholarly activity with UNH Innovation and UNH Career and Professional Success.

There are currently four research topics, including advanced manufacturing; internet engineering; ocean and environmental sensing; and biomaterials. Most cohorts work within a specific laboratory setting, including the Olson Advanced Manufacturing Center, Chase Ocean Engineering Laboratory and the UNH InterOperability Laboratory, to conduct their research. Students participating in the Innovation Scholars program will be enrolled in a
2-credit seminar both semesters of their first year for weekly cohort meetings.

**Independent Study and Projects**

All departments within the college offer independent study opportunities and projects. The content of these courses varies and is based upon current scientific and technological needs in addition to the interests of the student and faculty involved.

Permission of the faculty member and/or department chairperson is required. One should review the course descriptions for the independent study and project courses for specific requirements. Students interested in working with a faculty member on a project or independent study should discuss this with the faculty member and their academic adviser prior to registering for the course.

**Preparing for Teaching**

Degrees in mathematics education at the K-8 or secondary level are available through the department of Mathematics and Statistics.

Students interested in teaching chemistry, physics, or earth sciences should refer to the appropriate department advisors for program requirements.

**Study Abroad Programs**

The College of Engineering and Physical Sciences and the Global Education Center work closely to support students and their Education Abroad experience. Students are able to take part in exchange programs including, but not limited to:

- **Scotland, Heriot-Watt University Exchange Program**
  
  College of Engineering and Physical Sciences students are eligible to participate in a spring semester exchange with Heriot-Watt University in Edinburgh, Scotland. The current program is designed for civil and environmental engineering majors. For more information, contact Ray Cook at (603) 862-1411 or the Global Education Center, Conant Hall. Details on the program can also be found at [https://www.unh.edu/global/exchange-program-heriot-watt-university](https://www.unh.edu/global/exchange-program-heriot-watt-university).

- **Global E3 Exchange Programs**
  
  All majors with in the College of Engineering and Physical Sciences are eligible to participate in international exchange programs through the Global E3 program. Programs are offered in the fall, spring, and summer, as well as for the full academic year. For more information on Global E3, please refer to [www.iie.org/programs/global-e3](http://www.iie.org/programs/global-e3). For more information on eligibility, contact Catherine D’Auteuil at catherine.dauetul@unh.edu.

To learn about additional study abroad programs available to students in the College of Engineering and Physical Sciences, contact Catherine D’Auteuil at catherine.dauetul@unh.edu. For a full list of international study abroad programs available to UNH students, see [Study Abroad Programs](https://ceps.unh.edu/).

Students interested in participating in a domestic exchange program should go to [Domestic Study Programs](https://ceps.unh.edu/).

**Accreditation**

The baccalaureate-level programs in: Bioengineering; Chemical Engineering; Civil Engineering; Computer Engineering; Electrical Engineering; Environmental Engineering; Mechanical Engineering; and Ocean Engineering are accredited by the Engineering Accreditation Commission of ABET, Inc. [https://www.abet.org](https://www.abet.org)

The Department of Chemistry’s undergraduate bachelor of science program is approved by the American Chemical Society. [https://ceps.unh.edu/](https://ceps.unh.edu/)

**Departments**

- Chemical Engineering & Bioengineering (p. 64)
- Chemistry (p. 72)
- Civil and Environmental Engineering (p. 76)

Chemical Engineering & Bioengineering

The Department of Chemical Engineering and Bioengineering currently offers two undergraduate degrees, B.S in Bioengineering and B.S. in Chemical Engineering. In addition, B. S. in Chemical Engineering is offered with options in Bioengineering, Energy and Environmental Engineering. Both degree programs in Chemical Engineering and Bioengineering are accredited by the:

Engineering Accreditation Commission of ABET
415 North Charles St.
Baltimore, MD 21201
(410)-347-7700

CHEMICAL ENGINEERING

Chemical engineering is concerned with the analysis and design of processes that deal with the transfer and transformation of energy and material into products of high value. The practice of chemical engineering includes the conception, development, design, and application of physicochemical processes and their products; the development, design, construction, operation, control, and management of plants for these processes; and activities relating to public service, education, and research.

The curriculum prepares students for productive careers in industry or government and provides a foundation for graduate studies. The college’s program emphasizes chemical engineering fundamentals while offering opportunities for focused study in Bioengineering, Energy, and Environmental Engineering.

Traditional employment areas in the chemical process industries include industrial chemicals, petroleum and petrochemicals, plastics, pharmaceuticals, metals, textiles, and food. Chemical engineers are also working in increasing numbers in the areas of energy engineering, pollution abatement, and biochemical and biomedical engineering; in addition, they are employed by many government laboratories and agencies as well as private industries and institutions.

Chemical Engineering Mission Statement

The Chemical Engineering program strives to prepare our students for productive careers in industry or government and also provides our students with a solid foundation for graduate studies. Our program emphasizes chemical engineering fundamentals while offering opportunities for focused study in bioengineering, energy, and environmental engineering.

Chemical Engineering Program Educational Objectives

The program has the following major educational objectives with the expectation that our alumni will have successful careers in the many diverse areas of chemical engineering profession. Within a few years of obtaining a bachelor’s degree in chemical engineering, we expect our graduates to have the following attributes:

(1) Depth: To be effective in applying chemical engineering principles in engineering practice or for advanced study in chemical engineering.

(2) Breadth: To have a productive career in the many diverse fields of chemical engineering such as bioengineering, energy and the environment, or in the pursuit of graduate education in disciplines such as Chemical Engineering, Medicine, Law or Business.

(3) Professionalism: To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

Chemical Engineering Student Outcomes

(1) an ability to identify, formulate, and solve complex chemical engineering problems by applying principles of engineering, science, and mathematics.

(2) an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

(3) an ability to communicate effectively with a range of audiences.

(4) an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

(5) an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

(6) an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

(7) an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BIOENGINEERING

The Bioengineering program is tailored to students who want to use engineering principles to analyze problems and design solutions in the fields of healthcare, medicine and biology. It’s a truly interdisciplinary program, with courses in both the College of Engineering and Physical Sciences and the College of Life Sciences and Agriculture. Graduates from the bioengineering program solve problems at the interface
of biology and engineering in the fields of biotechnology and pharmaceuticals, as well as medicine and biofuels.

The curriculum prepares students by providing a solid foundation of biology and engineering principles through challenging courses and hands-on learning opportunities in our state-of-the-art laboratories. Our faculty have a broad background in modeling physiological and biochemical processes, enzyme kinetics, synthetic biology, biomaterials and biosensor development and related topics such as tissue engineering. Elective courses let you adapt your program to prepare for medical school, other graduate studies or careers in biomanufacturing, biotechnology or biomedical engineering.

Bioengineering Mission Statement
Our Bioengineering program empowers students with broad preparation for pursuing careers related to biotechnology, biomedical and engineering fields.

Bioengineering Program Educational Objectives
The program has the following major educational objectives with the expectation that our alumni will have successful careers in the many diverse areas of bioengineering profession. #Within a few years of obtaining a bachelor’s degree in bioengineering, we expect our graduates to have the following attributes:

1. Depth: To be effective in applying life science concepts and bioengineering principles in engineering practice or for advanced study.
2. Breadth: To have productive careers in the many diverse areas of bioengineering or in pursuit of graduate studies in engineering, law, medicine or business.
3. Professionalism: To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

Bioengineering Student Outcomes
1. An ability to identify, formulate, and solve complex bioengineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Bioengineering Major (B.S.)
https://ceps.unh.edu/chemical-bioengineering/program/bs/bioengineering-major

Programs
- Bioengineering Major (B.S.) (p. 65)
- Chemical Engineering Major (B.S.) (p. 67)
- Chemical Engineering Major: Bioengineering Option (B.S.) (p. 69)
- Chemical Engineering Major: Energy Option (B.S.) (p. 70)
- Chemical Engineering Major: Environmental Engineering Option (B.S.) (p. 71)

Faculty
Chemical Engineering and Bioengineering Faculty

Description
The Bioengineering program is tailored to students who want to use engineering principles to analyze problems and design solutions in the fields of healthcare, medicine and biology, biotechnology and pharmaceuticals, as well as biofuels.

The bioengineering program is truly interdisciplinary and will train graduates in biology and physiology as well as engineering. The program will provide graduates with capabilities in advanced mathematics (including differential equations and statistics), science, and engineering. Graduates will be conversant with solving problems at the interface of biology and engineering that may arise in a variety of fields. By graduation, students will have experience measuring and interpreting data from living systems and addressing the interactions between living and non-living materials.

For more information on the bioengineering program, please contact Nivedita Gupta (nivedita.gupta@unh.edu), Professor and Chair.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements
Students are required to obtain a minimum 2.0 grade-point average in CHBE 501 Material Balances and CHBE 502 Energy Balances and in
overall standing at the end of the sophomore year in order to continue in the major. Study abroad (Exchange) students are required to have a cumulative GPA of 3.0 or better in math, physics, chemistry, and other required courses at the end of the semester prior to their exchange semester.

Electives

Select five courses from the following:

- BMCE 753 Cell Culture
- BMS 503 Human Anatomy and Physiology I
- BMS 504 Pathologic Basis of Disease
- BMS 706 Virology
- & BMS 708 Virology Laboratory
- CEE 502 Project Engineering
- CEE 705 Introduction to Sustainable Engineering
- CEE 724 Environmental Engineering Microbiology
- CHBE 502 Heat Transfer and Unit Operations
- CHBE 603 Applied Mathematics for Chemical Engineers
- CHBE 651 Biotech Experience/Biomanufacturing
- CHBE 703 Mass Transfer and Stagewise Operations
- CHBE 707 Chemical Engineering Kinetics
- CHBE 709 Fundamentals of Air Pollution and Its Control
- CHBE 712 Introduction to Nuclear Engineering
- CHBE 714 Chemical Sensors
- CHBE 722 Introduction to Microfluidics
- CHBE 725 Cell Phenotyping and Tissue Engineering Laboratory
- CHBE 792 Process Dynamics and Control
- CHBE 795 Computational Molecular Bioengineering
- ECE 537 Introduction to Electrical Engineering
- ECE 541 Electric Circuits
- ECE 543 Introduction to Digital Systems
- ECE 633 Signals and Systems
- ECE 633H Honors/Signals and Systems
- ECE 717 Introduction to Digital Image Processing
- ECE 784 Biomedical Instrumentation
- GEN 711 Genomics and Bioinformatics
- or GEN 711W Genomics and Bioinformatics
- GEN 712 Programming for Bioinformatics
- GEN 717 Molecular Microbiology
- GEN 771 Molecular Genetics

Bioengineering Program Elective 4

Credits 15

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral

Fall

CHBE 762 Biomedical Engineering 4
CHBE 763 Bioengineering Design I 2
Bioengineering Program Electives (2) 8
Discovery Program Elective 4

Spring

CHBE 614 Separation Processes 3
CHBE 764 Bioengineering Design II 4
Bioengineering Program Elective 4
Discovery Program Elective 4

Total Credits 129

1 MATH 425 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.
2 CHEM 405 Chemical Principles for Engineers satisfies the Discovery Physical Science (with lab) category.
3 ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.
4 BIOL 411 Introductory Biology: Molecular and Cellular satisfies the Discovery Biological Science (with lab) category.
5 CHBE 502 Energy Balances satisfies the Discovery Inquiry category.

Student Learning Outcomes

By the time of graduation, students will have:

- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemical Engineering Major (B.S.)

https://ceps.unh.edu/chemical-bioengineering/program/bs/chemical-engineering-major

Description

Chemical engineering is concerned with the analysis and design of processes that deal with the transfer and transformation of energy and material. The practice of chemical engineering includes the conception, development, design, and application of physicochemical processes and their products; the development, design, construction, operation, control, and management of plants for these processes; and activities relating to public service, education, and research.

The curriculum prepares students for productive careers in industry or government and provides a foundation for graduate studies. The program emphasizes chemical engineering fundamentals while offering opportunities for focused study in bioengineering, energy or environmental engineering.

Traditional employment areas in the chemical process industries include industrial chemicals, petroleum and petrochemicals, plastics, pharmaceuticals, metals, textiles, and food. Chemical engineers also are working in increasing numbers in the areas of energy engineering, pollution abatement, and biochemical and biomedical engineering; in addition, they are employed by many government laboratories and agencies as well as private industries and institutions.

Graduates from the program have the ability to apply knowledge of mathematics, science, and engineering to identify, formulate, and solve chemical engineering problems as well as to design and conduct experiments safely and analyze and interpret data. They are prepared to pursue advanced studies in chemical engineering. Program graduates gain a sense of professional and ethical responsibility with the ability to apply environmental, safety, economic, and ethical criteria in the design of engineering processes. They learn to function as individuals or in a team and gain skills in written and oral communication and effectively use computers for engineering practice, including information search in the library and online. They also understand the need for lifelong learning and the significance of societal and global issues relevant to chemical engineering.

Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral
Major Requirements

A minimum of 129 credits is required for graduation with the degree of bachelor of science in chemical engineering. There are nine electives in the chemical engineering curriculum. Six of these are for the Discovery Program requirements. The remaining three electives are chemical engineering electives.

Students are required to obtain a minimum 2.0 grade-point average in CHBE 501 Material Balances and CHBE 502 Energy Balances and in overall standing at the end of the sophomore year in order to continue in the major. Study abroad (Exchange) chemical engineering students are required to have a cumulative GPA of 3.0 or better in math, physics, chemistry, and CHBE courses at the end of the semester prior to their exchange semester.
Fourth Year

Fall
CHBE 703 Mass Transfer and Stagewise Operations 3
CHBE 707 Chemical Engineering Kinetics 3
CHBE 713 Chemical Engineering Laboratory II 3
CHBE 752 Process Dynamics and Control 4
Chemical Engineering Elective 4

Credits 17

Spring
CHBE 614 Separation Processes 3
CHBE 708 Chemical Engineering Design 5 4
Chemical Engineering Elective 4
Discovery Elective 6 4

Credits 15

Total Credits 129

1 ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.
2 MATH 245 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.
3 PHYS 407 General Physics I or CHEM 405 Chemical Principles for Engineers satisfies the Discovery Physical Science (with lab) category.
4 CHBE 502 Energy Balances satisfies the Discovery Inquiry requirement.
5 CHBE#708 Chemical Engineering Design satisfies the Discovery Capstone Experience/Course.
6 Chemical Engineering students do not have to take a course in the Discovery ETS category since they satisfy this requirement through a combination of courses in the curriculum.

Student Learning Outcomes

By the time of graduation, students will have

• an ability to identify, formulate, and solve complex chemical engineering problems by applying principles of engineering, science, and mathematics.
• an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
• an ability to communicate effectively with a range of audiences.
• an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
• an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemical Engineering Major: Bioengineering Option (B.S.)

https://ceps.unh.edu/chemical-bioengineering/program/bsche/chemical-engineering-major-bioengineering-option

Description

Under this option, the required courses deal with the application of basic biological sciences and chemical engineering principles to the design and operation of large-scale bioprocesses for the production of high-value medicinal, food and beverage, pharmaceutical, biomedical, genetic engineering, and health care products. The elective courses permit the student to study topics of special interest in more depth or gain a broader perspective in bioengineering or some closely related subjects such as biochemistry or biotechnology experience in manufacturing or research. Three courses are required, and an additional course of at least three credits should be selected from the electives list. Students interested in the bioengineering option should declare their intention to the department faculty during the sophomore year.

### Student Learning Outcomes

By the time of graduation, students will have:

- an ability to identify, formulate, and solve complex chemical engineering problems by applying principles of engineering, science, and mathematics.
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- an ability to communicate effectively with a range of audiences.
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- an ability to conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### Chemical Engineering Major: Energy Option (B.S.)

https://ceps.unh.edu/chemical-bioengineering/program/bsche/chemical-engineering-major-energy-option

### Description

This option covers the major areas of current interest in the energy field. The required courses provide students with a general background knowledge of fossil fuels, nuclear power, solar energy, and other alternative energy resources. The elective courses will permit the student to study topics of special interest in more depth or gain a broader perspective on energy and some closely related subjects. Three courses are required, and one additional course of at least three credits should be selected from the electives list. Students interested in the energy option should declare their intention to the department faculty during the sophomore year.
Students interested in the environmental engineering option should declare their intention to the department faculty during the sophomore year. The chemical engineering program, with its substantial requirements in chemistry, fluid dynamics, heat transfer, mass transfer, unit operations, and reaction kinetics, provides students with a unique preparation to deal with many aspects of environmental pollution problems. The option gives students a special focus on the application of chemical engineering principles and processes to the solution of problems relating to air pollution, water pollution, and the disposal of solid and hazardous waste. Three required courses must be selected, plus one elective from the electives list. Each course must carry a minimum of three credits. The environmental engineering option gives students a special focus on the application of chemical engineering principles and processes to the solution of problems relating to air pollution, water pollution, and the disposal of solid and hazardous waste. Three required courses must be selected, plus one elective from the electives list. Each course must carry a minimum of three credits. ### Student Learning Outcomes

By the time of graduation, students will have
Chemistry majors have also been successful in a variety of professional work through teaching or research assistantships and fellowships. Chemistry coursework are often able to obtain funding for their graduate careers. You'll find chemists in many industries, including agricultural/business, or other pre-professional programs. With careful selection of elective courses, the B.A. degree may also lead to ACS certification, depending on program plan. Since the required courses for each degree program are very similar in the first and second years, it is easy to change from one program to another. A chemistry faculty adviser is assigned to a student once she/he enters the program. The student’s adviser provides academic guidance concerning the choice of courses to meet both major and university requirements.

https://ceps.unh.edu/chemistry

Chemistry

Chemistry is a dynamic, an extremely creative, and yet also a practical discipline. Chemists analyze and quantitate, like when testing environmental or forensic samples; they measure specific characteristics of substances, like the defects present in a material, or the optical properties of atmospheric particles; they design and synthesize new substances, like antibiotics, catalysts for hydrogen production, and polymers for flexible electronics; they also generate models and theories that can explain what happens in the laboratory or in Nature. Chemistry is integral to modern science and, ultimately, most phenomena in biology, engineering, environmental science, geology, materials science, and medicine can be described in terms of the chemical and physical behavior of atoms and molecules—because of this, chemistry is often called “The Central Science”. Chemists are vital members of the interdisciplinary teams tackling the complicated problems facing our world, including issues in energy, health, security, and defense. Chemists are essential in developing the technologies and materials that support modern life!

The study of chemistry provides students with the critical thinking and problem-solving skills necessary to be successful in a wide variety of careers. You'll find chemists in many industries, including agricultural/food products, biotechnology, coatings, materials, paper, personal care products, petrochemicals, pharmaceuticals, plastics, renewable energy, semiconductors, and solar cells. Chemists are also involved in environmental and health-related sciences, making public policies, patent law and intellectual property, and educating future generations of scientists.

Students are also well-prepared for graduate-level work in chemistry, chemical biology, chemical physics, biochemistry, biophysics, materials chemistry, and other related fields. Students who excel in undergraduate chemistry coursework are often able to obtain funding for their graduate work through teaching or research assistantships and fellowships. Chemistry majors have also been successful in a variety of professional programs where they have studied medicine, pharmacy, dentistry, veterinary medicine, business, or law.

The chemistry program at The University of New Hampshire is small enough to be personal, but broad enough to provide excellent opportunities for challenge and growth. Students interested in pursuing chemistry as an undergraduate degree have two options available to them. These are the Bachelor of Science in Chemistry (B.S.) degree and a Bachelor of Arts (B.A.) degree. The B.S. Chemistry degree is certified by the American Chemical Society; the B.A. degree may also lead to ACS certification, depending on program plan. Since the required courses for each degree program are very similar in the first and second years, it is easy to change from one program to another. A chemistry faculty adviser is assigned to a student once she/he enters the program. The student’s adviser provides academic guidance concerning the choice of courses to meet both major and university requirements.

- Chemistry Minor (p. 76)

Faculty

https://ceps.unh.edu/chemistry/people

Chemistry Major (B.A.)

https://ceps.unh.edu/chemistry/program/ba/chemistry-major

Description

The B.A. degree exposes students to the major fields of chemistry but provides more flexibility in course selection than the B.S. degree. The curriculum offers a comprehensive introduction to chemistry’s traditional subdisciplines (analytical, inorganic, organic, and physical chemistry) via foundational classroom and laboratory experiences. Undergraduate research is an option, but not a requirement for this degree. The B.A. degree is directed towards students who have interdisciplinary interests and are not planning to either attend a traditional graduate program in chemistry or find immediate employment in the chemical industry. Instead, this degree is geared toward students who plan to attend graduate school in an interdisciplinary field where chemical knowledge will be beneficial, and students who are interested in chemistry but plan to pursue post-graduate degrees in the health sciences, education, business, or other pre-professional programs. With careful selection of elective courses, the B.A. degree may also lead to American Chemical Society certification.

Total Credits 129

**Student Learning Outcomes**

At the time of graduation, a student should be able to:

- Reason with Chemistry's anchoring concepts: that matter consists of atoms that have internal structures that dictate their chemical and physical behavior; that atoms interact via electrostatic forces to form chemical bonds that chemical compounds have geometric structures that influence their chemical and physical behaviors; that intermolecular forces—electrostatic forces between molecules—dictate the physical behavior of matter; that matter changes, forming products that have new chemical and physical properties that energy is the key currency of chemical reactions in molecular scale systems as well as macroscopic systems; that chemical changes have a time scale over which they occur; that all chemical changes are, in principle, reversible, and chemical processes often reach a state of dynamic equilibrium; that Chemistry is generally advanced via experimental observations; and that Chemistry constructs meaning interchangeably at the particulate and macroscopic levels.

- Use Chemistry's cross-cutting concepts to interrogate and explain phenomena: chemical identity (how do we identify chemical substances?); structure-property relationships (how do we predict the properties of materials?); chemical causality (why do chemical processes occur?); chemical mechanism (how do chemical processes occur?); chemical control (how can we control chemical processes?); benefits-costs-risks (how do we evaluate the impacts of chemical processes occur?); chemical mechanism (how do chemical changes occur?); chemical causality (why do chemical processes occur?); chemical identity (how do we identify chemical substances?); chemical control (how can we control chemical processes?); benefits-costs-risks (how do we evaluate the impacts of chemically transforming matter?)

- Demonstrate the following general scientific practices when displaying knowledge of chemical ideas and concepts: asking questions; developing and using models; constructing explanations; planning and carrying out investigations; engaging in argument from evidence; analyzing and interpreting data; using mathematics and computational thinking; obtaining, evaluating, and communicating information OR Demonstrate the following Chemistry core practices (a) analysis: development and application of strategies for detecting, identifying, separating, and quantifying chemical substances (b) synthesis: the design of new substances and synthetic routes (c) transformation: controlling chemical processes for non-synthetic purposes.

**Chemistry Major (B.S.)**

https://ceps.unh.edu/chemistry/program/bs/chemistry-major

**Description**

The B.S. Chemistry degree is certified by the American Chemical Society and provides a deep, rigorous experience that prepares students for graduate work or a career in chemical industry and related fields. The curriculum offers thorough training in the major fields of chemistry, covering analytical, inorganic, organic, and physical chemistry, as well as biochemistry and chemical biology. Students gain laboratory experience in molecular synthesis and characterization, chemical biology, analytical and instrumental methods, physical chemical measurements and data analysis, and spectroscopy. At the same time, the program requires students to participate in scientific inquiry, via both advanced laboratory experiences and independent research.

Total Credits 85

1. BMCB 658 General Biochemistry satisfies the Discovery Biological Sciences requirement (for BS Chem majors only)
2. CHEM 799 Senior Thesis is a year-long experience of 4 credits per semester and satisfies the Discovery Capstone Experience requirement.
3. CHEM 740 Chemical Biology meets the ACS BIOCHEM requirement. Students can take CHEM 740 Chemical Biology. CHEM 740 Chemical Biology DOES NOT meet the Biological Sciences Discovery criteria. Students can meet this requirement with one of their discovery electives.
## Degree Plan

This is the suggested degree plan for B.S. Chemistry majors. A student can alter this plan in consultation with an academic advisor.

### Student Learning Outcomes

- Reason with Chemistry’s anchoring concepts: that matter consists of atoms that have internal structures that dictate their chemical and physical behavior; that atoms interact via electrostatic forces to form chemical bonds that chemical compounds have geometric structures that influence their chemical and physical behaviors; that intermolecular forces—electrostatic forces between molecules—dictate the physical behavior of matter; that matter changes, forming products that have new chemical and physical properties that energy is the key currency of chemical reactions in molecular scale systems as well as macroscopic systems; that chemical changes have a time scale over which they occur; that all chemical changes are, in principle, reversible, and chemical processes often reach a state of dynamic equilibrium; that Chemistry is generally advanced via experimental observations; and that Chemistry constructs meaning interchangeably at the particulate and macroscopic levels.
- Use Chemistry’s cross-cutting concepts to interrogate and explain phenomena: chemical identity (how do we identify chemical substances?); structure-property relationships (how do we predict the properties of materials?); chemical causality (why do chemical processes occur?); chemical mechanism (how do chemical processes occur?); chemical control (how can we control chemical processes?); benefits-costs-risks (how do we evaluate the impacts of chemically transforming matter?).
- Demonstrate the following general scientific practices when displaying knowledge of chemical ideas and concepts: asking questions; developing and using models; constructing explanations; planning and carrying out investigations; engaging in argument from evidence; analyzing and interpreting data; using mathematics and computational thinking; obtaining, evaluating, and communicating information OR demonstrate the following Chemistry core practices when displaying knowledge of chemical ideas and concepts (a) analysis: development and application of strategies for detecting,
identifying, separating, and quantifying chemical substances
(b)synthesis: the design of new substances and synthetic routes
(c)transformation: controlling chemical processes for non-synthetic purposes.

Chemistry Minor
https://ceps.unh.edu/chemistry/chemistry-minor

Description
In this minor, you'll be introduced to the study of chemistry, providing you with the communication, critical-thinking and problem-solving skills necessary for success in many careers. The chemistry program offers a wide selection of courses in analytical, inorganic, organic and physical chemistry. You’ll have the opportunity to participate in a variety of rigorous laboratory experiences and cutting-edge research. Combine the chemistry minor with a major such as business, education, engineering or a health-related field to enhance your options for a career or graduate studies.

If you are interested in obtaining a Chemistry Minor, please contact Cindi Rohwer, Academic Department Coordinator, Chemistry Department Office at (603) 862-1795 or Cindi.Rohwer@unh.edu. She will connect you to the Chemistry Department Undergraduate Coordinator so you can discuss your plans to minor in Chemistry.

Requirements
1. Complete a total of 20 credit hours in Chemistry (CHEM) courses.
2. A minimum of 12 credit hours at the 500 level or higher are required.
3. Chemistry courses for the minor cannot be completed on a pass/fail basis.
4. Grade of C- or better is required in all chemistry minor coursework.
5. A cumulative GPA of 2.00 is required for all chemistry minor coursework.
6. Biochemistry (BMCB) courses do not count toward a chemistry minor.
7. Transfer credits can only be applied to the minor with permission of the Chemistry Department Undergraduate Coordinator or Chair. Maximum of 8 transfer credit hours. Transfer courses must meet minimum grade requirements.
8. The following courses cannot be counted toward the Chemistry minor: CHEM 400, CHEM 408, CHEM 409, CHEM 411, CHEM 413, CHEM 501, CHEM 502, CHEM 503 and CHEM 798.

Civil and Environmental Engineering
https://ceps.unh.edu/civil-environmental-engineering

Overview
Civil and Environmental Engineering involves the sustainable planning, design, and construction of public works for the benefit of society while minimizing environmental impact. Civil Engineering concerns the design of buildings, bridges, roads, dams, tanks, and more. Environmental Engineering specializes in environmental cleanup, drinking water systems, wastewater treatment systems, and solid and hazardous waste disposal systems, environmental remediation, all with consideration of people, planet, and profits - known as the triple bottom line. Resulting infrastructure facilities must provide efficient service, be cost effective, and be compatible with the environment. Moreover, civil and environmental engineers work under a code of ethics in which their primary, overriding responsibility, is to uphold the public’s trust by working to plan, design, build, and restore safe, sustainable, and environmentally responsible public works.

The Department of Civil and Environmental Engineering has two degree programs: one resulting in a Bachelor of Science in Civil Engineering (the BSCIVE) and another resulting in a Bachelor of Science in Environmental Engineering (the BSENV). Both programs are accredited by ABET.

As civil engineering is such a broad field, it is traditionally divided into sub-disciplines. At the University of New Hampshire, multiple courses are offered in six: transportation, environmental engineering, geotechnical engineering, structural engineering, sustainable engineering, and water resources engineering.

Environmental engineering focuses on environmental pollution and public health protection; water, wastewater, reuse and stormwater technology; solid and hazardous waste engineering and remediation; engineering sustainability, environmental microbiology and chemistry; contaminant transport and fate, hydraulics, and hydrology.

Students may readily transfer between the BSCIVE and BSENV programs within the first three semesters. Transferring between the two programs is also possible later on in the programs, but additional courses may result.

Both engineering degrees provide a firm base in mathematics and engineering, and all majors are expected to develop excellent communication and computer skills. Graduates are prepared to enter the profession and to pursue advanced study. Because of the broad technical background attained, some graduates also successfully pursue further education in business, architecture, education, and law.

Mission
The mission of the Department of Civil and Environmental Engineering at the University of New Hampshire is fourfold:

- To pursue and disseminate knowledge through teaching, scholarship, outreach and public service.
- To provide excellent undergraduate and graduate education.
- To advance the state-of-the-art in science and engineering by conducting research.
- To enhance the quality of life for people in New Hampshire, New England, and beyond.

BSCIVE Program Overview
Civil engineers work as private consultants, for large contracting firms, and for government agencies in a wide variety of indoor and outdoor settings around the world. There is a strong and constant market for civil engineers due to the demands placed on the profession to design, construct, maintain, and repair the infrastructure.

Educational Objectives
In accordance with its University, College, and Department missions, the faculty of the Department of Civil & Environmental Engineering has established clear educational objectives for our BSCIVE graduates, five years after obtaining the degree:
1. Professional employment, primarily in the civil and environmental engineering disciplines.

2. Commitment to continuous learning through graduate and postgraduate education, coursework, and research.

3. Being resourceful in finding solutions, and retaining ownership and accountability for their work.

4. Positions of leadership, directing the work of others.

5. Professional licensure or certification in civil and environmental engineering disciplines and other professions.

6. Positions and active participation in community, public, and professional service.

Student Outcomes
To enable our graduates to achieve our educational objectives, the BSENVE program is designed to provide the following student outcomes at the time of graduation:

1. To have obtained an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. To have obtained an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

3. To have obtained an ability to communicate effectively with a range of audiences.

4. To have obtained an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. To have obtained an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. To have obtained an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. To have obtained an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

BSENVE Program Overview
Environmental engineers work as private consultants, in industry and for government agencies in a wide variety of indoor and outdoor settings around the world. There is a strong and constant market for environmental engineers due to the demands placed on the profession to construct, maintain, and repair the drinking water, wastewater, water reuse and stormwater, and solid and hazardous waste management infrastructure. The curriculum prepares students to plan, using triple bottom line considerations, and design systems to minimize the impact of human activity on the environment and protect human health.

Educational Objectives
In accordance with its University, College, and Department missions, the faculty of the Department of Civil & Environmental Engineering has established clear educational objectives for our BSENVE graduates, five years after obtaining the degree:

1. Professional employment, primarily in the environmental engineering disciplines.

2. Commitment to continuous learning through graduate and postgraduate education, coursework, and research.

3. Being resourceful in finding solutions and retaining ownership and accountability for their work.

4. Positions of leadership, directing the work of others.

5. Professional licensure or certification in environmental engineering discipline and other professions.

6. Positions and active participation in community, public, and professional service.

Student Outcomes
To enable our graduates to achieve our educational objectives, the BSENVE program is designed to provide the following student outcomes at the time of graduation:

1. To have obtained an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

2. To have obtained an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

3. To have obtained an ability to communicate effectively with a range of audiences.

4. To have obtained an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. To have obtained an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. To have obtained an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. To have obtained an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Programs
- Civil Engineering Major (B.S) (p. 77)
- Environmental Engineering Major (B.S.) (p. 80)
- Environmental Engineering Minor (p. 83)

Faculty
https://ceps.unh.edu/cee/faculty-staff-directory

Civil Engineering Major (B.S)
https://ceps.unh.edu/civil-environmental-engineering/program/bs/civil-engineering-major
Matriculating students should have strong aptitudes in mathematics and science along with imagination, spatial and graphic abilities, communication skills, and creativity. Students then follow a four-year program that conforms to the guidelines of, and is accredited by the Engineering Accreditation Commission of ABET, the global accreditor of college and university programs in applied and natural science, computing, engineering and engineering technology. ABET accreditation assures that programs meet standards to produce graduates ready to enter critical technical fields that are leading the way in innovation and emerging technologies, and anticipating the welfare and safety needs of the public.

The first two years of the program provide the necessary technical knowledge in mathematics, chemistry, and physics, while introducing and developing problem-solving techniques in eight courses tailored to civil engineering students. The junior year provides courses in each of the civil engineering sub-disciplines, providing students with skills in each and allowing students to determine which they wish to pursue further. The senior year is flexible, allowing students to choose where to focus attention by selecting from more than forty elective courses in civil and environmental engineering.

Additional opportunities exist for study abroad, cognates, minors, and dual majors, a three-year accelerated track, and early admission into two masters of science degree programs.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

More than half of the major’s total credits and nearly all of the senior-level courses are elected by the student. Of these, there are Discovery Program electives required by the University and other electives required by the department in order to satisfy departmental objectives and accreditation requirements.

The Discovery Program is described in University Academic Requirements. Courses required by the BSCIVE program fulfill Discovery requirements in Inquiry and Environment, Technology, and Society; Writing Skills; Quantitative Reasoning; Physical Sciences and Discovery Lab; and Capstone.

To graduate with a bachelor of science in civil engineering, a student must achieve the following: 128 or more credits, credit for the civil engineering program’s major and elective courses, satisfaction of the University’s Discovery Program requirements, satisfaction of the University’s writing-intensive course requirements, a cumulative grade-point average of 2.0 or better for all courses, and a cumulative grade-point average of 2.0 or better in all CEE courses.

Electives

Choose seven courses from the ’700-level CEE Electives Course List’ below with the following restrictions:

1. Courses must be taken in four of six different areas (sustainability, environmental, transportation, water resources, geotechnical, structural).

2. At least three design courses; including one Project-based Design Elective course.

3. One of the seven 700-level courses is a senior technical elective.

Additional Design courses:
To transfer into the BSCIVE major, a student must satisfy the following:

1. Be a CEPS major or have at least 12 credits of graded work at UNH along with Calculus I, and either chemistry or calculus-based physics.
2. Have an overall UNH grade-point average of 2.33 or greater.
3. Have an overall grade-point average of 2.33 or greater in all CEE courses taken to date;
4. Have a grade-point average of 2.33 or greater in courses taken to date at UNH of MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525 , and CEE 501 or ME 526 .
5. Have a grade-point average of 2.33 or greater in courses taken to date of CEE 500, CEE 501, ME 525, ME 526.

At the time of transferring into the BSCIVE program, only CEE 600-level and CEE 700-level classes with a grade of C- or better may be transferred in.

BSCIVE majors wishing to participate in domestic or international exchange programs must achieve a cumulative grade-point average of 2.75 or better in all CEE courses taken to date at the time of application to the exchange program.

To begin taking the required CEE 600-level courses in the junior year, students must meet the following requirements:

1. MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525; and CEE 501 or ME 526 must have been completed with passing grades.
2. The student must have a grade-point average of 2.00 or greater in all CEE courses.
3. The student must have a grade-point average of 2.00 or greater in MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525, and CEE 501 or ME 526.
4. The student must have a grade-point average of 2.00 or greater in CEE 500 or ME 525 and CEE 501 or ME 526.

**Program Policies and Requirements**

To transfer into the BSCIVE major, a student must satisfy the following:

1. Be a CEPS major or have at least 12 credits of graded work at UNH along with Calculus I, and either chemistry or calculus-based physics.
2. Have an overall UNH grade-point average of 2.33 or greater.
3. Have an overall grade-point average of 2.33 or greater in all CEE courses taken to date;
4. Have a grade-point average of 2.33 or greater in courses taken to date at UNH of MATH 425, PHYS 407, CHEM 403 or CHEM 405, CEE 500 or ME 525, and CEE 501 or ME 526.
5. Have a grade-point average of 2.33 or greater in courses taken to date of CEE 500, CEE 501, ME 525, ME 526.

University of New Hampshire
By the time of graduation students are:

- To have obtained an ability to communicate effectively with a range of audiences.
- To have obtained an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- To have obtained an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- To have obtained an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- To have obtained an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Environmental Engineering Major (B.S.)

https://ceps.unh.edu/civil-environmental-engineering/program-bs/environmental-engineering-major

**Description**

The Environmental Engineering program is accredited by the:

Engineering Accreditation Commission of ABET
111 Market Place
Suite 1050
Baltimore, MD 21202-4012,
(410) 347-7700
http://www.abet.org

Environmental engineers graduating with a B.S. EnvE degree will plan, design, and construct public and private facilities to minimize the impact of human activity on the environment through sustainable approaches that protect human health. For example, environmental engineers design and build drinking water treatment systems, municipal and industrial wastewater treatment plants, solid waste management facilities, air pollution control systems, contaminated ground water remediation systems, and hazardous waste remediation facilities. These facilities must meet regulatory requirements, be cost effective to build and maintain, be safe to operate, and have minimal environmental impact.

In CEE 420 Environmental Engineering Lectures I, students are introduced to the full spectrum of environmental engineering projects that they will subsequently explore in design teams during their degree program. In CEE 505 Introduction to Sustainable Engineering, students learn tools to analyze life cycles and are exposed to global actions for sustainability.

In CEE 520 Environmental Pollution and Protection: A Global Context, students tour field sites and through junior and senior year classes and student organizations (ASCE, EWRI, EWB), they interact with engineers who talk about engineering consulting, environmental policy, and design practices applied to local and global projects. As part of these projects, students:

1. analyze treatment alternatives;
2. recommend a system that meets regulatory operational needs, and is sustainable; and
3. prepare an implementation schedule and project budget.

---

**Student Learning Outcomes**

By the time of graduation students:

- To have obtained an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- To have obtained an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

---

**Third Year**

**Fall**

- CEE 635 Engineering Materials 4
- CEE 650 Fluid Mechanics 4
- CEE 680 Classical Structural Analysis 3
- Elective Discovery Program requirement 1 4

**Credits** 15

**Spring**

- CEE 620 Fundamental Aspects of Environmental Engineering 4
- CEE 665 Soil Mechanics 4
- Elective Statistics 3 4
- Elective Discovery Program requirement 1 4

**Credits** 16

**Fourth Year**

**Fall**

- CEE 797 Introduction to Project Planning and Design 2
- Elective Project-Based Design Elective 3 4
- Elective Area Elective 2 3 3
- Elective Civil Engineering 3 3
- Elective Discovery Program requirement 1 4

**Credits** 16

**Spring**

- CEE 798 Project Planning and Design 2
- Elective Area Elective 3 3 3
- Elective Area Elective 4 3 3
- Elective Civil Engineering 3 3
- Elective Senior Technical Elective 3 3

**Credits** 14

**Total Credits** 128

---

1. A course satisfying one each of the Discovery Program categories of Biological Science, Humanities, Fine and Performing Arts, Historical Perspectives, Social Science and World Cultures, preferably taken in this order. The Discovery Social Science elective must be selected from CEP 415, ECON 401, ECON 402, EREC 411, GEOG 582, GEOG 584, or POLT 402.

2. Satisfies capstone requirement for Discovery.

3. Approved list available in the CEE office.
Students choose elective courses from areas of Sustainability, Water Resources, Environmental Engineering Design, and other relevant topics. Design projects are performed in a minimum of two design electives. In the capstone design experience courses students work on a multi-disciplinary environmental engineering project and apply skills learned in other courses while working with real-world problems and clients.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*  
Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.  
*Major GPA requirements as indicated.

Major Requirements

To qualify for graduation, an EnvE major must: have satisfied all specified course requirements, have satisfied the University’s Academic Requirements, have a minimum cumulative grade-point average of 2.00, and have a minimum grade-point average of 2.00 in engineering courses.

At the end of the sophomore year, students are required to have a minimum overall grade-point average of 2.00 and a minimum grade-point average of 2.00 in CEE 420, MATH 425, CHEM 405, PHYS 407, MATH 426, CEE 500, CEE 520 to be permitted to enroll in junior-level courses.

EnvE students do not have to take a course in the Discovery Biological Science category since they satisfy this category with CEE 724

For a full listing of the requirements over four years of study please refer to the degree plan tab.

Electives

• Select four 700-level Design and Environmental/Civil Engineering Electives courses are required, two of which must be Design, with a minimum of 12 total credits.

• Select one Sustainability Elective, one Public Health Elective, and two Water Resources Electives are required.

• Each elective course can only be used to fulfill one category.

• Course lists are subject to change, check with advisor.

**Total Credits**

134-141

The EnvE program requires a minimum of 130 total credits for graduation.

1 Students who passed the ALEKS placement examination as determined by the Mathematics Department may enroll in MATH 425 Calculus I. Subsequent MATH courses (MATH 426 Calculus II, MATH 527 Differential Equations with Linear Algebra, Differential Equations with Linear Algebra, MATH 644 Statistics for Engineers and Scientists) will be taken one semester earlier than shown here.

2 See Discovery Program requirements. The Discovery requirements for Writing, Quantitative Reasoning, and Physical Science are fulfilled by ENGL 401 First-Year Writing, MATH 425 Calculus I, and PHYS 407 General Physics I, respectively. CEE 520 Environmental Pollution and Protection: A Global Context fulfills the Environmental, Technology, and Society requirement. CEE 797 Introduction to Project Planning and Design and CEE 798 Project Planning and Design fulfill the Senior Capstone requirement. Environmental Engineering Microbiology fulfills the Biological Science requirement. Courses in the EnvE curriculum designated Discovery Electives can be selected from the University’s approved Discovery Program courses in Fine and Performing Arts, Humanities, Historical Perspectives, World Cultures, and Social Science. One of these electives must have an Inquiry attribute.

3 Approved lists of sustainability, water resources, design and Environmental/Civil electives are available from the EnvE undergraduate coordinator, Paula Mouser.

**Student Learning Outcomes**

By the time of graduation students are:

- To have obtained an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
• To have obtained an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
• To have obtained an ability to communicate effectively with a range of audiences.
• To have obtained an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
• To have obtained an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• To have obtained an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• To have obtained an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Environmental Engineering Minor
https://ceps.unh.edu/civil-environmental-engineering/program/minor/environmental-engineering

Description

The environmental engineering minor is intended primarily for students in engineering and physical sciences who are not in the chemical, civil, or environmental engineering degree programs. Students contemplating such a minor should plan on a strong background in the sciences and mathematics (including differential equations).

The minor provides a comprehensive introduction to major areas of interest in environmental protection through the three required courses. Further breadth in environmental engineering or depth in specific areas can be attained through the choice of appropriate elective courses.

Requirements

The minor requires a minimum of five courses, as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 620</td>
<td>Fundamental Aspects of Environmental Engineering</td>
<td>4</td>
</tr>
<tr>
<td>CEE 706</td>
<td>Introduction to Sustainable Engineering</td>
<td>3</td>
</tr>
<tr>
<td>CEE 731</td>
<td>Advanced Water Treatment Processes</td>
<td>4</td>
</tr>
<tr>
<td>or CEE 721</td>
<td>Environmental Sampling and Analysis</td>
<td></td>
</tr>
</tbody>
</table>

A minimum of two elective ENE courses.

Choice of elective courses should be made in consultation with the minor area advisor, Nancy Kinner. Students normally start this program in the junior year and should declare their intention to enter the program as early as possible during the sophomore year. During the final semester, students must apply to the dean to have the minor appear on the transcript.

Computer Science

Undergraduate students may choose from one of seven degree options: the B.S. in computer science, which is intended for students interested in the design and implementation of software systems; the B.A. in Computer Science- Algorithms Option, which focuses on fundamental concepts in the areas of algorithms, artificial intelligence and machine learning; the B.A. in Computer Science- Cybersecurity Option, which is designed for students who are interested in computer and network security; the B.A. in Computer Science- systems option, which focuses on fundamental concepts in the areas of computing systems and data communication; the B.S. in Information Technology, which focuses on the application of existing computing technologies to meet the information needs of organizations and individual computer users; or the either of the two B.S. degrees in Analytics and Data Science: the analytics option, which emphasizes the application of data science in business and industry, or the data science option, which focuses on the theoretical and computational underpinnings of modern data science.

Analytics and Data Science Major: Analytics Option (B.S.)
https://ceps.unh.edu/computer-science/program-bs/analytics-data-science-major-analytics-option

Description

The option in Analytics is intended for students interested in either heading into industry immediately upon graduation, or pursuing graduate work in a professionally oriented program such as the Master of Science in Analytics at UNH. The option in Analytics places its emphasis on applications of data science in business and industry.

Program Objectives

Analytics and Data Science focuses on the extraction of meaning from data through the application of computer science, mathematics and business domain knowledge. Within a few years of obtaining a bachelor’s degree in Analytics and Data Science, our alumni will have:
1. Engaged in successful career areas of analytics and data science and will already have, or be pursuing, advanced degrees in Analytics, Data Science, Computer Science, Mathematics or related fields
2. Applied the full range of core Data Science concepts and techniques to fill the analytics needs of an organization
3. Communicated effectively with diverse stakeholders as well as functioned appropriately in a team environment
4. Navigated the complex interconnections between data, computing technology, and the goals and constraints of the organization served
5. Understood the pervasive and changing role of data in global society, and participated responsibly as both an Analytics and Data Science professional and citizen

For additional information about the Analytics and Data Science: Analytics Option, contact Matt Magnusson (matthew.magnusson@unh.edu), program co-director (Durham campus), or Jeremiah Johnson (jeremiah.johnson@unh.edu), program co-director (Manchester campus), at (603) 641-4127.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University’s Discovery program, completing all of the 24 required courses in the major as listed below, including the capstone course, the internship preparedness course, and a three-credit internship. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

1 Or another suitable 700-level data science or data engineering course chosen in consultation with the program coordinator.

2 Must be 600 or 700-level and approved by advisor.

### Student Learning Outcomes

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
- Apply theory, techniques, and tools throughout the data analysis lifecycle and employ the resulting knowledge to satisfy stakeholders’ needs.

### Analytics and Data Science Major: Data Science Option (B.S.)

[https://ceps.unh.edu/computer-science/program/bs/analytics-data-science-major-data-science-option](https://ceps.unh.edu/computer-science/program/bs/analytics-data-science-major-data-science-option)
### Description

The option in Data Science is intended for students interested in pursuing advanced degrees and conducting original research in data science. The option in data science places its emphasis on a rigorous introduction to the theoretical mathematical and computational underpinnings of modern data science.

### Program Objectives

Analytics and Data Science focuses on the extraction of meaning from data through the application of computer science, mathematics and business domain knowledge. Within a few years of obtaining a bachelor’s degree in Analytics and Data Science, our alumni will have:

1. Engaged in successful career areas of analytics and data science and will already have, or be pursuing, advanced degrees in Analytics, Data Science, Computer Science, Mathematics or related fields
2. Applied the full range of core Data Science concepts and techniques to fill the analytics needs of an organization
3. Communicated effectively with diverse stakeholders as well as functioned appropriately in a team environment
4. Navigated the complex interconnections between data, computing technology, and the goals and constraints of the organization served
5. Understood the pervasive and changing role of data in global society, and participated responsibly as both an Analytics and Data Science professional and citizen

For additional information about the Analytics and Data Science: Analytics Option, contact Matt Magnusson (matt.magnusson@unh.edu), program co-director (Durham campus), or Jeremiah Johnson (jeremiah.johnson@unh.edu), program co-director (Manchester campus), at (603) 641-4127.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

#### Major Requirements

Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University’s Discovery program, completing all of the 20 required courses in the major as listed below, including the capstone course, the internship preparedness course, and a three-credit internship. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

**Select Approved Minor** 2

Total Credits 102

1. Fulfills capstone requirement
2. Minor must be approved by an academic advisor and must be in a discipline to which Analytics & Data Science can be applied (i.e. Economics or Applied Mathematics).

### Student Learning Outcomes

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
• Apply theory, techniques, and tools throughout the data analysis lifecycle and employ the resulting knowledge to satisfy stakeholders’ needs.

**Analytics Minor**

[https://ceps.unh.edu/computer-science/program/minor/analytics](https://ceps.unh.edu/computer-science/program/minor/analytics)

**Description**

The demand for data-savvy individuals has never been higher, and the analytics minor gives you an introduction to the tools you'll need for a career involving data science and analytics, focused on the application of data science in industry. In addition to courses in mathematics, computer science and analytics, you can study neural networks and big data. Combine this minor with a major in the sciences, computer science, business, marketing or social sciences to bring enhanced skills to your career or graduate studies. With the experience provided by this minor, you’ll gain a competitive advantage in this rapidly growing field. The objective of this minor is to provide a basic background in analytics for those interested in applications.

For more information, contact Matthew Magnusson, program coordinator and minor supervisor, at Matthew.Magnusson@unh.edu (matthew.magnusson@unh.edu).

**Requirements**

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C- grade. Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval. Some preparation in MATH 425: Calculus I and programming (CS 415: Introduction to Computer Science I, or COMP 425: Introduction to Programming) is required.

Total Credits 20

**Computer Programming Cognate**

[https://ceps.unh.edu/computer-science/program/cognate/computer-programming](https://ceps.unh.edu/computer-science/program/cognate/computer-programming)

**Description**

The Cognate in Programming is designed so that students who wish to go beyond an introductory computer programming course are able to meet the challenges that technology imposes.

This cognate is for UNH students who are interested in acquiring skills beyond just a basic programming language. This cognate would be an alternative to students who are not going to pursue a minor in Computer Science or Information Technology but still want to have the opportunity to partake a coherent, if short, curriculum that gives them a foundation to participate in programming activities as applicable to their technical areas.

**Requirements**

The cognate consists of three courses in total, with one required course and two courses selected from four different sequence options. The Cognate will appear on each student's transcript.

<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IT 403</td>
<td>Introduction to Internet Technologies</td>
<td>4</td>
</tr>
</tbody>
</table>

Select one of the following two-course sequences:

- **Sequence one**
  - CS 415 Introduction to Computer Science I
  - CS 416 Introduction to Computer Science II
  - or IT 505 Integrative Programming

- **Sequence two**
  - CS 414 From Problems to Algorithms to Programs
  - CS 417 From Programs to Computer Science
  - or IT 505 Integrative Programming

- **Sequence three**
  - CS 410P Introduction to Scientific Programming/Python
  - or CS 410C Introduction to Scientific Programming/C
  - CS 417 From Programs to Computer Science
  - or IT 505 Integrative Programming

- **Sequence four**
  - CS 405 Introduction to Applications Programming
  - or IT 505 Integrative Programming

**Computer Science Major (B.S.)**

[https://ceps.unh.edu/computer-science/program-bs/computer-science](https://ceps.unh.edu/computer-science/program-bs/computer-science)

**Description**

Computer science focuses on problem solving with a particular emphasis on the design of computer-efficient solutions. Within a few years of obtaining a bachelor's degree alumni will have:

1. Engaged in successful careers in diverse areas of software development and will be pursuing advanced education in computer science or related fields;
2. Applied the full range of core computer science concepts and techniques to fill software development needs of an organization;
3. Adapted to changing directions of computing technology and used state-of-the-art techniques to confront new problems effectively;
4. Navigated the complex interconnections between software and the goals and constraints of the organization served;
5. Participated responsibly in the pervasive and changing role of computing technology in global society as both software engineers and citizens;

6. Operated collaboratively in a team environment and assumed leadership roles.

The B.S. in computer science program is accredited by the Computing Accreditation Commission of ABET.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

**All Major, Option and Elective Requirements as indicated.**

*Major GPA requirements as indicated.

### Major Requirements

Computer science majors must maintain an overall grade-point average of 2.0 or better in all required computer science, mathematics, and computer engineering courses in order to graduate. If at the end of any semester, including the first, a student’s cumulative grade-point average in these courses falls below 2.0, the student may not be allowed to continue as a CS major.

In order to meet the CS major requirements, the following courses must be passed with a grade of C- or better CS 410C, CS 410P, CS 415, CS 416, CS 420, CS 515, CS 520, IT 403

If a student wishing to transfer into the computer science major has any coursework that is applicable to the major, the grades in those courses must satisfy the minimum grade requirements for the B.S. degree in computer science. The student must have an overall grade-point average of 2.0 or better in all courses taken at the university.

Computer science majors must complete the following coursework in computer science, mathematics, computer engineering, and science. (all courses are 4 credits unless indicated otherwise):

### Student Learning Outcomes

Graduates of the UNH BS CS program will have an ability to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
• Communicate effectively in a variety of professional contexts.
• Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
• Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
• Apply computer science theory and software development fundamentals to produce computing-based solutions.
• Learn independently about new technologies, and develop the skills needed to understand them.

Computer Science Major: Algorithms Option (B.A.)

https://ceps.unh.edu/computer-science/program/ba/computer-science-major-algorithms-option

Description

The B.A. in Computer Science will allow students to combine the study of computer science with the study of another field. Given the emergence of computational approaches to virtually all areas of scholarship and creative expression, it is important to offer this flexibility. The three tracks in the B.A. program contain the same computer science core as the B.S. program, but give more control to the student to choose the complementary and advanced courses.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

Total Credits 102

1 Advanced CS course pool consists of the following:
• Any CS course at the 700-level
• One professional elective from the list of B.S. in Computer Science Electives

2 Courses must carry the Discovery attributes of Biological Science or Physical Science and include Discovery lab (DLAB).

Computer science majors must maintain an overall grade-point average of 2.0 or better in all required computer science, mathematics, and computer engineering courses in order to graduate. If at the end of any semester, including the first, a student’s cumulative grade-point average in these courses falls below 2.0, the student may not be allowed to continue as a CS major.

The following courses must be passed with a grade of C- or better: CS 410C, CS 410P, CS 415, CS 416, CS 420, CS 515, CS 520, IT 403

If a student wishing to transfer into the computer science major has any coursework that is applicable to the major, the grades in those courses must satisfy the minimum grade requirements for the B.S. degree in computer science. The student must have an overall grade-point average of 2.0 or better in all courses taken at the university.

Student Learning Outcomes

Graduates of the UNH B.A. CS programs will have an ability to:
• Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
• Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
• Communicate effectively in a variety of professional contexts.
• Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
• Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
• Apply computer science theory and software development fundamentals to produce computing-based solutions.
• Learn independently about new technologies, and have the skills needed to understand them.

If a student wishing to transfer into the computer science major has any coursework that is applicable to the major, the grades in those courses must satisfy the minimum grade requirements for the B.S. degree in computer science. The student must have an overall grade-point average of 2.0 or better in all courses taken at the university.

Student Learning Outcomes

Graduates of the UNH B.A. CS programs will have an ability to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.
- Learn independently about new technologies, and have the skills needed to understand them.

Computer Science Major: Systems Option (B.A.)

https://ceps.unh.edu/computer-science/program/ba/computer-science-major-systems-option
Description

The B.A. in Computer Science will allow students to combine the study of computer science with the study of another field. Given the emergence of computational approaches to virtually all areas of scholarship and creative expression, it is important to offer this flexibility. The three tracks in the B.A. program contain the same computer science core as the B.S. program, but give more control to the student to choose the complementary and advanced courses.

Student Learning Outcomes

Graduates of the UNH B.A. CS programs will have an ability to:

• Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
• Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
• Communicate effectively in a variety of professional contexts.
• Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
• Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
• Apply computer science theory and software development fundamentals to produce computing-based solutions.
• Learn independently about new technologies, and have the skills needed to understand them.

Computer Science Minor

https://ceps.unh.edu/computer-science/program/minor/computer-science

Description

The minor in computer science is designed for students in other majors who want to learn the fundamentals of designing and implementing computer software.

Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an
application should be made to the dean of the student’s major college to have the minor shown on the academic record. Students must consult with their major adviser and also the minor supervisor.

Requirements

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor.

Select one course from the following:

- CS 415: Introduction to Computer Science I
- or CS 410C: Introduction to Scientific Programming/C
- or CS 410P: Introduction to Scientific Programming/Python

Select three courses from the following:

- CS 730: Introduction to Artificial Intelligence
- CS 750: Machine Learning
- CS 753: Information Retrieval
- CS 757: Mathematical Optimization for Applications
- CS 775: Database Systems
- MATH 645: Linear Algebra for Applications
- MATH 736: Advanced Statistical Modeling
- MATH 738: Data Mining and Predictive Analytics
- MATH 739: Applied Regression Analysis
- DATA 750: Neural Networks
- DATA 757: Mining Massive Datasets

Total Credits: 20

1 Must select at least one CS and one MATH course. Must select CS 750: Machine Learning or MATH 738: Data Mining and Predictive Analytics.

Information Technology Cognate

https://ceps.unh.edu/computer-science/program/cognate/information-technology

Description

The Toolbox Cognate in Information Technology is designed to provide students with knowledge and skills required by essentially any job today. With introductory level options, including courses from outside the department, the cognate is of value to students who wish to get a firm foundation in areas related to computing and information technology. The cognate also gives students considering study of Information Technology or Computer Science an opportunity to sample a broad range of courses in the field.

The Cognate will appear on each student’s transcript.

Requirements

The cognate consists of three courses with no more than two courses to be taken from the same category (some courses may have prerequisites).

Data Science Minor

https://ceps.unh.edu/computer-science/program/minor/data-science

Description

The objective of this minor is to provide a basic background in data science for those who are more interested in the theoretical underpinnings of analytics and data science.

For more information, contact Matthew Magnusson, program coordinator and minor supervisor, at matthew.magnusson@unh.edu.

Requirements

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C-grade. Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval. Some preparation in MATH 425: Calculus I and programming (CS 415: Introduction to Computer Science I, or COMP 425: Introduction to Programming) is required.

Select one course from the following:

- CS 761: Programming Language Concepts and Features

An approved CS 700-level course

1 CS 659: Introduction to the Theory of Computation has mathematics prerequisites: MATH 425 Calculus I, MATH 426 Calculus II, and MATH 531 Mathematical Proof.
Information Technology Major (B.S.)

https://ceps.unh.edu/computer-science/program/bs/information-technology

Description

Information technology is concerned primarily with the application of existing computing technologies to the information needs of organizations and individual computer users. The IT program aims to provide graduates with the skills and knowledge to take on appropriate professional positions in information technology upon graduation and grow into leadership positions in the field. Potential careers include network administrator, database developer, system administrator, and webmaster.

The broad objectives for B.S. in information technology graduates are:

1. Apply the full range of core IT concepts and techniques to fill the IT needs of an organization and be prepared to assume managerial and other advanced responsibilities,
2. Confront new problems effectively and anticipate the changing directions of technology,
3. Communicate effectively with diverse stakeholders as well as function appropriately in a team environment,
4. Navigate within the complex relationships between IT and larger organizational goals, and
5. Understand the pervasive and changing role of computing technology in global society, and participate responsibly as both IT professional and citizen.

The B.S. in information technology program is accredited by the Computing Accreditation Commission of ABET.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Total Credits: 129-131

1 Starting in 2022-2023, all Information technology majors will be recommended to take CS 415 Introduction to Computer Science I and CS 417 From Programs to Computer Science as their two-semester sequence. CS 414 From Problems to Algorithms to Programs will be discontinued starting Fall 2022.

2 Courses must carry the Discovery attributes of Biological Science or Physical Science and include Discovery lab (DLAB).

Information technology majors must maintain an overall grade-point average of 2.0 or better in all required information technology and computer science required courses in order to graduate. If at the end of any semester, including the first, a student’s cumulative grade-point average in these courses falls below 2.0, the student may not be allowed to continue as an IT major. In order to meet the IT major requirements, the following courses must be passed with a grade of C- or better: CS 410P, CS 410C, CS 414, CS 415, CS 416, CS 417, IT 403, IT 505, IT 520.

If a student wishing to transfer into the information technology major has any coursework that is applicable to the major, the grades in those courses must satisfy the minimum grade requirements for the B.S. degree in information technology. The student must have an overall grade-point average of 2.0 or better in all courses taken at the University.

In addition to the core IT requirements, each student must complete a complementary set of courses in a particular domain outside of IT to which the student’s IT skills can be applied. This set of courses can be completed in one of the following ways:

1. An approved minor**;
2. A second major or UNH dual degree.

University of New Hampshire
**A list of preapproved minors is available from the CS Department and requires at least (5) courses to complete.**

### Degree Plan

The following is a sample schedule depicting the necessary requirements and the layout of the curriculum. Students must consult with their advisers in order to come up with the proper schedule for themselves.

### Student Learning Outcomes

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program’s discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
- Identify and analyze user needs and to take them into account in the selection, creation, integration, evaluation, and administration of computing-based systems.
- Self-learning skills, exposure to technologies new to the students, practice in understanding those technologies on their own.

### Information Technology Minor

https://ceps.unh.edu/computer-science/program/minor/information-technology

### Description

The information technology (IT) minor is a way for students in non-technical majors to bridge the gap between a primarily non-technical education and a technical world. Graduates from a variety of fields are discovering that there is a great need to have computer competency in addition to the knowledge they gain in their major; the IT minor, which is tailored to grow students’ understanding of computer and information technology applications, helps prepare students for the future.

### Requirements

Students who minor in IT must complete a minimum of 20 credits of IT courses.
Credit toward the minor will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean (of the student’s major college) to have the minor shown on their academic record. Students must consult with their major advisor and also the minor coordinator.

The Department of Earth Sciences also offers a minor in Earth Sciences, as well as an interdisciplinary minor in oceanography.

Descriptions and requirements for the majors and minors are arranged alphabetically.

https://ceps.unh.edu/earth-sciences

**Programs**

- Earth Sciences Major (B.A.) (p. 95)
- Earth Sciences Major (B.S.) (p. 97)
- Earth Sciences Minor (p. 101)
- Environmental Sciences Major: Geosystems Option (B.S.) (p. 101)
- Environmental Sciences Major: Hydrology Option (B.S.) (p. 104)
- Oceanography Minor (p. 106)

**Faculty**

https://ceps.unh.edu/earth-sciences/faculty-staff-directory

**Earth Sciences Major (B.A.)**

https://ceps.unh.edu/earth-sciences/program/BA/earth-sciences-major

**Description**

The bachelor of arts in Earth sciences is offered through the Department of Earth Sciences. This program provides students an opportunity to obtain a broad education and a general background in the Earth sciences with a greater degree of freedom in choosing electives than in the bachelor of science programs. Through careful choice of electives, students can prepare for business, industry, public service, the nonprofit sector, graduate school or, in combination with a M.Ed. or M.A.T. certification program, a career teaching in secondary schools.

**Requirements**

**Degree Requirements**

- Minimum Credit Requirement: 128 credits
- Minimum Residency Requirement: 32 credits must be taken at UNH
- Minimum GPA: 2.0 required for conferral*
- Core Curriculum Required: Discovery & Writing Program Requirements
- Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Capstone

Total Credits  39-44

1 Note that ESCI 401 Dynamic Earth, ESCI 402 Earth History, ESCI 405 Global Environmental Change, ESCI 409 Geology and the Environment, ESCI 420 Our Solar System, ESCI 501 Introduction to Oceanography cannot be taken to fulfill Discovery Program requirements for majors in the Department of Earth Sciences.

It is strongly advised that students complete, as early as possible, a year each of college chemistry and physics.

Capstone Experience

A capstone experience is required of all undergraduate Earth sciences majors during their senior year. All capstone experiences at UNH must meet one or more of the following criteria:

1. The capstone synthesizes and applies disciplinary knowledge and skills.
2. The capstone fosters reflection on undergraduate learning and experience.
3. The capstone demonstrates emerging professional competencies.
4. The capstone applies, analyzes, and/or interprets research or data or artistic expression.
5. The capstone explores areas of interest based on the integration of prior learning.

Suggested ways of meeting the capstone requirement in the Department of Earth Sciences include approved INCO 790 Advanced Research Experience, ESCI 795 Topics/ESCI 796 Topics field courses, ESCI 799 Senior Thesis, URA/SURF/IROP projects, internships, environmental/geologic field camps, REU programs, or Earth Sciences education and outreach activities designed according to the above criteria. Capstone experiences must be equivalent to a minimum of 2 academic credits. Students should work closely with their faculty advisors to define the most appropriate capstone experience for their Earth Sciences degree program, although the capstone mentor can be someone other than their primary faculty advisor. All capstone experiences must be approved and certified by the faculty advisor and the capstone mentor. Presentation of projects or experiences developed for the capstone is encouraged at the annual UNH Undergraduate Research Conference or other appropriate venue.

Credits  16
One course must be taken in each of the remaining Disciplinary Groups of the University Discovery Program (Biological Sciences; Environment Technology & Society; Historical Perspectives; World Culture; Fine & Performing Arts; Social Science; Humanities).

The foreign language requirement may be fulfilled by a full year (8 UNH credits or equivalent) elementary course in any foreign language including American Sign Language, 1 semester (4 UNH credits or equivalent) of any foreign language beyond the elementary level, or by taking a College Board foreign language achievement test.

Students should consider additional courses in Earth Sciences and other science and math courses.

**Student Learning Outcomes**

- Recognize common Earth materials and structures.
- Describe how Earth scientists construct the geological time scale and apply geochronologic dating techniques.
- Describe the broad attributes of and interactions within the Earth System, as well as its geological history, how and why it is changing today, and how these changes impact society.
- Understand Earth processes and cycles.
- Perform simple calculations to process and evaluate quantitative Earth science data.
- Interpret a geologic map and cross section in terms of the sequence of geologic events and understand the processes that caused those events.
- Collect, interpret, and synthesize basic field observations and measurements to develop and test multiple working hypotheses to explain them.
- Become proficient in basic geological and Earth science laboratory skills.
- Describe the basic dynamics governing the evolution of the Earth’s climate.
- Successfully apply basic calculus and chemistry to Earth science problems.
- Effectively communicate results of scientific inquiries orally, visually, and in writing.

**Earth Sciences Major (B.S.)**

https://ceps.unh.edu/earth-sciences/program-bs/earth-sciences-major

**Description**

The bachelor of science in Earth sciences is offered through the Department of Earth Sciences. The program represents a strong concentration in the Earth sciences, built upon a solid formation in mathematics, physics and chemistry. The B.S. degree is especially well-suited for students who wish a strong foundation for secondary teaching or plan to continue their studies in graduate school. Beyond a central core of courses, there are several possible specializations (climate, geology, geophysics, oceanography) from which students must choose in order to develop depth in a particular area of Earth sciences. Students are encouraged to participate in research, field or internship experiences to round out their experiences in the degree program.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

<table>
<thead>
<tr>

**Core Curriculum**

ESCI 401    | Dynamic Earth                                      | 4       |

or ESCI 409 | Geology and the Environment                       | 4       |

ESCI 402    | Earth History                                      | 4       |

ESCI 501    | Introduction to Oceanography                       | 4       |

ESCI 512    | Principles of Mineralogy                           | 4       |

ESCI 530    | Geological Field Methods                           | 4       |

or ESCI 534 | Techniques in Environmental Sciences               | 4       |

Select one of the following:

- ESCI 654  | Fate and Transport in the Environment              | 4       |

- ESCI 701  | Quantitative Methods in Earth Sciences             | 4       |

**Specializations**

Select one of the following approved specializations:

- Climate

- Geology

- Geophysics

- Oceanography

- Science/Math Electives

Complete three additional approved science/math electives

**Capstone**

Complete the capstone requirement

**Total Credits**

1 Some of these courses may also satisfy Discovery Program requirements.

2 Or CHEM 405 Chemical Principles for Engineers if applicable

3 ESCI 530 Geological Field Methods is required for the geology and geophysics specializations

4 Geophysics track must select ESCI 701 Quantitative Methods in Earth Sciences

5 The following should be considered: additional 700-level Earth sciences courses; additional chemistry, mathematics, and physics courses; courses in computer science, engineering, and the biological sciences; and an off-campus field camp.

**Capstone Experience**

A capstone experience is required of all undergraduate Earth sciences majors during their senior year. All capstone experiences at UNH must meet one or more of the following criteria:

1. The capstone synthesizes and applies disciplinary knowledge and skills.
2. The capstone fosters reflection on undergraduate learning and experience.
3. The capstone demonstrates emerging professional competencies.
4. The capstone applies, analyzes, and/or interprets research or data or artistic expression.
5. The capstone explores areas of interest based on the integration of prior learning.

Suggested ways of meeting the capstone requirement in the Department of Earth Sciences include approved INCO 790 Advanced Research Experience, ESCI 795 Topics/ESCI 796 Topics, ESCI 799 Senior Thesis, URA/SURF/ IROP projects, internships, environmental/geologic field camps, REU programs, or Earth Sciences education and outreach activities designed according to the above criteria. Capstone experiences must be equivalent to a minimum of 2 academic credits. Students should work closely with their faculty advisors to define the most appropriate capstone experience for their Earth Sciences degree program, although the capstone mentor can be someone other than their primary faculty advisor. All capstone experiences must be approved and certified by the faculty advisor and the capstone mentor. Presentation of projects or experiences developed for the capstone is encouraged at the annual UNH Undergraduate Research Conference or other appropriate venue.

Earth Sciences Minor

https://ceps.unh.edu/earth-sciences/program/minor/earth-sciences

Description

The Department of Earth Sciences offers a minor in Earth Sciences available to all University students. The Earth Sciences minor provides an opportunity for students to complement their major field of study with foundational knowledge and essential skills in the geosciences.

Interested students should contact the Department of Earth Sciences (earth.sciences@unh.edu) to arrange to complete an Intent to Minor form no later than their junior year. Forms can be picked up in the Earth Sciences main office, 214 James Hall.

Requirements

- The minor consists of at least 20 semester hours of credit.
- A grade of C- or better must be earned in each course, and an overall 2.00 grade point average must be maintained for all courses applied toward the minor.
- Courses taken on a pass/fail basis may not be used for the minor.

Student Learning Outcomes

- Recognize common Earth materials and structures.
- Describe how Earth scientists construct the geological time scale and apply geochronologic dating techniques.
- Describe the broad attributes of and interactions within the Earth System, as well as its geological history, how and why it is changing today, and how those changes impact society.
- Understanding Earth processes and cycles.
- Perform simple calculations to process and evaluate quantitative Earth science data.
- Collect, interpret, and synthesize basic field observations and measurements to develop and test multiple working hypotheses to explain them.
- Become proficient in basic geological and Earth science laboratory skills.
- Successfully apply basic calculus and chemistry to Earth science problems.
- Summarize, analyze, and evaluate student-generated scientific data and the primary Earth sciences literature.
- Effectively communicate results of scientific inquiries orally, visually, and in writing.

Environmental Sciences Major: Geosystems Option (B.S.)

https://ceps.unh.edu/earth-sciences/program/bs/environmental-sciences-major-geosystems-option

Description

The College of Engineering and Physical Sciences (CEPS) and the College of Life Science and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.
The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soils and watersheds options are both managed by the Department of Natural Resources and the Environment in the COLSA. The geosystems option provides students with a solid grounding in quantitative reasoning, with an emphasis on geochemical and geospatial systems.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

In addition to the Discovery Program and University writing requirements, all students will take two required introductory courses, plus one other elective introductory environmental science course. Foundation courses include introductions to biology, physics, chemistry, geology, calculus, and statistics.

Some students enroll in the EcoQuest program (a study abroad opportunity in New Zealand), which satisfies the policy requirement, and capstone requirement if taken senior year.

Students must complete additional courses for the geosystems option to total 88 credits in the major.

For a list of approved elective courses and for further information about the geosystems option, students may contact earth.sciences@unh.edu.

Capstone Experience

A capstone experience is required of all undergraduate Earth sciences majors during their senior year. All capstone experiences at UNH must meet one or more of the following criteria:

1. The capstone synthesizes and applies disciplinary knowledge and skills.
2. The capstone fosters reflection on undergraduate learning and experience.
3. The capstone demonstrates emerging professional competencies.
4. The capstone applies, analyzes, and/or interprets research or data or artistic expression.
5. The capstone explores areas of interest based on the integration of prior learning.
Suggested ways of meeting the capstone requirement in the Department of Earth Sciences include approved INCO 790 Advanced Research Experience, ESCI 795 Topics, ESCI 796 Topics, ESCI 799 Senior Thesis, URA/SURF/IROP projects, internships, environmental/geologic field camps, REU programs, or Earth Sciences education and outreach activities designed according to the above criteria. Capstone experiences must be equivalent to a minimum of 2 academic credits. Students should work closely with their faculty advisors to define the most appropriate capstone experience for their Earth Sciences degree program, although the capstone mentor can be someone other than their primary faculty advisor. All capstone experiences must be approved and certified by the faculty advisor and the capstone mentor. Presentation of projects or experiences developed for the capstone is encouraged at the annual UNH Undergraduate Research Conference or other appropriate venue.

| **Total Credits** | | 128 |

1 One course must be taken in each of the remaining Disciplinary Groups of the University Discovery Program (Environment Technology & Society; Historical Perspectives; World Culture; Fine & Performing Arts; Social Science; Humanities).

2 Three technical electives must be approved in consultation with departmental advisor. All students must take four writing intensive courses, including ENGL 401, a course in the major, and a course at the 600/700 level.

**Student Learning Outcomes**

- Recognize common Earth and environmental materials.
- Understand the Earth as a system and be able to describe the broad attributes of and interactions within the Earth System and the environment through both short- and long-term perspectives, evaluate how and why it is changing today, and assess coupled human and natural system interactions.
- Understand Earth processes and cycles.
- Perform field measurements and simple calculations to collect, evaluate and interpret quantitative environmental or geological data. Understand the role that spatially explicit data and time series play in understanding environmental and hydrological sciences.
- Collect, interpret, and synthesize basic field observations and measurements to develop and test multiple working hypotheses to explain them. Additionally, become comfortable with the use of
technology and computational methods in processing a range of scientific data.

- Analyze, summarize, evaluate, and explain/present their own scientific data and the primary Earth and environmental sciences literature.
- Communicate results of scientific inquiries orally, visually, and in writing.

**Environmental Sciences Major: Hydrology Option (B.S.)**

[https://ceps.unh.edu/earth-sciences/program/bs/environmental-sciences-major-hydrology-option](https://ceps.unh.edu/earth-sciences/program/bs/environmental-sciences-major-hydrology-option)

**Description**

The College of Engineering and Physical Sciences (CEPS) and the College of Life Science and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, geospatial science, ecosystem science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include: environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.

The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soils and watersheds options are both managed by the Department of Natural Resources and the Environment in the COLSA. The hydrology option provides students with a solid grounding in fundamental hydrological principles and quantitative reasoning.

Capstone Requirement

- Students must complete additional courses for the hydrology option to total 88 credits in the major.

For further information about the hydrology option or to discuss alternative elective courses, students may contact earth.sciences@unh.edu. (earth.sciences@unh.edu)

Capstone Experience

A capstone experience is required of all undergraduate Earth sciences majors during their senior year. All capstone experiences at UNH must meet one or more of the following criteria:

1. The capstone synthesizes and applies disciplinary knowledge and skills.
2. The capstone fosters reflection on undergraduate learning and experience.
3. The capstone demonstrates emerging professional competencies.
4. The capstone applies, analyzes, and/or interprets research or data or artistic expression.
5. The capstone explores areas of interest based on the integration of prior learning.

Suggested ways of meeting the capstone requirement in the Department of Earth Sciences include approved INCO 790 Advanced Research Experience, ESCI 795 Topics/ESCI 796 Topics, ESCI 799 Senior Thesis, URA/SURF/IROP projects, internships, environmental/geologic field camps, REU programs, or Earth Sciences education and outreach activities designed according to the above criteria. Capstone experiences must be equivalent to a minimum of 2 academic credits. Students should work closely with their faculty advisors to define the most appropriate capstone experience for their Earth Sciences degree program, although the capstone mentor can be someone other than their primary faculty advisor. All capstone experiences must be approved and certified by the faculty advisor and the capstone mentor. Presentation of projects or experiences developed for the capstone is encouraged at the annual UNH Undergraduate Research Conference or other appropriate venue.

Approved Science Elective  4
Free Elective  4
Discovery Discipline Course  1  4
Credits  16
Total Credits  128-129

1 One course must be taken in each of the remaining Disciplinary Groups of the University Discovery Program (Environment Technology & Society; Historical Perspectives; World Culture; Fine & Performing Arts; Social Science; Humanities).

2 Three technical electives must be approved in consultation with departmental advisor.

All students must take four writing intensive courses, including ENGL 401, a course in the major, and a course at the 600/700 level.

Student Learning Outcomes

• Recognize common Earth and environmental materials.
• Understand the Earth as a system and be able to describe the broad attributes of and interactions within the Earth System and the environment through both short- and long-term perspectives, evaluate how and why it is changing today, and assess coupled human and natural system interactions.
• Understand Earth processes and cycles.
• Demonstrate knowledge of core concepts in the hydrologic sciences: stream flow, groundwater, water budgets, hydrologic fluxes, and physical factors that affect them, and a basic understanding of the uses and limitations of a hydrologic model.
• Perform field measurements and simple calculations to collect, evaluate and interpret quantitative environmental or geological data. Understand the role that spatially explicit data and time series play in understanding environmental and hydrological sciences.
• Collect, interpret, and synthesize basic field observations and measurements to develop and test multiple working hypotheses to explain them. Additionally, become comfortable with the use of technology and computational methods in processing a range of scientific data.
• Analyze, summarize, evaluate, and explain/present their own scientific data and the primary Earth and environmental sciences literature.
• Communicate results of scientific inquiries orally, visually, and in writing.

Oceanography Minor

https://ceps.unh.edu/earth-sciences/program/minor/oceanography

Description

The minor in oceanography is available to students interested in obtaining a broad background in oceanography. All courses in the program are selected in consultation with the oceanography minor adviser, Dr. Jamie Pringle, (603) 862-5000, jpringle@unh.edu. Students must complete an Intent to Minor form no later than their junior year. Forms can be picked up in the Earth Sciences departmental office, 214 James Hall.

Requirements

The minor consists of a minimum of five courses with grades of C (2.00) or better and no pass/fail courses. No more than 8 major requirement credits may be used.

Electrical and Computer Engineering

The Department of Electrical and Computer Engineering offers a B.S. in electrical engineering and a B.S. in computer engineering. Both degree programs are accredited by the:

Engineering Accreditation Commission of ABET
415 N. Charles Street
Baltimore, MD 21201
Telephone (410) 347-7700

Electrical engineers design, develop, and produce the electrical and electronic systems upon which modern society has come to depend: basic infrastructure, such as the electric power grid and fiber optic communication lines; public conveniences, such as mag lev transporters and LED signs; consumer products, such as smart appliances; personal communication devices, such as smart phones; military systems, such as rail guns and laser weapons; instruments that can image the ocean floor or analyze the Earth’s atmosphere from satellites; and medical diagnostic machines like CAT and MRI scanners. Almost every facet of modern life is touched by the work of electrical engineers. Students electing this major gain knowledge of advanced electronic circuit and system design through the use of computer-aided design tools, hardware circuit prototyping, and hands-on laboratory testing.

Computers have become embedded in virtually every engineering system, including everyday items ranging from smart watches to electric vehicles. Computer engineering, is a rapidly growing field that emphasizes the design, interfacing, hardware/software tradeoffs, real-time applications of embedded computers, and IoT devices. Students who elect this major will gain a knowledge of both hardware and software concepts, and will learn to design, build, and test systems containing digital computers.

Embedded in both the electrical engineering and computer engineering programs is the biomedical engineering option. The option provides core knowledge expected of a computer and/or electrical engineer to provide engineering services in the biomedical field. Electrical and/or computer engineers with this option combine engineering principles with medical and biological sciences to design and create equipment, devices, computer systems, and software applications used in the healthcare field.

At UNH, the cornerstone of the electrical and computer engineering programs are the involvement of students in the solution of real-world problems.

ECE Department Mission

The mission of the department is to foster and advance knowledge in electrical and computer engineering.

The mission involves:

- teaching courses in electrical and computer engineering and related fields at the bachelor’s, master’s, and doctoral levels;
- advancing knowledge through research and scholarship;
- serving the state and nation by making the department’s intellectual resources available to industry and government agencies. The undergraduate EE and CE programs shall provide a firm foundation in electrical and computer engineering theory and practice, with a mix of laboratory and design experiences. The programs also shall foster teamwork and project management skills.

The graduate ECE program shall lead to the degrees of master of science in electrical and computer engineering and the doctor of philosophy in electrical and computer engineering. Research and scholarship are core components of the department’s mission and they directly impact undergraduate and graduate education. Success in obtaining funds to procure equipment and support research efforts is therefore an essential objective for the department.

The department recognizes the need to conduct periodic reviews and adjustments to meet the current and projected needs of the state and nation according to its mission objectives.

Electrical Engineering and Computer Engineering Program Educational Objectives

The Department of Electrical and Computer Engineering has adopted a set of program educational objectives that consists of statements describing the expected accomplishments of graduates during the first several years following graduation from either program:

Electrical Engineering Program Educational Objectives

Depth: To be effective in applying electrical engineering principles in engineering practice or for advanced study in electrical engineering.
Breadth: To have a productive career in the many diverse fields of electrical engineering such as analog engineering, bioengineering, communications, and electromagnetics and waves, or in the pursuit of graduate education in disciplines such as electrical engineering, medicine, law, or business.

Professionalism: To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

Computer Engineering Program Educational Objectives

Depth: To be effective in applying computer engineering principles in engineering practice or for advanced study in computer engineering.

Breadth: To have a productive career in the many diverse fields of computer engineering such as digital engineering, bioengineering, security, communications, and embedded systems, or in the pursuit of graduate education in disciplines such as computer engineering, medicine, law, or business.

Professionalism: To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

The department recognizes the need to conduct periodic reviews and adjustments to our educational objectives.

Electrical Engineering and Computer Engineering Program Educational Outcomes

The Department of Electrical and Computer Engineering has adopted a set of program educational outcomes that consists of statements describing what students are expected to know and be able to do by the time of graduation, the achievement of which indicates that the student is equipped to achieve the program objectives. The current program educational outcomes are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The department recognizes the need to conduct periodic reviews and adjustments to our educational outcomes.

Students contemplating a decision between the electrical engineering and computer engineering degree programs should consider both the similarities and differences of the two programs. The two curricula EE and CE are identical for the first two years of either program requiring the same foundational courses.

- Electrical and Computer Engineering Minor (p. 115)

Faculty

Electrical and Computer Engineering Faculty

Computer Engineering Major (B.S.)

https://ceps.unh.edu/electrical-computer-engineering/program/bs/computer-engineering-major

Description

This program is tailored to students who want to understand and participate in the engineering discipline that merges electronics systems with software. Students learn the fundamental concepts of electrical circuits and how those circuits can be controlled by software, gaining skills and technological expertise needed to succeed in graduate studies or a variety of career fields.

In addition to the university’s mandatory Discovery Program requirements, degree candidates must complete our core program (freshman through junior years). In the senior year, students select professional technical electives in the areas of their interest. They also carry out a student-designed project to acquire both breadth and depth of study and to integrate knowledge across course boundaries.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.
Major Requirements

In addition to Discovery Program requirements, the department has a number of grade-point average and course requirements:

1. Any computer engineering major whose cumulative grade-point average in ECE and CS courses is less than 2.0 during any three semesters will not be allowed to continue as a computer engineering major.

2. Computer engineering majors must achieve a 2.0 grade-point average in all ECE and CS courses as a requirement for graduation.

To make an exception to any of these departmental requirements based on extenuating circumstances, students must petition the department’s undergraduate committee. Mindful of these rules, students, with their adviser’s assistance, should plan their programs based on the distribution of courses found in the Degree Plan tab.

Spring

ECE 792 Senior Project II 3
Two Professional Electives 2 8
Discovery Program Category 4

Credits 15

Total Credits 125

1 Students are required to take either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives to fulfill the Social Science Category of the Discovery Program.

2 Four professional electives must be selected as follows:
• Choose two ECE 7XX courses, one course could be ECE 652 Electronic Design II.
• Students are allowed to take only one as ECE 795 Electrical and Computer Engineering Projects or ECE 796 Special Topics.
• Remaining professional electives can include: CS 619 Introduction to Object-Oriented Design and Development, CS 620 Operating System Fundamentals, CS 659 Introduction to the Theory of Computation, or any CS 7XX course.

ECE 791 Senior Project I and ECE 792 Senior Project II fulfill Discovery Program Capstone Experience.

Fulfilling the CE program curriculum taking ECE 401, ECE 791, and ECE 792 will automatically meet Discovery Category, “Environment, Technology and Society.”

**Student Learning Outcomes**

The Program Educational Objectives for the Computer Engineering Program are as follows:

• An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
• An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
• An ability to communicate effectively with a range of audiences.
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

**Computer Engineering Major: Biomedical Engineering Option (B.S.)**

https://ceps.unh.edu/electrical-computer-engineering/program/bsceng/computer-engineering-biomedical-engineering-option

**Description**

The Biomedical Engineering (BME) Option is intended to provide the core of knowledge expected of a computer and/or electrical engineer to provide engineering services in the biomedical field. Electrical and/or computer engineers with this option in biomedical engineering combine engineering principles with medical and biological sciences to design and create equipment, devices, computer systems, and software used in healthcare. The BME option is embedded in both the Electrical Engineering (EE) program and the Computer Engineering (CE) program.

**Degree Requirements**

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

In addition to Discovery Program requirements, the department has a number of grade-point average and course requirements:

1. Any computer engineering major whose cumulative grade-point average in ECE and CS courses is less than 2.0 during any three semesters will not be allowed to continue as a computer engineering major.
2. Computer engineering majors must achieve a 2.0 grade-point average in all ECE and CS courses as a requirement for graduation.

To make an exception to any of these departmental requirements based on extenuating circumstances, students must petition the department’s undergraduate committee. Mindful of these rules, students, with their adviser’s assistance, should plan their programs based on the distribution of courses found in the Degree Plan tab.

Total Credits 129

1 Students are required to take either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives to fulfill the Social Science Category of the Discovery Program.

2 Four professional electives must be selected as follows:
   • Choose any of four ECE 7XX courses
   • Students are allowed to take only one ECE 795 Electrical and Computer Engineering Projects or ECE 796 Special Topics

3 ECE 791 Senior Project I and ECE 792 Senior Project II fulfill Discovery Program Capstone Experience.

Fulfilling the EE Program curriculum taking ECE 401, ECE 791, and ECE 792 will automatically meet Discovery Category, “Environment, Technology and Society.”

Student Learning Outcomes

The Program Educational Objectives for the Electrical Engineering Program are as follows:

• An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
• An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
• An ability to communicate effectively with a range of audiences.
• An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
• An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Electrical Engineering Major: Biomedical Engineering Option (B.S.)
https://ceps.unh.edu/electrical-computer-engineering/program/bsee/electrical-engineering-biomedical-engineering-option

Description

The Biomedical Engineering (BME) Option is intended to provide the core of knowledge expected of a computer and/or electrical engineer to provide engineering services in the biomedical field. Electrical and/or computer engineers with this option in biomedical engineering combine engineering principles with medical and biological sciences to design and create equipment, devices, computer systems, and software used in healthcare. The BME option is embedded in both the Electrical Engineering (EE) program and the Computer Engineering (CE) program.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements

In addition to Discovery Program requirements, the department has a number of grade-point average and course requirements.

1. Any electrical engineering major whose cumulative grade-point average in ECE courses is less than 2.0 during any three semesters will not be allowed to continue as an electrical engineering major.
2. Electrical engineering majors must achieve a 2.0 grade-point average in all ECE and CS courses as a requirement for graduation.

To make an exception to any of these departmental requirements based on extenuating circumstances, students must petition the department's undergraduate committee. Mindful of these rules, students, with their adviser's assistance, should plan their programs based on the distribution of courses found in the Degree Plan tab.

**Student Learning Outcomes**

The Program Educational Objectives for the Electrical Engineering Program are as follows:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### Electrical and Computer Engineering Minor

**Description**

The Department of Electrical and Computer Engineering encourages highly motivated students outside of the ECE department are encouraged to consider a minor in Electrical and Computer Engineering. A university-wide GPA of at least 2.8 is required along with an appropriate reason for desiring the minor. Interested students should complete the provided application form and submit it to the ECE Undergraduate Curriculum Committee (Kingsbury W201) during their sophomore or, at the latest, junior year. After approval, the student will need to fill out an “Intent to Minor” form, available from the Associate Dean’s office (Kingsbury W283) in order to make entry into the minor program official. It is also the
student’s responsibility to submit a "Minor Certification of Completion" form before graduation and after all the minor courses have been taken. The ECE Minor Application Form can be downloaded here.

For additional information please contact the ECE Department. Our ECE Minor Faculty Advisor will be happy to answer any questions and help you select courses that best fit your career goals.

Requirements

Requirements for the ECE Minor:

1. You must take a minimum of five ECE courses (at least 18 credits), each with a grade of C- or better.

2. You must achieve at least an overall 2.0 average in all courses taken for the minor.

3. Courses taken credit/fail may not be used for the minor.

4. No more than eight credits of courses used by the student to satisfy major requirements may be used for the ECE minor.

5. No more than two courses completed prior to acceptance into the ECE minor may be counted toward the minor.

Environmental Sciences

The College of Engineering and Physical Sciences (CEPS) and the College of Life Sciences and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.

The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soil and watershed management options are both managed by the Department of Natural Resources and the Environment in COLSA.

https://ceps.unh.edu/earth-sciences

Programs

• Environmental Sciences Major: Ecosystems Option (B.S.) (p. 352)
• Environmental Sciences Major: Geosystems Option (B.S.) (p. 101)
• Environmental Sciences Major: Hydrology Option (B.S.) (p. 104)
• Environmental Sciences Major: Soil and Watersheds Option (B.S.) (p. 353)

CEPS faculty: https://ceps.unh.edu/directory/all

Materials Science

Materials Science Minor

https://ceps.unh.edu/materials-science/program/minor/materials-science

Requirements

To complete the minor in materials science, students must take the following courses.

Materials Science Minor (p. 116)
Students must complete at least 18 credits and a minimum of five courses, as described below, with C- or better and a minimum 2.0 grade-point average. No more than 8 credits used to satisfy the student’s major requirements may be used toward the minor.

</tbody>
</table>

1 It is strongly recommended that students take this course during their sophomore year.
2 Students cannot receive credit towards the minor for both PHYS 508 Thermodynamics and Statistical Mechanics and CHEM 683 Physical Chemistry I/ CHEM 685 Physical Chemistry Laboratory.
3 Students cannot receive credit towards the minor for PHYS 508 Thermodynamics and Statistical Mechanics if they have taken ME 503 Thermodynamics.
4 As needed to reach the required 18 credits

Mathematics and Statistics

The Department of Mathematics and Statistics offers a variety of programs leading to five different degrees:

- **B.A. degree:** mathematics major;
- **B.S. in mathematics degree:**
- **B.S. in applied mathematics degree:**
- **B.S. in mathematics education degree:**
- **B.S. in statistics degree:**

These programs provide flexibility through elective choices and are designed to maximize educational and employment opportunities. Each student must enroll in one specific program; however, changes between programs usually can be accommodated.

The first two years of all programs are similar. In the first year, students are expected to take MATH 425 Calculus I and MATH 426 Calculus II, as well as an introductory programming course (either MATH 445 Mathematics and Applications with MATLAB or CS 410C Introduction to Scientific Programming/C or CS 410P Introduction to Scientific Programming/Python). A sophomore typically takes follow-up calculus courses in MATH 527 Differential Equations with Linear Algebra and MATH 528 Multidimensional Calculus, MATH 539 Introduction to Statistical Analysis, and MATH 531 Mathematical Proof. The senior capstone experience is fulfilled by a variety of designated courses in each of the degree programs; specific details are given in each program’s course listing below.

For more information about the department’s undergraduate programs, visit [http://ceps.unh.edu/mathematics-statistics](http://ceps.unh.edu/mathematics-statistics)

**Standards for Graduation**

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

**Minoring in Mathematics**

The Department of Mathematics and Statistics offers three minor programs: mathematics, applied mathematics, and statistics. These programs, which are open to all students enrolled at the University, require a minimum of five MATH courses as detailed below. Students whose major program requires more than two courses required by the minor program must substitute additional courses from the list of elective courses to meet the five-course minimum.

[https://ceps.unh.edu/mathematics-statistics](https://ceps.unh.edu/mathematics-statistics)

**Programs**

- **Applied Mathematics Major (B.S.)** (p. 117)
- **Applied Mathematics Major: Computation Option (B.S.)** (p. 119)
- **Applied Mathematics Major: Dynamics and Control Option (B.S.)** (p. 120)
- **Applied Mathematics Major: Economics Option (B.S.)** (p. 122)
- **Applied Mathematics Major: Fluid Dynamics Option (B.S.)** (p. 123)
- **Applied Mathematics Major: Solid Mechanics and Vibrations Option (B.S.)** (p. 124)
- **Mathematics Education Major: Elementary/Middle School K-8 Option (B.S.)** (p. 126)
- **Mathematics Education Major: Secondary Option (B.S.)** (p. 128)
- **Mathematics Major (B.A.)** (p. 129)
- **Mathematics Major (B.S.)** (p. 130)
- **Statistics Major (B.S.)** (p. 132)
- **Applied Mathematics Minor** (p. 133)
- **Mathematics Minor** (p. 133)
- **Statistics Minor** (p. 134)

**Faculty**

Visit https://ceps.unh.edu/directory/all for faculty.

**Applied Mathematics Major (B.S.)**

**Description**

This degree prepares students for careers in science, engineering, and industry by giving students broad exposure to both theoretical and computational models of physical systems in the physical, natural, and social sciences.
Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

Student Learning Outcomes

- Students recognize common mathematical notations and operations used in mathematics, science and engineering.
- Students can recognize and classify a variety of mathematical models including differential equations, linear and nonlinear systems of algebraic equations, and common probability distributions.
- Students have developed a working knowledge (including notation, terminology, foundational principles of the discipline, and standard mathematical models within the discipline) in at least one discipline outside of mathematics.
- Students are able to extract useful knowledge, both quantitative and qualitative, from mathematical models and can apply that knowledge to the relevant discipline.

Applied Mathematics Major: Computation Option (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/applied-mathematics-computation-option

Description

This degree program prepares students for employment and/or graduate study in a variety of fields and research specializations in which mathematics plays a critical role in the solution of important scientific and technological problems.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

- Students recognize common mathematical notations and operations used in mathematics, science and engineering.
- Students can recognize and classify a variety of mathematical models including differential equations, linear and nonlinear systems of algebraic equations, and common probability distributions.
- Students have developed a working knowledge (including notation, terminology, foundational principles of the discipline, and standard mathematical models within the discipline) in at least one discipline outside of mathematics.
- Students are able to extract useful knowledge, both quantitative and qualitative, from mathematical models and can apply that knowledge to the relevant discipline.

Applied Mathematics Major: Solid Mechanics and Vibrations Option (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/applied-mathematics-solid-mechanics-vibrations-option

Description

Beginning in the 2022/23 academic year, the Applied Mathematics Major: Solid Mechanics and Vibrations option will no longer be accepting new
students. Current students will continue to have access to the same high-quality education and resources until they graduate.

This degree program prepares students for employment and/or graduate study in a variety of fields and research specializations in which mathematics plays a critical role in the solution of important scientific and technological problems.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

#### Major Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

Student Learning Outcomes

• Students recognize common mathematical notations and operations used in mathematics, science and engineering.
• Students can recognize and classify a variety of mathematical models including differential equations, linear and nonlinear systems of algebraic equations, and common probability distributions.
• Students have developed a working knowledge (including notation, terminology, foundational principles of the discipline, and standard mathematical models within the discipline) in at least one discipline outside of mathematics.
• Students are able to extract useful knowledge, both quantitative and qualitative, from mathematical models and can apply that knowledge to the relevant discipline.

Math Education Major: Elementary/Middle School Education K-8 Option (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/mathematics-education-elementarymiddle-school-option

Description

Beginning in the 2022/23 academic year, the Math Education Major: Elementary/Middle School Education K-8 option will no longer be accepting new students. Current students will continue to have access to the same high-quality education and resources until they graduate.

This professional degree program prepares students for teaching mathematics at the elementary and/or middle school level. The program is coordinated with the education department’s teacher certification programs. For the elementary option, full certification requires the five-year program. Students may complete the degree requirements for middle school option with full teacher certification in either four or five years.

Students electing the four-year option leading to middle school certification must plan for one semester of student teaching in their senior year; this requires careful planning with your program adviser to accommodate the scheduling of required MATH courses.

The five-year program for either option includes a year-long teaching internship in the fifth year. The internship requires admission into a UNH Department of Education graduate program that leads to certification. See Education, College of Liberal Arts.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

For teacher licensure a grade of B- or better is required in all Education courses.

Requirements for admission to student teaching include receiving credit for EDUC 500 and a minimum cumulative 2.8 GPA.

### Student Learning Outcomes

**Mathematics Concepts, Practices, and Curriculum.** Well-prepared beginning teachers of mathematics:

- Demonstrate robust knowledge of mathematical and statistical concepts that underlie what they encounter in teaching of K-8 or secondary mathematics.
- Engage in appropriate mathematical and statistical practices, and use technological tools to solve mathematical problems, and incorporate educational technology in their teaching.
- Analyze and interpret mathematical curricula, assessments, and standards documents.
- Analyze and interpret students' mathematical work.

**Pedagogical Knowledge and Practices for Teaching Mathematics.** Well-prepared beginning teachers of mathematics:

- Demonstrate strong foundations of pedagogical knowledge, and effective and equitable mathematics teaching practices.
- Construct instructional explanations, develop tasks, lesson plans and unit plans, that advance students' mathematical understanding.
• Recognize common patterns of student thinking related to particular mathematical topics, and articulate ways of supporting students’ mathematical thinking.

Productive dispositions. Well-prepared beginning teachers:

• Demonstrate positive and productive dispositions toward mathematics as a discipline, towards students as learners of mathematics and towards teaching mathematics in ways that support students’ sense making, understanding, and reasoning.

Mathematics Education Major: Secondary Education Option (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/mathematics-education-secondary-education-option

Description

This professional degree program prepares students for teaching mathematics at the secondary level. The program is coordinated with the education department’s teacher certification programs. Students may complete the degree requirements for the secondary option with full teacher certification in either four or five years.

Students electing the four-year option leading to secondary school certification must plan for one semester of student teaching in their senior year; this requires careful planning with your program adviser to accommodate the scheduling of required MATH courses.

The five-year program includes a year-long teaching internship in the fifth year. The internship requires admission into a UNH Department of Education graduate program that leads to certification. See Education, College of Liberal Arts.

Graduation Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

For teacher licensure a grade of B- or better is required in all Education courses.

Mathematics Major (B.A.)
https://ceps.unh.edu/mathematics-statistics/program/ba/mathematics

Description

The bachelor of arts degree with the mathematics major may offer a broader liberal arts program than the bachelor of science degree programs. By a careful selection of electives, students can shape this major into a preparation for graduate school, business, or industry.

| Elective Course                                     |                                                   | 4       |
|              | **Credits**                                         | 16                                                 |         |
| **Total Credits**                                    |                                                   | 129      |

## Student Learning Outcomes

- Students can explain core concepts from a range of different branches of mathematics, including analysis, algebra, calculus and statistics.
- Students can correctly interpret mathematical definitions and construct simple proofs which use definitions and logical arguments to establish properties of mathematical objects.
- Students are aware that mathematical objects may have multiple representations and are able to select representations which clarify problems and simplify calculations.
- Students can recognize valid and invalid mathematical arguments.
work in mathematics. Through a judicious choice of electives, students may design stronger pre-graduate programs, a program in applied mathematics, or slant the program toward a career in business or industry.

**Requirements**

**Degree Requirements**

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

Student Learning Outcomes

• Students can explain core concepts from a range of different branches of mathematics, including analysis, algebra, calculus and statistics.
• Students can correctly interpret mathematical definitions and construct simple proofs which use definitions and logical arguments to establish properties of mathematical objects.
• Students are aware that mathematical objects may have multiple representations and are able to select representations which clarify problems and simplify calculations.
• Students can recognize valid and invalid mathematical arguments.

Statistics Major (B.S.)

https://ceps.unh.edu/mathematics-statistics/program/bs/statistics

Description

This program prepares students for employment and/or graduate study in a variety of fields and research specializations in which statistical analysis and its applications play a critical role. In addition to its degree programs, the department has an active interest in the actuarial profession. Those interested in actuarial science should seek the advice of departmental coordinator of the actuarial program, Professor Linyuan Li.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: No
All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

In all courses used to satisfy the requirements for its major programs, the Department of Mathematics and Statistics requires that a student earn a grade of C- or better and have an overall grade-point average of at least 2.00 in these courses.

Code  Title  Credits
Required MATH Courses
MATH 425 Calculus I 4
MATH 426 Calculus II 4
MATH 445 Mathematics and Applications with MATLAB 4
or CS 410P Introduction to Scientific Programming/Python 4
or CS 410C Introduction to Scientific Programming/C 4

• Communicate theoretical foundations and principles of intermediate-level statistics to diverse audiences.

• Design an appropriate method of data collection for a variety of practical applications.

• Perform analyses using the established tools of applied statistics, including production of appropriate software output and its interpretation.

Applied Mathematics Minor
https://ceps.unh.edu/mathematics-statistics/program/minor/applied-mathematics

Description
This minor program introduces students to a variety of fields and research specializations in which mathematics plays a critical role in the solution of important scientific and technological problems.

For further information, please contact the minor coordinator located on the department website.

Requirements
Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean of the student’s major college to have the minor shown on the academic record. Students must consult with their major adviser and also the minor supervisor.

It requires a minimum of five MATH courses as detailed in the minor requirements. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor. Additional courses from the list of course electives may be utilized to meet the five-course minimum.

Mathematics Minor
https://ceps.unh.edu/mathematics-statistics/program/minor/mathematics

Description
The mathematics minor will introduce you to central fields of pure mathematics, such as algebra, analysis and geometry. You’ll be able to
Statistics Minor

https://ceps.unh.edu/mathematics-statistics/program/minor/statistics

Description

The minor in statistics is designed for students in other majors who want to learn the fundamentals of statistical analysis and its applications.

Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean of the student’s major college to have the minor shown on the academic record. Students must consult with their major adviser and also the minor supervisor.

For further information, please contact the minor coordinator located on the department website.

Requirements

The minor requires a minimum of five MATH courses as detailed in the requirements. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor. Additional courses from the list of course electives may be utilized to meet the five-course minimum.

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor.

The minor requires a minimum of five MATH courses as detailed in the minor requirements. Additional courses from the list of course electives may be utilized to meet the five-course minimum.

1. This requirement may be satisfied by MATH 525 Linearity I and MATH 526 Linearity II.

Mechanical Engineering

The Mechanical Engineering Program at UNH is accredited by the:

Engineering Accreditation Commission of ABET, http://www.abet.org

Mission

In support of the University and college missions, the Department of Mechanical Engineering is dedicated to educating the highest quality engineering professionals and leaders. Graduates will be prepared to creatively solve engineering problems through the use of analysis, computation, and experimentation. Students completing the program should be well-informed citizens who have the ability to grow intellectually and are able to solve new, challenging problems with self-confidence. It is the department’s intent to maintain a general and flexible curriculum that prepares students for both industrial practice and graduate education.

Educational Objectives

The objective of the UNH Mechanical Engineering Program is to produce graduates who are ethical professionals and good citizens. As they
progress in the first several years following graduation, they are expected to:

1. Use their engineering education and communication skills for success in:
   a. Technical careers in industry, academia, government, or other organizations;
   b. Graduate school in engineering or physical sciences;
   c. Nontechnical careers or education in areas such as law, medicine, business, public policy, secondary education, service industries, etc.;
   d. Careers involving management or entrepreneurship.
2. Exercise lifelong learning to:
   a. Pursue professional development opportunities in their disciplines;
   b. Develop new knowledge and skills;
   c. Pursue new areas of expertise or careers.
3. Use their engineering background to:
   a. Solve technical problems for societal benefit;
   b. Develop new knowledge and products that will promote sustainable economic and environmental developments to improve the quality of life;
   c. Promote the practice of engineering.

Mechanical engineering is a challenging profession and has two major emphases. The first is the general area of mechanical design, which involves all types of mechanical motion and the forces and energy that drive it. The other emphasis deals with energy generation and conversion and is grounded in the principles of the thermal and fluid sciences. Other subject areas, which support both emphases and are frequently part of designs and products, are the materials sciences, manufacturing, and control systems. All of these areas are included in the education and training of mechanical engineers. Ocean engineering is another focus area in our department which emphasizes solving engineering problems associated with the sustainable utilization of ocean resources and the scientific exploration and study of the ocean environment. Mechanical engineering requires significant study in mathematics, engineering computing, and basic sciences such as chemistry and physics, as well as basic engineering courses, before reaching the more specialized courses. Additional information can be found at the mechanical engineering website.

Mechanical Engineering Major (B.S.)

https://ceps.unh.edu/mechanical-engineering/program/ba/mechanical-engineering-major

Description

The B.S.M.E. curriculum provides students with a solid engineering core and prepares students for professional engineering careers or for graduate study. The department has course sequences in mechanics, thermal/fluid sciences, and systems and controls. Modern experimental methods are taught in a course sequences starting in the junior year. The two-semester senior design project requires students to utilize the skills they have learned in their courses and function in an engineering team. The five technical electives required in the program give the students the opportunity to focus on advanced technical areas of their choice.

With their advisers’ assistance, students should plan a program based on the following distribution of courses that totals not less than 128 credits. Note: mechanical engineering graduates typically exceed this requirement depending on what elective courses they select in the curriculum. Within the constraints of satisfying all the requirements and having all the necessary prerequisites, schedules may vary because of scheduling needs or student preference. Curriculum flexibility allows students to pursue a co-op experience or a minor, if interested which will potentially delay graduation. Some mechanical engineering elective courses may not be offered every year.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Grade-Point Average Requirements

In order to graduate with a mechanical engineering B.S. degree, students must have at least a 2.0 grade-point average in all engineering and science courses, including required technical electives, normally taken as department requirements after the start of the junior year as defined in the degree plan below.

Predictor courses: To enter the sophomore year, students must achieve a greater than (but not equal to) 2.00 GPA in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C.

To enter the junior year, students must achieve a minimum GPA of 2.00 in ME 525 Statics, ME 526 Mechanics of Materials, and ME 503 Thermodynamics with only one C- grade allowed and no grades below C-.

Students are allowed two repeats of these predictor courses to achieve the predictor rule requirements before being removed from the Program. This can be a single class repeated twice or two classes repeated once. Students are also removed from the program if they obtain a semester
GPA below 1.5 three times. Students may petition to be reinstated after one year out of the program.

**Technical Elective Requirements**

Of the five technical elective courses, at least three of these courses must be taken in mechanical or ocean engineering, and these must be at least three credits and at the 600 or 700 level. At most, two may be selected from other 600- or 700-level courses in the College of Engineering and Physical Sciences (CEPS), which can include CS 410C Introduction to Scientific Programming/C, CS 410P Introduction to Scientific Programming/Python (equivalent to a 600 level technical elective), ESCI 501 Introduction to Oceanography, ECE 543 Introduction to Digital Systems, or a course approved by the department. Only one technical elective is allowed at the 400 or 500 level. Courses that cover nearly identical material to core mechanical and ocean engineering courses, but in another CEPS department, will not be accepted as technical electives, e.g.,

<table>

</tr>
</tbody>
</table>

Students should consult with their academic advisor before selecting technical electives outside of mechanical/ocean engineering. With departmental approval, the two technical electives outside of mechanical/ocean engineering can be used for studying a focused area/minor, with the restrictions that only one course can be at the 400 or 500 level and the focused area/minor must be in a bachelor’s degree program.

**Discovery Program Requirements**

Students must satisfy the University’s Discovery Program requirements. The following features are unique to students in the Mechanical Engineering Program:

As is the case across the University, all students are required to take an Inquiry course or an Inquiry Attributes course during their first two years. This can be satisfied with ME 441 Introduction to Engineering Design and Solid Modeling. Students who are exempt from ME 441 Introduction to Engineering Design and Solid Modeling due to prior engineering design and computer-aided design (CAD) experience must select an Inquiry 444 course or a course with an Inquiry Attribute and enroll in ME 477 Introduction to Solid Modeling. The Discovery Environment, Technology, and Society category requirement is met upon receiving a B.S. degree in mechanical engineering. The Discovery Social Science category must be satisfied with either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives. The Discovery senior capstone experience is satisfied with either ME 755 Senior Design Project I and ME 756 Senior Design Project II or TECH 797 Undergraduate Ocean Research Project.

**Transfer Policy for UNH Students into the Department of Mechanical Engineering**

**CEPS Students:** To transfer into the freshman or sophomore year, students must earn a combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C in these two courses.

If students are enrolled in ME 525 Statics (or CEE 500 Statics for Civil Engineers), ME 526 Mechanics of Materials (or CEE 501 Strength of Materials), or ME 503 Thermodynamics, they must earn a combined GPA of 2.00 with no grade below a C in two of these courses with only one C– grade allowed to transfer into Mechanical Engineering. Note: A combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C is also required.

**Non-CEPS Students:** To transfer into the Department of Mechanical Engineering from another college at UNH, students have to satisfy the CEPS college transfer policy as well as the Department of Mechanical Engineering transfer policies listed above according to their status.

1 ME 441 Introduction to Engineering Design and Solid Modeling satisfies the Discovery Inquiry requirement. Note: ME 477 does not satisfy the Discovery Inquiry requirement. An alternative Discovery Program Inquiry course or Inquiry Attributes course is required. Permission is required to take ME 477 in place of ME 441.

2 CHEM 405 Chemical Principles for Engineers or CHEM 403 General Chemistry I and CHEM 404 General Chemistry II, or PHYS 407 General Physics I satisfies the Discovery Physical Science (with lab) category.

3 MATH 425 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.

4 ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.

5 MATH 525 Linearity I and MATH 526 Linearity II also counts as a 600 level technical elective course typically completed in the senior year of the program. Permission is required to take Linearity I and II.

6 ME 755, ME 756 and TECH 797 satisfy the Discovery Senior Capstone Experience category.

Student Learning Outcomes

- A. the ability to apply knowledge of mathematics, science and engineering; (objective 1)
- A.1 knowledge of chemistry and calculus-based physics with depth in at least one; (objective 1)
- A.2 the ability to apply advanced mathematics through multivariate calculus and differential equations; (objective 1)
- A.3 a familiarity with statistics and linear algebra; (objective 1)
- B. the ability to design and conduct experiments, as well as to analyze and interpret data; (objective 2)
- C. the ability to design a system, component, or process to meet desired needs; (objective 2)
- C.1 the ability to work professionally in mechanical systems areas including the design and realization of such systems; (objective 2)
- C.2 the ability to work professionally in thermal systems areas including the design and realization of such systems; (objective 2)
- D. the ability to function in multidisciplinary teams; (objective 2 & 3)
- E. the ability to identify, formulate and solve engineering problems; (objective 2)
- F. the understanding of professional and ethical responsibility; (objectives 4 & 6)
- G. the ability to communicate effectively; (objective 2)
- H. the broad education necessary to understand the impact of engineering solutions in a global and societal context; (objective 5)
- I. recognition of the need for and an ability to engage in lifelong learning; (objective 4)
- J. knowledge of contemporary issues; (objective 4)
- K. the ability to use the techniques, skills and modern engineering tools necessary for engineering practice; (objective 2)
Mechanical Engineering Minor
https://ceps.unh.edu/mechanical-engineering/program/minor/mechanical-engineering

Description

The minor, administered by the Department of Mechanical Engineering and offers a broad introduction to mechanical engineering.

Interested students should contact the Mechanical Engineering Chair at (603) 862-1353 and file an intent to minor form. During the last semester, students must complete a completion of minor form for it to appear on their transcript.

Requirements

Students must complete a minimum of six courses as follows:

<table>
<thead>
<tr>
<th>Code</th>

1 Physics Major Required Courses.

2 The total number of credits to complete the Physics Minor will be either 18 or 19 depending on what course is selected.

Ocean Engineering

Mission

The undergraduate program in ocean engineering emphasizes ocean engineering fundamentals while offering interdisciplinary opportunities for focused study in civil, electrical, environmental, or mechanical engineering, as well as marine sciences.

Program Educational Objectives

The ocean engineering program seeks to provide an environment that enables students to pursue their goals in an innovative, rigorous, and challenging program with a diversity of offerings. The program has the following major educational objectives, with the expectation that alumni will have successful careers in the many diverse areas of the ocean engineering profession. Within a few years of obtaining a bachelor’s degree in ocean engineering, we expect our graduates to have the following attributes:

Depth. To be effective in applying ocean engineering principles in engineering practice or for advanced study in ocean engineering.

Breadth. To have a productive career in the many diverse fields of ocean engineering such as coastal engineering, ocean acoustics, offshore structures, and marine renewable energy, or in the pursuit of graduate education in disciplines that include marine science, engineering, medicine, law, or business.

Professionalism. To function effectively in the complex modern work environment with the ability to assume professional leadership roles.

Ocean Engineering Major (B.S.)

https://ceps.unh.edu/ocean-engineering/program/bs/ocean-engineering-major

Description

Ocean engineering is a field of study that seeks to solve engineering problems associated with the ocean, including those problems associated with the sustainable utilization of ocean resources and the scientific exploration and study of the ocean environment. Ocean engineering is an interdisciplinary field with roots in mechanical, electrical, civil, and environmental engineering, with strong ties to physical, chemical, biological, and geological oceanography. Students of ocean engineering are best served when they are formally trained inside a framework that fuses the expertise of these often-disparate fields.
The BSOE curriculum provides students with a solid engineering core and prepares students for professional engineering careers or for graduate study. The BSOE starts with foundational classes in math, physics, chemistry, and engineering computing, along with introductions to ocean engineering through seminars and oceanography coursework. Students develop their engineering acumen through coursework and laboratory studies that are focused on analysis, experimentation, and design. Students proceed to increasingly advanced coursework in ocean instrumentation, waves and tides, the design of ocean structures, coastal engineering, ocean measurements, and ocean acoustics. Opportunities exist for at least four technical electives, which help students gain further competence in an area of their choice. Students finish their curriculum with a two-semester senior capstone design project. Elective courses in the arts, humanities, and the social sciences are included to provide a well-rounded education.

Students work with an advisor to plan a program that is based on the required coursework for the degree. Some ocean engineering elective courses may not be offered every year.

**Requirements**

### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

### Major Requirements

#### Technical Electives

The ocean engineering program curriculum requires four technical electives that are CEPS 600-level or higher courses that have been approved by the OE undergraduate curriculum committee. Sequences have been identified that will provide students more in-depth opportunities in one of the ocean engineering sub-areas. One of the technical electives needs to be a program-approved statistics course (OE 764 Spectral Analysis of Geophysical Time Series Data, MATH 644 Statistics for Engineers and Scientists, or ESCI 701 Quantitative Methods in Earth Sciences).

**Discovery Program**

Students must satisfy the University’s Discovery Program requirements. The following features are unique to students in the Ocean Engineering program: students are required to take an Inquiry course or an Inquiry Attribute course during their first two years. This is satisfied with ESCI 501 Introduction to Oceanography. The Discovery Environment, Technology, and Society category requirement is met upon receiving a B.S. degree in ocean engineering. The Discovery Social Science category must be satisfied with either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives. The Discovery senior capstone experience is satisfied with TECH 797 Undergraduate Ocean Research Project.

**Grade-Point Average**

In order to graduate with an ocean engineering B.S. degree, students must have at least a 2.0 grade-point average in all engineering and science courses, including required technical electives, normally taken as department requirements after the start of the junior year as defined in the degree plan below.

**Predictor courses:** To enter the sophomore year, students must achieve a greater than (but not equal to) 2.00 GPA in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C.

To enter the junior year, students must achieve a minimum GPA of 2.00 in ME 525 Statics, ME 526 Mechanics of Materials, and ME 503 Thermodynamics with only one C-grade allowed and no grades below C.

Students are allowed two repeats of these predictor courses to achieve the predictor rule requirements before being removed from the program. This can be a single class repeated twice or two classes repeated once. Students are also removed from the program if they obtain a semester GPA <1.5 three times. Students may petition to be reinstated after one year out of the program.

**Transfer Policy for UNH Students**

**CEPS Students:** To transfer into the freshman or sophomore year, students must earn a combined GPA greater than (but not equal to) 2.00 in PHYS 407 General Physics I and MATH 426 Calculus II with no grade below a C in these two courses.

If students are enrolled in ME 525 Statics (or CEE 500 Statics for Civil Engineers), ME 526 Mechanics of Materials (or CEE 501 Strength of Materials), or ME 503 Thermodynamics, they must earn a combined GPA of 2.00 with no grade below a C- in two of these courses with only one C-grade allowed to transfer in and advance to the junior year.

**Non-CEPS Students:** To transfer into the Ocean Engineering B.S. from another college at UNH, students have to satisfy the CEPS college transfer policy as well as the Ocean Engineering program transfer policies listed above according to status.

1. MATH 425 Calculus I satisfies the Discovery Foundation Quantitative Reasoning category.
2. PHYS 407 General Physics I or CHEM 405 Chemical Principles for Engineers or CHEM 403 General Chemistry I and CHEM 404 General Chemistry II satisfies the Discovery Physical Science (with lab) category.
3. ENGL 401 First-Year Writing satisfies the Discovery Foundation Writing Skills category.
4. ESCI 501 Introduction to Oceanography satisfies the Discovery Inquiry requirement.
5. MATH 525 Linear I and MATH 526 Linear II may be substituted for MATH 527 Differential Equations with Linear Algebra and MATH 528 Multidimensional Calculus. The MATH 525 and MATH 526 sequence will also count as one Technical Elective.
6. Total technical elective credits must be at 14 credits or higher to meet the UNH required total of 128 credits for graduation.

### Student Learning Outcomes

The Student Outcomes consist of the ABET 1-7 general requirements for all engineering programs with four additional outcomes specific to the Ocean Engineering program which are subsets of (1).

- (1) ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science and math. Knowledge of fluid mechanics and hydrosyistics with depth in at least one. An ability to apply solid mechanics and dynamics through multivariate calculus and differential equations. Knowledge of oceanography, water waves, and underwater acoustics. Ability to apply probability and applied statistics.
• (2) ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors.
• (3) ability to communicate effectively with a range of audiences.
• (4) ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments which must consider the impact of engineering solutions in global, economic, environmental and societal contexts.
• (5) ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
• (6) ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
• (7) ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Ocean Engineering Minor
https://ceps.unh.edu/ocean-engineering/program/minor/ocean-engineering

Description

The ocean engineering minor allows undergraduate engineering students to acquire a nucleus of knowledge about engineering pertaining to the ocean and the coastal zone.

Students wishing to take the ocean engineering minor should indicate their interest to the ocean engineering minor advisor, Tom Lippmann, (603) 862-4450 or t.lippmann@unh.edu no later than the beginning of the junior year and file an intent to minor form. During the final semester, students must complete a completion of minor form for it to appear on their transcript.

Requirements

To meet the University minor requirement, students must satisfactorily complete a minimum of five courses from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESCI 501</td>
<td>Introduction to Oceanography</td>
<td></td>
</tr>
<tr>
<td>ESCI 720</td>
<td>Ocean Measurements Lab</td>
<td></td>
</tr>
<tr>
<td>ESCI 752</td>
<td>Chemical Oceanography</td>
<td></td>
</tr>
<tr>
<td>ESCI 758</td>
<td>Introductory Physical Oceanography</td>
<td></td>
</tr>
<tr>
<td>ESCI 759</td>
<td>Geological Oceanography</td>
<td></td>
</tr>
<tr>
<td>OE 490</td>
<td>Introduction to Ocean Engineering</td>
<td></td>
</tr>
<tr>
<td>OE 754</td>
<td>Ocean Waves and Tides</td>
<td></td>
</tr>
<tr>
<td>OE 757</td>
<td>Coastal Engineering and Processes</td>
<td></td>
</tr>
<tr>
<td>OE 765</td>
<td>Underwater Acoustics</td>
<td></td>
</tr>
<tr>
<td>OE 771</td>
<td>Geodesy and Positioning for Ocean Mapping</td>
<td></td>
</tr>
<tr>
<td>OE 795</td>
<td>Special Topics</td>

</tr>
<tr>
<td>CEE 722</td>
<td>Introduction to Marine Pollution and Control</td>
<td></td>
</tr>
<tr>
<td>TECH 797</td>
<td>Undergraduate Ocean Research Project</td>
<td></td>
</tr>
</tbody>
</table>

Students typically take ESCI 501 Introduction to Oceanography, TECH 797 Undergraduate Ocean Research Project, and OE 490 Introduction to Ocean Engineering plus two additional engineering courses from the above list to complete the minor.

Physics and Astronomy

Physics is concerned with the properties of matter and the laws that describe its behavior. As a fundamental science, its discoveries and laws are basic to understanding in nearly all areas of science and technology. Advances in such diverse fields as medical instrumentation, solid state electronics, and space research have relied heavily on the application of basic physical laws and principles.

Students interested in the study of physics at the University of New Hampshire will find a strong interaction between research and academic programs. Undergraduates frequently participate in research studies ranging from nuclear scattering experiments at major particle accelerators to astrophysical studies of the solar system using space probes. These experiences have proven beneficial to engineering and physics students alike. The department is located in DeMeritt Hall (completed in 2008) and Morse Hall. Both buildings are equipped with state-of-the-art research facilities and laboratories. DeMeritt Hall also houses the physics library, classrooms, and a number of open and comfortable meeting areas, which provide an inviting atmosphere for study, interaction, and collaboration.

The suggested programs that follow are indicative of the flexibility available to students, whether they are preparing for graduate work in physics or astronomy, industrial opportunities, governmental research, secondary-level teaching, or a general education that might utilize the fundamental knowledge of physics.

Several undergraduate degree programs are offered through the department of physics. The B.S. degree is designed for students who wish to work as professional physicists or engineers. The B.A. degree is designed for students who want a strong background in physics but also want a broad liberal arts education. The department also offers a B.S. in engineering physics, which offers a deeper understanding of the physical principles needed to support careers in engineering. The BSEP program offers two tracks for students; aerospace and engineering research. Minors for astronomy and physics are also offered by the department.

Interested students are encouraged to contact the department for further information. More detailed information is also on the physics department website.

Engineering Physics Major (B.S.)

https://ceps.unh.edu/physics/program/bs/engineering-physics-major
Description

The goal of the UNH BSEP program is to produce broadly-trained engineers who can provide solutions to today's challenging problems in support of a technologically evolving society. The core of the program is based on interdisciplinary training, complemented with a deeper understanding of the physical principles needed to support careers in engineering, engineering research or, perhaps, further training in systems engineering. The program balances depth and breadth in skill development; flexibility and functionality are what drive the program in the sense that 1) the particular focus is based on the student's interests, and 2) the breadth of the course selection is guided by the post-graduation goals of the student (e.g., employment versus graduate school).

Requirements

Student Learning Outcomes

Students are expected to achieve the outcomes below upon graduation.

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Physics Major (B.A.)

https://ceps.unh.edu/physics/program/ba/physics-major

Description

This program provides an opportunity for a broad and liberal education, which in some cases may be sufficient for graduate work. This program can also be excellent preparation for middle and high school physics teachers, pre-med and pre-law students, and those wishing to pursue a technical career in industry. Because there are fewer required courses than for a B.S., you have time to pursue other academic interests. A judicious choice of electives may also prepare students for interdisciplinary programs that require proficiency in a specialized area of physics.

</tr>
</tbody>
</table>

Total Credits: 66-76

1 Note that no physics course can satisfy this requirement for a physics major. The rationale behind this is that a course in physics does not broaden the education of a physics major.

2 A capstone experience is required of all physics majors during their senior year. The Physics Department encourages students to write a senior thesis (PHYS 799 Thesis) for their capstone experience. Other options include independent study research projects (PHYS 795 Independent Study or INCO 590 Student Research Experience) or a special project as part of senior lab (PHYS 705 Experimental Physics II). All capstone experiences must be approved by the undergraduate committee during the student’s penultimate semester.

Degree Plan

Suggested Plan of Study

In the following table, “other required courses” include Discovery courses, writing-intensive courses, language courses required for the B.A., and free-choice electives.

### Student Learning Outcomes

- Students will master the fundamentals of mechanics, electricity and magnetism, quantum mechanics, and thermodynamics.
- Students will have a solid understanding of calculus and differential equations and be able to use mathematics to solve physics problems.
- Students will be proficient at taking measurements in a physics lab and analyzing measurements to draw valid conclusions.
- Students will be able to integrate competently the knowledge and skills acquired in the major and have adequate preparation to succeed in post-undergraduate studies or a professional career.
- Students develop and execute plans for post-graduation to establish their careers. Student will understand the variety of career paths and opportunities that are open to students who have majored in physics.
- Students will be able to present scientific ideas effectively in both written and oral form.

### Physics Major (B.S.)

[https://ceps.unh.edu/physics/program/bs/physics-major](https://ceps.unh.edu/physics/program/bs/physics-major)

### Description

The bachelor of science degree in physics prepares students for professional work as physicists, and is the first step toward graduate work in physics. It is also excellent preparation for graduate programs in medicine, law, or engineering, as well as for technical jobs in industry. The required courses are those typically necessary for admission to graduate study in physics or astronomy.

### Requirements

#### Degree Requirements

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral

#### Core Curriculum Required:

- Discovery & Writing Program Requirements

#### Foreign Language Requirement:

- No

#### Major Requirements

- All Major, Option and Elective Requirements as indicated.
- *Major GPA requirements as indicated.*

</table>
2.3 to continue in the B.S. program. Required for the B.S. degree and an overall grade-point average of at least a minimum grade of C in each 400- or 500-level course specifically required for a physics major. The rationale behind this is that a course in physics does not broaden the education of a physics major.

1 A capstone experience is required of all physics majors during their senior year. The Physics Department encourages students to write a senior thesis (PHYS 799 Thesis) for their capstone experience. Other options include independent study research projects (PHYS 795 Independent Study or INCO 590 Student Research Experience) or a special project as part of senior lab (PHYS 705 Experimental Physics II). All capstone experiences must be approved by the undergraduate committee during the student’s penultimate semester.

By the end of the spring semester of the sophomore year, a student must have a minimum grade of C in each 400- or 500-level course specifically required for the B.S. degree and an overall grade-point average of at least 2.33 in these courses in order to continue in the B.S. program.

### Physics Electives

In the following table, "electives" include Discovery courses, writing-intensive courses, physics electives, and free-choice electives. Note that physics electives can only be taken in the junior or senior year because of prerequisites, and are in general offered every other year.

Student Learning Outcomes

- Students will master the fundamentals of mechanics, electricity and magnetism, quantum mechanics, and thermodynamics.
- Students will have a solid understanding of calculus, differential equations, and linear algebra and be able to use mathematics to solve physics problems.
- Students will be able to solve physics problems using computational methods.
- Students will be proficient at taking measurements in a physics lab and analyzing measurements to draw valid conclusions.
- Students will be well prepared for graduate study in physics and related disciplines.
- Students will be well prepared for technical careers.
- Students will be able to present scientific ideas effectively in both written and oral form.

Astronomy Minor

https://ceps.unh.edu/physics/program/minor/astronomy

Description

This minor program introduces students to the fundamentals of astronomy and astrophysics and also allows students some flexibility in their choice of more focused coursework. The required courses cover the following topics: planets, stars, galaxies, cosmology, and modern astronomical tools. We have two flavors of the minor, one for those also getting a physics degree, and another for students outside of the physics major.

For further information please contact Professor Mark McConnell.

Requirements

Credit toward the minor will be given only for courses passed with C- or better, and a 2.0 grade-point average must be maintained in courses for the minor. Courses taken on the pass/fail basis may not be used for the minor. Students should declare their intent to earn a minor as early as possible and no later than the end of the junior year. During their final term, students must fill out an intent to minor and have it signed by the appropriate faculty.

The minor requires a minimum of five courses as detailed in the minor requirements. No more than 8.0 credits (or two courses) used by the student to satisfy major requirements may be used for the minor. Additional courses from the list of course electives may be utilized to meet the five-course minimum.

Physics Minor

https://ceps.unh.edu/physics/program/minor/physics

Description

This program allows students to become more deeply involved in physics without the commitment of a major.

To minor in physics, request a minor advisor at the physics office as soon as possible. Advisors assist in course selection to fit your interests, schedule, and help ensure you have met mathematical and physics prerequisites.
Requirements

- The minor consists of 5 courses in physics.
- At most only two minor courses can also fulfill a major requirement.

The following courses may NOT be used to fulfill minor requirements: PHYS 400, PHYS 401, PHYS 402, PHYS 409, PHYS 501.

Physics minors must take PHYS 407 and PHYS 408 or the equivalent. These two courses are prerequisites for all other physics courses.

Total Credits: 19

1 Select a four-credit physics course, chosen in consultation with the student’s physics minor advisor.

Examples of course combinations used to fulfill minor requirements:

1. PHYS 407, PHYS 408, PHYS 505 General Physics III & PHYS 506 General Physics III Laboratory, PHYS 508 Thermodynamics and Statistical Mechanics, PHYS 615 Classical Mechanics and Mathematical Physics I

Note: many physics courses have mathematics prerequisites. Prerequisites are listed in the course descriptions.

College of Health and Human Services

Kirsten N. Corazzini, Dean
Erin Hiley Sharp, Associate Dean, Academic Affairs
Dain LaRoche, Associate Dean, Research

The College of Health and Human Services (CHHS) prepares students for professional health-related careers, through hands-on, experiential learning. Taught by profession and field experts, CHHS provides undergraduate instruction that leads to the bachelor of science degree in communication sciences and disorders, health management and policy, human development and family studies, kinesiology (with majors in exercise science, health and physical education, health sciences and sport management and leadership), nursing, occupational therapy, recreation management and policy (with options in outdoor leadership and management, program and event management and therapeutic recreation), and social work. Each program enables students to acquire the knowledge and skills needed to practice in their chosen professions and to obtain a broad cultural background in the humanities and social sciences.

Undeclared Major

A limited number of well-qualified first-year students who have expressed an interest in a health-related career but who are undecided about a specific major may enter the College of Health and Human Services as undeclared students.

ACE First Year Experience Program

All CHHS students participate in our ACE (Academic and Career Engagement) First-Year Experience Program.

The ACE Program in the College of Health and Human Services provides our first year students with an environment that encourages academic success in the transition from high school to college. Through personalized academic and career coaching, this first-year experience program assists students with navigating academic and co-curricular resources, developing skills in active learning, reflection, and decision making, and exploring vast career options and alumni connections - all the while fostering a community of belonging and involvement within CHHS and UNH.

Members of the ACE Program participate in two ACE seminars during the first year. These seminars help students learn about CHHS majors and explore career choices, goals, and the resources and opportunities available to students at UNH, such as academic guidance and support for your personal well-being. Each CHHS student in the ACE Program has an ACE peer mentor and an ACE academic coach, who are available to meet on a regular basis. Each student is also assigned a faculty mentor within the major department.

Degrees Offered

Bachelor of Science (B.S.)

Degree Requirements

Candidates for the Bachelor of Science (B.S.) degree must satisfy all University requirements for graduation, earn at least 128 credits, successfully complete the courses required in one of the majors described in this section, and achieve the required minimum grade-point average in the chosen curriculum. Generally, courses are to be completed in the sequence in which they are arranged. Degree candidates must satisfy all of the University and Discovery Program requirements in addition to satisfying the requirements of an individual major program, which includes a senior capstone course/experience.

Applied Human Anatomy and Physiology

- Applied Human Anatomy and Physiology Minor (p. 149)

Applied Human Anatomy and Physiology Minor

https://chhs.unh.edu/kinesiology/program/minor/applied-human-anatomy-physiology

Description

The minor is designed to provide students with an opportunity to develop knowledge and skills necessary for pursuing degrees in medicine and allied health.

Admission to the applied Human Anatomy & Physiology minor is based on successful completion of BMS 507 Human Anatomy and Physiology I & BMS 508 Human Anatomy and Physiology II or ANSC 511 Anatomy and Physiology and ANSC 512 Anatomy and Physiology (or equivalent accepted by minor adviser) with a grade of C or better and a minimum GPA of 2.75.

Coaching

- Coaching Minor (p. 149)

Coaching Minor

https://chhs.unh.edu/kinesiology/program/minor/coaching

Description

The Coaching Minor is an interdisciplinary curriculum designed to provide students interested in coaching at the youth, high school or college levels with basic knowledge and skills necessary for competence in coaching. The minor consists of courses offered by several options within the Department of Kinesiology and Recreation Management and Policy. The proposed coursework lays a theoretical and practical framework for students interested in coaching.

Admission into the minor is based on successful completion of SML 565 Principles of Coaching (grade of C- or better), and a minimum GPA of 2.0.

Sport Management Leadership/Sport Studies majors are not permitted to minor in coaching.

Requirements

Coaching Minor Requirements

To graduate with a coaching minor, individuals must earn a grade of C- or better in all courses associated with the minor.

1 Students will not be permitted to enroll in SML 650D Internship in Coaching, until they have completed 10 Credits toward the minor to include: SML 565 Principles of Coaching; and one of the applicable courses/electives and at least one theory/practical coaching class.
Communication Sciences and Disorders (COMM)

WHAT IS COMMUNICATION SCIENCES AND DISORDERS?
Communication Sciences and Disorders is the profession devoted to assessing and treating disorders, delays, or differences in speech, language, and hearing. In this program, students learn how the ability to communicate develops — including how the brain and speech and hearing mechanisms function to support the acquisition of speech, language, social communication, and cognition. You’ll review an array of communication disorders that can affect individuals across the lifespan, learning about assessment and treatment. This pre-professional degree will prepare you to successfully enter clinical or research graduate programs in areas such as audiology, speech-language pathology, cognitive science, and education.

WHY STUDY COMMUNICATION SCIENCES AND DISORDERS AT UNH?
As a student in the communication sciences and disorders (CSD) program at UNH, you will learn about speech, language, and hearing through a unique educational model that includes classroom instruction, clinical observation, and research. Students observe at the on-campus Speech-Language-Hearing Center and Clinic for Neurogenic Communication Disorders, premier diagnostic and intervention centers in New Hampshire. In addition, you have the opportunity to participate in research activities in our state-of-the-art research laboratories. For students interested, a limited number of internships are available each semester.

Communication Sciences and Disorders (CSD) is devoted to helping people overcome disabilities of speech, language, and hearing. The study of Communication Sciences and Disorders may begin in the freshman or sophomore year. Students learn about speech, language, and hearing disorders in the classroom and are involved in clinical observation in the on-campus Speech-Language-Hearing Center and can participate in research projects. Students are encouraged to take elective courses in linguistics, human development, learning theory, early childhood, health administration, special education, and various aspects of rehabilitation.

As this is a pre-professional degree, students generally pursue graduate studies in speech-language pathology or audiology at colleges or universities offering graduate programs leading to a master’s or doctoral degree and to subsequent certification by the American Speech-Language-Hearing Association (ASHA). Certified clinicians find employment opportunities in hospitals, schools, community speech and hearing clinics, and private practice. Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of the Communication Sciences and Disorders major.

The Department of Communication Sciences and Disorders’ Accelerated Bachelor’s program provides CSD undergraduates with the opportunity to earn graduate credits during their senior year, shorten the length of their graduate studies, and jumpstart their careers. Learn more here!

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Candidates for a bachelor's degree in Communication Sciences and Disorders must satisfy all departmental as well as UNH Discovery and Writing Intensive requirements.

Students must earn a grade of C or better in all COMM courses.

CSD welcomes transfer students. We are committed to helping you keep to your intended graduation timeline; however, this is dependent upon what courses you have completed before transfer. UNH undergraduates who have not declared a major and/or are interested in transferring into communication sciences and disorders (CSD) should apply directly to the department by completing an internal transfer application. Transfer applications are reviewed on October 15th and March 15th. Acceptance into CSD is dependent upon space and the applicant’s academic credentials.

Before applying, it is recommended that you review the degree plan.

Internal Transfer students - Apply Now

For any questions regarding CSD curriculum please email the department at csd.department@unh.edu.

### Student Learning Outcomes

- The Communication Sciences and Disorders (CSD) undergraduate curriculum aligns with the American Speech Language Hearing Association (ASHA) standards.
- Students completing required COMM courses will have the foundational knowledge to meet ASHA standards.
- Students completing required COMM courses will have the academic preparation to apply to either SLP or Audiology graduate programs.
- All CSD students will have a capstone experience which will allow them to integrate academic experiences.
- Students will be introduced to evidence-based practice (EBP) as it relates to the professions of speech language pathology and audiology.

### Exercise Science

#### Programs

- Exercise Science Major (B.S.) (p. 151)

#### Exercise Science Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bachelor-of-science-in-exercise-science

### Description

This curriculum prepares students for careers in health and fitness promotion and education programs in hospitals, sports medicine centers, wellness clinics, universities, and rehabilitation facilities. Students are
also prepared for advanced degree programs in the health professions, basic biology fields, medicine, or other health-related fields.

Interested students should consult with the undergraduate major coordinator, Summer.Cook@unh.edu.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Students must earn a grade of C (2.0) or better in every required course. Successful completion of early and prerequisite courses is required before advancing to sequenced and higher-level coursework. All required courses must be completed before enrolling in EXSC 650A Internship in Exercise Science.

These courses give students practical experience in evaluating health and fitness and prescribing exercise to a wide range of clients. Specifically, students assess a number of disease risk factors, including blood pressure, blood chemistry, and body composition measures, and perform maximal graded exercise tests complete with electrocardiogram monitoring, as well as measure strength and flexibility. Students ultimately develop individualized exercise prescriptions for their clients and work with them one-on-one to improve their health and fitness. The internship experience is an off-campus, 10-week, 40-hours per week, full-time experience and can only be taken after all University and departmental courses are completed. Typically, this is taken during the summer after the student's senior spring academic term.

Total Credits 130-134

Student Learning Outcomes

- Apply fundamental principles of anatomy & physiology, chemistry, nutrition, exercise physiology, psychology, math and physics to anticipate and understand physiologic responses to acute and chronic exercise.
- Evaluate empirical literature in terms of accuracy, authority, bias and relevance, and synthesize information from a variety of sources for presentation in written and oral forms.
- Demonstrate competency in health and fitness assessments and use them to prescribe evidence-based exercise interventions to improve health, athletic performance, physical function and quality of life in diverse populations.
- Display professionally appropriate behaviors, ethical standards, sensitivity, compassion, and tolerance of individual differences, and demonstrate the ability to work in an interprofessional healthcare team.

Health and Physical Education

Programs

- Health and Physical Education Major (B.S.) (p. 153)
- Interdisciplinary Health Minor (p. 155)
- Lifetime Activity Programming and Leadership Minor (p. 155)
- Physical Education Teaching Minor (p. 155)

Health and Physical Education Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/health-physical-education-major

Description

The health and physical education (HPE) major provides a foundation for teaching through a four-year program (BS), or the UNH Department of Education fifth-year program leading to a master of arts in teaching (MAT). Graduates become certified to teach kindergarten through grade 12 (K-12) health and physical education in the state of New Hampshire. This licensure is transferable to all other states in the U.S. Extensive supervised practicum experiences that provide teaching skills, including adaptive physical education programming, offers an excellent foundation for preparing high-quality teachers. The combination of health with physical education and adaptive physical education makes graduates highly marketable.

Fifth Year Program Admission

Admission to the fifth year program for the Master of Arts in Teaching (MAT) requires a minimum GPA of 3.0. Students admitted to the accelerated masters program (required GPA of 3.2 or greater and completion of 90 credits) are eligible for dual credit at the undergraduate/graduate levels for up to 12 credit hours. This enables undergraduates to begin the masters program in their junior or senior year.

Transfer Student Admission

Internal UNH undergraduate transfer students must have a minimum GPA of 2.67.
External UNH undergraduate transfer students must have a minimum GPA of 2.75.

For questions about the program, contact the undergraduate program coordinator, Holly Alperin at (603) 862-1211, or Holly.Alperin@unh.edu.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements

Students must receive a minimum grade of C (2.0) or better in all major-required courses.

Teaching Licensure Program Requirements

In order to ensure full admittance to the teaching licensure program, all students are required to pass Praxis Core (Reading, Writing, Math) or equivalent prior to starting Elementary Practicum (HPE 610). Additionally students must earn a minimum grade of B- or better in the following major-required courses, HPE 570, HPE 675, HPE 781, and EDUC 605.

Culminating Experience

The coursework for students choosing the four-year or five-year path to teaching certification is exactly the same until the final semester of the undergraduate program. The culminating experience for students...
in the four-year teaching program is student teaching (EDUC 694D /HPE 694). Students must maintain a GPA of 2.5 to be eligible to student teach. Students choosing the fifth-year program complete a year-long internship, in lieu of student teaching. Students also have the option of completing a concentration in adapted physical education through additional coursework designed to enhance teaching strategies and the programmatic needs of students with disabilities.

### Degree Plan

#### Recommended Major Sequencing of Courses

This list only includes major classes. Students should be registered for, and taking an average of 16 credits per semester to be ‘on track’ to graduate in 4 years. In most semesters, this means a student will be taking Discovery or elective courses to meet this 16 credit ‘load’.

#### First Year

##### Fall

- **HPE 500**: Introduction to Health and Physical Education [2 credits]
- **HPE 600**: Movement and Gymnastics Exploration [4 credits]
- **NUTR 400**: Nutrition in Health and Well Being [4 credits]
- **1 or 2 Discovery Course**: [4-8 credits]

**Credits**: 14-18

##### Spring

- **HPE 603**: Team Sports [3 credits]
- **ENGL 401**: First-Year Writing [4 credits]

**Credits**: 14

Total Credits: 128-136

**Credits**: 14

Total Credits: 128-136
Student Learning Outcomes

- Apply sound pedagogical practices that enable effective teaching of health education, physical education, and adapted physical education at all levels.
- Create a learning environment that allows each student to feel safe, challenged and valued by embracing the unique strengths each student brings into the classroom and gymnasium.
- Integrate foundational skills and knowledge from health and physical education disciplines that enhance teaching practices in the classroom and gymnasium.
- Design unit and lesson plans within an overall curriculum for health and physical education that supports the development of students’ intellectual, physical, social and emotional well-being.
- Design and implement authentic assessments for health and physical education that will enhance and inform student learning.

Interdisciplinary Health Minor

https://chhs.unh.edu/kinesiology/program/minor/interdisciplinary-health

Description

The Interdisciplinary Health Minor prepares future professionals to approach health and well-being through a culturally-responsive and trauma-informed lens across multiple dimensions of wellness. Students gain the knowledge and skills to promote, support, and affect behavior change in ways that positively impacts the health and well-being of individuals and communities. Those who complete this minor have the ability to apply their knowledge and skills in settings such as schools, before/after-school programs, clinical settings, community health centers, fitness centers, and/or corporate settings.

Physical Education Teaching Minor

Description

The minor in Physical Education Teaching is for students with an interest in pursuing a graduate degree to teach physical education after completing their undergraduate degree at UNH. The coursework and practicum experiences lay the foundation for understanding teaching using best practices in the physical education field. The courses provide a foundation in how to teach physical education along with specific instruction on teaching pupils with disabilities. A combination of activity-based courses and field experiences at a local elementary, middle or high school give students a true sense for what teaching physical education is all about. Upon completion of this minor, students will have the baseline content knowledge and experience to teach physical education if they choose to pursue teaching certification at the graduate school level.

Lifetime Activity Programming and Leadership Minor

Description

The minor in Lifetime Activity Programming and Leadership is for students with an interest in working with youth in out-of-school activity settings such as before or after school programs, summer camps, outdoor/adventure settings, etc. The majority of courses will engage students in purposeful movement and will be physically engaging. Each course will have a teaching component that prepares students to facilitate the various activities with young people in a wide-range of environments.

Health Management and Policy (HMP)

Health Management and Policy is an interdisciplinary program providing students with a broad view of healthcare organizational structure and healthcare policy, while developing analytical skills that are integrated within courses and computer laboratories throughout the curriculum. Students are prepared to pursue careers in a wide range of healthcare organizations focusing on the business aspects and public health aspects within healthcare leadership. Graduates work in private practices, long-term care, rehabilitation facilities, hospitals, start-up organizations, urgent care centers, and other
managed care organizations in such areas as finance, information systems, management, marketing, operations, project management, as well as public health departments, community health, community-based and home-health agencies, mental health facilities, regulatory bodies, consulting companies, and insurance companies.

The department’s undergraduate program maintains full certification by the Association of University Programs in Health Administration (AUPHA). Students have the opportunity to become student members in the Medical Group Management Association (MGMA), American College of Healthcare Executives (ACHE), the Health Care Financial Management Association (HFMA), the American Public Health Association (APHA), and the New Hampshire Public Health Association (NHPHA) to establish a professional network and be informed on current issues within the field. The Health Management and Policy curriculum is approved under the New England Commission of Higher Education (NECHE).

**Faculty**

https://chhs.unh.edu/directory/all

**Health Management and Policy Major (B.S.)**

https://chhs.unh.edu/health-management-policy/program/bs/health-management-policy

**Description**

The Health Management and Policy (HMP) curriculum includes a variety of healthcare courses, including finance, management, data, and policy courses. Students complete a core of introductory courses prior to their junior year in the HMP major. Upper-division (junior and senior) HMP courses are planned in a two-year sequence, (see course sequence) and includes a 400-hour summer internship. Along with required major courses, students will be guided to complete the University requirements, for writing intensive courses and Discovery courses, to obtain the minimally required 128 credits to graduate. A professional academic advisor and faculty are available to assist with academic and career plans. This degree prepares students to be healthcare leaders in areas, including, but not limited to: consultant, epidemiologist, healthcare administrator, healthcare analyst, human resources, healthcare sales, lawyer, marketer, practice manager, and researcher.

It is important to note that internal or external transfer students may require an extra year due to the prescribed course sequence.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Total Credits 85

1 AP Statistics does not meet the statistics requirement.
2 HMP 798H is taken for two credits Fall of senior year, if selected for Honors in Major.
HMP 799H is taken for four credits Spring of senior year, if completing the Honors in Major thesis.

Field Practicum
HMP 622 Field Practicum in Organizational and Project Analysis, and Management Skills Development is the required 400 hour 10-week field practicum, (or administrative internship), which constitutes an essential part of the HMP academic program. The field practicum occurs during the summer between junior and senior year, typically beginning in late May and ending in late August, requiring a full-time commitment of the student. Students must be an HMP major, in good academic standing in the major, and must retain a cumulative GPA of 3.00 or higher to be granted permission to enroll in the course.

This experience allows students to explore an area of special interest in depth that integrates class work with a supervised field experience. Given sufficient timing of student requests, efforts will be made to arrange practica at distant sites based on special needs. Field practicum sites are selected with student involvement. Typical sites are often concentrated in central and Northern New England, but the experience could also be elsewhere, including abroad.

Academic Requirements
HMP majors must obtain a minimum of a B- in all HMP required courses and prerequisite courses. Majors must have an overall grade-point average of 3.00 to remain in the major. Students not continuing to make progress in the major, as evidenced by a low grades (below B-), incomplete courses, and/or administrative failures resulting in a cumulative GPA lower than 3.0 may, upon determination by the Health Management and Policy faculty, be excluded from the major and participation in the Field Practicum. An exclusion from the major may also be necessary to resolve questions concerning major departmental requirements or University academic standards.

The academic action of exclusion could be a temporary action. Consideration for a temporary action requires that a petition is completed by the student detailing the extenuating circumstances and providing supportive documentation to the Health Management and Policy Department for review by faculty with a determination of approval. Should a petition be granted approval to remain in the major due to extenuating circumstances, the student must demonstrate academic progress (B- in HMP courses and 3.0 GPA) the following semester or they will be excluded from the major without the option to return. If the petition is not determined approved by the faculty, students will be required to change their major.

Internal Applications for HMP Major
Students interested in additional information or in applying for admission to the health management and policy major should attend an HMP information session, and/or contact the academic department coordinator. Efforts should be made to complete this process during the freshman year or early in the sophomore year to ensure sufficient time to complete the required courses, HMP 401, HMP 403, HMP 501, MATH 420, ENGL 502, and Statistics. Admitted UNH students can apply to the major once the student meets the application requirements, a minimum cumulative GPA of 3.00 and at least two of the required courses completed with a B- or higher; however all HMP required courses must be completed with a B- or better to progress in the major.

Honors in Major
The department offers an honors-in-major program. Students must meet the department's requirement of having an overall 3.7 grade-point average at UNH and a 3.7 grade-point average for required HMP courses taken by the end of the spring semester sophomore year to be invited to Honors-in-Major. Honors-in-major students take a total of three honors designated major courses during the junior year and senior year, as well as completing an honors thesis project during the senior year, HMP 798H and HMP 799H. Students work on the honors thesis with a faculty member within the HMP department who has knowledge in the specific topic. Students should contact the academic department coordinator for further information.

Student Learning Outcomes

- The complexity of the health care delivery system, quality of care, and it relates to population health as well as the complexity of financing of the US healthcare delivery model.
- Analyze complex management situations, data and apply (appropriate) health management concepts, theories and models to develop recommendations, working within a team environment.
- Ability to describe and discuss the role of Human resource functions and the laws governing, the difference between management and leadership, organizational structures, mergers, acquisitions and affiliations and the role of governmental laws and regulations.
- Identify and prioritize organizational needs and market imperatives in design and development of business plans for health Programs and services in a variety of management settings to compile, present and discuss data and its limitations related to specific managerial problems and ethics for organizational decision making based on regulations and principles that govern the domains and the role of management and leadership.
- Use of computer analysis tools for calculating, aggregating, presenting and discussing data and its analysis.
- Understand the importance of a Mission and Vision statements and Identification and involvement of stakeholders, recognizing political and legal implications of actions and decisions.
- Describe and generally assess key concepts and elements of health information systems selection and implementation of health care systems and regulatory requirements related to clinical and financial systems, and the role in HIT/HIM as it relates to cost, quality and access.
- Application of economic theory and current mechanisms for advanced financial knowledge to decision making and strategic thinking skills, ability to identify and target market segment and defined appropriate intervals to measure, the time value of money, long-term debt, stocks and equity, and evaluation of capital projects.
- Communicate information, ideas and information effectively in a written and oral format using appropriate professional conventions.

Health Management Minor

https://chhs.unh.edu/health-management-policy/program/minor/health-management

Description

The department of Health Management and Policy (HMP) offers an integrated minor in health management, designed for students in majors outside of Health Management and Policy who are interested in learning about the business leadership aspects of healthcare. Students seeking to minor in health management should meet with the academic department coordinator to discuss the requirements.

Requirements

All courses must be completed with a C- or higher to be counted toward the minor.

The health management minor includes the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMP 401</td>
<td>United States Health Care Systems</td>
<td>4</td>
</tr>
<tr>
<td>HMP 501</td>
<td>Epidemiology and Community Medicine</td>
<td>4</td>
</tr>
</tbody>
</table>

Courses above must be taken before completing 600 and 700 level courses.

HMP 721 Managing Health Care Organizations 4

Select Two of the Following:

<table>
<thead>
<tr>
<th>Code</th>

</table>

1 Prerequisite courses must be completed for all HMP courses.

Public Health Minor

https://chhs.unh.edu/health-management-policy/program/minor/public-health

Description

The department of Health Management and Policy offers a minor in public health. Public health deals with the health of populations and focuses on health promotion and disease prevention, as well as access to the medical system. The minor introduces students to many of the foundation areas of public health and provides basic exposure to
key concepts and skills in the five core disciplines of public health, as articulated by the Council on Education for Public Health. The minor is open to baccalaureate students outside of the Health Management and Policy major at UNH. Students interested in this field may decide to continue their education with the Master of Public Health (MPH), which is also offered through the Department of Health Management and Policy.

### Requirements

The public health minor includes the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMP 403</td>
<td>Introduction to Public Health</td>
<td>4</td>

1 All prerequisite courses must be met for any listed courses.  
2 Other courses could be considered by submission of an academic petition.

### Health Sciences

- **Health Sciences Major (B.S.)** (p. 159)

### Health Sciences Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/health-sciences-major

### Description

The Health Sciences program is for those students who are concerned with the health and well-being of others, possess a strong science aptitude, and plan to pursue a career in healthcare. As healthcare has evolved in the U.S., degree programs in the allied health professions (physical therapy, physician assistant, etc.) have moved to post-baccalaureate education. Individuals with career interests in allied health professions must first attain prerequisite knowledge to be prepared to study in these advanced degree programs. This rigorous academic program provides the foundational life science coursework and advanced elective course offerings to prepare students for graduate programs in the allied health sciences.

Admission to graduate study in medical or allied health professions is very competitive and requires applicants to demonstrate exemplary academic performance for admission.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

### Major Requirements

Students are required to have earned a minimum, cumulative, GPA of 2.85 by the end of their Sophomore/2nd Year in the Health Sciences Major. Students are also required to achieve a C- or better in all required courses in the major. Students with a GPA below 2.85 will be excluded (removed) from the Health Sciences Major.

Core courses required of all Health Sciences concentrations are:

<table>

1 Any UNH statistics course satisfies the requirement with adviser approval.

### Required University Courses

Candidates for a degree must satisfy all of the University Discovery requirements in addition to satisfying the requirements of the Health Sciences curriculum and any pre-requisite coursework needed to apply to the graduate programs they plan to pursue.

### Recommended Electives

A student’s plan of elective courses should align with post-baccalaureate pursuits, and be approved by a Health Sciences advisor.

Recommended electives for future health professionals that are external to the Health Sciences courses may include course work in Communication Sciences & Disorders, Human Development & Family Studies, Health & Human Services, Health Management & Policy, Kinesiology, Nursing, Occupational Therapy, Recreation Management & Policy, Social Work, and other coursework in the life sciences and health and human services.
### Degree Plan

#### First Year

**Fall**
- BMS 507 Human Anatomy and Physiology I  
- BIOL 411 Introductory Biology: Molecular and Cellular  
- ENGL 401 First-Year Writing  
- Discovery/Elective (H.U.)

**Credits** 16

**Spring**
- BMS 508 Human Anatomy and Physiology II  
- BIOL 412 Introductory Biology: Evolution, Biodiversity and Ecology  
- HS 501 Medical Terminology  
- PSYC 401 Introduction to Psychology  
- Discovery/Elective (FPA)

**Credits** 18

#### Second Year

**Fall**
- HS 605 Exploration of Allied Health Professions (fall or spring)  
- CHEM 403 General Chemistry I  
- EXSC 620 Physiology of Exercise  
- KIN 585 Emergency Medical Responder  
- Discovery/Elective (ETS)

**Credits** 18

**Spring**
- CHEM 404 General Chemistry II  
- NUTR 400 Nutrition in Health and Well Being  
- PSYC 402 Statistics in Psychology  
- Discovery Elective (WC)

**Credits** 18

#### Third Year

**Fall**
- PHYS 401 Introduction to Physics I  
- HS 767 Pharmacology for Health Professions  
- Discovery Elective (HP)  
- Discovery Elective (see recommended electives under requirements)

**Credits** 16

**Spring**
- PHYS 402 Introduction to Physics II  
- HS 656 Musculoskeletal Pathologies for Health Professions  
- HS 657 Musculoskeletal Pathologies for Health Professions  
- KIN 652 Clinical Kinesiology  
- Discovery Elective (see recommended electives under requirements)

**Credits** 17

#### Fourth Year

**Fall**
- Discovery Elective (see recommended electives under requirements)  
- Discovery Elective (see recommended electives under requirements)  
- Discovery Elective (see recommended electives under requirements)  
- Discovery Elective (see recommended electives under requirements)

**Credits** 12

**Spring**
- HS 717 Cultural Considerations in Health Care  
- Discovery Elective (see recommended electives under requirements)  
- Discovery Elective (see recommended electives under requirements)  
- Discovery Elective (see recommended electives under requirements)

**Credits** 12

**Total Credits** 125

### Student Learning Outcomes

- Demonstrate understanding of core principles of biology, chemistry, physics, anatomy and physiology, psychology, and kinesiology.
- Demonstrate comprehension of musculoskeletal evaluation and assessment techniques.
- Demonstrate responsiveness to cultural considerations in healthcare.
  a.) Understand influence of age, race, ethnicity, gender, sexual orientation, spirituality, socioeconomic status, and other aspects of diversity on individual healthcare needs and health-related quality of life.
- Demonstrate an understanding of scientific research and writing.
  a.) Ability to identify and analyze scholarly literature. b.) Ability to synthesize and articulate research findings through writing.
- Demonstrate knowledge of behaviors, scopes of practice, and legal and ethical standards for health professions.
- Understand concepts of evidence-based practice and patient-centered care for health professions.

### Human Development and Family Studies (HDFS)

As a human development and family studies major at UNH, you’ll learn to promote the health and well-being of children, adults, and families through research, teaching and service. The program curriculum embraces diversity and emphasizes service excellence and innovation,
preparing you for a variety of in-demand careers in education, social services, and healthcare. Three separate concentrations allow students to focus on early childhood development and education, family support or lifespan development.

As a major public research university, UNH emphasizes hands-on experience and research opportunities. Students in the human development and family studies program have multiple opportunities to put theory into practice through the Child Study and Development Center, Family Connections Center and Marriage and Family Therapy Center. Students in the Child Development Concentration may apply to the Early Childhood Education Teaching Preparation Program, while students in the Family Support Concentration are encouraged to pursue provisional status as a Certified Family Life Educator, preparing them to work in areas such as social services, health services, family support, and youth program.

**Human Development and Family Studies** offer three areas of concentration

- **Family Support** - for students interested in working with children, adolescents, adults, and families
- **Lifespan Development** - for students with a broad interest in working with families
- **Child Development** - for students who have a broad interest in working with children ranging in age from birth to age eight.

**Two optional full-year internship opportunities**

Students can apply for either internship during their junior year

- Early Childhood Education teacher preparation (ECE) internship
- Family Support concentration offers an internship working in fields involving family, gender and cultural differences. This internships can also be taken by Lifespan Development students

**Three Minors**

The Human Development and Family Studies department offers three complementary undergraduate minors: Human Development and Family Studies, Adolescent and Youth Development, and Child Life. An undergraduate minor allows students to demonstrate a special area of interest, focus, or expertise and supports their academic major and future educational and career goals. Each HDFS minor highlights key aspects of individual and family development.

The Human Development and Family Studies minor is only available to non-HDFS majors; however, HDFS majors may choose to minor in Adolescent and Youth Development or Child Life. A completed minor at UNH typically consists of 20 credits, or 5 classes, completed with a C or better.

- **Child Life**
- **Adolescent and Youth Development**
- **Human Development and Family Studies**

Human Development and Family Studies The Child Life minor may also be taken by HDFS students interested in working with families and children in a hospital setting

### Human Development and Family Studies Major (B.S.)

https://chhs.unh.edu/human-development-family-studies/program/bs/human-development-family-studies-major

### Description

Human Development and Family Studies (HDFS) is an academic discipline focused on understanding the development of individuals and families over time and across the ecological contexts in which they live. HDFS is an applied field of study and a versatile undergraduate major for students interested in working to enhance the lives of individuals and families through in-demand careers in settings that include early childhood education, schools, hospitals, and social service agencies. The HDFS curriculum offers students the opportunity to take courses from child and adolescent development to adult development and aging; family, parenting, and interpersonal relationships; classroom curriculum, observation, and assessment; and family programming, policy, and law.

Courses in the HDFS major emphasize diverse experiences across age, gender, race and ethnicity, nationality, and socioeconomic status and prepare students for inclusive programming and practice.

HDFS majors choose between three concentrations: Child Development (p. 162), Family Support (p. 162), and Lifespan Development (p. 163). There is some overlap in coursework and career opportunities across the three concentrations, but each offers unique areas of emphasis.

As a major public research university, UNH emphasizes hands-on experience and research opportunities for undergraduate students. Students in the Human Development and Family Studies program are provided with opportunities to put theory and research into practice through practicum and internship courses in the Child Study and Development Center, Family Connections Center, and many schools and community-based organizations across the Seacoast region of New Hampshire. Students in the Child Development concentration who complete the Early Childhood Education Teacher Preparation Program will be prepared for certification to teach children from Preschool through 3rd Grade. Family Support students who complete the Family Internship Program will be eligible to pursue provisional status as a Certified Family Life Educator (CFLE) at graduation.

**HDFS Undergraduate Concentrations:**

- Child Development (p. 162) focuses on infancy through childhood with an emphasis on learning, education, and developmentally-appropriate practices and activities.
• **Family Support** (p. 162) focuses on development within the context of families, close relationships, and communities.
• **Lifespan Development** (p. 163) focuses on understanding and supporting development across the entire lifespan.

**Internship Opportunities**

Internships are not required for students to complete their degree in HDFS; however there are exciting opportunities to gain hands on experience. Students who want to take part in an internship apply during their junior year for an internship experience that spans their full senior year. An Early Childhood Education (ECE) Teacher Preparation internship is available for qualified students within the Child Development concentration. The Family Support and Lifespan concentrations offer an internship that introduces high-performing students to careers in human services, advocacy, and policy through placements in the Seacoast Region of New Hampshire.

**CHILD DEVELOPMENT CONCENTRATION**

The Child Development concentration is intended for students who have a broad interest in working with children ranging in age from birth to age eight. The concentration has four major foci: child development, teaching methodology and curriculum development, developmentally appropriate learning environments for young children, and home-school-community relations. This concentration prepares undergraduates for careers in early childhood education and related fields requiring in depth knowledge of early development and early childhood programs. Students in the Child Development concentration may apply to the Early Childhood Education (ECE) Teacher Preparation Program during their junior year.

**Child Development: Early Childhood Education (ECE) Teacher Preparation Program**

The Early Childhood Education (ECE) Teacher Preparation program prepares students for a career in teaching young children. Course work for this program is designed to maximize in-classroom mentorship and to provide a broad range of exposure across the pre-kindergarten to 3rd-grade levels. This program within the Child Development concentration of the Human Development and Family Studies Department is approved by the New Hampshire State Board of Education. Juniors in the Child Development concentration who have maintained a minimum overall GPA of 3.2 and a departmental GPA of 3.2 are eligible to apply. Please note that this is a competitive program with limited enrollment. Those accepted into the program must maintain this level of academic achievement throughout the program. Students must be prepared to have their own transportation for off-campus internship placements as needed.

**State Teacher Certification**

Although students may graduate from UNH with a bachelor’s degree in Human Development and Family Studies, having completed the ECE coursework along with all student teaching requirements, they will not be eligible to apply for the New Hampshire State Teaching Certification without the required set of passing test scores. This is a state of New Hampshire requirement; not a condition for graduation from UNH. Students who do not plan to become CFLEs may also choose to complete the Family Internship. The internship involves a commitment of sixteen hours per week for two semesters, in addition to a three-hour seminar (HDFS 792 Family Internship Seminar) every other week. Students apply for the internship by March 1st of their junior year. Internship applicants must have completed a minimum of twenty credits of departmental coursework prior to their senior year with a minimum departmental GPA of 3.0.

**Early Childhood Education (ECE) Internship Course Descriptions**

The ECE Internship course (HDFS 785 Seminar for Student Teachers) is a fall semester seminar-based course intended to prepare students, as teacher candidates, for the student teaching experience that takes place in the spring semester. This course emphasizes students’ continued development as learners, researchers, and collaborators. Discussions and projects focus on the ways in which these three roles are developed within the classroom and school community. Students meet as a cohort in weekly/bi-weekly seminars on campus. Students should expect to spend a minimum of five hours per week in their assigned classroom (60+ hours). Other expectations for this course include but are not limited to: preparing a resume, observing at other sites, attending professional conferences, starting a professional portfolio to document their achievement of professional teaching standards, and completing additional assignments and readings.

HDFS 786 Seminar for Student Teachers and HDFS 788 Student Teaching Young Children: provide the student teaching experience in the spring semester of the senior year. Students should expect to spend a minimum of twenty-five hours per week (a minimum of 325+ hours total) in their assigned classrooms, gradually assuming increasing teaching responsibilities, culminating in the assumption of two to three lead-teaching weeks. Additional hours outside of actual classroom/program operation hours are expected for meeting and planning with cooperating teachers, preparing for teaching, and attending parent conferences and other school functions, as well as attending professional conferences. Seminars provide continued opportunity for reflection on students’ development as teacher candidates, reflecting on classroom practices, identifying teaching strengths and weaknesses, and planning their first professional appointment as teachers of young learners. Students should be prepared to meet weekly after school hours and to complete and present their professional portfolio to faculty and related professionals in the field.

**FAMILY SUPPORT CONCENTRATION**

The Family Support concentration focuses on individuals, couples, and families within their social and cultural contexts. Students in this concentration develop knowledge and skills that prepare them to work with individuals and families as they support healthy development and well-being in schools, social service agencies, and non-profit organizations.

Students in this concentration can apply for the status of Provisional Certified Family Life Educator (CFLE) through the National Council on Family Relations (NCFR). Because our HDFS program is a CFLE-approved undergraduate academic program through NCFR, our students can become certified simply by demonstrating the completion of our curriculum along with completion of our full-year, senior internship.

**Family Internship**

Students who plan to apply for Provisional CFLE certification are required to complete the Family Internship, in which students apply knowledge gained from their academic studies in a supervised environment. Students who do not plan to become CFLEs may also choose to complete the Family Internship. The internship involves a commitment of sixteen hours per week for two semesters, in addition to a three-hour seminar (HDFS 792 Family Internship Seminar) every other week. Students apply for the internship by March 1st of their junior year. Internship applicants must have completed a minimum of twenty credits of departmental coursework prior to their senior year with a minimum departmental GPA of 3.0.

**Certified Family Life Educator**
Students in the Family Support concentration who are accepted to the Family Internship are encouraged to apply for provisional status as a Certified Family Life Educator (CFLE). Family life educators work in a variety of settings including social services, health services, child care, family support, youth programs, parent education, junior and senior high schools, and universities and colleges. The CFLE certification demonstrates expertise in a broad range of topics and increases professional credibility by validating students’ education and experience. The National Council on Family Relations (NCFR) has approved the Department of Human Development and Family Studies’ Family Support concentration as meeting the standards and criteria required for CFLE certification. Students may apply to NCFR for provisional CFLE designation upon completion of required coursework (see marked courses in the table below.) Upon meeting additional requirements listed on the NCFR website, students can apply for full certification after graduation.

LIFESPAN DEVELOPMENT CONCENTRATION
The Lifespan Development concentration focuses on learning about developmental tasks and developmentally-appropriate practices across the entire lifespan. Students in this concentration take courses in each of the developmental periods: childhood, adolescence, and adulthood. Students also gain expertise related to the social contexts impacting development, such as families and communities. Emphasis is placed on the impact of system dynamics, family systems, gender, and cultural differences on development. Students in the Lifespan Development concentration may also apply to take part in the Family Internship program during their senior year.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements
The core curriculum required of each Human Development and Family Studies student is designed to give a broad introduction to individual and family development and interpersonal relationships across the lifespan. Building off this curriculum, each student will select an area of concentration in Child Development, Family Support, or Lifespan Development that will guide further required coursework. With assistance from faculty advisors, students also choose supporting courses that allow them an individualized component to the major, tailored to their specific interests and career objectives. Lastly, the senior year culminates in the required capstone experience and optional internship opportunity.

Candidates for the Human Development and Family Studies degree must satisfy all of the University Discovery requirements in addition to satisfying the requirements of their HDFS concentration.

Concentrations and Requirements (p. 163)

Child Development Concentration (p. 163)
Child Development Concentration: ECE Teacher Preparation Program (p. 164)
Family Support/Provisional CFLE Concentration (p. 164)
Lifespan Development Concentration (p. 164)

Note: Students apply to the ECE Teacher Preparation Program during their Junior year.

CHILD DEVELOPMENT CONCENTRATION Requirements

Supporting Course Requirements (applies to all concentrations)

Supporting courses are intended to provide an individualized component to the HDFS curriculum. Because HDFS is interdisciplinary, this allows students to explore related areas that contribute to their academic and professional goals. Students must complete at least 8 additional HDFS credits of (this can include internships) as supporting coursework. The remaining 12 credits of supporting coursework can include additional courses within HDFS or outside of HDFS as long as those taken outside of HDFS:

1. At the 500-level or above
2. Approved by an HDFS advisor

Classes outside of HDFS meeting supporting course criteria are often found in the psychology, sociology, social work, women’s studies, education, and communication sciences and disorders departments.
Students who wish to become CFLEs are required to complete the Family Internship, including HDFS 782 Family Internship and HDFS 792 Family Internship Seminar. The Certified Family Life Education designation acknowledges the preventive focus of family life education and assures the designate has met or exceeded the high standards and criteria needed to provide quality family life education.

LIFESPAN DEVELOPMENT Curriculum

Student Learning Outcomes

- Use theoretical frameworks and empirical research to understand and explain child/lifespan development, family process and the interaction of individuals and families with society.
- Recognize and respect a diversity of family forms and processes. Understand how human development and family interactions are shaped by diverse personal contexts and cultures. Understand and be aware of one’s own biases, beliefs, and values.
- Understand ethical decision-making processes, and ethical standards and principles relevant to our discipline. Positively represent the profession in academic, professional and community settings.

Adolescent and Youth Development Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/adolescent-youth-development

Description

The departments of Recreation Management and Policy and Human Development and Family Studies offer an interdisciplinary minor designed to give students an opportunity to develop knowledge and skills regarding adolescence and youth development. The two required courses offer a foundation in theory, research, and practice, and students choose...
three additional courses in order to better prepare students to work with this age group.

For more information contact Dr. Cindy Hartman (cindy.hartman@unh.edu) in Recreation Management and Policy or Sahitya Maiya (sahitya.maiya@unh.edu) in Human Development and Family Studies.

## Requirements

The Adolescent and Youth Development minor requires students to complete 20 credits.

*Other adolescent or youth-based courses as approved by minor coordinator.*

- RMP majors may use RMP 668 Youth Culture and Programs to meet both major and minor requirements.
- The Adolescent and Youth Development Minor follows UNH’s policy on minors. Following University policy, students must complete 20 semester hours with a grade of C- or better and a 2.00 grade point average.
- No more than 8 credits used by a student to satisfy major requirements may be used for the minor.
- Students must submit a *Certification of Completion of Minor form* during their final semester to one of the Minor Coordinators: Dr. Cindy Hartman (cindy.hartman@unh.edu) in RMP or Sahitya Maiya (sahitya.maiya@unh.edu) in HDFS.

### Child Life Minor

[https://chhs.unh.edu/human-development-family-studies/program/minor/child-life](https://chhs.unh.edu/human-development-family-studies/program/minor/child-life)

**Description**

The department of Human Development and Family Studies offers a minor in Child Life. The minor introduces undergraduate students to the Child Life profession, which works with children, adolescents, and families facing challenges associated with hospitalization, medical procedures, illness, and disability. You will gain insight on how to support children and their families to effectively cope with the stress and anxiety of hospitalization using developmental play and normalized activities in their environment.

For students who wish to go on to become Child Life Specialists, the full list of UNH approved courses by the Association of Child Life Professionals can be found under HDFS Undergraduate Forms. [Click here to read more about ACLE certification.](https://chhs.unh.edu/human-development-family-studies/program/minor/child-life)

The Child Life minor may also be taken by HDFS students.

Individual course grades must be C- or above, and the overall grade-point average for the 20 human development and family studies credits must be at least 2.0.

### Kinesiology (KIN)

The mission of the Department of Kinesiology is to create, share, and apply knowledge in the promotion of health, physical activity, sport, and well-being. We achieve this through high quality teaching and...
mentoring of our students, conducting scholarly activity, and engaging in community outreach. Our programs purposefully blend theory, research, and practice to support the professional needs of our students in all stages of their careers.

The department offers four areas of study for majors: exercise science, health and physical education, health sciences and sport management and leadership. Candidates for degree requirements in any of the department majors must satisfy all University Discovery Program requirements in addition to satisfying specific program requirements.

https://chhs.unh.edu/kin

Programs

- Applied Human Anatomy & Physiology (p. 149)
- Coaching (p. 149)
- Exercise Science (p. 151)
- Health and Physical Education (p. 153)
- Health Sciences (p. 159)
- Kinesiology (p. 166)

Kinesiology Minor

https://chhs.unh.edu/kinesiology/program/minor/kinesiology

Description

The Department of Kinesiology offers an interdisciplinary curriculum for nonmajors, which is designed to provide students with the basic knowledge of human movement and sport sciences. The minor consists of courses offered by several options within the department.

Requirements

Minor Requirements

Complete a minimum of 20 credits approved by the department minor advisor.

Credits towards the minor come from courses in EXSC, HPE, HS, KIN, and/or SML.

No more than 6 of the 20 credits may be in activity or coaching courses.

Must have a C- (or better) in all graded courses. Pass/Fail option may NOT be used. Courses designated Credit/Fail MAY be used.

No more than 8 credits may satisfy BOTH major and minor requirements.

Please note: The designation of the completed minor will be "Kinesiology" which means students may create an emphasis in a particular area (i.e. Exercise Science, Health Sciences, Health and Physical Education, Sport Management and Leadership) or take classes from multiple areas in Kinesiology. For other minors in the Kinesiology area, please see here (https://chhs.unh.edu/kinesiology/program/minor/kinesiology).

Nursing (NURS)

The undergraduate nursing program is nationally accredited by the Commission on Collegiate Nursing Education

Students in the College’s Department of Nursing learn about relationship-based care, reflective thinking and clinical decision making while following guidelines for developing safe, quality clinical skills. Nursing students learn from faculty who serve as facilitators and mentors within a supportive, scholarly environment, and as graduates become part of the workforce that will help shape the future of healthcare.

https://chhs.unh.edu/nursing

Faculty

https://chhs.unh.edu/directory/all

Nursing Major (B.S.)

https://chhs.unh.edu/nursing/program/bs/nursing-major

Description

The nursing program faculty believe learning is a creative process wherein students are active participants in their education, growth, and development as professional nurses. Faculty members are facilitators and mentors to students within a supportive, scholarly environment.

The curricula are divided into biological, social sciences, and humanities as a foundation for courses in the major, and nursing courses, which emphasize relationship-based care, reflective thinking, clinical decision making, and the application of evidence-based guidelines to develop quality and safe clinical skills. Clinical experiences are offered in area health facilities, community health agencies, and a state-of-the-art simulation laboratory. The senior year culminates in a capstone practicum in which students apply curricular concepts in a precepted clinical experience.

A grade of C or better in high school chemistry is required, as well as biology or physics.

Students are responsible for their own transportation to clinical agencies, uniforms, professional equipment, health insurance coverage, yearly criminal background checks, drug screening, fingerprinting, yearly health assessment, and select immunizations and titers. Students must maintain certification in cardiopulmonary resuscitation at the American Heart Association Basic Life Support for Healthcare Professionals level. All clinical documents must be received by July 1st before the sophomore year, except flu vaccine, which is due by October 15th, and remain up to date until graduation. Clinical documents cannot expire during the academic year; documents that must be submitted yearly must be dated between May 1 and June 30. Students will be assessed a late fee if clinical documents are not received by the due date. Students will be
dropped from nursing courses if documentation is not received by the first day of class. Additional costs associated with the program include, but are not limited to, simulation laboratory fees, fees associated with program requirements, and attendance at professional meetings.

**Honors-in-Major Program**

The Honors-in-Major Program is offered to interested junior nursing students who achieve the required minimum cumulative GPA and minimum GPA in NURS courses at the end of the sophomore year in nursing and/or junior nursing students who are members of the University Honors Program. See Requirements tab for courses and more information.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Candidates for the nursing degree must satisfy all of the University Discovery Program requirements in addition to satisfying major requirements. Discovery courses listed below require a C or better in the major.

Prerequisite courses require grades of C or better and only one prerequisite course may be repeated one time in order to progress. Most of the prerequisite courses also meet Discovery requirements. Major courses require a minimum grade of C. Nursing courses may not be repeated. A cumulative grade-point average of 2.5 must be maintained throughout the program.

A course in statistics (HHS 540, PSYC 402, SOC 402, MATH 439) must be completed prior to, or taken concurrent with, nursing research. The statistics course requires a C or better in the major.

**Clinical Hours: 814***

These self-directed learning experiences, related to the student’s interests, are designed to help students acquire advanced knowledge and skills to undertake inquiry or scholarly projects. Students must submit a project description to a faculty adviser at the beginning of the senior year. Students present the results of this study at the Nursing Inquiry Day.

4. May be taken fall or spring semester

## Student Learning Outcomes

The undergraduate student is prepared to:

- Synthesize core knowledge from the liberal arts, sciences, and nursing as the foundation of professional practice.
- Integrate knowledge and skills to assess, design, implement, and evaluate nursing care in a safe, compassionate, culturally sensitive, evidence-based manner.
- Engage clients, families, and communities in collaborative decision-making incorporating evidence-based knowledge and anticipatory guidance.
- Employ team leadership and collaborative skills with other health professionals to optimize client and system outcomes.
- Recognize the influence of complex health systems on health care practice and advocate for policies that promote a socially just, patient centered healthcare system.
- Engage in scholarly inquiry to identify, evaluate and integrate the best current practice.
- Integrates health promotion, clinical prevention strategies when providing care at the individual or population level.
Occupational Therapy (OT)

Occupational therapy enables individuals of all ages to engage in everyday activities in the areas of work, self-care, home management, school, and leisure/play. Occupational therapists support people to promote their participation in desired activities in natural contexts. This process often involves working on skill development or adapting tasks or an environment to optimize peoples’ ability to fulfill their social roles and engage in activities that are meaningful and support health and well-being. A program of study in occupational therapy includes a foundation in the liberal arts; biological, behavioral, and health sciences; and discipline-specific studies in occupational science and occupational therapy.

The Professional Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. Their phone number is 303-652-AOTA and their website is: www.acoteonline.org

Graduates from an accredited program are eligible to sit for the certification examination for the occupational therapist, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be a registered occupational therapist (OTR). All states require licensure in order to practice, however, state licenses are usually based on the results of the NBCOT certification examination. A felony conviction may affect a person’s ability to sit for the NBCOT certification examination and obtain licensure.

Disability Studies Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/disabilities

Description

The minor in Disability Studies gives students the opportunity to explore the meaning, nature and consequences of disability from multiple perspectives. Ways of supporting people with disabilities and their families is addressed including the influences of disability policy, applications of technology, and societal and cultural attitudes and understanding related to persons with disability. This interdisciplinary program introduces topics such as exceptionality, the lived experience of disability and effects of stigma, disability policy, assistive technologies and universal design to enhance function and access, and health and human services for supporting individuals with disability. Students select from a wide range of electives to support their individual areas of interest. Students may expand career options by combining the minor in Disability Studies with majors such as Education, Occupational Therapy, Recreation Management and Policy, Psychology, Human Development and Family Studies, Communication Sciences and Disorders, Kinesiology, and Social Work.

When you minor in Disability Studies at UNH, depending on how you design your program and your course selection, you may work collaboratively with faculty from the Departments of Occupational Therapy, Recreation Management and Policy, Communication Sciences and Disorders, Social Work, Nutrition, Kinesiology, Human Development and Family Studies, and Education. You’ll also have the option of pursuing a faculty sponsored independent study or a small-scale research project.

Electives

Select 16 credits from the course list below. Note that any of the courses in the required course list above may be used as an elective course if not taken as the required course.

- OT 444 Living and Doing with Technology
- INTR 438 A Socio-cultural Perspective on the Deaf Community
- NUTR 740 Nutrition for Children with Special Needs
- OT 730 Assistive Technology for Enhancing Occupational Performance
- OT 733 Assistive Technology for Physical Access I: Electronic Technologies
- OT 734 Assistive Technology for Physical Access II: Mobility, Seating, and Transportation
- OT 735 Assistive Technology for Communication and Cognition
- OT 736 Assistive Technology for Vision and Hearing
- OT 520 Happy and Healthy at Work: Promoting Wellness, Diversity and Inclusion
- HMGT 520 Happy and Healthy at Work: Promoting Wellness, Diversity and Inclusion
- EDUC 760 Introduction to Young Children with Special Needs
- RMP 444A Taking the "Dis" out of Disability
- RMP 720 Adaptive Sport Facilitation for Recreation Therapy and Related Professions
- SW 704 Adolescents with Emotional and Behavioral Challenges
- HPE 781 Inclusion in Physical Education

1 The purpose of the independent study is to explore a topic that provides a detailed focus on an important issue related to individuals with disabilities. A student may also choose to engage in a small-scale research project to investigate an issue that affects individuals with disabilities. Each project will be negotiated with the student’s departmental faculty adviser and the coordinator of the minor program.

2 Prerequisite courses EDUC 500 Exploring Teaching and EDUC 402 Introduction to Educational Studies: Social Change and Education in Local and Global Contexts are waived with permission for students in non-education majors.
Please note: Additional elective courses may be added in the future as deemed appropriate and approved by disabilities studies coordinator.

Also note: Students must achieve C- or better and a 2.00 grade-point average in courses that the minor department approves. Courses taken on a pass/fail basis may not be used for a minor. No more than 8 credits used to satisfy major requirements may be used for a minor. There is no limit on the number of overlapping credits allowed between minors. Students should declare the intent to earn a minor as early as possible and no later than the end of the junior year. During the final term, an application should be made to the dean to have the minor show on the academic record.

**Occupational Therapy Major (B.S.)**

https://chhs.unh.edu/occupational-therapy/program/bs/occupational-therapy-major

**Description**

**Bachelor of Science to Advanced MS/OTD Program**

The University of New Hampshire Department of Occupational Therapy offers a Bachelor’s Degree leading to entry with Advanced Standing into our MS or OTD program. Students in the Bachelor of Science (BS) program smoothly enter into one of the graduate programs by completing professional level OT courses as part of their BS degree. The BS and MS degree programs are completed in five and half years, while the BS and OTD programs require 6 years with two summer terms. Students declare their intent to graduate with an Advanced Standing MS or an Advanced Standing OTD at the end of their sophomore year. Students may enter the BS program as first-year students or apply to transfer within UNH into the BS program during the fall semester of their sophomore year, space permitting. Students interested in transferring into this program should contact the Department of Occupational Therapy for information about transfer requirements, the application process and deadlines.

Students’ academic advisor guides them through a stream-lined application process to enter the Occupational Therapy: Advanced Standing MS or OTD Program during the senior year. Students must have a minimum of a 3.0 grade point average, earned a B- or above in all professional level OT courses (700 level or higher), with no more than 8 credits at B- pass all competency (practical) exams as part of OT courses, pass level I fieldwork, and meet professional behavioral standards, which are detailed in the OT Department Policy and Procedure Manual, available to all OT students on the department’s learning platform, MyCourses.

The Accreditation Council for Occupational Therapy Education (ACOTE), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929; (301)652-AOTA grants accreditation to entry level MS and OTD programs in the United States. Our Master's degree program is currently accredited by ACOTE.

The OTD program at the University of New Hampshire has received candidacy for accreditation from the ACOTE. The program must have a pre-accreditation review, complete an onsite evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the National Certification examination.

After completing the Master’s degree or OTD in occupational therapy, including 24 weeks of Level II Fieldwork, students will be eligible to sit for the national certification examination offered by the National Board for Certification in Occupational Therapy (NBCOT), which is required to practice as an occupational therapist. Detailed information regarding the Occupational Therapy: Advanced Standing MS and OTD Program may be found in the UNH Graduate Catalog. A felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

**Requirements**

**Degree Requirements**

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Students begin the BS curriculum with preprofessional courses, which include courses in biological and social sciences as well as occupational therapy. In addition to meeting the University Discovery Program requirements, students take the following courses during the first three years of the program.

<table>

Capstone:
- OT 741 Human Occupation

Total credits for BS-MS: 38-39

Total Credits 41-42

1 This course also fulfills the writing intensive in major course.

Students need to declare their choice for Advanced Standing MS or OTD by the end of their sophomore year. At the end of the senior year, students are awarded a Bachelor of Science Degree in Occupational Therapy. However, students must earn a graduate degree (MS or OTD) to become registered occupational therapists. Students apply to the Graduate School for Occupational Therapy: Advanced Standing MS or OTD Program during their senior year. An overall minimum grade point of 3.0 is required for admission to the MS Program or OTD program, and students must earn a minimum grade of B- in all OT classes at the 700 level, with no more than 8 credits of B- in OT courses at the 700 level, pass Level I Fieldwork, and meet professional behavior expectations. Please refer to the Graduate Catalog for additional information about the Advanced Standing MS and OTD Programs and the graduate portion of the professional occupational therapy curriculum including Fieldwork Level II requirements.

Students entering as first-year undergraduate students complete both the BS degree and Advanced Standing MS degree in 5.5 academic years (11 semesters and one January-term), including Level II Fieldwork, while those opting for the Advanced Standing OTD will complete the degree in 6 academic years including two summer terms (14 semesters total), including Level II Fieldwork and a Capstone experience. Students completing either of the advanced standing programs will be eligible to sit for the certification examination administered by the National Board of Certification of Occupational Therapists (NBCOT). A felony conviction may affect a student’s ability to complete fieldwork, sit for the NBCOT certification examination, and/or obtain state licensure.

Students are responsible for transportation to off-campus practicum and fieldwork locations.

Curriculum review and revision is undertaken annually. The department works closely with students during academic advising sessions and shares information about any policy and requirement changes during registration periods as well as throughout the academic year. Students also are expected to take an active role in verifying expectations and should check with their academic adviser each September for updated policies and requirements. Program requirements and policies for retention in the major are in the OT Department Policy and Procedure Manual, which is available online.

### Student Learning Outcomes

Student Learning Outcomes: BS in Occupational Therapy focuses on the study of human participation in life occupations and prepares students for an entry-level graduate degree to become registered occupational therapists. Occupations are the activities that people do every day across the lifespan, including but not limited to self-care, employment, volunteer work, leisure, and play. The aim of the BS program is to prepare students for employment in health services fields, or for graduate study in occupational therapy, or other varied fields and disciplines.

Upon graduation with a BS in OTS degree from UNH, students will:

- Critically evaluate biological, psychosocial, and educational theories that influence human behavior and occupational participation.
- Demonstrate an understanding of the value of human occupation in health and wellness.
- Demonstrate critical appraisal of how disease and disability influences health promotion and occupational well-being.
- Recognize the role of culture, socioeconomic status, abilities, and other factors on occupational performance and participation of all members of society.
- Demonstrate an understanding of concepts of occupational deprivation and occupational justice as related to health and well being for all people.
- Demonstrate competency in information and basic research literacy.
- Demonstrate professional behaviors and skills in written and oral communication.
- Be prepared to apply for graduate study in the field of occupational therapy or other disciplinary area of graduate study.
Recreation Management and Policy (RMP)

As the fabric of life in contemporary society grows in complexity, people are increasingly turning to leisure and recreation services to find meaning, renewal, and enrichment. Recreation services can improve public health and wellness, promote sustainable environments, develop a sense of community, and enhance the quality of life of all citizens. Recreation professionals work in diverse settings, including human services, health care, natural recreation resource areas such as parks, wilderness programs, and commercial recreation businesses. Population and economic projections suggest that recreation service industries will continue to expand and thereby continue to provide numerous professional career opportunities.

The Department of Recreation Management and Policy maintains three national accreditations. Our core is nationally accredited by the Council on Accreditation of Parks, Recreation, Tourism, and Related Professions (COAPRT). Our OLM option is accredited by the Association for Experiential Education (AEE). Further, our therapeutic recreation option is accredited by the Committee on Accreditation of Recreational Therapy Education (CARTE). CARTE is an approved accreditation program under the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The Department's curriculum supports a broad-based education and an opportunity to acquire specialized professional knowledge and skills. Graduates are employed in a broad range of settings, such as community recreation agencies, resorts, conference centers, youth services agencies, state or national parks, government agencies, universities, hospitals, rehabilitation centers, and long-term care facilities.

Curriculum Structure

Students entering the major may choose an option in Outdoor Leadership and Management ("OLM"), Program and Event Management ("PEM"), or Therapeutic Recreation ("TR"). The options include the professional core and required courses. Candidates for a degree in Recreation Management and Policy must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major option.

Professional Internship

A supervised internship (RMP 764 Internship) is required of all majors and serves as their major capstone requirement. The internship is designed to create a bridge between theory and practical application. Students, working with their advisers and the internship coordinator, select an appropriate setting based on their professional and career interests. They must register for an 8 or 12 credit full-time internship that ranges from 10 to 16 weeks and is under the supervision of a qualified professional. Specific requirements are identified in the Internship Manual available from the Department of Recreation Management and Policy.

Declaring a Major

First-year students entering UNH who wish to apply to the Bachelor of Science (B.S.) program in Recreation Management and Policy with an option in Outdoor Leadership and Management, Program and Event Management, or Therapeutic Recreation should contact the Office of Admissions. The admissions website contains complete campus visit information and an online visitor registration. It also contains admission criteria and important dates, as well as an online application form.

How to apply for students transferring from within UNH

Outdoor Leadership and Management: UNH's outdoor leadership and management program prepares students for dynamic careers in outdoor education, adventure programming, outdoor recreation management, parks and protected areas management, youth and after-school programming, and conservation. Our curriculum combines experiential learning in urban, rural and backcountry landscapes with a classic liberal arts education. You’ll gain a solid foundation in the theories, philosophies and methods of outdoor recreation leadership and management while gaining skills in outdoor activities such as climbing, canoeing and backpacking. Admission decisions are made after the student completes the online internal transfer application process and has a meeting with the OLM option coordinator. If you have questions about the program and event management option, please contact Nate Fitch (nate.fitch@unh.edu). OLM applications are accepted throughout the year and decisions are made on a rolling admission basis.

Program and Event Management: This option prepares students for supervisory or middle management positions and emphasizes planning, leadership, and administrative concepts in settings such as youth sport organizations, recreation resource management, business and entrepreneurial recreation, municipal recreation, campus recreation, residential communities, festivals and events planning, employee services recreation, recreational sports agencies, youth service agencies, and resorts. Admission decisions are made after the student completes the online internal transfer application process and has a meeting with the PEM option coordinator. If you have questions about the program and event management option, please contact Sean McLaughlin. OLM applications are accepted throughout the year and decisions are made on a rolling admission basis.

Therapeutic Recreation: The Therapeutic Recreation option prepares students for work primarily in clinical, allied health facilities such as hospitals, rehabilitation centers, mental health programs, and extended care facilities as well as inclusive community recreation programs. Admission decisions are based upon the content of the online application as well as a personal interview with the therapeutic recreation option coordinator. Students must have a minimum cumulative grade point average of 2.75 to be considered for admission into the major and it is highly recommended that students have completed or are enrolled in BMS 507 Human Anatomy and Physiology I or BMS 508 Human Anatomy and Physiology II at the time of application. If you have questions about the therapeutic recreation option, please contact Matt Frye (matt.frye@unh.edu).

To apply, we ask students to go through a short informational meeting with the TR Option Coordinator Matt Frye (matt.frye@unh.edu) prior to completing the online internal transfer application. TR applications are accepted throughout the year and decisions are made on a rolling admission basis.

Recreation Management and Policy Major: Outdoor Leadership and Management Option (B.S)

UNH's Outdoor Leadership and Management (OLM) Program is designed for students who want to study and work in outdoor programs, parks, and public or commercial recreation settings. Our graduates are guides, leaders, directors, and managers of agencies that provide healthy outdoor activities for people across their lifespan. Our curriculum combines experiential learning in urban, rural, and backcountry landscapes with a classic liberal arts education. You’ll gain a solid foundation in the theories, philosophies, and methods of outdoor recreation leadership and management while gaining skills in outdoor activities, pursuits or disciplines such as climbing, canoeing, and backpacking. This program will prepare you for dynamic careers in outdoor education, adventure programming, outdoor recreation management, parks and protected areas management, youth and after-school programming, conservation, and other outdoor fields.

LAP 500 Level Courses - Select 2 courses (with outdoor discipline) 4

Total Credits 66-68

Professional Internship

A supervised internship (RMP 764) is required of all majors and serves as their major capstone requirement. The internship is designed to create a bridge between theory and practical application. Students, working with their advisers and the internship coordinator, select an appropriate setting based on their professional and career interests. They must register for an 8 credit or 12 credit, 400 hour internship that is under the supervision of a qualified professional. Specific requirements are identified in the Internship Manual available from the Department of Recreation Management and Policy.

Student Learning Outcomes

- Students will know and demonstrate the nature and scope of the outdoor industry, including outdoor education, adventure leadership, and parks and protected-areas management.
- Students will know and demonstrate the techniques and processes used by professionals and staff in the outdoor industry.
- Students will know and demonstrate the foundation of the outdoor industry in history, science, and philosophy.
- Students will be able to demonstrate the ability to design, implement, and evaluate services that facilitate targeted human experiences and that embrace personal and cultural dimensions of diversity in outdoor settings.
- Students will demonstrate entry-level knowledge about operations, strategic management, and administration in the outdoor industry.
Students will demonstrate the potential to succeed as professionals at supervisory or higher levels in the outdoor industry through participation in structured practicum and internship experiences.

Recreation Management and Policy Major: Program and Event Management Option (B.S.)

https://chhs.unh.edu/recreation-management-policy/program/bs/recreation-management-policy-major-program-event-management-option

Description

This option prepares students for managerial positions in commercial, public, and nonprofit organizations that provide recreation and leisure services. Curriculum design emphasizes the effective and efficient planning, delivery, and evaluation of leisure-based programs, services, and enterprises. Applied experience is a component of most courses, in addition to a required practicum and the 10-16 week full-time internship under professional supervision. Depending upon the RMP electives and the career support emphasis or minor chosen, students may expect to find employment in a broad range of settings. Recent graduates have found employment in the areas of conference and event planning, municipal park and recreation services, recreational sports, commercial and entrepreneurial recreation businesses, youth-serving agencies, resorts, camps, and natural resource management positions in state and federal agencies.

- RMP 780 Event and Experience Design

Emphasis or Minor requirement 18-20

Emphasis (minimum of 18 credits) or Minor (18-20 credits) with C- or better, approved by their advisor.

Total Credits 84-92

1 RMP courses completed to fulfill the elective course requirement may not be used to fulfill the emphasis area requirement; unless prior approval from the student’s academic advisor is granted.

Professional Internship

A supervised internship (RMP 764) is required of all majors and serves as their major capstone requirement. The internship is designed to create a bridge between theory and practical application. Students, working with their advisers and the internship coordinator, select an appropriate setting based on their professional and career interests. They must register for an 8 or 12 credit full-time internship that ranges from 10 to 16 weeks and is under the supervision of a qualified professional. Specific requirements are identified in the Internship Manual available from the Department of Recreation Management and Policy.

Student Learning Outcomes

- Students will know and demonstrate the nature and scope of the recreation, events, and tourism profession and their associated industries.
- Students will know and demonstrate the techniques and processes used by professionals and staff in the recreation, events, and tourism industry.
- Students will know and demonstrate the foundation of the recreation, events, and tourism profession in history, science, and philosophy.
- Students will demonstrate the ability to design, implement, and evaluate services that facilitate targeted human experiences and that embrace personal and cultural dimensions of diversity.
- Students will demonstrate knowledge about operations, strategic management, and administration in recreation, events, and tourism organizations.
- Students will demonstrate the potential to succeed as professionals at supervisory or higher levels in recreation, events, tourism, or related organizations through participation in structured practicum and internship experiences.
Recreation Management and Policy Major: Therapeutic Recreation Option (B.S.)

https://chhs.unh.edu/rmp/therapeutic-recreation-bs

Description

Therapeutic recreation utilizes recreation to assist people with disabilities or illnesses to develop and use their leisure in ways that enhance health, independence, and well-being. Therapeutic recreation recognizes the importance of quality of life and uses activities to remediate or rehabilitate functional abilities. Therapeutic recreation services are provided in a variety of settings, including hospitals, long-term care facilities, residential treatment facilities, schools, home health care, community recreation, correctional facilities, rehabilitation centers, camp and outdoor education centers, and adult day programs. Observation and applied experience is a component of several courses. Students complete a 14-16-week full-time clinical internship under the supervision of a certified therapeutic recreation specialist (CTRS). The Bureau of Labor Statistics occupational outlook reports the employment of recreational therapists is projected to grow 8 percent from 2019 to 2029, which is much faster than the average for all occupations. As the large baby-boom generation ages, they will need recreational therapists to help treat age-related injuries and illnesses, such as strokes. Recreational therapists will also be needed to help patients manage chronic conditions such as diabetes and obesity (Bureau of Labor Statistics). A CNN Money report identifies recreation therapy among the top ten “best jobs for saving the world.” In particular, they note the profession’s high benefit to society and high personal job satisfaction (CNN Money Magazine).

Upon successful completion of this option, students are prepared to meet sitting requirements for the National Council for Therapeutic Recreation Certification Examination. Students/graduates who pass the NCTRC exam and attain the CTRS are eligible to seek licensure to practice in the state of New Hampshire.

Students may be required to submit to a criminal background check.

Total Credits: 92-94

1 RMP majors cannot count RMP 490 Recreation & Tourism in Society toward the University Social Sciences requirement.

2 All RMP students must complete an 8 or 12 credit hour internship.

3 Or other TR related courses as approved by Academic Advisor.

Professional Internship

A supervised internship RMP 764 is required of all majors and serves as their major capstone requirement. The internship is designed to create a bridge between theory and practical application. Students, working with their advisers and the internship coordinator, select an appropriate setting based on their professional and career interests. They must register for an 8 or 12 credit full-time internship that ranges from 14 to 16 weeks and is under the supervision of a Certified Therapeutic Recreation Specialist. Specific requirements are identified in the Internship Manual available from the Department of Recreation Management and Policy.

Student Learning Outcomes

- Students will integrate an understanding of history, service models, theory/philosophy, ethics, credentials, professional conduct, evidence-based practice and professional development with Recreational Therapy (RT) practice.
• Students will develop competence to individually screen, assess and systematically collect comprehensive and accurate data about patients/clients in an efficient and effective manner and to analyze the data collected to determine the course of actions subsequent to an individualized treatment/program plan.

• Students will develop competence in the planning and development of individualized treatment plans that identify functional outcome goals, modalities, facilitation techniques and interventions based on assessment data collected and evidence regarding the diagnosis and treatment of specific medical, psychiatric and other disabling conditions.

• Students will know how to use structured, systematic and evidence-based treatment interventions and facilitation techniques to improve patient/client functioning and independence in life activities.

• Students will develop competence to implement the individualized treatment/program plan using appropriate evidence-based treatment interventions and programs to restore, remediate, or rehabilitate patient/client functioning as well as to reduce or eliminate the limitations to participation in life activities resulting from medical, psychiatric or other disabling conditions.

• Students will acquire specific modality/skills and facilitation techniques used as treatment interventions in Recreational Therapy practice.

• Students will systematically conduct evaluation and research to determine the effectiveness of treatment interventions and programs used to reach patient/client outcomes.

• Students will develop the competencies to manage a Recreational Therapy practice, department, and staff.

• Students will develop an understanding of human anatomy and physiology, growth/development, psychology, functioning in life activities and an understanding of health care services to serve as a foundation for Recreational Therapy practice.

• Students will develop entry-level clinical proficiency and professional behavior through field-based clinical opportunities in accordance with professional standards of practice in Recreational Therapy.

### Adolescent and Youth Development Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/adolescent-youth-development

#### Description

The departments of Recreation Management and Policy and Human Development and Family Studies offer an interdisciplinary minor designed to give students an opportunity to develop knowledge and skills regarding adolescence and youth development. The two required courses offer a foundation in theory, research, and practice, and students choose three additional courses in order to better prepare students to work with this age group.

For more information contact Dr. Cindy Hartman (cindy.hartman@unh.edu) in Recreation Management and Policy or Sahitya Maiya (sahitya.maiya@unh.edu) in Human Development and Family Studies.

#### Requirements

The Adolescent and Youth Development minor requires students to complete 20 credits.

Other adolescent or youth-based courses as approved by minor coordinator.

- RMP majors may use RMP 668 Youth Culture and Programs to meet both major and minor requirements.
- The Adolescent and Youth Development Minor follows UNH’s policy on minors. Following University policy, students must complete 20 semester hours with a grade of C- or better and a 2.00 grade point average.
- No more than 8 credits used by a student to satisfy major requirements may be used for the minor.
- Students must submit a Certification of Completion of Minor form during their final semester to one of the Minor Coordinators: Dr. Cindy Hartman (cindy.hartman@unh.edu) in RMP or Sahitya Maiya (sahitya.maiya@unh.edu) in HDFS.

#### Outdoor Adventure Recreation Minor

https://chhs.unh.edu/recreation-management-policy/program/minor/outdoor-adventure-recreation

#### Description

The purpose of the minor in Outdoor Adventure Recreation is to complement major courses of study that prepare students for professional fields that work in outdoor environments across human service, natural resources, educational, or recreation sectors. It will provide an orientation to the technical, risk management, and leadership skills required for personal preparedness and program organization involving backcountry and facilities-based adventure activities. In addition, the minor seeks to improve the standards for fieldwork in professional fields that use the outdoors by offering high-quality training that employs current risk management principles that govern engagement in outdoor activities.

#### Program Objectives:

- Provide the highest quality professional preparation in outdoor technical skills
- Surpass national standards so students can pursue certifications if desired
- Cultivate life-long learners who are motivated to seek continuous improvement

The departments of Recreation Management and Policy and Human Development and Family Studies offer an interdisciplinary minor designed to give students an opportunity to develop knowledge and skills regarding adolescence and youth development. The two required courses offer a foundation in theory, research, and practice, and students choose three additional courses in order to better prepare students to work with this age group.

For more information contact Dr. Cindy Hartman (cindy.hartman@unh.edu) in Recreation Management and Policy or Sahitya Maiya (sahitya.maiya@unh.edu) in Human Development and Family Studies.
• Improve quality and help to reduce risks across professional fields that depend on a common skillset
• Expand participation in outdoor activities both on campus and in public and private sectors
• Enhance the experiences of future participants by emphasizing best practices that validate a range of life experiences, identities, and goals

Recreation Management Minor

Description

The recreation industry is a broad field including festival and event planning, non-profit administration, travel and tourism, sport, municipal recreation, and outdoor recreation. This industry is experiencing worldwide growth which is opening up tremendous workforce opportunities. The primary goal of the recreation management minor is to provide a basic understanding of the recreation industry and the variety of careers associated with this industry for students interested in staying on their existing academic pathway. The required core course for this minor, provides a comprehensive overview of the recreation industry. Students select additional elective courses from a list of offerings that lend themselves to specific areas of knowledge and interest.

Requirements

In total, five courses (18-20 credits) are required to complete this minor.

Social Work (SW)

The Department of Social Work’s undergraduate program is accredited by the Council on Social Work Education (CSWE) and must meet rigorous academic standards to retain this accreditation. Social work majors pursue a program that encompasses the professional social work competencies of professional identity, critical thinking, knowledge of diversity and human rights, social, environmental and economic justice, social welfare policy and services, social work practice with all client system sizes, human behavior in the social environment, research, and ethics.

According to the National Association of Social Workers (NASW), "The social work profession provides ethical, practical, and compassionate leadership to help people confront and resolve personal and social challenges" through their work with individuals, families, small groups, organizations, and communities. All social work majors complete a field internship under the direction of a qualified supervisor.

Social Work Major (B.S.)

https://chhs.unh.edu/social-work/program/bs/social-work-major

Description

The Department of Social Work's undergraduate program is accredited by the Council on Social Work Education (CSWE) and must meet rigorous academic standards to retain this accreditation.

The Department of Social Work's undergraduate program offers both a major and a minor in social work. It is a specialized degree that prepares graduates for generalist social work practice with a solid foundation in the liberal arts and in the knowledge, skills, and value base of social work. Through the mastery of core competencies, social work graduates apply their education working with individuals, families, groups, organizations, and communities. In addition, the program prepares qualified students to pursue graduate education in schools of social work and related fields.

Social work majors earn a B.S. degree in social work. Graduates are eligible for practice in a variety of social work settings throughout the United States. In preparation for graduate school, the program offers an Accelerated Masters that qualified students can consider applying for their junior year. In addition, qualified graduates are eligible to apply for advanced standing in M.S.W. programs that offer advanced standing. Depending upon the program, this can mean earning the M.S.W. in one calendar year versus two academic years.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of the social work major.

Students must maintain a GPA 2.0 and earn a C or better in the 13 social work major courses. In addition, students are expected to successfully complete three additional courses as part of a liberal arts foundation for the major. Students are required to complete 40 hours of advisor approved human service hours by end of first semester junior year.

To connect the theoretical and conceptual content of the classroom with the practice world, students must complete:

- 40 hours of human service related work in an approved agency/program setting by the end of the semester when they apply to the field. Twenty of the forty hours must be in the same agency/program. The remaining hours may be across multiple sites/programs. This experience may be paid or volunteer and must be pre-approved by the student's faculty adviser. The service hours must be completed post high school and by the end of the semester when field applications are due.
- Students complete a 450-hour internship over two semesters during the senior year. This is the senior capstone experience. The field placement in the final year of the baccalaureate program is arranged between the student and the field education coordinator.

In compliance with CSWE accreditation standards, the B.S. in social work program does not grant social work course credit for life or work experience.

**Gerontology Multidisciplinary Minor**

https://chhs.unh.edu/social-work/program/minor/gerontology

**Description**

The gerontology multidisciplinary minor (GMM) provides students with the opportunity to examine and evaluate the aging process as it affects the individual and society within the United States and in the world. Through a multidisciplinary course selection, students develop an understanding of aging from a variety of perspectives with a focus on how people age physically, cognitively, emotionally, and socially. Students are encouraged to analyze the historical and philosophical foundation from which policies, programs, and professional activities affecting the aged are developed, implemented, and evaluated. The purpose of GMM is to prepare students as they enter their career fields on the effects that the growing elderly population will have in every component of modern life.

**Requirements**

To complete a minor in gerontology students are required to take a minimum of 20 credits.

- Special Topic courses on aging-related topics can be used for GMM if approved by the GMM coordinator
- The GMM follows UNH’s policy on minors. Following University policy, students must complete 20 credit hours with a grade of C- or better and a 2.00 grade point average.
- Students must submit a Certification of Completion of Minor form during their final semester to the GMM Coordinator: Dr. BoRin Kim in the Department of Social Work.

Sport Management and Leadership

- Sport Management and Leadership Major (B.S.) (p. 180)
- Sport Management Minor (p. 182)

Sport Management and Leadership Major (B.S.)

https://chhs.unh.edu/kinesiology/program/bs/sport-management-leadership-major

**Description**

The Sport Management and Leadership Major at UNH prepares students for successful careers in the sport industry. The SML major meets the needs of the ever-changing sport marketplace, by balancing academic preparation through related coursework with extensive opportunities to gain experience in the sport industry. Analyzing and integrating the context/culture of sport is embedded throughout our curriculum and grounds students’ preparation for careers in interscholastic, intercollegiate, and professional sport including sport marketing, event management, coaching, administration, and sport media/communication. SML also prepares students for graduate study in areas such as sport law, sport business, sport psychology, or sport communication.

Majors take a core of foundation courses, in addition to applied electives and choose one of three focus areas: Sport Marketing and Event Management, Coaching/Athletic Administration, or Sport Media/Communication. In addition, a targeted internship experience is required since it is critical to career development. Students in this major are expected to complete a minor, cognate or a double major in a related field (e.g. business, communication, English/journalism, psychology, education) that ensures breadth and depth as well as appropriate knowledge and skills for entry into a sport-related career. Interested students should consult with major coordinator, Gretchen Browne, Gretchen.Browne@unh.edu.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Majors must earn a grade of B- or better in SML 580 Sport Industry, and a grade of C or better in an approved statistics course as well as each required Sport Management and Leadership course.

**Focus Areas**

Students must select one of three focus areas: 12 credits - 1 required four credit course/ 8 advisor approved credits from within the focus area.

**Sport Marketing and Event Management**

- SML 564 Introduction to Sport Marketing 4 credits
- Select 8 credits from the following:
  - SML 630 Sport Facility and Event Management 4 credits
  - SML 634 Sport Sponsorship and Sales 4 credits
  - SML 764 Advanced Sport Marketing 4 credits
  - SML 738 Sport Finance 4 credits
  - SML 643 Social Media Marketing in Sport 4 credits

**Coaching/Athletic Administration**

- SML 565 Principles of Coaching 4 credits
- Select 8 credits from the following:
  - SML 565A Clinical Practice in Coaching 2 credits
  - SML 560 Sport Psychology 4 credits
  - SML 630 Sport Facility and Event Management 4 credits
  - SML 765 Advanced Topics in Coaching 4 credits
  - SML 780 Psychological Factors in Sport 4 credits
  - SML 521 Theory of Coaching Basketball 2 credits
  - SML 523 Theory of Coaching Ice Hockey 2 credits
  - SML 525 Theory of Coaching Soccer 2 credits
  - SML 528 Theory of Coaching Track and Field 2 credits
  - SML 740 Athletic Administration 4 credits

**Sport Media/Communication**

- SML 592 Sport Media Relations 4 credits
- Select 8 credits from the following:
  - SML 631 Sport Media Production 4 credits
  - SML 643 Social Media Marketing in Sport 4 credits
  - SML 564 Introduction to Sport Marketing 4 credits
  - SML 630 Sport Facility and Event Management 4 credits

**Electives: Select 12 credit hours min. from the following:**

- SML 568 Global Perspectives in Sport 4 credits
- SML 764 Advanced Sport Marketing 4 credits
- SML 738 Sport Finance 4 credits
- SML 634 Sport Sponsorship and Sales 4 credits
- SML 564 Introduction to Sport Marketing 4 credits
- SML 565A Clinical Practice in Coaching 2 credits
- SML 560 Sport Psychology 4 credits
- SML 565 Principles of Coaching 4 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.
All students are required to complete an advisor approved minor, cognate or double major or 20 credits of coursework in a related field and approved in advance by faculty adviser.

 Majors must complete a minimum of 150 hours of industry experience before they can take SML 761 Senior Seminar Sport Management and Leadership. Students must be enrolled as a sport management and leadership major for one full semester before taking SML 761 Senior Seminar Sport Management and Leadership. See adviser for details.

 All students must have a minimum grade of C in Statistics, PSYC 402, SOC 402, ADMN 510 or HHS 540, or an approved Statistics course.

 Electives can include any courses listed within any focus area or the two additional courses listed below, including an additional 4 credits of internship. Credits applying to a declared focus area cannot also count as elective credits.

 Internal transfer applicants to Sport Management and Leadership must have at least a 2.5 GPA as well as a minimum grade of C in Statistics (PSYC 402, SOC 402, ADMN 510 or HHS 540 or another approved statistics course) and a minimum grade of B- in SML 580 Sport Industry.

### Recommended Major Sequencing of Courses

This list only includes major classes. Students should be registered for, and take an average of 16 credits per semester to be 'on track' to graduate in 4 years. In most semesters, this means a student will be taking Discovery or elective courses, to meet this 16 credit 'load'.

### Student Learning Outcomes

- SML students will understand the socio-cultural components of sport integrated throughout the curriculum while translating theory to practice in order to apply classroom knowledge in the sport setting.
- SML students will distinguish and employ effective leadership principles, management styles, and decision-making skills in sport organizations.
- SML students will identify and understand major issues in sport and how they can reflect as well as bring about change in society relative to diversity, equity, and inclusion.
- SML students will understand the importance of working collaboratively in order to effectively solve problems and reach organizational goals.
- SML students will be exposed to the basic operating principles in the sport industry in order to gain an understanding of the potential career paths.
• SML students will be able to organize, apply and synthesize information and ideas while effectively expressing these in both oral and written form (critical and technical) through various contexts, technologies and platforms.
• SML students will develop, utilize and reflect on professional skills while demonstrating an ability to self-advocate in their career development.
• SML students will apply critical thinking and problem-solving skills to develop and analyze research data on issues related to the sport industry.

Sport Management Minor
https://chhs.unh.edu/kinesiology/program/minor/sport-management

Description

The Sport Management minor offers an opportunity for students outside of the major to strategically take classes in our SML curriculum, specifically designed to provide students with the basic knowledge of sport management. The minor consists of two required Sport Management courses and then a variety of options across our SML curriculum and within Paul College.

Admission into the minor is based on successful completion of SML 580 Sport Industry and a minimum GPA of 2.0. Please contact sophia.min@unh.edu for additional information.

Requirements

• To graduate with a sport management minor, individuals must earn a grade of C- or better in all courses associated with the minor.
• Sport Management and Leadership/Sport Studies majors are not permitted to minor in sport management.

1. SML 580 Sport Industry should be the first class students take in this minor. Additionally, enrolling in this class is when a student fills out the intent to minor form.
2. If not taken as one of the two required courses.

College of Liberal Arts

Michele Dillon, Dean
Jenni Cook, Associate Dean

Scott Weintraub, Faculty Fellow

It is the purpose of the College of Liberal Arts, as a center of learning and scholarship, to help students achieve an understanding of the heritage of civilization and to educate them in the tradition of the past and realities of the present so they may recognize and act upon their obligations to the future.

The college seeks to meet the educational needs of each student through the development of interests and skills, which, combined with the individual’s potential, make possible a richer, more useful life.

Degrees

Bachelor of Arts

These programs primarily provide a broad liberal education along with depth in a major. Requirements for the bachelor of arts degree and information regarding the majors that lead to a bachelor of arts are outlined under Programs of Study (p. 186).

Bachelor of Fine Arts

This curriculum provides training for students who plan to enter a professional graduate school. Requirements for the bachelor of fine arts degree are outlined under Programs of Study/Art and Art History (p. 194).

Bachelor of Music

This curriculum provides professional training in performance, composition, music education, and music pre-teaching and allows students to develop their talent to a standard equivalent to the one achieved at conservatories of music. Requirements for the bachelor of music degree and information regarding the curriculum are presented in Programs of Study/Music (p. 252). Degrees include Music Education, Pre-Teaching, Performance and Composition.

Bachelor of Science

This curriculum provides strong preparation for entry into graduate programs in neuroscience, behavior, pharmacology and medicine. Requirements for the bachelor of science degree and information regarding this major are outlined under Programs of Study/Neuroscience and Behavior (p. 265).

The homeland security major (p. 441), offered on both the Durham and Manchester campuses, also leads to a bachelor of science degree.

Combined Programs of Study

In addition to pursuing a single major, students may combine programs of study as follows:

Minors: Students may pursue one or more minors, each typically comprised of 5 courses. Minors are available in nearly every discipline within the College of Liberal Arts.

Cognates: Students may pursue one or more cognates, each typically comprised of 3 courses and intended to develop career-oriented skills. The list of cognates and their requirements are found under Cognates (p. 203).

Second (Double) majors: Students may choose to fulfill the requirements of two dissimilar major programs.

Dual majors: Students may choose to fulfill the requirements of a dual major, typically comprised of 8 courses. Dual majors are designated
programs that must be paired with another major of any discipline. Dual majors in the College of Liberal Arts are educational studies (p. 214), humanities (p. 243), global studies (p. 275) and justice studies (p. 246).

See Special University Programs (p. 649) for information about the Sustainability dual major.

Student-designed majors: Under special circumstances, students may design their own majors.

Dual-degree programs: Students may choose to fulfill the requirements of two separate degrees, such as a B.A. and a B.S.

Interdisciplinary opportunities: See the Interdisciplinary Studies web page for the complete list of interdisciplinary programs within the College of Liberal Arts.

Proficiency in a Foreign Language

Please see the explanation of this University requirement under Foreign Language Requirement (p. 31): Bachelor of Arts.

Within the College of Liberal Arts, only those students majoring in linguistics, philosophy, psychology, sociology, theatre and dance, or women's and gender studies may use American Sign Language (ASL) to fulfill their foreign language proficiency requirement. English teaching majors who plan to pursue deaf studies may petition the English department to use ASL to fulfill their foreign language proficiency requirement.

COLA Study Abroad

cola.unh.edu/cola-study-abroad

The College of Liberal Arts offers a number of managed study abroad programs that are administered by college faculty and the College of Liberal Arts. These programs provide opportunities for liberal arts students as well as students in other colleges to experience and learn about different cultures and, in non-English-speaking countries, to increase proficiency in a foreign language.

Because the college administers these programs, registration, finances, and other logistics are streamlined and simple. Students pay UNH tuition and a single program fee, which covers housing, excursions, and, in some cases, board. Most UNH student fees are waived with the exception of the technology fee, a study abroad administration fee, and an international travel insurance fee. Students are eligible for federal financial aid for the semester-long programs.

Please see the list of eligibility requirements under Study Abroad Programs (p. 643).

To learn more about any of the programs, contact the program director listed on the website for each program or Mike Merrill, the study abroad advisor at michael.merrill@unh.edu.

Career and Professional Success

cola.unh.edu/careers

The College of Liberal Arts is committed to helping students achieve success in their career and professional endeavors. From one-on-one career counseling appointments to internship placements and employer visits to campus, the Career and Professional Success office supports students with the tools and resources to secure meaningful, impactful, and rewarding careers.

The Career and Professional Success office is located at 102 McConnell Hall.

Research Centers

Center for the Humanities

cola.unh.edu-center-humanities

The Center for the Humanities fosters excellence in the humanities, broadly conceived, at the University of New Hampshire. Center resources and programs support faculty research, encourage reflection and inquiry across the University community and beyond, create interdisciplinary initiatives in many forms, and undertake special projects to raise the visibility of the humanities. To accomplish this, the center endeavors to support the highest quality work by UNH humanities faculty, to build productive collaboration among faculty, to create singular projects that advance its goals, and to be a center of innovation, planning and inspiration for the humanities at the University of New Hampshire. By pursuing its goals, the center supports the University’s research mission in particular, as well as its academic plan.

The center is the sponsor of the Saul O Sidore Memorial Lectures and the James H. and Claire Short Hayes Chair in the Humanities.

Crimes Against Children Research Center

www.unh.edu/ccrc

The Crimes Against Children Research Center (CCRC) is concerned with all forms of crimes against children and adolescents, from birth through age 17, both within and outside the family, both known and unknown to law enforcement. These include criminal acts as defined by law, such as sexual assault, abduction, theft, robbery and aggravated assault against children. But it also includes child abuse in all its forms—physical, sexual, emotional—and child neglect, as well as child-to-child violence, such as peer and sibling assaults and bullying. It also includes indirect victimization, where children witness or are affected by the crime victimization of a family member or friend.

The CCRC, created in 1998, grew out of and expands upon the work of the UNH Family Research Laboratory, which has been devoted to the study of family violence and related topics since 1975. Associated with the center is an internationally recognized group of experts who have published numerous books and articles concerning the incidence and impact of violence against children.

CCRC staff has contributed to many pioneering national crime studies, including National Incidence Study of Missing, Abducted, Runaway and Throwaway Children; National Family Violence Survey; National Youth Victimization Prevention Survey; National Survey of Sexual Abuse in Day Care; Developmental Victimization Survey; Youth Internet Safety Surveys; and Multisite Evaluation of Children’s Advocacy Centers.

The CCRC is directed by David Finkelhor, who is also the director of the Family Research Laboratory and professor of sociology at the University of New Hampshire. Finkelhor has been researching criminal violence against children since 1978 and is the author and editor of 12 books and more than 100 articles on the subject.

Family Research Laboratory

cola.unh.edu-family-research-laboratory
Since 1975, the Family Research Laboratory (FRL) has devoted itself primarily to understanding family violence and the impact of violence in families. As public and professional interest in family violence has grown, so has the need for more reliable knowledge. The FRL seeks to fill that need through comprehensive literature reviews, new theories and methodologically sound studies. Researchers at the FRL pioneered many of the techniques that have enabled social scientists to estimate directly the scope of family violence. These efforts have brought international recognition to the FRL.

The FRL is unusual among research centers in the field because it addresses all aspects of the family, violence and abuse. Topics undertaken by the FRL include physical abuse of children, corporal punishment of children, sexual abuse of children, physical abuse of spouses, dating violence, abuse of the elderly, intra-family homicide, rape and marital rape, violence between siblings, peer victimization of children, pornography, and missing and abducted children. This variety of topics is a result of beliefs that have guided FRL research: that various forms of family problems are interrelated, that conflict is as basic to family life as are love and cooperation, and that much of the conflict and violence in the world outside the family can be traced to roots within the family. This holistic view of family violence has contributed both diversity and richness to the FRL’s work.

The FRL’s prominence in the field is in part a result of the large number, variety and scope of its publications. In a span of 10 years, FRL staff members have published more than 45 books and more than 740 articles on family violence.

The FRL is housed in a suite of offices in McConnell Hall. The FRL is directed by David Finkelhor, professor of sociology and director of the Crimes Against Children Research Center.

The UNH Survey Center is a full-scale, non-partisan academic survey research center, committed to providing university researchers, government and business leaders, and private organizations with reliable information about public attitudes concerning important policy matters. It is nationally known for its public opinion and political polling for CNN, Fox News and WMUR-TV.

The UNH Survey Center has conducted survey research projects at the University of New Hampshire since 1986: state, regional and national general population surveys based on probability sampling; surveys that target specific populations; surveys that utilize complex stratified sampling techniques; and panel studies. The Survey Center conducts telephone, mail and web surveys, as well as focus groups and other qualitative research projects.

The UNH Survey Center is located at 9 Madbury Road, Suite 401 and features a 41-station Computer-Assisted Telephone Interviewing (CATI) system. The Survey Center is directed by Andrew E. Smith, who is also associate professor of practice in political science.

**Related Research Centers**

**Carsey School of Public Policy**

carsey.unh.edu

The Carsey School of Public Policy at the University of New Hampshire is a nationally acclaimed resource for research, leadership development and engaged scholarship relevant to public policy. The school's activities address the most pressing challenges of the twenty-first century, striving for innovative, responsive and equitable solutions at all levels of government and in the for-profit and nonprofit sectors. Faculty and students throughout the College of Liberal Arts serve as staff, fellows, researchers and assistants in the school.

**Prevention Innovations Research Center**

Prevention Innovations Research Center is a research center at the University of New Hampshire made up of researchers and practitioners who work collaboratively to develop and evaluate prevention strategies, evidence-based measures to document the problems of sexual and relationship violence, stalking and harassment, and comprehensive community tools to effectively address the causes of violence. The Prevention Innovations Research Center (PIRC) assists high schools, colleges and universities, the United States Military and federal, state and local researchers and practitioners to develop, evaluate and implement model policies, procedures and programs to end sexual and relationship violence, stalking and harassment. PIRC plays a prominent role in working with New Hampshire criminal justice, advocacy and crisis organizations and state offices.

The Prevention Innovations Research Center is recognized for its groundbreaking research in the field of sexual violence prevention and response. PIRC has conducted first-of-its-kind research on campus violence, LGBTQ+ victimization, the economic cost of sexual violence and community responsibility in violence prevention. The Center's staff and fellows are nationally and internationally recognized leaders in prevention and response who design and provide cutting-edge contributions to evidence-based practices in prevention and make significant contributions to scholarship, programming and policy making in the field. Their efforts emphasize the importance of using a community bystander focus while examining the continuum of violence.

A cornerstone of PIRC's mission is to mentor the next generation of researchers and practitioners. The Susan Schechter Domestic and Sexual Violence Social Justice Laboratory (Schechter Lab) is an interdisciplinary research laboratory within the Prevention Innovations Research Center where undergraduate and graduate students earn academic credit for their role as research assistants and work with members of the staff on their research, report writing and publications. The Sharon B. Murphy Scholarship supports undergraduate and graduate student scholarship in the fields of domestic and sexual violence and stalking for work within the Schechter Lab.

PIRC works with practitioners and community partners to implement and refine approaches to prevention and response. This collaborative approach has contributed significantly to scholarly research, practice literature, institutional responses to sexual and relationship violence, sexual harassment and stalking, and technology transfer. PIRC provides effective, research-informed solutions to create safe, equitable environments.

**Academic and Cultural Centers**

**Global Racial and Social inequality lab**

cola.unh.edu/global-racial-social-inequality-lab

The Global Racial and Social inequality lab (GSRIL) is a dynamic site of research, pedagogical and community engaged activity. Faculty and students (undergraduate and graduate) already working on or interested in projects that variously engage with racial and social inequality are invited and encouraged to participate in the GSRIL. Additionally, the Lab encourages faculty and student engagement on these thematic
areas by incentivizing new and continuing research on such topics and with the intention to apply for external funding to support this research. The Lab provides pedagogical workshops on evolving best practices in creating inclusive syllabi and inclusive classrooms, as well as provides a venue for open discussion of complex issues. Additionally, the GRSIL serves as the administrative home of COLA’s many interdisciplinary minors focused on inequality. The Lab uses its analytical expertise to facilitate community partnerships, develop internships and expand our collaborative relationships with community colleges and non-profit community organizations in the region.

**Museum of Art**

[cola.unh.edu/museum-art](cola.unh.edu/museum-art)

The Museum of Art serves as the New Hampshire Seacoast’s premier public art museum and, for more than 50 years, has remained a vital resource for the visual arts, serving the University, local, and regional communities. Visitors and members gather to enjoy a wide variety of changing exhibitions, as well as annual exhibitions featuring UNH studio faculty and student work. Exhibitions of outdoor sculpture by regional artists are shown regularly in the Mills Courtyard. Accompanying programs include gallery talks, lectures, concerts, family programs and special events. The museum’s summer Art Camp provides K-12 students with quality hands-on visual arts and instruction.

The museum’s diverse permanent collection includes more than 1,800 works of art, from prehistoric to contemporary. The works are exhibited in the galleries and the Collection Study Area on a regular basis and are also used by faculty, students and scholars for teaching, research and interdisciplinary study.

Located in the Paul Creative Arts Center, the museum is open to students, faculty, museum members and the general public free of charge. For more information, call (603) 862-3712 or visit [cola.unh.edu/museum-art](cola.unh.edu/museum-art).

Africana and African American Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/africana-african-american-studies

Description

The Africana and African American studies minor (AFAM) encompasses multidisciplinary, comparative and global research with and about peoples and cultures of Africa and its Diasporas. Diaspora is defined by dispersals and mobilities of communities, the result of exploration, migration and or coercion. African Diaspora communities exist everywhere, from Europe, the Middle East and Asia, to South and North America. We consider how Africana heritage and culture is shaped by these long-standing, long-range connections between diverse places, making our focus importantly geographic and our content intrinsically cosmopolitan.

We foreground the experiences of African, African Diaspora and African American communities in our research, teaching and engagement. We consider how understanding exceptional experiences and histories of exclusion and communion can inform work for building a more sustainable, equitable and just world.

Blackness is a primary root for study and practice in the AFAM minor at UNH. Notwithstanding complex historic antecedents of race and racism, we consider how Blackness (/blackness) first consolidated as racial phenomena in the fifteenth century through global commodity capitalism. In this process, the modern enslavement and worldwide dispersal of African peoples arguably made up the first historic articulations of Blackness, the first major instance of globalization and one of the worst tragedies of human history with which we still reckon today. Throughout this history, the meanings and operations of race and racism in local contexts have not been altogether uniform but nonetheless reveal common dynamics of Black peoples’ marginalization and structural dispossession of sociocultural, political and material resources.

In this root, AFAM students learn about varieties of historic and contemporary Blackness and what it means to be Black (/black): as lived experience, categorical attribution and aspect of intersecting identities; as creatively spiritual, aesthetic, and discursive expression and media; as antiracist reclamation and foundation for agency, activism and sociopolitical mobilization; and as a fount for queerness, love, joy and liberation. Our students and faculty consider how Black experiences are multidimensional and multivalent, subject to ongoing clarification within and among diverse communities worldwide, and differently and lyrically voiced and performed for multiple means and ends. We consider how Blackness entails an existential and practical quest for freedom from oppressive orders and boundary-making.

The AFAM program has a strong focus on coursework and research on African American and or Black peoples in the United States, as their cultures and history have been integral to the development of the nation-state and also highlight the country’s problems and promises. The program also offers many courses on the cultures and history of Africa and its other Diaspora communities. Our courses range from the humanities to the social and natural sciences, and our approaches and methods are applicable to virtually all areas of study at UNH. Students are encouraged to take courses from a variety of disciplines. The minor therefore is designed to serve the needs of all students, regardless of
their background, and to complement their work in their major fields of study.

We maintain close intellectual and practical solidarities with UNH’s Center for the Humanities, Department of Women’s and Gender Studies, and other interdisciplinary minor programs in American Studies, Native American and Indigenous Studies, Latin American, Latinx, and Caribbean Studies, Queer Studies, and Race and Ethnic Studies. Our program faculty also maintain ties with Black educational and community organizations, such as the Seacoast African American Cultural Center, Black Heritage Trail of New Hampshire and others in the region.

The introductory course is meant to provide students with a general understanding of subjects and areas within the broader and related fields African, African Diaspora, African American and Black studies. Electives enable students to explore their interests and or develop greater understanding and synthesis of these subjects and areas. The upper-level course requirement is meant to be a culmination of a student’s work in the minor and a key conversation point with program faculty about future research and graduate study, community engagement and career options. Students should arrange to meet with faculty teaching this course early in the semester to establish goals for this culminating experience. Study abroad credits may also count with permission from the coordinator or other program faculty. A list of approved courses are posted each semester online.

Students can also pursue independent study and internship options as well for their elective or upper-level course requirement, with on-campus or community organizations such as the UNH BeauRegard Center or Black Students Union, Seacoast African American Cultural Center, Black Heritage Trail of New Hampshire or local chapters of national organizations. These options are supervised by program faculty and may be taken under the AFAM or other departmental codes.

Requirements

AFAM consists of five, 4-credit courses (or any course combination for 20 credits total). These include (1) a 400 or 500 level introductory course taught by an AFAM program faculty member, (2) two other approved elective courses related to the student’s choice of concentration, and (3) a course at the 600 or 700 level, also taught by an AFAM program faculty member. Students must earn a C- or better in each course, and maintain a 2.0 grade-point average in courses taken for the minor.

American Studies (AMST)

Programs

- American Studies Minor (p. 187)

American Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/american-studies

Description

American studies is the interdisciplinary examination of American life and culture at regional, national, and international scales. It integrates perspectives from a wide variety of disciplines, including history, English, communications, political science, geography, sociology and the arts.
At UNH, the American studies minor is an individualized program of study that allows each student to choose from a broad range of courses offered by several different departments that best match their interests and needs. It is intended to encourage students with particular interests in the United States to develop those interests and learn more about the country from a variety of perspectives.

Requirements

To earn a minor in American studies, students must complete five courses approved to satisfy minor requirements. At least one of those courses must concentrate on issues of race, gender, or ethnicity. No more than three courses may be at the 400 or 500 level, and no more than two courses may be taken in the same department. Students must earn a C-minus or better for a course to count toward minor requirements and must maintain a 2.0 grade point average in all courses taken for the minor.

Courses

To earn a minor in American studies, students must complete five courses approved to satisfy minor requirements. At least one of those courses must concentrate on issues of race, gender, or ethnicity. No more than three courses may be at the 400 or 500 level, and no more than two courses may be taken in the same department. Students must earn a C-minus or better for a course to count toward minor requirements and must maintain a 2.0 grade point average in all courses taken for the minor.

Anthropology (ANTH)

Anthropology is a field of visionaries, makers and collaborators, taking a critical, creative and holistic approach to the study of humankind. Our faculty teach hands-on courses in archaeology and socio-cultural, applied, biological and forensic anthropology, reflecting our faculty members’ research in the Americas, Europe, Africa, and Central and Southeast Asia. Through coursework, fieldwork and study-abroad experiences, students gain life-long learning skills that prepare them for success in cross-cultural understanding and communication, working for diverse organizations and tackling complex social issues in today’s global world. Our students are employed in a range of areas such as public health, business, international development, museums and education.

Anthropology Major (B.A.)

https://cola.unh.edu/anthropology/program/ba/anthropology-major

Description

Anthropology asks the question: What does it mean to be human? We answer this fundamental query with a global perspective on the human condition as students explore both the similarity and diversity of human experience. Through courses that cover a wide range of societies throughout the world, we investigate the human condition, past and present. Introductory courses provide an overview of the fields of anthropology; social and cultural anthropology, archeology, physical anthropology and linguistics. More advanced courses provide the opportunity for students to pursue intensive study of particular topics in cross-cultural perspective. The department emphasizes critical thinking and writing skills and encourages close faculty/student contact in seminar courses and at the upper level. Students, in consultation with their academic adviser, have the opportunity to take courses in other departments that complement specific foci in anthropology.

At this time of increasing globalization, anthropology provides students with a broad overview of diverse peoples and cultures. Majors are therefore well prepared to live in a rapidly changing world. The major both prepares students for graduate-level studies and serves as a foundation for a wide range of careers. With backgrounds in anthropology, our students become teachers, social workers, public policy experts, forensic investigators, health practitioners, primatologists, international business executives, and community and economic development specialists, as well as pursuing various other careers.

To declare a major in anthropology, students must have completed at least one introductory level anthropology course at the 400 or 500 level with a grade of C or better.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.**

## Major Requirements

Majors must complete a minimum of 40 credits in anthropology with grades of C or better and in accordance with the below requirements. The required minimum overall GPA in major coursework is 2.0.

### Electives

- One additional course numbered 500 or above: 4 credits
- Three additional courses numbered 600 or above: 12 credits

### Capstone Requirement

- ANTH 611 History of Anthropological Theory: 4 credits

### Total Credits

Total: 40 credits

(Notes: While 8 credits, ANTH #699 Senior Thesis and ANTH 699H Honors Senior Thesis count only as one ANTH 600-level course requirement.)

The Discovery Program capstone requirement may be fulfilled by completing one 700-level course (seminar format).

Other courses, internships, or experiences may be substituted with the permission of the student’s adviser and anthropology department chair.

Anthropology majors may use one major-required course to satisfy one Discovery category requirement. Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement. American Sign Language may not be applied toward the foreign language requirement.

Honors-in-major and senior thesis options are available.

Students declaring the major in anthropology are expected to make steady progress toward fulfillment of major requirements. Typically, this means taking at least one anthropology course per semester until all of the requirements have been met. A student who has fulfilled most of the major requirements may request an exception to this policy from their advisor.

### Degree Plan

Below is a general degree plan that we recommend anthropology majors follow as they plan their course schedules for their major course requirements over their four years at UNH. This general plan provides a recommended pace and appropriate order for the core courses offered in the major.

<table>

</tr>
</tbody>
</table>

### Second Year

- ANTH 513 Ethnographic Methods or ANTH 514 Method and Theory in Archaeology: 4 credits
- One ANTH 500-level or above course: 4 credits
- One ANTH 600-level course: 4 credits

### Third Year

- ANTH 611 History of Anthropological Theory: 4 credits
- One ANTH 600-level or above course: 4 credits
- One ANTH 600-level or above course: 4 credits

### Fourth Year

- ANTH #699 Senior Thesis (optional): 4-8 credits
- ANTH 750 or ANTH 785 or ANTH 797 | Islam and Gender: Gendered Lives of Muslims or The Anthropology of Dreams and Dreaming or Advanced Topics | 4       |

### Total Credits

Total: 8-12 credits

### Student Learning Outcomes

- Demonstrate ability to conduct anthropological research: to collect primary and secondary source data in the observation, documentation, or excavation of human actions, languages, remains, and or material artifacts.
- Master the ability to write with an anthropological lens: to critically analyze data with respect to historical and current anthropological theories and perspectives, and to construct persuasive arguments.
- Exhibit skills in presentation of anthropological research: in writing (ethnography, technical reports, and other genres), inter-personal and public speaking, and or data visualization (graphic illustration, exhibition, mapping, or modeling, for example).
- Demonstrate the knowledge or ability to collaborate with research partners and communities as part of a commitment to public, applied, engaged, or activist anthropology and archaeology.
- Demonstrate the ability to think comparatively about diversity and inequality across the global as well as within a specific social context, and to apply anthropological methods, perspectives, and theories to the world around them.
Anthropology Minor

https://cola.unh.edu/anthropology/program/minor/anthropology

Description

Anthropology asks the question: What does it mean to be human? Anthropologists, as scholars, collaborators, public figures and activists, take a critical, creative and holistic approach to the study of humankind. In our relatively small program in the College of Liberal Arts, students have the opportunity to take hands-on courses in archaeology and socio-cultural, applied, medical, biological and forensic anthropology, reflecting our faculty members' academic and applied research in the Americas, Europe, Africa, and Central and Southeast Asia.

Through coursework, fieldwork and study-abroad experiences, students gain life-long learning skills that prepare them for success in cross-cultural understanding and communication, as well as the ability to think comparatively about diversity and inequality on a local and global level.

A minor in anthropology provides many opportunities for cross-disciplinary collaboration, as students are encouraged to apply anthropological methods, perspectives and theories to the world around them, and to their other areas of study. Upon graduation, our majors and minors work for a diverse set of organizations, and are employed in a range of areas such as public health, business, law, international development, non-profit organizations, museums and education.

You do not need to declare a minor; however, it might be wise to meet with a faculty member from the Anthropology Department to discuss your minor plan.

At the beginning of your final semester of study, you should complete a certification of completion of minor form, obtain the necessary signatures, and submit it to your Dean's Office.

Requirements

A minor consists of five 4-credit courses (20 credits) in Anthropology, with a C or better in each course.

Total Credits: 20

1 Or another course closely related to the minor area of study with approval of faculty.
2 Please check with the contact for the minor to make sure that the topics covered are sufficiently relevant to Arabic studies.

Students may take equivalent courses while studying abroad to satisfy any of the courses required for the minor.

Art and Art History (ARTS)

The courses offered by the Department of Art and Art History provide an opportunity, within the liberal arts framework, for students to acquire a thorough knowledge of the basic means of visual expression, to study intensively the history of art, or to prepare themselves for a career in art teaching. In addition, these courses offer foundation experience for students who are interested in art but are majoring in other departments in the University. The Department of Art and Art History offers programs leading to a bachelor of arts degree in the arts with options in studio art, studio art/art education or art history and a bachelor of fine arts degree in studio art. Certification for art teaching in the public schools is offered in cooperation with the Department of Education (see Education, under Programs of Study).

The University reserves the right to retain selections from a student's work for a period of not more than two years.
Double Option in The Arts
Students may earn a B.A. degree in the arts with both a studio art option and an art history option provided the requirements for each option are met. No more than 8 credits used for one option may be used for the second option. These 8 credits will be in Introductory Drawing and Introduction to Art History.

Minors in the Department of Art and Art History
Students must receive a minimum grade of C- in all required courses. For art majors, only two courses from the art and art history major requirements can be applied toward the minor.

A maximum of two courses (8 credits) may be transferred from another accredited institution, provided UNH has accepted them as transfer credits. Transfer courses must be a minimum of three credits. Students with transfer courses that are accepted with less than four semester credits must still meet the credit requirement for completion of the minor.

Arts Major: Art History Option (B.A.)
https://cola.unh.edu/art-history/program/ba/arts-major-art-history-option

Description
The art history curriculum provides a comprehensive, in-depth study of Western art from the ancient world to the present as well as some exposure to non-Western cultures and artistic traditions. All courses in the program teach basic skills of interpretation and critical analysis within the framework of broad cultural perspectives that connect the visual arts to larger historical developments. They also teach good writing and research skills. In addition, art history majors typically branch out into other fields, such as history, literature and foreign languages. By the time they graduate, most majors are well equipped to pursue such traditional careers in the field as museum and gallery work, teaching, publishing or librarianship. But because art historical education is so broad, it also prepares students for a variety of other, more flexible options, such as law, business or architecture.

- ARTH 689 Contemporary Art and Theory: 1945-2000
- ARTH 693 American Art
- ARTH 694 Vision and Modernity: From Panorama to Early Film

Electives: Pre-Renaissance, Baroque or Modern Art (select three additional courses): 12
- ARTH 501 Introduction to Mediterranean Archaeology
- ARTH 583 Baroque Art: Realism, Caricature, Shock
- ARTH 587 Art in an Age of Revolutions, c. 1715-1900
- ARTH 654 17th and 18th Century American Architecture
- ARTH 655 Nineteenth-Century Architecture: The Architecture of Empire
- ARTH 656 Twentieth-Century Architecture: Modern and Contemporary
- ARTH 674 Greek Art and Architecture
provides a foundation for diverse professional achievement. Photography (both digital and wet lab techniques), printmaking, sculpture (all media: steel, aluminum, bronze casting, clay, and wood), furniture design and fabrication, ceramics and design. A degree in studio art provides a foundation for diverse professional achievement.

The B.A. in art - studio art option provides a strong fine arts education and solid foundation that prepares students for a life in the arts, whether it be as a professional or commercial artist, a teacher, an architect, a designer or a museum director. We offer courses in painting, drawing, photography (both digital and wet lab techniques), printmaking, sculpture (all media: steel, aluminum, bronze casting, clay, and wood), furniture design and fabrication, ceramics and design. A degree in studio art provides a foundation for diverse professional achievement.

**Arts Major: Studio Art Option (B.A.)**

https://cola.unh.edu/art-art-history/program/ba/arts-major-studio-art-option

**Description**

The B.A. in art - studio art option provides a strong fine arts education and solid foundation that prepares students for a life in the arts, whether it be as a professional or commercial artist, a teacher, an architect, a designer or a museum director. We offer courses in painting, drawing, photography (both digital and wet lab techniques), printmaking, sculpture (all media: steel, aluminum, bronze casting, clay, and wood), furniture design and fabrication, ceramics and design. A degree in studio art provides a foundation for diverse professional achievement.

**Requirements**

**Degree Requirements**

- Minimum Credit Requirement: 128 credits
- Minimum Residency Requirement: 32 credits must be taken at UNH
- Minimum GPA: 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Students selecting to work toward a bachelor of arts degree in studio art must complete a minimum of 14 courses (56 credits), with a minimum grade of C in each course. The following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTH 675</td>
<td>Roman Art and Architecture</td>
<td></td>
</tr>
<tr>
<td>ARTH 677</td>
<td>Early Medieval Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 678</td>
<td>Romanesque and Gothic Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 679</td>
<td>Northern Renaissance Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 680</td>
<td>Iconoclasm and Collecting: The Art of Early Modern Northern Europe</td>
<td></td>
</tr>
<tr>
<td>ARTH 681</td>
<td>Early Renaissance Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 682</td>
<td>The High Renaissance</td>
<td></td>
</tr>
<tr>
<td>ARTH 684</td>
<td>Baroque Art in Northern Europe</td>
<td></td>
</tr>
<tr>
<td>ARTH 685</td>
<td>Graphic Art of the Renaissance and Baroque Periods</td>
<td></td>
</tr>
<tr>
<td>ARTH 686</td>
<td>Sex and Sensuality in 18th-Century Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 689</td>
<td>Contemporary Art and Theory: 1945-2000</td>
<td></td>
</tr>
<tr>
<td>ARTH 693</td>
<td>American Art</td>
<td></td>
</tr>
<tr>
<td>ARTH 694</td>
<td>Vision and Modernity: From Panorama to Early Film</td>
<td></td>
</tr>
</tbody>
</table>

These courses must be completed with a minimum grade of C-. Art history students receive preferential placement in ARTS 532 Introductory Drawing. Students contemplating graduate school should learn German, and, if possible, either French, Italian, or another language relevant to their areas of interest.

The Discovery Program capstone requirement may be fulfilled by completing ARTH 795 Understanding Art History: An In-Depth Overview.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Art history majors may use two major-required courses to satisfy two Discovery category requirements.

**Student Learning Outcomes**

- We expect our art history majors to become conversant with some of the major conventions artists and architects have subscribed to over the millennia, and with how these have been bent or broken and why.
- We expect them to learn to write cogently and clearly, and to be able to analyze orally on the spot what they see in a work of art or architecture, often by comparison and contrast with works they know well.

<td></td>
<td></td>
</tr>
</tbody>
</table>

**Concentration Courses (4 courses)**

Minimum of three 600-700 level studio courses. No more than one of the following: a 500-level studio course (select from ARTS 501, ARTS 525, ARTS 536, ARTS 546, ARTS 551, ARTS 552, ARTS 596), ARTS 598 An Artist’s Life, a 600-700 level art history (see selection of courses in art history requirement above), or ARTS 600 Internship in Studio Art (with approval). Jterm and summer online courses cannot be used.
While these courses represent the minimum departmental requirements for the studio art option, students may wish to plan a program involving greater depth in one or several of the studio areas.

The Discovery Program capstone requirement will be fulfilled by completing a capstone project that reflects the training received, and personal artistic growth made, throughout the student’s years of study at UNH. The capstone project includes participation in the BA/BFA Senior Exhibition in the UNH Museum of Art in April-May. Students will submit a minimum of 5 (or the equivalent what would be the equivalent of 5) recent works for faculty to review and select for the exhibition. At the review a written artist statement and verbal explanation of the work must also be presented.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Studio art majors may use two major-required courses to satisfy two Discovery category requirements.

Student Learning Outcomes

### Introductory (500) Level:
- Basic skillset in a particular arts discipline
- Working knowledge of the tools and materials used in a particular arts discipline
- Basic understanding of analytical thinking when making and talking about art
- Demonstrate development of artistry

### Intermediate (500/600) Level:
- Demonstrate development of artistry and skill set in a range of artistic disciplines
- Demonstrate knowledge of tools and materials beyond the basics
- Deeper ability to discuss and analyze works of art
- Ability to verbalize intent in a particular work of art
- Ability to research particular artists
- Ability to declare an area of concentration for advanced in a particular arts discipline

### Advanced (600/700) Level:
- Demonstrate a high level of artistry
- Ability to work independently
- Develop and Demonstrate an individual sensibility
- Ability to understand and verbalize intent in a work of art
- Ability to construct a professional capstone portfolio or thesis
- Demonstrate in-depth familiarity with a range of artistic movements both historical and contemporary

### Arts Major: Studio Art/Art Education Option (B.A.)

https://cola.unh.edu/art-art-history/program/ba/arts-major-studio-art-art-education-option

**Description**

The program in art education is organized into a five-year, teacher-education sequence. This curriculum is designed to prepare teachers of art in the public schools. The satisfactory completion of the B.A. studio art curriculum for art education students and required education courses, in conjunction with the fifth-year internship, will satisfy the initial certification requirements for teachers of art in the public schools of New Hampshire and in most other states. These requirements may change by the time students apply for certification and the students are required to fulfill the then-current requirements. Art education students may take accredited crafts courses at other institutions as art electives.

A portfolio is required for acceptance to the studio art/art education option.

**Degree Requirements**

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

### Major Requirements

Students selecting to work toward a bachelor of arts degree in studio art/ art education must complete a minimum of 14 courses (56 credits), with a minimum grade of C in each course. The following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Required Core Foundation (4 courses)</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

Fine Arts Major (B.F.A.)

https://cola.unh.edu/art-art-history/program/bfa/fine-arts

Description

Incoming first-year and transfer applicants wishing to enter the bachelor of fine arts (B.F.A.) degree program must first apply for, and be admitted to, the bachelor of arts (B.A.) in the Arts: Studio Art option. Students may submit a B.F.A. portfolio after they begin their studies at UNH, as early as the spring semester of their first year. A full faculty review is held each spring semester.

The B.F.A. curriculum provides advanced training for students who plan to enter professional graduate school or pursue careers as professional artists.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Students selecting to work toward a B.F.A. degree must complete a minimum of 17 courses and 72 credits, with a minimum grade of C in each course. Transfer of 3-credit courses from other institutions will require additional course(s) to fulfill the major requirement of 72 credits. Transfer courses can fulfill only 8 requirements. The following courses are required:

<table>

</tr>
</tbody>
</table>

The possible areas of concentration within the department are painting, sculpture, ceramics, design, drawing, printmaking, photography, and furniture design. Proposals for individualized programs are accepted only by permission of the departmental chairperson, the major adviser, and the departmental bachelor of fine arts committee. Candidates applying for the bachelor of fine arts program are required to submit a portfolio to the B.F.A. committee, which meets each spring semester.

The Discovery Program capstone requirement may be fulfilled by completing ARTS 798 Seminar/Senior Thesis.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program.

Fine arts majors may use two major-required courses to satisfy two Discovery category requirements.

Student Learning Outcomes

Introductory (500) Level:

- Basic skillset in a particular arts discipline
- Working knowledge of the tools and materials used in a particular arts discipline
- Basic understanding of analytical thinking when making and talking about art
- Demonstrate development of artistry

Intermediate (500/600) Level:

- Demonstrate development of artistry and skill set in a range of artistic disciplines
- Demonstrate knowledge of tools and materials beyond the basics
- Deeper ability to discuss and analyze works of art
- Ability to verbalize intent in a particular work of art
- Ability to research particular artists
- Ability to declare an area of concentration for advanced in a particular arts discipline

Advanced (600/700) Level:

- Demonstrate a high level of artistry
- Ability to work independently
- Develop and Demonstrate an individual sensibility
- Ability to understand and verbalize intent in a work of art
- Ability to construct a professional capstone portfolio or thesis
- Demonstrate in-depth familiarity with a range of artistic movements both historical and contemporary
Architectural Studies Minor
https://cola.unh.edu/art-art-history/program/minor/architectural-studies

Description

The minor in architectural studies provides students with an interdisciplinary introduction to the history, theory and methods of architecture and its symbolism. The program allows students who are interested in this field to receive programmatic recognition of their work. It is designed to assist those who are contemplating enrollment at a school of architecture; are particularly interested in architectural history; want to supplement their technical majors (e.g., civil engineering) with strong academic minors; or plan to pursue careers in preservation, education, community service and public relations.

For more information, contact the minor coordinators: Ivo van der Graaff, ivo.vandergraaff@unh.edu, art and art history, or Raymond Cook, ray.cook@unh.edu, civil engineering.

Requirements

Five courses (18-20 credits), which consist of the following:

<table>

Art History Minor
https://cola.unh.edu/art-art-history/program/minor/art-history

Description

The art history minor offers those majoring in other fields (including studio art) the chance to gain a serious knowledge of aspects of the history and meanings of Western art from antiquity to the modern world. Particularly for those working in history and the humanities, a minor in art history will provide new interdisciplinary perspectives on their major fields.

Requirements

The minor consists of five courses (20 credits).

<table>

Art Minor
https://cola.unh.edu/art-art-history/program/minor/art

Description

The art minor is an appropriate option for students who do not want to take the specific requirements for the art history or studio art minors, but who are still interested in taking art history and/or studio classes.

Requirements

The minor in art consists of five courses (20 credits) chosen from the offerings of the department. Courses can be all studio art, all art history, or a combination of both.

<table>

Design Studies Minor
https://cola.unh.edu/art-art-history/program/minor/design-studies

Description

Situated within the studio arts program, the interdisciplinary minor in design studies brings together the formal and conceptual principles of design in the visual expressions of the fine arts (painting, sculpture, photography, etc.), the commercial arts (graphic design, illustration, etc.), the industrial arts (engineering) and the performing arts (stage, costume and lighting design).

Course options in communication, marketing, English and art history offer the opportunity to contextualize the principles and products of design in a broader historical, sociological and cultural context.

Course requirements and options within the design studies minor enable students to develop a common skill set of literacy and fluency in a range of design software programs (Photoshop, InDesign, Light Box, Fuse, etc.), the utility of which has become increasingly more essential to a range of fields of study and vocations.
Requirements

Five courses (20 credits) are required.¹

| ENGL 616D | Studies in Film/Narrative and Style                 |         |
| MKTG 520  | Topics in Marketing (Understanding Your Customer or Digital Marketing Communications) | |

Total Credits 20

¹ 19 credits are required to complete the minor if CEE 402 or CEE 700 is selected.

Students must receive a minimum grade of C in all required courses.

A maximum of two courses (8 credits) may be transferred from another accredited institution, provided UNH has accepted them as transfer credits. Transfer courses must be a minimum of 3 credits. Students with 3 credit transfers must make up the credit shortage.

Only two courses from the student’s area/department of concentration may be used to meet requirements towards a minor in design studies.

Studio Arts Minor

https://cola.unh.edu/art-art-history/program/minor/studio-arts

Description

The studio arts minor is for students who are interested in continuing on to the intermediate and advanced levels in a variety of mediums.

Requirements

Asian Studies

Programs

• Asian Studies Minor (p. 197)

Asian Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/Asian-studies

Description

The aim of the interdisciplinary Asian studies minor program is to foster teaching and learning as well as research in all areas of Asia. The minor offers opportunities to develop proficiency in Asian languages and to study the histories, politics, literatures, cultures and religions of East Asia (China, Japan, Korea and others) and South Asia (India, Pakistan, Sri Lanka, Bhutan and others). Courses offered provide students the chance to explore a wide range of contemporary subjects such as foreign policy, language use, education, environment, the Asian-American experience, ethnic and religious conflict, literary and cultural production, and cross-border movements of industry and ideas.

For further information, please contact Lawrence C. Reardon, associate professor of political science, chris.reardon@unh.edu, (603) 862-1858.

Requirements

To complete the minor in Asian Studies, students are required to take five courses (20 credits) or their equivalent, and no more than three can be counted from any one of the following disciplines:

• Anthropology (ANTH)
• Asian American or South Asian Literature (ENGL)
• Geography (GEOG)
• History (HIST)
• Languages, Literatures, and Cultures (either CHIN or JPN)
• Philosophy (PHIL)
• Political Science (POLT)
The following are a list of courses that count toward the minor. Please note additional courses may also count. Visit the program website for the most up-to-date information.

**Chinese (CHIN)**

**Programs**

- Chinese Minor (p. 198)

**Chinese Minor**

https://cola.unh.edu/languages-literatures-cultures/program/minor/chinese

**Description**

The Chinese minor provides students with linguistic skills and cross-cultural competence that will complement their studies in many other disciplines, such as business, international affairs, education, hotel management and social service. It prepares students for future academic and professional opportunities in which proficiency in Chinese is required or preferred. Students who have studied Chinese at UNH have gone on to use Chinese for a variety of career paths in both domestic and international settings.

**Requirements**

20 credits which consist of the following:

Total Credits 20

At the beginning of your final semester of study, please complete a Certification of Completion of Minor form, obtain the necessary signatures, and submit it to your Dean’s Office.

**Cinema Studies**

**Programs**

- Cinema Studies Minor (p. 198)

**Cinema Studies Minor**

https://cola.unh.edu/interdisciplinary-studies/program/minor/cinema-studies

**Description**

The minor in cinema studies offers a variety of opportunities to study a predominant contemporary form of narrative, aesthetic and social discourse: the moving image. Film is the primary medium of study for the minor, but the cinematic practices of video and television also may be included as potential areas of interest. Courses consist of interdisciplinary approaches to the analysis of cinema, covering works from the early cinema to the present, from the U.S. and other nations. Students learn the aesthetics, history, technology, economics and theory of cinema, while also acquiring the language for analyzing its forms and practices. The minor allows for organized and meaningful study of the moving image from a wide range of scholarly interests and approaches that complement the increasingly significant place of cinema in many major disciplines and other programs. Students enrolled in the cinema studies minor will become articulate and critical spectators in the larger cultural contexts of film and media studies.

Interested students should contact the cinema minor coordinator, Matt Konzett (matthias.konzett@unh.edu), Department of English, (603) 862-0261.

**Requirements**

Cinema studies students are required to take five courses. Students must earn at least a C- in each course and maintain a 2.0 grade-point average in courses taken for the minor. "Double counting" of minor course credits with major course credits will be left to the discretion of existing major departments, with the exception that no more than eight credits, if approved, will "double count."
the differences are:
The program offers three different options for the classics major. In brief, Studies regularly runs its own popular January Term course in Rome and this program. The Department of Classics, Humanities and Italian Rome. (UNH is part of the consortium of Universities that supports sites, including the Intercollegiate Center for the Classical Studies in studies. Students have frequently spent semesters at many study abroad adviser. Study abroad is another way that many majors broaden their a current list of approved courses is available from any departmental literature. Some of these courses can even count for major requirements; addition to Greek and Latin, program faculty may occasionally offer, on request, courses on other ancient languages, including Hittite, Hebrew, Egyptian Hieroglyphs, Syriac and Sanskrit. Students are encouraged to take courses offered outside the department that relate to the field of classics, such as those in ancient history, archaeology, ancient philosophy, classical art, modern languages, linguistics and English literature. Some of these courses can even count for major requirements; a current list of approved courses is available from any departmental adviser. Study abroad is another way that many majors broaden their studies. Students have frequently spent semesters at many study abroad sites, including the Intercollegiate Center for the Classical Studies in Rome. (UNH is part of the consortium of Universities that supports this program.) The Department of Classics, Humanities and Italian Studies regularly runs its own popular January Term course in Rome and manages several other study abroad programs.

The program offers three different options for the classics major. In brief, the differences are:

- The Classical Languages and Literatures (CLL) option allows for the most in-depth study of the ancient languages and requires knowledge of both Ancient Greek and Latin. It thus provides the strongest preparation for students considering graduate study in classics or related areas, and can also be an appropriate choice (with careful planning) for those thinking about teaching Latin in secondary schools. At the same time, it is designed for any student who desires a solid liberal arts education.

- The Ancient Mediterranean Civilizations (AMC) option balances language study with the opportunity for students to select from a wide range of courses covering many aspects of the Greek and Roman worlds, as well as the neighboring peoples in Europe, North Africa and the Near East. The flexibility of this option makes it especially attractive for students who wish to double major in another subject. It is generally not suitable, however, for those who wish to pursue related graduate study or a career in teaching Latin. AMC majors can, however, supplement the requirements with additional coursework to keep these options open.

- The Latin and Latin Teaching (LLT) option is designed to provide a good foundational liberal arts education centered on Latin and the Roman world, but it also includes specific elements that make it particularly appropriate for students who are considering careers teaching Latin in secondary schools after graduation. This option does not lead directly to state certification, which can be pursued during a fifth year of study in the Department of Education.

### Classics Major: Ancient Mediterranean Civilizations Option (B.A.)

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/classics-major-ancient-mediterranean-civilizations-option

### Description

The Ancient Mediterranean Civilizations (AMC) option balances language study with the opportunity for students to select from a wide range of courses covering many aspects of the Greek and Roman worlds, as well as the neighboring peoples in Europe, North Africa and the Near East. The flexibility of this option makes it especially attractive for students who wish to double major in another subject. It is generally not suitable, however, for those who wish to pursue related graduate study or a career in teaching Latin. AMC majors can, however, supplement the requirements with additional coursework to keep these options open.
Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Classics majors may use two major-required courses to satisfy two Discovery category requirements.

The required minimum overall GPA in major coursework is 2.0.

To complete the AMC option of the classics major, a student must complete 10 courses (40 credits), distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Language Proficiency</td>

<tr>
<td></td>
<td>Approved semester study abroad focused on the classical world</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>40</td>
</tr>
</tbody>
</table>

1 No more than 8 credits may come from CLAS courses at the 400 level, with up to an additional 8 credits from LATN and GREK courses at the 400 level. There are also courses taught outside of the program that are approved substitutes for CLAS courses, and the department will accept up to 8 credits from such courses. An up-to-date list of these courses is available from departmental advisers and additional exceptions are allowed with the written approval of the adviser.

Student Learning Outcomes

Students will be able to:

• Analyze and critique the cultural and historical importance of the ancient Greeks and Romans.

• Recognize and assess the relative value, and to integrate, the distinct categories of evidence from antiquity: material and textual.

• Demonstrate an understanding of the steps of the intellectual process as developed in classical antiquity, including:
  • identifying and defining essential questions
  • research in the best and fullest range of evidence
  • reasoned critique of the evidence
  • insightful synthesis of all relevant evidence
  • critical evaluation and integration of previous interpretations
  • creating an argument, including in essays or papers, which takes into account all the evidence
  • Translate key Latin and/or Greek texts at the intermediate level and demonstrate a knowledge of Latin or Greek vocabulary, morphology, and syntax at an intermediate level.

Classics Major: Classical Languages & Literatures Option (B.A.)

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/classics-major-classical-languages-literatures-option

Description

The Classical Languages and Literatures (CLL) option allows for the most in-depth study of the ancient languages and requires knowledge of both Ancient Greek and Latin. It thus provides the strongest preparation for students considering graduate study in classics or related areas, and can also be an appropriate choice (with careful planning) for those thinking about teaching Latin in secondary schools. At the same time, it is designed for any student who desires a solid liberal arts education.

Requirements

Degree Requirements

Select an approved capstone experience of the following:

- Senior thesis
- Honors thesis
- CLAS capstone course at the 600 or 700 level
- At least 8 credits in 700-level LATN or GREK courses
- Approved internship
- Approved semester study abroad focused on the classical world

Total Credits 40

1 No credits from language courses at the 400 level may be counted toward this option.
2 Students may count as many as 24 toward the CLL major option.
3 No more than 4 credits may come from courses at the 400 level. There are also courses taught outside of the program that are approved substitutes for CLAS courses, and the department will accept up to 8 credits from such courses. An up-to-date list of these courses is available from departmental advisers and additional exceptions are allowed with the written approval of the adviser.

Student Learning Outcomes

Student Learning Outcomes for Classics Major: Classical Languages and Literatures Option

- Translate, contextualize, and interpret key texts in their primary language (Greek or Latin) at the upper level.
- Translate, contextualize, and interpret intermediate-level texts in their secondary language (Greek or Latin).
- Demonstrate an accurate understanding of linguistic concepts related to Greek and Latin including the elements of phonetics, semantics, and morphology and syntax at an upper level for their primary language and at an intermediate level for their secondary language.
- Analyze and critique, including in essays or papers, the cultural, literary, and historical significance of the ancient Greeks and Romans, and how they have been received in later periods.

Classics Major: Latin & Latin Teaching Option (B.A.)

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/classics-major-latin-latin-teaching-option

Description

The Latin and Latin Teaching (LLT) option is designed to provide a good foundational liberal arts education centered on Latin and the Roman world, but it also includes specific elements that make it particularly appropriate for students who are considering careers teaching Latin in secondary schools after graduation. This option does not lead directly to state certification, which can be pursued during a fifth year of study in the Department of Education.

<td>CLAS 678 Topics in Ancient Roman History</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Select 8 credits of electives (which may include credits earned in a capstone experience) 2</td>
<td>8</td>
</tr>
</tbody>
</table>

Capstone Experience
Select an approved capstone experience of the following:

- Senior thesis
- Honors thesis
- CLAS capstone course at the 600 or 700 level
- At least 12 credits in 700-level LATN courses
- Approved external internship
- CLAS 694 Supervised Practicum (4-credit internal Latin teaching internship)
- Approved semester study abroad focused on the classical world

Total Credits 40

1 At least 4 credits must come at the 700 level.
An up-to-date list of these courses is always available from department advisors, and advisors can also approve exceptions in writing. (At present, the following CLAS courses do not count: CLAS 403 Introduction to Greek Civilization, CLAS 525 Greek and Latin Origins of Medical Terms, and CLAS 694 Supervised Practicum.) Besides CLAS 401 Classical Mythology and CLAS 404 Introduction to Roman Civilization, no other 400-level courses may count. No Greek language courses are required for the LLT option, but students are encouraged to complete at least the introductory sequence (401–402).

There are also courses taught outside of the program that are approved substitutes for CLAS courses, and the department will accept up to 8 credits from such courses. An up-to-date list of these courses is available from departmental advisors and additional exceptions are allowed with the written approval of the advisor.

Please note that the LLT option does not by itself meet New Hampshire state certification requirements. Those who intend to pursue this certification should enroll in EDUC 500 Exploring Teaching as early as possible and then apply early in the fall of their year of graduation for a fifth year of internship and study through UNH’s Department of Education. Students are also encouraged strongly to consider taking some EDUC electives during their period of undergraduate study.

Student Learning Outcomes

Student Learning Outcomes for Classics Major: Latin and Latin Teaching Option (B.A.)

- Ability to read major works of Latin authors in prose and poetry, and to translate Latin into idiomatic English.
- Ability to read aloud both prose and poetry in correct meter in Latin using an accepted standard of pronunciation.
- Knowledge of the morphology, phonology, and syntax of Latin; and of the historical development of Latin and the place of Latin in the etymology of English words.
- Ability to write short compositions in Latin.
- Knowledge, as demonstrated in essays or papers, of: a) major aspects of Greek and Roman history, cultural institutions and their connections to the western tradition and other world cultures b) the history and content of Green and Roman literature, in translation or in the original c) classical mythology.

Requirements

A minor in classics consists of five courses (20 credits).

Greek Minor

https://cola.unh.edu/classics-humanities-italian-studies/program/minor/greek

Description

Explore the cultural foundations of Western civilization in the Greek minor, studying ancient and modern Greek and Greek history, literature, philosophy and religion. The minor compliments studies in areas such as business, classics, history, the humanities, philosophy or international affairs, and will help you prepare for a career at home or abroad, or for graduate studies.

The coordinator is Scott Smith, Murkland Hall 301; Department of Classics, Humanities and Italian Studies; e-mail scott.smith@unh.edu.

Requirements

A minor in Greek consists of five courses (20 credits).

Latin Minor

https://cola.unh.edu/classics-humanities-italian-studies/program/minor/latin

Description

In the Latin minor, you’ll study Latin and the civilization, culture and mythology of the Roman world. You’ll be able to improve your fluency and your composition skills, and read in the original such classics as Lucretius, Catullus, Vergil, Horace and Ovid.

The coordinator is Scott Smith, Murkland Hall 301; Department of Classics, Humanities and Italian Studies; e-mail scott.smith@unh.edu.

Requirements

A minor in Latin consists of five courses (20 credits).
Cognates

- Art History, Design, and Computer Sciences Cognate (p. 203)
- Digital Writing and Literature Cognate (p. 203)
- Intercultural Communication for the Professional World Cognate (p. 204)
- Medical Sociology Cognate (p. 204)
- Philosophy of Business, Innovation, & Technology Cognate (p. 204)
- Political and Legal Philosophy Cognate (p. 205)
- Skills and Perspectives for the Digital World Cognate (p. 205)
- Studies in Fashion and Design Cognate (p. 206)
- Studies in the Design of Interior Space Cognate (p. 206)
- Technical Writing and Public Speaking Cognate (p. 207)
- Philosophy of Business, Innovation, & Technology Cognate (p. 204)

Art History, Design, and Computer Sciences Cognate

https://cola.unh.edu/art-art-history/program/cognate/art-history-design-computer-sciences

Description

The cognate is for students to develop basic skills in art history and design as well as computer programming. The aim is for them to be able to apply programming skills to develop projects related to museum collections management and visitor experience, research projects, website design for cultural institutions, and art market intelligence and data transparency. Students will be encouraged to learn the basic concepts of art history and design and combine them in creative ways with emerging technologies such as Augmented Reality, Virtual Reality, 3D modelling and more traditional website design. The aim is to give students a head start on how emerging technologies can come together with the art market as well as cultural heritage to help document, preserve, investigate and present it for future generations.

Requirements

Students will need to complete the following three modules, preferably in order.

<table>

Digital Writing and Literature Cognate

https://cola.unh.edu/english/program/cognate/digital-writing-literature

Description

Many jobs nowadays require not only solid reading and writing skills; but also the ability to deploy and adapt these skills in a variety of electronic, professional, public and semi-public platforms. This cognate builds students’ ability to comprehend and interpret difficult texts (including complex instructions); to edit, proofread and frame their work for different audiences and contexts; and to navigate rudimentary markup (code) and varied electronic interfaces with confidence and independence.

Contact the Department of English, 230F Hamilton Smith Hall or (603) 862-1313, with questions.

Requirements

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

In consultation with a program advisor, students may choose to pursue a "track": e.g., courses like ENGL 623 Creative Nonfiction and ENGL 712 Multimedia Storytelling may serve as a “creative” track for students interested in honing their digital storytelling and audio skills; while ENGL 693 Special Topics in Literature and ENGL 739 American Indian Literature may offer students a way in to cultural heritage management or nonprofit careers. Alternatively, students already focused on a particular course of study (e.g., journalism) may wish to learn how digital tools work in parallel fields (thus taking ENGL 631 Digital Reporting to enhance their digital reporting skills while also taking ENGL 739 American Indian Literature to learn how to edit Wikipedia).
and macro levels. It develops students' sociological imagination, fosters as the availability, effectiveness and choices around health care on micro of how social structure shapes the etiology of health and illness as well

https://cola.unh.edu/sociology/program/cognate/medical-sociology

Medical Sociology Cognate

https://cola.unh.edu/sociology/program/cognate/medical-sociology

Description

The medical sociology cognate provides students with an understanding of how social structure shapes the etiology of health and illness as well as the availability, effectiveness and choices around health care on micro and macro levels. It develops students' sociological imagination, fosters their application of a sociological perspective to the study of health, and allows them to gain the skills needed to be informed consumers of empirical health research. The focus on empirical literacy that is central to courses in sociology facilitates students' ability to communicate and apply research findings in their respective professional fields.

Although the sociological perspective will benefit students from all backgrounds, a cognate in medical sociology may be especially relevant for students majoring in biomedical science, neuroscience and behavior, psychology, gerontology, health and physical education, nursing, health policy and administration, business, human development and others.

Requirements

- Any three courses in medical/health focused sociology courses (12 credits) with a grade of C- or better
- Submission of a completed "Certification of Completion of Cognate" form
- Courses taken pass/fail may NOT be used for the cognate.
- Sociology majors may count cognate classes as major electives.

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

Intercultural Communication for the Professional World Cognate

https://cola.unh.edu/languages-literatures-cultures/program/cognate/intercultural-communication-professional-world

Description

This cognate is designed to provide students with the means to develop a global perspective, intermediate communication skills, and an understanding of the dynamics of intercultural communication. Research has linked study abroad experience with students' future employability, and "intercultural/global competence" in particular is a skill valued by employers in a wide range of fields. This cognate provides students a means to attain these valuable, marketable skills, as well as a means to demonstrate this to potential employers.

Contact the Department of Languages, Literatures and Cultures with questions LLC.dept@unh.edu or call (603) 862-4005.

Requirements

- Taught in English, fulfills WC Discovery, no prior knowledge assumed
- Students can petition for an alternate experience, such as The Washington Center Program, as long as the internship placement involves foreign language use. Preferably, this will relate to the same region covered in the professional culture course and the language skills course, but that is not required.
- Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.
- Any three courses in medical/health focused sociology courses (12 credits) with a grade of C- or better
- Submission of a completed "Certification of Completion of Cognate" form
- Courses taken pass/fail may NOT be used for the cognate.
- Sociology majors may count cognate classes as major electives.

Philosophy of Business, Innovation, & Technology Cognate

https://cola.unh.edu/philosophy/program/cognate/philosophy-business-innovation-technology

Description

Our internationally renowned philosophy professors emphasize discussion, debate, and writing in our courses. Wrestling with big questions prepares our students exceptionally well for highly successful careers in business and cutting-edge technology. As a lively and nurturing faculty personally invested in the success of our high achieving students, we pride in watching our graduates go on to excel in top law schools, elite graduate programs, and prestigious positions from Wall Street to Silicon Valley.

For students unable to major or minor in Philosophy, students may select the three course cognate in Philosophy of Business, Innovation, and Technology. This cognate provides official recognition for those who choose to emphasize the study of the relationships between markets, technology, and human well-being. Students will choose courses in the philosophy of artificial intelligence, evolution, neuroscience,
biotechnology, business ethics, economic policy, environmental ethics and other high impact subjects.

Contact the Philosophy Department with questions at (603) 862-2060 or philosophy@unh.edu.

Requirements

For a cognate in Philosophy of Business, Innovation, and Technology, a student must complete three (3) philosophy courses (for a total of 12 credits) from the following list.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Students do not need to declare a cognate; however, we recommend that students meet with a faculty member from the Philosophy Department to discuss their plan. At the beginning of a student’s final semester of study, the student should complete a Certification of Completion of Cognate form, obtain the necessary signatures, and submit it to their Dean’s Office.

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

Political and Legal Philosophy Cognate

https://cola.unh.edu/philosophy/program/cognate/political-legal-philosophy

Skills and Perspectives for the Digital World Cognate

https://ceps.unh.edu/computer-science/program/cognate/skills-perspectives-digital-world

Description

Engage with and reflect on the technology associated with the digital world. This cognate provides a foundation for the development of technical and critical skills aligned with one of the 21st century’s defining areas: information technology. A recent statement by General Electric’s CEO asserts that if you join the company today, as opposed to 20 years ago, you’re going to learn to code even though you may be in sales, finance or operations. This cognate gives students and future employees a fundamental introduction into technologies that are necessary for high functioning in today’s world, both in the workplace and beyond.

The curriculum consists of coursework designed to strengthen understanding of the technologies that drive the World Wide Web, explore computer programming, and consider the impact of the technologies on society.

Requirements

Credit toward the cognate will only be given for courses passed with C- or better, and a 2.00 grade-point average must be maintained in courses for the cognate. Courses taken on the pass/fail basis may not be used for the cognate.

**Studies in Fashion and Design Cognate**

https://cola.unh.edu/theatre-dance/program/cognate/studies-fashion-design

**Description**

The studies in fashion and design cognate offers students a foundation for developing the basic skills to enter the field of fashion design. It introduces the art behind the creation of apparel and the basics of marketing strategy connected to fashion design. Students will be educated to develop their own creative process and design method while learning the basic knowledge of marketing and personal business. The cognate prepares students with a means to combine their artistic vision with practical application and helps them become designers who have the skills to support their own artstries.

Students complete coursework selected from three groups:

1. **Design Creation**: Helps students to adapt their artistic skills to support conceptual ideas. It gives students the abilities in creating, analyzing, constructing and presenting works for costume creation. It aims to guide students in developing their own working process with a critical approach to problem solving. Students will be able to use terminology to communicate ideas in the fashion design industry.

2. **Design Skills**: Gives students the options to understand and apply a skill class of their choice to help students articulate their design ideas visually and digitally. It aims to offer students with the options to create visual merchandising for their design works through rendering hand skills, graphic design software, or photography.

3. **Marketing**: Helps students to understand and incorporate the business aspect into their creative works. It aims to prepare students to promote and sustain their creative works independently as a personal business or within retail organizations.

**Requirements**

Student must complete three courses (12 credits), one course in each group listed below.

**Studies in the Design of Interior Space Cognate**

https://cola.unh.edu/theatre-dance/program/cognate/studies-design-interior-space

**Description**

The cognate provides students a pathway to enter the world of interior design. It aims to give students an overview of design creation and execution for space planning. From concept development to project execution, the cognate allows students to formulate design projects that are both practical and aesthetically pleasing. Students will develop a comprehensive creative process through research, problem solving and project development. The cognate prepares students to apply critical thinking to the creation of interior environments utilizing a human-centered approach.

Students complete coursework selected from three groups:

1. **Design Development**: Helps students obtain the skills in design creation. Students will learn about concept development, research analysis, and psychological and physiological characteristics in space planning. It provides the students the ability to utilize knowledge in design elements and principles in 3D design creation and integrate this knowledge into design concepts as solutions for design projects.

2. **Historical Aspect**: Gives students an overview of architectural history. It will help students to identify the historical, political, social and economic elements that have influenced the evolution in interior architecture and decorative arts. Students will be able to apply the skill in research and their knowledge of historic design styles in their design creations.

3. **Design Skills**: Helps students to understand and apply skills related to design execution. It provides students with the option to gain craftsmanship in sketching, rendering, scaled design drawings, CAD (computer-aided drafting), graphic solutions or standards.

**Requirements**

Student must complete three courses (12 credits), one course in each group listed below.

Technical Writing and Public Speaking Cognate

https://cola.unh.edu/english/program/cognate/technical-writing-public-speaking

Description

The cognate in technical writing and public speaking (TWPS) offers students intensive instruction in oral and written communication as important means of addressing technical, professional or practical problems whose solutions require others’ cooperation. Students learn practical precepts for analyzing those “communication situations” and for making informed, strategic decisions when composing oral and written responses in response to them. Students also undergo extensive practice creating standard and, thus, widely applicable forms of spoken and written communication. All students acquire a foundation in effective expression by taking introductory courses in public speaking and in professional and technical writing. Students then build upon that foundation and complete the cognate with one advanced course in either public speaking or professional and technical writing. This cognate is attractive to students who recognize that effective expression is valued in nearly any field of endeavor they are likely to pursue in their postgraduate lives.

Please contact the Liberal Arts Dean’s Office for additional information, (603) 862-2062, 110 Murkland Hall.

Communication (CMN)

The Department of Communication at UNH emphasizes a range of studies in human communication, including rhetoric, media and interpersonal communication. Students are taught to analyze verbal, nonverbal and mediated messages from a variety of perspectives including historical, critical, interpretive and empirical approaches. Students explore connections and interrelationships among the people, environments, technologies and messages that comprise the social world.

The communication major prepares students well for a wide variety of careers in business, media, marketing, government, education, health, advocacy and social services. While offering access to a cutting-edge media lab and courses that teach students multi-media production skills, the department’s primary focus is analytical rather than vocational. We do not train students to do specific communication tasks, such as managing social media profiles or creating promotional content. Rather, we help students develop an understanding of how communication works the way it does, and how different modes of communication shape understanding and social relations. Students grapple with such “how” and “why” questions as they study real-world political issues, news events, cultural phenomena and communication between friends, family members, colleagues, community members and strangers.

The department is committed to providing a strong liberal arts orientation that helps students develop their abilities to think — to describe, analyze, critique, explore, integrate, synthesize and create ideas. The department’s faculty members believe that these are the skills and abilities that will be the most useful resources in students’ professional, civic and personal lives after leaving UNH. The program trains students to understand, adapt to and participate in social change. These educational efforts lead to the kind of fundamental understanding that identifies the communication professional and also provides a firm foundation for advanced, graduate study in communication and related fields.

The department’s faculty members have a strong national and international reputation for their research and publications. In addition, the department is recognized on campus for its commitment to teaching. About half of the department’s tenure-track faculty members have won awards for teaching excellence. The faculty is also very active in university, community and professional service.

The department offers a business applications option for communication majors who want to augment the liberal arts focus of their major with professional training in such areas as marketing, advertising and organizational behavior.

The department offers a media practices option for communication majors who want to augment their major with training in media production and applied media communication through courses at UNH-Manchester Communication Arts Department.

The department also offers internships, which are designed to integrate classroom study and supervised practical experience in a work setting. Internship credits do not count toward completion of the communication major, but they do contribute to the total number of credits needed for graduation.

https://cola.unh.edu/communication

Programs

- Communication Major (B.A.) (p. 208)
- Communication Major: Business Applications Option (B.A.) (p. 209)
- Communication Minor (p. 212)

Faculty

https://cola.unh.edu/communication/faculty-staff-directory
Communication Major (B.A.)
https://cola.unh.edu/communication/program/ba/communication-major

Description

The purpose of the communication major is to prepare students to engage more knowingly with the communicative patterns, problems and practices that they will encounter in their personal, professional and civic lives. This purpose requires that students learn to move beyond commonplace and conventional understandings of “communication” and acquire sophisticated perspectives — workable orientations — for describing, analyzing, reflecting upon and engaging with those patterns, problems and practices. Accordingly, the major not only acquaints students with a variety of empirical, critical, historical, theoretical and pragmatic perspectives on communication phenomena, but encourages them to formulate workable orientations of their own for engaging with communication issues and questions. Students who graduate with a communication major are prepared to become thoughtful and proficient “communication decision-makers” during their postgraduate lives.

Students wishing to declare communication as a major should contact the department's academic adviser, Andrew Sharp (andrew.sharp@unh.edu), for application information and requirements.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

Major GPA requirements as indicated.

Major Requirements

Majors must complete ten courses (40 credits) with a 2.0 overall average in the major. The distribution of required courses for the major is as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMN 455</td>
<td>Introduction to Media Studies</td>
<td>4</td>
</tr>
<tr>

<td>4</td>
</tr>
<tr>
<td>CMN 457</td>
<td>Introduction to Language and Social Interaction</td>
<td>4</td>
</tr>
<tr>
<td>Select three 500-level communication analysis courses</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>Select four upper-division courses</td>
<td>16</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>40</td>
</tr>
</tbody>
</table>

1. Majors must earn a grade of C or better in each introductory course.
2. Students must complete the 400-level prerequisite before taking a 500-level course.
3. At least two of the three 500-level courses must have different 400-level prerequisites.
4. Majors must earn a grade of C or better in all three analysis courses.
5. CMN 500 Public Speaking, CMN 599 Internship, and CMN #575 Research Practicum cannot be used to fulfill an analysis course requirement.
6. Students are eligible to take upper-division courses after successfully completing at least two of the 500-level analysis courses, each with a different 400-level prerequisite.
7. At least one of the student's four upper-division courses must be at the 700 level.
8. Majors must earn a grade of C or better in all upper-division courses.
9. Up to four credits of CMN 795 can be used towards the major, but can only fulfill the capstone requirement with department approval.
10. CMN 796 Comm-Entary Journal cannot be used to fulfill the advanced-level requirement.
11. A maximum of 8 credits of independent study (CMN 795 Independent Study) may be counted toward the major. CMN 799H Honors Thesis and CMN 796 Comm-Entary Journal cannot be used to fulfill an advanced course requirement. The Discovery Program Capstone requirement may be fulfilled by completing any 700-level communication course except CMN 796 Comm-Entary Journal. CMN 795 Independent Study can only fulfill the capstone requirement with department approval and can be repeated for a maximum of 8 credits.
12. Transfer students must complete 20 credits of their communication coursework at UNH to complete the major satisfactorily. Exchange students may transfer no more than 10 approved credits from another institution to be applied toward completion of the communication major at UNH.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second or dual major.

Student Learning Outcomes

Students will be able to describe the Communication discipline and its central questions. We expect students to be able to:

• Explain and synthesize the history of Communication theory.
• Articulate the differences between approaches within the discipline (media studies, language and social interaction, and rhetorical studies).
• Identify contemporary debates within the field.
• Distinguish Communication scholarship from other areas of study.
• Understand the role of Communication scholarship in society.
• Articulate the relevance of communication in civic life, including an ability to apply key concepts in the field to world events, situations, or problems.
Students will be able to think critically about communication processes by applying communication theories and concepts. We expect students to be able to:

• Identify theories, perspectives, principles, and concepts relevant to the discipline.
• Recognize academic writing, identify the work’s thesis, explain its method, assess the evidence used, and determine its significance.
• Engage with communicative patterns, processes, problems, and practices that they encounter in their personal, professional and civic lives.
• Acquire effective frameworks for describing, analyzing, reflecting upon, and engaging with those patterns, processes, problems, and practices.

Prepare students to become thoughtful and proficient communicators. We expect students to be able to:

• Become critical consumers of messages.
• Understand how meanings are constructed by speakers and audiences.
• Evaluate claims and arguments, and to be able to explain how they are grounded.
• Recognize the collaborative construction of meaning and its relation to social change.
• Explore the ways in which various forms of communication constitute, maintain, and transform social life.
• Formulate coherent arguments/theses, provide support for their perspectives, and communicate them clearly and logically.
• Select creative and appropriate modalities and technologies to accomplish communicative goals.
• Adapt messages and coordinate communication with others recognizing the diverse needs.

Communication Major: Business Applications Option (B.A.)

https://cola.unh.edu/communication/program/ba/communication-major-business-applications-option

Description

The Department of Communication in collaboration with the Department of Marketing and the Department of Management in the Peter T. Paul College of Business and Economics offers a business applications option for communication students. The objective of the business applications option is to offer a select group of communication students the opportunity to augment the liberal arts focus of their major with professional training in such areas as marketing, advertising and organizational behavior. Qualified students who meet all requirements will graduate with a B.A. degree in communication: business applications, an achievement which will be recorded on their official transcripts.

Minimum Requirements for Option Eligibility

1. Declared communication major.

2. Completion of CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction with a C or better.

3. Completion of at least one CMN 500-level course with a C- or better.

4. Maintain minimum in-major GPA of 2.5.

• Student enrollment in the Business Applications Option will be contingent upon space availability.
• Overall, total enrollment should not exceed twenty students in any given academic year.

1 Students admitted to the option must earn a minimum 2.5 cumulative grade point average in major courses at graduation or they will, by default, graduate with a BA in Communication without the special option designation on their diplomas.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Completion of all Communication major requirements.

 Majors must complete ten courses (40 credits) with a 2.0 overall average in the major. The distribution of required courses for the major is as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

1  • Majors must earn a grade of C or better in each introductory course.

2  • Students must complete the 400-level prerequisite before taking a 500-level course.
• At least two of the three 500-level courses must have different 400-level prerequisites.
• Majors must earn a grade of C- or better in all three analysis courses.
• CMN 500 Public Speaking, CMN 599 Internship, and CMN #575 Research Practicum cannot be used to fulfill an analysis course requirement.

3 • Students are eligible to take upper-division courses after successfully completing at least two of the 500-level analysis courses, each with a different 400-level prerequisite.
• At least one of the student’s four upper-division courses must be at the 700 level.
• Majors must earn a grade of C- or better in all upper-division courses.
• Up to four credits of CMN 796 can be used towards the major, but can only fulfill the capstone requirement with department approval.
• CMN 796 Comm-Entary Journal cannot be used to fulfill the advanced-level requirement.

Total Credits 16

1 Students undergo a business applications internship experience that must be completed in one semester. (Prerequisites: CMN 455, CMN 456, CMN 457)

A maximum of 8 credits of independent study (CMN 795 Independent Study) may be counted toward the major. CMN 799H Honors Thesis and CMN 796 Comm-Entary Journal cannot be used to fulfill an advanced course requirement. The Discovery Program Capstone requirement may be fulfilled by completing any 700-level communication course except CMN 796 Comm-Entary Journal. CMN 795 Independent Study can only fulfill the capstone requirement with department approval and can be repeated for a maximum of 8 credits.

Transfer students must complete 20 credits of their communication coursework at UNH to complete the major satisfactorily. Exchange students may transfer no more than 10 approved credits from another institution to be applied toward completion of the communication major at UNH.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second or dual major.

### Student Learning Outcomes

Students will be able to describe the Communication discipline and its central questions. We expect students to be able to:

- Explain and synthesize the history of Communication theory.
- Articulate the differences between approaches within the discipline (media studies, language and social interaction, and rhetorical studies).
- Identify contemporary debates within the field.
- Distinguish Communication scholarship from other areas of study.
- Understand the role of Communication scholarship in society.
- Articulate the relevance of communication in civic life, including an ability to apply key concepts in the field to world events, situations, or problems.

Students will be able to think critically about communication processes by applying communication theories and concepts. We expect students to be able to:

- Identify theories, perspectives, principles, and concepts relevant to the discipline.
- Recognize academic writing, identify the work’s thesis, explain its method, assess the evidence used, and determine its significance.
- Engage with communicative patterns, processes, problems, and practices that they encounter in their personal, professional and civic lives.
- Acquire effective frameworks for describing, analyzing, reflecting upon, and engaging with those patterns, processes, problems, and practices.

Prepare students to become thoughtful and proficient communicators. We expect students to be able to:

- Become critical consumers of messages.
- Understand how meanings are constructed by speakers and audiences.
- Evaluate claims and arguments, and to be able to explain how they are grounded.
- Recognize the collaborative construction of meaning and its relation to social change.
- Explore the ways in which various forms of communication constitute, maintain, and transform social life.
- Formulate coherent arguments/theses, provide support for their perspectives, and communicate them clearly and logically.
- Select creative and appropriate modalities and technologies to accomplish communicative goals.
- Adapt messages and coordinate communication with others recognizing the diverse needs.

### Communication Major: Media Practices Option (B.A.)

https://cola.unh.edu/communication/program/ba/communication-major-media-practices-option

### Description

The Department of Communication in collaboration with the Communication Arts Department at the UNH Manchester campus offers the media practices option. This option is designed for qualified students who want to augment their communication major at Durham with training in media production and applied media communication through courses in the Communication Arts Department at the Manchester Campus. 1
Qualified students who meet all requirements will graduate with a B.A. degree in communication with a media practices option, an achievement which will be recorded on their official transcripts.

**Minimum Requirements for Option Eligibility**

1. Declared Communication Major.
2. Completion of CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction with a C or better.
3. Maintain minimum in-major GPA of 2.5.

*Students are responsible for their own travel arrangements between Durham and Manchester campuses.*

### Requirements

**Degree Requirements**

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

- **Foreign Language Requirement:** Yes
- **All Major, Option and Elective Requirements as indicated.**

*Major GPA requirements as indicated.

### Major Requirements

Completion of all Communication major requirements.

Majors must complete ten courses (40 credits) with a 2.0 overall average in the major. The distribution of required courses for the major is as follows:

- **Complete the following three introductory courses:**
  - CMN 455 Introduction to Media Studies
  - CMN 456 Propaganda and Persuasion
  - CMN 457 Introduction to Language and Social Interaction

- **Select three 500-level communication analysis courses**
  - CMN 500 Public Speaking
  - CMN 599 Internship
  - CMN #575

- **Select four upper-division courses**

1. Majors must earn a grade of C or better in each introductory course.

2. Students must complete the 400-level prerequisite before taking a 500-level course.

3. Students are eligible to take upper-division courses after successfully completing at least two of the 500-level analysis courses, each with a different 400-level prerequisite.

- At least one of the student’s four upper-division courses must be at the 700 level.
- Majors must earn a grade of C- or better in all upper-division courses.
- Up to four credits of CMN 795 can be used towards the major, but can only fulfill the capstone requirement with department approval.
- CMN 796 Comm-Entary Journal cannot be used to fulfill the advanced-level requirement.

1. Students may arrange to take Media Practices (CA) courses at any time during the course of their academic programs after they have satisfactorily completed the three 400-level introductory courses. Thus, students may take the 500-level CA courses before, concurrently with, or after completion of CMN 500-level courses and/or CMN 600-level courses.

2. Visit our Internships webpage for procedures on how to arrange internships.

A maximum of 8 credits of independent study (CMN 795 Independent Study) may be counted toward the major. CMN 795H Honors Thesis and CMN 796 Comm-Entary Journal cannot be used to fulfill an advanced course requirement. The Discovery Program Capstone requirement may be fulfilled by completing any 700-level communication course except CMN 796 Comm-Entary Journal. CMN 795 Independent Study can only fulfill the capstone requirement with department approval and can be repeated for a maximum of 8 credits.

Transfer students must complete 20 credits of their communication coursework at UNH to complete the major satisfactorily. Exchange students may transfer no more than 10 approved credits from another institution to be applied toward completion of the communication major at UNH.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.
Major department courses may not be used to satisfy Discovery category requirements except in the case of a second or dual major.

Student Learning Outcomes

Students will be able to describe the Communication discipline and its central questions. We expect students to be able to:

- Explain and synthesize the history of Communication theory.
- Articulate the differences between approaches within the discipline (media studies, language and social interaction, and rhetorical studies).
- Identify contemporary debates within the field.

- Explore the ways in which various forms of communication constitute, maintain, and transform social life.
- Formulate coherent arguments/theses, provide support for their perspectives, and communicate them clearly and logically.
- Select creative and appropriate modalities and technologies to accomplish communicative goals.
- Adapt messages and coordinate communication with others recognizing the diverse needs.

Description

Students who enroll in a communication minor have the flexibility of structuring their pathway of five courses to explore the ways in which various forms of communication constitute, maintain and transform social life. The program trains students to understand, adapt to and participate in social change. We offer courses in media studies, rhetoric and face-to-face interaction. We’ll encourage you to "learn how to learn," to become clear and precise writers, and to develop your abilities to think — to describe, analyze, critique, explore, integrate, synthesize and create ideas. The department’s faculty members believe that these are the skills and abilities of a strong liberal arts education that will be the most useful resources in students’ professional, civic and personal lives after leaving UNH.

The contact for the communication minor is the department’s academic adviser, Andrew Sharp (andrew.sharp@unh.edu).

Requirements

Students who pursue a communication minor must complete any five courses (20 credits) within the minor with a C or better at the 400 level and with a C- or better at the 500, 600, and 700 levels, and maintain a minimum grade-point average of 2.0.

Required Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select 5 communication courses</td>
<td>20</td>
</tr>
</tbody>
</table>

Any combination of five communication courses is acceptable. Please see exceptions below.

- Communication minor students are not able to count both CMN 500 Public Speaking and CMN #600 Public Speaking as a Civic Art toward the minor.
- CMN #575 Research Practicum and CMN 599 Internship do not count toward the minor
- No more than two transfer courses from other institutions can be applied to the minor and all transfers are contingent upon departmental approval.
- No more than 4 credits of independent study can count toward the minor.
- No pass/fail or credit/fail courses can count toward the minor.

Education (EDUC)

Undergraduate course work in Education engages students in a diverse and varied collection of educational experiences that prepare them for present and future challenges as well as for a wide range of employment opportunities in education and professional settings engaged in education policy, community-based education, and advocacy.

Undergraduate students in Education have the following major and minor options:

- Educational Studies Dual Major (first major + education major)
- Educational Studies Major: Equity, Diversity, & Inclusion (B.A.)
- Education Minor
• Special Education Minor
• Teacher Certification in Other Content Areas

Accelerated Master’s Program

UNH undergraduate students with a 3.2 or higher cumulative grade-point average (GPA) can apply for "early admission " to the Graduate School either one or two semesters prior to their final semester as an undergraduate. Admitted students may register for a maximum of 12 credits of dual-credit coursework (undergraduate & graduate level coursework) prior to completing their bachelor’s degree. To receive graduate credit, students must be admitted to the Graduate School before the start of the semester in which the course(s) will be taken and need to maintain a 3.2 GPA or higher until their undergraduate degree is awarded. Applying for early admission involves the regular Graduate School application at www.gradschool.unh.edu.

Program Philosophy

The professional education unit at the University of New Hampshire seeks to prepare practitioners who will become leaders in their own practice settings and within their profession, applying knowledge to improve education for all students and enrich the lives of clients. Immersion in subject matter, research, theory and field-based experience provide a base for our graduates to make well-reasoned judgments in complex situations, render informed decisions, model exemplary practice, and take initiative for planned change.

Students learn to establish caring and thoughtful environments that celebrate individual differences and backgrounds while fostering cooperation and educational improvement. We stress reflective critical inquiry as a mode of study and community-building as a means to promote change. We value and support both our students’ local practice and their broader leadership within the profession.

Mission Statement of Programs in Educator Preparation

We seek to prepare beginning teachers who demonstrate excellence in classroom practice and who will become educational leaders. Our graduates will possess the knowledge, skills, and dispositions required in classroom practice and who will become educational leaders. Our Mission Statement of Programs in Educator Preparation is awarded. Applying for early admission involves the regular Graduate School application at www.gradschool.unh.edu.

https://cola.unh.edu/education/programs/ba/bm

Education Four-Year, Undergraduate Options

https://cola.unh.edu/education/program/bm/education-four-year-undergraduate-options-ba-bm

Description

The Educational Studies Major: Equity, Diversity & Inclusion (EDI) four-year program (B.A.) is for students interested in becoming teachers in elementary school settings.

The EDI major offers a Teacher Preparation Program leading to a pathway to dual certifications in Elementary Education (K-6) and ESOL (English to Speakers of Other Languages, K-12). Interested EDI students must apply to the Teacher Preparation Program. Only those who submit the application materials by the deadline (April 15th) and meet all the admission requirements are accepted into the Teacher Preparation Program. Graduates of the EDI Teacher Preparation Program will be eligible for NH teacher certifications in Elementary Education and English to Speakers of Other Languages (ESOL).

• Educational Studies Major: Equity, Diversity & Inclusion (B.A.)

A bachelor's degree including a one-semester student-teaching requirement allows students to be recommended for licensure in certain specialized areas. Those areas are

• Health and Physical Education Major (B.S.)
• Human Development and Family Studies Major (B.A.) - Child Development/Early Childhood Education
• Mathematics Education Major: Secondary Option (B.S.)
• Mathematics Education Major: Elementary/Middle School Education K-8 Option (B.S.)
• Music Education Major (B.M.)
• Theatre Major: Secondary Theatre Education Option (B.A.)
• Theatre Major: Dance Option (B.A.)

Requirements

See the Educational Studies Major: Equity, Diversity & Inclusion (B.A.) page for the requirements of this program.

For the specialized areas listed on the Description tab (i.e., health and physical education, human development and family studies, math education, music education, theatre and dance education), students must fulfill requirements for the major appropriate for the licensure being sought, in addition to the following core professional courses or their equivalent:

<table>
<thead>

</tr>
</tbody>
</table>

A minimum 2.8 cumulative grade-point average at the time of application to student teaching is required. Students in music, mathematics, and physical education need to apply by March 1st of the junior
year and October 15th of the senior year for spring semester to the
Education Department for student teaching. An unofficial transcript
and a current resume must accompany the application. Return
applications to the Education Department Office, 203 Morrill Hall, or
Education.Department@unh.edu.

Educational Studies Dual Major
https://cola.unh.edu/education/program/educational-studies-dual-major

Description
The Educational Studies Dual Major (ESDM) is designed for students who
are interested in an education that integrates field-work and research in a
range of educational settings, including classrooms, museums and non-
profits, whether they aspire to become educators, activists, policymakers
or deepen their knowledge of education as informed citizens.

The Educational Studies Dual Major (ESDM) is committed to deepening
our understanding of educational institutions and the processes
necessary to bring about systemic changes that lead to equity and
access to a first-rate educational experience for all students. In addition
to core courses and electives taught by educational studies faculty, our
dual major benefits from a wide array of cross-referenced courses offered
by other departments and programs, including Gender and Women's
Studies, Anthropology, History, Economics, Political Science, Psychology,
Sociology, Theatre and Dance, and others. Although the interdisciplinary
major does not lead to teacher certification, we do advise students from
across the University on pathways to teaching.

Requirements
Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: Yes, if primary major is a Bachelor of
Arts
Declarations of Major
All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Educational Studies Dual Major Requirements
The dual major in educational studies requires (32 credits) each
completed with a C+ or better. Any education course to be applied for a
future teacher licensure requirement must be completed with a grade of
B- or better. The dual major cannot be declared until after a first major
has been declared and students must have a UNH undergraduate GPA
of a 2.50 or better at the time of declaring. The required minimum overall
GPA in major coursework is 2.50.

Total Credits: 32

Candidates for a degree must satisfy all of the University Discovery
Program requirements in addition to satisfying the requirements of each
individual major program. Bachelor of arts candidates must also satisfy
the foreign language proficiency requirement.

Students who are interested in a dual major in Educational Studies will
need to file an Intent to Dual Major Form. The form is available from the
program website at cola.unh.edu/education. For more information, please
contact education.department@unh.edu.
Student Learning Outcomes

GOAL ONE: Our students effectively analyze the social dimensions of education, to include issues of culture, gender, equity, health, and economics. Specifically, students will:

• demonstrate understanding of the role of gender, race, ethnicity, and economic class in effecting education in formal and informal settings.
• demonstrate understanding of the history and politics of education including the principles, assumptions and impacts of school reform initiatives, education, international development and economic globalization as well as alternatives for defining and pursuing diverse conceptions of education, quality of life, and equity.
• demonstrate understanding of how economics and markets shape private and public actions and outcomes with respect to education on local, regional, national and global scales.
• demonstrate understanding of the origins, similarities and differences among concepts of diversity, universality, pluralism, multiculturalism, and cosmopolitanism and their implications for education in formal and informal at a variety of scales.
• demonstrate cultural self-awareness and cultural sensitivity in analysis, synthesis, visioning, design and intervention related to studies in education.
• demonstrate an understanding of the role of public health related to education at various scales.

GOAL TWO: Our students engage diverse histories of education in the context of civic engagement, activism, and commitment to equity and justice for Social Good. Specifically, students will:

• demonstrate understanding of the relationship between awareness and action and be able to articulate theories of ethics and civic engagement in the context of educational initiatives on local, national and international levels.
• demonstrate understanding of the principles, assumptions and frameworks of educating for equity and justice from diverse perspectives.
• critique these issues based on their direct experience in "engaged learning" projects as well as in historical social movement analogues, including civil rights, abolition, environmental movements, and women’s suffrage.

Educational Studies Major: Equity, Diversity & Inclusion (B.A.)

https://cola.unh.edu/education/program/ba/educational-studies-equity-diversity-inclusion

Description

The UNH major in educational studies: equity, diversity and inclusion (EDI) offers students committed to becoming teachers in elementary school settings opportunities to integrate knowledge and research methodologies from several academic disciplines and field sites into a focused examination of the interdisciplinary field of education. The four-year educational studies: EDI major program is designed for students who seek a rich understanding of education grounded in science, the arts and the humanities. The principles of equity, diversity and inclusion are woven throughout every course and field experience. All declared majors choose one of two strands of EDI: special education or multilingual learners. Graduates will be eligible for certification by the NH Department of Education in elementary education plus English to Speakers of Other Languages (ESOL).

The goal of the program is to graduate civically, globally and intellectually engaged students who understand the complexities of education, are capable of analyzing and evaluating complex problems influencing education from a variety of disciplinary perspectives, and are committed to becoming community teachers — teachers who are leaders and role-models in the communities in which they teach. Program graduates will be prepared for present and future challenges as well as for a wide range of employment opportunities in educational and professional settings engaged in educational policy, community-based education and educational advocacy.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

The major in educational studies: equity, diversity, and inclusion requires 88-98 credits with each course completed with a B- or better. The required minimum overall GPA in major coursework is 3.0.

Candidates for a degree must satisfy all of the Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Course selection for a B.A. in Educational Studies is designed in close consultation with an Education Department advisor.

Student Learning Outcomes

- **GOAL ONE**: Our students effectively analyze the social dimensions of education, to include issues of culture, gender, equity, health and economics.
- **GOAL TWO**: Our students are able to recognize and respond to systematic and pervasive acts of marginalization that may percolate through schools and school communities and are situated within the contexts of more complex intersections among students’ abilities, languages, races, ethnicities, religions, genders and sexualities, all of which impact student identity, motivation, interest and connection to education.
- **GOAL THREE**: Our students demonstrate depth of knowledge in their subjects; recognize how knowledge in their subjects is created, organized and linked to other disciplines; identify the organizing themes and central concepts necessary for understanding a subject; and identify associated content necessary for students to understand these themes and concepts.
- **GOAL FOUR**: Our students understand how students develop and learn; treat students equitably and work diligently to help each student reach his or her potential; and create and maintain an atmosphere conducive to learning.
- **GOAL FIVE**: Our students demonstrate specialized knowledge of how to teach subject matter to their students. They use multiple approaches to facilitate student learning. They create lessons that are engaging, appropriately challenging, and motivating for students. They involve students in thoughtful inquiry and reflection.
- **GOAL SIX**: Our students use multiple strategies to assess students, regularly assess student progress using appropriate measures, and demonstrate the ability to make informed decisions about students and their learning based on classroom, district and state assessments.
- **GOAL SEVEN**: Our students make well-reasoned choices and decisions within the complex and demanding conditions of teaching. They analyze the effects of their actions and make appropriate changes. They consider the moral and philosophical implications of educational decisions. They improve their practice by reflecting on their own experience, observing others, seeking advice and drawing upon educational research and scholarship.
- **GOAL EIGHT**: Our students assess the relative merits of educational reform efforts and determine their appropriateness to the classroom, school and broader societal contexts in which teaching and learning occur. They develop and articulate their own conceptual and philosophical perspective on teaching and learning based on professional experience and current theories and research in education. They understand the nature of educational change, the teacher’s role in the change process, and are willing to take risks as advocates for the benefit of students, teachers and the profession.
- **GOAL NINE**: Our students are active members of learning and professional communities. They work with colleagues to enhance their own teaching, learning and professional development, and work collaboratively with students, peers, and community members to create and contribute to effective learning environments.

Education Minor

https://cola.unh.edu/education/program/minor/education

**Description**

Explore the field of education. If you’d like to develop an understanding of the educational process and tools, the education minor is a great way to combine your interest with your major course of study. You’ll learn about the education system and current perspectives in education. In this highly flexible program, you’ll choose electives in areas ranging from teaching methods to language and literacy to special education.

A Certification of Completion of Minor form needs to be completed at the beginning of a student’s final undergraduate semester at UNH. Forms are available from the Registrar’s Office.

**Requirements**

A minor consists of five courses, twenty (20) credits in Education Department courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select five (5) education courses</td>
<td>20</td>
</tr>
</tbody>
</table>

A methods course located in another department may be counted for four (4) of these twenty (20) credits (e.g., ARTS 791 or ARTS 792, ENGL 792, MATH 709, etc.).

No more than eight (8) credits used by the student to satisfy major requirements may be used for the minor.

Courses used in obtaining a minor in special education cannot be used towards a minor in education.

EDUC 500 Exploring Teaching can only be counted once (four credits) towards the minor.

No more than two (2) transferred courses in Education or a closely-related area from another college or university may be used towards a
minor in Education. A three-credit (3) course transferred from another school will count for three credits (3) at UNH, not four credits (4).

Special Education Minor

https://cola.unh.edu/education/program/minor/special-education

Description

In the special education minor, you will engage in a critical examination of disability and study fundamental issues of values, purposes and practices in education systems. The concept of disability has a dual nature. It is an object of protection that recruits efforts and resources to develop all individuals’ abilities, and to ensure their meaningful, full participation in society. Disability has also been a conduit for exclusion and inequity, with long-standing intersections with race, language, class and gender, among others. The minor can be combined with other majors, and provides a pathway to the Education Department’s professional graduate preparation programs.

A Certification of Completion of Minor form needs to be completed at the beginning of a student’s final undergraduate semester at UNH. Forms are available from the Registrar’s Office or the Department of Education Office.

Requirements

A minor consists of 20 credits in Education Department courses. The specific courses required for the minor are:

</tr>
</tbody>
</table>

One course taken at UNH in a closely related department, such as a course from the disability studies minor from the Occupational Therapy Department.

Total Credits 20

1 Selection to be determined by the undergraduate major and future career interests
2 May be taken twice as the content/readings are different each semester

No more than one required course or one elective may be a transfer course. A three-credit course taken transferred from another school will count for three credits at UNH, not four credits. A minor in Special Education does NOT lead to a teaching certification.

English (ENGL)

The English department offers four majors: English, English literature, English teaching and English/journalism. A fifth undergraduate program is the interdepartmental linguistics major. We also offer the English/law 3+3 option for students interested in pursuing a JD after just 3 years of undergraduate study as an English major and the English major/text, business writing and digital studies option.

Though we offer several different programs in the English department, our shared focus is on studying the expressive possibilities of the English language in its myriad forms. Our classes pursue three teaching missions. First, we train students in professional study of the English language. Second, we offer students ways of understanding the various traditions of works written in English, with emphasis upon close reading and placing works in historical and cultural contexts. Third, and particularly important, we teach students to write with clarity, persuasiveness and elegance, and for a variety of audiences and situations. In all of our undergraduate English majors, we provide our students with critical thinking, writing and research skills that will enrich their personal and professional lives.

Writing Programs

The Department of English offers courses for students interested in becoming writers. Writing workshops are offered in fiction, poetry and creative nonfiction. Intermediate-level courses may be taken more than once for credit, especially with two different instructors.

English Literature Major (B.A.)

https://cola.unh.edu/english/program/ba/english-literature

Description

The English literature major serves those students who want to focus particularly on the study of literature — its many forms and styles, its rich history and the range of approaches to its analysis. The English literature track is an especially attractive major for those who plan to go on to graduate school.
As an English literature major, a student will learn about various literary traditions, both British and American literature as well as traditions organized around other principles, such as post-colonial literature, women’s literature, African-American literature and genres like poetry and drama. Courses are designed to expose students to many different sorts of works and to help them develop questions and strategies of critical thinking that will make all kinds of literary expression meaningful. And the works students will study will provide many ways of looking at the world and enrich their quality of life. What’s more, students have many opportunities to hone critical writing and research skills and to practice the art of presenting research findings to a group, all skills in high demand in today’s workplace. The English literature major is an excellent way to combine development of interpretive and writing skills with an exciting, in-depth encounter with some of the very best writing ever produced in the English language.

Students interested in majoring in English literature should consult Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313 or the director of the English literature program.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

#### Major Requirements

As an English literature major, you must complete a minimum of 40 credits of major coursework with a grade of C- or better, with the exception of ENGL 419 How to Read Anything, which you must complete with a grade of C or better. You may not use ENGL 401 First-Year Writing, ENGL 415, "Literature and..." courses, or ENGL 444 classes to satisfy major requirements.

A minimum of six courses must be completed at the 600 level or higher.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</thead>
<tbody>
<tr>
<td>ENGL 419</td>
<td>How to Read Anything ¹</td>
<td></td>
</tr>
</tbody>
</table>

Select two 500-level literature courses (select from list below)

Select two pre-1800 literature courses (select from list below)

Select two post-1800 literature courses (select from list below)

ENGL 714 Critical Skills

Select one American literature course at the 600/700 level

Select one British literature course at the 600/700 level

Select one course that addresses race, the construction of race, and racial theories in a U.S. context (select from list below)

Select one course that investigates Anglophone literature in a global or transnational context (select from list below)

Select one course in a specific genre including, poetry, memoir, nonfiction, drama, fiction, and film with the exception of ENGL 533 (select from list below)

1. This must be completed with a minimum grade of "C." ENGL 419 How to Read Anything is the only 400-level class that may count towards the English literature major.

With the exception of ENGL 533 Introduction to Film Studies

Please see your advisor if you have questions about other courses that might fulfill these requirements.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

The required minimum overall GPA in major coursework is 2.0.

English Literature majors may use one major-required course to satisfy one Discovery category requirement.

Majors may only count one online course toward their English major requirements.

Student Learning Outcomes

All undergraduate English majors acquire the same core skills. These include:

- Proficiency in analytical writing, critical thinking, and public-speaking.
- Knowledge of important literary genres and subgenres
- Fluency in literary terminology.
- A broad understanding of British-and-American literature, from the medieval period in England and the moment of first contact in America to the present day.
- Demonstrated proficiency in writing an analytical essay that offers a sophisticated close-reading or explication of a literary text. This essay will have a clear thesis and proceed in a logical fashion, with interpretive claims supported by evidence from the text.
- Demonstrated proficiency in literary research and in writing an extended thesis-driven research paper in which sources are correctly and responsibly cited.
- Demonstrated understanding of how to read across the color line in the US and/or how to analyze literary works written in English from outside the UK and the US—from India, Africa, and the Caribbean, for example.

English Major (B.A.)

https://cola.unh.edu/english/program/ba/english

Description

Our general English major has two objectives: provide our students with a common core of literary experience and expertise, and offer them the opportunity to shape a course of study suited to their personal interests. By offering flexible requirements, we encourage students to devise a path through coursework that has an intelligent rationale. Students whose primary interest is in literary studies can focus on our many offerings in that area; those who have a special interest in writing can take multiple writing courses in fiction, creative nonfiction and poetry writing (in addition to literature courses). Alternatively, they can match up courses from different areas in the department (say, literature and writing courses focused on poetry). Our major requirements encourage students to sample a range of courses in literature, linguistics, creative or nonfiction writing, and English teaching, so that students become familiar with the various strands of inquiry that compose contemporary English studies.

The guiding principle of the general English major, then, is that it is open and liberal by design. It allows students to sample a variety of courses in order to study the operation of language from many perspectives.
If you’re interested in majoring in English please contact Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral

Please see your advisor if you have questions about other courses that might fulfill these requirements.

Student Learning Outcomes

All undergraduate English majors acquire the same core skills.

These include:

• Proficiency in analytical writing, critical thinking, and public-speaking.
• Knowledge of important literary genres and subgenres
• Fluency in literary terminology.
• A broad understanding of British-and-American literature, from the medieval period in England and the moment of first contact in America to the present day.
• Demonstrated proficiency in writing an analytical essay that offers a sophisticated close-reading or explication of a literary text. This essay will have a clear thesis and proceed in a logical fashion, with interpretive claims supported by evidence from the text.
• Demonstrated proficiency in literary research and in writing an extended thesis-driven research paper in which sources are correctly and responsibly cited.
• Demonstrated understanding of how to read across the color line in the US and/or how to analyze literary works written in English from outside the UK and the US--from India, Africa, and the Caribbean, for example.

English Major: Text, Business Writing and Digital Studies Option (B.A.)

https://cola.unh.edu/english/program/ba/english-major-text-business-writing-digital-studies-option

Description

The modern workplace requires that employees be adaptable. The Bureau of Labor Statistics conducted a long-term study that showed people held 11.7 jobs between the ages of 18 and 48, and those numbers are increasing with people moving between jobs more frequently every year. It is crucial that we prepare our students not just for one industry, but rather arm them with the transferable skills of critical reading, writing, analysis, production, theory and aesthetics of new forms in digital media and business. These forms include but are not limited to social media, business writing conventions, modes of digital storytelling (i.e. audio and video essays, podcasts and wikis), digital archives, web design, and online communities and interaction. Students are also trained in analysis through traditional humanistic literature and they are expected to fulfill the core learning objectives shared by all English major tracks. These include:

• the ability to communicate and debate effectively with others, both orally and in writing,
• the ability to closely examine a variety of texts (including modern digital artifacts and archival materials)
• developing the ability to use a variety of media and communication platforms;
• experience and practice in dynamic critical thinking and creativity

If you're interested in majoring in English: Text, Business Writing and Digital Studies please contact Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

• Eleven courses (44 credits) are required for the major.
• Completed with a minimum grade of C- (with the exception of ENGL 419, which must be completed with a grade of C or better).
• Students must meet the following distribution requirements. Note that any one course may satisfy more than one requirement.

<table>

</tbody>
</table>

¹ Must be completed with a minimum grade of “C” to count towards the major.

² The internship is strongly recommended but is not required.

³ Students may select any 300 or 400 level course that is approved by the advisor.
Students may include any advanced-level ENGL courses in which 20% of student assessment/work includes a digital humanities, digital research, or digital production component (even it taken to fulfill literature requirements). ENGL 602 may NOT be double counted for this requirement. Look for the 'DH' designation in the course descriptions during registration.

**The Internship Experience:** Experiential learning course that allows students to apply all of the writing, speaking, and critical thinking skills into an on-the-job experience, enabling them first-hand practice with writing documents at work, peer collaboration, public speaking opportunities/presentations, and supervision and evaluation. Students must have JR or SR status to enroll in this course.

**Digital Portfolio:** A minimum of six polished projects represented in a digital portfolio started in ENGL 602 and expanded over your career at UNH. A reflective essay will accompany this portfolio. This is a non-credit degree requirement. The Digital Portfolio is completed during enrollment in ENGL 796 'The Internship Experience'.

**Student Learning Outcomes**

All undergraduate English majors acquire the same core skills. These include:

- Proficiency in analytical writing, critical thinking, and public-speaking.
- Knowledge of important literary genres and subgenres
- Fluency in literary terminology.
- A broad understanding of British-and-American literature, from the medieval period in England and the moment of first contact in America to the present day.
- Demonstrated proficiency in writing an analytical essay that offers a sophisticated close-reading or explication of a literary text. This essay will have a clear thesis and proceed in a logical fashion, with interpretive claims supported by evidence from the text.
- Demonstrated proficiency in literary research and in writing an extended thesis-driven research paper in which sources are correctly and responsibly cited.
- Demonstrated understanding of how to read across the color line in the US and/or how to analyze literary works written in English from outside the UK and the US—from India, Africa, and the Caribbean, for example.

**English Major: Law 3+3 Option (B.A.)**

https://cola.unh.edu/english/program/ba/english-major-law-33-option
Description

The Law 3+3 program offers highly motivated UNH undergraduate students of English the possibility to earn both a bachelor's degree (B.A.) and a law degree (J.D.) in six, rather than seven, years of study. After completing three years as an undergraduate and gaining admission to the UNH Law School through the approved process, the 3+3 program participant will become a full-time first-year law student. Upon successful completion of the first year of law study, the credits earned will be counted toward the JD degree and as elective credits sufficient to complete UNH’s requirements for the bachelor’s degree.

Eligibility and Admission Process

STEP ONE: Application to the 3+3 English/Law B.A./JD option

Students apply to the program either when they submit their applications to UNH, selecting the English/J.D. option on the online application, OR after they are admitted to UNH, by applying directly to the English Department’s "English/Law 3+3 Committee." In both cases, undergraduate applicants must fulfill the general requirements for admission to the English major.

Students applying at the time of admission to UNH will typically present the following high school credentials:

- A 3.5 GPA in high school (UNH recalculates high school GPA’s to a 4.0 weighted scale)
- A rigorous high school curriculum defined as the following:
  - 4 years of college prep (CP) or higher English
  - 4 years of CP or higher mathematics
  - 4 years of CP or higher social studies/history
  - Completed at least level 3 of a foreign language
  - 3 or more years of CP or higher laboratory sciences.
- A recommended score of 1200 or better (combined Math and Verbal) on the SAT or a 29 on the ACT.

Currently enrolled UNH students applying to the program must:

- Have a 3.5 GPA in college courses at the time of application. The English Department committee governing admission to the 3+3 program will also consider past SAT scores, maturity, and the ability to complete a highly demanding program of study based on performance thus far.
- For both groups, it is important to note that satisfying these requirements does not guarantee admission to this program. The review process is holistic (meaning all parts of the application carry weight and influence the final decision) and other components of the application will influence any admission decisions. Available space within the program will also influence who is admitted and how many students can be accepted.

STEP TWO: Application to UNH Law school

To be eligible, students must:

- Take the LSAT or the GRE no later than December of the final undergraduate year (i.e. the Junior year). Students opting to take the LSAT must earn a score of 157 or above. Students opting to take the GRE must score in the 80% of concurrently tested students.
- Submit the law school application through the Law School Admissions Council by January 1 of the calendar year in which the student wishes to enroll in law school.
- If, for some reason, students are not admitted to UNH Law, they will complete their final, fourth year at UNH, following the typical undergraduate program.

Questions about the English/Law 3+3 undergraduate program should be directed to Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313.

Questions about UNH Law School entry should be directed to Kevin Sousa, UNH pre-law advisor, 110 Murkland Hall, (603) 862-2062.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Students in the English/law 3+3 option fulfill the BA degree requirements and English major. See the Degree Plan for the recommended path through the English major.

Participation requires that students:

- Complete all discovery and major requirements and at least 98 credits before beginning law school
- Maintain a 3.5 or above grade point average, including transfer credits
- Take the LSAT or the GRE no later than December of the final undergraduate year (i.e. the Junior year). Students opting to take the LSAT must earn a score of 157 or above. Students opting to take the GRE must score in the 80% of concurrently tested students.
- Submit the law school application through the Law School Admissions Council by January 1 of the year in which the student wishes to enroll in law school.

Major Requirements

1. Students must complete a minimum of 40 credits of with a minimum grade of C-.
2. The required minimum overall GPA is 2.0.
3. ENGL 401, 415s, “Literature and...” courses, 444s, ENGL 620 and ENGL 788 may not be used to satisfy major requirements.
4. A total of six courses must be numbered 600 and above.
5. One major-required course may be used to satisfy one Discovery category requirement.
6. Only one online course may count toward major requirements.
7. Special Topics in Literature courses (e.g. ENGL 693, ENGL 787, ENGL 797) may be used to satisfy Pre-1800 or Post-1800 and/or Race Requirement areas if the designated topic is appropriate.
8. Capstone must be completed with a minimum grade of C. May not be double-counted toward major requirements. Submit a Capstone Declaration form indicating the English course to be taken at the time of registration.

Select one additional 500-, 600-, or 700-level ENGL course
Capstone (one 700-level ENGL course)

Please see your advisor if you have questions about other courses that might fulfill these requirements.

Law School Requirements

The following summarizes the required curriculum and bar recommended curriculum. 85 credits are required for graduation.

Required courses include:
- Administrative Process
- Criminal Procedure
- Professional Responsibility
- Upper Level Writing Course
University of New Hampshire

Upper Level Skills Course

**Bar recommended courses include:**

- Personal Taxation
- Business Associations
- Wills, Trust & Estates
- Evidence

### Degree Plan

#### English Major Degree Plan

Below is a suggested course outline to help guide English undergraduate students participating in the English/Law 3+3 program through completion of their major and Discovery program requirements. Variations to this suggested path of courses may be undertaken with the approval of the student’s English undergraduate advisor.

**TOTAL:** 98 Credits (40 Discovery, 44 English, 4-8 Foreign Language, 4-8 Elective)

**NEED:** Beyond ENGL 401 First-Year Writing, 3 more WI courses, one in major, one at 600 level.

Students should take LAW 475 Getting Ready to Succeed in Law School at some point during their Sophomore year but no later than the first semester of their Junior year. This 2-credit course, taught by a UNH Law School faculty member, will teach students how to prepare for a legal education. If LAW 475 is not offered during the appropriate timeline for student progression to their "1L"/Senior year of study, other 2-credit options that are suitable preparation for law school study include JUST 550 Mock Trial and JUST 551 Mock Trial. For other possible 1-2 credit courses, see the Time & Room Schedule and consult with your academic advisor. The 1-2 credit courses can be completed at any point in your first 3 years at UNH-Durham. You can also complete them during the January term [see, e.g., THDA #531 The London Experience: Discovery, a 2-credit study abroad program] or in the summer.
HONORS: It is not necessary to complete the honors program, but it is possible: Honors in Discovery + Honors in Major with Thesis (See addendum I).

SEQUENCE: With the exception of ENGL 419 How to Read Anything and ENGL 787 English Major Seminar, English courses don’t need to be taken in any specific order; the guide above is only a suggestion. In general, 500-level courses should be taken before 600-700 level ones. However, a student could take a class that satisfies the Race Requirement in Semester I of Junior year rather than Semester II, or a pre-1800 600-700 level literature course in Semester II of Junior year. As long as all the categories listed above are met, students have the flexibility to choose the courses that best meet their interests and schedules. There are some writing and journalism courses that have prerequisites, and students should be careful to note these before choosing upper-level courses in those fields.

ADVISING: It is very important that students progressing through the 3+3 English/Law program maintain close contact with their degree advisor. This will help students remain “on track” to complete degree requirements, and the advisor will guide the student into the next phase of the program, admission to the Law school. Students who plan early and work closely with their advisor may find it possible to include study abroad and participation in other University programs, if desired, but only with careful planning.

Law School Degree Plan

This is a sample Law School course planning outline. Variations to this suggested path of courses may be undertaken with the approval of the student’s Law school advisor.

Senior/First Year Law (31 credits)

The schedule and track of the second and third years of law school are directed by each student with careful advising from the law faculty.

English Teaching Major (B.A.)

Are you passionate about serving your community? Do you enjoy reading, writing, creative thinking and imagination? Are you eager to shape the future? The English teaching major could be a wonderful choice for you!

English teaching majors synthesize knowledge across areas — literature, language, composition, speaking, listening, identity, linguistics and education, just to name a few. We think critically and collaborate. We spark learning and we study it. We evaluate texts and resources, examine literacy skills, consider appropriate media, and design reading and writing opportunities and instruction in a variety of contexts. In particular, the English teaching major focuses on preparing future teachers and educational leaders, but the skills students learn are valuable in many settings, from the classroom to the workplace to the broader world.

The goal of the English teaching major is to prepare informed, thoughtful, and skilled English teachers who will become educational leaders in their own communities and in the teaching profession. In the English Department, students learn about literature, cultural theories of race and identity, composition, grammar, a variety of textual and digital media, and instructional practices appropriate to grades five through twelve. In the Education Department, students learn about human development, the history of schooling, and many philosophical perspectives on learning and education.

The final steps to becoming a teacher are completing a Master’s program in the Education Department and applying for New Hampshire teacher certification. Students who choose one of these programs will complete graduate-level coursework and undertake a year-long teaching internship where they will collaborate with a teacher to apply their knowledge in a classroom. Students who complete this program are uniquely well prepared to become leaders in the profession over the long term. State

Student Learning Outcomes

All undergraduate English majors acquire the same core skills. These include:

- Proficiency in analytical writing, critical thinking, and public-speaking.
- Knowledge of important literary genres and subgenres.
- Fluency in literary terminology.
- A broad understanding of British-and-American literature, from the medieval period in England and the moment of first contact in America to the present day.
- Demonstrated proficiency in writing an analytical essay that offers a sophisticated close-reading or explication of a literary text. This essay will have a clear thesis and proceed in a logical fashion, with interpretive claims supported by evidence from the text.
- Demonstrated proficiency in literary research and in writing an extended thesis-driven research paper in which sources are correctly and responsibly cited.
- Demonstrated understanding of how to read across the color line in the US and/or how to analyze literary works written in English from outside the UK and the US—from India, Africa, and the Caribbean, for example.

https://cola.unh.edu/english/program/ba/english-teaching-major
Students interested in majoring in English teaching should consult Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313, or the director of the English teaching program, Prof. Alecia Magnifico.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes
All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements
Completion of the undergraduate teaching major does not in itself meet state certification requirements.

Students should enroll in the undergraduate major and pass the following courses with a GPA of 2.5 or better:

<table>
<thead>
<tr>

</tbody>
</table>

1 ENGL 512 British Literature I: Age of Heroes: Beowulf to Dr. Faustus or ENGL 513W British Literature II: Age of Revolutions: Shakespeare to Austen may be substituted for one of the two required literature courses numbered 600 or above
2 Other courses may count, when relevant and with prior written approval of the student’s advisor. The course used to fulfill this requirement may be double counted within the "Two literature courses 600 or above" OR "Any English Department course..." requirement area.

Student Learning Outcomes

Students will have the opportunity to compare philosophies of English teaching and learning, and to develop their own approaches to writing and literacy instruction in unit plans and lesson plans. In class, we will discuss theoretical and pedagogical ideas centered on student writing, engage in reading and writing exercises, produce and practice instructional activities and assessments, evaluate approaches to teaching writing, and review state-level standards and tests. Overall, the aim of the course is recognition of literacy skills (including reading, writing, listening, speaking, and viewing) and consideration of how they can be used for learning goals including comprehension, analysis, description, and evaluation.

Students will:

- Design activities, lessons, and units to meet established standards and objectives in writing and language use.
- Adapt materials for a variety of students’ needs, including exceptional learners.
• Identify teaching resources among mentors, professional literature, conferences, organizations (e.g., National Council of Teachers of English [NCTE]), technology, and websites.
• Reflect and write on the theoretical bases for instructional decisions, evaluating professional literature and using appropriate academic conventions.
• Deliver engaging, on-point writing and language instruction appropriate to audience and content; practice a variety of presentation and discussion strategies.

English/Journalism Major (B.A.)
https://cola.unh.edu/english/program/ba/englishjournalism-major

Description
In our digital age, the ability to evaluate, edit, package and communicate information has become crucial to many, if not most, careers. Founded on the study of literature, the oldest form of story-telling, our English/journalism major prepares students for success in the media or any vocation that requires strong research and communications skills. Learn the basics: interviewing, fact gathering, verification and writing in both news and feature styles. Then broaden your repertoire by producing stories for digital platforms using audio, photo, video and data visualization.

Students interested in the English/journalism major should see Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313, or the director of the Journalism Program, Prof. Tom Haines.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

English/journalism majors must complete ENGL 401 First-Year Writing before taking the first journalism course, ENGL 534 21st Century Journalism: How the News Works. After completing ENGL 534 21st Century Journalism: How the News Works, majors may move on to ENGL 621 Newswriting. Journalism majors must complete classes taken for major credit with a grade of C- or better, with the exception of ENGL 419 How to Read Anything and the course taken for Capstone credit.

Select one post-1800 literature course (select from list below) 4
Select one course that addresses race, the construction of race, and racial theories (select from list below) 4
Select one additional ENGL course at the 500, 600 or 700 level. Any English course may be used to satisfy this requirement except courses with a journalism focus (see list of excluded courses in footnote) 2
ENGL 534 21st Century Journalism: How the News Works 4
ENGL 621 Newswriting 4
Select three additional journalism courses from the following: 12
ENGL 623 Creative Nonfiction
ENGL 631 Digital Reporting
ENGL #703T Travel Writing
ENGL 711 Editing
ENGL 712 Multimedia Storytelling
ENGL 721 Advanced Reporting
ENGL 722 Feature Writing
ENGL #723 Issues in Journalism
ENGL 735 Entrepreneurial Journalism

Capstone: Any English course at the 700 level (except ENGL 790). 3

1 Must be completed with a minimum grade of C. ENGL 419 How to Read Anything is the only 400-level class that may count towards the English/Journalism major. ENGL 415s, "Literature and..." courses, and ENGL 444s will NOT count towards this major.
2 English courses with a journalism focus are ENGL 534, ENGL 621, ENGL 623, ENGL 631, ENGL #703T, ENGL 711, ENGL 712, ENGL 720, ENGL 721, ENGL #723, ENGL 725.
3 Capstone course may not be double-counted towards other major requirement areas. Minimum grade required: C. ENGL 788 Senior Honors written as part of the English Honors in Major program may be used as a Capstone course. Students must submit a Capstone Declaration form at the time of registration. Capstone course credit may not be applied retroactively.

All undergraduate English majors acquire the same core skills. These include:

- Proficiency in analytical writing, critical thinking, and public-speaking.
- Knowledge of important literary genres and subgenres.
- Fluency in literary terminology.

A broad understanding of British-and-American literature, from the medieval period in England and the moment of first contact in America to the present day.

Demonstrated proficiency in writing an analytical essay that offers a sophisticated close-reading or explication of a literary text. This essay will have a clear thesis and proceed in a logical fashion, with interpretive claims supported by evidence from the text.

Demonstrated proficiency in literary research and in writing an extended thesis-driven research paper in which sources are correctly and responsibly cited.

Demonstrated understanding of how to read across the color line in the US and/or how to analyze literary works written in English from outside the UK and the US—from India, Africa, and the Caribbean, for example.

Students in our major tracks acquire the following specialized skills.

English/Journalism majors will be able to:

- Demonstrate proficiency in a wide range of reporting skills (i.e., finding trends, understanding context, editing, and so forth).
- Find and interview credible sources.
- Know how to write feature articles, profiles, and other kinds of news stories.

### English Minor

https://cola.unh.edu/english/program/minor/english

**Description**

The English minor offers students the opportunity to develop critical thinking, writing and research skills that will enrich both their personal lives and their professional careers. Students draw upon courses in literature, creative writing, journalism and linguistics to craft their own course of study.

Students interested in minoring in English may contact Carla Cannizzaro, academic/career counselor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313 with any questions.

**Requirements**

To minor in English at UNH, students complete five courses (20 credits).

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Credits 20

ENGL 401 First-Year Writing and ENGL 415s, "Literature and..." courses and ENGL 444s cannot be applied toward the English minor.

No more than two transfer courses may be applied toward the English minor.

The minimum acceptable grade for each course is C.
**Writing Minor**

https://cola.unh.edu/english/program/minor/writing

**Description**

With employers stressing the importance of writing skills and the writing demands of all professions increasing, the writing minor is designed to serve students who want to demonstrate sustained work with writing. Students take a concentration of courses in creative writing or journalism, focusing on the creative and practical uses of writing. The completion of a writing minor will enhance the job prospects in fields where the demands for writing is higher than ever. The writing minor also serves students who want to use the imagination to develop stories, poems, essays and screenplays.

Students interested in minoring in English writing may contact Carla Cannizzaro, Senior Academic Advisor, Department of English, 230F Hamilton Smith Hall, (603) 862-1313 with any questions.

**Requirements**

Students must complete at least five 4-credit courses (20 credits) from the list of approved courses. At least three of the courses must be at the 600 level or higher. ENGL 419s, "Literature and...", courses cannot be applied toward the English writing minor. The minimum acceptable grade for each course is C-. No more than two transfer courses can be applied toward the English writing minor. English literature and English teaching majors may declare a writing minor with the approval of their faculty adviser. A maximum of two English courses (8 credits) are allowed to double-count toward the literature or teaching major and writing minor. Other English Department majors are not eligible to declare a writing minor.

At the beginning of your final semester of study at UNH, please fill out a Certification of Completion of Minor form and obtain signatures from your major advisor, the English department coordinator, and the Dean of your college.

**French (FREN)**

**Study Abroad in Dijon**

The department offers a junior year and semesters abroad at the University of Burgundy in Dijon, France (see FREN 690 Study Abroad in Dijon France). This program is open to all qualified students at the University of New Hampshire who have completed FREN 631 Advanced French: Reading and Writing and FREN 632 Advanced French: Listening and Speaking by the end of the semester preceding their departure. Early consultation with the director of the program is urged. Non-credit orientation meetings are required during the semester prior to departure.

**Summer Study in Dijon**

This program is open to all students interested in an immersion program during the summer. It provides four to eight weeks of intensive courses in French at the CIEF (Centre International des Etudes françaises) at the Université de Bourgogne in Dijon, France. A minimum GPA of 2.5 is required. Special fee. 4 to 8 credits. No previous study of the language is necessary to participate. Study in Dijon can satisfy the language requirement. Consult faculty of the French program to ensure proper placement. For French majors, the summer course can only satisfy the study abroad requirement of those who have documented academic reasons preventing them from studying abroad for an entire semester. By petition only.

**Spring/Summer Study in Toulouse**

This program is open to all students interested in an immersion program during the summer. It provides four to eight weeks of intensive courses in French at the CIEF (Centre International des Etudes françaises) at the Université de Bourgogne in Dijon, France. A minimum GPA of 2.5 is required. Special fee. 4 to 8 credits. No previous study of the language is necessary to participate. Study in Dijon can satisfy the language requirement. Consult faculty of the French program to ensure proper placement. For French majors, the summer course can only satisfy the study abroad requirement of those who have documented academic reasons preventing them from studying abroad for an entire semester. By petition only.

**Teaching Assistantship in France (TAPIF)**

Each year the French government offers teaching assistantships in French elementary or secondary schools for graduating students who have studied French. The application process begins during the fall semester of the senior year. Consultation with the advisor is recommended.

French Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/french-major

Description

The undergraduate major in French offered by the Department of Languages, Literatures and Cultures is centered on the study of the French language and the literatures and cultures of France and the French-speaking world. Students who complete the requirements for the major can expect to become proficient in French at a level that would allow them to communicate with native speakers, to develop an in-depth critical appreciation of French and Francophone cultures and literatures, and to be culturally sensitive members of society.

The program offers courses devoted to authors, works, and literary and cultural movements that span ten centuries and four continents. The curriculum also includes interdisciplinary courses on relations between literature and other areas of study such as history, law, religion, politics and the arts. All courses are conducted in French, and majors are expected to write papers and examinations in that language.

French can be taken either as a primary major or as one of two majors, in consultation with the director of undergraduate studies. Appropriate majors to combine with French might include, but are not limited to, international affairs, political science, English, education, film and media studies, history, music, philosophy, theater studies, women’s studies, international affairs, political science, English, education, film and media studies, history, music, philosophy, theater studies, women’s studies, business and communication.

The French major may interest students desiring a general humanistic education based on the language and literature of the French-speaking world; students planning to teach French at the elementary or secondary level; students who intend to pursue graduate work in preparation for careers in such areas as international law, business, journalism, international organizations, and public or government service, which require both training in a major foreign language and/or a general background in a humanistic discipline.

Requirements

Degree Requirements

Minimum Credit Requirements: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

All students must complete at least 10 classes (40 credits). All coursework required for the French major must be completed with a grade of C or better. Specific course requirements are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 503</td>
<td>Intermediate French I</td>
</tr>
<tr>
<td>FREN 504</td>
<td>Intermediate French II</td>
</tr>
<tr>
<td>FREN 631</td>
<td>Advanced French: Reading and Writing</td>
</tr>
<tr>
<td>FREN 632</td>
<td>Advanced French: Listening and Speaking</td>
</tr>
</tbody>
</table>

Electives

Select a minimum of five courses from the following Culture, Linguistics, and Literature category:

- FREN 525 - A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond
- FREN 525H - Honors/A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond
- FREN 526 - Introduction to Francophone Cultures
- FREN 651 - Love, War, and Power in French Literature
- FREN 595 - French Practicum
- FREN 595A - A Culinary Exploration in Southern France
- FREN 652 - Greatest Hits of French
- FREN 676 - Topics in Francophone Culture
- FREN 677 - France in the European Union
- FREN 765 - Rebellion and Upheaval in 18th-Century Literature and Culture
- FREN 775 - Les Mis and their World
- FREN 785 - Francophones Plurielles
- FREN 790 - Cultural Encounters: A View from Abroad
- FREN 795 - Special Studies in French Language and Literature
- FREN 840 - Film History
- LLC 532 - Comparative Literature: Masterpieces of World Literature I
- LLC 595 - Language Practicum
- LLC 791 - Methods of Foreign Language Teaching
- LLC 790 - World Languages Capstone

Study Abroad

An approved foreign study experience in a French-speaking country is required, although an approved equivalent high-impact experience may be substituted for study abroad with a compelling justification.

1 While the major may start counting as early as the Intermediate I level (FREN 503), those who enter the major at a higher level (FREN 504, FREN 631, or FREN 632) will replace the courses they skip from the four in the intermediate and advanced language category with additional electives in the Culture, Linguistics, and Literature category.

2 More electives required if fewer language credits were completed due to proficiency level and placement.

3 No limit on the number of classes in the target language in a given semester will be strongly encouraged to enroll in one credit of conversation hour to maintain their language skills, and many of the courses taught in English will allow students the option to (or even require students to) do some work in the target language.

4 Or approved equivalent 700-level course taken at UNH, approved study abroad equivalent, or approved high-impact experience (such as internship with a robust target language/culture component).
individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

French majors may use two major-required courses to satisfy two Discovery category requirements.

**Student Learning Outcomes**

Upon completion of the French Major, our students are expected to master:

- **SLO 1**: Communicative Proficiency Students communicate in the target language, having mastered the four basic communicative skills at the advanced level according to the ACTFL Proficiency Guidelines. They are able to narrate and describe in past, present and future time, use a variety of communication strategies (such as circumlocution, paraphrasing), support their opinions and hypothesize. They can be understood without difficulty by a native interlocutor and carry conversations on a wide variety of topics. They are able to understand native speakers in a variety of situations (academic, everyday life, radio, television).

- **SLO 2**: Intercultural Competence During and after their experiences abroad, students are led to reflect on cultural differences and develop cross-cultural competencies. They develop awareness of what it means to interact appropriately and effectively within diverse social and cultural contexts.

- **SLO 3**: Knowledge and Understanding Students grasp complex or unfamiliar texts (literary, journalistic, etc.), have an awareness of the aesthetic properties of language and literary style, and have developed tools to assess and analyze different linguistic registers. They are able to contextualize and have knowledge of a representative selection of figures, works, and tendencies in the literature and other cultural productions from the Francophone world.

- **SLO 4**: Critical Thinking Students are able to critically analyze texts and other cultural artifacts from various areas of the Francophone world, are able to define a position about them, and to substantiate it using research. They are able to establish connections between different areas of knowledge, and are able to collaborate to answer questions and solve problems through task-based activities.

**French Minor**

https://cola.unh.edu/languages-literatures-cultures/program/minor/french

**Description**

The minor in French provides students with the components of a well-rounded education: a solid understanding of grammar and pronunciation, intercultural awareness, exposure to Francophone literatures and cultures, and a sufficient command of the language to enhance their chosen field of study, and countless career opportunities across the public, private and nonprofit sectors, including government, international development, journalism, law, communications and business.

Students in the French minor program at UNH are encouraged to complete some portion of their undergraduate study abroad through the Study Abroad in Dijon. Given the increasing globalization of our world, living abroad enhances cross-cultural awareness, competency, and adaptability. Students find that living and studying abroad expands their perspective, improves critical thinking, increases independence and better prepares them for a career in an increasingly global marketplace.

**Requirements**

A minor in French consists of 20 credits in French courses numbered FREN 503 Intermediate French I and above.

<table>

</tbody>
</table>

- No fewer than three courses have to be taken at UNH.
- No more than one course conducted in English (e.g., FREN 525 A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond) will be counted toward the minor, although students may elect to take more than one such course provided they earn more than 20 credits.
- Those entering the minor at FREN 504 Intermediate French II or higher will be expected to complete FREN 651 Love, War, and Power in French Literature or FREN 652 Greatest Hits of French.

- After completing the five required courses, students submit a Certification of Completion of Minor form.

**Geography (GEOG)**

Geography, as the study of place, space and environment, addresses the “why of where” by uniting social and biophysical sciences, humanities and technology to examine the factors that make a place or environment unique. Connecting academic inquiry to real-world problem solving, our courses teach critical thinking skills that prepare students to transfer classroom and field experience into a wide range of careers. With interests ranging from globalization to climate change and sustainability, urbanization to community development at home and abroad, geography majors gain the knowledge, techniques and perspectives needed to meet current and future challenges.

Geography at UNH is an undergraduate-focused department offering both major and minor degree programs. With small class sizes, personalized advising by department faculty, and opportunities for independent study, our students receive a high degree of individual attention. UNH geography graduates are prepared to enter a variety of careers or professional and graduate degree programs.

- Geography Minor (p. 233)

**Faculty**

https://cola.unh.edu/geography/faculty-staff-directory

**Geography Major (B.A.)**

https://cola.unh.edu/geography/program/ba/geography
Description

The geography major provides undergraduates with a solid foundation in geography by uniting social and biophysical sciences, humanities and technology to examine the factors that make a place or environment unique. Connecting academic inquiry to real-world problem solving, you will develop critical thinking skills and be prepared to transfer classroom and field experience into a wide range of careers.

With interests ranging from globalization to climate change and sustainability, urbanization to community development at home and abroad, UNH geography graduates have gone on to careers in urban, regional and transportation planning, community development, environmental conservation and natural resources management, sustainability science, geographic information science, market research, locational analysis, population studies, foreign aid, international diplomacy and education.

Students intending to major in geography should consult with the department chairperson.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

To earn a bachelor of arts in geography, students must complete 10 geography courses with a minimum grade of C- minus.

Students complete foundation courses intended to provide a basic understanding of human, physical, and world regional geography. It is recommended the courses be taken as early as possible in a student’s program. Students also complete required skills courses, which provide the basic analytical and technical skills used in geography, electives and a capstone course.

Geotechniques

Students interested in geographic information systems, remote sensing, locational analysis and other geographic techniques may specialize in Geotechniques by completing three 700-level methods courses in Geography (GEOG 750-769).

1 Independent study courses including GEOG 695 Internship and GEOG 795 Special Project may be applied to the major elective requirement once if taken for a total of four credit hours.

Student Learning Outcomes

- Integrate biophysical and socio-cultural disciplinary traditions to explain the complex interrelationships between and among human-natural systems spanning local to global scales.
- Communicate geographic concepts, research, and methods of analysis professionally and effectively through written products, oral presentations, and visualizations appropriate for the intended audience.

Geography Minor

https://cola.unh.edu/geography/program/minor/geography

Description

The geography minor allows undergraduates to explore one or more of the three main areas of geography — human geography, environmental geography and geotechniques. Studying geography prepares students to pursue a wide variety of careers or enter graduate school.

Requirements

To minor in geography, you must complete any five geography courses (at least 20 credit hours) with a grade of at least C-.

Total Credits | 20
Courses taken Pass/Fail cannot be used for the minor. All minor courses can be used to fulfill Discovery Program requirements.

At the beginning of your final semester at UNH you should complete a Certification of Completion of Minor form. The minor must be approved by your major and minor supervisors. The completed form is then presented to the college dean for approval and, finally, forwarded to the Registrar.

Please direct questions about minoring in geography to the department chairperson.

**German (GERM)**

German is the most widely spoken language in Europe, and Germany plays a leading role in a number of areas: EU and global trade and policy, fine arts, alternative energy and sustainability, engineering, philosophy. With their rich cultural and intellectual history, as well as one of the world’s primary export-driven economies, the German-speaking countries offer unique career opportunities for globally minded students and citizens.

**Summer Study in Berlin, Germany**

The UNH German Program manages a summer program in Berlin, Germany. During their study in Berlin, students can earn between 4 and 12 credits. The program provides students with an immersion experience in the German language and culture. Students receive language instruction at the appropriate level (elementary, intermediate, or advanced) at the BSI Private Language School in central Berlin. No prior German language study is required. On designated weekday afternoons, students participate in cultural excursions and discussions with the on-site UNH faculty member. Through the UNH Berlin summer program, students receive UNH credit and can fulfill the World Cultures Discovery requirement. In line with UNH’s goals to educate students to become global citizens, this immersion program gives students insight into what it means to experience a different culture and language. For more information, contact Charles Vannette or visit the COLA Center for Study Abroad.

**Other Programs**

The University allows students to attend approved study abroad programs for UNH credit at schools in Germany and Austria. Students may attend accredited one- or two-semester programs at universities in cities like Munich, Vienna, Berlin, Heidelberg, Freiburg or Salzburg. Most study abroad programs require a minimum of two years of college German. For details, see the coordinator of German or the foreign studies coordinator at the UNH Global Education Center. Internships with a German firm or organization may also be taken for credit (see GERM 595 Internship). Internships must be approved ahead of time in collaboration with an advisor in the German program. Financial aid applies to all approved programs.

*Students entering major at a higher language level will replace the language courses with additional electives.
Competency of its graduates.

Specific outcomes for Linguistic Competency The German Program

German majors may use two major-required courses to satisfy two individual major program. Bachelor of arts candidates must also satisfy Program requirements in addition to satisfying the requirements of each major.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

German majors may use two major-required courses to satisfy two Discovery category requirements.

Student Learning Outcomes

Specific outcomes for Linguistic Competency The German Program applies the ACTFL Proficiency Guidelines to evaluate the linguistic competency of its graduates.

• Speaking Proficiency: Graduates of the program achieve a speaking proficiency of Intermediate High to Advanced Mid, with the majority of students achieving the level of Advanced Low. Students demonstrate an ability to speak clearly and with precision about personal, professional, and academic topics.

• Writing Proficiency: Graduates of the program achieve a written proficiency of Intermediate High to Advanced Mid, with the majority of students achieving the level of Advanced Low. Students demonstrate an ability to write clearly about professional or academic topics, including introductory research in the area of literature and culture studies.

• Listening Proficiency: Graduates of the program achieve a listening proficiency of Advanced Low to Advanced High, with the majority of students achieving the level of Advanced Mid. Students demonstrate an ability to understand conventional as well as complex narratives that may use uncommon vocabulary or address difficult topics, such as theater plays in the target language.

• Reading Proficiency: Graduates of the program achieve a reading proficiency of Advanced Low to Advanced Mid. Students demonstrate an ability to read and interpret conventional quotidian texts as well as complicated narratives from the 18th-21st centuries, addressing a wide range of topics and genres, including literary, scientific, and cultural theory.

II. Specific outcomes for Integrative Knowledge Accompanying the acquisition of German language skills is the study of cultural phenomena, which provides German majors with a breadth of knowledge as found in a traditional liberal arts program. The acquired knowledge helps students engage with various additional fields of study across the UNH campus. Through transferable practice in abstract reasoning, critical examination, and constructive articulation, students extend their intellectual curiosity and learn to aspire to life-long learning.

• Interpretive Reasoning Particularly in the advanced courses that analyze art in its various forms – literature, film, painting, performance art, et. al. – we (students and faculty alike) wrestle with interpretation and contextualization. In these courses, we are invested in humanistic inquiry and address tough questions – those concerning value and meaning, realms of knowledge ungraspable by natural science alone. Patterns of narrative, traditions of rhetoric, and history all inform the analyses of the cultural artifacts under study. By fostering the skills of close reading and listening, German majors become more articulate (both in German and their native language) and more proficient in analyzing and synthesizing the various types of knowledge.

• Critical-Constructive Thinking In the analysis of cultural artifacts, students learn to consider a multitude of perspectives. In addition to critical thinking skills, German majors become better versed at the constructive synthesis. Term papers and presentations in the target language are the culmination of linguistic comprehension and production as well as of interpretation and critique. In assembling such larger projects, German majors learn to construct well-informed arguments that are based on interpretation and scholarly critique.

• Interdisciplinarity Language study entails a wide range of topics and genres, including literary, scientific, and historical subjects as complicated narratives from the 18th-21st centuries, addressing a wide range of topics and genres, including literary, scientific, and cultural theory.
of the skillsets during the study abroad experience (but also in our classrooms) offers an opportunity for students to achieve meaningful personal growth by realizing their own cultural underpinnings. As a result of their study of German, some students choose to go to or to return to Germany for work or travel. Thus, the study of German can result in transformative moments in the lives of our students.

German Minor

https://cola.unh.edu/languages-literatures-cultures/program/minor/german

Description

The German minor is offered by the Department of Languages, Literatures and Cultures. This program is of interest to the following groups of students:

- Those who have a special interest in the German language, literature and culture.
- Those who intend to enter fields in which a background in foreign languages and cultures is desirable, such as business, engineering, the sciences, law, international affairs, government service and international service.

Requirements

A minor consists of five courses in German numbered 503 and above.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Five electives selected from GERM 503 or above</td>

</tr>
<tr>
<td></td>
<td>Total Credits</td>
<td>20</td>
</tr>
</tbody>
</table>

The minor may include one course taught in English but not LLC 791 Methods of Foreign Language Teaching.

Students wishing to minor are expected to meet with a faculty member from the German program to discuss their course of study.

At the beginning of your final semester of study, you should file a certification of completion of minor form, obtain the necessary signatures, and submit it to your Dean’s Office.

History (HIST)

The Department of History is one of the top history departments in the country, with an internationally recognized faculty in American, European, and World and Ancient history. History professors have won some of the most important prizes in the profession, and they often appear on television and other media outlets. But what really distinguishes the department's faculty is that we love to teach. Our courses cover a wide range of times, places and subjects, from ancient history to the history of the modern world.

History is a flexible major, which makes it a good choice for students who want to complete a double major in another discipline. Popular double majors include communication, justice studies, economics and international affairs.

The Education Department’s 4+1 graduate program is also available to history majors. Students who complete that program receive their social studies teacher certification in five years and graduate with a B.A. and M.Ed. or M.A.T.

The Department offers a major and minor in history. We also administer an interdisciplinary minor, the social studies of science and technology.

The History Department at UNH has approximately 200 undergraduate majors; about 50 students graduate with a history major every year.

Five-Year BA/MA Program

The History Department offers our majors an opportunity to complete an accelerated Master's Degree in history in as little as one additional year of study. Eligible seniors and juniors are able to take up to 12 credits in graduate history courses, which will count both toward the completion of the history B.A. requirements, and the history M.A. requirements. This accelerated option is available for both the standard track M.A. and the museum studies track.

To be eligible for the program students must have a GPA of 3.2 or higher. Students also must have completed 96 credits by the time they enter the accelerated M.A. program.

Students should apply before April 10th of their junior year. Students interested in applying must complete the UNH graduate studies application. Applications will include two letters of recommendation, a cover letter, a writing sample and a UNH transcript. GRE scores are NOT required. Students should also submit a cover letter and an endorsement from a member of the History Department directly to the graduate director, Professor David Bachrach (david.bachrach@unh.edu).

If you are interested in applying for the accelerated M.A. program, or would like additional information about the program, please contact Professor David Bachrach.

History Major (B.A.)

https://cola.unh.edu/history/program/ba/history

Description

The study of history gives students the analytical and communication skills necessary to succeed in today's workplace. It is also essential for being an informed citizen. The history major covers an array of subjects: the Roman Empire, modern U.S. foreign policy, China's Cultural Revolution, medieval Islam, the American Revolution and many, many others. Every major takes an introductory seminar on historical writing and analysis, and the major concludes with a senior colloquium that
allows students to conduct in-depth research on a topic of their choosing. History is a flexible major. That makes history an excellent choice for students who plan to study abroad or who want to complete a double major in another discipline.

Students sometimes ask, “what can you do with a history major?” The answer is practically anything you want. History majors have attended some of the top graduate programs in the country. Many become teachers, but history majors also go into law, medicine and business, as well as careers in technology, international relations, politics and the media. Majoring in history prepares students well for the intellectual flexibility and ability to think outside the box that today’s job market demands.

**Undergraduate Awards for Majors**

The Philip M. Marston Scholarship, an award of $500, is available to students who are interested in colonial or New England history and have demonstrated financial need. There are course requirements for this scholarship. More details are available from the history office.

Each spring, the members of the departmental undergraduate committee choose history majors to receive the following prizes in history:

- The William Greenleaf Prize is given for the best senior colloquium paper. Award candidates must have a minimum grade-point average of 3.2 in history courses. Individuals may nominate themselves or may be nominated by faculty members.
- The Allen Linden Prize for the best senior history thesis is funded by the Signal Fund.
- The Charles Clark Prize is for the best essay or research paper submitted by a history major and is funded by the Signal Fund.

Phi Alpha Theta, the history honor society, is an international scholastic organization dedicated to promoting historical study on the undergraduate and graduate levels. Admission to the UNH Psi Pi chapter is open to undergraduates with an overall grade-point average of 3.0, a grade-point average of 3.4 or better in history courses, and completion of HIST 500 Introduction to Historical Thinking.

**Five-Year BA/MA Program**

The History Department offers our majors an opportunity to complete an accelerated Master’s Degree in history in as little as one additional year of study. Eligible seniors and juniors are able to take up to 12 credits in graduate history courses, which will count both toward the completion of the history B.A. requirements, and the history M.A. requirements. This accelerated option is available for both the standard track M.A. and the museum studies track.

To be eligible for the program students must have a GPA of 3.2 or higher. Students also must have completed 96 credits by the time they enter the accelerated M.A. program.

**Students should apply before April 10th of their junior year.** Students interested in applying must complete the [UNH graduate studies application](mailto:). Applications will include two letters of recommendation, a cover letter, a writing sample and a UNH transcript. GRE scores are NOT required. Students should also submit a cover letter and an endorsement from a member of the History Department directly to the graduate director, Professor David Bachrach at david.bachrach@unh.edu.

If you are interested in applying for the accelerated M.A. program, or would like additional information about the program, please contact Professor David Bachrach.

**Requirements**

**Degree Requirements**

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

To complete a major in history, students must take ten (10) 4-credit history courses or their equivalent. Students who enter the University as history majors, or who declare a major in history, should take the first required course, HIST 500, as soon as possible. To declare a major in history, students must have completed or be enrolled in two history courses. HIST 500 is a prerequisite for the second required course, HIST 797, which fulfills the Discovery Program capstone requirement for history majors and is taken during the senior year. Students should consult the list of topics for HIST 797 advertised each semester.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</thead>
<tbody>
<tr>
<td>HIST 500</td>
<td>Introduction to Historical Thinking</td>
<td>4</td>
</tr>
<tr>
<td>HIST 797</td>
<td>Colloquium</td>
<td>4</td>
</tr>
<tr>
<td>At least eight (8) additional courses, following the guidelines below. No more than two (2) may be at the 400-level and a minimum of three (3) must be at the 500-level or above.</td>
<td>32</td>
<td></td>
</tr>
</tbody>
</table>

**Total Credits** 40

A student’s program of study must include two parts:

1. An area of specialization. A student must select at least four courses to serve as an area of specialization within the major. Up to two courses (each four credits or their equivalent) in the area of specialization may be taken in other departments; such courses must be 500-level or above and have the approval of the student’s advisor. The area of specialization may be in a nation, region, a time period, global history, or one of the following:
   * ancient and pre-modern worlds
   * cultural and intellectual history
   * empires and colonialism
   * international and diplomatic history
   * politics, law, and government
   * race, gender, and sexuality
   * religion
   * revolution and social change
   * science, technology, medicine, and the environment
   * war and society
   * world economy
   * design your own (with advisor’s permission)

2. Complementary courses. A student must select, in consultation with his or her advisor, at least three history courses in fields outside the area of specialization, chosen to broaden his or her understanding
of the range of history. Each major should take at least one course from each of Groups I, II, and III. Group I contains all American history courses, Group II contains all European history courses, and Group III contains all other history courses.

The program must be planned in consultation with an advisor. A copy of the program, signed by the advisor, must be placed in a student’s file no later than the second semester of the student’s junior year. Courses at the 700-level will be judged by the advisor as to their applicability for area of specialization. The program may be modified with the advisor’s approval.

Only one HIST 695 Independent Study may be used to fulfill the 600-level requirement, and no more than two Independent Study courses may count toward the ten-course requirement. No more than two 400-level courses may be counted toward the major requirements. Students must receive at least a C in HIST 500 Introduction to Historical Thinking and at least a C- in the other nine courses. Majors must maintain a 2.0 or better in all history courses.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of Arts (B.A.) candidates must also satisfy the foreign language proficiency requirement.

History majors may use history courses to fulfill Discovery category requirements but may not double-count history courses for major and Discovery category requirements.

History majors must satisfy the language requirement for the B.A. degree in an international language that they could use for historical research. That list includes Arabic, Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students may petition the department curriculum committee for exceptions.

For transfer students, a minimum of five (5) of the semester courses used to fulfill the major requirements must be taken at the University. One upper-level course may be transferred to satisfy the requirement that a major must take at least three courses numbered 600 or above. Transfer students must complete both HIST 500 Introduction to Historical Thinking (or its equivalent) and HIST 797 Colloquium.

Students intending further work in history beyond the bachelor’s degree are urged to take HIST #775 Historical Methods.

Students intending to major in history should consult with the department administrative assistant. Suggested programs for students with special interests or professional plans are available in the department office.

Student Learning Outcomes

History students can:

Build historical knowledge.

• Gather and contextualize information in order to convey both the particularity of past lives and the scale of human experience.
• Recognize how humans in the past shaped their own unique historical moments and were shaped by those moments.

• Develop a body of historical knowledge with breadth of time and place—as well as depth of detail—in order to discern context.
• Distinguish the past from our very different present.

Develop historical methods.

• Recognize history as an interpretive account of the human past—one that historians create in the present from surviving evidence.
• Collect, sift, organize, question, synthesize, and interpret complex material.
• Practice ethical historical inquiry that makes use of and acknowledges sources from the past as well as the scholars who have interpreted that past.
• Develop empathy toward people in the context of their distinctive historical moments.

Recognize the provisional nature of knowledge, the disciplinary preference for complexity, and the comfort with ambiguity that history requires.

• Welcome contradictory perspectives and data, which enable us to provide more accurate accounts and construct stronger arguments.
• Describe past events from multiple perspectives.
• Explain and justify multiple causes of complex events and phenomena using conflicting sources.
• Identify, summarize, appraise, and synthesize other scholars’ historical arguments.

Apply the range of skills it takes to decode the historical record because of its incomplete, complex, and contradictory nature.

• Consider a variety of historical sources for credibility, position, perspective, and relevance.
• Evaluate historical arguments, explaining how they were constructed and might be improved.
• Revise analyses and narratives when new evidence requires it.

Create historical arguments and narratives.

• Generate substantive, open-ended questions about the past and develop research strategies to answer them.
• Craft well-supported historical narratives, arguments, and reports of research findings in a variety of media for a variety of audiences.

Use historical perspective as central to active citizenship.

• Apply historical knowledge and historical thinking to contemporary issues.
• Develop positions that reflect deliberation, cooperation, and diverse perspectives.

History Major: Law 3+3 Option (B.A.)

https://cola.unh.edu/history/program/ba/history-major-law-33-option

Description

The Law 3+3 option offers highly motivated UNH undergraduates the opportunity to complete their bachelor’s degree (B.A.) with a history major and their law degree (J.D.) at UNH in six years, rather than the usual seven years. It promises significant savings in both time and money. Students apply to the UNH Law School in their junior year (by Jan. 1),
following the approved process below, and after taking the LSAT exam. If admitted, undergraduates begin their first year of law school in their senior year. The credits earned upon successful completion of the law school courses will be applied to both the J.D. degree and as elective courses for the B.A. degree. After four years, students receive a B.A. with a history major. After six years, students, having completed all law school requirements successfully, will receive their J.D.

Eligibility and Admission Process
1) Phase I: applying to the Law 3+3 option. Students apply to the program either when they submit their applications to UNH by selecting the History/J.D. option on the online application, or after they are admitted, applying directly to the History Department's History/Law 3+3 Committee. In both cases, undergraduate applicants must fulfill the general requirements for admission to the History major.

a. Students applying at time of admission to UNH will typically present the following high school (HS) credentials:
   - a 3.5 GPA in HS
   - a rigorous HS curriculum defined as the following:
     - 4 years of college prep (CP) or higher English
     - 4 years of CP or higher mathematics
     - 4 years of CP or higher social studies/history
     - Completed at least level 3 of a foreign language
     - 3 or more years of CP or higher laboratory sciences
     - a score of 1200 or better (combined Math and Verbal) on the SAT or a 29 on the ACT

b. Currently enrolled UNH students applying to the program must:
   - have a 3.5 GPA in college courses at time of application.
   - The History/Law 3+3 Committee governing admission to the program will also consider past SAT scores, maturity, and ability to complete a highly demanding program of study based on performance thus far.

For both groups, it is important to note that satisfying these requirements does not guarantee admission to this program. The review process is holistic (meaning all parts of the application carry weight and influence the final decision) and other components of the application will influence any admission decisions. Available space will also influence who is admitted to the program and how many students can be accepted.

2) Phase 2: applying to UNH Law School. To be eligible, students must:
   - Complete all Discovery and major requirements, and accrue at least 98 credits before beginning law school in their senior year
   - Maintain at least a 3.5 grade point average (including transfer credits) at time of application to law school, and at end of junior year
   - Take the LSAT no later than December of the final undergraduate year (i.e. the junior year) and have a score of 157 or above
   - Submit the law school application through the Law School Admissions Council by Jan. 1 of the calendar year in which the student wishes to enroll in law school
   - If, for some reason, students are not admitted to UNH Law, they will complete their final, fourth year at UNH, following the typical undergraduate program.

<table>

</tbody>
</table>

At least eight (8) additional courses, following the guidelines below. No more than two (2) may be at the 400-level and a minimum of three (3) must be at the 600-level or above.

Total Credits 40

A student’s program of study must include two parts:

1. An area of specialization. A student must select at least four courses to serve as an area of specialization within the major. Up to two courses (each four credits or their equivalent) in the area of specialization may be taken in other departments; such courses must be 500-level or above and have the approval of the student’s advisor. The area of specialization may be in a nation, region, a time period, global history, or one of the following:
   - ancient and pre-modern worlds
   - cultural and intellectual history
   - empires and colonialism
   - international and diplomatic history
   - politics, law, and government
   - race, gender, and sexuality
   - religion
   - revolution and social change
   - science, technology, medicine, and the environment
   - war and society
   - world economy
   - design your own (with advisor’s permission)

2. Complementary courses. A student must select, in consultation with his or her advisor, at least three history courses in fields outside the area of specialization, chosen to broaden his or her understanding

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Students in the History/Law 3+3 option complete the requirements of the history major. See the Degree Plan for the recommended path through the major.

To complete a major in history, students must take ten (10) 4-credit history courses or their equivalent. Students who enter the University as history majors, or who declare a major in history, should take the first required course, HIST 500, as soon as possible. To declare a major in history, students must have completed or be enrolled in two history courses. HIST 500 is a prerequisite for the second required course, HIST 797, which fulfills the Discovery Program capstone requirement for history majors and is taken during the senior year. Students should consult the list of topics for HIST 797 advertised each semester.
of the range of history. Each major should take at least one course from each of Groups I, II, and III. Group I contains all American history courses, Group II contains all European history courses, and Group III contains all other history courses.

The program must be planned in consultation with an advisor. A copy of the program, signed by the advisor, must be placed in a student's file no later than the second semester of the student’s junior year. Courses at the 700-level will be judged by the advisor as to their applicability for area of specialization. The program may be modified with the advisor’s approval.

Only one HIST 695 Independent Study may be used to fulfill the 600-level requirement, and no more than two Independent Study courses may count toward the ten-course requirement. No more than two 400-level courses may be counted toward the major requirements. Students must receive at least a C in HIST 500 Introduction to Historical Thinking and at least a C- in the other nine courses. Majors must maintain a 2.0 or better in all history courses.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of Arts (B.A.) candidates must also satisfy the foreign language proficiency requirement.

History majors may use history courses to fulfill Discovery category requirements but may not double-count history courses for major and Discovery category requirements.

History majors must satisfy the language requirement for the B.A. degree in an international language that they could use for historical research. That list includes Arabic, Chinese, French, German, Greek, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students may petition the department curriculum committee for exceptions.

For transfer students, a minimum of five (5) of the semester courses used to fulfill the major requirements must be taken at the University. One upper-level course may be transferred to satisfy the requirement that a major must take at least three courses numbered 600 or above. Transfer students must complete both HIST 500 Introduction to Historical Thinking (or its equivalent) and HIST 797 Colloquium.

### Degree Plan

#### Undergraduate Courses

Below is a suggested course outline. There might be other possible plans.

**NOTE:** Students should plan early and work closely with their advisors if they want to pursue the fast track program. It may be possible to include study abroad and other programs, if desired, but only with careful planning. They are also strongly encouraged to consult with the pre-law advisor on campus (Paula DiNardo, paula.dinardo@unh.edu, 603-862-2064.)

| **Total Credits**    |                                            | 98      |

**TOTAL UNDERGRADUATE CREDITS REQUIRED - 98 cr.**

- 40 total Discovery Program credits; 40 history credits; 4-8 foreign language credits; 8-12 elective credits; and two 1-credit courses OR one 2-credit course
- In addition to fulfilling the Discovery Program and history major requirements, students need to fulfill the Bachelor of Arts foreign language requirement and take four (4) writing intensive courses. HIST 500 Introduction to Historical Thinking and HIST 797 Colloquium fulfill two (2) WI courses.
Clarification: to earn 98 credits in 3 years, students will need to take one (1) 2-credit course or two (2) 1-credit courses. The 2-credit course, LAW 475 Getting Ready to Succeed in Law School, is recommended and is best taken in the spring semester of sophomore year or the fall semester of the junior year as it will include LSAT prep. Other 2-credit options include JUST 550 Mock Trial and JUST 551 Mock Trial. For other possible 1-2 credit courses, see the Time & Room Schedule. The 1-2 credit courses can be completed at any point in your first 3 years at UNH-Durham. You can also complete them during the January term [see, e.g., THDA #531 The London Experience: Discovery, a 2-credit study abroad program] or in the summer.

#### LAW SCHOOL COURSES

After completing the first year courses (above), the schedule and track of the second and third years of law school are directed by each student with careful advising from the law faculty. The following summarizes the required curriculum and bar-recommended curriculum. 85 credits are required for graduation.

**Required courses include:**
- Administrative Process
- Criminal Procedure
- Professional Responsibility
- Upper Level Writing Course
- Upper Level Skills Course

**Bar-recommended courses include:**
- Personal Taxation
- Business Associations
- Wills, Trusts, and Estates
- Evidence

### Student Learning Outcomes

**History students can:**

#### Build historical knowledge.

- Gather and contextualize information in order to convey both the particularity of past lives and the scale of human experience.
- Recognize how humans in the past shaped their own unique historical moments and were shaped by those moments.
- Develop a body of historical knowledge with breadth of time and place—as well as depth of detail—in order to discern context.
- Distinguish the past from our very different present.

#### Develop historical methods.

- Recognize history as an interpretive account of the human past—one that historians create in the present from surviving evidence.
- Collect, sift, organize, question, synthesize, and interpret complex material.
- Practice ethical historical inquiry that makes use of and acknowledges sources from the past as well as the scholars who have interpreted that past.
- Develop empathy toward people in the context of their distinctive historical moments.

#### Recognize the provisional nature of knowledge, the disciplinary preference for complexity, and the comfort with ambiguity that history requires.

- Welcome contradictory perspectives and data, which enable us to provide more accurate accounts and construct stronger arguments.
- Describe past events from multiple perspectives.
- Explain and justify multiple causes of complex events and phenomena using conflicting sources.
- Identify, summarize, appraise, and synthesize other scholars’ historical arguments.

#### Apply the range of skills it takes to decode the historical record because of its incomplete, complex, and contradictory nature.

- Consider a variety of historical sources for credibility, position, perspective, and relevance.
- Evaluate historical arguments, explaining how they were constructed and might be improved.
- Revise analyses and narratives when new evidence requires it.

#### Create historical arguments and narratives.

- Generate substantive, open-ended questions about the past and develop research strategies to answer them.
- Craft well-supported historical narratives, arguments, and reports of research findings in a variety of media for a variety of audiences.

#### Use historical perspective as central to active citizenship.

- Apply historical knowledge and historical thinking to contemporary issues.
- Develop positions that reflect deliberation, cooperation, and diverse perspectives.
History Minor

https://cola.unh.edu/history/program/minor/history

Description

The study of history is an essential element of the liberal education. Studying history provides both an awareness of the past and the tools to evaluate and express one’s knowledge.

Requirements

A minor in history consists of 20 semester credits with C- or better and at least a 2.0 grade-point average in courses that the Department of History approves.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST</td>
<td>Five elective HIST courses</td>
<td>20</td>
</tr>
</tbody>
</table>

Total Credits 20

- Courses taken on a pass/fail basis may not be used for the minor.
- No more than 12 credits in 400-level courses may be used for this minor.
- For transfer students, no more than two transfer courses, or 8 transfer credits, may be used toward the minor.

Social Studies of Science and Technology Minor

https://cola.unh.edu/history/program/minor/social-studies-science-technology

Description

How are our lives being changed by technology? Why is science so influential in our society? Is modern science superior to traditional ways of knowing nature? Are science and technology doing more harm than good? The minor in social studies of science and technology enables students to seek answers to such questions through the perspectives of the humanities and social sciences. In this minor, students select courses from a range of disciplines, including anthropology, history, communication, sociology and philosophy, all of which shed light on the role of science and technology in modern society.

The minor presupposes no specialized scientific background and may be combined with any undergraduate major.

Students interested in taking the minor should contact the coordinator, Fredrik Meiton (Fredrik.Meiton@unh.edu), Department of History, Horton Social Science Center.

Requirements

To complete a minor in social studies of science and technology, students must complete five courses (20 credits) with a grade of C- or better, choosing no more than three courses from a single department.

Humanities (HUMA)

The humanities program examines the fundamental questions and issues of human civilization. Through studying diverse texts in the arts, music, literature, history, philosophy and science, students seek answers to questions that thoughtful human beings must address in the course of their lives. Whether these questions come from Socrates (What is justice?), from Sir Thomas More (What is obligation to God?), from Raphael (What is beauty?), from Newton (What are the laws of nature?) or from Martin Luther King, Jr. (What is freedom?), they direct our attention to enduring human concerns and to texts that have suggested or illustrated the most profound and powerful answers. The humanities program is housed in the Department of Classics, Humanities and Italian Studies.

Humanities Dual Major

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/humanities-dual-major

Description

The dual major in humanities is structured in such a way that students can focus on a chosen primary major while taking advantage of the humanities program curriculum and its emphasis on analytical writing, critical thinking and well-rounded interdisciplinary cultural knowledge. Students combine our curriculum with another, disciplinary major that allows them to pursue a narrower field of study in some depth. The dual major in interdisciplinary humanities offers students a set of tools and skills so they can understand and forge our 21st century world. Its curriculum provides structure, progression, and rigor. Citizens of the 21st century need to know how to analyze texts and navigate cultures. That is why the humanities are essential to the lives of educated people.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes, if primary major is a Bachelor of Arts

Declared Primary Major

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Humanities Dual Major Requirements

The humanities dual major consists of a minimum of 32 credits of academic work, with a minimum grade of C-. Students cannot declare the dual major until they have declared a primary major. They must have a GPA of 2.75 to be accepted to the dual major program.

</table>

1 Students will be made acquainted with the methods and technology required for research in humanities.
2 This seminar provides an opportunity for in-depth reading, viewing, and/or listening to texts and artifacts. The emphasis is on the multiple perspectives and methodologies that can be brought to bear upon these works from several humanistic disciplines.
3 Each student participates in the research tutorial (for a total of 6 credits) throughout the senior year. The tutorial provides a context within which students may discuss and receive direction in the course of completing a major research paper, the senior thesis. At the end of the second semester, students present their research to the faculty and their fellow students.
4 Selected with the advice and approval of each student’s major adviser or the program coordinator. These offerings should bear some relation to the student’s particular interests and senior research paper, as seems appropriate in each individual case.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Student Learning Outcomes

- Demonstrate the ability to find and evaluate primary and secondary source material necessary for humanistic research.
- Demonstrate the ability to propose, conduct, and present interdisciplinary humanistic research in a written, oral, or other forms. Identify and interpret creative and cultural forms from a given historical period.
- Compare and contrast the meanings of major texts and other significant cultural productions.

Humanities Minor

https://cola.unh.edu/classics-humanities-italian-studies/program/minor/humanities

Description

There has never been a more exciting time to be human—or has there? What exactly does it mean to be a human being in the twenty-first century? How can you get the most out of your humanity? Find out by minoring in the humanities. It can help prepare you for a life you may not have considered, in ways you've never imagined.
Italian Studies (ITAL)

The Italian studies program offers courses in Italian language, culture, literature, history and cinema, as well as courses on Italian American culture. Italian courses can also be used to fulfill Discovery Program requirements and the bachelor of arts foreign language proficiency requirement. In addition to the Italian studies major, an Italian studies minor is available.

The program provides opportunities both to achieve high competence in Italian language and culture and to apply these knowledge skills to other disciplines. The Italian studies program encourages independent and innovative thinking and research so that students may pursue and achieve individualized goals while they prepare for the challenges of thriving in the world community.

Study Abroad

The Italian studies program allows students to register for approved study abroad programs through the University.

Italian Studies Major (B.A.)

https://cola.unh.edu/classics-humanities-italian-studies/program/ba/italian-studies-major

Description

The Italian studies program offers courses in Italian language, culture, literature, history and cinema, as well as courses on Italian American culture. The program provides opportunities both to achieve high competence in Italian language and culture and to apply these knowledge skills to other disciplines. The Italian studies program encourages independent and innovative thinking and research so that students may pursue and achieve individualized goals while they prepare for the challenges of thriving in the world community.
Student Learning Outcomes

- Demonstrate speaking proficiency in Italian: Students speak Italian at the Advanced Level per standard guidelines established by the American Council on the Teaching of Foreign Languages (ACTFL).
- Demonstrate listening proficiency in Italian: Students’ aural comprehension is at the Advanced Level per standard guidelines established by ACTFL.
- Demonstrate reading proficiency in Italian: Students’ read at the Advanced Level per standard guidelines established by ACTFL.
- Demonstrate writing proficiency in Italian: Students’ write at the Advanced Level per standard guidelines established by ACTFL.
- Exhibit contemporary cultural competency: Demonstrate knowledge of contemporary aspects of Italian culture and the ability to interact appropriately and effectively within diverse social and cultural contexts.

- Exhibit historical cultural competency: Identify the major movements in Italian cultural history and analyze critically Italian cultural production from the 13th century to the present through close readings and audio and visual texts (e.g., literature, cinema, music, visual arts, traditional and social media) to provide critical insight on a range of topics in Italian culture.
- Exhibit intercultural competency. Present a global perspective through the articulation of cultural differences as well as shared values between cultures, societies, and nations.
- Exhibit research competency. Demonstrate ability to conduct research in both Italian and English: to produce coherent analyses utilizing primary and secondary sources, applying critical thinking and methodologies of argumentation, and integrating disparate areas of knowledge.

Italian Studies Minor

https://cola.unh.edu/classics-humanities-italian-studies/program/minor/

Italian-studies

Description

The Italian studies minor provides students with the opportunity to explore the language, culture, and society of Italy through an interdisciplinary program. The minor is advantageous for applicants to graduate and professional schools in Italian, modern languages, linguistics, film, history, theater, philosophy and law. It is also a valuable asset for careers in economics, international affairs, international business, fashion, teaching, communications, translation, interpretation, government and Foreign Service.

The Italian studies minor is offered by the Department of Classics, Humanities and Italian Studies.

Requirements

The minor consists of five courses.

<table>

1 One course from a related field of study may be counted towards the minor, subject to the approval of the Italian studies advisor.

- All courses for the Italian studies minor must be completed with a minimum grade of C.
- New students will be assigned to the proper course in consultation with the program coordinator.

Justice Studies (JUST)

Justice studies students think critically about issues that are part of the national conversation concerning justice: race and policing, cybercrime, the opioid crisis, juvenile delinquency, sexual and interpersonal violence, immigrants and refugees, wrongful convictions and bullying. All majors do applied or research internships in New England or Washington, D.C. Many spend a semester studying in Budapest and participating in Mock Trial. Our graduates excel in various positions including FBI agents,
federal probation and parole, police officers from local to federal levels, victim/witness advocates, prison wardens, police prosecutors, attorneys and juvenile justice advocates.

Justice Studies Dual Major

https://cola.unh.edu/justice-studies-program/justice-studies-dual-major

Description

The justice studies dual major is an interdisciplinary area that blends topics from humanities departments (e.g., philosophy), social science departments (e.g., psychology, sociology, women's and gender studies), departments that include both humanities and social science faculty (history, political science), and professionally oriented departments (education, family studies, social work). Topics studied include courts, family violence, rights, substance abuse, juvenile justice, school law, children as witnesses, hate crimes and community policing. Students will be required to choose a first major before they will be able to declare justice studies as a second major. The goal is to produce graduates who have a higher level of knowledge about law and justice in American society and in the world so that they will mature into more knowledgeable and effective citizens. The justice studies dual major is intended for students who are looking for careers in the justice system or who seek graduate training in law or social sciences and humanities related to the law.

Students are strongly encouraged to contact the Justice Studies Office and to declare the dual major as soon as they develop an interest in majoring. Once a student has been accepted to the JS dual major, they will be assigned an advisor.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes, if primary major is a Bachelor of Arts

Declared Primary Major

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Justice Studies Dual Major Requirements

The dual major in justice studies requires students to take a minimum of eight courses (32 credits), each completed with a grade of a C- or better. Students are required to have a grade-point average of a 2.5 or better before they can be accepted into the program. The dual major cannot be declared until after a first major has been declared. Students can count no more than two courses for both the first major and dual major, and students are not allowed to take more than two courses from any one department (except for JUST). An unlimited number of dual major courses can be used to satisfy Discovery requirements.

Elective Courses

This list is approved and published yearly by the Justice Studies Executive Committee.

Students who are interested in a dual major in justice studies will need to officially declare in Webcat (my.unh.edu). Program offices are located in Hamilton Smith Hall and are open Monday through Friday from 8 a.m. to 12 p.m. and 1 p.m. to 4:30 p.m. For more information, please contact Molly Dorsey at (603) 862-0703, e-mail marion.girard.dorsey@unh.edu; or Deb Briand at (603) 862-1716, e-mail deborah.briand@unh.edu.

### Student Learning Outcomes

- Demonstrate knowledge of fundamental theoretical approaches and key disciplinary concepts of Justice Studies.
- Demonstrate understanding of justice studies methods of research design, data gathering, and analysis.
- Exhibit critical thinking skills in evaluating justice studies research, including the background assumptions, appropriateness of methods used and the strength of explanatory evidence.
- Communicate justice studies knowledge in appropriate oral, written and graphic forms.
- Experience justice studies either in the real world through an internship or in a research lab through a research internship.

### Justice Studies Minor

**https://cola.unh.edu/justice-studies/program/minor/justice-studies**

**Description**

The justice studies minor is an interdisciplinary program that blends topics from humanities departments (e.g., philosophy), social science departments (e.g., psychology, sociology, women's and gender studies), departments that include both humanities and social science faculty (history, political science) and professionally oriented departments (education, family studies, social work). Topics studied include courts, family violence, rights, substance abuse, juvenile justice, school law, children as witnesses, hate crimes and community policing.

**Requirements**

The minor in justice studies requires students to take a total of five courses (20 credits) each with a grade of C- or better in order to complete the program. Students are allowed to "double count" no more than two courses toward their major and minor, and are not allowed to take more than two courses from any one department (except for justice studies).

In order to officially declare the minor in justice studies, students will need to submit an intent to minor form to Deb Briand in the Justice Studies Office. This form can be found on our website.

Total Credits: 20

Two courses can double count toward your justice studies dual major. These courses are most commonly JUST 401 Introduction to Justice Studies, and SOC 515 Introductory Criminology.

In order to officially declare the forensic minor, students will need to submit an intent to minor form to Deb Briand in the Justice Studies Office. This form can be found on our website.

### Latin American, Latinx and Caribbean Studies Minor

- [Latin American, Latinx and Caribbean Studies Minor](https://cola.unh.edu/interdisciplinary-studies/program/minor/latin-american-latinx-caribbean-studies)

### Description

Latin American, Latinx and Caribbean studies is an interdisciplinary minor encompassing anthropology, communications, economics, geography, history, linguistics, political science and Spanish. Knowledge of Latin America is especially valuable for students who plan to work in education, international organizations, government, social services, and business or for graduate studies related to Latin America.

For more information on the Latin American, Latinx and Caribbean studies minor (LALACS) contact [Lori Hopkins](mailto:lori.hopkins@unh.edu).

### Requirements

Students can complete the minor by selecting any five courses (20 credits) representing at least three disciplines.

Enrollment in these five courses must follow the guidelines below to count for the minor:

1. At least three courses must be taken in residence.
2. All coursework required for the minor must be completed with a grade of C or better.
3. Courses for the minor may not be taken pass/fail.

Academic study in Latin America is strongly recommended: Speak with faculty to help you find the study abroad program that best fits your interests. UNH and its affiliates offer several short- and long-term programs throughout Latin America.

### Elective Course List

Students should consult with an advisor or the course instructor to ensure that the majority of this coursework concentrates on Latin America.

1. An equivalent course as approved by a LALACS advisor can replace HIST 532 Modern Latin America.
2. Minimum of high-intermediate level proficiency in Spanish. Equivalent courses or equivalent testing may be counted here.
Linguistics (LING)

Linguistics is the study of one of the most important characteristics of human beings—language. It cuts across the boundaries between the sciences and the humanities. The program is an excellent liberal arts major or preprofessional major for education, law, medicine, clergy and others. It is a particularly appropriate major for students who want to teach English as a second language. Dual majors with a foreign language, international affairs, business administration and the like are quite feasible.

Students interested in the major or the minor should consult with the program coordinator or with any professor who teaches linguistics courses. To declare a major in linguistics, a student must meet with the linguistics coordinator to design a course of study. Information is available from the University Advising Center, 101 Hood House, and at cola.unh.edu/linguistics.

Select one course in historical linguistics or sociolinguistics from the following:

- ENGL 752 History of the English Language
- ITAL 733 History and Development of the Italian Language
- LING/ENGL 719 Sociolinguistics Survey
- RUSS 733 History of Slavic Languages and Culture
- SPAN 798 Topics in Hispanic Linguistics and Cultural Studies (Subtopic A)

Two years of college study (or equivalent) of one foreign language

Select one of the following cognate specialties:

- One year study (or equivalent) of a second foreign language from a different language family or subfamily

- PSYC 712 Psychology of Language

Select two elective courses from list below, one of which must be a 600- or 700-level LING or ENGL course

- LING 799 Linguistic Field Methods
- LING 695 Senior Honors

Total Credits: 44-56

1. Old English may count as the second foreign language if the first foreign language is not in the Germanic family.
2. With its prerequisite, either PSYC 512 Psychology of Primates or PSYC 513 Cognitive Psychology
3. History of the English Language or Sociolinguistics can be used as an elective if the other one is used for the Historical/Sociolinguistic requirement.

Elective Courses
Core areas:

and make arguments concerning the theoretical analysis of those data.

languages and linguistics. Students will be able to analyze sets of data

modes of critical thinking, and types of writing that are used in studying

Students will understand and be able to deploy the analytical tools,

Linguistics majors may use one major-required course to satisfy one

the foreign language proficiency requirement.

Program requirements in addition to satisfying the requirements of each

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery

program requirements in addition to satisfying the requirements of each

individual major program. Bachelor of arts candidates must also satisfy

the foreign language proficiency requirement.

Linguistics majors may use one major-required course to satisfy one

Discovery category requirement.

Student Learning Outcomes

Students will understand and be able to deploy the analytical tools,

modes of critical thinking, and types of writing that are used in studying

languages and linguistics. Students will be able to transcribe and read the

International Phonetic Alphabet.

Linguistics is the study of one of the most important characteristics of

human beings—language. It cuts across the boundaries between the

sciences and the humanities. Students interested in the minor should consult with Prof. Rachel Burdin, rachel.burdin@unh.edu, (603) 862-1088 the program coordinator, or with any professor who teaches linguistics courses.

TESOL Minor

https://cola.unh.edu/linguistics/program/minor/tesol

Description

The TESOL minor is a set of courses that are related to teaching English to speakers of other languages. This minor primarily is for students who are interested in teaching English to speakers of other languages, whether that be teaching English abroad or teaching ESL students in U.S. public schools (K-12). It is also appropriate for students who are going into social work or other professions that require regular interaction with nonnative English speakers.

The TESOL minor will not certify students to teach in New Hampshire public schools (K-12). For that purpose, students must complete the ESL certification program that is offered at the graduate level by the Education and English departments. However, the coursework in this minor will provide a very good foundation for students who want to later pursue ESL certification or an M.A. in TESOL at UNH or another institution.

Total Credits: 20

1 Whichever was not taken before
2 The TESOL coordinator can provide you with a list of available courses for a particular semester.

Students must receive a C- or better in each course and achieve a 2.0 GPA in the five courses.

No more than eight transfer credits will be accepted.

Medical Humanities, Society & Ethics

- Medical Humanities, Society & Ethics Minor (p. 251)

Medical Humanities, Society & Ethics Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/medical-humanities-society-ethics

Description

As an interdisciplinary minor, medical humanities, society and ethics (MHSE) teaches students to use methods from the humanities and social sciences to examine issues related to illness, health, healthcare, the body and the mind in their social, cultural and historical contexts.

MHSE takes as its starting point the dual claim that the central human experiences of health and illness as well as the systems of knowledge that have emerged to classify them are culturally shaped phenomena. Bodies and minds experience illness; people suffer; they age; they die. But the meanings people attach to these processes are not given in the natural world. They are rather forged within a particular society’s attitudes, values, beliefs and practices expressed through language, behavior, ritual and art. They are, moreover, contingent on time and place. Even the modern scientific discipline of medicine, its truth claims, and its terms are embedded in historical cultural domains. They have as much to do with attitudes to gender, race, socioeconomic status, relations of power, structures of authority and social hierarchies as they do with biology.

MHSE aims to bridge the gulf that exists between science and experience, biology and culture by challenging students to examine critically the origins and nature of their beliefs and values about illness and health as well as the beliefs and values embedded in their society’s social, cultural, educational, legal and political institutions.

MHSE students will learn that humanistic interpretive practices make cross-cultural and comparative studies of health and illness possible. The minor encourages students to take a broad community and global perspective on experiences of health and illness that address equity, policy and resource allocation.

Requirements

Students are required to take 20 credits in courses that are on the approved list (see below) or that are approved by the minor advisory committee through a petition process. Independent studies, practica and transfer credits may also count for the minor with the approval of the committee.

- At least 4 credits must be at the 600 or 700 level.
- No more than 12 credits may come from the same department.
- At least 12 credits must be taken in residence at UNH.
- No more than 4 credits may be taken from courses outside of the College of Liberal Arts.

The five-course requirement must include one non-language course. Opportunities approved by the affiliate faculty in respective disciplines. The Middle Eastern studies minor requires five courses (20 credits) affiliated faculty to discuss their program of study. Students interested in the minor should contact the coordinator and/or faculty to discuss their program of study.

**Middle Eastern Studies**

**Programs**

- Middle Eastern Studies Minor (p. 252)

**Middle Eastern Studies Minor**

https://cola.unh.edu/interdisciplinary-studies/program/minor/middle-eastern-studies

**Description**

The minor in Middle Eastern studies introduces students to the many facets of Middle Eastern cultures and societies through the interdisciplinary study of languages, history, politics, geography, and anthropology. Minor coursework enables students’ understanding of the Middle East as a dynamic region in a global and comparative context. This minor therefore encompasses not only the study of the region itself, but also the flows and circulation of migration, diasporas, refugees, ideas, literatures, social movements, war and natural resources that make the region pivotal to world history and the global economy. In addition, participation in the minor prepares students for study abroad experiences, helps them acquire skills and qualifications for graduate study, and enhances employment opportunities.

Students interested in the minor should contact the coordinator and/or affiliated faculty to discuss their program of study.

**Requirements**

The Middle Eastern studies minor requires five courses (20 credits) drawn from the list of approved courses or from exceptional courses and opportunities approved by the affiliate faculty in respective disciplines. The five-course requirement must include one non-language course.

Students must receive a grade of C- or better for a course to count toward the minor requirements. Once students have declared the minor, they are required to meet with the coordinator or appropriate core faculty advisor at least once per year for regular review and assessment of their program, learning outcomes and progress toward the degree.

**Foreign Language Study:**

The study of a Middle Eastern language or language relevant to Middle Eastern studies is strongly encouraged but not required. Students are encouraged and permitted to count Arabic toward the five-course requirement. Students who have studied Hebrew, Turkish, Farsi, or other Middle Eastern languages at other institutions may apply for transfer of their credit toward the minor. Through petition to the minor coordinator and with support of affiliate faculty in the respective discipline, students may apply for European languages, such as French and Italian, to count toward minor requirements, provided these are relevant to their research and study interests in the region.

**Transfer or Articulation Agreements with other Institutions:**

Transfer of credits may be approved by the coordinator to count toward the minor if the transfer is accepted by the University and fits within the scope of the minor.

Students interested in the minor should contact the coordinator and/or affiliated faculty to discuss their program of study. At the beginning of their final semester of study at UNH, students should fill out a completion form and submit it to their Dean’s Office.

**Music (MUSI, MUED)**

The Department of Music offers two degree programs: the bachelor of arts in music and the bachelor of music.

The University of New Hampshire Department of Music is an accredited institutional member of the National Association of Schools of Music. All programs have final approval from NASM.

Prospective majors in music are advised to contact the department for information on acceptance into the major.

All music students must earn grades of C- or better in all required music and music education courses. The required minimum overall GPA in required music and music education coursework is 2.0.

**Bachelor of Arts in Music**

The bachelor of arts in music program offers students an opportunity to major in music within the liberal arts curriculum. This program is intended for those who wish to pursue the serious study of music and to acquire at the same time a broad general education; it is recommended for those considering graduate study leading to master’s or doctoral degrees.

To be admitted formally to the B.A. program, students must give evidence of satisfactory musical training by taking an admission audition. Students must declare music as a major before the beginning of the junior year, but it is highly recommended that they declare as early as possible, considering the large number of required courses.
The bachelor of arts degree is offered with three options: music liberal studies, performance study and composition.

**Bachelor of Music Degree Program**

The bachelor of music degree program is offered to students who wish to develop their talent in performance, composition or music education to a high professional level. The program is recommended to those considering graduate study leading to the M.M. or D.M.A. degrees. The music education option is part of the undergraduate certification program (see the Department of Education).

To be admitted to the B.M. program, students must demonstrate a high degree of musical competence or significant creative ability during an audition or examination. Selection is made on the professional requirements appropriate to each option. Students must formally declare the B.M. as a degree program before the beginning of the sophomore year. Continuation into the upper level of the program is subject to review by the department faculty.

Four degrees are offered in the bachelor of music curriculum: bachelor of music in music education; bachelor of music in performance; bachelor of music in composition, and bachelor of music pre-teaching.

https://cola.unh.edu/music

### Programs

- Music Major: Composition Option (B.A.)
- Music Major: Music Liberal Studies Option (B.A.)
- Music Major: Performance Study Option (B.A.)
- Composition Major (B.M.)
- Music Education Major (B.M.)
- Performance Major (B.M.)
- Pre-Teaching Major (B.M.)
- Music Minor

### Faculty

https://cola.unh.edu/music/faculty-staff-directory

**Music Major: Composition Option (B.A.)**

https://cola.unh.edu/music/program/ba/music-major-composition-option

### Description

If you want to develop your skills as a composer while also pursuing a broad liberal arts education, the Bachelor of Arts in music with an option in composition is the degree you should pursue. You'll study music theory and analysis, the history and literature of music, and world music and technical skills such as ear training and piano as you grow as a composer and performer.

Students wanting to declare composition as their option must submit a music portfolio in addition to an audition on their major instrument.

### Requirements

#### Degree Requirements

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral*

#### Core Curriculum Required:

- Discovery & Writing Program Requirements
- Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

#### Major Requirements

The Discovery Program capstone requirement is fulfilled by a final project or a public performance given during the senior year. For students in the composition option, there is a choice of completing a half lecture, half lecture-recital or a half recital including at least one original composition.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second major. B.A. in music majors may use MUSI 502 Musics in Context (a required core course for the major) to satisfy the Inquiry Discovery requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second major. B.A. in music majors may use MUSI 502 Musics in Context (a required core course for the major) to satisfy the Inquiry Discovery requirement.

MUSI 441, MUSI 442, MUSI 448, MUSI 450, MUSI 452, MUSI 453, MUSI 454, MUSI 455, MUSI 456, MUSI 457, MUSI 459, MUSI 460, MUSI 462, MUSI 463, MUSI 464

Total Credits: 32

Students in the composition option, if not in a lesson studio, will attend composition seminar.

Student Learning Outcomes

- Demonstrate the ability to perform a specialization instrument or voice at an appropriate solo level and/or in small ensemble and large ensemble.
- Aurally identify, analyze, and work conceptually with the elements of music in a variety of musical styles.
- Students will demonstrate familiarity with musical literature from the formal concert repertory and from musical traditions outside of that repertory.
- Demonstrate the ability to develop and defend musical judgments in writing and in oral presentation.
- Demonstrate collegiate-level skills in the English language, competence in written and oral communication in English, and fluency in communicating and synthesizing musical, historical and analytical concepts in writing.
- Demonstrate the ability to create substantial original compositions for solo instrument(s), chamber ensemble, or large ensemble.
- Present at least one substantial original composition in performance of a lecture, lecture-recital, or recital.

Music Major: Music Liberal Studies Option (B.A.)

https://cola.unh.edu/music/program/ba/music-major-music-liberal-studies-option

Description

Students enrolling in the B.A. music liberal studies program — a program that stresses the development of skills in analysis, writing and critical thinking about a wide variety of musics and the larger connection with history, culture and society — are required to submit a writing sample and interview with one of the music liberal studies program faculty members. The writing sample should be non-fiction, preferably an assignment for a course in English, history or a similar subject, 500 words or more in length.

Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

The Discovery Program capstone requirement is fulfilled by a final project or a public performance given during the senior year. For students in the music liberal studies option, there is a choice of completing a half recital or comparable final project.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Major department courses may not be used to satisfy Discovery category requirements except in the case of a second major. B.A. in music majors may use MUSI 502 Musics in Context (a required core course for the major) to satisfy the Inquiry Discovery requirement.

Music Major: Performance Study Option (B.A.)

https://cola.unh.edu/music/program/ba/music-major-performance-study-option

Description

The Bachelor of Arts in performance study degree is the program for you if you wish to develop your talent as a performer while also gaining a solid liberal arts education. You'll develop your musicianship through private study, chamber music and some of the best performing ensembles in the region. You'll be immersed in the study of music theory, history, literature and world music while sharpening your listening and performance skills. This program is recommended if you're considering graduate study leading to a master's or doctoral degree in music.

• Demonstrate the ability to develop and defend musical judgments in writing and in oral presentation.
• Demonstrate collegiate-level skills in the English language, competence in written and oral communication in English, and fluency in communicating and synthesizing musical, historical and analytical concepts in writing.
• Demonstrate the ability to perform a specialization instrument or voice at the level of an advanced undergraduate student, or young professional, including a high level of technical and artistic competence, and to work independently in both solo practicing and small ensemble rehearsals.
• Demonstrate maturity in musical performance, using performance and liberal-arts tools and insights to create an artistic product.
• Students will plan, prepare, and perform a solo recital in collaboration with faculty and staff that includes both organizational elements and artistic preparation.

Composition Major (B.M.)
https://cola.unh.edu/music/program/bm/composition-major

Description
If you dream of writing inspiring music for bands, orchestras, choirs, films, video games or innovative chamber ensembles, then the Bachelor of Music in composition is for you. The music composition degree program at UNH builds on a core set of classes in music theory, analysis and history, and places heavy emphasis on composition and continuing to develop your skills as a performer. The major is recommended for students considering a professional career in composition or graduate study leading to an advanced degree.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No
All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements
All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

• For students in the composition option, a full lecture, lecture-recital or recital including at least one original composition is required.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.M. in music majors may use MUSI 502 Musics in Context (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement.

University of New Hampshire 257
Students in the bachelor of music in composition degree program may use a maximum of 8 ensemble credits toward graduation.

Students in the bachelor of music in composition degree are required to attend 8 semesters of composition seminar.

**Student Learning Outcomes**

- Students will exhibit the skills necessary for artistic expression at the highest possible level as defined by their particular area of concentration in solo and small ensemble (not conducted) and large ensemble (conducted) settings.
- Students will exhibit competency in musicianship and analysis through: their understanding of musical forms and processes aural, verbal and visual analyses skill in performance, academic, pedagogical, and compositional applications rudimentary ability to create derivative or original music.
- Students will demonstrate familiarity with musical literature from the formal concert repertory and from musical traditions outside of that repertory. Students will demonstrate the ability to place music in historical, cultural, and stylistic contexts.
- Students will demonstrate collegiate-level skill in the English language and competence in written and oral communication in English.
- Demonstrate the ability to use technologies current to their area of specialization for professional development and entrepreneurship, and career preparation and promotion.
- Demonstrate skill in the use of standard concepts, tools, techniques, and procedures to develop a composition from concept to finished product.
- Manage a formal performance of a finished product.

**Music Education Major (B.M.)**

https://cola.unh.edu/music/program/bm/music-education-major

**Description**

The B.M. music education is the traditional program of choice for students seeking a career as a school music teacher. The bachelor of music degree in music education provides a route to undergraduate certification leading to state of New Hampshire teacher certification in music, grades K-12 (cert. #612.13). New Hampshire also participates in a reciprocal agreement with many other states: the Interstate Certification Compact.

Successful applicants must demonstrate a high degree of musical competence and promise of future growth as a performer. A firm commitment to leading school musicians to artistic success is expected, as is a willingness to acquire the breadth of skills required for K-12 music certification. Continuation in the B.M. music education program is made with the recommendation of the appropriate faculty members and contingent upon personal commitment to the teacher licensure program.

Students interested in a five-year, bachelor/masters degree program typically complete the B.M pre-teaching (described elsewhere) as an undergraduate and apply to the UNH Department of Education for admission to the Master of Arts in Teaching (Secondary) degree program.

The four-year bachelor of music in music education curriculum is highly structured due to the number of required courses to complete. The requirements include a list of additional classes required to earn a degree and a certificate to teach. Students may elect a vocal/choral or instrumental emphasis.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Students in music education must maintain an overall minimum 2.8 grade-point average at the time of application for student teaching (February 15 of junior year). Any education course taken for a teacher licensure requirement must be completed with a B- or better.

B.M. music education majors may use MUSI 501 The Western Musical Canon (a required core course for the major) to satisfy the Fine and Performing Arts Discovery category requirement. In addition, they may use MUSI 502 Musics in Context (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement.

All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

- For students in the music education option, a half recital is required.

Performance Study (Applied Lessons): select from the following courses

Performance Ensemble: select from the following courses

Variable

Total Credits: 39-40

1 Students will be given the opportunity to test out of MUSI 471 Theory I, MUSI 475 Functional Piano I, MUSI 476 Functional Piano I and MUSI 575 Functional Piano II, MUSI 576 Functional Piano II.

Junior Standing in Music Education

Recognition of adequate completion of fundamental academic and musical competencies shall earn students declared for the Bachelor of Music: Music Education the title Junior Standing. Students will not receive permission to register for the upper-level music education methods courses (MUED 765, MUED 790, MUED 791) without such recognition. Two of the steps required for recognition are the submission of passing scores on the PRAXIS: Core Academic Skills for Educators tests (scores will be sent directly to the Department of Education) and clearance of the Criminal Background Check as conducted by the State of New Hampshire Department of Safety. Results will be sent directly to the music education coordinator in the Department of Music. There is a charge for each of these steps assessed by the providers. Current students may follow the catalog corresponding to their matriculation year or follow the proposed changes.

Junior Standing Requirements

1. Criminal Background Check
2. Academic Standing
   a. 2.8 overall grade point average
   b. Pass PRAXIS Core Academic Skills for Educators Test
3. Aural Skills: Complete MUSI 574 Ear Training II with a grade of C- or better and a departmental followup assessment
4. Music Performance Skills
   a. Pass Sophomore Performance Jury with a grade of C- or better
   b. Perform for at least 3 semesters as a regular member of at least one of the designated core ensembles
   c. Complete MUSI 576 Functional Piano II with a grade of C- or better and a departmental followup assessment
5. Complete EDUC 500 Exploring Teaching and a departmental followup assessment
Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement:

- For students in the performance option, a full recital is required.
- Students in the bachelor of music in performance degree program are required to perform a half junior recital.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.M. in music majors may use MUSI 502 Musics in Context (a required core course for the major) to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures (a required core course for the major) to satisfy the World Cultures Discovery category requirement.

Performance Major (B.M.)

https://cola.unh.edu/music/program/bm/performance-major

Description

The Bachelor of Music in performance degree is the program for you if you wish to focus intensively on developing your skills as a performer. This program places heavy emphasis on performance study and is great preparation for master and doctoral degree programs. You'll develop your musicianship through private study, chamber music and some of the best performing ensembles in the region. You'll be immersed in the study of music theory, history, literature and world music while sharpening your listening and performance skills.

Select 8 credits of the following: 2, 3

- MUSI 441 Concert Choir
- MUSI 442 Chamber Singers
- MUSI 448 Vocal Arts Project

Select one of the following: 8

- ITAL 401 Elementary Italian I
- ITAL 402 Elementary Italian II
- GERM 401 Elementary German I
- GERM 402 Elementary German II
- FREN 401 Elementary French I
- FREN 402 Elementary French II

Total Credits: 54-56

1. Three credits of lessons each semester until the student’s senior recital semester; then it is 4 credits.
2. Four credits must be MUSI 441 Concert Choir; the remaining 4 credits must be MUSI 441 Concert Choir, MUSI 442 Chamber Singers, or MUSI 448 Vocal Arts Project.
3. Students in the Bachelor of Music Performance program in the vocal track are required to complete 8 credits of ensemble. Students in this program are required to enroll in at least one ensemble in every semester of enrollment at UNH, including at least 4 credits of MUSI 441 Concert Choir, with the remaining credits coming from MUSI 441 Concert Choir, MUSI 442 Chamber Singers, and MUSI 448 Vocal Arts Project.

Bachelor of Music in Performance (All Other Instruments)

Degree program has final approval from the National Association of Schools of Music.

Code | Title | Credits
--- | --- | ---
MUSI 791 | Music Internship II | 2-4
MUSI 795 | Special Studies (Topic V) advanced piano pedagogy | 2
MUSI 795 | Special Studies (Topic E) piano literature | 1-2
MUSI 455 | Collaborative Piano | 4
MUSI 541/741 | Piano (piano lessons) | 25

Select 3 credits of MUSI 700-level Advanced Music History or Advanced Music Theory | 3

Select 3 credits of MUSI 700-level Advanced Music History or Advanced Music Theory | 3

Performance Study (Applied Lessons): select from the following: 7

- MUSI 541, MUSI 542, MUSI 543, MUSI 544, MUSI 545, MUSI 546, MUSI 547, MUSI 548, MUSI 549, MUSI 550, MUSI 551, MUSI 552, MUSI 553, MUSI 554, MUSI 555, MUSI 556, MUSI 557, MUSI 558, MUSI 559, MUSI 560, MUSI 561, MUSI 562, MUSI 563, MUSI 564, MUSI 741, MUSI 742, MUSI 743, MUSI 744, MUSI 745, MUSI 746, MUSI 747, MUSI 748, MUSI 749, MUSI 751, MUSI 752, MUSI 753, MUSI 754, MUSI 755, MUSI 756, MUSI 757, MUSI 758, MUSI 759, MUSI 760, MUSI 761, MUSI 762, MUSI 763, MUSI 764

Performing Ensemble: select from the following: 5, 6

- MUSI 441, MUSI 442, MUSI 443, MUSI 445, MUSI 452, MUSI 453, MUSI 454, MUSI 455, MUSI 456, MUSI 457, MUSI 459, MUSI 460, MUSI 462, MUSI 463, MUSI 464

Total Credits: 44-47

1. B.M. instrumental performance majors take one methods class in the appropriate instrumental family, e.g., a trumpet player would take MUSI 749 Techniques and Methods in Brass Instruments, to fulfill this requirement.
2. This is in addition to the advanced music history and advanced music theory class already required.
3. Three credits of lessons are taken each semester until the student’s senior recital semester; then it is 4 credits.
4. Students in the Bachelor of Music Performance program in the instrumental track for all instruments except piano are required to complete 12 credits of ensemble. Students in this program are required to enroll in at least one ensemble in every semester of enrollment at UNH, at least 6 of which must be on their primary instrument.
5. Further, instrumentalists specializing in woodwind, brass, string, or percussion instruments should enroll in one credit of a conducted ensemble (MUSI 450 Symphony, MUSI 452 Wind Symphony, MUSI 453 Symphonic Band, MUSI 441 Concert Choir, MUSI 442 Chamber Singers, MUSI 460 Jazz Band, MUSI 454 UNH Marching Band) in every semester of enrollment.
Student Learning Outcomes

- Students will exhibit the skills necessary for artistic expression at the highest possible level as defined by their particular area of concentration in solo and small ensemble (not conducted) and large ensemble (conducted) settings.
- Students will exhibit competency in musicianship and analysis through their understanding of musical forms and processes aural, verbal and visual analyses skill in performance, academic, pedagogical, and compositional applications rudimentary ability to create derivative or original music.
- Students will demonstrate familiarity with musical literature from the formal concert repertory and from musical traditions outside of that repertory. Students will demonstrate the ability to place music in historical, cultural, and stylistic contexts.
- Students will demonstrate collegiate-level skill in the English language and competence in written and oral communication in English.
- Demonstrate the ability to use technologies current to their area of specialization for professional development and entrepreneurship, and career preparation and promotion.
- Students will demonstrate an understanding of the fundamentals of pedagogy as required in the particular field of study.
- Students in vocal studies will demonstrate competencies in diction and language, as well as interpretive skills, physicality, and stage deportment.
- Students will plan, prepare, and perform a solo recital in collaboration with faculty and staff that includes both organizational elements and artistic preparation.

Pre-Teaching Major (B.M.)

https://cola.unh.edu/music/program/bm/pre-teaching-major

Description

The B.M. pre-teaching degree is the program of choice for most students seeking a five-year, combined bachelor’s and master’s degree program that includes certification to teach music in the public schools. Students will complete all of the skill and knowledge content requirements in this undergraduate program leaving a year-long internship and some advanced study in music and education for the fifth year.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of the major. B.M. in music majors may use MUSI 502 Musics in Context to satisfy the Inquiry Discovery category requirement, and MUSI 515 Music in World Cultures to satisfy the World Cultures Discovery category requirement. Additionally, B.M. music education and pre-teaching majors may use MUSI 501 The Western Musical Canon to satisfy the Fine and Performing Arts Discovery category requirement.

All bachelor of music students are required to give a public performance during their senior year, which fulfills the Discovery Program capstone requirement: for students in the pre-teaching option, a half recital is required.

1. Vocal track students take 2 credits. Instrumental track students take 3 credits.
2. Required for Vocal track.
3. Required for Instrumental track.
4. Required for Vocal track.
5. Students in the Bachelor of Music Education program are required to complete 8 credits of ensemble; a maximum of 8 ensemble credits may be counted towards graduation. Students will enroll in one conducted ensemble (MUSI 450 Symphony, MUSI 452 Wind Symphony, MUSI 453 Symphonic Band, MUSI 441 Concert Choir, MUSI 442 Chamber Singers, MUSI 460 Jazz Band, MUSI 454 UNH Marching Band) in every semester of their enrollment at UNH.
6. Students will exhibit the skills necessary for artistic expression at the highest possible level as defined by their particular area of concentration in small and solo ensemble (not conducted) and large ensemble (conducted) settings.
7. Students will demonstrate familiarity with musical literature from the formal concert repertory and from musical traditions outside of that repertory. Students will demonstrate the ability to place music in historical, cultural, and stylistic contexts.
8. Students will demonstrate ability to lead students to increased musical knowledge and advancing musical performance.
9. Students demonstrate knowledge of age-appropriate vocal and instrumental pedagogy.
10. Students demonstrate an understanding of best practices and applicable learning theories in music education.
11. Students will exhibit the skills necessary for artistic expression at the highest possible level as defined by their particular area of concentration in small and solo ensemble (not conducted) and large ensemble (conducted) settings.
12. Students will exhibit competency in musicianship and analysis through: their understanding of musical forms and processes aural, verbal and visual analyses skill in performance, academic, pedagogical, and compositional applications rudimentary ability to create derivative or original music.

Students will demonstrate competency in musicianship and analysis through: their understanding of musical forms and processes aural, verbal and visual analyses skill in performance, academic, pedagogical, and compositional applications rudimentary ability to create derivative or original music.

Performance Study (Applied Lessons): select from the following courses
- MUSI 541 Concert Choir
- MUSI 542 Wind Ensemble
- MUSI 543 Chamber Choir
- MUSI 544 UNH Marching Band
- MUSI 545 Wind Ensemble
- MUSI 546 Jazz Ensemble
- MUSI 547 Collaborative Piano
- MUSI 548 Small Ensemble

Total Credits 58-59

Music Minor

https://cola.unh.edu/music/program/minor/music

Description

A music minor is a great option for students who are passionate about the discipline of music but choose to major in another field. The minor includes required coursework in music theory and literature.

Requirements

All students wishing to receive a minor in music must complete a minimum of 20 credits of coursework in music, of which the following are required:

<table>

Option A:
Native American and Indigenous Studies (NAIS)

Programs

- Native American and Indigenous Studies Minor (p. 264)

Native American and Indigenous Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/native-american-indigenous-studies

Description

As an interdisciplinary minor, Native American and Indigenous studies (NAIS) offers a broad understanding of the history, lands, culture, literature, language and artistic expression, science and technology, race and identity, and social organization and political statuses of Native American and Indigenous peoples within and beyond North America. The minor provides an introduction to Indigenous values and a basis for understanding broad Indigenous issues.

NAIS complements a range of majors, including anthropology, English, history, political science, health and human services, music, psychology, biology, botany, natural resources and sustainability. The UNH Education Abroad program offers a variety of opportunities to UNH students to explore the NAIS minor overseas.

The minor will help students acquire the necessary skills and qualifications for a variety of graduate study and employment opportunities and enhance competitiveness for federal scholarships and programs, such as the Peace Corps, Teach for America or the National Parks Service. Students with NAIS training will be prepared for work with Tribal and Indigenous leaders and officials, public health practitioners and administrators, and/or working with institutions that require employees with cultural and historical sensitivity to Indigenous issues, such as museums or other public institutions. NAIS graduates may also go on to careers with organizations with Indigenous interests in the areas of education, business, arts, government and law, nonprofit and advocacy, and healthcare and science (e.g., the Native American

Requirements

20 credits (5 courses) are required for the minor. Students must receive a grade of C or better in each course in order for the course to count toward the minor requirements.

NAIS UNH-Approved Study Abroad Programs

Thailand-TEAN-Chang Mai; CIEE Khon Kaeo

USAC-Southwest Minzu University (Southwest Universities for Nationalities). Among the courses offered:

• Buddhism and Culture (ANTH/SOC)
• Tibetan Culture and Society (ANTH/SOC)
• Guizhou Field Study (ANTH/WLL, 200-level, 1 credit)

Morocco - IES & CIEE. Courses offered:

• Gender and Society in North Africa and Beyond
• North African Cultural Identities
• Internship/Social Action Seminar
• Islam In Morocco And North Africa (English-taught)
• Arab Media and Issues of Politics and Culture

New Zealand - Otago. Courses offered:

• Maori Studies

Peru - SIT: Indigenous Peoples and Globalization. Courses offered:

• History of Indigenous Cultures in Peru
• Indigenous Peoples in Motion: Changes, Resistance, and Globalization
• Quechua
• Research Methods and Ethics
• Independent Study Project

Senegal - CIEE. Courses offered:

• Contemporary Senegalese Society and Culture
• Intercultural Communication and Leadership (English)
• Environment and Development in Senegal and Sub-Saharan Africa (English)
• Public Health Issues and Challenges in West Africa

Tanzania-CIEE. Courses offered:

• Kiswahili
• Field Research Seminar
• Pre-History, Myths, Legends, and Beliefs of East Africa
• Contemporary Educational Issues in East Africa
• Gender and Development
• History of East Africa
• Poverty Analysis for Socio-economic Development

Bhutan - API at Royal Thimphu College with internship. Courses offered:

• Anthropology of the Himalayas
• Ethnography of Bhutan
• Anthropology of Identity
• Anthropology of Gender
• Kinship and Family
• ASC201: Anthropology of Globalization
• ASC301: Anthropology of Development

• ASC303: Applied Anthropology
• ASC304: Contemporary Issues in Anthropology
• ATH101: Ecological Anthropology
• ATH102: Medical Anthropology
• ATH203: History and Theory of Anthropology
• ATH204: Political Anthropology
• ATH305: Anthropology of Religion and Rituals

Neuroscience and Behavior (NSB)

Neuroscience is one of the fastest-growing scientific fields, and the discoveries that are being made today are having an immediate and significant impact on our society. The importance of understanding animal behavior is likewise increasing, particularly in the face of a rapidly-changing environment. The B.S. in Neuroscience and Behavior is a great way for students to combine interests in neurobiology and animal behavior. The curriculum prepares students for various post-graduate degrees, including medical, veterinary, and graduate school, and we offer students a variety of opportunities to get hands-on research experience.

Neuroscience and Behavior Major (B.S.)

https://cola.unh.edu/psychology/program/bs/neuroscience-behavior-major

Description

The major in neuroscience and behavior (NSB) offers an interdisciplinary approach to human and non-human behavior, focusing on the evolution and adaptiveness of certain behaviors, as well as their underlying neural mechanisms. Students who have always been fascinated by how the brain functions will be well served by this major, as will those who love wild animals and wish to better understand their behavior. The B.S. in neuroscience and behavior is based on a solid foundation in biology, chemistry, physics, statistics, and genetics (foundation courses). These are followed by a two-semester course sequence that covers the fundamentals of neuroscience and behavior. Students can then pick five or more electives focusing on areas of interest.

NSB students are encouraged to take advantage of research experiences in the laboratories of the psychology and biology faculty in the program. This provides valuable experience with cutting-edge equipment and techniques. Some students may share aspects of a larger project,
whereas others may be relatively independent and design their own project under supervision. In either case, important skills are gained by the discipline of gathering data, analyzing and interpreting it, and presenting it to a broader audience.

The curriculum provides most of the requirements and recommended courses for students seeking admission to graduate school and to professional schools in medicine and veterinary medicine. Students who might choose not to go on to advanced degrees are well-prepared for employment as skilled technicians in research laboratories or, if their interests are in animal behavior, as field research assistants or animal trainers. With additional courses in education, the B.S. in NSB also qualifies graduates to teach at the elementary, junior high, and high school levels.

Faculty participating in the NSB major combine a love of teaching and student mentoring with a passion for research, and encourage student participation. Research facilities that students can use include the Integrative Animal Behavior and Ecoacoustics Laboratory, the confocal imaging center, the Hubbard Center for Genomic Studies, and the many marine, freshwater, and estuarine laboratories associated with UNH programs. Students can also take summer courses at the Shoals Marine Laboratory.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

**Major GPA requirements as indicated.**

#### Major Requirements

Students majoring in NSB are required to take foundation courses in basic science, core courses, and five electives from an extensive list of courses, including some offered by other departments including biochemistry, molecular and cellular biology, and natural resources. Minimum grade of D- or better is required in CHEM 403, CHEM 404, CHEM 545/CHEM 546, and PHYS 401; minimum grade of C- or better is required in all other courses. Finally, a capstone experience is required. This may be independent research, an advanced seminar, or other special student activity. It is meant to integrate prior experience and take the student to a new level in an area of special interest.

**Capstone**

- Both must be taken to count as one of the 5 required major electives
- One experience totalling at least 4 credits, but can be earned over the course of two consecutive semesters provided the experience is with the same research mentor. Can only substitute for one elective.
- Courses that are eligible to fulfill the Capstone requirement are indicated with a (C) and must be taken senior year. You can: 1) designate a course as a Capstone course, with additional requirements as determined by the instructor; 2) complete one semester of Capstone Research (BIOL 795, PSYC 795, or INCO 790); 3) do an honors thesis in Neuroscience and Behavior (NSB 799H) or Biology or Psychology (BIOL 799H or PSYC 797/PSYC 799) or; 4) participate in an alternative activity with approval from the student's academic advisor.

1. Total Credits: 69-71
NSB majors may use BIOL 411, BIOL 412, CHEM 403, CHEM 404, PHYS 401, PHYS 407 and either PSYC 402 or BIOL 528 to fulfill the Biological Sciences, Physical Sciences, Discovery Lab, and Quantitative Reasoning Discovery requirements. Students transferring into the NSB program from other UNH majors must hold a cumulative GPA of at least 3.2 at the time of requested major change.

### Student Learning Outcomes

Students demonstrate that they understand basic principles of neuroscience and behavior.

- Apply the core principles of biology, chemistry, physics, and statistics to more advanced concepts in neuroscience and behavior.
- Apply the principles of evolution and genetics to understand how genotype and phenotype affect the structure and function of animal nervous systems and behavior.
- Describe the basic features of animal nervous system development, organization, signaling, integration, and higher-level processing, and how these are altered in diseases of the nervous system.
- Explain the four levels of analysis emphasized in modern animal behavior research: causation, development, function, and evolution.
- Describe molecular and cellular approaches to the study of brain structure, function, and development, as well as behavioral and cognitive neuroscience approaches to studying higher-level brain functions.

Students demonstrate that they can undertake scientifically valid methods of inquiry.

- Apply appropriate research methods, laboratory techniques, and statistical methods to investigate scientific questions in neuroscience and behavior.

Students demonstrate that they can think critically and analytically.

- Read and critique primary research literature related to the nervous system, how nervous system function generates behavior, and how behavior addresses fitness-related challenges across a diversity of species.

Students demonstrate that they can communicate effectively.

- Demonstrate scientific writing skills, and proficiency in delivering oral presentations related to both the primary literature and findings from student investigations in neuroscience and behavior.

Students practice science responsibly and ethically, and acknowledge the influence of cultural and historical biases in the sciences.

### Philosophy (PHIL)

Philosophy has always been at the heart of liberal education, deepening and enriching the lives of those who pursue it. The philosophy major provides students with the opportunity to confront a wide variety of questions, especially those that cannot be dealt with in the framework of other disciplines. Such questions include those about the ultimate nature of reality. Does God exist? Are minds distinct from bodies? Are there more things between heaven and Earth than are dreamed of in science? Other questions probe what it is to know: Do we know that material bodies external to our minds exist? What does it mean to justify a belief? Still other questions are about how we ought to be or act: What is a good person? Are there moral rules? How are they justified? Must we obey them?

Philosophy also concerns itself with other disciplines: What makes something a work of art? What distinguishes a scientific theory from a religious theory or myth? Is capitalism amoral? Is legal authority moral or political?

The Department of Philosophy offers a wide range of courses exposing students to the full scope of philosophical activity. Grappling with major primary texts from the history of philosophy is an important emphasis of the program, for philosophy today is the continuation of a conversation that extends back to the ancient Greeks and the Vedic scriptures. Philosophy also always has wrestled with cutting-edge topics emerging in the current culture. Some recent examples are: What are the prospects for machines with mental lives? What are the implications of new views in cosmology? How do we handle the pressing ethical dilemmas brought on by emerging medical technologies, or by the historically unparalleled rate of destruction of the Earth’s environment? Are gender and race socially constructed concepts rather than biological concepts?

### Options in the Major

Students may select one of three options for the philosophy major, but are not required to do so. The options do not add additional requirements to the general philosophy major, but rather focus philosophy electives in a specific area.

- The **ethics and social responsibility (ESR)** option provides official recognition for those who choose to emphasize concern with moral responsibility in personal and social contexts, including the political and corporate arenas. You will choose courses in environmental ethics, law, evolution, social and political philosophy, and feminism.
- The **business, innovation, and technology (BIT)** option provides official recognition for those who choose to emphasize the study of the relationships between markets, technology, and human well-being. You will choose courses in the philosophy of artificial intelligence, evolution, neuroscience, biotechnology, business ethics, economic policy, environmental ethics and other high-impact subjects.
- The **political and legal philosophy (PLP)** option provides official recognition for those who choose to emphasize the systematic study of the fundamental philosophical questions regarding politics, law and justice, and how they apply to contemporary issues. You will choose courses in the nature of justice, limits of state power, balancing liberty and equality, capitalism vs. socialism, authoritarian challenges to democracy, fascism and antifascism, privacy, freedom of expression, police ethics, justifications for punishment, racial and gender injustice, wealth inequality and crime, immigration, and other issues at the interface of ethics, justice, law and states.

### Research

Students are strongly encouraged to consider the possibility of presenting research at the Philosophy Department Undergraduate Research Conference and/or fulfilling an undergraduate research grant. This is especially encouraged for students considering graduate school in philosophy.

### Graduate Preparatory Emphasis

This emphasis is strongly recommended for students who plan to do graduate work in philosophy. Beyond the ten (10) courses required for the major, such students should select, with their adviser’s approval,
two additional philosophy courses above the 400-level, for a total of twelve (12) courses. Consult the Department of Philosophy website for additional graduate school planning information.

Honors in Philosophy

To graduate "With Honors" in philosophy, students will be expected to complete their philosophy capstone requirement; complete two additional 700-level PHIL courses (The 700-level course options will vary depending upon which departmental honors option [thesis or portfolio] the student fulfills; they will be expected to have an overall GPA of 3.5 or above; they will engage in independent study and research (under the supervision of a faculty member) beyond the requirements of their coursework; and, they will be expected to present and defend a culminating project to the department’s faculty. Consult the Department of Philosophy website for more details.

Distinction on Senior Thesis

Distinction on Senior Thesis is granted by a unanimous determination of the student’s committee that the thesis exceeds A-level work and is worthy of special recognition.

Philosophy Major (B.A.)

https://cola.unh.edu/philosophy/program/ba/philosophy-major

Description

UNH philosophy majors acquire the ability to think systematically and imaginatively about fundamental and enduring issues such as morality, justice, happiness, beauty, gender, race, nature, artificial intelligence, space, time, and the meaning of life and death. Our internationally-renowned professors emphasize discussion, debate and writing in our courses. Wrestling with the “big questions” from diverse and global perspectives will prepare you exceptionally well for a variety of fulfilling careers. A lively and nurturing community personally invested in the success of our high achieving students, we take pride in watching our graduates excel in top law and graduate schools, innovative social justice programs, and various positions from Wall Street to Silicon Valley and beyond that seek hard workers who can think rigorously and communicate clearly.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: Yes
All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements

Majors must take a minimum of ten (10) philosophy courses, for a total of 40 credits. A single course can satisfy multiple requirements for the major. The required minimum overall GPA in major coursework is 2.00 and minimum grade of C- for all courses counting toward the major. Candidates for a degree must satisfy additional University requirements for graduation, such as:

1. University "Writing Intensive" Requirements,
2. Philosophy majors must satisfy the language requirement for the B.A., as a part of their liberal arts education. See the UNH Advising Handbook for how students may satisfy this requirement. Students who would like to satisfy this requirement with a language not offered by COLA (such as American Sign Language) should speak with their advisor about how to petition for an exception,
3. minimum number of credits (128 credits for B.A. degree), and
4. University Discovery Requirements.

Consult with your adviser early and often to plan the optimal path for fulfilling major and University requirements.

Total Credits 40

1 PHIL 495 Tutorial Reading and PHIL 795 Independent Study normally do not count toward fulfilling major requirement credits; exceptions may be granted by special permission.

Note that it is in the nature of 700-level seminars to presuppose by default that students have completed the main 400-level and 500-level core requirements (PHIL 412 Beginning Logic, PHIL 500 Workshop, PHIL 530 Ethics, PHIL 570 Ancient Philosophy, PHIL 580 Modern...
Philosophy from Descartes to Kant) and so free reference is made to materials, views, techniques, etc. covered in those lower-level core requirements.

Discovery Requirements

For students majoring in only philosophy: philosophy majors may "double count" any two courses toward the major and also to satisfy Discovery requirements. For example, a philosophy major can count (1) PHIL 412 Beginning Logic toward the major requirement as well as using this course to satisfy the Quantitative Reasoning Discovery Category and (2) they can also count PHIL 421 Philosophy and the Arts toward both the major and the Fine and Performing Arts Discovery Category. Because PHIL 412 Beginning Logic and PHIL 570 Ancient Philosophy are required for the major and also satisfy Quantitative Reasoning and Humanities Categories, respectively, all majors could simply count these two courses toward their Discovery requirements. In various circumstances—for instance if a student already satisfied those Discovery requirements before becoming a philosophy major—one might prefer to count other philosophy courses toward different Discovery Categories, and they are free to do so.

For students double majoring with philosophy: The Department sets no limits on how many courses students may "double count" toward both the philosophy major and Discovery categories if philosophy is your second major. A double major with philosophy as the second major could in principle count any of the following courses toward the major while satisfying five Discovery Categories:

1. **Quantitative Reasoning (QR)** Discovery Category could be satisfied by PHIL 412 Beginning Logic.
2. **Fine and Performing Arts (FPA)** Discovery Category could be satisfied by PHIL 421 Philosophy and the Arts.
3. **Humanities (HUMA)** Discovery Category could be satisfied by PHIL 401 Introduction to Philosophy, PHIL 405 Critical Thinking, PHIL 405W Critical Thinking, PHIL 410 Happiness, Well-Being, and a Good Life, PHIL 419 Race, Gender and Social Justice, PHIL 419W Race, Gender and Social Justice, PHIL 420 Introduction to Philosophy of Law and Justice, PHIL 430 Ethics and Society, PHIL 431 Business Ethics, PHIL 436 Social and Political Philosophy, PHIL #440 Just Business: The Ethics of Markets and Money, PHIL 440A Honors/Who Are You? Personal Identity and Humanity, PHIL 440B Honors/Who's Human Now?, PHIL 510 Philosophy and Feminism, PHIL 525 Existentialism, PHIL 531 Topics in Professional and Business Ethics, or PHIL 570 Ancient Philosophy.
4. **World Cultures (WC)** Discovery Category could be satisfied by PHIL 440C Honors/The Copernican Lens: Finding a Place for Humanity or PHIL 520 Introduction to Eastern Philosophy.

Student Learning Outcomes

UNH philosophy majors acquire the ability to think systematically and imaginatively about fundamental and enduring issues such as morality, justice, happiness, beauty, gender, race, nature, artificial intelligence, space, time, and the meaning of life and death. Our internationally-renowned professors emphasize discussion, debate and writing in our courses. Wrestling with the “big questions” from diverse and global perspectives prepares students exceptionally well for a variety of fulfilling careers. Cultivating a lively and nurturing community personally invested in the success of our high achieving students, we take pride in watching our graduates excel in top law and graduate schools, innovative social justice programs, and various positions from Wall Street to Silicon Valley.

More concretely, we monitor the following learning objectives.

- Students understand major philosophers and philosophical ideas accurately.
- Students apply their understanding of ideas in novel contexts.
- Students write effectively.
- Students speak effectively.
- Students argue with depth, precision, balance, and insight.
- Students understand the formal structure of arguments and understand rules of inference.
- Students read analytically, critically, and empathetically.
- Students critically assess their own preconceptions, commitments and ideas.

The main way we oversee student progress is through close mentorship, early on in our 2nd year orientation designed for new majors (PHIL 500 Workshop), and culminating in their presentation of research in two required 700-level seminars. We also strongly encourage participation in the annual Philosophy Department Undergraduate Research Conference.

**Philosophy Major: Business, Innovation & Technology Option (B.A.)**

https://cola.unh.edu/philosophy/program/ba/philosophy-major-business-innovation-technology-option

**Description**

While completing the philosophy major, students may select the option in Philosophy of Business, Innovation and Technology. This option provides official recognition for those who choose to emphasize the study of the relationships between markets, technology and human well-being. Students will choose courses in the philosophy of artificial intelligence, evolution, neuroscience, biotechnology, business ethics, economic policy, environmental ethics and other high impact subjects.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
Major Requirements

Students must fulfill the requirements of the philosophy major plus the requirements of the option. Majors must take a minimum of ten (10) philosophy courses, for a total of 40 credits. A single course can satisfy multiple requirements for the major. The required minimum overall GPA in major coursework is 2.00 and the minimum grade for all courses counting toward the major is a "C-." Candidates for a degree must satisfy additional University requirements for graduation, such as:

1. University "Writing Intensive" Requirements,
2. Philosophy majors must satisfy the language requirement for the B.A., as a part of their liberal arts education. See the UNH Advising Handbook for how students may satisfy this requirement. Students who would like to satisfy this requirement with a language not offered by COLA (such as American Sign Language) should speak with their advisor about how to petition for an exception,
3. minimum number of credits (128 credits for B.A. degree), and
4. University Discovery Requirements.

Consult with your adviser early and often to plan the optimal path for fulfilling major and University requirements.

Note that it is in the nature of 700-level seminars to presuppose by default that students have completed the main 400-level and 500-level core requirements (PHIL 412 Beginning Logic, PHIL 500 Workshop, PHIL 530 Ethics, PHIL 570 Ancient Philosophy, PHIL 580 Modern Philosophy from Descartes to Kant) and so free reference is made to materials, views, techniques, etc. covered in those lower-level core requirements.

Discovery Requirements

For students majoring in only philosophy: philosophy majors may "double count" any two courses toward the major and also to satisfy Discovery requirements. For example, a philosophy major can count (1) PHIL 412 Beginning Logic toward the major requirement as well as using this course to satisfy the Quantitative Reasoning Discovery Category and (2) they can also count PHIL 421 Philosophy and the Arts toward both the major and the Fine and Performing Arts Discovery Category. Because PHIL 412 Beginning Logic and PHIL 570 Ancient Philosophy are required for the major and also satisfy Quantitative Reasoning and Humanities Categories, respectively, all majors could simply count these two courses toward their Discovery requirements. In various circumstances—for instance if a student already satisfied those Discovery requirements before becoming a philosophy major—one might prefer to count other philosophy courses toward different Discovery Categories, and they are free to do so.

For students double majoring with philosophy: The Department sets no limits on how many courses students may "double count" toward both the philosophy major and Discovery categories if philosophy is your second major. A double major with philosophy as the second major could in principle count any of the following courses toward the major while satisfying five Discovery Categories:

1. Quantitative Reasoning (QR) Discovery Category could be satisfied by PHIL 412 Beginning Logic.
2. Fine and Performing Arts (FPA) Discovery Category could be satisfied by PHIL 421 Philosophy and the Arts.
3. Humanities (HUMA) Discovery Category could be satisfied by PHIL 401 Introduction to Philosophy, PHIL 405 Critical Thinking, PHIL 405W Critical Thinking, PHIL 410 Happiness, Well-Being, and a Good Life, PHIL 419 Race, Gender and Social Justice, PHIL 419W Race, Gender and Social Justice, PHIL 420 Introduction to Philosophy of Law and Justice, PHIL 430 Ethics and Society, PHIL 431 Business Ethics, PHIL 436 Social and Political

*Major GPA requirements as indicated.

Business, Innovation, and Technology Option Requirements

This option requires four philosophy courses (for a total of 16 credits) from those listed below. Students may “double count” these courses toward the general requirements of the philosophy major, for example, by counting three of these courses as the elective courses required for the major.

Code | Title | Credits |
--- | --- | --- |
PHIL 405 | Critical Thinking | 4 |
PHIL 405W | Critical Thinking | 4 |
PHIL 419 | Race, Gender and Social Justice | 4 |
PHIL 419W | Race, Gender and Social Justice | 4 |
PHIL 420 | Introduction to Philosophy of Law and Justice | 4 |
PHIL 421 | Philosophy and the Arts | 4 |
PHIL 424 | The Future of Humanity: Science, Technology, and Society | 4 |
PHIL 424H | Honors/The Future of Humanity: Science, Technology, and Society | 4 |
PHIL 430 | Ethics and Society | 4 |
PHIL 430W | Ethics and Society | 4 |
PHIL 431 | Business Ethics | 4 |

1 PHIL 495 Tutorial Reading and PHIL 795 Independent Study normally do not count toward fulfilling major requirement credits; exceptions may be granted by special permission.

Note that it is in the nature of 700-level seminars to presuppose by default that students have completed the main 400-level and 500-level core requirements (PHIL 412 Beginning Logic, PHIL 500 Workshop, PHIL 530 Ethics, PHIL 570 Ancient Philosophy, PHIL 580 Modern Philosophy from Descartes to Kant) and so free reference is made to materials, views, techniques, etc. covered in those lower-level core requirements.

Discovery Requirements

For students majoring in only philosophy: philosophy majors may "double count" any two courses toward the major and also to satisfy Discovery requirements. ### Philosophy Major: Ethics and Social Responsibility Option (B.A.)

https://cola.unh.edu/philosophy/program/ba/philosophy-major-ethics-social-responsibility-option

### Description

While completing the philosophy major, students may select the option in ethics and social responsibility. This option provides official recognition for those who choose to emphasize concern with moral responsibility in personal and social contexts, including the political and corporate arenas. Students will choose courses in environmental ethics, law, evolution, social and political philosophy, and feminism.

### Requirements

We also strongly encourage participation in the annual Philosophy Department Undergraduate Research Conference.

**Philosophy Major: Political and Legal Philosophy Option (B.A.)**

https://cola.unh.edu/philosophy/program/ba/philosophy-major-political-legal-philosophy-option

**Description**

The political and legal philosophy option in the philosophy major gives students interested in politics, law and justice the opportunity to focus their philosophy major coursework around their interests in a systematic and rigorous way. Philosophy has long been a major for high-achieving students interested in law, and our graduates are admitted regularly to top law schools such as Harvard, Yale, Stanford, University of Chicago, NYU and Duke, among others. We are also a home for UNH students interested and active in political philosophy. Our faculty members have considerable expertise in both political and legal philosophy, with some serving on UNH’s pre-law advisory committee.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Students must fulfill the requirements of the philosophy major plus the requirements of the option. Majors must take a minimum of ten (10) philosophy courses, for a total of 40 credits. A single course can satisfy multiple requirements for the major. The required minimum overall GPA in major coursework is 2.00 and the minimum grade for all courses counting toward the major is a "C-". Candidates for a degree must satisfy additional University requirements for graduation, such as:

1. University "Writing Intensive" Requirements,
2. Philosophy majors must satisfy the language requirement for the B.A., as a part of their liberal arts education. See the UNH Advising Handbook for how students may satisfy this requirement. Students who would like to satisfy this requirement with a language not offered by COLA (such as American Sign Language) should speak with their advisor about how to petition for an exception,
3. minimum number of credits (128 credits for B.A. degree), and
4. University Discovery Requirements.

Consult with your adviser early and often to plan the optimal path for fulfilling major and University requirements.

**Philosophy Major: Political and Legal Philosophy Option Requirements**

This option requires four philosophy courses (for a total of 16 credits) from those listed below. Students may “double count” these courses toward the general requirements of the philosophy major, for example, by counting three of these courses as the elective courses required for the major.

- Students understand the formal structure of arguments and understand rules of inference.
- Students read analytically, critically, and empathetically.
- Students critically assess their own preconceptions, commitments and ideas.

The main way we oversee student progress is through close mentorship, early on in our 2nd year orientation designed for new majors (PHIL 500 Workshop), and culminating in their presentation of research in two required 700-level seminars. We also strongly encourage participation in the annual Philosophy Department Undergraduate Research Conference.

Philosophy Minor

https://cola.unh.edu/philosophy/program/minor/philosophy

Description

UNH philosophy minors acquire the ability to think systematically and imaginatively about fundamental and enduring issues such as morality, justice, happiness, beauty, gender, race, nature, artificial intelligence, space, time, and the meaning of life and death. Our internationally-renowned professors emphasize discussion, debate and writing in our courses. Wrestling with the “big questions” from diverse and global perspectives will prepare you exceptionally well for a variety of fulfilling careers. A lively and nurturing community personally invested in the success of our high achieving students, we take pride in watching our graduates excel in top law and graduate schools, innovative social justice programs, and various positions from Wall Street to Silicon Valley and beyond that seek hard workers who can think rigorously and communicate clearly.

Requirements

A philosophy minor consists of five (5) philosophy courses (for a total of 20 credits) with a grade of C- or above. At least one of the philosophy courses must be at the 500-level or higher.

Total Credits: 20

PHIL 495 Tutorial Reading and PHIL 795 Independent Study may be used towards the minor only with special approval.
You do not need to declare a minor; however, it might be wise to meet with a faculty member from the Philosophy Department to discuss your minor plan.

At the beginning of your final semester of study, you should complete a Minor Certification of Completion Form, email the completed form to philosophy@unh.edu to request the Department Chair’s signature as the Minor Advisor signature, obtain your advisor’s signature, and submit it to your Dean’s Office.

Political Science & International Affairs (PSIA)

The study of political science includes the study of politics, power, and governance. Students have the opportunity to study both formal and informal institutions of government, political behavior, civil society, public policy, international relations, democratization, crime and punishment, political economy, and comparative political development. Political science provides a strong foundation for informed citizenship and civic engagement. The study of political science is particularly valuable to students planning to enter local, state, or national government; the Foreign Service; law school and the legal profession; non-governmental organizations; political campaigns; and careers in the security/intelligence sector. The major also enhances cognitive abilities, writing, public speaking, critical thinking, and analytical skills.

Internships and Advanced Study

In addition to regularly scheduled courses, the department offers advanced study in Political Science and International Affairs, internships, and experiential learning. Interested students should contact our department advisor, Heather Austin (heather.austin@unh.edu), to learn about the course offerings for a given semester.

Students have engaged in exciting internship opportunities that explore various aspects of government, policy-making, the legal system, and interest groups. These internships provide students with the opportunity to engage with issues at the local, state, national, and international levels. Students must have junior or senior standing and normally have a 3.2 grade point average (GPA) or higher to be eligible for consideration. Students interested in internships should consult with faculty or our department advisor.

Political Science Language Requirement

The bachelor of arts degree at the University of New Hampshire requires that a student satisfy the foreign language proficiency requirement. See Foreign Language Requirement (p. 31) for the full description of this requirement.

The Department of Political Science does not allow American Sign Language (ASL) to count toward the language requirement.

Exceptions to this must be petitioned and approved by the Department of Political Science and International Affairs’ undergraduate committee and the student’s advisor.

Accelerated M.A. Degree Program

The Accelerated MA program aims to:

1. Improve opportunities for excellent undergraduates to prepare for competitive Ph.D. programs or add an additional credential before entering a competitive job market; and

2. Allow students interested in politics to advance and further specialize their political science education in only one additional year at UNH.

Students must fulfill all programmatic requirements for the current master’s degree program, as well as fulfill all programmatic requirements for their bachelor’s degree. Students may double-count up to 12 undergraduate credits (i.e., 3 courses) toward the completion of the MA degree.

Interested students must submit a full graduate application by February 15 of their junior year. Minimum GPA required for admission is 3.2.

For additional information you may contact the graduate coordinator, Prof. Emily Baer (Emily.Baer-Bositis@unh.edu) or Heather Austin, (603) 862-1767, heather.austin@unh.edu.

Global Studies Dual Major

https://cola.unh.edu/interdisciplinary-studies/program/global-studies-dual-major

Description

The Global Studies (GS) dual major complements and adds a global dimension to any major at UNH. The completion of the dual major requires no additional credits for graduation beyond the 128 required of all UNH students.

Note: The Department of Civil Engineering has developed a dual-major program in civil engineering and Global Studies. Students do not need to have pre-existing skills in a foreign language before coming to UNH.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes, if primary major is a Bachelor of Arts

Declared Primary Major

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Global Studies Dual Major Requirements

All coursework required for Global Studies must be completed with a grade of C or better.

Students who wish to declare the Global Studies dual major must earn a C or better in IA 401, have declared a primary major, and have a 2.5 cumulative grade-point average. Students are expected to maintain at least a 2.5 grade-point average, the minimum required for study abroad at UNH.

Global Studies Language Requirement

Students must demonstrate functional reading, writing, and speaking ability equivalent to a second-year, second-semester college level (504). Students may take placement tests to establish proficiency. Native second language speakers are exempt from this requirement - speak to an GS advisor. Language study may be pursued at UNH; through study abroad in the summer, J-term, or academic year; or through transfer credits from other institutions with the permission of a GS advisor.

International Experience - Study Abroad

Minimum of eight weeks. The GS international experience is typically conducted in a country or region that uses the student's second language. Students may pursue their international experience, or transferred from another university with the permission of the Global Studies advisor.

Electives are offered across the university and may be used to fulfill Discovery, Honors Program and/or other minor requirements. Up to 8 credits may be double counted between your primary major and the dual major. Additional courses taken in the primary major may count for the dual major if the courses are not counted toward the primary major requirements. Electives may be taken at UNH, during the international experience, or transferred from another university with the permission of the Global Studies advisor.

Electives - see list below

Select one elective course from each category list, plus one more course from either category (3 courses total):

Politics, Culture, & History

Science, Environment, Economy, & Health

Global Studies Language Requirement

GS majors must demonstrate functional reading, writing, and speaking ability equivalent to a second-year, second-semester college level (504). Students may take placement tests to establish proficiency. Native second language speakers are exempt from this requirement - speak to an GS advisor. Language study may be pursued at UNH; through study abroad in the summer, J-term, or academic year; or through transfer credits from other institutions with the permission of a GS advisor.

International Experience - Study Abroad

Minimum of eight weeks. The GS international experience is typically conducted in a country or region that uses the student's second language. Students may pursue their international experience elsewhere after consultation with an GS advisor. The international experience (typically completed in the junior year) is completed before taking IA 701 in the senior year. Students may spend an academic year, semester, or summer in an academic institution, in an internship with a private or public organization, or in purposeful travel/research. Students must meet with the Study Abroad Advisors at the Global Education Center to plan their international experience, typically a year in advance of study abroad.

Global Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/global-studies

Description

The Global Studies (GS) minor adds a recognized distinction and global context to your primary major at UNH. It was developed for those students who, due to the demands of their primary majors, are unable to complete the more rigorous requirements of the GS dual major.

The minor is declared when the fifth course is being taken. The student should obtain the minor completion form from the department.

Requirements

Students who wish to declare the Global Studies minor must earn a C or better in all GS course requirements and have a 2.5 cumulative grade-point average.

Code Title Credits
IA 401 International Perspectives 4
Select one of the following: 4
ECON 401 Principles of Economics (Macro) 4
ECON 402 Principles of Economics (Micro) 4
ERE 411 Environmental and Resource Economics Perspectives 4
Global Studies Language Requirement 1 4
International Experience - Study Abroad 2 4
Electives Choose one course from each category list (2 courses total): 3 8
Politics, Culture, & History 5
Science, Environment, Economy, & Health 5
Total Credits 20

1 Global Studies Language Requirement

Functional reading, writing, and speaking ability equivalent to a first-year, second-semester college level (402). Students may take placement tests to establish equivalency, include language study during the international experience, or transfer credits from other institutions.

2 International Experience - Study Abroad

Minimum of three weeks (or 4 credits). The international experience may include study, directed research, internship or service/volunteer experience abroad. Students should plan with the study abroad advisors (study.abroad@unh.edu) to plan for their international experience well in advance.

3 See elective category lists under the Global Studies dual major heading. Elective courses may count toward Discovery, Honors, Writing Intensive and major requirements.

International Affairs Major (B.A.)

https://cola.unh.edu/political-science/program/ba/international-affairs-major

Description

International affairs is the focused study of global issues drawing on approaches from political science, history, economics, anthropology, and related fields. Students acquire the substantive knowledge, practical skills, and real-world experience to address critical issues in international affairs, such as war and diplomacy, climate change and biodiversity,
human rights and women’s rights, refugees and migration, and inequality and poverty.

Students can focus their studies in one of the following thematic tracks: global development and environment, international security, global ethnic, race, and diversity studies; global health and education; regional or transnational studies in the Middle East, Latin America, Africa, or Asia. The major in IA thus provides students theoretical approaches grounded in the empirical study of places and peoples.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

All majors must complete 40 hours of IA core courses and departmentally approved IA electives, with a grade of C or better and a grade point average of 2.5 or better.

Electives

Select three electives in one of the following thematic tracks: Regional and Transnational Studies, Global Development and Environment, Global Ethnic, Race, and Diversity Studies, International Security, or Global Health and Education.

Regional and Transnational Studies

Complete three courses in a COLA interdisciplinary area studies minor. These include:

- African Studies
- Asian Studies
- Latin American and Caribbean Studies
- Middle Eastern Studies

Global Development and Environment

- CMN 670 From Silicon Valley to Foxconn: Global Digital Capitalism
- ECON 468 Economic Development
- EDEC 530 Education, Poverty, and Development
- ENGL 736 Environmental Theory
- GEOG 550 Sub-Saharan Africa: Environmental Politics and Development
- GEOG 560 Natural Hazards and Human Disasters
- GEOG 584 Political Geography
- GEOG 685 Population and Development
- HIST 609 Special Topics in American Legal History
- HIST 690 Seminar: Historical ExpI
- HIST 797 Colloquium
- POLT 546 Wealth and Politics in Asia
- POLT 549 The Politics of Markets
- POLT 560 Comparative Government and Society
- POLT 566 Politics in China
- POLT 760 Politics of Poverty
- POLT 761 Comparative Environmental Politics and Policy
- POLT 762 International Political Economy
- SOC 693 Global Social Change

Global Ethnic, Race, and Diversity Studies

- ANTH 485 Introduction to Race, Culture, and Power
- ANTH 501 Peoples and Cultures of the World
- ANTH 513 Ethnographic Methods
- CLAS 550B Identities and Difference in the Ancient World: Slaves and Masters
- CMN 620W Global Media, Culture, and Power
- CMN 596 Special Topics in Media Studies
- CMN 772 Seminar in Media Theory

- POLT 566 Asian Challenge to Global Order
- POLT 568 International Security
- POLT 569 The Rise of China
- POLT 592 Selected Topics in International Politics
- POLT 740 States and Societies in the Middle East
- POLT 742 Politics of Afghanistan, Pakistan, and India
- POLT 760 Theories of International Relations
- POLT 778 International Organization
- POLT 76E Seminar in International Politics
Graduates include: the foreign service, intelligence agencies, international organizations, the UN, journalism, think tank research, law, risk analysis, and business.

For more information, contact Professor Madhavi Devasher (madhavi.devasher@unh.edu), 603-862-8020.

Requirements

1. Five courses (20 credits)
2. Students must receive a grade of C or better for a course to count toward the minor requirements.
3. No more than 8 credits may double count between majors and minors. Thus, political science majors pursuing the security studies minor can only double count up to two of the three required political science courses below. The third required course must be taken in addition to courses taken to fulfill major requirements.

- HIST 437H Honors/The Mad Among Us: A Global History of Mental Disorder
- HIST 440E Honors/Drugs and Addiction in World History
- HIST 498 Explorations of Historical Perspectives

Student Learning Outcomes
- Apply different disciplinary approaches to the study of international affairs, including key themes and theoretical frameworks employed in these disciplines;
- Use critical thinking skills to analyze and discuss important global issues;
- Engage with cultural diversity and complexity through the international experience;
- Demonstrate familiarity with different types of data and sources and their appropriate use in analyzing selected topics in international affairs;
- Demonstrate competence in research design. Students will develop inquiry-based research questions, conduct a literature review, employ appropriate methods and data collection, and interpret their findings accurately.

International Security Minor
https://cola.unh.edu/political-science/program/minor/international-security

Description
The international security minor will provide students with the opportunity to explore the many dimensions of international security through course work in political science, history, and other closely related disciplines. Students will work with and learn from faculty conducting novel research on topics such as: the arms trade, ethnic conflict, drug-related violence, human security, and conflicts in regions throughout the war.

Students who successfully complete this major will be well-versed in contemporary international security issues and will learn critical thinking and analysis skills applicable to a wide range of careers. Leaders at all levels count on staff with analytical skills who can communicate effectively with policy-makers. Career paths open to our graduates include: the foreign service, intelligence agencies, international
Political Science Major (B.A.)

https://cola.unh.edu/political-science/program/ba/political-science-major

Description

The study of government and politics, to which the courses and seminars of the Department of Political Science are devoted, includes the development of knowledge of political behavior by individuals and groups as well as knowledge about governments: their nature and functions, their problems and behavior, and their interactions—at the national and international levels as well as local, state and regional levels.

Much of the learning offered by the Department of Political Science can also be regarded as essential for good citizenship, since political knowledge helps to explain the formal and informal institutions by which we are governed and the forces that lead to policy decisions, and also seeks to clarify the issues and principles that encourage people toward political involvement. In addition, such learning is especially valuable to students planning to enter local or national government or other public service related fields, including the Foreign Service, and it will be of great help to those who intend to study law and enter the legal profession. For teaching, particularly at the college level, and for many types of government service, graduate work may be indispensable. An undergraduate major in political science will provide a helpful foundation for any further study of politics and related fields in the social sciences and humanities. Such an emphasis will also be valuable for students seeking careers in journalism, international organizations, and the public affairs and administrative aspects of labor, financial and business organizations.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

The major in political science consists of at least 10 courses (40 credits) and not more than 12 courses (48 credits). The minimum grade requirement is C- per course. Any grade lower than a C- will not count toward major. The required minimum overall GPA for major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of the major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Political Science majors may use one major-required course to satisfy one Discovery category requirement.

The Political Science major option in International Security consists of at least 10 courses (40 credits). Students who elect this option can highlight their focus on international security to potential employers and graduate schools. The option in major will appear on students’ transcript. The option in major will allow students to develop a network with students who share an passion for international security, and to leverage this network at UNH and beyond.

**Degree Requirements**

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral
- **Core Curriculum Required:** Discovery & Writing Program Requirements
- **Foreign Language Requirement:** Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.*

**Major Requirements**

The Political Science major option in International Security consists of at least 10 courses (40 credits).

---

1. Once students declare the major, POLT 401, POLT 402, POLT 403 must be completed within the first calendar year. Note: POLT #407, POLT 440A, POLT 444, POLT 444B do not count toward the major.
2. Students can take any POLT course at the intermediate level or higher (500-799) to count toward elective credit. ECON 402 Principles of Economics (Micro) or ECON 605 Intermediate Microeconomic Analysis and ECON 401 Principles of Economics (Macro) or ECON 611 Intermediate Macroeconomic Analysis may also be used to fulfill the fifth or sixth elective in this sequence. Additional economics courses will be considered by petition. Only one economics course can count toward this requirement. If students substitute an economics course for a POLT 500-level course, the economics course cannot be used to satisfy Discovery Program category requirements.
The minimum grade requirement is C- per course. Any grade lower than a C- will not count toward the major option. The required minimum overall GPA for major coursework is 2.0.

**Student Learning Outcomes**

- **Knowledge Base**: a proficient knowledge base of the five subfields of Political Science including American Government, Political Theory, Comparative Politics, International Relations, and Methods. The program fosters the development of a strong empirical foundation through multiple levels of courses. The option in major allows students to focus on their elective coursework on critical international security issues.

- **Research Skills**: A second goal is to advance the students’ abilities to understand and use basic political science research skills. These include knowledge of credible sources of information, basic statistical applications, and support for foreign language proficiency. We also strive to help students identify interesting and important research questions clearly and concisely, gather and assess various types of information, and come to well-reasoned conclusions.

- **Critical Thinking**: The third objective involves enhancement of student cognitive abilities and critical thinking. We hone the ability to analyze, assess, and reconstruct findings in written, oral, and graphical form. We strive to promote students who are self-disciplined thinkers who understand the rigorous standards of research, are intelligent consumers of political information, and are able to understand and weigh multiple perspectives and interpretations.

- **Communication Skills**: Another aim is to enhance the written and oral communication skills of our students. We support the goals of the writing-intensive requirement and expose students to different genres and conventions in academic writing. Most 500 and 700-level courses emphasize cultivating strong writing and reading skills, while at the 700-level, student engagement in sustained discussion becomes the centerpiece of instruction in many seminars. Writing instruction includes emphasis not only on research papers but on short analytical essays, and reviews that ask students to synthesize complex information, develop arguments, and delve more deeply into interpretation. In some courses, part of this work includes iterated practice of grammar and stylistic choices through revision and proposal assignments.

- **Professional Socialization and Support for Post-Graduate Training and Placement**: The sixth aim of the program is to give students the requisite skills, preparation and knowledge base to become capable and responsible political actors in their chosen professional careers and future goals. We expect our students to be exposed to the ethics and organizational culture of political science specifically and the social sciences generally. We aim to provide a foundation of professionalism for students who enter both the private and public sectors.
sectors upon graduation and for those who continue their studies beyond the B.A.

- **Inspire Curiosity and Enthusiasm for Inquiry:** A final goal is to foster a spirit of inquiry. Faculty in the Department hope to stimulate curiosity about the political world and inspire lifelong learners who are engaged in the political process at the local, national and global levels.

## Political Science Minor

https://cola.unh.edu/political-science/program/minor/political-science

### Description

The study of government and politics, to which the courses and seminars of the Department of Political Science are devoted, includes the development of knowledge of political behavior by individuals and groups as well as knowledge about governments: their nature and functions; their problems and behaviors; and their interactions across all levels of governance.

Much of the learning offered by the Department of Political Science can also be regarded as essential for good citizenship, since political knowledge helps to explain the formal and informal institutions by which we are governed and the forces which lead to policy decisions, and also seeks to clarify the issues and principles that encourage people toward political involvement. In addition, such learning is especially valuable to students planning to enter local or national government or other public service, including the Foreign Service, and it will be of great help to those who intend to study law and enter the legal profession.

Students that would like to transfer credits from abroad or other universities should meet with our political science advisor, Heather Austin, (heather.austin@unh.edu) to determine eligibility toward the minor.

### Requirements

The political science minor consists of five courses (20 credits total).

</tbody>
</table>

- These courses may be taken in any combination of the five subfields and levels (400-700) offered. The fields to choose from are: American politics, political thought, comparative politics, international politics and methods.
- The minimum grade requirement is C- per course. Any grade lower than a C- will not count toward the minor.

## Survey Research Minor

https://cola.unh.edu/political-science/program/minor/survey-research

### Description

The survey research minor will provide students with the skills necessary to design, conduct, analyze and present survey research in a variety of professional settings. This minor will enable students to gain a strong grounding in the theory and practice of survey research, as well as learn how public opinion forms and changes over time. Students will apply what they have learned at the UNH Survey Center, nationally recognized for its public opinion and political polling. Students who complete this minor will be poised to pursue an advanced degree in this subject and, ultimately, a career in the field.

### Requirements

The survey research minor requires five courses (20 credits), as follows:

<table>
<thead>
<tr>

</tbody>
</table>

- Students must receive a grade of C or better for a course to count toward the minor requirements.
- Once students have declared the minor, they are required to meet with the coordinator or appropriate affiliated faculty advisor at least once per semester for regular review and assessment of their program, learning outcomes, and progress toward the degree.

## Transfer or Articulation Agreements with Other Institutions

Transfer credits may be approved by the coordinator to count toward the minor. If the transfer credit is accepted by the university and fits within the scope of the minor, it will be considered.

## Psychology (PSYC)

The Department of Psychology focuses on the scientific study of human and non-human behavior. The program exposes students to the scientific study of behavior and encourages an increased understanding of the behavior in humans and animals. Our bachelor of arts program in psychology is broad, with an emphasis on technical skills and the opportunity to specialize in areas that interest you. Courses cover such topics as clinical and counseling, social psychology, personality, psychological development, cognition in humans and non-humans,
neuroscience, sensory psychology and the history of psychology. Opportunities abound to gain research experience in a wide range of laboratories and/or to participate in clinically-oriented internships.

The program in neuroscience and behavior, shared between Liberal Arts and Life Sciences and Agriculture, focuses on the scientific study of the brain and its relationship to behavior. This Bachelor of Science program is structured around a rigorous core sequence of courses that incorporates an extensive laboratory experience, with the opportunity for specialization. Courses include such topics as endocrinology, genetics, neurology, animal behavior, neuroscience and philosophy, drugs, sensory systems, mood disorders and ecology. A large number of laboratories are available that routinely incorporate undergraduate students.

**Advising System**

All students in the department will be assigned a professional advisor, either the department coordinator or the academic advisor. Academic advisors assist students in all phases of educational planning and decision making, including registration, long-range academic planning, degree and program requirements, and career selection and planning. Faculty advisors are available to consult with students about research and graduate school options.

**Undergraduate Awards for Majors**

Each year the faculty chooses psychology undergraduates as the recipients of the following awards: the Herbert A. Carroll Award for an outstanding senior in psychology, the George M. Haslerud Award for an outstanding junior in psychology, the Fuller Foundation Scholarship for an undergraduate psychology major. Psychology majors with at least a 3.2 grade-point average are eligible for these awards. Faculty nominate students from the eligibility list and final selection of recipients is made by vote of the full-time psychology faculty.

**Honors Program in Psychology**

The Department of Psychology sponsors an honors program for outstanding students in the major. Students may apply to the honors program in psychology in their sophomore or junior year.

**Eligibility criteria include**

1. Overall grade-point average of 3.5 or above and 3.5 in major courses
2. Completion of PSYC 401 Introduction to Psychology, PSYC 402 Statistics in Psychology and PSYC 502 Research Methods in Psychology with a grade of B or above in each.

**Requirements of the program include**

1. Designate three of the four 700-level psychology courses as honors or equivalent
2. PSYC 797 Senior Honors Tutorial (fall of senior year)
3. PSYC 799 Senior Honors Thesis (spring of senior year)

Students interested in applying to the honors program should contact the department coordinator by the end of their sophomore year.

**Undergraduate Research Conference**

The Department of Psychology sponsors the annual George M. Haslerud Undergraduate Research Conference each spring. Undergraduate honors students present their theses at the conference. Contact the department coordinator for more information.

**Five-Year BA/MA Program**

The five-year B.A./M.A. program in experimental psychology aims to

1. improve opportunities for excellent undergraduates to prepare for competitive Ph.D. programs or add an additional credential before entering a competitive job market; and
2. allow students interested in experimental psychology to advance and further specialize their psychology education in only one additional year at UNH.

The M.A./B.A. requires 30 credits. Twelve credits will count towards both the B.A. and M.A. degree. These three courses count as electives and do not go towards the undergraduate psychology major. Students must fulfill all programmatic requirements for the master’s degree program, as well as fulfill all programmatic requirements for their bachelor’s degree.

The first step toward applying to the program is to contact a faculty member whose research is in a topic that matches your interest in order to arrange support for your thesis or paper of publishable quality. Interested students must submit a full graduate application to the graduate school during their junior year.

For additional information, please contact the department at 603-862-2360 or at psychology.dept@unh.edu.

https://cola.unh.edu/psychology

**Programs**

- Psychology Major (B.A.) (p. 285)
- Psychology Minor (p. 287)
- Neuroscience and Behavior Major (B.S.) (p. 370)

**Faculty**

https://cola.unh.edu/psychology/faculty-staff-directory

**Psychology Major (B.A.)**

https://cola.unh.edu/psychology/program/ba/psychology-major

**Description**

The psychology major provides students with a broad education, while also allowing some specialization. The program exposes students to the scientific study of behavior and encourages an increased understanding of the behavior of humans and animals.

Students who wish to declare psychology as a major after enrolling in the University should consult with the department’s academic counselor for application procedures and criteria.
requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Foreign Language Requirement: Yes
All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements
Students majoring in psychology must complete 44 credits with a minimum grade of C- in each course and a 2.0 overall average in all major requirements.

- PSYC 521 | Behavior Analysis                                                       |           |
- PSYC 522 | Behaviorism (offered in Manchester only)                               |           |
- PSYC 531 | Psychobiology                                                          |           |
Select two of the following courses from Group II: 8
- PSYC 552 | Social Psychology                                                       |           |
- PSYC 553 | Personality                                                            |           |
- PSYC 561 | Abnormal Behavior                                                       |           |
- PSYC 571 | Pioneers of Psychology (offered in Manchester only)                    |           |
- PSYC 581 | Child Development                                                       |           |

Depth (700-level) courses
Select two of the following courses from Group I: 8
- PSYC 705 | Tests and Measurement                                                  |           |
- PSYC 710 | Visual Perception                                                       |           |
- PSYC 712 | Psychology of Language                                                 |           |
- PSYC 713 | Psychology of Consciousness                                             |           |
- PSYC 716 | Cognitive Neuroscience                                                  |           |
- PSYC 720 | Animal Cognition                                                        |           |
- PSYC 722 | Behaviorism, Culture, and Contemporary Society                        |           |
- PSYC 731 | Brain and Behavior                                                      |           |
- PSYC 733 | Drugs and Behavior                                                      |           |
- PSYC 735 | Neurobiology of Mood Disorders                                          |           |
- PSYC 736 | Attention Disorders                                                     |           |
- PSYC 737 | Behavioral Medicine                                                    |           |
- PSYC 741W | Special Topics (examples: Fundamentals of Substance Abuse, Neuroscience of Memory, Fundamentals of Cognitive Science, Neurobiology of Spatial Cognition & Memory) |           |
Select two of the following courses from Group II: 8
- PSYC 705 | Tests and Measurement                                                  |           |
- PSYC 755 | Psychology and Law                                                     |           |
- PSYC 756 | Psychology of Crime and Justice                                        |           |
- PSYC 757 | Psychology of Happiness                                                |           |
- PSYC 758 | Health Psychology                                                       |           |
- PSYC 762 | Counseling                                                             |           |
- PSYC 780 | Prenatal Development and Infancy                                        |           |

Note: Most offerings have one or more prerequisite courses. Students (with the help of their adviser) are expected to select breadth courses that will later enable them to select depth courses appropriate to their interests and career goals.

The Discovery Program capstone requirement, taken during the senior year, may be fulfilled by completing one of the following options:
1. The honors-in-major program with an honors project; honors seminar, and research presentation (PSYC 799 Senior Honors Thesis);
2. a 4-credit capstone designated independent study project (PSYC 795 Independent Study);
3. PSYC 793 Internship;
4. Capstone-designated 700-level course.

The psychology department does not accept other departments’ statistics courses toward the psychology major. Students who have taken a statistics course other than PSYC 402 Statistics in Psychology must pass a competency exam in order to declare the major and/or register for PSYC 402 Statistics in Psychology.

Major department courses may not be used to satisfy Discovery category requirements except for PSYC 402 Statistics in Psychology, which may be used to satisfy the QR Discovery requirement and the major requirement. PSYC 401 Introduction to Psychology cannot be used to fulfill a Social Science; PSYC 571 Pioneers of Psychology cannot be used to fulfill a Historical Perspective. In the case that Psychology is a second major, major courses can be counted toward the Discovery requirements.

Transfer Students
Transfer students who elect to major in psychology must complete at least 24 credits in the program at UNH to qualify for the degree in psychology. Transfer students must earn a total of 44 approved credits for completion of the psychology major. The distribution of these credits will be determined by the department’s academic counselor. Transfer students should note that courses are allotted only the number of credits granted by the original institution (after adjustments for semester-hour equivalents). Thus, students transferring from an institution at which courses carry less than four credits each must make up for any credit deficit created by acceptance of transfer credits into the psychology major. Only courses taken in a psychology department can be transferred into the psychology major. Of the four 700-level courses required for the major, at least three must be taken at UNH.

Additional Notes
Specific course selections should be discussed with advisers. Exceptions to the requirements for the major require compelling circumstances and a petition to the department.

Psychology majors planning to go on to graduate study in psychology are advised to include PSYC 705 Tests and Measurement among their courses.
Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

**Student Learning Outcomes**

- Demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings in psychology.
- Understand basic research methods in psychology including design, data analysis, and interpretation; and utilize this knowledge to conduct their own psychological research, with an appreciation of the ethical issues involved in human and non-human research.
- Engage in scientific reasoning and problem solving so that they can evaluate the quality and implications of scientific research.
- Write empirical research reports and literature reviews in American Psychological Association style and present findings from scientific research.

**Psychology Minor**

[https://cola.unh.edu/psychology/program/minor/psychology](https://cola.unh.edu/psychology/program/minor/psychology)

**Description**

Psychology is the study of the mind and human and animal behavior – what motivates us to do the things that we do? In this program, you’ll have the opportunity to learn scientific research and analysis methods while studying how we learn and develop, how we interact socially, how our minds affect the way we perceive things, and how we identify and define abnormal behavior.

- No more than 4 credits of PSYC 795 Independent Study may be applied to the minor.
- A maximum of 9 approved psychology transfer credits can be applied to the UNH psychology minor.
- Transfer courses must be evaluated for their equivalency. Only courses taken in a psychology department can be applied towards the minor.
- Three credit transfer courses can be applied as only three credits. Students must make up the credit deficit created by acceptance of transfer courses, with one exception: one three-credit course accepted in transfer may be applied for a total of 19 credits.
- AP Psychology transferred into UNH is equivalent as PSYC 401.

**Queer Studies**

**Programs**

- Queer Studies Minor (p. 287)

**Queer Studies Minor**

[https://cola.unh.edu/womens-gender-studies/program/minor/queer-studies](https://cola.unh.edu/womens-gender-studies/program/minor/queer-studies)

**Description**

The queer studies minor provides students with opportunities to research and understand a rapidly growing field whose focus is the study of lesbian, gay, bisexual, trans and allied peoples, their histories and cultures. Queer studies is a method of inquiry that explores the role of same-sex desire and constructions of gender across and among cultures and histories. In these classes, students will consider sexualities and genders as identities and social statuses, as categories of knowledge, and as lenses that help to frame how we understand our world. The minor consists of interdisciplinary coursework in queer studies. Students who wish to pursue the queer studies minor should consult with Holly Cashman (holly.cashman@unh.edu).

**Requirements**

The queer studies minor requires 5 courses (20 credits) from the queer studies course offerings list below. A grade of C- or better is required in all queer studies courses. One pre-approved elective from the electives list below may count toward the minor. Courses taken Pass/Fail may not be used for the minor. No more than 8 credits used to satisfy the requirements for a major may be used for the queer studies minor. If you wish to substitute a different course, consult with a queer studies faculty advisor.

**Queer Studies Course Offerings**

Please note that additional courses may count. Please visit the program’s website for the most up-to-date information.

Race and Ethnic Studies (RES)

Programs

- Race and Ethnic Studies Minor (p. 288)

Race and Ethnic Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/race-ethnic-studies

Description

The race and ethnic studies (RES) minor examines how racial and ethnic categories are created and maintained — politically, socially and culturally. RES uses critical, interdisciplinary and comparative approaches to study race relations as they intersect with factors including gender and sexuality, class, religion and immigration status. The minor prepares students for life and work in a world increasingly characterized by difference derived from racial and ethnic identities.

Learning Outcomes

Facilitate understanding of how the social constructions of race affect the social fabric of our historical and contemporary world; enhance students’ abilities to appreciate differences and to actively and critically engage in civic responsibilities, especially with respect to social justice; prepare students to negotiate an increasingly interconnected world and apply their education in a wide range of occupations; gain exposure to the theories and methods of ethnic studies; and compare representations of borderlands, hybridity, migration and diaspora from different cultures to comprehend how national boundaries, as well as local, national, and transnational cultures and politics, affect the constitution of racial and ethnic categories.

Classes for the RES minor are housed in a variety of departments in the College of Liberal Arts, offering students a truly interdisciplinary experience. Please contact the Global Racial and Social Inequality Lab (GRESH@unh.edu) for minor advising.

Requirements

The race and ethnic studies minor consists of five courses or 20 credits. To complete a minor, students are required to:

1. Enroll in an introductory-level course. (These are listed on the minor website each semester.)
2. Enroll in at least one course at the 600/700-level.
3. Understand that no more than 8 credits used to satisfy the requirements for a major may be used for a minor.
4. Earn a C- or better in each course and maintain a 2.0 grade-point average in courses taken for the minor.

</tbody>
</table>
Additional Information

Courses taken pass/fail may not be used toward a minor. A relevant internship may be substituted for one of the electives.

After completing the 20-credit sequence, the student submits the Certification of Completion of Minor form, available online or from the RES coordinator. Once this certification is approved by the RES coordinator and major adviser, the form goes to the college dean and the registrar to be recorded on the transcript. The certification form must be completed by the beginning of the student's final semester at the University.

Religious Studies

- Religious Studies Minor (p. 289)

Religious Studies Minor

https://cola.unh.edu/interdisciplinary-studies/program/minor/religious-studies

Description

The religious studies program at the University of New Hampshire currently offers an interdisciplinary minor, bringing together courses in several fields that address religion as a cross-cultural and experiential phenomenon. Topics include beliefs, rituals, texts and the meaning of life as explored in a variety of religious traditions. A religious studies major is available through the self-designed major program. For more information, consult the coordinator.

</table>

Students especially interested in religious studies are encouraged to combine the minor with further pertinent coursework in one of the established departments contributing to the program: classics, humanities and Italian studies; history; philosophy; anthropology and English. The religious studies self-designed major includes the minor requirements of HUMA 505/RS 505 Introduction to Religion and HIST 483 as well as eight other relevant courses, which can include independent studies. The program coordinator can aid in advising such a major program.

Courses ordinarily have some degree of focus on issues related to the academic study of religion, conceptualizing religion, or religious influences as a principal concern, asking comparative questions, and/or developing models of cross-cultural usefulness.

Interested students also should be alert for special topics courses in history (e.g. HIST 600 Explorations), English, anthropology (e.g. ANTH 500 Peoples and Cultures of the World), humanities, classics and other disciplines that might be relevant to the study of religion.

Students interested in the religious studies minor should see the coordinator to fill out an intent-to-minor form by the beginning of their junior year.

Russian (RUSS)

The Russian program provides students with an opportunity to study one of the world's most important languages, its literature and its culture. In addition to the intrinsic value of Russian language, literature and culture as a liberal arts experience, the Russian major leads to a number of careers, such as teaching, translation and interpreting, government and the Foreign Service. It is also a valuable asset in preparing for careers in law, economics and international trade, and it can serve as a double major with business administration, international affairs, homeland security, the natural and physical sciences, and other liberal arts fields such as English, history, political science, sociology, philosophy, theatre, communication, linguistics and other foreign languages.

Russian Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/russian-major

Description

The Russian program provides students with an opportunity to study one of the world's most important languages, its literature and its culture. In addition to the intrinsic value of Russian language, literature and culture as a liberal arts experience, majoring in Russian leads to a number of careers, such as teaching, translation and interpreting, government and the Foreign Service. It is also a valuable asset in preparing for careers in law, economics and international trade. All Russian majors are strongly encouraged to double major or include a relevant minor in their studies.

If you would like more information please contact LLC.Dept@unh.edu.
Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

New students will be assigned to the proper language level course after consultation with the Russian faculty.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Russian majors may use two major-required courses to satisfy two Discovery category requirements. In addition, Russian majors may take RUSS 521W Devils, Deities, and Madness in Russian Literature to satisfy both a Discovery Inquiry requirement and a major requirement.

Transfer students must earn a minimum of 12 major credits at the Durham campus.

All students must complete at least 10 classes (40 credits). The required minimum overall GPA in major coursework is 2.0. Specific course requirements are:

**Language Courses**

1. Students entering major at a higher language level will replace the language courses with additional electives.

2. Select a minimum of three courses from the following Culture, Linguistics, and Literature category.

3. More electives required if fewer language credits were completed due to proficiency level and placement.

Study abroad is a requirement for the Russian major, although an approved equivalent high-impact experience may be substituted for study abroad with a compelling justification.

While the major may start counting as early as the Elementary I level (RUSS 401), those who enter the major at a higher level (RUSS 503, RUSS 504, RUSS 631, or RUSS 632) will replace the courses they skip from the elementary, intermediate and advanced language category with additional courses from the electives category.

More electives required if fewer language credits were completed due to proficiency level and placement.

Students are encouraged to take as many of the culture, linguistics, and literature elective in the Russian language as possible, but there is no limit on the number of classes conducted in English from the electives category. Students taking no classes in the target language in a given semester will be strongly encouraged to enroll in one credit of conversation hour to maintain their language skills, and many of the courses taught in English will allow students the option to (or even require students to) do some work in the target language.

Or approved equivalent 700-level course taken at UNH, approved study abroad equivalent, or approved high-impact experience (such as internship with a robust target language/culture component).

Student Learning Outcomes

- Upon completion of a Russian major, students are able to express themselves orally and in writing on a variety of topics with accuracy, and they are able to support their opinions with evidence found in the media and scholarly reading. Students are able to articulate their ideas and defend their opinions.
- Throughout the language sequence students are expected to give oral presentations on a variety of topics, related to their interest, second major or minor.
- Students have spent at least 8 weeks-semester/year in Russia on a study abroad program, which strengthens their language skills, improves their proficiency, both in language and culturally, and which allows them to interact with native speakers. The major includes at least two courses on Russian literature (one in English and one in Russian), and students are familiar with the works of major Russian authors (i.e. Pushkin, Lermontov, Turgenev, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, Zoshchenko, Bulgakov, among others.) Students are able to understand the texts in the historical and literary movements of Russia, as well as analyze the works in and of themselves. Students study the cultural history of Russia/Soviet Union/Russia to understand the Russian perspective of itself and the world.

Russian Minor

https://cola.unh.edu/languages-literatures-cultures/program/minor/russian

Description

The Russian program provides students the opportunity to minor in Russian. Students develop language proficiency, a solid knowledge of grammar and pronunciation, and knowledge of Russian culture. Students with a Russian minor will have a sufficient command of the language to enhance their chosen field of study, and will have countless career opportunities.

**Study Abroad**

- LLC 740 Film History
- LLC 592 Comparative Literature: Masterpieces of World Literature II
- LLC 995 Language Practicum
- LLC 791 Methods of Foreign Language Teaching
- LLC 790 World Languages Capstone

**Capstone**

**Study Abroad**

1. While the major may start counting as early as the Elementary I level (RUSS 401), those who enter the major at a higher level (RUSS 503, RUSS 504, RUSS 631, or RUSS 632) will replace the courses they skip from the elementary, intermediate and advanced language category with additional courses from the electives category.

2. More electives required if fewer language credits were completed due to proficiency level and placement.

3. Or approved equivalent 700-level course taken at UNH, approved study abroad equivalent, or approved high-impact experience (such as internship with a robust target language/culture component).
opportunities, such as the public, private and nonprofit sectors, including government, education, journalism, law, communications, and business.

Students in the Russian minor program at UNH are strongly encouraged to study on the UNH Study Abroad Program in Russia. Students can earn credits toward the Russian minor as well as complete two Discovery categories on the program. Foreign language skills and cultural competencies will open doors for students that would not have been opened without the minor in Russian.

Requirements

The minor in Russian consists of 20 credits in Russian courses above RUSS 402 Elementary Russian II; it must include:

- RUSS 503 Intermediate Russian I
- RUSS 504 and Intermediate Russian II
- Select at least one of the following: 4
  - RUSS 631 Advanced Russian Conversation and Composition
  - RUSS 632 Advanced Russian Conversation and Composition
  - RUSS 661W Readings in Russian Literature
  - RUSS 790W Advanced Language and Style
- Select two elective RUSS courses above RUSS 402 8

Total Credits 20

Students wishing to minor are expected to meet with a faculty member from the Russian program to discuss their course of study.

At the beginning of your final semester of study, you should fill out a certification of completion of minor form, obtain the necessary signatures, and submit it to your Dean’s Office.

Sociology (SOC)

Sociology is the study of social life, social change, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations and societies, and how people interact within these contexts.

Since human behavior is shaped by social factors, the subject matter of sociology ranges from the intimate family to the hostile mob; from organized crime to religious cults; from the divisions of race, gender and social class to the shared beliefs of a common culture.

Sociology Major (B.A.)

https://cola.unh.edu/sociology/program/ba/sociology

Description

Majoring in sociology provides a solid, multifaceted foundation in the liberal arts, including analytical thinking and writing, and skills in collecting and analyzing data. Students learn diverse theoretical approaches to the social world and acquire tools for conducting and understanding social science research. The wide range of substantive areas taught in the UNH Department of Sociology include courses concentrating on family and work; environmental sociology; social policy; inequalities of race, class and gender; criminology, social control and deviant behavior; medical sociology and mental health; and religion.

Undergraduate training in sociology is an excellent background for a variety of careers, including the business world, where majors might work in marketing and sales or human resources; government and nonprofit services, where majors might work in education, health services, social welfare or criminal justice; and research. An undergraduate degree in sociology is also excellent preparation for graduate work in law, social work, criminal justice, counseling, public administration, public health, business administration, urban planning or further studies in sociology.

Conjoint minors (allowing double-counting of one or two courses) are available for justice studies; gerontology; American studies; race and ethnic studies; women’s and gender studies; and other approved minors. Students also have the opportunity to pursue a second major, including justice studies. Students interested in social work or teaching can develop programs in conjunction with the appropriate departments. The departmental honors program is recommended for students with cumulative grade-point averages over 3.4, and especially for those anticipating graduate study.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Majors must complete a minimum of 40 semester credits in sociology courses with grades of C- or better in each course as well as maintain an overall GPA of 2.0 or better in all sociology courses.

Sociology Language Requirement
The bachelor of arts degree at the University of New Hampshire requires that students satisfy the foreign language proficiency requirement. The requirement may be met by demonstrating language proficiency equal to a one-year college-level course (401 and 402, 403 and 503, 501 [Latin only], or 503 and above in a spoken language). American Sign Language courses meet the foreign language proficiency requirement for sociology majors when ASL I and ASL II have been completed.

Student Learning Outcomes

• Outcome 1: Students will learn to articulate and evaluate how individual biographies are shaped by social structures, social institutions, cultural norms, and multiple dimensions of social stratification and inequality. (Sociological imagination)

• Outcome 2: Students will learn to analyze and evaluate multiple and competing arguments about high-profile social, political, and cultural current events; distinguish between evidence and opinions; and use reason and data to advance an argument. (Critical thinking)

• Outcome 3: Students will learn to use, evaluate, and apply classical and contemporary theoretical perspectives to historical and contemporary events. (Sociological theory)

• Outcome 4: Students will learn how to generate and interpret qualitative and quantitative data in a value-neutral way. (Data analysis)

• Outcome 5: Students will learn how to interpret and evaluate several of the major social science research methodologies, as well as the relationship between research questions and appropriate methods. (Research methods)

• Outcome 6: Students will learn to effectively communicate a sociological perspective both in writing and verbally. (Communication skills)

• Outcome 7: Students will learn to understand how people of different cultural, racial, ethnic, sex, gender, religious, and political identities interpret the world around them. (Diversity, Equity, and Inclusion)

• Outcome 8: Students will learn to work effectively and respectfully with people of different backgrounds, experiences, and perspectives. (Collaboration)

Sociology Minor

SOC 599 Sociological Analysis must be completed no later than the junior year and is a prerequisite for majors taking 600- and 700-level courses. SOC 402 Statistics is a prerequisite for SOC 601 Methods of Social Research. Complete SOC 611 Sociological Theory during senior year.

SOC 595 Independent Reading and Research can be used to fulfill one lower-level elective or SOC 799 Senior Thesis can be used to fulfill one upper-level elective. Sociology majors may use two major-required courses to satisfy two Discovery category requirements. In addition, SOC 599 Sociological Analysis can be used to satisfy both a major requirement and the Inquiry Discovery requirement. (Statistics courses taken in other disciplines are not acceptable as a substitute for SOC 402 Statistics.)

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. B.A. candidates must also satisfy the foreign language proficiency requirement.

Students interested in majoring in sociology should consult with the director of undergraduate program in the sociology department for guidance. It is the responsibility of all sociology majors to obtain the latest information from the department office.
administration, public health, business administration, urban planning and other fields.

Requirements

A minor consists of any five 4-credit courses in sociology with a C- or better in each course and a grade-point average of 2.0 or better in these courses.

Medical Sociology Cognate

https://cola.unh.edu/sociology/program/cognate/medical-sociology

Description

The medical sociology cognate provides students with an understanding of how social structure shapes the etiology of health and illness as well as the availability, effectiveness and choices around health care on micro and macro levels. It develops students’ sociological imagination, fosters their application of a sociological perspective to the study of health, and allows them to gain the skills needed to be informed consumers of empirical health research. The focus on empirical literacy that is central to courses in sociology facilitates students’ ability to communicate and apply research findings in their respective professional fields.

Although the sociological perspective will benefit students from all backgrounds, a cognate in medical sociology may be especially relevant for students majoring in biomedical science, neuroscience and behavior, psychology, gerontology, health and physical education, nursing, health policy and administration, business, human development and others.

Spanish (SPAN)

The Spanish program major and minor in the Department of Languages, Literatures and Cultures helps students develop Spanish language proficiency and enhanced knowledge of the cultural and literary achievements of Hispanic societies around the globe. This dual emphasis on communication and cultural analysis prepares students to live in communities where Spanish is increasingly important professionally and personally.

Students also have the option to complete honors in the major providing they complete the necessary classes and a senior thesis in Spanish.

The UNH study abroad program in Granada, Spain, open to majors and nonmajors, offers students the opportunity to live and study abroad for a spring semester. A six-week summer immersion program in Costa Rica also is available to students. Financial aid is available for eligible students. Visit cola.unh.edu/granada, cola.unh.edu/costa-rica, or contact the departmental program directors for further information.

Accelerated B.A./M.A. Program

The dual-degree B.A./M.A. program in Spanish in the Department of Languages, Literatures and Cultures offers high-achieving students the opportunity to earn both an undergraduate and a graduate degree during their time at UNH. Qualified students may be accepted into the program late in the first semester of their junior year and begin to take graduate courses in the spring of their senior year. Students graduate with a B.A.
upon completion of 128 credits (including all University, College and Program requirements), and then complete graduate work (30 credits) the following year. After only five years of study, students earn both degrees.

Spanish Major (B.A.)

https://cola.unh.edu/languages-literatures-cultures/program/ba/spanish-major

Description

When you major in Spanish you are opening your opportunities to a variety of fields in which proficiency in the Spanish language and knowledge of Hispanic cultures are desirable or required. Such fields might include international relations, business administration, government, social service and communications. In addition, students can prepare to teach Spanish at the elementary and secondary level and in bilingual education programs through UNH’s MAT in Secondary Education with a certification in World Languages. The undergraduate major also provides a basis for graduate study in preparation for scholarly research and teaching at the college level. When combined with coursework or a dual major in other disciplines, the major prepares students for work in Spanish-speaking areas of the world as well as in bilingual regions of the United States.

Study Abroad

An approved foreign study experience in a Spanish-speaking country is required, although an approved equivalent high-impact experience may be substituted for study abroad with a compelling justification

1 Students entering major at a higher language level will replace the language courses with additional electives
2 More electives required if fewer language credits were completed due to proficiency level and placement.
3 Or approved equivalent 700-level course taken at UNH, approved study abroad equivalent, or approved high-impact experience (such as internship with a robust target language/culture component).

While the major may start counting as early as the Intermediate I level (SPAN 503), those who enter the major at a higher level (SPAN 504, SPAN 631, or SPAN 632) will replace the courses they skip from the four in the intermediate and advanced language category with additional electives in the Culture, Linguistics, and Literature category.

Please note that the required minimum overall GPA for study abroad and the Spanish major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Spanish majors may use two major-required courses to satisfy two Discovery category requirements.
**Student Learning Outcomes**

Linguistic proficiency Students can demonstrate an Advanced level of proficiency (as defined in ACTFL Proficiency Guidelines) in the target language in speaking, writing, listening and reading.

- Speaking: students are able to handle a variety of communicative tasks. They are able to participate in most informal and formal conversations on topics related to school, home, academic, and other activities. They can also speak about topics related to employment, current events, and matters of public and community interest.
- Writing: students are able to meet work and/or academic writing needs. They demonstrate the ability to narrate, describe and express viewpoints about topics in major time frames with control of aspect.
- Listening and Reading: students are able to understand conventional narrative and descriptive texts (spoken and/or written). They can understand the main facts, tone and style, and supporting details.
- Comprehension: students may often develop understanding primarily from their particular situational and subject-matter knowledge (course materials, contextual knowledges, and study abroad experiences), but each student should be able to extend and expand their comprehension to most areas of specialized and non-specialized materials, especially as that directly relates to any of the student's other major and minor academic subjects of study.

Intercultural and transcultural competence Students will demonstrate knowledge and understanding of other cultures, and are able to think critically about and are able to recognize and accept culturally differences, and the uniqueness of other cultures and peoples. By the time they graduate from our program, they will be able to:

- Recognize and describe the historical, social, economic, and political forces that shape society in the various target cultures that they have directly studied (taking into account that they cannot be familiar with all the particular specificities of the 23+ nations of the Spanish-Speaking world).
- Analyze and critique the cultural and social products of the target culture(s) (film, literature, art, popular culture, media, etc.) within their context, including conducting basic research projects.
- On a broader level, each student should be able to begin to question the validity of their own cultural beliefs, behaviors and norms, by contrasting and comparing them with those of the target culture (cross-cultural sensitivity and respect).
- Students should be able to perceive and value cultural diversity and reinterpret the place of the self as an individual culturally situated within the global context of the twenty-first century.

**Spanish Minor**

[https://cola.unh.edu/languages-literatures-cultures/program/minor/spanish](https://cola.unh.edu/languages-literatures-cultures/program/minor/spanish)

**Description**

When you minor in Spanish you are expanding upon opportunities and opening doors to careers in your field of interest. Many other disciplines such as social service, nursing, teaching and business require Spanish as a second language since Spanish is the second most spoken language in the United States. Increasingly, employers in government at municipal, state and federal levels and business as well as related careers, are viewing such experience and language skills favorably.

**Requirements**

At least three courses must be taken in residence at UNH. All coursework required for the Spanish minor must be completed with a grade of C or better and may not be taken pass/fail.

**Theatre and Dance (THDA)**

There is no area of human endeavor that theatre does not touch. To study theatre is to learn a great deal about yourself and about the world in which you will live. No course of study will prepare you better for life in a rapidly changing world.

The award-winning faculty at the University of New Hampshire provide theatre and dance majors with superlative training within a broad liberal arts context. Students may take courses in acting; voice and movement; dialects; directing; choreography; design and theatre technology; the history, theory and criticism of drama and theatre; youth drama; secondary theatre education; playwriting; storytelling; puppetry; ballet; theatre dance (jazz and tap); aerial dance; and musical theatre. Students interested in performance, technical and historical aspects are trained to step into professional careers while still broadening the scope of their preparation through a rich liberal arts education. The program encourages students to explore their interests through independent studies and internships, special projects and active personal involvement in lecture and laboratory classes, with the possibility for integration with other departments. To assist with financial needs, the department awards scholarships to selected majors each spring.

The Department of Theatre and Dance offers over 25 performance opportunities every year in either musicals, plays or dance concerts. In addition to performing, students are given the opportunity to direct, stage manage, design, choreograph or write scripts for the work done in our department. We offer jazz, tap and ballet studies. In addition, UNH was the first university to add Aerial Dance to course offerings. Students study with faculty who have worked locally, nationally and internationally.

In addition to comprehensive liberal arts preparation, six specific course sequences are available within the theatre major:

1. courses leading to a theatre major with an option in acting & directing;
2. courses leading to a theatre major with an option in dance: ballet, theatre dance (tap and jazz) and aerial dance. Students also have the option of pursuing dance education leading to K-12 dance teacher certification. You may achieve dance licensure in two different ways. You may pursue dance education/licensure through the undergraduate program. This leaves no room for double majors or minors. If you want to broaden your undergraduate education and need more space for classes outside of THDA, you may pursue the five-year program, beginning preparation for teaching at the undergraduate level and then pursuing a graduate degree to get dance certification. Students complete a baccalaureate degree in theatre with a dance option and move into a fifth year of study with a
full-year internship, leading to either the Masters in Education (M.Ed.) or a Master of Arts in Teaching (M.A.T.) degree and licensure for teaching;
3. courses leading to a theatre major with an option in design & theatre technology;
4. courses leading to a theatre major with an option in musical theatre;
5. courses leading to a theatre major that, if desired, may be combined with requirements of the Department of Education to pursue a K-12 teacher’s license. You may achieve theatre licensure in two different ways. You may pursue secondary theatre education/licensure through the undergraduate program. This leaves no room for double majors or minors. If you want to broaden your undergraduate education and need more space for classes outside of THDA, you may pursue the five-year program, beginning preparation for teaching at the undergraduate level and then pursuing a graduate degree to get theatre arts certification. Students complete a baccalaureate degree in theatre with a secondary theatre education option and move into a fifth year of study with a full-year internship, leading to either the Masters in Education (M.Ed.) or a Master of Arts in Teaching (M.A.T.) degree and licensure for teaching;
6. courses leading to a theatre major that, if desired, may be combined with requirements of the Department of Education, in conjunction with a fifth year master of education (M.Ed.) program, to prepare students for elementary school certification with an undergraduate option in youth drama.

Auditions are required for the acting, dance and musical theatre options. Interviews are strongly encouraged for all other areas. The audition session will last approximately three hours. In addition to the audition, students will take part in group acting exercises, do a dance call and have an opportunity to ask questions during a comprehensive department overview. Please note that entrance into Department of Theatre and Dance options is contingent upon acceptance into the University of New Hampshire. Prospective students who live more than 250 miles away may contact the department to discuss other audition options. Audition dates, as well as detailed entrance requirements, can be found at the Department of Theatre and Dance website.

Minoring in Theatre and Dance

A minor acknowledges a level of competence and academic focus without the depth a major requires. Students may pursue a minor while majoring in another subject when the demands of that major prevent the possibility of a double major.

**Faculty**

https://cola.unh.edu/theatre-dance/faculty-staff-directory

**Theatre Major (B.A.)**

https://cola.unh.edu/theatre-dance/program/ba/theatre-major

**Description**

The comprehensive theatre major provides a well-rounded course of study which encourages inquisitive students who have a wide range of theatre/dance interests to tailor a program that will challenge but also broaden their intellectual horizons. Its lower required credit load also makes it ideally suited to students who want to combine their theatre studies with another major, such as business administration, international studies or social work. Contact Szu-Feng Chen (szu-feng.chen@unh.edu), Paul Creative Arts Center, (603) 862-4445.

**Requirements**

**Degree Requirements**

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

In the freshman and sophomore years, students should enroll for at least two major and two Discovery courses per semester. The minimum grade requirement for major courses is C- per course. Any grade lower than C- will not count toward the major. Under department policy, students who complete both COMM 401 American Sign Language I and COMM 502 American Sign Language II satisfy the bachelor of arts language proficiency requirement. All majors must take courses in the following areas: performance, design/theatre technology and theory/history as well as fulfill between four and eight practicums and complete a capstone course. Although timing will vary with each option, it is strongly suggested that all introductory courses be taken prior to the end of the student’s sophomore year. Students must also complete a digital portfolio that demonstrates fulfillment of student learning outcomes related to their area of study.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each
individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Theatre department majors may use one major-required course to satisfy one Discovery category requirement.

All UNH B.A. degrees require a minimum of 128 credit hours.

### Core Student Learning Outcomes for the Bachelor of Arts in Theatre major

On completion of the B.A. in Theatre, students will:

- Recognize and distinguish between various styles and forms of theatre or dance that have shaped the evolution of these disciplines.
- Effectively communicate artistic ideas and/or critical analysis of theatre or dance works through appropriate oral, written or practical means.
- Demonstrate knowledge and fundamental skill level of the basic areas of theatre or dance production in areas related to performance, design, technology or management.
- Create and demonstrate informed and personal artistic choices in coursework and productions (i.e., design, dance, directing, acting).

### Description

Created for students with a passion for acting and/or directing, this option is designed to develop the actor and the director as an interpretive, creative and self-sufficient artist. Award-winning faculty working in the profession challenge students to strive for excellence in the art and craft of acting and directing through highly challenging coursework, performance projects and productions, as well as special workshops with acclaimed guest artists.

1 The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.

Student Learning Outcomes

Core Student Learning Outcomes for the Bachelor of Arts in Theatre major: On completion of the B.A. in Theatre, students will:

- Recognize and distinguish between various styles and forms of theatre or dance that have shaped the evolution of these disciplines.
- Effectively communicate artistic ideas and/or critical analysis of theatre or dance works through appropriate oral, written or practical means.
- Demonstrate knowledge and fundamental skill level of the basic areas of theatre or dance production in areas related to performance, design, technology or management.
- Create and demonstrate informed and personal artistic choices in coursework and productions (i.e., design, dance, directing, acting).

Additional Student Learning Outcomes for Option in Acting and Directing: In addition to the shared department learning outcomes for all THDA students, upon completion of the major with an Option in Acting and Directing, students will:

- Achieve at minimum an intermediate proficiency in fundamental skills related to theatrical performance.
- Utilize critical thinking and writing skills to analyze plays for both the performance of roles and the direction of productions in a range of styles and genres.
- Effectively communicate and collaborate with all participants in the interactive and creative process of theatre.
- Form, communicate and defend verbally and in writing value judgments about quality and aesthetics of performance and directing in works of theatre.
- Demonstrate knowledge of basic terminology of acting and directing as well as leading practitioners and theorists of the acting and directing process.

Theatre Major: Dance Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-dance-option

Description

The dance option offers a diverse program that is designed to give the dance teacher, choreographer and/or performer the skills needed to embark on a successful career. Technique courses in ballet, pointe, tap, jazz and the aerial arts are at the core of this program. Courses in history of dance, composition, choreography and dance pedagogy aid dancers in preparing for a variety of employment opportunities in the dance field. In addition, dancers are introduced to the technical aspects involved in staging a full-scale performance. Performance opportunities include yearly faculty-directed dance concerts and student-created dance showcases each semester. Dancers may focus on one or all dance forms.

If you are interested in teaching grades K-12, you could pursue dance education, either through NH Dance K-12 teacher undergraduate certification, or you could pursue a fifth-year master’s in teaching program through the UNH Education Department. A Master’s degree can raise your salary significantly when entering the workforce.

Students who show mastery of aerial dance performance have the unique opportunity to receive Aerial Dance Teacher Training. Students may leave UNH with a certificate verifying they have completed a 75 hour training program focused on the fundamental skills needed to safely teach Aerial Dance.

**State K-12 Teacher Certification**

Certification in dance is part of the pre-service programs in teacher education, which seek to prepare teachers who demonstrate excellence in classroom practice and who will become educational leaders. You may achieve dance licensure in two different ways. You may pursue dance education/licensure through the undergraduate program. This leaves no room for double majors or minors. If you want to broaden your undergraduate education and need more space for classes outside of THDA, you may pursue the five-year program, beginning preparation for teaching at the undergraduate level and then pursuing a graduate degree to get dance certification. Students complete a baccalaureate degree in theatre with a dance option and move into a fifth year of study with a full-year internship, leading to either the Masters in Education (M.Ed.) or a Master of Arts in Teaching (M.A.T) degree and licensure for teaching. With a GPA of 3.2 or better, you may be eligible for early admission to the graduate program, allowing up to twelve credits to dual count for both undergraduate and graduate degrees. Successful completion of the Praxis Core test is required for UNH graduate school admission. To complete the work in five years, students must plan for dual admission to graduate school and also take multiple education courses during the undergraduate years.

The kindergarten through 12th grade certification in the dance education program provides the foundation for public school teaching certification. This program integrates a general education background with dance training in a variety of dance styles, dance history, choreography and dance pedagogy for the purpose of understanding content, process, and methodologies of dance as an art form. All five-year candidates must meet requirements for admission to graduate school. All K-12 education in dance students must receive a “C-“ grade or better in all theatre and dance courses required in the program and a “B-“ or better in the graduate level courses. New Hampshire also participates in a reciprocal agreement with many other states, the Interstate Certification Compact. For further clarification regarding undergraduate or graduate teacher certification options, contact Assaf Benchetrit, Paul Creative Arts Center, (603) 862-4485, assaf.benchetrit@unh.edu.

**4-Year Teacher Licensure B.A. Program**

The 4-year teacher licensure B.A. program includes the same requirements as the B.A. dance option but with the following modifications.

- The THDA 551: Acting I requirement is waived.
- The THDA 798/799 requirement is replaced with EDUC 694 Courses in Supervised Teaching.
The Performance requirement is reduced from 16 credits to 12 credits.

1 Must be taken before the teaching internship.
2 May be taken at the undergraduate level or the graduate level.

Core Student Learning Outcomes for the Bachelor of Arts in Theatre major:

- Recognize and distinguish between various styles and forms of theatre or dance that have shaped the evolution of these disciplines.
- Effectively communicate artistic ideas and/or critical analysis of theatre or dance works through appropriate oral, written or practical means.
- Demonstrate knowledge and fundamental skill level of the basic areas of theatre or dance production in areas related to performance, design, technology or management.
- Create and demonstrate informed and personal artistic choices in coursework and productions (i.e., design, dance, directing, acting).

Additional Student Learning Outcomes for Option in Dance:

- Develop an awareness of proper dance technique, physical expression and kinesthetic exploration.
- Apply choreographic phrases and compositional skills through performance.
- Demonstrate a foundation in dance pedagogy.
- Demonstrate a reflective and critical awareness of dance history.
- Effectively apply dance principles to critical writing via journals, performance critiques, and research assignments.

**Theatre Major: Design & Theatre Technology Option (B.A.)**

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-design-theatre-technology-option

**Description**

Design and theatre technology students who show significant progress and ability may earn the opportunity to demonstrate practical application of their studies through the department’s main stage production design assignments. Through classwork, production assignments and problem-solving, this option prepares students for both practical skills and aesthetic sensibilities needed for the creation of visual and technical elements for the performing arts. The challenging coursework provides both fundamental knowledge and critical thinking practice, which are skills that help students pursue a successful profession in theatre and related fields; the core principles of hard work, problem-solving and creativity are transferable to other career paths as well. UNH-trained graduates hold careers across the nation as designers, technical directors, stage managers, property masters, head electricians and scenic artists.

Student Learning Outcomes

Core Student Learning Outcomes for the Bachelor of Arts in Theatre major: On completion of the B.A. in Theatre, students will:

- Recognize and distinguish between various styles and forms of theatre or dance that have shaped the evolution of these disciplines.
- Effectively communicate artistic ideas and/or critical analysis of theatre or dance works through appropriate oral, written or practical means.
- Demonstrate knowledge and fundamental skill level of the basic areas of theatre or dance production in areas related to performance, design, technology or management.
- Create and demonstrate informed and personal artistic choices in coursework and productions (i.e., design, dance, directing, acting).

Additional Student Learning Outcomes for Option in Design and Theatre Technology: In addition to the shared department learning outcomes for all THDA students, upon completion of the major with an Option in Design and Theatre Technology, students will:

- Exhibit an understanding of the general principles and practices for the design/tech area.
- Apply knowledge of design/tech skills and technologies to the production of theatrical creations.
- Demonstrate skills in script analysis, research, and critical thinking for design development.
- Demonstrate development of a creative process as well as practical problem-solving skills for artistic work.
- Effectively use communication and collaboration skills in writing, speaking, and visual presentation.
- Utilize critical assessment skills to evaluate the work of other students and to show improvement on their own work as a result of the collective feedback process.
- Develop a resume, portfolio, and interview skills that reflect professional standards.

Theatre Major: Musical Theatre Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-musical-theatre-option

Description

The musical theatre option is designed to cultivate and nurture the creative artistry of those highly motivated students who wish to develop their combined talent as singers, actors and dancers. Students in the musical theatre option are trained as actors who sing and dance and will thrive in this intense and dynamic program of coursework, practical application, performance-based projects, departmental productions, and special workshops with guest artists and instructors. Students will be expected to fully integrate their rigorous training as actors, dancers and singers with the outstanding liberal arts education they will receive at UNH to become well-rounded and marketable musical theatre artists.

The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.

Student Learning Outcomes

Core Student Learning Outcomes for the Bachelor of Arts in Theatre major: On completion of the B.A. in Theatre, students will:

- Recognize and distinguish between various styles and forms of theatre or dance that have shaped the evolution of these disciplines.
- Effectively communicate artistic ideas and/or critical analysis of theatre or dance works through appropriate oral, written or practical means.
- Demonstrate knowledge and fundamental skill level of the basic areas of theatre or dance production in areas related to performance, design, technology or management.
- Create and demonstrate informed and personal artistic choices in coursework and productions (i.e., design, dance, directing, acting).

Additional Student Learning Outcomes for Option in Musical Theatre: In addition to the shared department learning outcomes for all THDA students, upon completion of the major with an Option in Musical Theatre, students will:

- Utilize a healthy vocal technique and demonstrate the ability to read music.
- Effectively analyze a dramatic script.
- Apply knowledge of theatre to write critically about both musical and non-musical theatre.
- Demonstrate the ability to perform dance choreography.
- Apply acting techniques both in writing and in practice.
- Utilize knowledge of musical theatre history and styles to select appropriate repertoire for class and auditions.
- Demonstrate the skills and create the elements necessary to compete in the professional theatrical world, including a professional resume and audition book.

Theatre Major: Secondary Theatre Education Option (B.A.)

https://cola.unh.edu/theatre-dance/program/ba/theatre-major-secondary-theatre-education-option
Candidates interested in passing on their love of theatre to future generations will find that the secondary theatre education option offers practical and theoretical training for teachers. As one of a few programs in the country, UNH’s Secondary Theatre Education option boasts a robust offering with six courses specifically focused on how to teach theatre. Through comprehensive course and laboratory work, students obtain hands-on theatre teaching experience, so that by the time they reach graduation, they have spent significant hours working with the K-12 age group. Students are provided with extensive training and practical teaching experience specifically geared towards the goal of being a theatre teacher, either in a traditional classroom or as a teaching artist. As you complete your studies, you will have the option to enter theatre education directly as a teaching artist at professional theatres, you could plan from your first year to pursue NH Theatre Arts K-12 teacher undergraduate certification, or you could pursue a fifth-year master’s in teaching program through the UNH Education Department. A master’s degree can raise your salary significantly when entering the workforce. Whether pursuing the fifth year graduate certification program or entering the professional theatre education world directly after the undergraduate degree, students can expect to leave UNH prepared for the rigorous task of teaching.

Contact Raina Ames (raina.ames@unh.edu), Paul Creative Arts Center, (603) 862-3044.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

#### Major Requirements

In the freshman and sophomore years, students should enroll for at least two major and two Discovery courses per semester. The minimum grade requirement for major courses is C- per course. Any grade lower than C- will not count toward the major. Under department policy, students who complete both COMM 401 American Sign Language I and COMM 502 American Sign Language II satisfy the bachelor of arts language proficiency requirement. All majors must take courses in the following areas: performance, design/theatre technology and theory/history as well as fulfill between four and eight practicums and complete a capstone course. Although timing will vary with each option, it is strongly suggested that all introductory courses be taken prior to the end of the student’s sophomore year. Students must also complete a digital portfolio that demonstrates fulfillment of student learning outcomes related to their area of study.

The required minimum overall GPA in major coursework is 2.0.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement.

Theatre department majors may use one major-required course to satisfy one Discovery category requirement.

All UNH B.A. degrees require a minimum of 128 credit hours.

Total Credits: 61

---

1. Students are required to take at least one practicum for every semester they are a major in the Department of Theatre and Dance. In addition, each student must take each type of practicum at least once (Technical, Costume, Performance, Marketing and Promotion).

2. May be taken at the undergraduate level or the graduate level.

NOTE: It is understood that students will fulfill 20 internship contact hours with theatre students in their option area: elementary, middle, or high school. Projects for THDA 729 Community Oriented Drama Programs cannot count as internship hours. Students may fulfill this requirement through a variety of teaching opportunities with the department’s outreach program (both during the school year and in the summer), or they may work with local schools teaching, coaching actors, assistant directing, choreographing, or in some other capacity as specifically arranged with their theatre adviser.

It also is understood that students involved in the above course curriculum in order to get state theatre arts certification must apply to either the UNH Department of Education or another university for acceptance into a fifth-year master of arts in teaching (M.A.T.) or master of education (M.Ed.) degree program that fulfills state requirements for certification.

### State K-12 Teacher Certification

In order to obtain state theatre arts certification, students must either know from their first year that they are pursuing undergraduate Theatre Arts teacher certification or they must apply to the UNH Department of Education or another university for acceptance into a fifth-year master
of arts in teaching (M.A.T.) or masters of education (M.Ed.) degree program, which fulfills state requirements for certification. Students who are accepted into early graduate admission may take up to 12 credits toward the 32 credit masters while finishing their undergraduate degree. For further clarification regarding both undergraduate and graduate certification options, contact Raina Ames, Paul Creative Arts Center, (603) 862-3044, raina.ames@unh.edu.

4-Year Teacher Licensure B.A. Program
The 4-year teacher licensure B.A. program includes the same requirements as the B.A. secondary theatre education option but with the following modifications:

• The THDA 798/799 requirement is replaced with EDUC 694 Courses in Supervised Teaching
• The following requirements are added.

5-Year Teacher Licensure M.A.T. or M.Ed. Program
The 5-year teacher licensure M.A.T. or M.Ed. Program includes the same requirements as the B.A. secondary theatre education option but with the following modifications:

• The following requirements are added.

Student Learning Outcomes
Core Student Learning Outcomes for the Bachelor of Arts in Theatre major: On completion of the B.A. in Theatre, students will:

• Recognize and distinguish between various styles and forms of theatre or dance that have shaped the evolution of these disciplines.
• Effectively communicate artistic ideas and/or critical analysis of theatre or dance works through appropriate oral, written or practical means.
• Demonstrate knowledge and fundamental skill level of the basic areas of theatre or dance production in areas related to performance, design, technology or management.
• Create and demonstrate informed and personal artistic choices in coursework and productions (i.e., design, dance, directing, acting).

Additional Student Learning Outcomes for Option in Secondary Theatre Education: In addition to the shared department learning outcomes for all THDA students, upon completion of the major with an Option in Secondary Theatre Education, students will:

• Develop and compile effective lesson plans and teaching materials appropriate to student developmental levels and individual learning styles.
• Define a personal teaching philosophy.
• Demonstrate effective teaching strategies.
• Evaluate teaching abilities through analysis and reflection.
• Develop directing and production skills.
• Match to teaching materials the appropriate national educational standards for arts and non-arts subjects.

Theatre Major: Youth Drama Option
(B.A.)
https://cola.unh.edu/theatre-dance/program/ba/theatre-major-youth-drama-option

Description
Anyone interested in teaching elementary-aged students would benefit from the youth drama option. Consider pairing this with family studies or early childhood education. Youth drama is for those students who wish to use dramatic arts as a teaching tool, either in the elementary classroom or as a teaching artist. Our comprehensive curriculum is specifically designed to train teachers to use storytelling and creative drama to enrich the classroom. Work with our master puppeteer to take Introduction to Puppetry as well as Advanced Puppetry. Through comprehensive class and laboratory work, students obtain hands-on theatrical teaching experience so that, by the time they reach graduation, they have spent significant hours teaching children. This program will give you hands-on teaching experience and the option to pursue a five-year master’s degree in elementary teaching through the UNH Education Department. Whether pursuing the fifth year graduate certification program or entering the professional theatre education world directly after the undergraduate degree, students will leave UNH with sound theoretical training in addition to practical instruction on how to use drama to enhance learning outcomes, address classroom discipline issues and, of course, bring the arts to life in the classroom.

Contact Raina Ames (raina.ames@unh.edu), Paul Creative Arts Center, (603) 862-3044.

1 The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.

2 Must be taken before student teaching internship.

State Teacher Certification

Youth Drama options often pursue elementary education certification. In order to obtain state licensure, students must apply to either the UNH Department of Education or another university for acceptance into a fifth year masters of education (M.Ed.) degree program, which fulfills state requirements for certification. Students who are accepted into early graduate admission may take up to 12 credits toward the masters degree while finishing their undergraduate degree. For further clarification regarding fifth-year certification options, contact Raina Ames, Paul Creative Arts Center, (603) 862-3044, raina.ames@unh.edu.

5-Year Teacher Licensure M.Ed. Program

The 5-year teacher licensure M.Ed. program includes the same requirements as the B.A. youth drama option but with the following modifications.

• Evaluate teaching abilities through analysis and reflection.
• Demonstrate technical skills in storytelling and puppetry performance techniques.
• Match to teaching materials the appropriate national educational standards for arts and non-arts subjects.

**Arts Administration Minor**

https://cola.unh.edu/theatre-dance/program/minor/arts-administration

**Description**

The minor in arts administration is designed to give students in the fine and performing arts a base knowledge and skill set that can be applied to a wide range of job opportunities related to arts management, administration and entrepreneurship in the creative economy. It has also been created for students enrolled in the Peter T. Paul School of Business, as well as majors in other disciplines, to expand their knowledge base in the fine and performing arts area of their greatest interest. These courses are combined with specific classes in arts administration to prepare students for opportunities within the nonprofit and for-profit arts sectors. Students who major in theatre or one of its theatre options may minor in arts administration provided no more than 8 credits are used to satisfy both major and minor requirements.

Contact Michael Wood (mike.wood@unh.edu), (603) 862-3038.

2 This course can be taken by students pursuing majors in the fine and performing arts division of COLA. This course cannot also be used toward completion of the Theatre & Dance major. Course must be specifically focused on Arts Administration.

**Dance Minor**

https://cola.unh.edu/theatre-dance/program/minor/dance

**Description**

Students minoring in dance keep open the option of pursuing a career in dance by cultivating and maintaining a high level of dance skill while still having the opportunity to major in another area of interest outside the Department of Theatre and Dance. Minors are encouraged to audition for all performance opportunities including faculty-directed dance concerts as well as student-created dance showcases.

Contact Michael Wood, (603) 862-3038, mike.wood@unh.edu.

**Requirements**

Students who major in theatre or one of its theatre options may minor in dance provided no more than 8 credits are used to satisfy both major and minor requirements.

Studies in Fashion and Design Cognate

https://cola.unh.edu/theatre-dance/program/cognate/studies-fashion-design

Description

The studies in fashion and design cognate offers students a foundation for developing the basic skills to enter the field of fashion design. It introduces the art behind the creation of apparel and the basics of marketing strategy connected to fashion design. Students will be educated to develop their own creative process and design method while learning the basic knowledge of marketing and personal business. The cognate prepares students with a means to combine their artistic vision with practical application and helps them become designers who have the skills to support their own artistry.

Students complete coursework selected from three groups:

1. Design Creation: Helps students to adapt their artistic skills to support conceptual ideas. It gives students the abilities in creating, analyzing, constructing and presenting works for costume creation. It aims to guide students in developing their own working process with a critical approach to problem solving. Students will be able to use terminology to communicate ideas in the fashion design industry.

2. Design Skills: Gives students the options to understand and apply a skill class of their choice to help students articulate their design ideas visually and digitally. It aims to offer students with the options to create visual merchandising for their design works through rendering hand skills, graphic design software, or photography.

3. Marketing: Helps students to understand and incorporate the business aspect into their creative works. It aims to prepare students to promote and sustain their creative works independently as a personal business or within retail organizations.

Requirements

Student must complete three courses (12 credits), one course in each group listed below.

Youth Drama Minor

https://cola.unh.edu/theatre-dance/program/minor/youth-drama

Description

Anyone with an interest in theatre for young audiences, either in acting or as a way to augment teaching strategies, will benefit from this minor, which utilizes activated and arts-infused methodology to enliven work with K-12 students. The youth drama minor is ideal for those who wish to explore the dramatic arts through an educational lens.

Contact Michael Wood, (603) 862-3038, mike.wood@unh.edu.
Studies in the Design of Interior Space Cognate

https://cola.unh.edu/theatre-dance/program/cognate/studies-design-interior-space

Description

The cognate provides students a pathway to enter the world of interior design. It aims to give students an overview of design creation and execution for space planning. From concept development to project execution, the cognate allows students to formulate design projects that are both practical and aesthetically pleasing. Students will develop a comprehensive creative process through research, problem solving and project development. The cognate prepares students to apply critical thinking to the creation of interior environments utilizing a human-centered approach.

Students complete coursework selected from three groups:

1. Design Development: Helps students obtain the skills in design creation. Students will learn about concept development, research analysis, and psychological and physiological characteristics in space planning. It provides the students the ability to utilize knowledge in design elements and principles in 3D design creation and integrate this knowledge into design concepts as solutions for design projects.

2. Historical Aspect: Gives students an overview of architectural history. It will help students to identify the historical, political, social and economic elements that have influenced the evolution in interior architecture and decorative arts. Students will be able to apply the skill in research and their knowledge of historic design styles in their design creations.

3. Design Skills: Helps students to understand and apply skills related to design execution. It provides students with the option to gain craftsmanship in sketching, rendering, scaled design drawings, CAD (computer-aided drafting), graphic solutions or standards.

Requirements

Student must complete three courses (12 credits), one course in each group listed below.

Women's and Gender Studies (WS)

Women's and gender studies provides students with an understanding of the status of women in various cultures and historical eras, in the nexus of race, class, sexuality, religious and disability studies. Students learn the use of gender as a category of analysis and increase their knowledge of women's contributions to many fields. Women's and gender studies courses offer students critical perspectives on such basic questions of the social order as assumptions about gender roles and gender identity.

As a relatively small department in the College of Liberal Arts, we provide students with a sense of community and opportunities to contribute directly to changing the campus climate. In a rigorous academic environment, women's and gender studies offers students a springboard for activism. Our internship program enables students to gain first-hand work experience across many fields.

A major or minor in women's and gender studies or social justice leadership prepares students for careers where the changing roles of women are having a perceptible impact. Women's studies graduates go on to law school and graduate school in a variety of disciplines. Some have taken positions with social change or family service agencies, while others have found work in such fields as health care, journalism, education, human rights, social and environmental justice, and the arts.

Women's and Gender Studies Major (B.A.)

https://cola.unh.edu/womens-gender-studies/program/ba/womens-gender-studies-major

Description

Women's and gender studies provides students with an understanding of the status of women in various cultures and historical eras, in the nexus of race, class, sexuality, religious and disability studies. Students learn the use of gender as a category of analysis and increase their knowledge of women's contributions to many fields. Women's and gender studies courses offer students critical perspectives on such basic questions of the social order as assumptions about gender roles and gender identity.

As a relatively small department in the College of Liberal Arts, we provide students with a sense of community and opportunities to contribute directly to changing the campus climate. In a rigorous academic
environment, women's and gender studies offers students a springboard for activism. Our internship program enables students to gain first-hand work experience across many fields.

A major in women's and gender studies prepares students for careers where the changing roles of women are having a perceptible impact. Women's and gender studies graduates go on to law school and graduate school in a variety of disciplines. Some have taken positions with social change or family service agencies, while others have found work in such fields as health care, journalism, education, human rights, social and environmental justice, and the arts.

Students who wish to major in women's and gender studies should consult with the department chair or coordinator.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

The women's and gender studies major requires students to complete 40 credits of major-approved coursework with grades of C- or better and an overall grade point average in major courses of 2.00 or higher.

505 Surveys

WS 505 Survey in Women's Studies

Examples of course topics include:

- Sustainability & Spirituality
- Leadership for Social Change
- Fashion This!
- Intro to LGBTQ+ Studies
- Exploring Masculinities
- Queer Cinema
- Reproductive Justice
- Disability Justice

WS 510 Framing Feminism: Gender Politics in Film

798 Colloquiums

WS 798 Colloquium

Examples of course topics include:

- Feminist Studies in Film and Queer Cinema
- Jewish Feminism, Politics, and Culture
- Global Feminist Issues
- Transgender Feminism
- Theater as a Provocative Act
- #Metoo Movement
- Native and Indigenous Women
- Queer Sustainability
- Queer Theory

For a list of currently-approved cross-counted offerings from other departments, please check: cola.unh.edu/womens-gender-studies/cross-counted-courses-ws-schedule.

A practicum, internship course, and/or research with faculty is strongly recommended.

Women's and gender studies majors may use two major-required courses to satisfy two Discovery category requirements. First and second majors may double count no more than two courses between the WS major and another major or minor.

Candidates for a degree must satisfy all of the University Discovery Program requirements in addition to satisfying the requirements of each individual major program. Bachelor of arts candidates must also satisfy the foreign language proficiency requirement. ASL: COMM 401 American Sign Language I and COMM 502 American Sign Language II may be used to satisfy the language competency requirement.

Student Learning Outcomes

- Demonstrate the ability to think critically about categories of difference—including gender, sexuality, race, nation, class, religion—and explore the relationship between inequality and those categories of difference.
• Demonstrate understanding of how difference influences the values, beliefs, and experiences of individuals and groups in across historical, cultural, political and geographic contexts.

• Define and apply central concepts in Women’s and Gender Studies and Queer Studies, including but not limited to sexuality, power, privilege, inequality, justice, violence, the body, reproductive health, and intersectionality (i.e., interlocking and simultaneous forms of oppression).

• Know the history of feminist thought and production, especially as it has been inflected by cultural difference.

• Demonstrate self-reflectiveness, cultural awareness, critical analysis, and the ability to effect personal and community change.

• Write and speak clearly, be able to construct persuasive arguments based on their experiences, the experiences of others, and on scholarship; be able to conduct research using feminist methodologies.

Social Justice Leadership Minor

https://cola.unh.edu/womens-gender-studies/program/minor/social-justice-leadership

Description

The minor in social justice leadership engages students in an exploration of policies, power dynamics, institutions and structures that promote and hinder equity and processes of change required for social justice. Students will examine various forms of injustice such as sexism, racism, classism, ableism and environmental degradation. The minor is grounded in three pillars — a theory component, a leadership component and experiential learning activities. The minor is interdisciplinary in nature, drawing on disciplines such as anthropology, education, English, history, philosophy, political science, social work and sociology. After completing the curriculum, students will have gained a historical perspective, theoretical understanding and applied leadership skills that are needed for social justice work and activism. The minor certifies students’ knowledge regarding, and commitment to, social justice leadership, which will be useful in postgraduate pursuits.

Students who wish to minor in social justice leadership should consult with the department chair or coordinator.

APPLIED

Choose one capstone course from the following (normally taken at the end of the course sequence): 4

- WS 795 Independent Study
- WS 796 Advanced Topics
- WS 797 Internship
- WS 798 Colloquium

Choose two electives in Social Justice and/or Leadership (see list below) 8

Total Credits 20

The women’s and gender studies core faculty will consider approving other courses that include more than 50% of content related to social justice leadership.

Once students have declared the minor, they are required to meet with the coordinator at least once per semester for regular review of progress towards the degree.

Transfer credits may be approved by the coordinator to count towards the minor. If the transfer credit is accepted by the university and fits within the scope of the minor, it will be considered.
Women's and Gender Studies Minor
https://cola.unh.edu/womens-gender-studies/program/minor/womens-gender-studies

Description

Women's and gender studies provides students with an understanding of the status of women in various cultures and historical eras, in the nexus of race, class, sexuality, religious and disability studies. Students learn the use of gender as a category of analysis and increase their knowledge of women's contributions to many fields. Women's studies courses offer students critical perspectives on such basic questions of the social order as assumptions about gender roles and gender identity.

As a relatively small department in the College of Liberal Arts, we provide students with a sense of community and opportunities to contribute directly to changing the campus climate. In a rigorous academic environment, women's and gender studies offers students a springboard for activism. Our internship program enables students to gain first-hand work experience across many fields.

A major or minor in women's and gender studies prepares students for careers where the changing roles of women are having a perceptible impact. Alumni go on to law school and graduate school in a variety of disciplines. Some have taken positions with social change or family service agencies, while others have found work in such fields as health care, journalism, education, human rights, social and environmental justice, and the arts.

Students who wish to minor in women's and gender studies should consult with the department chair or coordinator.

Requirements

For the women's and gender studies minor, students must complete 20 credits of women's and gender studies courses with a grade of C- or better. Courses taken pass/fail may not be used toward the minor. No more than eight credits used to satisfy the requirements for another major may be used for the women's and gender studies minor. Students electing the women's and gender studies minor must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>

<td>Gender, Power and Privilege</td>
<td></td>
</tr>
<tr>
<td>WS 798</td>
<td>Colloquium (normally taken at the end of the course sequence)</td>
<td>4</td>
</tr>
</tbody>
</table>

Complete three other women's studies courses, either program courses or those that are cross-counted with other departments.

Total Credits: 20

World Languages Dual Major
https://cola.unh.edu/languages-literatures-cultures/program/world-languages-dual-major

Description

The world languages dual major program can be paired with majors that leads to a B.S. degree. The major offers eight language options from which to choose as a focus: Arabic, Chinese, classics, French, German, Italian, Russian and Spanish. Study of a second language adds immense value to a student’s academic experience by sharpening skills in communication, decision-making, critical thinking, listening, concentration and multitasking. It also provides excellent professional preparation for careers in business, healthcare, science, engineering and more. Mastering a second language and honing intercultural communication skills in a multicultural America and globalized world will add richness and flexibility to life beyond one's career, as well.

The world languages dual major is administered by the Department of Languages, Literatures and Cultures (LLC) but draws on languages and courses from both LLC and the Department of Classics, Humanities and Italian Studies.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*
Core Curriculum Required: Discovery & Writing Program Requirements
Declared Primary Major
All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

World Languages Dual Major Requirements

The dual major in world languages consists of a total of 8 classes (32 credits), which may include the following, depending on your level/ proficiency and language placement entering UNH. The minimum level of proficiency is noted below for each language. All coursework required for the world languages major must be completed with a grade of C or better.

World Languages

- World Languages Dual Major (p. 311)
Student Learning Outcomes

Linguistic proficiency. Students will demonstrate an Intermediate-Mid to Intermediate-High level of proficiency based on the ACTFL Performance Descriptors for Language Learners in the target language in three modes of communication: interpretive, interpersonal and presentational skills.

- **Interpretive:** Students are able to understand main ideas and some supporting details on familiar topics relevant to their immediate environment such as everyday life and particular interests. They have sufficient control of language (vocabulary, structure, and conventional spoken and written language) to understand fully non-complex texts.
- **Interpersonal:** Students are able to participate in conversations on familiar topics, ask questions to initiate and sustain conversations, and communicate about self, others and everyday life.
- **Presentational:** Students are able to communicate information and express their thoughts about familiar topics using simple sentence structures. They are able to create messages in contexts relevant to themselves and others, and their immediate environment.

Intercultural and transcultural competence. Students will demonstrate knowledge and understanding of other cultures. They are able to think critically about and are able to recognize and accept culturally differences, and the uniqueness of other cultures and peoples. By the time they graduate from our program, they will be able to:

1. From 8 to 24 credits, depending on students' proficiency level and language placement on entry. All students must complete at least 8 classes (32 credits). While the major may start counting as early as the Elementary I level (401), those who enter the major at a higher level (e.g., 503, 504, or 631) will replace the lower level language courses with additional electives in the “Culture, Linguistics, Literature” category.
2. Minimum 4 credits up to 20 credits (depending on number required to get to 32 total)
3. Or approved equivalent 700-level course taken at UNH, approved study abroad equivalent, or approved high-impact experience (such as internship with a robust target language/culture component).
• Recognize and describe the target culture products and practices they have directly studied and interpret texts that are read, heard and viewed.
• Analyze and critique the cultural and social products of the target culture (film, literature, art, popular culture, media, etc.) within their context, including conducting basic research projects.
• Begin to question the validity of their own cultural beliefs, behaviors and norms, by contrasting and comparing them with those of the target culture, and reflecting upon cultural differences related to spoken and written communication.

College of Life Sciences and Agriculture

Anthony S. Davis, Dean
Kimberly J. Babbitt, Associate Dean
Anton Bekkerman, Associate Dean

The College of Life Sciences and Agriculture (COLSA) provides students a fundamental education in the agricultural, biological, life, natural, and social sciences. Advanced technical and professional courses are offered to prepare students for graduate school or entry-level positions in their chosen field. Preparation can vary from fundamental studies of cancer cells to community service planning, resource protection to genetic engineering, and molecular biology to biotechnology.

A blend of Discovery and foundational science courses, careful selection of supportive upper level courses, and ample opportunities to engage in internships, research, and study abroad experiences ensures graduates develop the background and experiences necessary to be competitive in the job market. Potential employers include federal, state, and local governments, consulting firms and industrial organizations. Graduates are employed as watershed, soil, and natural resource managers, associates in biomedical and agricultural research laboratories, marketing analysts and extension specialists, nutrition supervisors and environmental regulators, and information educators and communication experts. Community governments employ graduates as service planners and land-use specialists, teachers in traditional education, public health technicians, and urban pest control specialists. Positions are available in private and commercial organizations in production agriculture, food processing, landscaping, agribusiness, sales, and private planning. Graduates may also pursue entrepreneurial careers.

Additionally, COLSA prepares students for advanced study in their chosen field of interest where graduate study is required for attaining their career goals.

Degrees

The college offers three undergraduate degrees: the bachelor of arts, the bachelor of science, and the bachelor of science in forestry. Some of the courses prescribed in these degree programs partially fulfill the University’s Discovery requirements. Students should see their advisers for specific information.

General Science Certification

Students majoring in biochemistry, molecular and cellular biology, biomedical science, biology, environmental conservation and sustainability, environmental sciences, forestry, wildlife and conservation biology, or zoology may seek certification to teach science at the middle, junior, or high school level.

For further information, contact the coordinator of teacher education in the Department of Education.

Academic Advising

All students are provided both faculty and professional advising. Additional advising is provided to students pursuing a pre-professional health or veterinary track.

Undeclared Status

Students may select a major upon entering the college or wait until registration for the sophomore year. Students who are uncertain about choosing a specific major may remain undeclared during their freshman year. In most cases, they should take the following courses, after which they should be ready to declare a major.

<table>
<thead>

Credits: 17

Total Credits: 34

Undeclared freshmen should explore possible majors by taking courses in the areas or programs that interest them most. They should talk to faculty, students, and their adviser concerning requirements, job opportunities, etc. in the various programs and should be prepared to declare a major when they register for the first semester of the sophomore year.

Bachelor of Arts

The bachelor of arts degree is available in Sustainable Agriculture and Food Systems, and Zoology. Students must accumulate 128 credits, attain a 2.0 cumulative grade-point average, satisfy Discovery requirements, and complete a foreign language requirement (see University Academic Requirements for specific B.A. language requirements). Check individual departmental listings for specific major requirements and minimum acceptable grades in major courses.

Bachelor of Science

The bachelor of science degree is available in all departments or programs. University requirements are the same as for the bachelor of arts degree, except that a foreign language is not required and minimum acceptable grades may differ in some programs. Check individual departmental or program listings for specific major requirements.

Agribusiness

Programs

- Agribusiness Minor (p. 315)

Agribusiness Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/agribusiness

Description

The agribusiness minor is designed to provide students in disciplines other than environmental and resource economics with training in the economics and management of agricultural and other natural resource business firms. This program prepares students to work for private companies, governmental agencies, or nonprofit, nongovernmental organizations. Students who are interested in operating their own businesses will also find this minor very useful. The courses in the agribusiness minor emphasize the applications of economic and business management principles.

For additional information, contact John M. Halstead, Environmental and Resource Economics Program Coordinator, 168 James Hall, (603) 862-3914.

Animal Science (ANSC)

The undergraduate program in animal science is designed to prepare students for a variety of careers by providing strong fundamental and applied education in animal nutrition, reproduction, genetics, physiology, health, and animal management. On-campus animal facilities available to provide practical experience with agricultural animals include the Fairchild Dairy Teaching and Research Center, the Lou and Lutza Smith Equine Center, the nearby organic dairy housed at the Burley-Demeritt Farm, two high tunnels for small livestock species, and aquaculture facilities. Program graduates may be employed in animal business ownership, management, marketing, the pharmaceutical industry, agribusiness, finance, manufacturing, public relations, extension, vocational education, or consulting. Students who are considering continuing their studies through graduate school or veterinary school are advised to take the recommended additional courses in chemistry, math, and physics.

Animal Science Major (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program-bs/animal-science-major

Description

Animal Science is the study of the biology and management of animals that enhance human life and well-being. Completion of the Animal Science B.S. is designed to prepare students for a variety of animal-
focused careers. The Animal Science B.S. is one of many pathways for admission to veterinary school. Because admission to veterinary school is highly competitive due to the limited number of available spaces and the high standards for admission, students are advised to choose an academic program that deeply interests them. Simply taking the prerequisite courses required by veterinary schools without considering alternate career goals is not advisable.

**Degree Requirements**

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Students will be required to earn a C- or better in all required courses for the animal science major to receive credit toward graduation. Students failing to do this will need to retake the course in order to receive credit.

**Total Credits** 78
1 Students interested in graduate school should take 2 semesters of Organic Chemistry (CHEM 651/CHEM 653 and CHEM 652/CHEM 654) and one semester of General Biochemistry (BMCB 658/BMCB 659) in place of BMCB 501.

2 ENGL 501 Introduction to Creative Nonfiction, ENGL 502 Professional and Technical Writing, ENGL 503 Persuasive Writing or ENGL 419 How to Read Anything

Capstone Experience

The capstone requirement must be completed during the senior year, and may be satisfied through a course (e.g., ANSC 698 Cooperative for Real Education in Agricultural Management (CREAM), ANSC 728 Advanced Dairy Management II, ANSC 750 Collaborative Farm Design and Development, ANSC 797 Equine Capstone Experience, or ANSC 799 Honors Senior Thesis) or some form of experiential learning (e.g., mentored research projects and other special student activities).

### Second Year

**Fall**
- ANSC 511 Anatomy and Physiology 4
- BIOL 528 Applied Biostatistics I 4
- CHEM 651 Organic Chemistry I
- & CHEM 653 Organic Chemistry Laboratory 5
- Discovery course 4

**Credits** 17

**Spring**
- AAS 439 Fundamentals of Animal Health 2
- ANSC 512 Anatomy and Physiology 4
- CHEM 652 Organic Chemistry II
- & CHEM 654 Organic Chemistry Laboratory 5
- ENGL 501 Introduction to Creative Nonfiction (WI and FPA DISC) 4
- Elective 2

**Credits** 17

### Third Year

**Fall**
- ANSC 612 Genetics of Animals 4
- ANSC 625 Animal Diseases 4
- BMS 503 General Microbiology
- & BMS 504 General Microbiology Laboratory 5
- Discovery course or Elective 4

**Credits** 17

**Spring**
- ANSC 609 Principles of Animal Nutrition 4
- BMCB 658 General Biochemistry
- & BMCB 659 General Biochemistry Lab 5
- Discovery course 4
- Elective 4

**Credits** 17

### Fourth Year

**Fall**
- PHYS 401 Introduction to Physics I 4
- ANSC Repro Course or Discovery course 4
- Discovery course or Elective 4
- Elective 4

**Credits** 16

**Spring**
- ANSC 602 Animal Rights and Societal Issues (WI) 4
- PHYS 402 Introduction to Physics II 4
- ANSC Repro Course or Discovery course 4
- Capstone 4

**Credits** 16

**Total Credits** 133

---

**Student Learning Outcomes**

Students will gain a fundamental knowledge of the animal science related disciplines of:

- Anatomy & physiology: Students will be able to recognize the complimentary relationship of anatomic structure and function and accurately describe the basic physiologic processes of mammalian organ systems.
- Nutrition: Students will be able to identify, compare, contrast, and link different concepts regarding animal feeding and metabolism of carbohydrates, lipids, and protein in major livestock species and equine.
- Genetics: Students will understand basic principles and applications of inheritance, the difference between qualitative and quantitative genetics, and be able to discuss the various disciplines within genetics.
- Disease: Students will understand the modes of transmission of infectious diseases, recognize signs of illness associated with notable diseases in livestock species, and be able to appropriately apply general concepts of disease prevention and biosecurity to a variety of management situations.
- Reproduction: Students will comprehend the mechanisms and endocrine control of gametogenesis, fertilization, pregnancy, and lactation and understand the variety of factors that can influence reproductive success.
- Animal Ethics: Students will recognize the numerous ways that humans use, benefit from, and conflict with non-human animals and have an awareness of the variety of motivations and influences that drive these relationships.
- Students will be able to develop critical questions that facilitate their independent investigation of topics related to animal science and demonstrate an integration of discipline specific knowledge through engaging in experiential education opportunities.
- Students will be able to conduct literature searches using relevant databases to critically evaluate both academic and popular press resources pertinent to the animal sciences.
- Students will be able to construct well-supported, effectively organized written arguments to express informed perspectives on animal science related topics. These writings will demonstrate professional style, appropriate mechanics (grammar, punctuation, and spelling), and the correct use of citations.

---

**Animal Science Major: Dairy Management Option (B.S.)**

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/ba/animal-science-major-dairy-management-option

**Description**

The ANSC: dairy management option is designed to provide students with solid training in areas important to the successful management of a dairy enterprise, for employment in related agribusinesses (e.g., pharmaceutical and feed industries), or for those wishing to pursue additional training leading to the M.S. or Ph.D. degree in dairy science or its related disciplines. Dairy management students receive training in areas such as nutrition, reproduction, diseases, genetics, lactation
Students interested in graduate school should take two semesters of Organic Chemistry and one semester of Biochemistry.

**Animal Science: Dairy Management Option B.S. students must also complete:**

- ANSC 710: Dairy Nutrition                                                                                               | 4       |
- ANSC 724: Reproductive Management and Artificial Insemination (or Discovery course)                                 | 4       |
- ANSC 728: Advanced Dairy Management II (WI, capstone)                                                                  | 4       |
|            | **Credits**                                                                   | 16      |

**Total Credits** 128

1 ENGL 419, ENGL 501, ENGL 502 and ENGL 503 may be substituted.

### Student Learning Outcomes

Students will gain a fundamental knowledge of the animal science related disciplines of:

**Anatomy & physiology**
- Students will be able to recognize the complimentary relationship of anatomic structure and function and accurately describe the basic physiologic processes of mammalian organ systems.

**Nutrition**
- Students will be able to identify, compare, contrast, and link different concepts regarding animal feeding and metabolism of carbohydrates, lipids, and protein in major livestock species and equine.

**Genetics**
- Students will understand basic principles and applications of inheritance, the difference between qualitative and quantitative genetics, and be able to discuss the various disciplines within genetics.

**Disease**
- Students will understand the modes of transmission of infectious diseases, recognize signs of illness associated with notable diseases in livestock species, and be able to appropriately apply general concepts of disease prevention and biosecurity to a variety of management situations.

**Reproduction**
- Students will comprehend the mechanisms and endocrine control of gametogenesis, fertilization, pregnancy, and lactation and understand the variety of factors that can influence reproductive success.

**Animal Ethics**
- Students will recognize the numerous ways that humans use, benefit from, and conflict with non-human animals and have an awareness of the variety of motivations and influences that drive these relationships.
- Students will be able to develop critical questions that facilitate their independent investigation of topics related to animal science and demonstrate an integration of discipline specific knowledge through engaging in experiential education opportunities.
- Students will be able to conduct literature searches using relevant databases to critically evaluate both academic and popular press resources pertinent to the animal sciences.
- Students will be able to construct well-supported, effectively organized written arguments to express informed perspectives on animal science related topics. These writings will demonstrate professional style, appropriate mechanics (grammar, punctuation, and spelling), and the correct use of citations.

### Animal Science Major: Equine Studies Option (B.S.)

[https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/animal-science-equine-studies-option](https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/animal-science-equine-studies-option)

**Description**

The Animal Science: Equine Studies option is designed to provide students with a foundation in the sciences, a breadth within the animal science discipline, and the depth to serve the equine industry. Through a hands-on curriculum, equine studies students receive training in areas important to pursuing a successful career in equine management and to pursue additional training leading to the M.S. or Ph.D. degree in equine science or its related disciplines. The UNH Equine facilities include a 40-stall barn, indoor and outdoor riding arenas, 3 regulation-size dressage competition arenas, an outdoor competition course, laboratory, and artificial insemination rooms as well as classrooms and conference space.
Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Students will be required to earn a C- or better in the foundation courses and all required courses for the animal science major to receive credit toward graduation. Students failing to do this will need to retake the course in order to receive credit.

A. Foundation Science Courses required for all Animal Science majors

E. Professional Internship or Related Work Experience

Equine Studies option students will demonstrate evidence of a substantive work or internship experience in the equine industry. In collaboration with their advisors, students will select an appropriate setting based on their professional and career interests. Students will document this work via either credit-based ANSC 600 Field Experience or no-credit AAS 597 Applied Animal Science Work Experience.

1 Students interested in graduate school should take 2 semesters of Organic Chemistry (CHEM 651/653 and CHEM 652/654) and one semester of General Biochemistry (BMCB 658/BMCB 659) in place of BMCB 501.

2 ENGL 501 Introduction to Creative Nonfiction, ENGL 502 Professional and Technical Writing, ENGL 503 Persuasive Writing or ENGL 419 How to Read Anything.

Total Credits: 91

Student Learning Outcomes

As part of the foundation and core courses, all Animal Science students will gain a fundamental knowledge of the disciplines of:

**Anatomy & physiology**
- Students will be able to recognize the complimentary relationship of anatomic structure and function and accurately describe the basic physiologic processes of mammalian organ systems.

**Nutrition**
- Students will be able to identify, compare, contrast, and link different concepts regarding animal feeding and metabolism of carbohydrates, lipids, and protein in major livestock species and equine.

**Genetics**
- Students will understand basic principles and applications of inheritance, the difference between qualitative and quantitative genetics, and be able to discuss the various disciplines within genetics.

**Disease**
- Students will understand the modes of transmission of infectious diseases, recognize signs of illness associated with notable diseases in livestock species, and be able to appropriately apply general concepts of disease prevention and biosecurity to a variety of management situations.

**Reproduction**
- Students will comprehend the mechanisms and endocrine control of gametogenesis, fertilization, pregnancy, and lactation and understand the variety of factors that can influence reproductive success.

**Animal Ethics**
- Students will recognize the numerous ways that humans use, benefit from, and conflict with non-human animals and have an awareness of the variety of motivations and influences that drive these relationships.

**Critical Analysis & Communication**
- Students will be able to develop critical questions that facilitate their independent investigation of topics related to animal science and demonstrate an integration of discipline specific knowledge through engaging in experiential education opportunities.
- Students will be able to conduct literature searches using relevant databases to critically evaluate both academic and popular press resources pertinent to the animal sciences.
- Students will be able to construct well-supported, effectively organized written arguments to express informed perspectives on animal science related topics. These writings will demonstrate professional style, appropriate mechanics (grammar, punctuation, and spelling), and the correct use of citations.

By completing the Equine Core, students will be able to:
- Identify, explain, and demonstrate safe, effective, and humane equine handling and stable management skills.
• Identify, explain, and demonstrate equine health management practices and basic equine first aid.
• Explain guidelines for equine nutrition, feeding, and parasite management.
• Demonstrate technical proficiency with English tack, boots, bandages, and blankets.
• Demonstrate safe, competent longeing technique using a trained horse.
• Demonstrate an understanding of the principles of riding practices in equestrian sport.
• Communicate effectively, in written and verbal form, about professional topics in the equine industry.

Animal Science Minor
https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/animal-science

Description
The study of animal science will provide you with an introduction to the biology and management of animal species. In this minor, you’ll choose from a wide array of electives, with the potential to delve into topics such as animal genetics, diseases, and ethics, and gain hands-on equine, poultry and dairy experience. Your studies will prepare you for careers in various animal industries or further studies in veterinary medicine or graduate school.

Students wanting to declare a minor in animal science must meet with animal science minor coordinator as early as possible and no later than their final semester of their junior year.

Students must complete a minor completion form during their final semester at UNH.

Requirements

• A minor in Animal Science consists of a minimum of 20 credits of Animal Science (ANSC) courses.
• No more than 7 credits may be taken in the Thompson School of Applied Science (AAS) and at the 400-level.
• Students must receive a minimum grade of C- in any course used for the minor. Students failing to do this will need to retake the course in order to receive credit.
• No courses taken on a pass/credit/fail basis may count toward the minor.
• Students who transfer from other institutions may petition the animal science program faculty for course approval.
• No more than eight credits used to satisfy major requirements may be used for the minor.

Dairy Management Minor
https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/dairy-management

Description
Learn the fundamentals of running a dairy farm in this minor, from caring for the animals to managing the business end of the operation. In addition to courses in animal science, including biology, animal health, nutrition, genetics and reproduction, you’ll be introduced to areas such as agribusiness finance, personnel management and public relations. Combine this minor with a major in animal science, biology or sustainable agriculture to enhance your career opportunities or prepare for future graduate studies.

Requirements

A minor in Dairy Management consists of 20 credits with C- or better and a 2.0 grade point average in subjects that the minor department approves. Courses taken on the pass/fail basis cannot be used for a minor. No more than 8 credits used to satisfy major requirements may be used for the minor.

Equine Assisted Activities and Therapies Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/equine-assisted-activities-therapies

Description

The minor in Equine-Assisted Activities and Therapies (EAAT) provides students with exposure to several disciplines within this diverse field. The required courses introduce students to key concepts in equine handling and EAAT, including equine skills and the opportunity to test for PATH International CTRI instructor certification in therapeutic riding.

The elective courses list for the proposed EAAT minor are designed to provide students with supporting knowledge of equine-specific topics and non-profit challenges necessary for professionals working in the EAAT field.

Requirements

Students in the EAAT minor will take a total of 20 credit hours. Students must receive a minimum grade of C- in any course used for the minor. Students failing to do this will need to retake the course in order to receive credit. In accordance with University policy, up to 8 credit hours may count for both the minor as well as for the major, second major, or dual major. Students pursuing a degree in Equine Studies will NOT be eligible to complete the minor.

Equine Studies Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/equine-studies

Description

The equine studies minor at UNH will allow you to pursue your interest in horsemanship while also getting an introduction to equine science, equine industry and management, and equine-assisted activities and therapies. You’ll be able to explore equine care and management, equine health, and equine anatomy while also working with horses to develop professional equine skills. Combine this minor with a major such as biology, business, agriculture, or human-service-related fields to expand your possibilities for an equine-related career or further studies.

Students interested in the minor in equine studies should contact Sarah Rigg (Sarah.Rigg@unh.edu).

Requirements

A minor in equine studies consists of a minimum of 20 credits of equine-related animal science courses.

- ANSC 402 may be counted only once for minor credit.
- Students must receive a minimum grade of C- in any course used for the minor. Students failing to do this will need to retake the course in order to receive credit.
- No courses taken on a pass(credit)/fail basis may count toward the minor.
- No more than 12 credits at the 400-level may be used for the minor.
- Students must petition equine faculty in their junior year to include a course that is not listed.
- Students must take at least one course at the 600- or 700-level.
- Students who transfer from other institutions may petition the equine program faculty for course approval.
- Students who choose both ANSC 500 and ANSC 643 as two of their courses toward the minor in equine studies will be eligible for PATH International therapeutic riding instructor certification.

Biochemistry, Molecular and Cellular Biology (BMCB)

The field of biochemistry, molecular and cellular biology (BMCB) encompasses a wide range of life sciences, from biophysics and biochemistry to applied biology and medicine. The B.S. in biochemistry, molecular and cellular biology is designed for students to gain a solid foundation in biology, chemistry, physics, and mathematics, along with advanced knowledge in molecular biology, biochemistry, cell biology, and genetics. BMCB students have exposure to cutting-edge techniques and frontier research topics through inquiry-based learning and hands-on research opportunities. The program offers research opportunities with program faculty in the areas of structural biology, cell signaling pathways, cancer biology, gene regulation, neurobiology, cellular structure and function, and proteomics. Graduates are "profession-ready" and well-prepared for entry-level positions in biomedical research or in the biotechnology and pharmaceutical industries, for graduate education, or for post-baccalaureate professional programs (e.g., medical school, veterinary school, dental school, etc.).

The curriculum provides most of the required and recommended courses for students seeking admission to graduate schools and to professional schools in medicine, dentistry, veterinary medicine, or pharmacy. Students obtaining a B.S. in BMCB enjoy excellent job prospects immediately upon graduation, due to high demand for skilled research technicians in biotech and pharmaceutical companies, government agencies, academic research laboratories, and medical diagnostic laboratories. Graduates also have knowledge and skills that are valuable in the fields of management, sales, marketing, regulatory affairs, technical writing, and science journalism. Students who major in BMCB can also use their training in conjunction with advanced degrees in law and business. With additional courses in education, the B.S. degree in BMCB also qualifies graduates to teach at the elementary, junior high, or high school levels.

Faculty participating in the BMCB major combine a passion for teaching and student advising with strong expertise and achievements in their research areas. BMCB faculty are committed to providing independent research experiences for undergraduate students, and most faculty have active and well-funded research programs utilizing state-of-the-art techniques and instruments. On-campus facilities that students can use to enhance their research experience include the Hubbard Center for Genome Studies, the University Instrumentation Center, and the Center of Integrated Biomedical and Bioengineering Research.

Pre-Professional Health Programs

Students interested in postgraduate education in healthcare occupations (e.g., medical, dental, physician assistant, pharmacy, etc.) should visit the UNH Pre-Professional Health Programs Advising Office website or in person (Rudman Hall, Room 002). Students interested in veterinary medicine should consult the Pre-Veterinary Medicine Program. While many of the prerequisite courses required by professional schools are also requirements of the BMCB major, students should consult with their faculty adviser to create a plan of study that best prepares them for pursuing a career in one of these health professions.

Biochemistry, Molecular and Cellular Biology Major (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biochemistry-molecular-cellular-biology-major

Description

The Biochemistry, Molecular & Cellular Biology (BMCB) major provides you with conceptual competence, analytical skills, and laboratory experiences to understand life at the molecular and cellular level. Your BMCB degree will prepare you for immediate employment as a research associate in industry, for entry into graduate or professional programs in medicine, dentistry or other allied health professions, and other career tracks.

The BMCB program offers advanced coursework and laboratories in diverse research areas of modern biology

- Cancer biology
- Cell biology
- Cell culture & tissue engineering
- Endocrinology
- Molecular biology
- Pharmacology
- Physical biochemistry
- Protein structure, function & proteomics

BMCB majors participate in experiential learning activities

- Many courses have integrated laboratory experiences to foster inquiry-based learning and to train creative and critical thinkers
- Independent research experiences are available in faculty research laboratories
- Many courses provide exposure to cutting-edge techniques and instrumentation
• Job preparation can be enhanced by internships with regional biotechnology and pharmaceutical companies
• Summer undergraduate research fellowships at U.S. or international academic institutions combine travel with research opportunities outside UNH

BMCB graduates have been successful in many careers
• Research associates and laboratory technicians
• Biotechnology and pharmaceutical companies
• Government agencies
• Forensics laboratories
• Academic research laboratories
• Hospitals
• Science journalists and technical writers
• Healthcare workers
• Pharmaceutical sales and marketing staff
• Regulatory agency staff
• Primary and secondary school educators (with additional coursework in education)

BMCB graduates are well prepared for post-baccalaureate education
• Masters and doctoral programs in a wide variety of disciplines
• Professional health programs
  • Medical
  • Dental
  • Pharmacy
  • Physician’s Assistant and other allied health programs

Note: The BMCB major is designed so you can complete all of the prerequisite courses needed to seek admission to graduate schools or health professional schools in four years.

Requirements

Degree Requirements
Minimum Credit Requirement: 128 credits
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No
All Major, Option and Elective Requirements as indicated.
*Major GPA requirements as indicated.

Major Requirements
Students in the Biochemistry, Molecular and Cellular Biology (BMCB) major take eight Foundation courses, four Bioscience Core courses, five BMCB Core courses, one Laboratory Techniques course, and three Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other University academic requirements must be completed, including those for the Discovery Program and the University Writing Requirement.

A grade of C-minus or better is required in Statistics and in all Bioscience Core, BMCB Core, Laboratory Techniques, and Major Elective courses.

Total Credits: 128-131

Student Learning Outcomes

Core Knowledge in Biochemistry, Molecular Biology, and Cell Biology

- Students will be able to explain the structure and function of macromolecules, including key functional groups, higher order structure and function of macromolecules, catalysis and enzyme kinetics.
- Students will be able to explain matter and energy conversion, including thermodynamics, catalysis, biological energy, ATP and its function in metabolism.
- Students will be able to explain cellular homeostasis, including major metabolic pathways for carbohydrates, lipids, proteins and nucleic acids, key regulatory steps in these pathways and the organization of metabolic enzymes.
- Students will be able to explain the flow of biological information, including detailed replication, transcription and translation processes in the context of homeostasis and development.

Quantitative Literacy, Inquiry & Analysis

- Students will be able to apply the scientific method to examine experimental evidence and draw informed conclusions.
- Students will be able to use graphs to represent scientific data.
- Students will be able to apply statistical methods to interpret scientific data.

Critical Thinking & Problem Solving

- Students will be able to use data to troubleshoot an unexpected outcome.
- Students will be able to apply core knowledge to critically interpret scientific data.

Written Communication

- Students will demonstrate written skills to communicate scientific knowledge and experimental data.

Oral Communication

- Students will be able to demonstrate oral presentation skills to communicate scientific knowledge and experimental data.

Biochemistry, Molecular and Cellular Biology Minor

Description

Students who wish to develop focused competencies in biochemistry, molecular biology, and/or cell biology can complement their major academic program with a minor in biochemistry, molecular and cellular biology (BMCB).

Requirements

- Complete 20 credits from the courses listed below, with a grade of C-minus or better.
- C average (2.00) is required in courses that the minor program approves.
- No more than 8 credits used to satisfy major requirements may be used for the minor.
- Pass/fail courses may not be used for the minor.
- It is the student's responsibility to complete a Certification of Completion of Minor form during their final semester at UNH.

Biology

https://colsa.unh.edu/biological-sciences

Description

UNH's location and facilities provide unique opportunities for the study of biology due to its access to the seacoast, the Shoals Marine Laboratory, the lakes region of NH, and White Mountain National Forest. The Biology faculty strongly believe in a hands-on approach to teaching and active involvement of undergraduates in research. We have a wide range of faculty expertise, including freshwater, estuarine, ecology, physiology, neurobiology, and behavior. A Biology degree provides the background for a variety of professional positions in the public and private sectors, and provides an excellent foundation for students seeking to apply for graduate, medical, or veterinary school.
Minimum Residency Requirement: 32 credits must be taken at UNH
Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

Major GPA requirements as indicated.

Major Requirements

The biology courses in the core curriculum constitute an integrated sequence that train students in the basic skills and concepts of knowledge inherent to the biological sciences. The biology core allows a student to obtain a broad background in biology, and in the related physical sciences and math that provide a foundation for success in understanding biological principals.

To receive the B.S. degree in biology, students must complete 128 credit hours with at least a 2.0 cumulative grade-point average for completion of the degree. All UNH Discovery Program requirements, biology core curriculum requirements, plus seven additional courses from the biological sciences, and a capstone experience. A minimum grade of C- is required in all biological science courses that are counted toward the requirements for a degree in biology. Students who expect to compete successfully for post-baccalaureate programs should attain a cumulative GPA of 3.0 or higher by the end of the sophomore year and maintain it at that level.

Biology Electives

In addition to the biology core curriculum, students must complete seven biology elective courses. One course must be taken from each of the three categories/disciplines; the other four electives can be chosen from the category lists or can be any other biological sciences course with approval of the student’s adviser. All courses must be 500-level or above. There must be one animal-identified course (A) and one plant/fungal/algal course (FP). One capstone experience is required of all seniors; see subsequent section on capstones for detailed requirements. Corequisite lecture and lab courses count as one course.

University of New Hampshire

• Biology Minor (p. 331)
• Plant Biology Minor (p. 332)

Faculty

https://colsa.unh.edu/biological-sciences/people

Biology Major (B.S.)

https://colsa.unh.edu/biological-sciences/program/bs/biology-major

Description

Biology is one of the most popular science majors since it provides a broad background in the biological sciences while allowing flexibility and specialization within the major. It integrates theoretical and practical (hands-on laboratory and field work) courses in different aspects of the biology of multicellular life. It encompasses the study of structural and functional relationships of living organisms at the molecular, cellular, and organismal level, the interactions of living systems with the environment and with each other, and the evolutionary relationships of life. Our goal is to create an environment for those with a scholarly interest in the biological sciences, and to extend their understanding, awareness, and appreciation of the diversity inherent in the biological sciences. Our major is aimed at promoting an excellent education in biological sciences by involving undergraduate students in a strong interaction with faculty both in the classroom and in research laboratories.

The biology major prepares students for post graduate degrees in the biological and medical fields, and for job opportunities in industry (environmental, biomedical, pharmaceutical, and biotechnological) and governmental research, and secondary school teaching. Completion of the four-year undergraduate program plus a fifth-year internship will be necessary for biology teaching certification. Students who plan to enter medical, dental, or related professional schools are advised to confer with their faculty adviser to work the requirements for these programs into their academic majors.

Core courses in the biology major are from departments that contribute to the biological sciences community at UNH. The core curriculum consists of introductory and upper-level science courses plus seven additional courses in the biological sciences; three of these must be selected from course lists in three broad categories.

While students are advised to declare the biology major as incoming first-year students to assure adequate program planning, transfer into this major at a later stage is also possible. Several of the other biological science majors share the same biology core curriculum. For the first two years, it is quite easy to change to or from these other majors.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum GPA: 2.0 required for conferral

Core Curriculum Required: Discovery & Writing Program Requirements

ZOOL 640 Evolution
ZOOL 708 Stream Ecology
ZOOL 710 Sharks and Bony Fishes (A)
ZOOL 726 Conservation Behavior (A)

1. BIOL 400 Professional Perspectives on Biology is required only for first-year biology majors.
2. Students exploring pre-health professions should take a full year of Organic Chemistry (CHEM 651/ CHEM 653 and CHEM 652/CHEM 654).
3. A 600, 695, 795, or 799 experience may substitute for one elective with academic advisor approval, but only if taken for at least four credits. These four credits may be spread over multiple semesters if they are consecutive and with the same faculty mentor.
4. This class requires enrollment in both fall and spring sections, 2 credits/semester for a total of 4 credits.

Note: It is strongly recommended that students participate in an exchange semester at another university, or in a field-oriented program or internship. There are many exchange opportunities available in which a full semester of credits toward the major may be earned. It is further recommended that students explore possibilities of one or more semesters of independent investigation (research projects). For details, students should contact their adviser. Financial support is available for
most of these programs. In addition, students can explore the courses at the Shoals Marine Laboratory (SML), which provides an excellent setting for several "field-oriented" courses during the summer. Often there is financial support available for the SML programs. (See the SML website at https://marine.unh.edu/SML or the Cornell website at http://www.shoalsmarinelaboratory.org for details.)

### Capstone Experience

As part of the University of New Hampshire’s Discovery Program requirements, all students must complete a capstone experience during their senior year (after earning at least 90 credits). The capstone experience for students majoring in Biology consists of BOTH (1) an approved individual experience AND (2) the successful completion of the BIOL 780 Capstone Companion Course. Students will not be approved for graduation until capstone certification has been granted.

1) The individual experience

The individual experience may be satisfied through various forms of experiential learning (e.g., Honors thesis, mentored research project, internship) or a course denoted with a "(C)" in the courses listed above. The individual experience must fulfill at least one of the University’s capstone criteria:

- synthesizes and applies disciplinary knowledge and skills
- fosters reflection on undergraduate learning and experience
- demonstrates emerging professional competencies
- applies, analyzes, and/or interprets research, data, or artistic expression
- explores areas of interest based on the integration of the prior learning

Before beginning any capstone individual experience, students MUST SUBMIT A COMPLETED CAPSTONE APPROVAL FORM to their Program Coordinator.

Students can obtain this form on the Department’s Capstone page or from their Program Coordinator. Here they will describe their proposed individual experience and how it fulfills at least one of the University’s capstone criteria listed above. If the student is selecting a “C” course for their individual experience, they should obtain the course syllabus from the instructor for information about the course’s content and learning objectives.

2) Enrollment in BIOL 780

Students will also be required to enroll in BIOL 780 Capstone Companion Course (1 cr.) during the semester of their individual experience. BIOL 780 is offered every Fall and Spring semester.

- If the individual experience is a two-semester thesis, BIOL 780 should be taken during the second semester.
- If the individual experience occurs during the summer (e.g., internship), BIOL 780 should be taken during the Fall semester that immediately follows.
- Note: Because BIOL 780 is not offered during the summer, students cannot complete their individual experience during the summer and graduate during that same August. Summer experiences could only be used as individual capstone experiences if completed the summer before the student’s senior year.

### Student Learning Outcomes

- Students demonstrate that they understand basic principles of biology. Demonstrate a fundamental understanding of the relationships between structure, function, and process at the level of molecular, cellular, and organismal levels. Describe the principles and mechanisms of organismal evolution and genetics as the central unifying and explanatory concepts of biology. Explain the relationship between organisms and their physical, chemical, and biological environments. Explain what biodiversity is, its value in ecosystems, and the need for its conservation.
- Students demonstrate that they can undertake scientifically valid methods of inquiry. Demonstrate proficiency in searching, reading, and understanding scientific literature. Apply the scientific process, including the framework of initiation, designing, and conducting experiments, and the appropriate analysis and discussion based on the data gathered. Exhibit technical skills in the use of appropriate laboratory and field techniques commonly used in biology.
- Students demonstrate that they can think critically and analytically. Demonstrate an ability to critically and objectively evaluate data, develop hypotheses, interpret and or design biological experiments and studies.
- Students demonstrate that they can communicate effectively. Communicate scientific material effectively in written and oral formats.
- Students practice science responsibly and ethically, and acknowledge the influence of cultural and historical biases in the sciences.

### Biology Minor

[https://colsa.unh.edu/biological-sciences/program/minor/biology](https://colsa.unh.edu/biological-sciences/program/minor/biology)

#### Description

The Biology Minor is designed to give students a broad background in basic biological understanding of life processes, while providing experiences in ecology, evolution, and organismal diversity. Five courses are required for completion of the minor, of which no more than two can overlap with major requirements.

¹ The above table includes all surveys that are used as individual capstone experiences.
Faculty in the BMS major have expertise in many areas of biomedical science, including physiology, cell biology, infectious diseases, veterinary pathology, and laboratory medicine. The biomedical science faculty strongly encourage students to complement their academic courses with experiential learning opportunities through internships, field experience, and independent research projects conducted with biomedical research faculty. On-campus facilities include state-of-the-art research and teaching laboratories and the New Hampshire Veterinary Diagnostic Laboratory (NHVDL) that provide unique learning opportunities for students interested in veterinary medicine, pathobiology, and laboratory diagnostics.

There is high demand for skilled biomedical scientists as research assistants/technicians in biotechnology companies, pharmaceutical companies, government agencies, forensics, academic research laboratories, and hospitals, so BMS majors enjoy excellent job prospects upon graduation. The BMS curriculum also provides graduates with the required and recommended courses for admission to most graduate schools and professional schools of medicine, veterinary medicine, dentistry, public health, and pharmacy, as well as to physician assistant and pathologist’s assistant programs. BMS graduates have a knowledge base that is valuable in the fields of sales, marketing, regulatory affairs, technical writing, patent law, and scientific journalism. With additional courses in education, the B.S. in biomedical science also qualifies graduates to teach at the elementary, junior high, or high school levels.

Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions (e.g., physician, dentist, physician assistant, pharmacist, etc.) should visit the Pre-Professional Health Programs Advising Office. Students interested in veterinary medicine should consult the Pre-Veterinary Medicine Program. While many of the prerequisite courses required by professional schools are also requirements of the biomedical science major, students should consult with their faculty adviser to create a plan of study that best prepares them for pursuing a career in one of these human and animal health professions.

Programs

- Biomedical Science Major: Medical and Veterinary Sciences Option (B.S.) (p. 332)
- Biomedical Science Major: Medical Laboratory Sciences Option (B.S.) (p. 336)
- Biomedical Science Major: Medical Microbiology Option (B.S.) (p. 338)
- Biomedical Science Minor (p. 341)

Faculty

Biomedical Science affiliated faculty.

Biomedical Science Major: Medical and Veterinary Sciences Option (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biomedical-science-major-medical-veterinary
The Biomedical Science: Medical and Veterinary Sciences (BMS:MVS) program is informed by the principles of the One Health Initiative, which unites human and veterinary medicine. This rigorous academic program meets requirements for entry into veterinary school, medical school, and graduate school in the area of biomedical science or for a career as a research scientist in either the biotechnology/pharmaceutical sector or government and academic research labs.

You will select elective courses from three major areas of study:

- biomedical systems
- pathobiology and disease
- health and environmental issues

As a BMS:MVS major, you have many opportunities for career-relevant learning experiences including:

- NH Veterinary Diagnostic Laboratory located on the UNH campus
- UNH Agricultural Experiment Station farm facilities
- independent research in laboratories of UNH faculty in the biomedical and biological sciences
- experience in local hospitals
- internships in biotechnology and pharmaceutical companies in the Greater Boston area

BMS:MVS graduates are prepared for post-baccalaureate education in:

- professional health programs
  - veterinary school
  - medical school
  - allied health programs (physician assistant or pathologist’s assistant)
- graduate programs
  - biomedical science
  - pathology
  - public health
  - nursing

Careers of previous Medical & Veterinary Sciences graduates include:

- research scientists/laboratory technicians
  - biotechnology and pharmaceutical companies
  - academic biomedical research programs
  - forensic laboratories
  - hospitals/health clinics
- state and federal government employment
  - public health laboratories
  - health inspector (e.g., Food and Drug Administration)

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

### Minimum GPA: 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

### Major Requirements

Students in the Medical and Veterinary Sciences (MVS) option take eight Foundation courses, six Bioscience Core courses, three BMS-MVS Core courses, and six BMS-MVS Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other university academic requirements must be completed, including those for the Discovery Program and the University Writing Requirement.

A grade of C-minus or above is required in all courses within the major, which includes Foundation, Bioscience Core, and BMS-MVS Core courses, and BMS-MVS Major Electives.

Students applying to health profession schools need a full year of English. ENGL 415C, ENGL 419, ENGL 501, ENGL 502 or ENGL 503 should be taken in addition to ENGL 401. For further details, visit the Pre-Professional Health Program Advising Office on-line or in person (Rudman Hall, Room G02).

### Foundation Courses

BMS: MVS Capstone

The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other special student activity). Students may take more than one capstone course. Capstone completion is never displayed on Degree Works; your advisor will certify capstone completion at the time of graduation. Students must have 90 credits or more when completing their capstone requirement. See your advisor for questions about capstones.

---

1. BMCB 605, BMS 503 & BMS 504, and GEN 604 may be taken in other semesters, but all should be completed by the end of Fall semester in junior year.

### Student Learning Outcomes

**Core Knowledge**

- Students will demonstrate an understanding of core knowledge in biochemistry, molecular biology, cell biology, genetics & biomedical sciences.

**Biomedical Science: Medical & Veterinary Sciences option**

- Students will be able to list the major organ systems in mammals and describe their basic structure and function.
- Students will be able to describe the differences between Gram-negative and Gram-positive bacteria.
- Students will be able to describe the structure and function of the major cellular organelles.
- Students will understand the principles of Mendelian genetics.
- Students will understand the pathogenesis of disease and effects on the major organ systems.
- Students will be able to describe the inter-relationships between health and disease, society, and the environment.

**Quantitative Literacy, Inquiry & Analysis**
Students will be able to apply the scientific method to examine experimental evidence and draw informed conclusions.

Students will be able to use graphs to represent scientific data.

Students will be able to apply statistical methods to interpret scientific data.

Critical Thinking & Problem Solving

Students will be able to use data to troubleshoot an unexpected outcome.

Students will be able to apply core knowledge to critically interpret scientific data.

Written Communication

Students will demonstrate written skills to communicate scientific knowledge and experimental data.

Oral Communication

Students will be able to demonstrate oral presentation skills to communicate scientific knowledge and experimental data.

Biomedical Science Major: Medical Laboratory Sciences Option (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/biomedical-science-major-medical-laboratory

Description

The Biomedical Science: Medical Laboratory Science (BMS:MLS) program provides you with the medical knowledge and understanding of diagnostic testing needed for a fulfilling career in the biomedical sciences, including as an American College of Clinical Pathology-certified Medical Laboratory Scientist.

As a Biomedical Science: Medical Laboratory Science major, you will:

• learn to determine the presence, extent, or absence of human disease through understanding the diagnostic testing that medical professionals use to make these determinations (70% of physician decisions are based on diagnostic testing results)
• obtain hands-on experience by performing immunological, biochemical, molecular, and microbiological procedures that aid in the diagnosis, treatment, and prevention of disease

Unique features of the MLS option include:

• the only 4-year degree program in NH that includes a path for students to become certified as Medical Laboratory Scientists (MLS) by the American Society of Clinical Pathology (ASCP) and that is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)
• Certified Medical Laboratory Scientists are in high demand and easily find employment in hospitals and medical centers throughout the country
• the MLS program is affiliated with Dartmouth Hitchcock Medical Center and NorDx/Maine Medical Center

Careers or post-baccalaureate education of previous Medical Laboratory Science graduates include:

Certified medical laboratory scientists (ASCP) in diagnostic testing laboratories in hospitals and industry

research scientists/labatory technicians
• biotechnology and pharmaceutical companies
• biomedical research facilities
• forensic laboratories
• hospital reference laboratories
• government public health laboratories

secondary school educators (with additional coursework in education)

diagnostic product development

sales and marketing

state and federal government agencies (e.g., U.S. Food and Drug Administration).

professional health programs
• medical school
• allied health programs (physician assistant, pathologists’ assistant, pharmacy)

graduate programs
• microbiology
• biomedical science
• biochemistry
• nursing
• public health
• business administration

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

The Medical Laboratory Sciences (MLS) program is NAACLS accredited and follows accreditation requirements. Students in this option take four Foundation courses, five Bioscience Core courses, six BMS:MLS core courses, and five Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. In addition, all other University academic requirements must be completed, including those for Discovery Program and the University Writing Requirement.

A grade of C-minus or above is required in BMS:MLS Core Courses.

Foundation Courses
a laboratory component. A total of five unique Major Electives is required. Two courses must have a laboratory component.

### BMS-MLS Core Courses

<td>Human Anatomy and Physiology I</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 411</td>
<td>Introductory Biology Molecular and Cellular</td>
<td>0 or 4</td>
</tr>
</tbody>
</table>

¹ CHEM 403 fulfills the Physical Science Discovery requirement.

² Another 1 credit Biology course must be taken.

³ Statistics fulfills the Quantitative Reasoning Discovery requirement.

⁴ BIOL 411 fulfills the Biological Science Discovery requirement, Discovery Laboratory requirement, and the Discovery Inquiry requirement.

### BMS-MLS Major Electives

A total of five unique Major Electives is required. Two courses must have a laboratory component.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BMS 623</td>
<td>Histology: Microscopic Cellular Structure and Function</td>
<td>4</td>
</tr>
</tbody>
</table>

If BMS 721 is taken concurrently with BMS 720, it may count as one of the two required Laboratory Electives. However, BMS 721 is not a Major Elective course, so five Major Electives must still be completed, at least one of which includes a lab component, plus four additional Major Electives with or without lab.

### Required for students interested in MLS clinical generalist internship

A 20 credit Clinical Hematology Internship covering advanced instruction in hematology and hemostasis at a local hospital or reference laboratory is also available. Please see your advisor for information.
The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other special student activity). Students may take more than one capstone course. Capstone completion is never displayed on Degree Works; your advisor will certify capstone completion at the time of graduation. Students must have 90 credits or more when completing their capstone requirement. See your advisor for questions about capstones.

### Student Learning Outcomes

- Biomedical Science Major: Medical Microbiology Option (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/biomedical-science-major-medical-microbiology-option
Description

The Biomedical Science: Medical Microbiology (BMS:MM) program explores the world of microorganisms and how they interact with both humans and animals. This major provides you with excellent academic training and laboratory experiences in the areas of microbiology, infectious disease, and public health. BMS:MM graduates are prepared for successful careers in biotechnology or public health, or entry into graduate school or health professional programs.

The BMS:MM program includes course work and laboratories in:

- infectious disease
- immunology
- epidemiology and community health
- molecular biology
- microbial ecology and evolution

Students in the BMS:MM program may participate in a variety of experiential learning activities including:

- independent research experiences in laboratories of UNH biomedical science faculty
- work at the NH Veterinary Diagnostic Laboratory located on the UNH campus
- internships at biotechnology companies in the Greater Boston area
- internships at the NH Department of Public Health Laboratories

BMS:MM graduates have been successful in attaining careers as:

- research scientists/laboratory technicians
  - biotechnology and pharmaceutical companies
  - academic biomedical research programs
  - brewing industry
- primary and secondary school educators (requires additional coursework in education)
- state and federal government employees
  - public health laboratories
  - regulatory agencies (e.g., U.S. Food and Drug Administration)

BMS:MM graduates are prepared for post-baccalaureate education in:

- professional health programs
  - medical school
  - dental school
  - allied health programs (physician assistant, pharmacist, nursing, or pathologist’s assistant programs)
- graduate programs
  - biomedical science
  - public health
  - forensic science

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Students in the Medical Microbiology (MM) option take seven Foundation courses, six Bioscience Core courses, four BMS:MM Core courses, and five BMS:MM Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other University academic requirements must be completed, including those for the Discovery Program and the University Writing Requirement.

A grade of C-minus or better is required in all Bioscience Core, BMS:MM Core, and Major Elective courses.

1 CHEM 403 fulfills the Physical Science Discovery requirement
2 Students applying to health profession schools need a full year of Organic Chemistry, a full year of Introductory Biology, and a full year of English. CHEM 651/CHEM 653 and CHEM 652/CHEM 654 should be taken in place of CHEM 545/CHEM 546; ENGL 502 or ENGL 503 is suggested in addition to ENGL 401.
3 MATH 424B fulfills the Quantitative Reasoning Discovery requirement.
4 PSYC 402 and SOC 402 are acceptable alternatives.
5 BIOL 411 fulfills the Biological Science Discovery requirement, Discovery Laboratory requirement, and the Discovery Inquiry requirement.

BMS-MM Major Elective Courses

A total of five unique major elective courses is required. At least one course must be taken in each of the following subject areas: Host-Microbe Interaction Electives, Molecular Biology Electives, and Community Electives. Two additional courses are taken from any of the major elective subject areas.

6 Required for first-year students only.

BMS-MM Capstone

The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, or other special student activity). Students may take more than one capstone course. Capstone completion is never displayed on Degree Works; your advisor will certify capstone completion at the time of graduation. Students must have 90 credits or more when completing their capstone requirement. See your advisor for questions about capstones.

### Student Learning Outcomes

#### Core Knowledge
- Students will demonstrate an understanding of core knowledge in biochemistry, molecular biology, cell biology, genetics & biomedical sciences.

#### Biomedical Science: Medical Microbiology option
- Students will be able to compare and contrast cellular and non-cellular microorganisms.
- Students will understand basic structure-function relationships of microorganism components, and explain how specific microbial components contribute to a microorganism's growth and survival.

#### Quantitative Literacy, Inquiry & Analysis
- Students will be able to apply the scientific method to examine experimental evidence and draw informed conclusions.
- Students will be able to use graphs to represent scientific data.
- Students will be able to apply statistical methods to interpret scientific data.

#### Critical Thinking & Problem Solving
- Students will be able to apply core knowledge to critically interpret scientific data.

#### Written Communication
- Students will demonstrate written skills to communicate scientific knowledge and experimental data.

#### Oral Communication
- Students will be able to demonstrate oral presentation skills to communicate scientific knowledge and experimental data.

### Biomedical Science Minor

- **https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/minor/biomedical-science**

#### Description

Students who wish to develop focused competencies in the broad area of the biomedical sciences can complement their major academic program with a minor in biomedical science (BMS).

#### Requirements

The minor consists of a minimum of 20 credits, no more than 8 of which can also be used to fulfill major requirements. A grade of C- minus or better is required for all courses counted towards the minor. A "C average" (2.00) is required in courses that the minor department approves. Pass/fail courses cannot be used for the minor. It is the student's responsibility to file an Intent to Minor form with the BMS minor advisor by the end of the junior year and to complete a Certification of Completion of Minor form during their final semester at UNH.

#### Required Courses:
Community and Environmental Planning (CEP)

Community and Environmental Planning students have an appreciation for communities designed for people to live, work and play. Our students study a diverse and interconnected number of topics including perspectives in community development, fundamentals of land use planning, community economics, and natural resource conservation issues. If you want to help communities deal with problems associated with the intersection of our built and natural environments, such as economic development, transportation, affordable housing, green space and local agriculture, than a degree in Community and Environmental Planning may be the right fit for you.

https://colsa.unh.edu/natural-resources-environment

Expected CEP Student Outcomes:

- The foundational education in planning, natural resources, economics and sustainability.
- The fundamental values of diversity, equity, justice, and protection of community and the environment.
- The ability to assess, discuss, and engage others in the problems and potential solutions associated with impacts of land use changes.
- The ability to work with community members and professionals in the design and implementation of community improvements in building and transportation while protecting natural and built resources.

Students may go on to work in the community development or community planning departments in local communities. They may also choose to work in regional planning agencies, or with a state or federal office. Other options include the private sector, such as architectural or development companies, or the non-profit sector, such as with community development corporations or conservation groups. The American Planning Association provides a certification process for the planning profession (American Institute of Certified Planners) after several years of planning experience. Students may also choose to go on to graduate studies in Community and Environmental Planning, Natural Resources Management, Public Administration, or a related field.
**Requirements**

**Degree Requirements**

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Courses with the subject prefix CEP must be completed with a C- or above (6 courses total). In addition to the CEP degree requirements (below), students must complete the University Discovery Program and the University Writing Requirements.

- **EREC 627** Community Economics | 4

**Political Science Course:**

- **POLT 502** State and Local Government | 4
- **POLT 500** or **POLT 523** American Public Policy or American Political Thought | 4
- **POLT 595** Social Politics | 4

**Social Issues Course:**

- **SOC 490** Contemporary Social Problems | 4
- **INCO 505I** or **SOC 565** Social Innovator’s Toolbox or Environment and Society | 4

**Total Credits:** 64-72

*INCO 505I Semester in the City: Boston and SITC @ UNH Internship and INCO 505A Semester in the City Becoming a Problem Solver are taken as a 12-credit internship along with INCO 505B Social Innovator’s Toolbox, which fulfills the Social Issues course requirement.

CEP students are encouraged to have a study away/abroad experience, a dual degree, a minor, or focused area of study which add value to the CEP degree. Consider the following to complete the minimum of 128 credits:

- Semester in the City (if you have not done this in the CEP major)
- EcoQuest New Zealand (16 credits in electives - must qualify with EcoQuest)
- Study Away
- Study Abroad
- Minor as approved by the minor program
- Courses to round out a focus area. It is recommended that you choose upper level courses in NR and EREC.

**Degree Plan**

### Student Learning Outcomes

- Functional fluency in the use of traditional and contemporary planning tools, methods, projects, programs, and regulatory tools.
- Analysis and articulation of social and environmental problems through the use of reliable and valid sources.
- Inventory, assessment, and documentation techniques of existing resources in the built and natural environment.
- Assessment methods of the consequences of proposed changes to the landscape at different scales, from local to regional.
- Communication strategies for a diverse population regarding social and environmental issues related to community planning and development.
- Engagement strategies for various stakeholders in the planning process through a variety of public engagement techniques.
- Development of the comprehensive master planning process and documentation with lay and professional planners.
- Skilled writing and public speaking in order to engage all stakeholders in the planning process.
- Creative thinking and scenario design development and use regarding possible futures.
- Networking with a variety of stakeholders for building a strong social network within and between communities and organizations.
- Ability to work with the various scales of planning – federal, state, regional, local, neighborhood, and site levels.
- Awareness of the opportunities for planning work in government, non-government, non-profit, Cooperative Extension, and the private sector in planning, environmental conservation, architecture, construction, and others.
- Advocacy focus for all residents, businesses, organizations and visitors regardless of income, gender, race, ethnicity, religion or other stratifications within society.
- Applied application of planning education and tangible experience through a community planning internship.

### Community Planning Minor

[https://colsa.unh.edu/nren/cep/community-planning-minor](https://colsa.unh.edu/nren/cep/community-planning-minor)

### Description

Planning is a multidisciplinary profession that requires an understanding of social, economic, and environmental connections to land use change. Students may supplement their major with the minor in community planning to enhance their skills to work with communities for improved sustainability.

### Requirements

- Required: 20 hours of credit
- A grade of C- or better in each of the 5 courses.
- No more than 8 credits used to satisfy major requirements may be used for the minor.
- Credit/fail courses may not be used for the minor.
Ecogastronomy

The Peter T. Paul College of Business and Economics and the College of Life Sciences and Agriculture offer undergraduate students the opportunity to pursue a dual major in EcoGastronomy. The dual major requires completion of the EcoGastronomy program and any other major.

The EcoGastronomy program prepares students for professions within our rapidly evolving food community—from farm to fork to nutrition and health outcomes—where ever-greater integration of agriculture, food, and nutrition requires a broad perspective and a specific blend of skills and knowledge. The dual major in EcoGastronomy is international by providing a context for studying “gastronomy” in Ascoli-Piceno, Italy.

International Experience

All students who declare the dual major in EcoGastronomy spend a full semester abroad, most likely during their junior year. Students will study in Ascoli Piceno, Italy. (spring, summer or fall semester).

Dual majors will complete a series of upper-level core courses such as history of cuisine and gastronomy, history of food, aesthetics, food law, food technology processes, cross-cultural comparisons, and language.

The study abroad credit requirement is 8 credits.

Portfolio

Students will be required to submit a portfolio annually to the director, and a cumulative portfolio to the instructor of their capstone course for final assessment.

The courses in the dual major program are multidisciplinary, taught by faculty from different departments in the University. They are designed to integrate UNH strengths in sustainable agriculture, hospitality management, and nutrition to offer a unique academic program emphasizing the interdisciplinary, international, and experiential knowledge that connects all three fields. The program is experiential by requiring students to work in the field growing food, in the kitchen preparing food, and developing the skills associated with both. They will also experience the local food cultures and get firsthand experience on the issues of food security locally, regionally, and globally.

Students who wish to declare a dual major in EcoGastronomy must have a cumulative grade-point average of 2.5; have declared, or be prepared to declare, a disciplinary major; and complete the Introduction to EcoGastronomy course (ECOG 401 Introduction to Ecogastronomy) with a grade of C or better.

ECOG 401 Introduction to Ecogastronomy is prerequisite for study abroad. All required classes and the elective are a pre/corequisite for the senior EcoGastronomy capstone course, ECOG 701 EcoGastronomy Capstone. Exceptions are possible with a late declaration of the dual major. All foreign experiences must be pre-approved by the EcoGastronomy director.

The completion of the dual major requires no additional credits for graduation beyond the 128 required of all UNH students. All coursework required for EcoGastronomy must be completed with a grade C or better. For information, contact the dual major in EcoGastronomy, PAUL 101E, (603) 862-3327, ecog.info@unh.edu.

and natural resource economics, agricultural economics, or community economics. One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). In addition, students must satisfy University requirements, including those for the Discovery Program.

Upon graduation, students are qualified for a wide variety of opportunities. Private business, public institutions, and government agencies currently have a strong demand for specialists trained in natural resource development; land and water use policy; natural resource and small business management; agricultural, fisheries, and forestry marketing; and community development. In many cases, students may wish to improve their qualifications by pursuing more specialized graduate studies.

1 EREC 411 cannot be used to satisfy the Social Science Discovery program requirement; or taken for credit if credit has been earned for ECON 402.

2 Offered once a semester by Economics Department

Students are encouraged to consider adding additional courses from the economics (ECON) department to their program. In special cases, students may petition to have these courses, particularly ECON 706 and ECON 726, substitute for major EREC electives.

1 At least one Discovery course must have the Inquiry attribute.
2 The student must take at least 2 Writing-Intensive courses in addition to any of the following: EREC 708 Environmental Economics, EREC 756 Rural and Regional Economic Development, and CEP 777 Topics in Community Planning.

Student Learning Outcomes

Students will be able to:

- Describe and explain the ecological and societal value of biodiversity, sustainability, and environmental stewardship;
- Master mathematical, statistical, and study design knowledge and skills, and use state-of-the-art software, hardware, and analytical techniques relevant to environmental conservation and sustainability;
- Use principles of ecology, economics, sustainability, and policy science to solve real-world environmental problems;
- Communicate effectively to peers within the environmental community and with audiences outside of the discipline.

Environmental and Resource Economics Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/environmental-resource-economics

Description

The Environmental and Resource Economics minor aims to provide students majoring in other disciplines with an understanding of environmental and resource economics, and their uses in personal, social, business and government decision-making. Students learn how to apply economic analyses in evaluating environmental and resource problems, identifying their causes and examining alternative solutions. The minor also offers courses that teach techniques useful for decision making by local and regional communities. Students also obtain skills in the management of agricultural and natural-resource business firms.

Requirements

Minor Requirements

- Complete 5 Courses with a minimum of 20 credits from the courses listed below, with a grade of C- or better.
- No more than 8 credits used to satisfy major requirements may be used for the minor.
- Pass/Fail courses may not be used for the minor

1 EREC 411 cannot be taken for credit if credit has been earned for ECON 402.
Environmental Conservation and Sustainability

Mission of the ECS Major

Graduates of the environmental conservation and sustainability major understand the complexity of social-ecological systems and meet environmental challenges in innovative ways. ECS students understand ecological principles and comprehend the connections between natural resource and social systems (history, economics, law, policy, international perspectives). They integrate scientific information and human values and articulate problems in ways that point to solutions leading to a sustainable future.

ECS graduates have the theoretical, methodological, technical, and practical skills necessary to solve complex problems. They work collaboratively and across disciplinary boundaries and at all scales from the local to the international. Their critical thinking and communication skills allow them to serve as liaisons among diverse interest groups and to design, implement, and facilitate policy and action toward a sustainable future.

ECS graduates are environmental citizens, sustainability advocates, and leaders for constructive change. They typically serve as policy analysts, sustainability officers, resource managers, journalists, scientists, and teachers in business, non-profit organizations, and government agencies, including the Peace Corps and Ameri-Corps. Many ECS graduates attend graduate or professional programs following graduation.

Environmental Conservation and Sustainability Major (B.S.)

https://colsa.unh.edu/natural-resources-environment/program/bs/environmental-conservation-sustainability-major

Description

The ECS major curriculum is comprised of core requirements providing integrative courses in both environmental conservation and sustainability, along with a foundation in biology, ecology, physical and social science, and the basic tools and skills applied to problem solving. These core requirements are typically fulfilled in the first two years. Beginning in their junior year, ECS students, in consultation with their advisers, create a course focus area based on an ecological system or natural resource of their choosing. The focus area provides advanced study in ecology and natural resources; social sciences; tools, skills, and/or natural history and should reflect the student’s interests and future goals. Additionally, each ECS student completes a practicum experience and a capstone option.

The ECS major provides the opportunity for students to gain a common foundation of knowledge and skills emphasizing integration and critical thinking, while allowing for sufficient flexibility to pursue their interests and passions within a large and complex field of study. The design of the curriculum will allow each student at least four, and as many as six, free electives, which they may fulfill as they choose. Many students pursue international experiences, such as the UNH EcoQuest program in New Zealand, add a minor or dual degree (such as the dual degree in global studies), and/or pursue research opportunities with our faculty or through another of UNH’s undergraduate research opportunity programs.

Statistics: Select one of the following 4
Select two to five courses: no more than one course may be at the 400 or 500 level. Additional courses must be at the 600 or 700 levels.

Social Sciences
Select two to five courses: no more than one course may be at the 400 or 500 level. Additional courses must be at the 600 or 700 levels.

- CEP 415 Community Development Perspectives
- CEP 508 Applied Community Development
- CEP 507 Introduction to our Energy System and Sustainable Energy
- CEP 606 International Energy Topics
- CEP 643 Economics of Forestry
- CEP 662 Environmental Policy, Planning and Sustainability in New Zealand
- CEP 720 International Environmental Politics and Policies for the 21st Century
- CEP 724 Resolving Environmental Conflicts
- CEP 784 Sustainable Living - Global Perspectives
- CEP 787 Advanced Topics in Sustainable Energy
- ANTH 695 Globalization and Global Population Health
- CEP 614 Fundamentals of Planning

Additional Tools & Skills and Natural History
Select at least one course

- ENGL 502 Professional and Technical Writing
- enr 503 Persuasive writing
- engl 521 Nature Writers

Presentation Skills: Select one of the following

- GEOS 673 Geographic Information Systems
- GEOG 673 Systems Thinking for Sustainable Solutions
- ZOOL 708 Stream Ecology
- ZOOL 726 Conservation Behavior

Focus Area
Select seven total courses to create a focus area addressing an environmental issue, ecological system, or natural resource (see below). Ecology and Natural Resources:

- Select one to four courses: no more than one course may be at the 400 or 500 level. Additional courses must be designed in close consultation with the adviser. Courses from the ecology and natural resources category, along with a combination of courses in the social sciences; tools, skills, and natural history categories; and any additional courses from the ecology and natural resources category, may be applied in consultation with the adviser and ECS program coordinator.

- Total Credits 28

- Presentation Skills: Select one of the following
- ENG 502 Professional and Technical Writing
- ENG 503 Persuasive Writing
- ENG 521 Nature Writers

- CEP 673 Green Real Estate
- ECON 665 Intermediate Microeconomic Analysis
- ECON 645 International Economics
- ECON 668 Economic Development
- ECON 706 Economics of Climate Change
- EERE 672 Introduction to Natural Resource Economics
- EERE 665 Land Economics Perspectives: Uses, Policies, and Taxes
- EERE 672 Community Economics
- EERE 680 Agricultural and Food Policy
- EERE 708 Environmental Economics
- EERE 756 Rural and Regional Economic Development
- GEOG 673 Political Ecology
- HIST 618 American Environmental History
- MAR 705 Introduction to Marine Policy: Understanding US Ocean, Coastal and Great Lakes Policy
- POLT 751 Comparative Environmental Politics and Policy
- SAFS 672 Pathways to Sustainable Agriculture and Food Systems in Aotearoa New Zealand
- SAFS 673 Agricultural Production and Business Practice in Aotearoa New Zealand
- SOC 665 Environmental Sociology
- SOC 730 Communities and the Environment
- TOUR 400 Introduction to Tourism

Senior Capstone Options
The ECS major capstone experience may be filled by any one (1) of the following options:

- Option 1: Leadership for Sustainability
- Option 2: Both seminars must be scheduled. At least one must be taken in the senior year.
- Option 3: Applied Directed Research in New Zealand (NZ Directed projects, if taken in the senior year)
- Option 4: Directed projects fulfilling one of the following: NR 799, McNair Research Theses, Hamel Center Programs (HROP, SURF USA, SURF Abroad, etc.) may be applied in consultation with the adviser and ECS program coordinator.

Work Experience
- NR 600 Work Experience

Total Credits 60

1 The focus area is based upon at least one course in the ecology and natural resources category, along with a combination of courses in the social sciences; tools, skills, and natural history categories; and any additional courses from the ecology and natural resources category reflecting the student’s interests and future direction. Focus areas should be designed in close consultation with the adviser. Courses used to fulfill core requirements may not be used in the focus area.
If NR 663 Applied Directed Research in New Zealand is taken in the junior year or earlier, then one Critical Issues seminar (2cr) or Leadership for Sustainability must be taken in the senior year to fulfill the capstone requirement.

Each ECS major will engage in a practical experience reflecting their interests and goals. The choice of the experience will be made in conjunction with the adviser and may occur any time beginning with the sophomore year.

1 All choices for the Ecological Principles requirement except for SAFS 502 are fall courses.
2 The Statistics, Physical Science, Writing Skills and Presentation Skills requirements may be taken in either the Fall or Spring Semester of the second year.
3 Work experience, internship, etc may be scheduled any time beginning in the second year.
4 One of the 2 credit capstone seminars may be taken in either the fall or spring of the junior year.
5 One 2 credit seminar may be taken in each of the Fall and Spring semesters of the Senior Year OR NR 786 may be taken in the Fall semester of the Senior Year.

### Student Learning Outcomes

Students will be able to:

- Describe and explain the interactions among physical, biological, chemical, and human components of the environment;
- Formulate tests of environmental questions, acquire data, and apply scientific methods to answer these questions;
- Describe and explain the ecological and societal value of biodiversity, sustainability, and environmental stewardship;
- Use principles of ecology, economics, sustainability, and policy science to solve real-world environmental problems;
- Communicate effectively to peers within the environmental community and with audiences outside of the discipline.
Environmental Conservation and Sustainability Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/environmental-conservation-sustainability

Description

The minor in Environmental Conservation and Sustainability allows students from diverse majors across all UNH colleges to incorporate the theory and practice of sustainable resource use into their 4-year baccalaureate studies. Students take required introductory courses in both conservation and sustainability and then can fill out their minor with choices from ecology, social science and management, and a range of advanced topics. As well, students who participate in the EcoQuest Study Abroad Program can apply their courses to the minor.

Requirements

20 credits total required

- A grade of C or better in each of the 5 courses.
- No more than 8 credits used to satisfy major requirements may be used for the minor
- Credit/fail courses may not be used for the minor.

1 NR 795 Investigations requires working with an individual ECS faculty member on a special problem/issue.

Environmental Sciences

The College of Engineering and Physical Sciences (CEPS) and the College of Life Sciences and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.

The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the Department of Earth Sciences in CEPS, and the ecosystems and soil and watershed management options are both managed by the Department of Natural Resources and the Environment in COLSA.

Description

The College of Life Sciences and Agriculture (COLSA) and the College of Engineering and Physical Sciences (CEPS) jointly offer a bachelor of science degree in environmental sciences. Environmental science is an interdisciplinary field concerned with the interaction of biological, chemical, and physical processes that shape the environment, and control the response of natural systems to human activities. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, experience working in interdisciplinary teams to apply this understanding, and the ability to communicate effectively with both scientific and lay audiences. While in this program, students will acquire significant experience and comprehension of powerful analytical tools to be used in professional environmental science positions as well as a basic understanding of environmental policy. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. Program faculty emphasize teaching and research in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, global change, hydrology, plant ecology, soil science, and water resource management among many other fields.

Employment opportunities include environmental consulting firms; educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants, the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment.

The Program has four options, and specific course requirements for the major vary by option. The ecosystems and soils and watersheds options are both managed by the Department of Natural Resources and the Environment in COLSA, and the geosystems and hydrology options are both managed by Earth Sciences in CEPS.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.
Central to the function of environmental systems, the mathematical understanding of the physical, chemical and biological processes performance on exams, labs, and written assignments will be included. This will include content offered in the courses specified in the curriculum as assessed by key learning objectives. The primary learning outcome for the environmental sciences program will be that students will master the content offered in the courses specified in the curriculum as assessed by performance on exams, labs, and written assignments. This will include an understanding of the physical, chemical, and biological processes central to the function of environmental systems, the mathematical concepts required to understand, explain, and predict those processes, and the ability to determine the significance of results, both in terms of statistical probability and impact on the larger world.

The learning process leading to this mastery will require that students will have:

- Knowledge of how physical, chemical, and biological factors interact with human activities to shape the environment;
- Proficiency with environmental techniques including field, lab, GIS, or modeling;
- The ability to solve environmental problems;
- The ability to communicate orally or in writing about environmental dynamics.

Environmental Sciences Major: Soil and Watersheds Option (B.S.)

https://colsa.unh.edu/natural-resources-environment/program/bs/environmental-sciences-major-soil-watersheds-option

### Description

The College of Life Sciences and Agriculture (COLSA) and the College of Engineering and Physical Sciences (CEPS) jointly offer a bachelor of science degree in environmental sciences. Environmental science is an interdisciplinary field concerned with the interaction of biological, chemical, and physical processes that shape the environment, and control the response of natural systems to human activities. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, experience working in interdisciplinary teams to apply this understanding, and the ability to communicate effectively with both scientific and lay audiences. Capstone: NR 663 (EcoQuest Senior Year)(W), or NR 786, or NR 795, or NR 799, or approved research experience, or approved internship. Every student must complete a capstone experience senior year, or during the summer before senior year if at least 90 credit hours have been completed.

NR 791 —Preparation for Capstone (1 credit, pass/no credit) is offered every spring. While not required for graduation, it is recommended for second semester juniors who need guidance in terms of developing a capstone project and completing the Capstone Contract.

**a. A Contract form provided by the Program must be completed and signed by the student, the advisor, the program coordinator, and the capstone mentor (faculty or off-campus) before the end of Junior Year.**

**b. A signed Capstone Experience Evaluation form must be handed in to your advisor by the end of Senior year in order to graduate.**

**Individualization Your Education (19 Credits)**

Program Advisors will help students select additional courses from across the campus that relate to that student's areas of intellectual interest, and assist with the completion of minors, dual majors, study abroad, programs, research projects, internships, etc.

**Total Credits**

1. Many students enroll in the EcoQuest program (a study abroad opportunity in New Zealand), which satisfies the policy requirement, and capstone requirement if taken senior year.

2. NR 791 Preparation for Capstone - is offered every spring. While not required for graduation, it is recommended for second semester juniors.
who need guidance in terms of developing a capstone project and completing the Capstone Contract.

### Student Learning Outcomes

**Key Learning Objectives:** The primary Learning Outcome for the Environmental Science Program will be that students will master the content offered in the courses specified in the curriculum as assessed by performance on exams, labs and written assignments. This will include an understanding of the physical, chemical and biological processes central to the function of environmental systems, the mathematical concepts required to understand, explain and predict those processes, and the ability to determine the significance of results, both in terms of statistical probability and impact on the larger world.

The learning process leading to this mastery will require that students will have:

- Knowledge of how physical, chemical, and biological factors interact with human activities to shape the environment;
- Proficiency with environmental techniques including field, lab, GIS, or modeling;
- The ability to solve environmental problems;
- The ability to communicate orally or in writing about environmental dynamics.

### Forestry

Forests are central to meeting today's challenges of climate change, biodiversity, and the sustainability of rural communities and economies. The forestry program at the University of New Hampshire prepares its graduates with the scientific and managerial knowledge and skills to address these environmental and resource management problems at local, regional, and global scales.

**Forestry** is the art and science of managing and understanding forests, their use, and their conservation. It embraces both natural and human dimensions of sustainability. Forestry education at UNH focuses on sustainable management of forests for biodiversity, productivity, and health, based on a multidisciplinary approach. The program's goal is to provide a sound professional preparation, a broad general education, and the flexibility to cultivate special abilities and interests. Students are encouraged to develop an area of concentration or to complete a minor in consultation with their academic adviser. The Bachelor of Science in Forestry degree (B.S.F.) at UNH is accredited by the Society of American Foresters (SAF). The SAF is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting body for forestry in the United States.

A UNH forestry degree can be the gateway to a rewarding profession. UNH forestry graduates manage forests to provide wildlife habitat and recreational opportunities, care for soil and water resources, protect and restore forest ecosystems, and assure a sustainable supply of forest products. They are employed by private industry, public agencies, public interest groups, education institutions, research organizations, and consulting firms. Many students enter graduate school for advanced study in forest biology or management while others have found exciting international opportunities.

**Programs**

- Forestry Major (B.S.F.) (p. 355)
- Forestry Minor (p. 357)

**Faculty**

https://colsa.unh.edu/natural-resources-environment/people

**Forestry Major (B.S.F.)**

https://colsa.unh.edu/natural-resources-environment/program/bsf/forestry-major

**Description**

Forestry is an interdisciplinary profession, embracing the sustainable management of forest ecosystems for productivity, biodiversity, and health. The Forestry program's goals are to provide a solid professional preparation with a strong field component, founded in a broad general education, and with the flexibility to allow students to pursue special abilities and interests. The Bachelor of Science in Forestry (B.S.F.) degree is accredited by the Society of American Foresters.

Forestry graduates help manage and conserve public and private forests, addressing major environmental challenges including climate change, biodiversity protection, and sustainable resource management. They use science, planning, and geospatial technology to protect and restore forest ecosystems, ensure a sustainable forest product industry, provide wildlife habitat and recreational opportunities, and conserve soils and watersheds.

**Program Mission, Goals and Objectives**

The mission of UNH's Department of Natural Resources and the Environment, of which the Forestry Program is an integral part, is to serve as an educational center for the scholarly study of environmental and social sciences, and their application to the policy and management of natural resources from local to global scales. This is accomplished through education, research and outreach. This mission reflects UNH's larger mission to provide comprehensive, high-quality undergraduate programs and graduate programs of distinction, including a strong commitment to serving the public good and promoting the excitement of discovery among faculty and students.

The goal of the Forestry Program is to train natural resource professionals to sustainably manage forested landscapes for diverse objectives and in ways that balance changing social, cultural, economic, and environmental interests and priorities.

Our educational objectives are to:

1. Develop a strong knowledge base about the ecology and dynamics of forest ecosystems, including interactions between trees, wildlife, insects, soils, water, humans, and other ecosystem components.
2. Understand how different policies and management decisions affect forest dynamics over short to long time scales, and on different spatial scales.
3. Cultivate the necessary skills to manage forests for diverse objectives and to assess, respect, and balance the interests of different groups to achieve societal benefits.

4. Be able to critically evaluate scientific information and integrate this with professional experience and changing societal values to support adaptive management of forest resources.

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

*Major GPA requirements as indicated.

Total Credits 130

All forestry majors must satisfy the B.S.F. requirements and all Discovery Program requirements. Students must satisfy the Inquiry requirement of the Discovery Program by completing an Inquiry or Inquiry-attribute course. Seniors may also satisfy the capstone experience requirement of the Discovery Program. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course (NR 745 Forest Management), created work or product, or some form of experiential learning (e.g., honors thesis, mentored research project, and other special student activity). Departments are responsible for certifying that graduating seniors have met the capstone requirement for their majors.

**Student Learning Outcomes**

- Identify the major species of plants and wildlife and their distribution and habitat requirements.
- Understand the ecological concepts related to the structure, composition, and dynamics of forest ecosystems, including succession, competition, productivity, nutrient cycling, stand development, and wildlife populations.
- Understand soil properties, hydrology, water resources, and watershed functions.
- Understand how forest health and dynamics are impacted by different human and natural disturbances, including pests and diseases, climate change, pollutants, extreme climate events, management interventions.
- Design and conduct forest inventories using appropriate sampling methods and units of measurement.
- Analyze and interpret forest inventory data, and to use the information to project future forest stand development processes and tree conditions.
- Ability to use a variety of spatial analysis tools to assess landscape scale characteristics and produce maps of forest resources distribution.
- Explain forest development trajectories in both written and oral form and apply appropriate computer models and assessment techniques.
- Understand forest policy and the processes that influence policy development.
- Understand and apply economic principles to assessing the financial opportunities and risks of forestry operations.
- Understand how federal, state, and local laws and regulations govern the practice of forestry.
- Understand the administration, ownership, and organization of forest management enterprises.
- Integrate and effectively communicate the technical, financial, human resources, and legal aspects of administering public and private enterprises.
- Develop management plans that effectively integrate and balance multiple landowner (or stakeholder/societal) objectives and the ecological conditions and constraints of the biophysical system.
- Analyze the economic, environmental and social consequences of forest resource management strategies and decisions, and to evaluate their tradeoffs.
- Apply appropriate decision-making tools and techniques to evaluate alternative forest management practices and plans.
- Demonstrate effective problem-solving and teamwork skills, professional and ethical conduct, and respect for diverse values and interests.
- Describe and explain to different audiences in both written and oral form alternative options for managing forest resources to achieve multiple objectives.

**Forestry Minor**

https://colsa.unh.edu/natural-resources-environment/program/minor/forestry

**Description**

The minor in Forestry serves as a concentrated study, beyond a student’s primary major, that allows students to explore their interest in forest ecology and management, and to build skills that can help launch a career in forest conservation.

**Requirements**

Students interested in a minor in Forestry must complete a minimum of 5 courses and 20 credits with a grade of C- or better. Pass/Fail courses may not be used for the minor. Up to 8 credits can be used to satisfy both major and minor requirements.

Genetics (GEN)

Genetics and genomics are central to all aspects of the life sciences. Genetics is the branch of biology that deals with heredity, variation of genes among individuals in a population, and the expression and regulation of genes. Genomics focuses on determining the structure and function of genomes and includes the mapping of genes, high-throughput DNA sequencing, and investigating the molecular mechanisms by which genetic and environmental factors contribute to phenotypes. Every day, scientists are using the tools of genetics and genomics to make exciting discoveries in fields such as molecular medicine, cancer research, biodiversity, and sustainability.

Within the Genetics (GEN) major, students may choose the Genomics option (Genetics:Genomics). Genetics provides a solid foundation in biology, biochemistry, microbiology, chemistry, physics, math, and cell biology. Students also take advanced courses in molecular genetics, bioinformatics, molecular evolution, and genomics. Genetics students receive additional training in wet lab techniques. The Genetics:Genomics option provides additional training in genomics, evolutionary genetics, and computer programming for bioinformatics.

There are many opportunities for interested students to gain research experience through formal or informal research projects in faculty members' laboratories. The genetics faculty conduct research on diverse topics such as evolution, gene structure and function, host-microbe interactions, genome sequencing and analysis, heredity, and diversity in populations. Faculty research areas encompass microbial, plant, and animal genetics. Genetics faculty are committed to mentoring undergraduate students in independent research experiences in their laboratories, which provide students with exposure to and training in cutting-edge research technologies.

Students with degrees in genetics or genomics are well prepared to apply to graduate schools (e.g., for training as genetic counselors or researchers) or professional schools, or to pursue careers in biotechnology companies, forensics labs, hospitals, university research laboratories, or government agencies. Two additional courses are needed for application to professional programs (e.g., medical or dental school). Graduates may also be employed in fields such as management, sales, marketing, regulatory affairs, technical writing, or science journalism. With supplementary courses in education, graduates with a bachelor's degree in genetics or genomics can teach at the elementary, middle, or high school level.

Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions should visit the Pre-Professional Health Programs Advising website or visit the office in person. Requirements for specific types of professional schools (e.g., medical, dental, physician assistant, pharmacy, etc.) are available from Pre-Health Advising. Students interested in veterinary medicine should consult the Pre-Veterinary Medicine Program. Many of the prerequisite courses required by professional schools are also requirements of the genetics major, but students should consult with their faculty adviser to create a plan of study that best prepares them for pursuing a career in one of these health professions.

Genetics Major (B.S.)

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/genetics-major

Description

The Genetics program (GEN) explores the world of genetics and genomics in plants, animals, and microbes. Genetics majors are interested in understanding how DNA, along with the environment, specifies simple traits like hair color to more complex traits like high blood pressure, diabetes, and mental illness. The Genetics faculty strongly value hands-on learning and many GEN students conduct undergraduate research under the supervision of our faculty. GEN graduates are prepared for successful careers in the biotechnology fields or for entry into a variety of graduate school, genetic counseling, or health professional programs.

The Genetics program offers coursework and laboratories in:

- molecular genetics
- bioinformatics
- human genetics
- comparative genomics
- plant genetics
- microbial genetics and evolution
- population and evolutionary genetics

Students in the Genetics program may participate in a variety of experiential learning activities including:

- independent research experiences in laboratories of UNH faculty
- work at the Hubbard Center for Genome Studies or Research Computing Center
- internships at biotechnology companies in the Greater Boston area
- internships with genetics counselors at area medical centers

GEN graduates have been successful in attaining careers as:

- research scientists and laboratory technicians in
  - biotechnology and pharmaceutical companies
  - academic research programs
  - forensics
  - biomedical research centers & medical schools
  - government agencies
- genetic counselors
• educators
• technical support associates

**GEN graduates are prepared for further education in:**

• professional health programs
  • genetic counseling
  • medical school
• dental school
• allied health programs (physician assistant, pharmacist, nursing or pathologist’s assistant programs)
• veterinary school
• graduate programs such as
  • Genetics and Genomics
  • Integrative Biology
  • Neurogenomics
  • Molecular Biology
  • Microbiology
  • Environmental Sciences
• Public Health
• Computer Science

### Requirements

#### Degree Requirements

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

#### Major Requirements

Students majoring in genetics take seven Foundation courses, six Bioscience Core courses, four Genetics Core courses and four Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. In addition, all other University requirements must be completed, including those for the Discovery Program and the University Writing Program.

A grade of C-minus or better is required in Statistics and all Bioscience Core, Genetics Core, and Major Elective courses.

1 Students applying to health profession schools need a full year of Organic Chemistry, a full year of Introductory Biology, as well as a full year of English. CHEM 651/CHEM 653 and CHEM 652/CHEM 654 should be taken in place of CHEM 545/CHEM 546; ENGL 502 or ENGL 503 in suggested in addition to ENGL 401. See Pre-Professional Health Program Advising.

2 Fulfills Quantitative Reasoning Discovery requirement

3 Fulfills Biological Science Discovery requirement, Discovery Inquiry requirement, and Discovery laboratory requirement

4 Fulfills Physical Science Discovery requirement

#### Electives

Four unique major electives are required from the below categories.

5 Where listed, this course may fulfill another category (Genetics Core, Laboratory-Based Major Elective, or Population/Evolutionary Genetics Major Elective), IF students take one additional Bioscience Major Elective.

6 Must be a research project with a genetics focus.

1 Fulfills Physical Science Discovery requirement
The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a research project with a genetics focus. Students may take more than one capstone course. Capstone completion is never displayed on Degree Works; your advisor will certify capstone completion at the time of graduation. Students must have 90 credits or more when completing their capstone requirement. Contact your advisor for questions about capstones.

### Fourth Year

#### Fall
- **Genetics Core course** 4
- **Major Elective (Laboratory based)** 4-5
- **Major Elective (Bioscience/possible Capstone)** 4-5
- **Elective (any course)** 4

| Credits | 16-18 |

#### Spring
- **Major Elective (Bioscience)** 4
- **Elective (any course)** 4
- **Elective (any course)** 4

| Credits | 12 |

**Total Credits** 128-130

---

### Student Learning Outcomes

**SLO: Core Knowledge in Genetics**
- Students will be able to describe DNA, its role, structure, how DNA is packaged in the chromosomes in terms of histones, nucleosomes, and chromatin, including its discovery, how has modern genomics influenced, and differences between prokaryotes and eukaryotes.
- Students will be able to describe the central dogma of molecular biology, including specific details related to replication, transcription, and translation.
- Students will be able to define and describe evolution, how drift, gene flow, mutation, natural selection, recombination, within a population genetic framework, may result in evolution.
- Students will be able to describe the differences between mitosis and meiosis and how errors in these processes may effect phenotype, cause disease, etc.
- Students will be able to evaluate how genes and the environment can interact to produce a phenotype, including allelic differences and changes in gene regulation.
- Students will be able to describe the concept of deep time, and how comparing genes and genomes allows us to understand evolution and relatedness between species.
- Students will be able to use pedigrees to determine mode of inheritance of a trait.
- Students will be able to describe ethical issues related to modern genomics and implications for health care and insurance, interpersonal relationships, family planning, etc.
- Students will be able to describe high-throughput sequencing, and how it has changed the practice of modern genetics.

**SLO: Quantitative Literacy, Inquiry & Analysis**
- Students will be able to apply the scientific method to examine experimental evidence and draw informed conclusions.
- Students will be able to use graphs to represent scientific data.
- Students will be able to apply statistical methods to interpret scientific data.

**SLO: Critical Thinking & Problem Solving**
- Students will be able to use data to troubleshoot an unexpected outcome.

**SLO: Written Communication**
- Students will be able to apply core knowledge to critically interpret scientific data.

**SLO: Oral Communication**
- Students will be able to demonstrate oral presentation skills to communicate scientific knowledge and experimental data.

---

### Genetics Major: Genomics Option (B.S.)

[https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/genetics-major-genomics-option](https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/bs/genetics-major-genomics-option)

#### Description

The **Genetics:Genomics program (GEN)** explores the world of genetics and genomics in plants, animals, and microbes. Genomics is the study of genomes and includes topics like DNA structure and function, high-throughput sequencing, and computational comparison of the genomes of different organisms. The Genetics faculty strongly value hands-on learning and many GEN students conduct undergraduate research under the supervision of our faculty. GEN graduates are prepared for successful careers in biotechnology fields or for entry into a variety of graduate school or health professional programs.

The **Genetics program offers course work and laboratories in:**
- molecular genetics
- bioinformatics
- human genetics
- comparative genomics
- plant genetics
- microbial genetics
- population and evolutionary genetics

**Students in the Genetics program may participate in a variety of experiential learning activities including:**
- independent research experiences in laboratories of UNH faculty
- work at the Hubbard Center for Genome Studies or Research Computing Center
- internships at biotechnology companies in the Greater Boston area
- internships with genetics counselors at area medical centers

**GEN graduates have been successful in attaining careers as:**
- research scientists and laboratory technicians in
  - biotechnology and pharmaceutical companies
  - academic research programs
  - forensics
  - biomedical research centers & medical schools
  - government agencies
• genetic counselors
• educators
• technical support associates

**GEN graduates are prepared for further education in:**

• professional health programs
• genetic counseling
• medical school
• dental school
• allied health programs (physician assistant, pharmacist, nursing or pathologist’s assistant)
• vet school

• graduate programs such as
  • Genetics and Genomics
  • Integrative Biology
  • Neurogenomics
  • Molecular Biology
  • Microbiology
  • Environmental Sciences
  • Public Health
  • Computer Science

### Requirements

**Degree Requirements**

**Minimum Credit Requirement:** 128 credits

**Minimum Residency Requirement:** 32 credits must be taken at UNH

**Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

*All Major, Option and Elective Requirements as indicated.

### Major Requirements

Students majoring in Genetics with the Genomics option take seven Foundation courses, six Bioscience Core courses, four Genetics Core courses and five Major Elective courses. One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. In addition, all other University requirements must be completed, including those for the Discovery Program and the University Writing Program.

A grade of C-minus or better is required in statistics and all Bioscience Core, Genetics Core, and Major Elective courses.

### Code | Title | Credits
---|---|---
**Foundation Courses**
CHEM 403 | General Chemistry 1 | 4
CHEM 404 | General Chemistry II | 4
CHEM 545 | Organic Chemistry | 4
& CHEM 546 | and Organic Chemistry Laboratory 2 | 5
MATH 424B | Calculus for Life Sciences 3 | 4
Biol 528 | Applied Biostatistics I | 4

| Code | Title | Credits |
---|---|---|
**Bioscience Core Courses** | | |
BIOL 411 | Introductory Biology Molecular and Cellular 4 | 4
BIOL 412 | Introductory Biology Evolution, Biodiversity and Ecology | 4
GEN 604 | Principles of Genetics | 4
BMS 503 | General Microbiology | 5
& BMS 504 | and General Microbiology Laboratory | |
BMIC 605 | Principles of Cell Biology | 4
BMIC 668 | General Biochemistry | 5
& BMIC 699 | and General Biochemistry Lab | |

1. Fulfills Physical Science Discovery requirement
2. Students applying to health profession schools need a full year of Organic Chemistry, a full year of introductory Biology, and a full year of English. CHEM 651/CHEM 653 and CHEM 652/CHEM 654 should be taken in place of CHEM 545/CHEM 546; ENGL 502 or ENGL 503 is suggested in addition to ENGL 401. See Pre-Professional Health Program advising.

3. Fulfills Quantitative Reasoning Discovery requirement

4. Fulfills Biological Science Discovery requirement, Discovery Inquiry requirement, and Discovery laboratory requirement

### Electives

A total of five unique major electives are required.

| Code | Title | Credits |
---|---|---|
**Required Electives** | | |
GEN 712 | Programming for Bioinformatics | 5
GEN 721 | Comparative Genomics | 4

| Code | Title | Credits |
---|---|---|
**Population/Evolutionary Genetics Electives: Select two** | | |
GEN 705 | Population Genetics | 5
& GEN 725 | and Population Genetics Lab 5 | |
GEN 713 | Microbial Ecology and Evolution | 4
GEN 715 | Molecular Evolution | 4
GEN 772 | Evolutionary Genetics of Plants | 4

| Code | Title | Credits |
---|---|---|
**Bioscience Electives: Select one** | | |
GEN 704 | Genetics of Prokaryotic Microbes 5 | 5
GEN 705 | Population Genetics | 5
& GEN 725 | and Population Genetics Lab 5 | |
GEN 706 | Human Genetics | 4
GEN 713 | Microbial Ecology and Evolution | 4
GEN 715 | Molecular Evolution | 4
GEN 717 | Molecular Microbiology | 5
GEN 771 | Molecular Genetics | 4
GEN 772 | Evolutionary Genetics of Plants | 4
GEN 774 | Techniques in Plant Genetic Engineering and Biotechnology | 4
GEN 795 | Investigations in Genetics (4 credit minimum) 6 | 1-4
GEN 799 | Senior Thesis (4 credit minimum) 5 | 1-4
GEN 799H | Honors Senior Thesis (4 credit minimum) 6 | 1-4
Capstone
The capstone explores areas of interest based on the integration of prior learning. The capstone requirement may be satisfied through a course, created work or product, or some form of experiential learning (e.g., honors thesis, mentor research project, or other special student activity). Students may take more than one capstone course. Capstone completion is never displayed on Degree Works; your advisor will certify capstone completion at the time of graduation. Students must have 90 credits or more when completing their capstone requirement. Contact your advisor for questions about capstones.

- Students will be able to describe ethical issues related to modern genomics and implications for health care and insurance, interpersonal relationships, family planning, etc.
- Students will be able to describe high-throughput sequencing, and how it has changed the practice of modern genetics.

**SLO: Quantitative Literacy, Inquiry & Analysis**

- Students will be able to apply the scientific method to examine experimental evidence and draw informed conclusions.
- Students will be able to use graphs to represent scientific data.
- Students will be able to apply statistical methods to interpret scientific data.

**SLO: Critical Thinking & Problem Solving**

- Students will be able to use data to troubleshoot an unexpected outcome.
- Students will be able to apply core knowledge to critically interpret scientific data.

**SLO: Written Communication**

- Students will demonstrate written skills to communicate scientific knowledge and experimental data.

### Genetics Minor

https://colsa.unh.edu/molecular-cellular-biomedical-sciences/program/minor/genetics

**Description**

Students in other majors who wish to develop a focus in the area of genetics and genomics can complement their major academic program with a minor in genetics.

**Requirements**

The minor consists of a minimum of 20 credits, completed with a grade of C-minus or better.

- No more than 8 credits used to fulfill major requirements may be used for the minor.
- Minimum grade of C (2.00) is required in courses that the minor department approves.
- Pass/fail courses cannot be used for the minor.

Students must file an Intent to Minor form with the GEN minor advisor by the end of the junior year and complete a Certification of Completion of Minor form during the final semester at UNH.

A maximum of 4 credits of GEN 795 Investigations in Genetics may be used to fulfill minor requirements.

### GeoSpatial Analysis

#### Programs

- [GeoSpatial Analysis Minor](https://colsa.unh.edu/natural-resources-environment/program/minor/geospatial-analysis) (p. 365)

#### Description

The geospatial analysis minor is designed for students who wish to have more learning and experience using the tools of geospatial analysis such as statistics, aerial photography, satellite imagery, and geographic information systems (GIS) as they relate to their chosen field of study.

Students with questions about the minor or who would like more information should contact [Dr. Russell G. Congalton](russ.congalton@unh.edu) in the Department of Natural Resources and the Environment, (603) 862-4644.

#### Requirements

Students must complete a total of 20 credits. A grade of C- or better is required in each minor course and no course can be taken pass/fail. A total of not more than 8 credits from the student’s major requirements can be counted toward the minor.

### Green Real Estate

#### Programs

- [Green Real Estate Minor](https://colsa.unh.edu/natural-resources-environment/program/minor/green-real-estate) (p. 365)

#### Description

The green real estate minor will include the basic fundamentals of real estate (a class which is accredited by the New Hampshire Real Estate Commission). Students will learn about local and regional planning, environmental economics and market forces, and environmental issues as they pertain to real estate. In addition, students may choose complementary classes, such as architecture, surveying, land design, soils, wetland delineation, law, etc.

#### Requirements

Students must complete five courses (18 to 20 credits), with a minimum grade of C- or better in each course, and maintain a 2.0 average or better.

</table>
The marine, estuarine, and freshwater biology (MEFB) B.S. program is designed to provide a broad background for undergraduates interested in marine, estuarine, and freshwater biology, aquaculture, and fisheries. The program integrates theoretical and practical (hands-on laboratory and field) courses. Students are encouraged to become involved in one or more of the numerous undergraduate research opportunities available in the marine, estuarine, and freshwater sciences.

UNH is located on a seacoast that provides an extraordinary diversity of marine and estuarine habitats. It is also only a short distance from mountain streams, rivers, marshes, bogs, ponds, and lakes. All of the habitats provide outstanding resources for field courses and research. The marine, estuarine, and freshwater faculty are spread across all four departments of the College of Life Sciences and Agriculture. UNH is a Sea Grant university and has an international reputation for teaching and research in aquatic sciences. UNH has aquaculture facilities, and coastal and estuarine research laboratories. In collaboration with Cornell, UNH jointly administers the summer undergraduate programs at the Shoals Marine Laboratory on Appledore Island, seven miles off the coast of New Hampshire and Maine.

https://colsa.unh.edu/biological-sciences

https://colsa.unh.edu/biological-sciences/people

**Marine, Estuarine and Freshwater Biology Major (B.S.)**

https://colsa.unh.edu/biological-sciences/program/bs/marine-estuarine-and-freshwater-biology

**Description**

The Major in Marine, Estuarine, and Freshwater Biology is intended to give students interested in the fields of marine and freshwater biology the background and direct hands-on experience needed to pursue productive careers, including potential advanced study. This strategically cross-disciplinary major builds on a broad set of science courses in high-impact areas of study for today's world, represented by a core curriculum in math, chemistry, physics, and biology. The core background is strengthened by a series of required and elective courses in a diverse range of aquatic sciences spanning watersheds to oceans, providing opportunities for study from organismal to ecosystem scales. Designed to provide a solid foundation of knowledge in freshwater, estuarine, and marine biology, the MEFB Major allows flexibility and encourages students to focus on particular areas of interest from molecular biology to ecosystem and policy studies. Students will have the opportunity to specialize in areas of their own interest, such as aquaculture and fisheries, animal behavior, ecological restoration, or management.

While MEFB students must complete rigorous course requirements, our students are encouraged to tailor their elective courses within and across departments and colleges as needed to build their own, unique cross-disciplinary path.

The University of New Hampshire is uniquely located for the study of aquatic organisms and their habitats. We are centered between the Great Bay Estuary and the Gulf of Maine, with easy access to diverse marine environments as well as the freshwater habitats of New Hampshire's Lakes Region and the White Mountain National Forest. We boast three Marine Laboratories that provide exceptional opportunities for our student's research and educational needs, including Jackson Estuarine Laboratory (JEL), the Coastal Marine Lab (CML; part of the larger Judd Gregg Marine Research Center), and the Shoals Marine Laboratory (SML), as well as strong affiliations with the Great Bay National Estuarine Research Reserve. While JEL is located on Great Bay in Durham, CML is in nearby New Castle at the Seacoast, and SML is located seven miles off the coast. SML provides summer undergraduate programing with field-based marine courses that fulfill major electives, as well as internships and research opportunities for advanced study. In addition, UNH's campus maintains two fish aquaculture facilities, a world-class genomics laboratory, and the State Veterinary Diagnostic Laboratory, which provide hands-on opportunities for undergraduates. There is also an active diving program with courses at both beginner and advanced levels. A major strength of the MEFB program is the hands-on approach to learning combined with an emphasis on involving undergraduate students in mentored research opportunities.

**Off Campus Coursework and Study Abroad Opportunities**

It is strongly recommended that students consider participating in a summer, semester, or year-long study abroad program. UNH's Shoals Marine Laboratory (https://www.shoalsmarinelaboratory.org/), in conjunction with Cornell University, offers a host of marine biology-related college level courses that meet many degree requirements of the MEFB major over the summer on our island campus in the Isles of Shoals. SML offers both Merit and Need-based Scholarships, multicourse discounts, as well as competitive Research Internships offering summer stipends. UNH Global is the definitive resource for Study Abroad opportunities for undergraduates (https://www.unh.edu/global/education-abroad). UNH Global can provide information on programs of study, while students' academic advisors can assist in course selection options that provide equivalencies to requirements in MEFB so progress toward degree is not compromised. In addition, Ecoquest, run by the Department of Natural Resources, offers summer and semester programs of environmentally oriented courses in New Zealand (https://ecquest.unh.edu/). These are just some of the many opportunities available for MEFB students and we encourage you to explore more.

**Pre-health Professional Program**

MEFB majors who wish to pursue postgraduate degrees in the health care professions should visit the premed advising website (http://www.unh.edu/premed-advising).
Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

A minimum grade of C- is required in all biological science courses that are counted toward the requirements for a degree in MEFB. Students who expect to compete successfully for post-baccalaureate programs should attain a cumulative GPA of 3.0 or higher by the end of the sophomore year and maintain it at that level.

| MAR #405 | Introduction to Marine Mammal Science and Policy          | 3       |

Credits, 367

University of New Hampshire
Capstone Experience

As part of the University of New Hampshire’s Discovery Program requirements, all students must complete a capstone experience during their senior year (after earning at least 90 credits). The capstone experience for students majoring in MEFB consists of BOTH (1) an approved individual experience AND (2) the successful completion of the BIOL 780 Capstone Companion Course. Students will not be approved for graduation until capstone certification has been granted.

1) The individual experience

The individual experience may be satisfied through various forms of experiential learning (e.g., Honors thesis, mentored research project, internship) or a course denoted with a “(C)” in the courses listed above. The individual experience must fulfill at least one of the University’s capstone criteria:

- synthesizes and applies disciplinary knowledge and skills
- fosters reflection on undergraduate learning and experience
- demonstrates emerging professional competencies
- applies, analyzes, and/or interprets research, data, or artistic expression
- explores areas of interest based on the integration of the prior learning

Before beginning any capstone individual experience, students must submit a completed capstone approval form to their Program Coordinator.

Students can obtain this form on the Department’s Capstone page or from their Program Coordinator. Here they will describe their proposed individual experience and how it fulfills at least one of the University’s capstone criteria listed above. If the student is selecting a “C” course for their individual experience, they should obtain the course syllabus from the instructor for information about the course’s content and learning objectives.

2) Enrollment in BIOL 780 Capstone Companion Course

Students will also be required to enroll in BIOL 780 (1 cr) during the semester of their individual experience. BIOL 780 is offered every Fall and Spring semester.

- If the individual experience is a two-semester thesis, BIOL 780 should be taken during the second semester.
- If the individual experience occurs during the summer (e.g., internship), BIOL 780 should be taken during the Fall semester that immediately follows.
- Note: Because BIOL 780 is not offered during the summer, students cannot complete their individual experience during the summer and graduate during that same August. Summer experiences could only be used as individual capstone experiences if completed the summer before the student’s senior year.

**Student Learning Outcomes**

- Show the ability to synthesize diverse sources of information and communicate it effectively.
- Demonstrate a broad understanding of the unique characteristics, as well as the similarities, governing freshwater, estuarine and marine systems.
- Have a broad understanding of biology from the molecular to the ecosystem with a particular appreciation for the abiotic and biotic factors relating to diverse aquatic ecosystems.
- Demonstrate the ability to describe basic principles of scientific inquiry and the importance of scientific study for understanding the natural world.
- Demonstrate the ability to design and experiment, collect data, analyze and graph it appropriately, and summarize the significant findings.
- Demonstrate an ability to critically and objectively evaluate data, develop hypotheses, plus interpret biological experiments and studies.
- Demonstrate an ability to communicate clearly and explicitly, both orally and in writing, following conventional scientific formats.
- Demonstrate a broad understanding of major groups of prokaryotic and eukaryotic aquatic life.

**Marine Biology Minor**

https://colsa.unh.edu/biological-sciences/program/minor/marine-biology

**Description**

The Marine Biology minor is designed to provide a foundation in marine biology and related sciences to any UNH undergraduate student, with the exception of students majoring in marine, estuarine, and freshwater biology. It is offered through the Department of Biological Sciences.
The minor consists of five courses (20 credits) with grades of C- or better and no pass/fail courses. No more than eight major requirement credits may be used to complete the minor. The minor consists of an introductory Marine Science course and 4 courses selected in consultation with the minor advisor.

In addition, students are encouraged to become involved in a research project, either by working in a professor’s laboratory or by participating in the Undergraduate Ocean Research Project (TECH 797 Undergraduate Ocean Research Project).

### Neuroscience and Behavior (NSB)

Neuroscience is one of the fastest-growing scientific fields, and the discoveries that are being made today are having an immediate and significant impact on our society. The importance of understanding animal behavior is likewise increasing, particularly in the face of a rapidly-changing environment. The B.S. in Neuroscience and Behavior is a great way for students to combine interests in neurobiology and animal behavior. The curriculum prepares students for various post-graduate degrees, including medical, veterinary, and graduate school, and we offer students a variety of opportunities to get hands-on research experience.

### Animal Behavior Minor

https://colsa.unh.edu/biological-sciences/program/minor/animal-behavior

### Description

This minor is designed for students who are interested in learning more about animal behavior, including the mechanisms that underlie behaviors and the evolutionary forces that may have shaped them. Students will also gain practical skills in the methods used to study animal behavior in laboratory and field settings.

### Requirements

Students must earn a grade of C- or better in all courses taken for the minor. No more than 8 credits taken for the minor may be used toward a student’s major.

Neuroscience and Behavior Major (B.S.)

https://colsa.unh.edu/biological-sciences/program/bs/neuroscience-and-behavior-major

Description

The major in neuroscience and behavior (NSB) offers an interdisciplinary approach to human and non-human behavior, focusing on the evolution and adaptiveness of certain behaviors, as well as their underlying neural mechanisms. Students who have always been fascinated by how the brain functions will be well served by this major, as will those who love wild animals and wish to better understand their behavior. The B.S. in neuroscience and behavior is based on a solid foundation in biology, chemistry, physics, statistics, and genetics (foundation courses). These are followed by a two-semester course sequence that covers the fundamentals of neuroscience and behavior. Students can then pick five or more electives focusing on areas of interest.

NSB students are encouraged to take advantage of research experiences in the laboratories of the psychology and biology faculty in the program. This provides valuable experience with cutting-edge equipment and techniques. Some students may share aspects of a larger project, whereas others may be relatively independent and design their own project under supervision. In either case, important skills are gained by the discipline of gathering data, analyzing and interpreting it, and presenting it to a broader audience.

The curriculum provides most of the requirements and recommended courses for students seeking admission to graduate school and to professional schools in medicine and veterinary medicine. Students who might choose not to go on to advanced degrees are well-prepared for employment as skilled technicians in research laboratories or, if their interests are in animal behavior, as field research assistants or animal trainers. With additional courses in education, the B.S. in NSB also qualifies graduates to teach at the elementary, junior high, and high school levels.

Faculty participating in the NSB major combine a love of teaching and student mentoring with a passion for research, and encourage student participation. Research facilities that students can use include the Integrative Animal Behavior and Ecoacoustics laboratory, the confocal imaging center, the Hubbard Center for Genomic Studies, and the many marine, freshwater, and estuarine laboratories associated with UNH programs. Students can also take summer courses at the Shoals Marine Laboratory.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

Students majoring in NSB are required to take foundation courses in basic science, core courses, and five electives from an extensive list of courses, including some offered by other departments including biochemistry, molecular and cellular biology, and natural resources. Minimum grade of D- or better is required in CHEM 403, CHEM 404, CHEM 545/CHEM 546, and PHYS 401; minimum grade of C- or better is required in all other courses. Finally, a capstone experience is required. This may be independent research, an advanced seminar, or other special student activity. It is meant to integrate prior experience and take the student to a new level in an area of special interest.

Captions 3
Total Credits 69-71

1 Both must be taken to count as one of the 5 required major electives
2 One experience totaling at least 4 credits, but can be earned over the course of two consecutive semesters provided the experience is with the same research mentor. Can only substitute for one elective.
3 Courses that are eligible to fulfill the Capstone requirement are indicated with a (C) and must be taken senior year. You can: 1) designate a course as a Capstone course, with additional requirements as determined by the instructor; 2) complete one semester of Capstone Research (BIOL 795, PSYC 795, or INCO 790); 3) do an honors thesis in Neuroscience and Behavior (NSB 799H) or Biology or Psychology (BIOL 799H or PSYC 797/PSYC 799) or; 4) participate in an alternative activity with approval from the student's academic advisor.

NSB majors may use BIOL 411, BIOL 412, CHEM 403, CHEM 404, PHYS 401, PHYS 407 and either PSYC 402 or BIOL 528 to fulfill the Biological Sciences, Physical Sciences, Discovery Lab, and Quantitative Reasoning Discovery requirements. Students transferring into the NSB program from other UNH majors must hold a cumulative GPA of at least 3.2 at the time of requested major change.

Student Learning Outcomes

Students demonstrate that they understand basic principles of neuroscience and behavior.

- Apply the core principles of biology, chemistry, physics, and statistics to more advanced concepts in neuroscience and behavior.
- Apply the principles of evolution and genetics to understand how genotype and phenotype affect the structure and function of animal nervous systems and behavior.
- Describe the basic features of animal nervous system development, organization, signaling, integration, and higher-level processing, and how these are altered in diseases of the nervous system.
- Explain the four levels of analysis emphasized in modern animal behavior research: causation, development, function, and evolution.
- Describe molecular and cellular approaches to the study of brain structure, function, and development, as well as behavioral and cognitive neuroscience approaches to studying higher level brain functions.

Students demonstrate that they can undertake scientifically valid methods of inquiry.

- Apply appropriate research methods, laboratory techniques, and statistical methods to investigate scientific questions in neuroscience and behavior.

Students demonstrate that they can think critically and analytically.

- Read and critique primary research literature related to the nervous system, how nervous system function generates behavior, and how behavior addresses fitness-related challenges across a diversity of species.

Students demonstrate that they can communicate effectively.

- Demonstrate scientific writing skills, and proficiency in delivering oral presentations related to both the primary literature and findings from student investigations in neuroscience and behavior.

Students practice science responsibly and ethically, and acknowledge the influence of cultural and historical biases in the sciences.

Nutrition (NUTR)

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, or the biotechnology industry, or entry into post-baccalaureate professional programs such as dietetic internship, medical school, dental school, or graduate school. Nutrition faculty have expertise in clinical nutrition, sports nutrition, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult). Undergraduate students actively participate in ongoing research projects in these areas. The College Health and Nutrition Assessment Survey (CHANAS) is one resource that supports nutrition research at the University of New Hampshire.

Students pursuing the B.S. degree in Nutrition choose from one of three areas of specialization: Dietetics, Nutrition and Wellness, or Nutritional Sciences options:

The curriculum for the Dietetics option is accredited by the Academic Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). Students who complete the B.S. in Nutrition with the Dietetics option are eligible to apply for a dietetic internship, a prerequisite for becoming a registered dietitian.

Students who complete the Nutrition and Wellness option are prepared for jobs in agencies or businesses that have an emphasis on health and wellness, including schools, fitness centers, and non-profit or community organizations.

Students in the Nutritional Sciences option most often enroll in a post-graduate educational degree program (e.g., medical school, graduate school, physician assistant program, etc.) or enter the biomedical/biotechnology workplace.

Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions should visit UNH's Pre-Professional Health Programs Advising Office. Requirements for specific types of professional schools (e.g., medical, dental, physician assistant, pharmacy, etc.) are also provided by the Pre-Professional Health Advising Office. While many of the prerequisite courses required by professional schools are also requirements of the Nutrition major, you should consult with your faculty
Nutrition is the study of food, the nutrients found in food, and the body's metabolism of these nutrients to maintain and promote health. Nutrition is an interdisciplinary science based on biochemistry and physiology, but also integrates sociology, psychology, molecular biology, and genetics.

Students have three curriculum options within the major to pursue a bachelor’s degree in nutrition. The option is declared within the nutrition major after their second semester in the program. Options include:

- **Dietetics option** - is the first step to becoming a registered dietitian. The Didactic Program in Dietetics (DPD) curriculum is accredited by The Accreditation Council for Education in Nutrition and Dietetics (ACEND). It prepares you for a dietetic internship.
- **Nutrition and Wellness option** - provides a foundation in chemistry, anatomy, physiology and microbiology and includes courses on stress, wellness and exercise science. Students gain real-world experience providing hands-on nutrition and health guidance.
- **Nutritional Sciences option** - provides a comprehensive background in biology, chemistry, physiology, nutrition, biochemistry and physics, and includes courses on nutritional assessment, life cycle nutrition, nutrition and health, and careers in nutrition.

The program prepares students for success by offering real-world learning opportunities throughout the curriculum. These opportunities include applied research, field experiences, internships, community engagement, and study abroad offerings. Our diverse group of faculty are dedicated to student success in and outside of the classroom. Coursework supports diverse postgraduate pathways including dietetic internships, allied health programs, medical and dental schools and graduate school. The rigorous curriculum is designed to offer a science-based foundation and foster critical-thinking and strong communication skills for future professional success of our students.

**Requirements**

**Degree Requirements**

- **Minimum Credit Requirement:** 128 credits
- **Minimum Residency Requirement:** 32 credits must be taken at UNH
- **Minimum GPA:** 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

Students take 16-18 credits per semester. All students complete foundational courses in the sciences, nutrition core courses, and additional option-specific requirements as noted in the program descriptions (i.e. Dietetics, Nutrition and Wellness, and Nutritional Sciences). Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well.

**Nutrition Major: Dietetics Option (B.S.)**

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/nutrition-major-dietetics-option

**Description**

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.
The nutrition program prepares students for entry-level positions in health care, education, research, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, sports nutrition, telehealth, epidemiology, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult).

The curriculum for the Dietetics option is accredited by the Academic Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). Students who complete the B.S. in Nutrition with the Dietetics option are eligible to apply for a dietetic internship, a prerequisite for becoming a registered dietitian.

Dietetics Capstone Experience

One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Dietetics students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 780 Critical Issues in Nutrition during their senior year.

Both NUTR 720 and NUTR 780 are required courses; one of these courses must be taken during the student’s senior year to fulfill the university’s capstone requirement.

Student Learning Outcomes

- Demonstrate how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.
- Select and use appropriate current information technologies to locate and apply evidence-based guidelines and protocols.
- Apply critical thinking skills.
- Demonstrate effective and professional oral and written communication and documentation.
- Describe the governance of nutrition and dietetics practice, such as the Scope of Practice for the Registered Dietitian Nutritionist and the Code of Ethics for the Profession of Nutrition and Dietetics.
- Assess the impact of a public policy position on nutrition and dietetics practice.
- Discuss the impact of health care policy and different health care delivery systems on food and nutrition services.
- Identify and describe the work of interprofessional teams and the roles of others with whom the registered dietitian nutritionist collaborates.
- Demonstrate cultural humility, awareness of personal biases and an understanding of cultural differences as they contribute to diversity, equity, and inclusion.
- Describe contributing factors to health inequity in nutrition and dietetics including structural bias, social inequities, health disparities and discrimination.
- Participate in a nutrition and dietetics professional organization and explain the significant role of the organization.
- Defend a position on issues impacting the nutrition and dietetics profession.
- Use the Nutrition Care Process and clinical workflow elements to assess nutritional parameters, diagnose nutrition related problems, determine appropriate nutrition interventions and develop plans to monitor the effectiveness of these interventions.
- Develop an educational session or program/educational strategy for a target population.
- Demonstrate counseling and education methods to facilitate behavior change and enhance wellness for diverse individuals and groups.
- Practice routine health screening assessments, including measuring blood pressure and conducting waived point-of-care laboratory testing (such as blood glucose or cholesterol).
- Describe concepts of nutritional genomics and how they relate to medical nutrition therapy, health, and disease.
- Develop nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs.
- Apply management theories to the development of programs or services.
- Evaluate a budget/financial management plan and interpret financial data.
- Demonstrate an understanding of the regulation system related to billing and coding, what services are reimbursable by third party payers, and how reimbursement may be obtained.
- Apply the principles of human resource management to different situations.
- Apply safety and sanitation principles related to food, personnel, and consumers.
- Explain the processes involved in delivering quality food and nutrition services.
- Evaluate data to be used in decision-making for continuous quality improvement.
- Perform self-assessment that includes awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement.
- Identify and articulate one's skills, strengths, knowledge and experiences relevant to the position desired and career goals.
- Practice how to self-advocate for opportunities in a variety of settings (such as asking for needed support, presenting an elevator pitch).
- Practice resolving differences or dealing with conflict.
- Promote team involvement and recognize the skills of each member.
- Demonstrate an understanding of the importance and expectations of a professional in mentoring and precepting others.
Nutrition Major: Nutrition and Wellness Option (B.S.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/nutrition-major-nutrition-wellness-option

Description

**Total Credits** 128-130

---

**Student Learning Outcomes**

- Locate, interpret, evaluate and use professional literature to make ethical, evidence-based conclusions and decisions.
- Apply critical thinking skills.
- Deliver effective and professional oral and written communication.
- Demonstrate cultural humility, awareness of personal biases and an understanding of cultural difference they contribute to diversity, equity, and inclusion.
- Articulate aspects of nutrition and wellness for various populations across the lifespan.
- Discuss the impact of policies and guidelines on food and nutrition services.

**Nutrition Major: Nutritional Sciences Option (B.S.)**

**Description**

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, research, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, sports nutrition, and food science, as well as assessing risk factors of chronic disease risk (i.e., obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult), and populations that are underrepresented in research.

Students in the Nutritional Sciences option most often enroll in a post-graduate educational degree program (e.g., medical school, graduate school, physician assistant program, etc.) or enter the biomedical/biotechnology workplace.

**Requirements**

**Degree Requirements**

- Minimum Credit Requirement: 128 credits
- Minimum Residency Requirement: 32 credits must be taken at UNH
- Minimum GPA: 2.0 required for conferral*

**Core Curriculum Required:** Discovery & Writing Program Requirements

**Foreign Language Requirement:** No

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

**Major Requirements**

A minimum grade of C- or above is required in all NUTR courses required by the major.

</tbody>
</table>
One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Nutritional Sciences students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 751 Nutritional Biochemistry of Micronutrients.

NUTR 751 is a required course; and will only fulfill the university’s capstone requirement if taken during the student’s senior year.
Student Learning Outcomes

- Locate, interpret, evaluate and use professional literature to make ethical, evidence-based conclusions and decisions.
- Apply critical thinking skills.
- Deliver effective and professional oral and written communication.
- Demonstrate cultural humility, awareness of personal biases and an understanding of cultural difference they contribute to diversity, equity, and inclusion.
- Articulate the nutritional requirements for various populations across the lifespan.
- Explain macronutrient and micronutrient metabolism.
- Demonstrate an understanding of the scientific method and how it is used to generate knowledge in nutrition science.

Nutrition Minor

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/minor/nutrition

Description

The nutrition minor is particularly suited to students interested in pursuing professional careers related to human health and wellness.

Students declare the nutrition minor by submitting the Intent to Minor in Nutrition form online, preferably prior to the start of their junior year. Submission of the Intent to Minor form is required to gain registration preference in certain courses if space is available and by discretion of the instructor. To complete the minor, students submit a Certification of Completion of Minor form during their final semester at UNH.

Requirements

The minor consists of a minimum of 20 credits, no more than 8 of which can also be used to fulfill major requirements. A C average (2.00) is required in courses that the minor department approves; a grade of C minus or better is required in all courses to be counted toward the minor. Courses taken on a Pass/Fail basis may not be used for a minor.
Requirements

Requirements for the Culinary Nutrition & Food Studies Minor (20 credits).

Sustainable Agriculture and Food Systems (SAFS)

The sustainable agriculture and food systems (SAFS) program offers a flexible curriculum to students seeking integrated knowledge and experiences in modern agricultural and food systems to prepare for varied careers in these fields.

Students in this program will obtain knowledge in a variety of topics including sustainable agricultural practices, the science and management of working landscapes, locally produced foods, value-added agricultural products, and the promotion of healthy eating through sustainable food production and food policies. SAFS graduates will be prepared to pursue careers in a wide range of fields including the production of food, fiber, and agricultural services; management and marketing of agricultural operations; management of working lands, landscapes and ecosystems; agriculture/food/nutrition/natural resources-related research; policy-making; and other current and emerging professions.

The program offers both a bachelor of science (B.S.) degree and a bachelor of arts (B.A.) degree. The B.A. degree offers more flexibility to take courses from a variety of disciplines or pursuing a dual degree, second major, or minor. The B.S. degree best serves those seeking a strong foundation in scientific and technical knowledge and/or who envision pursuing an advanced degree.

Sustainable Agriculture and Food Systems Major (B.A.)

https://colsa.unh.edu/agriculture-nutrition-food-systems/program/ba/sustainable-agriculture-food-systems-major

Description

The Sustainable Agriculture & Food Systems B.A. provides students with a broad base of knowledge and experiences with modern agriculture and food systems. Sustainable Agriculture and Food Systems is an interdisciplinary field comprising the social, physical, and life sciences and beyond. Agriculture is key to solving many of the major challenges facing the world, such as producing food to meet the needs of an ever-growing population while conserving land, water, and soil resources.

Our students get hands-on experience in applied coursework, and we encourage our students to conduct research alongside faculty. Our students become practitioners and entrepreneurs of agricultural and food businesses, researchers and policy-makers at state/federal agencies and non-profit organizations, laboratory technicians, and agricultural educators. Some go on to obtain advanced degrees in the agricultural sciences.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.

*Major GPA requirements as indicated.

Major Requirements

The SAFS B.A. program structure includes FOUR major components: foundation courses, courses in a student-designed emphasis area, program elective courses, and a capstone. You must earn a minimum grade of C- in all courses required for the major.

Foundation courses include 36 credits, which satisfy 5 of the University Discovery requirements.

Student-Designed Emphasis courses include 20 credits that make up a cohesive emphasis or focus area. Courses may be selected from the List of Approved Program Electives, but do not need to be on that list. Each student will define their emphasis area in consultation with their advisor.

Programs

- Sustainable Agriculture and Food Systems Major (B.A.) (p. 379)
- Sustainable Agriculture and Food Systems Major (B.S.) (p. 381)
- Brewing Minor (p. 383)
- Horticulture Minor (p. 383)
- Sustainable Agriculture and Food Systems Minor (p. 384)
and submit it to the SAFS program committee for approval prior to the start of their 6th semester.

**Program Elective courses** include 16 credits, chosen from the *List of Approved Program Elective courses*.

A **Capstone** experience must take place during the senior year. There are two capstone options: SAFS 733 Advanced Topics in Sustainable Agriculture or ANSC 750 Collaborative Farm Design and Development. Your capstone **MAY NOT** be counted towards elective or emphasis credits.

Of the Student-Designed Emphasis and Program Elective courses, at least 16 credits (not counting the capstone) must be earned at the 600-700 level.
