**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 621 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL #723 - Issues in Journalism****Credits:** 4

This upper-level seminar focuses on the shifts in technology and public perception that are changing the definition of excellence in journalism. Special attention to legal and ethical issues reshaping journalism's public service role. May be repeated once for credit with permission of the journalism director.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 621 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

**ENGL 725 - Seminar in English Teaching****Credits:** 4

In this seminar on teaching English at the middle- and secondary-school levels, students meet the requirements for both English 710, Teaching Writing and English 792, Teaching Secondary School English. The two-semester course integrates the teaching of reading, writing, speaking, and listening, addressing both theoretical and practical issues. Through the study of different approaches, students develop their own philosophies of instruction.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 725L - Seminar in English Teaching: Lab****Credits:** 2

Classroom and research lab experiences give English Teaching majors enrolled in the Seminar in English Teaching opportunities to put their pedagogical and theoretical readings into practice and grow as teachers. This Lab should be taken simultaneously with ENGL 725. Students must have JR or SR status at the start of the course. Permission of instructor required.

**Co-requisite:** ENGL 725**Equivalent(s):** ENGL 810S**Grade Mode:** Credit/Fail Grading**ENGL 726 - Seminar in English Teaching****Credits:** 4

In this seminar on teaching English at the middle- and secondary-school levels, students meet the requirements for both English 710, Teaching Writing and English 792, Teaching Secondary School English. The two-semester course integrates the teaching of reading, writing, speaking, and listening, addressing both theoretical and practical issues. Through the study of different approaches, students develop their own philosophies of instruction.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 726L - Sem in English Teaching: Lab****Credits:** 2

Classroom and research lab experiences give English Teaching majors enrolled in the Seminar in English Teaching opportunities to put their pedagogical and theoretical readings into practice and grow as teachers. This lab should be taken simultaneously with ENGL 726. Students must have JR or SR status at the start of the course. Permission of instructor required.

**Co-requisite:** ENGL 726**Equivalent(s):** ENGL 892S**Grade Mode:** Credit/Fail Grading**ENGL 728 - Language and Gender****Credits:** 4

This course will explore a variety of topics around the theme of language and gender, including the relationship between gender, language and power; the linguistic marking of gender; how people use language to construct and perform their gender; how gender intersects with other facets of identity, including sexuality and race and ethnicity.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or WS 401 with a minimum grade of D- or WS 405 with a minimum grade of D-.

**Grade Mode:** Letter Grading**ENGL 729 - Special Topics in Composition Studies****Credits:** 4

Advanced course on a topic chosen by the instructor. Precise topics and methods of each section vary. Possible topics include alternative discourses and rhetorics, contrastive rhetoric, electronic discourse and digital rhetoric, women's rhetorics and feminist pedagogies, Montaigne and the essay tradition, theories of literacy, theories of persuasive writing, theories of transactional writing, and written discourse analysis. Barring duplication of subject, may be repeated for credit. For details see descriptions available in the English Department. Writing intensive when topic is studies in rhetoric and composition.

**Grade Mode:** Letter Grading**ENGL #730 - Practicum in Teaching English and the Language Arts****Credits:** 1-6

A site-based course for practicing teachers that features in-class observations and demonstrations, individual consultation, and group meetings in the schools.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** ENGL 921**Grade Mode:** Letter Grading**ENGL 735 - Entrepreneurial Journalism****Credits:** 4

This course teaches journalism students to think like business people so they can compete in the exploding world of online publishing. Students work on ways to monetize good journalism practices by studying opportunities available and applying what they learn to a publishing project. Those who prefer print will find the course valuable as they learn to balance business objectives with quality journalism.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ENGL 621 with a minimum grade of D-.

**Grade Mode:** Letter Grading**ENGL 736 - Environmental Theory****Credits:** 4

Theoretical approaches to nature writing. Topics vary but may include eco-memoirs, environmental rhetoric, native peoples and the land, land and national identity, animals in literature, and environmental activist non-fiction. May be repeated for credit if topic differs.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading**ENGL 738 - Asian American Studies****Credits:** 4

Are you captivated by the stories, histories and experiences of Asian Americans? Do you want to learn about their cultures, struggles, and accomplishments? This course examines the variety and complexity of Asian Americans through literature, poetry, film, essays, photography, music, and web-based presences. Specific course topics, as arranged by the instructor, include the Japanese American internment, the literature of popular culture of the Vietnam War, Asian American graphic narratives, transnational adoption, and food and culture.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ENGL 401 with a minimum grade of D-.

**Grade Mode:** Letter Grading**ENGL 739 - American Indian Literature****Credits:** 4

Close study of traditional and/or contemporary American Indian literature and folklore with historical and cultural background.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**ENGL 742 - American Literature, 1815-1865****Credits:** 4

Antebellum writers tried to shape the nation through their texts, as they expressed the struggles over power and identity that led to the Civil War—and that continue to define U.S. discourses today. We encounter the genres—novels, oratory, poetry, appeals, slave narratives, essays, and nature writing—that authors used to grapple with slavery, social reform, environmental transformation, and aesthetics. Writers may include William Apess (Pequot), Margaret Fuller, Edgar Allan Poe, Frederick Douglass, and Emily Dickinson.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL 743R - American Literature, 1865-1915: The Birth of the American Empire****Credits:** 4

The term millionaire; battles over citizenship; advocating for anarchism; mail order stores; yellow journalism; scientific revolutions; radical new art forms; war abroad and protests at home—and the invention of both the ice-cream cone and intercollegiate athletics: how did writers respond to and shape this tumultuous period in American history? Fiction, nonfiction, poetry; both individual works and historical and critical background.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Equivalent(s):** ENGL 743**Grade Mode:** Letter Grading**ENGL 749R - Major American Authors****Credits:** 4

How does a writer come to embody a particular moment? This course answers the question by focusing on an individual or community of writers: their work to be sure, but also their biographies; the historical context for the work; the cultural moment in which they participated; and the innovations they brought to their craft. May be repeated for credit, barring duplication of topic.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** ENGL 749**Grade Mode:** Letter Grading**ENGL 751 - Medieval Romance****Credits:** 4

This course provides an overview of one of the most unique genres of medieval literature: the romantic epic. From brave knights and marvelous wizards to cunning queens and hungry dragons, the literature of this class gives a fascinating introduction to the imaginative potential of the medieval world. This course also emphasizes how entertainment overlapped with ethical crisis, as romance reinforces social norms of gender and sex, race and religion.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 752 - History of the English Language****Credits:** 4

Evolution of English from the Anglo-Saxon period to the present day. Relations between linguistic change and literary style. (Not offered every year.)

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 753 - Old English****Credits:** 4

Introduction to Old English language and literature through the reading of selected poetry and prose.

**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL 756 - Chaucer****Credits:** 4

Geoffrey Chaucer is one of the most famous poets in the English language - but why? This course offers students and overview of Chaucer's poetry, spending particular time on his masterpiece, "The Canterbury Tales". Sometimes tragic, sometimes bawdy, and almost always humorous, Chaucer's poetry offers a glimpse of a world long-lost, while simultaneously forcing us to ask hard questions about justice, love, and the nature of human creation.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL 758 - Advanced Shakespeare****Credits:** 4

This course offers an in-depth look at a few Shakespeare plays, which you'll study intensively through the lens of a single topic. Topics vary from semester to semester. Recent examples include Shakespeare on Screen, Shakespeare and Race, Shakespeare's History Plays, Unknown Shakespeare, and Shakespearean Tragedy. Live and filmed performances will be included as available.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**ENGL 758R - Advanced Shakespeare****Credits:** 4

This course offers an in-depth look at a few Shakespeare plays, which you'll study intensively through the lens of a single topic. Topics vary from semester to semester. Recent examples include Shakespeare on Screen, Shakespeare and Race, Shakespeare's History Plays, Unknown Shakespeare, and Shakespearean Tragedy. Live and filmed performances will be included as available.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Equivalent(s):** ENGL 758**Grade Mode:** Letter Grading**ENGL 759 - Milton****Credits:** 4

Readings include a wide selection of Milton's poetry and prose with a special focus on "Paradise Lost". Milton's writings contain arguments regarding free will, tyranny, and slavery that inform modern conceptions of civil liberty, republican government, and free speech. In the US Benjamin Franklin, Thomas Jefferson, John Adams and other early framers credit "Paradise Lost" as having shaped their ideas of religious and civil liberty in a democratic republic.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading

**ENGL #767 - Literature of the Restoration and Early 18th Century****Credits:** 4

The English "Restoration" (roughly 1660-1688) was a comparatively free-spirited time following a decade of dogmatic and intolerant evangelical Christian rule. This course studies a variety of literary genres and academic disciplines, the opening of theaters and women performing on stage for the first time, the beginnings of the media, and the rise of scientific Enlightenment. Works by John Dryden, Aphra Behn, Jonathan Swift, and others.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL 773 - Literary Modernisms: Return, Revolt, Recycle****Credits:** 4

This course focuses on modernist writers such as T.S. Eliot, who sought to revitalize modern culture by looking backward to the past; Virginia Woolf, who experimented with the form of the novel; and performance artist Kabe Wilson, who recycles texts of high modernism. We explore modernist literature in its geopolitical contexts with special attention to imperial expansion and contraction, the rise of fascism, world wars, and struggles for suffrage, and national belonging.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL 774R - Modern & Contemporary British Literature: New Departures****Credits:** 4

This course celebrates the growing diversity of British literature over the past half century. These years witnessed the final breakup of the British empire, a civil war in Northern Ireland, the rise of Scottish nationalism, and an influx of immigrants from former colonies worldwide. Beginning with the "little Englander" attitudes of the postwar era, we will explore the emergence of postmodern and postcolonial Britain in fiction, graphic narrative, poetry, drama, film and performance.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Equivalent(s):** ENGL 774**Grade Mode:** Letter Grading**ENGL 775 - Modern Irish Literature: A Changing Landscape****Credits:** 4

In this course we will explore Irish literature and culture from the Celtic Renaissance in the early twentieth century to the Celtic Tiger of the early twenty-first. Readings will trace Ireland's transformation from an inward-looking agricultural nation to one of the most globalized countries in the world. Recurring themes will include the status of the Church, changing gender roles, sectarian conflict, and Ireland's relation to the world.

**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL #777 - The English Novel in the World****Credits:** 4

Novels written in English from Asia and Africa during the mid-twentieth century to the present day. We will discuss shifts from realism to magical realism and back; domestic, historical and speculative fiction; narratives of the rise of new nations and nationalism; experiences of exile and migration; the 'global' city; transnational cultural exchanges and networks that dismantle assumed civilizational boundaries. Newer novels offer opportunities to understand how literary narratives grasp ecological destruction, animal extinction, and human responsibility.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 778 - Race and Gender in Film and Popular Culture****Credits:** 4

This course explores representations of race and gender in American cinema and popular culture and features weekly readings in contemporary race and gender theories. Topics include the black women's gaze; woman as object; the action hero and hyper-masculinity; hybridity; race/ethnicity and hypersexuality; the crisis of white masculinity; white privilege; sexual orientation; transsexual and transgender performance. This course is reading and Canvas intensive, requiring weekly writing assignments and papers.

**Grade Mode:** Letter Grading**ENGL 779 - Linguistic Field Methods****Credits:** 4

Study of a non-Indo-European language by eliciting examples from an informant, rather than from written descriptions of the language. Students learn how to figure out the grammar of a language from raw data. (Not offered every semester).

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.**Equivalent(s):** LING 779**Grade Mode:** Letter Grading**ENGL 780 - Drama of Shakespeare's Contemporaries: Will and Company****Credits:** 4

Who were Shakespeare's contemporaries in the London theater, his models and mentors, his competitors, compatriots and rivals? Read the plays of those who inspired, fought with, befriended, and followed Shakespeare in one of the great eras of English literature. We'll discuss the development of revenge tragedy, histories and comedy, new styles of acting and theater buildings, presentations of court intrigue, the representation of women and "others", and the changing mores of early London.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL 782 - Modern and Contemporary Drama****Credits:** 4

An overview of the best writing for the modern stage. We'll survey developments in theater in the past 100 years, sampling such genres as absurdist drama, psychological gothic, "in yer face" theatre, theater that incorporates new media, and work by women, African-American, Latinx, gay and immigrant writers. We'll discuss the changing role of theater in society, identity politics onstage and off, and shock, sex and violence as dramatic techniques. Live and filmed performances as available.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**ENGL #783 - English Novel of the Eighteenth Century****Credits:** 4

The eighteenth-century was the period in which the English made the novel, a hitherto European genre, into their own. Finance, slavery, colonialism, war, and the development of the printing press created the media environment in which this genre could thrive, and women authors quickly came to dominate it. Themes include money and marriage, abolition of slavery, and human sympathy.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading

**ENGL 784 - English Novel of the 19th Century****Credits:** 4

The highly popular novels of nineteenth-century Britain produced such memorable characters as Sherlock Holmes, Count Dracula, Alice in Wonderland, Frankenstein's monster, and Dr. Jekyll. The novel's literary engagements with science, love, and the city are entangled with cultural discourses on animals, monstrosity, supernaturalism, degeneration, empire, race, and crime. In this course, students will sample a set of novels that exemplify the distinct generic and thematic innovations of the period.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D-**Grade Mode:** Letter Grading**ENGL 787 - English Major Seminar****Credits:** 4

This Capstone course offers you an opportunity to study a specialized topic in depth in a seminar format. Enrollment is limited to 15 so that you can take active part in discussion and work closely with the instructor on a research project. Topics vary from semester to semester. Recent topics include Tragedy, Comedy, American Women Poets, Medicine in Literature, and Feminist Print Culture. May be repeated for credit, barring duplication of topic. For details see semester specific course descriptions available in the English Department.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 419 with a minimum grade of B.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** ENGL 787R**Grade Mode:** Letter Grading**ENGL 787R - English Major Seminar****Credits:** 4

Open to senior English majors who, in the opinion of the department, have demonstrated the capacity to do superior work. An honors project consists of supervised research leading to a substantial thesis or writing of poetry or fiction portfolio. Required of students in the honors in major program. (Not offered every year.)

**Attributes:** Honors course; Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 789 - Special Topics in English Teaching****Credits:** 4

Advanced theories and practices course on English Teaching. Topics such as A) Teaching Young Adult Literature, C) Teaching English in Diverse Contexts, D) Teaching Drama, N) Teaching Nonfiction, R) English Teachers as Researchers, and T) Alternate Literacies and Teaching Technologies. Barring duplication of subject, course may be repeated for credit. For details see course descriptions available in the English department.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**ENGL 790 - Special Topics in Linguistics****Credits:** 4

Advanced course on a topic chosen by the instructor. Inquire at the English department office for a full course description each time the course is offered. Topics such as word formation, dialectology, linguistic theory and language acquisition, history of linguistics, language and culture, cross-disciplinary studies relating to linguistics. Barring duplication of subject, may be repeated for credit. (Also offered as LING 790.)

**Attributes:** Writing Intensive Course**Equivalent(s):** LING 790**Grade Mode:** Letter Grading**ENGL 791 - English Grammar****Credits:** 4

An introduction to the terminology and major concepts in English grammar. Covers descriptive vs. prescriptive grammar, parts of speech, phrase structure, clause types, and basic sentence patterns. Useful for pre-service teachers seeking to acquire the background knowledge needed to make informed decisions about teaching of English grammar.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 792 - Teaching Literature and Literacy****Credits:** 4

This course introduces theories and practices of teaching literature and literacy, including teaching reading and writing as well as teaching literary analysis at the secondary level. Students also learn to plan lessons, choose texts, and create learning activities for speaking, listening, and viewing in grade five through twelve. The course is designed for students who are interested in teaching as a possible career.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**ENGL 793 - Phonetics and Phonology****Credits:** 4

The sound system of English and other languages as viewed from the standpoint of modern linguistic theory, including the following topics: the acoustic and articulatory properties of speech sounds, the phonemic repertoires of particular languages, phonological derivations, and prosodic phenomena such as stress and intonation.

**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.

**Equivalent(s):** LING 793**Grade Mode:** Letter Grading

**ENGL 794 - Syntax****Credits:** 4

Relationship of grammar and meaning as viewed from the standpoint of modern linguistic theory. Emphasizes the syntax and semantics of English, with special attention to the construction of arguments for or against particular analyses.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.

**Equivalent(s):** LING 794**Grade Mode:** Letter Grading**ENGL 795 - Independent Study****Credits:** 1-4

Open to highly qualified juniors and seniors. To be elected only with permission of the department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**ENGL 796 - The Internship Experience****Credits:** 4

Students work with their peers to establish a personal definition of professionalism in their respective fields; they will read, critically analyze, and discuss articles covering a wide variety of topics, including writing at work, intended audiences, navigating a difficult work environment or situation, and strategies for professional development. Class sessions in a discussion format, intended to be flexible and to directly support the changing needs of writing in the workplace. Students, along with their supervisors, will create their own learning objectives and evaluation tools. Students will write about their experiences at the end of term. Minimum GPA 3.0 required for registration.

**Prerequisite(s):** ENGL 419 with a minimum grade of D- and (ENGL 502 with a minimum grade of D- or ENGL 602 with a minimum grade of D-).

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** ENGL 695**Grade Mode:** Letter Grading**ENGL 797 - Special Studies in Literature****Credits:** 4

A) Old English Literature, B) Medieval Literature, C) 16th Century, D) 17th Century, E) 18th Century, F) English Romantic Period, G) Victorian Period, H) 20th Century, I) Drama, J) Novel, K) Poetry, L) Non-fiction, M) American Literature, N) A Literary Problem, O) Literature of the Renaissance, R) Race and Racial Theories. The precise topics and methods of each section vary. Barring duplication of subject, may be repeated for credit. For details, see the course descriptions available in the English department.

## English/Speakers of Other Languages (ESL)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**ESL #410 - Elementary Reading, Writing, Grammar****Credits:** 4-12

Intensive English, with a focus on reading and writing, for English language learners at an elementary level. Students will develop a basic vocabulary in English and sufficient proficiency in the language to conduct essential business in an English-speaking environment.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**ESL #411 - Speaking and Listening, Elementary Level****Credits:** 2-8

Intensive English, with a focus on speaking and listening, for English language learners at an elementary level. Students will develop a basic vocabulary in English and sufficient proficiency in the language to conduct essential business in an English-speaking environment.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**ESL #420 - Intermediate Reading, Writing, Grammar****Credits:** 4-12

Intensive English, with a focus on reading and writing, for English language learners at an intermediate level. Students will expand their vocabulary and develop sufficient English proficiency to communicate with English speakers who have little experience with English language learners.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading

**ESL 421 - Intermediate Listening and Speaking****Credits:** 2-8

Intensive English, with a focus on speaking and listening, for English language learners at an intermediate level. Students will expand their vocabulary and develop sufficient English proficiency to communicate with English speakers who have little experience with English language learners.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**ESL #430 - Advanced Reading, Writing, Grammar****Credits:** 4-12

Intensive English, with a focus on reading and writing, for English language learners at an advanced level. Students will develop an extensive vocabulary in English, facility with complex sentence structures, and an ability to write coherent, comprehensible essays in English.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**ESL 431 - Advanced Listening and Speaking****Credits:** 2-8

Intensive English, with a focus on speaking and listening, for English language learners at an advanced level. Students will develop an extensive vocabulary in English and sufficient English proficiency to function successfully in American university courses that do not rely heavily on language.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**ESL #434 - High Advanced Integrated Skills****Credits:** 2-8

Intensive English with a focus on incorporating, analyzing, and synthesizing information from lectures and readings into academic writing. This course is intended for students whose skills are uneven in the reading, writing, listening, and speaking modalities. Students enrolled in ESL #434/ESL 634 will be simultaneously enrolled in ESL #430/ESL 630 or ESL 431/ESL 631.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**ESL #440 - Academic English I****Credits:** 4-8

This course is intended for speakers of other languages who have already achieved a 500 score on the TOEFL (or an equivalent score on another standardized test of English proficiency). Students will learn to read academic materials, write coherent essays on academic topics, and participate in group work and class discussion. Students enrolled in ESL #440/ESL #640 are also eligible to enroll in one University of New Hampshire course.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**ESL #445 - Introduction to US Academic Culture****Credits:** 4

This course will introduce students to the academic expectations, resources, policies and traditions of university life in the US and serve as an ongoing orientation to the University of New Hampshire. The course is designed to help new international students adjust to college life, establish skills that will help them be successful through their transition into their academic program and develop a sense of belonging and engagement with all the university has to offer.

**Grade Mode:** Credit/Fail Grading**ESL 450 - Academic English II****Credits:** 4

This course is intended for speakers of other languages who have already achieved a score of 525 or higher on the TOEFL (or an equivalent score on another standardized test of English language proficiency). Students will learn to read academic materials, do basic library research, write short papers in standard academic form, understand academic lectures, and participate in group work and class discussion. Students enrolled in ESL 450/ESL 650 are also eligible to enroll in two University of New Hampshire courses.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**ESL #640 - Academic English I****Credits:** 4-8

## Entrepreneurship (ENT) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**ENT 500 - The Entrepreneurial Mindset****Credits:** 4

This highly interactive course explores how entrepreneurs think and innovate. In the course, students may explore new paths to innovation and growth which includes understanding and incorporating the behaviors and thought processes unique to entrepreneurs. Students will incorporate entrepreneurial thinking and behavior into a process of a new venture or current positions, as intrapreneurs. The course will also provide a brief overview of tools that can be utilized to manage internal and external processes. Students may explore creative problem solving and, in teams, develop and test problem solutions using a "business model canvas" approach.

**Attributes:** Writing Intensive Course**Equivalent(s):** ENT 500G**Grade Mode:** Letter Grading

**ENT 600 - Launching and Managing Entrepreneurial Ventures****Credits:** 4

This course is designed for students interested in the steps required to start a new business venture. The focus will be on creating a new venture and covers in detail six key aspects related to the entrepreneurial process, including: introduction to lean entrepreneurship principles; business model design and assessment; legal issues in venture creation; new venture marketing and customer acquisition strategy; and new venture financial planning. Students may also learn all aspects of entrepreneurship, including: idea generation and business plan creation; forming a company; recruiting a team of key employees and advisors; developing a product/service; raising capital; business development / sales / marketing; board and investor relations; and fostering a strong business culture. Example assignments may include oral presentations, written new venture plans and discussions with classmates.

**Prerequisite(s):** ENT 500 with a minimum grade of D- or ENT 500G with a minimum grade of D-.

**Equivalent(s):** ENT 600G

**Grade Mode:** Letter Grading

**ENT 611 - Entrepreneurial Marketing****Credits:** 4

This course clarifies key marketing concepts, methods, and strategic issues relevant for start-up and early-stage entrepreneurs. Course topics may include but are not limited to identifying market opportunities, creating and screening new ideas, writing concepts, concept testing, new product forecasting, prototyping, and building a business case with assumptions about market entry strategy and launch marketing. The goal is to help students learn how to use state-of-the-art techniques to identify markets, develop new product ideas, measure customer benefits, and design profitable new products. This course is designed to help students develop a flexible way of thinking about marketing problems and strategies.

**Prerequisite(s):** MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.

**Equivalent(s):** ENT 611G

**Grade Mode:** Letter Grading

**ENT 703 - Entrepreneurial Finance****Credits:** 4

This course studies the financial strategies needed to support a new venture. Students investigate sources of funding and analyze investment strategies unique to the start-up. Planning for the funding aspect of a new venture is critical and this course will address the alternative sources of funds for carrying out the mission of the venture. This would include: understanding financial institutions (financial bootstrapping, external financing, angel investors, venture capitalists, founders, and banks) that provide risk capital for such firms. An entrepreneur needs to understand how to identify a business opportunity as well as how to marshal resources (especially capital) to a business opportunity. Topics may include financial statements, pro forma statements, cost of capital, break-even, financial ratios, investor expectations, and exit strategies. Recommended: ENT 500 The Entrepreneurial Mindset.

**Equivalent(s):** ENT 603G

**Grade Mode:** Letter Grading

**ENT 707 - Legalities and Ethics of Entrepreneurship****Credits:** 4

This course will examine the legal and ethical issues and problems faced by entrepreneurs in their journey, specifically from conception of an idea, to the creation and operations of a company, to the launch of a product or service, and finally to the sale of the company or investment by venture capitalists and everything in between. Topics may include the legal, ethical, and regulatory frameworks of intellectual property (trade secrets, patents, trademarks, and copyright), business and corporate issues, business entity structure and formation, taxation, contracts, operations and personnel, and raising capital through traditional and alternative methods. Recommended: ENT 500 The Entrepreneurial Mindset.

**Equivalent(s):** ENT 607G

**Grade Mode:** Letter Grading

## Environmental & Resource Economics (EREC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**EREC 411 - Environmental and Resource Economics Perspectives****Credits:** 4

Microeconomic theory and analysis in resource management and use decisions. Survey of significant resource problems from an economic perspective and the application of economic analysis.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** ECON 402, ECON 402A

**Mutual Exclusion:** No credit for students who have taken ECN 412, ECN 412W.

**Grade Mode:** Letter Grading

**EREC 444 - The New Pirates of the Caribbean****Credits:** 4

Inquiry into many facets of tourism from the standpoint of tourists and tour destination. Economic and institutional factors affecting human well-being from the use of land and water resources; discussions of distributional aspects of benefits from tourism activities.; environmental impacts; ownership patterns and uses; cultural attributes; and local economies in small Caribbean island nations. Cruise ships, time-shares, all-inclusive resorts, hurricanes, casinos, bars, rum, sex, and drugs are investigated through extensive readings and web surfing.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**EREC 525 - Statistical Methods and Applications****Credits:** 4

Applications of elementary statistical concepts and methods including probability, descriptive techniques, statistical inference and bivariate and multivariate statistical analysis. Orientation is toward analysis and interpretation of data commonly encountered in social science disciplines.

**Attributes:** Quantitative Reasoning(Disc)

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, HHS 540, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H, SOC 402, SOC #402H, SOC 502, SOC 502H.

**Grade Mode:** Letter Grading

**EREC 572 - Introduction to Natural Resource Economics****Credits:** 4

Introduces theory, methods of analysis, and current literature of natural resource economics and policy. Topics include multiple use, taxation, optimal harvest scheduling, market failure, property rights, public goods, benefit-cost analysis, amenity values, non-market resource services and natural resource policy. Topics applied to forests and forestry, wildlife management, outdoor recreation, public lands, agriculture, fisheries, water, energy and mining/nonrenewable resources.

**Grade Mode:** Letter Grading**EREC 601 - Agribusiness Economics and Management****Credits:** 4

Applications of economic and management principles in production, marketing, finance, and other operational decisions facing small agribusiness firms.

**Prerequisite(s):** EREC 411 with a minimum grade of D- or ECON 402 with a minimum grade of D-.

**Grade Mode:** Letter Grading**EREC 606 - Land Economics Perspectives: Uses, Policies, and Taxes****Credits:** 4

Economic and institutional perspectives affecting human use of land resources; discussion of land ownership patterns and uses; land rent, location, and resource use; institutional constraints; partial ownership policies; and local planning for more efficient use of land. Real estate markets, transfers, valuation, and taxation.

**Prerequisite(s):** EREC 411 with a minimum grade of D-.

**Equivalent(s):** RECO 606**Grade Mode:** Letter Grading**EREC 627 - Community Economics****Credits:** 4

Economic factors affecting community and local government decisions. Emphasizes use of economic theory for decision making and community problem solving.

**Prerequisite(s):** EREC 411 with a minimum grade of D-.

**Equivalent(s):** CD 627, RECO 627**Grade Mode:** Letter Grading**EREC 680 - Agricultural and Food Policy****Credits:** 4

Analysis of issues that led to government involvement in the agricultural and food sector. Application of economic concepts and tools to the evaluation of public policies affecting agriculture and food.

**Prerequisite(s):** EREC 411 with a minimum grade of D- or ECON 402 with a minimum grade of D-.

**Equivalent(s):** EREC 704**Grade Mode:** Letter Grading**EREC 708 - Environmental Economics****Credits:** 4

Environmental pollution, the market economy, and optimal resource allocation; alternative control procedures; levels of environmental protection and public policy; property right issues.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ECON 605 with a minimum grade of D-.

**Equivalent(s):** RECO 708**Grade Mode:** Letter Grading**EREC 756 - Rural and Regional Economic Development****Credits:** 4

Concepts and methods of delineating regional economies, methods of measuring activity, regional development, and public policies. Emphasizes empirical research studies.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ECON 605 with a minimum grade of D-.

**Equivalent(s):** RECO 756**Grade Mode:** Letter Grading**EREC #760 - Ecological-Economic Modeling for Decision Making****Credits:** 4

In this course, students will develop ecological-economic models and use them to inform economic decision making related to the management of natural resources. These models range from analytical models using algebra and calculus, to computational models using coding and simulations. The course will focus on spatial-dynamic computational bio-economic models because of their ability to capture economic decision making and ecological processes over time and space.

**Prerequisite(s):** ECON 605 with a minimum grade of D- and MATH 420 with a minimum grade of D-.

**Grade Mode:** Letter Grading**EREC 795 - Investigations****Credits:** 2-4

Special assignments in readings, investigations, or field problems. Topics may include agricultural marketing, agricultural production and farm management, community development, economics of human resources, economics of population and food, land economics, marine economics, rural economic development, regional economics, water economics, or teaching experience.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** EREC 795W, RECO 795**Grade Mode:** Letter Grading**EREC 795W - Investigations****Credits:** 2-4

Special assignments in readings, investigations, or field problems. Topics may include agricultural marketing, agricultural production and farm management, community development, economics of human resources, economics of population and food, land economics, marine economics, rural economic development, regional economics, water economics, or teaching experience.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** EREC 795, RECO 795**Grade Mode:** Letter Grading**EREC 799 - Honors Senior Thesis****Credits:** 1-4

Honor/thesis students conduct an independent research project, relevant to the student's area of specialization in the major, under the direction of a faculty sponsor. Students submit a research proposal, write a final report, and provide an oral presentation. One or two semester sequence.

**Attributes:** Honors course; Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** RECO 799**Grade Mode:** Letter Grading

## Exchange (EXCH)

### EXCH 595 - Exchange

**Credits:** 0-18

Exchange.

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

## Exercise Science (EXSC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### EXSC 520 - Contemporary Perspectives in Exercise Science

**Credits:** 4

This course is designed to introduce undergraduate students to the field of Exercise Science. Research studies, experiential learning and professional development will be used to explore the different aspects of Exercise Science including fitness, wellness, human performance, research and clinical exercise physiology. Students will discover the many ways exercise is used as a health and fitness intervention. Career options will be studied and evaluated giving students an informed exposure to potential areas of future.

**Equivalent(s):** KIN 520

**Grade Mode:** Letter Grading

### EXSC 527 - Scientific Foundations of Health and Fitness

**Credits:** 4

Provides students with practical, scientific, entry-level information relative to physical conditioning, health, and wellness from childhood through adulthood. Students are given theoretical information that will be followed by practical, hands-on experiences offered through laboratories experiences.

**Attributes:** Biological Science(Discovery); Discovery Lab Course; Writing Intensive Course

**Equivalent(s):** KIN 527

**Mutual Exclusion:** No credit for students who have taken NUTR 506.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

### EXSC 607 - Biology of Aging

**Credits:** 4

Biological mechanisms of the aging process, with special emphasis on human aging; changes due to chronic disease.

**Attributes:** Biological Science(Discovery)

**Equivalent(s):** KIN 607

**Grade Mode:** Letter Grading

### EXSC 620 - Physiology of Exercise

**Credits:** 4

Acute and chronic effects of exercise. Muscle physiology, respiration, cardiac function, circulation, energy metabolism, and application to training.

**Prerequisite(s):** BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.

**Equivalent(s):** KIN 620

**Grade Mode:** Letter Grading

### EXSC 621 - Exercise Laboratory Techniques

**Credits:** 4

Laboratory assessment of functional capacity, body composition, anaerobic power, anaerobic threshold, pulmonary function, blood pressure control, muscle strength, and temperature regulation. Field tests are used where appropriate. Extensive out-of-class time is required as each week a detailed lab report is submitted for grading.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** EXSC 620 with a minimum grade of D-.

**Equivalent(s):** KIN 621

**Grade Mode:** Letter Grading

### EXSC 650A - Internship in Exercise Science

**Credits:** 4-8

Individualized experiential training in an external (off-campus) exercise science setting (hospital, health & fitness club, business, physical therapy, or medical (physician assistant) offices, research laboratory) offering programs of prevention, intervention, and/or rehabilitation. The internship requires 400 contact hours and is a full-time commitment (10 weeks at 40 hours per week) usually taken the summer following the senior academic year. Activities may include graded exercise testing, exercise prescription, and exercise leadership. Must have completed all requirements for the option or have permission from the instructor prior to starting the internship. The course may be repeated once with 4 credits taken each time for a total of 8 credits. (IA continuous grading).

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** KIN 650A

**Grade Mode:** Credit/Fail Grading

### EXSC 693 - Teaching Assistantship

**Credits:** 2

Students serve as teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching assistants' and administrative duties.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Grade Mode:** Credit/Fail Grading

### EXSC 696 - Independent Study

**Credits:** 2-4

An advanced, individual scholarly project under the direct supervision of a faculty member.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

### EXSC 696W - Independent Study

**Credits:** 2-4

An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by major faculty and the department chair prior to the student's registration for EXSC 696W. All EXSC 696W projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**EXSC 699H - Honors Project****Credits:** 4

Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.

**Attributes:** Honors course**Grade Mode:** Letter Grading**EXSC 704 - Electrocardiography****Credits:** 4

Designed to provide exposure to basic interpretation and identification of electrocardiograms (ECGs). Includes detailed heart anatomy, coronary circulation, cardiac conduction system, electrocardiogram development, and all aspects pertaining to normal and abnormal ECGs.

**Prerequisite(s):** EXSC 621 with a minimum grade of D-.**Equivalent(s):** KIN 704**Grade Mode:** Letter Grading**EXSC 705 - Topics in Applied Physiology****Credits:** 4

Advanced exercise physiology course dealing with topics both current and relevant to exercise science majors. Includes genetics, environmental influences, immune system, detraining and over-training, epidemiology, ergogenic acids, and the influence of age and gender.

**Prerequisite(s):** EXSC 620 with a minimum grade of D- and EXSC 621 with a minimum grade of D- and EXSC 736 with a minimum grade of D-.**Equivalent(s):** KIN 705**Grade Mode:** Letter Grading**EXSC 720 - Science and Practice of Strength Training****Credits:** 4

Designed to provide students exposure to the knowledge and practical experience necessary for establishing strength development programs in a variety of populations, including healthy, athletic, and higher risk individuals. Program design, correct lifting techniques, physiological adaptations, and organization and administration of programs are highlighted. Includes fundamentals regarding the selection of programs and equipment, spotting techniques, as well as ways to assess strength and power in humans without expensive equipment.

**Prerequisite(s):** EXSC 620 with a minimum grade of D- and EXSC 621 with a minimum grade of D-.**Equivalent(s):** KIN 720**Grade Mode:** Letter Grading**EXSC 722 - Applied Biomechanics****Credits:** 4

This course provides students with a background in the fundamental biomechanical principles that describe and govern human movement. Topics of the course include friction, linear and angular motion, tissue material properties, conservation of energy, work and power, fluid mechanics, stability and center of gravity, mechanics of injury, walking and running gait analysis. These topics are taught through the lens of modern biomechanical analyses including dynamometry, electromyography, accelerometry, and optical motion analysis.

**Prerequisite(s):** EXSC 620 with a minimum grade of D-.**Equivalent(s):** KIN 722**Grade Mode:** Letter Grading**EXSC 724 - Exercise Metabolism: Acute and Chronic Adaptations****Credits:** 4

Overview of the metabolic processes that occur during exercise and metabolic changes that occur as a result of exercise training. Topics include glycogenolysis and glycolysis in muscle, cellular oxidation of pyruvate, lipid metabolism, metabolism of proteins and amino acids, neural and endocrine control of metabolism, and fatigue during muscular exercise.

**Prerequisite(s):** EXSC 621 with a minimum grade of D- and CHEM 404 with a minimum grade of D-.**Equivalent(s):** KIN 724**Grade Mode:** Letter Grading**EXSC 736 - Fitness and Graded Exercise Testing****Credits:** 4

Designed to provide students exposure to the knowledge and practical experience necessary for establishing exercise programs in apparently healthy populations. Topics include fitness testing, test interpretation, and exercise prescription.

**Prerequisite(s):** EXSC 621 with a minimum grade of D- and EXSC 704 with a minimum grade of D-.**Equivalent(s):** KIN 736**Grade Mode:** Letter Grading**EXSC 737 - Exercise Prescription and Leadership in Healthy and Special Populations****Credits:** 4

Provides exposure to the knowledge and practical experience necessary for establishing exercise and health promotion programs in a variety of populations. Includes fundamentals regarding personal training and program selection, implementation and equipment, legal issues, and budget establishment. Strength training programs and special populations are highlighted.

**Prerequisite(s):** EXSC 621 with a minimum grade of D- and EXSC 736 with a minimum grade of D-.**Equivalent(s):** KIN 737**Grade Mode:** Letter Grading**EXSC 794 - Cardiopulmonary Pathologies****Credits:** 4

Lecture study of the anatomy, physiology, and pathophysiology of the cardiac, vascular, and pulmonary systems. Particular emphasis on the study of cardiovascular function in diseased and stressed states. Clinical assessment of the cardiopulmonary patient.

**Prerequisite(s):** EXSC 704 with a minimum grade of D-.**Equivalent(s):** KIN 794**Grade Mode:** Letter Grading**EXSC 795 - Practicum in Cardiac Rehabilitation****Credits:** 2

Provides students with practical and theoretical experience in all aspects involving cardiac rehabilitation programs.

**Prerequisite(s):** EXSC 704 with a minimum grade of D- and EXSC 794 with a minimum grade of D-.**Equivalent(s):** KIN 795**Grade Mode:** Letter Grading**EXSC 798 - Special Topics in Exercise Science****Credits:** 1-4

New or specialized courses not normally covered in regular course offerings.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

# Finance (FIN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

## FIN 620 - Topics in Finance I

**Credits:** 2-4

Special topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

## FIN 650 - Wildcat Investment Fund

**Credits:** 2

Wildcat Investment.

**Repeat Rule:** May be repeated for a maximum of 12 credits.

**Grade Mode:** Letter Grading

## FIN 701 - Financial Policy

**Credits:** 4

Development of analytical tools and practical skills for recognizing and solving complex problems of business finance. Working-capital management, capital budgeting, cost of capital, capital structure, and dividend policy.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 701

**Grade Mode:** Letter Grading

## FIN 702 - Investments Analysis

**Credits:** 4

Security valuation, efficient markets, portfolio management, options, and alternative investments. Computer research topics.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 702

**Grade Mode:** Letter Grading

## FIN 703 - International Financial Management

**Credits:** 4

Financial Management problems facing multinational firms. Primary focus on effects of currency denominations on financial decisions.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 703

**Grade Mode:** Letter Grading

## FIN 704 - Derivatives Securities and Markets

**Credits:** 4

Derivative assets and markets, and their role in business decision-making and portfolio management. Emphasis on practical and theoretical aspects of hedging and speculating using futures and options for both commodities and financial assets, including their market mechanics.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 704

**Grade Mode:** Letter Grading

## FIN 705 - Financial Institutions

**Credits:** 4

Examination of financial institutions, financial instruments and financial markets. Emphasis on how commercial banks create value, the influences of the Federal Reserve and its monetary policies, and the workings of markets such as money markets, bond markets and mortgage markets. Throughout the course, the 2008 global financial crisis is central to the discussion. The course helps student develop knowledge and skills needed to start a career in finance industry.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 705

**Grade Mode:** Letter Grading

## FIN 706 - Financial Modeling and Analytics

**Credits:** 4

The main objective of the course is to bridge the gap between theory and practice by using software applications and real-world data to solve a variety of financial problems. The course is very 'hands-on' and is expected to help students develop skills that are useful in a variety of jobs in finance, accounting, insurance, and real estate.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 706

**Grade Mode:** Letter Grading

## FIN 707 - Equity Analysis and Firm Valuation

**Credits:** 4

This course is intended to provide practical tools for analyzing and valuing a company's equity. Primarily an applications course, it covers several valuation models such as market multiples and free cash flow models, and focuses on the implementation of finance theories to valuation problems.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.

**Equivalent(s):** ACFI 707

**Grade Mode:** Letter Grading

## FIN 708 - Real Estate Finance

**Credits:** 4

This course provides an introduction to residential and commercial real estate. Topics include market analysis, cash flows, debt and equity financing, valuation, and real estate investment trusts. Case studies, projects, and real world applications of the concepts learned are significant components of the course.

**Prerequisite(s):** ADMN 570 with a minimum grade of C- or HMGT 655 with a minimum grade of C-.

**Equivalent(s):** ACFI 708

**Grade Mode:** Letter Grading

## FIN 709 - Mortgage Banking and Fixed Income Securities

**Credits:** 4

This course focuses on bonds and the bond market. While the cash flows of bonds are specified, their valuation is particularly challenging given interest rate movements, embedded optionality, and credit risk. As part of an examination of structured products, the course will examine the process of creating, valuing, and trading mortgages. Further, the course demonstrates the skills needed to manage fixed income portfolios in light of both client specific objectives and the market environment.

**Prerequisite(s):** (ADMN 570 with a minimum grade of C- or HMGT 655 with a minimum grade of C-) and ACFI 702 with a minimum grade of C-.

**Equivalent(s):** ACFI 709

**Grade Mode:** Letter Grading

**FIN 710 - Big Data in Finance****Credits:** 4

This course serves as an introduction to many aspects of big data utilization, specifically as it applies to finance. Topics typically include high frequency trading, stock market anomalies, data management, fintech innovations, and safety and ethics when working with big data. Programming languages common to finance, such as Stata, SAS, and Python, are learned and used to analyze and manipulate data.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.**Equivalent(s):** ACFI 710**Grade Mode:** Letter Grading**FIN 711 - Investment Banking****Credits:** 4

This course explores several areas of investment banking. Investment bankers play a critical role in financial markets. Among their many roles, they provide advisory services to firms, help raise capital, and assist with complex financial transactions such as mergers and acquisitions. Course topics typically include company strategy, valuation, initial public offerings (IPOs), leveraged buyouts (LBOs), and mergers and acquisitions (M&A). Students cannot earn credit for the course after taking FIN 720 as Investment Banking.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.**Grade Mode:** Letter Grading**FIN 714W - Financial Scandals, Upheavals, and Crises****Credits:** 4

The course seeks to place money and finance in its historical context, showing its significant and pivotal role in human progress. We will examine innovation and crisis in banks and banking, the bond and equity markets, insurance, real estate, and cross-border trade & monetary flows. Our investigation will reach into numerous present financial events and circumstances, including the collapse of countries, scandals at companies, and the impact of individuals going "off the rails".

**Attributes:** Writing Intensive Course**Prerequisite(s):** ADMN 570 with a minimum grade of C-.**Grade Mode:** Letter Grading**FIN 720 - Topics in Finance II****Credits:** 4

Special topics, vary by semester.

**Prerequisite(s):** ADMN 570 with a minimum grade of C-.**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**FIN 720W - Topics in Finance II****Credits:** 4

Special topics, vary by semester.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ADMN 570 with a minimum grade of C-.**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**FIN 725 - Independent Studies in Finance****Credits:** 1-4

Student-designed individual research projects, approved by a faculty sponsor. Paper required. Course credits vary according to the nature of the project, to be determined by the faculty sponsor. For juniors and seniors in high standing; by permission.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**FIN 795 - Internships in Finance****Credits:** 1-4

Finance fieldwork in a business or other type of organization. Supervision provided by the organization, and consultation provided by the faculty sponsor. Written report required. Course credits vary according to the nature of the fieldwork, to be determined by the faculty sponsor. For juniors and seniors in high standing; by permission.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Credit/Fail Grading

## Finance (FNC) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**FNC 611 - Money and Banking****Credits:** 4

This course examines financial markets and financial intermediaries, and their role in creating and maintaining economic efficiency. It analyzes the performance of banks and other financial institutions and reviews the functions and measurements of money. It also examines and assesses the use of monetary policy tools, targets, and goals within the context of current economic conditions. Note: ECO 580 is recommended.

**Prerequisite(s):** ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D-.**Equivalent(s):** MGMT 611G**Grade Mode:** Letter Grading**FNC 612 - Investment Principles****Credits:** 4

This course provides the learner with a thorough overview of investments. Students will compare and contrast the major investment vehicles available today, including stocks, bonds, money markets, and mutual funds. Topics may include the analysis of investment vehicles (such as stocks, bonds, money markets, and mutual funds), consideration of risk and expected rates of return, time value of money applications, and the principles of asset allocation, risk tolerance, and diversification.

**Prerequisite(s):** (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-).**Equivalent(s):** MGMT 612G**Grade Mode:** Letter Grading**FNC 665 - Financial Management****Credits:** 4

A successful financial manager focuses on maximizing shareholder wealth, while also considering other stakeholders such as employees and communities. This course utilizes financial formulas, tables, and spreadsheets to focus on the financial functions of analysis, planning and decision-making, and control. Topics may include financial statement analysis and forecasting, working capital policy, cost of capital and capital budgeting techniques, interaction with financial markets, and time value of money techniques. NOTE: MTH 504 Statistics is recommended.

**Prerequisite(s):** (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D- or MGMT 569G with a minimum grade of D- or MGMT 569 with a minimum grade of D-) and (ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D-).**Equivalent(s):** MGMT 613G**Grade Mode:** Letter Grading

**FNC 675 - Financial Modeling and Decision-Making****Credits:** 4

This course prepares managers to develop real-world financial models and to interpret financial information for effective business decision making. It builds upon knowledge in accounting, finance, and economics and emphasizes the strategic application of such knowledge in the corporate setting. Students employ the tools of analysts to develop their understanding of how managers use financial data to guide decisions and to increase value. Topics may include capital budgeting, strategic investments, financial risk, and debt. NOTE: MTH 504 Statistics is recommended.

**Prerequisite(s):** (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D- or MGMT 569G with a minimum grade of D- or MGMT 569 with a minimum grade of D-) and (ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D-).

**Equivalent(s):** MGMT 615G

**Grade Mode:** Letter Grading

## Fire Service Administration (FSA) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**FSA 605 - Fire Service Ethics****Credits:** 4

This course examines the basic principles of ethics as related to fire service operations and management with special attention given to current issues in the fire service.

**Attributes:** Writing Intensive Course

**Equivalent(s):** FSA 605G

**Grade Mode:** Letter Grading

**FSA 610 - Community Risk Reduction for the Fire and Emergency Services****Credits:** 4

This course provides a theoretical framework for the understanding of the ethical, sociological, organizational, political, and legal components of community risk reduction and a methodology for the development of a comprehensive community risk-reduction plan.

**Equivalent(s):** FSA 610G

**Grade Mode:** Letter Grading

**FSA 635 - Political and Legal Foundations for Fire Protection****Credits:** 4

This course examines the legal aspects of fire service, as well as the political and social impacts of legal issues. It includes a review of the American legal system and in-depth coverage of legal and political issues involving employment and personnel matters, administrative and operational matters, planning and code enforcement, and legislative and political processes with regard to the fire service.

**Prerequisite(s):** FSA 605 with a minimum grade of D- or FSA 605G with a minimum grade of D-.

**Equivalent(s):** FSA 615G

**Grade Mode:** Letter Grading

**FSA 665 - Command and Control of Large-Scale Incidents****Credits:** 4

This course addresses the knowledge and skills necessary to command the mitigation of large-scale emergency incidents that require resources beyond the initial alarm assignment. Students will have the opportunity to focus on strategic preparation for predictable events and create individualized command tools.

**Equivalent(s):** FSA 617G

**Grade Mode:** Letter Grading

**FSA 685 - Fire Prevention Organization and Management****Credits:** 4

This course addresses the knowledge, methods, and concepts for effective leadership of comprehensive fire prevention and risk-reduction programs.

**Prerequisite(s):** FSA 605 with a minimum grade of D- or FSA 605G with a minimum grade of D-.

**Equivalent(s):** FSA 620G

**Grade Mode:** Letter Grading

**FSA 710 - Personnel Management for the Fire Service****Credits:** 4

This course examines relationships and issues in personnel administration and human resource development within the context of fire-related organizations. Topics include personnel management, organizational development, productivity, recruitment and selection, performance management systems, discipline, and collective bargaining.

**Prerequisite(s):** FSA 605 with a minimum grade of D- or FSA 605G with a minimum grade of D-.

**Equivalent(s):** FSA 625G

**Grade Mode:** Letter Grading

**FSA 740 - Applications of Fire Research****Credits:** 4

This course examines the basic principles of research and methodology for analyzing current fire-related research. The course also provides a framework for conducting and evaluating independent research in the following areas: fire dynamics, fire test standards and codes, fire safety, fire modeling, structural fire safety, life safety, firefighter health and safety, automatic detection and suppression, transportation fire hazards, risk analysis and loss control, fire service applied research, and new trends in fire-related research.

**Prerequisite(s):** (FSA 605 with a minimum grade of D- or FSA 605G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-).

**Equivalent(s):** FSA 630G

**Grade Mode:** Letter Grading

**FSA 760 - Fire and Emergency Services Administration****Credits:** 4

This course is designed to build upon an existing base of knowledge about fire and emergency services with an in-depth survey of executive-level administrative and managerial topics. The course addresses the following skills that are necessary to manage and lead a fire and emergency services department through the challenges and changes of the 21st century: persuasion and influence, accountable budgeting, anticipation of challenges and the need for change, and using specific management tools for analyzing and solving problems. A central part of the course focuses on how the leadership of a fire and emergency services department develops internal and external cooperation to create a coordinated approach to achieving the department's mission.

**Prerequisite(s):** (FSA 605 with a minimum grade of D- or FSA 605G with a minimum grade of D-) and (FSA 635 with a minimum grade of D- or FSA 615G with a minimum grade of D-) and (FSA 710 with a minimum grade of D- or FSA 625G with a minimum grade of D-).

**Equivalent(s):** FSA 637G**Grade Mode:** Letter Grading**FSA 797 - Integrative Capstone: Research Project in Fire Service Administration****Credits:** 4

This capstone course in Fire Service Administration provides students the opportunity to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. In addition to preparing a professional portfolio, students will write, present, and defend an independent research project or study, to include analysis and synthesis integrating theory and practice to address a significant contemporary industry issue. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** FSA 650G**Grade Mode:** Letter Grading

## Forest Technology (FORT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**FORT #466 - Forest Surveying and Mapping****Credits:** 0 or 4

Provides instruction and experience in running cruise lines and in the survey and identification of rural property lines. The focus is on field surveying techniques and problem solving of special importance to foresters. Use of magnetic survey data in rural property measurement. Skill and efficiency is developed in analyzing field survey data, plotting, lettering and finishing topographic and planimetric maps, and road plans, both manually and by Computer Assisted Drafting using multiple software applications.

**Equivalent(s):** FORT 266**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 470 - Applied Silviculture****Credits:** 0 or 4

Silvicultural practices in the U.S. including reforestation systems. Improvement of forest stands employing the basic tending practices of weeding, thinning, and pruning. Marking of stands prior to logging operations. 2 lec/1 4-hr lab.

**Equivalent(s):** FORT 270**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 527 - Forest Ecology****Credits:** 4

Introduces basic and applied ecology of forests, with emphasis on ecosystem processes, including water, energy, and nutrient cycles; biological interactions, including biodiversity and plant-plant, plant-animal, and plant-microbe relationships; and human impacts, including forest management, land-use/land cover-change, and changes in atmospheric chemistry.

**Equivalent(s):** NR 527**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 564 - Arboriculture****Credits:** 0 or 3

Tree selection, care, and maintenance in the urban environment. Includes climbing, safety practices, pruning, hazard tree assessment, and removals. 1 lec/1 4-hr lab.

**Equivalent(s):** FORT 464**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT #567 - Leadership, Supervision & Safety****Credits:** 2

Fundamentals of leadership and supervision including effective communication in the workplace and public sector are explored. Project management, personnel training and motivation, plus problem-solving and conflict resolution applied through a practical community service forestry project. Accident prevention, first aid, and CPR instruction also included. 2 lec.

**Equivalent(s):** FORT 267**Grade Mode:** Letter Grading**FORT 572 - Mensuration****Credits:** 0 or 4

Field application of forest inventory and timber cruising techniques. Measurement of tree form, volume, quality, and defect. Growth prediction of individual trees and stands. Use of basic statistical methods as a tool in cruising. 2 lec/1 4-hr lab.

**Equivalent(s):** FORT 272**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 573 - Management Operation & Analysis****Credits:** 4

An introduction to the basic concepts of forest land management and the practical approaches to forest management planning and financial decision-making. Topics include a silviculture review; deed research and mapping; management plan preparation; multiple-use sustainable forestry; tree valuation; timber sale appraisal methods; contracting; forest taxation; and long-term cost and return analysis. Students individually prepare a comprehensive forest management plan as a semester project.

**Equivalent(s):** FORT 273**Grade Mode:** Letter Grading**Special Fee:** Yes

**FORT 574 - Industrial Forest Management Tour****Credits:** 1

Concentrated field experience and intensive observations of industrial, private, and federal forest holdings and facilities; emphasizing forest utilization and management operations as currently practiced in New England. One week of concentrated field study.

**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**FORT 576 - Forest Products and Wood Science****Credits:** 0-4

Basics of structure and properties of wood as a raw material. Conversion of logs to lumber at Thompson School sawmill. Lumber and log grading and measuring. Studies in processing efficiency, lumber drying, and physical plant operations. Introduction to paper, veneer, and chip products. Marketing of forest products. 2 lec/1 4-hr lab.

**Equivalent(s):** FORT 476**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 577 - Forest Harvesting Systems****Credits:** 0 or 4

A study in harvesting methods and their relation to forest management and silviculture of the state and region. Theory and practice of conventional harvesting systems including hands-on application of techniques with a strong emphasis on protection of the environment and the safety and health of workers. Department permission for non-majors. 2 lec/4-hr lab.

**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 578 - Ecology and Management of Forest Stressors****Credits:** 4

An introduction to the biology and ecology of forest insects, pathogens, and invasive plants in the context of forest management. Students learn to recognize the signs and symptoms of insect and disease damage in forest trees and products. Students explore the impacts of novel invasions of pests, pathogens, and pernicious plants and evaluate adaptive management strategies. 2 lec/4 hr lab.

**Equivalent(s):** FORT 278**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 579 - Wildland Fire Ecology and Management****Credits:** 4

An exploration of the historical context of wildland fire and how our changing climate and past management practices influence future fire regimes at local and national scales. This course will provide instruction in fire ecology, and prescribed fire theory and methods. Students will learn the basic knowledge of forest fire control and use and will focus on firefighting, the impacts of fire on vegetation, and the use of prescribed fire in forest and wildlife management.

**Equivalent(s):** FORT 479**Grade Mode:** Letter Grading**Special Fee:** Yes**FORT 581 - Applied Geospatial Techniques****Credits:** 4

Geographic Information Systems (GIS) are integral to natural resource management and these technologies/software have become widespread throughout various fields. Proficiency in fundamental GIS skills is imperative for resource managers. Students will 1) develop an understanding of imagery acquisition and remote sensing systems/technologies; 2) develop skills in identification, interpretation, and mapping of land/vegetation features, including an understanding of map projection; 3) gain experience in GIS software to perform fundamental geoprocessing and mapping techniques.

**Equivalent(s):** FORT 281**Grade Mode:** Letter Grading**FORT 592 - Independent Studies in Forest Technology/Urban Tree Care****Credits:** 1-4

Students who have the ability and adequate preparation to work independently may propose a contract to design a course or research project on a topic not available through existing course offerings. The purpose of this research is to explore new areas in the student's field of study or to pursue course material in greater depth. Work is supervised by an appropriate faculty/staff member and credit varies depending on the proposed project/research. Examples include forest management, forest products, forest protection, wildlife management, or urban tree care.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** FORT 292**Grade Mode:** Letter Grading**FORT 597 - Work Experience****Credits:** 0

Career-related employment (10 weeks, generally in the summer following freshman year) in a forestry, urban tree care, or other department-approved natural resources area.

**Equivalent(s):** FORT 297**Grade Mode:** Credit/Fail Grading

## French (FREN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**FREN 401 - Elementary French I****Credits:** 0 or 4

Conducted in French, the course introduces students to French language and culture through speaking, listening, reading, writing, labs and films. Designed for students without previous training in French. Credit only for students who have had less than two years of French in secondary school. FREN 401 - FREN 402 taken together satisfies the foreign language requirement.

**Grade Mode:** Letter Grading**FREN 402 - Elementary French II****Credits:** 0 or 4

See description for FREN 401. Cannot be taken separately except with permission of instructor.

**Attributes:** Foreign Language Requirement**Prerequisite(s):** FREN 401 with a minimum grade of D-.**Grade Mode:** Letter Grading

**FREN 403 - Review of French****Credits:** 4

Conducted in French. Course emphasizes the active use of French through speaking, listening, reading, writing, labs, and films while providing a review of basic grammar. Designed for those students whose study of French has been interrupted for a significant amount of time or who have had two or more years of high school French. FREN 403 does not satisfy the foreign language requirement.

**Grade Mode:** Letter Grading**FREN 503 - Intermediate French I****Credits:** 4

Conducted in French. Review of grammar with emphasis on the development of reading, writing, speaking, and listening skills. With modules on culture tailored to the needs of students in STEM disciplines as well as in agriculture, business, hospitality, and health and human services (among others).

**Attributes:** World Cultures(Discovery)**Equivalent(s):** FREN 503H, FREN 585**Grade Mode:** Letter Grading**FREN 503W - Intermediate French I****Credits:** 4

Conducted in French. Review of grammar with emphasis on the development of reading, writing, speaking, and listening skills, and on culture. Discussion in French of literary and cultural readings. Labs and films.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Equivalent(s):** FREN 503H, FREN 585**Grade Mode:** Letter Grading**FREN 504 - Intermediate French II****Credits:** 4

Conducted in French. Review of grammar with emphasis on the development of reading, writing, speaking, and listening skills, and on culture. Discussion in French of literary and cultural readings. Labs and films.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Prerequisite(s):** FREN 503 with a minimum grade of D-.**Equivalent(s):** FREN 504H, FREN 586**Grade Mode:** Letter Grading**FREN 525 - A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond****Credits:** 4

What makes France France, and how did it evolve from a mostly agricultural to a modern society? Using films, essays, newspaper articles, and television this course examines major social, political, and gastronomic trends, events, debates and personalities that help shed light on contemporary French culture. Taught in English. Not for major credit. May be repeated for credit barring duplication of materials. Offered in Spring.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**FREN #525H - Honors/A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond****Credits:** 4

What makes France, France, and how did it evolve from a mostly agricultural to a modern society? Using films, essays, newspaper articles, and television this course examines major social, political, and gastronomic trends, events, debates and personalities that help shed light on contemporary French culture. Taught in English. Not for major credit. May be repeated for credit barring duplication of materials. Offered in the Spring.

**Attributes:** Honors course; World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**Special Fee:** Yes**FREN #526 - Introduction to Francophone Cultures****Credits:** 4

Taught in English. Focus on French-speaking cultures other than France. Includes historical, geographical, and artistic expressions of these cultures. Not for major credit. May be repeated for credit barring duplication of materials. (Not offered every year).

**Attributes:** World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**FREN 595 - French Practicum****Credits:** 2

Practical use of French language or cultural skills outside the classroom through special projects.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**FREN #595A - A Culinary Exploration in Southern France****Credits:** 0

A 2-week long experience abroad intended to immerse students in French language and culture. The intensive and impactful in-country travel will augment on-campus instruction, and will provide a "living lab" experience for students who have taken FREN 595.

**Prerequisite(s):** FREN 595 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**FREN 631 - Advanced French: Reading and Writing****Credits:** 4

This course is intended to refine students' ability to write in French through the study and practice of stylistic techniques, pertinent grammatical structures, and vocabulary used in contemporary written French. Working with a variety of texts, students become familiar with, and practice different forms of French rhetoric and styles in creative, argumentative, and analytical writings. Revision and rewriting are an integral part of the course, with students' own work providing a focus for in-class analysis and feedback. Offered during the fall semester. The course sequence FREN 631- FREN 632 may be taken in any order.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Prerequisite(s):** FREN 504 with a minimum grade of D-.**Grade Mode:** Letter Grading

**FREN 632 - Advanced French: Listening and Speaking****Credits:** 4

This course is intended to refine students' ability to communicate in French, through the practice of debating and exchanging ideas, and a variety of pronunciation exercises. While reviewing and refining pertinent grammatical structures, students discuss current events and other material in class and on-line. Students also have the opportunity to actively practice their French during the weekly Zoom session with French students from Bordeaux. Offered during the spring semester. FREN 631 and FREN 632 may be taken in any order.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** FREN 504 with a minimum grade of D-.**Grade Mode:** Letter Grading**FREN 651 - Love, War, and Power in French Literature****Credits:** 4

Reading and rigorous oral and written analysis of French literary texts that illustrate a variety of genres, with particular attention paid to the issues of love, war, and power. May be taken before or after FREN 652.

**Attributes:** Humanities(Disc); Writing Intensive Course**Prerequisite(s):** (FREN 631 (may be taken concurrently) with a minimum grade of D- and (FREN 632 (may be taken concurrently) with a minimum grade of D-.**Equivalent(s):** FREN 651H**Grade Mode:** Letter Grading**FREN 652 - Greatest Hits of French****Credits:** 4

Reading and rigorous oral and written analysis of major French texts spanning 5 centuries of literature that illustrate a variety of genres, from the Chanson de Roland to Moliere's famous comedies. May be taken before or after FREN 651.

**Attributes:** Humanities(Disc); Writing Intensive Course**Prerequisite(s):** FREN 631 (may be taken concurrently) with a minimum grade of D- and FREN 632 (may be taken concurrently) with a minimum grade of D-.**Equivalent(s):** FREN 652H**Grade Mode:** Letter Grading**FREN 676 - Topics in Francophone Culture****Credits:** 4

Topics drawn from all aspects and periods of French civilization. May be repeated for credit barring duplication of materials. (Not offered every year.)

**Attributes:** Writing Intensive Course**Prerequisite(s):** FREN 631 with a minimum grade of D- and FREN 632 with a minimum grade of D- and (FREN 651 with a minimum grade of D- or FREN 652 with a minimum grade of D-).**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** FREN 636**Grade Mode:** Letter Grading**FREN #677 - France in the European Union****Credits:** 4

Topics drawn from all aspects of contemporary French culture in its relationship with the fifteen member states of the European Union, with emphasis on the role of France in the building of the European Union. Corequisite: FREN 651 or FREN 652. (Not offered every year).

**Attributes:** Writing Intensive Course**Prerequisite(s):** FREN 631 with a minimum grade of D- and FREN 632 with a minimum grade of D-.**Equivalent(s):** FREN 645**Grade Mode:** Letter Grading**FREN 683 - Summer Study in Dijon (4 weeks)****Credits:** 4

This course offers four weeks of intensive study of French language at the Centre International d'Etudes Francaises (CIEF) in Dijon, France. The prerequisite is at least elementary French or equivalent and depends on the student's level at the time of registration. Minimum GPA of 2.5 or better and permission. Special UNH fee. Student responsible for personal and travel expenses. Offered summers only.

**Co-requisite:** INCO 589**Grade Mode:** Letter Grading**Special Fee:** Yes**FREN 690 - Study Abroad in Dijon France****Credits:** 0-16

Spring semester at the University of Burgundy (Dijon, France) for juniors. This one-semester program is open to majors who have completed with a B- or better FREN 631 and FREN 632 and FREN 651 or FREN 652, or equivalent. Non-majors need to speak with the program director to determine their eligibility. Non-credit orientation meetings are required during the fall semester prior to departure. The normal UNH requirements for studying abroad apply to this program. For further information, interested students should consult with the director in the French program.

**Co-requisite:** INCO 588**Attributes:** World Cultures(Discovery)**Repeat Rule:** May be repeated for a maximum of 32 credits.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**FREN 691 - Summer Study in Dijon (8 weeks)****Credits:** 8

This course offers eight weeks of intensive study of French language at the Centre International d'Etudes Francaises (CIEF) in Dijon, France. The prerequisite is at least elementary French or equivalent and depends on the student's level at the time of registration. This course is also open to French majors who cannot fulfill their semester-long study abroad requirement for documented academic reasons. By petition only. Minimum GPA of 2.5 or better and permission. Special UNH fee. Student responsible for personal and travel expenses. Offered summers only.

**Co-requisite:** INCO 589**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**FREN 765 - Rebellion and Upheaval in 18th-Century Literature and Culture****Credits:** 4

This course presents different facets of the culture, literature, and history from Louis XIV's death to the Napoleonic era, placing particularly emphasis on the intellectual productions that questioned the status quo and played a role in the unfolding of the French Revolution. May be repeated for credit, barring duplication of materials.

**Attributes:** Writing Intensive Course**Prerequisite(s):** FREN 651 with a minimum grade of D- and FREN 652 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 2 times.**Grade Mode:** Letter Grading

**FREN 775 - Les Mis and their World****Credits:** 4

Inspired by the very popular Victor Hugo's novel *Les Misérables*, this course examines 19th-century society and many issues of importance during that period: romantic and familial love, the nature of law and justice, morals and religious faith, as well as the architecture and urban design of Paris. It will also consider some of the adaptations for film, television, and the stage. May be repeated for credit, barring duplication of materials.

**Attributes:** Writing Intensive Course**Prerequisite(s):** FREN 651 with a minimum grade of D- and FREN 652 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 2 times.**Grade Mode:** Letter Grading**FREN #785 - Francophonies Plurielles****Credits:** 4

Spoken in many countries around the world, French has a rich international literary tradition. This course presents the numerous facets of Francophone literature and film produced in Quebec, Western Africa, the Indian Ocean, and the Caribbeans. Focus will change each time the course is offered. May be repeated for credit, barring duplication of materials.

**Attributes:** Writing Intensive Course**Prerequisite(s):** FREN 651 with a minimum grade of D- and FREN 652 with a minimum grade of D-.**Repeat Rule:** May be repeated up to 2 times.**Equivalent(s):** FREN 653**Grade Mode:** Letter Grading**FREN #790 - Cultural Encounters: A View from Abroad****Credits:** 4

French major capstone course for students returning from studying in a French-speaking country. It provides the opportunity 1) to reflect on an international experience and cross cultural communication; 2) to fine tune their use of different styles and modes of expression; 3) to practice translation skills.

**Attributes:** Writing Intensive Course**Prerequisite(s):** FREN 690 with a minimum grade of D-.**Grade Mode:** Letter Grading**FREN 795 - Special Studies in French Language and Literature****Credits:** 1-4

Individual guided study of the work of a major author, a genre, or specific topics in literature. Training in bibliography and organization of material. (Not offered every year).

**Grade Mode:** Letter Grading

## Genetics (GEN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**GEN 401 - Professional Perspectives in Genetics****Credits:** 1

Introduction to the fields of genetics and genomics and to the genetics faculty and their research. Careers and professional opportunities for genetic majors presented by invited speakers. Emphasis on skills needed for academic success and strategies for achieving professional goals.

**Grade Mode:** Credit/Fail Grading**GEN 604 - Principles of Genetics****Credits:** 0 or 4

Chemical structure of genetic material, gene recombination, mutation, and chromosome mapping. Gene expression and regulation; recombinant DNA; evolutionary, quantitative, and population genetics. College math or statistics suggested.

**Prerequisite(s):** (BIOL 411 with a minimum grade of D- or BIOL #411H with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D-) and CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-).

**Equivalent(s):** BIOL 604**Grade Mode:** Letter Grading**GEN 606 - Genetics Lab****Credits:** 4

Hands-on experience with some of the important model organisms used for research in genetics (fruit flies, bacteria, yeast, nematodes, and plants). Investigation of fundamental genetic concepts in the laboratory, experience with transmission and molecular genetic techniques, introduction to bioinformatics, analysis and interpretation of data.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**GEN 704 - Genetics of Prokaryotic Microbes****Credits:** 5

Maintenance, exchange, and expression of genetic material in bacteria and their viruses. Historical overview of the role microbial genetics played in development of modern molecular biology. Contemporary perspective on methods used to understand the function of genes and their applications to basic science, biomedical research, and biotechnology. Lab.

**Attributes:** Writing Intensive Course**Prerequisite(s):** BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D- and GEN 604 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**GEN 705 - Population Genetics****Credits:** 3

Exploration of the forces (mutations, selection, random drift, inbreeding, assortative mating) affecting the frequency and distribution of genetic variation in natural populations. Quantifying the structure of populations. Methods of analysis for theoretical and practical applications.

**Prerequisite(s):** GEN 604 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.**Equivalent(s):** PBIO 705, ZOOL 665, ZOOL 705**Mutual Exclusion:** No credit for students who have taken NR 664.**Grade Mode:** Letter Grading**GEN 706 - Human Genetics****Credits:** 4

Genetic basis of human traits and diseases including both traditional methods of diagnosis and contemporary molecular genetic approaches stemming from the human genome project. Case studies exemplify common practices in human genetic counseling and integrate the scientific basis of diagnosis with the special ethical implications of human genetic analysis.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Equivalent(s):** ANSC 706, BCHM 706**Grade Mode:** Letter Grading

**GEN 711 - Genomics and Bioinformatics****Credits:** 0 or 4

Methods, applications, and implications of genomics--the analysis of whole genomes. Medical, ethical and legal implications of genomic data. Computer lab provides exposure and experience in a range of bioinformatics approaches used in genome analysis. Computer Lab.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Equivalent(s):** GEN 711W**Grade Mode:** Letter Grading**GEN 711W - Genomics and Bioinformatics****Credits:** 0 or 4

Methods, applications, and implications of genomics--the analysis of whole genomes. Microbial, plant and animal genomics are addressed, as well as medical, ethical and legal implications. The lab provides exposure and experience on a range of bioinformatics approaches--the computer applications used in genome analysis. Lab.

**Attributes:** Writing Intensive Course**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Equivalent(s):** BCHM 711, BCHM 715, GEN 711, MICR 711, MICR 715**Grade Mode:** Letter Grading**GEN 712 - Programming for Bioinformatics****Credits:** 5

Development of programming skills that enable life science students to ask fundamental biological questions that require computers to automate repetitive tasks and handle query results efficiently. Topics include: computer values of important parameters of biological sequence data; pattern search and motif discovery scripts; accessing, querying, manipulating, retrieving, parsing, analyzing, and saving data from local and remote databases. Computer Lab.

**Prerequisite(s):** GEN 604 with a minimum grade of D- and GEN 711 with a minimum grade of D-.**Grade Mode:** Letter Grading**GEN 713 - Microbial Ecology and Evolution****Credits:** 4

Evolutionary and ecological forces that generate the tremendous diversity of microbial life on Earth with emphasis on viruses, archaea and bacteria. Functional roles of microorganisms, their population dynamics and interactions, and their mechanisms of evolutionary change in a variety of environmental settings, including natural communities and laboratory microcosms.

**Attributes:** Writing Intensive Course**Prerequisite(s):** GEN 604 with a minimum grade of D- and BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.**Equivalent(s):** MICR 713**Grade Mode:** Letter Grading**GEN 714 - Personal Genomics****Credits:** 4

Analysis and implications of personal genomic data is the focus of this course. Students understand and appreciate all aspects of the availability of personal genomic information and tools including scientific, medical, social, ethical and legal issues. Students have the opportunity to analyze their own individual genome to one of the publicly available genomes to learn about all various aspects of this emerging field. The course will be an entirely online format.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Grade Mode:** Letter Grading**GEN 715 - Molecular Evolution****Credits:** 4

Rates and patterns of evolutionary change in biomolecules. Forces affecting the size and structure of genomes. Molecular mechanisms of organismal evolution. Emphasizes integrating evidence from biochemistry, molecular genetics and organismal studies. Methods for reconstructing phylogeny from molecular sequences. Some knowledge of statistics recommended. Computer Lab.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Equivalent(s):** ZOOL 715**Grade Mode:** Letter Grading**GEN 717 - Molecular Microbiology****Credits:** 5

Fundamental physiological and metabolic processes of archaea, bacteria and fungi with a strong emphasis on prokaryotes. Literature-based course. Topics include regulation and coordination of microbial metabolism, bacterial cell cycle, global control of gene expression, signal transduction, and microbial cell differentiation. Lab.

**Attributes:** Writing Intensive Course**Prerequisite(s):** BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D- and GEN 604 with a minimum grade of D-.**Equivalent(s):** MICR 717**Grade Mode:** Letter Grading**Special Fee:** Yes**GEN 721 - Comparative Genomics****Credits:** 4

Explores the central questions and themes in contemporary comparative genomics, including genome biology, phylogenomics, human origins, population genomics, and ecological genomics. Provides the conceptual framework required to evaluate new work in this fast-changing field.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Grade Mode:** Letter Grading**GEN 725 - Population Genetics Lab****Credits:** 2

Hands-on approach to exploration of evolutionary forces affecting the frequency and distribution of genetic variation in natural populations. Wet lab techniques include DNA extraction, restriction enzyme digestion, PCR, DNA fragment size-selection. Computational skills include high-throughput sequencing data control, identifying allelic variants, and generation of population genetic summary statistics.

**Co-requisite:** GEN 705**Prerequisite(s):** GEN 604 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.**Grade Mode:** Letter Grading**GEN 771 - Molecular Genetics****Credits:** 4

Structure, organization, replication, dynamics, and expression of genetic information in eukaryotes. Focus on molecular genetic and epigenetic mechanisms of gene expression and its control; molecular genetic control of cell division and differentiation during development.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Grade Mode:** Letter Grading

**GEN 772 - Evolutionary Genetics of Plants****Credits:** 4

Mechanisms of genetic change in plant evolution, both in nature and under human influence. Topics include neo-Darwinian theory; speciation and hybridization; origins and co-evolution of nuclear and organelle genomes; gene and genome evolution; transposable elements; chromosome rearrangements; polyploidy; genetic modification. Lab introduces methods in information gathering, bioinformatics, genome analysis, plant breeding, and genetic manipulation. Lab.

**Attributes:** Writing Intensive Course**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Equivalent(s):** PBIO 772**Grade Mode:** Letter Grading**GEN 774 - Techniques in Plant Genetic Engineering and Biotechnology****Credits:** 4

Theory and hands-on experience with techniques used in plant genetic engineering, including cell and tissue culture, gene cloning, and analysis of foreign gene expression. Discussion of role of plant biotechnology in sustainable agriculture and climate change; modifying plants for better nutrition and stress response, environmental remediation, and production of pharmaceuticals; controversies associated with this technology. Lab.

**Prerequisite(s):** GEN 604 with a minimum grade of D-.**Equivalent(s):** PBIO 774, PBIO 775**Grade Mode:** Letter Grading**Special Fee:** Yes**GEN #790 - Undergraduate Teaching Experience****Credits:** 1-4

Provide academic support to graduate teaching assistants or faculty in preparing, presenting, and executing Genetics lectures or labs.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Equivalent(s):** MICR 790**Grade Mode:** Letter Grading**GEN 795 - Investigations in Genetics****Credits:** 1-4

Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply advanced knowledge and techniques of the major to a specific problem or question.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Equivalent(s):** GEN 795W**Grade Mode:** Letter Grading**GEN 795W - Investigations in Genetics****Credits:** 1-4

Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply advanced knowledge and techniques of the major to a specific problem or question.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 4 credits.**Equivalent(s):** GEN 795**Grade Mode:** Letter Grading**GEN 799 - Senior Thesis****Credits:** 1-4

Independent research project under the direction of a faculty sponsor for seniors in genetics. Final product is a written thesis. One or two semesters.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**GEN 799H - Honors Senior Thesis****Credits:** 1-4

Independent research project under the direction of a faculty sponsor for seniors in genetics and in the Honors Program. Final product is a written thesis. One or two semesters.

**Attributes:** Honors course; Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Geography (GEOG)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**GEOG 401 - World Regions: Europe and the Americas****Credits:** 4

Examines the rich diversity of human life in the following world regions: North America; Middle and South America; Europe; Russia and the post-Soviet states; and Oceania. We will examine the geography of these regions focusing on the following thematic concepts: Environment; Globalization and development; power and politics; urbanization; and population patterns. This course also serves as an introduction to geography.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** GEOG 401H**Grade Mode:** Letter Grading**GEOG 402 - World Regions: Asia and Africa****Credits:** 4

Examines the unique integration of human and physical phenomena that produces the distinctive character of the following world regions: the Middle East and North Africa; Sub-Saharan Africa; South Asia; Southeast and East Asia. The course also serves as an introduction to the discipline of geography, with its unique spatial perspective.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** GEOG 402H**Grade Mode:** Letter Grading**GEOG 405 - There Is No Planet B****Credits:** 4

Introduces human-environment relations as a central focus of geography, spanning social and environmental sciences. Considers mapping, natural resource use, commons and markets, hazards, political ecology, and land use change. Case studies link core concepts with examples from local to international scales.

**Attributes:** Environment,TechSociety(Disc)**Grade Mode:** Letter Grading**GEOG 473 - Elements of Weather****Credits:** 4

Basic principles of weather phenomena and the physical processes underlying these phenomena. Emphasis on weather patterns of New England. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Grade Mode:** Letter Grading

**GEOG 500 - Making Change: Social and Environmental Justice in Practice**  
**Credits: 4**

Provides students with opportunities to consider a personal philosophy and professional action plan for social and/or environmental justice, bridging understandings of social equity and environmental conservation. Spanning theoretical and practical perspectives, students will learn basic community organizing and grantwriting skills that are useful in a range of careers, particularly in the non-profit and government sectors.

**Grade Mode:** Letter Grading

**GEOG 530 - China: People, Politics and Economy**

**Credits: 4**

This course examines China's diverse physical environments, politics, economies, and cultures across the vast territory. Students learn to adopt a relational and spatial perspective to study the contemporary issues in China.

**Attributes:** World Cultures(Discovery)

**Equivalent(s):** GEOG 530W

**Grade Mode:** Letter Grading

**GEOG 540 - Geography of the Middle East**

**Credits: 4**

Environmental, cultural, political-geographic, and ecological foundations of the Middle East. Selected regional problems and issues, e.g., geographical dimensions of the Arab-Israeli conflict, oil, urbanization, population growth, and nomadism.

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Letter Grading

**GEOG 550 - Sub-Saharan Africa: Environmental Politics and Development**  
**Credits: 4**

Explores the political ecologies of development in sub-Saharan Africa. Provides a historical and spatial perspective on sub-Saharan Africa's environments and the politics that influence the region's conservation and development choices. Students will critique conventional knowledge, ideas, and explanations to develop a deeper understanding of environment-development linkages in sub-Saharan Africa over time.

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Letter Grading

**GEOG 560 - Natural Hazards and Human Disasters**

**Credits: 4**

A survey of natural hazards, including earthquakes, volcanoes, tsunamis, floods, drought, hurricanes and severe weather, and the human disasters they cause. The geography of community vulnerability to natural hazards and the factors that influence risk and recovery are also examined.

**Attributes:** Environment,TechSociety(Disc)

**Grade Mode:** Letter Grading

**GEOG 565 - Designing Sustainable Places**

**Credits: 4**

Introduces sustainable design of the built environment, including small towns, cities, suburbs, and rural areas. From neighborhood to regional scales, thoughtful place-making can link economic growth, justice, and environmental sustainability. Readings, discussions, writings, and hands-on field visits and design activities integrate human, environmental, and aesthetic perspectives to consider key challenges and identify a range of practical solutions.

**Grade Mode:** Letter Grading

**GEOG 572 - Geography of the Natural Environment**

**Credits: 4**

Provides an introduction to geography of the natural environment, including landforms, weather and climate, water resources, and biogeography. Examines the processes that shape the different elements of the environment and the relationships between them.

**Attributes:** Physical Science(Discovery)

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**GEOG 574 - Global Landscapes and Environmental Processes**

**Credits: 4**

A survey of earth's major landforms and the geographic factors that influence their development, distribution, and morphology. Topics include mountain building, river systems, desert migration and expansion, glacial and periglacial environments, and shoreline evolution. Discusses interactions with human activities and climate change. Emphasizes how these processes interact to form surface features that are unique to their geographic environment.

**Attributes:** Physical Science(Discovery)

**Grade Mode:** Letter Grading

**GEOG 580 - Human Geography**

**Credits: 4**

Differentiation of the world in terms of population, race, language, religion, political territory, and economic life. Collection and critical use of empirical data; emphasis on spatial and ecological analysis.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** GEOG 581O

**Grade Mode:** Letter Grading

**GEOG 581 - Society, Environment and Justice**

**Credits: 4**

Introduces human geography with an emphasis on social justice and environmental justice, integrating social and cultural aspects of space, place, and human-environment relations. Discusses urban, suburban, and rural examples in the US and internationally to illustrate basic geographic concepts.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)

**Grade Mode:** Letter Grading

**GEOG 582 - Global Trade and Local Development**

**Credits: 4**

This course examines the ways in which global trade interacts with local development across the world. It studies the special organization of economic activities through basic approaches in economic geography. It also studies the history and contemporary state of international competition and collaboration.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** GEOG 582W

**Grade Mode:** Letter Grading

**GEOG 584 - Political Geography**

**Credits: 4**

Interactions between geographic and political phenomena at the sub-national, national, and international levels. Emphasis on geographical aspects of current political problems within and between states. (Not offered every year.)

**Attributes:** Writing Intensive Course

**Grade Mode:** Letter Grading

**GEOG 590 - Field Research****Credits:** 4

Explores a range of research methods, emphasizing collection and analysis of field data to understand human-environment dynamics and/or spatial relations. Topics include ethics, sample design, surveys, interviews, participant observation, and qualitative and quantitative analyses. Students complete hands-on research activities.

**Equivalent(s):** GEOG 650**Grade Mode:** Letter Grading**GEOG 591 - Making Maps: GIS Fundamentals****Credits:** 4

Introduces Geographic Information Systems (GIS) to design digital maps, integrate diverse data sources, and conduct basic spatial analyses. Appropriate for students with or without computer technology background. Skills are highly employable in many careers where spatial data can be used, including social justice, public health, sustainability, town and urban planning, economic development, public safety, energy, transportation, construction, environmental hazards, political strategy, security and diplomacy, military intelligence, marketing, education, communications, real estate, and public humanities.

**Grade Mode:** Letter Grading**GEOG #595 - Statistics for Spatial Science****Credits:** 4

Introduces elementary statistics to students of social sciences from a spatial perspective. It is designed to help students approach introductory-level quantitative analysis using basic statistical problem-solving techniques with social and physical science data models. These elementary statistical tools and concepts will be explained during classroom lectures and proficiency obtained during practical exercises.

**Grade Mode:** Letter Grading**GEOG 670 - Climate and Society****Credits:** 4

An introduction to climate science and the interaction between humans and climate. Examines the processes that control climate, the mechanisms that drive climate change, and the impact of climate change on society.

**Attributes:** Writing Intensive Course**Equivalent(s):** GEOG 570**Grade Mode:** Letter Grading**GEOG 673 - Political Ecology****Credits:** 4

Examines human-environment relations through the geographic subfield of political ecology, integrating social and biophysical sciences. Emphasizes cross-scalar relationships in resource decisions and community development, with substantial coverage of rural, non-US contexts. Seminar-style course with regular readings, writings and discussion.

**Attributes:** Writing Intensive Course**Equivalent(s):** GEOG 573**Grade Mode:** Letter Grading**GEOG 685 - Population and Development****Credits:** 4

A regional approach to the study of population geography with concern for the interaction between the focus of economic growth and the components of population change and development. Considers the environmental impact of developing trends in the developed and developing worlds and the relationship of these trends to sustainable growth and population patterns.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**GEOG #686 - World Economy and Globalization****Credits:** 4

Emphasizes the spatial development of the world economy and the evolution into today's "globalized" economy. Topical emphasis includes the processes of global economic production changes, the role of transnational corporations, and the role of the state in globalization.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**GEOG 695 - Internship****Credits:** 1-4

Internships provide an opportunity for on-the-job skill development and practical experience in a closely supervised work setting. The student must provide a written proposal to a supervising faculty member before an internship program is approved. At the end of the semester, the student must make a presentation, provide work samples, or submit a detailed report, log, or portfolio describing the internship experience.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**GEOG 701 - Environmental Justice****Credits:** 4

This is a seminar-style discussion course in Environmental Justice. It supports students as they develop facility in linking theory, case material, and personal scholarly-professional goals. Readings and writings cover a breadth of topics including origins and theory of environmental justice as social movement and field of scholarship; environmental toxins, hazards, and public health; race and indigeneity; climate change mitigation and adaptation; knowledge systems; urban planning, housing and transportation; water resources; food systems; conservation and recreation; participatory research; and cross-scalar analyses. The course assumes familiarity with basic social science perspectives on race, difference, and equity, and general awareness of environmental issues.

**Grade Mode:** Letter Grading**GEOG 795 - Special Project****Credits:** 2 or 4

Readings, library, archival, and fieldwork. Primarily for geography seniors.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

## German (GERM)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**GERM 401 - Elementary German I****Credits:** 4

For students without previous training in German. Aural comprehension, speaking, writing, reading in a cultural context. No credit for those with two or more years of German in secondary school.

**Grade Mode:** Letter Grading**GERM 402 - Elementary German II****Credits:** 4

See description for GERM 401.

**Attributes:** Foreign Language Requirement**Prerequisite(s):** GERM 401 with a minimum grade of D-**Grade Mode:** Letter Grading

**GERM 503 - Intermediate German I****Credits:** 4

Review of grammar; practice in oral and written expression; readings and cultural material. Labs.

**Attributes:** World Cultures(Discovery); Foreign Language Requirement**Prerequisite(s):** GERM 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**GERM 504 - Intermediate German II****Credits:** 4

Review of grammar; practice in oral and written expression; readings and cultural material. Labs.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** GERM 503 with a minimum grade of D-.**Grade Mode:** Letter Grading**GERM 521 - Major German Authors in English****Credits:** 4

Selected masterpieces of the 18th, 19th, and 20th centuries by authors such as Goethe, Mann, Kafka, Hesse, Bachmann, Koeppen, Brecht, Frisch, Wolf, and Durrenmatt. Readings and discussions in English. May be taken for major or minor credit.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**GERM 525 - Introduction to German Culture and Civilization****Credits:** 4

Aspects of the political, social, and cultural life of Germany, Austria, and Switzerland. Conducted in English. Strongly recommended for any students planning study abroad in a German-speaking country. Required for the major, can be taken for the minor.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery)**Equivalent(s):** GERM 525H**Grade Mode:** Letter Grading**GERM 586 - Study in Berlin****Credits:** 0-8

Gives students an immersion experience in the German language and culture. Students will study 5 weeks in Berlin, where they will take an intensive language course (80 hours) at the BSI Private Language School, receive cultural instruction from the on-site UNH faculty member, and pursue an individual research project.

**Co-requisite:** INCO 589**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**GERM 631W - Advanced Communications Skills I****Credits:** 4

Intensive practice in vocabulary building and developing a sense of appropriate style for various contexts of oral and written communication. Discussion and writing on topics of current interest, written and oral reports, role play, and simulation of everyday situations, reinforced by written work.

**Attributes:** Writing Intensive Course**Prerequisite(s):** GERM 504 with a minimum grade of D-.**Equivalent(s):** GERM 631, GERM 631H**Grade Mode:** Letter Grading**GERM 632 - Advanced Communications Skills II****Credits:** 4

Intensive practice in vocabulary building and coherent expression in a variety of stylistic contexts. Special emphasis on writing skills, from expository prose to letter and resume writing, essays, journalistic reports, and creative writing, focusing on topics of current interest. Required for the German major.

**Prerequisite(s):** GERM 504 with a minimum grade of D-.**Grade Mode:** Letter Grading**GERM 728 - Modern German Literature****Credits:** 4

Major literary movements from 1872 to 1945. Reading and analysis of selected works. Conducted in German.

**Attributes:** Writing Intensive Course**Equivalent(s):** GERM 728H**Grade Mode:** Letter Grading**GERM #732 - Public Discourse and Current Affairs****Credits:** 4

Conducted in German. Public discourse and current affairs in German speaking societies. Analysis and interpretation of various media and contemporary events. Refinement of writing and stylistics with particular focus on grammatical accuracy and advanced composition.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**GERM 738 - Contemporary German Theater****Credits:** 4

Course taught in German. Students study German drama from academic and aesthetic perspectives. Students read original plays and selections from plays, followed by attendance at live performances within Germany. With the support of secondary sources, including theoretical and historical texts, students discuss and analyze the performance of these works. Of primary concern to us will be issues of Bühnentechnik (stage technology), Beleuchtung (lighting), Kostume (costumes), Musik (music), Bewegung (movement), Stimme (voice), Regie (direction), and Realismus (realism).

**Attributes:** FinePerformingArts(Discovery)**Prerequisite(s):** GERM 632 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**GERM #795 - Independent Study****Credits:** 1-4

Open to highly qualified juniors and seniors. To be elected only with permission of the department chairperson and supervising faculty member(s). Barring duplication of subject, may be repeated for credit.

**Repeat Rule:** May be repeated up to 4 times.**Equivalent(s):** GERM 795H**Grade Mode:** Letter Grading**GERM 797 - Special Studies in German Language and Literature****Credits:** 4

Selected topics in language, culture, and literature. Conducted in German. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**GERM 798 - Special Studies in German Language and Literature****Credits:** 4

Selected topics in language, culture, and literature. Conducted in German. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading

## Gerontology (GERO)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### GERO 500 - I'm Old, So What! An introduction to aging in the United States

**Credits:** 4

This is the first of two mandatory courses for the GERO Minor, but any student may take it as an elective. It introduces the learner to the field of gerontology (the study of how people age). It explores the biological, psychosocial, and cognitive changes within the context of society. The history of ageism and its influence on how it has affected the individual, families, and society is presented. The range of independence among older people is examined. Various disciplines that work within the field of gerontology are reviewed. Lectures, novels, films and guest speakers help to examine growing old in the U.S.

**Attributes:** Writing Intensive Course

**Equivalent(s):** GERO 600

**Grade Mode:** Letter Grading

### GERO 795 - Independent Study

**Credits:** 1-6

Open to Gerontology Minor students only. Content area determined by student and faculty mentor, topic must have a major aging component. A proposal of work must be signed by both student and faculty mentor and given to the Gerontology Minor Coordinator for final approval. Proposals are filed in the student's declared major academic folder. Work may be completed over two semesters, especially if it involves thesis/internship work. Credits compensatory with work: 1 to 6.

**Prerequisite(s):** GERO 500 with a minimum grade of D- and KIN 607 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 6 credits.

**Grade Mode:** Letter Grading

## Global Conflict and Human Security (GCHS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### GCHS 710 - Conflict & Human Security

**Credits:** 4

Examines patterns and trends of armed conflict, especially terrorism, insurgency and civil war in the 21st century. Reviews conditions that are likely to lead to war and the myriad ways conflict affects the economy, political system, and cultural norms of a society. Explores how civil wars end, key elements of effective peace processes, and the conditions under which mass violence is likely to resume. Examines conflict prevention strategies such as: preventing and countering violent extremism (P/CVE), disarmament, demobilization and reintegration (DDR) of combatants, and reform of police and military forces (security sector reform/SSR). Case studies on countries in Asia, Middle East, Africa and Latin America.

**Grade Mode:** Letter Grading

### GCHS 720 - Global Governance

**Credits:** 4

An introduction to the concepts and theories of global governance. Examines the role governments, non-governmental organizations, institutions, civil society, and other actors play in the development and implementation of international law and policies. Focuses on the global institutional infrastructure for foreign aid, humanitarian relief, development programs, peacebuilding, and human rights advocacy. Explores how multilateral organizations, non-governmental organizations and other actors promote human security and sustainable development in countries with weak governments.

**Grade Mode:** Letter Grading

### GCHS 730 - International Development & Human Security

**Credits:** 4

Introduces international development policy and practice. Explores the interrelatedness of the United Nations' distinct human security domains (economic, food, health, environmental, personal, community, and political security), and reviews their connections to the UN Sustainable Development Goals (e.g., zero hunger, peace, justice and strong institutions). Examines the strategies used by humanitarian and development organizations to enhance people's well-being in fragile states and conflict zones. Topics include: ethics of humanitarianism; how to create effective programs to alleviate poverty, tackle corruption and empower women and girls. Case studies on countries in Asia, Middle East, Africa and Latin America.

**Grade Mode:** Letter Grading

### GCHS 740 - Environmental Security, Climate Change and Conflict

**Credits:** 4

Explores different dimensions of human security with a focus on environmental security. Explores how environmental challenges (population demographics, food and water insecurity, energy insecurity, etc.) may give rise to socio-political instability around the world. Examines solutions to these problems, using comparisons between more and less developed nations.

**Grade Mode:** Letter Grading

## Greek (GREK)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### GREK 401 - Elementary Classical Greek I

**Credits:** 4

Explore the world of the ancient Greeks by learning the basic elements of Attic Greek: the alphabet, vocabulary and grammar. By the end of the first semester students will be prepared to read short adapted passages on the history, poetry, philosophy, religion (ancient Greek and early Christianity), mythology, politics, theater and culture of the ancient Greeks and the many other cultures that they were associated with.

**Grade Mode:** Letter Grading

### GREK 402 - Elementary Classical Greek II

**Credits:** 4

A continuation of GREK 401, this course expands students' abilities to read simple to moderate complex Greek passages, furthering their insights into the fascinating language and cultural practices of the Ancient Greeks.

**Attributes:** Foreign Language Requirement

**Grade Mode:** Letter Grading

**GREK 503 - Intermediate Classical Greek I****Credits:** 4

Readings from Xenophon, Plato, Herodotus, Euripides, and the New Testament.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** GREK 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**GREK 504 - Intermediate Classical Greek II****Credits:** 4

Readings from Xenophon, Plato, Herodotus, Euripides, and the New Testament.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** GREK 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**GREK 595 - Directed Reading in Greek****Credits:** 2 or 4

Independent study of a classical, Byzantine, or modern Greek author.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**GREK 751 - Homer and the Archaic Period****Credits:** 4

Readings from the Iliad, the Odyssey, the Homeric hymns, Hesiod, Pindar, and the lyric poets.

**Grade Mode:** Letter Grading**GREK 753 - Advanced Study in Athenian Literature****Credits:** 4

A) Aeschylus, B) Sophocles, C) Euripides, D) Aristophanes, E) Herodotus, F) Thucydides, G) Xenophon, H) Plato, I) Aristotle, J) Lysias, K) Demosthenes, L) Isocrates. Major Attic authors from the Battle of Marathon to the death of Alexander the Great. Each special topic may be repeated two times.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**GREK 795 - Special Studies****Credits:** 4

A) Pre-Socratic Philosophers; B) Hellenistic Greek Authors; C) Menander; D) Callimachus; E) Apollonius of Rhodes; F) Theocritus; G) Polybius; H) Greek Authors of the Roman Empire; I) Plutarch; J) Septuagint; K) New Testament; L) Greek Church Fathers; M) Byzantine Authors; N) Spoken Greek O) Advanced Greek Composition; P) Introduction to Classical Scholarship; Q) Greek Epigraphy; R) Greek Dialects; S) Comparative Grammar of Greek and Latin; T) Homer: A Linguistic Analysis; U) Greek Institutions; V) Paleography and Textual Criticism. Topics selected by instructor and student in conference. Each special topic may be repeated two times.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**GREK #796 - Special Studies****Credits:** 4

A) Pre-Socratic Philosophers; B) Hellenistic Greek Authors; C) Menander; D) Callimachus; E) Apollonius of Rhodes; F) Theocritus; G) Polybius; H) Greek Authors of the Roman Empire; I) Plutarch; J) Septuagint; K) New Testament; L) Greek Church Fathers; M) Byzantine Authors; N) Spoken Greek O) Advanced Greek Composition; P) Introduction to Classical Scholarship; Q) Greek Epigraphy; R) Greek Dialects; S) Comparative Grammar of Greek and Latin; T) Homer: A Linguistic Analysis; U) Greek Institutions; V) Paleography and Textual Criticism. Topics selected by instructor and student in conference. Each special topic may be repeated two times.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Health & Human Services (HHS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HHS 400A - UNH-4U: Career and Professional Seminar****Credits:** 1-4

In this seminar, UNH-4U students will explore career interests, develop career plans, and learn and practice skills needed to land a job or internship. Specific objectives include: 1) articulating career goals and competencies; 2) creating an academic and career development plan; 3) demonstrating skills for job and internship pursuit; and 4) engaging in professional networking. UNH-4U students can participate in the seminar up to 4 semesters with specific seminar activities established in consultation with mentor.

**Repeat Rule:** May be repeated for a maximum of 4 credits. May be repeated up to 16 times.**Grade Mode:** Credit/Fail Grading**HHS 400B - UNH-4U Seminar: Academic Success and Well-Being Seminar****Credits:** 1-4

In this UNH-4U seminar, students will focus on resource availability and resource navigation to support academic success, healthy living, and well-being. Specific objectives include: 1) identifying and articulating goals in the areas of academic success, healthy living, and well-being; 2) establishing resource utilization plans in support of each of these goals; 3) demonstrating targeted knowledge and skills related to independence in managing individual needs. UNH-4U students can participate in the seminar up to 4 semesters with specific seminar activities established in consultation with mentor.

**Repeat Rule:** May be repeated for a maximum of 4 credits. May be repeated up to 16 times.**Grade Mode:** Credit/Fail Grading**HHS 400C - UNH-4U Seminar: Independent Study****Credits:** 1-4

Qualified UNH-4U student will be permitted to pursue independent studies under faculty guidance.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 2 times.**Grade Mode:** Credit/Fail Grading

**HHS 400D - UNH-4U Seminar: Advanced Career and Professional Seminar****Credits:** 1-6

In this seminar, second year UNH-4U students will meet with instructor for weekly sessions to expand upon skills gained in HHS 400A in working toward individualized career goals. Students will practice skills needed to secure a job or internship. Specific objectives include: 1) update resume and cover letter; 2) create and/or a career portfolio; 3) engage in mock interviews; 4) actively seek and apply for paid employment and internship opportunities that align with career goals; 5) engage in professional networking; and 6) develop a job retention and growth plan. UNH-4U students may participate in the seminar up to 4 semesters with specific seminar activities established in consultation with mentor.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Credit/Fail Grading**HHS 401 - College of Health and Human Services Seminar****Credits:** 0-2

This course is an introduction to the curricular and co-curricular aspects of the University and specifically the College of Health and Human Services. The course will focus on resource navigation, major and career exploration and fostering "knowledge for healthy living".

**Grade Mode:** Credit/Fail Grading**HHS 402 - Foundations of Career and Professional Success****Credits:** 1 or 2

This course will guide CHHS students as they identify ways to self-reflect and build experience to become well rounded applicants for experiential learning (internships, clinicals, fieldwork, etc.), graduate school, and future careers. An emphasis will be placed on identifying robust ways to build transferable skills through activities beyond the classroom such as volunteer work, clubs and orgs, research, and jobs applicable to the student's field of interest.

**Grade Mode:** Credit/Fail Grading**HHS #444 - The Right to be Disabled in the Extreme Makeover Society****Credits:** 4

Explores how society's view of disability, its "construction," is influenced by a variety of cultural variables and the implications of that construction on institutions such as medicine and health care, education, the arts, the legal system, architecture and engineering, etc.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)**Grade Mode:** Letter Grading**HHS 540 - Statistics for Health and Human Service Professionals****Credits:** 4

A conceptual and analytical approach to the use of statistics in the health and human service professions. Emphasizes the logic and purpose of statistics. Attention to special problems of statistical design such as random assignment, single subject trials, and the ethics of control groups. Basic computer skills for manipulating data.

**Attributes:** Quantitative Reasoning(Disc)

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H, SOC 402, SOC #402H, SOC 502, SOC 502H.

**Grade Mode:** Letter Grading**HHS 598 - Special Topics****Credits:** 1-4

Explores areas related to specific professional health interests. May repeat but not duplicate subject areas. A) Communication Disorders, B) Health Management and Policy, C) Medical Laboratory Science, D) Nursing, E) Occupational Therapy, F) Kinesiology, G) Recreation Management and Policy, J) Family Studies, K) Social Work, L) Health Promotion, M) Women's Leadership N-Z) Interdisciplinary.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Letter Grading**HHS 697W - Professional Writing in the Health and Human Services****Credits:** 1-4

This course will focus on professional writing skills for the health sciences and human services professionals. Writing in these professions is unique because written communication often serves as the foundation for clinical and programmatic decision making requiring swift, precise, accurate, defensible, and objective writing. With this in mind, this course will focus on clinical recording, case documentation, cover letters, fact sheets, brief reports, memos, and infographics.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 4 credits. May be repeated up to 1 time.**Grade Mode:** Letter Grading**HHS 698 - Special Topics****Credits:** 1-2

Explores areas related to specific professional health interests. May repeat but not duplicate subject areas. A) Communication Disorders, B) Health Management and Policy, C) Medical Laboratory Science, D) Nursing, E) Occupational Therapy, F) Kinesiology, G) Recreation Management and Policy, J) Family Studies, K) Social Work, L) Health Promotion, M-Z) Interdisciplinary.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Credit/Fail Grading**HHS 798 - Special Topics****Credits:** 1-4

Explores areas related to specific professional health interests. May repeat but not duplicate subject areas. ## Health and Physical Education (HPE)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HPE 500 - Introduction to Health and Physical Education****Credits:** 2

This course is intended to lay the foundation for future Health and PE pedagogy courses. Topics of discussion will include the role of health and physical education in today's society, "old" versus "new" physical education and philosophy of education and physical education. Also, wellness and health promotion, teaching health via a skills-base approach, outcomes and assessments, career and professional considerations of teaching and future trends within the profession.

**Equivalent(s):** KIN 500**Grade Mode:** Letter Grading**HPE 570 - Elementary Physical Education Practicum****Credits:** 4

As a prospective teacher, you will be asked to examine, discuss, and implement teaching strategies learned in HPE 610 - Elementary Physical Education Pedagogy. Sixty hours of observation and teaching in the schools will be expected. As this is a "gateway" course to student teaching or the 5th year internship, it is expected that students invest efforts into the development of pedagogical skills needed for effective teaching.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HPE 610 with a minimum grade of D-**Equivalent(s):** KIN 570**Grade Mode:** Letter Grading**Special Fee:** Yes**HPE 600 - Movement and Gymnastics Exploration****Credits:** 4

This course is designed to enhance the students' knowledge of and ability to demonstrate, implement, and evaluate the movement fundamentals and gymnastics skills and progression that forms the foundation of preschool, elementary, and secondary school physical education content. The course will combine the elements of movement education and gymnastics progressions to develop a basis for students to learn the fundamentals of movement and how to teach them.

**Equivalent(s):** KIN 600**Grade Mode:** Letter Grading**HPE 601 - Lifetime Sports****Credits:** 3

This course is designed to acquaint students with a variety of lifetime sports. The emphasis will be placed on students' ability to effectively participate in, teach and assess various activities. The following lifetime sports will be covered: cross country skiing, snowshoeing, badminton, pickle ball, tennis, fitness-related activities, weight training and golf.

**Equivalent(s):** KIN 601**Grade Mode:** Letter Grading**HPE 603 - Team Sports****Credits:** 3

This course is designed to expose students to the teaching of games through a tactical approach. This approach places a heavy emphasis on small-sided, modified games with subsequent question and answer sessions. The course will focus on instruction, game play, skill development, and analysis leading to playing competence and knowledge of teaching in soccer, ultimate Frisbee, basketball, handball, flag football, volleyball and softball.

**Equivalent(s):** KIN 603**Grade Mode:** Letter Grading**HPE 610 - Elementary Physical Education Pedagogy****Credits:** 4

This course is designed for future physical education teachers focusing primarily on "what" and "how" to teach elementary physical education. The class adopts a skill theme and movement concept approach to the curriculum. Teaching skills will be developed through readings, lecture/discussion, assignments, peer teaching and teaching children in the gymnasium.

**Equivalent(s):** KIN 610**Grade Mode:** Letter Grading**HPE 648 - Current Issues in Teaching Health****Credits:** 4

This course provides the background information and skills teachers need to implement a health education program in schools at the grade levels in which they are certified. Aligned with the CDC Characteristics for Effective Health Education the course introduces the National Health Education Standards and prepares students in the development of teaching skills needed for implementing effective health education while including functional information based on local data and student need.

**Equivalent(s):** KIN 648**Grade Mode:** Letter Grading**HPE 653B - Biomechanics of Human Movement****Credits:** 2

Principles and methodology of analyzing movement in sport and physical education using principles of biomechanics and physics. Uses videos and field-based methodology to facilitate students' understanding of movement analysis and applying analyses to teaching and coaching.

**Prerequisite(s):** BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-**Equivalent(s):** KIN 653B**Grade Mode:** Letter Grading**HPE 655 - Middle School and Secondary Physical Education Pedagogy****Credits:** 4

Course content will include concepts related to effective teaching such as: planning, organization, communication, management, modifications, and evaluation. Mosston's spectrum of teaching styles will be discussed in relationship to meeting the individual needs of students. Curriculum models will be discussed in order to show the range of content available to physical educators. Application of theoretical concepts will occur in peer teaching episodes.

**Equivalent(s):** KIN 655**Grade Mode:** Letter Grading**HPE #666 - Middle School and Secondary Physical Education Practicum****Credits:** 4

Students in this course will be given the opportunity to spend 60 hours in a middle or high school observing, assisting and teaching physical education classes. These experiences will be augmented by weekly seminars whereby issues pertaining to focused observations and thoughts related to teaching and learning will be discussed. A major culminating "I Believe" paper will be required and this course will be the HPE capstone experience.

**Attributes:** Writing Intensive Course**Equivalent(s):** HPE 766, KIN 666**Grade Mode:** Letter Grading

**HPE 671 - Health Education Pedagogy****Credits:** 4

This course provides a foundation for teaching health education in K-12 settings. Aligned with the CDC Characteristics for Effective Health Education, the course builds on previous knowledge of the National Health Education Standards and other appropriate practices while preparing pre-service teachers to increase the health literacy and proficiency levels of their future students.

**Equivalent(s):** KIN 671**Grade Mode:** Letter Grading**HPE 675 - Motor Development and Learning****Credits:** 4

This class examines motor development throughout the life-span utilizing an ecological perspective that incorporates the individual, the environmental conditions and the required tasks. The class is divided into 4 modules. Modules include the theoretical underpinnings of motor development, elements of fitness, assessment, and individual constraints. The class concludes with peer teaching episodes.

**Equivalent(s):** KIN 675**Grade Mode:** Letter Grading**HPE 676 - Adventure Activities****Credits:** 3

This course provides for the acquisition of knowledge and skills for students to utilize adventure education methods and philosophies when teaching physical education through an experiential pedagogy. Students will be exposed to adventure methodologies: climbing, orienteering, initiatives, low ropes course and high ropes course. Students will realize facilitation and teaching strategies through peer and practice teaching with local students from Oyster River Middle School in Durham.

**Equivalent(s):** KIN 676**Grade Mode:** Letter Grading**HPE #693 - Teaching Assistantship in HPE****Credits:** 2

This course provides the opportunity for a student to work with a member of the HPE faculty in an experience to be determined and agreed upon.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**HPE 694 - Supervised Teaching in Health and Physical Education****Credits:** 6

Students in this course will be involved in observing, assisting and teaching health and physical education classes in local schools as their culminating experience in the HPE major. These experiences will be augmented by weekly seminars whereby issues pertaining to focused observations and thoughts related to teaching and learning will be discussed. Throughout the duration of this course, students will be asked to reflect on the teaching they observe as well as their own teaching.

**Co-requisite:** EDUC 694D**Equivalent(s):** KIN 694**Grade Mode:** Credit/Fail Grading**HPE 696 - Independent Study in Health and/or Physical Education****Credits:** 2-4

An advanced, individual scholarly project under the direct supervision of a faculty member.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 4 times.**Grade Mode:** Letter Grading**HPE #696W - Independent Study****Credits:** 2-4

An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by the major faculty and the department chair prior to the student's registration for HPE 696 WI. All HPE 696 WI projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 4 times.**Grade Mode:** Letter Grading**HPE #699H - Honors Project****Credits:** 4

Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.

**Attributes:** Honors course**Grade Mode:** Letter Grading**HPE 702 - Health Content and Youth Risk Behavior****Credits:** 4

Explore topics related to adolescent health, well-being, and risk behaviors that are relevant in the health education classroom today. Grounded in health behavior theories and behavior change, students explore ten dimensions of wellness: Cultural, Emotional, Environmental, Financial, Intellectual, Occupational, Physical, Sexual, Social, and Spiritual. Students develop a content base for teaching Standard 1 of the National Health Education Standards in coordination with the skill standards as outlined by the NH Health Education Curriculum Guidelines.

**Equivalent(s):** KIN 702**Grade Mode:** Letter Grading**HPE 712 - Health Education Practicum****Credits:** 4

This practicum provides prospective educators an opportunity to observe, develop and practice teaching skills in the health classroom. Students are expected to accumulate 60 hours of observing, assisting and teaching experience in schools. In addition, weekly seminars integrate field experience with lesson planning, school wellness policies and the Whole School, Whole Community, Whole Child approach. This serves as an opportunity for refinement and continued development of teacher skills and attributes for teaching health education.

**Prerequisite(s):** HPE 648 with a minimum grade of D- and HPE 671 with a minimum grade of D-.**Equivalent(s):** KIN 712**Grade Mode:** Letter Grading

### **HPE 742 - Physical Education Practicum for Students with Disabilities** **Credits: 4**

The purpose of the practicum is to provide the educators with opportunities to create, plan and manage physical education/activity experiences for individuals with disabilities within school and community settings.

**Equivalent(s):** KIN 742

**Grade Mode:** Letter Grading

### **HPE 766 - Middle School and Secondary Physical Education Practicum** **Credits: 4**

Students in this course will be given the opportunity to spend 60 hours in a middle or high school observing, assisting and teaching physical education classes. These experiences will be augmented by weekly seminars whereby issues pertaining to focused observations and thoughts related to teaching and learning will be discussed. A major culminating "I Believe" paper will be required and this course will be the HPE capstone experience.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HPE 655 (may be taken concurrently) with a minimum grade of D-.

**Equivalent(s):** HPE #666, KIN 666

**Grade Mode:** Letter Grading

### **HPE 781 - Inclusion in Physical Education**

**Credits: 4**

As schools move towards inclusive settings, general physical education (GPE) teachers need the knowledge, skills, and dispositions for educating students with disabilities in general and adapted physical education (APE) settings. The course begins with an understanding of the term disability followed by the legal mandates that define school policy and student placement. Throughout the course an overview of disability will be analyzed with readings that include an analysis of the social medical models designed to challenge the social construction of disability and orientations for practice. Classroom time will include direct teaching of individuals with disabilities.

**Attributes:** Writing Intensive Course

**Equivalent(s):** KIN 781

**Grade Mode:** Letter Grading

### **HPE 798 - Special Topics in Health and Physical Education**

**Credits: 4**

New or specialized courses not normally covered in regular course offerings. Special fee on some sections.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## **Health Care (HLTC) CPSO**

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### **HLTC 544 - Special Topics: Lower Level**

**Credits: 1-4**

A study of current and variable topics in Health Care. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** HLTC 544G

**Grade Mode:** Letter Grading

### **HLTC 550 - The Emerging U.S. Health Care System**

**Credits: 4**

This course traces the evolution of the U.S. health care delivery system over the last century with a focus on the structure and function of the contemporary managed care system. The course examines a wide range of factors (sociocultural, political, economic, legal and technical) which have impacted the evolution of the current system. Economic factors related to the delivery of health care services are extensively covered. Comparative health care systems are examined. The impact of the changing demographics of the U.S. population on the design and delivery of health care is reviewed.

**Attributes:** Writing Intensive Course

**Equivalent(s):** HLTC 550G

**Grade Mode:** Letter Grading

### **HLTC 560 - Health Behaviors: Theoretical Foundations for Health Education**

**Credits: 4**

This course explores how psychological theories and techniques can minimize unnecessary morbidity and premature mortality. Applied behavioral and cognitive techniques that target primary and secondary prevention efforts are identified through theory and research. Effective health coaching and education techniques that support the compliance of healthy behaviors will be introduced.

**Attributes:** Writing Intensive Course

**Equivalent(s):** HLTC 560G

**Grade Mode:** Letter Grading

### **HLTC 590 - Introduction to Fiscal Management in Health Care**

**Credits: 4**

This course is designed for health care managers who do not have a background in financial management. As an introduction to the tools and processes that empower managers entrusted with budgetary oversight, the course provides fundamental skills for effective financial management in the rapidly changing health care environment. Students become prepared to make their organizations more effective in the four managerial functions of planning, organizing, leading and controlling by balancing inflows (revenues) and outflows (expenses), successfully monitoring and controlling costs and staffing, and identifying areas to be targeted for improvement. Strategies to acquire and allocate funds and to plan, analyze, and control financial operations are introduced.

**Equivalent(s):** HLTC 555G, MGMT 555G

**Grade Mode:** Letter Grading

### **HLTC 595 - Practicum in Health Care**

**Credits: 4**

This project-based practicum is an entry-level field experience designed to assist health care-related majors in exploring career and vocational settings in which they can use and apply their knowledge and skills. The practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings and situations in which the student may engage for the internship of HLTC 795 or to investigate an evidence-based health and wellness topic for HLTC 798. Earlier registration deadlines apply. Please consult your advisor.

**Prerequisite(s):** HLTC 550 with a minimum grade of D- or HLTC 550G with a minimum grade of D-.

**Equivalent(s):** HLTC 540G

**Grade Mode:** Letter Grading

**HLTC 612 - Population Health****Credits:** 4

This course outlines how health care and health education delivery for various populations and communities have evolved. Topics include health behaviors, social determinants of health, cultural influences, health policy and economics, and how frameworks for health care systems influence disease prevention strategies. This course analyzes population health issues from multiple perspectives and examines community assessment strategies. The course also emphasizes the promotion of a healthy lifestyle for the individual and populations to reduce morbidity and mortality rates.

**Prerequisite(s):** HLTC 550 with a minimum grade of D- or HLTC 550G with a minimum grade of D- or HMSV 424 with a minimum grade of D- or HMSV 500G with a minimum grade of D- or BEHS 502G with a minimum grade of D-.

**Equivalent(s):** HLTC 612G

**Grade Mode:** Letter Grading

**HLTC 627 - Reimbursement and Financing Techniques in Health Care****Credits:** 4

This course analyzes various methods of health care financing, including Medicare/Medicaid, private insurance (including HMOs), and self-funding. It then discusses the various methodologies for reimbursement under these programs, including fee-for-service, capitation, and DRGs, and their impact on the health care organizations providing the services. Students will analyze how budgets, expenses, and financial statements, etc., are linked to the reimbursement process, and they will examine the role of the non-financial manager in health and human services in these processes.

**Prerequisite(s):** HLTC 555G with a minimum grade of D- or HLTC 590 with a minimum grade of D-.

**Equivalent(s):** HLTC 627G

**Grade Mode:** Letter Grading

**HLTC 690 - Law and Ethics for Health Care and Human Services****Credits:** 4

This course provides students with legal and ethical frameworks for working through increasingly complex issues that affect health and human services delivery from the standpoint of the individual, the public, and the system of providers. Through an overview of current law, regulation, standards of ethics, and moral theory, students will evaluate pervasive issues and dilemmas present in their field of study. This course incorporates case studies with philosophical and theoretical analysis to equip students with nuanced perspectives regarding the ethical, legal, and health policy challenges facing society.

**Attributes:** Writing Intensive Course

**Equivalent(s):** HLTC 629G

**Grade Mode:** Letter Grading

**HLTC 695 - Internship or Project in Health Care****Credits:** 4

This upper level course is a field-based experience designed to develop and hone the practical application skills of a health care, human services, or wellness-related major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where health care, human services, or wellness-related knowledge and skills are applied. A non-field-based project may be substituted with approval of Academic Affairs. NOTE: Registration for this course as an internship is by permission of Academic Affairs. Early registration deadlines may apply. All major requirements must be completed prior to enrollment in this course.

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HLTC 640G

**Grade Mode:** Letter Grading

**HLTC 720 - Health Program Planning and Evaluation****Credits:** 4

This course addresses the principles of planning, development, implementation, and evaluation of health programs with an emphasis on addressing community health frameworks, individual health and lifestyle risk factors, and the appropriate interventions to manage these risks. Partnership building with stakeholders will also be addressed.

**Prerequisite(s):** MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-.

**Equivalent(s):** HLTC 620G

**Grade Mode:** Letter Grading

**HLTC 737 - Informatics for Health Professionals****Credits:** 4

Health care professionals interact with patients, families, communities, and populations in technology rich environments. This course provides students with the opportunity to explore communication technologies and informatics tools integral to the health care system. Students will investigate how data is collected and utilized to inform decisions. Consideration of the impacts of information and communication technologies relative to ethical standards, quality improvement, regulations, and the experience of patients and providers shall be explored by students.

**Attributes:** Writing Intensive Course

**Equivalent(s):** HLTC 637G, NUR 608G

**Grade Mode:** Letter Grading

**HLTC 738 - Health Care Policy****Credits:** 4

This course explores the multifaceted issues affecting health care policy in the United States. The course reviews the history of health care policy and provides students with an understanding of how it has shaped our current health care delivery system. Major health care policies and initiatives are reviewed. The course also explores the many political challenges (state and national), political process, impact of the presidential administration, and political interest groups. Students examine the impact that various parties have on health care policy and the challenges facing reform efforts.

**Prerequisite(s):** HLTC 550 with a minimum grade of D- or HLTC 550G with a minimum grade of D-.

**Equivalent(s):** HLTC 638G

**Grade Mode:** Letter Grading

### **HLTC 795 - Integrative Capstone: Internship in Health and Wellness** **Credits: 4**

This upper level course is a field-based experience designed to develop and hone the practical application skills of a health care, or wellness-related major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where health care, or wellness-related knowledge and skills are applied. This course is the capstone for the BS in Health and Wellness. NOTE: Registration for this course as an internship is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HLTC 651G

**Grade Mode:** Letter Grading

### **HLTC 797 - Integrative Capstone: Project in Health Care Management** **Credits: 4**

This project-based capstone integrative seminar focuses on the concepts and techniques of successful health care management practices. It analyzes the process of developing and executing strategies designed to optimize a health care organization and its management. Students apply their knowledge of health care systems, policy, financing, and information systems to a course project. The project integrates essential knowledge from the degree program at both the practical and the theoretical levels while fulfilling the student's own field of professional interest. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HLTC 650G

**Grade Mode:** Letter Grading

### **HLTC 798 - Integrative Capstone: Project in Health and Wellness** **Credits: 4**

This capstone course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Conforming to the clinical, research and ethical health standards, students will complete an independent project, which includes the written analysis and synthesis integrating theory and practice. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HLTC 652G

**Grade Mode:** Letter Grading

## **Health Management & Policy (HMP)**

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### **HMP 401 - United States Health Care Systems**

**Credits: 4**

Nature and functions of health care services and health professionals; impact of social, political, economic, ethical, professional, legal, and technological forces on health care systems. Current health policy issues.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** HMP #401H, HMP #401W

**Grade Mode:** Letter Grading

### **HMP #401H - Honors/United States Health Care Systems**

**Credits: 4**

Nature and functions of health care services and health professionals; impact of social, political, economic, ethical, professional, legal, and technological forces on health care systems. Current health policy issues.

**Attributes:** Honors course; Social Science (Discovery); Writing Intensive Course

**Equivalent(s):** HMP 401, HMP #401W

**Grade Mode:** Letter Grading

### **HMP #401W - United States Health Care Systems**

**Credits: 4**

Nature and functions of health care services and health professionals; impact of social, political, economic, ethical, professional, legal, and technological forces on health care systems. Current health policy issues.

**Attributes:** Social Science (Discovery); Writing Intensive Course

**Equivalent(s):** HMP 401, HMP #401H

**Grade Mode:** Letter Grading

**HMP 403 - Introduction to Public Health****Credits:** 4

This course describes and defines “what is public health” and seeks to convey its critical importance and relevance to both public and individual (personal) wellbeing. It presents an overview of the structure, function, and organization of the public health system/services (government, proprietary, and voluntary sectors) and how they operate, emphasizing core functions and major divisions (public health administration, epidemiology and biostatistics, environmental health, social and behavioral health). Addresses the social, ethical, issues; bioterrorism; epidemics; obesity; tobacco, alcohol, and opioid use; violence. Seeks to challenge students to think critically about existing and emerging U.S. and global public health issues. Introduces public health careers.

**Equivalent(s):** HAP 403**Grade Mode:** Letter Grading**HMP #444 - From Frankenstein to Dolly, and Beyond****Credits:** 4

This course is an interdisciplinary introductory course designed specifically for first year students. It seeks to stimulate, provoke, and support student inquiry, discussion, and exploration of a wide variety of social and ethical issues associated with scientific research and advances, with an emphasis on ones related to the biomedical and health sciences. It explores the value-laden questions that they often precipitate, and their impact on individuals, population groups, and society at large.

**Attributes:** Environment,TechSociety(Disc); Inquiry (Discovery)**Grade Mode:** Letter Grading**HMP #444A - Global Public Health Issues****Credits:** 4

This course is designed to provide students with an introduction to and overview of the key areas of global health by addressing the major determinants of health and how health status is measured to determine the burden of disease in the developing world. Using the perspectives of public health, the course will cover factors associated with the development of health problems and efforts to prevent disease in impoverished areas. Students will also explore the role of social communication, politics, religion, economics, education and culture in contributing to global public health issues and will integrate these factors and values in developing solutions to the widespread public health issues impacting communities worldwide. Students will learn about the magnitude of disease in the developing world (e.g., communicable and non-communicable disease, women and child health, nutrition, and unintentional injuries), how health is assessed and how health systems effectively work together to improve global health.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery)**Grade Mode:** Letter Grading**HMP 501 - Epidemiology and Community Medicine****Credits:** 0 or 4

The distribution and determinants of disease, illness, and health in the community. Community health and illness measures, health status, and source of data. Development of hypotheses and study designs to reduce community health problems using epidemiological reasoning, methods, and analyses. Lab.

**Attributes:** Biological Science(Discovery); Discovery Lab Course**Equivalent(s):** HAP 402, HAP 501, HMP 501H**Grade Mode:** Letter Grading**HMP 610 - Survey of Health Information Systems****Credits:** 2

This course introduces you to the nomenclature and foundations of health information technology and systems in health care delivery settings and the management and strategic uses for those systems. It is relevant for those studying health care management and individuals using or installing clinical health information systems. Time will be spent examining health care information flow, data capture, storage within information systems, technology standards, information security, and data usages both internally and externally.

**Prerequisite(s):** HMP 401 with a minimum grade of D-.**Equivalent(s):** HMP 511, HMP 611**Grade Mode:** Letter Grading**HMP 611 - Introduction to Health Information Systems****Credits:** 4

This course introduces the student to the nomenclature and foundations of health information technology and systems in health care delivery settings and the management and strategic uses for those systems. It is relevant for those studying health care management and those using clinical health information systems. It examines health care information flow, information systems, technology standards and information security, and presents relevant examples, practical applications and case studies.

**Equivalent(s):** HMP 511, HMP 610**Grade Mode:** Letter Grading**HMP 621 - Pre-practicum Seminar****Credits:** 1-2

Preparation for field practicum experience, orientation to experiential learning and competency development.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Equivalent(s):** HAP 621**Grade Mode:** Letter Grading**HMP 622 - Field Practicum in Organizational and Project Analysis, and Management Skills Development****Credits:** 3

Experiential learning in a health care organization; application of theories to practice. Planned learning objectives are accomplished through three distinct components. Organizational Analysis, Project Analysis and Management Skills Development, with Supervision by agency personnel. This will include analysis of assigned health care agency, from external and internal viewpoints, development of the basic quantitative and interpersonal skills required for a health services manager, and demonstration of knowledge and analysis of specific problem-solving skills. Students need a GPA of 3.0 or higher, and an approved practicum site.

**Prerequisite(s):** HMP 621 with a minimum grade of D-.**Equivalent(s):** HAP 622, HMP 622A, HMP 622B, HMP 622C**Grade Mode:** Credit/Fail Grading**HMP 624 - Post Practicum Seminar****Credits:** 2

Summary and conclusion from field practicum experience. Individual analysis and panel discussions to include site assessment, project description and methodologies employed, critique of individual skills and knowledge base in relation to internship.

**Prerequisite(s):** HMP 621 with a minimum grade of D- and HMP 622 with a minimum grade of D-.**Grade Mode:** Letter Grading

**HMP 631 - Health Issues Seminar****Credits:** 2

Discussion of current issues in the fields of health management, health policy and public health.

**Prerequisite(s):** HMP 624 with a minimum grade of D- and HMP 712 with a minimum grade of D- and HMP 723 with a minimum grade of D- and HMP 735 with a minimum grade of D-.

**Grade Mode:** Letter Grading**HMP 635 - Healthcare Marketing****Credits:** 2

This course introduces the concepts, tools, and strategies needed to address the marketing needs of the healthcare industry to consumers for health promotion of the individual and community.

**Prerequisite(s):** HMP 401 with a minimum grade of D-.

**Equivalent(s):** HMP 735**Grade Mode:** Letter Grading**HMP 642 - Health Economics****Credits:** 4

Theoretical and empirical analysis of the U.S. health care delivery sector. Topics include health insurance markets and their effects on patients demand, uninsured populations and their access to health care services, breakdowns in the principal/agent relationship between patients' and providers, competition in the medical sector, technology, pharmaceuticals and the scope and effect of government involvement in the delivery of health care.

**Prerequisite(s):** HMP 624 with a minimum grade of D- and HMP 712 with a minimum grade of D- and HMP 723 with a minimum grade of D-.

**Grade Mode:** Letter Grading**HMP 669 - Human Behavior and the Public Health****Credits:** 4

Provides a grounding in fundamental concepts of the behavioral sciences as they illuminate public health. Individual and community responses to prevention, identification of symptoms, diagnoses, treatments, chronic ailments, and rehabilitation are discussed. In each of these areas, the course explores the interaction between community, family, patient, and health care provider.

**Equivalent(s):** HMP 569**Grade Mode:** Letter Grading**HMP 702 - Programming in Healthcare Environments****Credits:** 4

This course covers using Python as a programming language to write, implement, and design programs that are relevant to various aspects of programming in a health setting. After completion of this course, students should be comfortable with the basic data structures in Python and R (including arrays, dictionaries and dataframes), conditional logic and iterators, writing Python and R functions, and using Python libraries to read external data and perform data manipulations and data analysis.

**Grade Mode:** Letter Grading**HMP 703 - Translation of Health Data****Credits:** 4

This course will give you the skills you need to leverage data to reveal valuable insights and advance your career. This course teaches you the visualization skills necessary to be effective Data Storytellers which helps engage your audience in a story about the data. This course focuses on concepts as well as hands-on experience of presenting data from initial concepts to final presentation by creating meaningful displays of quantitative and qualitative data to facilitate peer/managerial decision making.

**Grade Mode:** Letter Grading**HMP 711 - Introduction to Healthcare Operations Analytics****Credits:** 4

Introduces intermediate techniques for data manipulation and analysis for the health care field. Also introduces methods for survey research and large data set manipulation and analysis. There is a lab section utilizing a statistical software package where students perform tasks from a large national data set.

**Prerequisite(s):** HMP 401 with a minimum grade of D-.

**Grade Mode:** Letter Grading**HMP 712 - Healthcare Operations Management****Credits:** 4

This course introduces students to the field of health analytics and data science. It expands upon introductory statistical and data manipulation methods to include data mining, predictive analytics, cluster analysis, trend and pattern recognition, and data visualization. It couples data skills with interpretive and communication skills. Students will also be exposed to basic statistical programming. There will be a graduate component of the course (812) where students will work on advanced concepts and complete a separate culminating project.

**Prerequisite(s):** HMP 401 with a minimum grade of D- and HMP 711 with a minimum grade of D-.

**Grade Mode:** Letter Grading**HMP 715 - Environmental Health****Credits:** 4

This course offers a general introduction to environmental health from the community, regional, and global perspective by addressing fundamental topics and current controversies such as air pollution, water pollution, built environment/urban sprawl, food safety, waste disposal, and occupational health. Students learn about environmental health assessment methods. Major issues in environmental health and related regulatory efforts and public health policy reform are examined.

**Grade Mode:** Letter Grading**HMP 721 - Managing Health Care Organizations****Credits:** 4

Organizational characteristics of ambulatory, acute, and long-term care facilities. Management issues and strategies involving governance, clinical services, human and fiscal resources, and community-based services.

**Prerequisite(s):** HMP 401 with a minimum grade of D-.

**Equivalent(s):** HAP 721**Grade Mode:** Letter Grading**HMP 722 - Health Care Management II****Credits:** 4

A continuation of HMP 721 - Managing Health Care Organizations with specific lectures and assignments devoted to organizational behavior, leadership, and managerial skills. Case studies and examples will relate specifically to health care organizations.

**Prerequisite(s):** HMP 721 with a minimum grade of D-.

**Grade Mode:** Letter Grading**HMP 723 - Health Planning****Credits:** 0 or 4

Theoretical and historical foundations of health planning; the relationship of health planning and regulation; the application of planning methods; and the utilization of strategic planning and its relationships to marketing.

**Equivalent(s):** HAP 723**Grade Mode:** Letter Grading

**HMP 724 - Long-Term Care Management****Credits:** 4

Exploration of the different components of the long-term-care service delivery system to apply contemporary management theory, concepts and models to the entities that make up the long term care service delivery system.

**Prerequisite(s):** HMP 401 with a minimum grade of D- and HMP 721 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**HMP 735 - Social Marketing****Credits:** 4

An introduction to the vocabulary and tools of social marketing. Expanding upon the traditional principles of marketing and consumer behavior, students are exposed to the challenges of trying to effect behavior change.

**Prerequisite(s):** HMP 401 with a minimum grade of D- and HMP 403 with a minimum grade of D- and HMP 501 with a minimum grade of D- and HMP 711 with a minimum grade of D- and HMP 740 with a minimum grade of D-.

**Equivalent(s):** HMP 635

**Grade Mode:** Letter Grading

**HMP 740 - Health Care Financial Management****Credits:** 4

Techniques, principles, and practices of managing fiscal aspects of health care organizations. Exploration of concepts and techniques associated with variance analysis, cost allocation, management of working capital, and capital decision analysis. Analysis of the impact of reimbursement on health care organizations.

**Prerequisite(s):** HMP 401 with a minimum grade of D- and HMP 501 with a minimum grade of D-.

**Equivalent(s):** HAP 740

**Grade Mode:** Letter Grading

**HMP 741 - Health Care Financial Management II****Credits:** 4

This course focuses on issues related to effective financial management of health care organizations and programs, building upon material covered in HMP 740, Health Care Financial Management. Topics include the time value of money, long-term debt, stocks and equity, and evaluation of capital projects.

**Prerequisite(s):** HMP 740 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**HMP 742 - Strategic Management for Health Care Organizations****Credits:** 4

Application of managerial methods involving financial, marketing, and operational analysis to health management. Case studies.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HMP 624 with a minimum grade of D- and HMP 642 with a minimum grade of D- and HMP 711 with a minimum grade of D- and HMP 712 with a minimum grade of D- and HMP 722 with a minimum grade of D- and HMP 723 with a minimum grade of D- and HMP 735 with a minimum grade of D- and HMP 740 with a minimum grade of D- and HMP 744 with a minimum grade of D- and HMP 746 with a minimum grade of D-.

**Equivalent(s):** HAP 742

**Grade Mode:** Letter Grading

**HMP 744 - Law and Ethics in Healthcare****Credits:** 4

Ethical theories, core legal principles and cases, and decision-making models; patient's rights and professional responsibilities; social justice and resource allocation; critical ethical dilemma's facing health care managers, policy makers, and executives; managerial versus medical care conflicts.

**Prerequisite(s):** HMP 401 with a minimum grade of D- and HMP 403 with a minimum grade of D- and HMP 501 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**HMP 746 - Health Policy****Credits:** 4

Analysis of the public policy process, the development of health policies in the U.S., and discussion of specific health policy issues.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HMP 401 with a minimum grade of D- and HMP 403 with a minimum grade of D- and HMP 501 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**HMP 796 - Independent Study****Credits:** 1-4

In-depth study with faculty supervision.

**Repeat Rule:** May be repeated for a maximum of 12 credits.

**Grade Mode:** Letter Grading

**HMP 798H - Honors Project/Research Design****Credits:** 2

Examines selected research designs and methods used in health services research/program evaluation. Establishes theoretical and methodological foundation for honors-in-major research project to be conducted during the subsequent semester under a faculty member's supervision.

**Attributes:** Honors course

**Grade Mode:** Letter Grading

**HMP 799H - Honors Project/Research****Credits:** 2-4

In-depth research project (conducting and analysis) under supervision of faculty member. Includes scholarly presentation of findings to faculty and other interested parties and preparation of manuscript suitable for publication in peer-viewed journal.

**Attributes:** Honors course; Writing Intensive Course

**Prerequisite(s):** HMP 798H with a minimum grade of D-.

**Grade Mode:** Letter Grading

## Health Sciences (HS)

**HS 406 - Introduction to Health Sciences****Credits:** 1

This introductory course is designed to expose students to the broad, interdisciplinary field of health sciences. It will provide students an overview of the prerequisite knowledge that will prepare an individual to pursue a career in any number of allied health professions. In this course, students will explore basic foundational concepts pertinent to a complex, ever-evolving healthcare field.

**Equivalent(s):** AT 406

**Grade Mode:** Letter Grading

**HS 501 - Medical Terminology****Credits:** 2

This course is an introduction to common medical terminology and vocabulary used by a variety of professionals in the healthcare field; terminology related to organ systems, disease diagnosis and pathophysiology will be emphasized. The origin, roots, prefixes, suffixes, and relevant abbreviations and acronyms of common medical and clinical terms are examined in a systems-based approach.

**Grade Mode:** Letter Grading**HS 605 - Exploration of Allied Health Professions****Credits:** 2

Explore and understand duties, responsibilities, and common work schedules of allied health professions. Complete 10 hours of observation with each profession: athletic training, physical therapy, and physician assistant. Students may substitute observation of other professions by submitting written justification to, and upon permission of course instructor.

**Grade Mode:** Credit/Fail Grading**HS 656 - Musculoskeletal Pathologies for Health Professions****Credits:** 4

Introduces the student to the musculoskeletal injuries common to allied health professions. Cognitive knowledge on anatomy, injury pathology, assessment and diagnosis. In conjunction with HS 657, Musculoskeletal Pathologies for Health Professions Lab, this course prepares the student for continued education in allied health professions.

**Co-requisite:** HS 657**Prerequisite(s):** BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-.**Grade Mode:** Letter Grading**HS 657 - Musculoskeletal Pathologies for Health Professions Lab****Credits:** 1

The practical application of the knowledge attaining in HS 656. Students will learn & perform anatomical landmark palpation, injury assessment procedures & techniques, and taping & wrapping procedures. This course, in conjunction with HS 656, prepares the students for further education at the graduate level.

**Co-requisite:** HS 656**Prerequisite(s):** BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-.**Grade Mode:** Letter Grading**Special Fee:** Yes**HS 696 - Independent Study****Credits:** 2-4

An advanced, individual scholarly project under the direct supervision of a faculty member.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HS 696W - Independent Study****Credits:** 2-4

An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by the major faculty and the department chair prior to the student's registration for HS 696W. All HS 696W projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HS 699H - Honors Project****Credits:** 4

Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.

**Attributes:** Honors course**Grade Mode:** Letter Grading**HS 717 - Cultural Considerations in Health Care****Credits:** 4

Capstone course to introduce concepts of culture, cultural humility, and diversity as related to professional practice for students preparing for careers in healthcare professions. Patient-centered course teaching students about patient types, and how to appropriately consider and care for those with differing cultural backgrounds, beliefs and practices.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 10 credits.**Grade Mode:** Letter Grading**HS 767 - Pharmacology for Health Professions****Credits:** 4

This course will be an introduction to the general principles of pharmacology, the organ systems affected by the various drug types, and drug classifications as appropriate for future allied health professionals. Students will also explore common prescribing in various practice settings as well as the applicable U.S. laws relative to the sale, supply, and administration of drugs.

**Prerequisite(s):** CHEM 403 with a minimum grade of C- and CHEM 404 with a minimum grade of C-.**Equivalent(s):** AT 667, KIN 667**Grade Mode:** Letter Grading**HS 770 - General Medical Conditions for Health Professions****Credits:** 4

This course will be an introduction to the general medical conditions commonly diagnosed and treated among allied health professionals, with emphasis on disease etiology, pathophysiology, signs and symptoms, diagnostic procedures, and therapeutic measures involved in treatment.

**Prerequisite(s):** BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-.**Equivalent(s):** AT 670**Grade Mode:** Letter Grading

# History (HIS) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

## HIS 402 - Great Civilizations

**Credits:** 4

For thousands of years, humans have created communities that align with certain perceived value systems. From these value systems, great civilizations have been cultivated, developed, and brought into conflict with other cultures. This course examines the rise of civilizations throughout the world, tracing the history of human societies from their beginnings through 1000 C.E. After surveying the prehistoric period and early civilization, the course focuses on the religious, political, and cultural characteristics of key civilizations from around the world. Emphasis will be placed on patterns of civilization, human conflict and interaction, and the development of human thought and expression.

**Attributes:** Historical Perspectives(Disc); Human Thought Exp (Gen Ed)

**Equivalent(s):** HIS 502G

**Grade Mode:** Letter Grading

## HIS 410 - United States History to 1865

**Credits:** 4

This course focuses on the origins and development of issues relevant to Americans today through the examination of the history of the United States from its earliest settlement through the Civil War. Students study themes and events ranging from Native American cultures and their contact with early European settlements, the triumph of British over French and Spanish settlers, the upheavals of the Revolution, the establishment of the United States, its expansion westward, and the development and growth of slavery which culminated in the Civil War. The focus of this class will be making connections between the past and the present day, recognizing historical themes, evaluating areas of conflict, and using evidence-based historical interpretation.

**Attributes:** Historical Perspectives(Disc); Human Thought Exp (Gen Ed)

**Equivalent(s):** HIS 510G

**Grade Mode:** Letter Grading

## HIS 411 - United States History: 1865 to the Present

**Credits:** 4

This course addresses the characteristics of contemporary American society as a product of major developments, policies, conflicts, and legislation that occurred from 1865 to the present. Major topics include: reconstruction after the Civil War, industrialization and its consequences, themes and patterns of American foreign policy, the Progressive era and the New Deal, World War II, the Cold War, America's role in the era of globalism, and domestic and foreign policy developments since World War II. Students will have the opportunity to use primary and secondary sources to explore multiple perspectives and interpretations of this period in history.

**Attributes:** Historical Perspectives(Disc); Human Thought Exp (Gen Ed)

**Equivalent(s):** HIS 511G

**Grade Mode:** Letter Grading

## HIS 512 - European History: Renaissance through the Industrial Revolution

**Credits:** 4

This course provides students the opportunity to engage in critical discussions about the foundations of modern western society according to key cultural, religious, and political changes associated with the Renaissance, the Reformation, and the emergence of the modern state. It also examines developments in the sciences, western philosophy, and revolutionary politics in theory and practice, through the nineteenth century, drawing connections between the past and the present day.

**Attributes:** Human Thought Exp (Gen Ed)

**Equivalent(s):** HIS 512G

**Grade Mode:** Letter Grading

## HIS 590 - Historical Methods

**Credits:** 4

In this course, students develop and employ historical methodology appropriate to the study of events, figures, periods, and cultures of the past. Building on General Education coursework in thinking, research, and writing, the course helps to develop a historical mindset through student practice with methods and processes of the historian, in designing viable projects to explore further, and in substantive written work. The course frames key questions and concepts in the discipline and prepares students for upper-level courses in the major.

**Attributes:** Human Thought Exp (Gen Ed); Writing Intensive Course

**Prerequisite(s):** (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-).

**Equivalent(s):** HIS 610G

**Grade Mode:** Letter Grading

## HIS 602 - History of New England

**Credits:** 4

The course is a survey of New England's history spanning a time period from the late 1600's to the present. Students will assess New England's role in the economic, political, and military history of our nation. In addition, there is a focus on local New England communities and the important historical events and forces that contributed to their development.

**Attributes:** Human Thought Exp (Gen Ed); Writing Intensive Course

**Equivalent(s):** HIS 602G

**Grade Mode:** Letter Grading

## HIS 611 - Themes in World History

**Credits:** 4

This course examines the political, social, economic, and cultural forces that shaped the development of world civilizations from 1000 CE to the present. The focus of study will move beyond basic geography and historic timelines to ask questions about cultural interactions, conflict, and the varying forces that impacted world history, as well as to evaluate interpretations of the past. Using both primary and secondary sources, students will critically examine connections and patterns of history with a particular focus on globalism, multiculturalism, nationalism, and religious conflict throughout Europe, Africa, Asia, and the Americas.

**Attributes:** Historical Perspectives(Disc); Human Thought Exp (Gen Ed); Writing Intensive Course

**Equivalent(s):** HIS 611G

**Grade Mode:** Letter Grading

**HIS 718 - History of World War II****Credits:** 4

This course explores the causes and consequences of the Second World War from a global perspective. It explores the rise of nationalism and totalitarianism and the impact of colonialism. The course explores the causes of WWI and its aftermath, moves through the decade of the 20's to the Depression and the rise of fascism, to the onset of the war in Europe, Africa, and the Pacific, and finally to the peace agreements and their effect on the future of the world. In particular it looks at industrial, agricultural, and democratic developments and their impact on the war. Military mobilization, gender, race, notions of "the good war," and cultural conflict will also be studied.

**Attributes:** Historical Perspectives(Disc); Human Thought Exp (Gen Ed)**Equivalent(s):** HIS 618G**Grade Mode:** Letter Grading**HIS 727 - Vietnam War: An Historical Perspective****Credits:** 4

Students will have the opportunity to examine three decades of struggle in Southeast Asia beginning with the history of French Colonial Indochina that led Communist Vietnamese revolutionaries into conflict with France, and then the United States and its Vietnamese allies. The course presents primary sources to examine the impact and significance of the war on American society and to evaluate its causes and consequences. The complexities of the lived human experiences before, during, and after the Vietnam War are studied according to a multitude of perspectives and interpretations.

**Attributes:** Human Thought Exp (Gen Ed)**Equivalent(s):** HIS 627G**Grade Mode:** Letter Grading**HIS 795 - Integrative Capstone: Internship in History****Credits:** 4

This capstone course is a field-based internship designed to develop and hone the practical application skills of a History major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where history-related knowledge and skills are applied. Students will complete a substantial, evidence-based research paper or project related to their internship work. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).**Equivalent(s):** HIS 651G**Grade Mode:** Letter Grading**HIS 797 - Integrative: Project in History****Credits:** 4

This capstone course for History majors is designed to integrate learning from the entire major in an individually-customized project. Students demonstrate competency in history by producing an assessment of prior historical study (historiography) and a substantive original essay based on in-depth research. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).**Equivalent(s):** HIS 660G**Grade Mode:** Letter Grading

## History (HIST)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HIST 403 - Introduction to Greek Civilization****Credits:** 4

A broad historical exploration of Greek civilization. Topics include: architecture, art, law, literature, philosophy, poetry, politics, religion, society, warfare, and the Greek's legacy to the modern world. Open to all students. No prior knowledge of the ancient world assumed; all readings are in English. Ideal background for students of English, philosophy, history, Latin, Greek, the arts, music, modern languages.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** CLAS 403, CLAS 405**Grade Mode:** Letter Grading**HIST 404 - Introduction to Roman Civilization****Credits:** 4

A broad historical exploration of Roman civilization. Topics include: architecture, art, law, literature, philosophy, poetry, politics, religion, society, warfare, and their legacy to the modern worlds. Open to all students. No prior knowledge of the ancient world assumed; all readings are in English. Ideal background for students of English, philosophy, history, Latin, Greek, the arts, music, modern languages.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** CLAS 404, CLAS 406**Grade Mode:** Letter Grading**HIST 405 - History of Early America****Credits:** 4

America from the early era of European discovery through the American Civil War. Emphasizes the interaction of European, Native American, and African peoples; the separation of the English colonies from Great Britain; and the establishment and early history of the United States. Course meets the History major requirement for Group 1.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** HIST 405H, HIST 405W**Grade Mode:** Letter Grading

**HIST 405W - History of Early America****Credits:** 4

America from the early era of European discovery through the American Civil War. Emphasizes the interaction of European, Native American, and African peoples; the separation of the English colonies from Great Britain; and the establishment and early history of the United States. Course meets the History major requirement for Group 1.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Equivalent(s):** HIST 405, HIST 405H**Grade Mode:** Letter Grading**HIST 406 - History of the Modern United States****Credits:** 4

History of the United States since the mid-19th century. Political, social, and economic developments as well as relationships of the modern U.S. with other countries. Course meets the History major requirement for Group 1.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** HIST 406H, HIST 406W**Grade Mode:** Letter Grading**HIST 410 - Historic Survey of American Civilization****Credits:** 4

Topical survey, within broad chronological divisions, of the development of American civilization since 1600. Students may take the course up to two times as long as the topic for the two courses is different. Course meets the History major requirement for Group 1.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** HIST 410H**Grade Mode:** Letter Grading**HIST 421 - World History to the 16th Century****Credits:** 4

The global experience of human communities with special emphasis on the development of the major civilizations and their interactions.

Comparisons of social, cultural, religious, and political life and the emergence of distinctive and diverse human societies are examined. Course meets the History major requirement for Group III.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 422 - World History in the Modern Era****Credits:** 4

Emergence of major global human interactions due to the growth of major civilizations. The global context for the rise of the modern West. The rise and decline of Western global domination and the emergence of new states and changing societies throughout the world. Course meets the History major requirement for Group III.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** HIST 422H**Grade Mode:** Letter Grading**HIST 425 - Foreign Cultures****Credits:** 4

Introduces the culture of a particular nation or region; preparation for experiencing a foreign culture. Consult department for listing of topics. Course meets the History major requirement for Group II or III, depending on the topic.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** HIST 425H, HIST 425W**Grade Mode:** Letter Grading**HIST #435 - Origins of European Society****Credits:** 4

This course traces the contours of human experience in what has come to be called "Western Civilization," from its beginnings in the ancient Near East, Greece, and Rome, to the dawn of the modern global world in sixteenth-century Europe. Although topics will vary by instructor, all sections examine the myriad forms of social, political, religious, military, and economic organization that emerged in this rich tradition. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** HIST 435H, HIST 435W**Grade Mode:** Letter Grading**HIST 435W - Origins of European Society****Credits:** 4

This course traces the contours of human experience in what has come to be called "Western Civilization," from its beginnings in the ancient Near East, Greece, and Rome, to the dawn of the modern global world in sixteenth-century Europe. Although topics will vary by instructor, all sections examine the myriad forms of social, political, religious, military, and economic organization that emerged in this rich tradition. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Equivalent(s):** HIST #435, HIST 435H**Grade Mode:** Letter Grading**HIST 436 - Europe and the Modern World****Credits:** 4

The course focuses on major encounters between Europe and its Global rivals from the Age of the Revolution to the rise of modern terrorism. While the topics covered will vary by instructor, all sections address the rise of Democracy, the birth of Capitalism, the apocalyptic destruction of the two World Wars, and the emergence of a diverse multi-cultural Europe in the years following World War II. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** HIST 436H, HIST 436W**Grade Mode:** Letter Grading**HIST 436W - Europe and the Modern World****Credits:** 4

The course focuses on major encounters between Europe and its Global rivals from the Age of the Revolution to the rise of modern terrorism. While the topics covered will vary by instructor, all sections address the rise of Democracy, the birth of Capitalism, the apocalyptic destruction of the two World Wars, and the emergence of a diverse multi-cultural Europe in the years following World War II. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Equivalent(s):** HIST 436, HIST 436H**Grade Mode:** Letter Grading

**HIST 437H - Honors/The Mad Among Us: A Global History of Mental Disorder****Credits:** 4

Mental disorder is a universal and persistent condition in human history. Every society has struggled to make sense of it; every society has struggled to address it. But, what is mental disorder? Is it a disease? If so, of what? The body? The brain? The soul? Is it a chemical imbalance? Genetic destiny? Is it the wage of sin? The mark of the devil? The curse of a god? Or is it a social label or cultural construct - a name slapped on thought, feeling, or behavior that defies a society's definition of "normal?" This course seeks to answer these questions by exploring the great range of beliefs human societies, ancient to modern and from across the globe, have developed to identify and define mental disorder as well as the methods they have employed to treat or contain it.

**Attributes:** Historical Perspectives(Disc); Honors course**Grade Mode:** Letter Grading**HIST 440A - Martin Luther King, Jr., and the Struggle for Racial Justice****Credits:** 4

This course examines Martin Luther King's life, philosophy, and career on the front lines of the civil rights movement. In our study of King as well as the larger black freedom struggle, we seek an understanding of how certain questions related to racial justice played out in American history. We focus on issues of civil disobedience, just and unjust laws, love and hate, violence and non-violence. Students will read many of King's famous writings such as the Letter from Birmingham Jail, as well as his lesser-known speeches - among them King's 1967 address denouncing the Vietnam War. More generally, this seminar introduces students to the rudiments of historical thinking and asks broader questions about the role of individuals in history and how social change happens. Course meets the History major requirement for Group I.

**Attributes:** Historical Perspectives(Disc); Honors course**Grade Mode:** Letter Grading**HIST 440B - Honors/Medicine, Society, Science, and the Law: Who Makes Your Health Care Decisions?****Credits:** 4

Every person interacts with the health care system – including you. In this class, students will study the interactions between law, society, science, and medicine to gain an understanding about how the American health care system developed and who has and does make decisions about health. Topics covered include vaccination, health care providers, discrimination, and epidemics. Course meets the History major requirement for Group I.

**Attributes:** Historical Perspectives(Disc); Honors course**Equivalent(s):** HIST 604**Grade Mode:** Letter Grading**HIST 440D - Honors/Citizens and Persons****Credits:** 4

Definitions of citizenship have changed dramatically in the course of history. In this class, we will trace the evolution of expanding (and occasionally contracting) political and civil rights and responsibilities over time, with an emphasis on events in multicultural American nations and emphasizing how laws, social practices, unique historical contexts, and individuals' understanding of self and other have mutually produced each other. The course is part of the Honors Symposium "Being Human" and will engage in an interdisciplinary conversation about personhood, humanity, rights and responsibilities, and dehumanization.

**Attributes:** Historical Perspectives(Disc); Honors course**Grade Mode:** Letter Grading**HIST 440E - Honors/Drugs and Addiction in World History****Credits:** 4

As drug addiction rates in the US are reaching epidemic proportions, new solutions and perspectives are becoming increasingly important. This course teaches students how a variety of cultures, including the Aztecs, Maya, Vedic India, China, and Greco-Roman antiquity, confronted the problems of drug use and addiction in their own societies. By examining these phenomena through the lens of other culture's values, students will gain a valuable perspective by which to address these problems today.

**Attributes:** Honors course; World Cultures(Discovery)**Grade Mode:** Letter Grading**HIST 440F - Honors/Islam, Art, and the Past****Credits:** 4

While the world is all too familiar with images of ISIS using explosives and frills to destroy ancient sites and artifacts in Iraq and Syria, there has been little attention given to the dynamic role of art within past and present Islamic societies. Yet, Islam has a rich and vibrant artistic tradition, one in which ancient civilizations played and continue to play a major role. This course introduces students to Islamic art and cultural heritage through a study of Islam's engagement with past artistic traditions in the fields of architecture and the fine arts. It also addresses how the recent actions of ISIS have changed questions about cultural heritage and stewardship in the Middle East and the West. Finally, the course asks students what they can and should do to preserve cultural heritage.

**Attributes:** FinePerformingArts(Discovery); Honors course**Grade Mode:** Letter Grading**HIST 440G - Honors/Revolutions in Science****Credits:** 4

In this course, we study several examples of scientific revolutions, and consider whether a general model applies to them all. How have ideas about the universe and human beings' place in it changed dramatically at certain points in history? Do scientific revolutions have a common structure? Do they have any connection to political or social revolutions? Are we living through a scientific or technological revolution? These are among the questions we will examine.

**Attributes:** Historical Perspectives(Disc); Honors course; Writing Intensive Course**Grade Mode:** Letter Grading**HIST 444D - Slavery and Society in Pre-Colonial Africa****Credits:** 4

Examines the evolution and practice of the institution of slavery in Africa from the earliest times to the era of European colonialism. Using contemporary personal narratives by the slaves, the course examines specific historical contexts of various slave systems, continuity and change in the ideologies and practices of slavery, religion and slavery, race and slavery, gender and slavery, conditions of slaves, as well as the making and uses of slaves - as domestics, concubines, eunuchs, officials, soldiers, labor and capital. Using films, slide images, and a comparative approach, African slavery will be examined within the context of the early evolution of slavery in the Mediterranean and Islamic worlds as well as its later expressions in the Atlantic world of the Americas. Course meets the History major requirements for Group III.

**Attributes:** Historical Perspectives(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading

**HIST 444H - Honors/From Beijing to Baghdad: Objects along the Silk Road****Credits:** 4

The Silk Road, often characterized as the world's first great superhighway, played a vital role in spreading forms of art and in developing new technologies for their production. The peoples along the Silk Road traded luxury goods such as silk and jade as well as culinary and musical traditions. Through lectures, readings, films, and podcasts we will explore the trade links between East and West and the material objects traded along the way.

**Attributes:** FinePerformingArts(Discovery); Honors course; Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HIST 444J - Honors/Global Citizenship: In Pursuit of Liberty****Credits:** 4

What does it mean to be a global citizen? Are we? What are human rights? Are they universal? This honors discovery course will explore with the men and women who traveled and thought beyond the borders of their locality and their moment of time and who imagined themselves citizens of the world. We will start with early revolutions that traversed oceans and national borders. We'll read utopias that saw their world differently. In the end, we will investigate major global challenges of our own world. We will move backwards, but also forwards in history. We will read novels, and perform plays. We will listen to Beethoven and Berlioz, in class and discuss larger questions of our international community, from sustainability to diversity, as they echo through different disciplines. Course meets History major requirement for Group I or II.

**Attributes:** Historical Perspectives(Disc); Honors course; Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HIST 483 - History of World Religions****Credits:** 4

Introduces the religions of the world in terms of historical development, relationship to society, belief system, central texts, and ritual practices. Begins with the religions of small and tribal societies (e.g., African, Native American), moves through religions of complex societies (e.g., Hinduism), and then studies the various traditions that emanated from ancient revelations: Zoroastrianism, Buddhism, Judaism, Christianity, Islam, and certain new forms of Christianity. Course meets History major requirement for Group III.

**Attributes:** Historical Perspectives(Disc)

**Equivalent(s):** HIST 483W, RS 483, RS 483W

**Grade Mode:** Letter Grading

**HIST 497 - Explorations in Historical Perspectives****Credits:** 4

In-depth exploration of a particular historical question or topic: for example, the French Revolution, Chaucer's England, or the New Deal. Students should consult with the Department of History for a list of topics and instructors. Course meets the History major requirements for Group I, II, or III, depending on the topic.

**Attributes:** Historical Perspectives(Disc)

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** HIST 497H, HIST 497W

**Grade Mode:** Letter Grading

**HIST 498 - Explorations of Historical Perspectives****Credits:** 4

In-depth exploration of a particular historical question or topic: for example, the French Revolution, Chaucer's England, or the New Deal. Students should consult with the Department of History for a list of topics and instructors. Course meets the History major requirements for Group I, II, or III, depending on the topic.

**Attributes:** Historical Perspectives(Disc)

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**HIST 500 - Introduction to Historical Thinking****Credits:** 4

Basic skills essential to the study of history: critical reading of historical literature, improvement of written and oral analysis of historical material, and use of library resources. Intensive study of books and documents from varying historical fields and periods. Required of history majors; open to other interested students.

**Attributes:** Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HIST 501 - Medieval Military History****Credits:** 4

Western societies from the Roman Empire to the emerging nation states of early modern Europe spent an enormous proportion of their surplus wealth on war. This course introduces this crucial aspect of Western history and examines the period extending from the third century AD, to just before the extensive introduction into Europe of gunpowder weapons in the fifteenth century. Discussion of not only battlefield tactics and famous generals but also the effect that war had upon society as a whole and the economic ramifications of war, the Christianization of war, and the effect of war upon literature. Course meets the History major requirements for Group II.

**Grade Mode:** Letter Grading

**HIST 505 - African American History****Credits:** 4

Explores the forced integration of the Atlantic World through the African slave trade and the development of creole cultures in America, and takes the story of Black Americans' "creative survival" and the evolution of African-American culture through the end of the Civil War. Course meets the History major requirements for Group I.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course

**Grade Mode:** Letter Grading

**HIST #506 - African American History****Credits:** 4

Experiences, aspirations, and contributions of black Americans from their ethnic origins in Africa to the present American crisis in race relations; comparative study of cultures and institutions. Reconstruction to the present. Course meets the History major requirements for Group I.

**Attributes:** Historical Perspectives(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HIST 509 - Law in American Life****Credits:** 4

Investigates the role of law in American social, political, and economic life from the European settlements to the present. Traces the development of legal institutions, but focuses on the various functions of law (e.g., in structuring social relationships, allocating resources, defining governmental authority, expressing social and moral values, and as a mechanism for control). Course meets the History major requirements for Group I.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**HIST 511 - History of New Hampshire****Credits:** 4

This course reconstructs the surprising past of the place we call New Hampshire. Beginning with the 17th -century encounter between English and Native people, it runs to the present. Literature, documents, photos and films provide access to New Hampshire's changing natural environment, its rural life, industrialization, politics and recent struggles. Course meets the History major requirements for Group I.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**HIST 515 - Game of Thrones: Power and Politics in Medieval and Renaissance Europe****Credits:** 4

George R.R. Martin's popular medieval fantasy series, A Song of Ice and Fire better known from HBO's Game of Thrones brilliantly portrays the brutal dynastic wars that unfolded between noble houses for control of Westeros. But did you know that pre-modern European history was one of Martin's greatest inspirations? Join us as we explore a real "Game of Thrones", the gripping series of national and international struggles between actual noble European houses for supremacy from the eleventh through the sixteenth centuries that ultimately forged the modern European state system.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**HIST 520 - History of Animals****Credits:** 4

Do animals have histories? Animals have created few if any written sources. Nevertheless, relationships between humans and animals have changed dramatically from the ancient past to the present day. Humans have shaped animal lives to serve many purposes; simultaneously, animals have served as agents of change in human history. Drawing on environmental, economic, social, and cultural history, this course will focus on the history of animals as pests, pets, producers, and products.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 521 - Origins of Modern Science****Credits:** 4

Development of scientific ideas in Europe from the Renaissance through the Scientific Revolution to the Enlightenment. Topics include themes in the physical and biological sciences and their relations to cultural and social contexts. No special science background is required. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 522 - Science in the Modern World****Credits:** 4

Development of science, particularly in Europe and North America, from the 18th century to the present. Themes including Darwinism, the growth of modern physical and biological sciences and science in the contemporary world. No special science background is required. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 532 - Modern Latin America****Credits:** 4

Provides a broad overview of Latin America from the 18th century to the present. It examines the breakdown of colonial rules, the establishment of independent countries, the formation of viable nation states, the importance of geography, the roles of the different elements of society. Social, political, and economic changes and continuities emphasized to give a sense of the ambiguities of the historical process. Cultural differences illustrated with slides and music. The effects of elite rule and of United States interventions studied. Course meets the History major requirements for Group III.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**HIST 537 - Espionage and History****Credits:** 4

Introduces the history and politics of espionage and intelligence organizations from the 20th century to the present. Special attention to intelligence work among the major powers in World War I, World War II, and the Cold War. Readings include autobiographical accounts and other primary sources as well as novels. Course meets the History major requirements for Group II.

**Grade Mode:** Letter Grading**HIST 538 - Modern European War and Society: The Napoleonic Wars to World War II****Credits:** 4

This course is organized around three conflicts: the Napoleonic Wars, World War I, and World War II. As we study them, we'll discuss the evolution and impact of total war in order to understand how societies work in wartime and how these conflicts have shaped Europe. In our exploration of each war, we examine a range of participants from international alliances to individual soldiers and to civilians involved in the conflict. Total war, by its nature, incorporates most elements of society, so we will spend time looking at the homefronts as well as the battlefronts. We will survey the conflicts as a whole, but also devote time to some special events or elements. For example, we will look at the battle of Somme during the portion of the course dedicated to World War I. We will also study some of the art that arose out of the conflict. The core of the class will be lectures, but we will engage in some discussion almost every day and there are some classes that will be dedicated to discussion. Course meets the History major requirements for Group II.

**Grade Mode:** Letter Grading**HIST 540 - Foundations of Medieval History: 300-1300 CE****Credits:** 4

Introduces the history of Western Europe from the end of the Roman Empire to the late twelfth century. Particular focus on the history of Christianity, social and economic structures, the role of women in medieval culture, and literacy and learning. Course meets the History major requirements for Group II.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**HIST 555 - The Vikings!****Credits:** 4

The Vikings spread terror and destruction throughout Europe. They also developed remarkable art forms, cutting edge technology, constructed new cities and kingdoms, and explored the new world 500 years before Columbus. This course will explore the identities of these fierce warriors, intrepid explorers, and famed poets. This course fulfills history category 2.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 560 - Modern Britain****Credits:** 4

This course explores Great Britain from the American Revolution to the reign of Elizabeth II. We examine Britain's unparalleled Imperial power, the vibrancy of Victorian Culture, and the devastating impact of the two World Wars, which initiated Britain's post-war decline. During the Cold War, Britain rebuilt its position through cultural exports like rock-n-roll music, royal pomp, and the mini-skirt, but has never fully recovered its status, despite its vibrant multi-cultural allure. Course meets the History major requirements for Group II.

**Grade Mode:** Letter Grading**HIST 563 - Introduction to Russian Culture and Civilization****Credits:** 4

Interdisciplinary course on the development of Russian culture from its origins through the end of the 19th century. Historical documents, literary works, ethnographic materials, films, slides of Russian art, and music. Course meets the History major requirements for Group II.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** RUSS 525**Grade Mode:** Letter Grading**HIST 565 - Women in Modern Europe****Credits:** 4

A social history of women in Europe from 1700 to the present. Examines the development of the "modern nuclear family," transformations in women's work during the industrial revolution, and women's political evolution from bread rioters to hearth tenders to petitioners. Sources include published diaries, historiographical studies, and novels. Course meets the History major requirements for Group II.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 566 - Comparative Revolutions: How to Make a Revolution in the World before Marx****Credits:** 4

This course in HOW TO MAKE A REVOLUTION (if you lived more than 100 years ago) will ask why the Sea Beggars flooded Holland, the Levellers dug up the Commons, and Black Loyalists fled the independent Americans after their revolution. The class asks how slaves in Haiti defeated Napoleon's troops, utopian socialists built a railway around a cross at the center of Europe, and Marx rallied the workers of the world to unite. Course meets the History major requirements for Group II.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**HIST 575 - Ancient Near East****Credits:** 4

From the Neolithic revolution to the time of Alexander the Great. Rise of civilization; nature of human artistic and intellectual development in the earliest civilizations of Mesopotamia and Egypt; Judaism in its historical setting. Course meets the History major requirements for Group III.

**Equivalent(s):** CLAS 575**Grade Mode:** Letter Grading**HIST 579 - History of China in Modern Times****Credits:** 4

This course introduces students to major historical developments in China from 1600 to the end of the twentieth century. Major themes include: ethnicity, alien rule, political reforms and revolution, industrialization, interactions with the rest of the world (such as cross-cultural relations and military conflict), social and cultural transformation. Readings for the course are a combination of secondary and primary sources in translation, including scholarly articles, memoirs, biography, fictions, and journalist reports, most of which are landmark works indispensable for the study of modern Chinese history. Course meets the History major requirements for Group III.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 580 - History of Japan in Modern Times****Credits:** 4

Surveys major historical changes in Japan from 1600 to the end of the 20th century. Topics include Tokugawa centralized feudalism, samurai class, Edo culture, foreign relations with Asian countries and the United States, wars, postwar reforms under American Occupation, and the rise of Japanese economic power. Sources include official documents, personal memoirs, literary works, films, as well as slides of ukiyo-e (woodblock paintings). Course meets the History major requirements for Group III.

**Grade Mode:** Letter Grading**HIST 585 - Medieval Islam****Credits:** 4

This course examines the origins and expansion of Islam and the development of the Muslim community from the time of Muhammad until the Islamic empires of the 16th century. We will address the associated geographies, artifacts, and legal formations associated with the medieval and early modern Islamic world. The course focuses on major developments in politics, religion, and the arts. Course meets the History major requirements for Group III.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**HIST 587 - History of Africa from the Earliest Times to 1870****Credits:** 4

This survey course introduces students to the major landmarks in the making of African history and societies from the earliest times to 1870 AD. Beginning with the dual premises that Africa is the birthplace of both the human species as well as some of the oldest and most varied civilizations in the world, the course examines the early civilizations of both Egypt and the Nile Valley, the development and of the Swahili culture, the Sudanese and forest empires, religious beliefs and the moral order, gender and class, warfare and diplomacy, the advent and impact of Islam and Christianity, migrations and cultural formations in central and southern Africa, commerce, and encounters with Europe, slavery and the Trans-Atlantic slave trade, and the end of formal African independence. Films and other visuals are streamed to supplement the readings. Course meets the History major requirements for Group III.

**Grade Mode:** Letter Grading

**HIST 588 - History of Modern Africa: 1870 to the Present****Credits:** 4

This survey course introduces students to the major forces and dynamics of change in the modern history of Africa, from the late 19th century to the present. The primary focus is on European imperialism and its aftermaths in Africa. Issues to be examined include: the scramble for and partition of Africa; resistance to colonization; the rise and fall of apartheid in Southern Africa; religion and society, music and culture, gender and sexuality, art and literature, pan-Africanism, military rule, HIV/AIDS, democratization, and nation building. Emphasis on African initiatives, and on an exploration of contemporary challenges and the major forces reshaping the history of this oldest, most diverse, and most fascinating continent. Feature films, drama skits, literary works, and guest lectures are utilized. Course meets the History major requirements for Group III.

**Grade Mode:** Letter Grading**HIST 595 - Explorations****Credits:** 1-4

See department listings for semester topic. Course meets History major requirement for Group I, II, or III depending on the topic.

**Grade Mode:** Letter Grading**HIST 600 - Explorations****Credits:** 4

Advanced explorations in one of the fields listed below: A) American History, B) European History, C) World History, D) Ancient History. Barring duplication of subject, may be repeated. Course meets History major requirement for Group I, II, or III depending on the topic.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**HIST 603 - European Conquest of North America****Credits:** 4

European Conquest of America explores many of the major issues relating to the creation and development of colonial North America. We will focus particularly on the extraordinary heterogeneous mixture of peoples who lived in North America and the Caribbean, and on the complexity and consequences of their interactions. Throughout the semester we will continually evaluate arguments among historians about whether or not it makes sense to understand the colonial period in terms of a conquest, or whether Native Americans retained enough power and resistance throughout the colonial period to make such an interpretation inaccurate. Course meets History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 605 - American Revolution, 1750-1800****Credits:** 4

Examines the transformation of thirteen British colonies into the United States through the election of Thomas Jefferson as president in 1801. Topics include the revolution's origins, the social and political impact of war, the changing structure of the family, the role of religion, the drafting and ratification of the Constitution, and the revolution's consequences for Indians and African Americans. Course meets History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 606 - History of the Early Republic****Credits:** 4

Explores the histories of the people and institutions that transformed the new United States from a coastal republic of largely independent freeholders to a transcontinental democracy increasingly driven by class. Topics include slavery, the family, reform movements, and the formation of national identity. Course meets History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 609 - Special Topics in American Legal History****Credits:** 4

In-depth thematic exploration of law in American life. Topics include race and equality in America; community, pluralism, and American law; property, liberty, and law; gender and law. May be repeated for credit with instructor's permission. Consult department listings of topics. Course meets History major requirement for Group I.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 611 - Civil War Era****Credits:** 4

Surveys the period from the presidency of Andrew Jackson to the end of the Reconstruction. Focuses on causes, course, and consequences of the Civil War. Topics include slavery in the Old South, antebellum reform movements, creation and breakdown of the Second Party System, social and economic (as well as military) events during the war and major developments during Reconstruction after the war. Course meets History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 612 - Emergence of Industrial America****Credits:** 4

Investigates the economic transformation of 19th-century America from a rural, agricultural society to an urban, industrial one. Explores the sweeping economic changes and focuses on such topics as change in work and leisure, westward expansion and its effects on Native Americans, shifts in gender roles, growth of a consumer culture, rise of the labor unions, Populism, immigration, reform and regulation movements, growth of American imperialism, and intellectual developments. Course meets History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 613 - American Ways of War****Credits:** 4

"Is there an American way of war?" This commonly asked question will be the focal point of the course. To answer that we will study the interactions of both war and society in the United States from the Civil War onwards, addressing such issues as the causes, courses, diplomacy, homefront, legacy, and the art of the great and small wars. Course meets the History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 615 - The Rise of Modern United States, 1900-1945****Credits:** 4

By 1900, the United States had emerged as the world's leading industrial power and leading destination for millions of immigrants and had begun to become a major player in world affairs. Americans enjoyed unprecedented prosperity and became eager consumers of new inventions and popular culture: cars, radios, jazz records, and the "motion pictures." But they also experienced the worst depression the country had ever known and struggled to make sense of a world that went to war twice within a generation. Women, African Americans, immigrants - all struggled to carve out their place in the new political order. By World War II, the United States assumed many of its "modern" characteristics. Using novels, movies, photographs, sporting events, political speeches and political debates, we will explore both the domestic and the international aspects of the development of modern U.S. Course meets the History requirements for Group I.

**Grade Mode:** Letter Grading

**HIST #616 - United States Since World War II****Credits:** 4

This course presents a framework for understanding American history from 1945 to the present. We explore major events and themes, beginning with the Cold War and the domestic anti-communism crusade, and continuing with the civil rights movement, the Vietnam War, and the women's movement. In our study of national politics, we chart the rise of liberalism – focusing on the presidencies of John F. Kennedy and Lyndon Johnson – as well as the conservative response, punctuated by the "Reagan Revolution." We conclude with a brief study of the 21st century.

**Grade Mode:** Letter Grading**HIST 618 - American Environmental History****Credits:** 4

Examines how nature has been a factor in American history and how Americans have wrestled with the concepts of nature and culture. Topics include industrialization, evolution, conservationism, environmentalism, and environmental diplomacy. Course meets the History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 619 - Foreign Relations of the United States****Credits:** 4

The history of American diplomacy from the colonial era to the present, with the dividing point at 1900. The focus will be on both the foreign and domestic influences that shaped American diplomacy. Course meets the History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 620 - Foreign Relations of the United States****Credits:** 4

The history of American diplomacy from the colonial era to the present, with the dividing point at 1900. The focus will be on both the foreign and domestic influences that shaped American diplomacy. Course meets the History major requirement for Group I.

**Grade Mode:** Letter Grading**HIST 621 - History of American Thought****Credits:** 4

This course introduces the subfields of American intellectual and cultural history by assessing the ideas of some of the brightest minds that thought about life on the land we know of as the United States of America before the middle of the nineteenth century. This course surveys more than two centuries of thinkers and their connection to America's plural and evolving popular culture. Ultimately, this course seeks to answer the question: What is the history of American thought?

**Grade Mode:** Letter Grading**HIST 624 - Topics in Modern US History****Credits:** 4

Advanced study of topics in U.S. history. Barring duplication of subject, may be repeated. Course meets the History major requirement for Group I.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 632 - Latin American History: Topics****Credits:** 4

Topics vary (see department listing for current semester). Seminar entails reading, discussion, and research on literature and documents related to the selected topic. Provides students with the opportunity to do research under close direction. Course meets the History major requirement for Group III.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 633 - Medieval England 800-1300****Credits:** 4

This course provides students with an opportunity to gain an in-depth understanding of the history of medieval England from the beginning of the period of consolidation under the Wessex dynasty in the ninth-century through the end of the thirteenth century. In addition to obtaining a large corpus of information through the reading of a significant monographs dealing with England during this period, students will be challenged to develop the critical analytical skills necessary for the thorough understanding and practice of historical methodologies, with a particular focus on the practice of historical method in writing medieval history. Finally, students will be given the opportunity to improve their communications skills through extensive class discussions dealing with the scholarly works read for this course, and in writing assignments.

Course meets the History major requirement for Group II.

**Grade Mode:** Letter Grading**HIST 634 - Medieval Empires****Credits:** 4

This course explores the political, economic, administrative, military, religious, and intellectual foundations of imperial rule in the Middle Ages with a particular focus on the Carolingian, German, and Byzantine Empires of the early and high Middle Ages. Course meets the History Major requirements for Group II.

**Grade Mode:** Letter Grading**HIST #640 - Holy War in the Holy Land: The Medieval Crusades****Credits:** 4

Survey of the medieval military expeditions organized by Christians to secure the Holy Land during the 12th and 13th centuries. Topics considered include the formulation of a "just war" theory; political, intellectual, religious, and military interactions between Christians, Jews, and Muslims; the Crusader State of Jerusalem; and the histories of individual crusades. Course meets the History major requirement for Group II.

**Grade Mode:** Letter Grading**HIST 641 - Europe after the Black Death****Credits:** 4

Explores the dramatic changes that characterized Western Europe as it rebounded in the fifteenth through the seventeenth centuries from the ravages of the Black Death of 1348. Examines the social, political, and artistic developments in late medieval and Renaissance Italy before "crossing the Alps" to trace the expansion of Renaissance culture in Northern Europe. Topics include the humanist movement; new patterns of social organization; the revival of classical antiquity in the arts, architecture, religion, and political theory; the effects on European society of the encounter with the "New World"; shifting roles for men and women in early modern European societies; religious war and conflict. Course meets the History major requirement for Group II.

**Grade Mode:** Letter Grading

**HIST 642 - Saints, Sinners, and Heretics: Europe in the Age of Religious Reform****Credits:** 4

Examines the history of Western Christendom from roughly 1400 to 1600, a period of tumultuous religious change throughout Europe. We begin in the Middle Ages where the seeds of religious division were sown. We then tackle Martin Luther's challenge to the Catholic church, trace the diffusion of his message throughout Europe, and address the Catholic response to the evangelizing movements that he inspired. Finally we investigate some of the regional varieties of Protestantism that developed in the latter half of the sixteenth century with a particular focus on Switzerland, Germany, England, Scotland, France, and the Netherlands. Course meets the History major requirement for Group II.

**Grade Mode:** Letter Grading**HIST 654 - Topics in History of Science****Credits:** 4

Advanced study of a selected topic in the history of European science since the Renaissance. Course meets the History major requirement for Group II.

**Grade Mode:** Letter Grading**HIST 656 - Twentieth Century Europe****Credits:** 4

The Twentieth Century began with European nations at the apex of their global power. It ended with their world dominance in ruins. Two World Wars, the rise of Nazism, and communist revolutions had left Europe in the shadow of the United States. Examining European history from the birth of the automobile to the fall of the Berlin Wall, we explore the political, social and cultural forces that made the twentieth century the bloodiest epoch in world history. Course meets the History requirement for Group II.

**Grade Mode:** Letter Grading**HIST 662 - England in the Tudor and Stuart Periods****Credits:** 4

England experienced great upheaval under the Tudor and Stuart dynasties. This course explores many of the key political, religious, social and economic changes that changed the face of England in the 16th and 17th centuries. We will study all of the Tudor and Stuart monarchs, and we will focus particularly on the following topics: Henry VIII, the English Reformation, Elizabeth I, Commons v. Nobility, the English Civil Wars and the execution of Charles I, the Restoration and the Glorious Revolution. Course meets the History requirement for Group II.

**Grade Mode:** Letter Grading**HIST #664 - Russia: Modernization through Soviet Empire****Credits:** 4

The challenges of modernization, experience and legacy of Leninist and Stalinist revolutions. Soviet consolidation and decline through the Gorbachev era. Course meets the History requirement for Group II.

**Grade Mode:** Letter Grading**HIST 665 - Themes in Women's History****Credits:** 4

In-depth examination of a selected topic in women's history. Topics may include Women and Health, Women in Modern European Political Theory, Comparative History of Women and Revolution. See Time and Room Schedule of history department newsletter for the specific topic. May be repeated for credit with permission of instructor. Course meets the History requirement for Group II.

**Grade Mode:** Letter Grading**HIST 675 - History of Ancient Greece****Credits:** 4

Discover the exciting, turbulent, and innovative world of the Greeks through their history, from the emergence of small cities in the archaic period to the empire of Alexander the Great. Special focus will be on the political, economic and social developments in the rise of the polis (city), the Persian and Peloponnesian Wars, the rise of Macedon and Alexander the Great's conquests. CLAS 403/HIST 403 is encouraged but not necessary.

**Equivalent(s):** CLAS 675**Grade Mode:** Letter Grading**HIST 676 - Topics in Ancient Greek History****Credits:** 4

Advanced historical study of a particular period or theme in ancient Greek history. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** CLAS 676**Grade Mode:** Letter Grading**HIST 677 - History of Ancient Rome****Credits:** 4

Discover the fascinating and tumultuous history of the ancient Roman world, from its small beginnings in the early Republic to the high Empire, when Rome controlled the whole Mediterranean basin. Special focus will be on the political and economic conflicts between social classes, the Punic Wars, the fall of the Republic, its transformation into a monarchy, and the golden age of imperial rule. CLAS 404/HIST 404 is encouraged but not necessary.

**Equivalent(s):** CLAS 677**Grade Mode:** Letter Grading**HIST #678 - Topics in Ancient Roman History****Credits:** 4

Advanced historical study of a particular period or theme in ancient Roman history. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** CLAS 678**Grade Mode:** Letter Grading**HIST 690 - Seminar: Historical Expl****Credits:** 4

Seminar in one of the fields listed below: A) American History, B) Atlantic History, C) Canadian History, D) Latin American History, E) Medieval History, F) European History, G) History of Islam, H) Ancient History, I) East Asian History, J) African History, K) Middle Eastern History, L) Historiography, M) Russian History, N) World History, O) British History, P) New Hampshire History, Q) Historical Methodology, R) Irish History, S) History of Science, T) Maritime History, U) Museum Studies. Course meets the History requirements for Group I, II, or III, depending on the topic. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** HIST 701**Grade Mode:** Letter Grading**HIST 691 - Internship****Credits:** 1-4

Supervised internship with a governmental agency, private corporation, philanthropic institution, library, archives, museum, historical society, or other institution seeking individuals interested in historical research.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading

**HIST 695 - Independent Study****Credits:** 1-4

A) Early American History, B) American National History, C) Canada, D) Latin America, E) Medieval History, F) Early Modern Europe, G) Modern European History, H) Ancient History, I) East Asia, J) Near East and Africa, K) European Historiography, L) American Historiography, M) Russia, N) World History, O) English History, P) New Hampshire History, Q) Historical Methodology, R) Irish History, S) History of Science, T) Maritime, U) Museum Studies. For students showing a special aptitude in history who desire to study an area or subject for which no appropriate course is offered.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 698 - Internship in Museum Studies****Credits:** 4

Supervised position with a museum, historical society, archive, or other history related site.

**Grade Mode:** Credit/Fail Grading**HIST 771 - Museum Studies****Credits:** 4

Introduction to theory, methods, and practice of museum studies. Examination of various museum functions, as well as contemporary historical controversies. May be repeated with departmental approval.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 772 - Studies in Regional Material Culture****Credits:** 4

Introduces the theory and methodology of material culture, that is, the study of history through the analysis of buildings, human-created landscapes, and artifacts made and used in the United States, particularly in New England. May be repeated for credit with permission of undergraduate adviser. Course meets the History major requirements for Group I.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 774 - Historiography****Credits:** 4

Analysis of ancient and modern historians. Open to undergraduates with permission. (Not offered every year.)

**Grade Mode:** Letter Grading**HIST #775 - Historical Methods****Credits:** 4

Contemporary historical methods. Required of all entering Ph.D. candidates; open to undergraduate with permission. (Not offered every year.)

**Equivalent(s):** HIST 670**Grade Mode:** Letter Grading**HIST 780 - Special Topics in Museum Studies/Material Culture****Credits:** 4

Study of a selected topic related to museum studies or material culture. May be repeated for course credit with permission of the undergraduate adviser. Course meets the History major requirements for Group I.

**Repeat Rule:** May be repeated up to 3 times.**Grade Mode:** Letter Grading**HIST 797 - Colloquium****Credits:** 4

Selected topics in American, European, and non-Western history. Required of history majors. Students must elect section in the department office at the time of registration. Course meets the History major requirements for Group I, II, or III, depending on the topic.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HIST 500 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HIST 799 - Senior Thesis****Credits:** 4

Supervised research leading to the presentation of a major research paper. Permission of department chairperson required. May not be used as a substitute for the required senior colloquium.

**Grade Mode:** Letter Grading

## Homeland Security (HLS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HLS 410 - Introduction to Homeland Security****Credits:** 4

The primary focus of HLS 410 is to describe the entirety of the homeland security enterprise in the US and to survey many of the major expressions of it, which can become careers in security. This includes a history of homeland security and emergency management disciplines, and the law and policy underpinnings for homeland security and specific units in emergency management, terrorism, intelligence, law and policy, critical infrastructure and risk analysis, corporate security, environmental/human security and cybersecurity.

**Grade Mode:** Letter Grading**HLS 415 - Fundamentals of Corporate Security****Credits:** 4

HLS 415 will introduce the student to the fundamentals of corporate security including the nature, scope, history, and essential elements of organization (or enterprise) security in the workplace, with emphasis on the private sector. Specific areas include the operational aspects of security strategies for identifying and controlling security exposures, risk management strategies, applicable legal issues, personal protection, property protection, role of intelligence, and concepts of disaster planning and management.

**Grade Mode:** Letter Grading**HLS 455 - Introduction to Cybersecurity****Credits:** 4

The primary focus of HLS 455 is to provide a survey of the broad field of cybersecurity and information security/assurance. Topics will include a definition of information security, the need for information security and cybersecurity in both the public and private sectors, ethical and legal issues revolving around cybersecurity, risk management and planning, and information/cyber security technology. The role of the U.S. Department of Homeland Security (DHS) in securing the cyberspace and the nation's information-related infrastructures will also be explored.

**Grade Mode:** Letter Grading

**HLS 480 - Professional Skills in Homeland Security****Credits:** 4

HLS 480 prepares students to effectively enter the workforce via an internship or co-op experience. Students learn to prepare a resume and cover letter, practice interviewing, learn about how their personality matches job descriptions, search for internships, and develop an e-Portfolio that describes themselves, their professional aspirations, skills, etc. Professional ethics, decision making, organizational power, basic leadership and management principles and professionalism are discussed and illustrated.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**HLS 505 - Political Violence and Terrorism****Credits:** 4

This course provides an interdisciplinary approach to the study of political violence and terrorism. The class includes inquiry into the theories and justifications for political violence of all types, limited war, asymmetric warfare and the contested term terrorism. Trends and reasons for contemporary violent political extremism as a phenomenon are particularly explored from both the U.S. domestic and international perspectives. Students are introduced to the ideologies, goals, and strategies of select organizations and broader extremist movements.

**Attributes:** Social Science (Discovery)**Equivalent(s):** PS 505**Grade Mode:** Letter Grading**HLS 510 - Fundamentals of Emergency Management****Credits:** 4

This course includes a thorough coverage of the historical and statutory background of emergency management (EM) in the USA as well as the significant laws and policies that have defined and shaped the field, including HSPD 5, HSPD 8, the National Flood Insurance Act, and the Stafford Act. Topics include detailed coverage of FEMA's all hazards approach, the EM cycle, integrated EM, the incident command system, the National Incident Management System, emergency support functions, and risk communications and the homeland security exercise evaluation program (HSEEP) where students are introduced to the both discussion and operations-based exercises and strategies for evaluating exercises. This course culminates with each student writing and formally presenting an integrated emergency management plan.

**Prerequisite(s):** HLS 410 with a minimum grade of D- and HLS 415 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 515 - Critical Infrastructure Security and Resilience****Credits:** 4

This course includes an introduction to critical infrastructure security, resilience, and risk analysis as it is conceptualized, regulated and used in the homeland security enterprise. Topics include the history and evolution of critical infrastructure protection including the composition, characteristics and risks to critical infrastructures. Public-private partnerships and sector-specific plans are examined. Resilience in a global context and risk analysis as a means by which resources and assets are allocated to critical infrastructure(s) is presented.

**Prerequisite(s):** HLS 410 with a minimum grade of D- and HLS 415 with a minimum grade of D- and HLS 455 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 520 - Homeland Security Law and Policy****Credits:** 4

This course is an overview of key legal, policy, and ethical issues in the context of Homeland Security policy and practice. Students examine legal concepts regarding constitutional rights of individuals, legal process, access to courts, the law of war, and national security principles as they relate to homeland security legislation and policy initiatives. Legal principles of due process, habeas corpus, search and seizure. Compulsory process, and international agreements are explored in greater depth. The law of war will be examined in the context of preemptive war and the current National Security Strategy, the status of combatants and detention, Elements of national security law, intelligence collection and sharing, the Patriot Act, and military-civilian relations, etc.

**Prerequisite(s):** HLS 410 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS #540 - Prevention and Detection of Fraud****Credits:** 4

Fraud detection and prevention are a perpetual concern for organizations, individuals and society. Course topics include fraud causes and behaviors of fraudsters, the fraud triangle, criminal and civil fraud, red flags, financial statement fraud, procurement fraud, bribery, pyramid schemes, money laundering, corporate governance, fraud risk management and responses. Real-world fraud schemes are explored and discussed.

Required course for minor in Forensic Accounting. May not be repeated for credit if taken as BUS 460.

**Equivalent(s):** BUS 460**Grade Mode:** Letter Grading**HLS 550 - History and Structure of the U.S. Intelligence Community****Credits:** 4

National security intelligence is a secret nation-state activity to understand or influence an adversarial entity. The United States has a unique Intelligence Community (IC) of 17 organizations that support policymakers. How did the IC develop? How does each component support its mission? This class provides students with an introduction to the history and structure of the United State IC with a focus on the events and policy that shaped its development.

**Grade Mode:** Letter Grading**HLS 555 - Comparative Homeland Security Systems****Credits:** 4

This course will encourage students to become cosmopolitan citizens by gaining knowledge and understanding of cultures other than those of the United States. Students will learn to recognize others' values and, ultimately, accept the many ways in which we all are human. For example, using the Irish struggle for independence from Britain and the Troubles as examples, students will examine Anglo and Irish "culture" and how it is influenced by or how it can influence nation-state security, or conversely, the fight for civil liberties and independence. The main systems and structures in both the US and the UK's domestic security enterprises will be discussed as well as the origins, typologies and goals of several terrorist groups, the basics of the intelligence community in both nations, and how intelligence informs the struggle to contain terrorism. In addition, for homeland security majors, this course can satisfy either the terrorism requirement or the intelligence systems requirement (see instructors). Although a major objective of the course is to prepare students to participate successfully in a managed study abroad program (as a separate course: HLS 656, 1 credit), participation in the study abroad trip is a not required component of this course.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading

**HLS 580 - Environmental and Human Security****Credits:** 4

Students will learn how environmental issues may give rise to socio-political instability around the world which can become threats to US national/homeland security. This course will explore how U.S. domestic and foreign policy, and ultimately, U.S. national security, can be impacted by emergent threats to nations from environmental health issues, climate change, deforestation, infrastructure vulnerabilities, and natural resource shortages caused by rapid industrialization, population growth, and urbanization in less developed countries. In a seminar format, students and faculty will cover a variety of readings and discuss their conclusions and students will have the opportunity to lead class discussions on assigned readings.

**Attributes:** Environment,TechSociety(Disc)**Grade Mode:** Letter Grading**HLS 595 - Independent Study in Homeland Security****Credits:** 1-4

This course is an independent study in homeland security. Its main function will be to allow students to complete a 500 level homeland security course required in the major, but who are not able to take the required course when it is offered. HLS 595 can substitute for the required core course. In addition, students can also take HLS 595 as a sophomore level independent study as a variable credit course for students wanting to more deeply explore an area of interest.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**HLS 610 - Exercise Design and Evaluation in Homeland Security****Credits:** 4

This course studies the role and structure of exercise design as it is applied in homeland security and emergency management. Students are introduced to the nature and characteristics of discussion and operations-based exercises and the Homeland Security Exercise Evaluation Program. The legislative and policy background of national preparedness is presented. Students complete a project and presentation that demonstrates how exercises are designed, scripted, implemented (conducted) and evaluated.

**Prerequisite(s):** HLS 510 with a minimum grade of D- and HLS 515 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 615 - Introduction to Fraud Investigation****Credits:** 4

Fraud Investigation is a specific process including acquisition and verification of information that could lead to the confirmation of fraudulent activity and legal consequences. Course topics include various steps in the fraud investigation process, including identification of fraud, planning an investigation, interviewing, gathering of public and non-public evidence, analysis of data, legal considerations, confidentiality, and writing a fraud examination report. Real-world fraud cases are discussed and analyzed. Required course for minor in Forensic Accounting.

**Grade Mode:** Letter Grading**HLS 630 - Sports and Large Event Security Management****Credits:** 4

This course will address the nature and scope of sport and large event security issues involved in securing the homeland from domestic and international threats to sports and other large events. Motives, methods, and impact of terrorism activity, natural disasters, and crowd management issues in sport and large event venues will be discussed. This course also includes an examination of the basic legislation and operations of the U.S. Department of Homeland Security; risk assessment; security planning options; emergency response and recovery, training and exercises.

**Prerequisite(s):** HLS 410 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 640 - Forensic Accounting****Credits:** 4

Forensic accounting procedures uncover fraudulent schemes and misappropriation of assets. Course topics include review of the basics of financial accounting, Sarbanes-Oxley legislation, the forensic accounting profession, occupational fraud, financial analysis techniques, money laundering, investigative and interviewing processes, evidence gathering, inferential analysis, and documentation and presentation of the case. Real-life fraud cases solved by forensic accounting skills are analyzed. Required course for minor in Forensic Accounting.

**Prerequisite(s):** BUS 532 with a minimum grade of D- or ADMN 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 650 - Topics in National Security Intelligence****Credits:** 4

What is national security intelligence? In this course students are introduced to definitions of intelligence and how they vary according to the entity employing the definition. Students learn about national security intelligence concepts including collection, analysis, counterintelligence, and covert action. Student will explore the organization and mission of the United States Intelligence Community, state and local intelligence agencies, and their role in Homeland Security.

**Prerequisite(s):** HLS 410 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 651 - Issues in Intelligence Collection****Credits:** 4

The primary focus of this course is to develop an understanding of intelligence collection in the US and foreign nations, the issues facing intelligence collection and a survey of the various forms of collection. Students will learn the role collection plays in the intelligence community, how various policies affect collection and how different agencies monitor and collect intelligence.

**Prerequisite(s):** HLS 650 with a minimum grade of D-.**Grade Mode:** Letter Grading**HLS 652 - Intelligence Analysis and Production****Credits:** 4

National security intelligence analysis is a process of transforming collected data into useable and often actionable products. In this class students will focus on the analysis phase of the intelligence cycle and its relationships with decision maker requirements, intelligence community planning, collection, and dissemination. A primary goal of this class is to increase students' capacity for critical thinking when conducting analytical activities.

**Prerequisite(s):** HLS 650 with a minimum grade of D-.**Grade Mode:** Letter Grading

**HLS 653 - Counterintelligence****Credits:** 4

Media articles often include depictions of captured spies, criminals, and faceless cyber-attacks. What process is used to identify and defend against these threats? Counterintelligence plays a key role in defending a country or organization from other nation states intelligence services and other nontraditional threats. In this course students will learn about counterintelligence as a phenomenon and critically examine the activities undertaken by counterintelligence organizations.

**Grade Mode:** Letter Grading**HLS 654 - Covert Action****Credits:** 4

On January 3, 2020 the Iranian Revolutionary Guards Corp leader Qasem Soleimani was killed in Iraq by a United States drone strike. Was this event covert action? In this class students will explore covert action and how it is used by nation states to achieve their foreign policy objectives.

**Grade Mode:** Letter Grading**HLS 655 - Open Source Intelligence****Credits:** 4

Open Source Intelligence (OSINT) plays a critical role in national security intelligence. Open sources are defined as those that are publicly available. In this course students will explore and analyze OSINT intelligence from publications, broadcasts, digital media, geographic, and other technical data.

**Grade Mode:** Letter Grading**HLS 656 - Comparative Homeland Security Systems Lab****Credits:** 1

The study abroad component of its prerequisite course, HLS 555. Students go on a 3-week managed study abroad program designed and led by UNH faculty.

**Prerequisite(s):** HLS 555 with a minimum grade of D-**Grade Mode:** Letter Grading**Special Fee:** Yes**HLS 665 - Bioterrorism, Biosecurity, and Biodefense****Credits:** 4

This course examines biowarfare, including biological, chemical, and radiological weapons. Historical, plausible, and novel weapons will be studied. Mechanisms of action, biological and societal impacts, detection, treatment and governmental strategies for biodefense will be investigated. Discussions will focus on surveillance and preparedness at the state and federal levels. Relevant aspects of the law will be presented and the bioethical challenges of anti-bioterror research will be explored.

**Prerequisite(s):** HLS 410 with a minimum grade of D- or BMS 503 with a minimum grade of D-**Equivalent(s):** BSCI 665**Grade Mode:** Letter Grading**HLS 695 - Independent Study in Homeland Security****Credits:** 1-4

This course is an independent study in homeland security. Its main function will be to allow students to complete a 600 level homeland security course required in the major, but who are not able to take the required course when it is offered. HLS 695 can substitute for the required core course. In addition, students can also take this course as a junior level independent study as a variable credit course for students wanting to more deeply explore an area of interest.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**HLS #722 - International White Collar Crime****Credits:** 4

It was Edwin Sutherland, an American sociologist of the early 20th century who first began to appreciate and understand white collar crime and distinguish it from other criminality. He was also the first to define it, calling it "crime committed by a person of respectability and high social status in the course of his occupation". Today, international white collar crime is a global phenomenon which reaches into the highest levels of transnational business and commercial behavior, government, and politics. It includes, but is not limited to, old-fashioned graft and corruption, tax evasion, money laundering, securities and market manipulation, banking and insurance violations and fraud, influence peddling and even election fixing. This course is intended to provide the ICLJ's advanced students with a thorough understanding of what white collar crime is, where it is, how it is executed, what is being done to combat it, and what dangers it presents to established and emerging nations. The course will examine the approaches to these problems used in countries that have a strong interest dealing with white collar criminal issues. In addition, international best practices and standards will be critically assessed.

**Grade Mode:** Letter Grading**HLS #724 - International Criminal Law Survey****Credits:** 4

This course is a survey of the field of international criminal law. It asks students to consider foundational questions about what counts as an international crime; when an individual country may have jurisdiction over crimes that occur outside the country's boundaries and when and over what crimes an international body may have jurisdiction. It introduces students to the international criminal court; the special tribunals; domestic and international efforts to combat terrorism and an array of transnational crimes like drug trafficking, cybercrimes, white-collar crimes etc.

**Grade Mode:** Letter Grading**HLS #726 - International Criminal Court & The Special Tribunals****Credits:** 4

This course is about a new and exciting area of law, practice and procedure that in many respects is still in its infancy. During the course you will explore how International Criminal Law and the International Criminal Courts and Tribunals evolved. You will examine their jurisprudence, practice and procedure. Specifically, you will discover how the prosecution operates from the investigation of crimes through to their prosecution. You will look at the role of the defense and the common defenses raised in cases before the courts. An understanding of the full ramifications of International Criminal Law can be challenging because it disturbs some of the well-established concepts that you may have become accustomed to, such as sovereignty, military supremacy, and discrimination.

**Grade Mode:** Letter Grading

**HLS 750 - Emergent Topics in Homeland Security/Homeland Defense**  
**Credits: 4**

This course will investigate the nature of strategic planning as it relates to homeland security and national security in the United States. In addition, students will explore how strategic planning relates to decision making in more stable environments as well as decision making under uncertainty. Relevant legislation and past decisions (such as the Bay of Pigs and the Cuban Missile Crisis) will be explored. In addition, the basic concepts of the techniques for strategic communication will be explored, developed, and related to decision making along with the characteristics of making high quality strategic decisions.

**Prerequisite(s):** HLS 510 with a minimum grade of D- and HLS 515 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**HLS 760 - Strategic Planning and Decision Making**

**Credits: 4**

This course investigates the nature of strategic planning as it relates to homeland security and national security in the U.S. Students explore how strategic planning relates to decision making in more stable as well as uncertain environments. Relevant legislation and past decisions (such as the Bay of Pigs and the Cuban Missile Crisis) are explored including concepts and techniques from making high quality decisions. Strategic communication principles and techniques are presented.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HLS 510 with a minimum grade of D- and HLS 515 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**HLS 770 - Internship in Homeland Security**

**Credits: 4**

This course represents the professional work experience required in the homeland security major. Students work in a professional setting for a minimum of 180 hours under the supervision of a site supervisor. All internships require students to identify and complete work on a specific project (s) approved by the HLS coordinator. Internships may be taken at any time after students have taken 30 credits of university coursework. Note that students who are academically or otherwise unable to enter into internship must take HLS 799 (thesis in homeland security which requires senior standing and permission from the HLS program coordinator).

**Prerequisite(s):** HLS 410 with a minimum grade of D- and HLS 555 with a minimum grade of D- and HLS 480 with a minimum grade of D-.

**Grade Mode:** Credit/Fail Grading

**HLS 790 - Capstone in Homeland Security**

**Credits: 4**

This course allows students to work collaboratively with an organization to identify and solve a homeland security, physical security, safety, cybersecurity or emergency management challenges. Each group performs a risk assessment in order to identify their client's primary security or preparedness challenges. Students then use their skill to identify and apply best practices as countermeasures. Students culminate their projects with presentations to their classmates and to their clients. The expectation of this class is to develop a professional example of the student's thinking and writing to solve real world security problems.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HLS 610 with a minimum grade of D- and HLS 760 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**HLS 795 - Independent Study in Homeland Security**

**Credits: 1-4**

This course is an independent study in homeland security. Its main function will be to allow students to complete a 700 level homeland security course required in the major, but who are not able to take the required course when it is offered. HLS 795 can substitute for the required core course. In addition, students can also take this course as a senior level independent study as a variable credit course for students wanting to more deeply explore an area of interest.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Credit/Fail Grading

**HLS 799 - Senior Thesis in Homeland Security**

**Credits: 4**

Students work under the direction of a faculty thesis advisor to plan and carry out independent research resulting in an oral presentation and a major research paper. Research projects should include the development of a research thesis/question, a literature review, analysis, and synthesis of relevant data/sources, discussion and interpretation and presentation of results. Senior Thesis can be used to substitute for Internship in HLS. Permission by HLS program coordinator required, open only to HLS seniors.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HLS 510 with a minimum grade of D- and HLS 515 with a minimum grade of D- and HLS 650 with a minimum grade of D- and HLS 760 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

## Horticultural Technology (HT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

No courses are currently active in the course inventory for this subject prefix.

## Hospitality Management (HMGT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HMGT 401 - Introduction to the Hospitality Industry**

**Credits: 4**

Review the broad spectrum of the hospitality industry from an historical perspective, in concert with current history, trends, and challenges presented by notable industry executives. Distinguished guests represent all segments of the hospitality industry plus selected allied support businesses. Industry segments include, but are not limited to, hotels and lodging, restaurant and food service, travel and tourism, conferences and conventions, casinos and gaming, clubs and resorts, health care and senior living, franchising and entrepreneurship, and technology support.

**Attributes:** Writing Intensive Course

**Grade Mode:** Letter Grading

**HMGT #403 - Introduction to Food Management****Credits:** 0 or 4

Designed to introduce the student to the fundamental components of food production principles, nutrition and menu development, and to some basic management skills. The subject matter is presented through classroom lectures, interactive electronic instruction, guest lectures, and food production labels.

**Grade Mode:** Letter Grading**HMGT #404 - Professional Development I****Credits:** 1

Development and integration of self-assessment, career planning, and academic work. Students design and produce an individual career action plan in preparation of a required summer internship. Through self-assessment instruments they develop an understanding of their personal values, interests, skills, and personality in relation to their vocational options, academic process, and career projections.

**Grade Mode:** Credit/Fail Grading**HMGT 405 - Introduction to Food and Service Management****Credits:** 0 or 4

This course is designed to build knowledge and experience in food and service management. Basic principles of foodservice management and their application to menu development, food safety, procurement, equipment usage and identification, customer service, marketing, leadership, human resources, and finance are covered during this course. Laboratory experience in both front and back of the house will provide hands-on experience in basic understanding of how a kitchen operates and dining room service. Training in Safe Food Handling, and Alcohol Services leads to Certification.

**Grade Mode:** Letter Grading**HMGT #504 - Professional Development II****Credits:** 2

Development and integration of self-assessment, career planning, and academic work. Students design and produce an individual career action plan in preparation of a required summer internship. Through self-assessment instruments they develop an understanding of their personal values, interests, skills, and personality in relation to their vocational options, academic process, and career projections.

**Grade Mode:** Letter Grading**HMGT 520 - Happy and Healthy at Work: Promoting Wellness, Diversity and Inclusion****Credits:** 4

Offers improved understanding and ability to effectively manage a diverse and healthy workforce. Addresses key diversity, inclusion, and wellness issues in the workplace of a general, technical, and social nature with an emphasis on disability and health promotion.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)**Equivalent(s):** HMGT 598, OT 520**Grade Mode:** Letter Grading**HMGT 554 - Lodging Operations Management****Credits:** 0 or 4

The course is designed to introduce the operational aspects of hotel and resorts as well as discuss current trends of the lodging industry, hotel organization, reservations, registration, guest services and communications, hotel security, front office accounting, housekeeping, night audit, planning for operations, sales techniques, revenue management, and human resources management. To achieve the learning objectives, lectures, labs, e-learning course, guest lectures, and individual assignments are employed. Training in hotel analytics leads to CHIA Certification.

**Prerequisite(s):** HMGT 401 (may be taken concurrently) with a minimum grade of C-.**Equivalent(s):** HMGT 654**Grade Mode:** Letter Grading**HMGT 570 - International Food and Culture****Credits:** 0 or 4

This course explores multiple world cultures using food, language, religion, geography, communication, politics, among other attributes, and compares/contrasts with our own diverse cultures here in the United States. Learn why we eat what we eat, when, and how. Food is a critical component across the world's many different cultures and this course will investigate how they are viewed by persons of different backgrounds. The course will leave you with an expanded understanding and appreciation of why and how persons from diverse cultures with varying backgrounds approach their food and beverage needs differently. Laboratory experience in cooking international cuisine.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** HMGT 670**Grade Mode:** Letter Grading**HMGT #600 - Hospitality Marketing Management****Credits:** 4

Students apply basic marketing principles to the competitive environment of service businesses, such as hotels, restaurants, and other hospitality firms. Strong emphasis on consumer behavior, services management theory, and the hospitality marketing mix as they relate to service firms of all types. Course material is presented through a variety of techniques: case studies, lectures, guest speakers, team projects, and written assignments.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HMGT 401 with a minimum grade of C- and HMGT 554 (may be taken concurrently) with a minimum grade of C-.**Mutual Exclusion:** No credit for students who have taken ADMN 585, MKTG 530, MKTG 550.**Grade Mode:** Letter Grading**HMGT #604 - Professional Development III****Credits:** 2

Students design and produce an individual career action plan. Emphasis on identifying each individual's marketable skills, locating job possibilities, writing resumes and correspondence, and interviewing for jobs. Career development workshops are used to enhance the learning experience.

**Prerequisite(s):** HMGT #504 (may be taken concurrently) with a minimum grade of D-.**Grade Mode:** Letter Grading

**HMG 618 - Uniform Systems for the Hospitality Industry****Credits:** 4

Following a review of financial statements and an introduction to the Uniform System of Accounts for Hotels and Restaurants, students learn specific applications of managerial accounting and decision support systems for the hospitality industry. Topics include cash flow analysis, cost management, cost-volume-profit analysis, pricing models, budgeting, and forecasting. Students develop an understanding of computer software and back-and front-office computer systems as they relate specifically to the hospitality industry. Lectures, computer exercises, and papers.

**Prerequisite(s):** ADMN 502 with a minimum grade of C-.**Grade Mode:** Letter Grading**HMG 625 - Hospitality and Employment Law****Credits:** 4

Tort and contract liability in the hospitality industry. Emphasizes a managerial approach to solving or avoiding potential problems including employment law issues that arise in any business environment: wrongful termination, compensation rules, affirmative action, employment discrimination, sexual harassment, and issues involving privacy in the workplace. Looks at numerous State and Federal Agencies with which Hospitality business must work. Examines key forms of ownership in terms of taxes, risks and rewards.

**Grade Mode:** Letter Grading**HMG 635 - Hospitality Human Resource Management****Credits:** 4

Addresses key hospitality resource management issues of a general, technical, and social nature including communication, motivation and leadership, job stress and safety, security, government regulations, discrimination, and substance abuse. Covers technical areas such as recruiting and selecting, placement, employment, training, performance appraisal, disciplining, and termination.

**Attributes:** Writing Intensive Course**Equivalent(s):** MGT 770**Grade Mode:** Letter Grading**HMG 655 - Hospitality Finance and Development****Credits:** 4

Provides the advanced student with a familiarity of the principles and practices of development and acquisition of hotel, restaurant, and other hospitality businesses, and the real estate development process. Emphasizes market and financial evaluation and decision making relative to economic, ethical, legal, and social aspects of the organization's environment. Group projects involving the preparation of a complete economic feasibility study for hotel or restaurant development or acquisition or repositioning are required.

**Prerequisite(s):** HMG 618 with a minimum grade of C-.**Grade Mode:** Letter Grading**HMG 661 - Event Design, Planning, and Management****Credits:** 4

Strategic and logistical considerations in managing the planning, development, marketing, and implementation of meetings, conventions, and events.

**Grade Mode:** Letter Grading**HMG 667 - Advanced Food & Beverage Operations & Event Management****Credits:** 0 or 4

A project management course integrating advanced management principles and techniques in the presentation of a large-scale gourmet dining event. This class examines services & operational management protocols: planning, forecasting and budgeting, marketing and sales, meal plan preparation, production, execution and delivery systems, service encounters, technology, purchasing and inventory management, human resources, scheduling, productivity and quality issues, HR and risk management.

**Grade Mode:** Letter Grading**HMG 681 - Contemporary Resort Development and Management****Credits:** 4

Looks at the elements of developing and maintaining Resort properties including Spas, Ski Areas, Waterparks, Time Shares, Beach Resorts and Full service resorts with private home development. Examines the key roles real estate and financing play in all resort development and sustainability.

**Attributes:** Writing Intensive Course**Equivalent(s):** HMG 681W**Grade Mode:** Letter Grading**HMG 682 - Private Club Management****Credits:** 4

Examines the effective operation and management of private clubs including city clubs, country clubs and yacht clubs. Major topics include: the unique niche that clubs represent in the hospitality industry, organizational structure of clubs, role of the board of directors, membership requirements, differences between tax-exempt clubs and non-exempt clubs, government regulation, preparing for a career in the club field, trends in club management and the future of clubs.

**Grade Mode:** Letter Grading**HMG 695 - Independent Analysis****Credits:** 2-12

Study and research project for honor students to advance knowledge in lodging and food services fields.

**Equivalent(s):** HMG 695W**Grade Mode:** Letter Grading**HMG 695W - Independent Analysis****Credits:** 2-12

Study and research project for honor students to advance knowledge in lodging and food services fields.

**Attributes:** Writing Intensive Course**Equivalent(s):** HMG 695**Grade Mode:** Letter Grading**HMG 696 - Supervised Student Teaching Experience****Credits:** 1-8

Participants are expected to perform such functions as attending classes, leading discussion groups, assisting faculty, presenting information in undergraduate courses that they have successfully completed, holding office hours, grading papers and exams. Enrollment is limited to juniors and seniors who have had above average GPAs.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**HMG 698 - Topics****Credits:** 1-4

Special topics and developments in lodging, food services, and other hospitality industries. Course may be repeated when topics change.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

**HMG 700 - PAUL Assessment of Core Knowledge****Credits:** 0

One of the learning objectives in the Hospitality Management Program is that all students will graduate with an understanding of these core knowledge assembled from various disciplines that contribute courses to the program. We assess this learning as part of our Assurance of Learning Program. This zero credit course provides an administrative mechanism for accomplishing this goal.

**Co-requisite:** HMG 703**Grade Mode:** Credit/Fail Grading**HMG 703 - Strategic Management in the Hospitality Industry****Credits:** 4

Capstone course, interrelating and applying strategic management concepts to hospitality organizations. Cases from hotel companies, restaurant chains, and other hospitality-related businesses, supplemented by economic and other published information from the industry, are used as departure points for class discussion.

**Co-requisite:** HMG 700**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**HMG #756 - International Franchising****Credits:** 4

Designed to help the student acquire an understanding of franchising as a system of distribution and business expansion. Franchising is studied from both the perspectives of the franchisee and the franchiser. In addition, economic, financial, and legal issues associated with franchising are covered. By the end of the course, students acquire the skills and sources of information that would permit sound assessment of the business opportunities available in franchising.

**Prerequisite(s):** ADMN 585 with a minimum grade of C- or HMG #600 with a minimum grade of C-.

**Equivalent(s):** MKTG #756**Grade Mode:** Letter Grading**HMG 758 - Revenue Management and Pricing****Credits:** 4

This course covers two topics critical to today's hotel industry; the actual techniques of selling, converting inquiries from individuals and conventions into business. Revenue Management is the technique of evaluating a piece of business and determining its profitability over all departments. The course looks intently at past history as well as forecasting in order to determine the price to be charged based on demand and profitability sought.

**Grade Mode:** Letter Grading**HMG 771 - International Wine and Beverage****Credits:** 4

Explore the wide world of wine, beer and spirits, through lectures, sensory evaluations, and in-class tasting exercises. Also learn about how to purchase, store, and serve different beverages. Enrolled students must be at least 21 years old.

**Grade Mode:** Letter Grading**HMG 777 - Casino Management****Credits:** 4

Examines the history of the gaming industry and the development, organization and management of casinos. Investigates economics, moral and social issues of gaming including problem gambling. Covers gaming regulations, accounting and taxation of casinos, casino marketing, national and international gaming destinations, game probabilities and the interaction of the casino department with other divisions of mega casino resorts including lodging, food and beverage and meetings and conventions. A central focus will be on current trends and events. A field trip to a casino resort is required for those enrolled students at least 21 years old on the day the trip is scheduled.

**Mutual Exclusion:** No credit for students who have taken HMG 777J.**Grade Mode:** Letter Grading**HMG 795 - Internship II****Credits:** 1-4

Off-campus work in the hospitality industry for on-the-job skill development. Normally supervision is provided by a qualified individual in the organization with frequent consultation by the faculty sponsor. Initial sponsorship of an Hospitality Management faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College juniors and seniors with 3.0 or better cumulative GPA.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Credit/Fail Grading**HMG 798 - Topics****Credits:** 4

Special Topics.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**HMG 799 - Honors Thesis/Project****Credits:** 4-8

Supervised research leading to the completion of an honors thesis or project; required for graduation from the honors program in hospitality management.

**Attributes:** Honors course; Writing Intensive Course**Grade Mode:** Letter Grading

## Hotel, Restaurant, Travel (HRT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HRT 600 - Hotel and Restaurant Management****Credits:** 4

This course considers the analysis of theories, principles, and techniques of successful hotel and restaurant management. Common issues associated with hotel and restaurant management are emphasized with the goal of enhancing students' ability to diagnose and address diverse problems and implement effective service strategies in a hospitality setting. Topics may include: the principles of organizing, the formulation of goals and objectives, decision-making processes, staffing, employee/guest relations, and labor management negotiations.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.

**Equivalent(s):** HRT 600G**Grade Mode:** Letter Grading

**HRT 601 - Food Service Systems and Control****Credits:** 4

This course covers the systems and techniques appropriate to manage food, beverage, and labor costs in food service operations. Topics may include: management, marketing, menu development, costs and pricing, quality assurance, production, and operational analysis. Students develop case studies that apply best practices in food service management. Students may evaluate evidence-based sales techniques and procedures and propose strategies to promote a food service operation, including marketing, public relations, and entrepreneurship.

**Prerequisite(s):** HRT 600 with a minimum grade of D- or HRT 600G with a minimum grade of D-.

**Equivalent(s):** HRT 601G

**Grade Mode:** Letter Grading

**HRT 635 - Leadership and Sustainable Tourism****Credits:** 4

This course provides a comprehensive introduction to the nature and scope of leadership and sustainable tourism planning at the local, regional, and national levels. Topics addressed may include: distinguishing between leading and managing, understanding systems and change leadership as well as the economic, social, environmental, and policy considerations within the sustainable development framework. Students may discuss competencies required for leading, planning, and development guidelines in different geographical areas. Students may illustrate how diversity, systems leadership, change leadership and conflict resolution promotes effective organizational management.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.

**Equivalent(s):** HRT 602G

**Grade Mode:** Letter Grading

**HRT 660 - Event, Meeting, and Conference Management****Credits:** 4

This course explores strategies to develop meaningful and well-organized conferences, meetings, and special events. The course addresses but is not limited to event logistics such as: client management, facilities management, compliance with ADA and other laws and regulations, contract negotiation, labor planning, standards for food and beverage management, meeting/organization agendas, transportation, schedule of events, break-out sessions, leisure activities, finances, and evaluations. Students may develop case studies that apply best practices in event management.

**Prerequisite(s):** HRT 600 with a minimum grade of D- or HRT 600G with a minimum grade of D-.

**Equivalent(s):** HRT 603G

**Grade Mode:** Letter Grading

**HRT 680 - Revenue Management in the Hospitality Industry****Credits:** 4

Students in this course will explore the strategies for realizing revenue in a complex hospitality environment. Case studies and real-world examples may be used to understand how, where, and when opportunities arise for maximizing revenue generation. While topics may vary, this course focuses primarily on the lodging, food and beverage, event, and leisure/recreation components of resort operations. Students will explore the historical role of revenue management as well as the current and future trends that operators are employing. This course focuses on both proactive and reactive strategies to address real-time changes within the industry.

**Prerequisite(s):** (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (HRT 600 with a minimum grade of D- or HRT 600G with a minimum grade of D-).

**Equivalent(s):** HRT 607G

**Grade Mode:** Letter Grading

## Human Development & Family Studies (HDFS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HDFS 444A - Youth Facing Adversity****Credits:** 4

This course focuses on childhood risks such as poverty, family stress and dysfunction, social and emotional problems, and bullying, as well as how children cope with risk and demonstrate resilience. Students will learn about and visit a number of community programs in New Hampshire that support children and their families in times of stress. Site-visits will include introduction to a range of providers such as child advocates, counselors, social workers, juvenile detention workers, and teachers.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course

**Equivalent(s):** FS 444A

**Grade Mode:** Letter Grading

**HDFS 525 - Human Development****Credits:** 0 or 4

This course provides an overview of human development from conception through death with an emphasis on the contexts in which development occurs, and a focus on thinking about ways to enhance the lives of individuals and families across the lifespan. The knowledge gained in this course will allow students to understand the needs of individuals across all life stages, and critically reflect on their own development.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** FS 525, FS 525H, HDFS 525H

**Grade Mode:** Letter Grading

**HDFS 545 - Intimate Relationships and Families****Credits:** 4

This course provides students with an overview of contemporary research and theory on intimate and family relationships. An historical overview of marriage, intimate partnering, and the family will be covered while also exploring diverse experiences. Emphasis will be placed on the cultural, societal, and political norms and tensions surrounding intimate and family relationships and related public policy. Students will also have an opportunity to reflect on their own attitudes, thoughts, and values.

**Attributes:** Social Science (Discovery)**Equivalent(s):** FS 545, FS 645**Grade Mode:** Letter Grading**HDFS 553 - Personal and Family Finance for Family Life Professionals****Credits:** 4

This course focuses on applied financial management emphasizing teaching financial issues to a variety of audiences. Topics include savings, credit, insurance and retirement, and programs and resources available to facilitate financial education.

**Equivalent(s):** FS 553**Grade Mode:** Letter Grading**HDFS 555 - Research Methods in HDFS****Credits:** 4

This course is an introduction to research methods as used in Human Development and Family Studies to provide students with a foundational understanding of how to design, implement, complete, and evaluate research studies. The research process will be emphasized, including review and application of current research literature, generating research questions, formulation of hypotheses, conceptual and operational definitions, measurement, sample selection, quantitative and qualitative analyses, designing and interpreting research designs, and understanding ethical responsibilities in research.

**Grade Mode:** Letter Grading**HDFS 565 - Introduction to Child Life****Credits:** 4

This course provides an introduction to the theory and practice of the child life profession and family centered care. Child life professionals work with children and adolescents facing acute, chronic, or life-threatening illness and traumatic injuries, and their families. Topics include children's emotional reactions to hospitalization, use of play, preparation for medical procedures, family support, and designing healing environments.

**Equivalent(s):** SW 565**Grade Mode:** Letter Grading**HDFS 586 - Families at Risk****Credits:** 4

This course is designed to look at the challenging biological, cultural and situational factors that affect the contemporary family. Concerns such as immigration, terrorism, disease, and media influences will be discussed, along with global problems of climate change, war, violence, alcohol and drug abuse, and economic change. This class is about how families cope with the stress associated with these challenges, but also how they adapt, how to promote resilience, and how families can thrive in the face of adversity. Students will explore remedies, solutions and support networks that help families in crisis.

**Prerequisite(s):** HDFS 545 with a minimum grade of D-.**Equivalent(s):** FS 586**Grade Mode:** Letter Grading**HDFS 590 - Learning Through Play****Credits:** 4

This class will focus on theories and stages of play, developmentally appropriate play activities, and examine the role of the teacher/child life specialist in creating an environment which promotes learning through play.

**Grade Mode:** Letter Grading**HDFS 610 - Introduction to Marriage and Family Therapy****Credits:** 4

Marriage and family therapy is a clinical mental health treatment model that sees the entire family system as essential in the healing process. The introduction to marriage and family therapy (MFT) course is designed to provide undergraduate students with the opportunity to develop: (1) an introductory knowledge of core family systems theory concepts; (2) a basic history of marriage and family therapy and its current practices; (3) the application of systems theory in multiple career paths; and (4) the application of introductory level therapeutic skills and practices.

**Prerequisite(s):** HDFS 545 with a minimum grade of C-.**Grade Mode:** Letter Grading**HDFS 623 - Developmental Perspectives on Infancy and Early Childhood****Credits:** 4

This course provides an overview of the physical, cognitive, language, and social-emotional development of children from the prenatal period through early and middle childhood. Theories of development are discussed as well as research methodologies used in the study of child development. Special attention is given to landmark and current research findings regarding development during this period of the lifespan.

**Prerequisite(s):** HDFS 525 with a minimum grade of D-.**Equivalent(s):** FS 623**Grade Mode:** Letter Grading**HDFS 624 - Developmental Perspectives on Adolescence and Early Adulthood****Credits:** 4

This course examines the normative changes adolescents experience in biological, social, emotional, and cognitive domains. Emphasis is on the contexts of adolescent development including family and peer relationships, school, work, leisure, and broader cultural influences. Students will learn about problematic and risky behaviors as well as the positive development outcomes associated with this period of the lifespan.

**Equivalent(s):** FS 624**Grade Mode:** Letter Grading**HDFS 625 - Adult Development and Aging****Credits:** 4

This course covers the general biological, psychological, and cultural theories and issues related to adult development and aging from emerging adulthood to the oldest old. The course emphasizes diversity in the process of aging and the influence of various contexts on that process. Designed for students who want to become more knowledgeable about successful aging as well as those who plan to work in adult and gerontological research or social services settings.

**Equivalent(s):** FS 625**Grade Mode:** Letter Grading

**HDFS 635 - Teaching and Learning in Early Childhood Settings****Credits:** 4

This course covers the theoretical and developmentally-appropriate approaches to supporting young children's physical, social, emotional, and cognitive development in early childhood settings. Weekly four-hour practicum experience working with preschool children at the UNH Child Study and Development Center is required.

**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 623 with a minimum grade of D-.

**Equivalent(s):** FS 635

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**HDFS 641 - Parenting Across the Life Span****Credits:** 4

This course provides an overview of theory and current research on parenting in contemporary society. The course explores the challenges and changing nature of parenting across development, current parenting issues, and parenting in diverse family types. Students will also have an opportunity to reflect on their own attitudes, thoughts, and values in regards to parenting.

**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D-.

**Equivalent(s):** FS 641

**Grade Mode:** Letter Grading

**HDFS 684 - Curriculum for Young Children****Credits:** 4

This course focuses on the design, implementation, and evaluation of developmentally-appropriate activities in a classroom of young children. This course takes the stance that curriculum is not simply activities or plans, but a product of societal, school, and classroom culture as influenced by particular views of development.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** HDFS 623 with a minimum grade of C- and HDFS 635 (may be taken concurrently) with a minimum grade of C-.

**Equivalent(s):** FS 734, HDFS 734

**Grade Mode:** Letter Grading

**HDFS 695 - Independent Study****Credits:** 1-6

Supervised in-depth scholarly experience relevant to any of the HDFS specializations: Child Development, Family Support, and Lifespan Development. Student must work directly with a supervising faculty member to develop and complete the project.

**Equivalent(s):** FS 695

**Grade Mode:** Letter Grading

**HDFS 697 - Special Topics****Credits:** 1-6

Focused examination of a particular theoretical, methodological, or policy issue.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** FS 697, FS 697W, HDFS 697W

**Grade Mode:** Letter Grading

**HDFS 697W - Special Topics****Credits:** 1-6

Focused examination of a particular theoretical, methodological, or policy issue.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** HDFS 697

**Grade Mode:** Letter Grading

**HDFS 707 - Practicum****Credits:** 1-6

Supervised in-depth experience in professional setting designed to increase the student's understanding of and experience working with children, adolescents, or families. Students must work with a supervising faculty member to identify a practicum site. 01) Child, 02) Family, 03) Adolescent.

**Equivalent(s):** FS 707

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**HDFS 709 - Child Development Internship****Credits:** 4

Supervised teaching internship at the UNH Child Study and Development Center with children 6 wks-6 years old age for 9 hours each week. Internship experiences include teaching, documentation, and assessment. In addition students attend a weekly one-hour seminar for an in-depth reflection and analysis of the internship experience. Materials fees.

**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** FS 709

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**HDFS 743 - Families, Schools, and Community****Credits:** 4

This course takes an ecological approach to emphasize the critical value of effective family-school-community partnerships in enhancing the education of young children. Models of family-school-community partnerships are explored. Practical knowledge regarding the experiences of those from diverse backgrounds to best prepare students to interact with, and support, all children and families is highlighted. Students actively engage within the community to build bridges between families, schools, and the greater community.

**Attributes:** Writing Intensive Course

**Equivalent(s):** HS 743

**Grade Mode:** Letter Grading

**HDFS 746 - Human Sexuality****Credits:** 4

This course addresses the biological, psychological, and cultural aspects of human sexuality and gender across the lifespan. Opinions, attitudes, and values affecting societal responses to sexual issues are explored in relation to scientific research and theory. Students will be better prepared to deal with sexual issues in their personal and professional lives.

**Equivalent(s):** FS 746

**Grade Mode:** Letter Grading

**HDFS 757 - Race, Class, Gender, and Families****Credits:** 4

This course explores the intersection of race, class, and gender in family life in the US. Theory, research, and other relevant literature is used to examine the variety of family configurations in our society today and the diverse experiences that individuals and families have as a result of existing social, political, and economic institutions.

**Attributes:** Writing Intensive Course

**Equivalent(s):** FS 757

**Grade Mode:** Letter Grading

**HDFS 760 - Family Programs and Policies****Credits:** 4

This course explores the relationship between family policy and legislation with programs, services, and family experiences at the local, state and national level. Course content includes concepts associated with planning for, implementing, and evaluating family policies and programs; as well as exploring the complexities of family policy and the policy-making process. Course assignments will challenge students to understand and evaluate family policies and programs that are compatible with their professional interests.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HDFS 545 with a minimum grade of D-.**Equivalent(s):** FS 760, HDFS 760W**Grade Mode:** Letter Grading**HDFS 771 - Observation and Assessment of Young Children****Credits:** 4

Comprehensive view of various observation techniques for determining children's strengths and emerging skills. Exploration of issues regarding the use of formal assessments and testing with young children, retention and transitional placements, and the parent's role in testing.

**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.**Equivalent(s):** FS 771**Grade Mode:** Letter Grading**HDFS 776 - Children, Adolescents and the Law****Credits:** 4

This course is designed to familiarize students with the specialized laws and legal systems that govern children and adolescents. Discussion will focus on society's efforts to balance competing interests and goals. The course provides the chance to explore laws and processes that affect children and adolescents as they interact with the court system, their caregivers, families and society at large.

**Attributes:** Writing Intensive Course**Equivalent(s):** FS 776**Grade Mode:** Letter Grading**HDFS 782 - Family Internship****Credits:** 6

Supervised experience working in human services agencies. Students spend a minimum of 16 hours per week in a selected community program. Admission by application only. A senior-level course with 6 credits being taken both fall and spring of the senior year. 20 credit hours of HDFS course work required prior to taking this course; IA (continuous grading).

**Co-requisite:** HDFS 792**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 760 (may be taken concurrently) with a minimum grade of D-.**Repeat Rule:** May be repeated up to 2 times.**Equivalent(s):** FS 782**Grade Mode:** Credit/Fail Grading**HDFS 785 - Seminar for Student Teachers****Credits:** 2

This seminar supplements the student teaching experience and provides a transition to the profession of teaching for those students admitted to the early childhood certification option. Students must apply during the spring semester of their junior year to be considered for the early childhood certification option.

**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.**Grade Mode:** Letter Grading**HDFS 786 - Seminar for Student Teachers****Credits:** 2

This seminar supplements the student teaching experience and provides a transition to the profession of teaching for those students admitted to the early childhood certification option. Students must apply during the spring semester of their junior year to be considered for the early childhood certification option.

**Co-requisite:** HDFS 788**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.**Equivalent(s):** FS 786**Grade Mode:** Letter Grading**HDFS 788 - Student Teaching Young Children****Credits:** 8

Supervised teaching experience. Students spend a minimum of 20 hours per week in a selected program for young children working with a cooperating teacher. Students must apply during the spring semester of their junior year to be considered for the early childhood certification option.

**Co-requisite:** HDFS 786**Prerequisite(s):** HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D- and HDFS 785 with a minimum grade of D-.**Equivalent(s):** FS 788**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**HDFS 792 - Family Internship Seminar****Credits:** 2

This biweekly seminar focuses on issues of concern to family internship students, provides advanced training in educational strategies for working with families, and develops students' professional skills. This is a two-semester course with 2 credits being taken each semester. Admission to family internship program required prior to taking this course. IA (continuous grading).

**Co-requisite:** HDFS 782**Repeat Rule:** May be repeated up to 2 times.**Equivalent(s):** FS 792, FS 792W**Grade Mode:** Letter Grading**HDFS 794 - Families and the Law****Credits:** 4

This course explores statutory law, case law and the judicial processes that affect families as members interact with each other and with society. Students will become familiarized with the family court system and its role in regulating the family.

**Attributes:** Writing Intensive Course**Equivalent(s):** FS 794**Grade Mode:** Letter Grading

**HDFS #795 - Advanced Independent Study****Credits:** 1-6

Students in the major may undertake advanced study in child development, lifespan development or family support in consultation with a HDFS faculty member. The result of the study is to be a significant written product of a quality comparable to a 700 level course. A learner/sponsor contract will be required.

**Grade Mode:** Credit/Fail Grading**HDFS 797 - Advanced Special Topics****Credits:** 1-6

Focused examination of a particular theoretical, methodological, or policy issue.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** FS 797**Grade Mode:** Letter Grading**HDFS 799 - Honors Senior Thesis****Credits:** 2-4

Under direction of a faculty sponsor, students plan and carry out an independent investigative effort in an area of family, child, and/or consumer studies, resulting in a written thesis and an oral presentation before students and faculty. Two-semester sequence as continuing course.

**Attributes:** Honors course**Equivalent(s):** FS 799**Grade Mode:** Letter Grading

## Human Resource Management (HRM) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HRM 420 - Human Resource Management****Credits:** 4

This course focuses on how human resource managers build effective networks and coalitions with others to accomplish tasks and stimulate motivation, cooperation, and satisfaction among work groups. It develops an understanding of the role and functions of human resource practitioners in a variety of organizational settings. Students build a knowledge base and identify the skills needed in the primary areas of human resources administration, which may include areas such as interviewing and selection, employee benefits and total compensation, performance assessment, professional development, workplace safety and wellness, employee relations, collective bargaining, workplace diversity, human resource information systems, rewards and recognition, performance coaching and corrective action, compliance and employment law, and organizational development.

**Equivalent(s):** HRM 518G, MGMT 518G**Grade Mode:** Letter Grading**HRM 470 - Human Resource Application in Today's Organizations****Credits:** 4

Human resource is the application of the current external environment and internal corporate culture to employing, training, compensating, retaining, and developing policies relating to people within their organizations. This course focuses on various ways managers have a direct impact on the success of their organization by applying human resource methodologies. The content covers human resource functions such as recruitment and selection, compensation and benefits, performance management, workplace safety and wellness, employee relations, collective bargaining, workplace diversity, rewards and recognition, compliance and employment law, and change management. Throughout, there will be an emphasis on effective communication with employees and internal business partners with a goal of building impactful networks and coalitions.

**Prerequisite(s):** HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D- or MGMT 518G with a minimum grade of D-.**Equivalent(s):** HRM 605G**Grade Mode:** Letter Grading**HRM 580 - Change Management****Credits:** 4

This course explores the change process in organizations. The organizational structure is viewed as the context in which individual, interpersonal, group, organizational, and systemic change is examined. Characteristics of functional and dysfunctional systems are defined, and the change process is delineated. Models, skills, techniques, and strategies for positive change are examined.

**Prerequisite(s):** COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.**Equivalent(s):** HRM 620G, MGMT 620G**Grade Mode:** Letter Grading**HRM 635 - Managing Conflict****Credits:** 4

This course teaches concepts and skills to manage conflict effectively between two people, within small groups, within organizations, and between organizations and systems. It is designed to help those who want to sharpen their ability to understand, manage, and create opportunity out of conflict. As a result of this course, one knows oneself and others better, enhances personal and interpersonal skills, and develops techniques to improve relations at work and at home. The class may include actual conflict situations through role playing, and practicing new communication skills to prepare managers in real-world situations.

**Equivalent(s):** HRM 621G, MGMT 621G**Grade Mode:** Letter Grading**HRM 660 - Recruitment, Selection, and Employee Development****Credits:** 4

HR professionals need to adapt to changing objectives and market conditions to recruit, select, and retain employees with the necessary skills to further organizational goals all while steering clear of legal and other risks. Attracting and retaining the right talent to the right position from the start is crucial for organizational success.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D-.**Equivalent(s):** HRM 610G**Grade Mode:** Letter Grading

**HRM 680 - Compensation and Performance Management****Credits:** 4

Human capital is a strategic asset for organizations. To recruit and retain employees, human resource leaders create compensation packages and develop performance evaluation plans to strengthen the organization. The course may cover topics such as job evaluation, employee benefits programs, performance evaluations, wage and salary administration, pay level decisions, and financial incentives.

**Prerequisite(s):** HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D-.

**Equivalent(s):** HRM 615G

**Grade Mode:** Letter Grading

**HRM 710 - Law and Ethics in Human Resource Management****Credits:** 4

This course addresses the complexity of employment and labor law and workplace policies. It explores issues such as alcohol and drugs, sexual harassment, privacy rights, wrongful discharge, the Americans with Disabilities Act (ADA), negligent employment practices, and discrimination. Upon completion of this course, students will have the ability to demonstrate how human resource managers can apply this knowledge to protect and add value to their organizations.

**Prerequisite(s):** HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D-.

**Equivalent(s):** HRM 607G, MGMT 607G

**Grade Mode:** Letter Grading

**HRM 740 - Workplace Coaching****Credits:** 4

This course engages students to learn and utilize core coaching concepts and methodologies to increase organizational and individual performance in the professional workplace. Differences between coaching and mentoring, coaching dynamics as a performance management tool, the eight steps to coaching for performance, and an array of coaching methodologies appropriate in diverse scenarios may be explored. Upon completion of this course students are expected to be able to apply coaching methodologies to common workplace scenarios. NOTE: This course is a business coaching course specific to Management and Human Resource Management majors.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.

**Equivalent(s):** HRM 637G, MGMT 637G

**Grade Mode:** Letter Grading

## Human Services (HMSV) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HMSV 424 - Human Services and the Helping Process****Credits:** 4

This course provides an introduction to the helping process in the context of a human service agency. There are two essential components to this course. The first examines the economic, social, and political forces that have shaped the development of human service organizations and their status today. It reviews the issues and obstacles involved in providing quality service to various populations in our society. The second major emphasis offers students the opportunity to review the basic elements of the helping process. Students examine the development of a professional working relationship with clients. They also learn what the process of helping includes. Emphasis includes the influence of personal experiences and values on prospective workers in the helping professions.

**Equivalent(s):** BEHS 502G, HMSV 500G

**Grade Mode:** Letter Grading

**HMSV 480 - Case Management****Credits:** 4

This course examines the theories, roles, and functions of case management. Students study examples of case management to include the professional skills necessary to be a successful case manager. The course explores case management issues with special populations and includes a discussion of the importance of ethics and the essential elements of case-note documentation, along with challenges and legal issues that case managers are faced with in organizations.

**Prerequisite(s):** (HMSV 424 with a minimum grade of D- or HMSV 500G with a minimum grade of D- or BEHS 502G with a minimum grade of D-) and (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-).

**Equivalent(s):** HMSV 501G

**Grade Mode:** Letter Grading

**HMSV 595 - Field-Based Practicum in Human Services****Credits:** 4

This field-based practicum is an entry-level field experience designed to assist Human Services majors in exploring career and vocational settings in which they can use and apply their knowledge and skills. The practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings in which the student may engage in a Human Services capstone internship or ideas for a potential Human Services capstone project. NOTE: This practicum requires students to complete a 25-hour work experience at a college-approved practicum site. Registration for this course is by permission of Academic Affairs. Early registration deadlines may apply.

**Prerequisite(s):** HMSV 480 with a minimum grade of D- or HMSV 501G with a minimum grade of D-.

**Equivalent(s):** HMSV 540G

**Grade Mode:** Letter Grading

**HMSV 597 - Project-Based Practicum in Human Services****Credits:** 4

This project-based practicum is designed to assist Human Services majors in exploring career and vocational settings in which they can use and apply their knowledge and skills. The practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings in which the student may engage in a Human Services capstone internship or ideas for a potential Human Services capstone project. NOTE: Students must follow college policy that all research activities which involve human participants, regardless of the level of risk foreseen, require review and written approval by the College's Institutional Review Board prior to the initiation of the activity.

**Prerequisite(s):** HMSV 480 with a minimum grade of D- or HMSV 501G with a minimum grade of D-.

**Equivalent(s):** HMSV 541G

**Grade Mode:** Letter Grading

**HMSV 795 - Integrative Capstone: Internship in Human Services****Credits:** 4

This capstone course is a field-based internship designed to develop and hone the practical application skills of a Human Services major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the general auspices of their college mentor. The internship requires documented evidence of 80 hours of supervised experience and practice in a field setting where human services knowledge and skills are applied. NOTE: Registration for this course, a field-based experience, is by permission of the Academic Affairs. Early registration deadlines will apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602G with a minimum grade of D- or CRIT 602 with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HMSV 651G

**Grade Mode:** Letter Grading

**HMSV 797 - Integrative Capstone: Project in Human Services****Credits:** 4

This project-based integrative capstone course in Human Services focuses on the concepts and techniques of successful Human Services practitioners. Students integrate the knowledge and skills gained from other courses in the Human Services program and demonstrate the ability to apply knowledge to new subject matter and practical situations. Students develop and implement a project within their chosen concentration (professional interest) that includes an applied research project, a written rationale, and synthesis of theory and practice. NOTE: Students must follow college policy that all research activities that involve human participants, regardless of the level of risk foreseen, require review and written approval by the College's Institutional Review Board prior to the initiation of the activity. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602G with a minimum grade of D- or CRIT 602 with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HMSV 650G

## Humanities (HUMA)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HUMA 401 - Introduction to the Humanities****Credits:** 4

Introduction to the interdisciplinary study of the humanities. Taking as its entry point a significant work, the course is organized by topics related to that work, selected and arranged to invoke lively intellectual debate among faculty and students alike. Group lectures by the four core humanities faculty members. The instructors teaching the course will provide material for smaller weekly discussion sections led by each of those faculty members. Requirements include lively discussions, papers, and examinations. Not repeatable.

**Attributes:** Humanities(Disc)

**Equivalent(s):** HUMA 401W

**Attributes:** Humanities(Disc); Writing Intensive Course

**Equivalent(s):** HUMA 401

**Grade Mode:** Letter Grading

**HUMA 411 - Humanities I****Credits:** 4

Introduction to the humanities and Western culture through literature, history, philosophy, music, art, and architecture. Examination of selected historical periods from classical Greece through the Renaissance through readings, films, slides, and field trips.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**HUMA 412 - Humanities II****Credits:** 4

Introduction to the humanities and Western culture through literature, history, philosophy, music, art, and architecture. Examination of selected historical periods from the Enlightenment to the present through the use of readings, films, slides, and field trips.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HUMA 413 - Dramatic Art and Social Reality: The Many Meanings of Performance****Credits:** 4

This course illuminates connections between the performed stories of drama and real aspects of our lives. It considers performances on stages, screen, and in everyday life—like social rituals, “scripted” because performers are expected to follow certain social roles. It examines those rituals, investigating how they were authored and whether participants have been appropriately cast. No credit if student has taken HUMA 412: Humanities II: Dramatic Art & Social Reality: The Many Meanings of Performance.

**Attributes:** FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HUMA 440A - Honors/Hooked: Narratives of Addiction, Recovery, and Redemption****Credits:** 4

This course explores literature about addiction through both literary and psychological lenses. It focuses on the redemption narrative that structures the understanding of addiction for writers and readers alike. Readings include stories of religious redemption, short fiction, memoirs, self-help texts, and narrative and psychological theory. This course is part of the Honors Symposium “Engaging Addiction”. The courses in the Symposium join several times during the semester for common meetings where perspectives can be compared and explored.

**Attributes:** Honors course; Humanities(Disc)

**Grade Mode:** Letter Grading

**HUMA 440B - Honors/That Belongs in a Museum! Museums and the Ownership of Antiquities****Credits:** 4

Suppose you stumbled upon an artifact from an Indigenous Native American people in your backyard. Do you own it? Or do the heirs of those who produced it? Or does it belong in a museum for all to see? In a series of controversial case studies we will examine what it means to “own” the past, how it should be protected and preserved, and what role museums have had—and should have—in safeguarding that past.

**Attributes:** Honors course; Humanities(Disc)

**Grade Mode:** Letter Grading

**HUMA 444D - Plague/Literary Histories of Epidemics****Credits:** 4

Explores the meanings of epidemics as represented in literature. Topics include mysterious ancient disasters, the Black Death, AIDS, and hypothetical diseases used as thought experiments, as well as current controversies about the spread and prevention of disease. How do disease and its control shape state and social structures? How have the meanings of disease, health, medicine, and the body changed over time? What kind of art does disease give rise to?

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HUMA 444E - What is a Criminal?****Credits:** 4

Criminals are people who break the law – In theory. How do people become criminals (with regard to biological, cultural, and economic influences)? What happens to them in the criminal justice system, and how does the system shape the definition of “criminal”? We will also discuss “criminals of conscience” from Thoreau and Gandhi to Edward Snowden. The course will emphasize reading but will also engage with other media, including films, podcasts, and visual art.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HUMA 444F - Travelers in the Premodern World****Credits:** 4

Travel is a fundamental aspect of the human experience. This course explores the human experience of travel using materials originating from across premodern world. Students investigate materials ranging from maps and pilgrimage accounts, to poetry and stories to understand what has compelled people to undertake the often perilous road. In the process, they consider the role of travel in cultural contact, communication, exchange, and the generation and spread of knowledge.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**HUMA 500 - Critical Methods in the Humanities****Credits:** 4

Critical analysis of works in the humanities. Focuses on major texts, evaluation of secondary literature, research writing, criticism. Required of all HUMA majors.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course

**Equivalent(s):** ECS 550

**Grade Mode:** Letter Grading

**HUMA 505 - Introduction to Religion****Credits:** 4

This course provides an introduction to religion, exploring the various ways that this phenomenon has been understood, approached, practiced, and studied across human history. The course will examine the different ways that religion can be defined, drawing from a variety of humanities and other disciplines. Foundational theories explaining the origins, persistence, and continued relevance of religion will be compared and applied to different traditions. Topics include concepts of divinity, rituals, myth, mysticism and spirituality, pilgrimage, death and the afterlife, and ultimate reality.

**Attributes:** Humanities(Disc)

**Equivalent(s):** RS 505

**Grade Mode:** Letter Grading

**HUMA 510A - Ancient Humanities: Cultures and Empires****Credits:** 4

Humans are social animals and, from an early period, they organized into cities and empires. How did peoples like the ancient Mesopotamians, Egyptians, Indians, Greeks, Chinese, or Romans view themselves? How did they conceive of the world? Why was power distributed to some and not others? This co-taught course examines art, philosophy, history, and cultures from the ancient world to offer an introduction to the human experience from approximately 3000 BCE to 700 CE.

### **HUMA 519 - Classical Greece**

**Credits: 4**

Examination of the culture of classical Greece through the history, drama, philosophy, and art of the period. Open to all students. Recommended for students in the humanities major.

**Attributes:** Humanities(Disc)

**Grade Mode:** Letter Grading

**HUMA 525 - Humanities and the Law****Credits:** 4

This multidisciplinary course examines the nature of justice, legal systems and law in various historical contexts, including how these have been conceived, how they originated and the role of the professional judiciary, as well as the relationship between law and ethics. Consideration of how legal ideas have changed over time and built upon each other. May be repeated once if specific topic is different.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HUMA 526 - Humanities and Science****Credits:** 4

In this interdisciplinary course, students examine the ways in which scientific and technological understanding affects the development of cultural expression. Scientific, technological and environmental factors are sometimes discussed as if they are separate from human beings, but in this course we will consider the myriad direct, complex, and surprising ways that they drive cultural shifts and are then understood in evolving ways by cultures. Topics vary with instructor. May be repeated once if topics is different.

**Attributes:** Humanities(Disc); Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** HUMA 651**Grade Mode:** Letter Grading**HUMA 527 - Humanities and Religion****Credits:** 4

This course examines the role of religion, religious ideas and religious practice in world cultures using a combination of methodologies drawn from different humanities disciplines, with a particular emphasis on comparative approaches and investigating how religion is used to create and express cultural identity around the globe.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**HUMA 550 - Budapest Spring Semester: Special Studies in Comparative Ideas****Credits:** 4

This course involves periodic offerings in literature, art, history, philosophy and political science designed to stimulate reflection on ideas and issues in Hungarian and Central European history and culture in a larger global context. Topics vary depending upon the expertise of the resident faculty.

**Co-requisite:** INCO 588**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**Special Fee:** Yes**HUMA 551 - Budapest Spring Semester: Field Studies in Art and Culture****Credits:** 6

This course is designed to provide students with first-hand experience of art, history, culture, folklore, and traditions of Hungary and Central Europe. The course combines preparatory readings with guided field trips to museums, historical sites, and culturally significant events and locations. Students maintain a weekly blog reflecting on field trip experiences.

**Co-requisite:** INCO 588**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**HUMA 563 - Introduction to Russian Culture and Civilization****Credits:** 4

Interdisciplinary course on the development of Russian culture from its origins through the end of the 19th century. Historical documents, literary works, ethnographic materials, films, slides of Russian art, and music.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** HIST 563**Grade Mode:** Letter Grading**HUMA #592 - Special Topics in the Humanities****Credits:** 2-8

Special topics; offered occasionally.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Equivalent(s):** HUMA 592W**Grade Mode:** Letter Grading**HUMA 698 - Independent Study****Credits:** 4

Independent study open only to highly qualified juniors and seniors who have completed at least four humanities courses above the 400 level. Requires original research and substantial writing projects under the direction of a member of the core faculty of the humanities.

**Grade Mode:** Letter Grading**HUMA 700 - Seminar****Credits:** 4

Provides an opportunity for in-depth reading, viewing, and/or listening to texts and artifacts. Emphasis on the multiple perspectives and methodologies that can be brought to bear upon these works from several humanistic disciplines.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**HUMA 730 - Special Studies****Credits:** 4

Selected topics not covered by existing courses, with subjects to vary.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** HIST 679, HUMA 690, HUMA 695, JUST 695**Grade Mode:** Letter Grading**HUMA 795 - Study of Creativity****Credits:** 4

A study of human creativity through representative lives and works of such figures as daVinci, Einstein, Kathe Kollwitz, Bach, Dickens, and Freud. Lectures, class discussions, films, and slides supplemented by gallery tours plays, and concerts. Open to students with a background in humanities or by permission of the instructor. (Normally offered every other year.)

**Attributes:** Writing Intensive Course**Equivalent(s):** HUMA 690, HUMA 695**Grade Mode:** Letter Grading**Special Fee:** Yes**HUMA 796 - Study of Contemporary Issues****Credits:** 4

Current social and political issues with focus on recent developments in public policy, science, and business, and their impact of social values.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**HUMA 798 - Research Seminar****Credits:** 1-2

Provides a context within which students may discuss and receive direction in the course of completing a major research paper. At the end of the seminar, students present their research to the faculty and their fellow students.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HUMA 500 with a minimum grade of D-.**Grade Mode:** Letter Grading**HUMA 799 - Research Seminar****Credits:** 3-4

Provides a context within which students may discuss and receive direction in the course of completing a major research paper. At the end of the seminar, students present their research to the faculty and their fellow students.

**Attributes:** Writing Intensive Course**Prerequisite(s):** HUMA 500 with a minimum grade of D- and HUMA 798 with a minimum grade of D-.**Grade Mode:** Letter Grading

## Humanities (HUMN) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**HUMN 470 - World Religions****Credits:** 4

This course offers a comparative study of world religions. The focus of the course is to acquire a broad overview of world religions through an examination of sacred texts, art and iconography, as well as religious experience and practice. Theological, philosophical and cultural influences are considered as religious language is examined. Religions considered are: Islam, Judaism, Hinduism, Christianity, Buddhism, religions of Africa, as well as primal religions.

**Attributes:** Human Thought Exp (Gen Ed)**Equivalent(s):** HUMN 504G**Grade Mode:** Letter Grading**HUMN 480 - Introduction to Ethics****Credits:** 4

This course introduces students to a variety of prominent ethical theories. It examines their complex interrelations, historical development, and relevance to ordinary life. Students are encouraged to engage in the critical analysis and comparison of these theories and to consider how they might explain and evaluate contemporary controversies such as war, environmental protection, euthanasia, and abortion. Relationships between ethics and other areas of philosophical investigation are considered.

**Attributes:** Human Thought Exp (Gen Ed); Humanities(Disc)**Equivalent(s):** HUMN 505G**Grade Mode:** Letter Grading**HUMN 502 - American Popular Culture****Credits:** 4

This course examines the origin, nature, and social impact of popular culture in America. Students explore and define what culture is, beginning with the differences between high culture, or the culture of the elite and intelligentsia, and low culture, or the culture of the masses - particularly as these differences in taste, recreation, art, and leisure activities relate to social and economic class, educational level, political power, health, and human development. Subsequently, the focus is primarily on aspects of popular culture. Students acquire and hone the skills of cultural analysis by dissecting both the ephemeral and archetypal facets of an eclectic and wide-ranging sampling of public media, art, music, fads, trends, and entertainment.

**Attributes:** Human Thought Exp (Gen Ed); Humanities(Disc)**Equivalent(s):** HUMN 502G**Grade Mode:** Letter Grading**HUMN 544 - Special Topics: Lower Level****Credits:** 1-4

A study of current and variable topics in Humanities. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** HUMN 544G**Grade Mode:** Letter Grading**HUMN 560 - Introductory Spanish****Credits:** 4

This course presents introductory grammar and vocabulary in order to lay the groundwork for comprehension, communication, and interest in Spanish and Spanish-speaking cultures. Students develop a basic proficiency in the language through practice in reading, writing, listening comprehension, and oral expression.

**Attributes:** Human Thought Exp (Gen Ed)**Equivalent(s):** HUMN 560G**Grade Mode:** Letter Grading**HUMN 625 - Introduction to Cultural Theory****Credits:** 4

This writing and reading intensive course is a general introduction to the critical perspectives and theories that enliven contemporary cultural studies with attention to various schools of 20th and 21st-century criticism, critical applications, and critical terminology. Theories covered include: Marxism, Psychoanalytic criticism, Structuralism, Post-structuralism, Feminist literary studies, Gender studies, Queer studies, Critical Race studies, Post-colonialism, New Historicism, Cultural studies, and Postmodernism. More broadly, this course explores current studies of literature and culture, examining the practices and values of literary and cultural scholars, students, and teachers in order to gain an understanding of the tradition and norms that have emerged from those practices and values, and finally, to consider which of those trends are most valuable for future critical endeavors in the field of cultural studies.

**Attributes:** Human Thought Exp (Gen Ed)**Prerequisite(s):** (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-).**Equivalent(s):** HUMN 625G**Grade Mode:** Letter Grading

**HUMN 644 - Special Topics: Upper Level****Credits:** 1-4

A study of current and variable topics in Humanities. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** HUMN 644G

**Grade Mode:** Letter Grading

**HUMN 797 - Integrative Capstone: Project in Humanities****Credits:** 4

This capstone course for Humanities and English majors is designed to integrate learning from the entire program in an individually-customized project. Students demonstrate competency in the study of the humanities by producing a substantive original essay based on in-depth research. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** HUMN 650G

**Grade Mode:** Letter Grading

## Information Technology (IT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**IT 403 - Introduction to Internet Technologies****Credits:** 4

Introductory course exploring the fundamentals of Internet communications with an emphasis on the World Wide Web. Students develop an understanding of the Internet's underlying technologies and learn how to utilize them as contributing members of the Web community. Students become proficient with creating and publishing Web pages using HTML and CSS. No prior knowledge or experience is assumed. No credit if credit earned for CIS 405. (Note CIS 405 is offered at UNH Manchester, and is not related to CS 405 at UNH Durham.)

**Grade Mode:** Letter Grading

**IT 502 - Intermediate Web Design****Credits:** 4

An intermediate level exploration of the theory and practice of Web design. Students learn the fundamentals of design theory applicable to the World Wide Web and examine tools and techniques for applying that knowledge to their projects. Additional topics include information architecture, usability, accessibility, optimization, typography, and market visibility. Working knowledge of XHTML and CSS required.

**Prerequisite(s):** IT 403 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT 505 - Integrative Programming****Credits:** 4

Expands prior programming knowledge through the introduction of another programming language, with a particular emphasis on integrative programming techniques common within IT. Topics include data access and exchange; database concepts; effective interfaces; and leveraging third-party APIs, libraries, and frameworks. Computer Science majors not allowed.

**Prerequisite(s):** CS 416 with a minimum grade of D- or CS 417 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT 520 - Computer Architecture****Credits:** 4

Fundamentals of computer organization, including binary systems, data representation (and compression), machine language, program execution, memory and process issues. Operating systems and networking basics. Not open to CS majors.

**Prerequisite(s):** CS 410 with a minimum grade of D- or CS 414 with a minimum grade of D- or CS 415 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT 604 - Server-side Web Development****Credits:** 4

An intermediate-level examination of the theory and practice of developing server-side applications for the World Wide Web. Students will learn practical techniques for designing and implementing data-driven Web sites through the use of server-side processing. Working knowledge of HTML, CSS, and some programming language is required.

**Prerequisite(s):** IT 403 with a minimum grade of D- and (CS 410 with a minimum grade of D- or CS 414 with a minimum grade of D- or CS 415 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**IT 605 - Client-side Web Development****Credits:** 4

An intermediate-level examination of the theory and practice of developing client-side applications for the World Wide Web. Students will learn practical techniques for designing and implementing dynamic Web sites through the use of client-side processing. Working knowledge of HTML, CSS, and some programming language is required.

**Prerequisite(s):** IT 403 with a minimum grade of D- and (CS 410 with a minimum grade of D- or CS 414 with a minimum grade of D- or CS 415 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**IT 609 - Network/Systems Administration****Credits:** 4

Introduces the central issues in administration of a networked computer system. Topics include the client-server model (including support of mail, FTP, Telnet, the Web), disk and file systems, backup and recovery, and security. Privacy and other legal/social issues will be discussed.

**Prerequisite(s):** IT 520 with a minimum grade of D- and (CS 410 with a minimum grade of D- or CS 414 with a minimum grade of D- or CS 415 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**IT 612 - Scripting Languages****Credits:** 4

This course is a study of the class of programming languages and tools known as scripting languages. Topics include: a general discussion of language design and its relationship to the intended computing environment, introduction to the command-line environment, the role of scripts in controlling and connecting other programs and components, basic functionality of at least two scripting languages, and the syntax use of regular expressions. Programming projects in multiple languages will be required.

**Prerequisite(s):** IT 505 with a minimum grade of D- or CS 515 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT 630 - Data Science and Big Data Analytics****Credits:** 4

An introduction to various disciplines that contribute to what is commonly known as Data Science. Students will learn how to gather, analyze, classify data utilizing various techniques. Study of tools and programming techniques to analyze data. Characteristics of big data and the emerging software stack for working with massive datasets, including Hadoop and MapReduce.

**Prerequisite(s):** CS 416 with a minimum grade of C- or CS 417 with a minimum grade of C-.

**Mutual Exclusion:** No credit for students who have taken MATH 738.

**Grade Mode:** Letter Grading

**IT 666 - Cybersecurity Practices****Credits:** 4

Through readings, exercises, research papers, and exams students will acquire the skills needed to implement solutions for security-related issues. Students will discuss security policies, legislation, system procedures, tools, and techniques. Students will analyze the patterns that attackers use to gain access to systems and understand what is required to defeat those attack patterns. At the conclusion of the course, students will have a heightened sense of security in the actions they take when using and maintaining computer systems.

**Prerequisite(s):** CS 527 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT #696 - Independent Study****Credits:** 1-6

Individual projects developed and conducted under the supervision of a faculty member.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**IT 699 - Internship****Credits:** 1

Provides the opportunity to apply academic experience in settings associated with future professional employment. Proposals for the internship must be approved by the instructor prior to registration. Students may receive compensation for their internship work.

**Repeat Rule:** May be repeated for a maximum of 4 credits. May be repeated up to 3 times.

**Grade Mode:** Credit/Fail Grading

**IT #704 - Advanced Web Development****Credits:** 4

An advanced exploration of various topics in Web development. Topics covered each semester will be chosen to reflect the current state of stable and accepted Web technologies, with a decided emphasis on open-source solutions. Both client-side and server-side technologies are likely to be included, with particular attention given to concepts and techniques used to facilitate efficient Web development.

**Prerequisite(s):** IT 604 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT 705 - Project Management for Information Technology****Credits:** 4

This course focuses on a core set of project management essentials that can affect the bottom line of project technical and business performance. These are termed "best practices," and those addressed are: formal risk management, agreement on interfaces, metrics based scheduling/tracking, frequent binary completion milestones, incremental development, people aware management style, and change management. The emphasis is on information technology projects; however, the basic principles are pertinent to a wider class of project domains.

**Attributes:** Writing Intensive Course

**Grade Mode:** Letter Grading

**IT 718 - Cloud Computing Principles****Credits:** 4

Students will learn fundamental cloud architectural principles of: operational excellence, security, reliability, performance efficiency, and cost optimization through readings, labs, and a hands-on project. Course material will cover cloud offerings from Amazon's AWS, Microsoft's Azure, and Google's Cloud Platform. Students complete a semester-long project in which they are required to implement a complete Cloud solution.

**Prerequisite(s):** CS 527 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IT 725 - Network Technology****Credits:** 4

Introduction to fundamental concepts of computer networks and exploration of widely-used networking technologies. Topics include principles of congestion and error control; network routing; local, wireless and access networks; application protocol design; and network programming. In-depth discussion of the Internet suite of protocols.

**Prerequisite(s):** IT 520 with a minimum grade of D-.

**Equivalent(s):** CS 725

**Grade Mode:** Letter Grading

**IT 775 - Database Technology****Credits:** 4

Topics include database architecture, schema design and definition, entity-relationship diagrams, data retrieval and update, and indexing performance. Architectures for single-user, multi-user, client-server, and web access are introduced. The relational data model is emphasized but alternative database models, such as semi-structured and object models, are introduced. Database administration topics include examination of metadata information, data integrity, and management of users and privileges, performance tuning, transactions, isolation levels, and security. Ethics of data protection are introduced. Students develop skill in SQL. Not open to CS majors.

**Prerequisite(s):** IT 505 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken CS 775.

**Grade Mode:** Letter Grading

**IT 780 - Topics in Information Technology****Credits:** 4

Material not normally covered in course offerings.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**IT 791 - Senior Project I****Credits:** 2

First semester of the capstone design experience. Industry best practices and tools are surveyed and applied in team projects. Students begin development on software projects proposed by faculty or external sponsors, including initial stages of design, implementation, and documentation, with an interim presentation of progress expected toward the end of the semester. Principles of security, testability, and maintainability are stressed.

**Prerequisite(s):** IT 705 (may be taken concurrently) with a minimum grade of D-.**Grade Mode:** Letter Grading**IT 792 - Senior Project II****Credits:** 2

Continuation of IT 791: Senior Project I. Students complete the project, a final presentation of results is expected toward the end of the semester. Successful completion of this course fulfills the Capstone Experience requirement for Information Technology majors.

**Attributes:** Writing Intensive Course**Prerequisite(s):** IT 791 with a minimum grade of D-.**Equivalent(s):** IT 710**Grade Mode:** Letter Grading

## Instructional Studies (INST) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**INST 544 - Special Topics: Lower Level****Credits:** 1-4

A study of current and variable topics in instructional studies. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** INST 544G**Grade Mode:** Letter Grading**INST 615 - Engaging Adult Learners in the Digital Age****Credits:** 4

Educators and trainers often feel compelled to use the latest technologies in their teaching practice to keep pace with culture and attract learners. Yet technology for technology's sake doesn't automatically help learners meet learning outcomes and can have an unintended negative impact on learning experiences if not selected properly. This course will provide guided practice-based learning activities to develop the skills needed to review, analyze, and select appropriate educational technologies for engaging education experiences for adult learners in a variety of settings.

**Equivalent(s):** INST 615G**Grade Mode:** Letter Grading**INST 701 - Teaching and Learning in Adulthood****Credits:** 4

This course examines the nature and process of teaching and learning in adulthood by reviewing and building on theories and philosophies of adult learning. It focuses on teaching adults in formal, informal, and non-formal settings. Understanding cognition and the learning process provides the foundation to employing instructional strategies that empower the adult learner. Students will explore active learning, collaborative learning, self-directed learning in relationship to learning strategies, motivation and the importance of practice, experience, self-reflection, and assessment.

**Attributes:** Writing Intensive Course**Equivalent(s):** INST 605G**Grade Mode:** Letter Grading**INST 702 - The Learning Workplace****Credits:** 4

This course deals with the professional learning needs and priorities of the workplace with an emphasis on business and industry settings. It examines the variety of ways in which employees and their managers gain new knowledge and skills as part of their on-going involvement in both their jobs and in formal, informal, and non-formal learning situations. Careful attention is given to understanding and applying effective transfer of learning strategies. The roles of in-house training, corporate university, individualized learning, distance learning, online learning, and external providers are also examined.

**Attributes:** Writing Intensive Course**Equivalent(s):** INST 607G**Grade Mode:** Letter Grading**INST 703 - Instructional Design and Interactive Learning****Credits:** 4

This course provides an introduction to theory and practice of instructional design and its role in developing interactive learning. It covers all the necessary elements to analyze, design, develop, implement, and evaluate effective learning, including interactive learning systems, and cultivates the effective combination of technology and instruction. The course addresses the different models used to develop effective instruction and expands the student's understanding of how to facilitate meaningful connections in learning through collaboration, discovery, and engagement.

**Equivalent(s):** INST 610G**Grade Mode:** Letter Grading

**INST 797 - Program Development and Learning****Credits:** 4

This course encompasses a broad spectrum of program development ranging from an individual course to a complete program of major learning activities conducted over a period of time for the education and training of adults. This project-based course serves as the Integrative Capstone and is designed to provide an opportunity to apply and practice theories, skills, and principles to a variety of situations adult educators may encounter in practice. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** INST 650G**Grade Mode:** Letter Grading

## Integrated Agriculture Management (IAG)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

No courses are currently active in the course inventory for this subject prefix.

## Integrated Applied Mathematics (IAM)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**IAM 550 - Introduction to Engineering Computing****Credits:** 4

An application driven introduction to computer-aided problem solving leveraging foundational knowledge in engineering and the physical sciences. Engineering applications are used to motivate the computational methods needed in scientific and engineering disciplines. Numerical methods, including the basic LU algorithm, one-dimensional root finding methods, and numerical differentiation and integration, are introduced as useful computational tools for tackling a broad range of engineering and scientific and engineering disciplines. Numerical methods, including the basic LU algorithm, one-dimensional root finding methods, the numerical differentiation and integration, are introduced as useful computational tools for tackling a broad range of engineering and scientific applications and to provide concrete and contextual programming experiences. MATLAB is used, with topics including scripts, functions, logical expressions, conditional statements, looping, data visualization, plotting, and recursion presented within the framework provided by both the numerical methods and the scientific or engineering problems. Laboratory included.

**Prerequisite(s):** MATH 426 (may be taken concurrently) with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken MATH 445.**Grade Mode:** Letter Grading**IAM 751 - Introduction to High-Performance Computing****Credits:** 4

Course gives an introduction to select areas of high-performance computing, providing a basis for writing and working with high-performance simulation codes. The three main topics are: 1) basic software engineering, 2) high-performance and parallel programming, and 3) performance analysis and modeling. Additional topics may include heterogeneous architectures like GPUs and data analysis/visualization. Working knowledge of a compiled programming language (C, C+ or Fortran) is required prior to taking this course.

**Grade Mode:** Letter Grading

## Intercollege (INCO)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**INCO 400 - Graduate Preparation Seminar****Credits:** 1

A survey seminar that explores issues related to graduate school preparation. Topics include graduate school culture, academic research, the role of multicultural scholars, faculty relations, the graduate record exam, resume/vita development, and financing graduate education. Enrollment in McNair Scholars Program required.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Grade Mode:** Credit/Fail Grading

**INCO 401 - University Exploratory Experience Advising Seminar and Workshop****Credits:** 2

This course is the Advising Program foundation for undeclared students who wish to explore the many major options offered in UNH's five Colleges. This course focuses on exploring career possibilities, identifying students' aptitudes and interests, and choosing a major that will help students achieve their goals and lead to academic success at UNH. This course is required of first-year students who do not yet know what college or major they wish to pursue. In addition to helping students find an academic home, the course will introduce First Year students to Campus Support Offices, Career and Internship resources, Study Abroad opportunities, academic expectations, and academic management skills essential for success in the University.

**Grade Mode:** Credit/Fail Grading**INCO 403 - Healthcare Professions Seminar****Credits:** 2

This seminar is designed for students (primarily for sophomores; juniors and seniors may also take the course) who are in the initial phase of preparation to a career in allopathic or osteopathic medicine, dentistry, podiatry, optometry, physicians assistant, chiropractics, physical therapy, pharmacy, or naturopathic medicine. Through readings and discussion students will become informed about current topics in healthcare, and specifically about these professions, requirements for admission to degree programs, and about how to become a competitive applicant.

**Grade Mode:** Credit/Fail Grading**INCO 412 - TRIO Scholar Success Seminar****Credits:** 0

An orientation and exploration of UNH culture, resources, personal values and goals to aid TRIO Scholars in their transition to the University of New Hampshire and to develop their personal four-year plan for educational, co-curricular, and high impact experiences. While building a sense of community through shared readings and interactive activities, the seminar also addresses financial aid, FAFSA, financial literacy and scholarship search, major and career exploration, and effective deep learning strategies. Open only to TRIO Scholars.

**Grade Mode:** Credit/Fail Grading**INCO #440A - Asking for It: The History and Law of Sexual Violence in the United States****Credits:** 4

Sexual violence has been perpetrated since ancient times. The #MeToo movement is just one example of the multi-layered and complex prevalence of sexual assault in today's culture. This course addresses sexual assault, its history, and the laws that criminalize it. Through readings, small group discussion, practical applications including a mock trial, and speakers, students will gain insight into how the law shapes rape culture and how, in turn, rape culture affects law.

**Attributes:** Honors course; Social Science (Discovery)**Grade Mode:** Letter Grading**INCO 490A - Fundamentals of Research Integrity****Credits:** 2

Undergraduate students interested in conducting research or those already conducting research will explore individual, professional, institutional and social issues related to the ethical conduct of research and scholarship. Students will use case studies as well as share their research interests and experience to investigate topics of data management, authorship, mentorship, human subjects, use of vertebrate animals, and scientific integrity. Completion of this course and accompanying modules fulfill part of the NSF RCR training mandate and/or the USDA NIFA RCR training mandate.

**Grade Mode:** Credit/Fail Grading**INCO 501 - Peer Coach Introduction to Pedagogy****Credits:** 1-2

This course provides an initial experience as an instructional peer coach. Students apply theories of cognition, group dynamics, learning, metacognition, and motivation to support other students as they learn science, engineering, and mathematics. Students reflect on their work as peer coaches through the lens of the required readings.

**Grade Mode:** Letter Grading**INCO 505A - Semester in the City Becoming a Problem Solver****Credits:** 4

This course will expose students to the concepts and practices associated with social innovation and social entrepreneurship – i.e., the development and growth of new, sustainable, and scalable approaches to the major social, economic, and environmental challenges facing society. Students will learn a variety of tools and methods used for the development, implementation, management, and assessment of social solutions that they will be able to use over the course of their careers. Taken concurrently with: INCO 505B and INCO 505I, for a total of 16 UNH credits.

**Co-requisite:** INCO 505B, INCO 505I**Grade Mode:** Letter Grading**Special Fee:** Yes**INCO 505B - Social Innovator's Toolbox****Credits:** 4

This course will expose students to the concepts and practices associated with social innovation and social entrepreneurship – i.e., the development and growth of new, sustainable, and scalable approaches to the major social, economic, and environmental challenges facing society. Students will learn a variety of tools and methods used for the development, implementation, management, and assessment of social solutions that they will be able to use over the course of their careers. Taken with INCO 505A & INCO 505I.

**Co-requisite:** INCO 505A, INCO 505I**Attributes:** Social Science (Discovery)**Grade Mode:** Letter Grading**INCO 505I - Semester in the City: Boston and SITC @ UNH Internship****Credits:** 8

Fellows spend 30 hrs/week (Mon-Thurs) for 14 weeks interning at a Boston nonprofit, government agency or social mission for-profit (Semester in the City) OR with a UNH Department (SITC @ UNH). Fellows are placed based on applications/interviews, with prioritization of issue and/or skill/knowledge alignment. The internship experience is intimately intertwined with coursework and reflection. Thus, the course is taken concurrently with INCO 505A and INCO 505B, a total of 16 UNH credits.

**Co-requisite:** INCO 505A, INCO 505B**Grade Mode:** Letter Grading

**INCO 529 - Writing Consultation****Credits:** 2

Includes instruction in philosophy and techniques of tutoring, theoretical and practical issues in collaborative learning and complex-skill formation, and cross disciplinary conventions of writing. In addition to the classroom portion of course, each student undertakes a supervised practicum experience in the University Writing Center.

**Grade Mode:** Credit/Fail Grading**INCO 585 - Foreign Exchange****Credits:** 0-16

Undergraduates who meet UNH Study Away Eligibility Requirements and the requirements set by the host institution, may participate in an international exchange program at one of UNH's partner institutions for a semester or academic year. Students must achieve the equivalent of a 'C' or above to receive international transfer credit. For more information contact the Coordinator of Student Programs at the Center for International Education.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**INCO 586 - Foreign Exchange****Credits:** 0-16

Undergraduates who meet UNH Study Away Eligibility Requirements and the requirements set by the host institution, may participate in an international exchange program at one of UNH's partner institutions for a semester or academic year. Students must achieve the equivalent of a 'C' or above to receive international transfer credit. For more information contact the Coordinator of Student Programs at the Center for International Education.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**INCO 588 - Study Abroad Experience - Semester****Credits:** 0

A Study Abroad Program co-requisite to enroll students in travel insurance and capture the mandatory study abroad fee.

**Grade Mode:** Not graded**Special Fee:** Yes**INCO 589 - Study Abroad Experience Short****Credits:** 0

For students enrolling in short term study abroad experiences in Fall and Spring semesters. Also for students enrolling in January term and Summer Session study abroad experiences.

**Grade Mode:** Not graded**Special Fee:** Yes**INCO 590 - Student Research Experience****Credits:** 1-4

Provides hands-on research experience to develop critical thinking, problem solving, and analytical skills. An entry-level research experience that introduces students to research theories, tools, and ethical issues. Each student completes a contract with a faculty mentor identifying the research activities the student will undertake.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**INCO 610 - Research Inquiry Seminar****Credits:** 2-6

With the notion of understanding self as the basis for investigating the world, this seminar focuses on exploring elementary concepts of academic research. Students are engaged in identifying strengths, discovering their passions, discerning the joys and frustrations of research, and developing a sketch of a research project. Enrollment in McNair Scholars Program required.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**INCO 620 - Talk to Action: Facilitating Deliberative Democracy****Credits:** 2-4

A theory-to-practice seminar that explores democratic theory from a deliberative perspective, dialogue and small group facilitation, civic engagement and social justice. Topics include moral disagreement, skills in public engagement and facilitation, creating social change, and moving from talk to action in the public sphere.

**Repeat Rule:** May be repeated for a maximum of 6 credits.**Grade Mode:** Credit/Fail Grading**INCO #682 - Washington Internship****Credits:** 0-12

Internship placements in Washington, D.C., through the Washington Center. Individual internships arranged with legislative and judicial offices, law firms, public interest organizations; in the arts, the media, labor, international affairs, business, consumer affairs. Supervision by agency personnel and faculty sponsor. Students should have above-average academic records before applying. Open to all majors. Applications available in the National Student Exchange Office, Hood House. Student must also register for a graded, 4-credit independent study in the student's major.

**Equivalent(s):** SCSC 682**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**INCO 682A - The Washington Center Career Readiness Seminar****Credits:** 4

This seminar course (co-requisite to internship) provides internship participants with professional development and career coaching necessary to guide students through transition from academic to professional. Assignments will be collected into final portfolio which will demonstrate integrative learning.

**Co-requisite:** INCO 682I**Grade Mode:** Letter Grading**INCO 682I - Washington DC Internship****Credits:** 4 or 8

Internship Placement in Washington DC through The Washington Center program. 32 hours per week, sites vary based on student major and interest.

**Co-requisite:** INCO 682A**Grade Mode:** Letter Grading

**INCO 685 - Study Abroad****Credits:** 0-16

Enables students to pursue a semester, summer, or an academic year of foreign study in programs other than those offered by UNH. Students must provide the University Committee on Study Abroad with detailed information about the curriculum and must receive approval from that committee before registration. Credit awarded only upon successful completion of the course of study and after receipt by the committee of an official transcript. Interested students should consult the Center for International Education. (Financial aid requires a minimum of 6 credits.)

**Attributes:** World Cultures(Discovery)**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**INCO 686 - Study Abroad****Credits:** 0-16

Enables students to pursue a semester, summer, or an academic year of foreign study in programs other than those offered by UNH. Students must provide the University Committee on Study Abroad with detailed information about the curriculum and must receive approval from that committee before registration. Credit awarded only upon successful completion of the course of study and after receipt by the committee of an official transcript. Interested students should consult the Center for International Education. (Financial aid requires a minimum of 6 credits.)

**Attributes:** World Cultures(Discovery)**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**INCO 687 - Study Abroad Experience****Credits:** 0-16

Enables students to pursue a term of foreign study in programs other than those offered by UNH. Students must meet all university requirements and complete required forms. Credit awarded only upon successful completion of the course of study abroad and after receipt and processing of an official transcript. Interested students should consult the Center for International Education. (Financial aid requires a minimum of 6 credits.)

**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**INCO 688 - Study Abroad Insurance Program****Credits:** 0

Study Abroad Insurance Program.

**Grade Mode:** Not graded**Special Fee:** Yes**INCO 699 - McNair Summer Internship****Credits:** 0

McNair Fellows; not graded; Summer only.

**Grade Mode:** Non-credit/non-CEU course**INCO 710 - Introduction to McNair Research****Credits:** 2-4

An Introduction to methods and techniques of research design within the social sciences, mathematics and natural sciences, and the humanities. Concepts are tailored to students' research thesis. Students design and construct a research project (execution of project may be allowed for additional credit). A comprehensive written proposal is required. Enrollment in McNair Scholars Program required. Special fee on study abroad sections.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**INCO 790 - Advanced Research Experience****Credits:** 1-4

Advanced research, scholarly or creative projects developed and conducted under the supervision of a faculty member. Provides students with the opportunity to apply advanced knowledge and techniques of their major to a specific problem or question. Significant preparatory course work for research, or other research experience approved by the INCO 790 faculty mentor required. INCO 790 may be repeated alone or in combination with INCO 590 for a maximum of 8 credits.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**INCO 791 - National Science Foundation Graduate Research Fellowship Preparation****Credits:** 0

This course is designed to enable students to receive information, guidance, and support in applying for the National Science Foundation (NSF) Graduate Research Fellowship program (GRFP). Students will become familiar with the NSF, its mission, and the selection criteria for this fellowship. Through independent work and collaborative exercises, students will strengthen writing skills and develop a strong application.

**Grade Mode:** Credit/Fail Grading**INCO 795 - Washington Center Course****Credits:** 4

Four-credit independent study in conjunction with The Washington Center program in Washington DC. May be offered as co-requisite with INCO #682 or as short term seminar class.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** SCSC 795**Grade Mode:** Letter Grading**Special Fee:** Yes

## Interdisciplinary Studies (IDIS) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**IDIS 410 - College Success Seminar****Credits:** 2

College Success Seminar provides the foundation for an informed and meaningful college experience. In the seminar, students discover how their individual capacities position them for the attainment of their goals within the academic community of the college. The course broadens understanding of key concepts common to integrative learning within higher education settings, particularly focusing on the ways multiple academic disciplines can improve success in applied careers. It empowers students to become informed users of information as well as engage in research and planning for subsequent courses. Students in this course will consider the ways various learning opportunities relate to one another and to the individual's personal, academic, and career goals. College Seminar fosters the self-awareness and intellectual perspective that are the hallmarks of well-educated persons and lifelong, engaged learners. For students in the AA General Studies program, this course will also guide students in developing their twenty credit academic concentration within the associate degree.

**Equivalent(s):** IDIS 502G**Grade Mode:** Letter Grading

**IDIS 560 - Research Methods in the Behavioral Sciences****Credits:** 4

In this course, students will investigate research methods relevant to the behavioral sciences. Topics will include the scientific method, research ethics, behavioral measurement, experimental and nonexperimental research design, statistical analysis, and scientific writing. Students will apply knowledge of research design, ethics, scientific writing, and APA formatting to propose a viable empirical study to address a practical problem.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course

**Prerequisite(s):** (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-) and (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or EDU 510G with a minimum grade of D- or EDC 500 with a minimum grade of D-).

**Equivalent(s):** IDIS 501G

**Grade Mode:** Letter Grading

**IDIS 601 - Interdisciplinary Seminar****Credits:** 4

Many problems in today's society are complex with no simple method of solving them. It is therefore imperative for civic-minded people to explore issues from multiple viewpoints and frameworks. The course analyzes specific themes as they relate to local or global communities while encouraging civil discourse among classmates. The seminar's specific topic varies by individual course section. Students approach a contemporary issue or problem and explore its causes and significance. Students are asked to use advanced problem-solving skills and methodologies to reflect on the topic, discuss possible approaches with peers, and investigate solutions using interdisciplinary research and analysis. The final product for this course contains a presentational component.

**Attributes:** Interdisciplinary Sem (Gen Ed); Writing Intensive Course

**Prerequisite(s):** ((COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D-) and (COM 480 with a minimum grade of D- or COMM 543G with a minimum grade of D-) and (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D- or MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D- or MATH at GSC or in transfer with a score of MET) and (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-)) or Has Accredited Bachelor Deg with a score of WAIV or ((CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and Has Accredited Associate Deg with a score of WAIV).

**Equivalent(s):** IDIS 601G

**Grade Mode:** Letter Grading

## International Affairs (IA)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**IA 401 - International Perspectives****Credits:** 4

Provides students with a broad, interdisciplinary overview of international affairs in a dynamic and interconnected world. The course is team-taught in two modules, each of which highlights perspectives from anthropology, geography, political science, or a related discipline. These modules address global issues such as poverty, conflict, human rights, development, environment, migration, and health. Required for the IA dual major and minor. Must complete IA 401 before the international experience, preferably during the 1st or 2nd year.

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Letter Grading

**IA 501 - Global Issues in International Affairs****Credits:** 4

Students analyze the theory and practice of international affairs and acquire practice in designing an independent research project. Topics vary with faculty expertise, and have included war and political violence; global environmental issues, social mobilization and protest, and development, race, and gender. IA 501 further prepares students for their international experience and helps them design individualized research topics for their capstone project in IA 701. This course must be taken before IA 701 and in most cases, before the student undertakes an international experience.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** IA 401 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**IA 695 - Independent Study in IA****Credits:** 2-4

Faculty supervised independent Study in International Affairs.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Credit/Fail Grading

**IA 701 - Exploring International Challenges and Opportunities****Credits:** 4

Around the world, policymakers, businesses, and communities face wide-ranging challenges and opportunities that are place-specific, yet global in scope. In this IA capstone seminar, students will learn how to investigate global issues, analyze their manifestations in different social, cultural, and political contexts, and formulate data-driven recommendations. Drawing upon their international experience, second language skills, and IA course work, students will complete individual capstone research projects and present their findings at the annual Undergraduate Research Conference.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** IA 401 with a minimum grade of D- and IA 501 with a minimum grade of D-.

**Grade Mode:** Letter Grading

## Italian (ITAL)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**ITAL 401 - Elementary Italian I****Credits:** 4

For students without previous training in Italian. Aural comprehension, speaking, writing, reading, (No credit for students who have had two or more years of Italian in secondary school; however, any such students whose studies of Italian have been interrupted for seven years should consult the Program Coordinator about possibly receiving credit).

**Grade Mode:** Letter Grading**ITAL 402 - Elementary Italian II****Credits:** 4

For students who have completed ITAL 401 or an equivalent. Aural comprehension, speaking, writing, reading. (No credit for students who have had two or more years of Italian in secondary school; however, any such students whose studies of Italian have been interrupted for seven years should consult the Program Coordinator about possibly receiving credit).

**Attributes:** Foreign Language Requirement**Grade Mode:** Letter Grading**ITAL 425 - Introduction to Italian Studies****Credits:** 4

This course explores Italian culture and society and examines the role of Italian art, cuisine, literature and history via readings, films, music, and lectures. What makes Italy Italy? What does it mean to be Italian? How do phenomena such as regionalism, the Mafia, and the European Union shape our understanding of contemporary Italy? The course analyzes the interactions among culture, politics, history, and society as a means of defining national identity.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** ITAL 425H**Grade Mode:** Letter Grading**ITAL 444A - Italians Come to America: Representing Emigration and Immigration on Both Sides of the Atlantic****Credits:** 4

Course is designed around the phenomenon of emigration from Italy to the United States over the last century or so, with particular attention to the time period between the end of the nineteenth century and the mid-twentieth century. While core media under examination are literature and film, we also draw on historical, anthropological, political and sociological readings to help us consider the many issues involved.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**ITAL 444B - Mamma Mia! Italian Motherhood from the Virgin Mary to Carmela Soprano****Credits:** 4

This course examines motherhood and the special role of the Italian mother - la mamma italiana - in past and present Italian society. Through readings from a wide variety of disciplines - theology, history, medicine, and literature - as well as an examination of art and film, we will analyze the origins and conflicted nature of Italian attitudes toward motherhood. Topics include: maternal love and self-sacrifice, beliefs about generation and their influence on maternal and paternal roles, Italian family structure. Mussolini's promotion of motherhood, the phenomenon of *mammismo* or "Mama's boys", and Italian-American mothers, including Carmela Soprano.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**ITAL 444C - Feelings: A Cultural History****Credits:** 4

How do we understand emotions? What is their relationship to our daily life, and to the larger world? They seem personal, but they are also universal, shaping not just individuals, but communities, politics, and society at large. This course charts the history of emotions through literature, visual art, and film, with a particular focus on Italy and the United States, and explores how feelings inform our political and cultural understanding of the world around us.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**ITAL 503 - Intermediate Italian I****Credits:** 4

For students who have completed ITAL 402 or an equivalent. A complete review of the fundamentals of grammar and syntax. Selected readings as a general introduction to Italian civilization and culture. Films and activities.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**ITAL 504 - Intermediate Italian II****Credits:** 4

For students who have completed ITAL 503 or an equivalent. A review of the fundamentals of grammar and syntax. Selected readings as a general introduction to Italian civilization and culture. Films and activities.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**ITAL #510J - Rome: The Eternal City in Italian Culture****Credits:** 4

This course offers an interdisciplinary introduction to the Eternal City and its role in Italian culture from the Middle Ages to the present. Together, the online and on-site components of the course allow students to compare their theoretical historical, social and artistic knowledge of Italian culture (acquired through readings, films and online lectures) with experiential knowledge gained through first-hand exposure to contemporary Rome. All readings in English. Fulfills the World Cultures Discovery requirement.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**ITAL 521 - Medieval and Renaissance Italian Culture****Credits:** 4

This course explores the culture and society of Medieval and Early Modern Italy through major works of fiction and non-fiction. The East met the West and the North met the South in the Italian peninsula making it one of the most diverse, wealthy, creative, powerful, and influential regions in Europe. In examining this period, the course asks such questions as: What was the Renaissance? Why were the Muslims and Vikings in Sicily? What is the Bonfire of the Vanities? Why did Shakespeare set so many plays in Italy? No prerequisites and all work is in English.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading

**ITAL 522 - Modern and Contemporary Italian Culture****Credits:** 4

This course explores the culture and society of modern and contemporary Italy through major works of fiction and non-fiction. In examining the emergence of the new nation-state, the course poses such questions as: What does "We have made Italy; now we need to make the Italians" mean? What is Fascism? What is "la dolce vita"? How have climate change and the refugee crisis changed Italy and Italians? The unification of Italy, colonialism, Fascism, Made in Italy, La Dolce Vita, domestic terrorism, North vs South are some of the topics examined. No prerequisites and all work is in English.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**ITAL 525 - Italian Cinema****Credits:** 4

Italian Cinema is a survey of the development of the film industry in Italy and of major Italian films. Through film, the course explores the culture, society, history, and politics of Italy, as well as the aesthetics, technology, economics, and theory of cinema. No prerequisites and all work is in English.

**Attributes:** FinePerformingArts(Discovery)

**Grade Mode:** Letter Grading

**ITAL 526 - The Art of Cinema in Italy****Credits:** 4

While studying in Italy students explore the relationship between cinema as art, the reception and distribution of films cinema historiography (including archives), and technology. Students read about movements, directors, and expectations of genre, and identify connections between artistic concerns and the technology involved in making, preserving and restoring films. Students visit the Cineteca di Bologna and attend the annual Cinema Ritrovato film festival.

**Attributes:** FinePerformingArts(Discovery)

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**ITAL 540 - Making Italian Americans: Migration and Identity Formation****Credits:** 4

This course examines historical, social, economic, political, cultural, religious, and folkloric structures that shape how Italian Americans identify themselves as a distinct ethnicity. Through study of Italian American identity, the course analyzes the Italian state in the late nineteenth century, immigration policies in the United States, the challenges of assimilation, the demise of traditional Italian American communities (i.e., "Little Italy"), and the role of ethnic identity in contemporary American society.

**Attributes:** Social Science (Discovery)

**Grade Mode:** Letter Grading

**ITAL 595 - Practicum****Credits:** 2

Practical use of Italian language and culture through special projects outside the classroom.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Equivalent(s):** ITAL 595A

**Grade Mode:** Credit/Fail Grading

**ITAL 631 - Advanced Conversation and Composition I****Credits:** 4

Rapid review of basic grammatical structures and in-depth study of more complex linguistic patterns. Vocabulary building. Frequent written compositions and oral presentations using materials on contemporary culture taken from the various media. Phonetics and oral/aural skills development.

**Attributes:** World Cultures(Discovery); Writing Intensive Course

**Prerequisite(s):** ITAL 504 with a minimum grade of C.

**Grade Mode:** Letter Grading

**ITAL 632 - Advanced Conversation and Composition II****Credits:** 4

Advanced spoken and written Italian to attain aural-oral fluency. Advanced reading and composition.

**Attributes:** World Cultures(Discovery); Writing Intensive Course

**Prerequisite(s):** ITAL 504 with a minimum grade of C.

**Grade Mode:** Letter Grading

**ITAL 635 - Italian Food Studies****Credits:** 4

Italian Food Studies acquaints students with the principles of aesthetics as they pertain to our understanding of and relationship to food. The philosophical aspects of the course are complemented by experiential components that emphasize the particularity as well as the diversity of the Italian regions.

**Attributes:** Humanities(Disc)

**Grade Mode:** Letter Grading

**ITAL 651 - Introduction to Italian Culture and Civilization I: Middle Ages, Renaissance, Baroque****Credits:** 4

Survey of major representative writers and artists, studied against the backdrop of social and cultural history. Dante, Petrarch, Boccaccio, Machiavelli, Marino. (Not offered every year).

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ITAL 631 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ITAL 652 - Introduction to Italian Culture and Civilization II: Age of Enlightenment, Romanticism, Modernism****Credits:** 4

Survey of major representative writers and artists, studied against a backdrop of social and cultural history. Parini, Goldoni, Leopardi, Manzoni, Pavese, Calvino. (Not offered every year).

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ITAL 631 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ITAL 675 - Special Topics in Italian Studies****Credits:** 4

Topics drawn from all aspects and periods of Italian Studies. May be repeated for credit barring duplication of materials.

**Prerequisite(s):** ITAL 631 with a minimum grade of D-.

**Repeat Rule:** May be repeated up to unlimited times.

**Grade Mode:** Letter Grading

**ITAL 681A - Ancient and Medieval Italy****Credits:** 4

Taking an interdisciplinary, but historically centered perspective, this course examines the construction of Italy as both a nation and culture from the pre-Roman period to the fifteenth century.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** ITAL 681B**Grade Mode:** Letter Grading**ITAL 681B - Ancient and Medieval Italy****Credits:** 4

Taking an interdisciplinary, but historically centered perspective, this course examines the construction of Italy as both a nation and culture from the pre-Roman period to the fifteenth century.

**Attributes:** Humanities(Disc)**Equivalent(s):** ITAL 681A**Grade Mode:** Letter Grading**ITAL 682B - Italian Culture: Early Modern, Modern and Contemporary****Credits:** 4

Taking an interdisciplinary, but humanistically-centered perspective, this course examines the construction of Italy as both a nation and culture from the fifteenth century to the contemporary era.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**ITAL 683 - UNH in Bologna Summer Program****Credits:** 0-8

This is an administrative placeholder course for the UNH in Bologna summer program. Students can be registered for both this administrative course number and the course number(s) of course(s) being offered on site.

**Co-requisite:** INCO 589**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**ITAL 733 - History and Development of the Italian Language****Credits:** 4

Development of the Italian language from Roman times to the present. Examines the comparative method and internal reconstruction as well as processes of changes in phonology, syntax and lexicon. The course introduces issues in dialect geography, the basic features of paleography and surveys the evolution of scripts.

**Prerequisite(s):** ITAL 631 with a minimum grade of D-.**Grade Mode:** Letter Grading**ITAL 775 - Topics in Literary & Cultural Studies****Credits:** 4

Advanced course on a literary/cultural topic. Possible topics include African Italian Literature, Dante, Poetry, Theatre, Italy and the European Union, Social & Political Movements, Environment, Sustainability, Film. Barring duplication of subject, the course may be repeated for credit.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**ITAL 795 - Independent Study in Italian Language and Literature****Credits:** 1-4

Individual guided study.

**Grade Mode:** Letter Grading**ITAL 796 - Independent Study in Italian Language and Literature****Credits:** 1-4

Individual guided study.

**Grade Mode:** Letter Grading

## Japanese (JPN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**JPN #401 - Elementary Japanese I****Credits:** 4

Elements of Japanese grammar. Oral practice and written drills designed to achieve a mastery of basic grammatical patterns. Reading of graded exercises introducing the student to written Japanese (Hiragana and Katakana) and Chinese characters used in contemporary Japan. Labs. (No credit for students who have had two or more years of Japanese in secondary school; however, any such students whose studies of Japanese have been interrupted for a significant period of time should consult with the department chairperson about possibly receiving credit).

**Grade Mode:** Letter Grading**JPN #402 - Elementary Japanese II****Credits:** 4

Elements of Japanese grammar. Oral practice and written drills designed to achieve a mastery of basic grammatical patterns. Reading of graded exercises introducing the student to written Japanese (Hiragana and Katakana) and Chinese characters used in contemporary Japan. Labs. (No credit for students who have had two or more years of Japanese in secondary school; however, any such students whose studies of Japanese have been interrupted for a significant period of time should consult with the department chairperson about possibly receiving credit).

**Attributes:** Foreign Language Requirement**Prerequisite(s):** JPN #401 with a minimum grade of D-.**Grade Mode:** Letter Grading**JPN #503 - Intermediate Japanese I****Credits:** 4

Review of Japanese grammar. Reading of prose and practice in oral and written expression. Labs.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** JPN #402 with a minimum grade of C.**Grade Mode:** Letter Grading**JPN #504 - Intermediate Japanese II****Credits:** 4

Review of Japanese grammar. Reading of prose and practice in oral and written expression. Labs.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** JPN #402 with a minimum grade of C.**Grade Mode:** Letter Grading**JPN #795 - Independent Study****Credits:** 1-4

Open to highly qualified juniors and seniors. To be elected only with the permission of department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated for credit.

**Grade Mode:** Letter Grading**JPN #796 - Independent Study****Credits:** 1-4

Open to highly qualified juniors and seniors. To be elected only with the permission of department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated for credit.

**Grade Mode:** Letter Grading

# Justice Studies (JUST)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

## JUST 401 - Introduction to Justice Studies

**Credits:** 4

Overview of justice studies as the study of law and law-like systems. Includes literature from both the law and society, and criminology. Topics will include morality versus legality, the American legal civil and criminal system, torts, and adult versus juvenile justice.

**Grade Mode:** Letter Grading

## JUST 405 - Technology, Crime, and Society: A Forensic Exploration of High-Tech and Digital Crime

**Credits:** 4

This course addresses the ways in which technology, crime, and law converge in the wider society in the twenty-first century. While emerging technologies bring great benefits, they also bring unintended and unforeseen consequences. This course uses a social science orientation to explore a new and evolving field of forensic technology.

**Attributes:** Environment, TechSociety(Disc)

**Grade Mode:** Letter Grading

## JUST 410 - Sexual Harassment and Rape Prevention (SHARPP) Peer Advocacy

**Credits:** 2-4

SHARPP Peer Advocacy is designed to provide the training and development of peer advocates to work directly with survivors of interpersonal violence while staffing SHARPP's 24/7 support line. Under NH state law (NH RSA 173:C), to have confidentiality as an advocate, individuals must successfully complete a minimum of 30-hours of specialized training and complete 6 hours of annual continuing education. This course will give students the basic understandings and skills needed to serve as a peer advocate, though is not meant to be the only training they receive in this role or as a comprehensive overview of all information needed to work with survivors.

**Grade Mode:** Letter Grading

## JUST 501 - Research Methods

**Credits:** 4

Overview of the various methodologies used in justice studies research: quantitative, qualitative, and legal. Topics include issues of design such as ethics, reliability, and validity measurement. Students will design and write up research proposals using one of the methods reviewed in the course.

**Attributes:** Inquiry (Discovery)

**Prerequisite(s):** ADMN 510 with a minimum grade of C- or MATH 420 with a minimum grade of C- or MATH 422 with a minimum grade of C- or MATH 439 with a minimum grade of C- or MATH 644 with a minimum grade of C- or PSYC 402 with a minimum grade of C- or SOC 402 with a minimum grade of C-.

**Grade Mode:** Letter Grading

## JUST 505 - Breaking Down Breaking Bad: The Analysis of Hollywood Crime and Justice

**Credits:** 4

In this course, we will consider the intersections of justice studies, crime/delinquency, policy/law, and media. Employing case studies, we will critically analyze depictions of crime, criminals, and law enforcement in popular culture. Specific attention is placed to the following areas: the social construction of crime and justice; the structure and influence of media; and the implications of media portrayals of crime and justice; the structure and influence of media; and the implications of media portrayals of crime for policy, law, and our understandings of deviance. You are invited to explore a multitude of theories, ideas, and research as you learn about this dynamic field of study.

**Grade Mode:** Letter Grading

## JUST 520 - Girls Gone Bad: Delinquent Girls in Cultural Context

**Credits:** 4

This course explores the important and under-studied intersection between gender/girls and delinquency. Who is the typical female delinquent? What causes her to get into trouble? What happens to her if she is arrested? Topics include the extent and nature of adolescent girl's delinquency and theoretical explanations for delinquency. Focus on social contexts (family, peers, school), developmental and social psychological factors and adolescent girls' experiences with the juvenile system.

**Grade Mode:** Letter Grading

## JUST 550 - Mock Trial

**Credits:** 2

Participation in American Mock Trial Association intercollegiate competition. Study and preparation for trial of national case (criminal or civil, alternate years). Year long course, 2 credit hours per semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## JUST 551 - Mock Trial

**Credits:** 2

Participation in American Mock Trial Association intercollegiate competition. Study and preparation for trial of national case (criminal or civil, alternate years). Year long course, 2 credit hours per semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## JUST 591 - Forensic Psychology

**Credits:** 4

Forensic psychology is one of the fastest growing sub-fields in psychology and in fact one of the fastest growing disciplines in the world of social science. Still, most people in the general population as well as many individuals within the study of psychology know very little about what forensic psychology actually is. This course is designed to cover the various roles and issues that constitute the science of forensic psychology and to help student deepen their understanding of the various roles forensic psychologists play in the real world. Needless to say, this course will not train you to be a forensic psychologist, but hopefully it will spark your interest about a very exciting topic and encourage you to study some of the issues we touch on, as you move on academically.

**Grade Mode:** Letter Grading

**JUST 595 - Special Topics****Credits:** 1-4

Special topics of advanced study in Justice Studies. Selected offerings reflect faculty expertise in teaching and research. May be repeated in different topic areas.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**JUST 601 - Internship****Credits:** 4

Weekly class meeting and a semester-long field internship in justice studies (e.g., law enforcement, corrections, victim advocacy, criminal or civil courts etc.) or a research internship working with a UNH faculty member or in a campus research lab (e.g., Crimes against Children's Lab, Prevention Innovations Research Center etc.) Placement must be approved by the justice studies internship coordinator. 155 internship hours required.

**Grade Mode:** Letter Grading**JUST 650 - Special Studies in Comparative Justice Systems****Credits:** 4

This course will involve periodic offerings in comparative analysis of justice systems in an international context. May be repeated provided both course offerings are substantially different. Must be taken with JUST 651 for those students participating in the Justice Studies Budapest Program.

**Co-requisite:** COLA #657, INCO 588, JUST 651**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**JUST 651 - Field Studies in the Hungarian Justice System****Credits:** 6

This course is designed to provide Justice Studies Budapest Program students with first-hand experience with the workings of the Hungarian justice system. Weekly field trips to agencies in law enforcement, the courts, and correctional facilities in the Budapest area will be arranged, and periodic lectures by Hungarian criminal justice professionals and scholars will compliment these visits. Must be taken with JUST 650 for those students participating in the Justice Studies Budapest Program.

**Co-requisite:** COLA #657, INCO 588, JUST 650**Grade Mode:** Credit/Fail Grading**JUST 701 - Senior Seminar****Credits:** 4

Advanced material in which the instructor has specialized knowledge through research and study. Topics may include the death penalty, terrorism, psychology of the jury, ethics and morality, immigration, therapeutic jurisprudence, and juveniles tried as adults.

**Attributes:** Writing Intensive Course**Prerequisite(s):** JUST 401 with a minimum grade of C- and JUST 501 with a minimum grade of C-.**Grade Mode:** Letter Grading**JUST 795 - Reading and Research****Credits:** 1-4

An independent study that is arranged by the student and supervised by a Justice Studies faculty member. Course requirements include: assembling and reading a substantial bibliography in the field; completing several written assignments and in some cases participating in hands-on experiences such as data collection and analysis. This course is by permission only and requires a signed agreement/proposal prior to registration. May be taken for 1-4 credits and includes a minimum of 3 hours of coursework per week per credit hour. Writing intensive in some select cases.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 2 times.**Grade Mode:** Letter Grading

## Kinesiology (KIN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**KIN 501 - First Aid: Responding to Emergencies****Credits:** 1

Covers the American Heart Association HeartSaver First Aid/CPR/AED: Adult, Child, Infant curriculum, the National Association of EMTs Bleeding Control for the Injured (BCon) curriculum which meets the Department of Homeland Security's Stop the Bleed initiative, and training for civilian responses to critical incidents.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**KIN 505 - Activity, Injuries and Disease****Credits:** 4

Sports and exercise are a part of American society and are used as entertainment, leisure activity as well as a means to better health. Unfortunately while we partake in these activities few individuals are aware of the risks they are exposing themselves to. In addition as more women engage in sports and exercise medical science is realizing that many conditions and injuries are gender specific. It is well known that women athletes deal with reproductive, orthopedic and nutritional issues that differ greatly from men. Also we know that individuals with varying diseases benefit greatly from exercise. This course will join, musculoskeletal anatomy, injuries, gender and special problems together to explain how an individual can enjoy activities safely. In addition this course addresses the interpretation of current medical literature and how to utilize new information.

**Attributes:** Biological Science(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**KIN 585 - Emergency Medical Responder****Credits:** 4

Standards of practice that conform to the content of the US Department of Transportation curriculum for Emergency Medical Responder (EMR). Initial evaluation and stabilization of patients at the scene of medical emergencies, CPR, and other basic medical care for illness and injury. Prepares the student for the National Registry of EMT (NREMT) EMR certifications exams. (Note: this is a different level of certification than Emergency Medical Technician (EMT). KIN 684 and KIN 685 prepares students for EMT certification). Lab.

**Grade Mode:** Letter Grading**Special Fee:** Yes

**KIN 652 - Clinical Kinesiology****Credits:** 4

The science of human movement from biomechanical, neuromuscular, and anatomical perspectives; human muscular, joint, and connective tissue anatomy; and actions of skeletal muscles are detailed.

**Prerequisite(s):** BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**KIN 653A - Musculoskeletal Assessment****Credits:** 2

Principles and methodology of joint range of motion, body mechanics, and muscle strength evaluation. Uses muscle palpation, goniometry, manual muscle testing, hand-held dynamometry to facilitate understanding of musculoskeletal anatomy and assessment.

**Prerequisite(s):** BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**KIN 668 - Ergogenic Aids in Sports****Credits:** 2

In sports, faster, higher, stronger, longer, and better is what everyone wants. Athletes and coaches seek out sports ergogenics that will give them a training and performance advantage over their competition. This course introduces the use of sports ergogenics and their use in athletic competition.

**Equivalent(s):** AT 668

**Grade Mode:** Letter Grading

**KIN 684 - Emergency Medical Care: Emergency Medical Technician (EMT)****Credits:** 3

Based on the curriculum established by the U.S. Department of Transportation for Emergency Medical Technician, and authorized by the State of New Hampshire-Bureau of Emergency Medical Services (EMS). Topics covered include trauma; medical, environmental and psychiatric emergencies; childbirth; hazardous materials; and infection control procedures. Students participate in clinical observations in one of the region's hospital emergency departments. Students have the option to take the state of NH-EMS Practical Examination and the National Registry Written Examination for EMT. Passage of both these examinations leads to national certification as an EMT.

**Co-requisite:** KIN 685

**Prerequisite(s):** ANSC 511 (may be taken concurrently) with a minimum grade of D- or ANSC 512 (may be taken concurrently) with a minimum grade of D- or ZOOL 401 (may be taken concurrently) with a minimum grade of D- or BMS 507 (may be taken concurrently) with a minimum grade of D- or BMS 508 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**KIN 685 - Emergency Medical Care: EMT Lab****Credits:** 2

Basic emergency health care, including trauma patients, medical and environmental emergencies, and childbirth. Includes clinical experience with a local hospital and ambulance service. Prepares the student for the National Registry of EMT's Examination.

**Co-requisite:** KIN 684

**Prerequisite(s):** (ANSC 511 (may be taken concurrently) with a minimum grade of D- and ANSC 512 (may be taken concurrently) with a minimum grade of D-) or ZOOL 401 (may be taken concurrently) with a minimum grade of D- or (BMS 507 (may be taken concurrently) with a minimum grade of D- and BMS 508 (may be taken concurrently) with a minimum grade of D-).

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**KIN #690 - Study Abroad in Kinesiology****Credits:** 0-16

A) Foreign study in, or related to, athletic training. Interested students should contact Program Director, Kinesiology Athletic Training Option.

B) Foreign study in, or related to, exercise science. Interested students should contact Program Director, Kinesiology Exercise Science Option.

C) Foreign study in, or related to, outdoor education. Interested students should contact Program Director, Kinesiology Outdoor Education Option.

D) Foreign study in, or related to, physical education. Interested students should contact Program Director, Kinesiology Physical Education Option.

E) Foreign study in, or related to, sports studies. Interested students should contact Program Director, Kinesiology Sports Studies Option.

**Co-requisite:** INCO 588

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**KIN 693 - Teaching Assistantship****Credits:** 2

A) Physical Education Pedagogy; B) Exercise Leader; C) Outdoor Education; D) Science Labs; E) Cardiac Rehabilitation; F) Coaching.

Students serve as teaching assistants in assigned class activities.

Assignments to be made by the class instructor may include teaching assistants' and administrative duties. May take two different sections.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Grade Mode:** Credit/Fail Grading

**KIN 696 - Independent Study****Credits:** 2-4

An advanced, individual scholarly project under the direct supervision of a faculty member.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**KIN 696W - Independent Study****Credits:** 2-4

An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by major faculty and the department chair prior to the student's registration for KIN 696 WI. All KIN 696 WI projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**KIN 699H - Honors Project****Credits:** 4

Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.

**Attributes:** Honors course**Grade Mode:** Letter Grading**KIN 706 - Neurology****Credits:** 4

Development, morphology, internal configuration, physiology, histology, function, and pathology of the human nervous system.

**Co-requisite:** KIN 707**Prerequisite(s):** BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.**Grade Mode:** Letter Grading**KIN 707 - Neurology Lab****Credits:** 2

Basic histology, neuroanatomy and neurophysiology of the human nervous system. Use of brain specimens, videos and pathology case studies to elucidate cell structure, sensory and motor systems, and spinal cord, brainstem and cortical organization and anatomy.

**Co-requisite:** KIN 706**Prerequisite(s):** (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or COMM 521 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**KIN 798 - Special Topics****Credits:** 1-4

New or specialized courses not normally covered in regular course offerings. Special fee on some sections.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes

## Languages, Literatures & Cultures (LLC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**LLC 444H - Honors/Human Rights and the Disappeared in Latin American Culture****Credits:** 4

This course is situated at the intersection of Latin American culture and Human Rights (1973-2020). Through our examination of case studies dealing with violations of Human Rights and forced disappearances in Central America, Colombia, Mexico, and the Southern Cone, the course uses methodologies from the humanities to explore the poetics/politics of mourning, the search for the disappeared, transitional justice, and memory practices by examining cultural production such as novels, poems, music, documentaries, films, performances, and visual arts.

**Attributes:** Honors course; World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**LLC 444I - US Latinx Cities: Urban Culture, Society and Space****Credits:** 4

This course will explore urbanism of four US Latinx Cities: Los Angeles, Chicago, Miami, and New York. We will examine how Hispanics have historically shaped and changed the landscape of each of these cities in the United States through various forms of cultural production such as literature, music, film and television as well as discuss the social issues that these cities and communities face such as social inequality, gentrification, race relations, sexuality/gender, and transportation.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**LLC 535A - Professional Culture in European Union - - Case Study: Germany****Credits:** 4

No previous German required. Conducting business with countries of the European Union, with a particular emphasis on Germany. The course focuses on the central role played by professional culture and business practices in the global marketplace.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**LLC #535B - Professional Culture in Latin America - Case Study: Mexico and Brazil****Credits:** 4

Conducted in English. No previous Spanish or Portuguese required. Conducting business with countries in Latin America with a particular emphasis on Mexico and Brazil. The course focuses on the central role played by professional culture and business practices in the global marketplace.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** SPAN #535B**Grade Mode:** Letter Grading**Special Fee:** Yes

**LLC 540 - Film History****Credits:** 4

Examines the historical development of film from a global perspective and the emergence of national cinemas as well as the cross-cultural influences that have produced the modern transnational film industry.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**LLC 552 - Comparative Literature: Masterpieces of World Literature II****Credits:** 4

Comparative studies of major authors representative of important periods of literary achievement. Renaissance to modern. Studies the age of empires through the colonial and post colonial periods. Introduction to various concepts of literature and genre. Topics and approaches may vary from semester to semester.

**Attributes:** Humanities(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**LLC #555 - Discover Cuba: An Arts Experience****Credits:** 4

This discovery course is designed to provide students with first-hand experience of the art, history, culture, music and visual arts of Cuba. The course combines an online academic class with on-site experiential learning through a fourteen day trip to Cuba. The course takes a highly contextual approach, locating the artwork in its historical, social, economic and cultural context for students to analyze and understand the complexities of modern Cuba.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**LLC 560 - Divine Madness and Dangerous Minds! - Mental Health in Literature and Art****Credits:** 4

Analysis and interpretation of art, literature, film, and various other representations of mental health and 'madness' from across the globe. Discussions of 'madness' are informed by artistic, medical, theoretical, political, and historical perspectives.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**LLC 595 - Language Practicum****Credits:** 2-4

Practical use of language skills outside the classroom through special projects.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**LLC 790 - World Languages Capstone****Credits:** 4

The World Languages capstone consists of a semester-long exploration of the language learning enterprise, study of life-long language learning strategies, reflection on intercultural competence, and development of comprehensive digital portfolio, including a reflection on the course of study and a language assessment as well as a culminating project.

**Grade Mode:** Letter Grading**LLC 791 - Methods of Foreign Language Teaching****Credits:** 4

Objectives, methods and techniques in teaching foreign languages from elementary grades through college. Discussion, demonstration, preparation of instructional materials, micro-teaching of the language skills, including developments in computer-aided instruction.

**Equivalent(s):** SPAN 791**Grade Mode:** Letter Grading

## Latin (LATN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**LATN 401 - Elementary Latin I****Credits:** 4

Explore the world of the ancient Romans by learning the basic elements of Latin: the alphabet, vocabulary and grammar. By the end of the first semester students will be prepared to read short adapted passages on the history, mythology and culture of the Romans and the many cultures that they were associated with. Ideal preparation for exploration in politics, legal studies, music, myth/religion, theology, philosophy, medicine and the history of science.

**Grade Mode:** Letter Grading**LATN 402 - Elementary Latin II****Credits:** 4

A continuation of LATN 401, this course expands students' abilities to read simple to moderately complex Latin passages, furthering their insights into the fascinating history and culture of the ancient Romans.

**Attributes:** Foreign Language Requirement**Grade Mode:** Letter Grading**LATN #403 - Review of Latin****Credits:** 4

Intensive review of Latin grammar and vocabulary. Preparation for LATN 503. Designed primarily for those whose study of Latin has been interrupted for a year or more and for those who have had only two years of high school Latin.

**Grade Mode:** Letter Grading**LATN 503 - Intermediate Latin I****Credits:** 4

Review. Readings from Cicero, Caesar, Sallust, Livy, Catullus, Horace, Ovid, Plautus, Terence, and Seneca.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** LATN 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**LATN 504 - Intermediate Latin II****Credits:** 4

Review. Readings from Cicero, Caesar, Sallust, Livy, Catullus, Horace, Ovid, Plautus, Terence, and Seneca.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** LATN 503 with a minimum grade of D-.**Grade Mode:** Letter Grading

**LATN 605 - Readings in Latin Literature****Credits:** 4

Reading and analysis of major works of Latin literature. Focus on improving translation skills and comprehension of Latin grammar and Latin language. Introduction to the critical analysis of Latin literature in the context of Roman civilization and culture. Satisfies foreign language requirement.

**Attributes:** Foreign Language Requirement**Prerequisite(s):** LATN 504 with a minimum grade of C.**Grade Mode:** Letter Grading**LATN 606 - Readings in Latin Literature****Credits:** 4

Reading and analysis of major works of Latin literature. Focus on improving translation skills and comprehension of Latin grammar and Latin language. Introduction to the critical analysis of Latin literature in the context of Roman civilization and culture. Satisfies foreign language requirement.

**Prerequisite(s):** LATN 504 with a minimum grade of C.**Grade Mode:** Letter Grading**LATN 753 - Advanced Studies in the Literature of the Golden Age****Credits:** 4

A) Lucretius; B) Catullus; C) Caesar; D) Sallust; E) Vergil; F) Horace; G) Tibullus; H) Propertius; I) Ovid; J) Livy. Major Roman authors from the dictatorship of Sulla to the death of Augustus. Each special topic may be repeated two times for up to eight credits.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 1 time.**Grade Mode:** Letter Grading**LATN 754 - Advanced Studies in the Literature of the Golden Age****Credits:** 4

A) Lucretius; B) Catullus; C) Caesar; D) Sallust; E) Vergil; F) Horace; G) Tibullus; H) Propertius; I) Ovid; J) Livy. Major Roman authors from the dictatorship of Sulla to the death of Augustus. Each special topic may be repeated two times.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**LATN #756 - Advanced Studies in the Literature of the Silver Age****Credits:** 4

A) Seneca the Younger; B) Persius; C) Petronius; D) Lucan; E) Statius; F) Quintilian; G) Martial; H) Juvenal; I) Tacitus; J) Pliny the Younger. Major Roman authors from the reign of Nero to the death of Trajan. Each special topic may be repeated two times.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Leadership (LD) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**LD 600 - Becoming an Effective Leader****Credits:** 4

This course is focused on the strengths and characteristics of effective leaders. Topics may include self-leadership, the difference between leadership and management, the importance of communication, trust, team building, systems leadership, change leadership and conflict resolution. Students may illustrate the value of diversity, systems leadership, change leadership and conflict resolution within teams and organizations, as well as assess personal leadership styles and the leadership of others.

**Attributes:** Writing Intensive Course**Equivalent(s):** LD 600G**Grade Mode:** Letter Grading**LD 660 - Leadership Theory****Credits:** 4

This course guides participants in developing lifelong learning skills for leadership that apply to any organizational level in a wide variety of environments. Both historical and current leadership theory and practice are explored. By taking an active leadership role in this course, students examine the issues, challenges, and practical skills of leadership in today's workplace. Presentations, team activities, reflection, interviewing, and feedback may be activities of developmental components within the course.

**Prerequisite(s):** LD 600 with a minimum grade of D- or LD 600G with a minimum grade of D-.**Equivalent(s):** LD 602G, MGMT 602G**Grade Mode:** Letter Grading**LD 704 - Leading Teams****Credits:** 4

Leadership is the process of motivating people to achieve project goals, usually in a dotted-line organizational setting. The success or failure of the project, and by extension the manager, is dependent upon the manager's ability to assess the team as a whole, (strengths and weaknesses), and to then apply that analysis to the individual team members. Within the course, students will have the opportunity to survey and discuss multiple methodologies used to evaluate teams. Students may analyze how organizational dynamics and structure impact the manager, limit or increase their power, and their ability to perform their job.

**Prerequisite(s):** (LD 600 with a minimum grade of D- or LD 600G with a minimum grade of D-) and (LD 660 with a minimum grade of D- or LD 602G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-).**Equivalent(s):** LD 605G**Grade Mode:** Letter Grading

**LD 725 - Volunteer Leadership****Credits:** 4

Volunteers are increasingly important in the United States. Not only do financially strapped organizations use volunteers to enhance their capacity, but policy makers and community leaders see volunteering as a vehicle to improve communities and solve public problems. This course may cover topics of volunteer administration: such as planning, marketing, recruitment, screening and selection, training, supervision, evaluation, and recognition. Students will gain an understanding of how the demographic of today's volunteer is changing, how best to deploy the talents of multi-generational volunteers, and how to provide a structured, objective framework to be accomplished by the volunteer corps. Legal issues surrounding the use of volunteers and designing effective volunteer policies may also be addressed.

**Equivalent(s):** LD 625G**Grade Mode:** Letter Grading

## Life Sciences & Agriculture (LSA)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**LSA 400 - Freshman Academic Experience I****Credits:** 1

Assistance to the undeclared student in identifying a major within the College of Life Sciences and Agriculture, including the biological, natural, and social sciences. The goal of this seminar is to support students in developing a sound academic program and assist them in making a successful transition from high school to college. The seminar also covers strategies for being a successful college student. Required for all first-semester LSA undeclared students.

**Grade Mode:** Credit/Fail Grading**LSA 401 - Scientific Research Exploration****Credits:** 2

This course introduces incoming freshmen to the scientific research process via a hands-on approach, which includes case studies, group work, and a two-week research immersion experience under the guidance of the College of Life Sciences and Agriculture (COLSA) faculty. Course readings, discussions, and active participation in local research will facilitate the student's exploration of experimental design, hypothesis testing, data collection and analysis, interpretation of results, and effective communication of research findings. In the context of a group research project, students begin thinking like scientists, as well as strengthening their math, writing, and oral communication skills. Open to incoming freshmen only.

**Grade Mode:** Credit/Fail Grading**LSA 402 - Freshman Academic Experience II****Credits:** 1

The second part of Freshman Academic Experience. This course reviews academic skills and focuses on your "academic career" as a student in COLSA including: major choices, opportunities for enrichment, networking, internships, and career paths. The goal of this seminar is to support students in developing a sound academic program and assist them in making a successful transition to college. The seminar also covers research strategies and building effective presentations. Required for all LSA undeclared students.

**Prerequisite(s):** LSA 400 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading**LSA 500 - College of Life Sciences and Agriculture Career Development****Credits:** 1

This course equips COLSA students with the tools and resources needed to land a job, internship, and/or prepare for graduate studies. Students will explore career paths; identify opportunities in field, research, and industry experiences; learn the fundamentals of planning and organizing job/internship search strategies; and develop their professional image in preparation for post-graduation plans.

**Grade Mode:** Credit/Fail Grading**LSA 595 - P2BIO Transfer Preparation Course****Credits:** 0

This zero-credit course is required for second-year life science students in the CCSNH who intend to apply for the P2BIO transfer scholarship. The course provides students with opportunities to learn about career pathway and curricular opportunities available through the P2BIO program. It will provide students with an opportunity to hone skills as developing science scholars with an emphasis on professional development and metacognition.

**Grade Mode:** Credit/Fail Grading**LSA 601 - P2Bio Professional Preparation Seminar****Credits:** 1

This course is required for P2Bio transfer students entering UNH in the fall semester. The course provides students with opportunities to learn about career pathways and curricular opportunities available through the P2Bio program. Students will hone skills as developing sciences scholars with an emphasis on professional development and metacognition.

**Grade Mode:** Credit/Fail Grading**LSA 700 - Peer Advisor Leadership Experience****Credits:** 2

Training course for peer advisors who lead/support LSA 400/402. The course meets twice a week; once in LSA 400/402 and once with the Program Coordinator. This course focuses on leadership training, teaching, group dynamics, and the UNH community. Students accepted into the role of Peer Advisor will be required to sign a contract committing to an entire year of Peer Advisor Role. This course prepares students to take on a teaching/advising/mentoring role with COLSA.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**LSA #798 - Who's on First? Interprofessional Colloquium****Credits:** 2

Students engage with other professions on teams working through health care situations across the continuum. Students collaborate with faculty mentors to learn effective strategies in team-based care and develop competencies in ethics, responsibility, communication and teamwork.

**Equivalent(s):** HHS 798**Grade Mode:** Credit/Fail Grading

## Lifetime Activity Program (LAP)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**LAP 501 - Lifetime Activity Program: Special Topics****Credits:** 2

The UNH Lifetime Activity Program UNH activity courses are designed to enhance the experience of UNH students of all abilities and contribute to the overall health and well-being of the UNH student population. Participate in a fun sport that combines elements of tennis, badminton, and ping-pong. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime. The same topic may be repeated once.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**Special Fee:** Yes**LAP 502 - Lifetime Activity Program: Pickleball****Credits:** 2

Participate in a fun sport that combines elements of tennis, badminton, and ping-pong. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 503 - Lifetime Activity Program: Ultimate Frisbee****Credits:** 2

Learn to play ultimate frisbee, a "Player defined and controlled non-contact team sport played with a flying disc on a playing surface with end zones in which all actions are governed by the "Spirit of the Game." Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 504 - Lifetime Activity Program: Strength Training****Credits:** 2

Improve your fitness and learn how to safely strengthen the whole body. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 505 - Lifetime Activity Program: Intro to Running****Credits:** 2

Learn the basics of how to run for fitness and overall wellbeing. This course will cover everything from how to choose the right running shoe to preparing for a 5k running race and beyond. Class time will be spent running outdoors. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 506 - Lifetime Activity Program: Fly Fishing****Credits:** 2

This course is a basic introduction to fly fishing. It is a hands-on, educational fishing experience, with instruction and feedback from an experienced instructor. For the angler who really wants to learn how to fly fish on their own, this class is a tremendous value! You do not need any of your own equipment or experience. The course fee covers equipment rental and travel.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**Special Fee:** Yes**LAP 507 - Lifetime Activity Program: Yoga and Meditation****Credits:** 2

This course introduces the lifelong skills of yoga and meditation. Learn how to practice different variations of yoga and meditation. You will gain skills in relaxation and mindful movement. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 508 - Lifetime Activity Program: Vinyasa Flow Yoga****Credits:** 2

Are you looking to move and breath in a mindful practice? This yoga class emphasizes movement between yoga poses, guided by your breath. Expect to learn the fundamental skills of vinyasa flow yoga, a practice that will serve you throughout your lifetime. No previous yoga experience necessary.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 509 - Lifetime Activity Program: Standup Paddleboarding****Credits:** 2

This course will teach students stand up paddle boarding skills, emphasizing paddle techniques, core strength, and more. No experience required. If you already know the basics, you'll walk away with new skills and techniques. Take time in your busy schedule to play outside and learn how to strengthen your whole body through paddling. The special fee covers equipment rental.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**Special Fee:** Yes**LAP 510 - Lifetime Activity Program: Indoor Rock Climbing****Credits:** 2

Explore new heights! This course provides students with an introduction to rock climbing in an indoor setting. Students will learn the basics of rock climbing while gaining strength and confidence. This course can also provide a foundation for students who want to eventually learn to climb outdoors. No experience required. If you already know the basics, you'll walk away with new skills and techniques.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 511 - Lifetime Activity Program: Disc Golf****Credits:** 2

Disc golf is a flying disc sport in which players throw a disc at a target; it is played using rules similar to golf. Unlike golf, this game uses natural landscapes as courses. This course will help students develop the fundamental skills to play disc golf. Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 512 - Lifetime Activity Program: Volleyball****Credits:** 2

This course is designed to help students develop basic skills and knowledge in the game of volleyball. No experience required! Students will learn fundamental skills and rules of the game. Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading

**LAP 514 - Lifetime Activity Program: Wilderness First Aid (WFA)****Credits:** 2

WFA is the perfect course for the outdoor enthusiast or trip leader who wants a basic level of first aid training. The course is taught by UNH faculty working with SOLO Wilderness Medicine. Certifications are provided by SOLO and are valid for two years. This course is approved to recertify SOLO Wilderness First Responders.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**Special Fee:** Yes**LAP 515 - Lifetime Activity Program: Lacrosse****Credits:** 2

Learn and develop basic skills of North America's indigenous sport. Play no contact games including Speed Lacrosse and Sixes. No equipment or previous experience required. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 516 - Lifetime Activity Program: Cycling****Credits:** 2

Learn the basics of cycling for fitness and overall wellbeing. Class time will be spent cycling outdoors. Students of all cycling abilities are welcome. Students should plan to bring their own equipment (bike and helmet), though bikes may be available for students who need them. Contact the instructor prior to registration if you need equipment.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 517 - Lifetime Activity Program: Personal Training****Credits:** 2

This course provides students with foundational understanding and knowledge of human movement science, functional assessment, and program design as it applies to the field of personal training. The course follows the National Academy of Sports Medicine (NASM) personal trainer curriculum.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**LAP 518 - Lifetime Activity Program: Ice Climbing****Credits:** 2

This course introduces students to the fundamentals of ice climbing. No previous experience is required. All specialized equipment and transportation are covered by the course fee.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**Special Fee:** Yes**LAP 519 - Lifetime Activity Program: Winter Hiking and Snowshoeing****Credits:** 2

Learn how to enjoy the outdoors during the winter through hiking and snowshoeing. Class time will be spent outdoors learning how to stay warm, and increase physical fitness while hiking or snowshoeing in the beautiful New Hampshire snow.

**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading

## Linguistics (LING)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**LING 405 - Introduction to Linguistics****Credits:** 4

Overview of the study of language: universal properties of human language, Chomsky's innateness hypothesis, language acquisition in children, dialects and language variation, language change. Includes an introduction to modern grammar (phonology, syntax, and semantics) and to scientific linguistic methodology.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)**Equivalent(s):** ENGL 505, ENGL 505H, LING 405H, LING 505, LING 505H**Grade Mode:** Letter Grading**LING 605 - Intermediate Linguistic Analysis****Credits:** 4

Analysis and problem solving in phonology, morphology, and syntax using data from many languages. Emphasis is both practical (learning how to describe grammar and sound system of a language) and theoretical (understanding languages' behavior).

**Prerequisite(s):** LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.**Equivalent(s):** ENGL 605**Grade Mode:** Letter Grading**LING 606 - Languages of the World****Credits:** 4

A survey of the languages of the world from genetic, areal, and typological perspectives. Students learn about the geographic and demographic distribution of language families and language isolates, as well as about structural characteristics of languages, language families and language areas. Additional topics include language endangerment and the question of linguistic universals. Students work collaboratively on a project investigating a particular language family, giving in class presentations and writing up a final project report. Some prior knowledge of phonetics, phonology, morphology, and syntax is necessary.

**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.**Equivalent(s):** ENGL 606**Grade Mode:** Letter Grading**LING 695 - Senior Honors****Credits:** 4

Open to senior LING majors who, in the opinion of the department, have demonstrated the capacity to do superior work.

**Attributes:** Honors course**Grade Mode:** Letter Grading**LING 717 - Languages in Contact****Credits:** 4

This course will explore topics related to languages in contact, including borrowing, code-switching, second language acquisition, bilingual mixed languages, language shift and maintenance, pidgins and creoles, and the linguistic and social factors which play a role in language contact.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.**Equivalent(s):** ENGL #717**Grade Mode:** Letter Grading

**LING 718 - Morphology****Credits:** 4

Morphology is the study of word formation and the mental lexicon. This course explores processes of derivation, compounding and inflection that allow us to form new words. Students will become proficient in analyzing word formation processes in English and other languages, including deploying terminology used by morphologists. Students will learn and practice the conventions of "writing like a linguist".

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.**Equivalent(s):** ENGL 718**Grade Mode:** Letter Grading**LING 719 - Sociolinguistics Survey****Credits:** 4

How language varies according to the characteristics of its speakers: age, sex, ethnicity, attitude, time, and class. Quantitative analysis methods; relationships to theoretical linguistics. Focus is on English, but some other languages are examined.

**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.**Equivalent(s):** ENGL 719**Grade Mode:** Letter Grading**LING 728 - Language and Gender****Credits:** 4

This course will explore a variety of topics around the theme of language and gender, including the relationship between gender, language and power; the linguistic marking of gender; how people use language to construct and perform their gender; how gender intersects with other facets of identity, including sexuality and race and ethnicity.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or WS 401 with a minimum grade of D- or WS 405 with a minimum grade of D-.**Grade Mode:** Letter Grading**LING 779 - Linguistic Field Methods****Credits:** 4

Study of a non-Indo-European language by eliciting examples from an informant, rather than written descriptions of the language. Students learn how to work out the grammar of a language from raw data. (Not offered every semester).

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.**Equivalent(s):** ENGL 779**Grade Mode:** Letter Grading**LING 790 - Special Topics in Linguistics Theory****Credits:** 4

Advanced course on a topic chosen by the instructor. Inquire at the English department office for a full course description each time the course is offered. Topics such as word formation, dialectology, linguistic theory, and language acquisition, history of linguistics, language and culture, cross-disciplinary studies relating to linguistics. Barring duplication of subject, may be repeated for credit.

**Attributes:** Writing Intensive Course**Equivalent(s):** ENGL 790**Grade Mode:** Letter Grading**LING 793 - Phonetics and Phonology****Credits:** 4

Sound system of English and of other languages viewed from the standpoint of modern linguistic theory, including the following topics: the acoustic and articulatory properties of speech sounds, the phonemic repertoires of particular languages, phonological derivations, and prosodic phenomena such as stress and intonation.

**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.**Equivalent(s):** ENGL 793**Grade Mode:** Letter Grading**LING 794 - Syntax****Credits:** 4

Relationship of grammar and meaning viewed from the standpoint of modern linguistic theory. Emphasis on the syntax and semantics of English, with special attention to the construction of arguments for or against particular analyses.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.**Equivalent(s):** ENGL 794**Grade Mode:** Letter Grading**LING #795 - Independent Study****Credits:** 1-4

A) Synchronic Linguistics, B) Diachronic Linguistics, C) Linguistic Theory. For students showing a special aptitude for linguistics who desire to pursue a line of inquiry for which no appropriate course is offered. All requests must be forwarded by the faculty sponsor to the director of the Inter-departmental Linguistics Committee.

**Grade Mode:** Letter Grading

## Management (MGMT) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MGMT 410 - Principles of Management****Credits:** 4

This course examines a wide range of business theories and practical applications related to effective management. In addition to learning about what management is and what managers do, students also explore and assess their own management skills and styles. Students apply critical thinking skills to core business functions. Focus is on contributing factors to management styles such as communication, the role of the manager, design of the organization, ethical issues, social responsibility and globalization. Course format may include the application of these management roles and competencies through experiential activities, group exercises and case analysis.

**Attributes:** Writing Intensive Course**Equivalent(s):** MGMT 500G**Grade Mode:** Letter Grading

**MGMT 544 - Special Topics: Lower Level****Credits:** 1-4

A study of current and variable topics in Management. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** MGMT 544G

**Grade Mode:** Letter Grading

**MGMT 566 - Organizational Behavior****Credits:** 4

This course focuses on practical application of current research and concepts in human behavior in order to understand and analyze organizations. Interpersonal processes, problem-solving, and managerial decision-making are considered through examination of the roles of power, politics, ethics, and conflict in organizations. Topics may include individual behavior, motivation and performance, interpersonal relations, small group relations, the role of leadership, and organizational culture.

**Attributes:** Writing Intensive Course

**Equivalent(s):** MGMT 566G

**Grade Mode:** Letter Grading

**MGMT 569 - Budget Management****Credits:** 4

One of the primary roles of a manager is to manage budgets and to communicate with accounting and finance professionals. This course is designed to provide budgeting skills to managers, enabling them to help in the decision-making process related to the financial health of their organizations. Students will have the opportunity to become familiar with processes related to development and management of the budgeting process, accounting practices, and financial oversight.

**Prerequisite(s):** CMPL 402 with a minimum grade of D- or CMPL 502G with a minimum grade of D- or MGMT 502G with a minimum grade of D- or CMPL 512 with a minimum grade of D- or CMPL 612G with a minimum grade of D-.

**Equivalent(s):** MGMT 569G

**Grade Mode:** Letter Grading

**MGMT 595 - Practicum in Management****Credits:** 4

This project-based practicum is an entry-level field experience designed to assist Business Management majors in exploring career and vocational settings in which they can use and apply their business-related knowledge and skills. The nature of the practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings and situations in which the learner may engage in an upper level Business Management Internship. Registration for this course is by permission of Academic Affairs. Earlier registration deadlines may apply.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.

**Equivalent(s):** MGMT 540G

**Grade Mode:** Letter Grading

**MGMT 608 - Fostering Inclusion and Diversity in the Workplace****Credits:** 4

Today's workforce is diverse; individuals are frequently interacting with peers, managers and customers, each with different backgrounds, experiences, group affiliations, neurodiversity, sexual orientations, religions, and identities. With equity and respect, these differences can enhance performance and creativity; workplace diversity can also help to increase employee and customer engagement, contentment, and inclusion. This course explores ways in which employees and managers can cultivate an inclusive workplace culture and offers means for expanding appreciation of each individual's uniqueness. This course may review paradigms that limit and promote inclusion, such as unconscious biases, behavioral change, leadership, acknowledgement of the dimensions of diversity, and enforcement of patterns by employers, employees, and society as a whole. Recommended: MGMT 566.

**Equivalent(s):** MGMT 608G

**Grade Mode:** Letter Grading

**MGMT 625 - Legal and Ethical Issues in Business Management****Credits:** 4

This course addresses the nature, functions, and operations of the legal system and how legal rules affect business operations. Students examine the legal framework of laws, rules, health and safety regulations, and judicial opinions that have direct and profound impacts on managerial decision-making and practice. Considerable emphasis is placed on the federal, state, and local regulations that directly impact business practice; consumer laws, labor and employment law; and the social and ethical environment of business policy and management practice.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.

**Equivalent(s):** MGMT 625G

**Grade Mode:** Letter Grading

**MGMT 626 - Project Management Strategies****Credits:** 4

This course examines tools and methods used to manage projects of varying size and scope, and explores how these tools can be deployed to plan, schedule, execute, and assess projects from start to finish. Topics may include cost, risk, and quality management frameworks.

While designed primarily for students in management-related and technology-related fields, the course takes a broad approach, recognizing the diversity of professions which require project management skills and knowledge. Students may be introduced to the roles and responsibilities of project and program managers in various settings, to the knowledge areas of the Project Management Institute, and to the significance of project management teams.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D-.

**Equivalent(s):** MGMT 626G

**Grade Mode:** Letter Grading

**MGMT 634 - Contemporary Management Issues****Credits:** 4

In this course, students examine how such issues as globalization, technology, the environment, business ethics, and business-government relations impact how businesses are managed. They also examine how leaders manage leaner and flatter organizations comprised of diverse employees working in teams. Students may explore the broad impacts of these contemporary management issues through reading, research, case studies, and active discussions.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D-.

**Equivalent(s):** MGMT 601G**Grade Mode:** Letter Grading**MGMT 642 - International and Cross-Cultural Management****Credits:** 4

Globalization, remote work environments, outsourcing, new technology, supply chains and current business practices require working across time zones, countries, and cultural norms, all of which challenge traditional assumptions about how to manage people and organizations. Students may study how growing worldwide interconnections impact globalization on managing organizations and people worldwide. This course reflects new and emerging individual and interrelated factors influencing international managers which may include legal, political, economic, competitive, socio/cultural, technological, and environmental factors. The class incorporates real-world examples, research, and practical application, allowing students to adjust, adapt, and navigate the changing global business landscape, assessing opportunities and addressing potential challenges.

**Equivalent(s):** MGMT 604G**Grade Mode:** Letter Grading**MGMT 644 - Special Topics: Upper Level****Credits:** 1-4

A study of current and variable topics in management. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject matter.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** MGMT 644G**Grade Mode:** Letter Grading**MGMT 680 - Global Business****Credits:** 4

This course introduces the concept of global business as a system and the theories which underlie it; institutions that are visual evidences of it; production, marketing, financial, legal, human resource management, culture, politics and other subsystems which comprise the total system. It also examines national governmental and international institutional controls and constraints, which impact the environment in which the system operates. Students may examine growing worldwide interconnections to gauge the impact of globalization on managing organizations and people worldwide. Global business has an impact on all businesses, regardless of size or location of your business.

**Attributes:** Writing Intensive Course**Equivalent(s):** MGMT 633G**Grade Mode:** Letter Grading**MGMT 685 - Global Innovation****Credits:** 4

This course recognizes the deep connection between global trade, technology, and innovation. Combining studies in global business and its responsible management with the specialized knowledge of technology and global innovation management gives students the opportunity to prepare for successful careers in a global environment for firms that compete on the basis of innovation in products and services. Students may learn how the product life-cycle influences the commercialization of new technology products in a diverse and ever-changing global market.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.

**Equivalent(s):** MGMT 632G**Grade Mode:** Letter Grading**MGMT 695 - Internship in Management****Credits:** 4

The upper level Business Management Internship is a field-based experience designed to develop and hone the practical application skills of a Business Management major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the general auspices of their faculty internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where business management-related knowledge and skills are applied. NOTE: It is recommended that learners have completed the majority of upper level course work in their major prior to enrolling in this course. Registration for this course is by permission of Academic Affairs. Earlier registration deadlines may apply.

**Equivalent(s):** MGMT 640G**Grade Mode:** Letter Grading**MGMT 706 - Fundraising and Resource Development****Credits:** 4

Fundraising is the act of soliciting for contributions or pledges. Development, on the other hand, refers to nurturing and building relationships over time between donors/philanthropists and organizations. The purpose of this course is to differentiate fundraising, grant writing, and development strategies in organizations. Students will examine the roles and responsibilities of the individuals within an organization that motivate, nurture, engage, and maintain donor relationships. This course may review ethics and transparency within fundraising, technology to facilitate resource development, social and business trends, and organizational adaptation.

**Attributes:** Writing Intensive Course**Equivalent(s):** MGMT 605G**Grade Mode:** Letter Grading

**MGMT 707 - Nonprofit Management****Credits:** 4

This course guides participants in understanding nonprofit organizations and their management. Topics may include motivations for starting nonprofit organizations as well as theories and strategies to balance the unique needs of nonprofits within market economies. This course covers considerations for staffing and volunteer management, funding sources, asset management, program evaluation and leadership structures as elements of identifying qualities of successful nonprofit organizations at various stages of development. Projects may include interviewing, building a nonprofit business plan, and presentations.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.

**Equivalent(s):** MGMT 638G

**Grade Mode:** Letter Grading

**MGMT 715 - Financial Management for Nonprofit Organizations****Credits:** 4

Nonprofit management is becoming a recognized specialty, with a growing number of individuals and entities specializing in nonprofit financial management. Concepts cover financial management considerations related to ethics, governance, policy and mission frameworks that are unique to nonprofit organizations and practices.

**Prerequisite(s):** (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (MGMT 707 with a minimum grade of D- or MGMT 638G with a minimum grade of D-).

**Equivalent(s):** MGMT 639G

**Grade Mode:** Letter Grading

**MGMT 795 - Integrative Capstone: Industry-Based Internship****Credits:** 4

This capstone course is a field-based internship designed to develop and hone the practical application skills of a Business Management major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where management-related knowledge and skills are applied. Students will also be required to submit professional documents such as a cover letter, resume, and professional portfolio as part of the course. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 02G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** MGMT 651G

**Grade Mode:** Letter Grading

**MGMT 796 - Individualized Studies Capstone****Credits:** 2-9

This course is an independent learning experience used to satisfy the integrative requirement. The purpose of the integrative experience is to provide the learner with a capstone project in which to reflect on and synthesize his or her prior learning and apply it at a new, higher level of understanding. It is the final learning experience of your degree program and is undertaken after all other coursework is completed. This capstone may incorporate some new aspects of learning, but the project must integrate foundation and specialized coursework into the experience. No transfer, assessment or validation credit may be used to fulfill this requirement. Course content is approved by Academic Affairs.

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** MGMT 670AG

**Grade Mode:** Letter Grading

**MGMT 797 - Integrative Capstone: Industry-Based Project****Credits:** 4

This capstone course builds on all previous coursework. By completing a course project, students synthesize practical knowledge and academic theories to develop and implement effective managerial strategies in their own field of professional interest. Students will have the opportunity to explore current research in the field of management to meet their personal professional goals and goals of their organizations. Professional documents such as a cover letter, resume, and professional portfolio are developed by students in this course. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** MGMT 660G

**Grade Mode:** Letter Grading

**MGMT 798 - Integrative Capstone: Strategic Management Experience**  
**Credits:** 4

This capstone course focuses on the concepts and techniques of business management. It analyzes the process of developing and executing strategies designed to maximize a company's competitive advantage. With this information, students will develop skills to determine the appropriate strategy to fit the company's unique resources and environment. Students will have the opportunity to participate in experiential learning that will allow them to apply previous learning and degree content by crafting and executing strategy. They will also apply their knowledge of strategic management to their own field of professional interest by completing a course project. Students will also be required to submit professional documents such as a cover letter, resume, and professional portfolio as part of the course. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).

**Equivalent(s):** MGMT 650G

**Grade Mode:** Letter Grading

## Management (MGT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MGT 520 - Topics in Management**

**Credits:** 4

Special topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**MGT 535 - Organizational Behavior**

**Credits:** 4

Application of behavioral science concepts to work settings in profit and nonprofit organizations. Individual settings behavior, interpersonal relations, work groups, relations among groups studied in the context of organizational goals and structure. Experiential focus. For non-business administration majors and minors.

**Equivalent(s):** MGT 580

**Mutual Exclusion:** No credit for students who have taken ADMN 575.

**Grade Mode:** Letter Grading

**MGT 540 - Leadership in the 21st Century**

**Credits:** 4

This course provides students with the opportunity to explore leadership through multiple modes of inquiry and learning experiences. The emphasis is on students' development of their own philosophies of leadership through self-reflection, peer-to-peer dialogue, and experiential learning opportunities. This multi-modal learning experience better prepares students to take on 21st century leadership challenges.

**Equivalent(s):** MGT 585

**Grade Mode:** Letter Grading

**MGT 620 - Topics in Management**

**Credits:** 4

Special topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.

**Grade Mode:** Letter Grading

**MGT 630 - Leading in Diverse Organizations**

**Credits:** 4

This course is designed to help students navigate diverse organizational settings more effectively and improve their ability to work within and lead diverse teams and organizations. It also offers students the opportunity to develop their critical thinking on topics such as identity, relationships across difference, discrimination and bias, equality, and equity in organizations and society and how they relate to organizational issues of power, privilege, opportunity, inclusion, creativity and innovation and organizational effectiveness.

**Prerequisite(s):** PHIL 431 with a minimum grade of C- and ADMN 575 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**MGT 640 - Human Resource Management**

**Credits:** 4

This course introduces the fundamentals of Human Resource Management (HRM) and how HR is using data to drive decision making (People Analytics). HRM should be an essential part of any business strategy to be integrated into the traditional trio of finance, marketing and operations. In most organizations, Human resource related costs are by far the number one line of operating expenses. But to earn and maintain a seat at the table, and help make data-informed strategic decisions, HR partners will need to bring a solid knowledge about gathering the right data, choosing appropriate analysis, and interpreting and communicating findings in a meaningful way.

**Prerequisite(s):** ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**MGT 642 - Talent Acquisition**

**Credits:** 4

This course is designed to provide an understanding of organizational staffing and hiring with an emphasis on issues that impact staffing in modern organizations. It will cover multiple aspects of the staffing process, including recruitment, assessment, and selection methods and procedures. In addition, the utility of methods used in job analysis, performance measurement, and internal and external market analysis will be discussed. This course is project intensive; students will be responsible for creating job descriptions, developing recruitment strategies, and building basic selection systems.

**Prerequisite(s):** ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C- or HMG 635 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**MGT 655 - Doing Business Globally**

**Credits:** 4

This course introduce students both the macro- and micro-level aspects of international business. Topics include the formal and informal institutions of global business, international trade and economic regional integration, foreign exchange and international monetary system, international strategies for entering foreign markets and managing global growth.

**Prerequisite(s):** ADMN 575 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MGT 662 - Exploration in Entrepreneurial Management****Credits:** 4

Examines the management of change and innovation, especially the role of entrepreneur in managing new ventures. Uses case analysis, guest speakers, and business plan preparation to study the characteristic behavioral, organizational, financial, and marketing problems of entrepreneurs and new enterprises.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C-) and (ADMN 585 with a minimum grade of C- or MKTG 550 with a minimum grade of C- or MKTG 530 with a minimum grade of C-) and (ADMN 502 with a minimum grade of C- or ACFI 501 with a minimum grade of C- or ACCT 501 with a minimum grade of C-).

**Equivalent(s):** MGT 732, MGT 733**Grade Mode:** Letter Grading**MGT 666 - Judgment Days: Revelations for Negotiating in your Favor****Credits:** 4

Negotiation is the art and science of securing agreements between two or more interdependent parties seeking to maximize their outcomes. Negotiating and decision-making are essential managerial skills, necessary for influencing employees and stakeholders. This course will draw on the latest research, to help you learn how to negotiate successfully and with integrity. Topics covered include bargaining with one or more parties, influence strategies, ethical and social dilemmas, and negotiating with difficult people.

**Prerequisite(s):** ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C-.

**Grade Mode:** Letter Grading**MGT 701 - Stakeholder Engagement & Sustainable Businesses****Credits:** 4

Demands on strategy have expanded in a new era of capitalism. Businesses must assume responsibility for addressing complex issues at the intersection of business and society. This course prepares students to drive change by leading purpose-driven businesses that engage all stakeholders, not just shareholders and management. Conscious capitalism and realizing that everything connects to everything else - ethics, economics, politics, culture, technology, environment - is the foundation for growing businesses while simultaneously solving global societal challenges.

**Prerequisite(s):** ADMN 575 with a minimum grade of C-.**Equivalent(s):** ADMN 701**Grade Mode:** Letter Grading**MGT 713 - Leadership Assessment and Development****Credits:** 4

Activities and exercises to help students determine their ideal job upon graduation as well as their career goals for the next three to five years. Students learn a matrix of key leadership behaviors and skills that distinguish high-performing managers and executives. Each student's behavior is assessed using this model so that students can determine the leadership behaviors and skills they most need to develop to meet their early career goals. Faculty assist students in developing a personal leadership development plan to focus professional energy, efforts, and achievements over the next three to five years.

**Prerequisite(s):** ADMN 575 with a minimum grade of C-.**Grade Mode:** Letter Grading**MGT 714 - Organizational Changemaker Skills****Credits:** 4

This course will leverage research from strategy, economics, organizational behavior, psychology, and sociology to understand organizations' dynamic and ever-changing nature. This multi-disciplinary view will cut across organizational levels to examine frame-breaking change at the macro level, like major strategy shifts to the more micro implications of team change like member churn. Students will learn how to diagnose organizational problems, communicate issues, options, and recommendations, and lead change efforts at the team and organizational level.

**Prerequisite(s):** ADMN 575 with a minimum grade of C-.**Equivalent(s):** MGT 614**Grade Mode:** Letter Grading**MGT 720 - Topics in Management II****Credits:** 4

Special topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MGT 720W - Topics in Management II****Credits:** 4

Special topics, vary by semester.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MGT 733 - Launching New Ventures****Credits:** 4

This capstone course in the Entrepreneurial Studies option builds on business ideas developed during previous courses. Focused on developing a well-researched business plan and turning that into a high-quality "pitch", students have the opportunity to develop the skills needed to launch their own entrepreneurial venture, work for new ventures, and/or launch new ventures/products within an existing organization. Students will be part of UNH's Holloway Competition and will build relationships within New Hampshire's entrepreneurial ecosystem.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** DS 741 with a minimum grade of C- and (MGT 742 with a minimum grade of C- or DS 742 with a minimum grade of C-).

**Equivalent(s):** MGT 662, MGT 732**Grade Mode:** Letter Grading**MGT 740 - Strategic HR & Analytics****Credits:** 4

This course introduces the fundamentals of Human Resource Management (HRM) and analytical techniques most commonly used to make strategic HR decisions. While HR costs often are a company's number one operating expense, effective HR management is more than keeping costs down. HR professionals help shape a company's workforce and ensure that it has the skills and knowledge needed to successfully implement its strategy. Students will learn the analytical tools to make these decisions.

**Prerequisite(s):** ADMN 510 with a minimum grade of C- and ADMN 575 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**MGT 755 - Global Mindset for Sustainable Business****Credits:** 4

A global mindset is the awareness and skills needed to communicate and manage across cultures as well as understanding how national/cultural contexts shape views of ethics and sustainability. A global mindset is not just for students who will work overseas. Almost all businesses today have international suppliers and/or customers. The course will provide students with the theoretical understanding and practical tools they need to develop a global mindset using a combination of active learning experiences.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ADMN 575 with a minimum grade of C-.**Grade Mode:** Letter Grading

## Marine Sciences (MARI)

**MARI #405 - Introduction to Marine Mammal Science and Policy****Credits:** 3

This course embarks on the scientific discovery of marine mammals through the intersection of marine policy, physics, biology, and societal value of the ocean. Marine mammal and human interactions will be related to specific marine laws protective of the major taxonomic groups. Students will receive an introduction to marine mammal evolution, morphological and physiological adaptations, ecology, and behavior. These foundational concepts will convey to students the intent of marine policy protective of marine mammals.

**Equivalent(s):** INCO 405**Grade Mode:** Letter Grading**MARI 533 - Basic SCUBA****Credits:** 3

A full semester rigorous introduction to the fundamentals of SCUBA diving, including diving physics, physiology, decompression issues, environment, equipment, and safety. Through a progressive series of classroom lectures and pool sessions, students gain the knowledge and skills necessary to conduct themselves with competence in New England waters. Emphasis on safety and problem prevention. Strong swimming ability required.

**Equivalent(s):** KIN 533**Grade Mode:** Letter Grading**Special Fee:** Yes**MARI 705 - Introduction to Marine Policy: Understanding US Ocean, Coastal and Great Lakes Policy****Credits:** 3

Effective management of human activities in ocean, coastal and Great Lakes areas is critical to our future. This course provides a foundation for students from various backgrounds to understand US marine policy and how it relates to their future careers in research, policy, law, or management. While focused on US marine policy, the course also provides international context, including the UN Law of the Sea and other related conventions on pollution, fisheries, and resource protection.

**Equivalent(s):** INCO 705**Grade Mode:** Letter Grading**MARI 730 - Research Diving Technologies****Credits:** 4

Certified divers receive extensive training in the methods, specific techniques, and challenges required to conduct underwater research in the Gulf of Maine. Progressively builds upon basic diving skills and knowledge until the student is competent to formulate and implement an independent pilot research project. The results will be written up and presented to the class. Completion of 100-hour course may lead to UNH/AAUS Scientific Diver certification. SCUBA open water certification and a college level science course required prior to taking this course.

**Equivalent(s):** KIN 730, MEFB 730**Grade Mode:** Letter Grading**Special Fee:** Yes**MARI 735 - Advanced SCUBA****Credits:** 4

Through this course students will become competent and highly educated in a variety of diving disciplines to prepare them to work underwater. Students will be exposed to a variety of diving-related topics through a series of lecture and hands-on practical applications. Topics covered are navigation, search and recovery, low visibility, night diving, surface supplied diving, boat driving, accident management, hyperbaric medicine, physics, physiology, working and scientific research methods for diving. Open water certification and college level science course required prior to taking course.

**Equivalent(s):** KIN 735**Grade Mode:** Letter Grading**Special Fee:** Yes**MARI 795 - Special Topics****Credits:** 1-4

New or specialized topics not normally covered in regular course offerings.

**Repeat Rule:** May be repeated for a maximum of 5 credits.**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes

## Marine, Estuarine and Freshwater Biology (MEFB)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MEFB 401 - Marine Estuarine and Freshwater Biology: Freshmen Seminar****Credits:** 1

The purpose of this course is threefold: First to acquaint freshmen MEFB majors to the wide range of topics that are included in the broad area of marine, estuarine and freshwater biology. Second, to introduce new UNH students to many of the MEFB faculty at UNH and give them the opportunity to become aware of the types of research that is being conducted at UNH. Finally, to begin teaching freshmen how to read the primary literature, write concise summaries of papers they read, give oral presentations to their peers, and understand how scientific knowledge is acquired and disseminated. Students attend a series of seminars presented by a wide range of MEFB faculty. The topics presented vary from year to year depending on the faculty that agree to participate. In addition students are required to read the current literature, write short papers and give presentations to the class.

**Grade Mode:** Credit/Fail Grading

**MEFB 403 - Investigative Marine Biology Laboratory****Credits:** 2-4

This course is an intensive marine-based introduction to the scientific method and experimental biology taught at Shoals Marine Laboratory. The course takes advantage of the unique learning opportunities afforded by the pristine marine environment (especially the intertidal) around Appledore Island. The overall course philosophy is to allow students to learn the scientific method by doing it themselves under the guidance of veteran marine biologists. The course is structured around two class projects that are designed to expose students to concepts and techniques in marine ecophysiology and biomechanics. (Summers only at Shoals Marine Lab.)

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 410 - Marine Immersion****Credits:** 2

An intensive 2-credit course for incoming freshmen, surveying a range of marine-related fields (with an emphasis on biology and ecology), research approaches, and organisms. The course is based at the Shoals Marine Laboratory on Appledore Island, where students, and some faculty, will be in residence. "Marine Immersion" introduces students to the breadth, excitement, and challenges of marine sciences through lectures, demonstrations, and field experiences offered by a cohort of UNH faculty, and through short research projects carried out on the island. It also introduces them to resources and opportunities available at UNH, provides an opportunity to get to know some of their professors, and lets them begin building a network among their peers even before they arrive in Durham. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** ZOOL 410**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 500 - Coastal Habitat Field Research Methods****Credits:** 4

This two-week intensive field based course is intended for students who wish to explore and gain proficiency in various research and assessment methods of terrestrial and aquatic plant communities of the Isles of Shoals and nearby coastal habitats of the Seacoast and Great Bay Estuary. Topics covered will include quantitative surveys methods, GIS based an aerial (UAV) mapping of plant communities, taxonomy and systematics of major vascular taxa, island biogeography, rare species ecology and conservation, and the management of invasive species. Through both field and classroom exercises, we will use a variety of sampling protocols to document the existing plant communities, contribute to ongoing plant community studies, investigate the floristic changes that the Isles of Shoals have experienced from past to present, and use these data to predict trends into the future to help preserve their unique flora. Student will use skills developed in class to design and implement brief field research project in a related topic of their choice. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- or BIOL 412 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 503 - Introduction to Marine Biology****Credits:** 0 or 4

Emphasizes the organization of marine biological communities. Various marine environments pelagic, benthic, temperate, tropical, and their characteristic communities. Major emphasis on the approaches (e.g., analysis of energy flow and predator-prey interactions) used to analyze marine communities as well as the sampling techniques employed for each approach and the characteristic habitat type.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.**Equivalent(s):** BOT 503, PBIO 503, ZOOL 503**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 504 - Field Wildlife Forensics****Credits:** 2

Introduction to forensic science and the utilization of marine biology within the justice system. Comprehensive instruction concerning the recognition, documentation, collection, and preservation of physical evidence. Students develop practical incident response, scene management, and forensic teamwork skills. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- or BIOL 412 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 505 - Introduction to Applied Science Communication****Credits:** 4

In this course students develop the capacity to solve increasingly challenging problems with greater independence. Students fill their science communication "tool box," learning how to engage a nonscientist audience. They will be introduced to video production, podcasts, Wikipedia editing, public science events, social media platforms, blogging and press release writing. After gaining basic skills with these communication platforms and tools, students will apply their skills to a topic of their own research interest on the island. Students will actively participate in a local public science event (Rock talks) and learn how to start a science cafe on their own. Students will receive feedback from their peers and their instructors, and by the end of this course they will become more effective science communicators. Skills gained in this course in this unique environment can be applied to any research field and are essential for every scientist. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes

**MEFB 506 - Marine Parasitology and Disease****Credits:** 4

This course will focus on one of the most diverse and fascinating groups of marine organisms: parasites. The course will explore marine parasites and pathogens at multiple levels, including: (1) the evolutionary perspective with an emphasis on coevolutionary relationships; (2) parasitic diseases and life cycles (from simple to complex); (3) taxonomic and phylogenetic understanding of parasite and host groups (with a focus on metazoan parasites and hosts); (4) ecological implications of parasitism in marine systems at the population, community, and ecosystem levels; and (5) the effects of human induced global change on parasitism in marine communities. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB #507 - Examining Marine Climate Changes on Appledore Island, ME****Credits:** 2

Marine climatic changes will severely impact ocean-based ecosystems, coastlines, and human communities. Hands-on inquiry research in this course at the Shoals Marine Laboratory located on Appledore Island, ME will involve students in examining alterations to the marine environment due to global climatic changes. Students will use the Columbia University-National Aeronautics and Space Administration (NASA) Goddard Institute for Space Studies (GISS) Educational Global Climate Model (EdGCM) and smartphone applications to envision future shorelines. Guest lectures and fieldwork will be led by marine and climate scientists from University of New Hampshire and the Woods Hole Oceanographic Institution and involve examination of changes to the littoral zone, Gulf of Maine, and the world's oceans more broadly. Topics covered in this one-week field course include: Examining the evidence that the Earth's climate is changing, the greenhouse effect and natural forcings on global climate, climate change and sea-level rise, sea-levels and coasts of the geologic past, alterations to ocean chemistry and temperature, marine ecological impacts, human coastal impacts, and possible policy solutions. This course is targeted toward early and mid-career students with backgrounds in Earth and environmental science, marine science, or environmental policy. (Summers only at Marine Shoals Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 508 - Marine Ecosystem Research and Management****Credits:** 4

This course challenges students with real-world problems in the Gulf of Maine related to ecosystem research and management. Students learn the tools to conduct field and laboratory research and how to apply these tools in a real-world conservation management problem. Students work in small groups to design and implement and short research project. Results are presented to local and regional conservation practitioners in the Gulf of Maine. One semester of college biology should be taken prior to this course.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 510 - Field Ornithology****Credits:** 4

Introduces field ornithology focusing on the biology, ecology, and behavior of avifauna on the Isles of Shoals. Includes such ornithological field methods as censusing techniques, territory mapping, banding, behavioral observation, and creating a field notebook. Fieldwork is designed to supplement many classroom concepts, including territoriality, breeding biology, and survivorship. One year of college level biology required. Lab. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** ZOOL 510**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 530 - Evolution and Marine Diversity****Credits:** 4

Patterns of diversity and processes of evolution. Topics include the diversity of life, the fossil record, macro-evolutionary patterns, the genetics and developmental basis of evolutionary change, processes at the population level, evolution by natural selection, modes of speciation, long-term trends in evolution, and human evolution. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- or BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 535 - Marine Mammal Biology****Credits:** 4

This course explores the biology and conservation of the whales and seals, with a particular focus on species of the Gulf of Maine. Lectures examine many facets of marine mammal science including: taxonomy and species diversity, morphological and physiological adaptations for life in the sea, foraging ecology and behavior, reproductive cycles, bio-acoustics, anthropogenic interactions, and management of threatened species. Land and open water observations of whale and seal behavior give students hands on opportunities to study marine mammals in the field. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- or BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 600 - Field Experience in Marine, Estuarine, and Freshwater Biology****Credits:** 1-4

A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty adviser selected by the student.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**MEFB 625 - Introduction to Marine Botany****Credits:** 5

Life history, classification, and ecology of micro- and macroscopic marine plants, including phytoplankton, seaweed, and salt marsh plants, and the interactions between humans and marine plant communities. Occasional Saturday morning field trips. Lab. Offered alternating years only.

**Prerequisite(s):** BIOL 412 with a minimum grade of D- or BIOL 409 with a minimum grade of D-.

**Equivalent(s):** BOT 625, PBIO 625**Grade Mode:** Letter Grading**Special Fee:** Yes

**MEFB 628 - Marine Invertebrate Evolution and Ecology****Credits:** 5

Stresses the rich diversity of marine invertebrates by integrating phylogenetic trends with physiological and behavioral adaptation, and with ecological and symbiotic interactions. Offers a comparative survey of invertebrates from protozoans to protochordates; deals with aspects of form and function, development, evolution, classification, ecology, and natural history. Students work with live and preserved animals. Extensive dissections and a field component are required.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB #630 - Biodiversity and Biology of Marine Invertebrates****Credits:** 4

An introduction to the biology and evolution of the major invertebrate phyla, concentrating on marine representatives. Emphasis placed on the evolution of form and function, and the ecology, behavior, physiology, chemical ecology, and natural history of invertebrates. Appledore Island's unique location provides an excellent venue for the study of freshly collected and in situ representatives of most of the major phyla. One year of college level biology required. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** ZOOL 628, ZOOL 630

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB 631 - Ecotoxicology and Quantitative Reasoning****Credits:** 4

An introduction to the field of ecotoxicology through hands-on laboratory research on the impact of biotoxins on wildlife, humans and ecosystems.

Focus of the course is on development of the students ability to design and carry out actual research projects using modern technique in this field. Concepts and application of quantitative thinking and biostatistics are integrated throughout the course. Results are communicated through oral and written reports, publications and posters.

**Prerequisite(s):** BIOL 411 (may be taken concurrently) with a minimum grade of D- and BIOL 412 (may be taken concurrently) with a minimum grade of D- and CHEM 403 (may be taken concurrently) with a minimum grade of D- and CHEM 404 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB 633 - Quantitative Reasoning and Analysis for Marine Sciences****Credits:** 4

Expand your statistical knowledge and resume by learning R. Use project-based learning to explore marine mammal populations, intertidal systems, and fisheries while learning statistical skills and R. In this course students will learn to become proficient in R (data manipulation, graphing, hypothesis testing, importing and cleaning data) and learn to effectively communicate statistical results. (Summers only at Shoals Marine Lab.)

**Mutual Exclusion:** No credit for students who have taken BIOL 633.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB 674 - Ecology and Marine Environment****Credits:** 4

Introduces the marine sciences with an emphasis on field work in natural habitats. Examines aspects of the systematics, morphology, physiology, behavior, and ecology of marine organisms, including intertidal plants and invertebrates, fishes, marine mammals and birds; fisheries biology; oceanography, marine geology; and human impacts on the marine environment. Sessions include lectures, discussions, field work, experience aboard a coastal research vessel, and excursions to distinctive habitats. Offered in cooperation with Cornell University. Students may not take Field Marine Science after taking Field Marine Biology and Ecology. One year of college level biology required. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** ZOOL 674, ZOOL 675

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB 702 - Sustainable Marine Fisheries****Credits:** 4

An intensive course for undergraduate students that introduces students to the complex challenges facing today's fishing industry, which is being asked to simultaneously sustain the livelihood of fishermen while meeting long-term conservation goals. The course is held both at the UNH Campus and at the Shoals Marine Laboratory. New England fisheries are used as a case-study for this course through global fishing management, trends, and issues are also discussed. (Summers only at Shoals Marine Lab.)

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB 714 - Field Animal Behavior****Credits:** 4

An animal's behavioral patterns represent its abilities to deal with the environment dynamically. Course focuses on ecological and evolutionary significance of behavioral patterns found in all organisms, particularly those animals that inhabit coastal marine environments. Strong emphasis on methods of behavioral research and interpretation of behavioral patterns using field observations of diverse fauna of Appledore Island and surrounding waters. One year of college level biology required. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** ZOOL 714

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**MEFB 717 - Lake Ecology****Credits:** 4

Introduces the ecology of freshwater systems with emphasis on lakes. Origins of lakes and the effects of watersheds on lake chemistry and nutrient cycling are explored. Other topics include the impact of human disturbances on productivity and aquatic food webs and methods used for the management and restoration of lakes. Comparisons are made of the structure and functions of lake ecosystems found in temperate, tropical and arctic regions. General biology required prior to taking this course.

**Equivalent(s):** BOT 717, PBIO 717, ZOOL 717

**Grade Mode:** Letter Grading

**MEFB 719W - Field Studies in Lake Ecology****Credits:** 4

Ecology of lakes and other freshwater habitats examined through field studies. Emphasizes modern methods for studying lakes; analysis and interpretation of data; and writing of scientific papers. Seminars on research papers and student presentations of class studies. Field trips to a variety of lakes, from the coastal plain to White Mountains; investigate problems, such as eutrophication, acidification, biodiversity and biotoxins. Capstone experiences include interaction with state agencies, lake stakeholders and the submission of written manuscripts for publication. Introductory Biology required prior to taking this one.

**Attributes:** Writing Intensive Course**Equivalent(s):** MEFB 719, PBIO 719, ZOOL 719**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 720 - Marine Invasive Species: Ecology, Evolution and Management****Credits:** 4

This course explores the spread, establishment, and impact of invasive species. Students will become familiar with ecological and evolutionary theories pertaining to species invasions, and methods for assessing their spread and impact at local and global scales. The course examines: (1) ecological impacts and predictors of invasive species; (2) evolutionary insights of invasions; (3) taxonomic identification and survey techniques; (4) management implications of invasive species; and (5) the effects of global change on their spread. One semester of college biology or equivalent should be taken prior to this course.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 721 - Aquatic Invasive Species****Credits:** 4

Capstone course for a limited number of biological science majors to work closely with and help teach a Discovery course for non-majors in biology. Involves lectures, discussions, and laboratory and field exercises and write-ups focusing on managing aquatic invasive species based on an understanding of their ecology.

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 725 - Marine Ecology****Credits:** 4

Marine environment and its biota, emphasizing intertidal and estuarine habitats. Includes field, laboratory exercises, and independent research project. General ecology required. Marine invertebrate zoology, oceanography, and statistics are desirable. (Offered alternate years.)

**Equivalent(s):** PBIO 725, ZOOL 725**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 730 - Underwater Research****Credits:** 4

Hypothesis testing and experimental design, theoretical and practical aspects of sampling, and critiques of current research papers. Includes special problems of conducting research underwater (diving physics and physiology, theory and use of diving tables, hyperbaric medicine) and underwater techniques (underwater photography and video, photo quadrates, tagging and marking, cages and enclosures). Students must supply their own equipment. Students with special research interests are encouraged to enroll in an additional third week of independent underwater research. Required prior to taking this course: recognized scuba certification, a medical examination, one year of biology or other supporting science. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** KIN 730, MARI 730, ZOOL 730**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 741 - Sharks: Biology and Conservation****Credits:** 4

The last 30 years have produced an explosion of new information on the biology of the approximately 1,000 living species of sharks, skates, rays, and chimaeras, which collectively make up the group Chondrichthyes. This course will cover advanced topics in the evolution, diversity, anatomy, functional morphology, physiology, sensory systems, behavior, reproduction, development, and conservation of cartilaginous fishes. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D- and (ZOOL 518 with a minimum grade of D- or ZOOL 625 with a minimum grade of D-).

**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 747 - Aquatic Plants in Restoration/Management****Credits:** 4

A field-intensive class focusing upon freshwater and marine vascular plants with an emphasis on species commonly associated with ecological restoration, the identification and conservation of rare species, and the adaptations and management of invasive species of aquatic habitats in New England. Field trips emphasize the flora of various wetland habitats, including open water and vegetated fresh water wetlands, as well as coastal and estuarine habitats. Lectures and readings examine the current trends in research and management focusing upon specific taxa and pertinent facets of their taxonomy, physiology, and natural history. Offered alternating years only.

**Equivalent(s):** BOT 747, PBIO 747**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 751 - Research in Marine Biology****Credits:** 4

Introduces the adaptations of organisms to marine environments and the role these adaptations have in structuring marine communities using an experimental approach. Emphasizes experimental design, implementation, data analysis, and scientific presentations. Prereq: one year of college-level biology or permission. Additional experience in biology, ecology or physiology is recommended. (Summers only at Shoals Marine Lab.)

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Equivalent(s):** ZOOL 751**Grade Mode:** Letter Grading**Special Fee:** Yes

**MEFB 754 - Anatomy and Function of Marine Vertebrates****Credits:** 4

The course is designed to introduce students to a comparative study of the principal organ systems of vertebrates (i.e., fishes, sea turtles, marine birds, marine mammals) that are specifically adapted to the marine environment. Rather than focusing only on description of anatomical structure, the anatomy of structures are investigated with function, biological role, and evolutionary relationships. Laboratory exercises cover osteology, dissection, behavior and biomechanics. One year of college biology required prior to taking this course. (Summers only at Shoals Marine Lab.)

**Equivalent(s):** ZOOL 753, ZOOL 754**Grade Mode:** Letter Grading**Special Fee:** Yes**MEFB 755 - Biological Oceanography****Credits:** 3

Biological processes of the oceans, including primary and secondary production, trophodynamics, plankton diversity, zooplankton ecology, ecosystems and global ocean dynamics.

**Prerequisite(s):** BIOL 411 with a minimum grade of C- or BIOL 412 with a minimum grade of C-.**Equivalent(s):** ESCI 750, ZOOL 750**Grade Mode:** Letter Grading**MEFB 770 - Senior Seminar in Marine, Freshwater, and Estuarine Biology****Credits:** 2

Explore and synthesize your undergraduate MEFB knowledge and skills through an integrated outlook at a topic relating to your professional future. Each semester revolves around a different overarching topic on which students read assigned topical papers, prepare critical analyses, and give presentations to the class.

**Grade Mode:** Letter Grading**MEFB 772 - Fisheries Biology: Conservation and Management****Credits:** 4

Globally, many fished populations are declining, but 3.2 billion people eat fish and the average human eats >40 pounds of fish a year. This course identifies what biological characteristics are important to management and how they are measured. The course also explores quantitative methods describing fishery-population interactions and other management tools. Lastly, students will learn about the impacts of fishing on ecosystems.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.**Equivalent(s):** ZOOL 772**Grade Mode:** Letter Grading**MEFB 773 - Physiology of Fishes****Credits:** 4

Investigates the physiological processes responsible for maintaining homeostasis in fishes. Focuses on the function and regulation of the major organ systems during stress and environmental adaptation. Topics include reproduction, osmoregulation, digestion, endocrinology, and sensory perception.

**Grade Mode:** Letter Grading**MEFB 795 - Independent Investigations in Marine, Estuarine, and Freshwater Biology****Credits:** 1-4

Independent study in a topic related to Marine, Estuarine, or Freshwater Biology, arranged by the student with a faculty sponsor. Enrollment by permission only.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 5 times.**Grade Mode:** Letter Grading**MEFB 799H - Honors Senior Thesis in Marine, Estuarine, and Freshwater Biology****Credits:** 2-4

Independent research requiring a written proposal, a thesis, and a final public presentation (e.g. the Undergraduate Research Conference). Intended for MEFB majors completing Honors-in-major requirements. Contact MEFB program coordinator prior to senior year to arrange supervision and obtain permission. Two consecutive semesters. (4 credit minimum total; 8 credits maximum).

**Attributes:** Honors course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Marketing (MKT) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MKT 510 - Principles of Marketing****Credits:** 4

Marketing is the process of planning and executing the conception, pricing, promotion, and distribution of goods and services to maintain relationships that satisfy organizational and individual needs and wants. The course introduces students to terminology, functions, institutions, philosophy, consumer behavior, market decision-making and public policy issues. The course will provide students with the basic framework to understand the role and scope of marketing in the business environment.

**Attributes:** Writing Intensive Course**Equivalent(s):** MGMT 514G, MKTG 514G**Grade Mode:** Letter Grading**MKT 517 - Consumer Behavior****Credits:** 4

This course focuses on consumer behavior in a variety of contexts. Understanding the decision process, attitude, and behavior of buyers is essential to developing marketing plans in today's competitive marketplace; sophisticated customer relationship management approaches are dependent upon knowing the customer. Students consider the major theoretical approaches to consumer behavior and examine how the concepts of affect and cognition, behavior, learning, and the environment can be used to design and maintain an effective marketing strategy. The course also offers students an opportunity to gain a better understanding of their own buying behavior. NOTE: PSY 410 and SOCI 410 are recommended.

**Prerequisite(s):** MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.**Equivalent(s):** MKTG 617G**Grade Mode:** Letter Grading

**MKT 523 - Introduction to Professional Sales****Credits:** 4

This course presents students with current knowledge, data, and skills that are applicable in today's competitive business environments. The course provides students with an in-depth awareness of the sales discovery and presentation process within the professional selling environment. Students may demonstrate their persuasive skills in the context of a hypothetical job interview.

**Equivalent(s):** MKTG 523G**Grade Mode:** Letter Grading**MKT 525 - Presentation Excellence in Sales****Credits:** 4

This hands-on, highly interactive course prepares students to effectively develop, organize, present, support, and close a powerful program and presentation with confidence and conviction. The focus draws upon listening skill sets, oratory, personal communication social styles, and persuasive/informative techniques that result in the presenter engaging the audience. The course helps students to build competence and confidence through feedback and practice. The course prepares students to deliver persuasive and informative presentations that promote a specific outcome.

**Equivalent(s):** MKTG 525G**Grade Mode:** Letter Grading**MKT 600 - Social Media Marketing****Credits:** 4

This course is designed to build students' social media marketing, advertising, and communication skills by utilizing projects that give students hands-on experience implementing social media marketing strategies. The focus of this course will be understanding social media, developing social media marketing strategies, and tracking their effectiveness in an effort to maximize marketing efforts for businesses. It is expected that students have a basic understanding of various social media platforms. This course is NOT about how to use social media; rather it looks at how we can use social media for marketing efforts. NOTE: MKT 510 is recommended.

**Attributes:** Writing Intensive Course**Equivalent(s):** MKTG 520G**Grade Mode:** Letter Grading**MKT 610 - Marketing Hospitality Organizations****Credits:** 4

This course provides a comprehensive overview of the role of marketing in the hotel, restaurant, and travel industries. Students in this course may use case studies and real-world events to explore the theories, principles, and application of both traditional and digital forms of marketing to select groups. This is an experiential course that may include assignments such as the creation of a marketing plan, advertising campaign or social media strategies for a partner organization. The focus of this course centers on the planning, implementation, and evaluating of marketing plans, strategies, budgets, and campaigns.

**Prerequisite(s):** MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.**Equivalent(s):** MKTG 610G**Grade Mode:** Letter Grading**MKT 612 - Agile Marketing****Credits:** 4

Marketing plays a fundamental role within an organization, yet in many organizations, marketing is siloed from other business units, teams, or departments. A successful marketing department must strategically place themselves into the business with innovation and adaptivity. This course may explore agile marketing techniques including outcomes, continuous improvement, and customer needs.

**Prerequisite(s):** MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.**Equivalent(s):** MKTG 612G**Grade Mode:** Letter Grading**MKT 615 - Digital Storytelling and Brand Management****Credits:** 4

This course introduces the role and philosophy of brand management in the strategic marketing process and the resulting effects on strategic and marketing decisions. Students learn to identify and establish brand positioning and values, design branding strategies, and grow and sustain brand equity. Topics may include the strategic brand building process, segmentation and positioning for building brands, consumer behavior, brand information systems, building brand equity, and the application of brand management using marketing principles. Students explore the critical role of brand management in successful marketing strategies.

**Prerequisite(s):** (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or MKT 612 with a minimum grade of D- or MKTG 612G with a minimum grade of D-) and (MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-).**Equivalent(s):** MKTG 615G**Grade Mode:** Letter Grading**MKT 618 - Sales Management****Credits:** 4

This course focuses on the strategic and tactical aspects of selling and sales force management. The course develops an analytical understanding of the concepts, tools, and techniques of sales management, using real-world marketing problems. Students will apply the principles of personal selling, relationship building, salesforce prospecting, and sales call planning in a simulated sales management environment. Issues concerning international sales, social responsibility, and ethical considerations as they relate to sales management may be addressed.

**Prerequisite(s):** (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-) and (MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-).**Equivalent(s):** MGMT 618G, MKTG 618G**Grade Mode:** Letter Grading**MKT 645 - Marketing Research****Credits:** 4

In this course, students explore the theories and techniques of planning, conducting, analyzing, and presenting market studies. Students may discuss ethical dimensions, emerging trends, and new skills associated with marketing research and how secondary data fit into the research process. Students may examine different methodologies with emphasis on primary research, including questionnaire design. The course addresses the growing role that technology plays in predicting marketing trends, addressing marketing problems, and the development of new products and services.

**Prerequisite(s):** MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.**Equivalent(s):** MKTG 615G**Grade Mode:** Letter Grading

**MKT 705 - Marketing for Nonprofits****Credits:** 4

The course explores the use of traditional and nontraditional channels to promote nonprofits to an array of actual and potential audiences for a variety of purposes. Most nonprofit organizations must be visible to the public in order to fulfill their missions. Thus, nonprofit leaders must know how to promote their organizations to current and potential supporters, the broader public, and the mass media. Topics may include program and organizational branding, targeting respective audiences, preparing materials for greatest effect, and applying social media as appropriate.

**Equivalent(s):** MKTG 605G**Grade Mode:** Letter Grading**MKT 720 - Digital Advertising****Credits:** 4

Digital technologies have become an integral component of daily life for many organizations and consumers. This class will provide the student with the theoretical understanding of the internet marketplace necessary to adapt to its many changes, while also equipping the student with the skills needed to perform vital daily functions. The course may cover a wide spectrum of topics, including (but not limited to) marketing strategic approaches on the internet, analytics, online reputation management (ORM), digital positioning and branding, email marketing, paid search marketing, and integrated communications on digital media.

**Prerequisite(s):** (MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-) and (MKT 517 with a minimum grade of D- or MKTG 617G with a minimum grade of D-).

**Equivalent(s):** MKTG 620G**Grade Mode:** Letter Grading**MKT 723 - Marketing Design and Usability****Credits:** 4

In the field of marketing, creating intuitive market interfaces (website, mobile applications, and e-commerce) is imperative for consumer engagement and retention. This course will explore web design, user interface (UI), user experience (UX), and experiential design principles within the context of digital marketing. Successful design leads to data-driven results. Students may have the opportunity to analyze universal web standards, design fundamentals, interface, usability, and design issues to enhance search engine optimization (SEO) and search engine marketing (SEM).

**Prerequisite(s):** MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.

**Equivalent(s):** MKTG 623G**Grade Mode:** Letter Grading

## Marketing (MKTG)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MKTG 520 - Topics in Marketing****Credits:** 1-4

Special topics covering a variety of marketing principles, topics vary by semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MKTG 530 - Survey of Marketing****Credits:** 4

Focuses on marketing as the process of planning and executing the conception, pricing, promotion, and distribution of ideas, goods and services to create exchanges that satisfy individual and organizational objectives. For business administration minors and non-business administration majors.

**Equivalent(s):** MKTG 550

**Mutual Exclusion:** No credit for students who have taken ADMN 585, HMGMT #600.

**Grade Mode:** Letter Grading**MKTG 547 - Promotion and Advertising****Credits:** 4

Focuses on advertising and promotions while providing coverage of other marketing communication tools (direct marketing, point-of-purchase, personal selling, public relations). Examines both traditional and electronic/online/digital approaches to advertising and promotions as means to each audiences with messages that support the organization's goals.

**Prerequisite(s):** MKTG 550 with a minimum grade of D-.

**Equivalent(s):** MKTG 557**Grade Mode:** Letter Grading**MKTG 620 - Topics in Marketing****Credits:** 4

Special topics covering a variety of marketing principles, topics vary by semester.

**Prerequisite(s):** MKTG 550 with a minimum grade of C- or MKTG 530 with a minimum grade of C- or ADMN 585 with a minimum grade of C-.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MKTG 620T - Topics in Marketing - Study Away****Credits:** 4

Special topics covering a variety of marketing principles, topics vary by semester.

**Prerequisite(s):** MKTG 550 with a minimum grade of C- or MKTG 530 with a minimum grade of C- or ADMN 585 with a minimum grade of C-.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MKTG 644 - Retail Management in an Omnichannel World****Credits:** 4

Success in retail requires managing multiple channels - online, traditional brick & mortar, and hybrid combinations. This course examines a broad range of retail management topics covering retailer types, selection of channels and locations, understanding online and in-store shopper behavior, financial strategy, purchasing, merchandise assortments including across products and services retailing, pricing, visual merchandising, and customer service and experience.

**Prerequisite(s):** ADMN 585 with a minimum grade of C- or MKTG 550 with a minimum grade of C- or MKTG 535 with a minimum grade of C-.

**Equivalent(s):** MKTG 754**Grade Mode:** Letter Grading

**MKTG 649 - Foundations of Personal Selling****Credits:** 4

The Foundations of Personal Selling combines heavy experiential learning with the academic principles of relationship selling to prepare students for the professional world. Students learn personal selling as they develop an understanding of, and appreciation for, applying the consultative sales process through partnering with customers. This course is ideal for those exploring a career in sales or simply interested in knowing how to sell their own strengths.

**Equivalent(s):** MKTG 559, MKTG 759**Grade Mode:** Letter Grading**MKTG 650 - Professional Sales Group****Credits:** 2

The Professional Sales Group is an elite experiential sales and leadership course where students actively train for, host, and compete in sales competitions and business networking events. These sales role-play competitions use real business case scenarios, with corporate professionals and alumni as buyers & judges, to simulate selling experiences for the students. Students in good standing may retake the course.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MKTG 652 - Digital Marketing Agency****Credits:** 2

Voice Z gives students the opportunity to gain real-world marketing experience by working hand in hand with clients to create impactful and innovative digital marketing campaigns. Admission to the course is competitive through an application process each April for the following year. Students accepted into the Voice Z Digital Marketing Agency for the Fall Semester are expected to continue through the Spring semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MKTG 689 - Advanced Sales****Credits:** 4

Advanced Sales is for students looking to enter a professional sales career upon graduation. This course builds on the consultative and relationship selling processes, concepts and experiences in their sales introductory course. Students learn and practice adaptability through cases, exercises, and role-plays while introducing, and using, increasingly important sales enabling technologies. Key skill components covered include prospecting, time management, and communicating value through storytelling.

**Prerequisite(s):** (MKTG 559 with a minimum grade of D- or MKTG 649 with a minimum grade of D- or MKTG 759 with a minimum grade of D-).**Grade Mode:** Letter Grading**MKTG 720 - Topics in Marketing II****Credits:** 4

Special topics covering a variety of marketing principles, topics vary by semester.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MKTG 720T - Topics/Study Away****Credits:** 4

Special topics study away; may be repeated.

**Co-requisite:** INCO 589**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Grade Mode:** Letter Grading**Special Fee:** Yes**MKTG 720W - Topics in Marketing II****Credits:** 4

Special topics covering a variety of marketing principles, topics vary by semester.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MKTG 750 - Marketing Strategy****Credits:** 4

An integrative marketing course designed to provide the student with a cohesive understanding of marketing decision making through the exploration of marketing problems with an emphasis on qualitative analysis as well as strategy formulation. Through the use of case studies, the course is designed for students who want to learn and apply what they learn, and thus emphasizes both the understanding and the application of concepts and practices in marketing strategy. MKTG 752 and/or MKTG 753 are recommended prior to taking this course.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Equivalent(s):** ADMN 750**Grade Mode:** Letter Grading**MKTG 752 - Marketing Research****Credits:** 4

Understanding fundamental concepts, tools, and methods used in conducting a marketing research study. Taking general managerial problems and structuring them in terms of specific questions amenable to research. Developing a competence in designing and conducting common qualitative and quantitative research (e.g., survey research). Students will learn various statistic techniques commonly used in marketing research and be able to use these analyses to provide managerial recommendations.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Equivalent(s):** ADMN 752**Grade Mode:** Letter Grading**MKTG 753 - Consumer/Buyer Behavior****Credits:** 4

Covers concepts, models, and theories from the behavioral sciences applied to consumer decision making and purchasing behavior. Examines consumer behavior from economic, psychological, sociological, and anthropological perspectives. Topic coverage includes discussion of marketing strategies and tactics to understand and influence consumer choice.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Grade Mode:** Letter Grading**MKTG #756 - International Franchising****Credits:** 4

Designed to provide an understanding of franchising as a system of distribution and business expansion. Franchising is studied from both the perspectives of the franchise and the franchiser. In addition, economic, financial, and legal issues associated with franchising are covered. By the end of the course, students have skills and sources of information that permit sound assessment of the business opportunities available in franchising.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Equivalent(s):** HMG T #756**Grade Mode:** Letter Grading

**MKTG 757 - Integrated Marketing Communication****Credits:** 4

Provides balanced coverage of all marketing communication tools: advertising, sales promotion, public relations, direct marketing, personal selling, POP, packaging, sponsorships, licensing, and customer service. Emphasizes the integration of these tools to send target audiences a consistent, persuasive message that promotes the organization's goals.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Grade Mode:** Letter Grading**MKTG 760 - International Marketing****Credits:** 4

Environmental factors affecting international trade: culture and business customs, political and legal factors and constraints, economic and technological development, and the international monetary system. Integration of these with the marketing management functions of market research and segmentation; product, promotion, distribution, and pricing decisions.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Equivalent(s):** ADMN 760**Grade Mode:** Letter Grading**MKTG 763 - Marketing Analytics****Credits:** 4

Marketing Analytics introduces students to the fascinating world of marketing analytics. It provides a broad perspective on product, consumer, marketing-mix, and digital analytics areas. It blends the art and science of marketing and orients students to the systematic use of data and empirical models, which enhance the decision-making of a company about its customers, competitors, and the industry.

**Prerequisite(s):** ADMN 585 with a minimum grade of C- and ADMN 580 (may be taken concurrently) with a minimum grade of C-.**Grade Mode:** Letter Grading**MKTG 764 - New Product Development****Credits:** 4

Tactical and strategic issues concerned with the development and marketing of product and service innovations. Equips students with the concepts, tools, and approaches useful in the development, management, and marketing of products and services. Provides an integrated experience of the process of uncovering customer problems, understanding these problems, and providing superior solutions.

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Grade Mode:** Letter Grading**MKTG 765 - Applications in Digital Marketing****Credits:** 4

This class will introduce students to the different disciplines that make up digital marketing in order to better prepare them for roles as either digital marketing generalists (where they will need to appreciate and possess a broad understanding of these disciplines), or as digital marketing specialists, (where they will need to focus on and master one of these disciplines).

**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Grade Mode:** Letter Grading**MKTG 775 - Marketing Workshop****Credits:** 4

This course is open only to senior marketing option students and serves as their capstone learning experience. Students work in small teams on a real-world marketing problem given them by outside business, non-profits, or government agencies. The teams conduct extensive field research, formulate strategy, and then implement, or test marketing campaign ideas and programs. Completion of two of the following courses required prior to taking this course; MKTG 752, MKTG 753, or MKTG 763.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ADMN 585 with a minimum grade of C-.**Equivalent(s):** MKTG 762**Grade Mode:** Letter Grading

## Materials Science (MS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MS 401 - Science of Stuff****Credits:** 4

Materials Science is a relatively new and fast growing field that studies all types of materials, including metals, ceramics, polymers, semiconductors, and composites. Material Science explores how stuff is put together, how to change stuff and make it better, the properties and applications of stuff, and even how to make totally brand new stuff. This course explores materials from various topic areas, including sports, forensics, medicine and health, fashion, architecture and construction, music and art, food and transportation from the perspective of materials science. Students explore additional materials independently as well as practice the process of science through simple experimentation and data analysis.

**Attributes:** Physical Science(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**MS 402 - Nanoscience in Energy****Credits:** 4

An introduction to nanomaterials, or matter with important structural features that are nanometers in size. A nanometer is very small—a billionth of a meter; a sugar molecule is only about 1 nm wide. Scientists and engineers are now building materials by manipulating atoms or groups of atoms. The course explores how materials with nanoscale features demonstrate novel and beneficial properties for energy applications. The growing energy demands of the planet require timely, if not urgent, innovative multidisciplinary solutions. These solutions require an informed citizenry knowledgeable about the various perspectives related to powering our planet. This course is a means to inform the non-scientist student about the physical science aspects of energy, nanomaterial solutions for our energy needs, along with some historical, economic, and environmental perspectives. The energy discussion provides a backdrop for our exploration of the structure and properties of nanomaterials.

**Attributes:** Physical Science(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes

**MS 762 - Electronic Materials Science****Credits:** 4

This course provides engineering and science students with a foundation in the materials science of modern electronic devices. Topics include bonding and structure of solids, electrical and thermal conduction, elements of quantum mechanics, band theory of electrons in solids, semiconductors, magnetism, dielectrics and superconductors. Examples of applications are taken primarily from the fields of semiconductor electronics and nanotechnology, and illustrate how the electrical and optical properties of devices are obtained from their compositions, crystal structures and microstructures. Permission of instructor required.

**Grade Mode:** Letter Grading

## Mathematics & Statistics (MATH)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MATH 400 - Freshman Seminar****Credits:** 1

A seminar experience that presents a mathematical culture associated with first-year college mathematics, including the ideas of abstraction, theorem and proof, and that provides a perspective of the diversity of mathematical areas of research and their interrelationships. Emphasis is on reading and writing mathematics.

**Grade Mode:** Credit/Fail Grading**MATH 418 - Analysis and Applications of Functions****Credits:** 4

Analysis and applications of algebraic and transcendental functions, with special emphasis on exponential, logarithmic, and trigonometric functions. Graphical analysis. Written projects are required on some or all of the following topics: rates of change, optimization, logarithmic or exponential modeling, and trigonometric functions. Intended for students planning to take MATH 425. Not offered for credit if credit is received for MATH 424 or MATH 425.

**Grade Mode:** Letter Grading**MATH 420 - Finite Mathematics****Credits:** 0 or 4

Topics selected from probability, systems of linear equations, matrix algebra, linear programming, mathematics of finance. Not a preparation for calculus. Not offered for credit to mathematics majors.

**Attributes:** Quantitative Reasoning(Disc)**Mutual Exclusion:** No credit for students who have taken MATH 422.**Grade Mode:** Letter Grading**MATH 421 - Pathways between Mathematics and the Arts****Credits:** 4

Exploration of the interaction between mathematics and the arts on numerous levels. The course builds on basic knowledge of elementary number systems to illuminate such topics symmetry, fractals, light, color, sound structures and musical materials. Students immediately apply new knowledge and techniques to make computer generated 2-D and 3-D images, animations and sound/music.

**Attributes:** Quantitative Reasoning(Disc)**Grade Mode:** Letter Grading**MATH 422 - Mathematics for Business Applications****Credits:** 4

Functions, sets and their use in mathematical models in business, economics and finance, including probability, linear systems and mathematics of finance; basic concepts of differential calculus and relevant applications.

**Attributes:** Quantitative Reasoning(Disc)**Mutual Exclusion:** No credit for students who have taken MATH 420.**Grade Mode:** Letter Grading**Special Fee:** Yes**MATH 424A - Calculus for Social Sciences****Credits:** 4

Rational, exponential and logarithmic functions; associated derivatives and their applications; associated antiderivatives and their applications.

Applications focus on contexts relevant to majors in the College of Liberal Arts and the Paul College. Not offered for credit to CEPS majors. Repeat rule applies for MATH 425 and MATH 424B. Students wanting a two-semester calculus course are strongly advised to take MATH 425-426. Those students who successfully complete MATH 424A and subsequently wish to continue their study of mathematics with MATH 426 are encouraged to complete supplementary modules available from the Mathematics Center (MaC).

**Attributes:** Quantitative Reasoning(Disc)**Equivalent(s):** MATH 424B, MATH 425**Grade Mode:** Letter Grading**MATH 424B - Calculus for Life Sciences****Credits:** 0 or 4

Rational, exponential and logarithmic functions; associated with derivatives and their applications; associated with antiderivatives and their applications. Applications focus on contexts relevant to majors in the College of Life Sciences and Agriculture. Not offered for credit for CEPS majors. Repeat rule applies for MATH 425 and MATH 424A. Students wanting a two-semester calculus course are strongly advised to take MATH 425-426. Those students who successfully complete MATH 424B and subsequently wish to continue their study of mathematics with MATH 426 are encouraged to complete supplementary modules available from the Mathematics Center (MaC).

**Attributes:** Quantitative Reasoning(Disc)**Equivalent(s):** MATH 424A, MATH 425**Grade Mode:** Letter Grading**MATH 425 - Calculus I****Credits:** 4

Calculus of one variable covering limits, derivatives of algebraic, trigonometric, exponential, and logarithmic functions; applications include curve sketching, max-min problems, related rates, and volume and area problems. Beginning in Spring 2019 students who have taken MATH 418 may not take the placement test as a means of entry into MATH 425. (Repeat rule applies for MATH 424A and MATH 424B).

**Attributes:** Quantitative Reasoning(Disc)**Prerequisite(s):** MATH 418 with a minimum grade of C.**Equivalent(s):** MATH 424A, MATH 424B, MATH 425H**Mutual Exclusion:** No credit for students who have taken MTH 705.**Grade Mode:** Letter Grading

**MATH 425H - Honors/Calculus I****Credits:** 4

Calculus of one variable covering limits, derivatives of algebraic, trigonometric, exponential, and logarithmic functions; applications include curve sketching, max-min problems, related rates, and volume and area problems. (Not offered for credit if credit is received for MATH 424.)

**Co-requisite:** PHYS 407H**Attributes:** Honors course; Quantitative Reasoning(Disc)**Prerequisite(s):** MATH 418C with a minimum grade of C.**Equivalent(s):** MATH 425**Grade Mode:** Letter Grading**MATH 426 - Calculus II****Credits:** 4

Second course in calculus of one argument, techniques and applications of integration, polar coordinates, and series.

**Prerequisite(s):** MATH 425 with a minimum grade of D-**Equivalent(s):** MATH 426H**Mutual Exclusion:** No credit for students who have taken MTH 705, MTH 707.**Grade Mode:** Letter Grading**MATH 426H - Honors/Calculus II****Credits:** 4

Second course in calculus of one argument, techniques and applications of integration, polar coordinates, and series.

**Co-requisite:** PHYS 408H**Attributes:** Honors course**Prerequisite(s):** MATH 425 with a minimum grade of D-**Equivalent(s):** MATH 426**Grade Mode:** Letter Grading**MATH 439 - Statistical Discovery for Everyone****Credits:** 4

Introduces the framework and concepts for learning with data. Emphasis on statistical discovery in everyday life and on drawing valid conclusion from data. Topics include: good and bad data, data ethics, how to conduct a valid survey, how to describe a population distribution; when to believe a poll; how to design an experimental study; how to avoid ambiguous results caused by "lurking" variables; how to make inference about an entire population based on a sample; how to describe relationships among variables; an understanding of the question of causation and chance in everyday life and in scientific studies, as well as the use and misuse of statistics in explaining what is statistical significance. This course has an activity-based learning component with lab exercises using statistical software for calculations without assuming a calculus background. The course may be used as a preparation for a more technical introductory statistics course. Science and Engineering students should take MATH 539 or MATH 644 according to their programs.

**Attributes:** Quantitative Reasoning(Disc)**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, MATH 539, MATH 644, MTH 701, PSYC 402, PSYC 402H, SOC 402, SOC #402H, SOC 502, SOC 502H.**Grade Mode:** Letter Grading**MATH 444 - Excursions in Quantitative Reasoning****Credits:** 4

Problems involving quantitative reasoning (most are nontraditional, some are fun, while others are interdisciplinary) designed to inspire curiosity encourages students to formulate and evaluate questions, all the while slowly drawing them into the process of scholarly investigation. In this regard, in addition to traditional mathematics homework, students need to do research outside of class to write and present projects.

**Attributes:** Quantitative Reasoning(Disc); Inquiry (Discovery)**Grade Mode:** Letter Grading**MATH 445 - Mathematics and Applications with MATLAB****Credits:** 4

Through the use of the MATLAB computation software, this course reinforces and builds on a student's mathematics foundation and previews more advanced mathematical concepts. The power and limitations of modern computational algorithms to solve real world problems are introduced and shown to influence nearly every aspect of modern society. The state-of-the-art computational tools afforded by MATLAB provide the student with a strategy for enhancing their knowledge and comprehension in subsequent Science, Engineering, or Technology themed courses.

**Attributes:** Environment,TechSociety(Disc)**Prerequisite(s):** MATH 418 with a minimum grade of D-**Mutual Exclusion:** No credit for students who have taken IAM 550.**Grade Mode:** Letter Grading**MATH 525 - Linearity I****Credits:** 6

Examines the fundamental role that linear models play in science and engineering; and the role of linearization in understanding nonlinear phenomena. Models are considered along several conceptual axes: discrete to continuous, one-dimensional to multidimensional, and static to dynamic, with an emphasis on the former. Mathematical areas of coverage include matrix algebra, concepts from calculus of several variables, difference equations, and linear transformations. Lab.

**Prerequisite(s):** MATH 426 with a minimum grade of D-**Grade Mode:** Letter Grading**MATH 526 - Linearity II****Credits:** 6

Continuation of study of linear models and the process of linearization begun in MATH 525, with an emphasis on models of dynamic phenomena. Additional mathematical areas of coverage include differential equations, eigenvalue and eigenvector analysis, phase plane analysis, and additional concepts from vector calculus. Lab.

**Prerequisite(s):** MATH 525 with a minimum grade of D-**Grade Mode:** Letter Grading**MATH 527 - Differential Equations with Linear Algebra****Credits:** 0 or 4

Fundamental methods of solving first-order equations, essentials of matrix algebra; higher-order linear equations, and linear systems; series solutions; Laplace transforms; selected applications.

**Prerequisite(s):** MATH 426 with a minimum grade of D-**Equivalent(s):** MATH 527H**Mutual Exclusion:** No credit for students who have taken MTH 707.**Grade Mode:** Letter Grading

**MATH 528 - Multidimensional Calculus****Credits:** 0 or 4

Partial differentiation; composite functions and chain rules; maximum and minimum; transformations; vector algebra; vector functions; gradient, divergence, and curl; curves and surfaces; multiple, line, and surface integrals; divergence, Green's and Stoke's theorem.

**Prerequisite(s):** MATH 426 with a minimum grade of D-.**Mutual Exclusion:** No credit for students who have taken MTH 707.**Grade Mode:** Letter Grading**MATH 531 - Mathematical Proof****Credits:** 4

Introduces reading and writing proofs in mathematics. The basic language of mathematics common to all branches of the subject, especially set theory and basic logic.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 425 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 539 - Introduction to Statistical Analysis****Credits:** 4

A first course introducing concepts of probability and scientific methods for data analysis. Exploratory data analysis, survey sampling, probability, discrete and continuous distributions, confidence intervals, hypothesis testing, comparing samples, linear regression, analysis of variance.

Statistical software is used. Offered primarily for mathematics majors; engineering majors should take MATH 644.

**Prerequisite(s):** MATH 425 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, COMP 490, EREC 525, HHS 540, MATH 439, MATH 644, MTH 701, PSYC 402, PSYC 402H, SOC 402, SOC 502, SOC 502H.

**Grade Mode:** Letter Grading**MATH 545 - Introduction to Linear Algebra****Credits:** 4

Designed to reinforce ideas seen throughout the mathematics curriculum. Centered on a study of vector spaces and linear systems, beginning with a brief focus on systems of linear equations and progressing to a full discussion of linear transformation and vector spaces. The course includes a survey of properties of matrices, such as rank, kernel, eigenvalues, eigenvectors, and diagonalization.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 426 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken MATH 645, MATH 762, MTH 709.

**Grade Mode:** Letter Grading**MATH 601 - Exploring Mathematics for Teachers I****Credits:** 4

Provides prospective elementary teachers with the opportunity to explore and master concepts involving number systems and operations, data analysis and probability. Additional topics may include geometry, measurement, and algebraic thinking. Mathematical reasoning, problem solving, and the use of appropriate manipulatives and technology are integrated throughout the course. Readings, class discussions, and assignments focus on mathematics content as well as applicable theories of learning, curriculum resources, and state and national recommendations. The course models instructional techniques that can be adapted to the elementary curricula. (Not offered for credit if credit is received for MATH 621 or MATH 623; not offered for credit to CEPS majors.)

**Grade Mode:** Letter Grading**MATH 621 - Number Systems for Teachers****Credits:** 4

Ways of representing numbers, relationships between numbers, number systems, the meanings of operations and how they relate to one another, and computation within the number system as a foundation for algebra; episodes in history and development of the number system; and examination of the developmental sequence and learning trajectory as children learn number concepts.

**Equivalent(s):** MATH 701**Mutual Exclusion:** No credit for students who have taken MTH 703.**Grade Mode:** Letter Grading**MATH 622 - Geometry for Teachers****Credits:** 4

Explorations of the foundations of informal measurement and geometry in one, two and three dimensions. The van Hiele model for geometric learning is used as a framework for how children build their understanding of length, area, volume, angles and geometric relationships. Visualization, spatial reasoning and geometric modeling are stressed. As appropriate, transformational geometry, congruence, similarity and geometric constructions will be discussed.

**Grade Mode:** Letter Grading**MATH 623 - Probability and Statistics for Teachers****Credits:** 4

An introduction to probability, descriptive statistics and data analysis; exploration of randomness, data representation and modeling. Descriptive statistics will include measures of central tendency, dispersion, distributions and regression. Analysis of experiments requiring hypothesizing, experimental design and data gathering.

**Mutual Exclusion:** No credit for students who have taken MTH 701.**Grade Mode:** Letter Grading**MATH 624 - Analysis of Secondary School Mathematics****Credits:** 4

Examines concepts from calculus and pre-calculus mathematics with an emphasis on connecting and logically refining the concepts of function, limit, sequences, series, and probability. Includes a deeper analysis of problems and topics drawn from secondary school mathematics with the kind of mathematical knowledge and sophistication that the student has gained from other collegiate mathematics courses. Proofs for many of the theorems that are typically introduced in a non-rigorous fashion in calculus are studied. Offered in alternate years in the spring semester following MATH 623.

**Prerequisite(s):** EDUC 500 with a minimum grade of D- and MATH 425 with a minimum grade of D- and MATH 545 with a minimum grade of D-.

**Grade Mode:** Letter Grading**MATH #625 - Functions and Algebra for Teachers****Credits:** 4

Representation and analysis of mathematical structure using generalization and algebraic symbols and reasoning. Attention is given to transition from arithmetic to algebra, working with quantitative change, the description of and prediction of change, and concepts in discrete mathematics.

**Prerequisite(s):** MATH 621 with a minimum grade of D-.**Grade Mode:** Letter Grading

**MATH 632 - Financial Mathematics****Credits:** 4

A mathematical introduction to interest theory and an overview of mathematical models used to analyze and price standard financial instruments including: interest bearing accounts, stocks and bonds. Introduction to basic concepts used in mathematical finance including: random variables, mathematics of arbitrage, risk and diversification. Includes a substantive introduction to all aspects of the financial mathematics actuarial exam.

**Grade Mode:** Letter Grading**MATH 644 - Statistics for Engineers and Scientists****Credits:** 4

Introduces the design of controlled experiments and the collection and analysis of scientific data. Use of a statistical software package is an integral part of the course; interpreting and drawing conclusions from standard software output is emphasized. Graphical data analysis, statistical process control, regression and correlation, multifactor experimental designs, confidence intervals, hypothesis testing.

**Prerequisite(s):** MATH 426 (may be taken concurrently) with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, COMP 490, EREC 525, HHS 540, MATH 439, MATH 539, PSYC 402, PSYC 402H, SOC 402, SOC #402H, SOC 502, SOC 502H.

**Grade Mode:** Letter Grading**MATH 645 - Linear Algebra for Applications****Credits:** 4

Fundamental notions of vector space theory, linear independence, basis, span, scalar product, orthogonal bases. Includes a survey of matrix algebra, solution of systems linear equations, rank, kernel, eigenvalues and eigenvectors, the LU- and QR-factorizations, and least squares approximation. Selected applications in mathematics, science, engineering and business.

**Prerequisite(s):** MATH 426 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken MATH 545, MATH 762.

**Grade Mode:** Letter Grading**MATH 647 - Complex Analysis for Applications****Credits:** 4

Complex numbers, analytic functions, Cauchy-Riemann equations, conformal mapping, contour integration, Cauchy's integral formula, infinite series, residue calculus, Fourier and Laplace transforms. (Not offered for credit if credit is received for MATH 788.)

**Prerequisite(s):** MATH 528 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken MATH 788.

**Grade Mode:** Letter Grading**MATH 696 - Independent Study****Credits:** 1-4

Individual projects of study developed by the student and a faculty sponsor. Intended for students with superior scholastic achievement. May be taken as writing intensive. A written proposal, including goals and assessment, endorsed by a faculty sponsor and approved by the department chairperson, must be submitted before registering.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** MATH 696W

**Grade Mode:** Letter Grading**MATH 696W - Independent Study****Credits:** 1-4

Individual projects of study developed by the student and a faculty sponsor. Intended for students with superior scholastic achievement. A written proposal, including goals and assessment, endorsed by a faculty sponsor and approved by the department chairperson, must be submitted before registering.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** MATH 696

**Grade Mode:** Letter Grading**MATH 700 - Introduction to Mathematics Education****Credits:** 4

General background information about mathematics education, such as theories of learning and teaching mathematics, mathematics curricula, classroom management, and techniques for the teaching and learning of mathematics that are common to all levels of mathematics education K-12.

**Prerequisite(s):** MATH 426 with a minimum grade of D- and EDUC 500 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken EDC 731.

**Grade Mode:** Letter Grading**MATH 703 - Teaching of Mathematics in Grades K-5****Credits:** 4

Methods of teaching mathematics at the elementary school level; uses of technology, manipulatives, models, and diagrams; developing unit and lesson plans; assessment; instructional formats; teaching reading and writing in mathematics.

**Prerequisite(s):** MATH 621 with a minimum grade of D- or MATH 601 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken EDC 724, EDC 733.

**Grade Mode:** Letter Grading**MATH 709 - Teaching of Mathematics in Grades 6-12****Credits:** 4

Methods of teaching mathematics at the middle and high school levels; uses of technology, manipulatives, models, and diagrams; developing unit and lesson plans; assessment; instructional formats; teaching reading and writing in mathematics.

**Prerequisite(s):** MATH 700 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken EDC 733, EDC 734.

**Grade Mode:** Letter Grading**MATH 732 - Introduction to the R Software****Credits:** 1

This course provides a basic introduction to the open-sources statistical software R for students who have never used this software or have never formally learned the basics of it. Topics include: Numeric calculations, simple and advanced graphics, object management and work-flow, RStudio, user-contributed packages, basic programming, writing of functions, statistical modeling and related graphs, distributed computing, reproducible research and document production via markup language.

**Equivalent(s):** MATH 759

**Grade Mode:** Credit/Fail Grading

**MATH 734 - Statistical Computing****Credits:** 4

This is a course on statistics-oriented programming and common computational methodologies used in statistics. Students will learn principles and techniques of sample-splitting, cross-validation, simulation, bootstrap, and optimization, and how to implement them in R. The students will gain experience of reading/modifying, writing and debugging code, and how to speed up computation.

**Prerequisite(s):** MATH 738 with a minimum grade of D- or MATH 739 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 736 - Advanced Statistical Modeling****Credits:** 4

This is a course on statistical models behind normal linear model. Topics covered in this course include generalized linear model, linear mixed model, generalized additive model, generalized linear mixed model, generalized additive mixed model, and smoothing methods if time allows.

**Prerequisite(s):** MATH 739 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 737 - Statistical Methods for Quality Improvement and Design****Credits:** 4

Six Sigma is a popular, data-focused methodology used worldwide by organizations to achieve continuous improvement of their existing processes, products and services or to design new ones. This course provides a thorough introduction to the Six Sigma principles, methods, and applications for continuous improvement (DMAIC process) and an overview of Design for Six Sigma (DFSS). Both manufacturing and non-manufacturing (transactional Six Sigma) applications are included. Emphasis is placed on the use of case studies to motivate the use of, as well as the proper application of, the Six Sigma methodology. Formal Six Sigma Green Belt certification from UNH may be attained by successfully completing TECH 696.

**Prerequisite(s):** MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 738 - Data Mining and Predictive Analytics****Credits:** 4

An introduction to supervised and unsupervised methods for exploring large data sets and developing predictive models. Unsupervised methods include: market basket analysis, principal components, clustering, and variables clustering. Important statistical and machine learning methods (supervised learning) include: Classification and Regression Trees (CART), Random Forests, Neural Nets, Support Vector Machines, Logistics Regression and Penalized Regression. Additional topics focus on metamodeling, validation strategies, bagging and boosting to improve prediction or classification, and ensemble prediction from a set of diverse models. Required case studies and projects provide students with experience in applying these techniques and strategies. The course necessarily involves the use of statistical software and programming languages. Undergraduate students are required to have junior or senior status to enroll in this course.

**Prerequisite(s):** MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken IT 630.

**Grade Mode:** Letter Grading

**MATH 739 - Applied Regression Analysis****Credits:** 4

Statistical methods for the analysis of relationships between response and input variables: simple linear regression, multiple regression analysis, residual analysis and model selection, multi-collinearity, nonlinear curve fitting, categorical predictors, analysis of variance, analysis of covariance, examination of validity of underlying assumptions, logistic regression analysis. Emphasizes real applications with use of statistical software.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 740 - Design of Experiments I****Credits:** 4

Course in design of experiments with applications to quality improvement in industrial manufacturing, engineering research and development, or research in physical and biological sciences. Experimental factor identification, statistical analysis and modeling of experimental results, randomization and blocking, full factorial designs, random and mixed effects models, replication and sub-sampling strategies, fractional factorial designs, response surface methods, mixture designs, and screening designs. Focuses on various treatment structures for designed experimentation and the associated statistical analyses. Use of statistical software.

**Prerequisite(s):** MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 741 - Survival Analysis****Credits:** 4

Explorations of models and data-analytic methods used in medical, biological, and reliability studies. Event-time data, censored data, reliability models and methods, Kaplan-Meier estimator, proportional hazards, Poisson models, loglinear models. The use of statistical software, such as SAS, JMP, or R, is fully integrated into the course. (Offered in alternate years in the spring semester.)

**Prerequisite(s):** MATH 739 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 743 - Time Series Analysis****Credits:** 4

An introduction to univariate time series models and associated methods of data analysis and inference in the time domain and frequency domain. Topics include: auto regressive (AR), moving average (MA), ARMA and ARIMA processes, stationary and non-stationary processes, seasonal ARIMA processes, auto-correlation and partial auto-correlation functions, identification of models, estimation of parameters, diagnostic checking of fitted models, forecasting, spectral density function, periodogram and discrete Fournier transform, linear filters, parametric spectral estimation, dynamic Fournier analysis. Additional topics may include wavelets and long memory processes (FARIMA) and GARCH Models. The use of statistical software, such as JMP, or R, is fully integrated into the course. Offered in alternate years in the spring semester.

**Prerequisite(s):** MATH 739 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**MATH 744 - Design of Experiments II****Credits:** 4

A second course in design of experiments, with applications in quality improvement and industrial manufacturing, engineering research and development, research in physical and biological sciences. Covers experimental design strategies and issues that are often encountered in practice: complete and incomplete blocking, partially balanced incomplete blocking (PBIB), partial confounding, intra and inter block information, split plotting and strip plotting, repeated measures, crossover designs, Latin squares and rectangles, Youden squares, crossed and nested treatment structures, variance components, mixed effects models, analysis of covariance, optimizations, space filling designs, and modern screening design strategies.

**Prerequisite(s):** MATH 740 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 745 - Foundations of Applied Mathematics I****Credits:** 4

An introduction to Partial Differential Equations (PDEs) and associated mathematical methods and the analytical foundation for applied mathematics. Topics include: PDE classification, superposition, separation of variables, orthonormal functions, completeness, convergence, Fourier Series, Sturm-Liouville eigenvalue problems, and eigenfunctions. Methods are introduced for the analysis and solution of boundary value problems, in particular, the Heat, Wave, and Laplace equations.

**Prerequisite(s):** MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 746 - Foundations of Applied Mathematics II****Credits:** 4

An introduction to special functions, asymptotic analysis, and transform methods applied to partial differential equations. Topics include: Boundary value problems in cylindrical coordinates, the Bessel equation and Bessel functions, Fourier-Bessel expansions in cylindrically symmetric spatial domains, the Fourier Transform, the Hilbert Transform, Cosine and Sine Transforms, problems on semi-infinite intervals, and Asymptotic Analysis.

**Grade Mode:** Letter Grading**MATH 747 - Introduction to Nonlinear Dynamics and Chaos****Credits:** 4

The mathematics of chaos and nonlinear dynamics. Topics include linear and nonlinear systems of ordinary differential equations, discrete maps, chaos, phase plane analysis, bifurcations and computer simulations.

**Prerequisite(s):** MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D- and MATH 645 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 753 - Introduction to Numerical Methods I****Credits:** 4

Introduces mathematical algorithms and methods of approximation. Topics include a wide survey of approximation methods. Methods examined include polynomial interpolation, root finding, numerical linear algebra, numerical integration, and the approximation of differential equations. Included in each case is a study of the accuracy and stability of a given technique, as well as its efficiency.

**Prerequisite(s):** MATH 426 with a minimum grade of D- and (MATH 445 with a minimum grade of D- or CS 410 with a minimum grade of D- or IAM 550 with a minimum grade of D-).**Grade Mode:** Letter Grading**MATH 755 - Probability with Applications****Credits:** 4

Introduces the theory, methods, and applications of randomness and random processes. Probability concepts, random variable, expectation, discrete and continuous probability distributions, joint distributions, conditional distributions; moment-generating functions, convergence of random variables.

**Prerequisite(s):** MATH 528 with a minimum grade of D- and (MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-).**Grade Mode:** Letter Grading**MATH 756 - Principles of Statistical Inference****Credits:** 4

Introduces the basic principles and methods of statistical estimation and model fitting. One- and two-sample procedures, consistency and efficiency, likelihood methods, confidence regions, significance testing, Bayesian inference, nonparametric and re-sampling methods, decision theory.

**Prerequisite(s):** MATH 755 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 757 - Mathematical Optimization for Applications****Credits:** 4

This course introduces the foundations of mathematical optimization and reinforces them via applications. The content includes convex optimization, first and second-order methods, constrained problems, duality, linear and quadratic programming, as well as discrete and non-convex optimization. Applications will focus on machine learning methods but also include problems from engineering and operations research. Programming proficiency in MATLAB, R, Java, C, Python, or equivalent is required prior to taking this course.

**Prerequisite(s):** MATH 426 with a minimum grade of D-.**Equivalent(s):** CS 757**Grade Mode:** Letter Grading**MATH 760 - Geometry****Credits:** 4

Advanced approach to fundamental properties of Euclidean and other geometries through deductive reasoning and proof.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 761 - Abstract Algebra****Credits:** 4

This course establishes the axiomatic framework that underlies number systems and similar mathematical structures, investigating basic properties of groups, rings, fields and their homomorphisms.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 763 - Abstract Algebra II****Credits:** 4

This course extends the investigations of MATH 761 into more specialized situations related to old and new problems in mathematics, such as the nature of solutions of polynomial equations. It presents advanced properties of groups, rings, fields and their applications.

**Prerequisite(s):** MATH 761 with a minimum grade of D-.**Grade Mode:** Letter Grading

**MATH 765 - Introduction to Commutative Algebra and Algebraic Geometry****Credits:** 4

Methods of determining solution sets of polynomial systems; affine varieties and their ideals; the 'algebra-geometry correspondence'; theory and applications of Grobner bases.

**Prerequisite(s):** MATH 761 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 767 - One-Dimensional Real Analysis****Credits:** 4

Theory of limits, continuity, differentiability, and integrability.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 768 - Real Analysis II****Credits:** 4

Theory of integration; series; power series and uniform convergence of power series.

**Grade Mode:** Letter Grading**MATH 769 - Introduction to Differential Geometry****Credits:** 4

Introduction to the study of geometric properties of curves and surfaces in 3-dimensional space.

**Prerequisite(s):** MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D- and MATH 645 with a minimum grade of D-.

**Grade Mode:** Letter Grading**MATH 770 - Foundations of Number Theory****Credits:** 4

Factorization and prime numbers, arithmetic functions, congruences, reciprocity laws, quadratic forms, Diophantine equations, computational number theory. Offered in alternate years.

**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 772 - Combinatorics****Credits:** 4

Graph theory (including planar graphs, graph coloring, Hamiltonian circuits, trees); counting principles (including permutations, combinations, pigeonhole principle, inclusion-exclusion principle); and related topics.

**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 776 - Logic****Credits:** 4

Examination of the basic notions of soundness and completeness, first for sentential and then for propositional logic. Turning to the question of decision procedures for logical formulae, the concept of recursive function, which emerges in the work of Church and Turing, provides the essential link between logic and theory of computation. The course culminates with Godel's Incompleteness Theorems, which demonstrate the intrinsic limitations of the logical method. Offered in alternate years.

**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 783 - Set Theory****Credits:** 4

Axiomatic set theory, including its history. Cantor's theory of infinite cardinal and ordinal numbers seemed laden with contradictions and paradoxes. A satisfactory treatment of these difficulties came with the axiomatic set theory of Zermelo and Fraenkel. This course develops the Zermelo-Fraenkel axioms and examines cardinal and ordinal arithmetic in the context they provide. The course then investigates the consequences of various additional axioms extending Zermelo-Fraenkel, such as the Axiom of Choice, the Continuum Hypothesis, large cardinal axioms of determinacy. Offered in alternate years.

**Prerequisite(s):** MATH 531 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 784 - Topology****Credits:** 4

Open sets, closure, base, and continuous functions; connectedness, compactness, separation axioms, and metrizable.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 767 with a minimum grade of D-.**Grade Mode:** Letter Grading**MATH 788 - Complex Analysis****Credits:** 4

Complex functions, sequences, limits, differentiation and Cauchy-Riemann equations, elementary functions, Cauchy's theorem and formula, Taylor's and Laurent's series, residues, conformal mapping. Not offered for credit if credit is received for MATH 647.

**Prerequisite(s):** MATH 767 with a minimum grade of D-.**Mutual Exclusion:** No credit for students who have taken MATH 647.**Grade Mode:** Letter Grading**MATH 790 - Historical Foundations of Mathematics****Credits:** 4

Historical development of number theory, geometry, probability, algebra, and analysis. Study of the significant mathematical contributions to these topics made by prominent mathematicians spanning several historical periods.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** MATH 531 with a minimum grade of D- or MATH 545 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken MTH 706.**Grade Mode:** Letter Grading**MATH 796 - Topics****Credits:** 1-4

New or specialized courses not covered in regular course offerings.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**MATH 797 - Senior Seminar****Credits:** 4

Exploration of mathematical topics beyond the student's previous coursework in the seminar format. The course focus is on independent research, collaborative work and classroom engagement; oral presentations and written work are required.

**Grade Mode:** Letter Grading

**MATH 798 - Senior Project****Credits:** 4

Students work either individually or as a group under the direction of a faculty sponsor to plan and carry out an independent research project resulting in a written report and presentation to the department. Students must submit a written proposal approved by a faculty sponsor and by the department chairperson before registering.

**Grade Mode:** Letter Grading**MATH 799 - Senior Thesis****Credits:** 2 or 4

Students work under the direction of a faculty sponsor to plan and carry out independent research resulting in a written thesis. Required for honors-in-major. Students must submit a written proposal approved by a faculty sponsor and by the department chairperson before registering.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Letter Grading

## Mathematics (MTH) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MTH 402 - Math for Our World****Credits:** 4

This course takes an integrated approach to the study of mathematics, combining mathematical concepts with applications in the real world. It addresses topics in mathematics necessary in a college education, providing the reasoning strategies needed for mathematical problem solving in the workplace, the media, and everyday life. The course serves as the foundation for higher-level math courses and provides the quantitative skills necessary to be adequately prepared for coursework in other academic areas. The overarching goal is to learn to interpret quantitative and statistical information that we encounter daily. Students will understand how real-world problems can be analyzed using the power and rigor of mathematical and statistical models. Topics include: problem solving, math of finance, geometry, basic probability, and beginning statistical concepts with an emphasis on real world applications and interpreting information. The use of Excel will be incorporated into the topics of this course. Acceptable scores on Accuplacer Arithmetic and Elementary Algebra Accuplacer Classic or Next Generation Accuplacer assessments; or approved exemption based on previous high school transcripts: a grade of C or better in both Algebra and Geometry taken within the last five years; or SAT Math score of 500+ or ACT Math score of 18+ taken within five years of registration; or successful completion of the ALEKS Program Math Tutorial as determined by the college's math faculty required. Accuplacer or ALEKS assessments should be completed within five years of registering for course.

**Attributes:** Mathematics (Gen Ed); Quantitative Reasoning(Disc)

**Prerequisite(s):** (Classic Arithmetic Accuplacer with a score of 080 and CL Elem Algebra - Accuplacer with a score of 036) or (Arithmetic Accuplacer-Next Gen with a score of 263 and Quant,Alg,Stats Accp-Next Gen with a score of 237) or C MATH 405/or taken elsewhere with a score of WAIV or SAT Math with a score of 500 or ACT Reading with a score of 18 or GSC Math Workshop Completed with a score of WAIV.

**Equivalent(s):** MATH 502G**Grade Mode:** Letter Grading**MTH 504 - Statistics****Credits:** 4

This course addresses introductory statistical concepts, methods, and procedures important for making well-informed decisions in real world settings. It provides students with both theoretical principles and practical skills in statistics. Topics include an overview of descriptive and inferential statistics, specifically sampling, measurements of central tendency and dispersion, frequency distributions, graphing techniques, probability theory, hypothesis testing, normal distribution, regression and correlation, t-tests, and analysis of variance. An acceptable score on the Classic or Next Generation Accuplacer arithmetic and elementary algebra assessment. Accuplacer assessments should be completed within five years of registering for course. NOTE: Excel proficiency is expected prior to enrollment in this course.

**Attributes:** Mathematics (Gen Ed); Quantitative Reasoning(Disc)

**Prerequisite(s):** MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.

**Equivalent(s):** MATH 504G**Grade Mode:** Letter Grading**MTH 510 - Pre-Calculus****Credits:** 4

This course is intended as a bridge course between algebra and calculus. The course focuses on strengthening the student's mathematical problem solving skills and developing a firm understanding of functions, their graphical representation, their behavior, and their use to model real-life situations. Various classes of functions will be highlighted: polynomials, rational, exponential, logarithmic, and trigonometric. Topics may also include: algebraic concepts, real number system, systems of equations and inequalities, complex numbers, and polar coordinates. An acceptable score on the Classic or Next Generation Accuplacer assessment(s) is accepted prior to taking this course. Accuplacer assessments should be completed within five years of registering for course. A graphing calculator is required.

**Attributes:** Mathematics (Gen Ed); Quantitative Reasoning(Disc)

**Prerequisite(s):** MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.

**Equivalent(s):** MATH 510G**Grade Mode:** Letter Grading**MTH 544 - Special Topics: Lower Level****Credits:** 1-4

A study of current and variable topic in mathematics. Course content will change from term to term.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** MATH 544G**Grade Mode:** Letter Grading

**MTH 701 - Probability and Statistics****Credits:** 4

In this course students study topics in data analysis including: descriptive and inferential statistics, probability, odds and fair games, probability distributions, normal distributions, and estimation. Among the topics are numerical and graphical summaries for one and two variables, linear regression and correlation, confidence intervals and tests concerning means, sampling and experimentation, basic probability, confidence intervals, hypothesis testing, sampling distributions, two-sample t-tests for means, chi-squared tests, regress and correlation, and possible other topics. A standards statistical software package is used throughout the course to support the course format that includes: hands-on activities, computer-based simulations, creating and implementing student developed investigations, and actual secondary and middle school mathematics classroom activities. Throughout the course students are given opportunities to relate the mathematical concepts studied in this course to the mathematical concepts they will be teaching.

**Prerequisite(s):** MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.

**Equivalent(s):** MATH 603G

**Mutual Exclusion:** No credit for students who have taken MATH 439, MATH 539, MATH 623.

**Grade Mode:** Letter Grading

**MTH 702 - Mathematical Proof****Credits:** 4

This course introduces students to the language and methods used to create and write mathematical proofs and solve problems. Methods of proof will include: direct, contrapositive, contradiction, and induction. Methods of problem solving will be based on Polya's four steps for problem solving. Students will learn about and utilize the many functions of proof including: verification, explanation, communication, discovery, justification, and inquiry. The course will also explore the relationship between problem solving and the process of proving. Students will explore fundamental abstract concepts in mathematics chosen from the following areas: functions and relations, set theory, number theory, and logic, Euclidian and non-Euclidian geometry, algebra, mathematical reasoning, proof, and problem solving. Connections to middle and secondary school mathematics.

**Prerequisite(s):** MTH 510 with a minimum grade of D- or MATH 510G with a minimum grade of D-.

**Equivalent(s):** MATH 600G

**Grade Mode:** Letter Grading

**MTH 703 - Number Systems****Credits:** 4

This course examines the structure and properties of mathematics while focusing on the development of mental mathematics strategies and problem solving skills. Topics include sets, functions, applications of rational numbers, integers, fractions, decimals, percentages, and number theory. Appropriate grade level techniques are utilized to investigate algorithms, probability and statistics, counting techniques, scientific notation, complex numbers, exponents, geometry, and measurement. Students will also investigate ratios, proportion, data analysis, patterns, and the connections to algebra and geometry topics in the context of the 5-12 grades mathematics curriculum.

**Prerequisite(s):** MTH 510 with a minimum grade of D- or MATH 510G with a minimum grade of D-.

**Equivalent(s):** MATH 601G

**Mutual Exclusion:** No credit for students who have taken MATH 621.

**Grade Mode:** Letter Grading

**MTH 704 - Geometric Structures****Credits:** 4

This course will examine concepts in Euclidean and non-Euclidean geometries. Course topics include area and volume, two- and three-dimensional perspective, congruence and similarity, properties of and relationships among geometric shapes and structures. Students will investigate graphing, vectors, motion, and symmetry. Students engage in course concepts through proofs, problem solving, dynamic geometric software, and through activities used in secondary and middle school mathematics. Throughout the course students will be given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.

**Prerequisite(s):** MTH 510 with a minimum grade of D- or MATH 510G with a minimum grade of D-.

**Equivalent(s):** MATH 602G

**Grade Mode:** Letter Grading

**MTH 705 - Calculus I****Credits:** 4

This course is the first semester of a calculus sequence dealing with applications and modeling of the differential and integral calculus. The course focuses on functions and their graphs, limits, continuity, differentiation, integration, the derivative and its uses in optimization and mathematical modeling, as well as the Fundamental Theorem. Throughout the course students are given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching. Graphing calculators are used throughout the course to explore and represent concepts.

**Prerequisite(s):** MTH 510 with a minimum grade of D- or MATH 510G with a minimum grade of D-.

**Equivalent(s):** MATH 606G

**Mutual Exclusion:** No credit for students who have taken MATH 425, MATH 426.

**Grade Mode:** Letter Grading

**MTH 706 - History of Mathematics****Credits:** 4

This course addresses the historical development of major themes in mathematics, including calculation, numbers, geometry, algebra, infinity, and formalism in various civilizations ranging from the antiquity of Babylonia and Egypt through classical Greece, the Middle and Far East, and on to modern Europe. The course emphasizes how earlier civilizations influenced or failed to influence later ones and how the concepts evolved in these various civilizations.

**Prerequisite(s):** MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D-.

**Equivalent(s):** MATH 608G

**Mutual Exclusion:** No credit for students who have taken MATH 790.

**Grade Mode:** Letter Grading

**MTH 707 - Calculus II****Credits:** 4

This course is the second semester of a calculus sequence dealing with applications of differential and multivariable calculus. Topics include the calculus of transcendental functions, applications of integration, some differential equations, sequences and series, differentiation and integration of trigonometric functions multidimensional calculus with applications, and an introduction to multivariable calculus. Throughout the course students are given opportunities to relate the mathematical concepts studies to the mathematical concepts they will be teaching. Graphing calculators are used throughout the course to explore and represent concepts.

**Prerequisite(s):** MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D-.

**Equivalent(s):** MATH 607G

**Mutual Exclusion:** No credit for students who have taken MATH 426, MATH 527, MATH 528.

**Grade Mode:** Letter Grading

**MTH 708 - Discrete Mathematics****Credits:** 4

This course is designed to introduce students to discrete and abstract mathematical topics. Topics include propositional and predicate logic; elementary set theory; introduction to proof techniques including mathematical induction; sets, relations, functions, and relations; recurrence relations, graph theory, as well as the properties of groups, rings, and fields. Students study number systems, mathematical induction, algorithms and complex number systems, matrix manipulation, combinatorics, graph theory, and finite differences. Course activities are based on secondary and middle school mathematics curricula. This course considers the basic objects of mathematics through real-world examples and the methods used to elucidate their properties.

**Prerequisite(s):** MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D-.

**Equivalent(s):** MATH 605G

**Grade Mode:** Letter Grading

**MTH 709 - Linear Algebra****Credits:** 4

This course examines concepts in algebra including: patterns and functions, arithmetic sequences, geometric sequences, arithmetic and algebra of the integers, least common multiple and greater common divisor, inequalities, modular arithmetic and systems of numbers, properties of groups and fields, the field of complex numbers, polynomial arithmetic and algebra, linear equations. The course develops the mathematical structures, algebraic properties, and applications of matrices, determinants, vectors, vector spaces, systems of linear equations, and linear transformations. Students engage with these concepts through exploration, analysis, proof, and problem solving based on activities used in secondary and middle school mathematics. Throughout the course students are given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.

**Prerequisite(s):** MTH 707 with a minimum grade of D- or MATH 607G with a minimum grade of D-.

**Equivalent(s):** MATH 604G

**Mutual Exclusion:** No credit for students who have taken MATH 545.

**Grade Mode:** Letter Grading

**MTH 710 - Algebra Theory for Middle School Teachers****Credits:** 4

This course will examine concepts in algebra including patterns and functions, arithmetic sequences, geometric sequences, arithmetic and algebra of the integers, least common multiple and greatest common divisor, inequalities, modular arithmetic and systems of numbers, basic properties of groups and fields, and polynomial arithmetic and algebra. This course will develop mathematical structures, algebraic properties, and applications of matrices. Students will engage with these concepts through exploration, analysis, proof, and problem solving based on activities used in middle school mathematics. Throughout the course students will be given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.

**Prerequisite(s):** (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-) and (MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D-).

**Equivalent(s):** MATH 609G

**Grade Mode:** Letter Grading

**MTH 744 - Special Topics: Upper Level****Credits:** 1-4

A study of current and variable topics in mathematics. Course content will change from term to term.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** MATH 644G

**Grade Mode:** Letter Grading

## Mechanical Engineering (ME)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**ME 441 - Introduction to Engineering Design and Solid Modeling****Credits:** 0 or 4

Why are some products better than others? What is the definition of "better"? This course uses an inquiry-guided approach to explore the product design process via team design projects and laboratory exercises. Everyday products are examined from historical, societal, design, safety and manufacturing perspectives. Topics include ideation, sketching, design constraints, solid modeling, decision making, statistical quality control, manufacturing methods and engineering analysis. Students develop an appreciation for good design and the ability to communicate design ideas via 3-D solid models, written and oral reports.

**Attributes:** Inquiry (Discovery); Writing Intensive Course

**Prerequisite(s):** MATH 418 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ME 477 - Introduction to Solid Modeling****Credits:** 1

Introduction to solid modeling and engineering drawings using computer-aided design software. For Mechanical Engineering students, this course can only be taken with permission as an alternative to the required ME 441 Introduction to Engineering Design and Solid Modeling for students with extensive engineering design experience (e.g., high school or another university course), an engineering project based program (e.g., FIRST Robotics or Project Lead the Way), or similar experience (e.g., working in the industry). Students should not take both ME 441 and ME 477. Lecture and Lab.

**Grade Mode:** Letter Grading

**ME 503 - Thermodynamics****Credits:** 3

Properties of a pure substance, work and heat, laws of thermodynamics, entropy, thermodynamic relations, cycles.

**Prerequisite(s):** PHYS 407 with a minimum grade of D- and CHEM 405 (may be taken concurrently) with a minimum grade of D- and MATH 528 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading**ME 525 - Statics****Credits:** 4

Introduces statics. Two- and three-dimensional force systems, the concept of equilibrium, analysis of trusses and frames, centroids, bending moment and shear force diagrams, and friction.

**Prerequisite(s):** (PHYS 407 with a minimum grade of C and MATH 426 with a minimum grade of C+) or (PHYS 407 with a minimum grade of C+ and MATH 426 with a minimum grade of C).

**Equivalent(s):** CEE 500, CIE 525, CIE 528**Grade Mode:** Letter Grading**ME 526 - Mechanics of Materials****Credits:** 3

Introduces strength of materials. Analysis of members under torsion, axial, shear and bending stresses, superposition of stresses, stability of columns.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ME 525 with a minimum grade of D-.**Equivalent(s):** CEE 501, CIE 526, CIE 529**Grade Mode:** Letter Grading**ME 561 - Introduction to Materials Science****Credits:** 4

The concepts of materials science and the relation of structure of material properties. Atomic structure, bonding material transport, mechanical properties of materials, solidification, phase diagrams, solid state transformations, and corrosion and oxidation. Laboratory exercises are carried out to demonstrate the basic concepts of the course.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MATH 425 with a minimum grade of D- and (CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).**Equivalent(s):** ME 661**Grade Mode:** Letter Grading**ME 603 - Heat Transfer****Credits:** 3

Analysis of phenomena; steady-state and transient conduction, radiation, and convection; engineering applications.

**Prerequisite(s):** MATH 527 with a minimum grade of D- and ME 608 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 608 - Fluid Dynamics****Credits:** 0 or 3

Dynamics and thermodynamics of compressible and incompressible fluid flow; behavior of fluids as expressed by hydrostatic, continuity, momentum, and energy equations.

**Prerequisite(s):** ME 503 with a minimum grade of D- and (MATH 527 (may be taken concurrently) with a minimum grade of D- and IAM 550 (may be taken concurrently) with a minimum grade of D-).

**Equivalent(s):** ME 508**Grade Mode:** Letter Grading**ME 627 - Dynamics****Credits:** 3

Introduction to particle and rigid body dynamics. Rectilinear and curvilinear motion, translation and rotation, momentum and impulse principles, and work-energy relationships.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ME 525 with a minimum grade of D-.**Equivalent(s):** CIE 527, ME 527**Grade Mode:** Letter Grading**ME 643 - Machine Design****Credits:** 3

Analysis, synthesis, and design of machine elements and systems. Development of engineering judgment; selection of materials stress and failure analysis; kinematic arrangement design for finite and infinite life. Open-ended design problems unify course topics.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ME 526 with a minimum grade of D- and ME 561 with a minimum grade of D- and ME 627 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 646 - Experimental Measurement and Data Analysis****Credits:** 0 or 4

Basic and advanced techniques of engineering and scientific parameter measurement including statistical data and error analysis, curve fitting, calibration and application of transducers, and technical writing. Laboratory experiments draw on concepts from mechanics, thermodynamics, and fluid mechanics.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ME 526 with a minimum grade of D- and ME 608 (may be taken concurrently) with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 670 - Systems Modeling, Simulation, and Control****Credits:** 4

Lumped parameter models for mechanical, electrical, thermal, fluid, and mixed systems. Matrix representation, eigenvalues, eigenvectors, time domain solutions, frequency response plots, and computer simulations are used to explore system response. Design of system for desired responses. Introduces feedback control, stability, and performance criteria.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ECE 537 with a minimum grade of D- and ME 627 with a minimum grade of D- and MATH 527 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 696 - Projects****Credits:** 1-4

Analytical, experimental, or design projects undertaken individually or in teams under faculty guidance. May be repeated for credit.

**Grade Mode:** Letter Grading**ME #699 - Engineering Internship****Credits:** 1

Internship experience provides on-the-job reinforcement of academic programs in mechanical engineering. Contact the Mechanical Engineering department office for guidelines. Appropriate class standing in major with 2.5 grade point average required.

**Repeat Rule:** May be repeated for a maximum of 3 credits.**Grade Mode:** Credit/Fail Grading

**ME 705 - Thermal System Analysis and Design****Credits:** 4

Engineering design of thermal systems that involve real problems and analysis of performance of the design. Design criteria include function, performance, optimization, economy, safety, and others as appropriate for the system. Required for ME seniors.

**Co-requisite:** ME 608**Attributes:** Writing Intensive Course**Prerequisite(s):** ME 503 with a minimum grade of D-.**Equivalent(s):** ME 605**Grade Mode:** Letter Grading**ME 706 - Renewable Energy: Physical and Engineering Principles****Credits:** 3

The goal of this course is to become "Fluent in energy" and to learn about the engineering fundamentals of renewable energy technologies. The course will begin by giving an overview of U.S. energy usage and sources, as well as history and trends. Various renewable energy topics will then be discussed. Where applicable, topics will be discussed in detail from a fluid and thermal sciences point of view. Guest lecturers and a field trip may be included. This course is open to all engineering seniors.

**Prerequisite(s):** ME 608 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 707 - Analytical Fluid Dynamics****Credits:** 4

Kinematics of flow; constitutive relationships; development of the Navier-Stokes equations; vorticity theorems; potential flow.

**Prerequisite(s):** ME 608 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 709 - Computational Fluid Dynamics****Credits:** 3

Conservation of mass, momentum, and energy, discretization schemes, boundary and initial conditions, turbulence and turbulence models, two-equation models, CFD software such as OpenFOAM, best practice guidelines for CFD. The class incorporates the use and creation of Open Educational Resources (OER).

**Grade Mode:** Letter Grading**ME 710 - Experimental Fluid Dynamics****Credits:** 4

This course will introduce students to a variety of experimental methods and techniques for the measurement of fluid flow. Topics include signal processing and analysis, pressure measurement, thermal anemometry, imaging, and advanced laser based optical diagnostics. The knowledge gained in this course is intended to help students carry out advanced research in fluid mechanics at the graduate level or in an industrial research lab setting.

**Prerequisite(s):** ME 603 with a minimum grade of D- and ME 608 with a minimum grade of D- and ME 646 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 712 - Waves in Fluids****Credits:** 3

Linear and nonlinear dynamics of hyperbolic and dispersive wave systems with application to acoustic waves, surface and internal gravity waves, Rossby waves, and capillary waves. Key physical concepts include wave-generation mechanisms, wavelength and amplitude dispersion, group velocity and energy propagation, steady streaming, and mode interactions.

**Prerequisite(s):** ME 608 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 717 - Marine Robotics and Applications****Credits:** 3

The purpose of this course is to cover (in lecture and lab format) the broad spectrum of marine vehicles and applications, as well as what is involved in designing and building robotic vehicles for specific missions. Course topics include: marine applications, sensors for marine environments, vehicle subsystems, ocean and open water environment, dynamic modeling and control, and design/fabrication/testing. Various invited speakers (both scientists and engineers) provide learning modules on various marine robotic related topics.

**Co-requisite:** ME 670**Equivalent(s):** OE 717**Grade Mode:** Letter Grading**ME 726 - Fracture Mechanics****Credits:** 4

The goal is to acquaint the student with understanding of the basic principles behind the derivation of the most common linear and non-linear fracture mechanical equations. The aim is also to gain knowledge in analytical predictions of the failure of materials and become familiar with the ongoing fracture mechanical research. The motivation for this course is that many practical problems in mechanical engineering, manufacturing and materials science have to do with material deformation and failure.

**Prerequisite(s):** ME 526 with a minimum grade of D- and ME 561 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME 727 - Advanced Mechanics of Solids****Credits:** 4

Stress, strain, stress-strain relations, anisotropic behavior, introduction to elasticity, plane stress/strain, bending and torsion of members with general cross-sections introduction to thin plates and shells, energy methods.

**Prerequisite(s):** ME 526 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME #730 - Mechanical Behavior of Materials****Credits:** 4

Elastic and inelastic behavior of materials in terms of micro- and macro-mechanics. Stress, strain, and constitutive relations related to recent developments in dislocation theory and other phenomena on the atomic scale and to the continuum mechanics on the macroscopic scale. Elasticity, plasticity, viscoelasticity, creep, fracture, and damping. Anisotropic and heterogeneous materials.

**Prerequisite(s):** ME 526 with a minimum grade of D- and ME 561 with a minimum grade of D-.**Grade Mode:** Letter Grading**ME #735 - Mechanics of Composite Materials****Credits:** 4

Classification of composites. Anisotropy of composite materials. Micromechanical predictions of elastic and hygrothermal properties. Strength and failure of composite materials. Analysis of laminates. Experimental methods for characterization of composites.

**Prerequisite(s):** ME 526 with a minimum grade of D-.**Grade Mode:** Letter Grading

**ME 742 - Materials Processing in Manufacturing****Credits:** 4

Description and analysis of major material shaping processes in modern manufacturing. Casting: fluid flow and heat transfer, solidification, casting processes, properties of cast components and geometric capabilities. Forming: plasticity and formability, bulk and sheet metal forming processes, properties of formed components and geometric capabilities. Machining: cutting forces and tool wear, machining processes, properties of machined components and geometric capabilities. Overview of some non-conventional processes. Lab demonstrations.

**Prerequisite(s):** ME 526 with a minimum grade of D- and ME 561 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ME 743 - Satellite Systems, Dynamics, and Control****Credits:** 3

General satellite systems with emphasis on spacecraft dynamics and control. Topics include general satellite information such as types of satellites, missions, and orbits, as well as satellite subsystems. Basic spacecraft dynamics and orbital mechanics topics are covered. Advanced topics include attitude and orbit estimation, and automatic attitude control.

**Prerequisite(s):** ME 670 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ME 747 - Experimental Measurement and Modeling of Complex Systems****Credits:** 0 or 4

Experimental measurements for evaluation, design, and control of mechanical, electrical, and thermal/fluid phenomena. Emphasizes the dynamic response of both sensors and systems and the interactions between physical processes. Experimental examples are drawn from mechanics, material science, thermal-fluid science and controls.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ME 646 with a minimum grade of D- and ME 670 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ME 755 - Senior Design Project I****Credits:** 2

Part I of this two-part sequence emphasizes problem definition, analysis, development of alternative concepts, decision-making processes, synthesis of an optimum solution and the development of a conceptual design. Lectures on these and other topics are combined with seminars given by professionals from industry, government, and academia. Related topics include ISO9000 quality systems, engineering management, design review process, engineering economics, team building and communications. Students are organized into project teams to develop a conceptual design. Formal design reviews are conducted. A formal proposal documents the semester's work.

**Attributes:** Writing Intensive Course

**Equivalent(s):** ME 656

**Grade Mode:** Letter Grading

**ME 756 - Senior Design Project II****Credits:** 2

Continuation of Senior Design Project I, in which the proposal submitted in the previous course is developed into a prototype system. Part II emphasizes the development, assembly, testing and evaluation of the system designed in Part I. Lectures and seminars focus on the prototype development process, design verification and industry practices. A formal report documents the semester's work.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ME 755 with a minimum grade of D-.

**Equivalent(s):** ME 656

**Grade Mode:** Letter Grading

**ME #761 - Diffraction and Imaging Methods in Materials Science****Credits:** 4

Introduces x-ray diffraction and electron microscopy. Basic crystallography, reciprocal lattice, x-ray and electron diffraction, x-ray methods, transmission and scanning electron microscopy. Lab.

**Prerequisite(s):** (CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D-) and PHYS 408 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ME 772 - Control Systems****Credits:** 0 or 4

Development of advanced control system design concepts such as Nyquist analysis, lead-lag compensation, state feedback, parameter sensitivity, controllability, observability, introduction to non-linear and modern control. Includes interactive computer-aided design and real-time digital control. Lab.

**Prerequisite(s):** ME 747 with a minimum grade of D-.

**Equivalent(s):** ECE 772, EE 772

**Grade Mode:** Letter Grading

**ME 777 - Computer Aided Engineering****Credits:** 4

In this course, modules of Solid Works (beyond its basic solid modeling capabilities) and other software is used to demonstrate how computer based tools can be used in engineering practice, in particular design analysis and optimization. Emphasis placed on using knowledge from past engineering courses to obtain theoretical calculations to compare with the results from the computer software package.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** ME 526 with a minimum grade of D- and ME 627 with a minimum grade of D- and ME 603 with a minimum grade of D- and ME 608 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**ME #782 - Industrial Skills and Engineering****Credits:** 3

In this course, the principles of Lean Manufacturing and Value Stream Mapping (VSM) as pioneered by Toyota and now utilized by most leading manufacturers will be studied and applied. Lean Manufacturing principles will be taught with classroom instruction and a structured model factory exercise. Instruction on the theory of Value Stream Mapping (VSM) will be followed with an actual industrial VSM activity where a process will be studied and a Desired Future State defined with VSM methods. This factory floor activity will be done collaboratively with employees from a manufacturing company.

**Grade Mode:** Letter Grading

**ME 785 - Solid Mechanics in Manufacturing****Credits:** 4

Characterization of material properties are studied with emphasis on plastic deformation. Also, numerical approaches to solve for the forces, stresses, and strains in manufacturing processes are covered. In particular, two prominent mass production manufacturing areas, metal forming and cutting, are examined.

**Grade Mode:** Letter Grading**ME 786 - Introduction to Finite Element Analysis****Credits:** 4

Topics include basic matrix theory, potential energy approach, direct stiffness method, calculus of variations, development of finite element theory, and modeling techniques. Applications in solid mechanics, heat transfer, fluids, and electromagnetic devices, via both commercially available codes and student-written codes. Lab.

**Prerequisite(s):** ME 526 with a minimum grade of D-.**Equivalent(s):** CIE 786**Grade Mode:** Letter Grading**ME 795 - Special Topics****Credits:** 1-4

New or specialized courses and/or independent study.

**Repeat Rule:** May be repeated for a maximum of 20 credits.**Grade Mode:** Letter Grading**ME 797 - Honors Seminar****Credits:** 1

Course enrichment and/or additional independent study in subject matter pertaining to a 600- or 700-level ME course other than ME 695, ME 696, ME 697, or ME 795.

**Attributes:** Honors course**Repeat Rule:** May be repeated for a maximum of 3 credits.**Grade Mode:** Letter Grading

## Military Science (MILT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MILT 400PT - Physical Training****Credits:** 0

This course is intended to fulfill the U.S. Army Cadet Command requirement to conduct organized physical training at the program level.

**Grade Mode:** Credit/Fail Grading**MILT 401 - Leadership Laboratory I****Credits:** 0

Open only to students taking another Military Science class, with different roles offered for students at different levels of the program. Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training programs. Students develop, practice and refine leadership skills by serving and being evaluated in a variety of supervisory positions. Specific events include a team-building leader reaction course, orientation to military weapons, basic tactical movement, and land navigation.

**Grade Mode:** Credit/Fail Grading**MILT 402 - Leadership Laboratory II****Credits:** 0

Open only to students taking another Military Science class, with different roles offered for students at different levels of the program. Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training programs. Students develop, practice and refine leadership skills by serving and being evaluated in a variety of supervisory positions. Specific events include basic marksmanship, advanced tactical movement, orienteering and land navigation.

**Grade Mode:** Credit/Fail Grading**MILT 403 - United States Army History****Credits:** 2

Develops an understanding of the effects the US military and society have on each other through the establishment and background of the United States Army. Presented in the context of broader US Military history and military strategy and global involvement. Through readings, oral and written presentations, and exams, students describe the role of the US Army, its evolution and its impact on society and technology; and critically analyze an armed conflict using the principles of war. This is a pre-commissioning requirement for professional military education (PME) required by the United States Army Cadet Command. It is open to non-ROTC students.

**Repeat Rule:** May be repeated for a maximum of 6 credits.**Grade Mode:** Letter Grading**MILT 413 - Introduction to ROTC****Credits:** 0 or 2

Make your first new peer group at college one committed to performing well and enjoying the experience. Increase self-confidence through team study and activities in physical fitness, rappelling, first aid, basic marksmanship, and basic drill. Learn fundamental concepts of leadership in both classroom and outdoor laboratory environments. One hour and a required leadership lab (MILT 401L) plus optional (mandatory for scholarship cadets) participation in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is also required for all cadets. Open to all college students, no military commitment required.

**Grade Mode:** Letter Grading**MILT 414 - Introduction to ROTC II****Credits:** 2

Learn and apply principles of effective leadership. Reinforce self-confidence through participation in physically and mentally challenging exercises with other ROTC cadets. Continued activities in basic drill, physical fitness, rappelling, first aid, and basic marksmanship. Develop communication skills to improve individual performance and group interaction. One hour and a required leadership lab (MILT 402L) plus optional (mandatory for scholarship cadets) participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required for all cadets. Open to all college students; no military commitment required.

**Grade Mode:** Letter Grading

**MILT 501 - Self/Team Development I****Credits:** 0 or 2

Learn and apply ethics-based leadership skills that develop individual abilities and contribute to the building of effective teams of people. Develop skills in oral presentations, planning of events, advanced first aid, physical fitness, and land navigation. Learn techniques for training others as an aspect of continued leadership development. Two hours and a required leadership lab (MILT 401L), plus optional participation (mandatory for scholarship cadets) in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is required. Additional weekend exercises may be offered for optional participation. Open to all college students, no military commitment required.

**Co-requisite:** MILT 401**Grade Mode:** Letter Grading**MILT 502 - Individual/Team Military Tactics****Credits:** 0 or 2

Introduces individual and team aspects of military tactics in small unit operations. Includes use of radio communications, making safety assessments, movement techniques, planning for team safety/security, and methods of pre-execution checks. Practical exercises with other ROTC students. Learn techniques for training others as an aspect of continued leadership development. Two hours and a required leadership lab (MILT 402L), plus optional participation (mandatory for scholarship cadets) in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is required. Additional weekend exercises may be offered for optional participation. Open to all college students, no military commitment required.

**Co-requisite:** MILT 402**Grade Mode:** Letter Grading**MILT 601 - Leading Small Organizations I****Credits:** 0 or 4

Series of practical opportunities to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Plan and conduct training for other ROTC students in small unit offensive and defensive operations. Three hours and required leadership lab (MILT 401L) plus required participation in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is also required. Other weekend exercises are offered for optional participation.

**Grade Mode:** Letter Grading**MILT 602 - Leading Small Organizations II****Credits:** 0 or 4

Continues the methodology from MILT 601. Analyze tasks; prepare written and oral guidance for team members to accomplish tasks. Delegate tasks and supervise. Plan for and adapt to the unexpected in organizations under stress. Examine and apply lessons from leadership studies. Examine importance of ethical decision making in setting a positive climate that enhances team performance. Three hours and a required leadership lab (MILT 402L) plus required participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.

**Grade Mode:** Letter Grading**MILT 611 - Seminar on Leadership and Management I****Credits:** 0 or 4

Plan, conduct and evaluate activities of the ROTC cadet organization. Articulate goals and put plans into action to attain them. Assess organizational cohesion and develop strategies to improve it. Develop confidence in skills to lead people and manage resources. Learn/apply various Army policies and programs in this effort. Three hours and a required leadership lab (MILT 401L) plus required participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.

**Grade Mode:** Letter Grading**MILT 612 - Transition to Lieutenant****Credits:** 0 or 4

Continues the methodology from MILT 611. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques. Examine aspects of tradition and law as related to leading as an officer in the Army. Prepare for a future as a successful Army lieutenant. Three hours and a required leadership lab (MILT 402L) plus required participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.

**Grade Mode:** Letter Grading**MILT 695 - Officer Internship****Credits:** 1-4

Experiential learning through fieldwork in a military-type unit. Written analysis required.

**Co-requisite:** MILT 601**Prerequisite(s):** MILT 611 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Music (MUSI)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MUSI 401 - Introduction to Music****Credits:** 4

Fundamental approach to analytical listening with attention to learning how to aurally recognize and apply the basic elements of music to a wide variety of specific musical works in oral and written contexts. Critical thinking and listening skills will be developed through study of music in a variety of cultural and historical perspectives. Some participation in musical life of the University may be required, unless this is the fully online version. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.

**Attributes:** FinePerformingArts(Discovery)**Equivalent(s):** MUSI #401H**Grade Mode:** Letter Grading

**MUSI #401H - Honors/Introduction to Music****Credits:** 4

Fundamental approach to perceptive listening based on a detailed study of several masterpieces representing different periods and forms. Historical perspective, but main emphasis is on confronting significant works of musical art on their own terms. Some participation in musical life of the University required. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.

**Attributes:** FinePerformingArts(Discovery); Honors course**Equivalent(s):** MUSI 401**Grade Mode:** Letter Grading**MUSI 402 - Historical Survey of Western Classical Concert Music****Credits:** 4

The study of the development of musical styles and idioms of Western European classical concert music in the context of selected historical and cultural aspects of Western civilization. Some participation in musical life of the University may be required. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.

**Attributes:** FinePerformingArts(Discovery)**Equivalent(s):** MUSI 402H**Grade Mode:** Letter Grading**MUSI 403 - Roots of Rock****Credits:** 4

Focuses on the musical styles, traditions, and social circumstances that led to a distinctive form of American popular music in the 1950's and '60's. In addition to developing critical listening skills to discern subtle distinctions among such styles and sub-styles as blues, folk, jazz, and country, the course also considers the diverse social trends that helped drive changes and developments in the various styles and genres covered. While some attention will be devoted to rock music of the mid-late sixties, the course emphasizes the various musical styles that preceded rock.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**MUSI 404 - An Introduction to Music, Media, and the Moving Image****Credits:** 4

Through selected readings, attentive listening, viewing, and discussion of a variety of films and multi-media productions, students develop a common vocabulary for analyzing music accompanying moving images. Students develop an understanding of the western and non-western musical conventions that work, often at a subconscious level, in conjunction with images to shape and cue audience responses to, and interaction with, visual cues. Media includes canonic Hollywood films, independent and foreign cinema, with explorations of non-Western films, video game scoring, television, and animation. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**MUSI 405 - Survey of Music in America****Credits:** 4

From colonial times to the present, including various European influences, the quest for an American style, and the emergence of such indigenous phenomena as jazz. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program. (Formerly MUSI 511).

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**MUSI 406 - Country Music****Credits:** 4

This course surveys the rich musical, cultural, and economic history of country music in the United States. Since its inception, country music has embodied a tension between tradition and progress. Country music thereby reflects a basic feature of the American story, valorizing our history while valuing social and technological development. Throughout the course, we consider this tension as it affects the musical content and cultural meaning of country music.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**MUSI 411 - Fundamentals of Music Theory****Credits:** 4

Elements of music theory for the non-music major; principles of musical structure, analysis, elementary written counterpoint and harmony, and ear training. May not be counted for credit toward a music major.

**Grade Mode:** Letter Grading**MUSI 412 - Fundamentals of Music Theory****Credits:** 4

Elements of music theory for the non-music major; principles of musical structure, analysis, elementary written counterpoint and harmony, and ear training. May not be counted for credit toward a music major.

**Prerequisite(s):** MUSI 411 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 441 - Concert Choir****Credits:** 0-1

Large, non-auditioned, SATB chorus specializing in the performance of choral art-song, masterworks, and symphonic choral repertoire. Open to all students. Pre-registration is encouraged. This class requires two concerts outside of the normal class meeting times.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 442 - Chamber Singers****Credits:** 0-1

Auditioned SATB chorus specializing in unaccompanied choral repertoire. Choral experience and strong skills in musicianship are recommended. Students who register for MUSI 442 must also register for MUSI 441. Auditions are open to all students and conducted the first week of the semester. Contact the instructor for further information. This class requires a number of concerts outside of the normal class meeting times; a schedule is included in the syllabus.

**Co-requisite:** MUSI 441**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

**MUSI 444 - Music and Social Change****Credits:** 4

The connections between music and social change with a twofold goal: 1) to heighten critical listening skills so as to become more aware of ways in which music can express social attitudes; and 2) to introduce the social, cultural, and political issues surrounding the music being studied. Course work consists of listening to selected repertoires, reading scholarly and popular essays about those repertoires, and extensive in-class (and on-line) discussion about issues raised by the listening and reading. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.

**Attributes:** FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading**MUSI 448 - Vocal Arts Project****Credits:** 0-1

This vocal performance course explores and prepares singers for a diverse and inclusive range of vocal repertory including but not limited to opera, music theatre, jazz, folk, country, contemporary commercial music, and original songs.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 450 - Symphony****Credits:** 0-1

Presents several concerts during the year of repertoire ranging from the great, standard symphonic literature to large modern works.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI #451 - Concert Band****Credits:** 1

The Concert Band performs serious, concert music, ranging from transcriptions of works for other mediums, to the 20th century "classics" of the wind band repertoire and music written for wind band. Anyone with previous band experience is welcome. Auditions are for chair placement only.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**MUSI 452 - Wind Symphony****Credits:** 0-1

Select wind ensemble which performs difficult classical and contemporary literature.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 453 - Symphonic Band****Credits:** 0 or 1

Original band music, transcription, marches, etc. For students whose program does not permit music as a major interest, but who are interested in maintaining their playing proficiency and continuing their study of music.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 454 - UNH Marching Band****Credits:** 0 or 1

Open to all students; performs during football games. Rehearsals conclude at the end of the football season.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 455 - Collaborative Piano****Credits:** 1

Drawing from available student instrumentalists and singers, pianists learn the art of performing in trios, duo sonatas, and two-piano works, and gain experience in Lieder accompaniment.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 456 - String Chamber Music****Credits:** 0-1

Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 457 - Wind Chamber Music****Credits:** 0-1

Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 458 - Brass Chamber Music****Credits:** 0-1

Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** MUSI 457**Grade Mode:** Letter Grading**MUSI 459 - Percussion Ensemble****Credits:** 0-1

Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 460 - Jazz Band****Credits:** 0-1

Two jazz bands perform a wide spectrum of big band literature.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 462 - Pep Band****Credits:** 0-1

Rehearsal and performance of a broad range of band music at hockey and basketball games.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**MUSI 463 - Jazz Combo****Credits:** 0-1

Groups of instrumentalists gain experience in the performance of literature for the smaller jazz ensemble.

**Repeat Rule:** May be repeated for a maximum of 9 credits.**Grade Mode:** Letter Grading**MUSI 464 - Guitar Ensemble****Credits:** 0-1

Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.

**Repeat Rule:** May be repeated for a maximum of 9 credits.**Grade Mode:** Letter Grading

**MUSI 471 - Theory I****Credits:** 3

Introduces the tonal system; species counterpoint; principles of voice leading and harmonic progression through the analysis, realization, and composition of one-, two-, and four-voiced textures. Concept of triad inversion and consonant diatonic harmonies of the major and minor modes. Students should register for MUSI 473 and MUSI 474 concurrently.

**Grade Mode:** Letter Grading**MUSI 472 - Theory I****Credits:** 3

Introduces the tonal system; species counterpoint; principles of voice leading and harmonic progression through the analysis, realization, and composition of one-, two-, and four-voiced textures. Concept of triad inversion and consonant diatonic harmonies of the major and minor modes. Students should register for MUSI 474 and MUSI 476 concurrently.

**Prerequisite(s):** MUSI 471 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 473 - Ear Training I****Credits:** 1

Laboratory exercises to develop aural skills; sight-singing and dictation. Students should register for MUSI 471 and MUSI 472 concurrently.

**Grade Mode:** Letter Grading**MUSI 474 - Ear Training I****Credits:** 1

Laboratory exercises to develop aural skills; sight-singing and dictation. Students should register for MUSI 472 and MUSI 476 concurrently.

**Prerequisite(s):** MUSI 473 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 475 - Functional Piano I****Credits:** 1

Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.

**Co-requisite:** MUSI 471, MUSI 473**Grade Mode:** Letter Grading**MUSI 476 - Functional Piano I****Credits:** 1

Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.

**Co-requisite:** MUSI 472, MUSI 474**Prerequisite(s):** MUSI 475 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 501 - The Western Musical Canon****Credits:** 3

An introductory survey of the Western "classical" canon. Students will become familiar with the different style periods of church, court, and concert music from the ninth century to the present day. Some score reading involved; rudimentary knowledge of music theory encouraged.

**Prerequisite(s):** (MUSI 472 with a minimum grade of D- or MUSI 412 with a minimum grade of D-).**Grade Mode:** Letter Grading**MUSI 502 - Musics in Context****Credits:** 3

Through a series of case studies drawn from a variety of global musics past and present, including classical, traditional, and commercial, this course introduces students to different approaches to thinking about and analyzing music in conjunction with the specific case studies and in individual and small group projects. This approach equips students to investigate music that they perform, teach, and listen to - within or beyond the UNH curriculum - drawing on different branches of music study to place any type of music in historical, cultural, and social contexts and to share their findings in written, oral, or recorded formats. A core course for music majors, this course builds on concepts and repertoires encountered in MUSI 501, MUSI 515 MUSI 471–476, 571–576 and prepares students for their 700- level courses in music history and theory.

**Attributes:** Inquiry (Discovery)**Prerequisite(s):** MUSI 471 with a minimum grade of C- and MUSI 472 with a minimum grade of C- and MUSI 501 with a minimum grade of C- and MUSI 515 with a minimum grade of C-.**Grade Mode:** Letter Grading**MUSI 515 - Music in World Cultures****Credits:** 4

An introduction to musicking (participating in any way, including listening, in musical performance) beyond the Western tradition, this course offers students an opportunity to explore the music and culture of diverse regions from an ethnomusicological perspective. Through listening to and analyzing music, readings, lecture, discussion, and individual fieldwork projects, students discover how music functions within different world cultures and gain understanding of the ways people "make music meaningful and useful in their lives," as, through musicking, they articulate, resist, and transform cultural norms.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**MUSI 520 - Diction for Singers I****Credits:** 2

Application of International Phonetic Alphabet (IPA) to English, French, German, and Italian. Emphasizes both written and spoken performance.

**Grade Mode:** Letter Grading**MUSI 521 - Diction for Singers II****Credits:** 2

Application of International Phonetic Alphabet (IPA) to English, French, German, and Italian. Emphasizes both written and spoken performance.

**Prerequisite(s):** MUSI 520 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 540 - Recital Attendance****Credits:** 0

This course is a requirement for all undergraduate music majors in the Department of Music. Students are required to attend at least twelve approved recitals or concerts during each semester they are enrolled in MUSI 540. This course must be completed six times with a grade of Credit (Satisfactory) for zero credit each time.

**Grade Mode:** Credit/Fail Grading**MUSI 541 - Piano****Credits:** 1-4

Private instruction in piano. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes

**MUSI 545 - Voice****Credits:** 1-4

Private instruction in voice. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 546 - Violin****Credits:** 1-4

Private instruction in violin. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 547 - Viola****Credits:** 1-4

Private instruction in viola. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 548 - Violoncello****Credits:** 1-4

Private instruction in violoncello. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 549 - String Bass****Credits:** 1-4

Private instruction in string bass. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 550 - Classical Guitar****Credits:** 1-4

Private instruction in classical guitar.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 551 - Flute****Credits:** 1-4

Private instruction in flute. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 552 - Clarinet****Credits:** 1-4

Private instruction in clarinet. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 553 - Saxophone****Credits:** 1-4

Private instruction in saxophone. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 554 - Oboe****Credits:** 1-4

Private instruction in oboe. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 555 - Bassoon****Credits:** 1-4

Private instruction in bassoon. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 556 - French Horn****Credits:** 1-4

Private instruction in French horn. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 557 - Trumpet****Credits:** 1-4

Private instruction in trumpet. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 558 - Trombone****Credits:** 1-4

Private instruction in trombone. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 559 - Euphonium****Credits:** 1-4

Private instruction in euphonium. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 560 - Tuba****Credits:** 1-4

Private instruction in tuba. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 561 - Percussion****Credits:** 1-4

Private instruction in percussion. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 562 - Jazz Piano****Credits:** 1-4

Private instruction in jazz piano. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes

**MUSI 563 - Jazz Guitar****Credits:** 1-4

Private instruction in jazz guitar. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 564 - Drum Set****Credits:** 1-4

Private instruction in drum set. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 571 - Theory II****Credits:** 3

Continuation of MUSI 471- MUSI 472. Compositional and analytical work stresses the treatment of dissonance within the tonal system; accessory tones, seventh chords, tonicization, modulation, basic principles of chromatic harmony, and harmonization of chorale melodies are covered. Students should register for MUSI 573 and MUSI 574 concurrently.

**Prerequisite(s):** MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 572 - Theory II****Credits:** 3

Continuation of MUSI 471- MUSI 472. Compositional and analytical work stresses the treatment of dissonance within the tonal system; accessory tones, seventh chords, tonicization, modulation, basic principles of chromatic harmony, and harmonization of chorale melodies are covered. Students should register for MUSI 573 and MUSI 574 concurrently.

**Prerequisite(s):** MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D- and MUSI 571 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 573 - Ear Training II****Credits:** 1

Laboratory exercises to develop aural skills further. Students should register for MUSI 571-572 concurrently.

**Prerequisite(s):** MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 574 - Ear Training II****Credits:** 1

Laboratory exercises to develop aural skills further. Students should register for MUSI 571-572 concurrently.

**Prerequisite(s):** MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 575 - Functional Piano II****Credits:** 1

Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.

**Co-requisite:** MUSI 571, MUSI 573**Prerequisite(s):** MUSI 476 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 576 - Functional Piano II****Credits:** 1

Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.

**Co-requisite:** MUSI 572, MUSI 574**Prerequisite(s):** MUSI 575 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 595 - Special Topics in Music Literature****Credits:** 0-4

Open to music majors and non-majors; topics in areas not easily covered in historical courses. May be repeated for credit.

**Grade Mode:** Letter Grading**MUSI 691 - Music Internship I****Credits:** 1-2

Music students will expand their professional experience in an educationally productive and effective manner while building community relationships. With the guidance of a UNH music internship coordinator and community partner supervisor, the student is expected to contribute effectively within the organization. Music Internship I is required of all music majors in their junior year.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Grade Mode:** Credit/Fail Grading**MUSI 701 - Topics in Music History****Credits:** 3

Courses offered under this number feature a variety of topics having to do with music history. Topics in given semesters reflect faculty expertise in teaching and research. For topic examples, see "Courses Taught" on relevant faculty web pages. May be repeated barring duplication of subject.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of C- and MUSI 502 with a minimum grade of C-.**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**MUSI 703 - Music of the Renaissance****Credits:** 3

Works of the 15th- and 16th-century composers from Dunstable to Palestrina.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 705 - Music of the Baroque****Credits:** 3

Music of Europe from de Rore to Bach.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Grade Mode:** Letter Grading

**MUSI 707 - Music of the Classical Period****Credits:** 3

Growth of musical styles and forms from early classicism through the high classicism of Haydn, Mozart, and the young Beethoven.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 709W - Music of the Romantic Period****Credits:** 3

A survey of romanticism in music from Beethoven's late period to the end of the 19th century. The works of Schubert, Berlioz, Schumann, Mendelssohn, Chopin, Wagner, Verdi, Brahms, Austrian symphonists, French pre-impressionists, and national styles in European music.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Equivalent(s):** MUSI 709**Grade Mode:** Letter Grading**MUSI 711 - Music of the 20th and 21st Centuries****Credits:** 3

Styles and techniques of composers from Debussy to the present. Special emphasis on tonal music before World War I, neoclassical trends, the emergence of atonality and serial techniques, electronic music.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 713 - Art Song****Credits:** 3

History and literature of the solo song with piano accompaniment. Survey of national styles of the 19th and 20th centuries and deeper study of the central core of the art song--the German Lied.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI #715 - Survey of Opera****Credits:** 3

History of the genre from Monteverdi to the present.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 731 - Conducting****Credits:** 2

Physical aspects, equipment of conductor, fundamental gestures and beats, baton techniques. Reading and analysis of full and condensed scores, study of transposition, psychology of rehearsal.

**Prerequisite(s):** MUSI 571 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 732 - Conducting****Credits:** 2

Physical aspects, equipment of conductor, fundamental gestures and beats, baton techniques. Reading and analysis of full and condensed scores, study of transposition, psychology of rehearsal.

**Prerequisite(s):** MUSI 571 with a minimum grade of D- and MUSI 731 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 741 - Piano****Credits:** 1-4

Private instruction in piano. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 745 - Voice****Credits:** 1-4

Private instruction in voice. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 746 - Violin****Credits:** 1-4

Private instruction in violin. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 747 - Viola****Credits:** 1-4

Private instruction in viola. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 748 - Violoncello****Credits:** 1-4

Private instruction in violoncello. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 749 - String Bass****Credits:** 1-4

Private instruction in string bass. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 750 - Classical Guitar****Credits:** 1-4

Private instruction in classical guitar.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**MUSI 751 - Flute****Credits:** 1-4

Private instruction in flute. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 752 - Clarinet****Credits:** 1-4

Private instruction in clarinet. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes

**MUSI 753 - Saxophone****Credits:** 1-4

Private instruction in saxophone. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 754 - Oboe****Credits:** 1-4

Private instruction in oboe. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 755 - Bassoon****Credits:** 1-4

Private instruction in bassoon. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 756 - French Horn****Credits:** 1-4

Private instruction in French horn. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 757 - Trumpet****Credits:** 1-4

Private instruction in trumpet. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 758 - Trombone****Credits:** 1-4

Private instruction in trombone. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 759 - Euphonium****Credits:** 1-4

Private instruction in euphonium. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 760 - Tuba****Credits:** 1-4

Private instruction in tuba. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 761 - Percussion****Credits:** 1-4

Private instruction in percussion. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 762 - Jazz Piano****Credits:** 1-4

Private instruction in jazz piano. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 763 - Jazz Guitar****Credits:** 1-4

Private instruction in jazz guitar. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 764 - Drum Set****Credits:** 1-4

Private instruction in drum set. Special fee for non-majors.

**Repeat Rule:** May be repeated for a maximum of 99 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI #771 - Counterpoint****Credits:** 3

Contrapuntal techniques of tonal music. Melodic construction and dissonance treatment through work in species counterpoint and studies in harmonic elaboration and prolongation. Analysis of selected compositions emphasizes the connection between fundamental contrapuntal techniques and the voice-leading of composition.

**Prerequisite(s):** MUSI 572 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 775 - Composition****Credits:** 1-4

Studies in composition and score preparation resulting in the creation of original compositions to be performed on a student composers' concert in the Music Department.

**Prerequisite(s):** MUSI 572 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 776 - Composition****Credits:** 1-4

Studies in composition and score preparation resulting in the creation of original compositions to be performed on a student composers' concert in the Music Department.

**Prerequisite(s):** MUSI 572 with a minimum grade of D- and MUSI 775 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUSI 777 - Advanced Composition****Credits:** 1-4

Continuation of MUSI 776. Individual compositional projects. May be repeated for credit.

**Prerequisite(s):** MUSI 776 with a minimum grade of D-.**Grade Mode:** Letter Grading

**MUSI 779 - Reading and Writing Musical Scores****Credits:** 3

This course is designed to assist music majors gain competence and confidence in working with full scores from music ensembles. Course activities will focus on the tasks of score reading and analysis, and the creation of new arrangements for ensembles the student is likely to lead in their professional life. Additionally, various aspects of programming repertoire for performances will be addressed. These skills will be of value to both music education and music performance majors.

**Prerequisite(s):** MUSI 471 with a minimum grade of C- and MUSI 472 with a minimum grade of C- and MUSI 571 with a minimum grade of C- and MUSI 572 with a minimum grade of C-.

**Grade Mode:** Letter Grading**MUSI 781W - Analysis: Form and Structure****Credits:** 3

Introduces analytical techniques through the study of representative masterworks: formal and structural elements and their interrelationships. Analysis of 18th- and 19th century works.

**Attributes:** Writing Intensive Course**Prerequisite(s):** MUSI 572 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**MUSI 791 - Music Internship II****Credits:** 2-4

Music students will expand their professional experience in an educationally productive and effective manner while building community relationships. With the guidance of a UNH music internship coordinator and community partner supervisor, the student is expected to contribute effectively within the organization. Music Internship II is required of all music majors (apart from music education majors) in their senior year.

**Prerequisite(s):** MUSI 691 with a minimum grade of CR.**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**MUSI 795 - Special Studies****Credits:** 1-4

A) J.S. Bach, B) Franz Schubert, C) Debussy and Ravel, D) the world of jazz, E) piano literature, F) 19th century French music, G) advanced analysis, H) advanced study in electronic music, I) composition through computer-generated sound, J) woodwind literature, K) brass literature, L) string literature, M) medieval performance practice, N) renaissance performance practice, O) baroque performance practice, P) classical performance practice, Q) 19th century performance practice, R) 20th century performance practice, S) woodwind repair, T) string repair, U) advanced jazz improvisation, V) advanced piano pedagogy, W) advanced accompanying, X) advanced conducting, Y) independent study. May be repeated for credit with permission.

**Repeat Rule:** May be repeated up to 4 times.**Equivalent(s):** MUSI #795W**Grade Mode:** Letter Grading**MUSI #795W - Special Studies/Cardiff****Credits:** 1-3

Advanced Music History or Advance Music Theory for Cardiff U. Study Abroad.

**Attributes:** Writing Intensive Course**Equivalent(s):** MUSI 795**Grade Mode:** Letter Grading

## Music Education (MUED)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**MUED 741 - Techniques and Methods in Choral Music****Credits:** 2

Methods for teaching choral music in 5-12th grade schools, the developing voice, vocal modeling, repertoire selection, choral conducting, rehearsal technique, sequencing and feedback, piano skills for choral rehearsal, in-school fieldwork. This class requires a fieldwork component. Students will conduct rehearsals at Oyster River Middle School 7:00am-7:50am at least once per week for a portion of the semester.

**Prerequisite(s):** EDUC 500 with a minimum grade of D- and MUSI 731 with a minimum grade of D- and MUSI 732 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUED 743 - Materials and Methods in Piano Music****Credits:** 2

Gives potential piano teachers a coherent but flexible approach to the instruction of students of different ages and levels of talent through evaluation of methods and materials and discussion of the role of the private teacher.

**Grade Mode:** Letter Grading**MUED 745 - Techniques and Methods in String Instruments****Credits:** 2

Class and individual instruction. Intensive training on the violin, viola, cello, and double bass. Classroom procedures, establishment of string programs, and evaluation of available methods materials.

**Grade Mode:** Letter Grading**MUED 747 - Techniques and Methods in Woodwind Instruments****Credits:** 2 or 3

Basic course in embouchure formation, tone production, tonguing, fingering and instrument care as applied to each of the woodwinds: flute, oboe, clarinet, bassoon and saxophone. Methods, studies, solos and ensembles most useful with school players of woodwind instruments.

**Grade Mode:** Letter Grading**MUED 749 - Techniques and Methods in Brass Instruments****Credits:** 2

Basic course in embouchure formation, tone, tonguing, fingering, flexibility, accuracy, and range development as applied to the trumpet or baritone horn, French horn, and trombone. Methods, studies, solos, and ensembles most likely to be useful with school players of brass instruments.

**Grade Mode:** Letter Grading**MUED 751 - Techniques and Methods in Percussion Instruments****Credits:** 2

Basic performance skills on snare drum, timpani, mallet instruments, and other percussion instruments used in bands and orchestras. Materials and methods of instruction.

**Grade Mode:** Letter Grading**MUED 755 - Vocal Pedagogy****Credits:** 2

A study of vocal anatomy, vocal function, and teaching methods, with an emphasis on application for singers and voice teachers.

**Grade Mode:** Letter Grading

**MUED 765 - Instrumental Music Methods****Credits:** 2

Organization and delivery of instruction to groups of instrumental music students. Examination of appropriate curricula and materials, application of instrumental and conducting techniques, structure of rehearsals, assessment of student progress.

**Grade Mode:** Letter Grading**MUED 771 - Marching Band Methods****Credits:** 2

Role of marching band in the school music program. Design and execution of field shows and parade marching. Understanding of marching percussion and auxiliary units. Examination of appropriate music.

**Prerequisite(s):** MUSI 471 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUED 790 - Teaching Elementary School Music****Credits:** 3

Experiential approach toward learning creative strategies for teaching elementary school music. Includes various curricula and methods; philosophy and psychology of music; demonstration of materials and instruments. Observation and teaching in schools. Piano proficiency recommended.

**Grade Mode:** Letter Grading**MUED 791 - Teaching Secondary School Music****Credits:** 2

Assembling, managing, and teaching junior/senior high school music curriculum. Academic issues of philosophy, curriculum building, application of learning theories, administration, evaluation, motivation, and classroom management combined with field experience in lesson planning and teaching/rehearsal techniques.

**Prerequisite(s):** MUSI 731 with a minimum grade of D- and MUSI 732 with a minimum grade of D-.**Grade Mode:** Letter Grading**MUED 795 - Special Studies****Credits:** 1-4

Allows upper-level students to explore individually or in groups areas related to their specific professional interests.

**Grade Mode:** Letter Grading

## National Security Intelligence Analysis (NSIA)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NSIA 710 - National Security Policy and the Intelligence Community****Credits:** 4

This course provides students an introduction to United States national security policy and the role of the intelligence community. Current and historical case studies will highlight the functions and limits of intelligence activities in support of decision makers policy making and implementation. In this course we survey political, institutional, and cultural challenges confronting analysts as they strive to provide intelligence products relevant to strategic and tactical policy goals.

**Grade Mode:** Letter Grading**NSIA 720 - Intelligence Analysis****Credits:** 4

In this class we define intelligence and focus on analysis. We identify intelligence organizations relationships with policymakers and the types of intelligence products they produce. Students will learn to identify and create intelligence requirements and the related variables and collection targets. We will explore analytical approaches and develop critical thinking skills. In this class we will define data, the causes of intelligence failures, and identify creativity in intelligence analysis.

**Grade Mode:** Letter Grading

## Native American Indigenous Studies (NAIS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NAIS 400 - Introduction to Native American and Indigenous Studies****Credits:** 4

This course serves as an introduction to the interdisciplinary field of Native American and Indigenous Studies (NAIS). NAIS cultivates a broad understanding of the history, lands, culture, literature, language and artistic expression, science and technology, race and identity, and social organization and political statuses of Indigenous peoples, emphasizing self-determination, sovereignty, and survivance globally. Students will learn about significant events and issues from Indigenous perspectives and develop new ways of thinking about Native peoples.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading

## Natural Resources (NR)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NR 400 - Professional Perspectives in Natural Resources****Credits:** 1

Lectures by departmental faculty provide an informal look at the various natural resource disciplines and professions represented by the Department of Natural Resources. These presentations acquaint students with our faculty and inform them of some of the exciting research being undertaken in the department. Students also learn of opportunities for professional involvement. Required for all first-semester Natural Resources majors.

**Grade Mode:** Credit/Fail Grading**NR 403 - Introduction to Environmental Science****Credits:** 4

A multi-disciplinary introduction to Environmental Sciences, presenting basic concepts and controversies in geology, meteorology/hydrology, global biology and biogeochemistry, integrated through the study of the Earth as system. Intended primarily for declared or perspective majors in Environmental Sciences and related programs. Combines lecture and discussion with discovery and presentation experiences to address the history of ideas, and major questions and controversies, both settled and active.

**Attributes:** Inquiry (Discovery)**Grade Mode:** Letter Grading

**NR 415 - Natural Resources Field Methods****Credits:** 2

This course is intended to serve first or second year students in Forestry, Wildlife and Conservation Biology, and Environmental Conservation and Sustainability. After taking this course, students are able to navigate successfully in wild terrain using pacing, map, compass, GPS; can conduct a simple planar survey including cartography; and can sample a forest in order to characterize the abundance and quality of forest resources. Moreover, students know the fundamental principles of navigation, surveying, and field sampling.

**Grade Mode:** Letter Grading**NR 417 - Sophomore Seminar: Wildlife and Conservation Biology****Credits:** 2

This course provides a professional foundation and orientation for second-year Wildlife & Conservation Biology (WCB) students. Through readings, seminars, guest speakers, and conservation, students will explore the range of what it means to be a professional Wildlife & Conservation Biologist. After taking this course, students will be better able to navigate and critique the scientific literature, synthesize and communicate information, and understand and articulate the diverse field of Wildlife & Conservation Biology.

**Grade Mode:** Letter Grading**NR 425 - Field Dendrology****Credits:** 4

Students study forest trees in natural communities and urban settings. Identification and nomenclature of important North American trees and shrubs is emphasized. Environmental factors influencing tree growth, combined with study of disturbance history, provide the context for understanding why tree species grow where they do. Students are introduced to the major forest regions of North America. Restricted to NR majors; others by permission.

**Equivalent(s):** EC 410, FOR 425, NR 420**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 433 - Wildlife Ecology****Credits:** 0 or 4

Historical, biological, ecological, and sociological factors influencing the wildlife resource and its management. Concepts in populations, communities, habitat, and contemporary wildlife issues. Lab.

**Attributes:** Biological Science(Discovery); Discovery Lab Course**Equivalent(s):** WILD 433**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 435 - Contemporary Conservation Issues and Environmental Awareness****Credits:** 4

Explores the impacts of technology and human activity on our environment and natural resources. Key conservation issues are used as examples of past and present biological, social, and environmental conflicts.

**Attributes:** Environment,TechSociety(Disc)**Equivalent(s):** EC 435, NR 435H, NR 435W, NR 535**Grade Mode:** Letter Grading**NR 435H - Honors/Contemporary Conservation Issues and Environmental Awareness****Credits:** 4

Explores the impacts of technology and human activity on our environment and natural resources. Key conservation issues are used as examples of past and present biological, social, and environmental conflicts.

**Attributes:** Environment,TechSociety(Disc); Honors course**Equivalent(s):** NR 435**Grade Mode:** Letter Grading**NR 437 - Principles of Sustainability****Credits:** 4

In this course, we investigate the foundational principles of the concept of sustainability. Our objectives include: understanding the many integrated dimensions of sustainability; examining illustrations of unsustainable human-environment relations; recognizing the complexity of sustainability problems and the challenges to finding solutions; comprehending that human-environment relations are a multi-level, complex and dynamic system, and appreciating that the sustainability of ecosystems is necessarily embedded in social, cultural and historical trends.

**Grade Mode:** Letter Grading**NR 439 - Environmental Biology****Credits:** 4

Environmental biology focuses on the origins, functions, and interactions of populations, communities, species and ecosystems in relation to dynamic environmental processes. The main course objective is to provide a basic understanding of ecosystem function and the ecological, evolutionary, and genetic principles necessary to understand biological diversity and its distribution.

**Grade Mode:** Letter Grading**Special Fee:** Yes**NR #444E - Eye of Newt and Toe of Frog: The World of Poisonous Animals****Credits:** 4

Course examines a variety of animal poisons and venoms in different contexts. Historical, cultural, physiological, pharmacological, and evolutionary viewpoints are explored. Readings, guest lectures, and peer blog entries are used to refine critical thinking skills and form the basis of in-class discussions.

**Attributes:** Biological Science(Discovery); Inquiry (Discovery)**Grade Mode:** Letter Grading**NR #444F - Does Extinction Matter****Credits:** 4

This course examines the causes and potential consequences of biodiversity loss. By considering ecological, economic, and ethical perspectives students will be asked to develop an informed personal answer to the question Does extinction matter? Development of critical thinking as well as written and oral communication skills will be stressed through a variety of in-class and outside class activities.

**Attributes:** Humanities(Disc); Inquiry (Discovery)**Grade Mode:** Letter Grading**NR #458 - The Science of Where****Credits:** 4

This online course introduces the principles and practices of spatial thinking through lectures, readings, discussions, and hands-on laboratory exercises. Students learn not only to think spatially, but also how to apply this knowledge in their own fields of study.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Grade Mode:** Letter Grading

**NR 501 - Studio Soils****Credits:** 0 or 4

An overview of physical, chemical, and biological properties of soil. Sub-disciplines of soil chemistry, soil physics, soil microbiology, soil genesis, and classification. Lab.

**Attributes:** Writing Intensive Course**Equivalent(s):** SOIL 501**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 502 - Forest Ecosystems and Environmental Change****Credits:** 4

Forest ecosystems cover a large fraction of the Earth's land surface and account for most of its terrestrial biological productivity. This course introduces forest ecosystems around the world and explores both the natural processes that regulate them and the environmental factors that cause change over time. Topics include tree growth strategies, successional change, nutrient cycling, and human-induced stressors such as air pollution and climate change.

**Attributes:** Environment,TechSociety(Disc)**Equivalent(s):** FOR 502, NR 502W**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 504 - Freshwater Resources****Credits:** 0 or 4

Major determinants of freshwater resources including hydrologic cycle and water balance, precipitation, stream-flow measurement, pollution, water supply and sewage treatment, water resource management and regulation. Lab/field trips.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Equivalent(s):** WARM 504**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 506 - Forest Entomology****Credits:** 0 or 4

Insects are among the most diverse and abundant organisms on the planet and play a crucial role in forest ecosystems. Insects from the base of the consumer food web in forests and are key drivers of nutrient cycling, pollination, etc. This course surveys common and important insect orders, families, and species found in forest systems and provides the tools for basic identification and biological study of these fascinating creatures.

**Equivalent(s):** FOR 506**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 507 - Introduction to our Energy System and Sustainable Energy****Credits:** 4

This course introduces students to our domestic energy system and the expanding efforts to develop our use and acceptance of sustainable energy. It provides a historical context of our system that explains where we are today in terms of the grid, technologies, energy use and production and energy markets, primarily for electricity and building use. The course examines how our current impedes and enhances opportunities for innovation in renewable technologies and financing.

**Attributes:** Environment,TechSociety(Disc)**Grade Mode:** Letter Grading**NR 508 - Communicating Science****Credits:** 4

Effective communication and community engagement with science are critical, particularly in our modern era of information overwhelm. In this course, we actively explore tools and techniques for oral, written, and visual communication of science in various mediums and with a range of publics and motivations. With an emphasis on critical and creative thinking, we will cultivate a set of skills and best practices as students develop a personal philosophy for communicating science with diverse audiences.

**Prerequisite(s):** ENGL 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**NR 527 - Forest Ecology****Credits:** 4

Introduces basic and applied ecology of forests, with emphasis on ecosystem processes, including water, energy, and nutrient cycles; biological interactions, including biodiversity and plant-plant, plant-animal, and plant-microbe relationships; and human impacts, including forest management, land-use/land cover-change, and changes in atmospheric chemistry. Lab.

**Equivalent(s):** FORT 527**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 561 - Chemistry of the Environment****Credits:** 4

The course is designed for students who desire a deeper understanding of chemical principles in environmental- and ecology-related disciplines. This course will focus on understanding key principles that underlie many of the important chemical processes that influence the functioning and health of environmental systems. These include reaction rates, oxidation-reduction, kinetics and enzyme dynamics, pH and acid-base equilibria, organic transformations, colloids and particulate behavior, and analytical approaches to understanding environmental chemistry.

**Prerequisite(s):** (CHEM 403 with a minimum grade of D- and CHEM 405 with a minimum grade of D-) or CHEM 411 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 600 - Work Experience****Credits:** 0

As part of their degree program, students are expected to engage in a work experience or internship under professional supervision and approved by natural resources faculty. This experience may occur at any time during their sophomore through senior years. Students are responsible for arranging their own experience in consultation with their advisor and NREN faculty members.

**Equivalent(s):** NR 599**Grade Mode:** Credit/Fail Grading

**NR 602 - Natural Resources and Environmental Policy****Credits:** 4

Contemporary natural resource and environmental policy problems/issues are addressed from a policy sciences perspective with emphasis on domestic policy solutions. Critical assessment of major policy initiatives and their implementation toward sustainable resource use and a healthy environment. Public policies are analyzed to determine the extent to which their implementation strategies have succeeded, and to assess their adequacy within a bioregional or ecosystem approach, and/or capacity to integrate economic and environmental decisions. Cases include national and local policies in their global context. Students apply public policy analysis and decision tools in laboratory sessions.

**Attributes:** Writing Intensive Course**Equivalent(s):** EC 702**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 603 - Landscape Ecology****Credits:** 4

This course focuses on the relationships between scale, spatial patterns and ecological processes. Through lecture, discussion and lab exercises students learn about scale and scaling techniques, the abiotic and biotic processes creating landscape patterns, how landscape patterns are characterized, and the application of landscape ecology theory to contemporary issues in conservation and management. Emphasis placed on landscape perspectives and practices as they relate to understanding and managing populations and communities.

**Prerequisite(s):** BIOL 541 with a minimum grade of D- or NR 527 with a minimum grade of D-.**Grade Mode:** Letter Grading**NR 606 - International Energy Topics****Credits:** 4

This course introduces students to international energy topics. Students will be exposed to a historical context and current status of several energy-related issues from an international perspective. Topics range from energy poverty, energy and climate change and global fossil fuel subsidies. Studies of specific technologies will be delivered through the context of international leaders, Iceland and geothermal, the UK and offshore wind and solar in Germany.

**Grade Mode:** Letter Grading**NR 615 - Wildlife Habitats****Credits:** 4

Introduces animal-habitat associations, including an examination of spatial and temporal features of wildlife habitat, the evolution of habitat selection, and how habitat suitability/productivity is evaluated.

**Attributes:** Writing Intensive Course**Prerequisite(s):** BIOL 541 with a minimum grade of D- or NR 527 with a minimum grade of D-.**Equivalent(s):** WILD 615**Grade Mode:** Letter Grading**Special Fee:** Yes**NR #625 - Physiological Ecology****Credits:** 4

Course examines the physiological mechanisms and adaptive responses of organisms that facilitate their survival in changing natural environments. Following an introduction to homeostasis and general physiological principles, topics focus on adaptations to the marine and freshwater environments, to estuarine challenges, and the specific requirements of terrestrial and aerial environments. Additional topics center on adaptations to extreme habitats and to parasitic life styles. Furthermore, the physiological bases of migrations, sleep, and mating/life history strategies are also explored. Examples are drawn from invertebrates, vertebrates, and plants.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- or BIOL 412 with a minimum grade of D-.**Grade Mode:** Letter Grading**NR #637 - Practicum in Environmental Conservation****Credits:** 4

Independent participation in an environmental conservation activity in the area of the student's specialization. Individual or group projects may be developed under the supervision of any faculty member within or outside natural resources or with supervisors in public and private agencies, upon approval of the course instructor. Research projects not acceptable.

**Equivalent(s):** EC 637, NR 637H**Grade Mode:** Credit/Fail Grading**NR 640 - Wildlife Population Ecology****Credits:** 4

An overview of the mechanisms that influence the characteristics of terrestrial wildlife populations. Lecture covers concepts and theory, with a central focus on population growth, how it is influenced by demographic rates of survival, recruitment, immigration/emigration, with additional consideration given to predation and competition, and how population status is monitored for wildlife, including occupancy, abundance, and viability. Lab provides hands-on exercises, often using computer software, with analysis and interpretation of data from local case studies.

**Prerequisite(s):** BIOL 412 with a minimum grade of D- and (BIOL 541 with a minimum grade of D- or NR 527 with a minimum grade of D-) and (MATH 424B with a minimum grade of D- or MATH 420 with a minimum grade of D-).**Grade Mode:** Letter Grading**NR 642 - Introduction to Biogeography****Credits:** 4

Biogeography is an integrative field of inquiry that unites concepts and information from evolutionary biology, ecology, systematics, geology, and physical geography. Students are introduced to the distribution patterns of wild animals and plants and to the factors that determine these patterns. In this course, the emphasis is on evolutionary aspects of biogeography, biodiversity, and implications for conservation issues.

**Prerequisite(s):** BIOL 541 with a minimum grade of D- or NR 527 with a minimum grade of D-.**Grade Mode:** Letter Grading**NR 643 - Economics of Forestry****Credits:** 4

Intermediate-level analysis of supply and demand for forest-based goods and services, managerial economics, taxation, capital investments.

**Prerequisite(s):** EREC 411 with a minimum grade of D- or ECON 402 with a minimum grade of D-.**Equivalent(s):** FOR 643**Grade Mode:** Letter Grading

**NR 650 - Principles of Conservation Biology****Credits:** 4

Examines the major issues relevant to conservation of biodiversity from the genetic to the ecosystem level. In addition to addressing ecological and biological principles, the interdisciplinary nature and challenges of managing for conservation biology, including the role of economic and social factors are examined.

**Equivalent(s):** EC 502**Grade Mode:** Letter Grading**Special Fee:** Yes**NR #655 - Vertebrate Biology****Credits:** 4

Introduces the diversity and evolution of vertebrates. Topics span the morphological, physiological, behavioral, and ecological diversity among the major vertebrate taxa. Labs stress identification of vertebrate taxa based on specimens and morphological structures. Lab.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Equivalent(s):** NR 655H, WILD 655, WILD 655H**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 658 - Introduction to Geographic Information Systems****Credits:** 4

Introduces the use of geographic information systems (GIS) for natural resources and related fields. Data models/structures, map projections, data input/output/storage, data analysis/modeling, interpolation, and data quality/standards. Hands-on lab using ArcGIS software. Restricted to NR majors or permission.

**Equivalent(s):** GEOG 658**Grade Mode:** Letter Grading**NR 660 - Ecology and Biogeography of New Zealand****Credits:** 5

Covers the principles of ecology and biogeography, with a distinct focus on New Zealand. Students investigate the processes that have shaped the New Zealand landmass and its biota. Impact of human settlement on New Zealand's ecosystems is explored in-depth. Methods and techniques of scientific research are incorporated in this course. Field exercises focus on topical case studies in a variety of ecosystems and are designed to strengthen students' conceptual knowledge, enable students to apply this knowledge, as well as develop field skills including classification systems, mapping, habitat assessment, field identification, and sampling techniques.

**Co-requisite:** INCO 588, NR 661, NR 662, NR 663

**Equivalent(s):** EC 660**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 661 - Restoration Ecology and Ecosystem Management in New Zealand****Credits:** 4

Current restoration projects and strategies for management of natural resources in New Zealand form the framework for this course. Solving problems related to introduced species, changes in habitat, the preservation of ecological processes and watershed management are the major foci of this course. Management of resources for multiple uses, as well as primary and extractive industries is included. Field exercises focus on topical case studies in a variety of terrestrial and coastal-marine ecosystems and include the identification of habitats and communities, stresses on the environment, and risk analysis.

**Co-requisite:** NR 660, NR 662, NR 663

**Equivalent(s):** EC 661**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 662 - Environmental Policy, Planning and Sustainability in New Zealand****Credits:** 3

Introduces students to politics in New Zealand. Investigating policy pathways and planning forms part of the curriculum. Students assess scope of legislation, including the Resource Management Act (1991), for the economic and socio-political environment in New Zealand. Government obligations to the Treaty of Waitangi, and customary uses of resources are included as part of this course. Students are exposed to diverse perspectives of local authority planners and policy makers, local iwi (tribes), the Department of Conservation, and community groups. Students examine case studies involving the resource consent process at several levels of decision-making. Case studies provide a comprehensive overview of the interactions between the environment and people and their cultural and socio-economic needs.

**Co-requisite:** NR 660, NR 661, NR 663

**Equivalent(s):** EC 662**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 663 - Applied Directed Research in New Zealand****Credits:** 4

Working closely with faculty, student teams investigate selected ecological, resource management or policy issues. All projects have scientific and societal relevance, and contribute to ongoing/existing projects in the region. Students use the scientific method to design and carry out their projects. Development of rigorous field investigations, experimental design, data analysis, and scientific writing are emphasized. Students prepare a research report and present their findings in a seminar that includes stakeholders and people from the local community.

**Co-requisite:** NR 660, NR 661, NR 662

**Attributes:** Writing Intensive Course**Equivalent(s):** EC 663**Grade Mode:** Letter Grading**Special Fee:** Yes

**NR 664 - Conservation Genetics and Applied Evolution****Credits:** 4

This course provides an overview of key concepts of conservation genetics and the use of genetic tools and data to address them. It addresses how evolutionary theory underpins processes and solutions relevant to biodiversity conservation. Major topics include genetic diversity and variation in natural populations, inbreeding, captive management, genetic rescue, genetic monitoring, and evolutionary responses to anthropogenic impacts. Practical exercises and case studies explore the application of genetic techniques and the analysis of genetic data.

**Prerequisite(s):** (BIOL 411 with a minimum grade of D- or NR 439 with a minimum grade of D- or BIOL 412 with a minimum grade of D-) and (BIOL 541 with a minimum grade of D- or NR 527 with a minimum grade of D-).

**Mutual Exclusion:** No credit for students who have taken GEN 705.

**Grade Mode:** Letter Grading

**NR 703 - Watershed Water Quality Management****Credits:** 4

Principles of land use as they relate to water quality and quantity. Lectures focus on biogeochemical cycles and the watershed approach to land and water resource management. Labs and field trips focus on methods of water sampling and analysis. One year of chemistry is recommended. Lab/field trips.

**Prerequisite(s):** NR 504 with a minimum grade of D-.

**Equivalent(s):** WARM 703

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 706 - Soil Ecology****Credits:** 4

Examines the ecological relationships between soil microorganisms and their biotic and abiotic environment, with emphasis on the role of soil microorganisms in biogeochemical cycling. Specific objectives are to examine the biodiversity present in soil systems, factors controlling microbial community composition and diversity, and linkages between soil microbial communities, soil physical properties, and soil organic matter and nutrient cycling dynamics. Lab.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (BIOL 412 with a minimum grade of D- or BIOL 409 with a minimum grade of D-) and CHEM 403 with a minimum grade of D-.

**Equivalent(s):** SOIL 706

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 707 - Environmental Modeling****Credits:** 4

Environmental Modeling introduces students to a range of key mathematical and computer modeling concepts and the ways they can be used to address important scientific questions. The course is divided into four topical sections: Population and Community Ecology, Hydrology, Biogeochemistry, and Ecosystems. In each section, modeling concepts and skills are presented together with environmental information to emphasize the linkage between quantitative methods and relevant scientific results.

**Prerequisite(s):** MATH 425 with a minimum grade of D- or MATH 424B with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NR 712 - Mammalogy****Credits:** 4

Evolution, ecology, behavior, physiology and diversity of mammals. The focus of the course is on conceptual issues, such as the relation of structure, function, physiology and ecology of species; reproductive physiology and life history strategies; and the evolution of mating systems and social structure. Familiarity of mammalian groups to the family level and identification of local fauna to species will be required. Lab.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 713 - Quantitative Ecology****Credits:** 4

Basic quantitative concepts applied to ecological systems including: population and community dynamics, experimental design, spatial patterns, species abundance and diversity, community organization, metapopulations, and landscapes.

**Prerequisite(s):** (BIOL 528 with a minimum grade of D- or EREC 525 with a minimum grade of D-) and (NR 527 with a minimum grade of D- or BIOL 541 with a minimum grade of D-).

**Equivalent(s):** FORS 713

**Grade Mode:** Letter Grading

**NR 720 - International Environmental Politics and Policies for the 21st Century****Credits:** 4

Students examine policies for managing human activities to sustain the health of regional ecosystems and planetary life-support systems. Selected problems of the international commons (oceans, marine resources, atmosphere, migratory species); global and regional carrying capacity (population, resource consumption), internationally shared ecosystems (transboundary watersheds and waterbodies, tropical forests); and the relevant international institutions and politics for policy formation, conflict resolution, and implementation. Using a policy-analytic framework, students develop case studies to assess international policies and institutional arrangements to achieve the objectives of Agenda 21—Earth Summit Strategy to Save the Planet.

**Attributes:** Writing Intensive Course

**Equivalent(s):** EC 720

**Grade Mode:** Letter Grading

**NR 724 - Resolving Environmental Conflicts****Credits:** 4

Theories and practices of environmental dispute settlement. Roles of public, non-governmental and governmental organizations. Effectiveness of public participation initiatives in influencing public policy decisions and/or resolving environmental conflicts. Alternative approaches to consensus (policy dialogues, joint problem solving; strategic planning; negotiation, mediation) as well as litigation. Specific cases are critiqued and evaluated; conflict resolution skills are developed. Students observe and/or participate in ongoing local decision processes. Lab.

**Attributes:** Writing Intensive Course

**Equivalent(s):** EC 724

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 729 - Silviculture****Credits:** 4

The science and art of establishing, growing, and tending forests to meet multiple objectives. Basics of forest stand dynamics applied to the problems of timber management, wildlife habitat, water quality, and carbon sequestration.

**Prerequisite(s):** NR 425 with a minimum grade of D- and NR 527 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 730 - Terrestrial Ecosystems****Credits:** 4

Processes controlling the energy, water, and nutrient dynamics of terrestrial ecosystems; concepts of study at the ecosystem level, controls on primary production, transpiration, decomposition, herbivory; links to earth-system science, acid deposition, agriculture. One semester each of biology, chemistry and ecology required prior to taking this course; possible courses include: BIOL 409, BIOL 411, BIOL 412 OR NR 439 AND CHEM 403, CHEM 405 OR CHEM 411 AND BIOL 541 OR NR 527.

**Equivalent(s):** EOS 730, FOR 730, FORS 730

**Grade Mode:** Letter Grading

**NR 734 - Tropical Ecology****Credits:** 4

This course introduces students to the ecology of different tropical ecosystems, and involves students in analyzing and interpreting ecological field data and remotely sensed data. An important emphasis is to understand patterns and processes across scales - from individual plants to ecosystems and landscapes. The course also addresses important global issues in the tropics, including climate change, land use change, diverse ecosystem services, and sustainable resource management.

**Prerequisite(s):** NR 527 with a minimum grade of D- and BIOL 541 with a minimum grade of D-.

**Equivalent(s):** FOR 734

**Grade Mode:** Letter Grading

**NR 740 - Inventory and Monitoring of Ecological Communities****Credits:** 4

Provides an introduction to the major concepts associated with monitoring change in ecological communities. Students develop an appreciation for such issues as: identification of appropriate baselines for comparison; use of indicator species; the tools used to inventory common, rare, and secretive species; how trend data are analyzed; and the implications of failing to detect an indicator species. Lab.

**Attributes:** Writing Intensive Course

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 743 - Addressing Arctic Challenges****Credits:** 4

Students will gain knowledge on the effect of climate change on Arctic environmental, social, and built systems, and apply transdisciplinary approaches to addressing arctic challenges. This course employs inquiry-based, peer-to-peer, and self-driven approaches. Students will tackle a research project, including data analysis, with the aim of contributing new knowledge in the form of a proposal, publication, outreach product, or other.

**Prerequisite(s):** BIOL 528 with a minimum grade of D- or SOC 402 with a minimum grade of D- or MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NR 744 - Biogeochemistry****Credits:** 4

Examines the influence of biological and physical processes on elemental cycling and geochemical transformations from the molecular to the global scale, involving microorganisms, higher plants and animals and whole ecosystems; factors that regulate element cycles including soils, climate, disturbance and human activities; interactions among the biosphere, hydrosphere, lithosphere, and atmosphere; transformations of C, N, S, and trace elements.

**Prerequisite(s):** (BIOL 409 with a minimum grade of D- or BIOL 411 with a minimum grade of D- or BIOL 412 with a minimum grade of D- or NR 439 with a minimum grade of D-) and (CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D- or CHEM 411 with a minimum grade of D-) and (BIOL 541 with a minimum grade of D- or NR 527 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**NR 745 - Forest Management****Credits:** 4

Forest land ownership, management objectives, forest inventory regulation and policy, forest administration, professional responsibilities and opportunities. Lab.

**Attributes:** Writing Intensive Course

**Equivalent(s):** FOR 745

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 749 - Forest Inventory and Modeling****Credits:** 4

Applied sampling and statistical techniques for assessing current forest conditions and predicting future growth, yield, and structure. Topics include plot and point sampling, ecological inventory, and evaluation of site quality and stand density.

**Prerequisite(s):** NR 415 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 750 - Sustaining Biological Diversity****Credits:** 4

This course examines the approaches to recover and restore declining populations and at-risk communities. Major concepts addressed include: population viability analysis; use of simulation models to explore conservation alternatives; integrating the political, economic, and social realities that affect natural resource management; the adaptive nature of any restoration of rare organisms and communities; and preparing for the challenges associated with invasive organisms and climate change.

**Prerequisite(s):** NR 650 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 751 - Aquatic Ecosystems****Credits:** 4

Energy flow and nutrient cycling in streams, rivers and lakes, with an emphasis on understanding the control of primary productivity, decomposition and community structure by both hydrologic and biotic drivers. Role of aquatic ecosystems in carbon and nitrogen budgets at watershed, regional, and global scales. Impacts of environmental changes such as global climate change and suburbanization on aquatic ecosystems. Lab.

**Prerequisite(s):** NR 504 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NR 753 - Critical Issues in Sustainability: Sustainability as an Abundance Paradigm****Credits:** 2

After 30 years in common parlance, the success of "Sustainability" still seems far from its goal. In part, this is because sustainability is typically applied as another way to manage scarcity, a paradigm informing economic and social policy for well over a century. Underlying this dominant view of sustainability, an increasing number of approaches to sustainability projects, some of longstanding are entering the mainstream as pieces of an identifiable, and distinctly novel, paradigm based on the assumption of abundance, rather than scarcity. These include ideas of the Natural Step and Natural Capital, as well as Cradle to Cradle and Biomimicry. The goals of this seminar are (1) to survey and discuss this growing literature and its application to the solution of sustainability problems; and (2) research and analysis towards transforming scarcity-based to abundance-based solutions. To be considered as a capstone option for majors in Environmental and Conservation Sustainability, students must also register for NR 754 in the Spring semester.

**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 754 - Critical Issues in Sustainability: Sense of Place****Credits:** 2

Costa Rica is the happiest country on Earth. Bhutan is a living laboratory for education. Bolivia has a Law of Mother Earth in its constitution. Cities and towns in the US create local solutions to problems of resource sustainability while the national dialogue stagnates. What drives some places to lay the foundations for sustainable futures, while others do not? Sense of Place is a powerful lens through which to view the relative achievements of places and organizations toward creating a sustainable future. The goals of this seminar are (1) to survey the Sense of Place literature and to analyze case studies of the role of Sense of Place in the success of sustainability efforts nationally and internationally; and (2) to research the role of Sense of Place in our local community environment and to relate it to stated goals in existing sustainability plans. To be considered as a capstone option for majors in Environmental and Conservation Sustainability, students must also register for NR 753 in the Fall semester.

**Grade Mode:** Letter Grading**NR 757 - Remote Sensing of the Environment****Credits:** 4

Practical and conceptual presentation of the use of remote sensing and other geospatial technologies for mapping and monitoring the environment. This course begins with the use of aerial photographs (photogrammetry, and photo interpretation) and includes measures of photo scale and area, parallax and stereo viewing, object heights, flight planning, photo geometry, the electromagnetic spectrum, camera systems and vegetation/land cover mapping. The course concludes with an introduction to other geospatial technologies including digital image analysis, global positioning (GPS), and geographic information systems (GIS). Conceptual lectures are augmented with practical homework assignments and hands-on lab exercises. Lab.

**Equivalent(s):** FOR 757, FORS 757, GEOG 757**Grade Mode:** Letter Grading**Special Fee:** Yes**NR 759 - Digital Image Processing for Natural Resources****Credits:** 4

Introduces digital remote sensing including multispectral scanners (Landsat and SPOT) radar, and thermal imagery. Hands-on image processing including filtering, image display, ratios, classification, registration, and accuracy assessment. GIS as it applies to image processing. Discussion of practical applications. Use of ERDAS image-processing software. Knowledge of PCs required.

**Prerequisite(s):** NR 757 with a minimum grade of D-.**Equivalent(s):** FOR 759, FORS 759, GEOG 759**Grade Mode:** Letter Grading**NR 760 - Geographic Information Systems in Natural Resources****Credits:** 4

This course in geographic information systems (GIS), covers advanced theory, concepts, and applications of GIS for natural resource and related disciplines. Discussion of database structures, data sources, spatial data manipulation/analysis/modeling, data quality and assessment. Students conduct a project of their design exploring aspects of GIS most useful to them. Lecture emphasizes concepts and applications through a text and selected peer-reviewed articles. Lab uses the latest version of ArcGIS software and provides hands-on experience.

**Prerequisite(s):** NR 658 with a minimum grade of D-.**Equivalent(s):** FOR 760, FORS 760, GEOG 760**Grade Mode:** Letter Grading**NR 761 - Environmental Soil Chemistry****Credits:** 4

Chemical transformations in soils are the basis for soil fertility and plant productivity in natural and managed ecosystems, and also influence key ecosystem processes including soil organic matter turnover and soil-atmosphere exchange of trace gases. This class will explore soil chemistry processes and transformations related to soil nutrient cycling, plant nutrient acquisition, and other critical environmental services.

**Grade Mode:** Letter Grading**NR #765 - Community Ecology****Credits:** 4

Properties of biotic communities, especially biodiversity. Effects of physical stress, disturbance, competition, predation, positive interactions, and dispersal on community properties. Community dynamics, including succession and stability. Lecture and discussion.

**Prerequisite(s):** BIOL 528 with a minimum grade of D- and BIOL 541 with a minimum grade of D-.**Grade Mode:** Letter Grading**NR 782 - Forest Health in a Changing World****Credits:** 4

Forests cover over 30% of the land surface of the Earth and are incredibly important ecologically, economically, and to the health of the planet.

While forests show great capacity to withstand disturbance, these ecosystems are increasingly threatened worldwide by climate change, native and introduced insects and disease, poor management practices, land clearing, drought, fire, and pollution. This course offers an overview of the dominant threats to forests, their causes and consequences, and options for monitoring, management, and mitigation.

**Grade Mode:** Letter Grading**Special Fee:** Yes

**NR 784 - Sustainable Living - Global Perspectives****Credits:** 4

The pursuit of sustainable solutions to living in our contemporary world is a global endeavor. In this course, the concept of living sustainably is explored from a broad international perspective. Global scale issues impacting sustainable resource use are considered, including population growth, economic globalization and development, social equity, and cultural values. We will expand our awareness of alternatives to those current practices that impede the sustainability of human societies as part of the earth's natural systems. We will also pursue an understanding of the interrelated socio-economic conditions, combined with social and personal ethics and values necessary to move toward a more sustainable future. And each of us will come to value what sustainable living means for our own lives.

**Prerequisite(s):** NR 437 with a minimum grade of D- or NR 435 with a minimum grade of D-.

**Equivalent(s):** EC 784

**Grade Mode:** Letter Grading

**NR 785 - Systems Thinking for Sustainable Solutions****Credits:** 4

This course applies systems thinking as a problem-solving approach aimed at exploring possibilities for creating a future based on sustainable relationships between healthy human societies and their natural environments. Types of systems and systems tools are utilized to describe human-environment relationships and to emphasize their resiliency or vulnerability to future unsustainable events and/or practices. We explore how systems may be restructured to create more sustainable outcomes.

**Prerequisite(s):** NR 437 (may be taken concurrently) with a minimum grade of D- or NR 435 (may be taken concurrently) with a minimum grade of D-.

**Equivalent(s):** EC 785

**Grade Mode:** Letter Grading

**NR 786 - Leadership for Sustainability****Credits:** 4

In this course we review and evaluate current knowledge and practice regarding the attainment of sustainability in social and environmental relations. We particularly focus on the meaning and qualities of leadership for achieving a sustainable future. Along the way, we also reflect on our own leadership styles and qualities. Topics include the role of leaders and leadership practices in government, business, academia etc; concepts and theories for achieving social change; and case studies exemplifying a range of leaders and approaches toward sustainability.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** NR 437 with a minimum grade of D- or NR 435 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 787 - Advanced Topics in Sustainable Energy****Credits:** 4

This course engages students in advanced topics in sustainable energy. Course reviews basic structures of our energy system, energy markets and economics, and the environmental, economic and technological of energy landscape. Focus is on electricity and building use with introductions to the transportation system. Students gain the knowledge to evaluate innovations in technology, policy and financing necessary to implement sustainable energy goals from conservation and efficiency to renewables and energy storage.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 791 - Preparation for Capstone****Credits:** 1

This class will require that students develop a proposal for their senior capstone experience, seek approval for that proposal from a faculty sponsor, and be prepared to complete the capstone senior year. Students will also work on resume development, on writing text introducing themselves to prospective employers, and on interviewing strategies.

**Grade Mode:** Credit/Fail Grading

**NR 795 - Investigations****Credits:** 1-4

Investigations in Natural Resources may include topics in environmental conservation, forestry, soil and watershed management, ecosystems, and wildlife management. Special fee on some topics.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NR 795W - Investigations****Credits:** 1-4

Investigations in Natural Resources may include topics in environmental conservation, forestry, soil and watershed management, ecosystems, and wildlife management.

**Attributes:** Writing Intensive Course

**Grade Mode:** Letter Grading

**NR 799 - Honors Senior Thesis****Credits:** 1-4

Honor/thesis students conduct an independent research project, relevant to the student's area of specialization in the major, under the direction of a faculty sponsor. Students submit a research proposal, write a final report, and provide an oral presentation. One or two semester sequence.

**Attributes:** Honors course; Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** EC 799, FOR 799, WARM 795, WILD 799

**Grade Mode:** Letter Grading

## Neuropsychology (NPSY)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NPSY 600 - Behavioral Neuroscience****Credits:** 4

This course is an introduction to behavioral neuroscience, with a focus on clinical applications. The course begins with an in-depth overview of the structure and function of neurons and then moves into topics such as sensory processing, psychopathology, and cognition. Students will learn about neural networks that give rise to these behaviors, and how the brain interacts with other organs. Additionally, students will learn through case studies.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NPSY 700 - Neuroimaging: Theory and Application****Credits:** 4

Neuroimaging techniques are commonly used in both clinical and research settings. This course introduces students to the fundamental principles governing neuroimaging. Topics covered include neuroanatomy and neurobiology reviewed in the context of different neuroimaging methods such as computed tomography, magnetic resonance imaging, electroencephalogram, and position emission tomography. We will review the various methods for processing structural, functional, and multimodal imaging datasets. Students will also gain hands on experience processing neuroimaging data during computer lab simulations.

**Prerequisite(s):** PSYC 531 with a minimum grade of D- or NPSY 600 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NPSY 701 - Neuropsychology Capstone Project****Credits:** 4

Under the direction of a faculty mentor, students will perform a research project in one of the labs within the Life Sciences department. Students will work with their mentor to design a research project, which will be approved by the course instructor. During class students will present their projects and be provided resources on how to navigate setbacks. Additionally, students will learn about: research ethics, review statistical methods, poster & manuscript preparation, and careers in neuroscience.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 531 with a minimum grade of D- or NPSY 600 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**NPSY 795 - Independent Study****Credits:** 1-4

Arranged by the student with a neuropsychology, psychology or biology faculty sponsor. Learner/sponsor contract required. Minimum time commitment: three hours per credit per week.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and NPSY 600 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 1 time.

**Grade Mode:** Letter Grading

**NPSY 798 - Capstone****Credits:** 0

This is a zero credit course to indicate on the transcript that the capstone requirement is fulfilled.

**Grade Mode:** Credit/Fail Grading

## Neuroscience and Behavior (NSB)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NSB 400 - Topics Neuroscience & Behavior****Credits:** 1

This seminar type course is designed as an introductory experience for incoming first-year students, although it may be taken by students transferring into the major. Topics covered will include sensory biology, learning and memory, homing and navigation, neuromodulators and stress, reproductive behaviors. The format will rely heavily on discussion, prompted either by assigned readings or presentations by program faculty on their areas of expertise.

**Grade Mode:** Credit/Fail Grading

**NSB 500 - Fundamentals of Neuroscience and Behavior I****Credits:** 3

The course will introduce students to the fundamental neural processes underlying behavior. It will begin with a detailed examination of the properties of individual neurons and then move on to demonstrate how neurons can communicate together to produce complex behaviors. Some of the basic concepts that will be covered will include: the molecular basis of electrical and chemical communication, sensory transduction and processing, neuropharmacology, the neural basis of reflexes and simple behavior, development of the nervous system and the influence of external stimuli on neural processing.

**Co-requisite:** NSB 501

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of D- and CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NSB 501 - Fundamentals of Neuroscience and Behavior I Laboratory****Credits:** 2

The course is designed to expose students to some of the classic experiments in cellular and molecular Neurobiology. They will record from sensory and motor neurons, stain and view neurons, carry out simple behavior experiments and record from muscles in freely behaving animals. The laboratory exercises will run parallel with the concepts taught in lecture and complement the lecture material in many ways. Students will conduct actual experiments, analyze the results and write lab reports as well.

**Co-requisite:** NSB 500

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of D- and CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NSB 502 - Fundamentals of Neuroscience and Behavior II/Systems Neuroscience****Credits:** 3

This course is an introduction to the questions addressed by scientists who aim to understand the biological basis of behavior and cognition. This semester we will review the major organization of the central nervous system and how these systems interact with each other to produce behavior and cognition. Major topics will include: the development and emergence of behavior; movement; the neural basis of cognition, and language, thought, affect and learning.

**Co-requisite:** NSB 503

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D- and CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D- and NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NSB 503 - Fundamentals of Neuroscience and Behavior II Laboratory**  
**Credits: 2**

This laboratory class will complement the material being taught in NSB 502. The laboratory will focus on behavioral and cognitive neuroscience experiments. Students will learn about neuroanatomy and neuroscience research methods, including experimental design, data collection, statistical analysis, data interpretation, and manuscript preparation through conducting actual experiments. Students will write research reports describing their experiments and will receive some basic computer programming and research ethics training.

**Co-requisite:** NSB 502

**Prerequisite(s):** NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NSB 600 - Field Experience in Neuroscience and Behavior**

**Credits: 1-4**

A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities relevant to neuroscience and behavior. Must be approved by a faculty advisor selected by the student.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Credit/Fail Grading

**NSB 705 - Molecular and Cellular Neurobiology**

**Credits: 4**

The overarching goal of this course is to examine the molecular and cellular mechanisms underlying neuronal function. This course builds on fundamental knowledge in neuroscience. Students will be exposed to primary literature regarding how different model organisms have been used to understand neurons.

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C- and CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D- and NSB 500 with a minimum grade of C- and NSB 502 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**NSB 727 - Animal Communication**

**Credits: 4**

This course examines the principles underlying how animals communicate with each other and why they communicate the way they do by using perspectives drawn from a broad range of disciplines including physics, chemistry, ecology, psychology, economics, and behavioral ecology. Students will explore the primary literature, and work in teams to conduct independent research. The course is intended for advanced undergraduate or graduate students interested in neuroscience and behavior, evolution, wildlife and conservation biology, or zoology.

**Prerequisite(s):** BIOL 412 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NSB #728 - Research Methods in Animal Behavior**

**Credits: 4**

This course provides hands-on experience with modern methods for studying animal behavior in the field and laboratory, and immersion in the primary literature. Animal behavior research projects will be complemented with a sequence of technical training sessions, the goals of which are to provide students with practical expertise in modern ethological techniques. The course takes a 'learn by doing' approach, with student research teams building relevant methodological proficiencies in the context of an investigation of their own design.

**Prerequisite(s):** BIOL 412 with a minimum grade of C- and ZOOL 613 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NSB 795 - Special Investigations**

**Credits: 1-4**

Independent research with any member of the NSB faculty in various areas including, but not limited to, neuroscience, neuroendocrinology, animal behavior.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** NSB 795W

**Grade Mode:** Letter Grading

**NSB 795W - Special Investigations**

**Credits: 1-4**

Independent research with any member of the NSB faculty in various areas including but not limited to neuroscience, neuroendocrinology, animal behavior.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Equivalent(s):** NSB 795

**Grade Mode:** Letter Grading

**NSB 798 - Capstone**

**Credits: 0**

This is a 0 credit course to indicate on the transcript that capstone requirement is fulfilled.

**Grade Mode:** Credit/Fail Grading

**NSB 799 - NSB Senior Thesis**

**Credits: 2-4**

Working under the direction of a faculty sponsor, the student plans and executes independent research resulting in a written thesis and public presentation. Limited to students entering their senior year. A two-semester sequence 2-4 credits each semester. IA (continuous grading) given first semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**NSB 799H - Honors Senior Thesis**

**Credits: 2-4**

Working under the direction of a faculty sponsor, the student plans and executes independent research resulting in a written thesis and public presentation. Limited to student entering their senior year or under exceptional circumstances their junior year. Required for students working toward University Honors or Honors-in-Major. A two-semester sequence 2-4 credits each semester. IA (continuous grading) given first semester.

**Attributes:** Honors course; Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

## Nursing (NUR) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### NUR 600 - Enhancing Your Nursing Career

**Credits:** 2

This course provides the RN to BSN student the opportunity to explore the contemporary nursing issues related to the major concepts that form a basis for the program outcomes and the additional nursing courses. Nursing knowledge is gained through a combination of experiential, evidence based, and classroom experiences. This course introduces the structure of evaluation and includes emphasis on evidence based practice, professional trends, and an opportunity to explore potential capstone project ideas.

**Equivalent(s):** NUR 600G

**Grade Mode:** Letter Grading

### NUR 615 - Evidence-Based Nursing

**Credits:** 4

The contemporary nurse is continually faced with a wide variety of problems encountered in the care of patients. Thus the nurse must have a repertoire of problem-solving skills that is based on sound evidence. Identification, evaluation, application, and/or compilation of evidence from a variety of resources to apply to health-related problems of individuals, families, communities, and the health care delivery system are essential tools of the contemporary nurse. Students will identify problems encountered in practice and find pertinent resources to assist in resolving them. The student will apply specific criteria to assess the quality of evidence, and as part of a team, will discuss whether it could feasibly and ethically be applied to care of patients. In addition, students will identify a problem or aspect of a problem to be researched, find relevant resources and/or literature, and determine what additional information is needed to resolve the problem. In collaboration with team members, a method of gathering pertinent data will be developed. Active R.N. License, or transfer credit in Statistics accepted as requirements prior to taking this course.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (NUR 600 with a minimum grade of C or NUR 600G with a minimum grade of C) and (MTH 504 with a minimum grade of C or MATH 504G with a minimum grade of C).

**Equivalent(s):** NUR 602G

**Grade Mode:** Letter Grading

### NUR 635 - The Nurse as Leader

**Credits:** 4

The nurse of today and tomorrow must inevitably be a leader, whether at the bedside in assisting an individual patient toward enhanced health or leading health care organizations, public policy initiatives, and professional associations to maximize their contributions to the health of the nation. The nurse, as the most plentiful, versatile, and wide-spread of health care providers, must be prepared to develop and implement new visions and models of care delivery, applications of technology, stewardship of costly resources, evaluation and improvement of health care quality, and delivery of safe, effective health care in a variety of settings. The student will explore leadership theories and styles, evaluate appropriate application of several leadership approaches, practice the leadership role in a project to create a health-care related change, and offer collegial peer evaluation of classmates' work. Active R.N. License required prior to taking this course.

**Prerequisite(s):** NUR 615 with a minimum grade of C or NUR 602G with a minimum grade of C.

**Equivalent(s):** NUR 606G

**Grade Mode:** Letter Grading

### NUR 670 - Nursing Care of Populations

**Credits:** 4

This course expands the student's focus from the care of individual patients to the care of aggregates. Aggregates may range from small to large, and include families, groups, communities, and the global population. Students will investigate the concept of community assessment and use a systems-based epidemiological model to organize data about health problems and populations at risk. Health challenges of specific diverse populations will be investigated along with resources for change and health promotion within the community. Students will perform a problem-focused literature review about a selected problem and create a community-based plan of care. Students will also become familiar with public health resources and functions. This course involves a clinical experience which comprises thirty hours spent in virtual simulation.

**Prerequisite(s):** NUR 615 with a minimum grade of C or NUR 602G with a minimum grade of C.

**Equivalent(s):** NUR 603G

**Grade Mode:** Letter Grading

### NUR 700 - Nursing Implications of Genetics and Genomics

**Credits:** 4

The human genome project has forever changed the understanding of human nature, health, illness, and approaches to patient care. During this course, topics will include current applications of genomic information and genetic interventions in health care. Students will learn to assess patients for possible genetic risk factors, genetic mutations occurring as a consequence of person-environment interaction, and specific health problems with known genetic bases. The nurse's role in assessment, case-finding, referral, and intervention will be emphasized. Students will also determine present regional applications of genetic medicine and familiarize themselves with existing community resources for assisting individuals with genetic issues.

**Prerequisite(s):** NUR 615 with a minimum grade of C or NUR 602G with a minimum grade of C.

**Equivalent(s):** NUR 607G

**Grade Mode:** Letter Grading

**NUR 740 - Nursing Care of Vulnerable Populations****Credits:** 4

Nursing care of vulnerable populations requires the nurse to integrate concepts of vulnerability, disparities, and social determinants of health with prior knowledge in caring for individuals and populations. This course includes information from different cultures and at-risk groups of individuals considered to be vulnerable. Key concepts to be covered include, understanding of the unique challenges in caring for the vulnerable, relevant health care research, and skills required to work with and advocate for vulnerable populations.

**Prerequisite(s):** NUR 670 with a minimum grade of C or NUR 603G with a minimum grade of C.

**Equivalent(s):** NUR 604G, NUR 610G

**Grade Mode:** Letter Grading

**NUR 795 - Integrative Capstone: Nursing Practicum****Credits:** 4

This course offers the opportunity to develop and implement a personalized precepted experience. The experience will include a project designed to solve an evidence-based problem or improve the quality of an aspect of nursing practice in the work place. The student will incorporate throughout the practicum the knowledge, skills, and enhanced professionalism acquired in the B.S.N. program. The role of the faculty will be that of consultant. The project will be presented and/or implemented in the work place as well as in the peer group, and the student will elicit evaluation of his/her work from colleagues and peers. Using evaluation feedback, the student will hypothesize and present ways of improving the project's quality. Prior to capstone enrollment, students are expected to complete the majority of their required major courses along with having an Active R.N. License. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (CRIT 602 with a minimum grade of C or CRIT 602G with a minimum grade of C or CRIT 502G with a minimum grade of C) and (IDIS 601 with a minimum grade of C or IDIS 601G with a minimum grade of C).

**Equivalent(s):** NUR 655G

**Grade Mode:** Letter Grading

## Nursing (NURS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NURS 450 - Making Babies: Technology, Nature, and Social Context****Credits:** 4

Examines the process of human birth focusing on the emergent technologies of human genetics, assisted fertility technologies, prenatal diagnosis and treatment, as well as the appropriate and inappropriate use of technology through the labor, delivery, and post-partum experience. The social, cultural, political, and historical context for the development and application of these technologies is explored.

**Attributes:** Environment, TechSociety(Disc)

**Equivalent(s):** HHS 450

**Grade Mode:** Letter Grading

**NURS 500 - Introduction to Professional Nursing****Credits:** 2

The course provides an overview of professional nursing with a focus on reflective thinking. A synthesis of current and projected trends in nursing practice and education, with an introduction to topics on ethical, social, and legislative issues, are explored. This course is divided into five modules: nursing as a career, nursing as a profession, nursing as art and science, nursing as communication, and nursing and relationship-centered care.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NURS 501 - Research for Nursing Professionals****Credits:** 4

The course focuses on the translation of current evidence into nursing practice through the identification of practice issues, appraisal and application of evidence, and the evaluation of outcomes. Development of evidence is examined using the research process. Concepts explored include research ethics and legal precepts, clinical judgment in knowledge development and application, and the integration of client values and preferences. Students learn to use reliable evidence to inform practice and make clinical judgments to promote nursing best practice.

**Equivalent(s):** HHS 598, NURS 641

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NURS 504 - Disease and Drugs I****Credits:** 4

The two semester course advances knowledge of human physiology and the pathophysiological variations in selected global disease states in adults and children. Student explore how the human body uses its adaptive powers to maintain a steady state and how alterations affect normal processes. Pharmacological agents used on these alterations are examined.

**Prerequisite(s):** BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D- and BMS 501 (may be taken concurrently) with a minimum grade of D-.

**Equivalent(s):** NURS 502

**Grade Mode:** Letter Grading

**NURS 505 - Diseases and Drugs II****Credits:** 0 or 4

The two semester course advances knowledge of human physiology and the pathopsychological variations in selected global disease states in adults and children. Students explore how the human body uses its adaptive powers to maintain a steady state and how alterations affect normal processes. Pharmacological agents used on these alterations are examined.

**Co-requisite:** NURS 506, NURS 601

**Prerequisite(s):** NURS 500 with a minimum grade of D-.

**Equivalent(s):** NURS 502

**Grade Mode:** Letter Grading

**NURS 506 - Human Development, Interaction and Learning Across the Lifespan****Credits:** 4

The course emphasizes human development, interaction and learning across the lifespan as essential to safe, effective relationship-centered care. An exploration of selected theoretical perspectives on human development, education and learning and group development prepares students to engage in professional practice.

**Co-requisite:** NURS 505, NURS 601

**Prerequisite(s):** NURS 500 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NURS 516 - Health Assessment and Nursing Fundamentals****Credits:** 0 or 4

Focuses on the acquisition of psychomotor and assessment skills required for the delivery of safe nursing care. Students begin by learning clinical skills in the simulation setting and then using those skills with supervision in the clinical setting. An additional focus of this course is understanding fundamental nursing concepts as they pertain to providing safe, effective care.

**Co-requisite:** NURS 516C**Grade Mode:** Letter Grading**NURS 516C - Health Assessment and Nursing Fundamentals Clinical****Credits:** 2

This clinical course is designed to provide experiences to apply the knowledge to the skills required to perform a systematic examination of a healthy adult, to perform basic psychomotor skills and to record findings appropriately. Students implement the nursing process by obtaining health histories, performing physical and psychosocial assessments, establishing a database, and formulating initial nursing plans. Students become familiar with the nursing simulation lab.

**Co-requisite:** NURS 516**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 517C - Clinical Integration****Credits:** 0 or 2

This course focuses on continued development of nursing skills necessary for promoting health in adults. Clinical practicum focuses on restorative care by providing supervised professional nursing practice for development of multidimensional assessment skills, decision-making processes, and evidence-based strategies and interventions for patients transitioning across the health care continuum. Application of evidence-based practice may include rehabilitative, end of life and palliative care.

**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 535 - Death and Dying****Credits:** 4

Encompasses peoples' responses to death throughout the lifecycle. Theories of death, dying, and grieving discussed. Students explore cultural influences, legal, and ethical dilemmas; the biopsychosocial needs of people facing life-threatening situations; resources for care of the dying; death rituals; and surviving a major loss.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**NURS 601 - Function and Wellbeing of Older Adults****Credits:** 2

This course focuses on developing knowledge necessary for promoting healthy aging and wellness across the lifespan. Multidimensional assessment skills are utilized to develop appropriate evidence-based interventions to assist individuals and families to maintain wellness and promote healthy lifestyles, and enhance the quality of life for older adults with acute and chronic conditions. Students will explore nursing issues and principles of promoting wellness across the health care continuum including end of life and palliative care.

**Grade Mode:** Letter Grading**NURS 611 - Care of the Adult with Acute Illness I****Credits:** 0 or 4

The first of two courses focused on adult health nursing of clients with commonly occurring disease states in the acute care setting. Course builds on previously learned knowledge of physical assessment and technical skills to focus on key components of acute care nursing. Special emphasis placed on the etiology, clinical evaluation and use of evidence-based nursing interventions to manage specific health problems related to cardiovascular, hematologic, pulmonary, endocrine and renal systems. The advanced skills and techniques required to care for clients with commonly occurring disease states is included.

**Co-requisite:** NURS 611C**Equivalent(s):** NURS 615**Grade Mode:** Letter Grading**NURS 611C - Care of the Adult with Acute Illness I Clinical****Credits:** 2

Designed to provide the student with opportunities to apply the nursing process and clinical judgment within an acute care setting to clients with commonly occurring disease states. The experience focuses on the application of knowledge and skills, evidence-based practice, clinical judgment and relationship-centered care.

**Co-requisite:** NURS 611**Prerequisite(s):** NURS 505 with a minimum grade of D-**Equivalent(s):** NURS 615C**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 612 - Care of the Adult with Acute Illness II****Credits:** 0 or 4

This is the second of two courses focused on adult health nursing of clients with commonly occurring disease states in acute care nursing. The course builds on previously learned knowledge of physical assessment and technical skills to focus on key components of acute care nursing. Special emphasis is placed on the etiology, clinical evaluation and use of evidence-based nursing interventions to manage specific health problems related to gastrointestinal, neurological, musculoskeletal systems and clients undergoing surgery. Complex client issues related to oncologic, immunologic and shock states are introduced. The advanced skills and interventions required to care for clients with commonly occurring disease states and those undergoing surgery are included.

**Co-requisite:** NURS 612C**Prerequisite(s):** NURS 611 with a minimum grade of D-**Equivalent(s):** NURS 615**Grade Mode:** Letter Grading**NURS 612C - Care of the Adult with Acute Illness II Clinical****Credits:** 2

Course is designed to provide the student with opportunities to apply the nursing process and clinical judgment within an acute care setting to clients with commonly occurring disease states and those undergoing surgery. The experience focuses on the application of knowledge and skills, evidence-based practice, clinical judgment and relationship-centered care.

**Co-requisite:** NURS 612**Prerequisite(s):** NURS 611 with a minimum grade of D-**Equivalent(s):** NURS 615C**Grade Mode:** Letter Grading**Special Fee:** Yes

**NURS 616 - Living with Mental Illness****Credits:** 2

This course is designed to provide an understanding of the concepts of mental health and major factors affecting human behavior and interaction. Specific theoretical concepts guiding nurse-client interactions are utilized as a vehicle for supporting the person's and family's optimum state of well-being.

**Co-requisite:** NURS 616C**Equivalent(s):** NURS 618**Grade Mode:** Letter Grading**NURS 616C - Living with Mental Illness Clinical****Credits:** 2

In this psychiatric nursing clinical course the nursing process and a situation-based interpretive approach serve as framework for professional nursing action. A special focus is placed on the integration of personal knowledge, therapeutic use of self and communication skills inherent in nurse-client relationships. Through a variety of clinical experiences, the student applies mental health concepts and principles of therapeutic communication in caring for people and families with alterations in mental health.

**Co-requisite:** NURS 616**Grade Mode:** Letter Grading**NURS 621 - Maternal and Newborn Nursing****Credits:** 0 or 2

The course allows students an opportunity to develop necessary knowledge, attitudes and skills required for the provision of safe care to child bearing women and their families. Childbirth is viewed as part of the life cycle with emphasis on women and family-centered care, normal physiological childbirth, client advocacy and the provision of therapeutic nursing practice.

**Co-requisite:** NURS 621C**Equivalent(s):** NURS 620**Grade Mode:** Letter Grading**NURS 621C - Maternal Newborn Nurs Clin****Credits:** 2

This clinical component of NURS 621, a course that has family as the focus for nursing practice, introducing the student to the care of young families throughout pregnancy, birth, and child-rearing periods. The health needs of the young family are discussed in terms of major morbidity/mortality and contemporary issues. This clinical course offers students experiences in various clinical settings in order to provide opportunities for the development of professional practice roles in maternal health.

**Co-requisite:** NURS 621**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 627 - Clinical Judgment in Nursing****Credits:** 4

This course is designed to apply and analyze clinical reasoning and judgement in a variety of situations, focusing on the ability to prioritize and individualize evidence-based nursing interventions.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**NURS 648W - Nursing Honors Seminar I****Credits:** 1-4

Honors seminar is designed to expand the knowledge and skills to develop a research thesis or quality improvement capstone project. Literature review and methods development will be a major focus under the direction of a faculty advisor.

**Attributes:** Honors course; Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 5 credits.**Grade Mode:** Letter Grading**NURS 695 - Independent Study****Credits:** 2-4

In-depth study with faculty supervision. May be repeated for different topics.

**Grade Mode:** Letter Grading**NURS 702 - Child Health Nursing****Credits:** 0 or 2

The course considers the child in the context of family as the focus for nursing practice, introducing the student to the care of children using a developmental approach. Commonly occurring health transitions and alterations occurring from infancy through adolescence are examined. A survey of child health explores both professional practice roles of the pediatric nurse in health promotion and illness as well as acute and chronic conditions that impact children at various stages of development.

**Equivalent(s):** NURS 620**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 702C - Child Health in the Community Clinical****Credits:** 2

Semester long clinical course focused on the practice of pediatric nursing in the community.

**Co-requisite:** NURS 702**Grade Mode:** Letter Grading**NURS 704 - Public Health Nursing****Credits:** 4

This course prepares the student for population-focused practice. Emphasis is placed on the synthesis of concepts, theories, knowledge and practice from nursing and public health sciences. Students explore the concepts of: community as client, community assessment, health promotion, health protection, illness prevention and vulnerability from a public health nursing perspective.

**Equivalent(s):** NURS 624**Grade Mode:** Letter Grading**NURS 704P - Public Health Nursing Project****Credits:** 2

Semester long experience working in teams with a community organization to address a current public health issue. Learning focuses on working in teams to develop a strategic understanding of the identified public health issue and to design, implement, and evaluate a targeted intervention project.

**Grade Mode:** Letter Grading

**NURS 705 - Contemporary Leadership within Health Care Systems****Credits:** 4

The course explores the dynamic nature of the healthcare system and practice environments that impact nursing. Emphasis is placed on relationship of ethics, power, change, conflict, communication and politics in health care systems. Focus is placed on the use of models of leadership and management to effectively negotiate change, provided safe quality care, and promote professional practice in the delivery of relationship-centered care.

**Co-requisite:** NURS 721**Equivalent(s):** NURS 703, NURS 705W**Grade Mode:** Letter Grading**NURS 711 - Clinical Judgment in Complex Illness****Credits:** 0 or 2

This course further develops and refines critical thinking skills by student participation in clinical scenarios and de-briefings. Students prepare for the care of patients with complex illness and engage in health assessment, psychomotor skills, and implementing the nursing process to develop a plan of care. May be waived with special circumstances.

**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 721 - Integrating Professional Nursing Practice****Credits:** 2

Weekly seminar provides an opportunity for the analysis, synthesis, refinement and integration of nursing knowledge. Standardized testing provides timely feedback to facilitate transition to professional practice.

**Co-requisite:** NURS 721C**Equivalent(s):** NURS 720**Grade Mode:** Letter Grading**NURS 721C - Integrating Professional Nursing Practice Clinical****Credits:** 6

Clinical synthesis experience to refine and integrate previously learned knowledge and skills into professional practice through a cooperatively designed learning experience. Students plan, deliver and manage care under the supervision of a licensed preceptor.

**Co-requisite:** NURS 721**Grade Mode:** Letter Grading**NURS 748W - Nursing Honors Thesis I****Credits:** 1

Honors seminar designed to expand the knowledge and skills presented in previous honors in major courses. Focuses on a project relevant to the discipline of nursing under the direction of a faculty adviser. Open to honors-in-major and senior nursing majors.

**Attributes:** Honors course; Writing Intensive Course**Prerequisite(s):** NURS 648 with a minimum grade of D-.**Equivalent(s):** NURS 797**Grade Mode:** Letter Grading**NURS 749W - Nursing Honors Thesis II****Credits:** 4

Honors seminar designed to expand the knowledge and skills presented in previous honors in major courses. Focuses on a project relevant to the discipline of nursing under the direction of a faculty adviser. Open to honors-in-major and senior nursing majors.

**Attributes:** Honors course; Writing Intensive Course**Prerequisite(s):** NURS 648 with a minimum grade of D- and NURS 748W with a minimum grade of D-.**Equivalent(s):** NURS 797**Grade Mode:** Letter Grading**NURS 794 - Special Topics****Credits:** 1-4

Specialized courses covering information not normally presented in regular course offerings. Description of topics varies. May be repeated but not in duplicate areas of content. Special fee on some sections.

**Grade Mode:** Letter Grading**Special Fee:** Yes**NURS 794W - Special Topics****Credits:** 1-4

Specialized courses covering information not normally presented in regular course offerings. Description of topics varies. May be repeated but not in duplicate areas of content. Special fee on some sections.

**Attributes:** Writing Intensive Course**Equivalent(s):** NURS 794**Grade Mode:** Letter Grading**Special Fee:** Yes

## Nutrition (NUTR)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**NUTR 400 - Nutrition in Health and Well Being****Credits:** 0 or 4

Addresses scientific principles of human nutrition to promote health and well-being. Overview of the biological significance of food and nutrition, specific nutrient functions, and how the supply and demand of food impacts physical health and well-being. Emphasis on scientific literacy and an appreciation of the ways in which we gain scientific knowledge and understanding. Lab.

**Attributes:** Biological Science(Discovery); Discovery Lab Course**Equivalent(s):** ANSC 400, NUTR 400H, NUTR 475**Grade Mode:** Letter Grading**Special Fee:** Yes**NUTR 401 - Professional Perspectives on Nutrition****Credits:** 1

Examines the many opportunities for dietitians and nutrition science professionals, from farm to fork, to health and nutrition outcomes. Students meet and interact with faculty and explore career paths and nutrition strategies in the food and nutrition science fields. Legal and ethical considerations for these professionals are discussed. Content areas for specialization in nutritional sciences, dietetics, health and wellness are reviewed, as well as the Ecogastronomy dual major.

**Grade Mode:** Credit/Fail Grading**NUTR 403 - Culinary Arts Skills Development****Credits:** 4

This laboratory class explores classical culinary and basic cooking techniques. Classical recipes for stocks, mother sauces, soups and pie crust, quick and yeast breads are featured with hands-on experiential learning using common practices and techniques of the food service industry. Students will gain an understanding of basic ingredients, fabrication, storage, cooking, hygiene and sanitation, equipment usage in modern culinary through demonstration, practice and evaluation.

**Equivalent(s):** CAN 403**Grade Mode:** Letter Grading**Special Fee:** Yes

**NUTR 405 - Food and Society****Credits:** 4

Consideration of the cultural significance of food, emphasizing historical, psychological, social, political, and economic aspects. (Spring semester only.)

**Attributes:** Social Science (Discovery)**Equivalent(s):** ANSC 405, NUTR 405W**Grade Mode:** Letter Grading**NUTR 476 - Nutritional Assessment****Credits:** 4

Designed for the student who plans to enter the health care profession. Introduces the concepts of nutritional assessment and the practical application of these concepts in the nutritional care of clients in clinical, community, and research settings.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.**Grade Mode:** Letter Grading**NUTR 504 - Managerial Skills in Dietetics****Credits:** 4

Emphasis on the basic principles of managing clinical, community, and food service operations, including personnel management, in-service and on-the-job training, policy and procedure development, negotiation techniques, facilities, equipment selection, and financial management.

**Equivalent(s):** NUTR 503**Grade Mode:** Letter Grading**NUTR 506 - Nutrition and Wellness****Credits:** 4

Course assists students in making informed decisions affecting personal and societal wellness. Emphasis on the dimensions of wellness, including the impact of psychological, emotional and physical health, as well as environmental influences that affect behavior.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.

**Mutual Exclusion:** No credit for students who have taken EXSC 527, KIN 527.

**Grade Mode:** Letter Grading**NUTR 525 - Food and Culture in Italy****Credits:** 4

Students will be introduced to the Italian culture and its traditions, with a special focus on food. Part of the course will involve out-of-class activities and tasting experiences in the city of Ascoli Piceno, Italy. Only open to students studying abroad in the UNH-in-Italy Program.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**NUTR 530 - Critical Analysis in Food Studies****Credits:** 4

The course aims to investigate concepts and ideas that are essential to food studies. The philosophical aspects of the course are complemented by the experiential components that emphasize the particularity of the Italian environment. Only open to students studying abroad in the UNH-in-Italy Program.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**NUTR 535 - History of Food in Italy****Credits:** 4

Students will examine the history of food in Italy and explore the interconnected sociological, cultural, political and environmental histories. Only open to students studying abroad in the UNH-in-Italy Program.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**NUTR 546 - Nutrition in Exercise and Sports****Credits:** 4

Advanced nutritional strategies to optimize health, fitness, and athletic performance. Emphasis is on nutrition before, during, and after exercise for fitness, training, and competitions. Topics include healthy strategies for building muscle and losing body fat, as well as dietary manipulation in an effort to gain a competitive advantage.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.**Equivalent(s):** NUTR 646**Grade Mode:** Letter Grading**NUTR 550 - Food Science: Principle and Practice****Credits:** 4

Application of scientific principles associated with the study of foods. Topics include: food composition, food additives and regulations, food safety, food biotechnology, product development and sensory evaluation. Principles of scientific inquiry as food ingredients are manipulated in a kitchen lab environment. Lab.

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and NUTR 403 with a minimum grade of D- and (CHEM 411 with a minimum grade of D- or CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D-).

**Equivalent(s):** NUTR 500, NUTR 501**Grade Mode:** Letter Grading**Special Fee:** Yes**NUTR 560 - Introduction to Research in Nutrition****Credits:** 2

Introduction to research methods in nutritional assessment. Students gain both conceptual knowledge and hands-on experience in a collaborative setting while working with the College Health and Nutrition Assessment Project.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**NUTR 595 - Mediterranean Diet and Culture****Credits:** 4

Is there a diet that allows one to eat, drink, and still be healthy? While Americans struggle with rising rates of obesity and related health conditions, inhabitants of the Mediterranean region enjoy relatively low rates of heart disease, cancer, and obesity. Offers a unique on-site experience in Ascoli Piceno, Italy to investigate the cultural and scientific importance of the Mediterranean Diet. Students review basic nutrition concepts as well as the history and evolution of the Mediterranean diet. Combining lecture, discussion, and experiential activities, NUTR 595 is offered through the UNH Italy Study Abroad Program during the summer session.

**Co-requisite:** INCO 589**Grade Mode:** Letter Grading**NUTR 600 - Field Experience in Nutrition****Credits:** 1-4

Supervised field experience in public and private agencies with planned learning objectives related to clinical and community nutrition and food service management. Students are responsible for their own transportation; faculty member coordinates arrangements with fieldwork sites.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 6 credits.**Grade Mode:** Credit/Fail Grading

**NUTR 610 - Nutrition Education and Counseling****Credits:** 4

The principles, methods and materials needed to provide nutrition education and counseling services. Emphasis on motivational interviewing, behavior change and developing skills needed to be an effective nutrition educator and counselor.

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and NUTR 476 with a minimum grade of D-.

**Equivalent(s):** NUTR 510

**Grade Mode:** Letter Grading

**NUTR 625 - From Farm to the Italian Table****Credits:** 4

Students will gain an appreciation for food production (harvesting, processing), culinary preparation, and tasting. Hands-on experience will be emphasized through field trips and will provide a broad, informed perspective on farming and sustainable agriculture. Only open to students studying abroad in the UNH-in-Italy Program.

**Grade Mode:** Letter Grading

**NUTR 628 - Culinary Nutrition Practicum****Credits:** 4

This course builds on basic cooking techniques learned in NUTR 403 with an emphasis on the study and use of whole food ingredients to prepare and critically evaluate healthy recipes/meals. Techniques such as recipe modification and menu development will be addressed. The course culminates with the development of a multi-course menu developed, prepared and presented by the students in the class.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NUTR 650 - Life Cycle Nutrition****Credits:** 4

Comprehensive review of the nutritional issues related to the life cycle. Nutrient requirements of each life cycle stage are analyzed in the context of their metabolic functions. Practical application of theory at each stage of the life cycle through projects and discussion. Recommended BMS 507 and BMS 508.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NUTR 686 - UNH-in-Italy Study Abroad****Credits:** 0

Provides a unique opportunity to study abroad in Ascoli Piceno, Italy during the semester. Open only to students studying abroad in the UNH-in-Italy Program.

**Grade Mode:** Not graded

**Special Fee:** Yes

**NUTR 699 - Independent Study****Credits:** 1-4

Scholarly project in an area of the nutritional sciences under the guidance of a faculty adviser.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 4 times.

**Equivalent(s):** NUTR 699W

**Grade Mode:** Credit/Fail Grading

**NUTR 700 - Career Development in Dietetics****Credits:** 1

Preparation for applying to dietetic internship programs and/or graduate school. Topics include writing resumes and personal statements, interviewing, professional skills, and navigating the online internship application.

**Grade Mode:** Letter Grading

**NUTR 709 - Nutritional Epidemiology****Credits:** 4

This course introduces basic concepts and methods in key areas of nutritional epidemiology, and discusses practical considerations related to designing, analyzing, and evaluating population-based nutrition studies. Research methods used in nutritional epidemiology will be taught to provide students with the ability to critically evaluate the nutritional epidemiological evidence. Learning will be enhanced by practical experiences in the collection, management, and analysis of nutritional epidemiological data during lab and in-class activities.

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and (PSYC 402 with a minimum grade of D- or SOC 502 with a minimum grade of D- or BIOL 528 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**NUTR 710 - Advanced Diabetes Care****Credits:** 2

Advanced Diabetes Care is a 2-credit course designed to build on foundational knowledge of diabetes care and education. During the semester, students will explore the pathophysiology of diabetes as well as modern medications and technology used to improve blood sugar management. Students will apply their knowledge of diabetes and nutrition to interpret data and deliver effective, compassionate care.

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NUTR 715 - Advanced Sports Nutrition****Credits:** 4

The focus of the course is placed on the application of evidence-based knowledge to sport-specific scenarios. Insight and skills gained in this course will expand students' abilities in assisting and recommending proper nutritional strategies for athletes during training and competition. Additionally, this discusses strategies to combat common issues athletes may encounter, such as injuries, illness, eating disorders, and gastrointestinal discomfort.

**Prerequisite(s):** NUTR 546 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NUTR 720 - Community Nutrition****Credits:** 4

Identification of causes of complex public health nutrition problems (such as food insecurity and escalating obesity rates) and cost-effective community-based interventions required to solve them. Provides skills and tools needed to assess design, and evaluate community nutrition and wellness interventions.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.

**Equivalent(s):** ANSC 610, ANSC 720

**Grade Mode:** Letter Grading

**NUTR 730 - From Seed to Sea: Examining Sustainable Food Systems****Credits:** 4

Integration of diverse human and natural system interactions in a seminar-based course to understand issues in food system sustainability. Examination of food system structure and function from coupled human and natural systems perspectives. Current and topical issues of food and agriculture include: exploration of using natural resources to meeting growing population demands; conflicting views on meeting food and nutrition requirements; impacts of increased stress on natural resources; inequities and discrimination in the food system; impact on dietary guidelines on the environment.

**Prerequisite(s):** NUTR 400 with a minimum grade of D- or NUTR 405 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NUTR 740 - Nutrition for Children with Special Needs****Credits:** 4

Nutritional assessment and care of children with special needs resulting in feeding difficulties requiring medical nutrition therapy.

**Prerequisite(s):** NUTR 400 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NUTR 750 - Nutritional Biochemistry****Credits:** 4

Digestion, absorption, transport, and utilization of food nutrients. Role of macro- and micro-nutrients as substrates and catalysts for metabolic pathways, and the role of these pathways in maintaining human health at the cellular, organ, and whole body levels.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-) and BMCB 658 with a minimum grade of D-.

**Equivalent(s):** ANSC 750, ANSC 750W, NUTR 750W

**Grade Mode:** Letter Grading

**NUTR 751 - Nutritional Biochemistry of Micronutrients****Credits:** 4

Investigation of the nutritional and biochemical aspects of micronutrient metabolism. All essential vitamins and minerals, as well as some phytonutrients and quasi-nutrients, are explored in depth. Nutrients are examined for their molecular, cellular, metabolic and biomedical functions, as well as the biochemical and clinical consequences of their deficiency or excess.

**Prerequisite(s):** NUTR 750 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**NUTR 755 - Concepts and Controversies in Weight Management****Credits:** 3

Overview of the risk factors associated with obesity; evidence-based recommendations for assessment and treatment of obesity. Counseling skills important to successful weight management and non-diet approaches are also explored.

**Co-requisite:** NUTR 758

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and NUTR 476 with a minimum grade of D- and NUTR 610 with a minimum grade of D-.

**Equivalent(s):** NUTR 756

**Grade Mode:** Letter Grading

**NUTR 758 - Practicum in Nutrition and Wellness****Credits:** 2

Assist clients in making lifestyle and dietary changes over a 10-week period and develop skills in marketing, advertising, counseling, an oral communication related to weight management.

**Co-requisite:** NUTR 755

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and NUTR 476 with a minimum grade of D- and NUTR 610 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Equivalent(s):** NUTR 680

**Grade Mode:** Letter Grading

**NUTR 773 - Clinical Nutrition****Credits:** 4

Principles and mechanisms of disease that result in altered nutrient requirements in humans.

**Prerequisite(s):** NUTR 400 with a minimum grade of D- and BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.

**Equivalent(s):** ANSC 773, ANSC 774, NUTR 774

**Grade Mode:** Letter Grading

**NUTR 775 - Practical Applications in Medical Nutrition Therapy****Credits:** 4

Combination of lecture and supervised practical experience in medical nutrition therapy in a New England hospital. Emphasizes nutritional counseling, assessment, and instruction of patients with nutrition-related disorders.

**Prerequisite(s):** NUTR 476 with a minimum grade of D- and ((BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-)) and BMCB 658 with a minimum grade of D-.

**Equivalent(s):** ANSC 775

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**NUTR 780 - Critical Issues in Nutrition****Credits:** 4

Critical review and analysis of controversial topics in nutrition; emphasis on developing oral and written communication skills and critical thinking skills.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** NUTR 773 with a minimum grade of D-.

**Equivalent(s):** ANSC 780

**Grade Mode:** Letter Grading

**NUTR 790 - Undergraduate Teaching Experience****Credits:** 1-2

Assist graduate teaching assistants or faculty in preparing, presenting, and executing NUTR courses/laboratories.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Grade Mode:** Letter Grading

**NUTR 795 - Investigations****Credits:** 1-4

Scholarly research project in an area of the nutritional sciences under the guidance of a faculty adviser.

**Equivalent(s):** NUTR 795W

**Grade Mode:** Letter Grading

**NUTR 795W - Investigations****Credits:** 1-4

Scholarly research project in an area of the nutritional sciences under the guidance of a faculty adviser.

**Attributes:** Writing Intensive Course**Equivalent(s):** NUTR 795**Grade Mode:** Letter Grading**NUTR 799H - Honors Senior Thesis****Credits:** 1-4

A special project conducted under faculty supervision and resulting in a written honors thesis. Students must initiate discussion of the project with an appropriate faculty member.

**Attributes:** Honors course; Writing Intensive Course

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 1 time.

**Grade Mode:** Letter Grading

## Occupational Therapy (OT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**OT 444 - Living and Doing with Technology****Credits:** 4

This course draws upon the knowledge from emerging product design concepts and principals and advocates for inclusiveness of all consumers regardless of their age, abilities, disabilities, and personal affinities. Students will apply critical thinking and hands-on learning to evaluate day-to-day technologies by use of various design criteria, identify usability problems, and design technology solutions. Course work will include readings, interactive activities, discussions, quizzes, and group projects.

**Attributes:** Environment,TechSociety(Disc); Inquiry (Discovery)**Grade Mode:** Letter Grading**OT 500 - Behavior and Development of Children****Credits:** 4

Introduces the biological, psychosocial, and cultural aspects of human development from birth through adolescence. Emphasizes theories that help explain human behavior; discusses implications of developmental research.

**Grade Mode:** Letter Grading**OT 501 - Developmental Tasks of Adulthood****Credits:** 4

Includes the biological and psychosocial context of development for adults. Developmental tasks relate to the accomplishment of prior tasks, physiological change, socioeconomic status, and psychosocial development.

**Grade Mode:** Letter Grading**OT 510 - Exploring Occupational Therapy and Occupation****Credits:** 4

Occupational therapy is introduced as a human service profession through experiential and academic activities, which illustrate the personal and professional skills required to practice in a variety of settings and roles. Basic concepts of human occupation and the therapeutic use of occupation are explored. Comparisons are made to related human service careers. Students are encouraged to do a personal assessment of their interest and potential for further study of occupational therapy.

**Grade Mode:** Letter Grading**OT 513 - Stressed Out: The Science and Nature of Human Stress****Credits:** 0 or 4

The human stress response system, research investigating the sequelae of stress on health, protective strategies for stress, managing personal stress effectively, and strategizing stress modulation as an intervention technique. Course format includes two hours of weekly lecture/discussion followed by one hour of experiential laboratory in which students research and/or apply new information.

**Attributes:** Biological Science(Discovery); Discovery Lab Course**Grade Mode:** Letter Grading**Special Fee:** Yes**OT 520 - Happy and Healthy at Work: Promoting Wellness, Diversity and Inclusion****Credits:** 4

Offers improved understanding and ability to effectively manage a diverse and healthy workforce. Addresses key diversity, inclusion, and wellness issues in the workplace of a general, technical, and social nature with an emphasis on disability and health promotion.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)**Equivalent(s):** HMG 520, HMG 598, OT 598**Grade Mode:** Letter Grading**Special Fee:** Yes**OT 610 - Occupation, Identity, Disability****Credits:** 4

Students develop skills and knowledge for analyzing daily existence, patterns of activity and the occupational choices pursued by humans. Students explore how the self-identity of individuals with and without disability is influenced by participation in everyday activities, and contextual factors: Through reading, reflective writing and collecting personal narratives of individuals with disability, students examine the relations among engagement in daily occupations and the orchestration of routines and social participation with self identity and well-being.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**OT 620 - Medical Terminology****Credits:** 2

This course provides an introduction to medical terminology. The origin, roots, prefixes and suffixes of common scientific and medical terms will be examined as well as common abbreviations and terms used in medical records documentation and within the medical, and allied health literature. Content is appropriate for students majoring in the Biological Sciences, Medical Sciences and Allied Health fields.

**Equivalent(s):** OT 720**Grade Mode:** Letter Grading**OT 685 - Psychosocial Disorders and Everyday Life****Credits:** 4

The study of abnormal behavior in the context of its effect on everyday function. Provides background information on adult psychosocial disorders commonly seen by service providers in the mental health system. Students learn to observe and describe behavior in terms of functional impairment, diagnostic criteria, and causative factors. General psychosocial and biological treatments are studied. This course or its equivalent is a prerequisite for entry to the professional master's degree program in occupational therapy. Students are expected to bring to this course a basic knowledge of psychosocial aspects of human development.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-**Grade Mode:** Letter Grading

**OT 695 - Independent Study****Credits:** 2-4

In-depth study with faculty supervision.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**OT 710 - OT Practice and Professional Roles****Credits:** 4

Students are introduced to foundation knowledge, values and philosophy of occupational therapy practice. Students learn skills to apply professional behaviors and skills required to be ethical practitioners. They learn about various practice settings and systems within which occupational therapists practice to prepare them to begin to make decisions regarding their fieldwork site selections. They are introduced to models of OT practice.

**Grade Mode:** Letter Grading**Special Fee:** Yes**OT 715 - Introduction to Group Process: Theory and Application****Credits:** 2

This course provides a theoretical foundation of group process in occupational therapy practice across practice settings. It explores several group theory perspectives and applies them to OT practice considering multiple group models, group leadership concepts, group process, therapeutic use of self, and contexts/environments. Students will learn to articulate core principles of group process and identify the role of occupational therapy practitioners in using groups as an intervention method and/or service delivery model.

**Grade Mode:** Letter Grading**OT 730 - Assistive Technology for Enhancing Occupational Performance****Credits:** 3

This course provides instruction on how occupational therapy practitioners use and apply assistive technology in the context of client evaluation and intervention, to improve quality of life and functional capacities. Students learn and apply clinical reasoning skills related to the selection, procurement, modification and training in the use of assistive technology solutions. OT majors only.

**Co-requisite:** OT 730L**Grade Mode:** Letter Grading**OT 730L - Assistive Technology for Enhancing Occupational Performance Lab****Credits:** 1

Co-Requisite Laboratory for OT 730 and OT 830 Assistive Technology for Enhancing Occupational Performance. Students are provided hands-on learning experiences regarding the fabrication, identification, adaptation and training in the use of assistive technology for individuals with functional problems associated with disability or impairment. OT evaluation and interventions related to the application of assistive technology are addressed. OT majors only.

**Co-requisite:** OT 730**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**OT 731 - Introduction to Assistive Technology Principles****Credits:** 2

This course presents an overview of the various assistive technology service delivery models, assessment tools, legislation, funding, and assistive technology across the lifespan.

**Grade Mode:** Letter Grading**OT 732 - Introduction to Assistive Technology Practices****Credits:** 2

This course presents an overview of the various service delivery models, assessment tools and teaches students how to create and modify devices. Students will conduct device demonstrations, training, reuse, and repair while acquiring skills using various fabrication tools, materials and techniques. Students will receive a materials kit they will use to fabricate eight assistive technology solutions. They will also be required to submit video clips and photos demonstrating their skills providing device demonstrations, loans and customer training.

**Grade Mode:** Letter Grading**Special Fee:** Yes**OT 733 - Assistive Technology for Physical Access I: Electronic Technologies****Credits:** 2

This course focuses on switch and computer access solutions; programming switch interfaces for computers and iPads; alternative mice and keyboards; switch access recipes; iPad mounting solutions; electronic aids for daily living, voice controlled solutions for the phone, computer, and activation of household appliances. Students will learn how to make, modify, and mount various switches an electronic devices. Intensive hands-on AT exploration will be completed on campus or virtual evidence provided will be accepted.

**Grade Mode:** Letter Grading**OT 734 - Assistive Technology for Physical Access II: Mobility, Seating, and Transportation****Credits:** 2

This course focuses on assistive technology solutions to maximize independence at home, in the community, and on the job for individuals who experience physical disabilities. Students will acquire skills in conducting accessibility assessments, Topics explored include wheelchair seating and mobility; ergonomic hand tools, independent living aids; ramps and lifts; vehicle modifications; and modifications for canes, crutches, walkers, and wheelchairs. Intensive hands-on AT exploration will be completed on campus or virtual evidence provided will be accepted.

**Grade Mode:** Letter Grading**OT 735 - Assistive Technology for Communication and Cognition****Credits:** 2

This course focuses on alternative and augmentative communication devices and devices that benefit individuals who experience cognitive impairments. This course explores assistive technology solutions for note taking, devices and apps for self-regulation, organization, and reminders. Students will learn how to conduct cognitive demand analysis for devices and apps to help users select appropriate accommodations and assistive technology solutions. Intensive hands-on AT exploration will be competed on campus or virtual evidence provided will be accepted.

**Grade Mode:** Letter Grading**OT 736 - Assistive Technology for Vision and Hearing****Credits:** 2

This course focuses on assistive technology for blind and low vision; deaf and hard of hearing; and deaf/blindness. Students will use an assortment of magnification devices; amplification systems; and assistive listening devices as well as learn how to create a variety of approaches to accommodate for vision and hearing impairments. Intensive hands-on AT exploration will be completed on campus or virtual evidence provided will be accepted.

**Grade Mode:** Letter Grading

**OT 741 - Human Occupation****Credits:** 4

This course introduces students to the broad concept of occupation by exploring ways people acquire skills for occupational performance. Students develop an understanding of the relations between health and occupation, disability and occupation, and explore how humans find meaning in their lives through occupational engagement.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**OT 744 - Fieldwork and Professionalism - Level 1****Credits:** 1

This course prepares students to enter level 1 fieldwork with confidence and working knowledge of expectations for a full-time two-week level 1 fieldwork experience.

**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**OT 745 - Administration and Management for Occupational Therapy Practice****Credits:** 4

This course aims to increase the student's understanding of systems of practice, and to business fundamentals associated with occupational therapy service delivery. Specific topics covered include and analysis of practice settings, reimbursement, supervision of professional and non-professional staff, program evaluation methods, ethics, OT management practices, marketing, health policy including medicare, Human Rights and Education Legislation, and the impact of policy decisions for the delivery of OT services. OT majors only.

**Grade Mode:** Letter Grading**OT 746 - Fieldwork & Prof Level II****Credits:** 1

This course is designed to deepen understanding of professionalism needed for success on Level II fieldwork. We will explore role changes that accompany leaving the academic world and entering the larger realm of professional practice. Students analyze factors that contribute to successful professional development and ethical practice. Students use the results of their analyses to plan their individual transition to fieldwork and entry-level practice.

**Prerequisite(s):** OT 744 with a minimum grade of D- and OT 792 with a minimum grade of D-.**Grade Mode:** Letter Grading**OT 750 - Neuro-Occupation: The Relationship Between Occupation and the Brain****Credits:** 3

The course explores brain development, neuroplasticity and occupation across the lifespan. Following a contextual review of the neuroanatomy and physiology, the students will explore the mind-body relationship across multiple domains of occupational therapy practice. There are four primary content areas: Applied neurology, nature with nurture: occupational engagement and the development of the brain, the brain, occupation and behavior, and neuroplasticity as the basis for improving motor behavior.

**Prerequisite(s):** OT 500 with a minimum grade of D- and OT 501 with a minimum grade of D- and KIN 707 with a minimum grade of D- and PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**OT 751 - Mind Body Systems/Neurologically Based Function and Dysfunction****Credits:** 4

Students study significant occupational-related disorders commonly seen by occupational therapists. A self-directed method is used to examine the perceptual, cognitive, biopsychosocial basis of these disorders. A basic overview of human body-mind systems is provided with an emphasis on pathology, the recognition of symptoms, their causes and the occupational implications of the disorders. The course is a prerequisite for courses in specific occupational therapy assessment and intervention.

**Grade Mode:** Letter Grading**OT 752 - Human Movement and Environmental Effects on Everyday Occupations****Credits:** 3

Integrates the student's prerequisite knowledge of occupation. Develops skills required for interpretation of biomechanical analysis for creating successful occupational performance for individuals with varied musculoskeletal, cardiac and respiratory dysfunction. Integration of the occupational therapy clinical reasoning process and the use of occupations as a therapeutic mechanism for change are emphasized. The analysis of environment as it relates to human movement and participation in desired occupations is explored.

**Co-requisite:** OT 752L**Grade Mode:** Letter Grading**Special Fee:** Yes**OT 752L - Human Movement Lab****Credits:** 1

Human Movement Lab.

**Co-requisite:** OT 752**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**OT 753 - Mind Body Systems: Neurologically-based Function and Dysfunction--Pediatric Conditions****Credits:** 4

This course applies an occupational science perspective to study disease, illness, medical conditions, and impairments to human body structures and functions that typically emerge and/or present themselves in childhood. The emphasis is on how disease, and impairments in physical and mental functioning interact with the human condition, the uniqueness of individuals, and the environments within which they live to impact occupational performance, and one's overall health, well-being, and life quality. This course is a prerequisite for all occupational therapy assessment and intervention courses including OT 762/OT 862, OT 763/OT 863, and OT 760/OT 860.

**Grade Mode:** Letter Grading

**OT 757 - Mind Body Systems: Neurologically-based Function and Dysfunction--Adult Conditions****Credits:** 4

This course is the second course in a two-part course sequence that uses a life span approach, drawing on occupational science perspectives to study conditions typically diagnosed during adulthood (ages 21 and up). The emphasis is on the interaction of the individual (the mind), the body and the psychosocial environment as related to occupational performance. Students will work in pairs to examine selected disorders, and will further develop their presentation skills. This course is a prerequisite for courses in occupational therapy assessment and intervention for adults.

**Prerequisite(s):** KIN 706 with a minimum grade of D- and OT 753 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**OT 760 - Psychosocial Evaluation and Intervention****Credits:** 3

Examines the evaluation of psychosocial and psycho-emotional areas of occupational performance and the planning and implementation of occupation-based interventions across domains of practice and client populations. Course addresses developing a client's occupational profile, narrative reasoning and therapeutic use of self, behavioral change, illness representation, and adjustment to chronic disorders. A specific focus of the course is evaluation of and intervention for clients' presenting with mental health disorders. Open to OT majors only.

**Co-requisite:** OT 760L, OT 760R

**Grade Mode:** Letter Grading

**OT 760L - Psychosocial Evaluation and Intervention Lab****Credits:** 1

This is the co-requisite lab for OT 760. Lab provides hands-on experiences regarding the evaluation and intervention of psychological and psycho-emotional areas of occupational performance. Course focuses on the evaluation and intervention for clients presenting with mental health disorders and also addresses narrative reasoning, therapeutic use of self, behavioral change, illness representation and adjustment to chronic disorders.

**Co-requisite:** OT 760

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**OT 760R - Psychosocial Evaluation & Intervention Recitation****Credits:** 0

Psychosocial Evaluation and Intervention Recitation provides additional hands-on and experiential learning opportunities in an established community program for all students enrolled in OT 760. This recitation allows students the opportunity to develop the skills needed to work in mental/behavioral health settings.

**Co-requisite:** OT 760

**Grade Mode:** Credit/Fail Grading

**OT 762 - Occupational Therapy Evaluation and Intervention for Children**  
**Credits:** 3

In this course, students will develop entry-level practice skills for conducting occupational therapy (OT) evaluations and interventions for children. Organized around the OT Practice Framework, students will learn how to collaborate with families and other professionals, develop clinical observation skills, and learn frequently used standardized assessments. Additionally, students will use primary OT frames of reference to plan and implement interventions. Students will apply their understanding of typical and atypical child development, and extend their clinical reasoning skills in order to develop competencies for providing OT services for children and with a variety of conditions across common practice settings.

**Co-requisite:** OT 762L, OT 762R

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**OT 762L - Occupational Therapy Evaluation and Intervention for Children Lab****Credits:** 1

The co-requisite labs provide hands-on experiences to compliment lecture material from OT 762, and to provide opportunities for the practical application of knowledge.

**Co-requisite:** OT 762

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**OT 762R - Occupational Therapy Evaluation and Intervention for Children Recitation****Credits:** 0

The recitation provides hands-on experiences to compliment lecture material from OT 762 and OT 762L, and to provide opportunities for the practical application of knowledge.

**Grade Mode:** Credit/Fail Grading

**OT 763 - Occupational Therapy Evaluation and Intervention for Adults****Credits:** 3

Students will develop entry-level practice skills related to the synthesis of evaluation, intervention planning and goal writing. The student will be introduced to a variety of standardized evaluation tools and implement OT interventions within various contexts of practice through case studies. Specific intervention techniques based on accepted frames of reference and research evidence that helps clients engage successfully in the daily occupations will be emphasized.

**Co-requisite:** OT 763L

**Prerequisite(s):** OT 757 with a minimum grade of D- or OT 751 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**OT 763L - Occupational Therapy Evaluation and Intervention for Adults Lab****Credits:** 1

This lab is a co-requisite course to accompany OT 763 Occupational Therapy Evaluation and Intervention for Adult Dysfunction. The lab course provides opportunity for the students to engage in experiential learning and application of principles and techniques learned in the lecture course.

**Co-requisite:** OT 763

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**OT 763R - Occupational Therapy Evaluation and Intervention for Adults Recitation****Credits:** 0

The recitation provides hands-on experiences to compliment lecture material from OT 763 and OT 763L, and to provide opportunities for the practical application of knowledge.

**Co-requisite:** OT 763, OT 763L**Grade Mode:** Credit/Fail Grading**OT 771 - Enabling Participation in Community Groups****Credits:** 3

Students will work in an organization, learn about the people served by this organization, and conduct therapeutic groups within the organization. Emphasis of content includes group process, clinical documentation, intervention planning and OT services with adults with cognitive impairments.

**Grade Mode:** Letter Grading**Special Fee:** Yes**OT 771L - Enabling Participation in Community Groups Lab****Credits:** 2

Students will work in an organization, learn about the people served by this organization and conduct therapeutic groups. This lab serves as a Level I Fieldwork placement.

**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**OT 781 - Introduction to Research and Evidence-Based Practice****Credits:** 3

This course introduces students to basic principles of scientific inquiry that contribute to OT evaluation and intervention evidence base. Students will explore quantitative, qualitative and mixed research methods and will learn the fundamental steps in conducting research such as formulating research questions and identifying appropriate research designs, instruments for measurement and outcomes. Students will have hands-on experience in identifying a research topic, reviewing the literature, retrieving, reading and synthesizing research articles. Prereq: Statistics.

**Prerequisite(s):** HHS 540 with a minimum grade of D- or PSYC 402 with a minimum grade of D- or SOC 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**OT 782 - Research Methods and Application****Credits:** 3

The course provides students an in depth understanding of quantitative, qualitative, and mixed methods designs. The students will learn the necessary knowledge and skills required to critically appraise research evidence. Emphasis will be given to various analytical approaches used to examine qualitative/quantitative evidence, such as understanding differences between experimental and quasi-experimental study designs. Students will work in teams to identify a research topic, review and appraise pertinent evidence, identify and describe gaps in existing knowledge. Students will further use this information to develop a research proposal that addresses the identified gaps.

**Prerequisite(s):** OT 781 with a minimum grade of D-.**Grade Mode:** Letter Grading**OT 785 - Research Methods and Application to Practice****Credits:** 4

Qualitative, quantitative, and mixed methods types of research are introduced and applied to relevant occupational therapy questions. Students acquire the fundamental skills of conducting research such as formulating research questions and identifying appropriate research designs and/or methods. Students also develop the ability to critically analyze research studies and apply the outcome to evidence-based practice in occupational therapy. OT majors only.

**Grade Mode:** Letter Grading**OT 789 - Using iPads to Support Children with Disabilities****Credits:** 3

The iPad is changing the way we teach and learn. This technology embraces Universal design principles (UDL) and enables children with significant disabilities to learn in ways never thought possible five years ago. It is a tool for delivering multimedia content and embraces the use of Multi modal learning. This technology finally levels the playing field to support all students including students with disabilities.

**Grade Mode:** Letter Grading**OT 791 - Senior Honors Thesis****Credits:** 1-4

Completion of a research project relevant to the study of occupation or occupational therapy, under the direction of a faculty mentor. Dissemination of findings is expected, as a written thesis paper and an oral presentation. This course is required for graduation with departmental honors in the occupational therapy major. A multiple-semester sequence of 1-4 credits is permitted.

**Attributes:** Honors course**Prerequisite(s):** OT 781 with a minimum grade of D- and OT 782 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Letter Grading**OT 792 - Level I Fieldwork****Credits:** 1

Provides occupational therapy students an opportunity to experience occupational therapy in a clinical setting. Students attend a seminar prior to beginning their placement. The Level I placement is scheduled between the fall and spring semesters of the senior year. During fieldwork, students observe an occupational therapist as well as participate in the planning and implementing of the occupational therapy assessment or intervention process for a client.

**Grade Mode:** Credit/Fail Grading**OT 795 - Special Topics****Credits:** 1-4

Formal courses given on selected topics or special interest subjects. Work may be directed in one of the following areas: A) Administration; B) Clinical Education; C) Pediatrics; D) Physical Disabilities; E) Mental Health; F) Gerontology/Geriatrics; G) School-based Practice, and others.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes

## Ocean Engineering (OE)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**OE 400 - Ocean Engineering Seminar****Credits:** 1

A seminar based course considering contemporary topics involved in ocean exploration. Faculty and guest speakers will describe thematic ocean engineering subareas through weekly presentations. The presentations will provide examples of engineering applications and ocean exploration. Class participation credit can be earned through oral discussions, presentation of contemporary OE topics, or hands on projects.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Grade Mode:** Credit/Fail Grading**OE 401 - Ocean Engineering Seminar****Credits:** 1

A seminar based course considering contemporary topics involved in ocean exploration. Faculty and guest speakers will describe thematic ocean engineering subareas through weekly presentations. The presentations will provide examples of engineering applications and ocean exploration. Class participation credit can be earned through oral discussions, presentation of contemporary OE topics, or hands on projects.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Grade Mode:** Credit/Fail Grading**OE 490 - Introduction to Ocean Engineering****Credits:** 4

Survey of engineering applications in the ocean environment. Topics vary and include hydrodynamics, waves, tides, underwater sound, instrumentation, marine geomechanics, and naval architecture. Includes guest lectures by faculty members from the Engineering departments.

**Co-requisite:** PHYS 407**Grade Mode:** Letter Grading**OE #521 - Power of the Sea: Scientific Discovery in the Ocean****Credits:** 4

This course considers the struggle to understand the physics of the sea to help predict when the sea will unleash its fury. The scientific discovery of ocean engineering topics such as tides, waves, and tsunamis are introduced through their human historical introduction. The historical significance and preliminary resolution of each physical mechanism provide context for the fundamental formulations and contemporary predictive models. The course also considers the role of ocean disasters and geopolitical conflict in motivating scientific exploration of the oceans.

**Attributes:** Physical Science(Discovery)**Grade Mode:** Letter Grading**OE 610 - Ocean Instrumentation Lab****Credits:** 4

An investigation of the discrete and integrated electronics typically used in the design and implementation of ocean instruments. Topics include both passive and active analog electronic elements typically used for signal conditioning of common oceanographic sensors (e.g., thermistors, pressure sensors, acoustic transducers); A/D and D/A conversion, sensor sampling criteria and rules, with examples from contemporary ocean instruments; embedded micro-controller/microcomputer modules for autonomous or remote sensing in ocean environments; inter-instrument communications methods typically used in ocean instruments (e.g., serial and network communications). Laboratory time will be used to develop practical experience in specification, design, development and testing of various ocean instrument components based on the material presented.

**Prerequisite(s):** MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D- and ECE 537 with a minimum grade of D- and IAM 550 with a minimum grade of D-.**Grade Mode:** Letter Grading**OE 677 - Seamanship and Marine Weather for Ocean Engineers and Scientists****Credits:** 2

A survey of basic principles of seamanship and marine weather intended for ocean engineers and ocean scientists. Reviews ship and vessel nomenclature, shipboard safety, techniques for equipment handling and instrument deployment, common shipboard evolutions associated with scientific cruises, navigation principles, and marine weather phenomena and products. Includes field trips and practical applications.

**Grade Mode:** Credit/Fail Grading**OE 717 - Marine Robotics and Applications****Credits:** 3

The purpose of this course is to cover (in lecture and lab format) the broad spectrum of marine vehicles and applications, as well as what is involved in designing and building robotic vehicles for specific missions. Course topics include: marine applications, sensors for marine environments, vehicle subsystems, ocean and open water environment, dynamic modeling and control, and design/fabrication/testing. Various invited speakers (both scientists and engineers) provide learning modules on various marine robotic related topics.

**Co-requisite:** ME 670**Equivalent(s):** ME 717**Grade Mode:** Letter Grading**OE 753 - Ocean Hydrodynamics****Credits:** 3

Fundamental concepts of fluid mechanics as applied to the ocean, continuity, Euler and Navier-Stokes equations, Bernoulli equation, stream function, potential function, moment theorem, turbulence and boundary layers are developed with ocean applications.

**Prerequisite(s):** MATH 527 with a minimum grade of D- and (CEE 650 with a minimum grade of D- or ME 608 with a minimum grade of D-).**Grade Mode:** Letter Grading

**OE 754 - Ocean Waves and Tides****Credits:** 4

Small amplitude, linear wave theory, standing and propagating waves, wave energy, refraction, diffraction, transformation in shallow water, statistics of random seas, spectral energy density, generating wave time series using the random phase methods forces on structures, Froude scaling of wave tank experiments, nonlinear effects. Description of tides as long waves, equilibrium tide, mathematical modeling including friction, nonlinear effects, and Coriolis forces, tidal analysis, the Great Bay Estuarine System as a case study.

**Prerequisite(s):** PHYS 407 with a minimum grade of D- and MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-.

**Grade Mode:** Letter Grading**OE 757 - Coastal Engineering and Processes****Credits:** 3

Introduces small amplitude and finite amplitude wave theories. Wave forecasting by significant wave method and wave spectrum method. Coastal processes and shoreline protection. Wave forces and wave structure interaction. Introduction to mathematical and physical modeling.

**Prerequisite(s):** CEE 650 with a minimum grade of D- or ME 608 with a minimum grade of D-.

**Grade Mode:** Letter Grading**OE 758 - Design of Ocean Structures****Credits:** 3

The foundational information necessary for the design of ocean structures. Topics include analysis and design of floating body, fixed body and moored line hydrostatics; wave forces on small and large bodies; dynamic response of floating bodies; and pile and gravity foundation geotechnics.

**Prerequisite(s):** (ME 526 with a minimum grade of D- or CEE 502 with a minimum grade of D-) and (ME 608 with a minimum grade of D- or CEE 650 with a minimum grade of D-) and OE 754 with a minimum grade of D- and MATH 527 with a minimum grade of D-.

**Grade Mode:** Letter Grading**OE 764 - Spectral Analysis of Geophysical Time Series Data****Credits:** 4

This course considers basic exploratory techniques and in-depth spectral analysis for estimation with geophysical time series data, including calculations of confidence intervals and significance testing. This course prepares students for interpreting time series data with science and engineering applications. Topics include sampling theory, filtering, statistics, probability, spectral analysis, and empirical orthogonal functions. Students gain experience in code-writing for the analysis of time series data.

**Prerequisite(s):** MATH 426 with a minimum grade of D-.

**Equivalent(s):** ESCI 764**Grade Mode:** Letter Grading**OE 765 - Underwater Acoustics****Credits:** 3

An introduction to acoustics in the ocean. Fundamental acoustic concepts including the simple harmonic oscillator, waves on strings, and the acoustic wave equation; the sonar equation; sound generation and reception by underwater acoustic transducers and arrays; basics of sound propagation; reflection and scattering from ocean boundaries. Spring semester offered every year; satisfies core course requirement in Ocean Engineering.

**Prerequisite(s):** PHYS 408 with a minimum grade of D- and MATH 527 with a minimum grade of D-.

**Grade Mode:** Letter Grading**OE 771 - Geodesy and Positioning for Ocean Mapping****Credits:** 4

The science and technology of acquiring, managing, and displaying geographically-referenced information; the size and shape of the earth, datums and projections; determination of precise positioning of points on the earth and the sea, including classical terrestrial-based methods and satellite-based methods; shoreline mapping, nautical charting and electronic charts.

**Prerequisite(s):** MATH 426 with a minimum grade of D- and PHYS 408 with a minimum grade of D-.

**Equivalent(s):** ESCI 771**Grade Mode:** Letter Grading**OE 774 - Integrated Seabed Mapping Systems****Credits:** 4

Overview of typical applications that involve mapping the sediment-water interface in the ocean and adjacent waters. Emphasis on defining the task-specific resolution and accuracy requirements. Fundamentals of acoustics relevant to seabed mapping. Progression through typical configurations involving single beam, sidescan, phase differing and multibeam systems. Integration of asynchronous 3D position, orientation and sound speed measurements with sonar-relative acoustic travel time and angles. Analysis of impact of offsets, mis-alignments and latency in all integrated sensors.

**Grade Mode:** Letter Grading**OE 795 - Special Topics****Credits:** 2-4

New or specialized courses and/or independent study. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated up to unlimited times.

**Grade Mode:** Letter Grading**OE 796 - Independent Study****Credits:** 1-4

Independent study for exceptional students. Individual reading, writing, or laboratory work carried out under the tutelage of a faculty member. May be used as a technical elective for the ocean engineering major if taken for 3-4 credits.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Grade Mode:** Letter Grading**OE 797 - Honors Seminar****Credits:** 1

Course enrichment and/or additional independent study in subject matter pertaining to 600- or 700-level OE courses.

**Attributes:** Honors course

**Repeat Rule:** May be repeated for a maximum of 3 credits. May be repeated up to 3 times.

**Grade Mode:** Letter Grading

## Operations Management (OPS) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**OPS 570 - Operations Management****Credits:** 4

This course analyzes complex operating situations faced by technical and business managers. Students learn the role of the operations manager in the enterprise as well as demonstrate an understanding of the scope of an operations strategy. Students develop operations strategies to meet organizational requirements while analyzing operations processes. The course also offers students an opportunity to apply knowledge that contributes to the operations success of organizations.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.

**Equivalent(s):** MGMT 627G, OPS 627G

**Grade Mode:** Letter Grading

**OPS 605 - Quality Management****Credits:** 4

This course provides students with understanding and knowledge of the philosophies and methods used to improve effectiveness and efficiency of organizational processes for businesses. Topics may include statistical methods for quality improvement in manufacturing and service operations. Emphasis is given to both the technical and managerial issues in understanding and implementing quality as a component for success in today's global business environment.

**Prerequisite(s):** (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-).

**Equivalent(s):** MGMT 619G, OPS 619G

**Grade Mode:** Letter Grading

**OPS 610 - Sustainable Facility Operations****Credits:** 4

This course provides an overview of the role of an operations manager in facility and venue management. Sustainable facility management includes maintenance, cleaning/housekeeping, engineering, heating, ventilation, and air conditioning (HVAC), utility usage management, budgets, security, crisis management/emergency management, and production. This course covers the general systems and processes related to the planning, programming, design, construction, and occupancy of facilities, including long-range, strategic and tactical planning, the relationship between facility planning and business planning, organization of sites, and buildings.

**Prerequisite(s):** DAT 510 with a minimum grade of D- or DATA 510G with a minimum grade of D-.

**Equivalent(s):** OPS 610G

**Grade Mode:** Letter Grading

**OPS 720 - Fundamentals of LEAN Process Improvement****Credits:** 4

This course promotes an understanding of the theoretical and practical aspects of LEAN processes, and how LEAN thinking can be applied in a variety of contexts and applications. Students will be exposed to a range of LEAN tools that prepare learners to actively participate in LEAN processes and events in support of the development of a LEAN organizational culture. Developing capacity in facilitation and change management, students will prepare to become LEAN practitioners, learning to guide a group through problem solving circumstances, while considering the challenges of organizational change.

**Attributes:** Writing Intensive Course

**Equivalent(s):** OPS 628G

**Grade Mode:** Letter Grading

# Outdoor Education (OUT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**OUT #407B - Introduction to Outdoor Education & Leadership - Three Season Experiences****Credits:** 2

An exploration of three-season adventure programs and career opportunities in the outdoor field. Students will be introduced to a variety of on-campus outdoor pursuits programming in spring, summer, and fall, including hiking, orienteering, climbing, and watersports. An emphasis on experiential teaching and learning will help students understand essential elements in program planning, administration and risk management. You will examine current trends in public participation in three-season outdoor activities and employment in the outdoor field. No experience required.

**Equivalent(s):** KIN 407B

**Grade Mode:** Letter Grading

**OUT 444A - Risk and the Human Experience****Credits:** 4

Explores the construct of risk in two phases: 1) knowledge building, focusing on the historical development of risk and its current manifestations in contemporary society; and 2) knowledge application, which focuses on applying conceptions of risk to various case study examples. The second phase of the course employs a problem-based learning approach with four distinct modules that ask students to apply, experience, and evaluate risk in a variety of contexts. Each module includes: a) a case study description, b) an experiential exercise, and c) a collaborative debriefing of the experience and reflective application to broader societal issues.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)

**Equivalent(s):** KIN 444A

**Grade Mode:** Letter Grading

**OUT 444C - AMPED UP: Social and Psychological Perspectives on Adventure****Credits:** 4

Interest in the topic of adventure has exploded in recent years; with enough money, almost any adventure is available to anyone. The widespread rise in popularity of adventure brings questions, however. What is the role of adventure in modern society? What is its value to individuals? Through lectures, written assignments, group projects, multimedia, and experiential learning, this course surveys psychological, sociological, and anthropological perspectives on these and students' own questions.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course

**Equivalent(s):** KIN 444C

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**OUT 515 - History of Outdoor Pursuits in North America****Credits:** 4

Voluntary pursuits in the outdoors have defined American culture since the early 17th century. Over the past 400 years, activities in outdoor recreation and education have reflected Americans' spiritual aspirations, imperial ambitions, social concerns, and demographic changes. This course will give students the opportunity to learn how Americans' experiences in the outdoors have influenced and been influenced by major historical developments of the 17th, 18th, 19th and 20th, and early 21st centuries. This course is cross-listed with RMP 515.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** KIN 515, RMP 515**Grade Mode:** Letter Grading**OUT 539 - Artificial Climbing Wall Management****Credits:** 2

The primary purpose of this course is an introduction to the procedures, methods, and techniques of artificial climbing wall management. Within the scope of this course, students will be introduced to operations, supervision, equipment and facility use/maintenance, risk management strategies, routesetting, individual and group programming/facilitation/teaching, technical skills and rescues/emergency procedures. A variety of teaching styles will be used to familiarize students with each topic area. Optional certification fee. Lab.

**Equivalent(s):** KIN 539**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 540 - Top Rope Rock Climbing****Credits:** 4

Provides students with an understanding of the equipment, techniques, and procedures necessary for the setup and management top rope rock climbing and rappelling sites, including advanced rescue skills. Students also develop basic climbing movement techniques and skills, an understanding of the pedagogical techniques used in climbing, and the requisite knowledge/skill development to conduct safe top rope experiences in multiple settings. The format of this course is a combination of demonstration/lecture and "hands-on" learning with the emphasis upon student interaction and practical skill development. Lab.

**Equivalent(s):** KIN 540**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 541 - Management of Challenge Courses****Credits:** 4

Provides students with an introduction to the basic facilitation/technical skills to manage a challenge course program. Exposure to intermediate technical skills usually required for lead facilitators. Specific topics include group process, framing, and sequencing, belay methods, participant and instructor equipment, operating procedures for low and high challenge course elements, and industry standards. Lab.

**Equivalent(s):** KIN 541**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT #542 - Sea Kayaking****Credits:** 2

An introduction to the technical, teaching, and leadership skills required to lead inland kayaking programs and to assist with coastal canoeing programs. Emphasis on individual kayaking skills, self- and group-assisted rescues, safety and group management in a marine environment, and tactics for ocean travel and navigation. Lab.

**Equivalent(s):** KIN 542**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 543 - Winter Adventure Programming****Credits:** 2

An introduction to winter programming and back country travel, including snowshoeing and skiing, winter interpretation activities, backpacking, and winter camping. Emphasis on teaching of introductory winter programs and trips. Lab.

**Prerequisite(s):** OUT 551 with a minimum grade of D-.**Equivalent(s):** KIN 543**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 545 - High Angle Rescue****Credits:** 2

Provides students with the skills necessary to perform self and group rescues in a variety of steep terrain and high angle environments. Students also gain the basic skills necessary for the implementation of self- and partner-rescues while in a technical climbing environment. The skills learned from this class will adapt readily to climber rescue, crevasse rescue, big wall rescue, cave rescue, and vertical urban rescue. Lab.

**Prerequisite(s):** OUT 547 with a minimum grade of D-.**Equivalent(s):** KIN 545**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 546 - Whitewater Canoeing****Credits:** 3

Introduces white water canoeing skills. Students gain a basic understanding of the equipment, techniques, and procedures to conduct canoeing activities in flat water, moving water, and white water environments. Emphasizes development of individual paddling skills, safe and conscientious paddling, and group management on moving water and white water. Lab.

**Equivalent(s):** KIN 546**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 547 - Lead Rock Climbing****Credits:** 3

Advanced climbing course designed to provide students with a structured environment to transition from top rope rock climbing or sport climbing to multi-pitch traditional lead climbing. Focuses on the development of the technical skills and judgment associated with leading in a multi-pitch environment. Specific topics include use of artificial protection, belay anchor construction, multi-pitch rappelling, knots, rope/belay station management, climbing technique, and multi-pitch leading considerations. Lab.

**Prerequisite(s):** OUT 540 with a minimum grade of D-.**Equivalent(s):** KIN 547**Grade Mode:** Letter Grading**Special Fee:** Yes

**OUT #548 - Winter Expedition Programming****Credits:** 4

Introduces methods and techniques of winter expedition travel including camping, snowshoeing, alpine climbing skills, technical skiing and ice climbing skills. A variety of teaching styles are used to familiarize students with each topic area, and occur in classroom, basecamp, and wilderness settings. Lab.

**Prerequisite(s):** OUT 551 with a minimum grade of D-.**Equivalent(s):** KIN 548**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 549 - Wilderness Navigation****Credits:** 4

Introduces the methods and techniques of wilderness navigation. Topics include map interpretation, compass use, global positioning systems, and other navigation methods. A variety of teaching styles are used to familiarize the students with each topic area, and occur in both classroom and wilderness settings. Lab.

**Equivalent(s):** KIN 549**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 550 - Outdoor Education Philosophy and Methods****Credits:** 4

Explores the philosophical basis for experiential and outdoor education. Experiential exercises and readings focus on risk, traditional vs. progressive education, role of nature, ethics, models of learning and facilitation, and developing a personal philosophy of outdoor education. Includes full-day outdoor education laboratory experiences.

**Attributes:** Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** KIN 550**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 551 - Adventure Programming: Backcountry Based Experience****Credits:** 4

Introduces the leadership of land-based backpacking programs. Students develop an understanding of backpacking equipment, trip planning and organization, instruction of basic camping skills, implementation of safety procedures and group management on backpacking trips. Lab.

**Equivalent(s):** KIN 551**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 552 - Adventure Programming: Water Based Experiences****Credits:** 4

Introduces the leadership of canoe expeditions. Students develop an understanding of necessary canoeing equipment, trip planning and organization, instruction of basic canoeing strokes, implementation of safety procedures, and group management on canoe expeditions. Lab.

**Equivalent(s):** KIN 552**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 650B - Internship in Outdoor Education & Leadership****Credits:** 4-8

Experiential learning in a setting appropriate to the student's objectives. A 4 credit internship requires a minimum of 400 hours experience. Provides an appropriate transition from undergraduate education to future employment in the field of outdoor education. Generally done after students have completed all other requirements for the option. IA continuous grading).

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** KIN 650B**Grade Mode:** Credit/Fail Grading**OUT 681 - Foundations of Adventure Education****Credits:** 4

Through experiential activities, personal reflections, readings, and group and independent projects, students will gain an understanding of models and theories underpinning adventure education. The course includes content such as adventure education history, outdoor leadership, personal growth, group development, risk taking and risk management, educational philosophy, and learning theory. Students learn to apply theoretical principles to practice in a variety of settings.

**Attributes:** Writing Intensive Course**Equivalent(s):** KIN 681**Grade Mode:** Letter Grading**OUT 682 - Experiential Teaching & Leadership****Credits:** 2

This class provides an orientation to experiential learning, teaching, and leadership in outdoor recreation, education, and instructional settings. Students develop and implement program designs and lesson plans, gaining practice with teaching methods, activity facilitation, leadership styles, and risk management considerations in outdoor recreation programs.

**Repeat Rule:** May be repeated for a maximum of 6 credits. May be repeated up to 2 times.**Equivalent(s):** KIN 682**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT 686 - Wilderness Emergency Medical Care****Credits:** 4

Standards of practice for professional providing emergency medical care in remote areas. Consideration of prolonged transport times, severe environments, and the use of portable and improvised equipment. Topics include wilderness trauma and illness, search and rescue operations, and environmental emergencies.

**Equivalent(s):** KIN 686**Grade Mode:** Letter Grading**Special Fee:** Yes**OUT #687 - Career and Professional Development Practicum****Credits:** 4

Explores professional competencies required in long-term careers in the outdoors. Includes job shadowing, teaching, and leadership experiences at external agencies. Students focus their learning experience in areas of the field that interest them and develop professional identity through self-assessment, resume development, job search processes, interview techniques, and negotiation strategies. Students co-design and focus their learning in specific areas of the field.

**Equivalent(s):** KIN 687**Grade Mode:** Letter Grading**Special Fee:** Yes

**OUT 693 - Teaching Assistantship****Credits:** 2

Students serve as teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching assistants' and administrative duties. May take two different sections.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**OUT 696 - Independent Study****Credits:** 2-4

An advanced, individual scholarly project under the direct supervision of a faculty member.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**OUT #696W - Independent Study****Credits:** 2-4

An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by major faculty and the department chair prior to the student's registration for OUT 696 WI. All OUT 696 WI projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**OUT #699H - Honors Project****Credits:** 4

Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.

**Attributes:** Honors course**Grade Mode:** Letter Grading**OUT 782 - Therapeutic Applications of Adventure Programming****Credits:** 4

A study of theory, practice, and research of adventure experiences in therapeutic settings. Incorporates theoretical seminars and associated practical experiences.

**Equivalent(s):** KIN 782**Grade Mode:** Letter Grading**OUT #786 - Organization and Administration of Outdoor Education Programs****Credits:** 4

Study of administration of outdoor education programs using a variety of organizational models. Students use simulated exercises and work with outdoor agencies on special projects to learn key factors necessary to manage a program.

**Attributes:** Writing Intensive Course**Equivalent(s):** KIN 786**Grade Mode:** Letter Grading**Special Fee:** Yes

## Paul College Business & Economics (PAUL)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PAUL 405 - Freshman Academic Experience I****Credits:** 0 or 1

This course is an introduction to the nature of academic knowledge, academic standards and academic management skills essential for success in the University and the Paul College. This course, along with PAUL 406 which follows in the spring term, provides academic foundation for the FIRE (First-year Innovation and Research Experience Program). PAUL 405 and 406 are required of all first-year students in Paul College.

**Equivalent(s):** ADMN 405**Grade Mode:** Credit/Fail Grading**PAUL 406 - Freshman Academic Experience II****Credits:** 0 or 1

This course is the second part of Freshman Academic Experience for all first-year students in Paul College. The second part of the course reviews academic skills and begins to focus on the student's academic career as a student in Paul College including: major choices, opportunities for enrichment, networking, internships and career paths as well as grand challenge research and presentations. This course, along with PAUL 405 which follows the spring term, provides the academic foundation for the FIRE (First-year Innovation and Research Experience Program). PAUL 405 and 406 are required of all first-year students in Paul College.

**Equivalent(s):** ADMN 406**Grade Mode:** Credit/Fail Grading**PAUL 407 - Paul Scholars Seminar****Credits:** 1

Weekly seminar curriculum is designed to guide academically talented students to achieve their full potential, enhancing their overall educational experience at UNH. The course will expose the Paul Scholars to the high-impact opportunities available at UNH (study abroad, study away, research, etc.) and guide students in evaluating current and desired skillsets leading to the identification of experiences to close their skills gap. Students are responsible for attending and participating in all class sessions and other activities as assigned throughout the course.

**Grade Mode:** Credit/Fail Grading**PAUL #440A - Honors/Design Thinking for Social Justice, Change, and Innovation****Credits:** 4

Utilizing the powerful, application-oriented methodology of human-centered design (design thinking), the course will enable students to become change makers and transformational leaders, by helping them understand the context and develop creative solutions to problems characterized by multiple forms of inequality (economic, social, racial, and gender-based), thus working toward social justice, change, and innovation.

**Attributes:** Honors course; Social Science (Discovery)**Grade Mode:** Letter Grading

**PAUL 450 - Personal Finance****Credits:** 4

This course will provide an overview of the personal financial planning process, including the establishment of goals and objectives, forecasting of lifetime income and expenditures, evaluation of investment options, money management, and understanding of all the many ways a person can achieve their financial goals through various strategies. The course covers the concepts, theories and analytical methods used in professional personal financial planning. Students analyze the effects of inflation, changing interest rates and taxation (high level taxation) on their investment decisions. The course is designed to expose students to all of the directly applicable mathematical formulas involved in the finance world that we utilize on a daily basis.

**Attributes:** Quantitative Reasoning(Disc)**Grade Mode:** Letter Grading**PAUL 520 - Topics I****Credits:** 1-4

Special Topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**PAUL 620 - Topics****Credits:** 4

Special topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**PAUL 626 - Supervised Student Teaching****Credits:** 2-4

Participants are expected to perform such functions as leading discussion groups, assisting faculty in undergraduate courses that they have successfully completed. For juniors and seniors with 3.0 or better cumulative GOA. No more than four credits may be earned as a teaching assistant in any one course. Permission of instructor and undergraduate programs office required.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Credit/Fail Grading**PAUL 660 - BiP-Social Intelligence Topics****Credits:** 2

Business in Practice: Social Intelligence develops students' abilities to navigate complex social relationships and environments. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course details.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**PAUL 670 - BiP-Analytical Intelligence Topics****Credits:** 2

Business in Practice: Analytical Intelligence develops students' abilities to analyze ideas, solve problems and make decisions. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course details.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**PAUL 680 - BiP-Competitive Intelligence Topics****Credits:** 2

Business in Practice: Competitive Intelligence develops students' abilities to gather, analyze, and distribute information and ideas about products, customers, competitors or the external environment. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course description.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**PAUL 690 - BiP-Professional Intelligence Topics****Credits:** 2

Business in Practice: Professional Intelligence develops students' abilities to achieve professional success. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course details.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**PAUL 705 - Supervised Student Teaching: Peer Advisor****Credits:** 0-2

Training course for peer advisors to prepare for leading student FIRE Teams. For Paul College juniors and seniors with 3.0 or better cumulative GPA. Permission from Undergraduate Programs Office required.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Credit/Fail Grading**PAUL 720 - Topics II****Credits:** 4

Special topics, vary by semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**PAUL 725 - Independent Study****Credits:** 1-4

Individual research projects that are student designed. Initial sponsorship of a Paul College faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**PAUL 725W - Independent Study****Credits:** 1-4

Individual research projects that are student designed. Initial sponsorship of Paul College faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading

**PAUL 790 - Honors/The Workshop****Credits:** 2

Open to students enrolled in the Paul Honors Program, this workshop is specifically designed for honors students starting the program in their junior year. It is designed to enable students to share the work they are doing for the honors designated course. The workshop will also include guest speakers and other programming of interest to Paul Honors Students.

**Attributes:** Honors course**Equivalent(s):** ADMN 790**Grade Mode:** Credit/Fail Grading**PAUL 792 - Honors Seminar****Credits:** 2

This course is designed to broaden perspectives, creating a socially conscious mindset of the impact of business activity. Students will explore a variety of topics with a focus that is open to various global issues, the future of business, or learn about faculty research interests in a relaxed environment. This seminar will allow students to see the cross-disciplinary nature of business practices and research.

**Attributes:** Honors course**Equivalent(s):** ADMN 792**Grade Mode:** Credit/Fail Grading**PAUL 794 - Honors/The Research Process****Credits:** 2

Open to students enrolled in the Paul Honors Program, this course is designed to help students formulate a thesis topic, learn the skills needed to write a thesis and serve as a mechanism for pairing students with a faculty thesis advisor. In addition, students will be expected to attend several research seminars.

**Attributes:** Honors course**Equivalent(s):** ADMN 794**Grade Mode:** Credit/Fail Grading**PAUL 795 - Internship****Credits:** 1-4

The internship is designed to provide practical experience in a major related field (organizations may include: business, industry, health, public service, non-profit). Supervision to be provided by a qualified individual in the organization, with student consultation by a faculty sponsor. Written report required. Initial sponsorship of an Paul College faculty member must be obtained followed by approval of PAUL advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.

**Repeat Rule:** May be repeated for a maximum of 12 credits. May be repeated up to 4 times.

**Equivalent(s):** ADMN 795**Grade Mode:** Credit/Fail Grading

## Philosophy (PHIL)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PHIL 401 - Introduction to Philosophy****Credits:** 4

This course gives a basic grounding in Philosophy. We explore enduring questions that we have all grappled with: Does God exist? Do we have free will? How can we lead fulfilling lives? No background in philosophy is needed, only an open and inquiring mind.

**Attributes:** Humanities(Disc)**Equivalent(s):** PHIL 401H, PHIL 401W**Grade Mode:** Letter Grading**PHIL 401H - Honors/Introduction to Philosophy****Credits:** 4

This course gives a basic grounding in Philosophy. We explore enduring questions that we have all grappled with: Does God exist? Do we have free will? How can we lead fulfilling lives? No background in philosophy is needed, only an open and inquiring mind.

**Attributes:** Honors course; Humanities(Disc); Writing Intensive Course**Equivalent(s):** PHIL 401, PHIL 401W**Grade Mode:** Letter Grading**PHIL 401W - Introduction to Philosophy****Credits:** 4

This course gives a basic grounding in Philosophy. We explore enduring questions that we have all grappled with: Does God exist? Do we have free will? How can we lead fulfilling lives? No background in philosophy is needed, only an open and inquiring mind.

**Attributes:** Humanities(Disc); Writing Intensive Course**Equivalent(s):** PHIL 401, PHIL 401H**Grade Mode:** Letter Grading**PHIL 405 - Critical Thinking****Credits:** 4

One of the most salient features of our culture is that there is so much BS. Most people are overconfident about their ability to avoid being taken in by it. This course aims to sharpen your BS detection skills and help you to diagnose errors in reasoning. You will learn how to check your (often unreliable) gut reactions, improve your critical thinking skills, and identify specious arguments across a range of topics.

**Attributes:** Humanities(Disc); Inquiry (Discovery)**Grade Mode:** Letter Grading**PHIL 405W - Critical Thinking****Credits:** 4

One of the most salient features of our culture is that there is so much BS. Most people are overconfident about their ability to avoid being taken in by it. This course aims to sharpen your BS detection skills and help you to diagnose errors in reasoning. You will learn how to check your (often unreliable) gut reactions, improve your critical thinking skills, and identify specious arguments across a range of topics.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 410 - Happiness, Well-Being, and a Good Life****Credits:** 4

A sustained exploration of happiness, well-being, and a good life. Are they the same? If not, do any include the others, and can they conflict? What sorts of things might contribute to or detract from happiness, well-being, and having a good life? Comparing work on these topics in philosophy and psychology will be a key theme in the course.

**Attributes:** Humanities(Disc); Inquiry (Discovery)**Grade Mode:** Letter Grading

**PHIL 412 - Beginning Logic****Credits:** 4

Principles of reasoning and development of symbolic techniques for evaluating arguments.

**Attributes:** Quantitative Reasoning(Disc)**Equivalent(s):** PHIL 412H**Grade Mode:** Letter Grading**PHIL 417 - God, Religion, and the Meaning of Life****Credits:** 4

An introductory philosophical exploration of the relationship between reason and religious experience, particularly as this relationship has developed in and in response to, the great world religions.

**Attributes:** Humanities(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 419 - Race, Gender and Social Justice****Credits:** 4

We are in the midst of a social reckoning in the United States. Black Lives Matter and #Me Too have turned a spotlight on the murder of black people by police officers and the sexual assault of women. Public health events reveal racialized health care inequities and unfair domestic and care work for women. This course provides philosophical tools that help us to understand our social world, its history, and to consider how to contribute solutions.

**Attributes:** Humanities(Disc); Inquiry (Discovery)**Equivalent(s):** PHIL 419W**Grade Mode:** Letter Grading**PHIL 419W - Race, Gender and Social Justice****Credits:** 4

Black Lives Matter and #Me Too have turned a spotlight on the murder of black people by police officers and the sexual assault of women. Public health events reveal racialized health care inequities and unfair domestic and care work for women. This course provides philosophical tools that help us to understand our social world, its history, and to consider how to contribute solutions.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** PHIL 419**Grade Mode:** Letter Grading**PHIL 420 - Introduction to Philosophy of Law and Justice****Credits:** 4

Introduction to debates regarding how ethical values relate to law and justice. Is justice universal or relative? Are laws making progress toward justice? How should we balance liberty and equality? Should freedom of speech be an absolute right? Does the state have too much power, or too little? Are laws applied fairly by police and the justice system? Why do we punish? What is the relationship between wealth, race, and justice? Discussion.

**Attributes:** Humanities(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 421 - Philosophy and the Arts****Credits:** 4

Contemporary philosophic concerns and perspectives as reflected in one or more of the arts (literature, theatre, film, music, plastic art).

**Attributes:** FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** PHIL 421H**Grade Mode:** Letter Grading**PHIL 424 - The Future of Humanity: Science, Technology, and Society****Credits:** 4

Consideration of the impacts of science and technology on humanity from a philosophical perspective. Topics often include genetic engineering, automated labor, advanced weaponry, artificial intelligence, social media and data extraction, space exploration, alien contact, virtual realities, transhumanism, and the future of humanity as an interplanetary species.

**Attributes:** Environment,TechSociety(Disc)**Equivalent(s):** PHIL 424H**Grade Mode:** Letter Grading**PHIL 424H - Honors/The Future of Humanity: Science, Technology, and Society****Credits:** 4

Consideration of the impacts of science and technology on humanity from a philosophical perspective. Topics often include genetic engineering, automated labor, advanced weaponry, artificial intelligence, social media and data extraction, space exploration, alien contact, virtual realities, transhumanism, and the future of humanity as an interplanetary species.

**Attributes:** Environment,TechSociety(Disc); Honors course**Equivalent(s):** PHIL 424**Grade Mode:** Letter Grading**PHIL 430 - Ethics and Society****Credits:** 4

Critical study of principles and arguments advanced in discussion of current moral and social issues. Possible topics: violence, rules of warfare, sexual morality, human rights, punishment, abortion.

**Attributes:** Humanities(Disc)**Equivalent(s):** PHIL 430H, PHIL 430W**Grade Mode:** Letter Grading**PHIL 430W - Ethics and Society****Credits:** 4

Critical study of principles and arguments advanced in discussion of current moral and social issues. Possible topics: violence, rules of warfare, sexual morality, human rights, punishment, abortion.

**Attributes:** Humanities(Disc); Writing Intensive Course**Equivalent(s):** PHIL 430, PHIL 430H**Grade Mode:** Letter Grading**PHIL 431 - Business Ethics****Credits:** 4

An interdisciplinary study of ethical issues in business. This course, taught collaboratively by business school and philosophy department faculty, applies philosophical perspectives, critical thinking, and analysis to ethical decision-making and implementation in the workplace as well as the broader context of other businesses, customers, society, and the environment.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**PHIL 435 - Human Nature and Evolution****Credits:** 4

Philosophy of biology and the evolutionary process. Readings of scientists and philosophers' commentary on scientists. Examination of the differences between scientific debate and philosophic debate. Philosophical study of scientific theory stressing humans' place in the natural world and the ethical implication of humans as natural beings in the evolutionary process.

**Attributes:** Environment,TechSociety(Disc)**Equivalent(s):** PHIL 435H**Grade Mode:** Letter Grading

**PHIL 435H - Honors\Human Nature and Evolution****Credits:** 4

Philosophy of biology and the evolutionary process. Readings of scientists and philosophers' commentary on scientists. Examination of the differences between scientific debate and philosophic debate. Philosophical study of scientific theory stressing humans' place in the natural world and the ethical implication of humans as natural beings in the evolutionary process.

**Attributes:** Environment,TechSociety(Disc); Honors course**Equivalent(s):** PHIL 435**Grade Mode:** Letter Grading**PHIL 436 - Social and Political Philosophy****Credits:** 4

Examines social and political thought that may include texts from ancient through contemporary times, addressing topics such as natural rights, revolution, law, freedom, justice, power. Questions may include: What is a community, and how are individuals related to communities? Can any particular form of government be morally justified, and if so, what kind of government? Can anarchism work? Is there something wrong with a society in which there is private ownership of property? What is oppressive? What is freedom, and are we free? What roles should different forms of power play in a society? Could and should there be a genderless society? Is ethnic diversity valuable?.

**Attributes:** Humanities(Disc); Inquiry (Discovery)**Equivalent(s):** PHIL 436H, PHIL 436W, PHIL 437**Grade Mode:** Letter Grading**PHIL 436H - Honors/Social and Political Philosophy****Credits:** 4

Examines social and political thought that may include texts from ancient through contemporary times, addressing topics such as natural rights, revolution, law, freedom, justice, power. **Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** PHIL 436, PHIL 436H, PHIL 437**Grade Mode:** Letter Grading**PHIL #440 - Just Business: The Ethics of Markets and Money****Credits:** 4

Critical study of business ethics and scandals. Questions may include: Is ethics irrelevant in the cutthroat world of money making? How can one be a good person - for example honest, loyal, and caring - while attempting to maximize profits? Must employers treat workers with dignity? Does anything have more value than money? Is money closer to the "root of all evil" or the "root of all good"? Should everything be for sale? To what extent are unregulated markets fair? How should we punish corporate wrongdoers?.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**PHIL 440A - Honors/Who Are You? Personal Identity and Humanity****Credits:** 4

What makes you you? Are you the same person over time? What does it mean to be a person? How is being a person related to being a human being? This course is part of an Honors Symposium on the nature of personhood and humanity. We will explore a number of philosophical questions related to personal identity over time, the social construction of the self, and the relationship between being a member of homo sapiens and being a person.

**Attributes:** Honors course; Humanities(Disc)**Grade Mode:** Letter Grading**PHIL 440B - Honors/Who's Human Now?****Credits:** 4

When we call someone human or a person, what do we mean, and what are we trying to do? How has the concept of personhood expanded or contracted to include more or fewer beings and why? Are fetuses persons? Are corporations persons? Are chimps persons? Who counts as a person now, and who will count as a person in the future? How and why are human persons subject to dehumanization? Readings and texts will draw from historical sources and contemporary philosophy. No credit if credit earned for PHIL 780.

**Attributes:** Honors course; Humanities(Disc)**Grade Mode:** Letter Grading**PHIL 440C - Honors/The Copernican Lens: Finding a Place for Humanity****Credits:** 4

How do humans fit into the cosmos? Once, we thought we were central players; most human societies believed they played a starring role, second only to the gods. Developments in the sciences have led modern humanity to a far more modest view: our existence is full of contingency and without cosmic significance. Humanity's self-conception is now recognized to be deeply culturally conditioned: is an objective view of humanity's place even possible?.

**Attributes:** Honors course; World Cultures(Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL #444 - Remaking Nature/The Ethics and Politics of Genetic Engineering****Credits:** 4

Examines the biological, ethical, social, and political issues raised by genetic engineering and by human enhancement techniques. Issues may include: cloning humans, selection of embryos on the basis of lack of genetic defects, genetic modification of plants and animals for food, gene therapy on humans, cognitive and athletic enhancement. Depending on instructor other topics may include human modification of the environment and engineering responses to global warming.

**Attributes:** Environment,TechSociety(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading

**PHIL 447 - Artificial Intelligence, Robots, and People****Credits:** 4

The historical origins of the science of computation. The implications of the nature of information-processing for understanding the mind-body relation. Examines the possible social, economic, and educational consequences of the computer revolution.

**Attributes:** Environment,TechSociety(Disc)**Equivalent(s):** PHIL 447H**Grade Mode:** Letter Grading**PHIL 450 - Environmental Ethics****Credits:** 4

Thoughtful people cannot help escape considering hard questions about our relationship to the natural world and what it means for the future of life on earth. In this course we think philosophically about these crucial concerns. We try to answer questions about our responsibilities to the environment and to future generations.

**Attributes:** Environment,TechSociety(Disc)**Equivalent(s):** PHIL 450H**Grade Mode:** Letter Grading**PHIL 495 - Tutorial Reading****Credits:** 1-4

Basic introductory reading under faculty direction on topics of philosophical importance. Books offered for tutorial reading may be in any area the instructor chooses or on independent study basis.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**PHIL 500 - Workshop****Credits:** 4

Introduces methods of studying philosophical texts. Emphasizes reading philosophical texts and arguments for comprehension, and on writing philosophically with accuracy and clarity. Open to PHIL majors (PHIL minors may enroll if they receive permission).

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 510 - Philosophy and Feminism****Credits:** 4

Focuses on philosophical issues in feminism primarily through the work of historical and contemporary philosophers. Topics include the question of the nature of women, feminism as an ethical and political theory, feminism as an exploration and transformation of the self, feminism as a philosophical methodology, and the institutions of marriage and motherhood.

**Attributes:** Humanities(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 520 - Introduction to Eastern Philosophy****Credits:** 4

Major Eastern traditions of philosophy. Concentration on Indian, Chinese, and Japanese systems may vary from semester to semester.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**PHIL 525 - Existentialism****Credits:** 4

Readings from existential philosophy and literature. Selections may be drawn from the works of Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, de Beauvoir, Buber, Bultman, Merleau-Ponty, Tillich, Kafka, and others.

**Attributes:** Humanities(Disc); Inquiry (Discovery)**Equivalent(s):** PHIL 525H**Grade Mode:** Letter Grading**PHIL 530 - Ethics****Credits:** 4

Critical examination of the development of philosophical thinking regarding human values, rights, and duties.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 531 - Topics in Professional and Business Ethics****Credits:** 4

Content variable. Examines a topic or topics related to ethical issues in professional and business situations. Some variations of the course will look in-depth at a specific issue, such as consumer behavior, medical ethics, discrimination, or the theory of the film. Alternatively, the course may examine, from one or more ethical perspectives, a wide range of issues related to business activity, workplace culture, regulation, and economic practices.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**PHIL #531W - Professional & Business Ethics****Credits:** 4

Content variable. Examines a topic or topics related to ethical issues in professional and business situations. Some variations of the course will look in-depth at a specific issue, such as consumer behavior, medical ethics, discrimination, or the theory of the film. Alternatively, the course may examine, from one or more ethical perspectives, a wide range of issues related to business activity, workplace culture, regulation, and economic practices.

**Attributes:** Humanities(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 560 - Philosophy Through Fiction****Credits:** 4

Philosophical implications of representative literary works, read in tandem with philosophical literature. The content will vary. The literary works explored may be drawn from ancient times through modern times. For examples, the classic Greek tragedy "Antigone" might be explored for its implications regarding moral, political, and feminist philosophy, or the philosophical implications of an anti-utopian contemporary work like "Brave New World" might be explored, or short stories drawn from science fiction and other speculative fiction might be used to explore the possibility of time travel or of machines with mental lives.

**Attributes:** Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 565 - Philosophy Through Film****Credits:** 4

Philosophical exploration of film as a medium for developing philosophical ideas and for stimulating philosophical thinking about various issues reflected in film, from traditional philosophical issues to the pressing social and cultural issues of our time. The content will vary. Philosophical texts are read in tandem with screenings of a range of movies from Hollywood blockbusters and art house films to films made for TV. Philosophical issues such as the nature of consciousness, appearance and reality, God and evil, the good life, and time and memory might be explored. Film might also be used to examine representations of race and gender or violence in society; and the power of movies to influence society might be explored through documentaries and propaganda films. Required evening film screenings in addition to regular class meetings.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**PHIL 570 - Ancient Philosophy****Credits:** 4

Development of Western philosophy from its beginnings in Greece to the Roman period, with particular emphasis on the thought of Plato and Aristotle. Attention is paid to the historical context and the development of ideas in culture.

**Attributes:** Humanities(Disc)**Equivalent(s):** PHIL 570H**Grade Mode:** Letter Grading**PHIL 580 - Modern Philosophy from Descartes to Kant****Credits:** 4

The birth and development of distinctively modern philosophy in the thought of such creative minds as Galileo, Descartes, Hobbes, Leibniz, Spinoza, Locke, Berkeley, Hume, Rousseau, Reid, Kant, and others.

**Grade Mode:** Letter Grading**PHIL 620 - 20th Century European Philosophy****Credits:** 4

Major figures or philosophical movements such as phenomenology, existentialism, critical social theory, and post-modernism. Content will vary. Consult Time and Room Schedule for topics.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**PHIL 630 - Neuroscience and Philosophy****Credits:** 4

This course has a double focus. It investigates theories concerning the nature of the mind/brain relation, especially in light of recent work in the neurosciences. It also considers the particular presuppositions of and methodological challenges endemic to the neurosciences, along with the relations neuroscience bears to neighboring disciplines.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 631 - Topics in the Philosophy of Science****Credits:** 4

Many people think that philosophy and science are miles apart. But philosophy of science is a dynamic field. It asks questions like: are scientific explanations always true and what's the difference between science and other ways of knowing? It explores issues such as the relation of science to common sense, the relation of theory to observation, the claim to objectivity in the natural and social sciences, and the role of values in scientific research.

**Attributes:** Writing Intensive Course**Equivalent(s):** PHIL 725**Grade Mode:** Letter Grading**PHIL 660 - Law, Medicine, and Ethics****Credits:** 4

Critical examination of the diverse legal and moral issues facing the profession of health care. Variable topics may include: duty to provide care; nature of informed consent to treatment; problems of allocating limited health-care resources (e.g., withdrawal of life-support systems, quality-of-life decisions, etc.); patient's right to confidentiality. Problems relating to involuntary preventive care (e.g., involuntary sterilization, psycho-surgery, etc.)

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 701 - Topics in Value Theory****Credits:** 4

Philosophical inquiry into the nature of value. Topics may include the grounds of right and wrong, various conceptions of morality, the nature of good and evil, theories about the meaning of life, the nature of the beautiful. Content will vary. Consult the Time and Room Schedule for topics. Course may be taken twice for credit (a third time with permission of the chair of the department) so long as the topic is different. May not be repeated to improve grade without approval from the department chair. Repeatable with permission.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated up to 2 times.**Grade Mode:** Letter Grading**PHIL 702 - Topics in Metaphysics and Epistemology****Credits:** 4

Advanced study in one or more of the following topics: nature of reality, relationship of thought and reality, nature of knowledge and perception, theories of truth. Content will vary. Consult the Time and Room Schedule for topics. Course may be taken twice for credit (a third time with permission of the chair of the department) so long as the topic is different. May not be repeated to improve grade without approval of the chair of the department.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated up to 1 time.**Grade Mode:** Letter Grading**PHIL #730 - Topics in Theories of Justice****Credits:** 4

The idea of justice is central to social, political, and legal theory. Considerations of justice are appealed to in assessing the legitimacy of governments, and the fair distributions of goods, and opportunities both with nation-states and globally, and to address specific social concerns such as racial or gender discrimination or access to health care. Examine both historical sources and contemporary debates about the nature of justice.

**Grade Mode:** Letter Grading**PHIL 780 - Special Topics****Credits:** 4

Advanced study of special topics: a problem, figure, or movement in the history of philosophy, or selected issues, thinkers, or developments in contemporary philosophy. Repeatable with permission.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated up to 4 times.**Grade Mode:** Letter Grading**PHIL 795 - Independent Study****Credits:** 1-8

For students who are adequately prepared to do independent, advanced philosophical work; extensive reading and writing. Before registering, students must formulate a project and secure the consent of a department member who will supervise the work. Conferences and/or written work as required by the supervisor.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

**PHIL 798 - Senior Thesis****Credits:** 4

Two-course sequence (798, then 799) open only to senior philosophy majors in the University Honors Program, the philosophy department honors-in-major program, or by special permission from the department. All senior thesis candidates must have a proposal approved in the spring of their junior year and a thesis adviser assigned by the chair of the department before registering for 798. Students must orally defend their theses before the department. (See department guidelines for further details).

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**PHIL 799 - Senior Thesis****Credits:** 4

Two-course sequence (798, then 799) open only to senior philosophy majors in the University Honors Program, the philosophy department honors-in-major program, or by special permission from the department. All senior thesis candidates must have a proposal approved in the spring of their junior year and a thesis adviser assigned by the chair of the department before registering for 799. Students must orally defend their theses before the department. (See department guidelines for further details).

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

## Physics (PHYS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PHYS 400 - Physics Seminar I****Credits:** 1

An informal reading and discussion course to introduce students to the general culture of physics, including career possibilities, historical and philosophical aspects of physics, current research at UNH and elsewhere, and physics in the news. Topics vary based on interests of the class. Students in their first year as physics majors (either as freshmen or transfers) are strongly encouraged to take this class.

**Repeat Rule:** May be repeated for a maximum of 2 credits.**Grade Mode:** Credit/Fail Grading**PHYS 401 - Introduction to Physics I****Credits:** 0 or 4

Broad survey of classical and modern physics. Designed to enable students to appreciate the role of physics in today's society and technology. Emphasizes the fundamental laws of nature on which all science is based, with some examples of interest to biologists. Knowledge of high school algebra, geometry, and trigonometry essential. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**PHYS #401J - Introductory Physics Review I****Credits:** 4

This course is for those who want to improve their understanding and their grade from Physics 401 before taking PHYS 402. Students must have passed the lab in PHYS 401 at UNH. This course will review all the topics from PHYS 401: motion, forces, energy, momentum, rotation, and fluids.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** PHYS 401 with a minimum grade of D-.**Equivalent(s):** PHYS 401**Grade Mode:** Letter Grading**PHYS 402 - Introduction to Physics II****Credits:** 0 or 4

Broad survey of classical and modern physics. Designed to enable students to appreciate the role of physics in today's society and technology. Emphasizes the fundamental laws of nature on which all science is based, with some examples of interest to biologists. Knowledge of high school algebra, geometry, and trigonometry essential. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** PHYS 401 with a minimum grade of D-.**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 405 - Intro to Modern Astronomy****Credits:** 4

Starting with a survey of the night sky and the daily motions of the stars and planets, this course surveys our current understanding of the Universe. It traces the development of the tools of the modern astronomer and how those tools have led to our theories of the solar system, the life cycle of stars, the formation of elements, the formation of galaxies and the evolution of the universe. Students explore in depth an astronomical topic of their choice through a term paper. The course includes direct experience with astronomical techniques and concepts through the use of the UNH Observatory and Small Radio Telescope, and a visit to a planetarium. Recommended for liberal arts and beginning science students. Knowledge of high school algebra is assumed. Note that this is the same course as PHYS 406, except for the substitution of a term paper instead of a lab. Cannot be taken for credit if credit received for PHYS 406.

**Attributes:** Physical Science(Discovery)**Equivalent(s):** PHYS 406**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 406 - Introduction to Modern Astronomy****Credits:** 0 or 4

Descriptive coverage of contemporary astronomical and astrophysical techniques with a review of current knowledge and theories concerning the solar system, galaxies, and the universe. Recommended for liberal arts and beginning science students. Knowledge of high school algebra is assumed. Note that this is the same course as PHYS 405, except for the substitution of a lab instead of a term paper. Cannot be taken for credit if credit received for PHYS 405. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Equivalent(s):** PHYS 406H**Grade Mode:** Letter Grading

**PHYS 407 - General Physics I****Credits:** 0 or 4

Introductory course emphasizing motion, forces, energy, momentum, rotation, and oscillations. Recommended for the student specializing in science and engineering. This version is the traditional format with three lectures, one recitation (problem solving section), and one lab each week. Students in this version must also register for a particular recitation and lab. Prereq: thorough knowledge of algebra, geometry, and trigonometry. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** MATH 425 (may be taken concurrently) with a minimum grade of D-.**Equivalent(s):** PHYS 407H, PHYS #407J, PHYS 407S**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 407H - Honors/General Physics I****Credits:** 0 or 4

Introductory course emphasizing motion, forces, energy, momentum, rotation, and oscillations. Recommended for the student specializing in science and engineering. The honors version covers the same material as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). Students in the Honors section must be co-enrolled in MATH 425H so that strong connections can be made between math and physics. 407H students work in groups in every class meeting. Students in this version do not register for a recitation or lab, since these activities are integrated into the regular class meetings. Prereq: thorough knowledge of algebra, geometry, and trigonometry. Lab.

**Co-requisite:** MATH 425H**Attributes:** Discovery Lab Course; Honors course; Physical Science(Discovery)**Equivalent(s):** PHYS 407, PHYS 407S**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS #407J - General Physics Review I****Credits:** 4

This course is for those students who want to improve their understanding and their grade from PHYS 407 before taking PHYS 408. Students must have passed the lab in PHYS 407 at UNH. This course will review all the topics from PHYS 407: motion, forces, energy, momentum, rotation, and oscillations.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** PHYS 407 with a minimum grade of D-.**Equivalent(s):** PHYS 407**Grade Mode:** Letter Grading**PHYS 407S - General Physics I Studio****Credits:** 4

Introductory course emphasizing motion, forces, energy, momentum, rotation, and oscillations. Recommended for the student specializing in science and engineering. The Studio version covers the same material as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). Students in this version do not register for a recitation or lab since these activities are integrated into the regular class meetings.

Prereq: thorough knowledge of algebra, geometry, and trigonometry. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** MATH 425 (may be taken concurrently) with a minimum grade of D-.**Equivalent(s):** PHYS 407, PHYS 407H**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 408 - General Physics II****Credits:** 0 or 4

Introductory course emphasizing waves, sound, heat, electricity and magnetism. Recommended for students specializing in science and engineering. This version is the traditional format with three lectures, one recitation (problem solving section), and one lab each week. Students in this version must also register for a particular recitation and lab. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** PHYS 407 with a minimum grade of D- and MATH 426 (may be taken concurrently) with a minimum grade of D-.**Equivalent(s):** PHYS 408H, PHYS 408S**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 408H - Honors/General Physics II****Credits:** 0 or 4

Introductory course emphasizing waves, sound, heat, electricity and magnetism. Recommended for students specializing in science and engineering. The honors version covers the same material as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). Students in the Honors section must be co-enrolled in MATH 426H so that strong connections can be made between math and physics. 408H students work in groups in every class meeting. Students in this version do not register for a recitation or lab, since these activities are integrated into the regular class meetings. Lab.

**Co-requisite:** MATH 426H**Attributes:** Discovery Lab Course; Honors course; Physical Science(Discovery)**Prerequisite(s):** PHYS 407H with a minimum grade of D- and MATH 425H with a minimum grade of D-.**Equivalent(s):** PHYS 408, PHYS 408S**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes

**PHYS 408S - General Physics II Studio****Credits:** 4

Introductory course emphasizing waves, sound, heat, electricity and magnetism. Recommended for students specializing in science and engineering. The Studio version covers the same materials as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). Students in this version do not register for a recitation or lab since these activities are integrated into the regular class meetings. Lab.

**Attributes:** Discovery Lab Course; Physical Science(Discovery)**Prerequisite(s):** PHYS 407 with a minimum grade of D- and MATH 426 (may be taken concurrently) with a minimum grade of D-.**Equivalent(s):** PHYS 408, PHYS 408H**Mutual Exclusion:** No credit for students who have taken .**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 409 - Investigating Physics****Credits:** 4

Elementary physics course where students develop a conceptual understanding of topics such as the solar system, phases of the moon, seasons, electrical circuits, electromagnets, light and color, sound and simple machines. The course is based on hands-on-activities, small groups, and discussions. This course is intended for students with little or no previous experience in physics who do not intend to take any other physics course. Cannot be taken for credit if credit received for PHYS 401, 402, 407 or 408. Not open to Physics majors.

**Attributes:** Discovery Lab Course; Physical Science(Discovery); Inquiry (Discovery)**Equivalent(s):** PHYS 401, PHYS 402, PHYS 407, PHYS 408**Grade Mode:** Letter Grading**PHYS 440A - Hon/Searching for Our Place in the Universe: Foundation and Limits of Certainty in Physical Science****Credits:** 4

We explore models of the universe and our place in it. We discuss the foundation of ideas about motion on Earth and in space, as well as the history of modern physics and astronomy, which have changed how we understand space and time. We consider the sources and limitations of human knowledge concerning the origin of the universe, the mystery of the origin of life and evidence that our description of reality is incomplete.

**Attributes:** Honors course; Physical Science(Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PHYS #444B - Into the Final Frontier: America's Journey into Space****Credits:** 4

One of the greatest accomplishments of the twentieth century is the human advance into space. For the first time ever, travel beyond the Earth is more than just the subject of adventurous science fiction tales - it is a reality. The purpose of this course is to trace the development of space flight from the late 1800's to the present time and to discuss the future of the United States human space flight program.

**Attributes:** Environment,TechSociety(Disc); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PHYS 501 - Peer-Led Team Learning in Physics****Credits:** 1

This course provides students with their initial experience as a peer instruction leader. In this course peer leaders will deepen their knowledge of introductory physics, be introduced to pedagogical theories. Pedagogical topics covered include questioning techniques, learning theory, cooperative learning, student epistemologies, and the nature of science. Students in this course are asked to reflect on their work as peer leaders through the lens of the required readings.

**Prerequisite(s):** (PHYS 401 with a minimum grade of D- and PHYS 402 with a minimum grade of D-) or (PHYS 407 with a minimum grade of D- and PHYS 408 with a minimum grade of D-).**Grade Mode:** Credit/Fail Grading**PHYS 505 - General Physics III****Credits:** 3

Electromagnetic waves, geometrical and physical optics, relativity, atomic physics, elementary quantum mechanics, molecular physics, and nuclear physics.

**Prerequisite(s):** PHYS 408 with a minimum grade of D-.**Grade Mode:** Letter Grading**PHYS 506 - General Physics III Laboratory****Credits:** 1

Structured laboratory experience in optics and modern physics. Lab.

**Co-requisite:** PHYS 505**Grade Mode:** Letter Grading**Special Fee:** Yes**PHYS 508 - Thermodynamics and Statistical Mechanics****Credits:** 4

Classical and statistical approach to thermodynamics, kinetic theory.

**Prerequisite(s):** PHYS 505 (may be taken concurrently) with a minimum grade of D- and (MATH 525 with a minimum grade of D- or MATH 527 with a minimum grade of D-).**Grade Mode:** Letter Grading**PHYS 601 - Computational Physics Recitation I****Credits:** 1

This course bridges students' computer science class and their physics classes by applying computational tools to basic physics problems.

Students will write, check, and document two physics codes. This course focuses on solving differential equations. The course will support students as they work on computational assignments from their core physics courses. Corequisite: PHYS 505 or PHYS 508.

**Prerequisite(s):** CS 410 with a minimum grade of D- or IAM 550 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading**PHYS 602 - Computational Physics Recitation II****Credits:** 1

This course bridges students' computer science class and their physics classes by applying computational tools to basic physics problems.

Students will write, check, and document two physics codes. This course focuses on data processing. The course will support students as they work on computational assignments from their core physics courses. Corequisite: PHYS 605 or PHYS 615.

**Prerequisite(s):** (CS 410 with a minimum grade of D- or IAM 550 with a minimum grade of D-) and PHYS 601 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading

**PHYS 605 - Experimental Physics I****Credits:** 5

Circuit design with passive and active elements including transistors and operational amplifiers; electrical measurements for experimental physics; digital electronics, microprocessors, and interfacing techniques. Lab.

**Prerequisite(s):** PHYS 408 with a minimum grade of D- and (MATH 525 with a minimum grade of D- or MATH 527 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**PHYS 615 - Classical Mechanics and Mathematical Physics I****Credits:** 4

Analytical treatment of classical mechanics covering the dynamics of particles and rigid bodies at an intermediate level. Advanced mathematical analysis (complex numbers, differential equations, Fourier series, multiple integrals) are reviewed or introduced as needed to analyze physical situations.

**Prerequisite(s):** PHYS 407 with a minimum grade of D- and (IAM 550 with a minimum grade of D- or CS 410P with a minimum grade of D-) and ((MATH 527 (may be taken concurrently) with a minimum grade of D- and MATH 528 (may be taken concurrently) with a minimum grade of D-) or (MATH 525 (may be taken concurrently) with a minimum grade of D- and MATH 526 (may be taken concurrently) with a minimum grade of D-)).

**Grade Mode:** Letter Grading

**PHYS 616 - Classical Mechanics and Mathematical Physics II****Credits:** 4

Analytical treatment of classical mechanics covering the dynamics of particles and rigid bodies, at an intermediate level. Advanced mathematical analysis (complex numbers, differential equations, Fourier series, multiple integrals) are reviewed or introduced as needed to analyze physical situations.

**Prerequisite(s):** PHYS 505 with a minimum grade of D- and PHYS 615 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 701 - Quantum Mechanics I****Credits:** 4

Non-relativistic Schrodinger equation, the hydrogen atom, applications to atomic and nuclear structure.

**Prerequisite(s):** PHYS 505 with a minimum grade of D- and PHYS 615 with a minimum grade of D- and PHYS 616 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 702 - Quantum Mechanics II****Credits:** 4

Non-relativistic Schrodinger equation, the hydrogen atom, applications to atomic and nuclear structure.

**Prerequisite(s):** PHYS 701 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 703 - Electricity and Magnetism I****Credits:** 4

Foundation of electromagnetic theory; electrostatics, dielectric theory, electromagnetism, magnetic properties of matter, alternating currents, Maxwell's field theory.

**Prerequisite(s):** PHYS 408 with a minimum grade of D- and PHYS 615 with a minimum grade of D- and ((MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-) or (MATH 525 with a minimum grade of D- and MATH 526 with a minimum grade of D-)).

**Grade Mode:** Letter Grading

**PHYS 704 - Electricity and Magnetism II****Credits:** 4

Foundation of electromagnetic theory; electrostatics, dielectric theory, electromagnetism, magnetic properties of matter, alternating currents, Maxwell's field theory.

**Prerequisite(s):** PHYS 703 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 705 - Experimental Physics II****Credits:** 4

Modern physics experiments and special project problems assigned to individual students. Lab.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PHYS 605 with a minimum grade of D- and PHYS 505 with a minimum grade of D- and (CS 410P with a minimum grade of D- or IAM 550 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**PHYS 708 - Optics****Credits:** 4

Geometrical optics, electromagnetic theory of light, interference, diffraction, polarization, related phenomena and nonlinear optics. Lab.

**Prerequisite(s):** PHYS 505 with a minimum grade of D- and PHYS 615 with a minimum grade of D- and PHYS 616 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 710 - Astrophysics I****Credits:** 4

A comprehensive review of modern astrophysics. Topics covered include the celestial sphere, celestial mechanics, the tools of the modern astronomer (including different types of telescopes for studying the electromagnetic radiation from space), stellar spectra, stellar atmospheres, stellar interiors, the formation of stars, stellar evolution, and the stellar graveyard (white dwarfs, neutron stars, and black holes).

**Prerequisite(s):** ((MATH 525 with a minimum grade of D- and MATH 526 with a minimum grade of D-) or (MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-)) and PHYS 505 with a minimum grade of D- and PHYS 506 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 711 - Astrophysics II****Credits:** 4

A continuation of the comprehensive review of modern astrophysics. Topics covered include the degenerate stellar remnants (white dwarfs, neutron stars, black holes), the interstellar medium, the Milky Way Galaxy, the nature of galaxies, the evolution of galaxies, the structure of the Universe, active galaxies, cosmology, and the early Universe.

**Prerequisite(s):** PHYS 710 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**PHYS 712 - Space Plasma Physics****Credits:** 4

Introduces space plasma physics, including solar physics, heliospheric physics, magnetospheric physics, and ionospheric physics. An overview of the basic phenomena and processes (e.g., particle acceleration and transport, shock formation, magnetic structures and reconnection, wave propagation, wave-particle interactions, instabilities), theoretical techniques (e.g., single-particle orbits, kinetic and fluid descriptions), and experimental techniques. (Alternate years only.)

**Prerequisite(s):** PHYS 408 with a minimum grade of D- and PHYS 508 with a minimum grade of D- and PHYS 616 with a minimum grade of D-.

**Equivalent(s):** EOS 712

**Grade Mode:** Letter Grading

**PHYS 718 - Condensed Matter Physics****Credits:** 4

Theory and experiment underlying the behavior of solids. Transport theory, surface studies, and the interaction of radiation and matter. Operation of semiconducting and superconducting devices and lasers.

**Prerequisite(s):** PHYS 508 with a minimum grade of D- and PHYS 701 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading**PHYS 720 - Nuclear Physics****Credits:** 4

Nuclear phenomenology, reactions, models, radiation, interaction of radiation with matter; accelerators; properties and interactions of elementary particles; symmetries and symmetry breaking; standard model.

**Prerequisite(s):** PHYS 702 (may be taken concurrently) with a minimum grade of D- and PHYS 703 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading**PHYS 764 - General Relativity and Cosmology****Credits:** 4

Review of special relativity, and the motivation for considering gravity in terms of curvature of space time. Introduction to Riemannian geometry, general relativity and Einstein's equations. Application of general relativity in the study of black holes, gravitational waves, cosmology, as well as recent results on inflation and quantum gravity. (Alternate years only.)

**Prerequisite(s):** PHYS 505 with a minimum grade of D- and PHYS 508 with a minimum grade of D- and PHYS 616 with a minimum grade of D- and (CS 410P with a minimum grade of D- or IAM 550 with a minimum grade of D-) and (MATH 645 with a minimum grade of D- or MATH 545 with a minimum grade of D- or MATH 525 with a minimum grade of D-).

**Grade Mode:** Letter Grading**PHYS 795 - Independent Study****Credits:** 1-8

Individual project under direction of a faculty adviser.

**Grade Mode:** Letter Grading**PHYS 797 - Senior Design Project****Credits:** 2

Four credits of this course is the required Senior Design Project for BSEP majors and fulfills their capstone requirement; the course is taken for two credits in each of the last two semesters before graduation. Students work under the direction of a faculty sponsor on the design aspect of a specific project, which might include trade studies, design reviews, cost-benefit analyses, etc. all leading to an optimal design solution. Acceptable designs can include detailed hardware aspects of a system or sub-system, numerical modeling of a system, or paper studies of a system concept. Students are required to submit a final report and to present their work at a public forum. Restricted to BSEP seniors.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Letter Grading**PHYS 798 - Senior Project****Credits:** 2-4

Students complete an independent project and submit a written report. Students can choose from a range of projects, including (but not limited to) a research or numerical project, and extensive literature review on an advanced physics topic, building an apparatus, or developing a new or existing experiment in Physics 705. A student intending to take Physics 798 must arrange to have a faculty advisor for the project and should work with this advisor to develop a one-page project proposal. The student must submit this proposal to the Physics Undergraduate Curriculum Committee by the tenth week of the semester preceding the semester in which the student takes Physics 798. This course satisfies the capstone requirement in Physics.

**Grade Mode:** Letter Grading**PHYS 799 - Thesis****Credits:** 4

Students work under the direction of a faculty sponsor to plan and carry out independent research resulting in a written thesis. Required for honors-in-major.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PHYS 795 with a minimum grade of D- or INCO 790 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Political Science (POL) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**POL 450 - American Government and Politics****Credits:** 4

This course introduces the learner to the historical background, the institutions, and the political processes within the United States national government. The focus is on process, but the appropriate attention is given to the institutions of government in which the political processes occur, such as Congress, the courts, and local governments. The course employs a systems model of politics to identify how politics works in the United States. Both process and institutions are studied from a systems perspective so that critical functions and decision points can be identified, described, and assessed. Specific attention will be paid to the legislative process, elections, and enacting change.

**Attributes:** HumanBehavSocial Sys (Gen Ed); Writing Intensive Course**Equivalent(s):** POL 550G**Grade Mode:** Letter Grading**POL 554 - Law and Society****Credits:** 4

This course is designed to provide an interdisciplinary approach to study of the law, incorporating history, philosophy, economics, political science, sociology, and psychology. Students are introduced to law in society by focusing on social and legal theory analysis from a critical perspective. Beginning with a historical overview of the law, learners explore the variety of forces that shape the law as well as its impact on society at large. In addition, the course provides a basic introduction to legal reasoning and the law in the context of society. Landmark United States Supreme Court criminal and civil cases will also be examined.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Equivalent(s):** POL 554G**Grade Mode:** Letter Grading

**POL 690 - The US in World Affairs****Credits:** 4

This course examines U.S. foreign relations since WWII with a particular focus on the late twentieth century through modern day. Students will explore patterns of U.S. policy in a volatile environment marked by fundamental changes to the international system of states since the collapse of the Soviet Union. Students trace the transformation in international relations that has led to the creation of world trade and globalized institutions, the proliferation of regional ethnic and religious conflicts, and most challenging of all, the emergence of transnational terrorism. Students will have the opportunity to analyze the international system and relevant political theories, develop competence in defining both transient and enduring national interests, and build confidence in appraising the policy responses of national actors to those challenges.

**Attributes:** HumanBehavSocial Sys (Gen Ed); Historical Perspectives(Disc); Writing Intensive Course

**Equivalent(s):** POL 600G

**Grade Mode:** Letter Grading

## Political Science (POLT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**POLT 401 - Politics and Society****Credits:** 4

Introduces the nature of politics and political institutions. Emphasizes political behavior and continuing issues of modern politics, such as power, authority, legitimacy, freedom, and order.

**Attributes:** Humanities(Disc)

**Equivalent(s):** POLT 401H

**Grade Mode:** Letter Grading

**POLT 402 - American Politics and Government****Credits:** 4

Foundational course to help students understand the institutions and actors of American politics and government, the decision-making process of government, and the political considerations that drive American government.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** POLT 402H

**Mutual Exclusion:** No credit for students who have taken PS 402.

**Grade Mode:** Letter Grading

**POLT 403 - United States in World Affairs****Credits:** 4

Introduces students to key concepts, actors, and events in U.S. foreign policy. After examining the early foundations of American foreign policy, this course concentrates on the United States' international engagement from the Cold War to the present. Students develop the analytical skills they need to form their own opinions on contemporary issues in U.S. foreign policy, and defend these opinions articulately based on a solid knowledge of historic and current events.

**Attributes:** Historical Perspectives(Disc)

**Equivalent(s):** POLT 403H, POLT 403W

**Grade Mode:** Letter Grading

**POLT #407 - Law and Society****Credits:** 4

Introduces the ways in which law operates in modern society: its forms, functions, underlying values, and the consequences of its application in particular regimes. Topics include the psychological bases for legal obligation, the evolution of particular legal doctrines, the philosophical underpinnings of legal responsibility, the relationship of law to social structures, the relationship of law to morality, the nature of legal reasoning, and critiques of law.

**Equivalent(s):** POLT 407H, PS #407

**Grade Mode:** Letter Grading

**POLT 440A - Honors/Global Justice****Credits:** 4

The course exposes students to different understandings of global justice and the institutions and approaches used to address genocide and mass human suffering. Students explore several modern conflicts and different cultural understandings of these conflicts and views on justice. The class also examines the political dynamics of international and domestic institutions, power politics, and international activism. Students also examine the globalization of accountability and post-conflict transitions from violence to peace.

**Attributes:** Honors course; World Cultures(Discovery)

**Grade Mode:** Letter Grading

**POLT 444 - Politics and Policy in a Warming World****Credits:** 4

Uses the issue of climate change to explore the relationships between scientific and technical research and debate, policymaking at the international and domestic (U.S.) levels, and public understanding and interpretation of complex technical issues. The course is interdisciplinary.

**Attributes:** Environment,TechSociety(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**POLT 444B - Cruel and Unusual in a Federal System****Credits:** 4

This course is an exploration of the US/state constitutional language of 'cruel and unusual' as an important limitation on governmental power. Students study its historical origins, interpretations, and applications across time periods and types of regimes. Particular attention will be paid to its association with the death penalty in the contemporary United States.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**POLT 500 - American Public Policy****Credits:** 4

Foundational public policy course examining policy choices and conflicts, how policy decisions are made, how policies are assessed, the development of potential policy solutions, and the politics of policy making. Students engage in a task force project that simulates public policy processes and culminates in a policy recommendation at the end of the semester.

**Attributes:** Writing Intensive Course

**Mutual Exclusion:** No credit for students who have taken PS 500.

**Grade Mode:** Letter Grading

**POLT 502 - State and Local Government****Credits:** 4

Examines power, policies, political culture, and constitutional settings of state and local governments in the United States. Students study how state legislatures, governors, courts, political parties, and interest groups interact to shape political outcomes at the state and local levels.

**Grade Mode:** Letter Grading**POLT 504 - American Presidency****Credits:** 4

The President as administrator, policy maker, and political leader. The relationship between the President and the public, the media, and other governmental institutions. Historical and constitutional background of the Presidency, role, and powers of the President in domestic and foreign affairs.

**Grade Mode:** Letter Grading**POLT 505 - American Congress****Credits:** 4

Role and powers of Congress as national lawmaker and check on the executive branch: committee structure, concepts of representation, legislative oversight and party cleavage, federal budget control, and foreign policy involvement.

**Grade Mode:** Letter Grading**POLT 506 - Parties, Interest Groups, and Voters****Credits:** 4

Role of political parties as organizers and managers of social conflict. Role of voters in controlling parties and government. Influence of interest groups in the electoral process and in governmental decision making.

**Grade Mode:** Letter Grading**POLT 507 - Politics of Crime and Justice****Credits:** 4

Criminal justice in theory and practice; contemporary role of police, prosecutors, judges, juries, counsel, and interest groups in the administration of criminal justice.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 508 - Supreme Court and the Constitution****Credits:** 4

Supreme Court treated as a political institution whose historic mission is to decide all controversies arising under the Constitution between the nation and the states, the President and Congress; the role of the judiciary in defining its own powers, rights, and duties.

**Attributes:** Writing Intensive Course**Equivalent(s):** PS #508**Grade Mode:** Letter Grading**POLT 509 - Managing Bureaucracy in America****Credits:** 4

Growth and development of the bureaucratic state. Roles and powers of administrative officials, decision making in bureaucratic settings, citizen participation, and the influence of interest groups on bureaucratic policymaking.

**Grade Mode:** Letter Grading**POLT #510 - Media and Politics****Credits:** 4

Contemporary review of media in politics; major roles of media today in providing news, setting public agenda, influencing public opinion; government regulations vs. media responsibility; future developments and consequences for American democracy.

**Grade Mode:** Letter Grading**POLT 511 - Women & Politics****Credits:** 4

This class provides a survey of the intersection of women, sex, and gender with politics.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 512 - Public Opinion in American Politics****Credits:** 4

Relationship of mass and elite opinion within the context of American political culture. Impact of public opinion on American governmental policies, especially with respect to major issues facing the President and Congress. Appraisal of responsiveness to influence and responsibility to lead.

**Attributes:** Social Science (Discovery)**Grade Mode:** Letter Grading**POLT 513 - Civil Rights and Liberties****Credits:** 4

Analysis of four major areas of constitutional rights and liberties, political freedom, equal protection of the laws, and due process with particular attention to their impact on such problems as political protest, discrimination, school segregation, students' rights and the relationship between government and religion.

**Grade Mode:** Letter Grading**POLT #520 - Politics, Justice, and Morality****Credits:** 4

Origin of the idea of justice; relationship between politics, justice, and morality; selections from Plato, Aristotle, Roman, Islamic, and Christian political philosophers.

**Grade Mode:** Letter Grading**POLT #521 - Rights and the Political Community****Credits:** 4

Human rights and the quality of communities as expressed in Hobbes, Locke, Mandeville, Rousseau, and others.

**Grade Mode:** Letter Grading**POLT 522 - Dissent and the Political Community****Credits:** 4

Current political ideologies and controversies in America and abroad; liberal democracy and its critics since the 19th century.

**Grade Mode:** Letter Grading**POLT 523 - American Political Thought****Credits:** 4

Introduces the student to the key questions about politics and government asked and answered by American thinkers and actors, as well as the ways in which those "answers" have shaped our institutions and political processes. Emphasizes the idea of property.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 524 - Politics and Literature****Credits:** 4

This course examines classical and contemporary works of literature to explore perennial issues in the study of politics, such as: exceptionalism, individualism, justice, and equality.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading

**POLT #524W - Politics and Literature****Credits:** 4

This course examines classical and contemporary works of literature to explore perennial issues in the study of politics, such as: exceptionalism, individualism, justice, and equality.

**Attributes:** Humanities(Disc); Writing Intensive Course**Grade Mode:** Letter Grading**POLT 544 - Of Dictators and Democrats****Credits:** 4

Why are some countries democratic, while others are ruled by dictators?

This course answers this question by examining leading theories of democratization, then testing these theories empirically through case studies of ancient Greece, the United States, Germany, Chile, and South Africa. The course concludes with an overview of contemporary political change in the Middle East, and the potential for popular protest to culminate into democratic practices.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT #545 - People and Politics in Asia****Credits:** 4

This course is an introduction to Northeast Asia, with special emphasis on the politics of the region's major actors. Will China be the next global hegemon? Is Japan moribund? Is Taiwan an independent country? Is Hong Kong a democratic bastion? Why does Kim Jong-un keep threatening to attack the United States? This is a mid-level, writing intensive course that will prepare students for more advanced courses on the nations and issues of the Asia-Pacific rim.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 546 - Wealth and Politics in Asia****Credits:** 4

Different paths to modernization, industrialization, and development in nations of the Asia-Pacific Rim. In-depth examinations of the challenges faced by Japan, China, Hong Kong/Macao, Taiwan, and the Koreans in their search for the correct path to economic growth and prosperity, with special emphasis on each nation's distinct society and history. Companion course to POLT #545, but either may be taken separately.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 548 - Drug Wars****Credits:** 4

The Americas have hosted several wars against drugs, but these militarized campaigns have not curtailed the global consumption of opiates, cocaine, and cannabis. Perhaps even more sobering, the drug wars have coincided with spiraling rates of violent crime. Given this track record, policymakers have begun to reevaluate drug policies in the US and abroad. This course evaluates these contemporary changes, particularly in light of the successes and failures of past drug control policies.

**Grade Mode:** Letter Grading**POLT 549 - The Politics of Markets****Credits:** 4

This course surveys some major debates in comparative political economy, focusing especially on the creation, evolution, and reform of market institutions. The course emphasizes the ways in which the market is embedded in social and political institutions. Main topics include: 1) Theoretical foundations of political economy, 2) Patterns of industrialization, 3) Capitalist institutions in contemporary industrialized countries, 4) Challenges of development, 5) Transitions from communism to a market economy, and current challenges facing capitalism.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**Special Fee:** Yes**POLT 550 - Comparative Government and Society****Credits:** 4

Introduces students to key concepts and themes in comparative politics through the study of revolutions, ideologies, institutions, and/or social movements. This course compares interactions between citizens and their governments in various types of democracies as well as authoritarian regimes, and spans industrialized and developing countries.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**POLT 551 - Ethnicity ,Violence, Democracy****Credits:** 4

What is ethnic identity and why do ethnic differences result in violence? Are diverse societies prone to conflict? The course provides a broad perspective to these questions by examining diversity and conflict in the Middle East, Europe, Africa, Asia, Latin America and the US. Racial and ethnic politics in the US, while not a primary focus, are compared to identity and conflict in other countries. Students will understand how identity evolves and shapes the world.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 552 - Contemporary European Politics****Credits:** 4

Analyzes politics, governments, and societies in contemporary Europe; focuses on basic characteristics of political life in different countries as well as pressing economic, political, and social issues.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 554 - Revolution and Protest in Latin America****Credits:** 4

Throughout Latin American history, economic and political models have been heavily contested. Advocates of state intervention in the economy have clashed with free market forces, and these clashes have often spilled into the political arena where they have been further complicated by divisions between dictators and democrats. This course examines these twin processes in Latin American politics, tracing economic and political development from the time of independence to the present.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 556 - Politics in China****Credits:** 4

Dynamics of China's domestic political and economic policy processes - from massive starvation of the Great Leap Forward and the ideological upheavals of the Great Proletarian Cultural Revolution to the "Opening of China to the Outside World."

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**POLT 559 - Comparative Politics of the Middle East****Credits:** 4

Examines the dynamics of political and economic change in states and societies of the Middle East. Covers state formation, nationalism and colonialism, authoritarianism and opposition movements, and the origins of the Israeli-Palestinian conflict.

**Grade Mode:** Letter Grading**POLT 560 - World Politics****Credits:** 4

The course explores the primary issues of world politics with a focus on conflict, cooperation and development. Students are introduced to the principal theories and concepts in the analysis of world politics and encouraged to apply these theories and concepts to contemporary global issues.

**Attributes:** Social Science (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**POLT 562 - Strategy and National Security Policy****Credits:** 4

This course develops an understanding of: 1) strategy and its relationship to national security policy and 2) American national security issues and the process of creating and implementing American national security policies. A primary theoretical and practical consideration is the relationship between the use of force and diplomacy. Among the specific issues are: the nuclear world, the U.S. defense posture, military interventions, and the broadening definition of security.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT #563 - The Global Information Grid's Disruptive Impact on Government, Politics, and Society****Credits:** 4

Disruptive networking technologies, collectively called the Global Information Grid or GIG, are facilitating revolutionary changes in government, politics, and society. The course is designed to provide students with a framework for understanding and addressing issues that spring from the application of technology.

**Grade Mode:** Letter Grading**POLT 565 - United States Policy in Latin America****Credits:** 4

Frequently U.S. policymakers portray the United States as a benevolent neighbor, seeking to help the countries in their "backyard". Many Latin Americans disagree with this view, and think more critically about the motivations and legacies of U.S. intervention in the Western Hemisphere. To understand these disagreements, this course applies theories of international relations to analyze pivotal events in the history of U.S. - Latin American relations from the time of independence to the present, including Spanish-American War, creation of Panama Canal, Cuban Missile Crisis, Iran Contra Affair, War Against Drugs, Washington Consensus.

**Grade Mode:** Letter Grading**POLT 566 - Asian Challenge to Global Order****Credits:** 4

Asian international relations continue to challenge global power structures. As the world's most vital region, Asia is characterized by explosive economic growth, diverse political systems, modernizing militaries, and advanced technologies. This course explores the regional political and economic dilemmas, starting with the breakdown of the old imperialist order, Japan's expansion, the Asian Cold War, Korean and Chinese unification, China's post-1978 emergence, North Korea nuclear weapons, and the growing conflict over the Pacific Ocean's marginal seas.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 568 - International Security****Credits:** 4

Explores central issues related to security in international politics, including: intelligence collection, emerging technologies, the rise and fall of major interstate wars, nuclear weapons, climate change, terrorism, civil wars, and coercion.

**Prerequisite(s):** POLT 403 with a minimum grade of D-.**Grade Mode:** Letter Grading**POLT 569 - The Rise of China****Credits:** 4

Analysis of China's struggle for political and economic power in Asia and the world. Examines the legacy of China's historical encounters with the outside world, interactions with the international system since 1949, domestic determinants of foreign political and economic policies, and theories of decision making.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT #570 - Counterterrorism: Nation states' responses to terrorist activity****Credits:** 4

This course explores nation states' responses to terrorism or "counterterrorism." Students learn to define terrorism and use models to understand responses. Case studies are used to highlight the challenges and successes resulting from different response strategies. Students analyze questions facing government counterterrorism decision makers. For example, what is the risk of a terrorist organization acquiring and detonating a nuclear weapon and what response could governments deliver following such an event?.

**Grade Mode:** Letter Grading**POLT 580 - Selected Topics Am Politics****Credits:** 4

Special topics such as politics and public affairs in New Hampshire, women in politics, and civil liberties. Not offered every semester. See departmental listings for semester offerings.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**POLT 584 - Selected Topics in Political Thought****Credits:** 4

Special issues in political theory, such as liberalism and conservatism, radical political thought, the American character, and others. Not offered every semester. See departmental listings for semester offerings.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**POLT 588 - Selected Topics in Comparative Politics****Credits:** 4

Specialized areas or issues such as regional politics, national politics, judicial systems, administrative law, constitutions, etc.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 592 - Selected Topics in International Politics****Credits:** 4

Examines specialized issues in international politics. Topics may include ethnic conflict, non-proliferations and global security, economic and political globalization, etc. Not offered every semester. See departmental listings for semester offerings.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 595 - Smart Politics****Credits:** 4

An introduction to empirical research methods in political science, both qualitative and quantitative. Students study all aspects of the research process, including hypothesis-building, concepts and variables, measurement, research design, sampling, and empirical observations. Special attention paid to the use of statistical software.

**Attributes:** Inquiry (Discovery); Writing Intensive Course**Mutual Exclusion:** No credit for students who have taken PS 595.**Grade Mode:** Letter Grading**POLT 602A - Internship****Credits:** 4

Field experience in a governmental or nongovernmental organization at the local, state, national, or international level. Arrangements must be made through the political science department. Open to juniors and seniors with at least a 3.2 GPA. Permission of the undergraduate curriculum committee of the department is required prior to the internship.

**Grade Mode:** Letter Grading**POLT #602B - Washington Center Internship****Credits:** 4

A four-credit independent study designed to work in conjunction with the University's Washington Center Internship program. Requirements: major in political science. Junior or senior research component to be discussed with faculty sponsor.

**Prerequisite(s):** POLT 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**POLT #602C - Concord Internship Program****Credits:** 12

Provides students with field experience in state government in Concord (State Senate, House of Representatives, Office of the Governor, etc.). Students will spend three days weekly in Concord and attend a weekly practicum in Durham. Open to juniors and seniors with a 3.2 or better GPA. Applications accepted in the fall semester and can be found on department's website. Students may sign up any four (4) credit course along with 602C for a total of 16 credits.

**Grade Mode:** Credit/Fail Grading**POLT 602D - Internship****Credits:** 2-12

Field experience in governmental or nongovernmental organization at the local, state, national, or international level. Arrangements must be made through the political science department. Open to juniors and seniors with at least 3.2 GPA. Permission from the undergraduate curriculum committee of the department is required. From 2 to 12 credits maybe taken.

**Grade Mode:** Credit/Fail Grading**POLT 695 - Independent Study****Credits:** 2-4

Designed to meet special interests of students and instructors in exploring issues in political science. Upon satisfying eligibility requirements set forth by departmental guidelines (in departmental office and online), students must have the approval of a faculty sponsor. Students submit the form and all supporting evidence by mid-semester prior to the planned semester of independent study for departmental approval. Does not meet the major's four field-course requirement; maximum of eight (8) credits can be counted toward the non-field major requirements.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**POLT 696 - Independent Study****Credits:** 2-4

Designed to meet special interests of students and instructors in exploring issues in political science. Upon satisfying eligibility requirements set forth by departmental guidelines (in departmental office and online), students must have the approval of a faculty sponsor. Students submit the form and all supporting evidence by mid-semester prior to the planned semester of independent study for departmental approval. Does not meet the major's four field-course requirement; maximum of eight (8) credits can be counted toward the non-field major requirements.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**POLT 700 - Political Science Pro-Seminar****Credits:** 4

Familiarizes students with political science as a profession. Briefly surveys the scope of the discipline in terms of the substantive fields and methodological approaches. Examines the logic of research design and explores diverse methods of inquiry (e.g., archival, experimental, case study, comparative analysis, field study, survey, etc.), including the process of generating a presentable research paper.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 705 - Elections in the United States****Credits:** 4

Students will study various aspects of elections in the United States while observing and analyzing case studies during campaign season.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 709 - Reforming American Government****Credits:** 4

Why is American government designed the way that it is (and how does it change?)? Whose interests are protected and whose interests are limited by its design? What do successful reforms tell us about the future of reform?

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**POLT 721 - Feminist Political Theory****Credits:** 4

Familiarizes students with trends feminist political thinking; exploring issues of race, ethnicity, class, religion/spirituality, sexual orientation, ability, age as they relate to gender and the development of feminist political theory. Attention is paid to critical thinking and analysis using the paradigm of gender as a prism through which to view our lives and ideas.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 740 - States and Societies in the Middle East****Credits:** 4

This seminar explores the comparative politics of selected countries and conflicts in the contemporary Middle East and North Africa. We focus on understanding the causes and consequences of popular uprisings, civil wars, and protracted conflicts. The class is taught through discussion, with students taking active, participatory roles. Themes include changing forms of governance, changing practices of warfare, gender and minority rights, economic and environmental problems, protest and activism, state-society relations, and migration and refugees. Students read memoir, journalistic accounts, and theoretical articles in comparative politics to understand important developments. Specific country and issue cases change each year; recent seminars have addressed Israel-Palestine, Syria, Egypt, Iran, and Iraq. Writing, reading, and discussion intensive class. Designed as follow-on course to POLT 559, Comparative Politics of the Middle East, counts as capstone course for the Middle East Minor.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 742 - Politics of Afghanistan, Pakistan, and India****Credits:** 4

Afghanistan, Pakistan, and India are strategically important states and potential flashpoints of conflict. Nuclear neighbors, India and Pakistan have been in conflict for 70 years while Afghanistan remains internally unstable. The politics of these countries are also intimately involved with each other. The class will focus both on the internal politics of these states and their foreign relations with each other and the United States. Students will develop expertise in a crucial world region.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 748 - Food and Wine Politics****Credits:** 4

Food and wine politics provides a lens through which to analyze contrasting perspectives on production organization, market structures, quality constructs, consumer preferences, and health and safety regulation. This course draws upon texts from economic history, political economy, economic sociology, and public policy to shed light on comparative political and market organization across Europe, the United States, and emerging market economies.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 750 - Politics of Poverty****Credits:** 4

Why are some countries rich while others are so poor? This course answers this question by examining several theories of economic development: political culture, modernization, dependency, regime types, urban bias, rent-seeking institutions, and international aid. The immediate goal of this course is for students to understand the causes of international inequality in the distribution of wealth. Students also improve their ability to evaluate theoretical arguments and empirical evidence critically, and develop reading and writing skills.

**Attributes:** Writing Intensive Course**Mutual Exclusion:** No credit for students who have taken PS 750.**Grade Mode:** Letter Grading**POLT 751 - Comparative Environmental Politics and Policy****Credits:** 4

Environmental politics and policy across national boundaries and at different levels of governance. Comparison of the U.S. and European Union environmental policies to build a foundation for comparisons across national boundaries and sub-national authorities. Students improve their understanding of how and why comparative methods are used to gain insight into politics and policymaking. Central concepts and debates addressed include the roles of expertise, sustainability, precautionary principle, the use of market mechanisms in policy, environmental justice, policy devolution and flexibility, environmental performance assessment, NGO roles, activism, and social movements. Using a range of theoretical approaches and historical and contemporary events and case studies, evaluating the claims and explanatory power of various concepts and theories. Includes ethical issues emerging from the theory and practice of environmental politics.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 760 - Theories of International Relations****Credits:** 4

Theoretical approaches of international politics, international organization, and international political economy with particular emphasis on systems theories, domestic determinants of foreign policy and theories of decision making.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 762 - International Political Economy****Credits:** 4

This course has been designed to introduce advanced undergraduates and graduate students to the current theoretical discussions in international political economy. The course analyzes the development of current international economic regimes, as well as looks at systemic theories (interdependence, hegemonic stability), domestic determinants (bureaucratic, interest group), and decision-making theories (rational choice). By monitoring current economic and political news, students are challenged to apply these ideas to explain the current problems in political economy.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**POLT #765 - Security Intelligence Study****Credits:** 4

The goal of the Security Intelligence Study course is to provide an opportunity for students to apply research and analysis models used by intelligence professionals to a real world problem. Using unclassified public sources, students research and present an analytical product to help limit risk for a government decision maker. Participants learn about and use publicly available data and intelligence analysis models.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 778 - International Organization****Credits:** 4

This course is about cooperation at the international level. With a focus on international organizations, we examine what roles international institutions (both IGOS and NGOS) play in global governance and their effects in various issue areas. We examine their historical origins, functions, and the international and domestic political forces that impact their effectiveness. The course also considers the role of international organizations on world order including conflict resolution, peacekeeping, development, and human rights.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 795 - Advanced Study****Credits:** 1-4

Senior POLT majors, with a cumulative average of 3.20 or greater, may undertake advanced study (political science), in an area of their choice, in consultation with member(s) of the faculty. Normally, the result of the project is a significant written product of a quality comparable to that done at the 700 course level. Student must initiate the project discussion and obtain approval of the undergraduate curriculum committee of the department before undertaking the project.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 796 - Advanced Study****Credits:** 4

Senior POLT majors, with a cumulative average of 3.20 or greater, may undertake advanced study (political science), in an area of their choice, in consultation with member(s) of the faculty. Normally, the result of the project is a significant written product of a quality comparable to that done at the 700 course level. Student must initiate the project discussion and obtain approval of the undergraduate curriculum committee of the department before undertaking the project.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 797B - Seminar in American Politics****Credits:** 4

Advanced analysis and individual research.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 797C - Seminar in Comparative Politics****Credits:** 4

Advanced analysis focusing on government and politics in foreign nations or regions. Areas of interest may include: constitutional structures, political parties and interest groups, legislatures, bureaucracy, and public policy. Topics address such concerns as religion and politics, patterns of economic development, ethnic strife, and political leadership.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 797E - Seminar in International Politics****Credits:** 4

Advanced analysis focusing on problems of theory and contemporary issues in international politics. Areas of interest may include: democratic norms in international relations, NATO expansion and European security, the peace process in the Middle East, etc. See department listings for semester offerings.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT #797I - Seminar in Political Thought****Credits:** 4

Advanced treatment and individual research.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 798B - Seminar in American Politics****Credits:** 4

Advanced analysis and individual research.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**POLT 799 - Honors Thesis****Credits:** 4

Senior POLT honors-in-major students (see department for honors-in-major requirements), with a cumulative average of 3.20 or greater, may undertake a special honors project in an area of their choice. The result of this special project is a significant written product constituting an honors thesis, under the supervision of a faculty sponsor. Students must initiate the project discussion and obtain approval of the undergraduate curriculum committee before undertaking the project. The honors thesis constitutes the tenth course in the major.

**Attributes:** Honors course; Writing Intensive Course**Grade Mode:** Letter Grading

## Politics and Society (PS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PS 402 - Practical Politics****Credits:** 4

With particular attention to the development and evolution of US political institutions over time, this course seeks to help students understand how national politics affects them and their communities and how they can, in turn, use that insight to affect national politics. We will work to develop not just new knowledge, but to foster tools and practices of civic engagement.

**Attributes:** Historical Perspectives(Disc)**Mutual Exclusion:** No credit for students who have taken POLT 402.**Grade Mode:** Letter Grading

**PS #407 - Politics, Law and Contemporary Society****Credits:** 4

This course examines the foundation and structure of the American legal system and the complex relationship between law, politics, and contemporary social structures, including the philosophical and historical origins of law and the concept of sovereignty. Using case studies and United States Supreme Court decisions, the course considers the philosophical, historical, economic, environmental, and sociological underpinnings of contemporary legal and politics issues.

**Attributes:** Social Science (Discovery)**Equivalent(s):** POLT #407, POLT 407H**Grade Mode:** Letter Grading**PS 425 - Exploring Leadership****Credits:** 1-4

Exploring Leadership is an introductory course on the foundations of student development and leadership, with an emphasis on applying the formal literature on leadership to help students develop and articulate their own personal philosophy of leadership and enact a leadership action plan for their club/organization/leadership position. no credit for students who have taken.

**Equivalent(s):** UMST 525**Grade Mode:** Letter Grading**PS 426 - Social Justice & Leadership****Credits:** 1-4

An exploration of social justice through personal and institutional lenses to analyze power and privilege, discrimination and prejudice, inclusion and equity through the intersections of multiple social identities to develop student leaders who will promote an equitable and inclusive environment and serve as social change agents in the college and community.

**Equivalent(s):** UMST 526**Grade Mode:** Letter Grading**PS 430 - The Mindful Leader****Credits:** 2

Research has shown that mindfulness and emotional intelligence positively impact leadership, job performance and satisfaction, and work-life balance. This course will introduce students to mindfulness and emotional intelligence through research, discussion, and personal experience. Students will explore how to lead mindfully and develop their emotional intelligence to better manage personal and professional stress and support a culture of vulnerability, non-judgment, and being in the present moment. This course is open to all undergraduate students. Credit cannot be earned if taken UMST 599: The Mindful Leader.

**Grade Mode:** Letter Grading**PS 500 - Wicked Problems: Puzzles in Public Policy****Credits:** 4

Meaningful change in the US is difficult under the best of circumstances, and it's almost never the best of circumstances. As a result, the richer your understanding of the complex and often irrational US policy-making system, the better the chance that you will be able to understand why certain policies are made (or not made), why they take the form that they do, and how to alter them.

**Attributes:** Social Science (Discovery); Writing Intensive Course**Mutual Exclusion:** No credit for students who have taken POLT 500.**Grade Mode:** Letter Grading**PS 501 - Social and Political-Economic Theory****Credits:** 4

Classics of sociological and political economic theory, as well as contemporary thinking in conservative, classical liberal, modern liberal, and radical political economy. Emphasis on the historical context in which these ideas emerge, and the links among them. Readings and discussions include such thinkers as Comte, Spencer, Weber, Durkheim, Locke, Marx, Smith, Riccardo, J.S. Mill, Shumpeter, Keynes, Hayek.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**PS #502W - Political Psychology****Credits:** 4

Political opinion, identity, and belief-formation and reinforcement. The roles of cognition and emotion in how political identities, opinions and beliefs form, change and resist change. The implications of idea-framing in the acceptance and rejection of political concepts and ideologies. The role of social contexts and the media in creating conceptual boundaries in contemporary politics.

**Attributes:** Social Science (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PS 506 - Civil Society and Public Policy****Credits:** 4

Explores how grassroots advocacy organizations and social movements mobilize human and material resources in order to shape public policy and what tactics and organizational and communication strategies lead to success. Provides students with hand-on learning through service learning project at a local organization. Policy areas may include immigration, environmental conservation, women's issues and more.

**Grade Mode:** Letter Grading**PS 507 - Justice, Law and Politics****Credits:** 4

This course examines the relationships among law, politics, and social structures and how much relationships shape our conceptions of justice. We explore philosophical and historical origins of US law and such concepts as due process and sovereignty. We examine the foundations and economic, environmental, and sociological underpinnings of contemporary legal and political issues.

**Attributes:** Social Science (Discovery)**Grade Mode:** Letter Grading**PS #508 - Supreme Court in US Society****Credits:** 4

This course examines Supreme Court legal holdings from the creation of the American Republic to the present, with attention to the social and historical contexts in which holdings have been made. We examine Constitutional issues, the process by which the Court examines such issues, the ways in which political and social context has framed and influenced Court decisions, as well as how the Court has influenced politics and the broader society.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** POLT 508**Grade Mode:** Letter Grading

**PS 509 - Political and Social Change in Developing Countries****Credits:** 4

Overview of the pressing social, political, and economic issues in the developing world. Analysis includes: political development, including different forms of authoritarianism and democracy; international political economy and models of macro-economic development; international and national aid programs aimed at reducing poverty. Case studies include China, India, Iraq and more.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** POLT 553**Grade Mode:** Letter Grading**PS 510 - Politics of Food****Credits:** 4

This course examines the politics of how food is produced, marketed and distributed in the United States, with attention to how the American food system has changed since World War II. The ethics and nutritional and public health implications of current agricultural policies and practices are looked at carefully, as are the environmental impacts of current practices. The impact on international food prices and markets and world hunger are also examined.

**Attributes:** Environment,TechSociety(Disc)**Grade Mode:** Letter Grading**PS 511 - Women and War****Credits:** 4

Explores impact of war on women as both victims (i.e. refugees, rape victims) and participants (i.e. warriors). Covers issues such as women in combat as soldiers and terrorists, women's rights, sexual violence and rape during warfare, women's roles during peace-building etc. Case studies include Bosnia, Liberia, Afghanistan, USA, Colombia, and more.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**PS #513 - Politics of Red Tape: Bureaucracy & Policy****Credits:** 4

Bureaucrat, someone is reported to have once said, is the only word in the English language that can be hissed even though it has no "s." The labyrinthine workings of government itself—the bureaucracy—are a seemingly constant source of fear, anger, frustration and indignation. Why does the public sector seem to generate such antipathy? We will explore this question, and examine how administrative agencies can be effectively and democratically managed. No credit if taken POLT 509.

**Grade Mode:** Letter Grading**PS 515 - New Hampshire Politics in Action****Credits:** 4

A hands-on course on New Hampshire politics and policymaking, in which students will identify a Bill currently active in the NH General Court and develop and execute a step-by-step plan for helping get it enacted or defeated. Periodic travel to the State Capitol in Concord will be required.

**Attributes:** Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**PS 520 - Globalization: Politics, Economics and Culture****Credits:** 4

Globalization is a complex web of interwoven processes that affect virtually all facets of our daily lives, from pop culture to economics to politics and everything in between. But what exactly is globalization, anyway? And does increased interconnectedness and interdependence do more harm than good? What are the effects of globalization on our society and on others around the world? How can we solve problems, such as climate change, that transcend national boundaries? This course covers different dimensions of globalization, exploring everything from free trade and global supply chains in business to the global hip-hop phenomenon to the problem of international terrorism, and many other issues.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**PS 595 - Research for Political and Policy Action****Credits:** 4

This course offers an overview of how the social sciences—political science especially—decide which questions to ask and how to design the research projects that will help them develop answers to those questions. As we explore these methods of inquiry and analysis, students undertake their own multi-methods research project to better understand something that interests or puzzles them while experiencing first hand the challenges inherent in sound research.

**Attributes:** Inquiry (Discovery); Writing Intensive Course**Mutual Exclusion:** No credit for students who have taken POLT 595.**Grade Mode:** Letter Grading**PS 599 - Peer Educator Development****Credits:** 1 or 4

Preparing students to be leaders on their campus and in their community. Upon completion, students will be eligible to take the BACCHUS Certified Peer Educator (CPE) exam to become a nationally-certified peer educator. No credit for students who have taken UMST 599 - Peer Educator Development.

**Grade Mode:** Letter Grading**PS 651 - Selected Topics: Public Service****Credits:** 4

Interdisciplinary treatment of selected topics in politics and society. Topics may include democracy, empire and war, gender roles in electoral process, the sociology and psychology of terrorism, the political economy of hunger and poverty, the social origins of dictatorship and democracy, and others. Topic: Empire, Democracy, and War is Writing intensive.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**PS #695 - Public Service Independent Study****Credits:** 1-4

Independent study on specific topics in Politics and Society. Project must be approved by the project supervisor Politics and Society Program.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**PS 701 - Senior Seminar/Internship in Public Service****Credits:** 4

Students undertake internships or other approved field projects with organizations such as political campaigns, media organizations, government offices, business or community groups. The seminar component enables students to share and analyze these experiences, employing readings, discussions, collective behavior games, and speakers.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading

**PS 731 - Community Leadership - Capstone****Credits:** 4

Culminating experience for the Community Leadership Minor, but open to other students with instructor's permission. Working alone or in groups, students will design and execute a project of benefit to a community partner.

**Equivalent(s):** UMST 531, UMST 701**Grade Mode:** Letter Grading**PS 750 - Poverty & Inequality Past and Present****Credits:** 4

This course will help students develop the knowledge and tools, using the best available data and research from across disciplines, to describe the scale and scope of need in the US. It will also help you develop understanding of the causes of poverty, inequality, and homelessness, and the consequences of them too – not just upon individuals and families, but ultimately upon entire neighborhoods, communities, and the nation as a whole.

**Attributes:** Writing Intensive Course**Mutual Exclusion:** No credit for students who have taken POLT 750.**Grade Mode:** Letter Grading

## Portuguese (PORT)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PORT #401 - Elementary Portuguese I****Credits:** 4

Conducted in Portuguese, this immersive introduction to Portuguese and the cultures of the Portuguese-speaking world (Brazil, Lusophone Africa, and Portugal) is intended for students without previous exposure to the language. Focuses on conversational and cultural competence while presenting fundamentals of grammar. Students who have taken Portuguese in secondary school must contact the program regarding placement. Students possessing advanced proficiency in Spanish or another Romance language may seek instructor permission to enroll directly in PORT #402. PORT #401 and PORT #402 jointly satisfy the foreign language requirement for the Bachelor of Arts degree.

**Grade Mode:** Letter Grading**PORT #402 - Elementary Portuguese II****Credits:** 4

Conducted in Portuguese, this course introduces Portuguese and the cultures of the Portuguese-speaking world. Focuses on conversational and cultural competence while presenting fundamentals of grammar. Students with prior exposure to Portuguese must contact the program regarding placement. Students possessing advanced proficiency in Spanish or another Romance language may directly enroll in PORT #402 with instructor permission. PORT #401 and PORT #402 jointly satisfy the foreign language requirement.

**Attributes:** Foreign Language Requirement**Prerequisite(s):** PORT #401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PORT #503 - Intermediate Portuguese I****Credits:** 4

Conducted in Portuguese, this course emphasizes development of reading, writing, speaking, and listening skills, essential grammar, and continued exploration of Portuguese-speaking cultures. Students who have taken Portuguese in secondary school are encouraged to contact the program regarding placement. Satisfies the foreign language requirement. Counts as an elective for the major in Spanish.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**PORT #795 - Independent Study in Portuguese****Credits:** 1-4

Guided individual study in language, literature, and culture from the Portuguese-speaking world. Topics selected by instructor and student in conference. Barring duplication of content, may be repeated.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Professional and Technical Communication (PTC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PTC 500 - Business Communication****Credits:** 4

This course focuses on writing skills used in the business world. Frequent writing assignments include letters, emails, reports and resumes. The drafting, feedback and revision method is used. Required for the BUS degree and should be taken within the first 2 semesters. No credit if ENGL 595 "Literary Topics: Business Communications" taken.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ENGL 401 with a minimum grade of D- or ENGL 401A with a minimum grade of D-.**Grade Mode:** Letter Grading

## Psychology (PSY) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PSY 410 - Introduction to Psychology****Credits:** 4

This survey course provides an introduction to the science of psychology. It examines many of the major areas of applied and experimental psychology. A selection of topics from the following specialty areas are covered: History of Psychology, Research Methods, Biological Psychology, Cognition, Learning, Memory, Human Development, Stress, Emotion, Health Psychology, Personality Theories, Psychopathology, and Social Psychology. Students will apply knowledge of these topics to interpret personal experiences, current events, societal issues, and practical problems.

**Attributes:** HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)**Equivalent(s):** PSY 501G**Grade Mode:** Letter Grading

**PSY 470 - Child Development****Credits:** 4

This course focuses on the development of children from birth to early adolescence. It includes the major developmental theories and perspectives as well as an overview of the research methodology used in the field. Through reflective writing, current research in the areas of physical, cognitive, and social and emotional development is explored in the context of the child's environment.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Equivalent(s):** PSY 508G**Grade Mode:** Letter Grading**PSY 480 - Infant and Toddler Development****Credits:** 4

This course focuses on major theoretical perspectives of child development with particular attention to infant and toddler development. Topics include the physical, social, emotional, and cognitive milestones of the growing child along with factors that contribute to optimal development. There is an emphasis on the importance of creating high quality, safe, and supportive environments as well as on attachment and the role of communication in the development of trust and autonomy. Students observe children to develop strategies for creating and maintaining developmentally appropriate environments. Prior completion of PSY 525 or PSY 470 recommended.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Equivalent(s):** PSY 510G**Grade Mode:** Letter Grading**PSY 525 - Human Development****Credits:** 4

This course focuses on the development of the individual from conception to death. Major developmental theories, milestones, processes, and influences are covered. Research findings about these topics are examined. Growth and development are viewed as products of interacting biological, psychological, and social factors. The risks and opportunities in the developing person's social environment, as well as the application of theories and research findings, are emphasized.

**Attributes:** HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)**Equivalent(s):** PSY 509G**Grade Mode:** Letter Grading**PSY 530 - Social Psychology****Credits:** 4

Social Psychology is the scientific study of how individuals, groups, organizations, and culture influence and are influenced by their social environment. This course provides an overview of classic and contemporary work in this field and explores topics such as aggression, attitude formation and change, social thinking, individual and group influence, prejudice, friendships and romantic relationships, leadership, social influence, altruism, and/or conformity.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Equivalent(s):** PSY 502G, PSY 608G**Grade Mode:** Letter Grading**PSY 565 - Core Principles of Addiction****Credits:** 4

This course introduces students to the basic issues discussed by addiction support workers, including the Twelve Core Functions of the alcohol and other drug (AOD) counselor. Students will also have an opportunity to explore the possible professional certifications (e.g., Certified Recovery Support Worker (CRSW), Licensed Alcohol and Drug Counselor (LADC), etc.) within this career. A wide array of topics related to addiction may be discussed in this beginning-level course. Topics may include the economic, political, and/or cultural consequences of addiction and potential consequences of addiction on the individual's relationships, mental health, and physical health.

**Equivalent(s):** PSY 515G**Grade Mode:** Letter Grading**PSY 602 - Theories of Personality****Credits:** 4

This course examines specific theories of personality for the purpose of explaining normal and abnormal development and behavior. Psychoanalytic, trait, humanistic, existential, cognitive, behavioral, and social learning theories, among others, are reviewed and critiqued based on research evidence. Each theory or theoretical perspective is presented in terms of historical context, basic assumptions, and hypothetical constructs. Students explore behaviors and motivations from the perspective of different personality theories. The application of personality theories in helping-profession contexts is introduced.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.**Equivalent(s):** PSY 602G**Grade Mode:** Letter Grading**PSY 603 - Crisis Intervention****Credits:** 4

This course focuses on crisis theory, methods of crisis intervention, and specific crises that occur with individuals and families such as suicide, unemployment, natural disasters, illness, divorce, and death. Students are expected throughout the course to apply their exploration of theory to their work and life experiences.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.**Equivalent(s):** PSY 603G**Grade Mode:** Letter Grading

**PSY 626 - Educational Psychology****Credits:** 4

This course focuses on the study of teaching and learning, including several theoretical perspectives specific to human and cognitive development. Course topics include motivation, critical thinking, student assessment and achievement, and implications of approaches to each. The course critically examines the relationship between research and education, including the contributions and limitations of measurement in instructional settings and the interplay with educational policy.

**Attributes:** HumanBehavSocial Sys (Gen Ed)

**Prerequisite(s):** (IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-) and (EDC 500 with a minimum grade of D- or EDU 510G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D-).

**Equivalent(s):** PSY 606G**Grade Mode:** Letter Grading**PSY 630 - Psychology of Adulthood****Credits:** 4

This course is a life-span developmental approach to adulthood in contemporary American society that includes the major theoretical perspectives regarding developmental transitions and age-related tasks. The following topics are included: 1) methodological issues related to the study of development, 2) patterns of stability and change across adulthood with regard to processes such as biological functioning, sensation and perception, cognition, personality, identity, gender and social roles, relationships, career, and mental health, and 3) death and dying as the final stage of life. Students can consider their own development in light of this content.

**Attributes:** HumanBehavSocial Sys (Gen Ed)

**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.

**Equivalent(s):** PSY 615G**Grade Mode:** Letter Grading**PSY 646 - Psychology of Occupational Stress****Credits:** 4

This course focuses on occupational stress research, including the identification of organizational and psychosocial sources of stress. It defines workplace stress and eustress and explores factors including work environments, stress perception, diversity stress, personality, and interpersonal relationships with managers, staff, and co-workers. This course evaluates measurement tools, prevention and remediation strategies for individuals and organizations, and other approaches that create healthy workplaces. Each area is examined from the individual worker's perspective and that of management. Learners apply the major theoretical principles and processes to their own experiences as employees, employers, or military personnel.

**Attributes:** HumanBehavSocial Sys (Gen Ed)

**Prerequisite(s):** CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D- or PSY 502G with a minimum grade of D- or PSY 530 with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.

**Equivalent(s):** PSY 616G**Grade Mode:** Letter Grading**PSY 654 - Counseling Theories****Credits:** 4

This course provides an overview of counseling theories developed by major theorists. The course examines how both the historical context and the scientific knowledge of the time helped to shape the theories developed during the past century. Research findings evaluating the effectiveness of therapeutic modalities are reviewed. Important elements of the counseling process, which include assessments, confidentiality, the therapeutic alliance, and the impact of funding sources on decision making, are examined.

**Attributes:** HumanBehavSocial Sys (Gen Ed)

**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.

**Equivalent(s):** PSY 604G**Grade Mode:** Letter Grading**PSY 665 - Principles of Assessment****Credits:** 4

This course is a survey of assessment issues and methods for students pursuing studies in education-related fields or the behavioral sciences. Topics include differences between formal and informal assessment and evaluation, reliability and validity, differences between norm-referenced and criterion-referenced tests, development of assessment and evaluation instruments and plans, methods for observing and recording behavior, and how to use assessment information to develop and/or modify programs and environments. NOTE: MTH 402 or MTH 504 is recommended.

**Attributes:** HumanBehavSocial Sys (Gen Ed)

**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.

**Equivalent(s):** PSY 605G**Grade Mode:** Letter Grading**PSY 675 - Foundations of Addictions Counseling****Credits:** 4

This course provides students with an opportunity to study the important theories, strategies, and skills of addictions-related counseling. Topics are derived from the Twelve Core Functions of Addiction Counselors and will include concepts like screening, referral, intake, assessment, crisis management, treatment, recovery, support, and/or client education.

**Prerequisite(s):** PSY 565 with a minimum grade of D- or PSY 515G with a minimum grade of D-.

**Equivalent(s):** PSY 625G**Grade Mode:** Letter Grading**PSY 685 - Principles of Psychopathology****Credits:** 4

The focus of this course is on the societal definitions and impact of abnormal and deviant behavior, and what is considered psychopathology. It examines both how mental illness is recognized and regarded, and how its treatment may vary, in different societies and cultures. It deals with major disorders and personality syndromes considered to be abnormal or deviant and examines the various etiologic factors known or believed to play a role in each of the disorders, considering them from varying perspectives, such as psychoanalytic, cognitive behavioral, biological, and humanistic.

**Attributes:** HumanBehavSocial Sys (Gen Ed)

**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.

**Equivalent(s):** PSY 617G**Grade Mode:** Letter Grading

**PSY 710 - The Biology of Addiction****Credits:** 4

This course introduces the biological mechanisms of substance use and misuse (e.g., nervous system activity, tolerance, withdrawal, and metabolism) and the resulting behavioral and health consequences. Students will also examine the classification of various substances, epidemiological data and trends, the diagnoses and diagnostic criteria of substance use disorders, genetic and biological influences on addiction, and biological theories of addiction. Other potential topics include behavioral addictions (e.g., gambling, eating, video games, or sex) and the effects of drugs on individuals, families, and society.

**Attributes:** Phys Natural World (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.**Equivalent(s):** PSY 610G**Grade Mode:** Letter Grading**PSY 725 - Cognitive Psychology****Credits:** 4

This course introduces some of the major topics related to human cognition, including perception, attention, memory, knowledge acquisition, language, problem solving, reasoning, and decision making. Students will explore the historical context, current theories, neurobiological underpinnings, research methods, and empirical research relevant to the field of cognitive psychology. Comprehension will be enhanced through the application of cognitive principles to understand everyday behavior and solve practical problems.

**Attributes:** HumanBehavSocial Sys (Gen Ed); Writing Intensive Course**Prerequisite(s):** IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-.**Equivalent(s):** PSY 609G**Grade Mode:** Letter Grading**PSY 740 - Biopsychology****Credits:** 4

This course addresses the relationship between the brain and behavior to provide an overview of the biological basis of thoughts, actions, and feelings. Topics may include basic functional neuroanatomy and physiology, sleeping and dreaming, emotion, biopsychological research methods, learning and memory, development of the brain, sensation and perception, motor control, language and lateralization, substance use and neuropharmacology, emotion, and behavioral health problems (for example, stress-related disorders, anxiety, depression, or schizophrenia) and their pharmacological treatment. Comprehension will be enhanced through the application of biopsychological principles to understand everyday behavior and solve practical problems. NOTE: SCI 490 recommended.

**Attributes:** Phys Natural World (Gen Ed); Writing Intensive Course**Prerequisite(s):** IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-.**Equivalent(s):** PSY 601G, SCI 600G**Grade Mode:** Letter Grading**PSY 795 - Integrative Capstone: Internship in Applied Psychology****Credits:** 4

This capstone course is a field-based internship designed to develop and hone the practical application skills of an Applied Psychology major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where psychology-related knowledge and skills are applied. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).**Equivalent(s):** BEHS 651G**Grade Mode:** Letter Grading**PSY 797 - Integrative Capstone: Project in Applied Psychology****Credits:** 4

This capstone course in applied psychology requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students will complete an independent project that requires conducting scholarly research on a chosen topic, critically evaluating the relevant literature, and synthesizing peer-reviewed sources into a scientific paper that conforms to APA formatting standards. Students will become familiar with the APA ethical standards regarding human research, and students choosing to conduct an empirical study collecting data from human participants will be required to undergo a review and approval process by the Institutional Review Board (IRB). Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).**Equivalent(s):** BEHS 650G**Grade Mode:** Letter Grading

## Psychology (PSYC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PSYC 400 - Psychology Freshmen Advising Seminar****Credits:** 1

This course is an introduction to our program, the various areas of Psychology and faculty research, some employment opportunities after graduation, academic standards, and management skills essential for success as a declared psychology major in the University. The goal of this course is to help students make a positive academic transition into UNH. Students will learn about the resources UNH has to offer to support their success and how to navigate UNH academic planning tools. This course will introduce students to the different areas of psychology and expectations for a psychology major. This course is required for all first-year declared Psychology majors.

**Grade Mode:** Credit/Fail Grading**PSYC 401 - Introduction to Psychology****Credits:** 4

Psychology as a behavioral science; its theoretical and applied aspects. Includes research methods, behavioral neuroscience, sensation and perception, cognition, learning, development, personality, psychopathology, and social psychology. To experience actively the nature of psychological research students have an opportunity to participate in a variety of studies as part of a laboratory experience.

**Attributes:** Social Science (Discovery)**Equivalent(s):** PSYC 401H**Grade Mode:** Letter Grading**PSYC 402 - Statistics in Psychology****Credits:** 4

Design, statistical analysis, and decision making in psychological research. Probability, hypothesis-testing, and confidence intervals. Conceptualization, computation, interpretation, and typical applications for exploratory data analysis (including measures of central tendency, variability), t-tests, correlations, bivariate regression, one-way analysis of variance, and chi square. Introduction to computer methods of computation.

**Attributes:** Quantitative Reasoning(Disc)**Equivalent(s):** PSYC 402H

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, MATH 439, MATH 539, MATH 644, SOC 402, SOC #402H, SOC 502, SOC 502H.

**Grade Mode:** Letter Grading**PSYC 405 - Introduction to Happiness****Credits:** 4

Introduction to Happiness is a multidisciplinary course grounded in the social and behavioral science. This class will introduce you to the science and philosophies of human happiness, explore the elements of human health and well being. While heavily grounded in psychology, faculty from a variety of other disciplines including sociology, philosophy, human development and occupational therapy will discuss their research and scholarship that addresses happiness.

**Grade Mode:** Letter Grading**PSYC 440A - Honors/Understanding the Human Brain****Credits:** 4

First, we will examine the evolution of the brains of hominids to understand what are characteristics are uniquely human and what are conserved across species. We then explore selected topics in neuroscience that alter neural functioning, for example, the impact of neuro-prosthetics, cognitive enhancement, racial discrimination. Finally, we will discuss the benefit and limitations of using animal models to understand human neural functioning.

**Attributes:** Biological Science(Discovery); Honors course**Grade Mode:** Letter Grading**PSYC 502 - Research Methods in Psychology****Credits:** 4

Research design, including experimental and correlation design; internal versus external validity; measurement; writing a research report; graphic and statistical methods for summarizing data; sampling; and special problems such as experimenter effects, reactivity of measurement, and others. The use of hypothesis testing and data analysis in research.

**Attributes:** Inquiry (Discovery); Writing Intensive Course

**Prerequisite(s):** PSYC 401 with a minimum grade of D- and PSYC 402 with a minimum grade of D-.

**Equivalent(s):** SOC 601, SW 601, SW 601W**Grade Mode:** Letter Grading**PSYC 511 - Sensation and Perception****Credits:** 4

The study of how humans (and some other animals) sense and perceive their environment. Topics include seeing (vision), hearing (audition), tasting (gustation), smelling (olfaction), feeling (somatosensation), and the variety of state-of-the-art methods used by psychologists to study these senses. Illusions and other sensory and perceptual phenomena are treated.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 512 - Psychology of Primates****Credits:** 4

A comparative analysis of primate cognitive, linguistic, and social processes. The origins of human behavior are explored from the perspectives of history, evolution, and contemporary work in neuropsychology, linguistic, sociobiology, and related fields.

**Grade Mode:** Letter Grading**PSYC 513 - Cognitive Psychology****Credits:** 4

The study of human cognition, its basic concepts, methods, and major findings. Human knowledge acquisition and use. Attention, perception, memory, imagery, language, reading, problem solving, and decision making.

**Grade Mode:** Letter Grading**PSYC 521 - Behavior Analysis****Credits:** 4

Principles derived from the experimental study of human and animal learning and their theoretical integration. Respondent and operant conditioning. Reinforcement and punishment, stimulus control, choice and preference, conditioned reinforcement.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 522 - Behaviorism****Credits:** 4

Introduction to behaviorism as a philosophy of science. Some historical background, but concentration on modern behaviorism as exemplified in the works of B. F. Skinner. No credit for students who have completed PSYC 722. Offered only in Manchester.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading

**PSYC 531 - Psychobiology****Credits:** 4

Introduces the behavioral neurosciences. Surveys research conducted by psychologists to learn about the biological basis of behavior: development, sensation, perception, movement, sleep, feeding, drinking, hormones, reproduction, stress, emotions, emotional disorders, learning, and memory.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 552 - Social Psychology****Credits:** 4

Behavior of individuals as affected by other individuals, groups, and society. Topics include attitude change and social influence, conformity, social interaction, interpersonal attraction, impression formation, research.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 553 - Personality****Credits:** 4

Major theories, methods of assessment, and research.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 561 - Abnormal Behavior****Credits:** 4

Causes, diagnosis, and treatment of abnormal behavior. Implications of varying theoretical viewpoints.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Equivalent(s):** PSYC 761**Grade Mode:** Letter Grading**PSYC 571 - Pioneers of Psychology****Credits:** 4

An introduction to the development and evolution of psychology as an academic discipline and applied science. The lives and works of innovators in psychology are placed in socio-political context.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** PSYC 571H**Grade Mode:** Letter Grading**PSYC 581 - Child Development****Credits:** 4

The developing child in the context of his/her society. Current problems in, and influences on, development of the child. Personality and cognitive development; exceptional children.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 595 - Applications of Psychology****Credits:** 1-4

Arranged by the student or offered by psychology faculty for supervised field, academic, or research experience related to psychology. A) Field experience: supervised internship at a business or human services setting, B) Academic experience: specialized classroom experience or supervised teaching assistance, C) Research experience: supervised research experience or laboratory work. Psychology instructors sponsor academic credit for appropriate experience combined with a relevant academic component. Requires a signed learning agreement prior to registration.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**PSYC 705 - Tests and Measurement****Credits:** 4

Testing intelligence, creativity, achievement, interests, and personality. Test construction; evaluation; relation to psychological theory, research, and practice.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.**Equivalent(s):** PSYC 705H**Grade Mode:** Letter Grading**PSYC 710 - Visual Perception****Credits:** 4

The study of how humans (and some other animals) see. Topics include color vision, depth perception, form and pattern vision, visual learning and development, eye movements, diseases of the visual system, illusions, and other visual phenomena.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 511 with a minimum grade of D- or PSYC 531 with a minimum grade of D-)) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).

**Grade Mode:** Letter Grading**PSYC 712 - Psychology of Language****Credits:** 4

Theories of language structure, functions of human language, meaning, relationship of language to other mental processes, language acquisition, indices of language development, speech perception, reading.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 512 with a minimum grade of D- or PSYC 513 with a minimum grade of D-).

**Equivalent(s):** PSYC 712W**Grade Mode:** Letter Grading**PSYC 712W - Psychology of Language****Credits:** 4

Theories of language structure, functions of human language, meaning, relationship of language to other mental processes, language acquisition, indices of language development, speech perception, reading.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 512 with a minimum grade of D- or PSYC 513 with a minimum grade of D-).

**Equivalent(s):** PSYC 712**Grade Mode:** Letter Grading**Special Fee:** Yes**PSYC 713 - Psychology of Consciousness****Credits:** 4

Explores questions of consciousness What is it? How does it develop? Are infants and animals conscious? Why did consciousness evolve? Includes a review of historical background, including the ideas of Jaynes, Piaget, James, Freud, and others. Contemporary topics may include the role of language and other representational systems, blindsight, subliminal perception, priming and other implicit cognitive phenomena, hypnosis, confabulation and attribution, dreaming, multiple personality and conceptions of self and free will, from simultaneous perspectives of phenomenology, behavior, and neuroscience. Specific topics governed by class interests.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 513 with a minimum grade of D-.

**Equivalent(s):** PSYC 713H**Grade Mode:** Letter Grading

**PSYC 713W - Psychology of Consciousness****Credits:** 4

Explores questions of consciousness What is it? How does it develop? Are infants and animals conscious? Why did consciousness evolve? Includes a review of historical background, including the ideas of Jaynes, Paiget, James, Freud, and others. Contemporary topics may include the role of language and other representational systems, blindsight, subliminal perception, priming and other implicit cognitive phenomena, hypnosis, confabulation and attribution, dreaming, multiple personality and conceptions of self and free will, from simultaneous perspectives of phenomenology, behavior, and neuroscience. Specific topics governed by class interests.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 513 with a minimum grade of D-.**Equivalent(s):** PSYC 713, PSYC 713H**Grade Mode:** Letter Grading**PSYC 716 - Cognitive Neuroscience****Credits:** 4

Cognitive Neuroscience is a rapidly expanding scientific discipline that probes classical questions of human cognitive psychology via a broad array of cutting-edge methodological approaches, which include but are not limited to brain imaging (e.g., functional MRI and electroencephalography), lesion studies, single-cell recording, and examinations of brain injuries and other neurological disorders. This course will survey the results of these approaches, which have thus far generated fundamental insights about how the brain supports motor control, attention, memory, emotion processing, social cognition, language, executive function and decision making.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 513 with a minimum grade of D- or PSYC 531 with a minimum grade of D-).**Grade Mode:** Letter Grading**PSYC 720 - Animal Cognition****Credits:** 4

Do animals use language or have a culture? Can birds count? Do animals use tools and understand how they function? How do ants navigate their environment to find food and then return to their nest? How animals perceive, attend to, process, store, and represent information from their environment. Research on animal learning and behavior as a framework for investigating cognitive processes in animal learning. Quantitative versus qualitative nature of differences between people and non-human animals. Multidisciplinary approach including the fields of anthropology, physiology, philosophy and biology.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (PSYC 401 with a minimum grade of D- and PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 513 with a minimum grade of D- or PSYC 521 with a minimum grade of D-)) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).**Grade Mode:** Letter Grading**PSYC 722 - Behaviorism, Culture, and Contemporary Society****Credits:** 4

Introduces behaviorism as a philosophy of science. Concentration on modern behaviorism as exemplified in the works of B.F. Skinner. Implications of behaviorism for the development and evolution of cultures. Consideration of societal issues (for example pollution, overpopulation, conflict, drug abuse) from a behavioral framework. No credit for students who have completed PSYC 522.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 521 with a minimum grade of D-.**Equivalent(s):** PSYC 522**Grade Mode:** Letter Grading**PSYC 731 - Brain and Behavior****Credits:** 4

Neuropsychology, the study of brain/behavior relationships including clinical topics related to the analysis of neurological diseases in humans and more basic experimental topics related to integrative functions of the brain. The main focus is on cerebral cortex and functions related to perception, movement, attention, memory, and language.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).**Grade Mode:** Letter Grading**Special Fee:** Yes**PSYC 733 - Drugs and Behavior****Credits:** 4

Introduces the principles of psychopharmacology and the effects of psychoactive substances on behavior. Focuses on the therapeutic and recreational use of drugs and the mechanisms of drug action, that is how the drugs affect the brain. Neuropsychiatric function and dysfunction are discussed as they relate to the use or abuse of particular drugs.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).**Grade Mode:** Letter Grading**PSYC 735 - Neurobiology of Mood Disorders****Credits:** 4

Neurobiological and neurochemical substrates underlying various psychopathologies, using both animal models and human data. Study of disorders from the field of biological psychiatry including aggression, anxiety, panic disorder, obsessive-compulsive disorder, unipolar depression, bipolar affective disorder, schizophrenia, and post-traumatic stress disorder. The effectiveness of current behavioral and pharmacological therapy.

**Attributes:** Writing Intensive Course**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).**Grade Mode:** Letter Grading

**PSYC 736 - Attention Disorders****Credits:** 4

Attention encompasses several cognitive functions including, but not limited to, the ability to select relevant from irrelevant stimuli, to maintain goal-directed behavior over time, and to process multiple streams of information at once. This course explores how the normal brain "attends", and the consequences of dysfunction in neurochemical systems hypothesized to mediate these abilities including dementia, attention-deficit hyperactivity disorder (ADHD) and schizophrenia.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).

**Grade Mode:** Letter Grading**PSYC 737 - Behavioral Medicine****Credits:** 4

Behavioral, physiological, and neurochemical alterations, associated with health-promoting behaviors (low-fat diet, exercise) as well as health-impairing behaviors (eating disorders, smoking, excessive alcohol consumption). Topics include stress, coping, type-A behavior, hypertension, and the interface of brain, behavior, and immunity (psychoimmunology, cancer, AIDS). Treatment/therapy are discussed from behavioral and pharmacological perspectives.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).

**Grade Mode:** Letter Grading**PSYC 741W - Special Topics****Credits:** 4

New or specialized courses are presented under this listing. Advanced material not normally covered in a regular course in which instructor has specialized knowledge through research and study. May be repeated for different topics.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** PSYC 741, PSYC 741A, PSYC 741B, PSYC 741C, PSYC 741D**Grade Mode:** Letter Grading**PSYC 755 - Psychology and Law****Credits:** 4

Applications of psychology to the study of the law, including theories of legal and moral judgment, participants in the legal system (judges, police, victims, witnesses), the trial process, and plea bargaining. Special focus on the death penalty, the insanity plea, and child witnesses.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.

**Equivalent(s):** PSYC 755H**Grade Mode:** Letter Grading**PSYC 756 - Psychology of Crime and Justice****Credits:** 4

Examines the psychological aspects of crime and justice, including the following origins and causes of crime: developmental, biological, biopsychological, learning, and mental disorder. Focuses on issues related to homicide, profiling, and serial killers. Examines aggression and violence as well as causes and consequences of criminal homicides. Discussion of the future of crime.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.

**Grade Mode:** Letter Grading**PSYC 757 - Psychology of Happiness****Credits:** 4

Overview of empirical research in Positive Psychology. We will discuss factors that may influence happiness and subjective well-being; and effects that well-being may have on other life outcomes such as physical health. Learning involves reading and writing about evidence from research and also experimental exercises (such as doing an act of kindness).

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.

**Grade Mode:** Letter Grading**PSYC 758 - Health Psychology****Credits:** 4

Survey of current topics in health psychology, including social stress and the etiology of disease, Type A and other personality factors related to health, modification of risk factors, the practitioner-patient relationship, chronic pain, and the emotional impact of life-threatening illness.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.

**Grade Mode:** Letter Grading**PSYC 762 - Counseling****Credits:** 4

Theories of counseling, ethical considerations, professional and paraprofessional activities in a variety of work settings.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 553 with a minimum grade of D- or PSYC 561 with a minimum grade of D-).

**Grade Mode:** Letter Grading**PSYC 780 - Prenatal Development and Infancy****Credits:** 4

Psychological development of infants from conception through second year of life. Factors and potential influences on reproductive health and prenatal physical and behavioral development. Transition to parenthood, infant temperament and parent-infant relationships. Developmental patterns of specific capabilities.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 581 with a minimum grade of D- or HDFS 525 with a minimum grade of D-).

**Grade Mode:** Letter Grading

**PSYC 783 - Cognitive Development****Credits:** 4

Theories of cognitive development. Comparison among major theorists on how knowledge, thought, and development are defined and studied. Current research, including cognitive development; memory; perceptual processes; language.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 581 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 785 - Social Development****Credits:** 4

Examines development of social interactions. Emphasizes important social relationships for the child (e.g., attachment to parents and friendships with peers). Considers other topics of relevance to social developmentalists, such as temperament, aggression, social cognition, and sex roles.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 581 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 791 - Special Topics****Credits:** 4

New or specialized courses are presented under this listing. Advanced material not normally covered in a regular course in which instructor has specialized knowledge through research and study. May be repeated for different topics.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.**Repeat Rule:** May be repeated up to 4 times.**Equivalent(s):** PSYC 791W**Grade Mode:** Letter Grading**Special Fee:** Yes**PSYC 791W - Special Topics****Credits:** 4

New or specialized courses are presented under this listing. Advanced material not normally covered in a regular course offering in which instructor has specialized knowledge through research and study. May be repeated for different topics.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.**Repeat Rule:** May be repeated up to 4 times.**Equivalent(s):** PSYC 791**Grade Mode:** Letter Grading**PSYC 793 - Internship****Credits:** 4-8

Supervised practicum in one of several cooperating New Hampshire mental health/rehabilitation facilities. Coursework knowledge applied to meaningful work and team experience. Commitment includes a negotiated number of weekly work hours and weekly seminars. Supervision by institution personnel and the instructor. A maximum of 4 credits may be applied to the Psychology major. Course applications accepted beginning in March for fall term and October for spring term.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 561 with a minimum grade of D- and PSYC 762 (may be taken concurrently) with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 794 - Advanced Internship****Credits:** 1-8

Supervised advanced practicum experience in co-operating New Hampshire mental health/rehabilitation facilities. Expands and builds on experiences and skills acquired in PSYC 793. Commitment includes a negotiated number of hours of work per week and participation in weekly seminars. Supervision done by institution personnel and instructor.

**Prerequisite(s):** PSYC 793 with a minimum grade of D-.**Grade Mode:** Letter Grading**PSYC 795 - Independent Study****Credits:** 1-4

A) Physiological, B) Perception, C) History and Theory, D) Behavioral Analysis, E) Social, F) Cognition, G) Statistics and Methods, H) Experimental, I) Personality, J) Developmental, K) Counseling, L) Psychotherapy, M) Research Apprenticeship, N) Teaching of Psychology, O) Advanced Externship (content area to be determined). Arranged by the student with a psychology faculty sponsor. Learner/sponsor contract required. Minimum time commitment: three hours per credit per week.

**Prerequisite(s):** PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** PSYC 795H, PSYC 795W**Grade Mode:** Letter Grading**PSYC 797 - Senior Honors Tutorial****Credits:** 4

For senior psychology honors students. Students propose honors theses under the supervision of psychology faculty. Theses proposed and begun in this course are completed in PSYC 799. (Typically offered in fall.)

**Attributes:** Honors course**Grade Mode:** Letter Grading**PSYC 798 - Capstone****Credits:** 0

This is a zero credit course to indicate on the transcript that the capstone requirement is fulfilled. PSYC majors only.

**Grade Mode:** Credit/Fail Grading**PSYC 799 - Senior Honors Thesis****Credits:** 4

Under supervision of psychology department faculty members, students complete the honors projects proposed and begun in PSYC 797. The honors project, which should be empirical in nature, culminates in an oral presentation at the end of the semester. (Typically offered in spring).

**Attributes:** Honors course**Prerequisite(s):** PSYC 797 with a minimum grade of D-.**Grade Mode:** Letter Grading

## Public Administration (PA)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PA 700 - Foundations and Theories of Public Administration****Credits:** 4

The foundations and Theories of Public Administration will explore the theoretical foundations of public administration and their practical applications. It will look to the early literature that helped shape the field along with a contemporary perspective of public administration. Students will understand the theoretical foundations of public administration, understand the different roles of the public sector, understand the historical roots of public administration, and understand the applied aspects of public administration.

**Grade Mode:** Letter Grading**PA 709 - Organization and Management in Public and Nonprofit Sectors****Credits:** 4

This course is about management theory and practice. It provides the opportunity to acquire the theoretical knowledge as well as the practical methods necessary to manage organizations in the public and nonprofit sectors. Embedded in this idea of management learning is the proposition that theory and practice of management are closely connected.

**Grade Mode:** Letter Grading**PA 718 - Nonprofit Management****Credits:** 4

Nonprofits play a major role in our lives although we may not be aware of their influence. The nonprofit sector in the United States has grown exponentially over the past twenty-five years, more rapidly than the government and for-profit sectors, making it the fastest growing segment of our economy. This course provides students with a practical hands-on approach to the non-profit sector, its governance and management including finance, fundraising, personnel management, strategic planning, and risk management.

**Grade Mode:** Letter Grading

## Public Administration (PADM) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PADM 500 - Introduction to Public Administration****Credits:** 4

This course introduces concepts of effective leadership for public service programs in the governmental and public sectors. Students will have the opportunity to become acquainted with public administration and policy as fields of study, such as the nature of bureaucracy, public policy, allocation of resources and public budgeting, leadership, supervision, and organization of civil servants.

**Equivalent(s):** MGMT 501G, PADM 500G**Grade Mode:** Letter Grading**PADM 600 - Public Policy Development and Implementation****Credits:** 4

This course is an overview of policy formulation and administration in the context of U.S. federal, state, and local governments. The relationship between politics and administration is explored with reference to the classical policy/administration dichotomy. The content of this course aims to familiarize students with the public policy process, equipping students with analytical frameworks and practical tools to improve their engagement with the process through their work. By the conclusion of this course, students will have the opportunity to develop their knowledge and skills to effectively apply these tools as future elected public officials, public agency managers, policy analysts, and public service providers.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D-.**Equivalent(s):** PADM 600G**Grade Mode:** Letter Grading**PADM 645 - Public Sector Budget and Finance****Credits:** 4

This course examines public budgeting in the context of its institutional, procedural, and political dimensions. Students will have the opportunity to learn about budgeting, accounting, and financial management concepts and techniques necessary for planning, analysis, and decision making in government and public sector organizations. This course also presents an overview of budgetary reforms, budget theories and techniques, and comparative perspectives of federal, state, and local budgeting methods. Further topics may include types of budgets and budget reports; the budgeting process at the local, state, and federal levels; basic expenditure and revenue forecasting and analysis; and communication strategies for financial and budgetary matters.

**Prerequisite(s):** PADM 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or MGMT 501G with a minimum grade of D-.**Equivalent(s):** PADM 610G**Grade Mode:** Letter Grading**PADM 670 - Human Resources in the Public Sector****Credits:** 4

This course will focus on human resources in public sector practices. The history and changing role of public sector human resource strategies will be explored by students to develop an understanding of how individuals from diverse backgrounds, interests, and skill sets can work together and contribute towards an organization's mission. Students will have the opportunity to build capacity to influence people both inside and outside of an organization, optimize the structure and culture of their organization, make effective decisions, resolve conflicts, and drive change for higher organizational performance. Further, students will be given the opportunity to develop and enhance their supervisory and leadership skills so they can manage and lead high-performing, successful organizations.

**Attributes:** Writing Intensive Course**Prerequisite(s):** PADM 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or MGMT 501G with a minimum grade of D-.**Equivalent(s):** PADM 615G**Grade Mode:** Letter Grading

## Public Policy (PPOL)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**PPOL 706 - Fundamentals of Policy Analysis****Credits:** 4

This foundational course in public policy analysis will introduce students to the policymaking process. Students will learn about the connection between research and policy, and develop fundamental skills in research design. Tools and techniques for policy analysis will be explored. The importance of effectively conveying results to stakeholders will be discussed, and students will work in teams to design and present a substantial policy research and analysis project.

**Grade Mode:** Letter Grading**PPOL 712 - Strategies for Policy Impact****Credits:** 4

This course explores how to develop and implement strategies that drive policy change. You will learn how to analyze various approaches to changing policy, consider context for the change (timing, climate for change, opposition) and then identify the most viable option to use to influence policy change. This class is about influencing change versus the mechanics of designing policy. Students will review different influence models, discuss which ones work best in various situations, and identify how influence models connect to campaigns that influence legislative and institutional policy. You will better understand policy change efforts by reviewing examples and learning the central elements of a successful endeavor. Finally, students, in teams, will choose their own adventure and create their own policy change strategy.

**Grade Mode:** Letter Grading**PPOL 722 - Media Strategy and Communication****Credits:** 4

In this course, we will introduce contemporary media strategies and learn how to use them to influence public policy. We will focus on: Recognizing the dynamics of the news cycle and how to identify opportunities in a saturated media landscape; Developing a message and a strategy to convey the message; Writing to advance a message in different media; Verbal skills to deliver a policy message via TED talk, panel or news conference; Nuance and differences when interacting with TV, radio, print, and social media; Introducing and practicing interview skills for TV, video, radio, print, and online media; and Understanding the power of image and authenticity.

**Grade Mode:** Letter Grading**PPOL 797 - Advanced Special Topics****Credits:** 4

Occasional or experimental offerings.

**Grade Mode:** Letter Grading

## Race & Ethnic Studies (RES)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

No courses are currently active in the course inventory for this subject prefix.

## Recreation Management & Policy (RMP)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**RMP 400 - Recreation Management and Policy Continuing Enrollment****Credits:** 0

This course enables BS students to maintain continuous enrollment in RMP as part of their matriculation plan until after their degree is formally awarded. Students registering for RMP 400 will pay a continuous enrollment fee. No credit.

**Repeat Rule:** May be repeated up to 2 times.**Grade Mode:** Not graded**Special Fee:** Yes**RMP 411 - Applied Recreation Risk Management****Credits:** 2

This course prepares students for leadership and management activities in recreational settings. Students will become familiar with professional standards in applied recreation contexts, examine risk management principles, and pursue certifications in areas such as: defensive driving, child protection, wilderness first aid, and CPR. At the end of the course students will be equipped to lead various campus-based and off campus recreational programs.

**Grade Mode:** Letter Grading**RMP 444A - Taking the "Dis" out of Disability****Credits:** 4

In contrast to the traditional view of disability as a defect, students learn how disability provides a unique vantage point on our world and can be perceived as an ordinary part of the twists and turns of life. Examines the history of social responses to disability, with an emphasis on the present day concepts of inclusion and self-determination. Students explore expressions of the disability experience through print and visual media.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**RMP 490 - Recreation & Tourism in Society****Credits:** 4

This course provides an overview of the historical and philosophical framework for the comparison of concepts, theories, and the inter-relationships between factors (social, economic, political, psychological) that influence our recreation and tourism experiences. Students explore how recreation is reflected in arts, literature, history, philosophy, psychology, sociology, economics, and anthropology, and will be introduced to different delivery systems, as well as a variety of relevant professional associations and career opportunities.

**Attributes:** Social Science (Discovery)**Equivalent(s):** RMP 490H**Grade Mode:** Letter Grading**RMP 500 - Therapeutic Recreation Methods in Physical Rehabilitation Settings****Credits:** 1

This course introduces students to a variety of assistive techniques, devices and equipment used in Therapeutic Recreation settings that allow individuals with illnesses and disabilities achieve maximum independence and functional capacity to maintain optimal health and leisure functioning. Students learn and apply skills in anatomical orientation and positioning, universal precautions, assistive technology and adapted equipment for recreation including manual, power, sports, and all-terrain wheelchairs, wheelchair mobility skills, proper body mechanics, transfer and lifting techniques, ambulation assists, and sighted guide techniques.

**Co-requisite:** RMP 503**Prerequisite(s):** RMP 490 with a minimum grade of D- and RMP 501 with a minimum grade of D- and RMP 502 with a minimum grade of D-.**Grade Mode:** Letter Grading

**RMP 501 - Recreation Services for Individuals with Disabilities****Credits:** 4

Presents and discusses issues that concern the delivery of quality leisure services to individuals with disabilities in community settings. Classroom activities provide opportunities for practical experience.

**Grade Mode:** Letter Grading**RMP 502 - Foundations of Therapeutic Recreation****Credits:** 4

History and professional concepts of therapeutic recreation and the roles and functions of the therapeutic recreation specialist.

**Grade Mode:** Letter Grading**RMP 503 - Therapeutic Recreation Rehabilitation Principles & Interventions****Credits:** 4

Introduces the rehabilitation principles and recreational therapy interventions used by therapeutic recreation specialists to improve functioning for people with physical and cognitive impairments. Students learn and apply fundamental processes of clinical reasoning and treatment program planning to improve quality of life. A lab provides students with the opportunity to use a variety of assistive techniques, adaptive devices, and equipment to support individuals and achieve maximum independence and promote a healthy leisure lifestyle.

**Co-requisite:** RMP 500

**Prerequisite(s):** RMP 490 with a minimum grade of D- and RMP 501 with a minimum grade of D- and RMP 502 with a minimum grade of D-.

**Equivalent(s):** RMP 606**Grade Mode:** Letter Grading**Special Fee:** Yes**RMP 504 - Therapeutic Recreation Mental Health Principles and Interventions****Credits:** 4

Introduces mental health principles and recreational therapy interventions to improve functioning for people with emotional, social, and behavioral impairments. Students will learn and apply fundamental processes of clinical reasoning and treatment program planning to improve quality of life for persons with emotional, social, and behavioral impairments. Restricted to RMP majors.

**Grade Mode:** Letter Grading**RMP 505 - Therapeutic Recreation: Aging Services Principles & Interventions****Credits:** 4

This course is designated to introduce the student to the field of therapeutic recreation and its nexus with the older adult population. We will explore the role leisure and recreation, in concert with the recreational therapist, plays in the well-being of older adults. Topics of study will include: Health Promotion and Prevention; Geriatric Syndromes, Chronic Health Conditions; Roles of Recreational Therapist in Geriatrics; Common Illness, Health Settings; and Interventions.

**Grade Mode:** Letter Grading**RMP 511 - Issues of Wilderness and Nature in American Society****Credits:** 4

Provides students with an overview of the evolving relationship between wilderness/nature and American society. Examines the philosophy, ethics, and societal values in American society and its relationship to our natural wilderness. Recent issues are used as case studies in order for students to articulate, defend, and critique the ethical issues presented. Students are responsible for understanding and applying philosophical approaches developed by philosophers, writers, and activists associated with the wilderness, sustainability, biodiversity, hunting, suburban sprawl, environmental activism, endangered species, organic foods, and genetic engineering.

**Attributes:** Humanities(Disc)**Grade Mode:** Letter Grading**RMP 515 - History of Outdoor Pursuits in North America****Credits:** 4

Voluntary pursuits in the outdoors have defined American culture since the early 17th century. Over the past 400 years, activities in outdoor recreation an education have reflected Americans' spiritual aspirations, imperial ambitions, social concerns, and demographic changes. This course will give students the opportunity to learn how Americans' experiences in the outdoors have influenced and been influenced by major historical developments of the 17th, 18th, 19th and 20th, and early 21st centuries. This course is cross-listed with KIN 515.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** KIN 515, OUT 515**Grade Mode:** Letter Grading**RMP 557 - Program and Event Design****Credits:** 4

This course introduces students to a range of approaches to recreation program and event design, and focuses on providing leisure experiences for all populations. Course topics include foundations of programming, program theories, needs assessment techniques, vision, mission, goals, and objectives, processes of group planning, public relations, program promotion, and program evaluation. Students will design and deliver a recreation program using a team approach.

**Prerequisite(s):** RMP 490 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 559 - Marketing the Recreation Experience****Credits:** 4

This course prepares students to apply marketing principles and strategies to recreation programs and events, including procedures for developing marketing plans for recreation and event organizations. Course content includes planning the marketing mix, with a focus on the recreation or event product, price, place, and promotion. The course covers the application of marketing and communication strategies delivered through social and audio-visual media. The culminating project consists of a marketing and communication plan for a recreation/leisure service agency.

**Attributes:** Writing Intensive Course**Prerequisite(s):** RMP 490 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 560 - Recreational Sport Management****Credits:** 4

Explores and examines the theoretical foundations and basic skill methods, and techniques necessary for the effective and efficient delivery of recreational sport programs within a variety of collegiate, public, quasi-public, and private settings, agencies and/or organizations.

**Grade Mode:** Letter Grading

**RMP 563 - Recreation Management and Policy Practicum****Credits:** 2

Designed to provide first and second year RMP majors the opportunity to observe and practice leadership skills in clinical and community-based settings. Students complete a 40-45 hour practicum at an approved site. Successful completion of a practicum is prerequisite to the professional internship, RMP 664. Students are responsible for transportation and housing.

**Prerequisite(s):** RMP 490 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**RMP 593 - Special Topics****Credits:** 2-4

A) Camping and Outdoor Education for Individuals with Disabilities, B) State Parks: Their Management and Role, C) Therapeutic Recreation in the School Setting, D) Social Psychology of Leisure, E) New Hampshire's Recreation/Ski Industry, F) Child Life Internship, J) Campus Recreation Applied Leadership, K-Z) Interdisciplinary. Specialized courses covering information not presented in regular course offerings. Description of topics available in department office during preregistration. May be repeated but not in duplicate areas. Special fee for RMP 593G.

**Equivalent(s):** RMP 593W**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**RMP 603 - New Hampshire Ski Industry Management****Credits:** 4

This course examines the New Hampshire ski and snowboard industry from several distinct but interrelated perspectives: social, technological, environmental, historical, economic, and operational. Students will explore skiing as a holistic and fulfilling segment of the outdoor recreation field, while gaining an understanding of its interdependence with the state's economy, the natural environment, and New Hampshire's unique cultural history. The influence of New Hampshire's ski industry on the history and growth of the American ski industry will be examined, and the impacts of climate change and other environmental issues will be investigated in light on ongoing societal shifts and relevant technological advancements.

**Grade Mode:** Letter Grading**RMP 612 - Therapeutic Communication and Facilitation Techniques in Therapeutic Recreation****Credits:** 0 or 4

Addresses specific clinical knowledge and skills essential to therapeutic recreation service delivery including clinical interviewing, group process, leisure education, treatment approaches, and intervention techniques.

**Prerequisite(s):** RMP 490 with a minimum grade of D-.**Equivalent(s):** RMP 604**Grade Mode:** Letter Grading**RMP 613 - Interventions and Documentation in Therapeutic Recreation****Credits:** 0 or 3

This course emphasizes theory and concepts in clinical intervention within therapeutic recreation settings. Students learn to identify and select appropriate facilitation techniques for a variety of client needs. Students also learn to write and interpret practice-based documentation. Students are afforded the opportunity to practice and apply concepts learned.

**Prerequisite(s):** RMP 490 with a minimum grade of D-.**Equivalent(s):** RMP 605**Grade Mode:** Letter Grading**RMP 614 - Assessment and Treatment Planning in Therapeutic Recreation****Credits:** 4

Addresses the principles of activity analysis, client assessment, documentation, individualized program planning, selection of interventions, and collaboration with a treatment team.

**Attributes:** Writing Intensive Course**Prerequisite(s):** RMP 612 with a minimum grade of D- and RMP 613 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 615 - Clinical Lab in Therapeutic Recreation****Credits:** 2

A clinical lab that provides students with the opportunity to apply principles central to the effective delivery of therapeutic recreation individualized treatment planning, client assessment, documentation, and activity analysis with members of one of two community sites located in the Seacoast region. Students are required to participate in weekly sessions (five to six hours per week) for a total of 15 weeks.

**Prerequisite(s):** RMP 612 with a minimum grade of D- and RMP 613 with a minimum grade of D-.**Equivalent(s):** RMP 602**Grade Mode:** Credit/Fail Grading**RMP 654 - Professional Development and Ethics****Credits:** 2

Focuses on preparing students for the internship experience through the identification of career goals and the selection of an approved internship site. A portfolio emphasizing process skills in resume construction, interviewing techniques, establishing internship goals and objectives, and self-assessment is developed. Securing Certification in Basic First Aid and CPR (infant, child, adult) is a component of this course.

**Grade Mode:** Letter Grading**RMP 661 - Leadership in Recreation Services****Credits:** 4

This course is designed to expose students to fundamental principles of leadership, communication, group facilitation, motivation, employee management, conflict resolution, and development of professional ethics. Students will develop techniques for the exercise of leadership in group and organizational settings associated with recreational programs and events. Students are expected to apply the leadership principles, theories, and techniques to small group exercises and activity leadership requirements.

**Prerequisite(s):** RMP 490 with a minimum grade of C.**Grade Mode:** Letter Grading**RMP 663 - Management and Finance in the Experience Industry****Credits:** 4

This course provides advanced standing RMP students with entry-level knowledge of current management practice, specializing in planning, human resources, finance, budget, resource acquisition, technology, and evaluation. The primary objective of this course is to provide students with an understanding of the tools and approaches used in the management and financing of recreation and event planning agencies and organizations. RMP majors only.

**Prerequisite(s):** RMP 490 with a minimum grade of C.**Grade Mode:** Letter Grading

**RMP 668 - Youth Culture and Programs****Credits:** 4

Emphasizes the identification of community and personal issues youth face in growing up as well as institutional and programmatic support available to assist youth. The course also examines the leadership, administrative, financial, and marketing tools necessary to develop successful youth programs and services. Service learning fieldwork and the completion of a background check are required.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**RMP 670 - Venue Management Design & Operations****Credits:** 4

Provides students with an orientation to the management, design, operation, and functions of various recreation venues. Topics include venue management, operational considerations, support features, and auxiliary functions that impact the manager's role. Students gain insight into key areas of venue management, design, and operations through visits to actual recreation venues.

**Grade Mode:** Letter Grading**Special Fee:** Yes**RMP 680 - Festival and Event Planning****Credits:** 4

Introduces the planning, marketing, management, and evaluation of festivals and special events. Explores the theories and practices relevant to successful event planning for host community residents and visitors.

**Prerequisite(s):** RMP 557 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 700H - Senior Honors Project****Credits:** 4-6

Under the direction of an RMP faculty member, students complete either a supervised research or applied field study project that builds on their honors coursework. Students submit a written proposal for approval and present the results at the completion of their project. Applied studies address a specific need or problem of a local agency or organization.

**Attributes:** Honors course**Grade Mode:** Letter Grading**RMP 705 - Management and Policy in Therapeutic Recreation****Credits:** 4

Addresses National Council for Therapeutic Recreation Certification knowledge areas concerning management competency. Students acquire knowledge of current principles and procedures for assuming an administrative role in the therapeutic recreation profession. Issues and practices related to budgeting, reimbursement, quality improvement programs, and comprehensive program planning.

**Prerequisite(s):** RMP 612 with a minimum grade of D- and RMP 613 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 711 - Recreation Resource Management****Credits:** 4

Examines the supply and demand of natural resources for outdoor recreation uses, with emphasis on relationships between public and private roles and responsibilities. Social, environmental, and economic impacts of outdoor recreation use are discussed. Current principles and techniques of recreation resource planning and management are outlined.

**Grade Mode:** Letter Grading**RMP 720 - Adaptive Sport Facilitation for Recreation Therapy and Related Professions****Credits:** 4

This course takes a strengths-based approach to examining adaptive sports and recreation for recreational therapists and related professions, with a focus on best practices and risk management in community-based settings. This is an experiential learning course, whereby students will learn how to design, plan, and facilitate a variety of adaptive sports for people with disabilities. Students will learn and apply processes for assessing, selecting, and fitting adaptive sports and recreation equipment for individuals with disabilities.

**Grade Mode:** Letter Grading**RMP 724 - Research, Evaluation, and Data-Driven Decisions****Credits:** 4

Emphasizes the understanding and practical application of evaluation concepts and tools within recreation, event, and allied health services. The course will cover the utility and feasibility of evaluation, evaluation planning and design (including quantitative and qualitative research design, methods, and analysis), evaluation management and data collection, analysis and reporting, and decision-making based on evaluation data.

**Attributes:** Writing Intensive Course**Prerequisite(s):** RMP 557 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 740 - Therapeutic Recreation Service Delivery in Community Settings****Credits:** 4

This course provides specialized knowledge and skills related to the practice of Recreational Therapy in a community setting. The course will encourage students to expand their understanding of philosophical constructs, public policy, and professional programs. Specific facilitation techniques and treatment modalities will be introduced as well as information specific to the therapeutic process as it is observed in these settings.

**Prerequisite(s):** RMP 490 with a minimum grade of D- and RMP 502 with a minimum grade of D-.**Grade Mode:** Letter Grading**RMP 764 - Internship****Credits:** 8 or 12

Supervised professional work experience in an approved recreation, park, tourism, or healthcare agency. Students participate in a 10 week (400 hour) or 14 week (560 hour) internship experience after receiving approval from their Academic Advisor and the Internship Coordinator.

**Grade Mode:** Credit/Fail Grading**RMP 772 - Law and Public Policy in Leisure Services****Credits:** 4

Topics including the law of torts, contracts, property, civil rights, risk management, and legal research are addressed in the context of leisure services and recreation resources. Public policy and professional advocacy implications are examined in relation to legislative and judicial systems.

**Attributes:** Writing Intensive Course**Prerequisite(s):** RMP 557 with a minimum grade of D- and RMP 663 with a minimum grade of D-.**Grade Mode:** Letter Grading

**RMP 775 - Entrepreneurial and Commercial Recreation****Credits:** 4

Principles of business planning and development as applied to the private sector leisure services industry. Emphasizes knowledge of key commercial leisure services profiles and their intersection with allied professions such as hospitality and tourism. Course topics include entrepreneurship, business planning, needs assessment, product development, selling, financing, legal designations, and business operations leading to the development of a business plan for a new entrepreneurial recreation enterprise.

**Grade Mode:** Letter Grading**RMP 776 - Human Dimensions of Natural Environments****Credits:** 4

This course draws on research and theories that illuminate the profound connections between nature and human health and wellbeing. Students will explore contemporary philosophical, psychological, and cultural perspectives to understand how both organized and unstructured experiences in the outdoors support human flourishing. Students review research and gain hands-on practice with ideas in the context of outdoor recreation, resource management, education, and other human service fields.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**RMP 780 - Event and Experience Design****Credits:** 4

This course will explore social and technical aspects of event coordinating, with a focus on the production associated with management, strategic planning and evaluation of event. Throughout the course, students will gain hands-on experience working with volunteers and clients. Students will have the opportunity to plan and execute an event. Students will hone their skills in planning, executing, marketing, risk management and budgeting, while discovering how best practices are applicable to effective event coordinating.

**Prerequisite(s):** RMP 680 with a minimum grade of C-.**Grade Mode:** Letter Grading**RMP 796 - Independent Study****Credits:** 1-4

Individual study and/or research relating to leisure-oriented topics.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** LMT 796, RMP 796W**Grade Mode:** Letter Grading**RMP 796W - Independent Study****Credits:** 1-4

Individual study and/or research relating to leisure-oriented topics.

**Attributes:** Writing Intensive Course**Equivalent(s):** RMP 796**Grade Mode:** Letter Grading

## Religious Studies (RS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**RS 483 - History of World Religions****Credits:** 4

Introduces the religions of the world in terms of historical development, relationship to society, belief system, central texts, and ritual practices. Begins with the religions of small and tribal societies (e.g., African, Native American), moves through religions of complex societies (e.g., Hinduism), and then studies the various traditions that emanated from ancient revelations: Zoroastrianism, Buddhism, Judaism, Christianity, Islam, and certain new forms of Christianity.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** HIST 483**Grade Mode:** Letter Grading**RS 505 - Introduction to Religion****Credits:** 4

This course provides an introduction to religion, exploring the various ways that this phenomenon has been understood, approached, practiced, and studied across human history. The course will examine the different ways that religion can be defined, drawing from a variety of humanities and other disciplines. Foundational theories explaining the origins, persistence, and continued relevance of religion will be compared and applied to different traditions. Topics include concepts of divinity, rituals, myth, mysticism and spirituality, pilgrimage, death and the afterlife, and ultimate reality.

**Attributes:** Humanities(Disc)**Equivalent(s):** HUMA 505**Grade Mode:** Letter Grading

## Russian (RUSS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**RUSS 401 - Elementary Russian I****Credits:** 4

For students without previous training in Russian. An introduction to contemporary standard Russian. Includes a cultural component. Topics include those which enable students to function in Russian in everyday situations (i.e. food, leisure activities, literature, transportation, music, sports, daily life).

**Grade Mode:** Letter Grading**RUSS 402 - Elementary Russian II****Credits:** 4

For students without previous training in Russian. An introduction to contemporary standard Russian. Includes a cultural component. Topics include those which enable students to function in Russian in everyday situations (i.e. food, leisure activities, literature, transportation, music, sports, daily life.) Cannot be taken separately except with permission of instructor.

**Attributes:** Foreign Language Requirement**Prerequisite(s):** RUSS 401 with a minimum grade of D-.**Grade Mode:** Letter Grading

**RUSS #425M - Topics in Russian Culture and Society in Moscow****Credits:** 4

Introduction to contemporary Russian society and culture in English. Examines the "Russian mind" (as it was before 1917), the "Soviet mind" and how the two have clashed. A closer examination of how the Russians are adapting to the changes that have taken place in their country since the collapse of communism. Readings, film, realia. Themes to be discussed include leadership, authority and power, the Russian soul, family, women, youth, education, holidays and celebrations, and the new Russians. Through pre-departure readings and on location, each culture and historical topic is taught on site during field trips and after field trip discussions, lectures, and round tables. A focused topic is explored on location with pre- and post program research.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** RUSS 425, RUSS 425T**Grade Mode:** Letter Grading**RUSS 503 - Intermediate Russian I****Credits:** 4

Continued work in grammar, and writing with cultural components. A review of the fundamentals of grammar and syntax. Readings and cultural material included. Topics include: the university, student life, everyday routines, holidays.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** RUSS 402 with a minimum grade of D-.**Grade Mode:** Letter Grading**RUSS 504 - Intermediate Russian II****Credits:** 4

Continued work in grammar, and writing with cultural components. A review of the fundamentals of grammar and syntax. Readings and cultural material included. Topics include: description of people, living arrangements, weather, cities, travel.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** RUSS 503 with a minimum grade of D-.**Grade Mode:** Letter Grading**RUSS 521W - Devils, Deities, and Madness in Russian Literature****Credits:** 4

Introduces Russian literature from a variety of perspectives. Selected works by famous and lesser known Russian writers on the themes of devils, deities, and madness. Literary texts, as well as film versions of literary texts, are considered in their historical and cultural contexts. Lectures, readings, and discussions in English. Open to all students, including freshmen.

**Attributes:** Humanities(Disc); Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** RUSS 521**Grade Mode:** Letter Grading**RUSS 525 - Russia: Mythology and Propaganda****Credits:** 4

Exploration of the relationship between mythology and culture as a part of the cultural identity of the Russian people, before the 1917 Revolution, during the Communist period, and since the fall of the Soviet Union. Focus on pre 1917 Slavic pagan, Christian, and folk mythology vis-a-vis Western mythology, on 20C propaganda and control of the "public mind" designed to reshape national identity and on the current deconstruction, reform, and rebirth of the old mythology.

**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**RUSS #525M - Russia: Mythology and Propaganda in Moscow****Credits:** 4

Exploration of the relationship between mythology and culture as a part of the cultural identity of the Russian people, before the 1917 Revolution, during the Communist period, and since the fall of the Soviet Union. Focus on pre 1917 Slavic pagan, Christian, and folk mythology vis-a-vis Western mythology, on 20C propaganda and control of the "public mind" designed to reshape national identity and on the current deconstruction, reform, and rebirth of the old mythology. Course conducted on location in Russia and on line.

**Co-requisite:** INCO 589**Attributes:** Historical Perspectives(Disc)**Grade Mode:** Letter Grading**Special Fee:** Yes**RUSS #595 - Russian Practicum****Credits:** 2

Participants earn credit for approved, uncompensated, pre-professional activities and special projects, including K-12 outreach, assisting in undergraduate courses, work with professional organizations, businesses, social services, non-profits, NGOs or educational organizations in a Russian context and with on-site supervision. Writing assignments are required and vary depending upon the project. Enrollment limited to sophomores, juniors and seniors who are Russian majors and have a B or above average in Russian language courses.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Credit/Fail Grading**RUSS 631 - Advanced Russian Conversation and Composition****Credits:** 4

Advanced spoken and written Russian designed to include all four language skills (speaking, reading, writing, listening.) Readings on contemporary cultural topics and vocabulary building. Composition and conversation based on Russian-language media and literature.

**Prerequisite(s):** RUSS 504 with a minimum grade of D-.**Grade Mode:** Letter Grading**RUSS 632 - Advanced Russian Conversation and Composition****Credits:** 4

Advanced spoken and written Russian designed to include all four language skills (speaking, reading, writing, listening.) Readings on contemporary cultural topics and vocabulary building. Composition and conversation based on Russian-language media and literature.

**Prerequisite(s):** RUSS 504 with a minimum grade of D-.**Grade Mode:** Letter Grading**RUSS #680 - UNH Russia Summer Study Abroad****Credits:** 0

Summer study abroad program facilitated by the UNH Russia Program. This course is a placeholder for the study abroad program fee. Students register for both this administrative course number and two Russian courses offered on the program.

**Co-requisite:** INCO 589**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**RUSS #685 - Study Abroad****Credits:** 0-16

Studies at a Russian institution of higher learning. Interested students should consult with a Russian advisor. (IA grade will be assigned until official transcript is received from the foreign institution.)

**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes

**RUSS 691W - Readings in Russian Literature****Credits:** 1-4

Linguistic and stylistic characteristics of one of the major works in Russian literature. Study of the epoch when the work was written, as well as reading the literary work and discussing it. Students learn to analyze a literary work in the target language. Readings, class discussions, and papers conducted entirely in Russian.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**RUSS #725M - Topics in Russian Culture and Society in Moscow****Credits:** 4

Historical, social, political, intellectual and artistic developments in Russia that have influenced contemporary Russian society and culture. Designed to give a deeper introspection into Modern Russian and its society, and a firsthand dialogue with the most significant sites in Russian civilization. Through pre-departure readings and on location, each cultural and historical topic is taught on site during field trips and after field trip discussions. Readings, class discussions, and films. Conducted entirely in Russian. A focus topic is explored on location with pre and post program research.

**Prerequisite(s):** RUSS 504 with a minimum grade of D-**Equivalent(s):** RUSS 725**Grade Mode:** Letter Grading**RUSS 733 - History of Slavic Languages and Culture****Credits:** 4

Students look at modern Russian (standard and dialects) through the perspective of the history of the language. Focuses on the evolution of phonetics and grammar as well as etymology. Russian's relation to other Slavic languages is discussed. Students look at the language through the lens of history, culture, and politics.

**Equivalent(s):** RUSS 790**Grade Mode:** Letter Grading**RUSS 790W - Advanced Language and Style****Credits:** 4

For students who have a strong, active control of grammar. The most difficult problems of Russian grammar and syntax in poetry and prose. Develops confidence in expression both in everyday situations and in abstract concepts (emphasis on the latter). The course is tailored to students' major and interest (such as international affairs, history, political science, etc) so they can use the language towards their research in Russian. May be repeated for credit, barring duplication of material.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** RUSS 790**Grade Mode:** Letter Grading**RUSS 795 - Independent Study****Credits:** 1-4

Open to highly qualified juniors and seniors. To be elected only with permission of the Russian program coordinator and the supervising faculty member or members. Barring duplication of subject, may be repeated for credit.

**Repeat Rule:** May be repeated up to 4 times.**Grade Mode:** Letter Grading**RUSS 797 - Special Studies in Russian Language, Literature, and Culture****Credits:** 2 or 4

Selected topics in language, literature, and culture. Barring duplication of subject, may be repeated for credit.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Science (SCI) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SCI 412 - Introduction to Astronomy****Credits:** 4

Through a variety of activities, this course provides the student with a basic background in astronomy which enhances appreciation of the universe and the technology used in our attempt to understand it. This course exposes the student to the real, measurable, and verifiable connections that exist between the universe and life on Earth. Readings, observations, discussions, and other activities will explicate that what goes on out there can and does have a real and measurable influence on what happens down here.

**Attributes:** Physical Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 512G**Grade Mode:** Letter Grading**SCI 470 - Physical Geography****Credits:** 4

Physical Geography is the study of planet Earth. In this course, students examine the nature of the Earth's six spheres: the atmosphere (the layer of gases); hydrosphere (the water in oceans, streams, lakes, etc.); cryosphere (the ice in glaciers); geosphere (the solid earth), biosphere (life); and anthrosphere (humans and human activities). By investigating the processes operating within each sphere and how these spheres interact with each other to shape all aspects of our planet, students gain an understanding of how the Earth works and how landscape features have formed.

**Attributes:** Physical Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 518G**Grade Mode:** Letter Grading**SCI 480 - Introduction to Oceanography****Credits:** 4

This course examines the ocean, including the processes that control its major features, the life within it, and its impact on earth processes. An ecological approach is used to integrate the geological, biological, chemical, and physical aspects of oceanography. Special emphasis is placed on the coastal environment.

**Attributes:** Physical Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 520G**Grade Mode:** Letter Grading

**SCI 490 - Human Biology****Credits:** 4

This course is an introductory study of anatomy and physiology that provides a foundation in biological science and the structure and function of the human body. Topics explored include cellular biology and molecular composition, tissues, organs, and how the human body systems perform and adapt. The building of a relevant vocabulary and a foundation of facts and concepts provides the background needed for further understanding of developments in bioscience and biomedicine.

**Attributes:** Biological Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 505G**Grade Mode:** Letter Grading**SCI 502 - Nutrition and Health****Credits:** 4

This course provides the student with a foundation in the science of human nutrition and metabolism. The research supporting direct and indirect links between nutrition and disease is introduced. Topics covered may include the biological functions and food sources of each nutrient; nutrition guidelines and standards; digestion and absorption of nutrients; nutrition throughout the lifecycle; food safety and technology; energy balance and weight management; eating disorders and disturbances; and physical activity.

**Attributes:** Biological Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 502G**Grade Mode:** Letter Grading**SCI 508 - Issues in Women's Health****Credits:** 4

This course examines women's health and women's health care from biological, medical, historical, political, and social perspectives. It begins with the study of endocrinology and the physiological processes unique to women. Factors related to health care issues specific to women are examined. Societal and health care constraints, which hinder women from achieving their full health potential are also addressed. The course also presents information on women's health care practices, including the concept of self-care, and relates this to the development of educated consumerism in the health care industry.

**Attributes:** Biological Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 508G**Grade Mode:** Letter Grading**SCI 509 - Disease Prevention and Health Promotion****Credits:** 4

This course is a survey of various diseases that have emerged as serious health problems on a global scale. Students examine the etiology, transmission, detection, treatment, and method of prevention of ancient and newer diseases that continue to pose health threats, including risks related to pandemic and endemic disease.

**Attributes:** Biological Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 509G**Grade Mode:** Letter Grading**SCI 528 - Natural History of Northern New England****Credits:** 4

This course focuses on the evolutionary adaptations of plants and animals that allow them to survive and thrive through all of New England's seasons. Students are introduced to the origin and development of the diverse ecosystems of our region and their relationship to the resident and migratory wildlife of Northern New England. The effects of the Ice Age on northern New England's topography and on the rhythms of the animal and plant life cycles are investigated.

**Attributes:** Phys Natural World (Gen Ed)**Equivalent(s):** SCI 528G**Grade Mode:** Letter Grading**SCI 541 - Introduction to Environmental Science****Credits:** 4

An introductory survey of global environmental problems such as global warming, acid rain, nuclear waste storage, agricultural runoff, and heavy metal contamination. This course explores the interrelationship between the natural environment and the effects of human activity resulting in pollution of air, water, and land. A major focus of the course is critical examination of ecological, economic, and political aspects of pollution in a global context.

**Attributes:** Physical Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 541G**Grade Mode:** Letter Grading**SCI 544 - Special Topics: Lower Level****Credits:** 1-4

A study of current and variable topics in Science. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** SCI 544G**Grade Mode:** Letter Grading**SCI 550 - Wellness and the Human Body****Credits:** 4

This course examines the integration of the human body systems. Common pathologies that interfere with normal physiological function and quality of life are examined and evidence-based practices for disease prevention and wellness are addressed. Recommended: SCI 490.

**Attributes:** Biological Science(Discovery); Phys Natural World (Gen Ed)**Equivalent(s):** SCI 603G**Grade Mode:** Letter Grading**SCI 604 - Principles of Exercise Science****Credits:** 4

This is an applied course addressing exercise physiology and integrated kinesiology principles. Students will examine how the mind and body respond to various intensities and modalities of exercise as well as explore various methods of measuring physiological variables such as cardiovascular fitness, muscular strength and endurance, flexibility, and body composition. Topics include: energy systems, neuromuscular concepts, and functions of the cardiovascular and respiratory systems during rest and exercise. Students enrolled in this course are required to complete the college's risk waiver prior to participating in any physical activity.

**Attributes:** Biological Science(Discovery); Phys Natural World (Gen Ed)**Prerequisite(s):** SCI 490 with a minimum grade of D- or SCI 505G with a minimum grade of D-.**Equivalent(s):** SCI 604G**Grade Mode:** Letter Grading

**SCI 610 - Contemporary Issues in Personal and Global Health****Credits:** 4

This course explores current issues in health from a scientific lens. Students will examine diverse factors that influence the wellness-illness continuum related to a specific topic. Perspectives include the biological, sociocultural, behavioral, and public health implications, to these personal and global health challenges.

**Attributes:** Environment, TechSociety(Disc); Phys Natural World (Gen Ed); Writing Intensive Course

**Equivalent(s):** SCI 610G

**Grade Mode:** Letter Grading

**SCI 615 - Fitness and Health****Credits:** 4

This course presents the concepts of physical activity and exercise that connect to our health and well-being. Students will study how exercise is a mechanism to improve fitness, control weight, cope with life stressors, and optimize mindset. Students will have the opportunity to explore how the body and mind respond to different types of physical activity and the resulting health improvements of physical activity recommendations. Health behaviors and tools that support physical activity as part of a holistic approach to wellness will be addressed.

**Attributes:** Phys Natural World (Gen Ed)

**Equivalent(s):** SCI 615G

**Grade Mode:** Letter Grading

**SCI 644 - Special Topics: Upper Level****Credits:** 1-4

A study of current and variable topics in Science. Course content changes from term to term. It is expected that the student will have prior course work or experience in the subject area.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** SCI 644G

**Grade Mode:** Letter Grading

## Sign Language Interpreting (INTR)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**INTR 430 - Introduction to Interpretation****Credits:** 4

A survey of traditional and contemporary perspectives on interpretation and interpreters; introduces the cognitive processes involved in interpretation and factors that influence those processes. Several models of interpretation explored. Particular attention given to interpretation as an intercultural, as well as inter-lingual, process. Students engage in a research project related to course content.

**Grade Mode:** Letter Grading

**INTR 438 - A Socio-cultural Perspective on the Deaf Community****Credits:** 4

Introduction to the deaf community and deaf culture. Discussion of similarities to, and differences from, mainstream hearing culture. Supplemental videotapes focus on aspects of culture including deaf education, autobiographical sketches, deaf norms and values, and deaf literature and folklore. Theoretical issues of culture and linguistics applied to deaf culture, American Sign Language, and the variety of cultural perspectives of the deaf community. Students engage in a research project related to course content.

**Attributes:** Social Science (Discovery); Writing Intensive Course

**Prerequisite(s):** ENGL 401 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**INTR 439 - Ethics and Professional Standards for Interpreters****Credits:** 4

Seminar course using readings, theory, and discussion of hypothetical situations and role plays to explore ethical standards and dilemmas in ASL-English interpretation. Covers personal and professional values, ethics, and morality; professional principles; power, responsibility, and group dynamics; the interpreter's role; cross-cultural issues; and the decision-making process. Students engage in a research project related to course content.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** INTR 430 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**INTR 539 - Comparative Linguistic Analysis for Interpreters****Credits:** 4

Examines the basic similarities and differences between the linguistic structure of American Sign Language and spoken English; focuses on each language's communication functions and how they serve these functions. Students engage in a research project related to course content.

**Prerequisite(s):** ASL 532 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**INTR 540 - Translation****Credits:** 0 or 4

Introduction to theory and practice of translation. Students analyze pre-prepared interpretations and translations to discover how expert interpreters and translators construct meaning in the alternate language. Particular attention paid to the form/meaning distinction. Students prepare translations from texts of their choosing. Lab.

**Prerequisite(s):** ASL 532 (may be taken concurrently) with a minimum grade of D-.

**Grade Mode:** Letter Grading

**INTR 599 - Special Topics****Credits:** 1-4

Occasional offerings dependent on availability and interest of faculty. Barring duplication of subject, may be repeated.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**INTR 630 - Consecutive Interpretation I****Credits:** 0 or 4

Introduction to the theory and practice of consecutive interpretation. Analyzes and integrates specific subtasks of the interpreting process culminating in the performance of prepared and spontaneous consecutive interpretations. Students work with a variety of texts, language models, and settings with the goal of engaging in the consecutive interpreting process by chunking information and constructing meaning in the alternate language. Lab.

**Prerequisite(s):** INTR 540 with a minimum grade of D-.**Grade Mode:** Letter Grading**INTR 636 - Consecutive Interpretation II****Credits:** 0 or 4

Continues and advances the theory and practice of consecutive interpretation and introduces simultaneous interpretation. The focus of this course is on interactive discourse (dialogues). Particular attention is given to processes involved in the transition from consecutive to simultaneous interpreting, and determining when to use each mode of interpretation. The advantages and limitations of both types of interpreting are compared. Students apply theoretical information to the process of simultaneous interpreting. Students also engage in a research project related to course content. Lab.

**Prerequisite(s):** INTR 630 with a minimum grade of D-.**Grade Mode:** Letter Grading**INTR 732 - Simultaneous Interpretation****Credits:** 0 or 4

Focuses on simultaneous interpretation of expository discourse (presentations). Students further explore and apply theory learned in INTR 636 to a variety of texts, language models, and settings. Students engage in a research project related to course content. Lab.

**Attributes:** Writing Intensive Course**Prerequisite(s):** INTR 636 with a minimum grade of D-.**Grade Mode:** Letter Grading**INTR 734 - Field Experience and Seminar I****Credits:** 4

Gives students the opportunity to observe professional working interpreters, with some direct interpreting experience as deemed appropriate. Students integrate knowledge, theoretical understanding, and skills acquired in the interpreting program by working closely with on-site supervisors (interpreters) in addition to attending a bi-weekly seminar with the UNHM field experience coordinator.

**Prerequisite(s):** INTR 732 (may be taken concurrently) with a minimum grade of D-.**Grade Mode:** Letter Grading**INTR 735 - Field Experience and Seminar II****Credits:** 4

Gives students the opportunity to gain supervised interpreting experience. Students engage in actual interpreting assignments and receive support and mentorship from a professional interpreter, enabling them to integrate knowledge, theoretical understanding, and skills acquired in the interpreting program. Students work closely with on-site supervisors (interpreters) in addition to attending a biweekly seminar with the UNHM field coordinator.

**Prerequisite(s):** INTR 734 with a minimum grade of D-.**Grade Mode:** Letter Grading

## Social Science (SOSC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SOSC 445 - Race & Diversity in the U.S.****Credits:** 4

This course offers an introduction to the body of research and understanding about race and diverse identities and cultures, particularly in the context of the United States. Students will identify and describe terminology relating to race and diversity and will explore and describe the concepts of race, culture, class, sex, and gender identity as social constructs. Students will be asked to think critically about assumptions related to race- and sex-based hierarchical ideas and the effects of those assumptions on equitable economic, social, and political participation in the United States. Students will explore, and explain, the meaning of intersectionality as it relates to diverse identities (e.g. race, ethnicity, sex and gender, etc.).

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Equivalent(s):** SOSC 505G**Grade Mode:** Letter Grading**SOSC 544 - Special Topics: Lower Level****Credits:** 1-4

A study of current and variable topics in Social Science. Course content changes from term to term.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** SOSC 544G**Grade Mode:** Letter Grading**SOSC 602 - Men and Women in Cross-Cultural Perspectives****Credits:** 4

This course provides a basis for analyzing alternatives in the relationships between men and women by looking at the roles women play in widely different societies; for example, in peasant, socialist, and capitalist industrial societies. The range of women's and men's roles in a variety of cultures is explored.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.**Equivalent(s):** SOSC 602G**Grade Mode:** Letter Grading**SOSC 610 - Multicultural Perspectives in Education****Credits:** 4

In this course, students will demonstrate an understanding of the major principles, theories, and research pertaining to the influence of cultural groups and subgroups on language learning, school achievement, and acculturation. Students will explore the role of cultural and social identities and demonstrate the ability to apply this knowledge in identifying environments that support both students' identities and academic needs. The role of the dominant culture and its impact on students will be explored.

**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.**Equivalent(s):** EDU 631G**Grade Mode:** Letter Grading

**SOSC 630 - Aspects of Aging in a Modern Society****Credits:** 4

The course introduces the physical, psychological, economic, and social aspects of aging. Attention is given to these key aspects of aging and their relationship to the characteristics of our aging population in the United States. The course also explores the impact of culture, family structure, and societal values on the elderly in our society.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.**Equivalent(s):** SOSC 630G**Grade Mode:** Letter Grading**SOSC 644 - Special Topics: Upper Level****Credits:** 1-4

A study of current and variable topics in Social Science. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject area.

**Repeat Rule:** May be repeated up to unlimited times.**Equivalent(s):** SOSC 644G**Grade Mode:** Letter Grading**SOSC 675 - Dynamics of Family Relationships****Credits:** 4

This course examines evolving family structures in contemporary American society. The functions that a family serves are reviewed. The stages of family life and development, a variety of communication patterns, and the causes of breakups are addressed. The focus of the course is on helping students develop an ability to assess the strengths of a family system, evaluate the decision-making processes used by a family, and discuss the resiliency of the family. The course reviews a range of intervention methods that can be used to improve family relationships.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.**Equivalent(s):** SOSC 604G**Grade Mode:** Letter Grading**SOSC 680 - Stress and the Family****Credits:** 4

This course examines the characteristics of both healthy and troubled families as they progress through each developmental stage. Change is a constant in each person's life; the family's response to change and the resulting stress is reviewed. A family's ability to manage extraordinary stressors, from both external and internal sources, is discussed. There is an emphasis on maladaptive patterns including family violence, runaways, and self-harming patterns. NOTE: Completion of SOSC 675 is recommended.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.**Equivalent(s):** SOSC 605G**Grade Mode:** Letter Grading**SOSC 710 - Social Stratification and Inequality****Credits:** 4

This course explores the diversity of life experiences in contemporary America and assesses structured inequality in terms of socioeconomic, racial, gender, and sexuality differences. Using the theoretical framework of the social construction of race, gender, economic class, sexual orientation, and disability in historical contexts, the course examines how and why stratification systems emerge and are reproduced. Students then consider alternatives to the categories of difference and the processes, philosophical developments, institutions, and conditions that lead to and rely on power and privilege in modern society.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.**Equivalent(s):** SOSC 637G**Grade Mode:** Letter Grading

## Social Work (SW)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SW 424 - Introduction to Social Work****Credits:** 4

Introduces the learner to the field of social work with emphasis on the "person-in-environment" and attention to a range of practice approaches to understanding and assisting of the human condition. An overview of the history, values, and ethics of the profession. Includes various fields of practice in which social workers are employed.

**Equivalent(s):** SW 524**Grade Mode:** Letter Grading**SW 440A - Honors/Healthy Communities: Environmental Justice and Social Change****Credits:** 4

This course provides students with opportunities to examine and promote health within communities. Students explore components of healthy communities, with a focus on equity, sustainability, and social and environmental justice. The class examines historical, contemporary, and future factors that empower and constrain community residents and systems. Students practice skills for social change and engage in experiential activities and discussion designed to foster consideration of community health and social justice.

**Attributes:** Honors course; Social Science (Discovery)**Grade Mode:** Letter Grading

**SW 444 - You've Got Your Troubles, I've Got Mine****Credits:** 4

A seminar for traditional first- or second-year students. Examines the many personal losses typical for students leaving home for the first time. Guest speakers from various disciplines (e.g., social work, therapeutic recreation, nursing, family studies). The various ways one may find and give informal support to others dealing with loss are explored. In addition, the personal responses allowing one to better cope with adversity and ways of expressing grief are explored. Group work brings the class together as an informal support network. Students exchange ideas in techniques used to deal with personal loss and develop an informal support network to use after the course has ended.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**SW 500 - I'm Old, So What! An introduction to aging in the United States****Credits:** 4

This is the first of two mandatory courses for the GERO Minor, but any student may take it as an elective. It introduces the learner to the field of gerontology (the study of how people age). It explores the biological, psychosocial, and cognitive changes within the context of society. The history of ageism and its influence on how it has affected the individual, families, and society is presented. The range of independence among older people is examined. Various disciplines that work within the field of gerontology are reviewed. Lectures, novels, films and guest speakers help to examine growing old in the U.S.

**Equivalent(s):** GERO 500

**Grade Mode:** Letter Grading

**SW 525 - Social Welfare Policy: History of Social and Economic Justice****Credits:** 4

An overview of the history and current status of social welfare policy in the United States. Considers the origins, development, and analysis of significant policies, values, attitudes and other issues related to the social welfare system and the delivery of service. Focuses on policy analysis from a social and economic justice perspective.

**Attributes:** Historical Perspectives(Disc)

**Grade Mode:** Letter Grading

**SW 550 - Human Behavior and Social Environment I****Credits:** 4

Introduces human behavior and development as it influences and is influenced by multiple factors in the social environment, including individual genetic and biological composition, race, gender, age, socioeconomic status, ethnicity, geographic location, physical appearance, and ability. How these factors operate throughout the life cycle. Provides a knowledge base and perspective to understand a client's behavior, attitude, and values in relation to the attitudes and values of the social work professional and the larger society.

**Attributes:** Social Science (Discovery)

**Grade Mode:** Letter Grading

**SW 551 - Human Behavior and Social Environment II****Credits:** 4

Agents of socialization that most significantly affect family, group, and organizational development and behavior within an ecosystems framework. Particular attention is paid to the influence of class, gender, race, ethnicity, religion, age, sexual orientation and other aspects of diversity on development and behavior of larger systems.

**Attributes:** Social Science (Discovery)

**Grade Mode:** Letter Grading

**SW 565 - Introduction to Child Life****Credits:** 4

When facing acute, chronic, or life-threatening illness and traumatic injuries, children and families have unique needs within the medical system. The purpose of this course is to provide an introduction to the theory and practice of the child life profession and family centered care. Topics include children's emotional reactions to hospitalization, use of play, preparation, and family support, designing healing environments, and specializations within the field.

**Equivalent(s):** HDFS 565

**Grade Mode:** Letter Grading

**SW 601 - Research Methods in Social Work****Credits:** 4

Introduces students to practitioner-researcher role in social work. Critical evaluation of, and introduction to research including project design, survey and evaluative methodologies. Introduction to statistics used in research process. Each student completes an individual research project.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** SW 424 with a minimum grade of D-

**Equivalent(s):** PSYC 502, SOC 601, SOC 601W

**Grade Mode:** Letter Grading

**SW 611 - Behavioral Health and Well Being****Credits:** 4

This course provides an overview of behavioral health and wellbeing through a social justice lens. While students will learn about the traditional approach to behavioral health including the diagnosis and assessment of "mental illness", they will also explore contemporary perspectives that view our behavioral health as inseparable from our bodies, families, communities, and other social determinants of health.

**Equivalent(s):** SW 711

**Grade Mode:** Letter Grading

**SW 622 - Social Work Practice: Interventions with Individuals and Families****Credits:** 4

Introduces methods and practice. Basic principles, values, and ethics, interviewing skills, problem assessment, and contracting of social work practice with individuals and families are studied. Skills training in lab sessions.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** SW 424 with a minimum grade of D-

**Grade Mode:** Letter Grading

**SW 623 - Social Work Practice: Interventions with Groups, Organizations and Communities****Credits:** 4

Continuation of SW 622. Delineation and study of intervention and change strategies differentiated with individuals, groups, and communities.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** SW 622 with a minimum grade of D-

**Grade Mode:** Letter Grading

**SW 625 - Social Welfare Policy in a Global Context****Credits:** 4

Builds on the curricular content covered in Introduction to Social Welfare Policy (SW 525). Both courses view social welfare policy as the framework from which social work services are developed and delivered. This course examines the macroeconomic context for policy analysis and advocacy and integrates policy and practice through student research and analysis of specific social problems. Policymaking is analyzed in legislative, community, organizational, and global environments emphasizing advocacy in the pursuit of social and economic justice.

**Prerequisite(s):** SW 424 with a minimum grade of D- and SW 525 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SW 630 - Race Equity in Health and Human Services****Credits:** 4

The course will explore the social construction of individual and group racial and ethnic identities and their relationship to oppression, prejudice, discrimination, and powerlessness in social and interpersonal contexts and their impact on individuals, families, groups, organizations and communities. Students will have an opportunity to examine their own experiences of both privilege and oppression. Students will learn to critically examine theories, concepts, and models of practice for racial and cultural bias.

**Grade Mode:** Letter Grading

**SW #650 - Exploring Social Justice and Cultural Competency Using an Experiential Learning Approach****Credits:** 4

This course explores the use of experiential activities to address social justice issues and cultural competency. Students will experience an interactive activity-based approach to build self-awareness and techniques for working with specific client groups. The course focuses on methods and activities using metaphorical development and facilitation to promote dialogue and reflection. (can be used to satisfy SW Distribution Requirement).

**Grade Mode:** Letter Grading

**SW 660 - Exploring Issues in Housing and Homelessness****Credits:** 4

This course examines the meaning we attach to shelter in our society, and will examine multiple perspectives on the issues of housing and homelessness. The course will begin with a macro perspective and will draw on economic, humanistic, and historical perspectives to respond to this question, is housing a right? Students will also examine community development approaches to housing and their neighborhood effects. The course will conclude with an in-depth look at the complexities of homelessness.

**Grade Mode:** Letter Grading

**SW 697 - Special Topics in Social Welfare****Credits:** 4

Seminar for advanced majors. Topics may include: Alcohol and Alcoholism, Drugs and Chemical Dependency, Income Maintenance, Health Care, Child Welfare, Aging, Mental Health, or Developmental Disabilities. or study travel experiences. May be repeated for different topics.

**Repeat Rule:** May be repeated up to 1 time.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SW 702 - Aging and Society****Credits:** 4

This course is designed to formalize students with biological, psychological, and sociological perspectives of aging and social services and policies for older people. This course covers a broad range of theories and contemporary issues in the field of aging. It also focuses on the strengths and limitations of existing programs and policies such as Social Security, Medicare, Medicaid, Supplemental Security Income, and other community services. Comparisons to developments in other countries will be made throughout the course to provide a broader context for understanding aging and programs/policies in the U.S.

**Grade Mode:** Letter Grading

**SW 704 - Adolescents with Emotional and Behavioral Challenges****Credits:** 4

This course focuses on the characteristics and needs of youth with emotional and behavioral challenges based upon socio-cultural and ecological theories, and provides exposure to family- and youth-driven practices and approaches that represent System of Care values and principles.

**Grade Mode:** Letter Grading

**SW 705 - Child and Adolescent Risks and Resiliency: Program, Policy and Practice****Credits:** 4

Examination of the major policy and program questions of child welfare with a focus on child care and protection, adoption and foster care, juvenile delinquency, service delivery, and concepts of treatment in public and private programs.

**Grade Mode:** Letter Grading

**SW #706 - Social Action in the Dominican Republic****Credits:** 4

This course examines issues of culture, poverty, social development and social justice in the Dominican Republic through both service learning work and through preparatory and reflective class sessions and discussions. Students will examine social and economic development issues within a global framework and will explore efforts to improve conditions on this island nation. The service learning component includes working on a designated construction project and volunteering in a local elementary school. Students will also collaborate with community leaders to learn more about social, cultural and historical issues and will engage in a variety of cross-cultural activities. Students will engage with the local Haitian immigrant community, tour local schools and orphanages, and visit historical areas including the Zona Colonial of Santo Domingo. The primary part of the class will take place during March spring break.

**Co-requisite:** INCO 589

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SW 707 - Child Maltreatment****Credits:** 4

This course introduces students to advanced concepts in child welfare with an emphasis on child maltreatment assessment and child protective services. The course addresses emerging assessment practices, data informed child protective service provision, the role of technology in child welfare practice, and workforce development.

**Grade Mode:** Letter Grading

**SW 710 - SW and the Digital Age****Credits:** 4

This course focuses on the ever-changing landscape of technology as it relates to the Social Work field. Students will explore topics such as telehealth, online communities, assistive technology as well as digital advocacy. Ethical implications of the integration of technology into Social Work will be explored throughout the course. Students will work independently or collaboratively at a distance to create a multi-media project focused on a topic of interest within Digital Social Work.

**Grade Mode:** Letter Grading**SW 712 - Understanding Developmental Disabilities****Credits:** 4

Analysis of the complex social contexts of people with developmental disabilities. Explores and questions traditional approaches and the current system. Examines family and community services and resources.

**Grade Mode:** Letter Grading**SW 713 - School Social Work****Credits:** 4

The course examines the school as a social institution that serves to educate and socialize children into US society and the role of the social worker in the school setting. Readings, activities, and discussions provide practical skills and theory for school social work practice. The course content addresses the history of school social work integrating social work values into a school setting, systemic needs within school settings, the importance of networking and professional collaboration, and working with diverse and at-risk youth and their families. Students also examine the role of school social workers in helping students, schools and families adjust to and cope with trauma, special education needs, and related topics.

**Grade Mode:** Letter Grading**SW #714 - Drugs and Alcohol: Use, Misuse and Addiction****Credits:** 4

This course examines a) historical, cultural, social aspects of alcohol, b) impact of alcohol on body and behavior, c) progression of drinking and the treatment and prevention of alcoholism, d) impact of addiction on families.

**Grade Mode:** Letter Grading**SW 715 - Affirming Practice with Lesbian, Gay, Bisexual, Transgender, Queer+ People****Credits:** 4

This course addresses the task of clinical practice with lesbian, gay, bisexual, transgender, queer, questioning, asexual, intersex, two-spirit, genderqueer, pansexual, and beyond (LGBTQ+) people on both personal and professional levels for the social worker. The class makes use of personal narratives, as well as theoretical and clinical practice readings. Students are expected to explore and examine their own attitudes, beliefs, and assumptions about LGBTQ+ people.

**Grade Mode:** Letter Grading**SW 721 - International Social Work****Credits:** 3

This course introduces the growing field of international social work. It addresses the impact of globalization on social work practice, provides an overview of the social work profession around the world, and considers current challenges and suggested ways social workers can contribute to solutions. Human rights and globalization are dominant themes underlying international social work and serve as unifying concepts for examining various global issues. The focus of the course is on global social issues with particular attention to human rights, development, racism, status of women and children, climate change, immigrants and refugees, HIV/AIDS, and aging populations. Linkages between international and domestic social work practice are emphasized, making the course relevant to all students and their future practice.

**Grade Mode:** Letter Grading**SW 740 - Social Work Field Experience****Credits:** 4

Majors are placed in a social welfare setting for a minimum of 225 hours; individual arrangements with faculty coordinate. (No credit toward a minor).

**Co-requisite:** SW 740A**Prerequisite(s):** SW 622 with a minimum grade of D-.**Equivalent(s):** SW 640**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes**SW 740A - Social Work Field Experience I: Seminar****Credits:** 4

This weekly seminar, held concurrently with Social Welfare Experience I, integrates the field experience with social work theory and concepts learned throughout the curriculum by class discussion, exercises, readings and written assignments. Seminar I provides an opportunity for orientation to field, an overview of field requirements, review of the Code of Ethics, and use of small group discussion for problem solving. Students learn to use supervision effectively, to participate in the helping process, and to manage their own stress. Students learn to assess the impact of policy on the client system, agency and worker and to use research to inform practice.

**Co-requisite:** SW 740**Prerequisite(s):** SW 622 with a minimum grade of D-.**Equivalent(s):** SW 640A**Grade Mode:** Letter Grading**SW 741 - Social Work Field Experience II****Credits:** 4

A continuation of SW 740 with a minimum of 225 hours required in this term.

**Co-requisite:** SW 741A**Prerequisite(s):** SW 740 with a minimum grade of D- and SW 740A with a minimum grade of D-.**Equivalent(s):** SW 641**Grade Mode:** Credit/Fail Grading

**SW 741A - Social Work Field Experience II: Seminar****Credits:** 4

This is a continuation of Social Welfare Field Experience I: SW 740A and builds upon the concepts presented in the student's first field practice seminar. This seminar meets weekly for two and a half hours and is held concurrently with the field placement. It is designed to integrate the field experience with social work concepts through class discussion, reading and written assignments. Topics include but are not limited to, understanding and using agency structure to enhance client interactions, preparing client assessment and other documents, enhancing the client-worker therapeutic interaction, effective use of supervision, effective use of self in practice, prevention of burn-out, termination with clients and with agency staff, and values and ethics.

**Co-requisite:** SW 741**Prerequisite(s):** SW 740 with a minimum grade of D- and SW 740A with a minimum grade of D-.**Equivalent(s):** SW 641A**Grade Mode:** Letter Grading**SW 770 - Intimate Partner Violence****Credits:** 4

This course examines intimate partner violence or domestic violence from its historic roots to the present. In accordance with an historical and contextual approach, the course examines theories that explain and describe the phenomenon, research that attempts to define it, as well as social policies, social movements, and intervention from a social work perspective. Intimate partner violence, cuts across ethnics, racial, and class boundaries and impedes a victim's wellbeing and social participation.

**Grade Mode:** Letter Grading**SW 785 - Study Abroad: Comparative Social Welfare Systems****Credits:** 4

Students examine the historical development of social welfare in another country including an analysis of the underlying values and attitudes that dictate practice and policy decisions. Includes agency site visits, lectures, themed readings, and visits to important cultural sites.

**Co-requisite:** INCO 589**Prerequisite(s):** SW 424 with a minimum grade of D- and SW 525 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**SW 795 - Independent Study in Social Service****Credits:** 1-6

Independent work under department faculty guidance. Enrollment by permission only through arrangement with specific faculty. May be repeated with a different focus. 12 hours in social work coursework required.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**SW 796 - Independent Study: Teaching Assistantship****Credits:** 1-6

Participating students provide leadership and supervision for small groups of social work majors in social work practice simulations. Student teaching assistants work closely with, and under the direction of, department faculty.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**SW 797 - Special Topics in Social Welfare****Credits:** 4

Seminar for advanced majors cross-listed with SW 897. Topics may include: alcohol and alcoholism, drugs and chemical dependency, income maintenance, health care, child welfare, aging, mental health, or developmental disabilities or study travel experiences. May be repeated for different topics.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**SW 798 - Undergraduate Thesis in Social Work****Credits:** 1-6

Collaborating with a faculty adviser, students propose, develop, and implement a thesis research project for both oral and written presentation. The thesis must be a significant research project through which the student independently demonstrates their expertise in a specific topic area.

**Prerequisite(s):** SW 601 with a minimum grade of D-.**Repeat Rule:** May be repeated for a maximum of 6 credits.**Equivalent(s):** SW 798H**Grade Mode:** Letter Grading**SW 798H - Honors Thesis****Credits:** 2-4

Working with an assigned faculty adviser, students propose and develop a thesis project for both oral and written presentation before the end of the semester. 16 hours in social work coursework required.

**Attributes:** Honors course**Repeat Rule:** May be repeated for a maximum of 6 credits.**Grade Mode:** Letter Grading**SW 799 - Senior Project****Credits:** 1-6

Working with an assigned faculty adviser, students propose and develop a community project for both oral and written presentation during the senior year.

**Prerequisite(s):** SW 601 with a minimum grade of C.**Repeat Rule:** May be repeated for a maximum of 6 credits. May be repeated up to 3 times.**Mutual Exclusion:** No credit for students who have taken SW 799H.**Grade Mode:** Letter Grading**SW 799H - Honors Project****Credits:** 1-6

Working with an assigned faculty adviser, students propose and develop a community project for both oral and written presentation during the senior year. Admission to the SW Honors Program required.

**Attributes:** Honors course**Prerequisite(s):** SW 601 with a minimum grade of C.**Repeat Rule:** May be repeated for a maximum of 6 credits. May be repeated up to 3 times.**Mutual Exclusion:** No credit for students who have taken SW 799.**Grade Mode:** Letter Grading

## Sociology (SOC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SOC 400 - Introductory Sociology****Credits:** 4

Overview of sociology as the scientific study of human social and cultural relationships. Social theory, methods and techniques of research, and current research findings on a wide range of social issues.

**Attributes:** Social Science (Discovery)**Equivalent(s):** SOC 400H, SOC 400W**Grade Mode:** Letter Grading**SOC 402 - Statistics****Credits:** 4

Elementary applied statistical techniques; tables, graphs, cross-clarifications; central tendency and dispersion; correlation and linear regression; confidence intervals and hypothesis testing. Other statistical classes including ADM 430, BIOL 528, ADMN 420, EREC 525, HHS #540, MATH 439, MATH 539, PHIL 412, MATH 644, PSYC 402 cannot be used to satisfy the major requirement. This is, all majors must take SOC 402 even if they have taken an introductory statistics course in another department. A student can, however, petition to receive eight credits for two introductory statistics courses, if and only if, SOC 402 is taken after the student became a sociology major and took their first statistics course prior to declaring SOC as their major. Majors cannot receive credit for statistics courses taken after they have declared SOC.

**Attributes:** Quantitative Reasoning(Disc)**Equivalent(s):** SOC #402H, SOC 502, SOC 502H

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H.

**Grade Mode:** Letter Grading**SOC #402H - Honors/Statistics****Credits:** 4

Elementary applied statistical techniques; tables, graphs, cross-classifications; central tendency and dispersion; correlation and linear regression; confidence intervals and hypothesis testing. No credit for students who have completed ADMN 430, BIOL 528, ADMN 420, EREC 525, HHS #540, MATH 439, MATH 539, MATH 644, PSYC 402, but petitions for acceptance of such courses to fulfill the sociology major requirement in statistics will be entertained.

**Attributes:** Honors course; Quantitative Reasoning(Disc)**Equivalent(s):** SOC 402, SOC 502, SOC 502H

**Mutual Exclusion:** No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H.

**Grade Mode:** Letter Grading**SOC #440A - Honors/Drug Addiction in American Society****Credits:** 4

This course will introduce students to interdisciplinary topics in the study of drug addiction, drug panics, and the U.S. war on drugs. It will draw on scholarly and journalistic research to consider sociological theories, methods, and data gathering techniques in the study of addiction, and it will explore ways in which individuals create, interact with, and are shaped by social groups and institutions, including those associated with politics, health, economics, family, and the legal system.

**Attributes:** Honors course; Social Science (Discovery)**Grade Mode:** Letter Grading**SOC 444A - Honors/Society in the Arctic****Credits:** 4

Introduction to societies of the far North today, from Alaska and Canada through Greenland, Iceland, northern Scandinavia and Russia. Reviews interconnected issues of social change, environment, sustainable development, local control, and modernization vs. traditions. Arctic dilemmas highlight some basic questions facing all societies in the 21st century.

**Attributes:** Environment,TechSociety(Disc); Honors course; Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**SOC 450 - Contemporary Social Problems****Credits:** 4

This course introduces students to the study of major social problems in contemporary society, including poverty, discrimination, inequality, crime, violence, and environmental degradation. Explores how and why people come to view certain social conditions as problematic. Also explores the consequences of and possible solutions to contemporary social problems.

**Attributes:** Social Science (Discovery)**Equivalent(s):** SOC 540**Grade Mode:** Letter Grading**SOC 515 - Introductory Criminology****Credits:** 4

Introduces the scientific study of crime. Reviews the different forms of criminal behavior, theories of crime, and strategies of crime control.

**Grade Mode:** Letter Grading**SOC 520 - Family****Credits:** 4

Sociological study of marriage and the family in American society. Following a life-cycle approach, topics include gender roles, communication and conflict, dating and mate selection, work and family economics, the transition to parenthood, middle- and late-life family, divorce, and remarriage.

**Equivalent(s):** SOC 520H**Grade Mode:** Letter Grading**SOC 525 - Juvenile Crime and Delinquency****Credits:** 4

Crime, violence, and the criminal justice system as it affects children and youth in the role of both perpetrators and victims.

**Grade Mode:** Letter Grading**SOC 530 - Race and Racism****Credits:** 4

This course examines the categories of race and ethnicity, and the way these two concepts help us describe historical trends and modern relations. By the end of the course. Students should have: an in-depth understanding of the origins of race and racism; be able to identify, explain, and apply various sociological concepts and theories pertaining to race, ethnicity, racial oppression; and be able to conceptualize, operationalize, and test a line of scientific inquiry on race.

**Attributes:** Social Science (Discovery)**Grade Mode:** Letter Grading**SOC 535 - Homicide****Credits:** 4

An introduction to theory and research in homicide studies, including a review of the origins of and social responses to homicide.

**Grade Mode:** Letter Grading

**SOC 555 - Death and Dying in America****Credits:** 4

This course will explore a cultural and structural overview of death and dying in American society. Topics include the historical contexts of the care and treatment of the dying and the dead; attitudes toward death; bereavement over the life course; socialization to death; anticipatory grief and terminal illness; funeral rituals and their social functions; burial, mourning and grief practices; and suicide and assisted suicide. Cannot earn credit if previously taken SOC 597 "Special Topics: Death and Dying in America".

**Grade Mode:** Letter Grading**SOC 565 - Environment and Society****Credits:** 4

Environment and Society focuses on the complex interactions between human communities and the natural world. The course considers the interconnected ways that social systems, the built environment, and related technologies produce environmental changes, and in turn how shifts in resources, air, water quality, climate, biodiversity, and ecosystems force societies to adapt. This course fulfills in the Environment, Technology, and Society category of UNH's Discovery Program.

**Attributes:** Environment,TechSociety(Disc)**Grade Mode:** Letter Grading**SOC 570 - Sexual Behavior****Credits:** 4

This course approaches sexuality as a social phenomenon. We examine variability in sexual practices, sexual identities, and sexual behaviors throughout history, across cultures, and throughout the life course of individuals. Particularly, we focus on the social control of sexuality and the extent to which sexualities are socially constructed. We consider the media and other cultural influences on a diverse range of sexual experiences and take a straightforward, non-stigmatizing approach to tackling controversial issues.

**Grade Mode:** Letter Grading**SOC #590 - Global Social Conflict****Credits:** 4

This course examines the causes and consequences of worldwide economic, cultural, and political conflict in the age of globalization. Issues covered include: economic inequality, gender, race, health, environmental sustainability, and violent extremism throughout the modern world.

**Grade Mode:** Letter Grading**SOC 595 - Independent Reading and Research****Credits:** 2-8

Independent study of advanced or specialized topics in sociology requiring extensive reading and writing. Before registering, students must develop a project in consultation with a faculty supervisor and submit a proposal to the undergraduate committee. Students are required to complete 12 sociology credits prior to taking this course.

**Grade Mode:** Letter Grading**SOC 597 - Special Topics****Credits:** 4

Occasional or experimental offerings. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**Special Fee:** Yes**SOC 599 - Sociological Analysis****Credits:** 4

Basic skills essential to sociological study, including: development of critical reading skills; evaluation of theory construction and evidence; analysis of classic and contemporary works, research, writing, and use of library resources. To be taken by sociology majors no later than the junior year.

**Attributes:** Inquiry (Discovery); Writing Intensive Course**Equivalent(s):** SOC 599W**Grade Mode:** Letter Grading**SOC 601 - Methods of Social Research****Credits:** 4

Overview of major research methods: survey analysis, personal interview, participant observation, content analysis, and experimental design. Each student designs and completes a research project. Students are strongly urged to have completed SOC 599 prior to enrolling.

**Attributes:** Writing Intensive Course**Prerequisite(s):** SOC 402 with a minimum grade of D-**Equivalent(s):** PSYC 502, SW 601, SW 601W**Grade Mode:** Letter Grading**SOC 611 - Sociological Theory****Credits:** 4

Analysis of the origins and development of sociological theory. Includes the classical works of Marx, Weber, and Durkheim and their connections to the major strands of present day research.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 620 - Drugs and Society****Credits:** 4

Provides students with an overview of drug using behavior as viewed from a sociological perspective. Highlights historical and current drug use trends, examines the social correlates of drug use, considers societal responses to drug use including treatment, prevention, and policy, and engages students in key controversial debates confronting U.S. citizens and policymakers. Provides a foundation for understanding of drugs and society.

**Grade Mode:** Letter Grading**SOC 625 - Mental Health and Society****Credits:** 4

This course introduces students to sociological approaches for studying and understanding mental health and illness in society. With an emphasis on the importance of social stress, we examine the distribution of mental illness in the United States and identify the factors that help to explain mental health differences across social roles and statuses.

**Grade Mode:** Letter Grading**SOC 627 - Sociology of Fashion****Credits:** 4

This course explores how clothing, accessories, and bodily adornment are socially constructed processes. We apply a sociological lens to uncover how fashion intersects with: social identities and aspirations; fads and trends; historical forces; how we modify our bodies; production and consumption of clothing and shoes; race, class, and gender; labor and human rights; globalization and trade; technology, and environmental issues in clothing production. Cannot earn credit if previously earned credit for SOC 697 "Special Topics Sociology of Fashion".

**Grade Mode:** Letter Grading

**SOC 635W - Medical Sociology****Credits:** 4

Health and illness are considered as a sociocultural phenomenon. Meanings are attached to health and illness as they are influenced by our social values and our cultural beliefs, which to a large degree are influenced by available medical technologies. People's experiences of health and illness are shaped by a range of social factors (e.g., race, class, gender) and follow clear patterns of social inequality. A critical approach is taken to examine topics such as the social determinants of health, illness and healthcare; the social construction of illness; the medicalization of society; and the social organization of health care.

**Attributes:** Writing Intensive Course**Equivalent(s):** SOC 635**Grade Mode:** Letter Grading**SOC 636 - Sociology of Justice****Credits:** 4

In this course, students will begin to understand how individuals, groups, and societies perceive justice, how to research those perceptions, and how those perceptions shape our lives. By the end of this course, students should have an advanced understanding of justice research and be able to apply sociological research principles to examining wide variety of real-world issues.

**Grade Mode:** Letter Grading**SOC 645 - Class, Status and Power****Credits:** 4

Focuses on the major dimensions of inequality, including class, gender, and race, by exploring the distribution of economic, political, and social resources within contemporary societies.

**Equivalent(s):** SOC 645W**Grade Mode:** Letter Grading**SOC 647 - Sociology of Work and Well-Being****Credits:** 4

What constitutes a 'good job' or a 'bad job'? What characteristics of jobs are harmful, and which job conditions protect worker health and wellbeing? In this course, we focus heavily on the nature of job stress, where it comes from, and why some people experience more of it than others. Topics will include socioeconomic disparities in stress exposure, gender and racial discrimination in the workplace, gig work and online platforms, social protection policies, and COVID-19. Cannot earn credit if already taken SOC 697 under the special topic "Work and Well-Being".

**Grade Mode:** Letter Grading**SOC #656 - Terrorism****Credits:** 4

This course provides a global assessment of the definition and nature of terrorism, trends in terrorism over the course of the past several decades, perspectives concerning the degree to which cultural, economic, and political conflict contribute to terrorism, and alternative means for dealing with terrorism in the age of globalization.

**Grade Mode:** Letter Grading**SOC #660 - Urban Sociology****Credits:** 4

Urban Sociology focuses on urban communities, urbanization, and urban social issues. Covers the historical development of cities; the difference between urban, suburban, and rural communities; urban life styles; and the significance of poverty and race for understanding contemporary American cities. Emphasizes American cities, with some consideration to world patterns of urbanization and the growth, development, and role of global cities.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 665 - Environmental Sociology****Credits:** 4

Interactions between society and the physical environment, including environmental constraints, population and economic growth, social impacts of resource development, large-scale environmental change, and the social bases of environmental attitudes, behavior, and politics.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 693 - Global Social Change****Credits:** 4

This course explores the causes and consequences of social change in societies around the world. Case studies of important social trends such as the diffusion of culture, international migration, health pandemics, changing status of women, environmental degradation, and promoting more equitable development enable investigation of the broad social implications of the process of globalization.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 697 - Special Topics****Credits:** 4

Occasional or experimental offerings. May be repeated for different topics.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated up to 2 times.**Grade Mode:** Letter Grading**SOC #715 - Criminological Theory****Credits:** 4

Introduces graduate students and advanced undergraduates to the major theoretical literature in crime and delinquency. Covers both classical and contemporary theory, with empirical assessments of theories, including macro- and micro-level control, strain, and learning theories, as well as recent developments in biosocial, deterrence, labeling, and critical/feminist theories.

**Grade Mode:** Letter Grading**SOC #720 - Sociology of Drug Use****Credits:** 4

Examines licit and illicit drug use from a sociological perspective. Draws primarily from the sociology of mental health and criminology to explore a variety of drug-related topics including historical and current U.S. drug trends, dominant theoretical approaches about the initiation into, and continued use of drugs, drug-related crime, therapeutic use of drugs, prevention and treatment of drug problems, and drug-related policies.

**Grade Mode:** Letter Grading**SOC 725 - Social Demography****Credits:** 4

Social demography examines the linkages between changes in the size, composition and distribution of the population and changes in social, environmental, economic and political factors. The course examines demographic methods and the materials and the analytical techniques used by demographers to analyze population redistribution, fertility, work, marriage, migration and mortality. The policy implications of demographic change will be examined with attention to the U.S. as well as the developed and developing world.

**Grade Mode:** Letter Grading

**SOC 730 - Communities and the Environment****Credits:** 4

People and the natural environments in which they live fundamentally structure communities around the globe. Economic change, expanding development, and human migration are transforming social and environmental conditions in both rural and urban settings, altering the identities of many communities as well as their relationships with the natural world. The importance of these emerging social and environmental issues has made them a focus for social science inquiry. This course exposes students to a range of sociological concepts, theories, and research approaches related to the study of communities and environmental issues. Some of the substantive themes that are covered include: population dynamics and environmental change; social capital and social networks; political economy and community development; collective action and social movements; science, technology, and environmental risks; and environmental racism and justice. The principal assignment for the course will be a research project where students investigate a community or environmental issue of their own interest.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 740 - Sociology of Mental Health****Credits:** 4

Introduces students to different sociological approaches for studying and understanding mental health and illness. Students examine the social distribution of mental illness in the United States and the social-structural factors that help to explain mental health variations. Also addresses issues surrounding mental health treatment, systems, and policies for the mentally ill.

**Grade Mode:** Letter Grading**SOC 745 - Race, Ethnicity, and Inequality****Credits:** 4

Sociological perspectives on race and ethnic relations for graduate and advanced undergraduate students. Topics include the creation of racial and ethnic identities, the nature and extent of segregation, education, employment, and wealth inequalities, and the effects of state policy. The course emphasizes both theoretical and empirical assessments.

**Grade Mode:** Letter Grading**SOC #773 - Childhood and Social Policy****Credits:** 4

Exposes students to a variety of sociological perspectives about childhood in American society. Stimulates analysis about how social institutions, like the modern family, school, economic system, justice system and communications media affect children. Assumes prior understanding of important sociological concepts, critical thinking skills and social science writing ability.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 788 - Advanced Medical Sociology****Credits:** 4

This course is intended to provide an in-depth introduction to the major theoretical frameworks of medical sociology and empirical research examining social factors that influence individual's health and illness. We will take a critical approach in our examination of: the distribution of health and illness (by socioeconomic status, sex/gender, and race/ethnicity); medicalization and social control; and the social construction of health and illness. Most of the learning in this course will take place through shared facilitation of class discussions based on the reading.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SOC 792 - Internship Independent Study****Credits:** 2-8

Provides upper level sociology majors with an opportunity to apply what they have learned in the classroom to the real world. This will provide the opportunity for students to work individually with a faculty member on an Internship with the option of variable credit. There is no formal class time required. Students will arrange meetings with supervising faculty to plan assigned readings, update internship progress and complete semester projects. Project ideas are developed with faculty and internship site supervisor.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**SOC 797 - Special Topics****Credits:** 4

Occasional or experimental offerings. May be repeated for different topics.

**Attributes:** Writing Intensive Course**Equivalent(s):** SOC 797W**Grade Mode:** Letter Grading**SOC 799 - Senior Thesis****Credits:** 4 or 8

Independent work in the library or field culminating in a written senior thesis. Recommended for, but not confined to, majors intending to pursue graduate studies. Students must arrange for supervision from two faculty members and submit a proposal to the Undergraduate Committee before registering. May be completed in one or two successive semesters during the senior year.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** SOC 699**Grade Mode:** Letter Grading**SOC 799H - Senior Honors Thesis****Credits:** 4 or 8

Independent work in the library or field culminating in a written senior honors thesis and a formal research presentation. Recommended for, but not confined to, majors intending to pursue graduate studies. Required for students participating in the departmental honors program as part of their 16 honors credits. Students must arrange for supervision from two faculty members and submit a proposal to the Undergraduate Committee before registering. May be completed in one or two successive semesters during the senior year.

**Attributes:** Honors course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** SOC 699H**Grade Mode:** Letter Grading

## Sociology (SOCI) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SOCI 410 - Introduction to Sociology****Credits:** 4

This course introduces basic concepts, theories, and methods in the discipline of sociology that reveal the relationship between the individual and society and challenge students to develop a sociological perspective. Students are exposed to diverse cultures and social structures with an emphasis on the dynamics of power and inequality on the local, national, and global levels as they are influenced by the social constructs of race, ethnicity, class, gender and sexuality.

**Attributes:** HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)**Equivalent(s):** SOC 501G**Grade Mode:** Letter Grading**SOCI 601 - Society and the Individual****Credits:** 4

This course explores the interface between individuals and their social context. It uses sociological perspectives such as symbolic interactionism, functional theory, and conflict theory to examine the relationships we as individuals have with our society. The course also examines the extent to which our roles and statuses are determined at birth, and the roles we play in shaping ourselves as well as the institutions in which we live. How social factors influence individual perceptions and choices is viewed in the context of the institution of marriage; family structure and relationships; demographics such as age, gender, race, ethnicity, and class; attitudes and moral behavior; violence and aggression; and work and authority.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.**Equivalent(s):** SOC 601G**Grade Mode:** Letter Grading**SOCI 603 - Work and Society****Credits:** 4

This course analyzes the social nature of work in industrial societies. Topics include the study of occupations, training, automation, unemployment, and the role of minorities in the workplace. Through ethnographic case studies and recent articles, the course compares work structures in North America, Asia, and Europe.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.**Equivalent(s):** SOC 603G**Grade Mode:** Letter Grading**SOCI 675 - Child Abuse and Neglect****Credits:** 4

This course provides an examination of child maltreatment from a variety of perspectives, including theoretical, cultural, historical, and legal. It offers definitions of the types of child abuse and neglect, and allows students to reflect on how culture and history play roles in the defining process. Students learn to identify signs and symptoms resulting from maltreatment, and take an in-depth look at how trauma affects all areas of child development. The roles of child protection workers, the complex child protection system, and the legal systems are explained. Students have the opportunity to critically review current research and debate emotionally charged ethical issues. This course challenges students to consider the dynamics that may lead people to harm children and connect the development of prevention strategies to these variables.

**Attributes:** HumanBehavSocial Sys (Gen Ed)**Prerequisite(s):** PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D-.**Equivalent(s):** SOC 607G**Grade Mode:** Letter Grading**SOCI 680 - Issues of Addiction in Special Populations****Credits:** 4

This course explores important complications that arise when dealing with addiction-related issues of special populations (e.g., children, homeless, criminal justice system involvement, gender, sexual orientation). Emphasis will be placed on exploring the ways to educate and connect people to the services available.

**Prerequisite(s):** (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-) and (PSY 565 with a minimum grade of D- or PSY 515G with a minimum grade of D-).**Equivalent(s):** SOC 612G**Grade Mode:** Letter Grading

## Spanish (SPAN)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SPAN 401 - Elementary Spanish I****Credits:** 4

Conducted in Spanish. For students with no previous knowledge of Spanish. Development of listening comprehension, speaking, reading, and writing skills, as well as cultural awareness of the Hispanic world. No credit for students who have had two or more years of Spanish in secondary school; however, any such students whose studies of Spanish have been interrupted for 5 years or more should consult the coordinator of elementary Spanish. SPAN 401-402 taken together satisfy the foreign language requirement.

**Grade Mode:** Letter Grading

**SPAN 402 - Elementary Spanish II****Credits:** 4

Conducted in Spanish. Development of listening comprehension, speaking, reading, and writing skills, as well as cultural awareness of the Hispanic world. Cannot be taken separately without permission of the instructor. SPAN 401-402 taken together satisfy the foreign language requirement.

**Attributes:** Foreign Language Requirement**Prerequisite(s):** SPAN 401 with a minimum grade of D-.**Grade Mode:** Letter Grading**SPAN 403 - Review of Spanish****Credits:** 4

Conducted in Spanish. Accelerated elementary Spanish course, designed for those who have had only 2 years of High school Spanish. Does not satisfy the foreign language requirement. Preparation for Spanish 503.

**Grade Mode:** Letter Grading**SPAN 503 - Intermediate Spanish I****Credits:** 4

Conducted in Spanish. Further development of reading, writing, speaking, and listening skills. Development of intercultural awareness through discussion and short papers in Spanish based on authentic texts from the Hispanic world. Counts toward the major and the minor in Spanish. Satisfies the Foreign Language Requirement.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** SPAN 503H**Grade Mode:** Letter Grading**SPAN 504 - Intermediate Spanish II****Credits:** 4

Conducted in Spanish. Further development of reading, writing, speaking, and listening skills. Development of intercultural awareness through discussion and short papers in Spanish based on authentic texts from the Hispanic world. Counts towards the major and minor in Spanish. Satisfies the foreign language requirement.

**Attributes:** World Cultures(Discovery)**Prerequisite(s):** SPAN 503 with a minimum grade of D-.**Equivalent(s):** SPAN 504H**Grade Mode:** Letter Grading**SPAN 525 - Introduction to Spanish Cultures****Credits:** 4

Historical, geographical, and artistic expressions of Spanish cultures that have formed the character of contemporary Spanish culture. Majors may take either SPAN 525 or SPAN 526 or another English language course with advisor approval, but only one can be counted for major credit.

**Attributes:** World Cultures(Discovery)**Grade Mode:** Letter Grading**SPAN 526 - Introduction to Latin American Cultures****Credits:** 4

Significant historical, geographical, and artistic expressions of pre-Colombian and Latin America cultures. Conducted in English. Counts towards the major and the minor in Spanish.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** SPAN 526H**Grade Mode:** Letter Grading**SPAN #535B - Professional Culture in Latin America - Case Study: Mexico and Brazil****Credits:** 4

Conducted in English. No previous Spanish or Portuguese required. Conducting business with countries in Latin America with a particular emphasis on Mexico and Brazil. The course focuses on the central role played by professional culture and business practices in the global marketplace.

**Attributes:** World Cultures(Discovery)**Equivalent(s):** LLC #535B**Grade Mode:** Letter Grading**SPAN 595 - Practicum****Credits:** 2-4

Practical use of Spanish language or cultural skills outside the classroom through special projects.

**Repeat Rule:** May be repeated for a maximum of 4 credits.**Grade Mode:** Letter Grading**SPAN 631 - Advanced Conversation and Composition I****Credits:** 4

Emphasis on presentational, interpersonal, written or spoken Spanish through in-class and online discussions and frequent out of class assignments based on cultural and literary readings and films. May include service learning option. Satisfies the foreign language requirement. Required for Spanish major and minor. The course sequence SPAN 631-SPAN 632 may be taken in any order.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Prerequisite(s):** SPAN 504 with a minimum grade of D-.**Equivalent(s):** SPAN 631H**Grade Mode:** Letter Grading**SPAN 632 - Advanced Conversation and Composition II****Credits:** 4

Emphasis on presentational, interpersonal, written or spoken Spanish through in-class and online discussions and frequent out of class assignments based on cultural and literary readings and films. May include service learning option. Satisfies the foreign language requirement. The course sequence SPAN 632-SPAN 631 may be taken in any order.

**Attributes:** World Cultures(Discovery); Writing Intensive Course**Prerequisite(s):** SPAN 504 with a minimum grade of D-.**Equivalent(s):** SPAN 632H**Grade Mode:** Letter Grading**SPAN 641 - Spanish Language Variation & Change****Credits:** 4

This course introduces students to the variation in the Spanish spoken today in Spain, Latin America, and the U.S. Students will improve speaking and listening skills through close study of pronunciation and language variation (geographic, social class, age, gender/sexuality, etc.). Students will deepen their understanding of language and culture through examining the relationship between language variation and language change in the Spanish-speaking world. This class is conducted in Spanish.

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.**Grade Mode:** Letter Grading

**SPAN 645 - Intro to Spanish Linguistics****Credits:** 4

Establishes the basis for future application of linguistic principles. Explores different areas of linguistics including morphology, word formation and verbal inflection. Issues in syntax and semantics are analyzed both in isolation and in terms of their relationship to each other. Students will be equipped with the skills necessary to apply these linguistic concepts to actual Spanish language data and to achieve a better understanding of the structures governing the language they are studying. Conducted in Spanish.

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SPAN 647 - Topics in Hispanic Cultural Studies****Credits:** 4

Contemporary approaches to the study of Hispanic cultural practices and perspectives that examine the intersections of politics, art, religion and the forces of globalization with the aim of further development of intercultural competence. Conducted in Spanish. May be taken more than once for credit if no duplication of content.

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**SPAN 648 - The Hispanic World Today****Credits:** 4

This course focuses on researching and discussing contemporary issues in Spain and/or Latin America while improving reading and oral performance. Primary sources include newspapers, resources from the internet, and/or archival materials.

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Equivalent(s):** SPAN 691, SPAN 692

**Grade Mode:** Letter Grading

**SPAN 650 - Hispanic Literature and Popular Culture****Credits:** 4

The study of literary texts and popular literary art forms.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SPAN 651 - Introduction to Spanish Literature and Thought****Credits:** 4

Reading and analysis of major works within the historical, cultural, and social background of the Iberian peninsula. Emphasis on works from medieval to Golden Age Spain. Conducted in Spanish.

**Attributes:** Humanities(Disc); Writing Intensive Course

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SPAN #652 - Introduction to Spanish Literature and Thought****Credits:** 4

Reading and analysis of major works within the historical, cultural, and social background of the Iberian peninsula. Emphasis on works from 19th century to contemporary works in Spain. Conducted in Spanish.

**Attributes:** Humanities(Disc); Writing Intensive Course

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SPAN #653 - Introduction to Latin American Literature and Thought****Credits:** 4

Reading and analysis with thematic focus on historical, cultural, and social backgrounds of Precolombian, colonial, and modern cultures in Latin America. Conducted in Spanish.

**Attributes:** Humanities(Disc); Writing Intensive Course

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SPAN 654 - Introduction to Latin American Literature and Thought****Credits:** 4

Reading and analysis of major works within the historical, cultural, and social background of Latin America. Emphasis on works in the 20th-21st century. Conducted in Spanish.

**Attributes:** Humanities(Disc); Writing Intensive Course

**Prerequisite(s):** SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SPAN 683 - Summer Study in Costa Rica****Credits:** 0 or 8

Studies in San Joaquin de Flores, Costa Rica. Six week summer immersion program for undergraduate students. Interested students should contact the program director.

**Co-requisite:** INCO 589

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**SPAN 686 - Study Abroad/Granada****Credits:** 0 or 20

Studies in Granada, Spain. Noncredit orientation meetings required during semester prior to departure. Interested students should consult with the program directors. (An IA [continuous grading] grade will be assigned until official transcript is received from the foreign institution.)

**Co-requisite:** INCO 588

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Credit/Fail Grading

**Special Fee:** Yes

**SPAN 790 - Topics in Second Language Acquisition/Pedagogy/Methodology****Credits:** 4

A) Introduction to Second Language Acquisition, B) Internet Technologies and Second Language Learning. May be taken more than once if no duplication of content.

**Repeat Rule:** May be repeated up to unlimited times.

**Grade Mode:** Letter Grading

**SPAN 795 - Independent Study****Credits:** 1-4

Guided individual study with training in bibliography and organization of materials. Topics selected by instructor and student in conference. Barring duplication of content, may be repeated for credit.

**Repeat Rule:** May be repeated up to unlimited times.

**Equivalent(s):** SPAN 797

**Grade Mode:** Letter Grading

**SPAN 797 - Topics in Hispanic Literary and Cultural Studies****Credits:** 4

A) Medieval Spanish Literature, B) Spanish Literature of the Renaissance and the Golden Age, C) Spanish Literature of the 18th and 19th Centuries, D) Spanish Literature of the 20th Century (Poetry/Theater/Prose), E) Contemporary Spanish Literature, F) Spanish Cultural Studies, G) Latin American Literature of the 16th and 17th Centuries, H) Latin American Literature of the 18th and 19th Centuries, I) 20th Century Latin American Literature (Poetry/Theater/Prose), J) Contemporary Latin American Literature, K) Cyberliterature and Cyberculture, L) Transatlantic Studies, M) Spanish and Latin American Philosophy and Essay, N) Indigenous Cultural Expression of the Americas, O) Hispanic Film Studies, P) U.S. Hispanic Cultural Studies, Q) Latin American Cultural Studies, R) Senior Seminar, S) Other. May be taken more than once for credit if no duplication of content. Any course in this category can be counted as your major discover capstone. Consult with your advisor.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 16 credits.**Equivalent(s):** SPAN 799**Grade Mode:** Letter Grading**SPAN 798 - Topics in Hispanic Linguistics and Cultural Studies****Credits:** 4

A) History of the Spanish Language, B) Study of Spanish Mood and Aspect, C) Sociolinguistics of Spanish, D) Discourse Analysis, E) Politeness and Pragmatics, F) Bilingualism and Spanish in the U.S., G) Spanish Pronouns, Agreement and Modifiers, H) Regional and Social Variation in Spanish Phonetics, I) Other. May be taken more than once for credit if no duplication of content. Any course in this category can be counted as your major discovery capstone. Consult with your advisor.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**SPAN 799 - Senior Honors****Credits:** 4

For senior Spanish majors with a minimum cumulative grade-point average of 3.40 and the same or better average in the major who want to undertake a special honors project in an area of Spanish language or literature of their choice.

**Attributes:** Honors course**Grade Mode:** Letter Grading

## Speech Language Assistant (SLA) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SLA 500 - Role of the Speech-Language Assistant****Credits:** 4

This course is designed to provide students with an overview of the profession of a Speech-Language Assistant. Topics include professional ethics, the American Speech-Language Hearing Association (ASHA), and gaining familiarity with the association's guidelines for becoming a registered Speech Language Assistant. Also discussed are roles and responsibilities such as observing, documenting, defining, and understanding goals and objectives in educational and medical settings; implementing both immediate and long-term accommodations; working as part of a team; practicing appropriate health and safety precautions; and working effectively with cultural differences in diverse populations.

**Attributes:** Writing Intensive Course**Equivalent(s):** COMM 511G, INST 511G**Grade Mode:** Letter Grading**SLA 501 - Survey of Communication Disorders****Credits:** 4

This course provides students with knowledge of the basic components and development of speech and language. Historical aspects of Speech-Language and Audiology are addressed. Various disorders including language, articulation, voice, fluency, and hearing are explored.

**Prerequisite(s):** SLA 500 with a minimum grade of D- or COMM 511G with a minimum grade of D-.**Equivalent(s):** COMM 512G, INST 512G**Grade Mode:** Letter Grading**SLA 502 - Anatomy and Physiology of Speech and Hearing****Credits:** 4

This course is designed to provide students in the speech-language concentration with knowledge of the basic anatomy and physiology of the speech production and perception systems to support understanding of directions from a Speech-Language Pathologist. The focus is on those aspects of anatomy and physiology that are critical for clinical implementation. Measurement tools and instrumentation used in the field are discussed.

**Prerequisite(s):** SLA 501 with a minimum grade of D- or COMM 512G with a minimum grade of D-.**Equivalent(s):** COMM 513G, INST 513G**Grade Mode:** Letter Grading**SLA 503 - Articulation and Phonological Disorders****Credits:** 4

This course introduces phonetic principles, categorization of sounds, and various applications of these concepts. Students become familiar with the International Phonetic Alphabet (IPA), learn to read a Speech-Language Pathologist's transcription, and develop their own transcription skills. Articulation and phonological disorders are presented and distinctions and direct connections discussed, with the primary emphasis on intervention and remediation strategies. Additional topics include children and adults for whom English is a second language, and individuals with dialectic and/or cultural differences.

**Prerequisite(s):** SLA 502 with a minimum grade of D- or COMM 513G with a minimum grade of D-.**Equivalent(s):** COMM 514G, INST 514G**Grade Mode:** Letter Grading

**SLA 504 - Introduction to Audiology and Aural Rehabilitation****Credits:** 4

This course is designed to equip Speech-Language Assistant concentration students with knowledge of the hearing process, symptoms of hearing impairment, basic methods by which an audiologist diagnoses hearing difficulties, and elements of rehabilitative approaches for persons with hearing impairment. An overview of various causes of hearing impairment is explored.

**Prerequisite(s):** SLA 503 with a minimum grade of D- or COMM 514G with a minimum grade of D-.

**Equivalent(s):** COMM 515G, INST 515G

**Grade Mode:** Letter Grading

**SLA 506 - Language Acquisition****Credits:** 4

This course introduces research, theory, and practical applications pertinent to first language acquisition. The development of language is explored through its five major components: phonology, pragmatics, semantics, morphology, and syntax. Stages of acquisition are traced from pre-linguistic communication in infancy through adolescents' use of abstract thinking and expressions. Distinctions between language disorders and developmental differences are considered, as are relationships between language and literacy skills (reading and writing).

**Attributes:** HumanBehavSocial Sys (Gen Ed); Writing Intensive Course

**Equivalent(s):** PSY 521G

**Grade Mode:** Letter Grading

**SLA 550 - Clinical Practicum I****Credits:** 2

This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.

**Prerequisite(s):** SLA 500 with a minimum grade of D- or COMM 511G with a minimum grade of D-.

**Equivalent(s):** COMM 516G, INST 516G

**Grade Mode:** Letter Grading

**SLA 551 - Clinical Practicum II****Credits:** 2

This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.

**Prerequisite(s):** SLA 550 with a minimum grade of D- or COMM 516G with a minimum grade of D-.

**Equivalent(s):** COMM 516AG, INST 516AG

**Grade Mode:** Letter Grading

**SLA 552 - Clinical Practicum III****Credits:** 2

This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.

**Prerequisite(s):** SLA 551 with a minimum grade of D- or COMM 516G with a minimum grade of D-.

**Equivalent(s):** COMM 516BG, INST 516BG

**Grade Mode:** Letter Grading

**SLA 553 - Clinical Practicum IV****Credits:** 2

This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.

**Prerequisite(s):** SLA 552 with a minimum grade of D- or COMM 516BG with a minimum grade of D-.

**Equivalent(s):** COMM 516CG, INST 516CG

**Grade Mode:** Letter Grading

## Sports Management & Leadership (SML)

**SML 521 - Theory of Coaching Basketball****Credits:** 2

Individual team offense and defense, rules of the game. Problems in team handling and conditioning.

**Prerequisite(s):** (SPST 565 (may be taken concurrently) with a minimum grade of D- or SML 565 (may be taken concurrently) with a minimum grade of D-).

**Equivalent(s):** KIN 521, SPST 521

**Grade Mode:** Letter Grading

**SML 522 - Theory of Coaching Football****Credits:** 2

Systems of play, team and individual offensive and defensive fundamentals, theory and strategy of team play, coaching methods, physical conditioning, rules.

**Prerequisite(s):** (SPST 565 (may be taken concurrently) with a minimum grade of D- or SML 565 (may be taken concurrently) with a minimum grade of D-).

**Equivalent(s):** KIN 522, SPST 522

**Grade Mode:** Letter Grading

**SML 523 - Theory of Coaching Ice Hockey****Credits:** 2

Basic hockey skills. Fundamentals of individual and team offense and defense; coaching methods; rules. Student must have basic skating skills prior to taking course.

**Prerequisite(s):** (SPST 565 (may be taken concurrently) with a minimum grade of D- or SML 565 (may be taken concurrently) with a minimum grade of D-).

**Equivalent(s):** KIN 523, SPST 523

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SML 525 - Theory of Coaching Soccer****Credits:** 2

Fundamental and advanced skills and techniques; offensive and defensive principles of team play; tactical formations and strategy; methods of training and practicing; rules.

**Equivalent(s):** KIN 525, SPST 525**Grade Mode:** Letter Grading**SML 528 - Theory of Coaching Track and Field****Credits:** 2

Starting, sprinting, middle-distance and distance running, relay, hurdling, high and broad jumping, pole vault, shot putting, discus, hammer, and javelin. Methods of training and practicing.

**Equivalent(s):** KIN 528, SPST 528**Grade Mode:** Letter Grading**SML 560 - Sport Psychology****Credits:** 4

Introduction to the discipline of sport psychology. Explores behavioral, cognitive, and social psychology in relation to elite, collegiate and high school athletes, as well as recreational sport participants.

**Equivalent(s):** KIN 560, SPST 560**Grade Mode:** Letter Grading**SML 561 - History of American Sport and Physical Culture****Credits:** 4

Major individuals, organizations, and trends that influenced the development of an American industry in sports, active recreation, and physical fitness. Readings, discussions, and research projects provide experience in the craft and utility of history.

**Attributes:** Historical Perspectives(Disc)**Equivalent(s):** KIN 561, KIN 561W, SPST 561, SPST 561W**Grade Mode:** Letter Grading**SML 561W - History of American Sport and Physical Culture****Credits:** 4

Major individuals, organization and trends that influenced the development of an American industry in sports, active recreation, and physical fitness. Reading, discussions and research projects provide experience in the craft and utility of history.

**Attributes:** Historical Perspectives(Disc); Writing Intensive Course**Equivalent(s):** KIN 561W, SPST 561W**Grade Mode:** Letter Grading**SML 562 - Sport Media Relations****Credits:** 4

A survey of basic concepts of sports media relations for students considering careers in school or college sports coaching or administration, media or related fields. The focus is on developing necessary skills, techniques and recommended media relations practices as well as social implications of the media in sports public relations including print, radio, television, the World Wide Web and social media.

**Equivalent(s):** KIN 562, SPST 562**Grade Mode:** Letter Grading**SML 564 - Introduction to Sport Marketing****Credits:** 4

An introductory study of sport marketing, which includes the basic principles, key scholars, relevant scholarship, and necessary experiential elements to aid students in understanding the discipline's applied and academic aspects. This course will introduce traditional marketing concepts as well as focus on the marketing of sport and through sport.

**Equivalent(s):** KIN 564, SPST 564**Grade Mode:** Letter Grading**SML 565 - Principles of Coaching****Credits:** 4

Overviews current theory and practice in coaching education, including sport pedagogy, physiology, psychology, administration and risk management. Issues of performance and competition specific to child, youth and collegiate coaching are addressed.

**Equivalent(s):** KIN 565, SPST 565**Grade Mode:** Letter Grading**SML 565A - Clinical Practice in Coaching****Credits:** 2

Students will learn and utilize best practices in the field to create safe, positive and effective coaching environments while teaching technical and tactical sport skills. Group management, motivation skill progression, evaluation and feedback will be explored. An emphasis will be placed on writing and implementing practice objectives, as well as effective practice design and execution. This course will include weekly practical coaching sessions.

**Prerequisite(s):** SML 565 with a minimum grade of D- or SPST 565 with a minimum grade of D-.**Equivalent(s):** SPST 565A**Grade Mode:** Letter Grading**SML 568 - Global Perspectives in Sport****Credits:** 4

Global Perspectives in Sport explores the intersections of management and the cross cultural context of sport in examining issues and challenges in sport around the globe. This course will prepare students to think critically about the organization, governance, business activities, and cross-cultural context of modern sport on an international level.

**Equivalent(s):** KIN 568, SPST 568**Grade Mode:** Letter Grading**SML 580 - Sport Industry****Credits:** 4

Overviews the various segments that make up the sport industry, including governing bodies, the mass media, sporting goods firms, players' and coaches' associations, public regulatory agencies, and secondary and higher education. Readings and discussions consider the development and structure of each segment. interaction between segments, legal issues, and policy implications. While the course will focus on the United States, there is some comparison to other countries.

**Equivalent(s):** KIN 580, SPST 580**Grade Mode:** Letter Grading**SML 630 - Sport Facility and Event Management****Credits:** 4

Students learn the principles and processes involved in effective sport facility and event management. In terms of facilities, students explore the concepts of facility design, planning, systems, risk management, marketing, and ownership. In terms of events, students explore the concepts of creation, impact(s) on host communities, marketing/ sponsorship, and the potential positive and negative outcomes of sport events.

**Equivalent(s):** KIN 630, SPST 630**Grade Mode:** Letter Grading**Special Fee:** Yes

**SML 631 - Sport Media Production****Credits:** 4

Sport media professionals are expected to write their own scripts, produce their own content, and distribute that content on multiple digital platforms. Sport Media Production is designed to combine media management with production work in digital media, video, podcasting and website design. This course examines many of the current distribution platforms (Twitter, Facebook, Youtube, blogs, mobile applications) and the tools to create media for these outlets. In this course, students will create media using Adobe Creative Cloud and current video-editing systems.

**Prerequisite(s):** (SML 562 with a minimum grade of D- or SPST 562 with a minimum grade of D-).

**Equivalent(s):** KIN 631, SPST 631

**Grade Mode:** Letter Grading

**SML 634 - Sport Sponsorship and Sales****Credits:** 4

The goal of this course is for students to develop an understanding of all aspects of sport sales and sponsorship. This course will explain the intricacies of both sport sales and sport sponsorship as well as demonstrate the ways they overlap and differ. Specifically, this course will cover concepts such as aftermarketing, up-selling, benefit selling, and sponsorship proposals.

**Equivalent(s):** KIN 634, SPST 634

**Grade Mode:** Letter Grading

**SML 643 - Social Media Marketing in Sport****Credits:** 4

Students examine the use of social media as a tool in the marketing of sport and sport-related products. They are expected to effectively analyze and prescribe different ways in which social media can enhance the marketing profile of such products upon course completion. Student work should facilitate a deep understanding of social media in its constituent forms as they apply to sport and students should be able to examine such use critically.

**Equivalent(s):** KIN 643, SPST 643

**Grade Mode:** Letter Grading

**SML 645 - Leadership in Sport****Credits:** 4

This course examines leadership theories and behavior as it relates to the sport industry. Students will study leadership behavior as it relates to coaching, administering athletic departments or programs, and directing sport-related businesses. Additionally, this course will explore the ethical issues dilemmas, and ethical decision-making process sport managers face in professional, collegiate and interscholastic sport.

**Equivalent(s):** SPST 645

**Grade Mode:** Letter Grading

**SML 650C - Internship in Sport Management and Leadership****Credits:** 1-8

Experiential learning in a setting appropriate to the major option and to student's objectives. An 8 credit internship requires a minimum of 600 hours experience; fewer credits will require proportionally fewer hours. May be on- or off-campus with an approved organization. Student must participate in securing the internship. A journal, bi-weekly reports and a final paper required. May be repeated, with no more than 8 credits taken in any given semester.

**Repeat Rule:** May be repeated for a maximum of 12 credits.

**Equivalent(s):** KIN 650C, SPST 650C

**Grade Mode:** Letter Grading

**SML 650D - Internship in Coaching****Credits:** 2-4

Experiential learning in a setting appropriate to student's learning objectives in coaching. May be on- or off-campus with an approved organization. Student must participate in securing the assistantship. A journal, bi-weekly reports, and final report required.

**Prerequisite(s):** (SPST 565 with a minimum grade of D- or SML 565 with a minimum grade of D-).

**Repeat Rule:** May be repeated for a maximum of 12 credits.

**Equivalent(s):** KIN 650D, SPST 650D

**Grade Mode:** Letter Grading

**SML 693 - Teaching Assistantship****Credits:** 2

A) Physical Education Pedagogy; B) Exercise Leader; C) Outdoor Education; D) Science Labs; E) Cardiac Rehabilitation; F) Coaching. Students serve as teaching teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching assistants' and administrative duties. May be repeated barring duplication of subject.

**Repeat Rule:** May be repeated for a maximum of 4 credits.

**Equivalent(s):** KIN 693, SPST 693

**Grade Mode:** Credit/Fail Grading

**SML 696 - Independent Study****Credits:** 2-4

An advanced, individual scholarly project under the direct supervision of a faculty member.

**Equivalent(s):** KIN 696, SPST 696

**Grade Mode:** Letter Grading

**SML 696W - Independent Study****Credits:** 2-4

An advanced writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty advisor will prepare a written proposal that outlines: questions to be pursued, methods of investigation, students qualifications to conduct the research, nature of finished written product (e.g. case study, position paper, extended lab report). Proposal must be approved by major faculty and dept. chair prior to students registration for SML 696W. All SML 696W projects must include Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.

**Attributes:** Writing Intensive Course

**Equivalent(s):** KIN 696W, SPST 696W

**Grade Mode:** Letter Grading

**SML 699H - Honors Project****Credits:** 4

Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.

**Attributes:** Honors course

**Equivalent(s):** KIN 699H, SPST 699H

**Grade Mode:** Letter Grading

**SML 738 - Sport Finance****Credits:** 4

This course examines the financial tools that sport managers use to run their sport businesses. Therefore it explores traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sport organizations, including the tie value of money, capital structuring, stocks, inventory management, and taxation.

**Equivalent(s):** SPST 738**Grade Mode:** Letter Grading**SML 740 - Athletic Administration****Credits:** 4

Introduces basic management components and processes used in the successful administration of school and college athletic programs. Topics include planning, organizing, and managing sports programs, personnel, and policies; game scheduling; finances and facilities; equipment and event management; student support services; and key legal issues.

**Equivalent(s):** KIN 740, SPST 740**Grade Mode:** Letter Grading**SML 741W - Social Issues in Contemporary Sports****Credits:** 4

Investigation of interrelationships among sport, culture, and society in an attempt to understand the role and function of sport in contemporary society. Overview of selected socio-cultural factors that influence and result from participation in sports.

**Attributes:** Writing Intensive Course**Equivalent(s):** KIN 741, SML 741, SPST 741**Grade Mode:** Letter Grading**SML 761 - Senior Seminar Sport Management and Leadership****Credits:** 4

Discussions of sport studies topics, such as gambling, aggression, media, gender, race, class. Students consider different disciplinary approaches to these topics and develop projects to advance knowledge related to their interests. Students must accumulate an aggregate total of 150 hours of work (paid or unpaid) in four approved sport organizations before they are allowed to register for SML 761.

**Attributes:** Writing Intensive Course**Equivalent(s):** KIN 761, SPST 761**Grade Mode:** Letter Grading**SML 764 - Advanced Sport Marketing****Credits:** 4

An advanced course covering sport marketing, which includes a review of key sport marketing terms/concepts, in-depth experience writing a sport marketer, and practical experience acting as a sport marketer. This course will instruct students on how to complete all aspects of an in-depth marketing plan. This is an undergraduate/graduate dual student course.

**Prerequisite(s):** (SPST 564 with a minimum grade of D- or SML 564 with a minimum grade of D- or ADMN 585 with a minimum grade of D-).**Equivalent(s):** KIN 764, SPST 764**Grade Mode:** Letter Grading**SML 765 - Advanced Topics in Coaching****Credits:** 4

This course goes beyond the basic principles of coaching and addresses advanced topics in coaching (talent identification, talent development) from both the science and the art of coaching technique and strategies. This course is structured as an upper division course in Sport Studies. Content includes topics related to the development of the field of coaching. The class makes extensive use of case studies and analysis of practical coaching situations for the betterment of coach development. This course combines lecture, small group discussion and practical application of material.

**Prerequisite(s):** (SML 565 with a minimum grade of D- or SPST 565 with a minimum grade of D- or KIN 565 with a minimum grade of D-).**Equivalent(s):** KIN 765, SPST 765**Grade Mode:** Letter Grading**SML 780 - Psychological Factors in Sport****Credits:** 4

Factors of outstanding athletic achievement; psychological variables in competition; the actions and interactions of sport, spectator, and athlete. Special attention directed to strategies for coaches, teachers, and athletic trainers to utilize sport psychology in their professional practice.

**Prerequisite(s):** PSYC 401 with a minimum grade of D-.**Equivalent(s):** KIN 780, SPST 780**Grade Mode:** Letter Grading**SML 798 - Special Topics****Credits:** 1-4

New or specialized courses not normally covered in regular course offerings. Special fee on some sections.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** KIN 798, SPST 798**Grade Mode:** Letter Grading**Special Fee:** Yes

## Supply Chain Management (SCM) CPSO

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SCM 570 - Supply Chain Purchasing Management****Credits:** 4

In this course, students will learn how purchasing and supply management have become increasingly visible in a world where supply is a major determinant of corporate survival and success. Supply chain performance and influences will be examined as they are not only operational and financial risks but also reputational risk. Extending the supply chain globally into emerging regions places new responsibilities on the supplier and supply, not only to monitor environmental, social, political, and security concerns, but also to influence them. Thus, students will develop a more in-depth understanding of the job of the supply manager of today as they go beyond the scope of supply chain efficiency and value for money spent to search for competitive advantage in the supply chain.

**Prerequisite(s):** MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.**Equivalent(s):** SCM 510G**Grade Mode:** Letter Grading

**SCM 610 - Supply Chain Management****Credits:** 4

This course explores the management and flow of materials in a typical enterprise supply chain. Students examine a complete overview of material flow, from internal and external suppliers, to and from the enterprise. Topics may include basic elements of the supply chain, just-in-time (JIT), total quality management (TQM), enterprise resource planning (ERP), demand planning, and capacity management.

**Prerequisite(s):** (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-) and (CMPL 402 with a minimum grade of D- or CMPL 502G with a minimum grade of D- or MGMT 502G with a minimum grade of D-) and (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-).

**Equivalent(s):** MGMT 610G, SCM 610G

**Grade Mode:** Letter Grading

**SCM 715 - Logistics Management****Credits:** 4

Logistics is planning and managing the movement of goods along the supply chain. This course provides students opportunity to identify and apply logistical and advanced managerial terms and theories. Designing effective development and management of the supply chain network is an invaluable source of sustainable, competitive advantage in today's turbulent global marketplace. In the contemporary scenario, demand is difficult to predict and the supply chain needs to be more flexible and customer-focused.

**Prerequisite(s):** SCM 610 with a minimum grade of D- or SCM 610G with a minimum grade of D-.

**Equivalent(s):** SCM 615G

**Grade Mode:** Letter Grading

## Sustainability (SUST)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**SUST 401 - Exploring Sustainability****Credits:** 4

This interdisciplinary course is focused on discovering what sustainability means, understanding the challenges, and exploring transformative solutions. We explore the concept of sustainability and the three intersecting dimensions of environmental, social, and economic well-being. We learn about systems and explore specific sustainability challenges. Learning in this course is active and participatory. We also explore the role of personal and collective action and how we each can play a role in building a more sustainable society.

**Attributes:** Environment, TechSociety(Disc)

**Grade Mode:** Letter Grading

**SUST #401A - Surveying Sustainability****Credits:** 2

This course explores the history of sustainability and the varied and changing meanings of the concept. It focuses on the principles of sustainability in support of the long-term welfare of humans and the earth system. Students discuss and debate a set of global grand challenges, their local and national ramifications, and how to connect knowledge to action. To count towards the SDM, it must be followed by SUST #401B at Shoals Marine Lab.

**Co-requisite:** SUST #401B

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SUST #401B - Surveying Sustainability Lab****Credits:** 2

This week long intensive course takes place at the Shoals Marine Laboratory, and must be preceded by SUST #401A. This course is focused on using the Isles of Shoals archipelago as a case study of the ecological, economic, and social aspects of sustainability, as explored through a systems framework.

**Co-requisite:** SUST #401A

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SUST 501 - Sustainability in Action****Credits:** 4

This course explores what sustainability action entails from academic and practitioner perspectives. We begin by understanding the cross-cutting perspectives and methods of sustainability science including transdisciplinarity, systems thinking, stakeholder driven research, and solutions-based projects. We build on this knowledge to explore sustainability challenges using case studies to provide current and local context for the material we cover. Students are expected to apply the theoretical concepts to these practical examples of sustainability science in practice.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** SUST 401 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**SUST 600 - Sustainability Independent Study****Credits:** 1-4

SUST 600 will provide an independent study to students who are interested in studying of a topic in sustainability in depth. Due to the highly personalized nature of SUST 600, the specific readings, activities and assignments will vary based on student interests and disciplinary backgrounds. At a minimum, students will be guided in how to prepare a project proposal, place their work within the current literature on the topic, and complete a final project.

**Prerequisite(s):** SUST 401 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Credit/Fail Grading

**SUST 605 - Sustainability Internship****Credits:** 1-4

SUST 605 will provide credit for practical work or a project experience in sustainability. The purpose of SUST 605 is to gain practical experience working in a sustainability field while simultaneously achieving specific learning goals pre-identified by the student and faculty mentor.

**Prerequisite(s):** SUST 401 with a minimum grade of D-.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Credit/Fail Grading

**SUST 750 - Sustainability Capstone****Credits:** 4

This course is the culminating experience for the Sustainability Dual Major. The overall format is to: 1) synthesize the knowledge obtained in other core courses and elective courses taken for the Sustainability Dual Major; and 2) work in groups to apply that knowledge to a specific project. As sustainability science is focused on developing solutions to place-based sustainability challenges, students will delve into a specific sustainability issue, applying their disciplinary expertise within interdisciplinary teams.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** SUST 401 with a minimum grade of C- and SUST 501 with a minimum grade of C-.

**Grade Mode:** Letter Grading

# Sustainable Agriculture & Food Systems (SAFS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

## SAFS 403 - Green Thumb Workshop

**Credits:** 2

The objective of this course is to instill a life-long appreciation for garden plants and the many aesthetic, therapeutic, and culinary roles they play in enhancing our lives and landscapes. This course emphasizes hands-on learning of key horticultural skills and techniques (e.g. garden design, propagation, pruning, plant breeding, and problem diagnosis), complemented by activities designed to bring the beauty and utility of plants to life (e.g. flower arranging, botanical drawing, dyeing, and tastings).

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## SAFS 405 - Sustainable Agriculture and Food Production

**Credits:** 4

This course introduces the fundamental concepts that define sustainable and organic agriculture. We will explore the scientific and biological principles that underlie sustainable and organic farming techniques and methods, and each student will explore research-based evidence surrounding the sustainability of different practices within the agricultural and food system. We will study the environmental, social and economic impacts of different food production systems, with an emphasis on systems common in the U.S. Finally, we will look at the role each of us has in influencing how food is grown, either as producer or as a consumer.

**Attributes:** Environment,TechSociety(Disc)

**Equivalent(s):** PBIO 405

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## SAFS 410 - A Taste of the Tropics

**Credits:** 4

This course will expose students to the exciting world of tropical agriculture and the ways that people in the tropics utilize a diverse array of food crops. Our lives as consumers in the developed world are touched by tropical products every single day. Whether it's the cinnamon in your tea, the vanilla in your cookies, the black pepper on your salad, or your cup of hot coffee, you likely consume tropical crops whether you know it or not. Ever stop to wonder where these items are from and how they are produced? We will examine agriculture and food culture throughout the tropical world's four principle areas: Latin America, Tropical Asia, Tropical Africa, and the South Pacific. Production systems ranging from large scale modern high input operations to home subsistence gardens are explored. Tropical crops are examined in five major groups: grains and legumes, starchy roots, exotic vegetables, tropical fruit, and herbs, spices, medicinal plants. Cultural uses of these crops throughout the tropical world are given special emphasis.

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Letter Grading

## SAFS 415 - Introduction to Brewing Art and Science

**Credits:** 4

Introduction to the scientific foundations of beer brewing. Topics covered will include beer styles; ingredient sourcing; industrial production from nano to macro scale; current trends and topics; quality control; safety and sustainability.

**Grade Mode:** Letter Grading

## SAFS 421 - Introductory Horticulture

**Credits:** 0 or 4

This course will introduce the disciplines of plant science and horticulture. Students will learn the fundamentals of plant structure and how cells, tissues, organs and whole plants develop and function. Students will then explore how environmental factors affect growth and development, and how humans manipulate them to produce horticultural crops: fruits, vegetables, flowers and landscape plants. Labs are designed to emphasize and reinforce the principles covered in lecture and will give students a hands-on introduction to horticulture. Lab.

**Attributes:** Biological Science(Discovery); Discovery Lab Course

**Equivalent(s):** PLSC 421

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## SAFS 430 - Plant Propagation

**Credits:** 4

Plant Propagation is an introductory hands-on course. Students will learn the techniques and skills necessary to propagate plants by seed, cuttings, grafting, budding, division, layering, and tissue culture. Students will also learn how plant morphology, anatomy and physiology and the environment influence the success of plant propagation.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## SAFS 502 - Agroecology

**Credits:** 4

This course introduces students to the discipline and practice of agroecology, with an emphasis on relevant ecological theory within the context of production agriculture. Students are exposed to key ecological principles from population, community, and ecosystem ecology and agronomy. Students learn about the history and consequences of modern industrial agricultural systems and the need for more sustainable management practices that consider ecological interactions.

**Grade Mode:** Letter Grading

## SAFS #510 - Agriculture and Development in the Neotropics

**Credits:** 4

Course is designed as a three week immersion into tropical agriculture and Costa Rican ecology and culture. Agriculture plays a pivotal role in Costa Rica's history and in shaping current events. Production of horticultural and agronomic crops occurs on a variety of scales ranging from large export based systems, to mid-sized operations for domestic sales, and sustenance based home gardens. Examples of all systems are visited and discussions focus on their overall sustainability. Sustainability is a broad concept and requires consideration of socio-cultural, environmental, and economic factors. Agriculture and agricultural products infuse the culture as seen by large participation in farmers markets and appreciation for a wide variety of fruits and vegetables prepared in myriads of ways. An appreciation for nature also infuses the culture and is embodied by the country's extensive system of national parks and protected reserves along with the national philosophy of 'Pura Vida'.

**Attributes:** World Cultures(Discovery)

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**SAFS 515 - Technical Brewing****Credits:** 4

Technical brewing will focus on learning skills needed in the brewing industry. This hands-on class will focus on sensory, the brewing process, quality control, safety, and sanitation in the brew house. Must be 21 to enroll in the course.

**Prerequisite(s):** SAFS 415 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**SAFS 517 - Advanced Aspects of Brewing****Credits:** 4

In Advanced Aspects of Brewing, we will examine five specific aspects of the brewing industry: microbiology, waste products, sustainability, engineering, and analytical chemistry. We will utilize the UNH brewery to make a series of unique products that will serve as the testing basis for each module.

**Prerequisite(s):** SAFS 415 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**SAFS #600 - Field Experience****Credits:** 0

As part of their degree program, students are expected to engage in a work experience or internship under professional supervision and approved by sustainable agriculture faculty. Provides the opportunity to apply academic knowledge in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty advisor selected by the student.

**Equivalent(s):** SAFS 600W**Grade Mode:** Credit/Fail Grading**SAFS 601 - Fruit Crop Production****Credits:** 4

This course explores the origin, distribution, botany, and cultural practices of fruit crops. Fruit crops represent an important component of both our dietary needs and many agricultural production systems. Emphasis is given to temperate fruit crops suitable for New England growing conditions. Other topics explored include integrating fruit crops into landscapes, organic and conventional cultural practices, and post-harvesting handling.

**Prerequisite(s):** SAFS 421 with a minimum grade of D-.**Grade Mode:** Letter Grading**SAFS 620 - Food Systems & Community Resilience****Credits:** 4

This course is designed to provide a broad overview of the emerging field of food systems. We will use a systems perspective to better understand how the U.S. food system shapes the food we eat, and the character and health of our communities and environment. In the second half of the course, we will critically evaluate alternative food system development, policies, and initiatives aimed at improving farmers' livelihoods, environmental sustainability, food justice, and community resilience.

**Prerequisite(s):** SAFS 405 with a minimum grade of D-.**Grade Mode:** Letter Grading**SAFS 632 - Urban Agriculture****Credits:** 4

Urban agricultural systems play an important role in local food production. Production systems range from community gardens to completely controlled production environments. Urban farmers face unique challenges developing sustainable business models due to high land costs, waste management, post-harvest storage, and limited technical experience. This course provides a practical, hands-on understanding of urban agricultural production systems. Emphasis is placed on controlled environmental agriculture from an urban farmer's perspective through classroom discussion and production systems operation.

**Grade Mode:** Letter Grading**SAFS 651 - Plant Pathology****Credits:** 4

Plant pathology explores the nature, impact and management of plant diseases. Topics covered include organisms and environmental causes of plant diseases and disorders, how plant pathogens interact with host plants and the environment to cause disease, types of diseases, disease development and spread, the human environmental costs of plant diseases, diagnosis, and prevention and management. Students learn to diagnose diseases and disorders through the recognition of symptoms and signs. Laboratory exercises explore the casual agents of plant diseases, symptom and signs, and diagnosis. Lab.

**Prerequisite(s):** BIOL 409 with a minimum grade of D- or SAFS 421 with a minimum grade of D-.**Equivalent(s):** BOT 651, PBIO 651**Grade Mode:** Letter Grading**SAFS 670 - Systems Thinking: Land Use Capability and Sustainability in Aotearoa New Zealand****Credits:** 4

This course establishes a conceptual framework in systems thinking to critically examine New Zealand and global examples of the challenges that have arisen from the mismatch between land use and land use capability. Students investigate downstream effects of the rural-urban divide (food-justice), on people, health, services and the environment. Food security, ethical foods, as well as the influence of climate change on food supply and the viability of agribusiness are included.

**Co-requisite:** INCO 588, SAFS 671, SAFS 672, SAFS 673**Grade Mode:** Letter Grading**Special Fee:** Yes**SAFS 671 - Agroecology and Sustainable Land Management in Aotearoa New Zealand****Credits:** 4

Agroecology is a way of thinking and acting. Using this lens, students investigate the interface of agriculture and the natural environment. Through first-hand experiences with agribusiness, students explore enduring solutions for sustainable food systems. The emphasis will be on dimensions of agroecology that are relevant in a framework of sustainable land management; and on gaining confidence in evaluating processes and science associated with the biological and physical process in agroecosystems.

**Co-requisite:** INCO 588, SAFS 670, SAFS 672, SAFS 673**Grade Mode:** Letter Grading**Special Fee:** Yes

**SAFS 672 - Pathways to Sustainable Agriculture and Food Systems in Aotearoa New Zealand****Credits:** 4

This course empowers students to pursue knowledge and understanding of food systems around the interface of policy, practice, and science to build pathways toward technically robust, economically sound and viable solutions which enable transformation in the rural landscape. Topics include: value systems, socio-cultural benefits of re-thinking food systems at scale, carbon-forestry, carbon offsets, nutrient cap-and-trade models, (Integrated) Catchment Management and Climate Smart Agriculture. Critical thinking and risk assessment tools are integral components.

**Co-requisite:** INCO 588, SAFS 670, SAFS 671, SAFS 673**Grade Mode:** Letter Grading**Special Fee:** Yes**SAFS 673 - Agricultural Production and Business Practice in Aotearoa New Zealand****Credits:** 4

In this experiential course students will spend time in farm or agribusiness placements. Practical, hands-on experience of the workings of agribusiness provides students with opportunities to enhance their autonomy and capacity as active learners. Students will gain transferable skills, increase competency and develop a comprehensive understanding of sustainability initiatives and practices of food systems. Students can transfer insights from classroom work to a practical setting and bring previously developed skills to a new context.

**Co-requisite:** INCO 588, SAFS 670, SAFS 671, SAFS 672**Grade Mode:** Letter Grading**Special Fee:** Yes**SAFS 679 - Food Production Field Experience I****Credits:** 4

This is part one of a two course series to be taken during spring semester. Course provides students with hands-on experience in growing food and managing a small farm business. We will be growing fresh vegetables and some fruits for the UNH Dairy Bar. Lectures, readings, and hands-on activities during Part I focus on all aspects of production: propagation, crop establishment, irrigation, crop management, soil considerations, and pest and disease practices.

**Prerequisite(s):** SAFS 405 with a minimum grade of D-.**Grade Mode:** Letter Grading**SAFS 680 - Food Production Field Experience II****Credits:** 4

This is part of a two course series to be taken during fall semester. Course provides students with hands-on experience in growing food and managing a small farm business. We will be growing fresh vegetables and some fruits for the UNH Dairy Bar. Lectures, readings, and hands-on activities in part two focus on crop harvesting and maturity, post-harvest considerations, marketing, special event planning and execution, record keeping, and small farm business management.

**Prerequisite(s):** SAFS 405 with a minimum grade of D- and SAFS 679 with a minimum grade of D-.**Grade Mode:** Letter Grading**SAFS 689 - Greenhouse Management and Operation****Credits:** 4

Course provides introduction to greenhouse construction, design, environmental control, and current trends in the industry. Fundamentals of starting a greenhouse business including safety and labor, marketing, and post-harvest considerations also covered. Efforts towards making the greenhouse industry more sustainable are explored alongside with certification options and procedures. Crops representative of current major New England crops are grown during lab. Students learn about crop selection and practices including IPM, irrigation, and fertility management. Lab. (Offered alternate years).

**Attributes:** Writing Intensive Course**Prerequisite(s):** SAFS 421 with a minimum grade of D-.**Equivalent(s):** PBIO 689**Grade Mode:** Letter Grading**Special Fee:** Yes**SAFS 733 - Advanced Topics in Sustainable Agriculture****Credits:** 4

In this writing-intensive, capstone course, SAFS juniors and seniors engage in critical, student-led discussion of instructor-chosen and student-selected works related to food systems sustainability across scales, local to global. With these discussions as context, students pursue individual, semester-long projects to practically address a specific issue of interest. The course aims to improve critical reading, writing, discussion, and presentation skills; build cohort cohesiveness; and challenge students' beliefs and working assumptions about agriculture and food systems sustainability.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**SAFS 760 - Insect Pest Management****Credits:** 4

Students learn the principles of integrated pest management, as they apply to insects (and some other arthropods). Additionally, they learn to recognize the major orders of insects, and some insect families that are important as natural enemies of pests. Course incorporates a significant amount of writing, plus learning to search the scientific literature.

**Attributes:** Writing Intensive Course**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.**Equivalent(s):** PBIO 760**Grade Mode:** Letter Grading**SAFS 795 - Investigations****Credits:** 1-4

With faculty guidance, students work on individual projects related to sustainable agriculture and food systems.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** SAFS 795W**Grade Mode:** Letter Grading**SAFS 795W - Investigations****Credits:** 1-4

With faculty guidance, students work on individual projects related to sustainable agriculture and food systems.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** SAFS 795**Grade Mode:** Letter Grading

**SAFS 799 - Honors Senior Thesis****Credits:** 1-4

Independent research requiring a written proposal, thesis, and presentation of research results to an audience of faculty and/or students. Intended for students completing SAFS Honors-in-Major requirements. Contact SAFS Program coordinator prior to senior year to arrange supervision and obtain permission. Two-semester sequence; students typically register for 5 credits over two semesters. IA grade (continuous course) given at end of first semester.

**Attributes:** Honors course; Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## Technology (TECH)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**TECH 400 - Introduction to CEPS Programs****Credits:** 1

An overview of programs offered by the College of Engineering and Physical Sciences with an emphasis on skills needed to be successful academically, career opportunities and professional development.

Required course of all undeclared majors in CEPS.

**Grade Mode:** Credit/Fail Grading**TECH 401 - Scientific Research Exploration****Credits:** 2

This course introduces incoming freshmen to the scientific research process via a hands-on approach, which includes case studies, group work, and a two-week immersion experience under the guidance of the College of Engineering and Physical Sciences (CEPS) faculty. Course readings, discussions, and active participation in local research will facilitate the student's exploration of experimental design, hypothesis testing, data collection and analysis, interpretation of results, and effective communication of research findings. In the context of a group research project, students begin thinking like scientists, as well as strengthening their math, writing, and oral communication skills.

**Grade Mode:** Credit/Fail Grading**TECH 402 - Introduction to CEPS Career Exploration****Credits:** 1

This course will build on TECH 400's academic exploration and guide CEPS students as they identify ways to self-reflect and build experience to become well-rounded applicants for experiential learning opportunities (internships and research), graduate school, and their future careers. An emphasis will be placed on identifying ways to harness transferable skills through hands-on experiences beyond the classroom (jobs, volunteer work, clubs and orgs) applicable to the student's field(s) of interest.

**Prerequisite(s):** TECH 400 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading**TECH 411 - Innovation Scholars I****Credits:** 2

A research driven introduction to the university experience. Science, mathematical, and engineering principles will be applied within a cohort research experience for first year students. Under the direction of a faculty mentor(s), student teams will be guided through a year-long research experience culminating in a presentation of research results at the Undergraduate Research Conference, or equivalent activity.

**Grade Mode:** Credit/Fail Grading**TECH 412 - Innovation Scholars II****Credits:** 2

A research driven introduction to the university experience. Science, mathematical, and engineering principles will be applied within a cohort research experience for first year students. Under the direction of a faculty mentor(s), student teams will be guided through a year-long research experience culminating in a presentation of research results at the Undergraduate Research Conference, or equivalent activity.

**Attributes:** Inquiry (Discovery)**Prerequisite(s):** TECH 411 with a minimum grade of D-.**Grade Mode:** Credit/Fail Grading**TECH #500 - Integrated CEPS Seminar I****Credits:** 2

The seminar course is intended for students transferring to CEPS. The course focuses on building an interdisciplinary community among students; introducing the STEM disciplines as fields of study and professions, discussing the nature of scientific knowledge and ethics; learning how to learn, and engaging with CEPS student organizations, and with other campus academic support structures. Students are evaluated on their participation in class activities, written assignments, presentations, and posting/commenting to/on topical online blogs, which promote out-of-class discussion.

**Grade Mode:** Credit/Fail Grading**TECH #501 - Integrated CEPS Seminar II****Credits:** 1

The seminar course is intended for students transferring to CEPS. The course focuses on building an interdisciplinary community among students, advancing topics from TECH #500, and professional development via engagement in undergraduate research and career development activities. Students are required to be simultaneously involved in a research project with a faculty member of their choosing. Students are evaluated on their participation in class activities, written assignments, presentations, and posting/commenting to/on topical online blogs, which promote out-of-class discussion.

**Grade Mode:** Credit/Fail Grading**TECH #601 - Fundamentals Examination Review****Credits:** 1

A ten-week review course for those interested in taking the fundamentals examination to be certified as an engineer-in-training (EIT).

**Grade Mode:** Credit/Fail Grading**TECH 602 - Machine Shop Training****Credits:** 1

In this course, the operation of the basic metal-cutting machine tools (e.g., engine lathe, milling machine, drill press, band saw, cut-off saw, etc.) are demonstrated. The students receive introductory training on the safe operation of these machines as well as on safe practices in the machine shop. Two small projects are completed to demonstrate basic machine shop abilities by the end of the course. Students must successfully complete an online shop safety quiz prior to the first day of the course. Offered spring and fall semesters only.

**Equivalent(s):** TECH 602A**Grade Mode:** Credit/Fail Grading**Special Fee:** Yes

**TECH #697 - CEPS Industrial Experience****Credits:** 1

Students in the CEPS Industrial Experience must register for TECH #697 during each semester (fall and/or spring) in which they are participating in their industrial work experience. Student in the minor must get permission from the minor advisor in order to register for this course.

**Repeat Rule:** May be repeated for a maximum of 2 credits.

**Equivalent(s):** TECH 797

**Grade Mode:** Credit/Fail Grading

**TECH 750 - Intellectual Asset Management for Engineers and Scientists****Credits:** 4

This course provides an introduction to the most important topic in the 21 century—intellectual assets. Students will receive an overview in practical, real-world aspects of managing intellectual assets (copyright, patents, trademarks, trade secrets, etc.). Students taking this course will be exposed to lectures, guest presentations, and case studies aimed at increasing their understanding of intellectual property strategies and related legal issues; technology assessment; technology valuation; licensing issues, strategies and negotiation techniques; business planning and start-up company development; and strategies for attracting investment for new ideas. The instructors and guest speakers for the course are involved in managing, protecting, investing in, or commercializing intellectual property assets in real world settings such as university technology transfer offices, patent law firms, venture capital firms, start-up companies, and related settings.

**Grade Mode:** Letter Grading

**TECH 780 - Intellectual Property Law for Engineers & Scientists****Credits:** 3

This course will cover the major doctrines of trade secrets, patents, copyrights, and trademarks, including what kinds of information qualify for protection, what must be done to obtain that protection, what rights owners and others have to use the information, and the underlying policy choices made by legislators and courts.

**Grade Mode:** Letter Grading

**TECH 797 - Undergraduate Ocean Research Project****Credits:** 2

Students work as members of interdisciplinary project teams on contemporary ocean-related problems under the guidance of a faculty adviser. Student team defines problem, prepares a budget, conducts literature surveys, engages in dialogue with experts in the community, deals with vendors, designs, and builds a working engineering model, gathers and analyzes scientific data or conducts a comprehensive study, makes interim reports, and defends the results before a jury of experts. A yearlong effort: 2 credits each semester, 4 credits total, an IA (continuous course) grade given at the end of the first semester.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated up to 1 time.

**Equivalent(s):** TECH #697

**Grade Mode:** Letter Grading

## Theatre & Dance (THDA)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**THDA 401 - New Student Seminar****Credits:** 1

This course is an introduction to being a theatre and dance major. Students will examine academic standards expected in our department as well as management skills essential for success in balancing rehearsal and practicum schedules with academic responsibilities for all classes. This course is focused on helping majors understand expectations of being a Theatre and Dance major along with ways to cope with the stress.

**Grade Mode:** Credit/Fail Grading

**THDA 435 - Introduction to Theatre****Credits:** 4

Introduces all aspects of theatrical production: play writing, acting, directing, design, technical theatre and construction, and theatre management. Cultural and social context of theatre in our time and through the ages. Introduces major classical and modern types of theatre. Selected plays are read and discussed, and attendance at theatrical production is required.

**Attributes:** FinePerformingArts(Discovery)

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**THDA 436 - History of Theatre I****Credits:** 4

The history of theatre and its drama is introduced through close study of the world's greatest plays from the Greeks through the end of the 17th century – How these plays were performed then, how they are performed now, their political, social, and cultural urgencies.

**Attributes:** FinePerformingArts(Discovery); Writing Intensive Course

**Equivalent(s):** THDA 436H

**Grade Mode:** Letter Grading

**THDA 436H - Honors/History of Theatre I****Credits:** 4

The history of theatre and its drama is introduced through close study of the world's greatest plays from the Greeks through the end of the 17th century – How these plays were performed then, how they are performed now, their political, social, and cultural urgencies.

**Attributes:** FinePerformingArts(Discovery); Honors course; Writing Intensive Course

**Equivalent(s):** THDA 436

**Grade Mode:** Letter Grading

**THDA 438 - History of Theatre II****Credits:** 4

The history of theatre and its drama is introduced through close study of the world's greatest plays of the 19th, 20th, and 21st centuries – How these plays were performed then, how they are performed now, their political, social and cultural urgencies.

**Attributes:** FinePerformingArts(Discovery); Writing Intensive Course

**Equivalent(s):** THDA 438H

**Grade Mode:** Letter Grading

**THDA 438H - Honors/History of Theatre II****Credits:** 4

The history of theatre and its drama is introduced through close study of the world's greatest plays of the 19th, 20th, and 21st centuries – How these plays were performed then, how they are performed now, their political, social and cultural urgencies.

**Attributes:** FinePerformingArts(Discovery); Honors course; Writing Intensive Course

**Equivalent(s):** THDA 438

**Grade Mode:** Letter Grading

**THDA 439 - In Bed with the Bard: Shakespearean Seduction from Romeo and Juliet to Leonardo and Claire****Credits:** 4

Introduces the imaginative process by which actors and directors bring Shakespeare's plays to life on the stage. Detailed study of eight plays.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**THDA 440A - Honors/Theatre and Social Justice****Credits:** 4

This course that will examine to what degree dramatic literature and theatre art has effected socio-political change in the past, and in the present, through an in-depth exploration of texts, artistic methods and theatrical techniques. Students will create theatrical art related to various sociopolitical issues. Absolutely no experience in theatre is necessary, as this course is built around the premise that we all have the ability to create art and affect politics and society.

**Attributes:** FinePerformingArts(Discovery); Honors course**Equivalent(s):** THDA 444**Grade Mode:** Letter Grading**THDA 441 - Exploring Musical Theatre****Credits:** 4

This is an introductory course designed to enhance the student's enjoyment and understanding of musical theatre. Course content and internet exploration as well as play attendance are designed to acquaint students with and nurture an appreciation for musical theatre. This course is intended for introductory students of all majors who are interested in studying musical theatre elements, styles, and significance.

**Attributes:** FinePerformingArts(Discovery)**Equivalent(s):** THDA 440**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 442 - Introduction to the Art of Acting****Credits:** 4

Designed for non-THDA major students interested in the art of acting. Students broaden and deepen their own creativity, gain a deeper understanding of human behavior and interaction, and strengthen analytical skills through class work and projects. Focuses on the basic skills of acting: the ability to effectively communicate, to gain access to the full spectrum of human emotions, and increase spontaneity. Important innovators and theorists in the field of theatre and acting are covered, such as Sanford Meisner, Constantine Stanislavski, Bertolt Brecht, Jerzy Grotowsky, Augusto Boal, and Jacques Lecoq. Additional topics include contemporary plays and playwrights, an historical perspective of the art of acting, and the current state of live theatrical performance. Theatre majors not allowed.

**Attributes:** FinePerformingArts(Discovery)**Equivalent(s):** THDA 551**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 444A - What's Old Becomes New: Dramatic Adaptations****Credits:** 4

To what degree does updating theatrical themes contribute to societal norms and relevant commentary? This course will examine how enduring dramatic ideas evolve by comparing plays that are written in reaction to or as an extension of a provocative piece, both carrying on similar themes but told in updated ways. Students also will investigate the role these adaptations play in theatre history, why they are done and whether they are justified as quality art.

**Attributes:** FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 444B - Famous Dancers of the 20th Century****Credits:** 4

The purpose of this course is to provide an introduction to the dancers of the twentieth century whose contributions to the art form have made dance an important cultural necessity. This includes examining how their style of dance and unique personalities has had a major influence on our perceptions of dance and how they have had an effect on society.

**Attributes:** FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course**Grade Mode:** Letter Grading**THDA 450 - History of Musical Theatre in America****Credits:** 4

Study of the development of the musical and its relationship to American social history.

**Equivalent(s):** THDA 440**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 455 - Musicianship and Beginning Vocal Techniques for Musical Theatre****Credits:** 2

This course is a combination course designed to help musical theatre students develop the appropriate musicianship skills as well as beginning vocal techniques. Musicianship skills include melodic and rhythmic sight reading, harmony reading and singing, basic piano skills, as well as key signature and interval recognition. Beginning vocal techniques include breath management, strengthening vocal fold closure, releasing tension and creating space in the acoustic chamber (throat and mouth). These skills will help musical theater students develop the ability to overlap strong vocal work with strong musicianship specifically for industry standard auditions and performances in Musical Theatre.

**Grade Mode:** Letter Grading**THDA 458 - Costume Construction****Credits:** 4

Study and development of costuming techniques, including hand and machine sewing, pattern drafting, alterations, and fabric manipulation. Emphasis on demonstrated understanding.

**Grade Mode:** Letter Grading**Special Fee:** Yes

**THDA 459 - Stagecraft****Credits:** 0 or 4

Elements of play production: basic building components, tools, and materials for producing the scenery; equipment and shop layouts supporting all of the areas of the set, lighting, and costume designs; and consideration of various stage spaces and theatrical venues. Practical application on University theatre productions. Lab.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 460 - Elements of Design****Credits:** 4

Course is designed for students who are interested in theatrical design elements including scenery, costume, lighting and sound. Class encompasses lecture, discussion, presentation and studio (work in class) formats. Critique and discussion are essential to the creative thinking that a designer needs to have. Throughout the course, each student is expected to complete projects that incorporate the design elements they have studied.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 462 - Ballet I****Credits:** 4

Introductory lecture and dance technique course focusing on the fundamentals of ballet technique and the historical development of ballet from the Renaissance to modern times. This ballet class will improve strength, flexibility, coordination, agility, endurance, and musicality while incorporating an appreciation for artistry. No dance experience required, only willingness to develop at your own pace. Open to both majors and non-majors.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**THDA 463 - Theatre Dance I****Credits:** 4

Introductory lecture and dance technique course focusing on how technology, industrialization and popular culture impact the art by discussing dancers, choreographers, films and musicals of the 20th century. Jazz and tap class will improve strength, flexibility, coordination, and musicality. No Dance experience required, only willingness to develop at your own pace. Students with prior experience are expected to register for THDA 563 or THDA 663. Instructor determines appropriate level. Class open to both majors and non-majors.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 464 - Ballet Cross-Training****Credits:** 1

Traditional ballet exercises will be modified to focus on repetition and body mechanics to improve athletic skills through dance. This ballet class will help students further develop strength, coordination, speed, agility, flexibility, fluidity, balance, efficiency of movement, and mental focus. Particular emphasis will be given to psychomotor skill development through challenges that require applying unfamiliar ballet vocabulary while moving to music. No dance experience required, only willingness to develop at your own pace in a fun, judgment-free environment.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**THDA 475 - Stage Makeup****Credits:** 2

Fundamentals of juvenile, old age, character, and special stage makeup techniques.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 487 - History of Dance****Credits:** 4

This course will be a study of dance from prehistory to the present. Through an interactive approach students will gain methods to perceive, create and respond to the history of dance through integrated arts and technology. Activities both in and out of the classroom will aid in the understanding of dance and how it has evolved throughout history both socially and as a means of entertainment. This course will also examine how dance has influenced or collaborated with other art forms.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**THDA 500 - Musical Theatre Voice I****Credits:** 0 or 1

This course provides students with a foundation in healthy, relaxed, and dynamic singing of primarily musical theatre repertoire. In addition to expanding the student's knowledge of and ability to sing various styles of musical theatre repertoire, this course provides a venue to explore and develop analytical skills relating to character and script.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading**THDA 522 - Storytelling, Story Theatre, and Involvement Dramatics****Credits:** 4

This course actively explores storytelling techniques based on individual needs. An examination of story theatre and involvement styles leads to practical experience in individual performances. Participants will actively develop performance techniques that reflect a variety of styles and approaches for storytelling. We will examine the historical significance of storytelling in Eastern and Western civilizations and develop a perspective on its role in culture and religion. Applications for both educational and entertainment purposes will be explored through acting and vocal techniques, games, media, felt board, and puppetry. This course will include an examination of story theatre and involvement styles and the development of the ensemble for performance. The projects will include individual performances and group collaboration of selected stories appropriate for a wide range of audiences. The final project will reflect the participant's individual needs and utilize storytelling techniques developed in the course.

**Attributes:** FinePerformingArts(Discovery)**Equivalent(s):** THDA 622**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA #531 - The London Experience: Discovery****Credits:** 4

Learn about one of the greatest cities in the world during this 10-day trip to London. This Discovery class begins as a two-week, on-line course and then packs in a busy schedule visiting amazing sights and taking in some of the best theatre in the English speaking world. The course offers an insight into the history, politics, society and culture of London through the lens of art, architecture, music, and of course, theatre.

**Co-requisite:** INCO 589**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes

**THDA #532 - The London Experience****Credits:** 2

Exploration of the culture and history of London while enhancing study of live theatre prior to active study in the country. IA (continuous grading).

**Co-requisite:** INCO 589**Repeat Rule:** May be repeated for a maximum of 4 credits.**Equivalent(s):** THDA 592C**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 541 - Arts Administration and Entrepreneurship****Credits:** 4

This course will explore multiple facets of the business of running an arts-based organization. The course will also examine business-related issues relevant to individuals seeking to build a career in the arts. The class will provide an overview of the essential knowledge needed for effective arts management and to cultivate the skillset needed to develop, fund, promote and deliver arts-based projects.

**Attributes:** Inquiry (Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 546 - Costume Design for the Theatre****Credits:** 4

How to design costumes for the theatre, not figure drawing, although drawing techniques are taught. Script analysis and research and presentational techniques for costume design explored and implemented.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 548 - Stage Lighting Design and Execution****Credits:** 4

This class is designed for students who are interested in theatrical lighting design. The class meets 3 hours per week. It is a project-based course taught in various formats including lectures, hands-on practices, class discussions, and presentations. The class will help students develop the skills for lighting design and creative thinking that are essential for a critical thinker.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 549 - Vectorworks Computer-Aided Design Drafting for the Theatre****Credits:** 2

This course will help students develop essential drafting skills used to present design ideas, technical solutions, and communication in productions. Drafting is a form of visual presentation that brings the design ideas to realization. Throughout the semester, students will learn about the basic graphic standard in the industry, gain proficiency in VectorWorks software, and develop a clear and accurate presentation for their designs.

**Grade Mode:** Letter Grading**THDA 551 - Acting I****Credits:** 4

Development of fundamental vocal and physical stage techniques for actors and directors through exercises, improvisation and theatre games.

**Attributes:** Inquiry (Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 552 - Acting II****Credits:** 4

Focuses on strengthening the actor's ability to achieve a higher level of truth, presence, and spontaneity on stage. Building on the approach devised by Sanford Meisner, this highly intensive class creates a bridge to connect these developing skills to various forms of text.

**Prerequisite(s):** THDA 551 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 554 - Stage Combat****Credits:** 4

This course actively explores stage combat techniques for unarmed combat as well as basic rapier swordplay. Students are expected to prepare hand-to-hand acting projects as well as a final rapier fight project which demonstrates proper stage combat techniques learned during the semester.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 555 - Acting The Song****Credits:** 4

Foundations of solo musical theatre performance, with a special focus on Acting the Song. Students will review beginner acting techniques and transfer their work from the realm of the monologue into the realm of the musical theatre solo assessed through solo performances and written assignments.

**Grade Mode:** Letter Grading**THDA 562 - Ballet II****Credits:** 2

This dance technique class is taught at an intermediate level and is an extension of Ballet I with a focus on developing ballet vocabulary and artistry. Open to both majors and non-majors.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**THDA 563 - Theatre Dance II****Credits:** 2

This dance technique class is an extension of THDA 463. Students will become versatile in a variety of dance styles, including contemporary and musical theatre style jazz and tap dance. Technical execution, artistry and improvisation will be explored. Open to both majors and non-majors.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA #564 - Compocinema****Credits:** 4

Compocinema examines dance/movement as an interdisciplinary form that integrates the human body, digital video camera, the computer program, and site-specific and/or collaborative formats. Emphasizing conceptual and practical approaches, students (individually and in groups) will take turns developing and performing movement as well as planning, designing, shooting, editing, observing, describing, analyzing, and revising video of dance/movement as artistic expression.

**Grade Mode:** Letter Grading**THDA 565 - Aerial Dance I****Credits:** 2

This class focuses on beginning aerial dance language and skills as well as body conditioning. Apparatuses including fabric, trapeze and lyra are introduced.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading

**THDA 570 - Movement & Vocal Production****Credits:** 4

Expansion of the student's body-voice awareness, utilizing basic theories and lessons of Lessac Kinesensics and other somatic voice and body practices. Students will build breath-body connection and capacity, expand resonance and articulation, explore body alignment and expressiveness to build a foundation for a healthy and dynamic body-voice for stage and screen performance.

**Prerequisite(s):** THDA 551 with a minimum grade of D-.**Equivalent(s):** THDA 470**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 576 - Pointe****Credits:** 2

This class is taught at an intermediate level focusing on developing pointe technique and artistry. Classical variations are incorporated to study the history of ballet through practical application. 1-2 years of pointe technique required. If interested in beginning the study of pointe technique, contact the instructor. Open to both majors and non-majors.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**THDA 583 - Introduction to Puppetry****Credits:** 4

Introduces the art of puppetry for general appreciation, entertainment, application in the classroom, and as a therapeutic tool. Emphasis on constructing a variety of puppets (e.g., hand, rod, shadow, and scarf) and adapting literary sources for scripts and performance.

**Attributes:** FinePerformingArts(Discovery)**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 589 - Practicum****Credits:** 1

The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** THDA 689**Grade Mode:** Credit/Fail Grading**THDA 592A - Special Topics****Credits:** 1-4

Special topics, projects in theatre and dance. Content varies according to needs and interests of students and faculty. Course descriptions are available in department office.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Equivalent(s):** THDA 592**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 600 - Musical Theatre Voice II****Credits:** 0 or 1

This course is a continuation of THDA 500: Musical Theatre Voice I. Students build on the groundwork in vocal technique, analysis, and performance established in Musical Theatre Voice I and continue to explore and develop these skills.

**Grade Mode:** Letter Grading**THDA 624 - Theatre for Young Audiences****Credits:** 4

Introduces coaching and directing techniques for classical and contemporary acting styles in theatre for young audiences. Historical contents leads into practical exploration of actor training and coaching, production and design, choreography, and business management for theatre and for youth programs. Students develop teaching strategies for young performers and participate in a culminating project.

**Equivalent(s):** THDA 624A, THDA 624B, THEA 624A, THEA 624B**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 630 - Actor's Voice Through Text****Credits:** 4

Continuing development of the actor's techniques for creating increased vocal expressiveness. Expands actor's awareness and use of their voice through in-depth analysis and interpretation of text. Exploration of the application of vocal technique to film and theatre scripts from intimate to heightened communication including vocal extremes.

**Prerequisite(s):** THDA 570 with a minimum grade of D-.**Equivalent(s):** THDA 550**Grade Mode:** Letter Grading**THDA 632 - Interpretation of Shakespeare in Theatre****Credits:** 4

Increases understanding of Shakespeare's language and action, and improves ability to speak his verse and prose with clarity and verve. Students achieve insights into Shakespeare's plays through the medium of performance. Weekly oral and written assignments.

**Grade Mode:** Letter Grading**THDA 633 - Dance Composition****Credits:** 4

Practical, developmental approach to process of creating dances.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA #638 - American Theatre: 1920-1970****Credits:** 4

A survey of American plays from O'Neill onward. Students read and analyze two plays a week. Oral, written, and theatrical assignments.

**Prerequisite(s):** THDA 436 with a minimum grade of D- or THDA 438 with a minimum grade of D- or THDA 450 with a minimum grade of D-.**Grade Mode:** Letter Grading**THDA 640W - Playwriting****Credits:** 4

To illuminate and guide each student through the art and craft of writing for performance. This course explores the fundamental principles needed to build a realistic play that is intended to be produced upon the stage. Though the course is built around the construction of plays, the principles, writing exercises, readings, and other assignments serve as a solid base for any form of dialogue driven writing.

**Attributes:** Writing Intensive Course**Equivalent(s):** THDA 540, THDA 540W, THDA 750**Grade Mode:** Letter Grading**Special Fee:** Yes

**THDA 641 - Stage Management****Credits:** 4

Introduces to the concepts and skills needed for stage management. Stage managers perform a central role in the theatrical production, coordinating artistic and technical elements. They need a thorough understanding of the script, strong management skills, and a solid background in all aspects of the theatre. Prepares students to function as a stage manager in productions at any theatre.

**Equivalent(s):** THDA 592B**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA #650 - Scene Painting for the Theatre****Credits:** 4

This course focuses on developing scene painting techniques used by modern scenic artists in theatre. The class will encompass 3 hours per week for lectures, painting technique demonstrations, and working on individual projects. Students will need to commit hours outside class meeting time to completed large scale projects in the scene shop.

**Equivalent(s):** THDA 592E**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 651 - Rendering for the Theatre****Credits:** 2

Theatrical rendering is a presentational arrangement of given items in perspective appropriate to a set or in a costume at a frozen moment during the production, indicating appropriate mood, atmosphere, and depth. For the theatre, this is generally done in watercolor, but many other media are possible and are explored.

**Equivalent(s):** THDA 592F**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 652 - Scene Design****Credits:** 4

Scene design from script to finished design. Both aesthetic and practical viewpoints considered. Emphasis on presentational techniques: study of perspective and finished rendering.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 655 - Musical Theatre Scene Study****Credits:** 4

Builds on and expands the techniques learned in Acting I and Musical Theatre Voice I, with a special emphasis on partner work and scene study.

**Prerequisite(s):** THDA 551 with a minimum grade of D- and THDA 555 with a minimum grade of D-.**Grade Mode:** Letter Grading**THDA 662 - Ballet III****Credits:** 2

Advanced-level course in technique. Open to both majors and non-majors.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**THDA 663 - Theatre Dance III****Credits:** 2

This dance technique class is an extension of THDA 563. Students will become seasoned in contemporary jazz, musical theatre style jazz and tap dance. Technical execution, choreographic artistry and improvisation will be explored. Class open to both majors and non-majors.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 665 - Aerial Dancell****Credits:** 2

The study of aerial arts including two and one point trapeze and fabric. Class open to both majors and non-majors.

**Repeat Rule:** May be repeated for a maximum of 16 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 670 - Dialects****Credits:** 4

Study and practice in basic dialect acquisition for performers.

**Prerequisite(s):** THDA 551 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 672 - Audition****Credits:** 4

Business aspects of creating and maintaining a performance career, including resumes, photos, agents, casting directors, website building, networking, unions, trade publications, audition material, cold-reading, camera acting, and voice over.

**Prerequisite(s):** THDA 551 with a minimum grade of D-.**Grade Mode:** Letter Grading**THDA 683 - Advanced Puppetry****Credits:** 4

In-depth study of the theory and practice of puppetry for the advanced student. Students develop skills in manipulation and construction of selected puppet forms and apply these skills in performance. Examines historical perspectives and the application of puppetry in the classroom and as a therapeutic tool.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 700 - Musical Theatre Voice III****Credits:** 0 or 1

This course is a continuation of THDA 600: Musical Theatre Voice II. Students continue to develop their skills of vocal technique, analysis, and performance established in Musical Theatre Voice II, while focusing these skills towards their application in auditioning for, and performing in, professional theatre.

**Repeat Rule:** May be repeated for a maximum of 3 credits.**Grade Mode:** Letter Grading**THDA 721 - Arts Integration****Credits:** 4

This course examines the value and practical application of incorporating the arts into non-arts educational settings. From the perspective of multiple intelligences and varied learning styles, students investigate how the arts can enhance teaching methodology by developing and implementing lesson plans for a variety of non-arts subject areas.

Active theatre involvement is limited; the focus is on practicing teaching methods.

**Attributes:** Writing Intensive Course**Equivalent(s):** THDA 621**Grade Mode:** Letter Grading**Special Fee:** Yes

**THDA 727 - Methods of Teaching Theatre****Credits:** 4

This course is the culminating experience for theatre education. The purpose is to provide practical information and skills that theatre teachers will use as source material for the classroom and to prepare for the education job search. Students will examine a variety of teaching models in order to articulate a personal teaching philosophy, write comprehensive semester curricula and course syllabi, and create an extracurricular program plan and philosophy.

**Attributes:** Writing Intensive Course**Equivalent(s):** THDA 627**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 729 - Community Oriented Drama Programs****Credits:** 1-4

Advanced practicum in designing, developing, and producing drama programs for the school and community. Includes audience analysis and marketing skills as well as adapting spaces, soliciting volunteers, and working with a limited budget.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 732 - Choreography****Credits:** 4

Theoretical and practical consideration of the creative and aesthetic aspects of ballet, modern, and theatre dance.

**Prerequisite(s):** THDA 633 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 741 - Directing****Credits:** 4

A process oriented approach to the art of stage directing. The course begins with an in-depth focus on script analysis. Students then develop their skills as the "master storyteller" through imagination, interpretation, communication, and style.

**Prerequisite(s):** THDA 551 with a minimum grade of D- and THDA 552 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 742 - Directing II****Credits:** 4

In-depth study of the theory and practice of stage direction for the advanced student. Builds on 741, Directing. Students strengthen and expand their existing knowledge of the subject area. Exploration focuses on three areas of directorial communication: application to periods and styles, exploration of avant-garde theory, and directorial technique. Concludes with a major project mounted for public performance.

**Prerequisite(s):** THDA 741 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 755 - Musical Theatre Repertoire****Credits:** 4

Students learn to integrate and expand on techniques in previous acting, musical theatre, and voice classes, with special emphasis given to audition techniques, repertoire expansion and specialization, and in-depth analysis of the business and personal requirements necessary to be a successful artist in the professional theatre.

**Prerequisite(s):** THDA 551 with a minimum grade of D- and THDA 555 with a minimum grade of D-.**Grade Mode:** Letter Grading**THDA 758 - Acting III****Credits:** 4

Applies the principles and techniques acquired by students in THDA 551 and THDA 552 to various genres, such as epic and absurdist, and to mediums such as television and film. Special attention is given to characterization beyond the student's standard range and the development of the actor as a creative artist, using the techniques of such methodologists as Lecoq, Laban, and Grotowski.

**Prerequisite(s):** THDA 551 with a minimum grade of D- and THDA 552 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 759 - Acting: Period and Style****Credits:** 4

Techniques of style analysis and period research. For the first time in the students' undergraduate actor training, students synthesize their basic actor training with the heightened language and archetypal characterization inherent in the classical theatre of the ancient Greeks, the Commedia dell'Arte, the Renaissance, the Neoclassical period, and the Restoration period.

**Prerequisite(s):** THDA 551 with a minimum grade of D- and THDA 552 with a minimum grade of D- and (THDA 436 with a minimum grade of D- or THDA 438 with a minimum grade of D-).**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 760 - Teacher Planning for Theatre****Credits:** 4

Focuses on lesson and unit planning for the areas of high school theatre history, play analysis, and play writing. Students will practice various methods of teaching these areas of drama.

**Grade Mode:** Letter Grading**Special Fee:** Yes**THDA 786 - Dance Pedagogy****Credits:** 4

Methods course that focuses on the art and science of teaching the movement forms of ballet, modern, jazz and tap. Designed to prepare students who are seeking dance certification with a M.Ed. or a M.A.T., or who wish to open their own studio. Provides background into the nature of teaching, standards that make up good teaching, awareness of National/State standards, and study and practice of lesson plans in K-12 school curricula or private studios.

**Grade Mode:** Letter Grading**THDA 791 - Internship in Theatre and Dance****Credits:** 2-8

Fieldwork with a regional or touring theatre or with a theatre education program. This advanced-level internship allows the student to experience a professional theatre/theatre education setting prior to graduation. Normally supervised by a qualified theatre professional, with frequent consultation with a faculty sponsor. Written report required. May be part- or full-time with credits assigned accordingly.

**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading

**THDA 795 - Independent Study****Credits:** 1-8

Advanced individual study. Specific independent study opportunities are sometimes posted in the Theatre and Dance Department Office. Project, which includes a substantial piece of writing, must be developed with supervising instructor.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** THDA 795W**Grade Mode:** Letter Grading**THDA 795W - Independent Study****Credits:** 1-8

Advanced individual study. Specific independent study opportunities are sometimes posted in the Theatre and Dance Department Office. Project, which includes a substantial piece of writing, must be developed with supervising instructor.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** THDA 795**Grade Mode:** Letter Grading**THDA 796 - Independent Study****Credits:** 1-8

Advanced individual study. Specific independent study opportunities are sometimes posted in the Theatre and Dance Department Office. Project, which includes a substantial piece of writing, must be developed with supervising instructor.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** THDA 796W**Grade Mode:** Letter Grading**THDA 798 - Senior Thesis****Credits:** 2

Supervised research leading to the presentation of a major research paper.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**THDA 799 - Capstone Project****Credits:** 2 or 4

This required course incorporates and tests the knowledge that majors have learned over their careers in the Department of Theatre and Dance. Capstone experiences are tailored to each student through conference with their adviser in their specific Theatre and Dance track.

**Attributes:** Writing Intensive Course**Equivalent(s):** THDA 799H**Grade Mode:** Letter Grading**THDA 799H - Honors/Capstone Project****Credits:** 4

See description for THDA 799.

**Attributes:** Honors course; Writing Intensive Course**Equivalent(s):** THDA 799**Grade Mode:** Letter Grading

## Tourism Planning & Development (TOUR)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**TOUR 400 - Introduction to Tourism****Credits:** 4

Provides an informational foundation in tourism and gives a more extensive knowledge of the tourism industry. Examines historical perspectives, tourism organization, and supply and demand of the tourism industry. Discusses the dynamic and pluralistic nature of the tourism industry.

**Equivalent(s):** RECO 400**Grade Mode:** Letter Grading**TOUR 510 - Tourism and Global Understanding****Credits:** 4

Introduces ways in which tourism can act as a vehicle to understanding foreign cultures. Responsible tourism, has the potential to help bridge cultural and psychological distances that separate people of different races, religions, and socio-economic classes. Through responsible tourism we can learn to appreciate, trust, and respect the human diversity that our world has to offer. Helps students gain an informed acquaintance with other cultures and customs, and to understand the central role of tourism in international and cross-cultural understanding.

**Grade Mode:** Letter Grading**TOUR 767 - Social Impact Assessment****Credits:** 4

Provides a cross-disciplinary perspective on the issues, problems, and methods of Social Impact Assessment (SIA). Provides analytic approach and theoretical framework for the assessment of diverse events, including changes in the natural environment, the local economy, or dominant technology. SIA is required of most U.S. and Canadian federal- and state-sponsored projects that come under the National Environmental Protection Act, as well as all projects funded by international donor agencies.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**TOUR 798 - Independent Study****Credits:** 1-4

Special assignments in readings, investigations, field problems. May include teaching experience.

**Equivalent(s):** TOUR 798W**Grade Mode:** Letter Grading

## TSAS Social Science (SSCI)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

No courses are currently active in the course inventory for this subject prefix.

## TSAS Thompson School Applied Science (TSAS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**TSAS 495 - Thompson School:Special Topics****Credits:** 1-4

New or specialized courses not normally covered in regular course offerings. May involve one, two or more program areas within the Thompson School of Applied Science. Topics and prerequisites (if any) to be announced before registration. May include a lab. Special fee on some sections. Some sections may be Cr/F.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** TSAS 295**Grade Mode:** Letter Grading**Special Fee:** Yes

## UNHM Independent Study (UMIS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**UMIS 599 - Independent Study****Credits:** 1-4

Independent study with the approval and sponsorship of UNHM faculty of material not covered in regular course offerings. Barring duplication of subject, may be repeated.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Letter Grading

## UNHM Special Topics (UMST)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**UMST 401 - First Year Seminar****Credits:** 2

This two-credit seminar is part of UNH Manchester's continued commitment to the success of first year students. The focus of this course is not on a specific academic subject or field of study; instead, the focus is on YOU – the student. This course is designed to help you transition into your first semester as a college student on the Manchester campus. Together we will learn how to incorporate health and well-being into our daily lives through the exploration of resiliency skill building, mindfulness practice, peer-to-peer discussions, and personal reflections.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**UMST 402 - Transfer Seminar****Credits:** 1

The Transfer Seminar focuses on students' adjustment to being at UNH Manchester. By incorporating topics such as campus resources, financial literacy, internship and career planning, self-reflection, and information literacy, the goal of this course is to foster the development of skills or strategies that are both applicable and valuable across disciplines as well promoting personal success during and after college.

**Grade Mode:** Letter Grading**UMST 472 - Beyond Google: An Introduction to Information Literacy****Credits:** 2

Beyond Google is a 2-credit introduction to the six frameworks of information literacy for high education created by the Association of College and Research Libraries. Students learn the critical thinking skills necessary to identify, evaluate, and use diverse information sources to meet varied information needs.

**Grade Mode:** Letter Grading**UMST 500 - Internship****Credits:** 1-4

The UNHM internship places students in a variety of business and organizational settings under the direction of a faculty adviser and workplace supervisor. Students fulfill the obligations of the workplace internship plan, as well as complete individually-designed projects of academic merit under the direction of UNH faculty. Open to matriculated students with a 2.5 GPA or better. Students must receive approval of the UNHM internship coordinator.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading**UMST 521 - Tutor Development****Credits:** 3

This interdisciplinary course, team-taught by the Director and Assistant Director of the Learning Center, is intended to prepare undergraduates for working as peer tutors. Students will study theories of adult development, learn several approaches to tutoring in their discipline(s), and practice their tutoring and communication skills. Cannot be repeated.

**Attributes:** Writing Intensive Course**Grade Mode:** Letter Grading**UMST 572 - Knowledge in Action: Research in the Workplace****Credits:** 2

This 2-credit course guides students toward critical thinking competencies and evaluative skills necessary for successful information-seeking strategies in workplace settings. By discovering and assessing a variety of career-specific information sources, students will explore how professional organizations develop questions to address problems of practice. Students will interrogate the contexts in which professionals create and disseminate knowledge; engage in fact-checking and other assessment activities; and address workplace issues through the effective use of relevant professional information sources.

**Grade Mode:** Letter Grading**UMST 582 - Internship and Career Planning Seminar****Credits:** 1

This course is strongly encouraged for any student seeking internship and/or employment opportunities. Participants will research and evaluate opportunities related to their career interests, conduct informational interviews, create tailored resumes and cover letters, use LinkedIn as a networking and job search resource, and participate in employer-based resume reviews and mock interviews. This course is open to all students in all majors and is suited for students interning and/or seeking employment within the next six months. Letter grades are assigned. This course cannot be repeated for credit. Students who enrolled in UMST 599 Internship and Career Planning Seminar previously are not eligible to take this course for credit.

**Grade Mode:** Letter Grading**UMST 599 - Special Topics****Credits:** 1-4

Occasional offerings dependent on availability and interest of faculty, barring duplication of subject, may be repeated for credit.

**Repeat Rule:** May be repeated up to unlimited times.**Grade Mode:** Letter Grading**UMST 799 - Pre-Pharmacy Concurrent Enrollment****Credits:** 0-20

Registration place-holder for students completing the fourth year of their B.A. Biology Program at Massachusetts College of Pharmacy and Health Studies in the Pre-Pharmacy articulation program.

**Grade Mode:** Credit/Fail Grading

## Veterinary Technology (VTEC)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

### VTEC 424 - Introduction to Veterinary Technology

**Credits:** 2

An overview of the veterinary technology field. Topics in veterinary office practice management are covered, including, appointment scheduling, inventory control, financial transactions, client communication and regulatory, legal, and ethical aspects of veterinary practice. Other topics include veterinary technician and animal science career options, professional development and domestic animal management including breed identification, terminology, and husbandry.

**Grade Mode:** Letter Grading

### VTEC 430 - Companion Animal Behavior and Handling Techniques

**Credits:** 4

Overview of the development, selection, genetics, and function of specific breeds of companion animals. Canine and feline handling and restraint skills will be demonstrated and practiced. General dog and cat, as well as breed-specific, behavior is included. Other companion animals such as parrots, rabbits, and pigs are reviewed as time allows.

**Equivalent(s):** AAS 430

**Grade Mode:** Letter Grading

### VTEC 435 - Animal Health and Laboratory Diagnostics

**Credits:** 4

Covers the principles of maintaining animal health by preventing and managing disease via husbandry, immunization, and diagnostic testing. Focus is on domestic species; primarily dogs, cats, horses and cows. Topics include parasitology, microbiology, immunology, and clinical, gross and histopathology. Laboratory activities include fecal flotation, urinalysis, complete blood count and blood chemistry, bacterial culture and sensitivity testing, gram staining, serology, laboratory safety, and principles of sample collection and quality control. VTEC and AAS majors only.

**Attributes:** Biological Science(Discovery); Discovery Lab Course

**Grade Mode:** Letter Grading

**Special Fee:** Yes

### VTEC 449 - Clinical Animal Nursing Techniques I

**Credits:** 4

Essential skills and knowledge for the care of small animals, focusing on companion animal species. Wellness protocols and basic nursing skills (medication administration, nail trimming, ear cleaning, anal gland expression, wound care, injections, phlebotomy, electrocardiogram, blood pressure measurement) will be discussed and practiced.

**Prerequisite(s):** VTEC 430 with a minimum grade of D-.

**Equivalent(s):** AAS 449

**Grade Mode:** Letter Grading

**Special Fee:** Yes

### VTEC 497 - Veterinary Technology Work Experience

**Credits:** 0

Provides students supervised introductory hands-on experience in a veterinary medical facility. Students apply skills learned in animal handling and nursing, laboratory methods, client communication and practice management courses. Students are responsible for obtaining a position in an approved veterinary facility and need to complete a minimum of 80 hours of work to fulfill course requirements. Must have rabies vaccine series completed prior to the start of the semester.

**Prerequisite(s):** AAS 449 with a minimum grade of D-.

**Grade Mode:** Credit/Fail Grading

### VTEC 550 - Clinical Animal Nursing Techniques II

**Credits:** 4

Builds on materials presented in VTEC 449, Clinical Animal Nursing Techniques I. Covers veterinary imaging modalities including radiographic and ultrasonographic techniques and safety; nursing care of hospitalized patients, dentistry, emergency, laboratory, and exotic animal medicine.

**Prerequisite(s):** VTEC 449 with a minimum grade of C+.

**Equivalent(s):** AAS 550

**Grade Mode:** Letter Grading

**Special Fee:** Yes

### VTEC 565 - Pharmacology for Veterinary Technicians

**Credits:** 4

This course provides study in the area of veterinary medicines emphasizing classes and actions of drugs, calculating dosages, proper administration, and dispensing of drugs. Topics include general pharmacology, calculating dosages, pharmacy regulation guidelines and record keeping. Case-based learning is utilized to correlate common diseases in companion animals with associated pharmacological agents. Specifically, disease pathogenesis, diagnosis, and treatment options are discussed along with pertinent technician interventions and evaluations.

**Prerequisite(s):** AAS 428 with a minimum grade of C+.

**Equivalent(s):** VTEC 265

**Grade Mode:** Letter Grading

### VTEC 575 - Veterinary Anesthesia and Surgical Assisting

**Credits:** 4

This course provides the theoretical knowledge and practical experience necessary to provide safe and effective anesthesia and analgesia to veterinary patients; including providing nursing care and assistance in all aspects of veterinary surgery and anesthesia.

**Prerequisite(s):** VTEC 565 (may be taken concurrently) with a minimum grade of C+.

**Equivalent(s):** VTEC 275

**Grade Mode:** Letter Grading

**Special Fee:** Yes

### VTEC 579 - Small Animal Practicum I

**Credits:** 4

This course provides veterinary technology students service learning opportunities. Students manage a wellness clinic for pets, developing staffing/appointment schedules, and performing appropriate procedures on pets. Additionally, students travel off-campus to provide medical, husbandry, and behavioral care for shelter animals. Successful ascertainment and use of correct veterinary terminology is required. A surgical rotation is conducted to introduce techniques in anesthesia, surgical nursing, and dentistry.

**Prerequisite(s):** VTEC 449 with a minimum grade of C+ and VTEC 565 with a minimum grade of C+.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**VTEC 580 - Small Animal Practicum II****Credits:** 4

Students manage a wellness clinic for pets, developing staffing/ appointment schedules, and perform appropriate procedures on pets. Additionally, students travel off campus to provide medical care for shelter animals. A surgical rotation is conducted to reinforce techniques in anesthesia/surgical nursing and dentistry. Nursing care assignments are due throughout the semester to aid students in the integration of knowledge gain during their academic coursework. This is a four-credit course offered for VTEC majors only, and by permission only.

**Prerequisite(s):** VTEC 579 with a minimum grade of C+ and VTEC 575 with a minimum grade of C+.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**VTEC 583 - Large Animal Practicum****Credits:** 2

An applied large animal class covering basic veterinary nursing care and procedures, focusing on horses and cows. The majority of class time is spent practicing hands-on skills with animals. Restricted to veterinary technology students only.

**Prerequisite(s):** AAS 421 with a minimum grade of C+ and VTEC 449 with a minimum grade of C+.

**Equivalent(s):** VTEC 283

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**VTEC 595 - Veterinary Technology Internship****Credits:** 3

Provides students supervised hands-on experience in a veterinary medical facility within a clinical setting, students apply skills learned in animal handling and nursing, diagnostics and laboratory, client communication and practice management courses. Students are responsible for obtaining a position in an approved veterinary facility prior to the start of the semester. Open to veterinary technology students only.

**Prerequisite(s):** VTEC 550 with a minimum grade of C+ and VTEC 579 with a minimum grade of C+.

**Equivalent(s):** VTEC 295

**Grade Mode:** Credit/Fail Grading

**VTEC 599 - Comprehensive VTNE Review****Credits:** 4

Course will prepare veterinary technology students for the Veterinary Technician National Examination (VTNE). Topics include VRNE qualification and registration procedures and standardized test-taking strategies, but will primarily focus on a systematic review of the nine knowledge domains covered on the VTNE. Specific course content will vary based on yearly changes to VTNE content and based on students' performance on a VTNE readiness assessment at the start of the course.

**Prerequisite(s):** VTEC 435 with a minimum grade of C+ and VTEC 550 with a minimum grade of C+ and VTEC 575 with a minimum grade of C+ and VTEC 579 with a minimum grade of C+.

**Grade Mode:** Letter Grading

**Special Fee:** Yes

## Women's Studies (WS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**WS 401 - Introduction to Women's Studies****Credits:** 4

Interdisciplinary survey of the major areas of women's studies: women's history, cross-cultural perspectives, women in literature, psychology of women, etc. Basic principles and concepts fundamental to more advanced women's studies research. Topics vary. Required for major and minor.

**Attributes:** Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course

**Equivalent(s):** WS 401H

**Grade Mode:** Letter Grading

**WS 403 - Gender Interactions in College Sports Culture****Credits:** 2

An integrative view of growing up as an athlete in American culture. Analysis of major perspectives on human development and implications in sports and education. With emphasis on gender, sexual assault, and racism.

**Grade Mode:** Credit/Fail Grading

**WS 405 - Gender, Power and Privilege****Credits:** 4

This course explores the diversity of women's lives through the dynamics of status, power, privilege, and inequality in contemporary United States. Students will examine women's diverse experiences by using the theoretical framework of the social construction of race, gender, economic class, and sexual orientation in historical context. We will examine categories of difference and the processes, philosophical developments, institutions, and conditions that lead to and rely on power and privilege in modern American society.

**Attributes:** Humanities(Disc)

**Grade Mode:** Letter Grading

**WS 444 - Trans/Forming Gender****Credits:** 4

Using a social construction approach, students explore the multiple ways in which gender is constructed within the lives of children, women, men, and transgender people. Specific attention focuses on the social institutions and systems that encourage both the construction and reproduction of gender identity and expression across the lifespan. Students actively participate in identifying historical and current day factors and institutions that shape gender. Students explore the roles of families, schools, educational settings, media, the workplace, recreation activities, the medical system, religion, laws, and the laws and the legal system in the construction of gender.

**Attributes:** Social Science (Discovery); Inquiry (Discovery)

**Grade Mode:** Letter Grading

**WS 444A - Race Matters****Credits:** 4

Class examines race categories in the United States and how these historically changing categories shape our diverse realities across racial, ethnic, gendered, classed, and national identities. Students examine race as a category of difference and explore the multiple ways that individuals claim racial identities. Specific attention focuses on how diverse women have made history in their own lives and in the lives of others by resisting the interlocking systems of oppression.

**Attributes:** Historical Perspectives(Disc); Inquiry (Discovery)

**Grade Mode:** Letter Grading

**WS #444C - On the Roads to Equality****Credits:** 4

Looking beyond what is traditionally thought of as the women's rights movement in the United States, this course remaps women's history and activism to include a diversity of women's experiences. A multicultural examination of history focuses on women's leadership and participation in immigrant rights, labor, the Black Women's Club, economic justice, reproductive rights, self determination and feminist movements during the 19th and early 20th centuries.

**Attributes:** Historical Perspectives(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**WS 444D - Cyborgs, Avatars, and Feminists: Gender in the Virtual World****Credits:** 4

Utilizing feminist theoretical and critical investigations of gender and techno culture, students explore women's popular and theoretical conceptions of cyberspace. Students explore numerous digital communication systems within cyberspace and examine how and why a diversity of women utilize these systems. This course provides students with the opportunity to investigate the impact that advancements in virtual technology have in the lives of women.

**Attributes:** Environment,TechSociety(Disc); Inquiry (Discovery); Writing Intensive Course

**Grade Mode:** Letter Grading

**WS 505 - Survey in Women's Studies****Credits:** 4

In-depth study of topics not covered in regular course offerings. The course explores the breadth and depth of Women's Studies from a historical perspective. In order to understand Women's Studies currently, students look at the historical foundations that contribute social, political, and economic influences on the topics. Barring duplication of topic, may be repeated for credit.

**Attributes:** Historical Perspectives(Disc); Inquiry (Discovery)

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**WS #505O - Survey in Women's Studies****Credits:** 4

In-depth study of topics not covered in regular course offerings. The course explores the breadth and depth of Women's Studies from a historical perspective. In order to understand Women's Studies currently, students look at the historical foundations that contribute social, political, and economic influences on the topics. Barring duplication of topic, may be repeated for credit.

**Attributes:** Historical Perspectives(Disc)

**Equivalent(s):** WS 505

**Grade Mode:** Letter Grading

**WS 510 - Framing Feminism: Gender Politics in Film****Credits:** 4

This course examines the history of feminist struggle in the U.S. by critically viewing and analyzing diverse films from the 1970s to the present. Students learn about the three waves of feminism and the various sociocultural, economic, sexual and political issues faced by women in the long and ongoing quest to achieve gender equality. Students explore methods of historical inquiry and film criticism to enable complex analyses of historical developments and contemporary arrangements of power. Attention is paid to how multiple identities and forms of oppression intersect in women's diverse lived experiences.

**Attributes:** Historical Perspectives(Disc)

**Grade Mode:** Letter Grading

**WS 632 - Feminist Thought****Credits:** 4

Theories of women's oppression and emancipation explored from various historical, political, cultural, and social perspectives. A major goal of the course is to increase awareness of historical and contemporary feminist approaches to understanding women's experiences, representations, and relative positions in societies. The course also considers the interrelation of theory and practice and the impact of past feminist theories on feminist movements.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** WS 401 with a minimum grade of D- or WS 405 with a minimum grade of D-.

**Grade Mode:** Letter Grading

**WS 795 - Independent Study****Credits:** 1-4

For advanced students who have the preparation to carry out an individual project of supervised research on a specific women's studies topic. Preparation should include WS 401 or equivalent, and/or other women's studies courses. Barring duplication of topic, may be repeated.

**Repeat Rule:** May be repeated for a maximum of 8 credits.

**Grade Mode:** Letter Grading

**WS 796 - Advanced Topics****Credits:** 4

Advanced or specialized topics not normally covered in regular course offerings. May be repeated, but not in duplicate areas.

**Repeat Rule:** May be repeated up to 2 times.

**Equivalent(s):** WS 796W

**Grade Mode:** Letter Grading

**WS 797 - Internship****Credits:** 4

Students gain practical experience in a woman-focused agency or organization. Plan of study and requirements are developed together with a faculty adviser and the student's workplace adviser. Bi-monthly seminar with all internship students and instructor.

**Repeat Rule:** May be repeated up to 2 times.

**Grade Mode:** Letter Grading

**WS 798 - Colloquium****Credits:** 4

Intensive study of specialized topic for advanced students. Topics vary with instructor. Barring duplication of topic, may be repeated for credit. Required for WS majors.

**Attributes:** Writing Intensive Course

**Repeat Rule:** May be repeated up to 8 times.

**Grade Mode:** Letter Grading

**WS 799 - Honors Thesis****Credits:** 4-8

With a faculty sponsor, students enrolled in the honors-in-major program develop an independent, investigative project in women's studies. Written thesis.

**Attributes:** Honors course

**Grade Mode:** Letter Grading

## Zoology (Z00L)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

**ZOOL 400 - Professional Perspectives in Zoology****Credits:** 1

Presentations by departmental faculty provide an informal overview of various zoological topics and professional opportunities. The course acquaints students with faculty, provides information on departmental research projects, and facilitates early research involvement for students. Required for all first-year zoology majors.

**Grade Mode:** Credit/Fail Grading**ZOOL 401 - Human Biology****Credits:** 0 or 4

How does the human body function in the face of constant flux? In this introductory biology course you will explore the molecules, cells, and organ systems that keep you healthy through the multidisciplinary lenses of chemistry, genetics, and homeostasis. Hands-on experimentation allows you to investigate common health-related questions such as the effects of caffeine on reaction time and the effects of handwashing on bacterial growth and transmission. Cannot be taken for credit after BMS 507 and BMS 508. Lab.

**Attributes:** Biological Science(Discovery); Discovery Lab Course**Equivalent(s):** ZOOL 507, ZOOL 508**Grade Mode:** Letter Grading**Special Fee:** Yes**ZOOL 406 - Evolution of Human Behavior****Credits:** 4

Have you ever wondered why women and men often have different criteria when looking for sexual partners? Why do we feel compelled to help people in some situations, but not others? This course explores the evolutionary effects on our most basic impulses, abilities, and failings, and illuminates the social and ecological pressures that made us who we are. Fair warning: this course may forever change how you think about your friends, your dates, and yourself!

**Attributes:** Biological Science(Discovery)**Grade Mode:** Letter Grading**ZOOL 406H - Honors/Evolution of Human Behavior****Credits:** 4

Have you ever wondered why women and men often have different criteria when looking for sexual partners? Why do we feel compelled to help people in some situations, but not others? This course explores the evolutionary effects on our most basic impulses, abilities, and failings, and illuminates the social and ecological pressures that made us who we are. Fair warning: this course may forever change how you think about your friends, your dates, and yourself!

**Attributes:** Biological Science(Discovery); Honors course**Grade Mode:** Letter Grading**ZOOL 518 - Comparative Morphology and Biology of Vertebrates****Credits:** 0 or 4

Why are vertebrates so successful on Earth? In this hands-on comparative biology course you will systematically examine the evolutionary history of form and function by exploring key adaptations that allowed vertebrates to diversify and thrive in the aquatic, terrestrial, and arboreal habitats they occupy today. In lab you will hone your dissection skills as you track ancestral and derived characteristics in 5 representative species on the vertebrate tree of life. Lab.

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-.**Grade Mode:** Letter Grading**Special Fee:** Yes**ZOOL 529 - Developmental Biology****Credits:** 0 or 4

Developmental biology explores how organisms construct themselves in each generation, and how those processes interact with ecological and evolutionary forces. The course examines development in various phyla, with an overarching focus on the design and interpretation of experiments using both classical and modern techniques. Labs include student-designed experiments and observation of development in several species of vertebrate embryos. Lab.

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-.**Equivalent(s):** ZOOL 629**Grade Mode:** Letter Grading**Special Fee:** Yes**ZOOL 542 - Ornithology****Credits:** 0 or 4

Identification and biology of birds, especially those of northeastern United States. Involves field trips, laboratory work, and lectures. (Spring semester only.)

**Prerequisite(s):** BIOL 412 with a minimum grade of C-.**Grade Mode:** Letter Grading**ZOOL 555 - Introduction to Entomology****Credits:** 4

This course is about insects, the animal taxon that represents 50% of all life forms on Earth. During this course students will explore this incredible diversity by studying insects from inside out and learning about major evolutionary events in the last 500 million years that shaped this incredible diversity. This course will also highlight the beneficial and detrimental roles insects play in human society: students will gain insights into medical and veterinary entomology, coastal entomology, principles of sustainable pest management and insect conservation. Throughout the course, students will broadly apply online tools for insect identification and will be exposed to community driven nature conservation and monitoring efforts using online applications, such as iNaturalist and BugGuide. Lab.

**Prerequisite(s):** BIOL 412 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**ZOOL 566 - Herpetology****Credits:** 4

This course will serve as an introduction to the morphology, behavior, and evolutionary ecology of reptiles (tuataras, turtles, snakes, lizards, and crocodilians) and amphibians (frogs, salamanders, and caecilians), with a special emphasis on New England taxa. The course will include field excursions, short-term research projects, and the comparative examination of specimens.

**Prerequisite(s):** BIOL 412 with a minimum grade of C-.**Grade Mode:** Letter Grading**Special Fee:** Yes**ZOOL 600 - Field Experience****Credits:** 1-4

A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty advisor selected by the student.

**Repeat Rule:** May be repeated for a maximum of 8 credits.**Grade Mode:** Credit/Fail Grading

**ZOOL 610 - Principles of Aquaculture****Credits:** 4

Introduces the culture practices employed for production of aquatic organisms. Topics include ecological and environmental considerations, selective breeding, nutrition, diseases, processing, and marketing. Emphasis on finfish.

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**ZOOL 613W - Animal Behavior****Credits:** 5

In this course we will first investigate the mechanisms of behavior—how do animals behave the way they do? We'll then spend the bulk of the semester exploring the ecology and evolution of behavior—why do animals behave the way they do? In lab, we will use hands-on activities to complement material from class, and you'll gain first-hand research experience when you design and conduct your own animal behavior study. Lab.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** BIOL 412 with a minimum grade of C-.

**Equivalent(s):** ZOOL 613, ZOOL 713

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**ZOOL 625 - Principles of Animal Physiology****Credits:** 3

Introduces the principles of animal function. The major systems (digestion, metabolism, respiration, circulation, osmotic and ionic regulation, nerve-muscle function, endocrine control) are covered with emphasis on functional mechanisms at the cell and tissue levels.

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-.

**Equivalent(s):** ANSC 627, ANSC 717, ZOOL 519, ZOOL 627

**Grade Mode:** Letter Grading

**ZOOL 626W - Animal Physiology Laboratory****Credits:** 2

Basic training in the measurement of function in animals, data analysis and expression, and the development of scientific communication skills.

**Co-requisite:** ZOOL 625

**Attributes:** Writing Intensive Course

**Equivalent(s):** ZOOL 626

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**ZOOL 690 - Evolution****Credits:** 4

Evolutionary biology is about uncovering the past, understanding the present, and predicting the future of animals, plants, and microbes. Is also offers insight into how scientific ideas change through time. This course covers natural selection and adaptation, phylogeny, population genetics and structure, origins and extinction of species, domestication, and evolutionary medicine. Additional topics may include human evolution and evolutionary impacts, biogeography, and social evolution, as well as the intersections between evolution, ecology and development.

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Equivalent(s):** ZOOL 690W

**Grade Mode:** Letter Grading

**ZOOL 690W - Evolution****Credits:** 4

Evolutionary biology is about uncovering the past, understanding the present, and predicting the future of animals, plants, and microbes. Is also offers insight into how scientific ideas change through time. This course covers natural selection and adaptation, phylogeny, population genetics and structure, origins and extinction of species, domestication, and evolutionary medicine. Additional topics may include human evolution and evolutionary impacts, biogeography, and social evolution, as well as the intersections between evolution, ecology and development.

**Attributes:** Writing Intensive Course

**Prerequisite(s):** BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.

**Equivalent(s):** ZOOL 690

**Grade Mode:** Letter Grading

**ZOOL 708 - Stream Ecology****Credits:** 4

Ecological relationships of organisms in flowing water; streams as ecosystems. Lectures on physical and chemical features of streams, floral and faunal communities, and factors controlling populations and behavior of stream organisms. Lab exercises employ both field and laboratory experimental techniques. Lab. (Not offered every year.)

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**ZOOL 710 - Sharks and Bony Fishes****Credits:** 0 or 4

Some fish swimming today are hundreds of years old, whereas others complete their life cycle in two months! This course provides an introduction to the diversity of fishes found across the globe, including elasmobranchs (sharks, skates, and rays) and teleosts (bony fishes). Particular attention will be paid to fishes local to New Hampshire and New England. Students will learn about fish anatomy, physiology, and ecology. Lab. (Offered in alternative years.)

**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-.

**Equivalent(s):** ZOOL 734

**Grade Mode:** Letter Grading

**Special Fee:** Yes

**ZOOL 726 - Conservation Behavior****Credits:** 4

What's the best way to deter an elephant from raiding crops? Is it with chili peppers? Bees? This is one example from the new interdisciplinary field of "conservation behavior," which uses the study of animal behavior to inform how we manage wildlife populations. This course targets students well-versed in either animal behavior or wildlife ecology who wish to learn more about the other side. We will focus heavily on reading, writing, discussion, and career preparation.

**Prerequisite(s):** ZOOL 613 with a minimum grade of C- or NR 433 with a minimum grade of D- or NR 640 with a minimum grade of C-.

**Grade Mode:** Letter Grading

**ZOOL 733W - Behavioral Ecology****Credits:** 0 or 4

Behavioral ecology is the evolution of animal behavior played out on the stage of ecology—why might a certain behavior be adaptive in a certain context? In this course, we will pursue in-depth, high-level explorations of the central topics of animal behavior, all through the lens of evolution. We will also focus heavily on improving reading, writing, and presentation skills.

**Attributes:** Writing Intensive Course**Prerequisite(s):** ZOOL 613 with a minimum grade of C-.**Equivalent(s):** ZOOL 733**Grade Mode:** Letter Grading**ZOOL 736 - Genes and Behavior****Credits:** 4

Genes and behavior examines the genetic underpinnings of animal behavior, and how behavior evolves on a genetic level. The course primarily relies on readings from the primary literature, using examples from laboratory model organisms, animals in their natural habitats, and humans. Topics include aggressiveness, social behavior, personality, parental care, communication, mating behavior, novelty seeking behavior, and foraging. This interdisciplinary course examines these behaviors at multiple levels, including genomics, population genetics, molecular genetics, epigenetics, endocrinology, and neurobiology.

**Prerequisite(s):** (GEN 604 with a minimum grade of C- or ANSC 612 with a minimum grade of C-) and ZOOL 613 with a minimum grade of C-.**Grade Mode:** Letter Grading**ZOOL 740 - Acoustic Ecology****Credits:** 4

This course examines the acoustic environment and how alterations to the acoustic environment from human activities and climate change result in permanent changes to animal behavior and the resulting soundscape. Focusing on using acoustics as a tool to monitor species and habitats, students will learn quantitative approaches and best practices for acoustic ecology investigations. Students will explore the emerging field of ecological acoustics through primary literature and hands-on, independent research in habitats surrounding UNH campus. This course is intended for advanced undergraduate or graduate students interested in animal behavior, ecology, wildlife and conservation biology, or zoology.

**Prerequisite(s):** BIOL 412 with a minimum grade of D-.**Grade Mode:** Letter Grading**Special Fee:** Yes**ZOOL 770 - Senior Seminar in Zoology****Credits:** 2

Explore and synthesize your undergraduate zoological knowledge and skills through an integrated outlook at a topic relating to your professional future. Each semester revolves around a different overarching topic on which students read assigned topical papers, prepare critical analyses, and give presentations to the class.

**Grade Mode:** Letter Grading**ZOOL 777W - Neuroethology****Credits:** 4

Students taking this course will discover how some of the most remarkable behavioral adaptations in animals can be understood by examining specialized sensory systems and neural circuits. By exploring the complex interactions between animal behavior, neural systems, evolutionary relationships, anatomy, physiology and ecology, students will be better equipped to understand the neural basis of behavior. A culminating writing project will help sharpen students' scientific writing skills, and the ability to understand the primary neuroethology literature.

**Attributes:** Writing Intensive Course**Prerequisite(s):** BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-.**Equivalent(s):** ZOOL 777**Grade Mode:** Letter Grading**ZOOL 795 - Independent Investigations in Zoology****Credits:** 1-4

Independent study in a topic related to Zoology, arranged by the student with a faculty sponsor. Enrollment by permission only.

**Repeat Rule:** May be repeated for a maximum of 8 credits. May be repeated up to 5 times.**Grade Mode:** Letter Grading**ZOOL 795W - Special Investigations****Credits:** 1-4

Independent study in various areas including but not limited to animal behavior, developmental biology, ecology, endocrinology, evolution, ichthyology, genetics, history of biology, invertebrate biology, neurobiology and behavior, protozoology, teaching practices, underwater research, vertebrate biology, and biological techniques. Course sections for advanced work, individual or group seminar. May include reading, laboratory work, organized seminars, and conferences.

**Attributes:** Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 12 credits.**Grade Mode:** Letter Grading**ZOOL 799H - Honors Senior Thesis****Credits:** 1-4

Working under the direction of a faculty sponsor, the student plans and carries out independent research resulting in a written thesis. Limited to students entering their senior year; required for students in the honors program or working toward honors-in-major. A two-semester sequence. 2-4 credits each semester. IA (continuous grading) given at the end of the first semester.

**Attributes:** Honors course; Writing Intensive Course**Repeat Rule:** May be repeated for a maximum of 8 credits.**Equivalent(s):** ZOOL 799**Grade Mode:** Letter Grading
