This course provides in-depth study of the development of children's language and communication skills from birth through age eight. Students identify the various developmental levels exhibited by children, and choose and create diverse materials to enhance language and literacy development. The course focuses on analyzing and creating language-rich programs designed to foster listening, oral and written language, and pre-reading and reading skills at the appropriate developmental level. Students formulate developmentally appropriate questions and responses to enrich the child's experience. The course addresses how everyday experiences can present opportunities for creating meaningful communication between children, their peers, and adults.
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D-.
Equivalent(s): EDU 555G
Grade Mode: Letter Grading

EDC 504 - Health, Safety & Nutrition in Early Childhood Settings
Credits: 4
This course provides a comprehensive overview of health, safety and nutrition best practices in early care and education group settings. How best to promote the physical, mental, and emotional health of each child will be explored. State regulations, program procedures, and curriculum integration will be the focus of the course.
Equivalent(s): EDU 556G
Grade Mode: Letter Grading

EDC 505 - Mathematics and Science in Early Childhood Education
Credits: 4
The course focuses on the cognitive development of children birth to age eight with emphasis upon the development and interrelatedness of math and science concepts. Using a hands-on approach, students explore the various materials used in learning centers to stimulate and develop children's logico-mathematical thinking. Students identify the various developmental levels of children's thinking and create developmentally appropriate materials and settings. The course emphasizes the application of developmental principles to investigate and devise experiences which employ mathematical reasoning and scientific processes.
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): EDU 600G
Grade Mode: Letter Grading

EDC 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Education. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): EDU 544G
Grade Mode: Letter Grading

EDC 601 - Positive Behavior Guidance in Early Childhood Education
Credits: 4
This course provides an overview of children's social and emotional development and an exploration of factors that influence behavior. Topics include the impact of differing development, external factors, relationships, and stress and trauma on child development. Participants will analyze children's behavior in a variety of situations and reflect on how children respond to stimuli. The role of adults in affecting positive development will be explored. Evidence based strategies and techniques for guiding positive behavior will be applied.
Equivalent(s): EDU 560G
Grade Mode: Letter Grading

EDC 602 - Learning and Early Childhood Environments
Credits: 4
This course addresses how to optimize children's learning through play and daily routines. Using theories of child development, participants analyze how the physical arrangement of the classroom and outdoor area can maximize development. Students plan an environment that meets safety and health needs, that allows for child-directed choices and activities, and supports the child's physical, cognitive, language, social, and creative growth. Students apply practices to environments that are both developmentally and culturally inclusive.
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): EDU 551G
Grade Mode: Letter Grading

EDC 606 - Young Children with Exceptionalities in Early Childhood Settings
Credits: 4
This course focuses on promoting the optimal development of young children with special needs in an inclusionary early childhood setting. Building on a foundation of child development and the components of high-quality early childhood programs, students investigate specific physical, emotional, and psychological conditions that delay or modify the course of a child's healthy development. Students observe children with special needs to design curriculum and environmental adaptations. Students develop strategies for collaborating with families and community service providers based on knowledge of legislative mandates regarding special education.
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): EDC 506
Grade Mode: Letter Grading

EDC 607 - Early Childhood Program Administration
Credits: 4
This course provides an overview of the policies, procedures, and leadership practices related to the administration of quality early childhood programs. Topics include program development, budgeting and financial management, organizational structures, and staffing and supervision. The role of directors as leaders is explored. This course is designed for early childhood administrators, as well as for those aspiring to be directors. Prior completion of EDC 713 Family and Community Relations in ECE and EDC 602 Learning and Early Childhood Environments is recommended.
Prerequisite(s): EDC 501 with a minimum grade of D- or EDU 550G with a minimum grade of D-.
Grade Mode: Letter Grading

EDC 644 - Special Topics: Upper Level
Credits: 4
A study of current and variable topics in Education. Course content changes from term to term.
Equivalent(s): EDU 644G
Grade Mode: Letter Grading

EDC 700 - Introduction to Clinical Experience
Credits: 1
This course is required for all students enrolled in teaching licensure programs. Students develop prerequisite skills in lesson planning, assessment creation, data collection, and the formative assessment cycle, as they gain the technical and professional understandings required for successful completion of teacher licensure programs.
Equivalent(s): EDU 622G
Grade Mode: Letter Grading

EDC 701 - Special Education Law
Credits: 4
The current field of special education was established by law and further refined through the courts in litigation. In this writing intensive class, students trace the historical development of federal, state, and local laws and regulations such as the Individuals with Disabilities Education Act (IDEA) and the New Hampshire Standards for the Education of Students with Disabilities. Students will gain an understanding of the relationship between constitutional law, statutory law, regulatory law, and case law as it relates to current special education law. The focus on policies and procedures provides the background that future teachers and paraprofessionals need to fulfill their legal and ethical responsibilities and to understand the ever changing, complex nature of special education law.
Attributes: Writing Intensive Course
Equivalent(s): EDU 621G
Grade Mode: Letter Grading

EDC 702 - Young Children with Exceptionalities, Birth to Age 8
Credits: 4
In this course, students examine typical and non-typical development of children from birth through age 8. This is a time of rapid brain growth and overall development that forms the foundation for all learning. For young children who have exceptionalities in the physical, behavioral, developmental, or learning domains, these years are even more critical. The purpose of this course is to provide current, research-based knowledge and resources for professionals and their families who nurture, support, and provide services to exceptional children.
Grade Mode: Letter Grading

EDC 703 - The Dynamic Role of the Special Educator
Credits: 4
In this clinical course, students will examine the multifaceted role of the special education teacher as evaluator, consultant, case manager, and teacher. Courses taken throughout the teacher certification program support the development of skills for each of these roles. This is an introductory course designed to accomplish the following outcomes: (a) explore the college's digital library; (b) introduce the American Psychological Association annotation and format requirements; (c) provide a beginning teacher with an organizational framework for the varying roles of a special education teacher; (d) provide an in-depth understanding of their case management responsibilities; e) plan for the effective supervision of paraeducators; f) introduce the reflective analysis of student work teaching and assessment cycle; and g) apply the components of systematic direct instruction in lesson plan development.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 606G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 704 - Assessment of Young Children in Early Childhood and Early Childhood Spec. Education, Birth to Age 8
Credits: 4
In this course, students use procedures involved in the evaluation process for the determination of eligibility for special education. Students develop the skills necessary to administer and interpret assessment tools commonly used by early intervention staff and early childhood special education teachers. Under the supervision of the district mentor, students review early support and services records and/or school records, gather information, observe an evaluation team meeting, consult with district evaluators, and review a variety of assessment tools and evaluation reports for young children through age eight. Students participate in preparing an assessment plan, administering chosen assessment tools, and writing assessment reports. Emphasis is placed on working with team members in the evaluation process.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 624G
Grade Mode: Letter Grading

EDC 705 - Collaboration, Consultation and Teaming In Early Childhood & Early Childhood Special Education
Credits: 4
In this course, students research and evaluate family, community, and professional partnerships which support the growth and development of children with disabilities. The specific roles and responsibilities of each contributing partner will be explored and analyzed. Students, using knowledge acquired in areas of collaboration, consultation, and teaming, construct service delivery models to support young children with diverse needs and their families. Fifty to sixty supervised clinical hours are required.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 627G
Grade Mode: Letter Grading

EDC 706 - IFSPs, IEPs, and Transition Planning - Birth to Age 8
Credits: 2
This clinical course focuses on the components and processes involved in the legal aspects and development of Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs). Under the supervision of a district mentor, students review school records; observe IFSP/IEP team meetings; consult with district evaluators, students, and parents; analyze previously written IFSPs/IEPs and progress reports; and develop the skills necessary to prepare IFSPs/IEPs inclusive of transition plans and/or services. The culminating activities of the course include the development of an IFSP an IEP, and a research paper which addresses the legal/ethical considerations and implications in the development of IFSPs and IEPs. Fifty to sixty supervised clinical hours are required.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 628G
Grade Mode: Letter Grading

EDC 707 - Behavior Interventions for Young Children in Early Childhood/ Early Childhood Special Education
Credits: 4
In this clinical course, students examine basic principles and components of life skills that children need as foundation for the development of positive social skills, e.g., attachment, affiliation, self-regulation, initiative, problem solving, and respect. The student develops and implements a variety of activities and lesson plans to teach young children these critical life skills. Students develop strategies to be used with young children receiving early intervention services and/or to motivate young children in their preschool programs/classrooms by facilitating the development of positive peer relationships, addressing emotional needs, and minimizing disruptions resulting in increased learning. The student documents the use of individual activities and/or classroom strategies in a professional portfolio. Fifty to sixty supervised clinical hours are required.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 630G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 708 - Science, Technology, Engineering & Mathematics in Early Childhood and Early Childhood Spec Education
Credits: 4
In this clinical course, students focus on STEM content, effective practice, instructional strategies, materials and curriculum integration, based on standards, inquiry, and connections to the real world. STEM concepts of curiosity, creativity, collaboration, and critical thinking are researched and explored. Students will learn about the Scientific Method, as well as the roles of observation, classification, description, experimentation, application, and imagination. Students will learn how to use technology and interactive media in the early childhood classroom to support learning. The role of engineering in the curriculum will be investigated, including design of methods and ideas for product development. Students will understand and apply math process standards of problem-solving, reasoning and proof, communication, connection, and representation. The course emphasizes application of principles in order to investigate and create experiences which employ STEM concepts and teaching strategies.
Attributes: Writing Intensive Course
Prerequisite(s): (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-) and (EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-).
Equivalent(s): EDU 625SG
Grade Mode: Letter Grading
Special Fee: Yes

EDC 709 - Teaching Language Arts and Literacy in Early Childhood and Early Childhood Special Education
Credits: 6
This clinical course focuses on the development and instruction of language arts and literacy for children from birth through grade 3, with particular attention to the needs of children in early childhood and early childhood special education settings. Grounded in the research of the National Reading Panel and aligned with developmentally appropriate practices and standards from the National Association for the Education of Young Children (NAEYC), the course emphasizes the foundational components of early literacy, including phonological awareness, print awareness, oral language, vocabulary development, and early writing. Candidates explore the reciprocal relationships between speaking, listening, reading, and writing, and learn to design inclusive, culturally responsive instruction that meets the needs of diverse learners, including children with disabilities and dual language learners. Students assess children's literacy skills using both formal and informal tools and apply differentiated strategies to support language and literacy growth across home, classroom, and community contexts. Although this course focuses on birth through age 3, strategies and methods for teaching reading through grade 8 are covered in order to help prepare teachers for the Pearson Foundations of Reading Test. Drawing on the principles of the science of reading and structured literacy, the course prepares candidates to deliver evidence-based instruction that supports the development of proficient readers. Students learn to implement systematic, explicit instruction in phonics and other critical components of reading, consistent with current research and best practices for early literacy intervention. Fifty to eighty supervised clinical hours are required, with opportunities to observe and engage with children in early childhood and special education settings, collaborate with families, and evaluate the effectiveness of instruction. #As part of the clinical experience, students will complete a Small Group Decoding Intervention Project, providing hands-on practice in identifying decoding needs, designing targeted phonics instruction, and monitoring student progress. This semester-long project involves working with a small group of K–8 students over 5–6 weeks, conducting assessments, delivering instruction, and reflecting on student growth and instructional effectiveness. It serves as a key opportunity to apply course concepts to authentic classroom practice and is aligned with all course learning outcomes.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 601AG
Mutual Exclusion: No credit for students who have taken EDUC 706.
Grade Mode: Letter Grading
Special Fee: Yes

EDC 710 - Curriculum, Assessment and Instruction in Early Childhood/ Early Childhood SPED - Birth to Age 8
Credits: 4
In this clinical course, students examine, develop, and evaluate developmentally appropriate curriculum and instruction in early childhood and special education settings, for young children age five (kindergarten) through age eight (grade 3). Students use district and state curriculum and integrate subjects with one another. Students develop skills to create and advocate for healthy, supportive, respectful, and challenging learning environments for all children, ages five through eight.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 626G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 711 - Managing Student Behavior (non-clinical)
Credits: 4
This course is designed for non-teacher preparatory candidates to provide an overview of classroom behavior management. Students observe effective teachers using instructional management strategies. They administer and interpret questionnaires to analyze the classroom environment and identify student needs. They identify strategies to help students meet these needs, to increase motivation, to develop positive peer relationships, and to minimize disruption.
Prerequisite(s): PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.
Equivalent(s): EDU 623G
Grade Mode: Letter Grading

EDC 712 - Observation and Assessment in Early Childhood Education
Credits: 4
This course is designed to provide early childhood educators with the ability to use a variety of assessment methods to determine the developmental levels and needs of young children. Students are introduced to the meaning and uses of authentic assessment, as well as various tools and assessment strategies. The course addresses the interpretation of observational and assessment data to monitor children's progress, guide instructional practice, and identify and refer at-risk children. Prior completion of EDC 602 Learning and Early Childhood Environments is recommended.
Attributes: Writing Intensive Course
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): EDU 601G
Grade Mode: Letter Grading

EDC 713 - Family and Community Relations in Early Childhood Education
Credits: 4
This course examines various ways of enhancing the young child's development through promoting positive interrelationships among child care providers, parents, and others in the community. Using an ecological systems framework, the course builds knowledge of the roles of diverse family structures, cultural identities, stressors and supports, economic circumstances, and community characteristics and resources in facilitating child development. Students develop skills needed for communicating effectively with families, facilitating parent education, and promoting family involvement with child care settings as well as utilization of community resources. NOTE: Prior completion of SOSC 675 Dynamics of Family Relationships is recommended.
Attributes: Writing Intensive Course
Equivalent(s): EDU 603G
Grade Mode: Letter Grading

EDC 715W - Enhancing Supervision through Mentoring
Credits: 4
In this course, early childhood educators who are primary supervisors of teachers or assistant teachers explore the various dimensions of their role. Based on concepts of adult development and the stages of teacher development, participants learn to establish mentoring relationships and balance supervisory responsibilities as they gain skills to guide new employees, set goals, provide feedback on performance, resolve conflicts, and create positive working environments.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

EDC 716 - Students with Disabilities
Credits: 4
This course provides an overview of the thirteen Individuals with Disabilities Education Act (IDEA) educational disabilities and the opportunity to explore the implications of disability on learning. Students will develop knowledge of specific disabilities including: definition, diagnosis, etiology, prevalence, characteristics, adaptive behavior, and systems of support and resources. Students will explore how disability impacts learning and access to the general education curriculum. Students will research and identify teaching strategies, Universal Design for Learning (UDL) strategies, interventions, and educational and assistive technologies to enhance learning and provide equity in the classroom for students with disabilities.
Equivalent(s): EDU 617G
Mutual Exclusion: No credit for students who have taken EDUC 650, EDUC 750.
Grade Mode: Letter Grading

EDC 717 - Positive Behavior Guidance and Student Engagement
Credits: 4
In this clinical course, students explore the theory of social-emotional development, preventative intervention strategies, and the characteristics of safe and supportive learning communities. Students examine specific strategies for motivating students and promoting positive relationships between colleagues, students, and parents in an effort to enhance learning. Students conduct a functional behavior assessment as they develop a comprehensive perspective on classroom culture through the development of proactive management skills and intervention strategies.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 619G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 718 - Transition Planning & Developing IEPs
Credits: 2
This clinical course focuses on the components and processes involved in developing Individualized Education Programs (IEPs). Under the supervision of a supervising practitioner, students review school records, observe IEP team meetings, consult with district evaluators, students, and parents, analyze previously written IEPs and progress reports, and develop the skills necessary to prepare IEPs that include transition plans. During the culminating activity of the course, students develop an IEP and transition plan as a vehicle for exploring the legal and ethical considerations and implications in the development, implementation, and evaluation of IEPs.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 609G
Grade Mode: Letter Grading

EDC 719 - Using Technology to Teach Social Studies
Credits: 4
Technology is a necessary tool in teaching today's youth. In this clinical course, students focus on developing three broad skills: (1) how to design and teach an integrated social studies unit that challenges and assists K-8 students to think deeply, (2) how to incorporate into the plan a wide range of mostly constructivist instructional strategies, and (3) how to integrate a rich array of technology tools and digital educational content in a way that amplifies student learning.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 612G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 720 - Instructional Methods, Strategies, and Technologies to Meet the Needs of All Students
Credits: 4
Through the development of lesson plans in this clinical course, students demonstrate knowledge and expertise of a variety of instructional methods and research-based strategies to improve learning for diverse student populations facing complex individual learning challenges. Students will research instructional strategies and metacognition to determine its effectiveness in increasing independence, enhancing learning, and developing thinking skills in mathematics. Through their understanding of the principles of instruction, assessment, remediation, and technology integration, students develop a comprehensive math unit.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 607G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 721 - Assessment of Students with Disabilities
Credits: 4
This course focuses on the tools and procedures involved in the evaluation and determination of education disabilities. Under the supervision of the district mentor, students review school records, observe an evaluation team meeting, consult with district evaluators, review various assessment tools and evaluation reports, and develop the skills necessary to administer and interpret some of the assessments commonly used by special education teachers. The culminating activity of the course is the development of a formal assessment report.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 611G
Grade Mode: Letter Grading

EDC 722 - Strategies for Teaching Science
Credits: 4
This clinical course focuses on learning theories and their application to science instruction. Students examine a variety of instructional strategies through readings, observation and participation in their clinical placements, and determine the appropriateness of each in the learning process. Topics include constructivist learning, differentiated learning, and an in-depth look at how the state and national standards guide science instruction. Additional topics include integrated STEM curricula, the appropriate use of technology, and effective formative, summative, and alternative assessment strategies. Students plan, teach and evaluate an integrated thematic unit with lessons that align with Next Generation Science Standards.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 613G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 723 - Teaching Language Arts and Literacy
Credits: 6
This clinical course explores the development and instruction of language arts and literacy from kindergarten through grade 8. Grounded in the research of the National Reading Panel and the standards of the National Council of Teachers of English, the course addresses phonemic awareness, phonics, fluency, vocabulary, and comprehension alongside writing, speaking, and listening. Students engage in classroom observations, design and implement instructional strategies for diverse learners, and assess student progress in both reading and writing. Clinical work includes family and caregiver engagement, as well as curriculum evaluation. Drawing on the principles of the science of reading and structured literacy, the course prepares candidates to deliver evidence-based instruction that supports the development of proficient readers. Students learn to implement systematic, explicit instruction in phonics and other critical components of reading, consistent with current research and best practices for early literacy intervention. Fifty to eighty supervised clinical hours are required, with opportunities to observe and engage with children in early childhood and special education settings, collaborate with families, and evaluate the effectiveness of instruction. As part of the clinical experience, students will complete a Small Group Decoding Intervention Project, providing hands-on practice in identifying decoding needs, designing targeted phonics instruction, and monitoring student progress. This semester-long project involves working with a small group of K–8 students over 5–6 weeks, conducting assessments, delivering instruction, and reflecting on student growth and instructional effectiveness. It serves as a key opportunity to apply course concepts to authentic classroom practice and is aligned with all course learning outcomes.
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 610G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 724 - Elementary School Mathematics Methods
Credits: 4
This clinical course focuses on learning theories and their application to elementary school mathematics instruction. Students research a variety of instructional strategies through readings, observation, and participation in a clinical placement and determine the appropriateness of each in the learning process. Topics include constructivist learning, differentiated learning, and an in-depth look at how the Common Core State Standards in Mathematics guide mathematics instruction. Additional topics include integrated curricula, the appropriate use of technology, and effective formative, summative, and alternative assessment strategies. Students plan two five-lesson mathematics units for two different grade levels, teaching and reflecting on lessons taught in one of the units.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 616G
Mutual Exclusion: No credit for students who have taken MATH 703.
Grade Mode: Letter Grading
Special Fee: Yes

EDC 731 - Aspects of Mathematics Learning
Credits: 4
The clinical course is designed to provide prospective secondary school and middle school teachers with the skills to develop an integrated approach to teaching and learning mathematics. It will cover cultural and psychological aspects of learning mathematics, models of instruction and planning, teaching and learning styles, assessment strategies, models and organization, curriculum materials selection, classroom management, and the role of technology and media within these.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-.
Equivalent(s): EDU 652G
Mutual Exclusion: No credit for students who have taken MATH 700.
Grade Mode: Letter Grading
Special Fee: Yes

EDC 732 - Reading and Writing in the Mathematics Content Area
Credits: 4
This clinical course is designed to provide prospective secondary and middle school teachers with the knowledge, skills, and resources necessary to incorporate literacy skills into their mathematics content area plans. Emphasis will be on integrating the teaching of reading, writing, and oral literacy skills from various fields; students will explore and practice the methods and strategies, including testing and measurement assessments necessary to meet the diverse literacy needs of today's students allowing them to become independent students. Teaching and discussing theoretical and practical application of current theories and methods involved in teaching literacy to diverse secondary and middle student population within the contemporary pluralistic classroom, including differentiated learning styles through socioeconomic status, gender, and heritage, will be emphasized.
Attributes: Writing Intensive Course
Prerequisite(s): EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D- or EDC 731 with a minimum grade of D- or EDU 652G with a minimum grade of D-.
Equivalent(s): EDU 653G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 733 - Middle Level Mathematics Methods
Credits: 4
This clinical course focuses on mathematics learning theories and their application to middle school mathematics instruction. Students examine a variety of instructional strategies through readings, observation and supervised teaching. Topics include constructivist learning, differentiated learning, and an in-depth look at how the state and national standards guide mathematics instruction. Additional topics include integrated curricula, the appropriate use of technology, and effective formative, summative, and alternative assessment strategies. Students plan two, five-lesson mathematics units for two different grade levels, teaching and reflecting on lessons taught in one of the units. Depending on the certification program, a range of fifty to ninety supervised clinical hours are required.
Attributes: Writing Intensive Course
Prerequisite(s): (EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-) and (EDC 732 with a minimum grade of D- or EDU 653G with a minimum grade of D-).
Equivalent(s): EDU 614G
Mutual Exclusion: No credit for students who have taken MATH 703, MATH 709.
Grade Mode: Letter Grading
Special Fee: Yes

EDC 734 - Upper Level Mathematics Methods
Credits: 4
This clinical course focuses on mathematics learning theories and their application to secondary mathematics instruction. Students examine a variety of instructional strategies through readings, observation, and supervised teaching. Topics include constructivist learning, differentiated learning, and an in-depth look at how the state and national standards guide mathematics instruction. Additional topics include integrated curricula, the appropriate use of technology, and effective formative, summative, and alternative assessment strategies. Students plan two, 5-lesson mathematics units for two different grade levels, teaching and reflecting on lessons taught in one of the units. Depending on the certification program, a range of fifty to ninety supervised clinical hours are required.
Attributes: Writing Intensive Course
Prerequisite(s): (EDC 700 with a minimum grade of D- or EDU 622G with a minimum grade of D-) and (EDC 732 with a minimum grade of D- or EDU 653G with a minimum grade of D-).
Equivalent(s): EDU 615G
Mutual Exclusion: No credit for students who have taken MATH 709.
Grade Mode: Letter Grading
Special Fee: Yes

EDC 790 - Integrative: English Language Arts
Credits: 4
This capstone course in English Language Arts builds on all previous work in both education and English. Students explore current research in the field of English Language Arts education and synthesize their knowledge to build effective instructional practices that support children's learning. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): EDU 660G
Grade Mode: Letter Grading

EDC 791 - Integrative: Social Studies
Credits: 4
This capstone course in Social Studies builds on all previous work in both education and Social Studies. Students explore current research in the field of Social Studies and synthesize their knowledge to build effective instructional practices that support children's learning. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): EDU 661G
Grade Mode: Letter Grading

EDC 792 - Integrative: Mathematics Studies
Credits: 4
This capstone course in Math Studies builds on all previous work in both education and Math Studies. Students explore current research in the field of Math and synthesize their knowledge to build effective instructional practices that support children's learning. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): EDU 665G
Grade Mode: Letter Grading

EDC 797 - Practicum: Professionalism in Early Childhood Education
Credits: 4
This clinical course is designed to provide an opportunity for students to apply early childhood educational and developmental theory to practice in a licensed early childhood setting. Students participate in an approved site where they plan and implement curriculum under the supervision of a credentialed early childhood professional. This capstone experience allows the student to integrate course work in early childhood education, curriculum, assessment, and child development. In addition, students reflect upon and analyze field experiences. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): EDU 650G
Grade Mode: Letter Grading
Special Fee: Yes

EDC 798 - Culminating Teaching Experience and Seminar
Credits: 4
This course is the culminating experience in the plan of study toward NH teacher certification. This course gives teacher candidates an opportunity to be mentored in their field of certification by experienced teachers holding graduate degrees and to practice the variety of methods and strategies studied in the teacher preparation program. Teacher candidates enrolled in this course may be at different stages of acquiring the three hundred sixty to four hundred forty hours of supervised teaching experience. Additionally, teacher candidates will use the Teacher Candidate Assessment of Performance process to develop a final culminating document that demonstrates their proficiency in the areas of contextualization, planning and preparation, instruction, academic language, assessment, and reflection.
Attributes: Writing Intensive Course
Equivalent(s): EDU 651G
Grade Mode: Letter Grading
Special Fee: Yes

Education (EDUC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

EDUC 400 - Careers in Education: Exploring Professional Contexts
Credits: 1
Designed for students interested in learning about careers in education, this survey course explores professional opportunities in both formal and informal education settings within P-12 teaching and beyond (i.e., research, museum director, counseling, social work, educational software developer, etc.). Faculty from multiple disciplines and local professionals will present seminars and lead discussions about their role in addressing contemporary issues in education. Students will consider pathways that can be taken to pursue professional goals.
Grade Mode: Credit/Fail Grading

EDUC 402 - Introduction to Educational Studies: Social Change and Education in Local and Global Contexts
Credits: 4
This course introduces students to Educational Studies: the ways that social, cultural, and political factors influence education outside of conventional school settings. We examine the relationship between education and social change in local and global contexts. Guiding questions include: How does schooling produce certain kinds of citizens? How do grassroots movements use education to resist colonial/colonizing agendas? What role does education play in promoting democracy, and social and economic equality?.
Grade Mode: Letter Grading

EDUC 500 - Exploring Teaching
Credits: 4
For students considering a teaching career. In-school experiences to develop introductory skills in teaching. On-site seminars for analysis and evaluation. Assessment and advising related to teaching as a career. Prerequisite for further work toward teacher licensure. Minimum of 7 hours a week, plus travel time, required.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

EDUC 506 - Mentoring Readers and Writers in the Elementary Grades
Credits: 4
This course supports and extends the experiences of students who are simultaneously volunteering with the Seacoast Reads program. Students explore mentoring relationships, elementary students' engagement and motivation, effective practices for supporting literacy development, lesson planning, understanding student growth, and volunteers' own development as educators.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

EDUC 520 - Education, Poverty, and Development
Credits: 4
An examination of the human and institutional relationships among education, poverty, and social development. This course will emphasize the ways in which access to universal, effective education is correlated with the incidence of childhood poverty and its reduction in the US and selected countries in the developing world. Interactive, discussion-based classes. Prior coursework in social or political sciences, economics, international affairs, health sciences, or related fields suggested. A minimum of 15 hours of fieldwork beyond classroom time is required. Students can fulfill this requirement through a variety of experiences on and off campus.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

EDUC 525 - The Idea of Race in Teaching and Learning
Credits: 4
This course examines the idea of race from the perspective of science, history, and lived experience to help the student properly evaluate inequalities of treatment (on the basis of race or any other marker) in various sectors of life in the United States. The course aims to help the student a) perceive what is taught about race and what is communicated in our schools and colleges about the meaning of racial ascription and b) to figure out how the power of educational institutions can best be used to promote equality and fairness in society.
Grade Mode: Letter Grading

EDUC 550 - Language and Linguistic Diversity in Schools
Credits: 4
The course offers a broad examination of language and linguistic diversity and identities, drawing from education, sociolinguistics, anthropology, child development, and related fields. Content includes a critical examination of the evolution of the laws and policies affecting linguistic minorities in the U.S. and how they inform the educational rights of emerging and developing bilingual learners. A minimum of 20hrs of fieldwork beyond classroom time is required. Students have the opportunity to identify age group preference for field placement.
Grade Mode: Letter Grading

EDUC 556 - Peer to Peer Mentoring for Students with Disabilities
Credits: 2
This in person course is open to all undergraduates pursuing any major who have an interest in learning more and experiencing the importance of mentoring and diversity expansion at UNH. The primary goal is to introduce UNH undergraduates with and without intellectual disabilities to a mentoring experience. UNH students will develop a beginning understanding of the importance of expanding the diversity of the UNH campus to include students with disabilities in authentic campus life experiences including taking courses, extra-curricular activities, residential life, and on campus employment. Each mentor/mentee relationship will be individualized based on the needs of the students enrolled in the course and mentoring relationships will be matched based on the completion of individualized student directed personalized future planning.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

EDUC 605 - Educational Perspectives in Critical Times
Credits: 4
In this course students inquire, reflect on and teach ethical dilemmas in the practice of education. Students will establish a foundation of knowledge on which to build philosophies of education in preparation for a career in which they face policies influenced by political agendas, fads, and economic interests. Through readings, discussions and field experiences, students will become more practiced and comfortable in having difficult discussions related to pressing issues of education and equity.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 610 - Clinical Experience in Educational Studies
Credits: 1-4
Work with an agency, institution, or organization to gain technical and/or professional competence not otherwise available. Student plans experience with departmental advisor. Credit approval subject to recommendation of faculty members and performance of student.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

EDUC 650 - Introduction to Disability in Inclusive Schools and Communities
Credits: 4
In this foundational course, students will be introduced to evidence-based practices in equity-based inclusive education, leading to improved academic, social, communication, and behavioral outcomes for all students. Through a variety of films, readings, podcasts, interviews, and fieldwork assignments, students will explore education through the lens of learners with disabilities, families, and educators' perspectives. Students in this course represent a broad array of disciplines, including special education, social work, communication disorders, family studies, occupational therapy, early childhood, and more.
Mutual Exclusion: No credit for students who have taken EDC 716.
Grade Mode: Letter Grading

EDUC 656 - Advocating for Diverse and Inclusive Family-School-Community Partnerships
Credits: 4
The course is to examine the socio-cultural circumstances surrounding racially, culturally and linguistically diverse (RCLD) families raising children with disabilities, address the implications of the Individuals with Disabilities Education Act (IDEA) and Every Student Succeeds Act (ESSA) for families and professionals, discuss issues regarding families' experience during the special education process, assess family strengths and coping styles, and develop knowledge and skills to advocate for diverse and inclusive family-school-community partnerships.
Grade Mode: Letter Grading

EDUC 694 - Courses in Supervised Teaching
Credits: 8
Supervised Teaching of Music. Supervised Teaching of Adult and Occupational Education. Supervised Teaching of Mathematics.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

EDUC 694A - Supervised Teaching/Music
Credits: 8
Supervised Teaching of Music.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

EDUC 694C - Supervised Teaching/Mathematics
Credits: 8
Supervised Teaching of Mathematics.
Grade Mode: Credit/Fail Grading

EDUC 694D - Supervised Teaching/Kinesiology
Credits: 4
Supervised Teaching of Kinesiology.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

EDUC 701 - Human Development & Learning: Cultural Perspectives
Credits: 4
Learning in formal and informal contexts and cultural aspects of learning and development with an emphasis on childhood and adolescence. Theories of learning including behaviorism, constructivism, sociocultural, and design perspectives. Topics include research and varied cultural perspectives on intelligence, motivation, identity and the self, concept learning and knowledge, noncognitive aspects of learning, social and emotional learning, deficit thinking and social justice perspectives, design-based perspectives on educational innovation, and assessment. Junior and Senior status.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 703C - Classroom Management: Creating Positive Learning Environments
Credits: 4
This course is designed to help prospective and current teachers create and maintain caring, respectful classroom communities in which learners feel safe, valued, cared for, valued, and empowered. The course includes a strong emphasis on developing knowledge about the culture and backgrounds of children and families in order to establish positive interactions within the classroom community. The course addresses the challenges and opportunities in creating community in the increasingly diverse student populations in US schools. We will consider what it means to be culturally responsive in order to establish a classroom in which all students can succeed academically and socially.
Grade Mode: Letter Grading

EDUC 703D - Social Studies Methods for Middle and High School Teachers
Credits: 4
The social studies theory and methods course begins with an overview of the varied and, at times, competing goals and visions of the profession. Students examine these goals and their underlying rationales, and then develop their own philosophy of social studies teaching and learning. Students also examine state and national scope and sequence frameworks for the social studies, as well as the language arts Common Core standards. A variety of classroom strategies and methods are explored during the remainder of the course, including unit design, leading class discussions, how to approach controversial issues, teaching concepts and generalizations, increasing student engagement and empathy with the past, incorporating technology and the arts, management and discipline, and formats for assessment and grading.
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 703F - Teaching Elementary School Science
Credits: 4
This course is designed to increase pre-service teachers' pedagogical content knowledge and enthusiasm with respect to teaching science at the elementary level. Throughout this course, students will familiarize themselves with reform-based approaches to elementary science instruction through inquiry, readings, and class discussions. Science will be explored not only as an important element of elementary education, but also as a means by which to support a diverse class of elementary students in literacy and mathematics learning.
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 703M - Teaching Elementary Social Studies
Credits: 4
Social Studies Methods explores practical teaching models, techniques of implementation, and relationships to curricula in elementary classroom instruction. The New Hampshire Social Studies Frameworks and Common Core Curriculum Standards for instruction are identified and implemented in creating lesson plans for a mini unit.
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 706 - Teaching & Learning Literacy in the Elementary Classroom
Credits: 4
Methods in reading and writing instruction, including current theories, practices and materials for teaching, learning and assessment. Course includes a weekly practicum in an elementary classroom and satisfies reading/language arts requirement for prospective elementary teachers in the elementary or P-3 certification programs.
Mutual Exclusion: No credit for students who have taken EDC 709.
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 707 - Teaching Reading through the Content Areas
Credits: 2
Approaches and methods for teaching reading through content materials; coursework includes practical applications through development of instructional strategies and materials. Required for candidates seeking certification in art, biology, chemistry, earth science, general science, physical science, physics, or social science.
Grade Mode: Letter Grading

EDUC 710 - Navigating Difficult Dialogue
Credits: 4
This course is designed to support navigating the inevitable 'difficult dialogues' we encounter in schools (and life). This course emphasizes practicing basic counseling skills and deeper listening skills to facilitate effective dialogue and outcomes in a variety of settings. Teachers and administration in schools, managers in the workplace, business leaders in organizations, leaders in communities, and other educators in various fields will find this course useful in their professional work with individuals and groups.
Grade Mode: Letter Grading

EDUC 712 - Teaching Multilingual Learners
Credits: 4
This course is for people interested in teaching in schools and/or community agencies serving multilingual populations. Topics include: theories of first and second language acquisition, translanguaging, language policies and laws, strategies for teaching academic content to emerging bilinguals in mainstream classroom, creating classroom/school cultures that invite all students into learning, and the role of advocacy and professional collaboration in linguistically diverse public schools. In addition to designing and exploring a variety of teaching activities and techniques, students conduct a rich collection of field assignments including interviewing bi-/multilingual adults; visiting community agencies; and collaboratively designing community engagement activities.
Grade Mode: Letter Grading

EDUC 718 - Critical Social Justice in and Beyond Education
Credits: 4
Students will become familiar with key concepts and principles of critical theory, critical pedagogy, and social justice education so that they may use this body of work to inform their teaching, leadership, and scholarship. We will examine the role of a) schools in providing equity of educational access and outcomes, b) teacher agency to change unjust conditions, and c) micro experiences within schools and the macro layer of context (i.e., history, politics, economics, culture).
Grade Mode: Letter Grading

EDUC 720 - Educational Technology
Credits: 4
Educators with any experience level will develop the skills and mindset to find and use technology tools that can enhance student learning. Assignments and online discussions focus on foundational educational technology topics, including ethical and social justice considerations, best practices, and national technology standards. Assignments are completed using each week's tech tool category, such as presentations, image/video editing, and website creation. Participants will curate educational technology tools that fit their preferences and needs. This class will include the focus on facilitating remote learning.
Grade Mode: Letter Grading

EDUC 733 - Teaching Writing in the Elementary Grades
Credits: 4
An exploration of writing and writing instruction across a range of expressive forms, including digital technologies, social media, and video. Special emphasis on engagement with and preparation to teach multimodal literacies in elementary classrooms. Includes a focus on language diversity, the relationship between reading, writing, and literacy development, student-centered assessments, and integrating the arts into the reading and writing workshop.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

EDUC 734 - Critical Perspectives on Children's Literature
Credits: 4
Interpretive and critical study of literature and nonfiction texts written for elementary and middle school readers. Applications of children's literature in educational settings.
Grade Mode: Letter Grading

EDUC 739 - Assessment and Individualized Educational Planning in Special and Inclusive Education
Credits: 4
This course is intended to develop beginning inclusive and special educators' abilities in (a) assessing learners and learning environments, (b) designing, implementing, and evaluating the effectiveness of instruction through the use of individualized educational plans, and (c) implementing high-leverage practices in the areas of collaboration, assessment, and social/emotional/behavioral supports. Provides a focus on federal and state legal and procedural mandates.
Grade Mode: Letter Grading

EDUC 740 - Methods for Supporting Students in Special Education Using Intensive Interventions
Credits: 4
This course is designed to prepare educators to develop, implement, and assess the efficacy of evidence-based interventions for children and youth with intensive learning and behavioral needs. Topics addressed include the analysis of characteristics of learners and learning environments, and the subsequent design of individualized educational interventions in the areas of receptive and expressive language and literacy, mathematics, content-area academics and functional social/behavioral skills.
Grade Mode: Letter Grading

EDUC 751A - Inclusive Elementary Education: Literacies and Learning for Diverse Learners
Credits: 4
This course examines the role and responsibility of the elementary educator as an advocate for, and educator of, students with diverse learning needs. Methods and structure to enable educators to understand, engage, and respond to the challenges presented within an academically diverse classroom are addressed. Special focus is given to research and applications for facilitating emergent literacies and social, emotional and behavioral development.
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 751B - Methods of Inclusive Secondary Education: Literacies, Learning, and Transitions
Credits: 4
This course examines the role and responsibility of the secondary educator as an advocate for, and educator of students with diverse learning needs. Methods and structures to enable educators to understand, engage, and respond to the challenges presented within an academically diverse classroom are addressed. Special focus is given to research and applications for developing literacy, knowledge and competence within the content areas, and for facilitating post secondary transitions.
Grade Mode: Letter Grading
Special Fee: Yes

EDUC 760 - Introduction to Young Children with Special Needs
Credits: 4
Needs of children (birth to eight years) with developmental delays or who are at risk for disabilities. Strengths and special needs of such children; causes, identification, and treatment; current legislation; parent and family concerns; program models.
Grade Mode: Letter Grading

EDUC 761 - Designing Curriculum for Inclusive, Equitable Settings for Young Children (birth-8)
Credits: 4
This course focuses on designing curriculum for inclusive and equitable settings for young children, birth through age 8. Classroom applications for constructivist theory in the areas of curriculum planning and implementation; issues of equity and diversity in curriculum and assessment; overview of research and theory related to teaching and learning of specific content areas, with emphasis on integrated approach to early childhood curriculum. Stresses the reciprocal nature of student-teacher relationship in the inclusive and equitable settings.
Grade Mode: Letter Grading

EDUC 784 - Educators as Engaged Researchers and Reflective Professionals
Credits: 4
Educators as Engaged Researchers and Reflective Professionals is the culminating course for students completing their B.A in Education. The course is an integrative experience designed to offer students the space and opportunity to reflect on their time as undergraduate Education students and apply their knowledge in meaningful ways. This course will guide students in understanding their development within the major, encouraging and challenging them during this transitional, final semester to consider how they will draw on their knowledge and experiences in purposeful ways to positively impact their future academic, professional, and personal goals and endeavors. This work will manifest in different ways, and students will have the space to personalize their capstone experience; however, all students will be expected to complete two primary outcomes: portfolio and research experience.
Grade Mode: Letter Grading

EDUC 795 - Independent Study
Credits: 2 or 4
Juniors and seniors only, with approval by appropriate faculty member.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

EDUC 798 - Internship and Seminar in Inclusive Teaching
Credits: 4
This course is the fall teaching internship for students enrolled in the BA in Education program. This internship (part of a two-course sequence) is the culminating clinical experience required for licensure. Students will complete internship hours with a Clinical Educator, supervised by a UNH instructor. Students will also attend a weekly seminar where course assignments will be completed.
Prerequisite(s): EDUC 706 with a minimum grade of D- or EDUC 806 with a minimum grade of B-.
Grade Mode: Credit/Fail Grading

EDUC 799 - Internship and Seminar in Inclusive Teaching
Credits: 8
This course is the spring teaching internship for students enrolled in the BA in Education program. This internship (part of a two-course sequence) is the culminating clinical experience required for licensure. Students will complete internship hours with a Clinical Educator, supervised by a UNH instructor. Students will also attend a weekly seminar where course assignments will be completed.
Prerequisite(s): EDUC 706 with a minimum grade of D- or EDUC 806 with a minimum grade of B-.
Grade Mode: Credit/Fail Grading

Electrical & Computer Engineering (ECE)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ECE 401 - Perspectives in Electrical and Computer Engineering
Credits: 4
An introductory course for electrical and computer engineering majors that introduces incoming students to the fundamental concepts of analysis and design. Concepts are presented through an examination of real-world problems. Students are introduced to electrical and computer engineering problem solving and design through active learning techniques in lecture and in a laboratory setting. Provides a context for the electrical engineering and computer engineering curriculum and introduces the profession and activities of electrical and computer engineering. Lab.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading

ECE 537 - Introduction to Electrical Engineering
Credits: 4
Fundamentals of electrical engineering. Topics are circuit elements; signal waveforms; circuit laws and theorems; transfer functions; free, forced, and steady state responses; power calculations; amplifiers; and magnetic circuits. Lab.
Prerequisite(s): (PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-) and MATH 527 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 541 - Electric Circuits
Credits: 4
Linear passive circuits beginning with resistive circuits, power and energy relations, mesh and node analysis. Transient and steady-state behavior of simple circuits containing energy storage elements (capacitors, inductors). Introduction to linear active circuits using dependent source models and ideal op amps. Introduction to transfer function and frequency response concepts. Lab.
Prerequisite(s): MATH 426 (may be taken concurrently) with a minimum grade of D- and (PHYS 408 (may be taken concurrently) with a minimum grade of D- or PHYS 408S (may be taken concurrently) with a minimum grade of D- or PHYS 408H (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading

ECE 543 - Introduction to Digital Systems
Credits: 4
Fundamental analysis and design principles. Number systems, codes, Boolean algebra, and combinational and sequential digital circuits. Lab: student-built systems using modern integrated circuit technology and an introductory design session on a CAD workstation. Lab.
Grade Mode: Letter Grading

ECE 548 - Electronic Design I
Credits: 4
Introduction to electronic design for analog signal processing. Basic Concepts of Semiconductor Materials (electrons and holes, n-type and p-type semiconductors), Diodes (Modeling, Biasing, Zener Diodes, and Rectifier Circuits), FETs (Device Structure, Modes of Operation, and I-V Characteristics), BJTs (Device Structure, Modes of Operation, and I-V Characteristics), Transistor Amplifiers (Biasing a Transistor, Small-Signal Modeling, and Configurations), Operational Amplifier circuits for amplification and filtering. Lab.
Prerequisite(s): ECE 541 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 562 - Computer Organization
Credits: 4
Basic computer structure, including arithmetic, memory, control, and input/output units; the tradeoffs between hardware, instruction sets, speed, and cost. Laboratory experiments will use hardware and software to understand the concepts of instruction set architecture, machine language programming, control and data path design, and I/O interfacing.
Prerequisite(s): ECE 543 with a minimum grade of D- and CS 410C with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 583 - Designing with Programmable Logic
Credits: 6
This course covers topics related to field programmable logic devices. Students will be introduced to Hardware Description Language (HDL) design entry languages and simulation procedures, along with common logic synthesis tools. In laboratory exercises, each student will prototype a digital system starting with HDL entry, functional and timing simulations, logic synthesis, device programming, logic probing, and system verification. Labs will develop report writing skills. This course is required for CE majors and optional for EE majors.
Prerequisite(s): ECE 543 with a minimum grade of D- and ECE 562 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 602 - Engineering Analysis
Credits: 3
Analyze and solve engineering problems using linear algebra and integral and differential calculus of functions of several variables. Boundary-value problems in mechanics, fluid dynamics, and electrostatics. Examination of electrostatics, magnetostatics, and fluid and wave mechanics using vector differential and integral calculus. Introduction of approximation and error analysis methods as fundamental engineering tools.
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 645 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 603 - Electromagnetic Fields and Waves I
Credits: 3
Maxwell's equations in integral and differential form with applications to static and dynamic fields. Uniform plane waves in free space and material media. Boundary conditions; simple transmission line theory; parallel plate and rectangular waveguides; simple radiating systems.
Prerequisite(s): (PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-) and ECE 602 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 633 - Signals and Systems I
Credits: 3
Mathematical characterization of continuous-time systems using time- and frequency-domain concepts. Properties of linear systems described by ordinary differential equations. Fourier analysis of signals and system frequency response functions. Applications to communication and control systems. Introduction to system simulation using computer methods.
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 645 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): ECE 633H
Grade Mode: Letter Grading

ECE 633H - Honors/Signals and Systems I
Credits: 4
Mathematical characterization of continuous-time systems using time- and frequency-domain concepts. Properties of linear systems described by ordinary differential equations. Fourier analysis of signals and system frequency response functions. Applications to communication and control systems. Introduction to system simulation using computer methods. Honors students will attend an additional one-hour meeting each week.
Attributes: Honors course
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 645 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 634 - Signals and Systems II
Credits: 3
Transient response analysis of linear systems using Laplace transforms, application to feedback control systems. Introduction to discrete-time linear systems; system response determination using Z-transform; elementary design of digital filters and controllers. State variable formulation of dynamical systems.
Prerequisite(s): ECE 633 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 647 - Random Processes and Signals in Engineering
Credits: 3
Emphasis on applied engineering concepts such as component failure, quality control, noise propagation. Topics include random variables, probability distributions, mean and variance, conditional probability, correlation, power spectral density.
Prerequisite(s): MATH 426 with a minimum grade of D- and ECE 602 with a minimum grade of D-.
Equivalent(s): ECE 647H
Grade Mode: Letter Grading

ECE 647H - Honors/Random Processes and Signals
Credits: 4
Emphasis on applied engineering concepts such as component failure, quality control, noise propagation. Topics include random variables, probability distributions, mean and variance, conditional probability, correlation, power spectral density. Honors students attend an additional one-hour meeting each week.
Attributes: Honors course
Prerequisite(s): MATH 426 with a minimum grade of D- and ECE 602 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 649 - Embedded Microcomputer Based Design
Credits: 6
This course covers topics related to architectures for embedded processors, hardware and software aspects of interfacing, handling interrupts, low-level programming including debugging of real-time systems, and embedded application implementations. Laboratory exercises will reinforce theoretical and applied concepts using an embedded architecture and develop report writing skills. Programming experience required. This course is required for CE majors and is optional for EE majors.
Attributes: Writing Intensive Course
Prerequisite(s): ECE 562 with a minimum grade of D- and ECE 583 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 652 - Electronic Design II
Credits: 6
Design of fundamental circuit blocks in electronic systems. Multistage amplifiers; feedback systems and stability; power amplifiers. Laboratory exercises in the design and analysis of active circuits. Application of laboratory instrumentation to the investigation of active circuit characteristics; computer-aided design, analysis, and testing; development of report writing skills. This course is required of EE majors, but it is not required of CE majors.
Prerequisite(s): ECE 548 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 653 - Electronic Design III
Credits: 6
Continuation of ECE 652 with emphasis on more advanced circuits including: active filters, Nonlinear electronic circuits: oscillators, function generators, phase-locked loops; clippers and peak detectors; A/D and D/A conversion, switching mode circuits. Laboratory exercises in the design and analysis of active circuits. Further advanced application of laboratory instrumentation to the investigation of active circuit characteristics; computer-aided design, analysis, and testing; development of report writing skills. This course is required of EE majors, but it is not required of CE majors.
Attributes: Writing Intensive Course
Prerequisite(s): ECE 652 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 712 - Advanced Digital Systems Design and Verification
Credits: 4
This course will introduce standard on-chip communication networks for digital systems, off-chip wired/wireless communication protocols and the implementation of standard I/O interfaces. This course will also teach the advanced FPGA architecture, design flow, and debugging methods, and reinforce students' prototyping skills on standalone FPGAs and cloud FPGAs. Modern digital design and optimization techniques will be presented and examined, as well. Reliability and security issues in digital system design will be emphasized in this course.
Prerequisite(s): ECE 543 with a minimum grade of D- and ECE 562 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 714 - Introduction to Digital Signal Processing
Credits: 4
Introduction to digital signal processing theory and practice, including coverage of discrete time signals and systems, frequency domain transforms and practical spectral analysis, digital filter terminology and design, and sampling and reconstruction of continuous time signals. Laboratory component providing an introduction to DSP design tools and real-time algorithm implementation. Lab.
Prerequisite(s): ECE 634 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 715 - Introduction to VLSI
Credits: 4
Principles of VLSI (Very Large Scale Integration) systems at the physical level. CMOS circuit and logic design, CAD tools, CMOS system case studies. Students exercise the whole development cycle of a VLSI chip: design and layout with the up-to-date commercial EDA tools. An IA (continuous grading) grade is given at the end of semester I. Lab.
Grade Mode: Letter Grading

ECE 717 - Introduction to Digital Image Processing
Credits: 4
Digital image representation; elements of digital processing systems; multidimensional sampling and quantization; image perception by humans, image transformations including the Fourier, the Walsh, and the Hough Transforms; image enhancement techniques including image smoothing, sharpening, histogram equalization, and pseudo color processing; image restoration fundamentals; image compression techniques, image segmentation and use of descriptors for image representation and classification. Lab.
Prerequisite(s): ECE 634 with a minimum grade of D- and ECE 647 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 757 - Fundamentals of Communication Systems
Credits: 4
Spectra of deterministic and random signals; baseband and bandpass digital and analog signaling techniques; transmitter and receiver architectures; performance analysis of digital and analog signaling in additive noise channels; carrier and symbol timing synchronization methods. Lab.
Prerequisite(s): ECE 634 with a minimum grade of D- and ECE 647 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 772 - Control Systems
Credits: 4
Development of advanced control system design concepts such as Nyquist analysis; lead-lag compensation; state feedback; parameter sensitivity; controllability; observability; introduction to non-linear and modern control. Includes interactive computer-aided design and real-time digital control. Lab.
Prerequisite(s): ECE 634 with a minimum grade of D-.
Equivalent(s): ME 772
Grade Mode: Letter Grading

ECE 775 - Applications of Integrated Circuits
Credits: 4
Design and construction of linear and nonlinear electronic circuits using existing integrated circuits. Limitations and use of operational amplifiers. Laboratory course in practical applications of non-digital integrated circuit devices. Lab.
Prerequisite(s): ECE 651 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 784 - Biomedical Instrumentation
Credits: 4
Principles of physiological and biological instrumentation design including transducers, signal conditioning, recording equipment, and patient safety. Laboratory includes the design and use of instrumentation for electrocardiography, electromyography, electroencephalography, pulse measurement, blood pressure, phonocardiography, spirometry, and temperature. Current research topics such as biotelemetry, ultrasonic diagnosis, and computer applications.
Prerequisite(s): ECE 548 with a minimum grade of D- or ECE 537 with a minimum grade of D-.
Grade Mode: Letter Grading

ECE 791 - Senior Project I
Credits: 3
First semester of the capstone design experience. Topics include creativity, design methodology, specification development, project management, ethics, safety, reliability and preparation for oral and written reports. Students develop project plans, and prepare and present written and oral project proposals. The project plans must include aspects of design, implementation and evaluation. At the end of the semester, students prepare a written progress report. All ECE Core Course Requirements must be met prior to enrolling in Senior Project I.
Attributes: Writing Intensive Course
Equivalent(s): ECE 791H
Grade Mode: Letter Grading

ECE 791H - Senior Honors Project I
Credits: 4
First semester of the capstone honors senior thesis research. Topics include creativity, design methodology, specification development, project management, ethics, safety, reliability and preparation for oral and written reports. Students develop project plans, and prepare and present written and oral project proposals. The project plans must include aspects of design, implementation and evaluation, similar to ECE 791. However, honors thesis research must also include independent research beyond the normal scope of ECE 791. At the end of the semester students prepare a written progress report. All ECE Core Course Requirements must be met prior to enrolling in Senior Honors Project I.
Attributes: Honors course; Writing Intensive Course
Equivalent(s): ECE 791
Grade Mode: Letter Grading

ECE 792 - Senior Project II
Credits: 3
This course requires the completion of the capstone design experience begun in ECE 791. At the end of the semester students prepare written final project reports, and present their results in a research poster session.
Attributes: Writing Intensive Course
Prerequisite(s): ECE 791 with a minimum grade of D-.
Equivalent(s): ECE 792H
Grade Mode: Letter Grading

ECE 792H - Senior Honors Project II
Credits: 4
This course requires the completion of the capstone honors thesis research begun in ECE 791H. At the end of the semester students prepare honors theses, and present their research results in a research poster session. ECE 791H/792H fulfills the requirement of one professional elective.
Attributes: Honors course; Writing Intensive Course
Prerequisite(s): ECE 791H with a minimum grade of D-.
Equivalent(s): ECE 792
Grade Mode: Letter Grading

ECE 795 - Electrical and Computer Engineering Projects
Credits: 1-4
Laboratory course. Student undertakes a project of mutual interest with an ECE faculty advisor. A written final report must be filed with the ECE Department.
Grade Mode: Letter Grading

ECE 796 - Special Topics
Credits: 1-4
New or specialized courses and/or independent study. 1 to 4 credits some sections may use credit/fail grading.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

Engineering Technology (ET)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ET 401 - Introduction to 3D Printing
Credits: 4
This project-based course explores the latest techniques in designing and fabricating 3D models using 3D printing technology. Through the integration of techniques from mathematics, engineering, and computing, students learn to design 3D models and manufacture them using 3D printers. The course challenges students to apply their skills in a variety of engineering projects that require creative problem-solving and critical thinking.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

ET 405 - Engineering Design
Credits: 4
This course introduces the engineering design process and solid modeling software tools to create 3D CAD models and generate professional industry engineering drawings. Industry codes and procedures are practiced e.g. Geometric Dimensioning & Tolerancing (GD&T). Students complete hands-on projects and activities. The engineering design process includes: problem identification, concept creation, modeling, analysis, and documentation. Industry standard 3D modeling software is used with project design methodology for graphical, written, and oral communication of mechanical design ideas.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading

ET 411 - Manufacturing and Materials Processing
Credits: 0 or 4
This course covers the basic manufacturing processes used to convert raw materials into finished goods. Various manufacturing methods including both traditional and computer controlled covered include: machining, forming, casting, welding, 3D printing. The complex relationship between design and manufacturability is investigated and emphasized. The lab portion of this course will demonstrate the use of various machining processes which are capable in the UNHM Machine Shop Lab.
Prerequisite(s): MATH 418 with a minimum grade of C- and ET 405 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

ET 421 - Digital Electronics I
Credits: 0 or 4
The fundamental analysis and design concepts of digital theory needed for more advanced study of digital circuits. Topics covered include: number systems, codes, Boolean algebra, K-mapping, and combinational, sequential digital circuits. Lab exercises explore modern integrated circuit technology and introductory design using Electronic Design Automation (EDA) tools.
Co-requisite: COMP 424
Prerequisite(s): MATH 418 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 431 - Circuit Analysis I
Credits: 0 or 4
First course in electronic circuit analysis exploring the fundamental idea of current and voltage. Topics include the basic laws and theorems that govern simple electrical systems; Kirchoff's laws, Ohm's law, power relationships, resistance, inductance, and capacitance. Laboratory exercises will introduce the student to the basic measurement techniques of electronic systems using circuit building, power supplies, multi-meters and oscilloscopes. This course will also introduce basic circuit simulation techniques.
Prerequisite(s): MATH 418 (may be taken concurrently) with a minimum grade of C-.
Grade Mode: Letter Grading

ET 432 - Circuit Analysis II
Credits: 0 or 4
Second course in electronic circuit analysis, introducing time varying circuits and more advanced electronic circuit analysis; including super position, node/mesh methods, phasor representation, frequency response, impedance, and reactance. Lab exercises use oscilloscopes, function generators to build and analyze circuits with reactive elements.
Co-requisite: MATH 425
Prerequisite(s): MATH 418 with a minimum grade of C- and ET 431 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 450 - Statics and Strength of Materials
Credits: 0 or 4
The statics portion of the course analyzes equilibrium force systems applied to rigid bodies and the internal stresses and strains which result. The strength of materials portion of the course investigates the relationship between internal stress and strain to material properties and behavior. Topics include free body diagrams, equilibrium force analysis, tension, compression, shear and moment diagrams, torsion, bending, trusses, and beam deflection analysis. Lab.
Prerequisite(s): MATH 418 with a minimum grade of C- and (PHYS 407 (may be taken concurrently) with a minimum grade of C- or PHYS 407S (may be taken concurrently) with a minimum grade of C- or PHYS 407H (may be taken concurrently) with a minimum grade of C-).
Grade Mode: Letter Grading

ET 502 - Measurement and Control
Credits: 0 or 4
The course covers basic electricity and electronics (analog and digital) and electronic components (transistors, op-amps, SCR's). Electromechanical principles are introduced involving sensors and transducers used in production processes. Programming using the Arduino software and microcontroller is introduced. The basics of Programmable Logic Control (PLC) using Relay Ladder Logic programming is covered. Students use both hardware and software covered in the lecture portion of the course in the laboratory session.
Prerequisite(s): MATH 418 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 505 - Material Science
Credits: 0 or 4
This course studies the properties and behavior of engineering materials. Materials considered are ferrous and nonferrous metals and alloys, as well as plastics, ceramics, and composites. Material property and behavior modification through thermal and mechanical means is studied: such as heat treatment of steel or cold work forming. Selection of materials based upon manufacturing and design requirements is emphasized. Lab experiments will complement lecture material where appropriate.
Prerequisite(s): MATH 425 with a minimum grade of C- and ET 450 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 522 - Digital Electronics II
Credits: 0 or 4
Advanced topics in digital design techniques. Topics covered include: complex digital circuits, Flip-Flop circuits, counters, state machines, state diagrams, and memory devices. Laboratory exercises work with modern digital design methods with schematic entry, synthesis using VHDL, simulation modern digital systems implemented on Field Programmable Gate Arrays (FPGA).
Prerequisite(s): ET 421 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 541 - Electronic Devices
Credits: 4
Introductory course in Electronic devices looking at modern components used in current electronic systems. This course will develop techniques to analyze basic semiconductor devices such as diodes, field effect transistors and bipolar transistors. Specific diode circuits covered include: rectifying, clipping, and clamping circuit configurations. Methods to model, analyze and bias the basic transistor amplification circuits will be developed. Lab exercises will explore these types of circuit both in physical prototyping and simulation.
Prerequisite(s): MATH 425 with a minimum grade of C- and ET 431 with a minimum grade of C- and ET 432 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 542 - Analog Electronics
Credits: 0 or 4
Design of fundamental analog circuit blocks in electronic systems. Multistage amplifiers; feedback systems and stability; power amplifiers. Nonlinear electronic circuits: oscillators, function generators; clippers and peak detectors; A/D and D/A conversion. Laboratory exercises will explore building physical prototypes and the use of simulation to build and analyze Analog systems.
Grade Mode: Letter Grading

ET 550 - Dynamics and Machine Design I
Credits: 0 or 4
The dynamics portion of the course covers basic fundamentals of particle and rigid body dynamics, rectilinear and curvilinear motion, and kinematic motion. The machine design portion covers static and dynamic stress analysis theories, combined stress, and fatigue and endurance strength. Introduction to various machine element analyses are begun including fasteners, springs, and shaft design. Computer applications are employed where appropriate using CAD and Excel. Lab.
Prerequisite(s): ET 405 with a minimum grade of C- and ET 450 with a minimum grade of C- and MATH 425 (may be taken concurrently) with a minimum grade of C-.
Grade Mode: Letter Grading

ET 560 - Machine Design II
Credits: 0 or 4
This course is a continuation of ET 550 Machine Design portion. Additional machine elements and their related analyses are covered. Power transmission drive components such as gears, belts, chains, clutches and brakes are covered. Lab projects will involve individual components or combined items above. Computer application software is used where appropriate, including CAD and Excel. Lab.
Prerequisite(s): ET 550 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 590 - Embedded Microcontrollers
Credits: 0 or 4
The purpose of this course is to explore the subject of microprocessors and embedded systems, covering architectural issues, programming, and interfacing. The course will also cover processor organization, emphasizing the typical structure of today's microcontrollers, processor models, and programming styles. Throughout the material, the consideration of input/output systems to the use of various embedded peripherals and interfacing external loads for a spectrum of diverse applications will be addressed.
Prerequisite(s): ET 522 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 625 - Technical Communications
Credits: 4
Designed to improve students' capabilities to prepare and present technical information in written and oral form and through electronic means. ET majors should take this course early in their program of study so that proficiencies developed can be utilized in later courses. (Also listed as ENGL 502.)
Attributes: Writing Intensive Course
Equivalent(s): ENGL 502, ENGL 502H
Grade Mode: Letter Grading

ET 635 - Fluid Technology and Heat Transfer
Credits: 0 or 4
Fundamental principles of fluid technology and basic principles of heat transfer, with applications in solving practical problems, and how these concepts are used in the HVAC area. Lab.
Prerequisite(s): ET 529 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 641 - Production Systems
Credits: 4
Market forecasting; waiting line theory; manufacturing inventories and their control; production scheduling; quality control.
Prerequisite(s): MATH 425 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

ET 644 - Mechanical Engineering Technology Concepts in Analysis and Design
Credits: 4
Kinematics, kinetics, work and energy, fluids, heat transfer; application of these concepts to problems in mechanical design.
Prerequisite(s): ET 450 with a minimum grade of C- and ET 560 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 645 - Fluid Technology and Heat Transfer II
Credits: 0 or 4
The course prepares the student to apply thermal and fluid engineering principles to situations typical of those encountered in industry. Topics covered include thermodynamics of two phase fluids, fluid dynamics of piping systems, principles of turbomachinery, and analysis of power cycles. No credit for students who have taken ET 696 Special Topics in Mechanical Engineering Technology for credit. Lab.
Prerequisite(s): ET 635 with a minimum grade of C- and MATH 425 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 660 - FPGA Design with HDL
Credits: 4
This course covers the design and verification of various digital blocks with a hardware description language and their implementations in an FPGA (Field Programmable Gate Array) using an integrated design tool.
Prerequisite(s): ET 590 with a minimum grade of D- and COMP 424 with a minimum grade of D-.
Grade Mode: Letter Grading

ET 671 - Digital Systems
Credits: 0 or 4
Digital systems design and application using TTL and CMOS devices, design of systems, and interfacing. Digital design project required. Lab.
Prerequisite(s): ET 522 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 674 - Control Systems and Components
Credits: 0 or 4
Topics include linear systems analysis, the Laplace transform and its properties, controllers, root locus technique, transient response analysis, first- and second-order systems, error analysis, and control system design. Lab.
Prerequisite(s): MATH 425 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 675 - Electrical Technology
Credits: 0 or 4
Electrical circuits: DC and AC network analysis, power factors, transformers, power supplies. Electronic circuits--diodes, transistors and operational amplifiers. Digital circuits and introduction to computer-aided engineering. Lab.
Prerequisite(s): MATH 425 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 677 - Analog Systems
Credits: 0 or 4
Operational amplifiers. Transducers and measurement systems. Frequency response. Grounding and shielding. Signal and power interfacing techniques. Design project. Lab.
Prerequisite(s): ET 542 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 680 - Communications and Fields
Credits: 0 or 4
Topics include Fourier series analysis; the Fourier transform and its properties; convolution; correlation including PN sequences; modulation theory; encoding and decoding of digital data (NRZ-M, NRZ-S, RZ, Biphase-L, and Manchester); antennas and antenna pattern; Radar Range Equation; and an introduction to information theory. Lab.
Prerequisite(s): MATH 425 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 751 - Mechanical Engineering Technology Project
Credits: 4 or 8
Students are required to find solutions to technological problems in design, fabrication, and testing as posed in industry. Students define the problem, create a schedule and budget, and work on a team to research, design, build, and test the software and hardware needed. Senior standing in the ET program required. This is a two-semester, year-long course: 4 credits per semester, a letter grade is given at the end of each semester. Withdrawal from course results in loss of credit.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ET 781 - Introduction to Automation Engineering
Credits: 4
Students are introduced to the topics needed to develop a good understanding of the basic principles of Automation Engineering. This introductory course covers a wide variety of topics such as performance of sensors, actuators, motors and drives, PLC's and HMI, environmental controls , robots, machine vision systems, and controls and system integration. Open to Electrical Engineering Technology, and Mechanical Engineering Technology majors only.
Grade Mode: Letter Grading

ET 788 - Introduction to Digital Signal Processing
Credits: 0 or 4
This course will deal with the topics of spectral representation of periodic and non-periodic analog signals followed by discrete sampling and aliasing and how it relates to Nyquist sampling theorem. The z-transform will be introduced as the required mathematical tool along with an introduction to MATLAB and its associated DSP tool box. Spectral analysis of digital signal will be accomplished using these tools. Convolution and digital filtering will also be covered. Lab.
Prerequisite(s): ET 680 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 790 - Microcomputer Technology
Credits: 0 or 4
This course explores modern microprocessor technology, focusing on microcontroller units (MCUs) for embedded systems. The topics include MCU structure, volatile and non-volatile memories, versatile input/output blocks, analog components, instruction set architecture, and assembly language programming. Laboratory work provides various C programming exercises with the Texas Instruments MSP430, a 16-bit MCU.
Prerequisite(s): ET 671 with a minimum grade of C-.
Grade Mode: Letter Grading

ET 791 - Electrical Engineering Technology Project
Credits: 4 or 8
Students are required to find solutions to technological problems in design, fabrication, and testing as posed in industry. Students define the problem, create a schedule and budget, and work on a team to research, design, build, and test the software and hardware needed. Senior standing in the ET program required. This is a two-semester, year-long course: 4 credits per semester, a letter grade is given at the end of each semester. Withdrawal from course results in loss of credit.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

English (ENG) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ENG 420 - The Writing Process
Credits: 4
This course introduces students to the foundational concepts and skills needed to communicate effectively in writing for academic study and professional development. Students will learn how to use the four stages of the writing process - prewriting, drafting, revising, and editing - to create written communication that meets its intended purpose for its intended audience. Students will also be introduced to rhetorical styles and the role of outside sources in academic writing. Constructing and implementing effectively-designed search strategies for information to answer a critical inquiry or research question are also addressed in this course.
Attributes: English (Gen Ed); Writing Intensive Course
Equivalent(s): ENG 500G
Mutual Exclusion: No credit for students who have taken ENGL 401.
Grade Mode: Letter Grading

ENG 450 - Introduction to Literature
Credits: 4
This writing and reading intensive course is foremost intended to increase students' exposure to and appreciation of literature in its many forms. Students will therefore read and discuss the primary genres of poetry, the short story, drama, and the novel. The second goal of the course is to hone students' abilities to read, write, and think critically about the ways in which human experience itself is shaped by language in literary texts. Through the development of literary analysis skills and the practice of writing about literature, students will learn to communicate meaningfully about literature as an art form with aesthetic, social, cultural, and political significance.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc); Writing Intensive Course
Prerequisite(s): (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-) and (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-).
Equivalent(s): ENG 504G
Grade Mode: Letter Grading

ENG 505 - Introduction to Language and Linguistics
Credits: 4
This course promotes meaningful literacy instruction through the study of language, language acquisition, the study of sounds and sound formation, word formation, and how words combine into larger meaningful units. The prescriptive standardization of such language forms as spelling, semantics, pronunciation, style, and register are addressed in this course. Basic components of descriptive grammar, to include syntax, semantics, phonology, and morphology are applied. Students will have the opportunity to develop an appreciation for regional and ethnic dialects and examine how language changes and develops over time.
Attributes: Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 505G
Grade Mode: Letter Grading

ENG 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in English. Course content changes from term to term.
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): ENG 544G
Grade Mode: Letter Grading

ENG 545 - The Media and Its Messages
Credits: 4
Grounded within the context of media studies, this course engages students in a critical and analytical exploration of the media and its influences on American culture and society. The course examines the various ways that the media functions as both a lens for interpreting culture and a tool through which culture is shaped. Through critical engagement with various forms of media, students explore the roles of film, visual art, television, music, mass media, and web- based media in shaping their understanding of literature, writing, and culture.
Attributes: Environment,TechSociety(Disc); Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 508G
Grade Mode: Letter Grading

ENG 555 - Children's Literature
Credits: 4
What are the qualities that make a particular work of children's literature endure? Why do some deceptively simple books remain favorites for years? Citing the work of psychologists, art historians, educators, and authors, students explore these and similar questions. The course considers picture books, traditional literature, and Young Adult novels. Students prepare annotated bibliographies of various genres, taking a personal look at the important role particular books play in the moral and social development of children.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-.
Equivalent(s): ENG 555G
Grade Mode: Letter Grading

ENG 565 - Modern American Writers 1865 to the Present
Credits: 4
For the past 150 years, American writers have grappled with the concept of what America is and what it might become. By reading fiction, poetry, drama, and non-fiction from 1865 to the present, this course explores how modern writers have shaped--and revealed--American identities. Readings may include authors of "Local Color" writing, Realism, the "Lost Generation," and the Postmodern era, as well as writers of the Harlem, Southern, and Native American Renaissances, in their historical, literary, and cultural contexts. Through reading, writing, and research, learners will interrogate evolving American experiences.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-.
Equivalent(s): ENG 510G
Grade Mode: Letter Grading

ENG 585 - Short Fiction
Credits: 4
This class focuses on late 19th through early 21st century short fiction, including both the short story and the novella. Readings and discussion of primary works by selected authors combine with study of secondary commentaries that outline the evolution of and theories about the genre. Students develop a basis for interpreting complex texts and for analyzing the techniques and characteristics that give short fiction its distinctive literary flavor.
Attributes: Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 633G
Grade Mode: Letter Grading

ENG 590 - Expository Writing
Credits: 4
This course extends and refines writing, reading, and critical thinking skills. Through analysis of texts, study of language as a symbol system, and exploration of advanced expository and persuasive techniques, students identify and apply effective strategies for creating and communicating meaning in their own essays. Writing within the course integrates research and citation in ways that are appropriate to the individual learner's chosen field of study. The workshop format of the course includes class discussion, individual conferences with the instructor, and peer critique of work in progress.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-) and (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-).
Equivalent(s): ENG 600G
Grade Mode: Letter Grading

ENG 604 - Creative Writing
Credits: 4
The goal of this course is for students to develop their own capacity for creative expression by writing in fiction, poetry, and other genres using the major craft forms and elements of the genre. They will also generate strategies for reading and interpreting contemporary published writing in the same genres. A workshop format will be used for students to learn how discussing works in progress with other writers can advance their own creative expression and support the creative expression of others. The workshop format will also introduce students to the unique challenges posed by the revision process in reworking an original creative work for an external audience.
Attributes: FinePerformingArts(Discovery); Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 604G
Grade Mode: Letter Grading

ENG 610 - War Writing in the 21st Century
Credits: 4
This course is designed to bridge the ever-widening civilian-military gap in the United States by examining the twenty-first century war experience through literature. The course will explore stories in multiple genres such as fiction, poetry, memoir, drama, and blogs to gain insights into the value of stories portraying combat and its aftermath. The course will also explore representations of military families on the home front. In addition to assigned readings, learners will have the opportunity to design research projects tailored to their own interests. This course provides insight to those who work with veterans and/or military families in the fields of behavioral health, health care, business, or education, and to anyone exercising their civic duties in a democracy.
Attributes: Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 550G
Grade Mode: Letter Grading

ENG 615 - Young Adult Literature
Credits: 4
This course explores a wide range of literature for young adults, along with social and literary criticism that help to illuminate the impact of this literature. Through readings and discussion of both current and classic literature, students identify why literature is a powerful tool and how it can help young adults shape their lives. Learners respond to young adult literature through written analyses and critiques.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-.
Equivalent(s): ENG 560G
Grade Mode: Letter Grading

ENG 620 - Multicultural Perspectives through Literature
Credits: 4
As the new realities of the global village erode long-standing assumptions about discrete nationhood and fixed cultures, the concept of what it means to be an American is also shifting. Through representative literary works, this course explores the challenges individuals from various ethnic, racial, and cultural backgrounds confront within a pluralistic society. Students construct a more inclusive definition of culture, assess traditional attitudes about race and ethnicity, and appreciate just how deeply Native, African, Hispanic, Asian, and European Americans have enriched our national identity.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-.
Equivalent(s): ENG 620G
Grade Mode: Letter Grading

ENG 625 - Readings in World Literature
Credits: 4
This course surveys representative texts in English by writers around the world, past and present. Readings from diverse periods and genres introduce major themes, movements, and topics in selected works from any or all of the following: antiquity, Europe, Asia, Africa, Latin America, the Caribbean, and the Pacific. Discussions of political, historical, and cultural contexts suggest the powerful forces that have shaped and continue to influence literary forms and traditions outside the U.S. and Britain.
Attributes: Human Thought Exp (Gen Ed)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 625G
Grade Mode: Letter Grading

ENG 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in English. Course content changes from term to term. It is expected that the student will have prior coursework or experience in the subject matter.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): ENG 644G
Grade Mode: Letter Grading

ENG 645 - Disability in Literature and Culture
Credits: 4
This course provides students with an in-depth study of how the portrayal of people with disabilities of many kinds - physical, emotional, social, and mental - in literature is reflective of the social and historical context in which it was written. Students apply close textual analysis of the imagery used to describe people with disabilities and evaluate the cultural attitudes this use of language reveals. Students read literature written by both disabled and non-disabled authors and analyze the ways that many stereotypical portrayals of disability undermine the disability community. Questions of how a culture decides what is "normal," how portrayals of the disability experience in literature differ between adults and children, and how the advocacy role is portrayed in literature are also examined. The goal of this course is to discover how literature can challenge our own assumptions about the experience of the disabled by contemplating what ultimately makes us human.
Attributes: Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 645G
Grade Mode: Letter Grading

ENG 675 - Survey of Classic Literature Through Film
Credits: 4
This course explores the interaction between film and literature in order to introduce students to major literary texts and their adaptations through film. Students will have the opportunity to read and analyze a selection of novels, plays, and poetry from major American and British writers. The course invites students to investigate cinematic interpretations of major works, and to position them within their historical and cultural contexts (taking careful consideration of portrayals of race, gender, class, religion, and sexuality). Students will practice analyzing literary text and film, and engage in scholarly and critical research. Additionally, they will use their work over the course of the semester to either create their own research on the topic or develop a lesson plan that incorporates literature and film for K-12 students. Selections of texts and films will represent commonly taught works.
Attributes: Human Thought Exp (Gen Ed)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or Has Accred Associate Deg with a score of WAIV or Has Accred Bachelor Deg with a score of WAIV.
Equivalent(s): ENG 636G
Grade Mode: Letter Grading

ENG 730 - The Graphic Novel
Credits: 4
This course will explore several different kinds of graphic novellas, memoir, fantasy, social critiques, adaptations, etc. in an effort to understand how writers and illustrators weave words and images together to create meaning in unique ways that transcend traditional genres and harness new modes of expression. The students will have an opportunity to broaden their knowledge and appreciation of graphic novels as they apply critical concepts to their study and produce their own comics. Recommended: ART 401 and CRIT 501.
Attributes: Human Thought Exp (Gen Ed)
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): ENG 630G
Grade Mode: Letter Grading

English (ENGL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ENGL 401 - First-Year Writing
Credits: 4
Training to write more skillfully and to read with more appreciation and discernment. Frequent individual conferences for every student.
Attributes: Writing Skills(Discovery); Writing Intensive Course
Equivalent(s): ENGL 401A, ENGL 401H
Mutual Exclusion: No credit for students who have taken ENG 420.
Grade Mode: Letter Grading

ENGL 401H - Honors/First-Year Writing
Credits: 4
Training to write more skillfully and to read with more appreciation and discernment. Frequent individual conferences for every student.
Attributes: Honors course; Writing Skills(Discovery); Writing Intensive Course
Equivalent(s): ENGL 401, ENGL 401A
Grade Mode: Letter Grading

ENGL 405 - Introduction to Linguistics
Credits: 4
Overview of the study of language: universal properties of human language, Chomsky's innateness of hypothesis, language acquisition in children, dialects and language variation, language change. Includes introduction to modern grammar (phonology, syntax, semantics) and to scientific linguistic methodology.
Attributes: Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): ENGL 405H, LING 405, LING 405H
Grade Mode: Letter Grading

ENGL 415C - Literature and Medicine
Credits: 4
Literary representations of medical practice are used to prompt discussion of broad issues concerning medical philosophy and medical ethics, the image of the medical professional in the media, differing conceptions of healing in various social contexts worldwide, and changes in biological science and medicine on the larger society. Ideal for students interested in: Health Care, Biomedical Sciences, Physical therapy, and Nutrition.
Attributes: Humanities(Disc); Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of B or ENGL 401H with a minimum grade of B.
Equivalent(s): ENGL 415A, ENGL 415B, ENGL 415E, ENGL 415F, ENGL 415G, ENGL 415J
Grade Mode: Letter Grading

ENGL 419 - How to Read Anything
Credits: 4
Whether epic or tweet, song lyric or script, English 419 prepares you for close, detailed, and critical readings and for writing with clarity and precision. You'll discover selected prose, poetry, plays and films from across the English-speaking world throughout history. Whatever your major, this course develops skills in research, writing, and critical thinking. Prerequisite (with minimum grade of C) for declaring one of the four majors or two options offered in the English Department.
Attributes: Inquiry (Discovery); Writing Intensive Course
Equivalent(s): ENGL 419H
Grade Mode: Letter Grading

ENGL 440A - Honors/On Race in Culture and Society
Credits: 4
Of our special concern will be the claim that race is a culturally or socially, not biologically, constructed category. The reading list will include literary texts (Toni Morrison's "Recitatif"), works of African American comedians (Bill Cosby, Richard Pryor, Eddie Murphy, etc.), philosophical texts (Immanuel Kant, W.E.B. DuBois, K.A. Appiah, etc.) as well as some legal documents (recent U.S. Supreme Court decisions concerning affirmative action). We will also do two case studies, one on the name of Redskins and one the Whiteness Project. The general goal of the course is to improve the student's ability to speak and think critically about race and race relations in the U.S.
Attributes: Honors course; Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

ENGL 440B - Honors/Seeing is Believing: How the Copernican Revolution Changed the Way We See Ourselves
Credits: 4
This course explores the various ways that scientists, philosophers, poets, novelists, and literary theorists have tried to reconcile what we see (or think we see) with what we know (or think we know), from the ancient past to the 21st century. Our special focus will be on how the Copernican Revolution prompted a wholesale reevaluation of perception and knowledge. We will explore how writers, artists musicians, and philosophers embraced or lamented the enormous cultural and psychological changes that the Copernican evolution helped to introduce. We also will investigate how these changes continue to shape our worldview in the 21st-century.
Attributes: Honors course; Humanities(Disc)
Grade Mode: Letter Grading

ENGL 444D - The Irish Experience
Credits: 4
Explores the historical causes and literary effects of emigration from Ireland to other regions in the North and South Atlantic. Considers the political and economic conditions of Ireland itself and asks how Irish identities are first formed dialectically through contact with indigenous others and then nostalgically constituted through the experience of migration.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ENGL 444N - Monsters!!!
Credits: 4
This course will introduce students to a number of critical thinking processes by examining one of the most symbolically significant human archetypes, Monsters. By engaging works of historical significance and popular texts, students will explore a familiar subject from historical, political, psychological, and literary points of view.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ENGL 501 - Introduction to Creative Nonfiction
Credits: 4
A writing course that explores types of creative nonfiction such as nature writing, the profile, the memoir, and the personal essay. Extensive reading of contemporary authors to study the sources and techniques used in creative nonfiction. Regular papers, conferences, and workshops.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Equivalent(s): ENGL 501H
Grade Mode: Letter Grading

ENGL 502 - Professional and Technical Writing
Credits: 4
A writing course introducing students to the effective communication of technical information through various workplace documents including resumes, memos, business letters, reports, brochures, etc. Special emphasis on an introduction to professional conventions and genres and to the transferable skills of rhetorical and audience analysis, document design and collaborative work.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Equivalent(s): ENGL 502H, ET 625
Grade Mode: Letter Grading

ENGL 503 - Persuasive Writing
Credits: 4
Writing of all types of persuasive nonfiction prose, including argumentative essays and position papers. Special attention to argumentative structures and analysis of audiences. Weekly papers of varying lengths and formats, frequent conferences.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 504 - Resume Writing
Credits: 2
Write your resume now! Readings from recruiters, scholars, and managers reveal what employers want in resumes and cover letters, and what they don't want. Topics include: understanding ATS (applicant tracking systems); analyzing purpose and audience; learning cutting-edge designs; writing detailed and efficient content; tailoring your resume to the job advertisement; writing persuasive cover letters; and formatting and editing tips. Students will identify two job advertisements and write a resume and letter for each.
Grade Mode: Credit/Fail Grading

ENGL 512 - British Literature I Age of Heroes: Beowulf to Dr. Faustus
Credits: 4
An introduction to the earliest poetry, prose and drama in English, considered in chronological order and in historical context. Examine important literary works as the old English epic Beowulf, Chaucer's entertaining collection Canterbury Tales, the Arthurian romance Sir Gawain and the Green Knight, the devotional autobiography The Book of Margery Kempe, the sermon in dramatic form Everyman, Edmund's Spenser's chivalric saga The Faerie Queen and the sonnets of Philip Sidney and William Shakespeare.
Attributes: Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

ENGL 513W - British Literature II Age of Revolutions: Shakespeare to Austen
Credits: 4
The English literary tradition from the Renaissance to the early Romantics spans a period of great social tumult. It includes civil war, new ideas in science, theology, and politics, and expanding British power abroad. Amidst such change flourished reinvented classical genres like the epic, satire, and stage comedy, as well as new forms like the novel, the pamphlet and the newspaper. This class provides a brisk survey of the revolutionary literature of this fascinating age.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): ENG 513H, ENGL 513
Grade Mode: Letter Grading

ENGL 514 - British Literature III: Revolts, Renewals, Migrations
Credits: 4
Encounter the Romantic fantasies of John Keats's nature poetry and Mary Shelley's Frankenstein, the Victorian novels that brought us Jane Eyre, Ebenezer Scrooge and Mr. Hyde, the experiments of Modernists like Virginia Woolf and James Joyce, and Postmodern transformations by a shifting cast of contemporaries. We'll read these works in the context of imperial expansion and contraction, the crises of world wars, and the civil rights and independence struggles of the 20th and 21st centuries.
Attributes: Humanities(Disc)
Equivalent(s): ENGL 514H, ENGL 514W
Grade Mode: Letter Grading

ENGL 514W - British Literature III: Revolts, Renewals, Migrations
Credits: 4
Encounter the Romantic fantasies of John Keats's nature poetry and Mary Shelley's Frankenstein, the Victorian novels that brought us Jane Eyre, Ebenezer Scrooge and Mr. Hyde, the experiments of Modernists like Virginia Woolf and James Joyce, and Postmodern transformations by a shifting cast of contemporaries. We'll read these works in the context of imperial expansion and contraction, the crises of world wars, and the civil rights and independence struggles of the 20th and 21st centuries.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): ENGL 514, ENGL 514H
Grade Mode: Letter Grading

ENGL 516W - American Literature II Money, Migration, and Modernity: Huck Finn to Beloved
Credits: 4
Students will discuss novels, plays, poems, and essays that address the difficult issues of national rebuilding, the temptations of a new consumer culture, the devastations of numerous wars fought overseas, and encounters with European, Jewish, Latin American, and Asian immigrants. Whether comparing nineteenth-century Huckleberry Finn with twentieth-century Beloved or making sense of modern and postmodern literary playfulness, students will become thoughtful readers and writers.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): ENGL 516, ENGL 516H
Grade Mode: Letter Grading

ENGL 518W - Bible as Literature
Credits: 4
Have you ever wanted to read the Bible to gain a better understanding of history, religion, and the arts? Do you want to be able to discuss current religious and political issues in a Biblically informed way? Or maybe you just want bragging rights. Approaching the Bible as a literary work, this course investigates the intense and complicated emotional relationship between God and humanity. For people of faith, some faith, or no faith.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): ENGL 518, ENGL 518H
Grade Mode: Letter Grading

ENGL 520 - Dystopian and Post-Apocalyptic Fiction
Credits: 4
What's behind the explosion of the dystopian and post-apocalyptic subgenres in the past decade? How do these seer-like representations of the future revisit older narrative traditions? We will discover why these prophetic forms--straddling the realms of science, politics, literature, and psychology--are at the forefront of the popular imagination. Assignments include blog posts, an op-ed, an imitative style exercise, and participation in online group chats from which you have a wide selection of times.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

ENGL 526 - Introduction to Fiction Writing
Credits: 4
Writing fiction asks us to say: who am I? What's happening in the world around me? Awakening to the story in your life, and thus to your own imagination, will change your life. Repeatedly, we see fiction writers find their power as creative people. You might become the head of a major corporation! You might just write a great novel or short story. Or just be happier. Join us: write stories, change your life.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 527 - Introduction to Poetry Writing
Credits: 4
Writing poetry is training for life - its practice deepens both the liveliness and rigor of the mind. This course is run in a workshop/discussion format - it uses innovative exercises, guided prompts, language games, and readings that teach the basics of craft, while showing you how to think like a writer, opening up to the pleasures and surprises of the creative process. No prior experience necessary.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 533 - Introduction to Film Studies
Credits: 4
A survey of the international development of the motion picture from the silent period to the present, emphasizing film's narrative practices. Introduces students to the study of the art, history, technology, economics, and theory of cinema. Films and film makers of various nations, periods, movements, and genres examined.
Attributes: Humanities(Disc)
Equivalent(s): ENGL 533H, ENGL 533W
Grade Mode: Letter Grading

ENGL 534 - 21st Century Journalism: How the News Works
Credits: 4
This class explores ways new technology, including social media, has affected the practice of journalism, and examines journalism past and present. Students discuss libel law, ethics and how to define plagiarism in the digital age. This survey is meant not only to lay a foundation for prospective journalists, but also to provide a broad understanding of the news media for those interested in how the news works.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

ENGL 550 - Introduction to the Literature and Culture of Race
Credits: 4
This course introduces students to readings across the field of ethnic literature and culture in order to form their capacity to speak and think critically about race relations in America. Readings will include those in race theory, racial construction and authenticity, histories of raced subjects in America, the rise of ethnic studies, white ignorance and whiteness studies, the intersectionality of race with gender, sexual orientation, economic class, religion, and faith. Includes Asian American, African American, Native, and Latino/a literature.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 555 - Science Fiction
Credits: 4
This course examines stories, novels, and film from the popular genre of science fiction. A variety of literary critical approaches are deployed to discuss a number of key authors and texts from the nineteenth century to the present.
Attributes: Humanities(Disc)
Equivalent(s): ENGL 555H
Grade Mode: Letter Grading

ENGL 560 - Introduction to Latinx Literature and Culture
Credits: 4
This course introduces students to the field of Latinx literature and culture in order to develop the ability to speak and think critically about race relations in the USA. Course readings will be drawn from texts produced primarily in English by individuals of Latin American descent. Readings may include immigration and borderlands discourse, art, music, television and film, histories of Latinx subjects in America, and the intersectionality of race with gender, sexual orientation, economic class and religion.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ENGL 565 - Literary Dublin: Short-Term Study Abroad
Credits: 4
In this short-term study abroad experience, students will gain an appreciation of Ireland's many challenges of self- and other identity related to its location, conquest, colonization, emigration, religions, and recent global immigration. Contemporary course selections reference people (including Irish Americans) and events brought to life on site in Dublin. The course includes UNH guest speakers from English, history, and anthropology; Dublin -based speakers when available. Offers Irish American students research into their genealogy. Students must have a 3.25 GPA and 32 credits.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading
Special Fee: Yes

ENGL 575 - Sex and Sensibility: The Rise of Chick Lit
Credits: 4
This course examines the courtship novel, with an emphasis on female protagonists. How have various writers addressed the institution of marriage and long-term commitment, and the role finances play in partner choice? We'll start with the novels of Jane Austen and move to contemporary "chick lit", the latest incarnation of the romantic quest narrative, in order to understand this genre's continuing popularity. Assignments include blogs, online chats, research essays, and creative writing opportunities.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

ENGL 581 - Reading the Postcolonial Experience
Credits: 4
Modern South Asia and Africa have been shaped by their history of colonization. What is it like to live in places once dominated by foreigners, then reshaped by nationalisms and various injustices intensified by globalization? In this course, we'll read literary depictions that illuminate the lives, dreams, joys, hates, and failures of individuals and groups in these places, exploring both ordinary life and extraordinary experiences created by dispossession, political tyranny, civil war, and environmental trauma.
Attributes: World Cultures(Discovery); Writing Intensive Course
Equivalent(s): ENGL 581H
Grade Mode: Letter Grading

ENGL 585 - Introduction to Women in Literature
Credits: 4
The goal of this course is to examine women's roles in literary traditions, including women as authors and women as characters. We interrogate categories of sex, gender, and sexuality as they intersect with other categories of identity including race, class, and nation. Specific topics differ each semester according to the individual instructor. Recent semesters have included "Jewish Women Writers" and "Female Authors of the Mystery Novel". May be repeated for credit, barring duplication of topic.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ENGL 585H, ENGL 585R
Grade Mode: Letter Grading

ENGL 595 - Literary Topics
Credits: 4
Investigate in depth a literary topic of particular interest, in a course specially designed for both majors and non-majors. Themes vary from semester to semester--recent topics include the contemporary short story, Irish literature, animals in literature, and the literature of the Vietnam War. See the English Department for details of current offerings. May be repeated for credit, barring duplication of topic.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ENGL 595H, ENGL 595W
Grade Mode: Letter Grading

ENGL 602 - Advanced Professional and Technical Writing
Credits: 4
An advanced writing course focusing on writing in a global and technological workplace. In addition to fluency in the documents of the workplace, students focus on visual rhetoric in a technological environment through web design and usability while studying the issues of globalism, ethics, and the environment that affect all professional writing today. May be repeated with approval of instructor.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 603 - Phonetics
Credits: 4
This course introduces students to the study of the physical properties of speech sounds, including the transcription of English and other languages using the International Phonetics Alphabet, basic anatomy and physiology of the vocal tract, and the acoustic properties of vowels and consonants. Additional topics to be covered include phonetic variation and change, and the perception of speech sounds.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): LING 603
Grade Mode: Letter Grading

ENGL 604 - Phonology
Credits: 4
This course introduces students to the study of phonology, or the mental organization of speech sounds. Topics covered include phonological typology, the concept of phonemes and mental representations of sounds, distinctive features and rule-based phonology, and a basic introduction to Optimality Theory.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): LING 604
Grade Mode: Letter Grading

ENGL 605 - Intermediate Linguistic Analysis
Credits: 4
Introduces analysis methods and problem solving in phonology, morphology, and syntax using data from many languages. Emphasis will be both practical (learning how to describe the grammar and sound system of a language) and theoretical (understanding languages' behavior).
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.
Equivalent(s): LING 605
Grade Mode: Letter Grading

ENGL 606 - Languages of the World
Credits: 4
A survey of the languages of the world from genetic, areal, and typological perspectives. Students learn about the geographic and demographic distribution of language families and language isolates, as well as about structural characteristics of languages, language families and language areas. Additional topics include language endangerment and the question of linguistic universals. Students work collaboratively on a project investigating a particular language family, giving in class presentations and writing up a final project report. Some prior knowledge of phonetics, phonology, morphology, and syntax is necessary.
Prerequisite(s): ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D- or ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.
Equivalent(s): LING 606
Grade Mode: Letter Grading

ENGL 607 - Syntax
Credits: 4
In this course, students explore the knowledge of sentence structure in an attempt to build a basic theoretical model of grammar. Students look at what we know when we know how to form phrases, sentences, and various grammatical constructions. In addition, students take an in-depth look at relationships between different elements within sentences and how best to formally account for these things. The course approaches all of this from a Chomskian/Generativist perspective in particular, although other frameworks will be discussed.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): LING 607
Grade Mode: Letter Grading

ENGL 608 - Semantics
Credits: 4
In this course we explore meaning in language in-depth and from many different angles. First we discuss the nature of meaning and the various levels we must describe to move towards a more complete understanding. Along the way we examine meaning in words and how these meanings are stored, related and represented both in our knowledge and in the mind/brain. From there we will spend a significant amount of time uncovering the meanings of sentences by looking at sentential meaning as a function of the sum of its parts.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): LING 608
Grade Mode: Letter Grading

ENGL 610W - Digital Humanities
Credits: 4
Digital methods can greatly intensify our understanding of literary works, non-fiction writing, film and many other modes of expression in the humanities. This course introduces students to the methods of thought, research and argumentation that digital technology makes possible. These may include identifying quantifiable language patterns, working with archival documents, mapping locations in written works, illuminating historical works, creating digital visualizations of texts, or working with translation tools and concordances.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 616A - Studies in Film/Genre
Credits: 4
Advanced, focused study of the narrative, dramatic, and poetic practices of cinema, within one of four possible subject areas: A) Genre; B) Authorship; C) Culture and Ideology; D) Narrative and Style. Precise issues and methods may vary, ranging from general and specific considerations of how a given subject area involves film theory, criticism, and history, to its use in diverse analyses of selected national cinemas, periods, movements, and filmmakers. May be repeated for credit barring duplication of topic. Barring duplication of material taken for credit in CMN 650, course may be repeated for credit. Detailed course descriptions available in the English department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): AMST 605, ENGL 616
Grade Mode: Letter Grading

ENGL 616B - Studies in Film/Authorship
Credits: 4
Advanced, focused study of the narrative, dramatic, and poetic practices of cinema, within one of four possible subject areas: A) Genre; B) Authorship; C) Culture and Ideology; D) Narrative and Style. Precise issues and methods may vary, ranging from general and specific considerations of how a given subject area involves film theory, criticism, and history, to its use in diverse analyses of selected national cinemas, periods, movements, and filmmakers. May be repeated for credit barring duplication of topic. Barring duplication of material taken for credit in CMN 650, course may be repeated for credit. Detailed course descriptions available in the English department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): AMST 605, ENGL 616
Grade Mode: Letter Grading

ENGL 616C - Studies in Film/Culture and Ideology
Credits: 4
Advanced, focused study of the narrative, dramatic, and poetic practices of cinema, within one of four possible subject areas: A) Genre; B) Authorship; C) Culture and Ideology; D) Narrative and Style. Precise issues and methods may vary, ranging from general and specific considerations of how a given subject area involves film theory, criticism, and history, to its use in diverse analyses of selected national cinemas, periods, movements, and filmmakers. May be repeated for credit barring duplication of topic. Barring duplication of material taken for credit in CMN 650, course may be repeated for credit. Detailed course descriptions available in the English department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): AMST 605, ENGL 616
Grade Mode: Letter Grading

ENGL 616D - Studies in Film/Narrative and Style
Credits: 4
Advanced, focused study of the narrative, dramatic, and poetic practices of cinema, within one of four possible subject areas: A) Genre; B) Authorship; C) Culture and Ideology; D) Narrative and Style. Precise issues and methods may vary, ranging from general and specific considerations of how a given subject area involves film theory, criticism, and history, to its use in diverse analyses of selected national cinemas, periods, movements, and filmmakers. May be repeated for credit barring duplication of topic. Barring duplication of material taken for credit in CMN 650, course may be repeated for credit. Detailed course descriptions available in the English department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): AMST 605, ENGL 616
Grade Mode: Letter Grading

ENGL 618 - Film Theory
Credits: 4
Examines basic theories of film and their relationship to the practice of close analysis of film. Theories are meant to provide students with a vocabulary for critical analysis and stress the many ways of seeing film.
Grade Mode: Letter Grading

ENGL 620 - English Major Internship
Credits: 1-4
Open to all English majors. Internships allow students to use skills learned in the major in a supervised work setting. In addition to the job experience, the English major internship requires research and writing assignments overseen by a faculty sponsor. These supplementary assignments must be outlined in a written proposal describing the work involved in the internship and how it relates to the student's academic training. Registration requires permission from the employer, faculty sponsor, major advisor, and department chairperson. The employer must be an established organization approved by Career Services. This course does not count toward the English major or substitute for English 720, the Journalism Internship.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

ENGL 621 - Newswriting
Credits: 4
Students get a strong journalistic foundation with hands-on experience reporting and writing compelling news stories for print and digital platforms. Skills taught include finding news stories and tracking down sources; conducting interviews and verifying facts; and drafting and revising stories. ENGL 621 may be taken more than once for credit with the approval of the Journalism Program Director. Students must fill out a Permission to Repeat an English Course For Credit form, available in the department office.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 623 - Creative Nonfiction
Credits: 4
Intensive writing course emphasizing the blend of basic elements that constitute creative nonfiction: research, observation, and personal experience. Also readings and discussion of some of the best published creative nonfiction. Students must fill out a Permission to Repeat an English Course For Credit form, available in the department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 625 - Intermediate Fiction Writing Workshop
Credits: 4
Students continue to explore the aspects of fiction writing. Through short exercises students learn to create visual scenes, integrate exposition with dramatic scene, and construct convincing characters in believable situations. We'll continue to explore the basic elements of what makes a short story, such as point of view, dialogue, dramatization, voice, meaning, language. Students write short stories and significantly revise them. Through discussion of student writing in a workshop format, as well as reading and responding to short stories by published authors, we'll address the questions: What is a short story? How do we create a world in which the reader is fully involved? Where does the story evoke emotion or meaning? ENGL 625 may be taken more than once for credit, recommended with two different instructors. Students must fill out a Permission to Repeat an English Course For Credit form, available in the department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 625A - Intermediate Fiction Writing Workshop: Screenwriting
Credits: 4
In this course, intermediate creative writers will learn the craft of writing scripts for film and television. Students will continue to explore the elements of effective storytelling by writing and significantly revising loglines, outlines, and complete short screenplays. The course will combine in-depth analysis of classic and contemporary screenplays (including shorts, teleplays, and feature-length films) with lectures, writing exercises, and peer workshops. Topics will include dramatic structure, professional formatting and planning, and how to develop vividly compelling characters, scenes, conflict and dialogue. The aim of the course will not be to simply reinforce existing narrative principles but rather to test the validity of existing conventions. Throughout we will address the questions: What makes a story relevant, moving, thrilling, or meaningful? Why does this story need to be told visually? What makes a great script great? ENGL 625A may be taken more than once for credit, recommended with two different instructors. Students must fill out a Permission to Repeat an English Course For Credit form, available in the department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 627 - Intermediate Poetry Writing Workshop
Credits: 4
Workshop discussion of poems written by students, with focus on more complex techniques and forms. Individual conferences with instructor. ENGL 627 may be taken more than once for credit, recommended with two different instructors. Students must fill out a Permission to Repeat an English Course For Credit form, available in the department office.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 631 - Digital Reporting
Credits: 4
This course immerses students in the digital news landscape and teaches them to report across multiple platforms. Students learn reporting tools and strategies for producing dynamic digital journalism.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 621 with a minimum grade of B.
Equivalent(s): ENGL 531
Grade Mode: Letter Grading

ENGL 650R - I Hear America Singing: Studying American Literature and Culture
Credits: 4
Examine unique themes, theories, and works of art in American Studies that are not offered on a regular basis. This course explores the intersection of literature and medicine; as well as comics and graphic narrative; music and social protest, photography and nonfiction; the literature of Stonewall. Learn how to approach the proposed subject, its specialized vocabulary, history and politics in its pages, and its value for the contemporary moment. May be repeated for credit, barring duplication of topic.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): AMST 603, ENGL 650
Grade Mode: Letter Grading

ENGL 655 - Reading in all Directions: Comics and Graphic Narrative
Credits: 4
"Reading happens in all directions," says Hilary Chute about the study of comics and graphic narrative. In this course, students will learn to read images and texts from all directions: up, down, horizontally, vertically, across panels and jacket flaps, in seriality and on the internet. Comics' ability to represent both trauma and the trivial takes students from newspaper funnies to the Holocaust, from superheroes in mid-century floppies to Underground comix and current autobiographical comics, comics journalism, comics history, and fiction.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 657 - Shakespeare
Credits: 4
An introduction to the main periods of Shakespeare's playwriting career, addressing representative works from each of the genres in which he wrote (tragedy, comedy, history, romance). We will discuss such matters as a Renaissance theater architecture and performance conventions, Shakespeare's poetic language, the representation of women, commoners and minorities on stage, royal power and court politics, love, sex, religion, and revenge. Live and filmed performances will be included as available.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Equivalent(s): ENGL 657H
Grade Mode: Letter Grading

ENGL 690 - African American Literature
Credits: 4
Whether in poetry and prose, or fiction and nonfiction, what issues have occupied African American writers and readers? What joy do these writers and readers derive from the written word and oral tradition? Motivated by these questions, this class traces the origins of an African American literary tradition in British North American; charts the circulation of ideas about democracy and citizenship in the nineteenth-century United States; and maps ongoing debates about race and representation today.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 693 - Special Topics in Literature
Credits: 4
A) Old English Literature, B) Medieval Literature, C) 16th Century, D) 17th Century, E) 18th Century, F) English Romantic Period, G) Victorian Period, H) 20th Century, I) Drama, J) Novel, K) Poetry, L) Nonfiction, M) American Literature, N) A Literary Problem, O) Literature of the Renaissance, R) Race and Racial Theories. The precise topics and methods of each section vary. Barring duplication of subject, course may be repeated for credit. For details, see course descriptions available in the English department. (Not offered every year.) Special fee on some topics.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to 2 times.
Grade Mode: Letter Grading
Special Fee: Yes

ENGL 693R - Special Topics in Literature
Credits: 4
A) Old English Literature, B) Medieval Literature, C) 16th Century, D) 17th Century, E) 18th Century, F) English Romantic Period, G) Victorian Period, H) 20th Century, I) Drama, J) Novel, K) Poetry, L) Nonfiction, M) American Literature, N) A Literary Problem, O) Literature of the Renaissance, R) Race and Racial Theories. The precise topics and methods of each section vary. Barring duplication of subject, course may be repeated for credit. For details, see course descriptions available in the English department. (Not offered every year). Special fee on some topics.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ENGL 693
Grade Mode: Letter Grading
Special Fee: Yes

ENGL 694 - Special Topics in Creative Writing
Credits: 4
Courses offered under this number feature a variety of topics having to do with creative writing. Barring duplication of subject, course may be repeated for credit. For details, see the course descriptions available in the English Department.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 701 - Advanced Fiction Writing Workshop
Credits: 4
Students come to this course with a firm grasp of all the elements of fiction, ready to write short stories that construct convincing characters in believable situations. In a workshop format, students give and receive critiques on classmates' work. Significant revisions of short stories and thorough discussions of work by published authors will round out the course as students continue to explore the art of writing the short story. Students are responsible for leading discussion of published stories. ENGL 701 may be taken more than once for credit, recommended with two different instructors.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 703T - Travel Writing
Credits: 4
A workshop devoted to reading and writing and writing narratives of place. Travel writing requires the author to research and reflect, exploring both the external--the place--and the internal--the author's experience. Students write multiple travel pieces and read widely essays of place by writers such as John Steinbeck, Joan Didion, Pico Iyer and Eliza Griswold.
Co-requisite: INCO 589
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 501 with a minimum grade of D- or ENGL 621 with a minimum grade of D- or ENGL 623 with a minimum grade of D-.
Equivalent(s): ENGL 703
Grade Mode: Letter Grading
Special Fee: Yes

ENGL 710 - Teaching Writing
Credits: 4
This course will introduce you both to the theories and practices of teaching writing in middle and high school at a time of increased accountability. The course is designed for students who are interested in exploring teaching as a possible career. In the course we will try out varied literacy activities and study teaching writing using a process approach. We discuss different approaches to planning instruction and various forms of writing assessment, including state-wide tests.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 711 - Editing
Credits: 4
Survey of newspaper and news website editing, covering topics ranging from grammar and style to headline writing to ethics.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 621 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 712 - Multimedia Storytelling
Credits: 4
In this course, students explore the theory and practice of visual storytelling -- including composition, lighting, editing and more -- to produce short yet vibrant journalistic video documentaries. Students learn to shoot and edit audio and video. They explore narrative techniques and structure. They broaden their reportorial range, bringing visual sensitivity to storytelling.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 621 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 714 - Critical Skills
Credits: 4
This course provides training in critical analysis of various texts (literature, film, and media). Criticism is often applied to the hot-button issues of the day. We ask questions like: How does gender shape the way we read? How to interpret texts in a globalized world? Does the truth matter? This course satisfies a post-1800 literature requirement for English Department majors; may be taken for elective credit by English Teaching Majors.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 419 with a minimum grade of D-.
Equivalent(s): ENGL 617
Grade Mode: Letter Grading

ENGL 715 - Teaching English as a Second Language: Theory and Methods
Credits: 4
A course on the linguistic, psychological, and sociological theories that inform our understanding of language acquisition and current best practices in the teaching of ESOL. Provides an overview of first and second language acquisition, bilingualism, learner individual differences (e.g., age, motivation, aptitude, learning strategies), and sociocultural contexts of ESL teaching and learning.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 716 - Curriculum, Materials and Assessment in English as a Second Language
Credits: 4
A hands-on approach to developing curriculum and course material for teaching English as a Second Language. Students work on lesson plan development (needs analysis, objective writing, task sequencing, assessment of proficiency and objective), conduct ESL classroom observations, and engage in teaching demonstrations.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 718 - Morphology
Credits: 4
Morphology is the study of word formation and the mental lexicon. This course explores processes of derivation, compounding and inflection that allow us to form new words. Students will become proficient in analyzing word formation processes in English and other languages, including deploying terminology used by morphologists. Students will learn and practice the conventions of "writing like a linguist".
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.
Equivalent(s): LING 718
Grade Mode: Letter Grading

ENGL 719 - Sociolinguistics Survey
Credits: 4
How language varies according to the characteristics of its speakers: age, sex, ethnicity, attitude, time, and class. Quantitative analysis methods; relationship to theoretical linguistics. Focus is on English, but some other languages are examined.
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.
Equivalent(s): LING 719
Grade Mode: Letter Grading

ENGL 720 - Journalism Internship
Credits: 1-16
Students intending to pursue careers in journalism spend a semester working full or part time, reporting and writing, editing or producing content for a news organization.
Prerequisite(s): ENGL 621 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 721 - Advanced Reporting
Credits: 4
While the theme of this course is teaching students advanced techniques of writing and reporting, each semester the course is offered it focuses on different areas of journalism. One semester, students may learn multimedia reporting - storytelling across multiple platforms, including video and audio - and in other semesters the course may focus on sportswriting. Yet in others, students will develop their news reporting skills. The course may be taken multiple times for credit with the approval of the Journalism Program Director.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 621 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

ENGL 722 - Feature Writing
Credits: 4
An intermediate workshop that asks students to report in greater depth and experiment with different storytelling methods.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 621 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 725 - Teaching Writing: Seminar in English Teaching
Credits: 4
In this course, students will learn to be effective teachers of writing and composition. Students will work to develop their own approaches to literacy instruction by examining and comparing philosophies of English teaching and learning. Students will discuss theoretical, pedagogical, and practical ideas for teaching writing; engage in writing and composition exercises; produce and practice instructional activities and assessments; and evaluate teaching approaches. Together, the secondary school English methods courses (ENGL 725/ENGL 810S and ENGL 726/ENGL 892S) integrate knowledge about the teaching of reading, writing/composing, speaking, listening, and viewing.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 725L - Seminar in English Teaching: Lab
Credits: 2
Classroom and research lab experiences give English Teaching majors enrolled in the Seminar in English Teaching opportunities to put their pedagogical and theoretical readings into practice and grow as teachers. This Lab should be taken simultaneously with ENGL 725. Students must have JR or SR status at the start of the course. Permission of instructor required.
Co-requisite: ENGL 725
Grade Mode: Credit/Fail Grading

ENGL 726 - Teaching Literature and Literacy: Seminar in English Teaching
Credits: 4
In this course, students will learn to be effective teachers of literacy and literature. Students will work to develop their own approaches to literacy instruction by examining and comparing philosophies of English teaching and learning. Students will discuss theoretical, pedagogical, and practical ideas for teaching literature and literacy; engage in writing and composition exercises; produce and practice instructional activities and assessments; and evaluate teaching approaches. Together, the secondary school English methods courses (ENG 725/ENGL 810S and ENGL 726/ENGL 892S) integrate knowledge about the teaching of reading, writing/composing, speaking, listening, and viewing.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 726L - Sem in English Teaching: Lab
Credits: 2
Classroom and research lab experiences give English Teaching majors enrolled in the Seminar in English Teaching opportunities to put their pedagogical and theoretical readings into practice and grow as teachers. This lab should be taken simultaneously with ENGL 726. Students must have JR or SR status at the start of the course. Permission of instructor required.
Co-requisite: ENGL 726
Grade Mode: Credit/Fail Grading

ENGL 727 - Issues in Second Language and Multilingual Literacy
Credits: 4
Study of various issues in second language and multilingual literacy theory, research, instruction and administration. Topics include, but are not limited to, the characteristics and needs of multilingual learners, L2 reading-writing interfaces, sociocultural influences on L2 literacy development, L2 vocabulary learning strategies, and literacy instruction and placement for emergent bilinguals.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 728 - Language and Gender
Credits: 4
This course will explore a variety of topics around the theme of language and gender, including the relationship between gender, language and power; the linguistic marking of gender; how people use language to construct and perform their gender; how gender intersects with other facets of identity, including sexuality and race and ethnicity.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or WS 401 with a minimum grade of D- or WS 405 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 729 - Special Topics in Composition Studies
Credits: 4
Advanced course on a topic chosen by the instructor. Precise topics and methods of each section vary. Possible topics include alternative discourses and rhetorics, contrastive rhetoric, electronic discourse and digital rhetoric, women's rhetorics and feminist pedagogies, Montaigne and the essay tradition, theories of literacy, theories of persuasive writing, theories of transactional writing, and written discourse analysis. Barring duplication of subject, may be repeated for credit. For details see descriptions available in the English Department.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 736 - Environmental Theory
Credits: 4
Theoretical approaches to nature writing. Topics vary but may include eco-memoirs, environmental rhetoric, native peoples and the land, land and national identity, animals in literature, and environmental activist non-fiction. May be repeated for credit if topic differs.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 738 - Asian American Studies
Credits: 4
Are you captivated by the stories, histories and experiences of Asian Americans? Do you want to learn about their cultures, struggles, and accomplishments? This course examines the variety and complexity of Asian Americans through literature, poetry, film, essays, photography, music, and web-based presences. Specific course topics, as arranged by the instructor, include the Japanese American internment, the literature of popular culture of the Vietnam War, Asian American graphic narratives, transnational adoption, and food and culture.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 742 - American Literature, 1815-1865
Credits: 4
Antebellum writers tried to shape the nation through their texts, as they expressed the struggles over power and identity that led to the Civil War--and that continue to define U.S. discourses today. We encounter the genres--novels, oratory, poetry, appeals, slave narratives, essays, and nature writing--that authors used to grapple with slavery, social reform, environmental transformation, and aesthetics. Writers may include William Apess (Pequot), Margaret Fuller, Edgar Allan Poe, Frederick Douglass, and Emily Dickinson.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 751 - Medieval Romance
Credits: 4
This course provides an overview of one of the most unique genres of medieval literature: the romantic epic. From brave knights and marvelous wizards to cunning queens and hungry dragons, the literature of this class gives a fascinating introduction to the imaginative potential of the medieval world. This course also emphasizes how entertainment overlapped with ethical crisis, as romance reinforces social norms of gender and sex, race and religion.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 752 - History of the English Language
Credits: 4
Overview of the evolution of the English language from Proto-Indo-European until the present day. Topics to be covered include a general introduction to language change, the relationship between language and literary style, the impact of technology on language, and the state of English in the world today.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 756 - Chaucer
Credits: 4
Geoffrey Chaucer is one of the most famous poets in the English language - but why? This course offers students and overview of Chaucer's poetry, spending particular time on his masterpiece, "The Canterbury Tales". Sometimes tragic, sometimes bawdy, and almost always humorous, Chaucer's poetry offers a glimpse of a world long-lost, while simultaneously forcing us to ask hard questions about justice, love, and the nature of human creation.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 758 - Advanced Shakespeare
Credits: 4
This course offers an in-depth look at a few Shakespeare plays, which you'll study intensively through the lens of a single topic. Topics vary from semester to semester. Recent examples include Shakespeare on Screen, Shakespeare and Race, Shakespeare's History Plays, Unknown Shakespeare, and Shakespearean Tragedy. Live and filmed performances will be included as available.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ENGL 759 - Milton
Credits: 4
Readings include a wide selection of Milton's poetry and prose with a special focus on "Paradise Lost". Milton's writings contain arguments regarding free will, tyranny, and slavery that inform modern conceptions of civil liberty, republican government, and free speech. In the US Benjamin Franklin, Thomas Jefferson, John Adams and other early framers credit "Paradise Lost" as having shaped their ideas of religious and civil liberty in a democratic republic.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 773 - Literary Modernisms: Return, Revolt, Recycle
Credits: 4
This course focuses on modernist writers such as T.S. Eliot, who sought to revitalize modern culture by looking backward to the past; Virginia Woolf, who experimented with the form of the novel; and performance artist Kabe Wilson, who recycles texts of high modernism. We explore modernist literature in its geopolitical contexts with special attention to imperial expansion and contraction, the rise of fascism, world wars, and struggles for suffrage, and national belonging.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 775 - Modern Irish Literature: A Changing Landscape
Credits: 4
In this course we will explore Irish literature and culture from the Celtic Renaissance in the early twentieth century to the Celtic Tiger of the early twenty-first. Readings will trace Ireland's transformation from an inward-looking agricultural nation to one of the most globalized countries in the world. Recurring themes will include the status of the Church, changing gender roles, sectarian conflict, and Ireland's relation to the world.
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 777 - The English Novel in the World
Credits: 4
Novels written in English from Asia and Africa during the mid-twentieth century to the present day. We will discuss shifts from realism to magical realism and back; domestic, historical and speculative fiction; narratives of the rise of new nations and nationalism; experiences of exile and migration; the 'global' city; transnational cultural exchanges and networks that dismantle assumed civilizational boundaries. Newer novels offer opportunities to understand how literary narratives grasp ecological destruction, animal extinction, and human responsibility.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 778 - Race and Gender in Film and Popular Culture
Credits: 4
This course explores representations of race and gender in American cinema and popular culture and features weekly readings in contemporary race and gender theories. Topics include the gaze; woman as object; the action hero and hyper-masculinity; hybridity; race/ethnicity and hypersexuality; the crisis of masculinity; and sexual orientation. This course is reading and Canvas intensive, requiring weekly writing assignments and papers.
Grade Mode: Letter Grading

ENGL 779 - Linguistic Field Methods
Credits: 4
Study of a non-Indo-European language by eliciting examples from an informant, rather than from written descriptions of the language. Students learn how to figure out the grammar of a language from raw data. (Not offered every semester).
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): LING 779
Grade Mode: Letter Grading

ENGL 782 - Modern and Contemporary Drama
Credits: 4
An overview of the best writing for the modern stage. We'll survey developments in theater in the past 100 years, sampling such genres as absurdist drama, psychological gothic, "in yer face" theatre, theater that incorporates new media, and work by women, African-American, Latinx, gay and immigrant writers. We'll discuss the changing role of theater in society, identity politics onstage and off, and shock, sex and violence as dramatic techniques. Live and filmed performances as available.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 784 - English Novel of the 19th Century
Credits: 4
The highly popular novels of nineteenth-century Britain produced such memorable characters as Sherlock Holmes, Count Dracula, Alice in Wonderland, Frankenstein's monster, and Dr. Jekyll. The novel's literary engagements with science, love, and the city are entangled with cultural discourses on animals, monstrosity, supernaturalism, degeneration, empire, race, and crime. In this course, students will sample a set of novels that exemplify the distinct generic and thematic innovations of the period.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

ENGL 787 - English Major Seminar
Credits: 4
This Capstone course offers you an opportunity to study a specialized topic in depth in a seminar format. Enrollment is limited to 15 so that you can take active part in discussion and work closely with the instructor on a research project. Topics vary from semester to semester. Recent topics include Tragedy, Comedy, American Women Poets, Medicine in Literature, and Feminist Print Culture. May be repeated for credit, barring duplication of topic. For details see semester specific course descriptions available in the English Department.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 419 with a minimum grade of B.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ENGL 787R
Grade Mode: Letter Grading

ENGL 788 - Senior Honors
Credits: 4
Open to senior English majors who, in the opinion of the department, have demonstrated the capacity to do superior work. An honors project consists of supervised research leading to a substantial thesis or writing of poetry or fiction portfolio. Required of students in the honors in major program. (Not offered every year.)
Attributes: Honors course; Writing Intensive Course
Grade Mode: Letter Grading

ENGL 789 - Special Topics in English Teaching
Credits: 4
Advanced theories and practices course on English Teaching. Topics such as A) Teaching Young Adult Literature, C) Teaching English in Diverse Contexts, D) Teaching Drama, N) Teaching Nonfiction, R) English Teachers as Researchers, and T) Alternate Literacies and Teaching Technologies. Barring duplication of subject, course may be repeated for credit. For details see course descriptions available in the English department.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 790 - Special Topics in Linguistics
Credits: 4
Advanced course on a topic chosen by the instructor. Inquire at the English department office for a full course description each time the course is offered. Topics such as word formation, dialectology, linguistic theory and language acquisition, history of linguistics, language and culture, cross-disciplinary studies relating to linguistics. Barring duplication of subject, may be repeated for credit.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): LING 790
Grade Mode: Letter Grading

ENGL 791 - English Grammar
Credits: 4
An introduction to the terminology and major concepts in English grammar. Covers descriptive vs. prescriptive grammar, parts of speech, phrase structure, clause types, and basic sentence patterns. Useful for pre-service teachers seeking to acquire the background knowledge needed to make informed decisions about teaching of English grammar.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 792 - Teaching Literature and Literacy
Credits: 4
This course introduces theories and practices of teaching literature and literacy, including teaching reading and writing as well as teaching literary analysis at the secondary level. Students also learn to plan lessons, choose texts, and create learning activities for speaking, listening, and viewing in grade five through twelve. The course is designed for students who are interested in teaching as a possible career.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ENGL 793 - Phonetics and Phonology
Credits: 4
The sound system of English and other languages as viewed from the standpoint of modern linguistic theory, including the following topics: the acoustic and articulatory properties of speech sounds, the phonemic repertories of particular languages, phonological derivations, and prosodic phenomena such as stress and intonation.
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): LING 793
Grade Mode: Letter Grading

ENGL 794 - Syntax
Credits: 4
Relationship of grammar and meaning as viewed from the standpoint of modern linguistic theory. Emphasizes the syntax and semantics of English, with special attention to the construction of arguments for or against particular analyses.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): LING 794
Grade Mode: Letter Grading

ENGL 795 - Independent Study
Credits: 1-4
Open to highly qualified juniors and seniors. To be elected only with permission of the department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 796 - The Internship Experience
Credits: 4
Students work with their peers to establish a personal definition of professionalism in their respective fields; they will read, critically analyze, and discuss articles covering a wide variety of topics, including writing at work, intended audiences, navigating a difficult work environment or situation, and strategies for professional development. Class sessions in a discussion format, intended to be flexible and to directly support the changing needs of writing in the workplace. Students, along with their supervisors, will create their own learning objectives and evaluation tools. Students will write about their experiences at the end of term. Minimum GPA 3.0 required for registration.
Prerequisite(s): ENGL 419 with a minimum grade of D- and (ENGL 502 with a minimum grade of D- or ENGL 602 with a minimum grade of D-).
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ENGL 695
Grade Mode: Letter Grading

ENGL 797 - Special Studies in Literature
Credits: 4
A) Old English Literature, B) Medieval Literature, C) 16th Century, D) 17th Century, E) 18th Century, f) English Romantic Period, G) Victorian Period, H) 20th Century, I) Drama, J) Novel, K) Poetry, L) Non-fiction, M) American Literature, N) A Literary Problem, O) Literature of the Renaissance, R) Race and Racial Theories. The precise topics and methods of each section vary. Barring duplication of subject, may be repeated for credit. For details, see the course descriptions available in the English department.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ENGL 797R - Special Studies in Literature (Race & Racial Theories)
Credits: 4
A) Old English Literature, B) Medieval Literature, C) 16th Century, D) 17th Century, E) 18th Century, F) English Romantic Period, G) Victorian Period, H) 20th Century, I) Drama, J) Novel, K) Poetry, L) Non-fiction, M) American Literature, N) A Literary Problem, O) Literature of the Renaissance, R) Race and Racial Theories. The precise topics and methods of each section vary. Barring duplication of subject, may be repeated for credit. For details, see the course descriptions available in the English department.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ENGL 797
Grade Mode: Letter Grading

English/Speakers of Other Languages (ESL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ESL 421 - Intermediate Listening and Speaking
Credits: 2-8
Intensive English, with a focus on speaking and listening, for English language learners at an intermediate level. Students will expand their vocabulary and develop sufficient English proficiency to communicate with English speakers who have little experience with English language learners.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

ESL 431 - Advanced Listening and Speaking
Credits: 2-8
Intensive English, with a focus on speaking and listening, for English language learners at an advanced level. Students will develop an extensive vocabulary in English and sufficient English proficiency to function successfully in American university courses that do not rely heavily on language.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

Entrepreneurship (ENT) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ENT 500 - The Entrepreneurial Mindset
Credits: 4
This highly interactive course explores how entrepreneurs think and innovate. In the course, students may explore new paths to innovation and growth which includes understanding and incorporating the behaviors and thought processes unique to entrepreneurs. Students will incorporate entrepreneurial thinking and behavior into a process of a new venture or current positions, as intrapreneurs. The course will also provide a brief overview of tools that can be utilized to manage internal and external processes. Students may explore creative problem solving and, in teams, develop and test problem solutions using a "business model canvas" approach.
Attributes: Writing Intensive Course
Equivalent(s): ENT 500G
Grade Mode: Letter Grading

ENT 600 - Launching and Managing Entrepreneurial Ventures
Credits: 4
This course is designed for students interested in the steps required to start a new business venture. The focus will be on creating a new venture and covers in detail six key aspects related to the entrepreneurial process, including: introduction to lean entrepreneurship principles; business model design and assessment; legal issues in venture creation; new venture marketing and customer acquisition strategy; and new venture financial planning. Students may also learn all aspects of entrepreneurship, including: idea generation and business plan creation; forming a company; recruiting a team of key employees and advisors; developing a product/service; raising capital; business development / sales / marketing; board and investor relations; and fostering a strong business culture. Example assignments may include oral presentations, written new venture plans and discussions with classmates.
Prerequisite(s): ENT 500 with a minimum grade of D- or ENT 500G with a minimum grade of D-.
Equivalent(s): ENT 600G
Grade Mode: Letter Grading

ENT 611 - Entrepreneurial Marketing
Credits: 4
This course clarifies key marketing concepts, methods, and strategic issues relevant for start-up and early-stage entrepreneurs. Course topics may include but are not limited to identifying market opportunities, creating and screening new ideas, writing concepts, concept testing, new product forecasting, prototyping, and building a business case with assumptions about market entry strategy and launch marketing. The goal is to help students learn how to use state-of-the-art techniques to identify markets, develop new product ideas, measure customer benefits, and design profitable new products. This course is designed to help students develop a flexible way of thinking about marketing problems and strategies.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D- or BUS 610 with a minimum grade of D-.
Equivalent(s): ENT 611G
Grade Mode: Letter Grading

ENT 703 - Entrepreneurial Finance
Credits: 4
This course studies the financial strategies needed to support a new venture. Students investigate sources of funding and analyze investment strategies unique to the start-up. Planning for the funding aspect of a new venture is critical and this course will address the alternative sources of funds for carrying out the mission of the venture. This would include: understanding financial institutions (financial bootstrapping, external financing, angel investors, venture capitalists, founders, and banks) that provide risk capital for such firms. An entrepreneur needs to understand how to identify a business opportunity as well as how to marshal resources (especially capital) to a business opportunity. Topics may include financial statements, pro forma statements, cost of capital, break-even, financial ratios, investor expectations, and exit strategies. Recommended: ENT 500 The Entrepreneurial Mindset.
Equivalent(s): ENT 603G
Grade Mode: Letter Grading

ENT 707 - Legalities and Ethics of Entrepreneurship
Credits: 4
This course will examine the legal and ethical issues and problems faced by entrepreneurs in their journey, specifically from conception of an idea, to the creation and operations of a company, to the launch of a product or service, and finally to the sale of the company or investment by venture capitalists and everything in between. Topics may include the legal, ethical, and regulatory frameworks of intellectual property (trade secrets, patents, trademarks, and copyright), business and corporate issues, business entity structure and formation, taxation, contracts, operations and personnel, and raising capital through traditional and alternative methods. Recommended: ENT 500 The Entrepreneurial Mindset.
Equivalent(s): ENT 607G
Grade Mode: Letter Grading

Environmental & Resource Economics (EREC)

Courses previously under the EREC subject prefix are now under the following subject prefix:

Natural Resources (NR)

Exchange (EXCH)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

EXCH 595 - Exchange
Credits: 0-18
For students enrolling in domestic study away/exchange experiences.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

Exercise Science (EXSC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

EXSC 520 - Contemporary Perspectives in Exercise Science
Credits: 4
This course is designed to introduce undergraduate students to the field of Exercise Science. Research studies, experiential learning and professional development will be used to explore the different aspects of Exercise Science including fitness, wellness, human performance, research and clinical exercise physiology. Students will discover the many ways exercise is used as a health and fitness intervention. Career options will be studied and evaluated giving students an informed exposure to potential areas of future.
Equivalent(s): KIN 520
Grade Mode: Letter Grading

EXSC 527 - Scientific Foundations of Health and Fitness
Credits: 4
Provides students with practical, scientific, entry-level information relative to physical conditioning, health, and wellness from childhood through adulthood. Students are given theoretical information that will be followed by practical, hands-on experiences offered through laboratories experiences.
Attributes: Biological Science(Discovery); Discovery Lab Course; Writing Intensive Course
Equivalent(s): KIN 527
Mutual Exclusion: No credit for students who have taken NUTR 506.
Grade Mode: Letter Grading
Special Fee: Yes

EXSC 607 - Biology of Aging
Credits: 4
Biological mechanisms of the aging process, with special emphasis on human aging; changes due to chronic disease.
Attributes: Biological Science(Discovery)
Equivalent(s): KIN 607
Grade Mode: Letter Grading

EXSC 620 - Physiology of Exercise
Credits: 4
Acute and chronic effects of exercise. Muscle physiology, respiration, cardiac function, circulation, energy metabolism, and application to training.
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Equivalent(s): KIN 620
Grade Mode: Letter Grading

EXSC 621 - Exercise Laboratory Techniques
Credits: 4
Laboratory assessment of functional capacity, body composition, anaerobic power, anaerobic threshold, pulmonary function, blood pressure control, muscle strength, and temperature regulation. Field tests are used where appropriate. Extensive out-of-class time is required as each week a detailed lab report is submitted for grading.
Attributes: Writing Intensive Course
Prerequisite(s): EXSC 620 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

EXSC 649 - Junior Seminar in Exercise Science
Credits: 2
This is a seminar course for juniors enrolled in the Exercise Science Program and is designed to further prepare students for the off campus practicum. Topics to be covered include cover letter and resume preparation, relevant literature discussions, and professional workplace standards.
Prerequisite(s): EXSC 735 with a minimum grade of D- and EXSC 736 with a minimum grade of D-.
Grade Mode: Letter Grading

EXSC 650A - Internship in Exercise Science
Credits: 6
Individualized experiential training in an external (off-campus) exercise science setting (hospital, health & fitness club, business, physical therapy, or medical (physician assistant) offices, research laboratory offering programs of prevention, intervention, and/or rehabilitation. The internship requires 270 contact hours and is a full-time commitment (10 weeks at 27 hours per week) taken the summer following the junior academic year. Activities may include graded exercise testing, exercise prescription, and exercise leadership.
Prerequisite(s): EXSC 649 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading

EXSC 651 - Senior Seminar in Exercise Science
Credits: 2
This course is a seminar for seniors in the Exercise Science program and is designed to disseminate the internship experience (EXSC650A: Internship in Exercise Science). Topics to be covered include but are not limited to: networking, professional development, career planning, and participation in an Internship symposium presentation.
Prerequisite(s): EXSC 649 with a minimum grade of D- or EXSC 650A with a minimum grade of D-.
Grade Mode: Letter Grading

EXSC 693 - Teaching Assistantship
Credits: 2
Students serve as teaching teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching assistants' and administrative duties.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

EXSC 696 - Independent Study
Credits: 2-4
An advanced, individual scholarly project under the direct supervision of a faculty member.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

EXSC 696W - Independent Study
Credits: 2-4
An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by major faculty and the department chair prior to the student's registration for EXSC 696W. All EXSC 696W projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): KIN 770W
Grade Mode: Letter Grading

EXSC 699H - Honors Project
Credits: 4
Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.
Attributes: Honors course
Grade Mode: Letter Grading

EXSC 704 - Electrocardiography
Credits: 4
Designed to provide exposure to basic interpretation and identification of electrocardiograms (ECGs). Includes detailed heart anatomy, coronary circulation, cardiac conduction system, electrocardiogram development, and all aspects pertaining to normal and abnormal ECGs.
Prerequisite(s): BMS 508 with a minimum grade of D-.
Equivalent(s): KIN 704
Grade Mode: Letter Grading

EXSC 705 - Topics in Applied Physiology
Credits: 4
Advanced exercise physiology course dealing with topics both current and relevant to exercise science majors. Includes genetics, environmental influences, immune system, detraining and over-training, epidemiology, ergogenic acids, and the influence of age and gender.
Prerequisite(s): EXSC 620 with a minimum grade of D- and EXSC 621 with a minimum grade of D- and EXSC 736 with a minimum grade of D-.
Equivalent(s): KIN 705
Grade Mode: Letter Grading

EXSC 720 - Science and Practice of Strength Training
Credits: 4
Designed to provide students exposure to the knowledge and practical experience necessary for establishing strength development programs in a variety of populations, including healthy, athletic, and higher risk individuals. Program design, correct lifting techniques, physiological adaptations, and organization and administration of programs are highlighted. Includes fundamentals regarding the selection of programs and equipment, spotting techniques, as well as ways to assess strength and power in humans without expensive equipment.
Prerequisite(s): EXSC 620 with a minimum grade of D- and EXSC 621 with a minimum grade of D-.
Equivalent(s): KIN 720
Grade Mode: Letter Grading

EXSC 722 - Applied Biomechanics
Credits: 4
This course provides students with a background in the fundamental biomechanical principles that describe and govern human movement. Topics of the course include friction, linear and angular motion, tissue material properties, conservation of energy, work and power, fluid mechanics, stability and center of gravity, mechanics of injury, walking and running gait analysis. These topics are taught through the lens of modern biomechanical analyses including dynamometry, electromyography, accelerometry, and optical motion analysis.
Prerequisite(s): EXSC 620 with a minimum grade of D-.
Equivalent(s): KIN 722
Grade Mode: Letter Grading

EXSC 724 - Exercise Metabolism: Acute and Chronic Adaptations
Credits: 4
Overview of the metabolic processes that occur during exercise and metabolic changes that occur as a result of exercise training. Topics include glycogenolysis and glycolysis in muscle, cellular oxidation of pyruvate, lipid metabolism, metabolism of proteins and amino acids, neural and endocrine control of metabolism, and fatigue during muscular exercise.
Prerequisite(s): EXSC 621 with a minimum grade of D- and CHEM 404 with a minimum grade of D-.
Equivalent(s): KIN 724
Grade Mode: Letter Grading

EXSC 735 - Clinical Applications of Exercise Testing
Credits: 2
This course provides students with both the knowledge and practical experience necessary to assess health and physical fitness in apparently healthy populations. Emphasis is placed on developing competency in informed consent, prescreening procedures, and the administration of health and physical fitness-related tests.
Co-requisite: EXSC 736
Prerequisite(s): EXSC 621 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

EXSC 736 - Guidelines of Fitness and Graded Exercise Testing
Credits: 2
This course introduces students to the physiological foundations of health and physical fitness assessment. Students will explore evidence-based procedures put forth by the American College of Sports Medicine for preparticipation health screening, risk stratification, and the administration of standardized assessment of health and physical fitness related testing.
Co-requisite: EXSC 735
Prerequisite(s): EXSC 621 with a minimum grade of C.
Equivalent(s): KIN 736
Grade Mode: Letter Grading

EXSC 737 - Exercise Prescription and Leadership in Healthy and Special Populations
Credits: 4
Provides exposure to the knowledge and practical experience necessary for establishing exercise and health promotion programs in a variety of populations. Includes fundamentals regarding personal training and program selection, implementation and equipment, legal issues, and budget establishment. Strength training programs and special populations are highlighted.
Prerequisite(s): (EXSC 621 with a minimum grade of C or EXSC 735 with a minimum grade of C) and EXSC 736 with a minimum grade of C.
Equivalent(s): KIN 737
Grade Mode: Letter Grading
Special Fee: Yes

EXSC 794 - Cardiopulmonary Pathologies
Credits: 4
Lecture study of the anatomy, physiology, and pathophysiology of the cardiac, vascular, and pulmonary systems. Particular emphasis on the study of cardiovascular function in diseased and stressed states. Clinical assessment of the cardiopulmonary patient.
Prerequisite(s): EXSC 704 with a minimum grade of D-.
Equivalent(s): KIN 794
Grade Mode: Letter Grading

EXSC 795 - Practicum in Cardiac Rehabilitation
Credits: 2
Provides students with practical and theoretical experience in all aspects involving cardiac rehabilitation programs.
Prerequisite(s): EXSC 704 with a minimum grade of D-.
Equivalent(s): KIN 795
Grade Mode: Letter Grading

Finance (FIN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

FIN 501 - Survey of Finance
Credits: 4
This course introduces students to the fundamentals of finance. It will be offered to non-business major students. Students will learn basic macroeconomic notions and financial concepts such as supply and demand, time value of money, and market risk, and will be able to analyze economic factors and growth, value future cash flows of a project, make capital budgeting decisions, understand risk and return trade-offs and determine the cost of capital.
Grade Mode: Letter Grading

FIN 608 - Real Estate Finance
Credits: 4
This course provides an introduction to residential and commercial real estate. Topics include market analysis, cash flows, debt and equity financing, valuation, and real estate investment trusts. Case studies, projects, and real world applications of the concepts learned are significant components of the course.
Prerequisite(s): ADMN 570 with a minimum grade of C- or FIN 501 with a minimum grade of C- or HMGT 655 with a minimum grade of C-.
Equivalent(s): ACFI 708, FIN 708
Grade Mode: Letter Grading

FIN 620 - Topics in Finance I
Credits: 4
Special topics, vary by semester.
Prerequisite(s): ADMN 570 with a minimum grade of D- or FIN 501 with a minimum grade of D- or HMGT 655 with a minimum grade of D-.
Grade Mode: Letter Grading

FIN 650 - Wildcat Investment Fund
Credits: 2
Wildcat Investment.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

FIN 695 - Real Estate Internship
Credits: 4
This course provides an experiential learning opportunity to students who are considering developing a career in real estate industry. It is the advanced-level follow-up elective course of FIN 608 (Real Estate Finance) and CEP 672 (Fundamentals of Real Estate). It is not a traditional lecture type course, but rather a semester-long or summer internship in a real estate company. The instructor is the Minor Program Coordinator and would coordinate with the Paul College Career and Professional Success (CaPS) team and real estate companies to allocate intern opportunities to students, oversee student progress and analyze performance feedback, and develop rubrics for credit/fail grading.
Prerequisite(s): ADMN 570 with a minimum grade of C- or FIN 501 with a minimum grade of C- or HMGT 655 with a minimum grade of C-.
Grade Mode: Credit/Fail Grading

FIN 701 - Financial Policy
Credits: 4
Development of analytical tools and practical skills for recognizing and solving complex problems of business finance. Working-capital management, capital budgeting, cost of capital, capital structure, and dividend policy.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 701
Grade Mode: Letter Grading

FIN 702 - Investments Analysis
Credits: 4
Security valuation, efficient markets, portfolio management, options, and alternative investments. Computer research topics.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 702
Grade Mode: Letter Grading

FIN 703 - International Financial Management
Credits: 4
An exploration of financial management of firms operating in a global environment. Topics include foreign exchange markets, translation, transaction, and operating risk exposures, risk exposure management, sourcing capital globally, the financing of international trade, multinational tax management, and derivatives used to mitigate international exposure. Students also engage in a country specific analysis that incorporates the 2030 UN development and sustainability goals framework.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 703
Grade Mode: Letter Grading

FIN 704 - Derivatives Securities and Markets
Credits: 4
Derivative assets and markets, and their role in business decision-making and portfolio management. Emphasis on practical and theoretical aspects of heading and speculating using futures and options for both commodities and financial assets, including their market mechanics.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 704
Grade Mode: Letter Grading

FIN 705 - Financial Institutions
Credits: 4
Examination of financial institutions, financial instruments and financial markets. Emphasis on how commercial banks create value, the influences of the Federal Reserve and its monetary policies, and the workings of markets such as money markets, bond markets and mortgage markets. Throughout the course, the 2008 global financial crisis is central to the discussion. The course helps student develop knowledge and skills needed to start a career in finance industry.
Attributes: Writing Intensive Course
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 705
Grade Mode: Letter Grading

FIN 706 - Financial Modeling and Analytics
Credits: 4
The main objective of the course is to bridge the gap between theory and practice by using software applications and real-world data to solve a variety of financial problems. The course is very 'hands-on' and is expected to help students develop skills that are useful in a variety of jobs in finance, accounting, insurance, and real estate.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 706
Grade Mode: Letter Grading

FIN 707 - Equity Analysis and Firm Valuation
Credits: 4
This course is intended to provide practical tools for analyzing and valuing a company's equity. Primarily an applications course, it covers several valuation models such as market multiples and free cash flow models, and focuses on the implementation of finance theories to valuation problems.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Equivalent(s): ACFI 707
Grade Mode: Letter Grading

FIN 709 - Fixed Income Analysis and Valuation
Credits: 4
This course is a rigorous and analytical study of a wide range of topics in the fixed income arena. It focuses on securities (mainly bonds), and things that can look like securities (mainly loans) that promise an ongoing and consistent cash flow (hence: "fixed income"). The valuations of these things are influenced by interest rates and credit risk. The course is focused on the concepts and tools that are important to practitioners and investors who want to use these securities, whether as issuer or as investor. It includes a study of the markets in which these securities trade.
Prerequisite(s): (ADMN 570 with a minimum grade of C- or HMGT 655 with a minimum grade of C-) and FIN 702 with a minimum grade of C-.
Equivalent(s): ACFI 709
Grade Mode: Letter Grading

FIN 710 - Big Data in Finance
Credits: 4
This course serves as an introduction to many aspects of big data utilization, specifically as it applies to finance. Topics typically include high frequency trading, stock market anomalies, data management, fintech innovations, and safety and ethics when working with big data. Programming languages common to finance, such as Stata, SAS, and Python, are learned and used to analyze and manipulate data.
Prerequisite(s): FIN 702 (may be taken concurrently) with a minimum grade of C-.
Equivalent(s): ACFI 710
Grade Mode: Letter Grading

FIN 711 - Investment Banking
Credits: 4
This course explores several areas of investment banking. Investment bankers play a critical role in financial markets. Among their many roles, they provide advisory services to firms, help raise capital, and assist with complex financial transactions such as mergers and acquisitions. Course topics typically include company strategy, valuation, initial public offerings (IPOs), leveraged buyouts (LBOs), and mergers and acquisitions (M&A). Students cannot earn credit for the course after taking FIN 720 as Investment Banking.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Grade Mode: Letter Grading

FIN 720 - Topics in Finance II
Credits: 4
Special topics, vary by semester.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

FIN 720W - Topics in Finance II
Credits: 4
Special topics, vary by semester.
Attributes: Writing Intensive Course
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

FIN 725 - Independent Studies in Finance
Credits: 1-4
Student-designed individual research projects, approved by a faculty sponsor. Paper required. Course credits vary according to the nature of the project, to be determined by the faculty sponsor. For juniors and seniors in high standing; by permission.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

FIN 799H - Honors Thesis in Finance
Credits: 4-8
Supervised research leading to the completion of an honors thesis or project in finance; required for graduation from the honors program in administration for students in the finance option. Permission of director of undergraduate programs and Accounting and Finance department chair.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Mutual Exclusion: No credit for students who have taken ADMN 799.
Grade Mode: Letter Grading

Finance (FNC) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

FNC 611 - Money and Banking
Credits: 4
This course examines financial markets and financial intermediaries, and their role in creating and maintaining economic efficiency. It analyzes the performance of banks and other financial institutions and reviews the functions and measurements of money. It also examines and assesses the use of monetary policy tools, targets, and goals within the context of current economic conditions. Note: ECO 580 is recommended.
Prerequisite(s): ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D- or ECN 411 with a minimum grade of D- or ECN 412 with a minimum grade of D-.
Equivalent(s): MGMT 611G
Grade Mode: Letter Grading

FNC 612 - Investment Principles
Credits: 4
This course provides the learner with a thorough overview of investments. Students will compare and contrast the major investment vehicles available today, including stocks, bonds, money markets, and mutual funds. Topics may include the analysis of investment vehicles (such as stocks, bonds, money markets, and mutual funds), consideration of risk and expected rates of return, time value of money applications, and the principles of asset allocation, risk tolerance, and diversification.
Prerequisite(s): (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D- or MATH 420 with a minimum grade of D- or MATH 422 with a minimum grade of D- or MATH 425 with a minimum grade of D-).
Equivalent(s): MGMT 612G
Grade Mode: Letter Grading

FNC 665 - Financial Management
Credits: 4
A successful financial manager focuses on maximizing shareholder wealth, while also considering other stakeholders such as employees and communities. This course utilizes financial formulas, tables, and spreadsheets to focus on the financial functions of analysis, planning and decision-making, and control. Topics may include financial statement analysis and forecasting, working capital policy, cost of capital and capital budgeting techniques, interaction with financial markets, and time value of money techniques. NOTE: MTH 504 Statistics is recommended.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D- or MGMT 569G with a minimum grade of D- or MGMT 569 with a minimum grade of D-) and (ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D-).
Equivalent(s): MGMT 613G
Mutual Exclusion: No credit for students who have taken BUS 601.
Grade Mode: Letter Grading

FNC 675 - Financial Modeling and Decision-Making
Credits: 4
This course prepares managers to develop real-world financial models and to interpret financial information for effective business decision making. It builds upon knowledge in accounting, finance, and economics and emphasizes the strategic application of such knowledge in the corporate setting. Students employ the tools of analysts to develop their understanding of how managers use financial data to guide decisions and to increase value. Topics may include capital budgeting, strategic investments, financial risk, and debt. NOTE: MTH 504 Statistics is recommended.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D- or MGMT 569G with a minimum grade of D- or MGMT 569 with a minimum grade of D- or BUS 532 with a minimum grade of D-) and (ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D- or ECN 411 with a minimum grade of D- or ECN 412 with a minimum grade of D-).
Equivalent(s): MGMT 615G
Grade Mode: Letter Grading

Fire Service Administration (FSA) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

FSA 603 - Principles of Emergency Services
Credits: 4
This foundation course establishes baseline knowledge of emergency service history and practice common to all organizations. Students will extend their prior professional and academic experience into overviews of emergency service organizations, leadership and management strategies, service delivery, funding, and basic principles of community and responder risk reduction.
Grade Mode: Letter Grading

FSA 605 - Fire Service Ethics
Credits: 4
This course examines the basic principles of ethics as related to fire service operations and management with special attention given to current issues in the fire service.
Attributes: Writing Intensive Course
Equivalent(s): FSA 605G
Grade Mode: Letter Grading

FSA 610 - Community Risk Reduction for the Fire and Emergency Services
Credits: 4
This course provides a theoretical framework for the understanding of the ethical, sociological, organizational, political, and legal components of community risk reduction and a methodology for the development of a comprehensive community risk-reduction plan.
Equivalent(s): FSA 610G
Grade Mode: Letter Grading

FSA 635 - Political and Legal Foundations for Fire Protection
Credits: 4
This course examines the legal aspects of fire service, as well as the political and social impacts of legal issues. It includes a review of the American legal system and in-depth coverage of legal and political issues involving employment and personnel matters, administrative and operational matters, planning and code enforcement, and legislative and political processes with regard to the fire service.
Equivalent(s): FSA 615G
Grade Mode: Letter Grading

FSA 665 - Command and Control of Large-Scale Incidents
Credits: 4
This course addresses the knowledge and skills necessary to command the mitigation of large-scale emergency incidents that require resources beyond the initial alarm assignment. Students will have the opportunity to focus on strategic preparation for predictable events and create individualized command tools.
Equivalent(s): FSA 617G
Grade Mode: Letter Grading

FSA 685 - Fire Prevention Organization and Management
Credits: 4
This course addresses the knowledge, methods, and concepts for effective leadership of comprehensive fire prevention and risk-reduction programs.
Prerequisite(s): FSA 603 with a minimum grade of D- and FSA 605 with a minimum grade of D- and FSA 610 with a minimum grade of D- and FSA 635 with a minimum grade of D- and FSA 665 with a minimum grade of D-.
Equivalent(s): FSA 620G
Grade Mode: Letter Grading

FSA 710 - Personnel Management for the Fire Service
Credits: 4
This course examines relationships and issues in personnel administration and human resource development within the context of fire-related organizations. Topics include personnel management, organizational development, productivity, recruitment and selection, performance management systems, discipline, and collective bargaining.
Prerequisite(s): FSA 603 with a minimum grade of D- and FSA 605 with a minimum grade of D- and FSA 610 with a minimum grade of D- and FSA 635 with a minimum grade of D- and BEHS 665 with a minimum grade of D- and PADM 645 with a minimum grade of D-.
Equivalent(s): FSA 625G
Grade Mode: Letter Grading

FSA 740 - Applications of Fire Research
Credits: 4
This course examines the basic principles of research and methodology for analyzing current fire-related research. The course also provides a framework for conducting and evaluating independent research in the following areas: fire dynamics, fire test standards and codes, fire safety, fire modeling, structural fire safety, life safety, firefighter health and safety, automatic detection and suppression, transportation fire hazards, risk analysis and loss control, fire service applied research, and new trends in fire-related research.
Prerequisite(s): FSA 603 with a minimum grade of D- and FSA 605 with a minimum grade of D- and FSA 610 with a minimum grade of D- and FSA 635 with a minimum grade of D- and FSA 665 with a minimum grade of D- and FSA 685 with a minimum grade of D- and FSA 710 with a minimum grade of D- and FSA 760 with a minimum grade of D- and MTH 504 with a minimum grade of D-.
Equivalent(s): FSA 630G
Grade Mode: Letter Grading

FSA 760 - Fire and Emergency Services Administration
Credits: 4
This course is designed to build upon an existing base of knowledge about fire and emergency services with an in-depth survey of executive-level administrative and managerial topics. The course addresses the following skills that are necessary to manage and lead a fire and emergency services department through the challenges and changes of the 21st century: persuasion and influence, accountable budgeting, anticipation of challenges and the need for change, and using specific management tools for analyzing and solving problems. A central part of the course focuses on how the leadership of a fire and emergency services department develops internal and external cooperation to create a coordinated approach to achieving the department's mission.
Prerequisite(s): FSA 603 with a minimum grade of D- and FSA 605 with a minimum grade of D- and FSA 610 with a minimum grade of D- and FSA 635 with a minimum grade of D- and BEHS 665 with a minimum grade of D- and PADM 645 with a minimum grade of D-.
Equivalent(s): FSA 637G
Grade Mode: Letter Grading

FSA 797 - Integrative Capstone: Research Project in Fire Service Administration
Credits: 4
This capstone course in Fire Service Administration provides students the opportunity to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. In addition to preparing a professional portfolio, students will write, present, and defend an independent research project or study, to include analysis and synthesis integrating theory and practice to address a significant contemporary industry issue. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Prerequisite(s): FSA 603 with a minimum grade of D- and FSA 605 with a minimum grade of D- and FSA 610 with a minimum grade of D- and FSA 635 with a minimum grade of D- and BEHS 665 with a minimum grade of D- and PADM 645 with a minimum grade of D- and FSA 710 with a minimum grade of D- and FSA 760 with a minimum grade of D- and MTH 504 with a minimum grade of D-.
Equivalent(s): FSA 650G
Grade Mode: Letter Grading

Forest Technology (FORT)

Courses previously under the FORT subject prefix are now under the following subject prefix:

Natural Resources (NR)

French (FREN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

FREN 401 - Elementary French I
Credits: 0 or 4
For students without previous knowledge of French, the course introduces students to French language and culture through speaking, listening, reading, writing, labs and films. Credit only for students who have had less than two years of French in secondary school. FREN 401 - FREN 402 taken together satisfies the foreign language requirement.
Grade Mode: Letter Grading

FREN 402 - Elementary French II
Credits: 0 or 4
See description for FREN 401. Cannot be taken separately except with permission of instructor.
Attributes: Foreign Language Requirement
Prerequisite(s): FREN 401 with a minimum grade of D-.
Grade Mode: Letter Grading

FREN 403 - Review of French
Credits: 4
Conducted in French. Course emphasizes the active use of French through speaking, listening, reading, writing, labs, and films while providing a review of basic grammar. Designed for those students whose study of French has been interrupted for a significant amount of time or who have had two or more years of high school French. FREN 403 does not satisfy the foreign language requirement.
Grade Mode: Letter Grading

FREN 503 - Intermediate French I
Credits: 4
Conducted in French. Review of grammar with emphasis on the development of reading, writing, speaking, and listening skills. With modules on culture tailored to the needs of students in STEM disciplines as well as in agriculture, business, hospitality, and health and human services (among others).
Attributes: World Cultures(Discovery); Foreign Language Requirement
Equivalent(s): FREN 503H, FREN 585
Grade Mode: Letter Grading

FREN 503W - Intermediate French I
Credits: 4
Conducted in French. Review of grammar with emphasis on the development of reading, writing, speaking, and listening skills, and on culture. Discussion in French of literary and cultural readings. Labs and films.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Equivalent(s): FREN 503H, FREN 585
Grade Mode: Letter Grading

FREN 504 - Intermediate French II
Credits: 4
Conducted in French. Review of grammar with emphasis on the development of reading, writing, speaking, and listening skills, and on culture. Discussion in French of literary and cultural readings. Labs and films.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): FREN 503 with a minimum grade of D-.
Equivalent(s): FREN 504H, FREN 586
Grade Mode: Letter Grading

FREN 525 - A Road Trip Through France: Baguette, Brie, Bordeaux, and Beyond
Credits: 4
What makes France France, and how did it evolve from a mostly agricultural to a modern society? Using films, essays, newspaper articles, and television this course examines major social, political, and gastronomic trends, events, debates and personalities that help shed light on contemporary French culture. Taught in English. May be repeated for credit barring duplication of materials. Offered in Spring.
Attributes: World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

FREN 595 - French Practicum
Credits: 2
Practical use of French language or cultural skills outside the classroom through special projects.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

FREN 631 - Advanced French: Reading and Writing
Credits: 4
This course is intended to refine students' ability to write in French through the study and practice of stylistic techniques, pertinent grammatical structures, and vocabulary used in contemporary written French. Working with a variety of texts, students become familiar with, and practice different forms of French rhetoric and styles in creative, argumentative, and analytical writings. Revision and rewriting are an integral part of the course, with students' own work providing a focus for in-class analysis and feedback. Offered during the fall semester. The course sequence FREN 631- FREN 632 may be taken in any order.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): FREN 504 with a minimum grade of D-.
Grade Mode: Letter Grading

FREN 632 - Advanced French: Listening and Speaking
Credits: 4
This course is intended to refine students' ability to communicate in French, through the practice of debating and exchanging ideas, and a variety of pronunciation exercises. While reviewing and refining pertinent grammatical structures, students discuss current events and other material in class and on-line. Students also have the opportunity to actively practice their French during the weekly Zoom session with French students from Bordeaux. Offered during the spring semester. FREN 631 and FREN 632 may be taken in any order.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): FREN 504 with a minimum grade of D-.
Grade Mode: Letter Grading

FREN 651 - Love, War, and Power in French Literature
Credits: 4
Reading and rigorous oral and written analysis of French literary texts that illustrate a variety of genres, with particular attention paid to the issues of love, war, and power. May be taken before or after FREN 652.
Attributes: Humanities(Disc); Writing Intensive Course
Prerequisite(s): (FREN 631 (may be taken concurrently) with a minimum grade of D- and (FREN 632 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): FREN 651H
Grade Mode: Letter Grading

FREN 652 - Greatest Hits of French
Credits: 4
Reading and rigorous oral and written analysis of major French texts spanning 5 centuries of literature that illustrate a variety of genres, from the Chanson de Roland to Moliere's famous comedies. May be taken before or after FREN 651.
Attributes: Humanities(Disc); Writing Intensive Course
Prerequisite(s): FREN 631 (may be taken concurrently) with a minimum grade of D- and FREN 632 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): FREN 652H
Grade Mode: Letter Grading

FREN 676 - Topics in Francophone Culture
Credits: 4
Topics drawn from all aspects and periods of French civilization. May be repeated for credit barring duplication of materials. (Not offered every year.)
Attributes: Writing Intensive Course
Prerequisite(s): FREN 631 with a minimum grade of D- and FREN 632 with a minimum grade of D- and (FREN 651 with a minimum grade of D- or FREN 652 with a minimum grade of D-).
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): FREN 636
Grade Mode: Letter Grading

FREN 683 - Summer Study in Dijon (4 weeks)
Credits: 4
This course offers four weeks of intensive study of French language at the Centre International d'Etudes Francaises (CIEF) in Dijon, France. The prerequisite is at least elementary French or equivalent and depends on the student's level at the time of registration. Minimum GPA of 2.5 or better and permission. Special UNH fee. Student responsible for personal and travel expenses. Offered summers only.
Co-requisite: INCO 589
Attributes: Foreign Language Requirement
Grade Mode: Letter Grading
Special Fee: Yes

FREN 690 - Study Abroad in Dijon France
Credits: 0-16
Spring semester at the University of Burgundy (Dijon, France) for juniors. This one-semester program is open to majors who have completed with a B- or better FREN 631 and FREN 632 and FREN 651 or FREN 652, or equivalent. Non-majors need to speak with the program director to determine their eligibility. Non-credit orientation meetings are required during the fall semester prior to departure. The normal UNH requirements for studying abroad apply to this program. For further information, interested students should consult with the director in the French program.
Co-requisite: INCO 588
Attributes: World Cultures(Discovery)
Repeat Rule: May be repeated for a maximum of 32 credits.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

FREN 691 - Summer Study in Dijon (8 weeks)
Credits: 8
This course offers eight weeks of intensive study of French language at the Centre International d'Etudes Francaises (CIEF) in Dijon, France. The prerequisite is at least elementary French or equivalent and depends on the student's level at the time of registration. This course is also open to French majors who cannot fulfill their semester-long study abroad requirement for documented academic reasons. By petition only. Minimum GPA of 2.5 or better and permission. Special UNH fee. Student responsible for personal and travel expenses. Offered summers only.
Co-requisite: INCO 589
Grade Mode: Credit/Fail Grading
Special Fee: Yes

FREN 775 - Les Mis and their World
Credits: 4
Inspired by the very popular Victor Hugo's novel Les Miserables, this course examines 19th-century society and many issues of importance during that period: romantic and familial love, the nature of law and justice, morals and religious faith, as well as the architecture and urban design of Paris. It will also consider some of the adaptations for film, television, and the stage. May be repeated for credit, barring duplication of materials.
Attributes: Writing Intensive Course
Prerequisite(s): FREN 651 with a minimum grade of D- and FREN 652 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

FREN 795 - Special Studies in French Language and Literature
Credits: 1-4
Individual guided study of the work of a major author, a genre, or specific topics in literature. Training in bibliography and organization of material. (Not offered every year).
Grade Mode: Letter Grading

FREN 799 - Honors Senior Thesis
Credits: 2
Course leading to an honors senior thesis. Open only to seniors seeking honors in major whose individually designed research projects have been approved by the department and who have been assigned an adviser. Students must enroll for the spring semester. Students defend the resulting written thesis in an oral presentation before department members and others.
Attributes: Honors course
Grade Mode: Letter Grading

Genetics (GEN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

GEN 604 - Principles of Genetics
Credits: 0 or 4
Chemical structure of genetic material, gene recombination, mutation, and chromosome mapping. Gene expression and regulation; recombinant DNA; evolutionary, quantitative, and population genetics. College math or statistics suggested.
Prerequisite(s): (((BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-)) or BMS 507 with a minimum grade of D-) and CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-).
Equivalent(s): BIOL 604
Grade Mode: Letter Grading

GEN 606 - Genetics Lab
Credits: 4
Hands-on experience with some of the important model organisms used for research in genetics (fruit flies, bacteria, yeast, nematodes, and plants). Investigation of fundamental genetic concepts in the laboratory, experience with transmission and molecular genetic techniques, introduction to bioinformatics, analysis and interpretation of data.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

GEN 704 - Microbial Genetics and Genomics
Credits: 5
Study of heritable information in bacteria, their viruses, and model Eukaryotic microbes and fundamentals of bacterial genomics. Topics will include genetics of bacteriophages and bacteria; genome maintenance, mutation and evolution especially in reference to evolution of pathogens; mechanisms of gene transfer, gene regulation and adaptive responses; analysis of gene expression including by using the latest genomic tools; use of genomic data, including concepts and strategies of genome sequencing and annotation as well as metagenomics approaches for understanding diversity. Practical laboratory training in microbial genetics and genomics. Special emphasis on recombinant DNA techniques, nucleotide sequencing methods, and bioinformatics analysis to dissect and analyze gene function and genome structural features as practical tools for careers in biotechnology. Original research projects will include opportunities to work with bacteria, phages, and yeast.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D- and GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

GEN 705 - Population Genetics
Credits: 3
Exploration of the forces (mutations, selection, random drift, inbreeding, assortative mating) affecting the frequency and distribution of genetic variation in natural populations. Quantifying the structure of populations. Methods of analysis for theoretical and practical applications.
Prerequisite(s): GEN 604 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.
Equivalent(s): PBIO 705, ZOOL 665, ZOOL 705
Mutual Exclusion: No credit for students who have taken NR 664.
Grade Mode: Letter Grading

GEN 706 - Human Genetics
Credits: 4
Genetic basis of human traits and diseases including both traditional methods of diagnosis and contemporary molecular genetic approaches stemming from the human genome project. Case studies exemplify common practices in human genetic counseling and integrate the scientific basis of diagnosis with the special ethical implications of human genetic analysis.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Equivalent(s): ANSC 706, BCHM 706
Grade Mode: Letter Grading

GEN 711 - Genomics and Bioinformatics
Credits: 0 or 4
Methods, applications, and implications of genomics--the analysis of whole genomes. Medical, ethical and legal implications of genomic data. Computer lab provides exposure and experience in a range of bioinformatics approaches used in genome analysis. Computer Lab.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Equivalent(s): GEN 711W
Grade Mode: Letter Grading

GEN 711W - Genomics and Bioinformatics
Credits: 0 or 4
Methods, applications, and implications of genomics--the analysis of whole genomes. Microbial, plant and animal genomics are addressed, as well as medical, ethical and legal implications. The lab provides exposure and experience on a range of bioinformatics approaches--the computer applications used in genome analysis. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): GEN 604 with a minimum grade of D-.
Equivalent(s): BCHM 711, BCHM 715, GEN 711, MICR 711, MICR 715
Grade Mode: Letter Grading

GEN 712 - Programming for Bioinformatics
Credits: 5
Development of programming skills that enable life science students to ask fundamental biological questions that require computers to automate repetitive tasks and handle query results efficiently. Topics include: computer values of important parameters of biological sequence data; pattern search and motif discovery scripts; accessing, querying, manipulating, retrieving, parsing, analyzing, and saving data from local and remote databases. Computer Lab.
Prerequisite(s): GEN 604 with a minimum grade of D- and GEN 711 with a minimum grade of D-.
Grade Mode: Letter Grading

GEN 713 - Microbial Ecology and Evolution
Credits: 4
Evolutionary and ecological forces that generate the tremendous diversity of microbial life on Earth with emphasis on viruses, archaea and bacteria. Functional roles of microorganisms, their population dynamics and interactions, and their mechanisms of evolutionary change in a variety of environmental settings, including natural communities and laboratory microcosms.
Attributes: Writing Intensive Course
Prerequisite(s): GEN 604 with a minimum grade of D- and BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): MICR 713
Grade Mode: Letter Grading

GEN 714 - Personal Genomics
Credits: 4
Analysis and implications of personal genomic data is the focus of this course. Students understand and appreciate all aspects of the availability of personal genomic information and tools including scientific, medical, social, ethical and legal issues. Students have the opportunity to analyze their own individual genome to one of the publicly available genomes to learn about all various aspects of this emerging field. The course will be an entirely online format.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading

GEN 715 - Molecular Evolution
Credits: 4
Rates and patterns of evolutionary change in biomolecules. Forces affecting the size and structure of genomes. Molecular mechanisms of organismal evolution. Emphasizes integrating evidence from biochemistry, molecular genetics and organismal studies. Methods for reconstructing phylogeny from molecular sequences. Some knowledge of statistics recommended. Computer Lab.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Equivalent(s): ZOOL 715
Grade Mode: Letter Grading

GEN 717 - Molecular Microbiology
Credits: 5
Fundamental physiological and metabolic processes of archaea, bacteria and fungi with a strong emphasis on prokaryotes. Literature-based course. Topics include regulation and coordination of microbial metabolism, bacterial cell cycle, global control of gene expression, signal transduction, and microbial cell differentiation. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D- and GEN 604 with a minimum grade of D-.
Equivalent(s): MICR 717
Grade Mode: Letter Grading
Special Fee: Yes

GEN 721 - Comparative Genomics
Credits: 4
Explores the central questions and themes in contemporary comparative genomics, including genome biology, phylogenomics, human origins, population genomics, and ecological genomics. Provides the conceptual framework required to evaluate new work in this fast-changing field.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading

GEN 725 - Population Genetics Lab
Credits: 2
Hands-on approach to exploration of evolutionary forces affecting the frequency and distribution of genetic variation in natural populations. Wet lab techniques include DNA extraction, restriction enzyme digestion, PCR, DNA fragment size-selection. Computational skills include high-throughput sequencing data control, identifying allelic variants, and generation of population genetic summary statistics.
Co-requisite: GEN 705
Prerequisite(s): GEN 604 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

GEN 771 - Molecular Genetics
Credits: 4
Structure, organization, replication, dynamics, and expression of genetic information in eukaryotes. Focus on molecular genetic and epigenetic mechanisms of gene expression and its control; molecular genetic control of cell division and differentiation during development.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading

GEN 772 - Evolutionary Genetics of Plants
Credits: 4
Explores diverse aspects of plant genetic change in nature and under human influence. Emphasis will be placed on the unique aspects of plants, such as polyploidy and distinctive mating systems.
Attributes: Writing Intensive Course
Prerequisite(s): GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading

GEN 774 - Techniques in Plant Genetic Engineering and Biotechnology
Credits: 4
This course offers a comprehensive exploration of molecular biology and biotechnological techniques used to manipulate plant genomes. It introduces foundational topics such as genetic engineering principles, molecular cloning, gene editing (including CRISPR/Cas9), and transgenic plant technologies.
Prerequisite(s): GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

GEN 790 - Undergraduate Teaching Experience
Credits: 1-4
Provide academic support to graduate teaching assistants or faculty in preparing, presenting, and executing Genetics lectures or labs.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): MICR 790
Grade Mode: Letter Grading

GEN 795 - Investigations in Genetics
Credits: 1-4
Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply advanced knowledge and techniques of the major to a specific problem or question.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): GEN 795W
Grade Mode: Letter Grading

GEN 795W - Investigations in Genetics
Credits: 1-4
Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply advanced knowledge and techniques of the major to a specific problem or question.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): GEN 795
Grade Mode: Letter Grading

GEN 799 - Senior Thesis
Credits: 1-4
Independent research project under the direction of a faculty sponsor for seniors in genetics. Final product is a written thesis. One or two semesters.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

GEN 799H - Honors Senior Thesis
Credits: 1-4
Independent research project under the direction of a faculty sponsor for seniors in genetics and in the Honors Program. Final product is a written thesis. One or two semesters.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Geography (GEOG)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

GEOG 401 - World Regions: Europe and the Americas
Credits: 4
Examines the rich diversity of human life in the following world regions: North America; Middle and South America; Europe; Russia and the post-Soviet states; and Oceania. We will examine the geography of these regions focusing on the following thematic concepts: Environment; Globalization and development; power and politics; urbanization; and population patterns. This course also serves as an introduction to geography.
Attributes: World Cultures(Discovery)
Equivalent(s): GEOG 401H
Grade Mode: Letter Grading

GEOG 402 - World Regions: Asia and Africa
Credits: 4
Examines the unique integration of human and physical phenomena that produces the distinctive character of the following world regions: the Middle East an North Africa; Sub-Saharan Africa; South Asia; Southeast and East Asia. The course also serves as an introduction to the discipline of geography, with its unique spatial perspective.
Attributes: World Cultures(Discovery)
Equivalent(s): GEOG 402H
Grade Mode: Letter Grading

GEOG 405 - There Is No Planet B
Credits: 4
Introduces human-environment relations as a central focus of geography, spanning social and environmental sciences. Considers mapping, natural resource use, commons and markets, hazards, political ecology, and land use change. Case studies link core concepts with examples from local to international scales.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

GEOG 473 - Elements of Weather
Credits: 4
Basic principles of weather phenomena and the physical processes underlying these phenomena. Emphasis on weather patterns of New England. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Grade Mode: Letter Grading

GEOG 500 - Making Change: Social and Environmental Justice in Practice
Credits: 4
Provides students with opportunities to consider a personal philosophy and professional action plan for social and/or environmental justice, bridging understandings of social equity and environmental conservation. Spanning theoretical and practical perspectives, students will learn basic community organizing and grantwriting skills that are useful in a range of careers, particularly in the non-profit and government sectors.
Grade Mode: Letter Grading

GEOG 530 - China: People, Politics and Economy
Credits: 4
This course examines China's diverse physical environments, politics, economies, and cultures across he vast territory. Students learn to adopt a relational and spatial perspective to study the contemporary issues in China.
Attributes: World Cultures(Discovery)
Equivalent(s): GEOG 530W
Grade Mode: Letter Grading

GEOG 550 - Sub-Saharan Africa: Environmental Politics and Development
Credits: 4
Explores the political ecologies of development in sub-Saharan Africa. Provides a historical and spatial perspective on sub-Saharan Africa's environments and the politics that influence the region's conservation and development choices. Students will critique conventional knowledge, ideas, and explanations to develop a deeper understanding of environment-development linkages in sub-Saharan Africa over time.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

GEOG 560 - Natural Hazards and Human Disasters
Credits: 4
A survey of natural hazards, including earthquakes, volcanoes, tsunami, floods drought, hurricanes and severe weather, and the human disasters they cause. The geography of community vulnerability to natural hazards and the factors that influence risk and recovery are also examined.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

GEOG 572 - Geography of the Natural Environment
Credits: 4
Provides an introduction to geography of the natural environment, including landforms, weather and climate, water resources, and biogeography. Examines the processes that shape the different elements of the environment and the relationships between them.
Attributes: Physical Science(Discovery)
Grade Mode: Letter Grading

GEOG 574 - Global Landscapes and Environmental Processes
Credits: 4
A survey of earth's major landforms and the geographic factors that influence their development, distribution, and morphology. Topics include mountain building, river systems, desert migration and expansion, glacial and periglacial environments, and shoreline evolution. Discusses interactions with human activities and climate change. Emphasizes how these processes interact to form surface features that are unique to their geographic environment.
Attributes: Physical Science(Discovery)
Grade Mode: Letter Grading

GEOG 580 - Human Geography: People and Places
Credits: 4
Why do people live, work, and play differently in different places? How are our realities shaped by local to global influences, both social and environmental? What does this mean in terms of "place" and lived landscapes? This course provides an overview of human geography as a social science, including the "why of where" and human-environment relationships. Topics may include urban, rural, and suburban development, globalization and governance, borders and migration, conservation and development, and different understandings of knowledge, economy, technology, race, gender, and class.
Attributes: Social Science (Discovery)
Equivalent(s): GEOG 581O
Grade Mode: Letter Grading

GEOG 581 - Society, Environment and Justice
Credits: 4
Introduces human geography with an emphasis on social justice and environmental justice, integrating social and cultural aspects of space, place, and human-environment relations. Discusses urban, suburban, and rural examples in the US and internationally to illustrate basic geographic concepts.
Attributes: Social Science (Discovery); Inquiry (Discovery)
Grade Mode: Letter Grading

GEOG 582 - Global Trade and Local Development
Credits: 4
This course examines the ways in which global trade interacts with local development across the world. It studies the special organization of economic activities through basic approaches in economic geography. It also studies the history and contemporary state of international competition and collaboration.
Attributes: Social Science (Discovery)
Equivalent(s): GEOG 582W
Grade Mode: Letter Grading

GEOG 584 - Place and Power: Political Geographies from Personal to Global
Credits: 4
This course introduces the breadth of contemporary political geography. It considers relationships between space/place and social power across personal to global scales. This may include geographic perspectives on socio-cultural identity, territory, migration, the state, civil society, borders, sovereignty, democracy, governance, citizenship, colonialism, neoliberalism, postcolonialism, justice, social change, conflict, violence, security, and geopolitics. It is a discussion seminar with readings, short, informal writings, student-driven discussion, limited lecture, more structured writings, and guided revision.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

GEOG 591 - Making Maps: GIS Fundamentals
Credits: 4
Introduces Geographic Information Systems (GIS) to design digital maps, integrate diverse data sources, and conduct basic spatial analyses. Appropriate for students with or without computer technology background. Skills are highly employable in many careers where spatial data can be used, including social justice, public health, sustainability, town and urban planning, economic development, public safety, energy, transportation, construction, environmental hazards, political strategy, security and diplomacy, military intelligence, marketing, education, communications, real estate, and public humanities.
Grade Mode: Letter Grading

GEOG 670 - Climate and Society
Credits: 4
An introduction to climate science and the interaction between humans and climate. Examines the processes that control climate, the mechanisms that drive climate change, and the impact of climate change on society.
Attributes: Writing Intensive Course
Equivalent(s): GEOG 570
Grade Mode: Letter Grading

GEOG 673 - From Political Ecology to Climate Justice
Credits: 4
This course considers the relationship between the environment and social power, including international and US case studies that reveal how social differences such as class, race, ethnicity, and gender intersect with environmental aspects of rural and urban development, food systems, natural resources, technology, sustainability, and climate change mitigation, adaptation, and resilience. It compares solutions offered by government, business, and civil society. It is a discussion seminar with readings, short, informal writings, student-driven discussion in small groups, limited lecture, and more structured writing with guided revision.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

GEOG 695 - Internship
Credits: 1-4
Internships provide an opportunity for on-the-job skill development and practical experience in a closely supervised work setting. The student must provide a written proposal to a supervising faculty member before an internship program is approved. At the end of the semester, the student must make a presentation, provide work samples, or submit a detailed report, log, or portfolio describing the internship experience.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

GEOG 701 - Environmental Justice
Credits: 4
This is a seminar-style discussion course in Environmental Justice. It supports students as they develop facility in linking theory, case material, and personal scholarly-professional goals. Readings and writings cover a breadth of topics including origins and theory of environmental justice as social movement and field of scholarship; environmental toxins, hazards, and public health; race and indigeneity; climate change mitigation and adaptation; knowledge systems; urban planning, housing and transportation; water resources; food systems; conservation and recreation; participatory research; and cross-scalar analyses. The course assumes familiarity with basic social science perspectives on race, difference, and equity, and general awareness of environmental issues.
Grade Mode: Letter Grading

GEOG 795 - Special Project
Credits: 2 or 4
Readings, library, archival, and fieldwork. Primarily for geography seniors.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

German (GERM)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

GERM 401 - Elementary German I
Credits: 4
For students without previous training in German. Aural comprehension, speaking, writing, reading in a cultural context. No credit for those with two or more years of German in secondary school.
Grade Mode: Letter Grading

GERM 402 - Elementary German II
Credits: 4
See description for GERM 401.
Attributes: Foreign Language Requirement
Prerequisite(s): GERM 401 with a minimum grade of D-.
Grade Mode: Letter Grading

GERM 503 - Intermediate German I
Credits: 4
Review of grammar; practice in oral and written expression; readings and cultural material. Labs.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): GERM 402 with a minimum grade of D-.
Grade Mode: Letter Grading

GERM 504 - Intermediate German II
Credits: 4
Review of grammar; practice in oral and written expression; readings and cultural material. Labs.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): GERM 503 with a minimum grade of D-.
Grade Mode: Letter Grading

GERM 525 - Introduction to German Culture and Civilization
Credits: 4
Aspects of the political, social, and cultural life of Germany, Austria, and Switzerland. Conducted in English. Strongly recommended for any students planning study abroad in a German-speaking country. Required for the major, can be taken for the minor.
Attributes: World Cultures(Discovery); Inquiry (Discovery)
Equivalent(s): GERM 525H
Grade Mode: Letter Grading

GERM 586 - Study in Berlin
Credits: 0-8
Gives students an immersion experience in the German language and culture. Students will study 5 weeks in Berlin, where they will take an intensive language course (80 hours) at the BSI Private Language School, receive cultural instruction from the on-site UNH faculty member, and pursue an individual research project.
Co-requisite: INCO 589
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

GERM 631W - Advanced Communications Skills I
Credits: 4
Intensive practice in vocabulary building and developing a sense of appropriate style for various contexts of oral and written communication. Discussion and writing on topics of current interest, written and oral reports, role play, and simulation of everyday situations, reinforced by written work.
Attributes: Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): GERM 504 with a minimum grade of D-.
Equivalent(s): GERM 631, GERM 631H
Grade Mode: Letter Grading

GERM 632 - Advanced Communications Skills II
Credits: 4
Intensive practice in vocabulary building and coherent expression in a variety of stylistic contexts. Special emphasis on writing skills, from expository prose to letter and resume writing, essays, journalistic reports, and creative writing, focusing on topics of current interest. Required for the German major.
Attributes: Foreign Language Requirement
Prerequisite(s): GERM 504 with a minimum grade of D-.
Grade Mode: Letter Grading

GERM 728 - Modern German Literature
Credits: 4
Major literary movements from 1872 to 1945. Reading and analysis of selected works. Conducted in German.
Attributes: Writing Intensive Course
Equivalent(s): GERM 728H
Grade Mode: Letter Grading

GERM 732 - Public Discourse and Current Affairs
Credits: 4
Conducted in German. Public discourse and current affairs in German speaking societies. Analysis and interpretation of various media and contemporary events. Refinement of writing and stylistics with particular focus on grammatical accuracy and advanced composition.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

GERM 797 - Special Studies in German Language and Literature
Credits: 4
Selected topics in language, culture, and literature. Conducted in German. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

GERM 798 - Special Studies in German Language and Literature
Credits: 4
Selected topics in language, culture, and literature. Conducted in German. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

Gerontology (GERO)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

GERO 500 - I'm Old, So What! An introduction to aging in the United States
Credits: 4
This is the first of two mandatory courses for the GERO Minor, but any student may take it as an elective. It introduces the learner to the field of gerontology (the study of how people age). It explores the biological, psychosocial, and cognitive changes within the context of society. The history of ageism and its influence on how it has affected the individual, families, and society is presented. The range of independence among older people is examined. Various disciplines that work within the field of gerontology are reviewed. Lectures, novels, films and guest speakers help to examine growing old in the U.S.
Attributes: Writing Intensive Course
Equivalent(s): GERO 600
Grade Mode: Letter Grading

GERO 795 - Independent Study
Credits: 1-6
Open to Gerontology Minor students only. Content area determined by student and faculty mentor, topic must have a major aging component. A proposal of work must be signed by both student and faculty mentor and given to the Gerontology Minor Coordinator for final approval. Proposals are filed in the student's declared major academic folder. Work may be completed over two semesters, especially if it involves thesis/internship work. Credits compensatory with work: 1 to 6.
Prerequisite(s): GERO 500 with a minimum grade of D- and KIN 607 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Letter Grading

Global Conflict and Human Security (GCHS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

GCHS 710 - Conflict & Human Security
Credits: 4
Examines patterns and trends of armed conflict, especially terrorism, insurgency and civil war in the 21st century. Reviews conditions that are likely to lead to war and the myriad ways conflict affects the economy, political system, and cultural norms of a society. Explores how civil wars end, key elements of effective peace processes, and the conditions under which mass violence is likely to resume. Examines conflict prevention strategies such as: preventing and countering violent extremism (P/CVE), disarmament, demobilization and reintegration (DDR) of combatants, and reform of police and military forces (security sector reform/SSR). Case studies on countries in Asia, Middle East, Africa and Latin America.
Grade Mode: Letter Grading

GCHS 720 - Global Governance
Credits: 4
An introduction to the concepts and theories of global governance. Examines the role governments, non-governmental organizations, institutions, civil society, and other actors play in the development and implementation of international law and policies. Focuses on the global institutional infrastructure for foreign aid, humanitarian relief, development programs, peacebuilding, and human rights advocacy. Explores how multilateral organizations, non-governmental organizations and other actors promote human security and sustainable development in countries with weak governments.
Grade Mode: Letter Grading

GCHS 730 - International Development & Human Security
Credits: 4
Introduces international development policy and practice. Explores the interrelatedness of the United Nations' distinct human security domains (economic, food, health, environmental, personal, community, and political security), and reviews their connections to the UN Sustainable Development Goals (e.g., zero hunger, peace, justice and strong institutions). Examines the strategies used by humanitarian and development organizations to enhance people's well#being in fragile states and conflict zones. Topics include: ethics of humanitarianism; how to create effective programs to alleviate poverty, tackle corruption and empower women and girls. Case studies on countries in Asia, Middle East, Africa and Latin America.
Grade Mode: Letter Grading

Greek (GREK)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

GREK 401 - Elementary Classical Greek I
Credits: 4
Explore the world of the ancient Greeks by learning the basic elements of Attic Greek: the alphabet, vocabulary and grammar. By the end of the first semester students will be prepared to read short adapted passages on the history, poetry, ,philosophy, religion (ancient Greek and early Christianity), mythology, politics, theater and culture of the ancient Greeks and the many other cultures that they were associated with.
Grade Mode: Letter Grading

GREK 402 - Elementary Classical Greek II
Credits: 4
A continuation of GREK 401, this course expands students' abilities to read simple to moderate complex Greek passages, furthering their insights into the fascinating language and cultural practices of the Ancient Greeks.
Attributes: Foreign Language Requirement
Grade Mode: Letter Grading

GREK 503 - Intermediate Classical Greek I
Credits: 4
Readings from Xenophon, Plato, Herodotus, Euripides, and the New Testament.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Grade Mode: Letter Grading

GREK 504 - Intermediate Classical Greek II
Credits: 4
Readings from Xenophon, Plato, Herodotus, Euripides, and the New Testament.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Grade Mode: Letter Grading

GREK 751 - Homer and the Archaic Period
Credits: 4
Readings from the Iliad, the Odyssey, the Homeric hymns, Hesiod, Pindar, and the lyric poets.
Grade Mode: Letter Grading

GREK 753 - Advanced Study in Athenian Literature
Credits: 4
A) Aeschylus, B) Sophocles, C) Euripides, D) Aristophanes, E) Herodotus, F) Thucydides, G) Xenophon, H) Plato, I) Aristotle, J) Lysias, K) Demosthenes, L) Isocrates. Major Attic authors from the Battle of Marathon to the death of Alexander the Great. Each special topic may be repeated two times.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

GREK 795 - Special Studies
Credits: 4
A) Pre-Socratic Philosophers; B) Hellenistic Greek Authors; C) Menander; D) Callimachus; E) Apollonius of Rhodes; F) Theocritus; G) Polybius; H) Greek Authors of the Roman Empire; I) Plutarch; J) Septuagint; K) New Testament; L) Greek Church Fathers; M) Byzantine Authors; N) Spoken Greek O) Advanced Greek Composition; P) Introduction to Classical Scholarship; Q) Greek Epigraphy; R) Greek Dialects; S) Comparative Grammar of Greek and Latin; T) Homer: A Linguistic Analysis; U) Greek Institutions; V) Paleography and Textual Criticism. Topics selected by instructor and student in conference. Each special topic may be repeated two times.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Health & Human Services (HHS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HHS 400A - UNH-4U: Career and Professional Seminar
Credits: 1-4
In this seminar, UNH-4U students will explore career interests, develop career plans, and learn and practice skills needed to land a job or internship. Specific objectives include: 1) articulating career goals and competencies; 2) creating an academic and career development plan; 3) demonstrating skills for job and internship pursuit; and 4) engaging in professional networking. UNH-4U students can participate in the seminar up to 4 semesters with specific seminar activities established in consultation with mentor.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 16 times.
Grade Mode: Credit/Fail Grading

HHS 400B - UNH-4U Seminar: Academic Success and Well-Being Seminar
Credits: 1-4
In this UNH-4U seminar, students will focus on resource availability and resource navigation to support academic success, healthy living, and well-being. Specific objectives include: 1) identifying and articulating goals in the areas of academic success, healthy living, and well-being; 2) establishing resource utilization plans in support of each of these goals; 3) demonstrating targeted knowledge and skills related to independence in managing individual needs. UNH-4U students can participate in the seminar up to 4 semesters with specific seminar activities established in consultation with mentor.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 16 times.
Grade Mode: Credit/Fail Grading

HHS 400C - UNH-4U Seminar: Independent Study
Credits: 1-4
Qualified UNH-4U student will be permitted to pursue independent studies under faculty guidance.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Credit/Fail Grading

HHS 400D - UNH-4U Seminar: Advanced Career and Professional Seminar
Credits: 1-6
In this seminar, second year UNH-4U students will meet with instructor for weekly sessions to expand upon skills gained in HHS 400A in working toward individualized career goals. Students will practice skills needed to secure a job or internship. Specific objectives include: 1) update resume and cover letter; 2) create and/or a career portfolio; 3) engage in mock interviews; 4) actively seek and apply for paid employment and internship opportunities that align with career goals; 5) engage in professional networking; and 6) develop a job retention and growth plan. UNH-4U students may participate in the seminar up to 4 semesters with specific seminar activities established in consultation with mentor.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Credit/Fail Grading

HHS 401 - College of Health and Human Services Seminar
Credits: 0-2
This course is an introduction to the curricular and co-curricular aspects of the University and specifically the College of Health and Human Services. The course will focus on resource navigation, major and career exploration and fostering “knowledge for healthy living”.
Grade Mode: Credit/Fail Grading

HHS 402 - Spring ACE Seminar
Credits: 1 or 2
This course will guide CHHS students as they identify ways to self-reflect and build experience to continue on the path to becoming well rounded students. An emphasis will be placed on identifying ways to build transferable skills through involvement beyond the classroom such as clubs and orgs, CHHS institutes, research, and activities applicable to the student's field of interest.
Grade Mode: Credit/Fail Grading

HHS 500 - ACE Peer Leadership
Credits: 0-2
In this course, you will be given the opportunity to further your leadership and transferable professional skills. Through both mentoring a first-year student as well as partnering with an assigned professional academic advisor, you will develop critical skills in classroom management, public speaking, group and personal communication, and organization by supporting the facilitation of a first-year seminar, providing peer mentoring and advising, and engaging in professional development opportunities throughout the semester.
Repeat Rule: May be repeated for a maximum of 6 credits. May be repeated up to 3 times.
Grade Mode: Credit/Fail Grading

HHS 697W - Professional Writing in the Health and Human Services
Credits: 1-4
This course will focus on professional writing skills for the health sciences and human services professionals. Writing in these professions is unique because written communication often serves as the foundation for clinical and programmatic decision making requiring swift, precise, accurate, defendable, and objective writing. With this is mind, this course will focus on clinical recording, case documentation, cover letters, fact sheets, brief reports, memos, and infographics.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

HHS 698 - Special Topics
Credits: 1-2
Explores areas related to specific professional health interests. May repeat but not duplicate subject areas. A) Communication Disorders, B) Health Management and Policy, C) Medical Laboratory Science, D) Nursing, E) Occupational Therapy, F) Kinesiology, G) Recreation Management and Policy, J) Family Studies, K) Social Work, L) Health Promotion, M-Z) Interdisciplinary.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Credit/Fail Grading

HHS 710 - Introduction to Telehealth
Credits: 4
This course focuses on the ever-changing landscape of telehealth through the lens of various health and human services disciplines. Students will explore topics such as the digital divide, telepresence, ethics, telehealth technology, and current practices in telehealth. In addition to completing weekly modules that span a variety of key telehealth topics, students will work collaboratively at a distance to create a multi-media project focused on a telehealth topic of interest.
Grade Mode: Letter Grading

HHS 798 - Special Topics
Credits: 1-4
Explores areas related to specific professional health interests. May repeat but not duplicate subject areas. A) Communication Disorders, B) Health Management and Policy, C) Medical Laboratory Science, D) Nursing, E) Occupational Therapy, F) Kinesiology, G) Recreation Management and Policy, J) Family Studies, K) Social Work, L) Health Promotion, M-Z) Interdisciplinary. Special fee on some topics.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 7 times.
Grade Mode: Letter Grading
Special Fee: Yes

Health and Physical Education (HPE)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HPE 500 - Introduction to Health & Physical Activity Promotion
Credits: 2
This course introduces key concepts in promoting health and physical activity across the lifespan. Students will explore wellness principles, social and behavioral determinants of health, strategies for behavior change, and educational and public health frameworks. Emphasis is placed on understanding how health and physical activity contribute to individual and community well-being. Students will also examine diverse professional roles and career pathways in schools, healthcare, workplaces, and community-based health promotion and recreational settings.
Equivalent(s): KIN 500
Grade Mode: Letter Grading

HPE 570 - Elementary Physical Education Practicum
Credits: 4
As a prospective teacher, you will be asked to examine, discuss, and implement teaching strategies learned in HPE 610 - Elementary Physical Education Pedagogy. Sixty hours of observation and teaching in the schools will be expected. As this is a "gateway" course to student teaching or the 5th year internship, it is expected that students invest efforts into the development of pedagogical skills needed for effective teaching.
Attributes: Writing Intensive Course
Prerequisite(s): HPE 610 with a minimum grade of D-.
Equivalent(s): KIN 570
Grade Mode: Letter Grading
Special Fee: Yes

HPE 600 - Movement and Gymnastics Exploration
Credits: 4
This course is designed to enhance the students' knowledge of and ability to demonstrate, implement, and evaluate the movement fundamentals and gymnastics skills and progression that forms the foundation of preschool, elementary, and secondary school physical education content. The course will combine the elements of movement education and gymnastics progressions to develop a basis for students to learn the fundamentals of movement and how to teach them.
Equivalent(s): KIN 600
Grade Mode: Letter Grading

HPE 601 - Foundations of Lifetime Physical Activity
Credits: 3
Why do some people stay active for life while others struggle to get moving? This course explores physical activity participation and promotion across the lifespan through a social ecological lens. Students will investigate how beliefs, environments, policies, technologies, and more shape opportunities for movement. Through reflective discussions and within physically active learning across lifetime activities, students will develop foundational knowledge and skills to understand and promote meaningful and sustainable physical activity in diverse communities.
Equivalent(s): KIN 601
Grade Mode: Letter Grading

HPE 603 - Game On! Playing and Leading Team Sports and Activities
Credits: 3
This active, hands-on course engages students in playing and leading team sports and cooperative games using tactical, player-centered approaches. Learning opportunities emphasize small-sided and modified games that encourage students to explore how strategy, skill, communication, and decision-making emerge through play. Foundational instructional practices are introduced to support developmentally appropriate, inclusive experiences. Students gain knowledge, skills, and dispositions necessary to enjoy as well as lead meaningful physical activity in diverse team-based settings.
Equivalent(s): KIN 603
Grade Mode: Letter Grading

HPE 610 - Teaching Young Children Through Movement
Credits: 4
This course explores the foundations of physical activity for young children, with an emphasis on what to teach and how to create meaningful, developmentally appropriate movement experiences. Using a skill theme and movement concept approach, the course prepares students to support children's motor development and physical activity experiences in school and community settings through hands-on learning, readings, discussions, assignments, and opportunities to design and lead activities for children. Students will gain practical experience and build confidence in fostering movement skills that promote health, enjoyment, and lifelong engagement in physical activity.
Equivalent(s): KIN 610
Grade Mode: Letter Grading

HPE 648 - Moving Towards Well-Being: Principles of Health Behavior Change for Health and Wellness Educators
Credits: 4
Do you want to help others achieve health and well-being? This class emphasizes a salutogenic approach to examine the foundations of health behavior change across different dimensions of wellness, explores social and environmental factors that can impact health outcomes, and develops the ability to teach others the skills necessary to improve health and well-being in a variety of school, healthcare, fitness, or other settings.
Equivalent(s): KIN 648
Grade Mode: Letter Grading

HPE 653B - Biomechanics of Human Movement
Credits: 2
Principles and methodology of analyzing movement in sport and physical education using principles of biomechanics and physics. Uses videos and field-based methodology to facilitate students' understanding of movement analysis and applying analyses to teaching and coaching.
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Equivalent(s): KIN 653B
Grade Mode: Letter Grading

HPE 655 - Middle School and Secondary Physical Education Pedagogy
Credits: 4
Course content will include concepts related to effective teaching such as: planning, organization, communication, management, modifications, and evaluation. Mosston's spectrum of teaching styles will be discussed in relationship to meeting the individual needs of students. Curriculum models will be discussed in order to show the range of content available to physical educators. Application of theoretical concepts will occur in peer teaching episodes.
Equivalent(s): KIN 655
Grade Mode: Letter Grading

HPE 671 - Health Education Pedagogy
Credits: 4
This course provides a foundation for teaching health education in K-12 settings. Aligned with the CDC Characteristics for Effective Health Education, the course builds on previous knowledge of the National Health Education Standards and other appropriate practices while preparing pre-service teachers to increase the health literacy and proficiency levels of their future students.
Equivalent(s): KIN 671
Grade Mode: Letter Grading

HPE 675 - Motor Development and Learning Across the Lifespan
Credits: 4
This course examines how humans develop and learn movement skills across the lifespan and how these processes influence physical activity, recreation, and daily life. Drawing on ecological and developmental perspectives, students explore how individual traits, environments, and tasks shape motor behavior and physical activity. Topics include motor development theory, motor learning, physical literacy, and movement constraints. Emphasis is placed on how motor competence supports lifelong physical activity, autonomy, and wellbeing.
Equivalent(s): KIN 675
Grade Mode: Letter Grading

HPE 676 - Adventure Activities
Credits: 3
This course provides for the acquisition of knowledge and skills for students to utilize adventure education methods and philosophies when teaching physical education through an experiential pedagogy. Students will be exposed to adventure methodologies: climbing, orienteering, initiatives, low ropes course and high ropes course. Students will realize facilitation and teaching strategies through peer and practice teaching with local students from Oyster River Middle School in Durham.
Equivalent(s): KIN 676
Grade Mode: Letter Grading

HPE 694 - Supervised Teaching in Health and Physical Education
Credits: 6
Students in this course will be involved in observing, assisting and teaching health and physical education classes in local schools as their culminating experience in the HPE major. These experiences will be augmented by weekly seminars whereby issues pertaining to focused observations and thoughts related to teaching and learning will be discussed. Throughout the duration of this course, students will be asked to reflect on the teaching they observe as well as their own teaching.
Co-requisite: EDUC 694D
Equivalent(s): KIN 694
Grade Mode: Credit/Fail Grading

HPE 696 - Independent Study in Health and/or Physical Education
Credits: 2-4
An advanced, individual scholarly project under the direct supervision of a faculty member.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 4 times.
Grade Mode: Letter Grading

HPE 702 - Health Content and Youth Risk Behavior
Credits: 4
Explore topics related to adolescent health, well-being, and risk behaviors that are relevant in the health education classroom today. Grounded in health behavior theories and behavior change, students explore ten dimensions of wellness: Cultural, Emotional, Environmental, Financial, Intellectual, Occupational, Physical, Sexual, Social, and Spiritual. Students develop a content base for teaching Standard 1 of the National Health Education Standards in coordination with the skill standards as outlined by the NH Health Education Curriculum Guidelines.
Equivalent(s): KIN 702
Grade Mode: Letter Grading

HPE 712 - Health Education Practicum
Credits: 4
This practicum provides prospective health educators an opportunity to observe, develop, and practice teaching skills and functional information in health education settings. Students are expected to accumulate 60 hours of observing, assisting and teaching experience in a K-12 school or community-based setting. In addition, weekly seminars integrate field experience with lesson planning, current issues in teaching health education, and an understanding of the professional, legal, and ethical considerations pertaining to health education. This serves as an opportunity for refinement and continued development of your skills and attributes for teaching health education. All students seeking to complete the HPE Teacher Licensure track must have a placement in a K-12 school-based health education classroom.
Co-requisite: NUTR 400
Prerequisite(s): HPE 648 with a minimum grade of D- and HPE 671 with a minimum grade of D- and HPE 702 with a minimum grade of D-.
Equivalent(s): KIN 712
Grade Mode: Letter Grading

HPE 766 - Middle School and Secondary Physical Education Practicum
Credits: 4
Students in this course will be given the opportunity to spend 60 hours in a middle or high school observing, assisting and teaching physical education classes. These experiences will be augmented by weekly seminars whereby issues pertaining to focused observations and thoughts related to teaching and learning will be discussed. A major culminating "I Believe" paper will be required and this course will be the HPE capstone experience.
Attributes: Writing Intensive Course
Prerequisite(s): HPE 655 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): HPE 666, KIN 666
Grade Mode: Letter Grading

HPE 781 - Introduction to Adapted Physical Education
Credits: 4
This course covers with the skills to adeptly execute diverse physical activity programs tailored to the specific requirements of individuals with disabilities within K-12 school settings. The focus of the course lies in addressing considerations for physical activity programming and understanding the characteristics of individuals dealing with developmental, physical, emotional, sensory, health, learning, and/or multiple disabilities. This course begins with an understanding of the term disability followed by the legal mandates that define school policy and student placement. Throughout the course an overview of disability will be analyzed with readings that include an analysis of the social medical models designed to challenge the social construction of disability and orientations for practice. Classroom time will also include direct teaching of individuals with disabilities in physical activity settings.
Attributes: Writing Intensive Course
Equivalent(s): KIN 781
Grade Mode: Letter Grading

Health Care (HLTC) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HLTC 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Health Care. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): HLTC 544G
Grade Mode: Letter Grading

HLTC 550 - The Emerging U.S. Health Care System
Credits: 4
This course traces the evolution of the U.S. health care delivery system over the last century with a focus on the structure and function of the contemporary managed care system. The course examines a wide range of factors (sociocultural, political, economic, legal and technical) which have impacted the evolution of the current system. Economic factors related to the delivery of health care services are extensively covered. Comparative health care systems are examined. The impact of the changing demographics of the U.S. population on the design and delivery of health care is reviewed.
Attributes: Writing Intensive Course
Equivalent(s): HLTC 550G, HMP 401
Grade Mode: Letter Grading

HLTC 560 - Health Behaviors: Theoretical Foundations for Health Education
Credits: 4
This course explores how psychological theories and techniques can minimize unnecessary morbidity and premature mortality. Applied behavioral and cognitive techniques that target primary and secondary prevention efforts are identified through theory and research. Effective health coaching and education techniques that support the compliance of healthy behaviors will be introduced.
Attributes: Writing Intensive Course
Equivalent(s): HLTC 560G
Grade Mode: Letter Grading

HLTC 590 - Introduction to Fiscal Management in Health Care
Credits: 4
This course is designed for health care managers who do not have a background in financial management. As an introduction to the tools and processes that empower managers entrusted with budgetary oversight, the course provides fundamental skills for effective financial management in the rapidly changing health care environment. Students become prepared to make their organizations more effective in the four managerial functions of planning, organizing, leading and controlling by balancing inflows (revenues) and outflows (expenses), successfully monitoring and controlling costs and staffing, and identifying areas to be targeted for improvement. Strategies to acquire and allocate funds and to plan, analyze, and control financial operations are introduced.
Equivalent(s): HLTC 555G, MGMT 555G
Grade Mode: Letter Grading

HLTC 595 - Practicum in Health Care
Credits: 4
This project-based practicum is an entry-level field experience designed to assist health care-related majors in exploring career and vocational settings in which they can use and apply their knowledge and skills. The practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings and situations in which the student may engage for the internship of HLTC 795 or to investigate an evidence-based health and wellness topic for HLTC 798. Earlier registration deadlines apply. Please consult your advisor.
Prerequisite(s): HLTC 550 with a minimum grade of D- or HLTC 550G with a minimum grade of D-.
Equivalent(s): HLTC 540G
Grade Mode: Letter Grading

HLTC 612 - Population Health
Credits: 4
This course outlines how health care and health education delivery for various populations and communities have evolved. Topics include health behaviors, social determinants of health, cultural influences, health policy and economics, and how frameworks for health care systems influence disease prevention strategies. This course analyzes population health issues from multiple perspectives and examines community assessment strategies. The course also emphasizes the promotion of a healthy lifestyle for the individual and populations to reduce morbidity and mortality rates.
Prerequisite(s): HLTC 550 with a minimum grade of D- or HLTC 550G with a minimum grade of D- or HMSV 424 with a minimum grade of D- or HMSV 500G with a minimum grade of D- or BEHS 502G with a minimum grade of D-.
Equivalent(s): HLTC 612G, HMP 403
Grade Mode: Letter Grading

HLTC 627 - Reimbursement and Financing Techniques in Health Care
Credits: 4
This course analyzes various methods of health care financing, including Medicare/Medicaid, private insurance (including HMOs), and self-funding. It then discusses the various methodologies for reimbursement under these programs, including fee-for-service, capitation, and DRGs, and their impact on the health care organizations providing the services. Students will analyze how budgets, expenses, and financial statements, etc., are linked to the reimbursement process, and they will examine the role of the non-financial manager in health and human services in these processes.
Prerequisite(s): HLTC 555G with a minimum grade of D- or HLTC 590 with a minimum grade of D-.
Equivalent(s): HLTC 627G, HMP 740, HMP 741
Grade Mode: Letter Grading

HLTC 690 - Law and Ethics for Health Care and Human Services
Credits: 4
This course provides students with legal and ethical frameworks for working through increasingly complex issues that affect health and human services delivery from the standpoint of the individual, the public, and the system of providers. Through an overview of current law, regulation, standards of ethics, and moral theory, students will evaluate pervasive issues and dilemmas present in their field of study. This course incorporates case studies with philosophical and theoretical analysis to equip students with nuanced perspectives regarding the ethical, legal, and health policy challenges facing society.
Attributes: Writing Intensive Course
Equivalent(s): HLTC 629G, HMP 744
Grade Mode: Letter Grading

HLTC 695 - Internship or Project in Health Care
Credits: 4
This upper level course is a field-based experience designed to develop and hone the practical application skills of a health care, human services, or wellness-related major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where health care, human services, or wellness-related knowledge and skills are applied. A non-field-based project may be substituted with approval of Academic Affairs. NOTE: Registration for this course as an internship is by permission of Academic Affairs. Early registration deadlines may apply. All major requirements must be completed prior to enrollment in this course.
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HLTC 640G
Grade Mode: Letter Grading

HLTC 720 - Health Program Planning and Evaluation
Credits: 4
This course addresses the principles of planning, development, implementation, and evaluation of health programs with an emphasis on addressing community health frameworks, individual health and lifestyle risk factors, and the appropriate interventions to manage these risks. Partnership building with stakeholders will also be addressed.
Prerequisite(s): MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-.
Equivalent(s): HLTC 620G
Grade Mode: Letter Grading

HLTC 737 - Informatics for Health Professionals
Credits: 4
Health care professionals interact with patients, families, communities, and populations in technology rich environments. This course provides students with the opportunity to explore communication technologies and informatics tools integral to the health care system. Students will investigate how data is collected and utilized to inform decisions. Consideration of the impacts of information and communication technologies relative to ethical standards, quality improvement, regulations, and the experience of patients and providers shall be explored by students.
Attributes: Writing Intensive Course
Prerequisite(s): NUR 615 with a minimum grade of D- or (MTH 504 with a minimum grade of D- and HLTC 612 with a minimum grade of D-).
Equivalent(s): HLTC 637G, NUR 608G
Grade Mode: Letter Grading

HLTC 738 - Health Care Policy
Credits: 4
This course explores the multifaceted issues affecting health care policy in the United States. The course reviews the history of health care policy and provides students with an understanding of how it has shaped our current health care delivery system. Major health care policies and initiatives are reviewed. The course also explores the many political challenges (state and national), political process, impact of the presidential administration, and political interest groups. Students examine the impact that various parties have on health care policy and the challenges facing reform efforts.
Prerequisite(s): HLTC 550 with a minimum grade of D- or HLTC 550G with a minimum grade of D-.
Equivalent(s): HLTC 638G, HMP 746
Grade Mode: Letter Grading

HLTC 795 - Integrative Capstone: Internship in Health and Wellness
Credits: 4
This upper level course is a field-based experience designed to develop and hone the practical application skills of a health care, or wellness-related major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where health care, or wellness-related knowledge and skills are applied. This course is the capstone for the BS in Health and Wellness. NOTE: Registration for this course as an internship is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HLTC 651G
Grade Mode: Letter Grading

HLTC 797 - Integrative Capstone: Project in Health Care Management
Credits: 4
This project-based capstone integrative seminar focuses on the concepts and techniques of successful health care management practices. It analyzes the process of developing and executing strategies designed to optimize a health care organization and its management. Students apply their knowledge of health care systems, policy, financing, and information systems to a course project. The project integrates essential knowledge from the degree program at both the practical and the theoretical levels while fulfilling the student's own field of professional interest. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HLTC 650G
Grade Mode: Letter Grading

HLTC 798 - Integrative Capstone: Project in Health and Wellness
Credits: 4
This capstone course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Conforming to the clinical, research and ethical health standards, students will complete an independent project, which includes the written analysis and synthesis integrating theory and practice. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HLTC 652G
Grade Mode: Letter Grading

Health Management & Policy (HMP)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HMP 401 - United States Health Care Systems
Credits: 4
Nature and functions of health care services and health professionals; impact of social, political, economic, ethical, professional, legal, and technological forces on health care systems. Current health policy issues.
Attributes: Social Science (Discovery)
Equivalent(s): HLTC 550, HMP 401H, HMP 401W
Grade Mode: Letter Grading

HMP 403 - Introduction to Public Health
Credits: 4
This course describes and defines "what is public health" and seeks to convey its critical importance and relevance to both public and individual (personal) wellbeing. It presents an overview of the structure, function, and organization of the public health system/services (government, proprietary, and voluntary sectors) and how they operate, emphasizing core functions and major divisions (public health administration, epidemiology and biostatistics, environmental health, social and behavioral health). Addresses the social, ethical, issues; bioterrorism; epidemics; obesity; tobacco, alcohol, and opioid use; violence. Seeks to challenge students to think critically about existing and emerging U.S. and global public health issues. Introduces public health careers.
Equivalent(s): HLTC 612
Grade Mode: Letter Grading

HMP 501 - Epidemiology and Community Medicine
Credits: 0 or 4
The distribution and determinants of disease, illness, and health in the community. Community health and illness measures, health status, and source of data. Development of hypotheses and study designs to reduce community health problems using epidemiological reasoning, methods, and analyses. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): HAP 402, HAP 501, HMP 501H
Grade Mode: Letter Grading

HMP 512 - Using Data to Improve Human Health
Credits: 4
A digital revolution is transforming healthcare around the world. The amount of healthcare data being generated is growing exponentially by the day, facilitated by technology, such as Electronic Health Records and wearable health devices. Advances in software for mining, analyzing, and visualizing data are allowing researchers to unveil unprecedented insights. This course explores the role of data in advancing human health. Through a multidisciplinary approach, students will examine the collection, analysis, and ethical implications of health-related data. The course aims to foster critical thinking skills and an understanding of the interplay between technology and society in the context of healthcare.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

HMP 540 - Statistics for Health and Human Service Professionals
Credits: 4
A conceptual and analytical approach to the use of statistics in the health and human service professions. Emphasizes the logic and purpose of statistics. Attention to special problems of statistical design such as random assignment, single subject trials, and the ethics of control groups. Basic computer skills for manipulating data.
Attributes: Quantitative Reasoning(Disc)
Equivalent(s): HHS 540
Mutual Exclusion: No credit for students who have taken ADMN 420, ADMN 510, BIOL 528, EREC 525, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

HMP 610 - Survey of Health Information Systems
Credits: 2
This course introduces you to the nomenclature and foundations of health information technology and systems in health care delivery settings and the management and strategic uses for those systems. It is relevant for those studying health care management and individuals using or installing clinical health information systems. Time will be spent examining health care information flow, data capture, storage within information systems, technology standards, information security, and data usages both internally and externally.
Prerequisite(s): HMP 401 with a minimum grade of D-.
Equivalent(s): HMP 511, HMP 611
Grade Mode: Letter Grading

HMP 621 - Pre-practicum Seminar
Credits: 1-2
Preparation for field practicum experience, orientation to experiential learning and competency development.
Repeat Rule: May be repeated for a maximum of 2 credits. May be repeated up to 1 time.
Equivalent(s): HAP 621
Grade Mode: Letter Grading

HMP 622 - Field Practicum in Organizational and Project Analysis, and Management Skills Development
Credits: 3
Experiential learning in a health care organization; application of theories to practice. Planned learning objectives are accomplished through three distinct components. Organizational Analysis, Project Analysis and Management Skills Development, with Supervision by agency personnel. This will include analysis of assigned health care agency, from external and internal viewpoints, development of the basic quantitative and interpersonal skills required for a health services manager, and demonstration of knowledge and analysis of specific problem-solving skills. Students need a GPA of 3.0 or higher, and an approved practicum site.
Prerequisite(s): HMP 621 with a minimum grade of D-.
Equivalent(s): HAP 622, HMP 622A, HMP 622B, HMP 622C
Grade Mode: Credit/Fail Grading

HMP 624 - Post Practicum Seminar
Credits: 2
Summary of field practicum experience, and next steps. Individual analysis and panel discussions to include site assessment, project description, and methodologies employed, critique of individual skills, and knowledge base in relation to internship.
Prerequisite(s): HMP 621 with a minimum grade of D-.
Grade Mode: Letter Grading

HMP 631 - Health Issues Seminar
Credits: 2
Discussion of current issues in the fields of health management, health policy and public health.
Grade Mode: Letter Grading

HMP 635 - Healthcare Marketing
Credits: 4
Healthcare marketing builds upon competencies from previous courses, it covers foundational marketing principles, their application in healthcare administration, including marketing strategy, strengths and weakness evaluation, environmental forces, competitors, market size, customer/patient stratification and needs by defined groups, products and services, promotion, distribution, evaluation, and communication channels used to launch a targeted approach to different segmentations. Groups will choose a topic (new service, expansion or social marketing/public health topic) for full marketing launch presentations.
Grade Mode: Letter Grading

HMP 642 - Health Economics
Credits: 4
This course in health economics introduces the tools of microeconomics to analyze various issues in health and healthcare. The first half of the course focuses on patient demand, and the second half focuses on provider supply. Topics covered in the former include the demand for health and healthcare, the demand for insurance, externalities associated with certain health behaviors, cost-effectiveness analyses, and health equity considerations. Topics covered in the latter half of the course include the role of nonprofits, provider agency, provider competition versus concentration, insurer behavior, and the effects of government regulation of insurance.
Grade Mode: Letter Grading

HMP 669 - Human Behavior and the Public Health
Credits: 4
Provides a grounding in fundamental concepts of the behavioral sciences as they illuminate public health. Individual and community responses to prevention, identification of symptoms, diagnoses, treatments, chronic ailments, and rehabilitation are discussed. In each of these areas, the course explores the interaction between community, family, patient, and health care provider.
Equivalent(s): HMP 569
Grade Mode: Letter Grading

HMP 702 - Programming in Healthcare Environments
Credits: 4
This course covers using Python as a programming language to write, implement, and design programs that are relevant to various aspects of programming in a health setting. After completion of this course, students should be comfortable with the basic data structures in Python and R (including arrays, dictionaries and dataframes), conditional logic and iterators, writing Python and R functions, and using Python libraries to read external data and perform data manipulations and data analysis.
Grade Mode: Letter Grading

HMP 703 - Translation of Health Data
Credits: 4
This course will give you the skills you need to leverage data to reveal valuable insights and advance your career. This course teaches you the visualization skills necessary to be effective Data Storytellers which helps engage your audience in a story about the data. This course focuses on concepts as well as hands#on experience of presenting data from initial concepts to final presentation by creating meaningful displays of quantitative and qualitative data to facilitate peer/managerial decision making.
Grade Mode: Letter Grading

HMP 711 - Introduction to Healthcare Operations Analytics
Credits: 4
Introduces intermediate techniques for data manipulation and analysis for the health care field. Also introduces methods for survey research and large data set manipulation and analysis. There is a lab section utilizing a statistical software package where students perform tasks from a large national data set.
Grade Mode: Letter Grading

HMP 712 - Healthcare Operations Management
Credits: 4
This course introduces students to the field of health analytics and data science. It expands upon introductory statistical and data manipulation methods to include data mining, predictive analytics, cluster analysis, trend and pattern recognition, and data visualization. It couples data skills with interpretive and communication skills. Students will also be exposed to basic statistical programming. There will be a graduate component of the course (812) where students will work on advanced concepts and complete a separate culminating project.
Prerequisite(s): HMP 711 with a minimum grade of D-.
Grade Mode: Letter Grading

HMP 715 - Environmental Health
Credits: 4
This course offers a general introduction to environmental health from the community, regional, and global perspective by addressing fundamental topics and current controversies such as air pollution, water pollution, built environment/urban sprawl, food safety, waste disposal, and occupational health. Students learn about environmental health assessment methods. Major issues in environmental health and related regulatory efforts and public health policy reform are examined.
Grade Mode: Letter Grading

HMP 721 - Managing Health Care Organizations
Credits: 4
Organizational characteristics of ambulatory, acute, and long-term care facilities. Management issues and strategies involving governance, clinical services, human and fiscal resources, and community-based services.
Grade Mode: Letter Grading

HMP 722 - Health Care Management II
Credits: 4
A continuation of HMP 721 - Managing Health Care Organizations with specific lectures and assignments devoted to organizational behavior, leadership, and managerial skills. Case studies and examples will relate specifically to health care organizations.
Prerequisite(s): HMP 721 with a minimum grade of D-.
Grade Mode: Letter Grading

HMP 723 - Health Planning
Credits: 4
Theoretical and historical foundations of health planning; the relationship of health planning and regulation; the application of planning methods; and the utilization of strategic planning and its relationships to marketing.
Equivalent(s): HAP 723
Grade Mode: Letter Grading

HMP 740 - Health Care Financial Management
Credits: 4
Techniques, principles, and practices of managing fiscal aspects of health care organizations. Exploration of concepts and techniques associated with variance analysis, cost allocation, management of working capital, and capital decision analysis. Analysis of the impact of reimbursement on health care organizations.
Equivalent(s): HLTC 627
Grade Mode: Letter Grading

HMP 741 - Health Care Financial Management II
Credits: 4
This course focuses on issues related to effective financial management of health care organizations and programs, building upon material covered in HMP 740, Health Care Financial Management. Topics include the time value of money, long-term debt, stocks and equity, and evaluation of capital projects.
Prerequisite(s): HMP 740 with a minimum grade of D-.
Equivalent(s): HLTC 627
Grade Mode: Letter Grading
Special Fee: Yes

HMP 742 - Strategic Management for Health Care Organizations
Credits: 4
Application of managerial methods involving financial, marketing, and operational analysis to health management. Case studies.
Attributes: Writing Intensive Course
Prerequisite(s): HMP 721 with a minimum grade of D- and HMP 740 with a minimum grade of D-.
Equivalent(s): HAP 742
Grade Mode: Letter Grading

HMP 744 - Law and Ethics in Healthcare
Credits: 4
Ethical theories, core legal principles and cases, and decision-making models; patient's rights and professional responsibilities; social justice and resource allocation; critical ethical dilemma's facing health care managers, policy makers, and executives; managerial versus medical care conflicts.
Equivalent(s): HLTC 690
Grade Mode: Letter Grading

HMP 746 - Health Policy
Credits: 4
Analysis of the public policy process, the development of health policies in the U.S., and discussion of specific health policy issues.
Attributes: Writing Intensive Course
Equivalent(s): HLTC 738
Grade Mode: Letter Grading

HMP 749 - Public Health Capstone: Integrative Experience
Credits: 4
The Capstone course is the culminating experience for students in the Bachelor of Public Health (BPH) program. This course integrates knowledge and skills acquired throughout the program, allowing students to apply public health theories, methods, and practices to real-world public health problems. Students will work on a community-based project, research paper, or case study to demonstrate their competencies in public health practice, research, and policy development.
Grade Mode: Letter Grading

HMP 796 - Independent Study
Credits: 1-4
In-depth study with faculty supervision.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

HMP 798H - Honors Project/Research Design
Credits: 2
Examines selected research designs and methods used in health services research/program evaluation. Establishes theoretical and methodological foundation for honors-in-major research project to be conducted during the subsequent semester under a faculty member's supervision.
Attributes: Honors course
Grade Mode: Letter Grading

HMP 799H - Honors Project/Research
Credits: 2-4
In-depth research project (conducting and analysis) under supervision of faculty member. Includes scholarly presentation of findings to faculty and other interested parties and preparation of manuscript suitable for publication in peer-viewed journal.
Attributes: Honors course; Writing Intensive Course
Prerequisite(s): HMP 798H with a minimum grade of D-.
Grade Mode: Letter Grading

Health Sciences (HS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HS 406 - Introduction to Health Sciences
Credits: 1
This introductory course is designed to expose students to the broad, interdisciplinary field of health sciences. It will provide students an overview of the prerequisite knowledge that will prepare an individual to pursue a career in any number of allied health professions. In this course, students will explore basic foundational concepts pertinent to a complex, ever-evolving healthcare field.
Equivalent(s): AT 406
Grade Mode: Letter Grading

HS 501 - Medical Terminology
Credits: 2
This course is an introduction to common medical terminology and vocabulary used by a variety of professionals in the healthcare field; terminology related to organ systems, disease diagnosis and pathophysiology will be emphasized. The origin, roots, prefixes, suffixes, and relevant abbreviations and acronyms of common medical and clinical terms are examined in a systems-based approach.
Grade Mode: Letter Grading

HS 605 - Exploration of Allied Health Professions
Credits: 2
Explore and understand duties, responsibilities, and common work schedules of allied health professions. Complete 10 hours of observation with each profession: athletic training, physical therapy, and physician assistant. Students may substitute observation of other professions by submitting written justification to, and upon permission of course instructor.
Grade Mode: Credit/Fail Grading

HS 656 - Musculoskeletal Pathologies for Health Professions
Credits: 4
Introduces the student to the musculoskeletal injuries common to allied health professions. Cognitive knowledge on anatomy, injury pathology, assessment and diagnosis. In conjunction with HS 657, Musculoskeletal Pathologies for Health Professions Lab, this course prepares the student for continued education in allied health professions.
Co-requisite: HS 657
Prerequisite(s): BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-.
Grade Mode: Letter Grading

HS 657 - Musculoskeletal Pathologies for Health Professions Lab
Credits: 1
The practical application of the knowledge attaining in HS 656. Students will learn & perform anatomical landmark palpation, injury assessment procedures & techniques, and taping & wrapping procedures. This course, in conjunction with HS 656, prepares the students for further education at the graduate level.
Co-requisite: HS 656
Prerequisite(s): BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

HS 696 - Independent Study
Credits: 2-4
An advanced, individual scholarly project under the direct supervision of a faculty member.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HS 699H - Honors Project
Credits: 4
Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.
Attributes: Honors course
Grade Mode: Letter Grading

HS 702 - From Lab to Life: Interpretation of Research to Guide Clinical Practice
Credits: 4
This course equips students with the skills to advance clinical practice through evidence-based and translational research. Topics include differentiating research types, utilizing database search strategies, and navigating the research journey. Ethical considerations, including the use of AI and research integrity, are emphasized. Students will critically analyze research articles, develop innovative solutions for health and wellness, explore career opportunities in clinical research, and assess disparities in health outcomes among underrepresented populations.
Grade Mode: Letter Grading

HS 717 - Cultural Considerations in Health Care
Credits: 4
Capstone course to introduce concepts of culture, cultural humility, and diversity as related to professional practice for students preparing for careers in healthcare professions. Patient-centered course teaching students about patient types, and how to appropriately consider and care for those with differing cultural backgrounds, beliefs and practices.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 10 credits.
Grade Mode: Letter Grading

HS 741 - The Art and Science of Healthcare Practice: Integrating Clinical Knowledge with Professional Skills
Credits: 4
Explore concepts of effective healthcare practice, including professionalism, communication skills, clinical reasoning, and interprofessional collaboration. Develop essential skills for navigating healthcare practice, enhancing patient care, and working collaboratively with diverse healthcare teams. Practical exercises provide students with the opportunity to apply theoretical knowledge in realistic settings. Students develop a strong understanding of how to contribute effectively to interprofessional teams in delivering high-quality, patient-centered care.
Grade Mode: Letter Grading
Special Fee: Yes

HS 767 - Pharmacology for Health Professions
Credits: 4
This course will be an introduction to the general principles of pharmacology, the organ systems affected by the various drug types, and drug classifications as appropriate for future allied health professionals. Students will also explore common prescribing in various practice settings as well as the applicable U.S. laws relative to the sale, supply, and administration of drugs.
Prerequisite(s): CHEM 403 with a minimum grade of C- and CHEM 404 with a minimum grade of C-.
Equivalent(s): AT 667, KIN 667
Grade Mode: Letter Grading

HS 770 - General Medical Conditions for Health Professions
Credits: 4
This course will be an introduction to the general medical conditions commonly diagnosed and treated among allied health professionals, with emphasis on disease etiology, pathophysiology, signs and symptoms, diagnostic procedures, and therapeutic measures involved in treatment.
Prerequisite(s): BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-.
Equivalent(s): AT 670
Grade Mode: Letter Grading

History (HIS) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HIS 402 - Great Civilizations
Credits: 4
For thousands of years, humans have created communities that align with certain perceived value systems. From these value systems, great civilizations have been cultivated, developed, and brought into conflict with other cultures. This course examines the rise of civilizations throughout the world, tracing the history of human societies from their beginnings through 1000 C.E. After surveying the prehistoric period and early civilization, the course focuses on the religious, political, and cultural characteristics of key civilizations from around the world. Emphasis will be placed on patterns of civilization, human conflict and interaction, and the development of human thought and expression.
Attributes: Historical Perspectives(Disc); Human Thought Exp (Gen Ed)
Equivalent(s): HIS 502G
Mutual Exclusion: No credit for students who have taken HIST 421.
Grade Mode: Letter Grading

HIS 410 - United States History to 1865
Credits: 4
This course focuses on the origins and development of issues relevant to Americans today through the examination of the history of the United States from its earliest settlement through the Civil War. Students study themes and events ranging from Native American cultures and their contact with early European settlements, the triumph of British over French and Spanish settlers, the upheavals of the Revolution, the establishment of the United States, its expansion westward, and the development and growth of slavery which culminated in the Civil War. The focus of this class will be making connections between the past and the present day, recognizing historical themes, evaluating areas of conflict, and using evidence-based historical interpretation.
Attributes: Historical Perspectives(Disc); Human Thought Exp (Gen Ed)
Equivalent(s): HIS 510G
Mutual Exclusion: No credit for students who have taken HIST 405.
Grade Mode: Letter Grading

HIS 411 - United States History: 1865 to the Present
Credits: 4
This course addresses the characteristics of contemporary American society as a product of major developments, policies, conflicts, and legislation that occurred from 1865 to the present. Major topics include: reconstruction after the Civil War, industrialization and its consequences, themes and patterns of American foreign policy, the Progressive era and the New Deal, World War II, the Cold War, America's role in the era of globalism, and domestic and foreign policy developments since World War II. Students will have the opportunity to use primary and secondary sources to explore multiple perspectives and interpretations of this period in history.
Attributes: Historical Perspectives(Disc); Human Thought Exp (Gen Ed)
Equivalent(s): HIS 511G
Mutual Exclusion: No credit for students who have taken HIST 406.
Grade Mode: Letter Grading

HIS 512 - European History: Renaissance through the Industrial Revolution
Credits: 4
This course provides students the opportunity to engage in critical discussions about the foundations of modern western society according to key cultural, religious, and political changes associated with the Renaissance, the Reformation, and the emergence of the modern state. It also examines developments in the sciences, western philosophy, and revolutionary politics in theory and practice, through the nineteenth century, drawing connections between the past and the present day.
Attributes: Human Thought Exp (Gen Ed)
Equivalent(s): HIS 512G
Grade Mode: Letter Grading

HIS 590 - Historical Methods
Credits: 4
In this course, students develop and employ historical methodology appropriate to the study of events, figures, periods, and cultures of the past. Building on General Education coursework in thinking, research, and writing, the course helps to develop a historical mindset through student practice with methods and processes of the historian, in designing viable projects to explore further, and in substantive written work. The course frames key questions and concepts in the discipline and prepares students for upper-level courses in the major.
Attributes: Human Thought Exp (Gen Ed); Writing Intensive Course
Prerequisite(s): (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-).
Equivalent(s): HIS 610G
Grade Mode: Letter Grading

HIS 602 - History of New England
Credits: 4
The course is a survey of New England's history spanning a time period from the late 1600's to the present. Students will assess New England's role in the economic, political, and military history of our nation. In addition, there is a focus on local New England communities and the important historical events and forces that contributed to their development.
Attributes: Human Thought Exp (Gen Ed); Writing Intensive Course
Equivalent(s): HIS 602G
Grade Mode: Letter Grading

HIS 611 - Themes in World History
Credits: 4
This course examines the political, social, economic, and cultural forces that shaped the development of world civilizations from 1000 CE to the present. The focus of study will move beyond basic geography and historic timelines to ask questions about cultural interactions, conflict, and the varying forces that impacted world history, as well as to evaluate interpretations of the past. Using both primary and secondary sources, students will critically examine connections and patterns of history with a particular focus on globalism, multiculturalism, nationalism, and religious conflict throughout Europe, Africa, Asia, and the Americas.
Attributes: Historical Perspectives(Disc); Human Thought Exp (Gen Ed); Writing Intensive Course
Equivalent(s): HIS 611G
Grade Mode: Letter Grading

HIS 718 - History of World War II
Credits: 4
This course explores the causes and consequences of the Second World War from a global perspective. It explores the rise of nationalism and totalitarianism and the impact of colonialism. The course explores the causes of WWI and its aftermath, moves through the decade of the 20's to the Depression and the rise of fascism, to the onset of the war in Europe, Africa, and the Pacific, and finally to the peace agreements and their effect on the future of the world. In particular it looks at industrial, agricultural, and democratic developments and their impact on the war. Military mobilization, gender, race, notions of "the good war," and cultural conflict will also be studied.
Attributes: Historical Perspectives(Disc); Human Thought Exp (Gen Ed)
Equivalent(s): HIS 618G
Grade Mode: Letter Grading

HIS 727 - Vietnam War: An Historical Perspective
Credits: 4
Students will have the opportunity to examine three decades of struggle in Southeast Asia beginning with the history of French Colonial Indochina that led Communist Vietnamese revolutionaries into conflict with France, and then the United States and its Vietnamese allies. The course presents primary sources to examine the impact and significance of the war on American society and to evaluate its causes and consequences. The complexities of the lived human experiences before, during, and after the Vietnam War are studied according to a multitude of perspectives and interpretations.
Attributes: Human Thought Exp (Gen Ed)
Equivalent(s): HIS 627G
Grade Mode: Letter Grading

HIS 795 - Integrative Capstone: Internship in History
Credits: 4
This capstone course is a field-based internship designed to develop and hone the practical application skills of a History major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where history-related knowledge and skills are applied. Students will complete a substantial, evidence- based research paper or project related to their internship work. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HIS 651G
Grade Mode: Letter Grading

HIS 797 - Integrative: Project in History
Credits: 4
This capstone course for History majors is designed to integrate learning from the entire major in an individually-customized project. Students demonstrate competency in history by producing an assessment of prior historical study (historiography) and a substantive original essay based on in-depth research. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HIS 660G
Grade Mode: Letter Grading

History (HIST)

Read more about the courses within this subject prefix in the descriptions provided below.

HIST 403 - Introduction to Greek Civilization
Credits: 4
A broad historical exploration of Greek civilization. Topics include: architecture, art, law, literature, philosophy, poetry, politics, religion, society, warfare, and the Greek's legacy to the modern world. Open to all students. No prior knowledge of the ancient world assumed; all readings are in English. Ideal background for students of English, philosophy, history, Latin, Greek, the arts, music, modern languages.
Attributes: Historical Perspectives(Disc)
Equivalent(s): CLAS 403, CLAS 405
Grade Mode: Letter Grading

HIST 404 - Introduction to Roman Civilization
Credits: 4
A broad historical exploration of Roman civilization. Topics include: architecture, art, law, literature, philosophy, poetry, politics, religion, society, warfare, and their legacy to the modern worlds. Open to all students. No prior knowledge of the ancient world assumed; all readings are in English. Ideal background for students of English, philosophy, history, Latin, Greek, the arts, music, modern languages.
Attributes: Historical Perspectives(Disc)
Equivalent(s): CLAS 404, CLAS 406
Grade Mode: Letter Grading

HIST 405 - History of Early America
Credits: 4
America from the early era of European discovery through the American Civil War. Emphasizes the interaction of European, Native American, and African peoples; the separation of the English colonies from Great Britain; and the establishment and early history of the United States. Course meets the History major requirement for Group 1.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 405H, HIST 405W
Mutual Exclusion: No credit for students who have taken HIS 410.
Grade Mode: Letter Grading

HIST 405W - History of Early America
Credits: 4
America from the early era of European discovery through the American Civil War. Emphasizes the interaction of European, Native American, and African peoples; the separation of the English colonies from Great Britain; and the establishment and early history of the United States. Course meets the History major requirement for Group 1.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Equivalent(s): HIST 405, HIST 405H
Grade Mode: Letter Grading

HIST 406 - History of the Modern United States
Credits: 4
History of the United States since the mid-19th century. Political, social, and economic developments as well as relationships of the modern U.S. with other countries. Course meets the History major requirement for Group 1.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 406H, HIST 406W
Mutual Exclusion: No credit for students who have taken HIS 411.
Grade Mode: Letter Grading

HIST 410 - Historic Survey of American Civilization
Credits: 4
Topical survey, within broad chronological divisions, of the development of American civilization since 1600. Students may take the course up to two times as long as the topic for the two courses is different. Course meets the History major requirement for Group 1.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): HIST 410H
Grade Mode: Letter Grading

HIST 421 - World History to the 16th Century
Credits: 4
The global experience of human communities with special emphasis on the development of the major civilizations and their interactions. Comparisons of social, cultural, religious, and political life and the emergence of distinctive and diverse human societies are examined. Course meets the History major requirement for Group III.
Attributes: Historical Perspectives(Disc)
Mutual Exclusion: No credit for students who have taken HIS 402.
Grade Mode: Letter Grading

HIST 422 - World History in the Modern Era
Credits: 4
Emergence of major global human interactions due to the growth of major civilizations. The global context for the rise of the modern West. The rise and decline of Western global domination and the emergence of new states and changing societies throughout the world. Course meets the History major requirement for Group III.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 422H
Grade Mode: Letter Grading

HIST 425 - Foreign Cultures
Credits: 4
Introduces the culture of a particular nation or region; preparation for experiencing a foreign culture. Consult department for listing of topics. Course meets the History major requirement for Group II or III, depending on the topic.
Attributes: World Cultures(Discovery)
Equivalent(s): HIST 425H, HIST 425W
Grade Mode: Letter Grading

HIST 436 - Europe and the Modern World
Credits: 4
The course focuses on major encounters between Europe and its Global rivals from the Age of the Revolution to the rise of modern terrorism. While the topics covered will vary by instructor, all sections address the rise of Democracy, the birth of Capitalism, the apocalyptic destruction of the two World Wars, and the emergence of a diverse multi-cultural Europe in the years following World War II. Course meets the History major requirements for Group II.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 436H, HIST 436W
Grade Mode: Letter Grading

HIST 436W - Europe and the Modern World
Credits: 4
The course focuses on major encounters between Europe and its Global rivals from the Age of the Revolution to the rise of modern terrorism. While the topics covered will vary by instructor, all sections address the rise of Democracy, the birth of Capitalism, the apocalyptic destruction of the two World Wars, and the emergence of a diverse multi-cultural Europe in the years following World War II. Course meets the History major requirements for Group II.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Equivalent(s): HIST 436, HIST 436H
Grade Mode: Letter Grading

HIST 437H - Honors/The Mad Among Us: A Global History of Mental Disorder
Credits: 4
Mental disorder is a universal and persistent condition in human history. Every society has struggled to make sense of it; every society has struggled to address it. But, what is mental disorder? Is it a disease? If so, of what? The body? The brain? The soul? Is it a chemical imbalance? Genetic destiny? Is it the wage of sin? The mark of the devil? The curse of a god? Or is it a social label or cultural construct - a name slapped on thought, feeling, or behavior that defies a society's definition of "normal?" This course seeks to answer these questions by exploring the great range of beliefs human societies, ancient to modern and from across the globe, have developed to identify and define mental disorder as well as the methods they have employed to treat or contain it.
Attributes: Historical Perspectives(Disc); Honors course
Grade Mode: Letter Grading

HIST 440A - Martin Luther King, Jr., and the Struggle for Racial Justice
Credits: 4
This course examines Martin Luther King's life, philosophy, and career on the front lines of the civil rights movement. In our study of King as well as the larger black freedom struggle, we seek an understanding of how certain questions related to racial justice played out in American history. We focus on issues of civil disobedience, just and unjust laws, love and hate, violence and non-violence. Students will read many of King's famous writings such as the Letter from Birmingham Jail, as well as his lesser-known speeches - among them king's 1967 address denouncing the Vietnam War. More generally, this seminar introduces students to the rudiments of historical thinking and asks broader questions about the role of individuals in history and how social change happens. Course meets the History major requirement for Group I.
Attributes: Historical Perspectives(Disc); Honors course
Grade Mode: Letter Grading

HIST 440D - Honors/Citizens and Persons
Credits: 4
Definitions of citizenship have changed dramatically in the course of history. In this class, we will trace the evolution of expanding (and occasionally contracting) political and civil rights and responsibilities over time, with an emphasis on events in multicultural American nations and emphasizing how laws, social practices, unique historical contexts, and individuals' understanding of self and other have mutually produced each other. The course is part of the Honors Symposium "Being Human" and will engage in an interdisciplinary conversation about personhood, humanity, rights and responsibilities, and dehumanization.
Attributes: Historical Perspectives(Disc); Honors course
Grade Mode: Letter Grading

HIST 440E - Honors/Drugs and Addiction in World History
Credits: 4
As drug addiction rates in the US are reaching epidemic proportions, new solutions and perspectives are becoming increasingly important. This course teaches students how a variety of cultures, including the Aztecs, Maya, Vedic India, China, and Greco-Roman antiquity, confronted the problems of drug use and addiction in their own societies. By examining these phenomena through the lens of other culture's values, students will gain a valuable perspective by which to address these problems today.
Attributes: Honors course; World Cultures(Discovery)
Grade Mode: Letter Grading

HIST 440F - Honors/Islam, Art, and the Past
Credits: 4
While the world is all too familiar with images of ISIS using explosives and frills to destroy ancient sites and artifacts in Iraq and Syria, there has been little attention given to the dynamic role of art within past and present Islamic societies. Yet, Islam has a rich and vibrant artistic tradition, one in which ancient civilizations played and continue to play a major role. This course introduces students to Islamic art and cultural heritage through a study of Islam's engagement with past artistic traditions in the fields of architecture and the fine arts. It also addresses how the recent actions of ISIS have changed questions about cultural heritage and stewardship in the Middle East and the West. Finally, the course asks students what they can and should do to preserve cultural heritage.
Attributes: FinePerformingArts(Discovery); Honors course
Grade Mode: Letter Grading

HIST 440J - Capitalism and Inequality in World History
Credits: 4
This course introduces students to the causes of wealth inequality in the broadest possible variety of well-documented societies throughout world history, especially how capitalism causes and increases the gap between rich and poor. Ancient Greece, Rome, and China will be studied in depth, culminating in Industrial Capitalism from nineteenth-century Britain to twenty-first century US. State solutions to recurring patterns of free market profit-maximization (debt forgiveness, taxation, wealth distribution) are explored from ancient Mesopotamia to today. Cannot earn credit if credit received for HIST 690 "Rich vs. Poor: Class Welfare in World History".
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

HIST 444H - Honors/From Beijing to Baghdad: Objects along the Silk Road
Credits: 4
The Silk Road, often characterized as the world's first great superhighway, played a vital role in spreading forms of art and in developing new technologies for their production. The peoples along the Silk Road traded luxury goods such as silk and jade as well as culinary and musical traditions. Through lectures, readings, films, and podcasts we will explore the trade links between East and West and the material objects traded along the way.
Attributes: FinePerformingArts(Discovery); Honors course; Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HIST 444J - Honors/Global Citizenship: In Pursuit of Liberty
Credits: 4
What does it mean to be a global citizen? Are we? What are human rights? Are they universal? This honors discovery course will explore with the men and women who traveled and thought beyond the borders of their locality and their moment of time and who imagined themselves citizens of the world. We will start with early revolutions that traversed oceans and national borders. We'll read utopias that saw their world differently. In the end, we will investigate major global challenges of our own world. We will move backwards, but also forwards in history. We will read novels, and perform plays. We will listen to Beethoven and Berlioz, in class and discuss larger questions of our international community, from sustainability to diversity, as they echo through different disciplines. Course meets History major requirement for Group I or II.
Attributes: Historical Perspectives(Disc); Honors course; Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HIST 483 - History of World Religions
Credits: 4
Introduces the religions of the world in terms of historical development, relationship to society, belief system, central texts, and ritual practices. Begins with the religions of small and tribal societies (e.g., African, Native American), moves through religions of complex societies (e.g., Hinduism), and then studies the various traditions that emanated from ancient revelations: Zoroastrianism, Buddhism, Judaism, Christianity, Islam, and certain new forms of Christianity. Course meets History major requirement for Group III.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 483W, RS 483, RS 483W
Grade Mode: Letter Grading

HIST 497 - Explorations in Historical Perspectives
Credits: 4
In-depth exploration of a particular historical question or topic: for example, the French Revolution, Chaucer's England, or the New Deal. Students should consult with the Department of History for a list of topics and instructors. Course meets the History major requirements for Group I, II, or III, depending on the topic.
Attributes: Historical Perspectives(Disc)
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): HIST 497H, HIST 497W
Grade Mode: Letter Grading

HIST 498 - Explorations of Historical Perspectives
Credits: 4
In-depth exploration of a particular historical question or topic: for example, the French Revolution, Chaucer's England, or the New Deal. Students should consult with the Department of History for a list of topics and instructors. Course meets the History major requirements for Group I, II, or III, depending on the topic.
Attributes: Historical Perspectives(Disc)
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 500 - Introduction to Historical Thinking
Credits: 4
Basic skills essential to the study of history: critical reading of historical literature, improvement of written and oral analysis of historical material, and use of library resources. Intensive study of books and documents from varying historical fields and periods. Required of history majors; open to other interested students.
Attributes: Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HIST 501 - Medieval Military History
Credits: 4
Western societies from the Roman Empire to the emerging nation states of early modern Europe spent an enormous proportion of their surplus wealth on war. This course introduces this crucial aspect of Western history and examines the period extending from the third century AD, to just before the extensive introduction into Europe of gunpowder weapons in the fifteenth century. Discussion of not only battlefield tactics and famous generals but also the effect that war had upon society as a whole and the economic ramifications of war, the Christianization of war, and the effect of war upon literature. Course meets the History major requirements for Group II.
Grade Mode: Letter Grading

HIST 505 - African American History
Credits: 4
Explores the forced integration of the Atlantic World through the African slave trade and the development of creole cultures in America, and takes the story of Black Americans' "creative survival" and the evolution of African-American culture through the end of the Civil War. Course meets the History major requirements for Group I.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Grade Mode: Letter Grading

HIST 509 - Law in American Life
Credits: 4
Investigates the role of law in American social, political, and economic life from the European settlements to the present. Traces the development of legal institutions, but focuses on the various functions of law (e.g., in structuring social relationships, allocating resources, defining governmental authority, expressing social and moral values, and as a mechanism for control). Course meets the History major requirements for Group I.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Grade Mode: Letter Grading

HIST 511 - History of New Hampshire
Credits: 4
This course reconstructs the surprising past of the place we call New Hampshire. Beginning with the 17th -century encounter between English and Native people, it runs to the present. Literature, documents, photos and films provide access to New Hampshire's changing natural environment, its rural life, industrialization, politics and recent struggles. Course meets the History major requirements for Group I.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Grade Mode: Letter Grading

HIST 520 - History of Animals
Credits: 4
Do animals have histories? Animals have created few if any written sources. Nevertheless, relationships between humans and animals have changed dramatically from the ancient past to the present day. Humans have shaped animal lives to serve many purposes; simultaneously, animals have served as agents of change in human history. Drawing on environmental, economic, social, and cultural history, this course will focus on the history of animals as pests, pets, producers, and products.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

HIST 522 - Science in the Modern World
Credits: 4
Development of science, particularly in Europe and North America, from the 18th century to the present. Themes including Darwinism, the growth of modern physical and biological sciences and science in the contemporary world. No special science background is required. Course meets the History major requirements for Group II.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

HIST 525 - Explorations in History & Humanities
Credits: 4
In-depth exploration of a particular question or topic that illustrates the intersection of History and Culture -- particularly as it produces or shapes Humanistic engagement with the past: for example "Cultural Memory of War," "Nationalism and Identity," "The Myth of the 'Lost Cause,'" African Oral Traditions," "Representations of the Holocaust in History & Film," or "The History of Memory." Students discover that cultural representations shape historical events and that history itself produces cultural, philosophic, and ideological outcomes that profoundly affect human engagement with past and present experiences. Students should consult with the Department of History for a list of topics and instructors. Course meets History major requirements for Group I, II, or III, depending on the topic.
Attributes: Humanities(Disc)
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

HIST 532 - Modern Latin America
Credits: 4
Provides a broad overview of Latin America from the 18th century to the present. It examines the breakdown of colonial rules, the establishment of independent countries, the formation of viable nation states, the importance of geography, the roles of the different elements of society. Social, political, and economic changes and continuities emphasized to give a sense of the ambiguities of the historical process. Cultural differences illustrated with slides and music. The effects of elite rule and of United States interventions studied. Course meets the History major requirements for Group III.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Grade Mode: Letter Grading

HIST 537 - Espionage and History
Credits: 4
Introduces the history and politics of espionage and intelligence organizations from the 20th century to the present. Special attention to intelligence work among the major powers in World War I, World War II, and the Cold War. Readings include autobiographical accounts and other primary sources as well as novels. Course meets the History major requirements for Group II.
Grade Mode: Letter Grading

HIST 538 - Modern European War and Society: The Napoleonic Wars to World War II
Credits: 4
This course is organized around three conflicts: the Napoleonic Wars, World War I, and World War II. As we study them, we'll discuss the evolution and impact of total war in order to understand how societies work in wartime and how these conflicts have shaped Europe. In our exploration of each war, we examine a range of participants from international alliances to individual soldiers and to civilians involved in the conflict. Total war, by its nature, incorporates most elements of society, so we will spend time looking at the homefronts as well as the battlefronts. We will survey the conflicts as a whole, but also devote time to some special events or elements. For example, we will look at the battle of Somme during the portion of the course dedicated to World War I. We will also study some of the art that arose out of the conflict. The core of the class will be lectures, but we will engage in some discussion almost every day and there are some classes that will be dedicated to discussion. Course meets the History major requirements for Group II.
Grade Mode: Letter Grading

HIST 547 - Introduction to Russian History: Russia and the World
Credits: 4
An introductory survey of Russian history, from the 1200s to the present. Focuses on the rise and expansion of the state based in Moscow, and on the various peoples it ruled. Considers continuities and changes between Muscovy, the Russian Empire, the Soviet Union, and the Russian Federation, as well as comparisons to other contemporary states. Central themes include imperial expansion, cultural and religious diversity, war and society, and struggles for social justice and political freedom.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HUMA 547
Grade Mode: Letter Grading

HIST 555 - The Vikings!
Credits: 4
The Vikings spread terror and destruction throughout Europe. They also developed remarkable art forms, cutting edge technology, constructed new cities and kingdoms, and explored the new world 500 years before Columbus. This course will explore the identities of these fierce warriors, intrepid explorers, and farmed poets. This course fulfills history category 2.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

HIST 560 - Modern Britain
Credits: 4
This course explores Great Britain from the American Revolution to the reign of Elizabeth II. We examine Britain's unparalleled Imperial power, the vibrancy of Victorian Culture, and the devastating impact of the two World Wars, which initiated Britain's post-war decline. During the Cold War, Britain rebuilt its position through cultural exports like rock-n'-roll music, royal pomp, and the mini-skirt, but has never fully recovered its status, despite its vibrant multi-cultural allure. Course meets the History major requirements for Group II.
Grade Mode: Letter Grading

HIST 563 - Introduction to Russian Culture and Civilization
Credits: 4
Interdisciplinary course on the development of Russian culture from its origins through the end of the 19th century. Historical documents, literary works, ethnographic materials, films, slides of Russian art, and music. Course meets the History major requirements for Group II.
Attributes: World Cultures(Discovery)
Equivalent(s): RUSS 525
Grade Mode: Letter Grading

HIST 565 - Women in Modern Europe
Credits: 4
A social history of women in Europe from 1700 to the present. Examines the development of the "modern nuclear family," transformations in women's work during the industrial revolution, and women's political evolution from bread rioters to hearth tenders to petitioners. Sources include published diaries, historiographical studies, and novels. Course meets the History major requirements for Group II.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

HIST 566 - Comparative Revolutions: How to Make a Revolution in the World before Marx
Credits: 4
This course in HOW TO MAKE A REVOLUTION (if you lived more than 100 years ago) will ask why the Sea Beggars flooded Holland, the Levellers dug up the Commons, and Black Loyalists fled the independent Americans after their revolution. The class asks how slaves in Haiti defeated Napoleon's troops, utopian socialists built a railway around a cross at the center of Europe, and Marx rallied the workers of the world to unite. Course meets the History major requirements for Group II.
Attributes: World Cultures(Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HIST 571 - Modern Middle East History
Credits: 4
This course surveys the history of the Middle East (defined as the territory of the former Ottoman and Qajar Empires) from 1768 to the present. In addition to offering an overview of major political, social and economic developments, the course aims to sketch a basic picture of social and cultural life at different points. Course meets the History major requirements for Group III.
Attributes: World Cultures(Discovery)
Equivalent(s): HUMA 571
Grade Mode: Letter Grading

HIST 575 - Ancient Near East
Credits: 4
From the Neolithic revolution to the time of Alexander the Great. Rise of civilization; nature of human artistic and intellectual development in the earliest civilizations of Mesopotamia and Egypt; Judaism in its historical setting. Course meets the History major requirements for Group III.
Equivalent(s): CLAS 575
Grade Mode: Letter Grading

HIST 585 - Medieval Islam
Credits: 4
This course examines the origins and expansion of Islam and the development of the Muslim community from the time of Muhammad until the Islamic empires of the 16th century. We will address the associated geographies, artifacts, and legal formations associated with the medieval and early modern Islamic world. The course focuses on major developments in politics, religion, and the arts. Course meets the History major requirements for Group III.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

HIST 588 - History of Modern Africa: 1870 to the Present
Credits: 4
This survey course introduces students to the major forces and dynamics of change in the modern history of Africa, from the late 19th century to the present. The primary focus is on European imperialism and its aftermaths in Africa. Issues to be examined include: the scramble for and partition of Africa; resistance to colonization; the rise and fall of apartheid in Southern Africa; religion and society, music and culture, gender and sexuality, art and literature, pan-Africanism, military rule, HIV/AIDS, democratization, and nation building. Emphasis on African initiatives, and on an exploration of contemporary challenges and the major forces reshaping the history of this oldest, most diverse, and most fascinating continent. Feature films, drama skits, literary works, and guest lectures are utilized. Course meets the History major requirements for Group III.
Grade Mode: Letter Grading

HIST 595 - Explorations
Credits: 1-4
See department listings for semester topic. Course meets History major requirement for Group I, II, or III depending on the topic.
Grade Mode: Letter Grading

HIST 600 - Explorations
Credits: 4
Advanced explorations in one of the fields listed below: A) American History, B) European History, C) World History, D) Ancient History. Barring duplication of subject, may be repeated. Course meets History major requirement for Group I, II, or III depending on the topic.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

HIST 603 - European Conquest of North America
Credits: 4
European Conquest of America explores many of the major issues relating to the creation and development of colonial North America. We will focus particularly on the extraordinary heterogeneous mixture of peoples who lived in North America and the Caribbean, and on the complexity and consequences of their interactions. Throughout the semester we will continually evaluate arguments among historians about whether or not it makes sense to understand the colonial period in terms of a conquest, or whether Native Americans retained enough power and resistance throughout the colonial period to make such an interpretation inaccurate. Course meets History major requirement for Group I.
Grade Mode: Letter Grading

HIST 606 - History of the Early Republic
Credits: 4
Explores the histories of the people and institutions that transformed the new United States from a coastal republic of largely independent freeholders to a transcontinental democracy increasingly driven by class. Topics include slavery, the family, reform movements, and the formation of national identity. Course meets History major requirement for Group I.
Grade Mode: Letter Grading

HIST 609 - Special Topics in American Legal History
Credits: 4
In-depth thematic exploration of law in American life. Topics include race and equality in America; community, pluralism, and American law; property, liberty, and law; gender and law. May be repeated for credit with instructor's permission. Consult department listings of topics. Course meets History major requirement for Group I.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 611 - Civil War Era
Credits: 4
Surveys the period from the presidency of Andrew Jackson to the end of the Reconstruction. Focuses on causes, course, and consequences of the Civil War. Topics include slavery in the Old South, antebellum reform movements, creation and breakdown of the Second Party System, social and economic (as well as military) events during the war and major developments during Reconstruction after the war. Course meets History major requirement for Group I.
Grade Mode: Letter Grading

HIST 612 - Emergence of Industrial America
Credits: 4
Investigates the economic transformation of 19th-century America from a rural, agricultural society to an urban, industrial one. Explores the sweeping economic changes and focuses on such topics as change in work and leisure, westward expansion and its effects on Native Americans, shifts in gender roles, growth of a consumer culture, rise of the labor unions, Populism, immigration, reform and regulation movements, growth of American imperialism, and intellectual developments. Course meets History major requirement for Group I.
Grade Mode: Letter Grading

HIST 613 - American Ways of War
Credits: 4
"Is there an American way of war?" This commonly asked question will be the focal point of the course. To answer that we will study the interactions of both war and society in the United States from the Civil War onwards, addressing such issues as the causes, courses, diplomacy, homefront, legacy, and the art of the great and small wars. Course meets the History major requirement for Group I.
Grade Mode: Letter Grading

HIST 615 - The Rise of Modern United States, 1900-1945
Credits: 4
By 1900, the United States had emerged as the world's leading industrial power and leading destination for millions of immigrants and had begun to become a major player in world affairs. Americans enjoyed unprecedented prosperity and became eager consumers of new inventions and popular culture: cars, radios, jazz records, and the "motion pictures." But they also experienced the worst depression the country had ever known and struggled to make sense of a world that went to war twice within a generation. Women, African Americans, immigrants - all struggled to carve out their place in the new political order. By World War II, the United States assumed many of its "modern" characteristics. Using novels, movies, photographs, sporting events, political speeches and political debates, we will explore both the domestic and the international aspects of the development of modern U.S. Course meets the History requirements for Group I.
Grade Mode: Letter Grading

HIST 618 - American Environmental History
Credits: 4
Examines how nature has been a factor in American history and how Americans have wrestled with the concepts of nature and culture. Topics include industrialization, evolution, conservationism, environmentalism, and environmental diplomacy. Course meets the History major requirement for Group I.
Grade Mode: Letter Grading

HIST 619 - Foreign Relations of the United States
Credits: 4
The history of American diplomacy from the colonial era to the present, with the dividing point at 1900. The focus will be on both the foreign and domestic influences that shaped American diplomacy. Course meets the History major requirement for Group I.
Grade Mode: Letter Grading

HIST 620 - Foreign Relations of the United States
Credits: 4
The history of American diplomacy from the colonial era to the present, with the dividing point at 1900. The focus will be on both the foreign and domestic influences that shaped American diplomacy. Course meets the History major requirement for Group I.
Grade Mode: Letter Grading

HIST 621 - History of American Thought
Credits: 4
This course introduces the subfields of American intellectual and cultural history by assessing the ideas of some of the brightest minds that thought about life on the land we know of as the United States of America before the middle of the nineteenth century. This course surveys more than two centuries of thinkers and their connection to America's plural and evolving popular culture. Ultimately, this course seeks to answer the question: What is the history of American thought?.
Grade Mode: Letter Grading

HIST 632 - Latin American History: Topics
Credits: 4
Topics vary (see department listing for current semester). Seminar entails reading, discussion, and research on literature and documents related to the selected topic. Provides students with the opportunity to do research under close direction. Course meets the History major requirement for Group III.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 633 - Medieval England 800-1300
Credits: 4
This course provides students with an opportunity to gain an in-depth understanding of the history of medieval England from the beginning of the period of consolidation under the Wessex dynasty in the ninth-century through the end of the thirteenth century. In addition to obtaining a large corpus of information through the reading of a significant monographs dealing with England during this period, students will be challenged to develop the critical analytical skills necessary for the thorough understanding and practice of historical methodologies, with a particular focus on the practice of historical method in writing medieval history. Finally, students will be given the opportunity to improve their communications skills through extensive class discussions dealing with the scholarly works read for this course, and in writing assignments. Course meets the History major requirement for Group II.
Grade Mode: Letter Grading

HIST 634 - Medieval Empires
Credits: 4
This course explores the political, economic, administrative, military, religious, and intellectual foundations of imperial rule in the Middle Ages with a particular focus on the Carolingian, German, and Byzantine Empires of the early and high Middle Ages. Course meets the History Major requirements for Group II.
Grade Mode: Letter Grading

HIST 640 - Holy War in the Holy Land: The Medieval Crusades
Credits: 4
Survey of the medieval military expeditions organized by Christians to secure the Holy Land during the 12th and 13th centuries. Topics considered include the formulation of a "just war" theory; political, intellectual, religious, and military interactions between Christians, Jews, and Muslims; the Crusader State of Jerusalem; and the histories of individual crusades. Course meets the History major requirement for Group II.
Grade Mode: Letter Grading

HIST 641 - Europe after the Black Death
Credits: 4
Explores the dramatic changes that characterized Western Europe as it rebounded in the fifteenth through the seventeenth centuries from the ravages of the Black Death of 1348. Examines the social, political, and artistic developments in late medieval and Renaissance Italy before "crossing the Alps" to trace the expansion of Renaissance culture in Northern Europe. Topics include the humanist movement; new patterns of social organization; the revival of classical antiquity in the arts, architecture, religion, and political theory; the effects on European society of the encounter with the "New World"; shifting roles for men and women in early modern European societies; religious war and conflict. Course meets the History major requirement for Group II.
Grade Mode: Letter Grading

HIST 642 - Saints, Sinners, and Heretics: Europe in the Age of Religious Reform
Credits: 4
Examines the history of Western Christendom from roughly 1400 to 1600, a period of tumultuous religious change throughout Europe. We begin in the Middle Ages where the seeds of religious division were sown. We then tackle Martin Luther's challenge to the Catholic church, trace the diffusion of his message throughout Europe, and address the Catholic response to the evangelizing movements that he inspired. Finally we investigate some of the regional varieties of Protestantism that developed in the latter half of the sixteenth century with a particular focus on Switzerland, Germany, England, Scotland, France, and the Netherlands. Course meets the History major requirement for Group II.
Grade Mode: Letter Grading

HIST 654 - Topics in History of Science
Credits: 4
Advanced study of a selected topic in the history of European science since the Renaissance. Course meets the History major requirement for Group II.
Grade Mode: Letter Grading

HIST 656 - Twentieth Century Europe
Credits: 4
The Twentieth Century began with European nations at the apex of their global power. It ended with their world dominance in ruins. Two World Wars, the rise of Nazism, and communist revolutions had left Europe in the shadow of the United States. Examining European history from the birth of the automobile to the fall of the Berlin Wall, we explore the political, social and cultural forces that made the twentieth century the bloodiest epoch in world history. Course meets the History requirement for Group II.
Grade Mode: Letter Grading

HIST 665 - Themes in Women's History
Credits: 4
In-depth examination of a selected topic in women's history. Topics may include Women and Health, Women in Modern European Political Theory, Comparative History of Women and Revolution. See Time and Room Schedule of history department newsletter for the specific topic. May be repeated for credit with permission of instructor. Course meets the History requirement for Group II.
Grade Mode: Letter Grading

HIST 675 - History of Ancient Greece
Credits: 4
Discover the exciting, turbulent, and innovative world of the Greeks through their history, from the emergence of small cities in the archaic period to the empire of Alexander the Great. Special focus will be on the political, economic and social developments in the rise of the polis (city), the Persian and Peloponnesian Wars, the rise of Macedon and Alexander the Great's conquests. CLAS 403/HIST 403 is encouraged but not necessary.
Equivalent(s): CLAS 675
Grade Mode: Letter Grading

HIST 676 - Topics in Ancient Greek History
Credits: 4
Advanced historical study of a particular period or theme in ancient Greek history. May be repeated barring duplication of subject.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): CLAS 676
Grade Mode: Letter Grading

HIST 677 - History of Ancient Rome
Credits: 4
Discover the fascinating and tumultuous history of the ancient Roman world, from its small beginnings in the early Republic to the high Empire, when Rome controlled the whole Mediterranean basin. Special focus will be on the political and economic conflicts between social classes, the Punic Wars, the fall of the Republic, its transformation into a monarchy, and the golden age of imperial rule. CLAS 404/HIST 404 is encouraged but not necessary.
Equivalent(s): CLAS 677
Grade Mode: Letter Grading

HIST 678 - Topics in Ancient Roman History
Credits: 4
Advanced historical study of a particular period or theme in ancient Roman history. May be repeated barring duplication of subject.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Equivalent(s): CLAS 678
Grade Mode: Letter Grading

HIST 690 - Seminar: Historical Expl
Credits: 4
Seminar in one of the fields listed below: A) American History, B) Atlantic History, C) Canadian History, D) Latin American History, E) Medieval History, F) European History, G) History of Islam, H) Ancient History, I) East Asian History, J) African History, K) Middle Eastern History, L) Historiography, M) Russian History, N) World History, O) British History, P) New Hampshire History, Q) Historical Methodology, R) Irish History, S) History of Science, T) Maritime History, U) Museum Studies. Course meets the History requirements for Group I, II, or III, depending on the topic. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): HIST 701
Grade Mode: Letter Grading

HIST 691 - Internship
Credits: 1-4
Supervised internship with a governmental agency, private corporation, philanthropic institution, library, archives, museum, historical society, or other institution seeking individuals interested in historical research.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Credit/Fail Grading

HIST 695 - Independent Study
Credits: 1-4
A) Early American History, B) American National History, C) Canada, D) Latin America, E) Medieval History, F) Early Modern Europe, G) Modern European History, H) Ancient History, I) East Asia, J) Near East and Africa, K) European Historiography, L) American Historiography, M) Russia, N) World History, O) English History, P) New Hampshire History, Q) Historical Methodology, R) Irish History, S) History of Science, T) Maritime, U) Museum Studies. For students showing a special aptitude in history who desire to study an area or subject for which no appropriate course is offered.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 698 - Internship in Museum Studies
Credits: 4
Supervised position with a museum, historical society, archive, or other history related site.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Credit/Fail Grading

HIST 771 - Museum Studies
Credits: 4
Introduction to theory, methods, and practice of museum studies. Examination of various museum functions, as well as contemporary historical controversies. May be repeated with departmental approval.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 772 - Studies in Regional Material Culture
Credits: 4
Introduces the theory and methodology of material culture, that is, the study of history through the analysis of buildings, human-created landscapes, and artifacts made and used in the United States, particularly in New England. May be repeated for credit with permission of undergraduate adviser. Course meets the History major requirements for Group I.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 774 - Historiography
Credits: 4
Analysis of ancient and modern historians. Open to undergraduates with permission. (Not offered every year.)
Grade Mode: Letter Grading

HIST 797 - Colloquium
Credits: 4
Selected topics in American, European, and non-Western history. Required of history majors. Students must elect section in the department office at the time of registration. Course meets the History major requirements for Group I, II, or III, depending on the topic.
Attributes: Writing Intensive Course
Prerequisite(s): HIST 500 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HIST 799 - Senior Thesis
Credits: 4
Supervised research leading to the presentation of a major research paper. Permission of department chairperson required. May not be used as a substitute for the required senior colloquium.
Grade Mode: Letter Grading

Homeland Security (HLS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HLS 410 - Introduction to Homeland Security
Credits: 4
The primary focus of HLS 410 is to describe the entirety of the homeland security enterprise in the US and to survey many of the major expressions of it, which can become careers in security. This includes a history of homeland security and emergency management disciplines, and the law and policy underpinnings for homeland security and specific units in emergency management, terrorism, intelligence, law and policy, critical infrastructure and risk analysis, corporate security, environmental/human security and cybersecurity.
Grade Mode: Letter Grading

HLS 415 - Fundamentals of Corporate Security
Credits: 4
HLS 415 will introduce the student to the fundamentals of corporate security including the nature, scope, history, and essential elements of organization (or enterprise) security in the workplace, with emphasis on the private sector. Specific areas include the operational aspects of security strategies for identifying and controlling security exposures, risk management strategies, applicable legal issues, personal protection, property protection, role of intelligence, and concepts of disaster planning and management.
Grade Mode: Letter Grading

HLS 455 - Introduction to Cybersecurity
Credits: 4
The primary focus of HLS 455 is to provide a survey of the broad field of cybersecurity and information security/assurance. Topics will include a definition of information security, the need for information security and cybersecurity in both the public and private sectors, ethical and legal issues revolving around cybersecurity, risk management and planning, and information/cyber security technology. The role of the U.S. Department of Homeland Security (DHS) in securing the cyberspace and the nation's information-related infrastructures will also be explored.
Grade Mode: Letter Grading

HLS 480 - Professional Skills in Homeland Security
Credits: 4
HLS 480 prepares students to effectively enter the workforce via an internship or co-op experience. Students learn to prepare a resume and cover letter, practice interviewing, learn about how their personality matches job descriptions, search for internships, and develop an e-Portfolio that describes themselves, their professional aspirations, skills, etc. Professional ethics, decision making, organizational power, basic leadership and management principles and professionalism are discussed and illustrated.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

HLS 505 - Political Violence and Terrorism
Credits: 4
This course provides an interdisciplinary approach to the study of political violence and terrorism. The class includes inquiry into the theories and justifications for political violence of all types, limited war, asymmetric warfare and the contested term terrorism. Trends and reasons for contemporary violent political extremism as a phenomenon are particularly explored from both the U.S. domestic and international perspectives. Students are introduced to the ideologies, goals, and strategies of select organizations and broader extremist movements.
Attributes: Social Science (Discovery)
Equivalent(s): PS 505
Grade Mode: Letter Grading

HLS 510 - Fundamentals of Emergency Management
Credits: 4
This course includes a thorough coverage of the historical and statutory background of emergency management (EM) in the USA as well as the significant laws and policies that have defined and shaped the field, including HSPD 5, HSPD 8, the National Flood Insurance Act, and the Stafford Act. Topics include detailed coverage of FEMA's all hazards approach, the EM cycle, integrated EM, the incident command system, the National Incident Management System, emergency support functions, and risk communications and the homeland security exercise evaluation program (HSEEP) where students are introduced to the both discussion and operations-based exercises and strategies for evaluating exercises. This course culminates with each student writing and formally presenting an integrated emergency management plan.
Prerequisite(s): HLS 410 with a minimum grade of D- and HLS 415 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 515 - Critical Infrastructure Security and Resilience
Credits: 4
This course includes an introduction to critical infrastructure security, resilience, and risk analysis as it is conceptualized, regulated and used in the homeland security enterprise. Topics include the history and evolution of critical infrastructure protection including the composition, characteristics and risks to critical infrastructures. Public-private partnerships and sector-specific plans are examined. Resilience in a global context and risk analysis as a means by which resources and assets are allocated to critical infrastructure(s) is presented.
Prerequisite(s): HLS 410 with a minimum grade of D- and HLS 415 with a minimum grade of D- and HLS 455 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 520 - Homeland Security Law and Policy
Credits: 4
This course is an overview of key legal, policy, and ethical issues in the context of Homeland Security policy and practice. Students examine legal concepts regarding constitutional rights of individuals, legal process, access to courts, the law of war, and national security principles as they relate to homeland security legislation and policy initiatives. Legal principles of due process, habeas corpus, search and seizure. Compulsory process, and international agreements are explored in greater depth. The law of war will be examined in the context of preemptive war and the current National Security Strategy, the status of combatants and detention, Elements of national security law, intelligence collection and sharing, the Patriot Act, and military-civilian relations, etc.
Prerequisite(s): HLS 410 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 540 - Prevention and Detection of Fraud
Credits: 4
Fraud detection and prevention are a perpetual concern for organizations, individuals and society. Course topics include fraud causes and behaviors of fraudsters, the fraud triangle, criminal and civil fraud, red flags, financial statement fraud, procurement fraud, bribery, pyramid schemes, money laundering, corporate governance, fraud risk management and responses. Real-world fraud schemes are explored and discussed. Required course for minor in Forensic Accounting. May not be repeated for credit if taken as BUS 460.
Equivalent(s): BUS 460
Grade Mode: Letter Grading

HLS 550 - History and Structure of the U.S. Intelligence Community
Credits: 4
National security intelligence is a secret nation-state activity to understand or influence an adversarial entity. The United States has a unique Intelligence Community (IC) of 17 organizations that support policymakers. How did the IC develop? How does each component support its mission? This class provides students with an introduction to the history and structure of the United State IC with a focus on the events and policy that shaped its development.
Grade Mode: Letter Grading

HLS 555 - Comparative Homeland Security Systems
Credits: 4
This course will encourage students to become cosmopolitan citizens by gaining knowledge and understanding of cultures other than those of the United States. Students will learn to recognize others' values and, ultimately, accept the many ways in which we all are human. For example, using the Irish struggle for independence from Britain and the Troubles as examples, students will examine Anglo and Irish "culture" and how it is influenced by or how it can influence nation-state security, or conversely, the fight for civil liberties and independence. The main systems and structures in both the US and the UK's domestic security enterprises will be discussed as well as the origins, typologies and goals of several terrorist groups, the basics of the intelligence community in both nations, and how intelligence informs the struggle to contain terrorism. In addition, for homeland security majors, this course can satisfy either the terrorism requirement or the intelligence systems requirement (see instructors). Although a major objective of the course is to prepare students to participate successfully in a managed study abroad program (as a separate course: HLS 656, 1 credit), participation in the study abroad trip is a not required component of this course.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

HLS 580 - Environmental and Human Security
Credits: 4
Students will learn how environmental issues may give rise to socio-political instability around the world which can become threats to US national/homeland security. This course will explore how U.S. domestic and foreign policy, and ultimately, U.S. national security, can be impacted by emergent threats to nations from environmental health issues, climate change, deforestation, infrastructure vulnerabilities, and natural resource shortages caused by rapid industrialization, population growth, and urbanization in less developed countries. In a seminar format, students and faculty will cover a variety of readings and discuss their conclusions and students will have the opportunity to lead class discussions on assigned readings.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

HLS 595 - Independent Study in Homeland Security
Credits: 1-4
This course is an independent study in homeland security. Its main function will be to allow students to complete a 500 level homeland security course required in the major, but who are not able to take the required course when it is offered. HLS 595 can substitute for the required core course. In addition, students can also take HLS 595 as a sophomore level independent study as a variable credit course for students wanting to more deeply explore an area of interest.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

HLS 605 - Disaster Research Methods
Credits: 4
This course offers an overview of various research methodologies and approaches used in emergency and disaster management. Topics include but are not limited to, different aspects of research methods, such as theory, research designs, measurement, validity, reliability, data collection techniques, and ethical considerations. Students will design and draft a research proposal using appropriate research methods to investigate critical research questions.
Prerequisite(s): ENGL 401 with a minimum grade of C- and HLS 510 with a minimum grade of C-.
Grade Mode: Letter Grading

HLS 615 - Introduction to Fraud Investigation
Credits: 4
Fraud Investigation is a specific process including acquisition and verification of information that could lead to the confirmation of fraudulent activity and legal consequences. Course topics include various steps in the fraud investigation process, including identification of fraud, planning an investigation, interviewing, gathering of public and non-public evidence, analysis of data, legal considerations, confidentiality, and writing a fraud examination report. Real-world fraud cases are discussed and analyzed. Required course for minor in Forensic Accounting.
Grade Mode: Letter Grading

HLS 630 - Sports and Large Event Security Management
Credits: 4
This course will address the nature and scope of sport and large event security issues involved in securing the homeland from domestic and international threats to sports and other large events. Motives, methods, and impact of terrorism activity, natural disasters, and crowd management issues in sport and large event venues will be discussed. This course also includes an examination of the basic legislation and operations of the U.S. Department of Homeland Security; risk assessment; security planning options; emergency response and recovery, training and exercises.
Prerequisite(s): HLS 410 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 640 - Forensic Accounting
Credits: 4
Forensic accounting procedures uncover fraudulent schemes and misappropriation of assets. Course topics include review of the basics of financial accounting, Sarbanes-Oxley legislation, the forensic accounting profession, occupational fraud, financial analysis techniques, money laundering, investigative and interviewing processes, evidence gathering, inferential analysis, and documentation and presentation of the case. Real-life fraud cases solved by forensic accounting skills are analyzed. Required course for minor in Forensic Accounting.
Prerequisite(s): BUS 532 with a minimum grade of D- or ADMN 502 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 650 - Topics in National Security Intelligence
Credits: 4
What is national security intelligence? In this course students are introduced to definitions of intelligence and how they vary according to the entity employing the definition. Students learn about national security intelligence concepts including collection, analysis, counterintelligence, and covert action. Student will explore the organization and mission of the United States Intelligence Community, state and local intelligence agencies, and their role in Homeland Security.
Prerequisite(s): HLS 410 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 651 - Issues in Intelligence Collection
Credits: 4
The primary focus of this course is to develop an understanding of intelligence collection in the US and foreign nations, the issues facing intelligence collection and a survey of the various forms of collection. Students will learn the role collection plays in the intelligence community, how various policies affect collection and how different agencies monitor and collect intelligence.
Prerequisite(s): HLS 650 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 652 - Intelligence Analysis and Production
Credits: 4
National security intelligence analysis is a process of transforming collected data into useable and often actionable products. In this class students will focus on the analysis phase of the intelligence cycle and its relationships with decision maker requirements, intelligence community planning, collection, and dissemination. A primary goal of this class is to increase students' capacity for critical thinking when conducting analytical activities.
Prerequisite(s): HLS 650 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 653 - Counterintelligence
Credits: 4
Media articles often include depictions of captured spies, criminals, and faceless cyber-attacks. What process is used to identify and defend against these threats? Counterintelligence plays a key role in defending a country or organization from other nation states intelligence services and other nontraditional threats. In this course students will learn about counterintelligence as a phenomenon and critically examine the activities undertaken by counterintelligence organizations.
Grade Mode: Letter Grading

HLS 654 - Covert Action
Credits: 4
On January 3, 2020 the Iranian Revolutionary Guards Corp leader Qasem Soleimani was killed in Iraq by a United States drone strike. Was this event covert action? In this class students will explore covert action and how it is used by nation states to achieve their foreign policy objectives.
Grade Mode: Letter Grading

HLS 655 - Open Source Intelligence
Credits: 4
Open Source Intelligence (OSINT) plays a critical role in national security intelligence. Open sources are defined as those that are publicly available. In this course students will explore and analyze OSINT intelligence from publications, broadcasts, digital media, geographic, and other technical data.
Grade Mode: Letter Grading

HLS 656 - Comparative Homeland Security Systems Lab
Credits: 1
The study abroad component of its prerequisite course, HLS 555. Students participate in a study abroad program designed and led by UNH faculty.
Prerequisite(s): HLS 555 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

HLS 665 - Bioterrorism, Biosecurity, and Biodefense
Credits: 4
This course examines biowarfare, including biological, chemical, and radiological weapons. Historical, plausible, and novel weapons will be studied. Mechanisms of action, biological and societal impacts, detection, treatment and governmental strategies for biodefense will be investigated. Discussions will focus on surveillance and preparedness at the state and federal levels. Relevant aspects of the law will be presented and the bioethical challenges of anti-bioterror research will be explored.
Prerequisite(s): HLS 410 with a minimum grade of D- or BMS 503 with a minimum grade of D-.
Equivalent(s): BSCI 665
Grade Mode: Letter Grading

HLS 695 - Independent Study in Homeland Security
Credits: 1-4
This course is an independent study in homeland security. Its main function will be to allow students to complete a 600 level homeland security course required in the major, but who are not able to take the required course when it is offered. HLS 695 can substitute for the required core course. In addition, students can also take this course as a junior level independent study as a variable credit course for students wanting to more deeply explore an area of interest.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

HLS 750 - Emergent Topics in Homeland Security/Homeland Defense
Credits: 4
This listing features newly introduced or specialized courses. These courses offer a concentrated exploration of a specific topic, such as a particular security risk, policy issue, theoretical approach, or methodological technique.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

HLS 760 - Strategic Planning and Decision Making
Credits: 4
This course investigates the nature of strategic planning as it relates to homeland security and national security in the U.S. Students explore how strategic planning relates to decision making in more stable as well as uncertain environments. Relevant legislation and past decisions (such as the Bay of Pigs and the Cuban Missile Crisis) are explored including concepts and techniques from making high quality decisions. Strategic communication principles and techniques are presented.
Attributes: Writing Intensive Course
Prerequisite(s): HLS 510 with a minimum grade of D- and HLS 515 with a minimum grade of D-.
Grade Mode: Letter Grading

HLS 770 - Internship in Homeland Security
Credits: 4
This course represents the professional work experience required in the homeland security major. Students work in a professional setting for a minimum of 180 hours under the supervision of a site supervisor. All internships require students to identify and complete work on a specific project (s) approved by the HLS coordinator. Internships may be taken at any time after students have completed HLS 480. Note that students who are academically or otherwise unable to enter into internship must take HLS 799 (thesis in homeland security which requires senior standing and permission from the HLS program coordinator).
Prerequisite(s): HLS 480 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 20 credits. May be repeated up to 5 times.
Grade Mode: Credit/Fail Grading

HLS 790 - Capstone in Homeland Security
Credits: 4
This course allows students to work collaboratively with an organization to identify and solve a homeland security, physical security, safety, cybersecurity or emergency management challenges. Each group performs a risk assessment in order to identify their client's primary security or preparedness challenges. Students then use their skill to identify and apply best practices as countermeasures. Students culminate their projects with presentations to their classmates and to their clients. The expectation of this class is to develop a professional example of the student's thinking and writing to solve real world security problems.
Attributes: Writing Intensive Course
Prerequisite(s): HLS 760 with a minimum grade of C-.
Grade Mode: Letter Grading

HLS 795 - Independent Study in Homeland Security
Credits: 1-4
This course is an independent study in homeland security. Its main function will be to allow students to complete a 700 level homeland security course required in the major, but who are not able to take the required course when it is offered. HLS 795 can substitute for the required core course. In addition, students can also take this course as a senior level independent study as a variable credit course for students wanting to more deeply explore an area of interest.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

HLS 799 - Senior Thesis in Homeland Security
Credits: 4
Students work under the direction of a faculty thesis advisor to plan and carry out independent research resulting in an oral presentation and a major research paper. Research projects should include the development of a research thesis/question, a literature review, analysis, and synthesis of relevant data/sources, discussion and interpretation and presentation of results. Senior Thesis can be used to substitute for Internship in HLS. Permission by HLS program coordinator required, open only to HLS seniors.
Attributes: Writing Intensive Course
Prerequisite(s): HLS 510 with a minimum grade of D- and HLS 515 with a minimum grade of D- and HLS 650 with a minimum grade of D- and HLS 760 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Honors (HON)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HON 500H - Special Topics in Honors
Credits: 1-4
This course provides Honors students an opportunity to take a deep dive into a topic selected by the instructor(s). Students participate in active class discussions and hands-on learning.
Attributes: Honors course
Repeat Rule: May be repeated up to 4 times.
Equivalent(s): HONR 500
Grade Mode: Credit/Fail Grading

HON 799H - Honors Thesis Completion
Credits: 1-4
This course supports students in any major who are writing an Honors Thesis. Students will work with the professor to establish thesis expectations, process, and due dates.
Attributes: Honors course
Repeat Rule: May be repeated up to 2 times.
Equivalent(s): HONR 799H
Grade Mode: Letter Grading

Horticultural Technology (HT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

No courses are currently active in the course inventory for this subject prefix.

Hospitality Management (HMGT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HMGT 401 - Introduction to the Hospitality and Tourism Industry
Credits: 4
Review the broad spectrum of the hospitality industry from an historical perspective, in concert with current history, trends, and challenges presented by notable industry executives. Distinguished guests represent all segments of the hospitality industry plus selected allied support businesses. Industry segments include, but are not limited to, hotels and lodging, restaurant and food service, travel and tourism, conferences and conventions, casinos and gaming, clubs and resorts, health care and senior living, franchising and entrepreneurship, and technology support.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

HMGT 405 - Introduction to Food and Service Management
Credits: 0 or 4
This course is designed to build knowledge and experience in food and service management. Basic principles of foodservice management and their application to menu development, food safety, procurement, equipment usage and identification, customer service, marketing, leadership, human resources, and finance are covered during this course. Laboratory experience in both front and back of the house will provide hands-on experience in basic understanding of how a kitchen operates and dining room service. Training in Safe Food Handling, and Alcohol Services leads to Certification.
Grade Mode: Letter Grading

HMGT 554 - Lodging Operations Management
Credits: 0 or 4
The course is designed to introduce the operational aspects of hotel and resorts as well as discuss current trends of the lodging industry, hotel organization, reservations, registration, guest services and communications, hotel security, front office accounting, housekeeping, night audit, planning for operations, sales techniques, revenue management, and human resources management. To achieve the learning objectives, lectures, labs, e-learning course, guest lectures, and individual assignments are employed. Training in hotel analytics leads to CHIA Certification.
Prerequisite(s): HMGT 401 (may be taken concurrently) with a minimum grade of C-.
Equivalent(s): HMGT 654
Grade Mode: Letter Grading

HMGT 570 - International Food and Culture
Credits: 0 or 4
This course explores multiple world cultures using food, language, religion, geography, communication, politics, among other attributes, and compares/contrasts with our own diverse cultures here in the United States. Learn why we eat what we eat, when, and how. Food is a critical component across the world's many different cultures and this course will investigate how they are viewed by persons of different backgrounds. The course will leave you with an expanded understanding and appreciation of why and how persons from diverse cultures with varying backgrounds approach their food and beverage needs differently. Laboratory experience in cooking international cuisine.
Attributes: World Cultures(Discovery); Inquiry (Discovery)
Equivalent(s): HMGT 670
Grade Mode: Letter Grading

HMGT 601 - Management of Customer Services and Experiences
Credits: 0 or 4
The course Management of Customer Services and Experiences Serves as the introduction into the Option Hospitality Management off the BSBA Program at Paul College, UNH. This course is designed to integrate fundamental management principles and techniques in service management, related consumer behavior and experiences. The course touches upon all aspects of service operations and management including service design, service operations, service management and customer behavior. The course will integrate service forecasting techniques, (online) marketing and sales, production delivery systems, service encounters, technology, purchasing, inventory management, human resources, scheduling, productivity and quality issues and its management. In addition to sanitation and safety, product planning, costing, and customer service delivery. Microcredentials may be offered.
Grade Mode: Letter Grading

HMGT 618 - Uniform Systems for the Hospitality Industry
Credits: 4
Following a review of financial statements and an introduction to the Uniform System of Accounts for Hotels and Restaurants, students learn specific applications of managerial accounting and decision support systems for the hospitality industry. Topics include cash flow analysis, cost management, cost-volume-profit analysis, pricing models, budgeting, and forecasting. Students develop an understanding of computer software and back-and front-office computer systems as they relate specifically to the hospitality industry. Lectures, computer exercises, and papers.
Prerequisite(s): ADMN 502 with a minimum grade of C-.
Grade Mode: Letter Grading

HMGT 635 - Leadership and HR Management in Hospitality and Tourism
Credits: 4
The focal point of this class is the intersection between Strategic Organizational Management, Leadership and Human Resources Management in hospitality, events and tourism. To develop the student's understanding of this domain, we will employ a series of readings, case studies, and team presentations that will study people, organizations, and the HR function. As a result of this class, students should develop a robust understanding about the vital role that people – human capital, transactional and transformational Human Resource Management, and good HR strategy play in an service organization's future success. Despite the breadth of our focus, we shall endeavor to maintain the perspective of the Senior HR professional throughout the course.
In addition, students should discover that effective strategic HR Management is not easily carried out and that significant barriers exist that can cause firms to fall short of their higher-orders of achievement.
Attributes: Writing Intensive Course
Equivalent(s): RMP 661
Grade Mode: Letter Grading

HMGT 655 - Hospitality Finance and Development
Credits: 4
Finance and Asset Management are subjects of critical importance to the successful launch, management, and expansion of hotel and hospitality enterprises, and real estate ventures. Hotel Property Development and Asset Management entails the study of the fundamental concepts of financial management and how they apply to the development of hospitality and real estate businesses. The topics will be taught by lecture presentations, case study analysis, investigation of current industry activities, a semester-long team project, and required readings and assignments from the course textbook and other materials.
Grade Mode: Letter Grading

HMGT 661 - Event Design, Planning, and Management
Credits: 4
Strategic and logistical considerations in managing the planning, development, marketing, and implementation of meetings, conventions, and events.
Grade Mode: Letter Grading

HMGT 667 - Advanced Food & Beverage Operations & Event Management
Credits: 0 or 4
A project management course integrating advanced management principles and techniques in the presentation of a large-scale gourmet dining event. This class examines services & operational management protocols: planning, forecasting and budgeting, marketing and sales, meal plan preparation, production, execution and delivery systems, service encounters, technology, purchasing and inventory management, human resources, scheduling, productivity and quality issues, HR and risk management.
Grade Mode: Letter Grading

HMGT 681 - Contemporary Resort Development and Management
Credits: 4
The course is designed to introduce the management of hotels, resorts and destinations as units of how tourism and hospitality is structured. It focusses on development, operations and management as underlying concepts. In a classic hotel setting, hotel development and management can be treated as two separate entities. However, resorts focus not only on the convenience and service needs of guest, but also on their leisure needs. Hence resort development and management is a guest experience focused ongoing activity. The concept of destinations is an very important one and an aggregation of many players (hotels, resorts, etc.) in an industrial and geographical meaning as well as a brand. Topics discussed in the class include overview, concept, history and current trends of the industry, planning and development, major recreational activities and facilities, management, and risk management, marketing and branding, as well as planning, stakeholder policy and sustainability issues. The course applies global case studies and lots of practical management exposure.
Attributes: Writing Intensive Course
Equivalent(s): HMGT 681W
Grade Mode: Letter Grading

HMGT 695 - Independent Analysis
Credits: 2-12
Study and research project for honor students to advance knowledge in lodging and food services fields.
Equivalent(s): HMGT 695W
Grade Mode: Letter Grading

HMGT 696 - Supervised Student Teaching Experience
Credits: 1-8
Participants are expected to perform such functions as attending classes, leading discussion groups, assisting faculty, presenting information in undergraduate courses that they have successfully completed, holding office hours, grading papers and exams. Enrollment is limited to juniors and seniors who have had above average GPAs.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

HMGT 698 - Topics
Credits: 1-4
Special topics and current developments in Hospitality, Franchising and Service Management. Course may be repeated when topics change.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

HMGT 758 - Revenue Management: The Art of Pricing
Credits: 4
Revenue management has become an increasingly popular subject in many businesses, particularly in the service sector. This course will help students to learn more about formulating tactics and strategies to maximize revenues for organizations. The overall objective of this course is to provide students with the know-how and tools to make pricing decisions that align with the firm's strategy, drive profitability, and lead to sustainable competitive advantage. This course focuses on thoroughly understanding and articulating the monetary and psychological value drivers of the firm's value proposition, applying appropriate monetary equivalents, and successfully communicating these to the purchaser. Rather than seeking to "optimize" prices for the short run, this course takes a longer-term view of managing markets strategically. This course thoroughly examines the role of pricing in each element of the marketing mix, considering the source of volume, segmentation, targeting, and positioning, and shows how pricing can be used to align the elements of strategy and execution.
Grade Mode: Letter Grading

HMGT 771 - International Wine and Beverage
Credits: 4
Explore the wide world of wine, beer and spirits, through lectures, sensory evaluations, and in-class tasting exercises. Also learn about how to purchase, store, and serve different beverages. Enrolled students must be at least 21 years old.
Grade Mode: Letter Grading
Special Fee: Yes

HMGT 775 - Modern Operations and Innovations in Hospitality and Tourism
Credits: 4
Capstone course for the Hospitality Management Option, interrelating and applying strategic management and innovation concepts to hospitality and service organizations. Cases from hotel companies, restaurant chains, and other tourism or service-related businesses, supplemented by economic and other published information from the industry, are used as departure points for class discussion. Students will apply knowledge gained in the course in a simulated hospitality environment. This course presents the principles of organization, management and decision models applied to the tasks and challenges of hospitality operations. The class involves developing an understanding of the techniques of problem solving (including planning, organizing, staffing, communication, directing and controlling operations). Students will analyze various types of industry data and make strategic inferences based upon that analysis and based on a comprehensive understanding of bench marking and performance reports. Students are offered to receive the designation of Certified Hotel Industry Analyst (CHIA).
Grade Mode: Letter Grading

HMGT 777 - Casino Management
Credits: 4
Examines the history of the gaming industry and the development, organization and management of casinos. Investigates economics, moral and social issues of gaming including problem gambling. Covers gaming regulations, accounting and taxation of casinos, casino marketing, national and international gaming destinations, game probabilities and the interaction of the casino department with other divisions of mega casino resorts including lodging, food and beverage and meetings and conventions. A central focus will be on current trends and events. A field trip to a casino resort is required for those enrolled students at least 21 years old on the day the trip is scheduled.
Mutual Exclusion: No credit for students who have taken HMGT 777J.
Grade Mode: Letter Grading

HMGT 795 - Internship II
Credits: 1-4
Off-campus work in the hospitality industry for on-the-job skill development. Normally supervision is provided by a qualified individual in the organization with frequent consultation by the faculty sponsor. Initial sponsorship of an Hospitality Management faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College juniors and seniors with 3.0 or better cumulative GPA.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Credit/Fail Grading

HMGT 798 - Topics
Credits: 4
Special Topics.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

HMGT 799 - Honors Thesis/Project
Credits: 4-8
Supervised research leading to the completion of an honors thesis or project; required for graduation from the honors program in hospitality management.
Attributes: Honors course; Writing Intensive Course
Grade Mode: Letter Grading

Hotel, Restaurant, Travel (HRT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HRT 600 - Hotel and Restaurant Management
Credits: 4
This course considers the analysis of theories, principles, and techniques of successful hotel and restaurant management. Common issues associated with hotel and restaurant management are emphasized with the goal of enhancing students' ability to diagnose and address diverse problems and implement effective service strategies in a hospitality setting. Topics may include: the principles of organizing, the formulation of goals and objectives, decision-making processes, staffing, employee/guest relations, and labor management negotiations.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): HRT 600G
Grade Mode: Letter Grading

HRT 601 - Food Service Systems and Control
Credits: 4
This course covers the systems and techniques appropriate to manage food, beverage, and labor costs in food service operations. Topics may include: management, marketing, menu development, costs and pricing, quality assurance, production, and operational analysis. Students develop case studies that apply best practices in food service management. Students may evaluate evidence-based sales techniques and procedures and propose strategies to promote a food service operation, including marketing, public relations, and entrepreneurship.
Prerequisite(s): HRT 600 with a minimum grade of D- or HRT 600G with a minimum grade of D-.
Equivalent(s): HRT 601G
Grade Mode: Letter Grading

HRT 635 - Leadership and Sustainable Tourism
Credits: 4
This course provides a comprehensive introduction to the nature and scope of leadership and sustainable tourism planning at the local, regional, and national levels. Topics addressed may include: distinguishing between leading and managing, understanding systems and change leadership as well as the economic, social, environmental, and policy considerations within the sustainable development framework. Students may discuss competencies required for leading, planning, and development guidelines in different geographical areas. Students may illustrate how diversity, systems leadership, change leadership and conflict resolution promotes effective organizational management.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): HRT 602G
Grade Mode: Letter Grading

HRT 660 - Event, Meeting, and Conference Management
Credits: 4
This course explores strategies to develop meaningful and well-organized conferences, meetings, and special events. The course addresses but is not limited to event logistics such as: client management, facilities management, compliance with ADA and other laws and regulations, contract negotiation, labor planning, standards for food and beverage management, meeting/organization agendas, transportation, schedule of events, break-out sessions, leisure activities, finances, and evaluations. Students may develop case studies that apply best practices in event management.
Prerequisite(s): HRT 600 with a minimum grade of D- or HRT 600G with a minimum grade of D-.
Equivalent(s): HRT 603G
Grade Mode: Letter Grading

HRT 680 - Revenue Management in the Hospitality Industry
Credits: 4
Students in this course will explore the strategies for realizing revenue in a complex hospitality environment. Case studies and real-world examples may be used to understand how, where, and when opportunities arise for maximizing revenue generation. While topics may vary, this course focuses primarily on the lodging, food and beverage, event, and leisure/recreation components of resort operations. Students will explore the historical role of revenue management as well as the current and future trends that operators are employing. This course focuses on both proactive and reactive strategies to address real-time changes within the industry.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (HRT 600 with a minimum grade of D- or HRT 600G with a minimum grade of D-).
Equivalent(s): HRT 607G
Grade Mode: Letter Grading

Human Development & Family Studies (HDFS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HDFS 525 - Human Development
Credits: 0 or 4
This course provides an overview of human development from conception through death with an emphasis on the contexts in which development occurs, and a focus on thinking about ways to enhance the lives of individuals and families across the lifespan. The knowledge gained in this course will allow students to understand the needs of individuals across all life stages, and critically reflect on their own development.
Attributes: Social Science (Discovery)
Equivalent(s): FS 525, FS 525H, HDFS 525H
Grade Mode: Letter Grading

HDFS 545 - Intimate Relationships and Families
Credits: 4
This course provides students with an overview of contemporary research and theory on intimate and family relationships. An historical overview of marriage, intimate partnering, and the family will be covered while also exploring diverse experiences. Emphasis will be placed on the cultural, societal, and political norms and tensions surrounding intimate and family relationships and related public policy. Students will also have an opportunity to reflect on their own attitudes, thoughts, and values.
Attributes: Social Science (Discovery)
Equivalent(s): FS 545, FS 645
Grade Mode: Letter Grading

HDFS 553 - Personal and Family Finance for Family Life Professionals
Credits: 4
This course focuses on applied financial management emphasizing teaching financial issues to a variety of audiences. Topics include savings, credit, insurance and retirement, and programs and resources available to facilitate financial education.
Equivalent(s): FS 553
Grade Mode: Letter Grading

HDFS 555 - Research Methods in HDFS
Credits: 4
This course is an introduction to research methods as used in Human Development and Family Studies to provide students with a foundational understanding of how to design, implement, complete, and evaluate research studies. The research process will be emphasized, including review and application of current research literature, generating research questions, formulation of hypotheses, conceptual and operational definitions, measurement, sample selection, quantitative and qualitative analyses, designing and interpreting research designs, and understanding ethical responsibilities in research.
Grade Mode: Letter Grading

HDFS 565 - Introduction to Child Life
Credits: 4
This course provides an introduction to the theory and practice of the child life profession and family centered care. Child life professionals work with children and adolescents facing acute, chronic, or life-threatening illness and traumatic injuries, and their families. Topics include children's emotional reactions to hospitalization, use of play, preparation for medical procedures, family support, and designing healing environments.
Equivalent(s): SW 565
Grade Mode: Letter Grading

HDFS 586 - Families at Risk
Credits: 4
This course is designed to look at the challenging biological, cultural and situational factors that affect the contemporary family. Concerns such as immigration, terrorism, disease, and media influences will be discussed, along with global problems of climate change, war, violence, alcohol and drug abuse, and economic change. This class is about how families cope with the stress associated with these challenges, but also how they adapt, how to promote resilience, and how families can thrive in the face of adversity. Students will explore remedies, solutions and support networks that help families in crisis.
Prerequisite(s): HDFS 545 with a minimum grade of D-.
Equivalent(s): FS 586
Grade Mode: Letter Grading

HDFS 590 - Learning Through Play
Credits: 4
This class will focus on theories and stages of play, developmentally appropriate play activities, and examine the role of the teacher/child life specialist in creating an environment which promotes learning through play.
Grade Mode: Letter Grading

HDFS 610 - Introduction to Marriage and Family Therapy
Credits: 4
Marriage and family therapy is a clinical mental health treatment model that sees the entire family system as essential in the healing process. The introduction to marriage and family therapy (MFT) course us designed to provide undergraduate students with the opportunity to develop: (1) an introductory knowledge of core family systems theory concepts; (2) a basic history of marriage and family therapy and its current practices; (3) the application of systems theory in multiple career paths; and (4) the application of introductory level therapeutic skills and practices.
Prerequisite(s): HDFS 545 with a minimum grade of C-.
Grade Mode: Letter Grading

HDFS 623 - Infant and Child Development
Credits: 4
This course provides an overview of the physical, cognitive, language, and social-emotional development of children from the prenatal period through early and middle childhood. Theories of development are discussed as well as research methodologies used in the study of child development. Special attention is given to landmark and current research findings regarding development during this period of the lifespan.
Equivalent(s): FS 623
Grade Mode: Letter Grading

HDFS 624 - Adolescent Development
Credits: 4
This course examines the normative changes adolescents experience in biological, social, emotional, and cognitive domains. Emphasis is on the contexts of adolescent development including family and peer relationships, school, work, leisure, and broader cultural influences. Students will learn about problematic and risky behaviors as well as the positive development outcomes associated with this period of the lifespan.
Equivalent(s): FS 624
Grade Mode: Letter Grading

HDFS 625 - Adult Development
Credits: 4
This course covers the general biological, psychological, and cultural theories and issues related to adult development and aging from emerging adulthood to the oldest old. The course emphasizes diversity in the process of aging and the influence of various contexts on that process. Designed for students who want to become more knowledgeable about successful aging as well as those who plan to work in adult and gerontological research or social services settings.
Equivalent(s): FS 625
Grade Mode: Letter Grading

HDFS 630W - Youth Facing Adversity
Credits: 4
This course focuses on childhood risks such as poverty, family stress and dysfunction, social and emotional problems, and bullying, as well as how children cope with risk and demonstrate resilience. Students will learn about and visit a number of community programs in New Hampshire that support children and their families in times of stress. Students will hear from multiple guest speakers who research and/or support youth at-risk such as child advocates, counselors, social workers, juvenile detention workers, human service professionals, and teachers.
Attributes: Writing Intensive Course
Equivalent(s): HDFS 444A
Grade Mode: Letter Grading

HDFS 635 - Teaching and Learning in Early Childhood Settings
Credits: 4
This course covers the theoretical and developmentally-appropriate approaches to supporting young children's physical, social, emotional, and cognitive development in early childhood settings. Weekly four-hour practicum experience working with preschool children at the UNH Child Study and Development Center is required.
Attributes: Writing Intensive Course
Prerequisite(s): HDFS 525 with a minimum grade of C- and HDFS 623 with a minimum grade of C-.
Equivalent(s): FS 635
Grade Mode: Letter Grading
Special Fee: Yes

HDFS 641 - Parenting Across the Life Span
Credits: 4
This course provides an overview of theory and current research on parenting in contemporary society. The course explores the challenges and changing nature of parenting across development, current parenting issues, and parenting in diverse family types. Students will also have an opportunity to reflect on their own attitudes, thoughts, and values in regards to parenting.
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D-.
Equivalent(s): FS 641
Grade Mode: Letter Grading

HDFS 684 - Curriculum for Young Children
Credits: 4
This course focuses on the design, implementation, and evaluation of developmentally-appropriate activities in a classroom of young children. This course takes the stance that curriculum is not simply activities or plans, but a product of societal, school, and classroom culture as influenced by particular views of development.
Attributes: Writing Intensive Course
Prerequisite(s): HDFS 623 with a minimum grade of C- and HDFS 635 (may be taken concurrently) with a minimum grade of C-.
Equivalent(s): FS 734, HDFS 734
Grade Mode: Letter Grading

HDFS 695 - Independent Study
Credits: 1-6
Supervised in-depth scholarly experience relevant to any of the HDFS specializations: Child Development, Family Support, and Lifespan Development. Student must work directly with a supervising faculty member to develop and complete the project.
Equivalent(s): FS 695
Grade Mode: Letter Grading

HDFS 697 - Special Topics
Credits: 1-6
Focused examination of a particular theoretical, methodological, or policy issue.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): FS 697, FS 697W, HDFS 697W
Grade Mode: Letter Grading

HDFS 707 - Practicum
Credits: 1-6
Supervised in-depth experience in professional setting designed to increase the student's understanding of and experience working with children, adolescents, or families. Students must work with a supervising faculty member to identify a practicum site. 01) Child, 02) Family, 03) Adolescent.
Equivalent(s): FS 707
Grade Mode: Credit/Fail Grading
Special Fee: Yes

HDFS 709 - Child Development Internship
Credits: 4
Supervised teaching internship at the UNH Child Study and Development Center with children 6 wks-6 years old age for 9 hours each week. Internship experiences include teaching, documentation, and assessment. In addition students attend a weekly one-hour seminar for an in-depth reflection and analysis of the internship experience. Materials fees.
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): FS 709
Grade Mode: Letter Grading
Special Fee: Yes

HDFS 743 - Families, Schools, and Community
Credits: 4
This course takes an ecological approach to emphasize the critical value of effective family-school-community partnerships in enhancing the education of young children. Models of family-school-community partnerships are explored. Practical knowledge regarding the experiences of those from diverse backgrounds to best prepare students to interact with, and support, all children and families is highlighted. Students actively engage within the community to build bridges between families, schools, and the greater community.
Attributes: Writing Intensive Course
Equivalent(s): HS 743
Grade Mode: Letter Grading

HDFS 746 - Human Sexuality
Credits: 4
This course addresses the biological, psychological, and cultural aspects of human sexuality and gender across the lifespan. Opinions, attitudes, and values affecting societal responses to sexual issues are explored in relation to scientific research and theory. Students will be better prepared to deal with sexual issues in their personal and professional lives.
Equivalent(s): FS 746
Grade Mode: Letter Grading

HDFS 757 - Race, Class, Gender, and Families
Credits: 4
This course explores the intersection of race, class, and gender in family life in the US. Theory, research, and other relevant literature is used to examine the variety of family configurations in our society today and the diverse experiences that individuals and families have as a result of existing social, political, and economic institutions.
Attributes: Writing Intensive Course
Equivalent(s): FS 757
Grade Mode: Letter Grading

HDFS 760 - Family Programs and Policies
Credits: 4
This course explores the relationship between family policy and legislation with programs, services, and family experiences at the local, state and national level. Course content includes concepts associated with planning for, implementing, and evaluating family policies and programs; as well as exploring the complexities of family policy and the policy-making process. Course assignments will challenge students to understand and evaluate family policies and programs that are compatible with their professional interests.
Attributes: Writing Intensive Course
Prerequisite(s): HDFS 545 with a minimum grade of D-.
Equivalent(s): FS 760, HDFS 760W
Grade Mode: Letter Grading

HDFS 771 - Observation and Assessment of Young Children
Credits: 4
Comprehensive view of various observation techniques for determining children's strengths and emerging skills. Exploration of issues regarding the use of formal assessments and testing with young children, retention and transitional placements, and the parent's role in testing.
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.
Equivalent(s): FS 771
Grade Mode: Letter Grading

HDFS 776 - Children, Adolescents and the Law
Credits: 4
This course is designed to familiarize students with the specialized laws and legal systems that govern children and adolescents. Discussion will focus on society's efforts to balance competing interests and goals. The course provides the chance to explore laws and processes that affect children and adolescents as they interact with the court system, their caregivers, families and society at large.
Attributes: Writing Intensive Course
Equivalent(s): FS 776
Grade Mode: Letter Grading

HDFS 782 - Community Internship
Credits: 6
Supervised experience working in human services agencies. Students spend a minimum of 16 hours per week in a selected community program. Admission by application only. A senior-level course with 6 credits being taken during the semester. 20 credit hours of HDFS course work required prior to taking this course.
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 760 (may be taken concurrently) with a minimum grade of D-.
Repeat Rule: May be repeated up to 2 times.
Equivalent(s): FS 782
Grade Mode: Credit/Fail Grading

HDFS 785 - Seminar for Student Teachers I
Credits: 2
This seminar supplements the student teaching experience and provides a transition to the profession of teaching for those students admitted to the early childhood certification option. Students must apply during the spring semester of their junior year to be considered for the early childhood certification option.
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.
Grade Mode: Letter Grading

HDFS 786 - Seminar for Student Teachers II
Credits: 2
This seminar supplements the student teaching experience and provides a transition to the profession of teaching for those students admitted to the early childhood certification option. Students must apply during the spring semester of their junior year to be considered for the early childhood certification option.
Co-requisite: HDFS 788
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D-.
Equivalent(s): FS 786
Grade Mode: Letter Grading

HDFS 788 - Student Teaching Young Children
Credits: 8
Supervised teaching experience. Students spend a minimum of 20 hours per week in a selected program for young children working with a cooperating teacher. Students must apply during the spring semester of their junior year to be considered for the early childhood certification option.
Co-requisite: HDFS 786
Prerequisite(s): HDFS 525 with a minimum grade of D- and HDFS 545 with a minimum grade of D- and HDFS 623 with a minimum grade of D- and HDFS 635 with a minimum grade of D- and HDFS 785 with a minimum grade of D-.
Equivalent(s): FS 788
Grade Mode: Credit/Fail Grading
Special Fee: Yes

HDFS 792 - Community Internship Seminar
Credits: 2
This biweekly seminar focuses on issues of concern to family internship students, provides advanced training in educational strategies for working with families, and develops students' professional skills. Admission to family internship program required prior to taking this course.
Co-requisite: HDFS 782
Equivalent(s): FS 792, FS 792W
Grade Mode: Letter Grading

HDFS 793 - Community Internship Seminar
Credits: 2
This biweekly seminar focuses on issues of concern to family internship students, provides advanced training in educational strategies for working with families, and develops students' professional skills. Admission to family internship program required prior to taking this course.
Co-requisite: HDFS 782
Prerequisite(s): HDFS 792 with a minimum grade of D-.
Equivalent(s): FS 792, FS 792W
Grade Mode: Letter Grading

HDFS 794 - Families and the Law
Credits: 4
This course explores statutory law, case law and the judicial processes that affect families as members interact with each other and with society. Students will become familiarized with the family court system and its role in regulating the family.
Attributes: Writing Intensive Course
Equivalent(s): FS 794
Grade Mode: Letter Grading

HDFS 797 - Advanced Special Topics
Credits: 1-6
Focused examination of a particular theoretical, methodological, or policy issue.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): FS 797
Grade Mode: Letter Grading

HDFS 799 - Honors Senior Thesis
Credits: 2-4
Under direction of a faculty sponsor, students plan and carry out an independent investigative effort in an area of family, child, and/or consumer studies, resulting in a written thesis and an oral presentation before students and faculty. Two-semester sequence as continuing course.
Attributes: Honors course
Grade Mode: Letter Grading

Human Resource Management (HRM) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HRM 420 - Human Resource Management
Credits: 4
This course focuses on how human resource managers build effective networks and coalitions with others to accomplish tasks and stimulate motivation, cooperation, and satisfaction among work groups. It develops an understanding of the role and functions of human resource practitioners in a variety of organizational settings. Students build a knowledge base and identify the skills needed in the primary areas of human resources administration, which may include areas such as interviewing and selection, employee benefits and total compensation, performance assessment, professional development, workplace safety and wellness, employee relations, collective bargaining, workplace diversity, human resource information systems, rewards and recognition, performance coaching and corrective action, compliance and employment law, and organizational development.
Equivalent(s): HRM 518G, MGMT 518G
Grade Mode: Letter Grading

HRM 470 - Human Resource Application in Today's Organizations
Credits: 4
Human resource is the application of the current external environment and internal corporate culture to employing, training, compensating, retaining, and developing policies relating to people within their organizations. This course focuses on various ways managers have a direct impact on the success of their organization by applying human resource methodologies. The content covers human resource functions such as recruitment and selection, compensation and benefits, performance management, workplace safety and wellness, employee relations, collective bargaining, workplace diversity, rewards and recognition, compliance and employment law, and change management. Throughout, there will be an emphasis on effective communication with employees and internal business partners with a goal of building impactful networks and coalitions.
Prerequisite(s): HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D- or MGMT 518G with a minimum grade of D-.
Equivalent(s): HRM 605G
Grade Mode: Letter Grading

HRM 580 - Change Management
Credits: 4
This course explores the change process in organizations. The organizational structure is viewed as the context in which individual, interpersonal, group, organizational, and systemic change is examined. Characteristics of functional and dysfunctional systems are defined, and the change process is delineated. Models, skills, techniques, and strategies for positive change are examined.
Prerequisite(s): COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): HRM 620G, MGMT 620G
Grade Mode: Letter Grading

HRM 635 - Managing Conflict
Credits: 4
This course teaches concepts and skills to manage conflict effectively between two people, within small groups, within organizations, and between organizations and systems. It is designed to help those who want to sharpen their ability to understand, manage, and create opportunity out of conflict. As a result of this course, one knows oneself and others better, enhances personal and interpersonal skills, and develops techniques to improve relations at work and at home. the class may include actual conflict situations through role playing, and practicing new communication skills to prepare managers in real-world situations.
Equivalent(s): HRM 621G, MGMT 621G
Grade Mode: Letter Grading

HRM 660 - Recruitment, Selection, and Employee Development
Credits: 4
HR professionals need to adapt to changing objectives and market conditions to recruit, select, and retain employees with the necessary skills to further organizational goals all while steering clear of legal and other risks. Attracting and retaining the right talent to the right position from the start is crucial for organizational success.
Attributes: Writing Intensive Course
Prerequisite(s): HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D-.
Equivalent(s): HRM 610G
Grade Mode: Letter Grading

HRM 680 - Compensation and Performance Management
Credits: 4
Human capital is a strategic asset for organizations. To recruit and retain employees, human resource leaders create compensation packages and develop performance evaluation plans to strengthen the organization. The course may cover topics such as job evaluation, employee benefits programs, performance evaluations, wage and salary administration, pay level decisions, and financial incentives.
Prerequisite(s): HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D-.
Equivalent(s): HRM 615G
Grade Mode: Letter Grading

HRM 710 - Law and Ethics in Human Resource Management
Credits: 4
This course addresses the complexity of employment and labor law and workplace policies. It explores issues such as alcohol and drugs, sexual harassment, privacy rights, wrongful discharge, the Americans with Disabilities Act (ADA), negligent employment practices, and discrimination. Upon completion of this course, students will have the ability to demonstrate how human resource managers can apply this knowledge to protect and add value to their organizations.
Prerequisite(s): HRM 420 with a minimum grade of D- or HRM 518G with a minimum grade of D-.
Equivalent(s): HRM 607G, MGMT 607G
Grade Mode: Letter Grading

HRM 740 - Workplace Coaching
Credits: 4
This course engages students to learn and utilize core coaching concepts and methodologies to increase organizational and individual performance in the professional workplace. Differences between coaching and mentoring, coaching dynamics as a performance management tool, the eight steps to coaching for performance, and an array of coaching methodologies appropriate in diverse scenarios may be explored. Upon completion of this course students are expected to be able to apply coaching methodologies to common workplace scenarios. NOTE: This course is a business coaching course specific to Management and Human Resource Management majors.
Attributes: Writing Intensive Course
Prerequisite(s): MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.
Equivalent(s): HRM 637G, MGMT 637G
Grade Mode: Letter Grading

Human Services (HMSV) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HMSV 424 - Human Services and the Helping Process
Credits: 4
This course provides an introduction to the helping process in the context of a human service agency. There are two essential components to this course. The first examines the economic, social, and political forces that have shaped the development of human service organizations and their status today. It reviews the issues and obstacles involved in providing quality service to various populations in our society. The second major emphasis offers students the opportunity to review the basic elements of the helping process. Students examine the development of a professional working relationship with clients. They also learn what the process of helping includes. Emphasis includes the influence of personal experiences and values on prospective workers in the helping professions.
Equivalent(s): BEHS 502G, HMSV 500G
Grade Mode: Letter Grading

HMSV 480 - Case Management
Credits: 4
This course examines the theories, roles, and functions of case management. Students study examples of case management to include the professional skills necessary to be a successful case manager. The course explores case management issues with special populations and includes a discussion of the importance of ethics and the essential elements of case-note documentation, along with challenges and legal issues that case managers are faced with in organizations.
Prerequisite(s): (HMSV 424 with a minimum grade of D- or HMSV 500G with a minimum grade of D- or BEHS 502G with a minimum grade of D-) and (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-).
Equivalent(s): HMSV 501G
Grade Mode: Letter Grading

HMSV 595 - Field-Based Practicum in Human Services
Credits: 4
This field-based practicum is an entry-level field experience designed to assist Human Services majors in exploring career and vocational settings in which they can use and apply their knowledge and skills. The practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings in which the student may engage in a Human Services capstone internship or ideas for a potential Human Services capstone project. NOTE: This practicum requires students to complete a 25-hour work experience at a college-approved practicum site. Registration for this course is by permission of Academic Affairs. Early registration deadlines may apply.
Prerequisite(s): HMSV 480 with a minimum grade of D- or HMSV 501G with a minimum grade of D-.
Equivalent(s): HMSV 540G
Grade Mode: Letter Grading

HMSV 597 - Project-Based Practicum in Human Services
Credits: 4
This project-based practicum is designed to assist Human Services majors in exploring career and vocational settings in which they can use and apply their knowledge and skills. The practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings in which the student may engage in a Human Services capstone internship or ideas for a potential Human Services capstone project. NOTE: Students must follow college policy that all research activities which involve human participants, regardless of the level of risk foreseen, require review and written approval by the College's Institutional Review Board prior to the initiation of the activity.
Prerequisite(s): HMSV 480 with a minimum grade of D- or HMSV 501G with a minimum grade of D-.
Equivalent(s): HMSV 541G
Grade Mode: Letter Grading

HMSV 795 - Integrative Capstone: Internship in Human Services
Credits: 4
This capstone course is a field-based internship designed to develop and hone the practical application skills of a Human Services major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the general auspices of their college mentor. The internship requires documented evidence of 80 hours of supervised experience and practice in a field setting where human services knowledge and skills are applied. NOTE: Registration for this course, a field-based experience, is by permission of the Academic Affairs. Early registration deadlines will apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602G with a minimum grade of D- or CRIT 602 with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HMSV 651G
Grade Mode: Letter Grading

HMSV 797 - Integrative Capstone: Project in Human Services
Credits: 4
This project-based integrative capstone course in Human Services focuses on the concepts and techniques of successful Human Services practitioners. Students integrate the knowledge and skills gained from other courses in the Human Services program and demonstrate the ability to apply knowledge to new subject matter and practical situations. Students develop and implement a project within their chosen concentration (professional interest) that includes an applied research project, a written rationale, and synthesis of theory and practice. NOTE: Students must follow college policy that all research activities that involve human participants, regardless of the level of risk foreseen, require review and written approval by the College's Institutional Review Board prior to the initiation of the activity. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602G with a minimum grade of D- or CRIT 602 with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HMSV 650G
Grade Mode: Letter Grading

Humanities (HUMA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HUMA 401 - Introduction to the Humanities
Credits: 4
Introduction to the interdisciplinary study of the humanities. Taking as its entry point a significant work, the course is organized by topics related to that work, selected and arranged to invoke lively intellectual debate among faculty and students alike. Group lectures by the four core humanities faculty members. The instructors teaching the course will provide material for smaller weekly discussion sections led by each of those faculty members. Requirements include lively discussions, papers, and examinations. Not repeatable.
Attributes: Humanities(Disc)
Equivalent(s): HUMA 401W
Grade Mode: Letter Grading

HUMA 401W - Introduction to Humanities
Credits: 4
Introduction to the interdisciplinary study of the humanities. Taking as its entry point a significant work, the course is organized by topics related to that work, selected and arranged to invoke lively intellectual debate among faculty and students alike. Group lectures by the three core humanities faculty members. The instructors teaching the course will provide material for smaller weekly discussion sections led by each of those faculty members. Requirements include lively discussions, papers, and examinations.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): HUMA 401
Grade Mode: Letter Grading

HUMA 411 - Humanities I
Credits: 4
Introduction to the humanities and Western culture through literature, history, philosophy, music, art, and architecture. Examination of selected historical periods from classical Greece through the Renaissance through readings, films, slides, and field trips.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

HUMA 412 - Humanities II
Credits: 4
Introduction to the humanities and Western culture through literature, history, philosophy, music, art, and architecture. Examination of selected historical periods from the Enlightenment to the present through the use of readings, films, slides, and field trips.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HUMA 440A - Honors/Hooked: Narratives of Addiction, Recovery, and Redemption
Credits: 4
This course explores literature about addiction through both literary an psychological lenses. It focuses on the redemption narrative that structures the understanding of addiction for writers and readers alike. Readings include stories of religious redemption, short fiction, memoirs, self-help texts, and narrative and psychological theory. This course is part of the Honors Symposium "Engaging Addiction". The courses in the Symposium join several times during the semester for common meetings where perspectives can be compared and explored.
Attributes: Honors course; Humanities(Disc)
Grade Mode: Letter Grading

HUMA 440B - Honors/That Belongs in a Museum! Museums and the Ownership of Antiquities
Credits: 4
Suppose you stumbled upon an artifact from an Indigenous Native American people in your backyard. Do you own it? Or do the heirs of those who produced it? Or does it belong in a museum for all to see? In a series of controversial case studies we will examine what it means to “own” the past, how it should be protected and preserved, and what role museums have had—-and should have—in safeguarding that past.
Attributes: Honors course; Humanities(Disc)
Grade Mode: Letter Grading

HUMA 440H - Honors/Changing Our Minds: Revolutions in Thought
Credits: 4
This course is inspired by Freud's idea that human self-understanding advances during great revolutions in thought. We study several revolutions in science and belief, from Marx to Darwin, and consider whether a general model applies to them all. How have ideas about the universe and human beings' place in it changed dramatically at certain points in history? Do revolutions in thought have a common structure? What revolution are we living in today? This course is part of an Honors symposium titled "The Copernican Lens: Dawn and Limits of Certainty in Physical Science and the Humanities", which runs concurrently with three other "Copernicus Lens" courses in other fields during the same semester. Taking its point of departure from the revolution in astronomy introduced by Nicolaus Copernicus, the symposium explores the intersections of types of thinking about the universe and humanity across history, especially the relationship between scientific and humanistic thinking. The implications of key transformations in scientific and humanistic thought are traced in the realms of philosophical ideas about humans' place in the world, and historical understandings of the development of science, belief, and truth itself. The course will be run in a seminar, discussion-based format, meeting twice a week for discussion (Mondays & Wednesdays) and once a week (Fridays) for a shared plenary with the other three "Copernicus Lens" courses. Among the requirements of each course in the Honors symposium is participation in plenary sessions when the students from all four courses meet together. The four instructors (Professors Nathan Schwadron [Physics], Subrena Smith [Philosophy], Rachel Trubowitz [English], and Paul Robertson [Classics, Humanities and Italian Studies]) have planned the plenary sessions around common activities and learning materials, approached from the individual perspectives of their own discipline. By learning from each of the professors, the students in all the courses will gain an understanding of the different disciplinary perspectives that can be applied to the study of science in its cultural and historical contexts. The course qualifies for "Historical Perspectives" credit in the Discovery Program because it introduces students to major developments in the history of science and belief that have significantly shaped contemporary life. Through study of specific episodes and historians' interpretation of them, students will gain an understanding of the methods of historical inquiry. They will also come to grasp the historical contingency of beliefs and assumptions through entering imaginatively into worldviews different from those of the present.
Attributes: Historical Perspectives(Disc); Honors course; Writing Intensive Course
Grade Mode: Letter Grading

HUMA 444E - What is a Criminal?
Credits: 4
Criminals are people who break the law -- In theory. How do people become criminals (with regard to biological, cultural, and economic influences)? What happens to them in the criminal justice system, and how does the system shape the definition of "criminal"? We will also discuss "criminals of conscience" from Thoreau and Gandhi to Edward Snowden. The course will emphasize reading but will also engage with other media, including films, podcasts, and visual art.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HUMA 444F - Travelers in the Premodern World
Credits: 4
Travel is a fundamental aspect of the human experience. This course explores the human experience of travel using materials originating from across premodern world. Students investigate materials ranging from maps and pilgrimage accounts, to poetry and stories to understand what has compelled people to undertake the often perilous road.
In the process, they consider the role of travel in cultural contact, communication, exchange, and the generation an spread of knowledge.
Attributes: World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

HUMA 500 - Critical Methods in the Humanities
Credits: 4
Critical analysis of works in the humanities. Focuses on major texts, evaluation of secondary literature, research writing, criticism. Required of all HUMA majors.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): ECS 550
Grade Mode: Letter Grading

HUMA 505 - Introduction to Religion
Credits: 4
This course provides an introduction to religion, exploring the various ways that this phenomenon has been understood, approached, practiced, and studied across human history. The course will examine the different ways that religion can be defined, drawing from a variety of humanities and other disciplines. Foundational theories explaining the origins, persistence, and continued relevance of religion will be compared and applied to different traditions. Topics include concepts of divinity, rituals, myth, mysticism and spirituality, pilgrimage, death and the afterlife, and ultimate reality.
Attributes: Humanities(Disc)
Equivalent(s): RS 505
Grade Mode: Letter Grading

HUMA 510A - Ancient Humanities: Cultures and Empires
Credits: 4
Humans are social animals and, from an early period, they organized into cities and empires. How did peoples like the ancient Mesopotamians, Egyptians, Indians, Greeks, Chinese, or Romans view themselves? How did they conceive of the world? Why was power distributed to some and not others? This co-taught course examines art, philosophy, history, and cultures from the ancient world to offer an introduction to the human experience from approximately 3000 BCE to 700 CE.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Equivalent(s): HUMA 510B, HUMA 510C, HUMA 510D
Grade Mode: Letter Grading

HUMA 510B - Ancient Humanities: Cultures and Empires
Credits: 4
Humans are social animals and, from an early period, they organized into cities and empires. How did peoples like the ancient Mesopotamians, Egyptians, Indians, Greeks, Chinese, or Romans view themselves? How did they conceive of the world? Why was power distributed to some and not others? HUMA 512D - Modern Humanities: Colonies, Constitutions, and Capital
Credits: 4
The world we know took shape since the 1600s as European empires conquered much of the world; industrialization and capitalism expanded and redistributed power and wealth; and science opened new ways of viewing and changing the world. Humans forged new ideas to justify or challenge these changes. This is the Humanities section of a co-taught course that explores the art, philosophy, history, and cultures of the modern world to understand how it came to be. Students registered in this course can only earn credit towards the Humanities Discovery category and cannot satisfy Discovery categories associated with other sections of this team-taught course.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): HUMA 512A, HUMA 512B, HUMA 512C
Grade Mode: Letter Grading

HUMA 513B - Global Humanities
Credits: 4
In this co-taught topics course, students will study art, philosophy, history, and cultures of a particular region of the globe, most often one underrepresented in the traditional study of Western Humanities. Students will consider internal diversity, change over time, and interactions with other regions. Topics may include Africa, the Indian Ocean, Latin America, the Mediterranean, the Middle East, South or East Asia, or associated diasporas. May be repeated if specific topic is different.
Attributes: World Cultures(Discovery); Writing Intensive Course
Repeat Rule: May be repeated up to 1 time.
Equivalent(s): HUMA 513A, HUMA 513C, HUMA 513D
Grade Mode: Letter Grading

HUMA 513C - Global Humanities
Credits: 4
In this co-taught topics course, students will study art, philosophy, history, and cultures of a particular region of the globe, most often one underrepresented in the traditional study of Western Humanities. Students will consider internal diversity, change over time, and interactions with other regions. Topics may include Africa, the Indian Ocean, Latin America, the Mediterranean, the Middle East, South or East Asia, or associated diasporas. May be repeated if specific topic is different.

Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

HUMA 519 - Classical Greece
Credits: 4
Examination of the culture of classical Greece through the history, drama, philosophy, and art of the period. Open to all students. Recommended for students in the humanities major.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

HUMA 525 - Humanities and the Law
Credits: 4
This multidisciplinary course examines the nature of justice, legal systems and law in various historical contexts, including how these have been conceived, how they originated and the role of the professional judiciary, as well as the relationship between law and ethics. Consideration of how legal ideas have changed over time and built upon each other. May be repeated once if specific topic is different.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

HUMA 526 - Humanities and Science
Credits: 4
In this interdisciplinary course, students examine the ways in which scientific and technological understanding affects the development of cultural expression. Scientific, technological and environmental factors are sometimes discussed as if they are separate from human beings, but in this course we will consider the myriad direct, complex, and surprising ways that they drive cultural shifts and are then understood in evolving ways by cultures. Topics vary with instructor. May be repeated once if topics is different.
Attributes: Humanities(Disc); Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): HUMA 651
Grade Mode: Letter Grading

HUMA 527 - Humanities and Religion
Credits: 4
This course examines the role of religion, religious ideas and religious practice in world cultures using a combination of methodologies drawn from different humanities disciplines, with a particular emphasis on comparative approaches and investigating how religion is used to create and express cultural identity around the globe.
Attributes: World Cultures(Discovery); Writing Intensive Course
Equivalent(s): ANTH 527
Grade Mode: Letter Grading

HUMA 547 - Introduction to Russian History: Russia and the World
Credits: 4
An introductory survey of Russian history, from the 1200s to the present. Focuses on the rise and expansion of the state based in Moscow, and on the various peoples it ruled. Considers continuities and changes between Muscovy, the Russian Empire, the Soviet Union, and the Russian Federation, as well as comparisons to other contemporary states. Central themes include imperial expansion, cultural and religious diversity, war and society, and struggles for social justice and political freedom.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 547
Grade Mode: Letter Grading

HUMA 550 - Budapest Spring Semester: Special Studies in Comparative Ideas
Credits: 4
This course involves periodic offerings in literature, art, history, philosophy and political science designed to stimulate reflection on ideas and issues in Hungarian and Central European history and culture in a larger global context. Topics vary depending upon the expertise of the resident faculty.
Co-requisite: INCO 588
Attributes: Humanities(Disc)
Grade Mode: Letter Grading
Special Fee: Yes

HUMA 551 - Budapest Spring Semester: Field Studies in Art and Culture
Credits: 6
This course is designed to provide students with first-hand experience of art, history, culture, folklore, and traditions of Hungary and Central Europe. The course combines preparatory readings with guided field trips to museums, historical sites, and culturally significant events and locations. Students maintain a weekly blog reflecting on field trip experiences.
Co-requisite: INCO 588
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

HUMA 563 - Introduction to Russian Culture and Civilization
Credits: 4
Interdisciplinary course on the development of Russian culture from its origins through the end of the 19th century. Historical documents, literary works, ethnographic materials, films, slides of Russian art, and music.
Attributes: World Cultures(Discovery)
Equivalent(s): HIST 563
Grade Mode: Letter Grading

HUMA 571 - Modern Middle East History
Credits: 4
This course surveys the history of the Middle East (defined as the territory of the former Ottoman and Qajar Empires) from 1768 to the present. In addition to offering an overview of major political, social and economic developments, the course aims to sketch a basic picture of social and cultural life at different points. Course meets the History major requirements for Group III.
Attributes: World Cultures(Discovery)
Equivalent(s): HIST 571
Grade Mode: Letter Grading

HUMA 698 - Independent Study
Credits: 4
Independent study open only to highly qualified juniors and seniors who have completed at least four humanities courses above the 400 level. Requires original research and substantial writing projects under the direction of a member of the core faculty of the humanities.
Grade Mode: Letter Grading

HUMA 701W - Capstone Course
Credits: 4
Students will investigate the intersections of the fields of Classics, Humanities, and Italian Studies through the exploration of a common theme. Working across disciplines, students will learn how scholars from these fields have approached common issues. Students will also demonstrate their ability to conduct research by engaging in a semester-long specialized project connected to the course theme.
Attributes: Writing Intensive Course
Equivalent(s): CLAS 701W, ITAL 701W
Grade Mode: Letter Grading

HUMA 795 - Study of Creativity
Credits: 4
A study of human creativity through representative lives and works of such figures as daVinci, Einstein, Kathe Kollwitz, Bach, Dickens, and Freud. Lectures, class discussions, films, and slides supplemented by gallery tours plays, and concerts. Open to students with a background in humanities or by permission of the instructor.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

HUMA 796 - Study of Contemporary Issues
Credits: 4
Current social and political issues with focus on recent developments in public policy, science, and business, and their impact of social values.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

HUMA 798 - Research Seminar
Credits: 1-2
Provides a context within which students may discuss and receive direction in the course of completing a major research paper. At the end of the seminar, students present their research to the faculty and their fellow students.
Attributes: Writing Intensive Course
Prerequisite(s): HUMA 500 with a minimum grade of D-.
Grade Mode: Letter Grading

HUMA 799 - Research Seminar
Credits: 3-4
Provides a context within which students may discuss and receive direction in the course of completing a major research paper. At the end of the seminar, students present their research to the faculty and their fellow students.
Prerequisite(s): HUMA 500 with a minimum grade of D- and HUMA 798 with a minimum grade of D-.
Grade Mode: Letter Grading

Humanities (HUMN) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

HUMN 470 - World Religions
Credits: 4
This course offers a comparative study of world religions. The focus of the course is to acquire a broad overview of world religions through an examination of sacred texts, art and iconography, as well as religious experience and practice. Theological, philosophical and cultural influences are considered as religious language is examined. Religions considered are: Islam, Judaism, Hinduism, Christianity, Buddhism, religions of Africa, as well as primal religions.
Attributes: Human Thought Exp (Gen Ed)
Equivalent(s): HUMN 504G
Grade Mode: Letter Grading

HUMN 480 - Introduction to Ethics
Credits: 4
This course introduces students to a variety of prominent ethical theories. It examines their complex interrelations, historical development, and relevance to ordinary life. Students are encouraged to engage in the critical analysis and comparison of these theories and to consider how they might explain and evaluate contemporary controversies such as war, environmental protection, euthanasia, and abortion. Relationships between ethics and other areas of philosophical investigation are considered.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc)
Equivalent(s): HUMN 505G
Grade Mode: Letter Grading

HUMN 502 - American Popular Culture
Credits: 4
This course examines the origin, nature, and social impact of popular culture in America. Students explore and define what culture is, beginning with the differences between high culture, or the culture of the elite and intelligentsia, and low culture, or the culture of the masses - particularly as these differences in taste, recreation, art, and leisure activities relate to social and economic class, educational level, political power, health, and human development. Subsequently, the focus is primarily on aspects of popular culture. Students acquire and hone the skills of cultural analysis by dissecting both the ephemeral and archetypal facets of an eclectic and wide-ranging sampling of public media, art, music, fads, trends, and entertainment.
Attributes: Human Thought Exp (Gen Ed); Humanities(Disc)
Equivalent(s): HUMN 502G
Grade Mode: Letter Grading

HUMN 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Humanities. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): HUMN 544G
Grade Mode: Letter Grading

HUMN 560 - Introductory Spanish I
Credits: 4
HUMN 560: Introductory Spanish I establishes the foundational principles of grammar and vocabulary with a focus on present and present progressive tense comprehension and basic interpersonal communication in the Spanish language. Students will practice reading, writing, listening comprehension, and verbal expression so that they will be able to engage in first-level interpersonal exchanges. Introduction to diverse cultures from across the Spanish-speaking world will be included. Introductory Spanish I & II taken together satisfy the foreign language requirement.
Attributes: Human Thought Exp (Gen Ed)
Equivalent(s): HUMN 560G
Grade Mode: Letter Grading

HUMN 565 - Introductory Spanish II
Credits: 4
Introductory Spanish II expands upon the fundamental principles of grammar and vocabulary with a focus on past and future tense comprehension and fluid interpersonal communication in the Spanish language. Students will practice reading, writing, listening comprehension, and verbal expression so that they will be able to engage in real world Spanish-speaking environments. Study of diverse cultures from across the Spanish-speaking world will be included. HUMN 560 and HUMN 565 taken together satisfy the foreign language requirement.
Attributes: Human Thought Exp (Gen Ed)
Prerequisite(s): HUMN 560 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken SPAN 402.
Grade Mode: Letter Grading

HUMN 625 - Introduction to Cultural Theory
Credits: 4
This writing and reading intensive course is a general introduction to the critical perspectives and theories that enliven contemporary cultural studies with attention to various schools of 20th and 21st-century criticism, critical applications, and critical terminology. Theories covered include: Marxism, Psychoanalytic criticism, Structuralism, Post-structuralism, Feminist literary studies, Gender studies, Queer studies, Critical Race studies, Post-colonialism, New Historicism, Cultural studies, and Postmodernism. More broadly, this course explores current studies of literature and culture, examining the practices and values of literary and cultural scholars, students, and teachers in order to gain an understanding of the tradition and norms that have emerged from those practices and values, and finally, to consider which of those trends are most valuable for future critical endeavors in the field of cultural studies.
Attributes: Human Thought Exp (Gen Ed)
Prerequisite(s): (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-).
Equivalent(s): HUMN 625G
Grade Mode: Letter Grading

HUMN 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in Humanities. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): HUMN 644G
Grade Mode: Letter Grading

HUMN 797 - Integrative Capstone: Project in Humanities
Credits: 4
This capstone course for Humanities and English majors is designed to integrate learning from the entire program in an individually-customized project. Students demonstrate competency in the study of the humanities by producing a substantive original essay based on in-depth research. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): HUMN 650G
Grade Mode: Letter Grading

Information Technology (IT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

IT 403 - Introduction to Internet Technologies
Credits: 4
Introductory course exploring the fundamentals of Internet communications with an emphasis on the World Wide Web. Students develop an understanding of the Internet's underlying technologies and learn how to utilize them as contributing members of the Web community. Students become proficient with creating and publishing Web pages using HTML and CSS. No prior knowledge or experience is assumed. No credit if credit earned for CIS 405. (Note CIS 405 is offered at UNH Manchester, and is not related to CS 405 at UNH Durham.)
Grade Mode: Letter Grading

IT 502 - Intermediate Web Design
Credits: 4
An intermediate level exploration of the theory and practice of Web design. Students learn the fundamentals of design theory applicable to the World Wide Web and examine tools and techniques for applying that knowledge to their projects. Additional topics include information architecture, usability, accessibility, optimization, typography, and market visibility. Working knowledge of XHTML and CSS required.
Prerequisite(s): IT 403 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 505 - Integrative Programming
Credits: 4
Expands prior programming knowledge through the introduction of another programming language, with a particular emphasis on integrative programming techniques common within IT. Topics include data access and exchange; database concepts; effective interfaces; and leveraging third-party APIs, libraries, and frameworks.
Prerequisite(s): CS 416 with a minimum grade of D- or CS 417 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 520 - Foundations of Information Technology
Credits: 4
Fundamentals of computer hardware, software, and data. Topics include processors, memory, storage, resource management, and discrete mathematics.
Prerequisite(s): CS 415 with a minimum grade of C- or CS 410C with a minimum grade of C- or CS 410P with a minimum grade of C-.
Grade Mode: Letter Grading

IT 604 - Server-side Web Development
Credits: 4
An intermediate-level examination of the theory and practice of developing server-side applications for the World Wide Web. Students will learn practical techniques for designing and implementing data-driven Web sites through the use of server-side processing. Working knowledge of HTML, CSS, and some programming language is required.
Prerequisite(s): IT 403 with a minimum grade of D- and (CS 410 with a minimum grade of D- or CS 414 with a minimum grade of D- or CS 415 with a minimum grade of D-).
Grade Mode: Letter Grading

IT 605 - Full-Stack Web Development
Credits: 4
An examination of the theory and practice of developing applications for the World Wide Web utilizing tools and techniques across the full stack of Web technologies. Students will leverage their existing programming skills to learn practical techniques for designing and implementing Web-based applications involving both client-side and server-side processing.
Prerequisite(s): IT 403 with a minimum grade of C- and IT 505 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 609 - Network/Systems Administration
Credits: 4
Introduces the central issues in administration of a networked computer system. Topics include the client-server model (including support of mail, FTP, Telnet, the Web), disk and file systems, backup and recovery, and security. Privacy and other legal/social issues will be discussed.
Prerequisite(s): IT 520 with a minimum grade of D- and (CS 410 with a minimum grade of D- or CS 414 with a minimum grade of D- or CS 415 with a minimum grade of D-).
Grade Mode: Letter Grading

IT 612 - Scripting Languages
Credits: 4
This course is a study of the class of programming languages and tools known as scripting languages. Topics include: a general discussion of language design and its relationship to the intended computing environment, introduction to the command-line environment, the role of scripts in controlling and connecting other programs and components, basic functionality of at least two scripting languages, and the syntax use of regular expressions. Programming projects in multiple languages will be required.
Prerequisite(s): IT 505 with a minimum grade of D- or CS 515 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 630 - Data Science and Scalable Data Systems
Credits: 4
A practical course on building the data foundation for data science and analytics. Create reliable, scalable data for dashboards, apps, and machine learning—with an introduction to core concepts in data modeling, pipeline design, quality assurance, streaming, and governance. Prepares students to deliver dependable data that powers real analysis and products—skills in high demand across careers in analytics, AI, and machine learning.
Prerequisite(s): ADMN 520 with a minimum grade of D- or BIOL 528 with a minimum grade of D- or BUS 430 with a minimum grade of D- or HMP 540 with a minimum grade of D- or MATH 439 with a minimum grade of D- or MATH 539 with a minimum grade of D- or MATH 540 with a minimum grade of D- or MATH 644 with a minimum grade of D- or PSYC 402 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

IT 666 - Cybersecurity Practices
Credits: 4
Through readings, exercises, research papers, and exams students will acquire the skills needed to implement solutions for security-related issues. Students will discuss security policies, legislation, system procedures, tools, and techniques. Students will analyze the patterns that attackers use to gain access to systems and understand what is required to defeat those attack patterns. At the conclusion of the course, students will have a heightened sense of security in the actions they take when using and maintaining computer systems.
Prerequisite(s): CS 527 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 699 - Internship
Credits: 1
Provides the opportunity to apply academic experience in settings associated with future professional employment. Proposals for the internship must be approved by the instructor prior to registration. Students may receive compensation for their internship work.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 3 times.
Grade Mode: Credit/Fail Grading

IT 705 - Project Management for Information Technology
Credits: 4
This course focuses on a core set of project management essentials that can affect the bottom line of project technical and business performance. These are termed "best practices," and those addressed are: formal risk management, agreement on interfaces, metrics based scheduling/tracking, frequent binary completion milestones, incremental development, people aware management style, and change management. The emphasis is on information technology projects; however, the basic principles are pertinent to a wider class of project domains.
Attributes: Writing Intensive Course
Prerequisite(s): CS 518 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 718 - Cloud Computing Principles
Credits: 4
Students will learn fundamental cloud architectural principles of: operational excellence, security, reliability, performance efficiency, and cost optimization through readings, labs, and a hands-on project. Course material will cover cloud offerings from Amazon's AWS, Microsoft's Azure, and Google's Cloud Platform. Students complete a semester-long project in which they are required to implement a complete Cloud solution.
Prerequisite(s): CS 527 with a minimum grade of D-.
Grade Mode: Letter Grading

IT 725 - Network Technology
Credits: 4
Introduction to fundamental concepts of computer networks and exploration of widely-used networking technologies. Topics include principles of congestion and error control; network routing; local, wireless and access networks; application protocol design; and network programming. In-depth discussion of the Internet suite of protocols.
Prerequisite(s): IT 520 with a minimum grade of D-.
Equivalent(s): CS 725
Grade Mode: Letter Grading

IT 760W - Human-Computer Interaction
Credits: 4
This course is a broad introduction to designing, prototyping, and evaluating user interfaces in the context of Human-Computer Interaction (HCI) theory and practice. Additional topics may include the history of computer interfaces, theories of human cognition and perception, observational techniques, and experimental design. Coursework includes lectures, programming assignments, writing assignments, class presentations, and group projects.
Attributes: Writing Intensive Course
Prerequisite(s): CS 416 with a minimum grade of C- or CS 417 with a minimum grade of C-.
Equivalent(s): CS 760
Mutual Exclusion: No credit for students who have taken CMPL 622.
Grade Mode: Letter Grading

IT 775 - Database Technology
Credits: 4
Topics include database architecture, schema design and definition, entity-relationship diagrams, data retrieval and update, and indexing performance. Architectures for single-user, multi-user, client-server, and web access are introduced. The relational data model is emphasized but alternative database models, such as semi-structured and object models, are introduced. Database administration topics include examination of metadata information, data integrity, and management of users and privileges, performance tuning, transactions, isolation levels, and security. Ethics of data protection are introduced. Students develop skill in SQL. Not open to CS majors.
Prerequisite(s): IT 505 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken CS 775.
Grade Mode: Letter Grading

IT 780 - Topics in Information Technology
Credits: 4
Material not normally covered in course offerings.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

IT 791 - Senior Project I
Credits: 2
First semester of the capstone design experience. Industry best practices and tools are surveyed and applied in team projects. Students begin development on software projects proposed by faculty or external sponsors, including initial stages of design, implementation, and documentation, with an interim presentation of progress expected toward the end of the semester. Principles of security, testability, and maintainability are stressed.
Prerequisite(s): IT 705 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

IT 792 - Senior Project II
Credits: 2
Continuation of IT 971: Senior Project I. Students complete the project, a final presentation of results is expected toward the end of the semester. Successful completion of this course fulfills the Capstone Experience requirement for Information Technology majors.
Attributes: Writing Intensive Course
Prerequisite(s): IT 791 with a minimum grade of D-.
Equivalent(s): IT 710
Grade Mode: Letter Grading

Instructional Studies (INST) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

INST 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in instructional studies. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): INST 544G
Grade Mode: Letter Grading

INST 615 - Engaging Adult Learners in the Digital Age
Credits: 4
Educators and trainers often feel compelled to use the latest technologies in their teaching practice to keep pace with culture and attract learners. Yet technology for technology's sake doesn't automatically help learners meet learning outcomes and can have an unintended negative impact on learning experiences if not selected properly. This course will provide guided practice-based learning activities to develop the skills needed to review, analyze, and select appropriate educational technologies for engaging education experiences for adult learners in a variety of settings.
Equivalent(s): INST 615G
Grade Mode: Letter Grading

INST 701 - Teaching and Learning in Adulthood
Credits: 4
This course examines the nature and process of teaching and learning in adulthood by reviewing and building on theories and philosophies of adult learning. It focuses on teaching adults in formal, informal, and non-formal settings. Understanding cognition and the learning process provides the foundation to employing instructional strategies that empower the adult learner. Students will explore active learning, collaborative learning, self-directed learning in relationship to learning strategies, motivation and the importance of practice, experience, self-reflection, and assessment.
Attributes: Writing Intensive Course
Equivalent(s): INST 605G
Grade Mode: Letter Grading

INST 702 - The Learning Workplace
Credits: 4
This course deals with the professional learning needs and priorities of the workplace with an emphasis on business and industry settings. It examines the variety of ways in which employees and their managers gain new knowledge and skills as part of their on-going involvement in both their jobs and in formal, informal, and non-formal learning situations. Careful attention is given to understanding and applying effective transfer of learning strategies. The roles of in-house training, corporate university, individualized learning, distance learning, online learning, and external providers are also examined.
Attributes: Writing Intensive Course
Equivalent(s): INST 607G
Grade Mode: Letter Grading

INST 703 - Instructional Design and Interactive Learning
Credits: 4
This course provides an introduction to theory and practice of instructional design and its role in developing interactive learning. It covers all the necessary elements to analyze, design, develop, implement, and evaluate effective learning, including interactive learning systems, and cultivates the effective combination of technology and instruction. The course addresses the different models used to develop effective instruction and expands the student's understanding of how to facilitate meaningful connections in learning through collaboration, discovery, and engagement.
Equivalent(s): INST 610G
Grade Mode: Letter Grading

INST 797 - Program Development and Learning
Credits: 4
This course encompasses a broad spectrum of program development ranging from an individual course to a complete program of major learning activities conducted over a period of time for the education and training of adults. This project- based course serves as the Integrative Capstone and is designed to provide an opportunity to apply and practice theories, skills, and principles to a variety of situations adult educators may encounter in practice. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): INST 650G
Grade Mode: Letter Grading

Integrated Agriculture Management (IAG)

Read more about the courses within this subject prefix in the descriptions provided below.

No courses are currently active in the course inventory for this subject prefix.

Integrated Applied Mathematics (IAM)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

IAM 550 - Introduction to Engineering Computing
Credits: 4
An application driven introduction to computer-aided problem solving leveraging foundational knowledge in engineering and the physical sciences. Engineering applications are used to motivate the computational methods needed in scientific and engineering disciplines. Numerical methods, including the basic LU algorithm, one-dimensional root finding methods, and numerical differentiation and integration, are introduced as useful computational tools for tackling a broad range of engineering and scientific applications and to provide concrete and contextual programming experiences. MATLAB is used, with topics including scripts, functions, logical expressions, conditional statements, looping, data visualization, plotting, and recursion presented within the framework provided by both the numerical methods and the scientific or engineering problems. Laboratory included.
Prerequisite(s): MATH 426 (may be taken concurrently) with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken MATH 445.
Grade Mode: Letter Grading

IAM 751 - Introduction to High-Performance Computing
Credits: 4
Course gives an introduction to select areas of high-performance computing, providing a basis for writing and working with high-performance simulation codes. The three main topics are: 1) basic software engineering, 2) high-performance and parallel programming, and 3) performance analysis and modeling. Additional topics may include hetergeneous architectures like GPUs and data analysis/visualization. Working knowledge of a compiled programming language (C, C+ or Fortran) is required prior to taking this course.
Grade Mode: Letter Grading

Intercollege (INCO)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

INCO 400 - Graduate Preparation Seminar
Credits: 1
A survey seminar that explores issues related to graduate school preparation. Topics include graduate school culture, academic research, the role of multicultural scholars, faculty relations, the graduate record exam, resume/vita development, and financing graduate education. Enrollment in McNair Scholars Program required.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading

INCO 403 - Healthcare Professions Seminar
Credits: 2
This seminar is designed for students (primarily for sophomores; juniors and seniors may also take the course) who are in the initial phase of preparation to a career in allopathic or osteopathic medicine, dentistry, podiatry, optometry, physicians assistant, chiropractics, physical therapy, pharmacy, or naturopathic medicine. Through readings and discussion students will become informed about current topics in healthcare, and specifically about these professions, requirements for admission to degree programs, and about how to become a competitive applicant.
Grade Mode: Credit/Fail Grading

INCO 425H - Honors/Calculus and Physics Recitation
Credits: 0
Recitation for MATH 425H and PHYS 407H.
Co-requisite: MATH 425H, PHYS 407H
Attributes: Honors course
Grade Mode: Letter Grading

INCO 426H - Honors/Calculus and Physics Recitation
Credits: 0
Recitation for MATH 426H and PHYS 408H.
Co-requisite: MATH 426H, PHYS 408H
Attributes: Honors course
Grade Mode: Letter Grading

INCO 490A - Fundamentals of Research Integrity
Credits: 2
Undergraduate students interested in conducting research or those already conducting research will explore individual, professional, institutional and social issues related to the ethical conduct of research and scholarship. Students will use case studies as well as share their research interests and experience to investigate topics of data management, authorship, mentorship, human subjects, use of vertebrate animals, and scientific integrity. Completion of this course and accompanying modules fulfill part of the NSF RCR training mandate and/or the USDA NIFA RCR training mandate.
Grade Mode: Credit/Fail Grading

INCO 501 - Peer Coach Introduction to Pedagogy
Credits: 1-2
This course provides an initial experience as an instructional peer coach. Students apply theories of cognition, group dynamics, learning, metacognition, and motivation to support other students as they learn science, engineering, and mathematics. Students reflect on their work as peer coaches through the lens of the required readings.
Grade Mode: Letter Grading

INCO 502 - Peer Learning Coach Development
Credits: 1
Development and assessment of leadership skills. Practical application of theories of cognition, group dynamics, learning, and motivation to helping other students learn. Requires class session, course content review session, and one weekly meeting with students.
Prerequisite(s): CHEM 501 with a minimum grade of D- or INCO 501 with a minimum grade of D-.
Grade Mode: Letter Grading

INCO 505A - Becoming a Problem Solver
Credits: 4
A hands-on course for students participating in Semester in the City (Boston) or Semester for Impact (NH) that builds the skills of students as changemakers for social good. Students participate in skill-building and reflective workshops designed around our core skills of launching a purpose driven career, working in diverse teams, persuasive communication and human centered problem solving. Students practice new concepts and skills every week and engage in team-based community research projects, craft a three-minute speech they deliver at program completion, and develop their professional on-line profile and portfolio of work.
Co-requisite: INCO 505B, INCO 505I
Grade Mode: Letter Grading
Special Fee: Yes

INCO 505B - Social Innovator's Toolbox
Credits: 4
A weekly seminar that exposes students to the field of social innovation through case studies, guest speakers, short readings, and interactive, student-led work. Through a series of field-tested assignments, or "deliverables", students are introduced to and practice applying different concepts and methods from social innovation, social entrepreneurship, sustainable development, nonprofit management, and social impact evaluation to their specific work in their internships.
Co-requisite: INCO 505A, INCO 505I
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

INCO 505I - Internship: Semester in the City (Boston) or Semester for Impact (NH)
Credits: 8
While participating in Semester in the City (Boston) or Semester for Impact (New Hampshire), students will intern with a nonprofit, social mission business, or government agency for 30 hours per week for a full-semester. Students will gain work-based experience, learning more about themselves and their interests while also building skills and networks. Students are matched with an internship based on a variety of factors. are paired with a dedicated mentor at the internship site, and focus on a special project throughout the semester.
Co-requisite: INCO 505A, INCO 505B
Grade Mode: Letter Grading

INCO 529 - Writing Consultation
Credits: 2
Includes instruction in philosophy and techniques of tutoring, theoretical and practical issues in collaborative learning and complex-skill formation, and cross disciplinary conventions of writing. In addition to the classroom portion of course, each student undertakes a supervised practicum experience in the University Writing Center.
Grade Mode: Credit/Fail Grading

INCO 585 - Foreign Exchange
Credits: 0-16
Undergraduates who meet UNH Study Away Eligibility Requirements and the requirements set by the host institution, may participate in an international exchange program at one of UNH's partner institutions for a semester or academic year. Students must achieve the equivalent of a 'C' or above to receive international transfer credit. For more information contact the Coordinator of Student Programs at the Center for International Education.
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 586 - Foreign Exchange
Credits: 0-16
Undergraduates who meet UNH Study Away Eligibility Requirements and the requirements set by the host institution, may participate in an international exchange program at one of UNH's partner institutions for a semester or academic year. Students must achieve the equivalent of a 'C' or above to receive international transfer credit. For more information contact the Coordinator of Student Programs at the Center for International Education.
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 588 - Study Abroad Experience - Semester
Credits: 0
A Study Abroad Program co-requisite to enroll students in travel insurance and capture the mandatory study abroad fee.
Grade Mode: Not graded
Special Fee: Yes

INCO 589 - Study Abroad Experience Short
Credits: 0
For students enrolling in short term study abroad experiences in Fall and Spring semesters. Also for students enrolling in January term and Summer Session study abroad experiences.
Grade Mode: Not graded
Special Fee: Yes

INCO 590 - Student Research Experience
Credits: 1-4
Provides hands-on research experience to develop critical thinking, problem solving, and analytical skills. An entry-level research experience that introduces students to research theories, tools, and ethical issues. Each student completes a contract with a faculty mentor identifying the research activities the student will undertake.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

INCO 610 - Research Inquiry Seminar
Credits: 2-6
With the notion of understanding self as the basis for investigating the world, this seminar focuses on exploring elementary concepts of academic research. Students are engaged in identifying strengths, discovering their passions, discerning the joys and frustrations of research, and developing a sketch of a research project. Enrollment in McNair Scholars Program required.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

INCO 620 - Talk to Action: Facilitating Deliberative Democracy
Credits: 2-4
A theory-to-practice seminar that explores democratic theory from a deliberative perspective, dialogue and small group facilitation, civic engagement and social justice. Topics include moral disagreement, skills in public engagement and facilitation, creating social change, and moving from talk to action in the public sphere.
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Credit/Fail Grading

INCO 682A - The Washington Center Career Readiness Seminar
Credits: 4
This seminar course (co-requisite to internship) provides internship participants with professional development and career coaching necessary to guide students through transition from academic to professional. Assignments will be collected into final portfolio which will demonstrate integrative learning.
Co-requisite: INCO 682I
Grade Mode: Letter Grading

INCO 682I - Washington DC Internship
Credits: 4 or 8
Internship Placement in Washington DC through The Washington Center program. 32 hours per week, sites vary based on student major and interest.
Co-requisite: INCO 682A
Grade Mode: Letter Grading

INCO 683 - Global Internship
Credits: 0-6
Enables students to pursue a global internship through a third party provider. Students must meet all university requirements and complete required forms. Interested students should consult the Global Education Office. (Financial aid requires a minimum of 6 credits.)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 684 - Domestic Study Away
Credits: 0 or 16
For students enrolling in domestic study away experiences with third-party providers.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 685 - Study Abroad
Credits: 0-16
Enables students to pursue a semester, summer, or an academic year of foreign study in programs other than those offered by UNH. Students must provide the University Committee on Study Abroad with detailed information about the curriculum and must receive approval from that committee before registration. Credit awarded only upon successful completion of the course of study and after receipt by the committee of an official transcript. Interested students should consult the Center for International Education. (Financial aid requires a minimum of 6 credits.)
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 686 - Study Abroad
Credits: 0-16
Enables students to pursue a semester, summer, or an academic year of foreign study in programs other than those offered by UNH. Students must provide the University Committee on Study Abroad with detailed information about the curriculum and must receive approval from that committee before registration. Credit awarded only upon successful completion of the course of study and after receipt by the committee of an official transcript. Interested students should consult the Center for International Education. (Financial aid requires a minimum of 6 credits.)
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 687 - Study Abroad Experience
Credits: 0-16
Enables students to pursue a term of foreign study in programs other than those offered by UNH. Students must meet all university requirements and complete required forms. Credit awarded only upon successful completion of the course of study abroad and after receipt and processing of an official transcript. Interested students should consult the Center for International Education. (Financial aid requires a minimum of 6 credits.)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

INCO 688 - Study Abroad Insurance Program
Credits: 0
Study Abroad Insurance Program.
Grade Mode: Not graded
Special Fee: Yes

INCO 699 - McNair Summer Internship
Credits: 0
McNair Fellows; not graded; Summer only.
Grade Mode: Not graded

INCO 710 - Introduction to McNair Research
Credits: 2-4
An Introduction to methods and techniques of research design within the social sciences, mathematics and natural sciences, and the humanities. Concepts are tailored to students' research thesis. Students design and construct a research project (execution of project may be allowed for additional credit). A comprehensive written proposal is required. Enrollment in McNair Scholars Program required. Special fee on study abroad sections.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

INCO 790 - Advanced Research Experience
Credits: 1-4
Advanced research, scholarly or creative projects developed and conducted under the supervision of a faculty member. Provides students with the opportunity to apply advanced knowledge and techniques of their major to a specific problem or question. Significant preparatory course work for research, or other research experience approved by the INCO 790 faculty mentor required. INCO 790 may be repeated alone or in combination with INCO 590 for a maximum of 8 credits.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

INCO 791 - National Science Foundation Graduate Research Fellowship Preparation
Credits: 0
This course is designed to enable students to receive information, guidance, and support in applying for the National Science Foundation (NSF) Graduate Research Fellowship program (GRFP). Students will become familiar with the NSF, its mission, and the selection criteria for this fellowship. Through independent work and collaborative exercises, students will strengthen writing skills and develop a strong application.
Grade Mode: Credit/Fail Grading

INCO 795 - Washington Center Course
Credits: 4
Four-credit upper-level seminar course as co-requisite with The Washington Center internship program in Washington DC.
Co-requisite: INCO 682A
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

Interdisciplinary Studies (IDIS) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

IDIS 410 - College Success Seminar
Credits: 2
College Success Seminar provides the foundation for an informed and meaningful college experience. In the seminar, students discover how their individual capacities position them for the attainment of their goals within the academic community of the college. The course broadens understanding of key concepts common to integrative learning within higher education settings, particularly focusing on the ways multiple academic disciplines can improve success in applied careers. It empowers students to become informed users of information as well as engage in research and planning for subsequent courses. Students in this course will consider the ways various learning opportunities relate to one another and to the individual's personal, academic, and career goals. College Seminar fosters the self-awareness and intellectual perspective that are the hallmarks of well-educated persons and lifelong, engaged learners. For students in the AA General Studies program, this course will also guide students in developing their twenty credit academic concentration within the associate degree.
Equivalent(s): IDIS 502G
Grade Mode: Letter Grading

IDIS 560 - Research Methods in the Behavioral Sciences
Credits: 4
In this course, students will investigate research methods relevant to the behavioral sciences. Topics will include the scientific method, research ethics, behavioral measurement, experimental and nonexperimental research design, statistical analysis, and scientific writing. Students will apply knowledge of research design, ethics, scientific writing, and APA formatting to propose a viable empirical study to address a practical problem.
Attributes: Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-) and (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or EDU 510G with a minimum grade of D- or EDC 500 with a minimum grade of D-).
Equivalent(s): IDIS 501G
Mutual Exclusion: No credit for students who have taken PSYC 502.
Grade Mode: Letter Grading

IDIS 601A - Interdisciplinary Seminar: Being Happy
Credits: 4
The goal of this final general education course is to explore complex themes related to the human experience by making connections across multiple academic disciplines. Several topics will be offered each term and all sections will provide students with the opportunity to hone their research, writing, and presentation skills. Students will use advanced problem-solving skills and methodologies to reflect on the section's topic, collaborate with peers, and investigate solutions using interdisciplinary research and analysis. The theme for this topic is Being Happy, which explores concepts of happiness from the disciplines of psychology, biology, sociology, and technology.
Attributes: Interdisciplinary Sem (Gen Ed); Writing Intensive Course
Prerequisite(s): ((COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D-) and (COM 480 with a minimum grade of D- or COMM 543G with a minimum grade of D-) and (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D- or MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D- or MATH at GSC or in transfer with a score of MET) and (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-)) or Has Accred Bachelor Deg with a score of WAIV or ((CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and Has Accred Associate Deg with a score of WAIV).
Equivalent(s): IDIS 601, IDIS 601G
Grade Mode: Letter Grading

IDIS 601B - Interdisciplinary Seminar: Business of Beer
Credits: 4
The goal of this final general education course is to explore complex themes related to the human experience by making connections across multiple academic disciplines. Several topics will be offered each term and all sections will provide students with the opportunity to hone their research, writing, and presentation skills. Students will use advanced problem-solving skills and methodologies to reflect on the section's topic, collaborate with peers, and investigate solutions using interdisciplinary research and analysis. The theme for this topic is the Business of Beer, and explores themes ranging from beer culture to the beer industry to sustainability.
Attributes: Interdisciplinary Sem (Gen Ed); Writing Intensive Course
Prerequisite(s): ((COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D-) and (COM 480 with a minimum grade of D- or COMM 543G with a minimum grade of D-) and (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D- or MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D- or MATH at GSC or in transfer with a score of MET) and (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-)) or Has Accred Bachelor Deg with a score of WAIV or ((CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and Has Accred Associate Deg with a score of WAIV).
Equivalent(s): IDIS 601, IDIS 601G
Grade Mode: Letter Grading

IDIS 601C - Interdisciplinary Seminar: Paranormal Activities
Credits: 4
The goal of this final general education course is to explore complex themes related to the human experience by making connections across multiple academic disciplines. Several topics will be offered each term and all sections will provide students with the opportunity to hone their research, writing, and presentation skills. Students will use advanced problem-solving skills and methodologies to reflect on the section's topic, collaborate with peers, and investigate solutions using interdisciplinary research and analysis. The theme for this topic is Paranormal Activities which explores the unknown from multiple disciplines such as sociology, history, and psychology.
Attributes: Interdisciplinary Sem (Gen Ed); Writing Intensive Course
Prerequisite(s): ((COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D-) and (COM 480 with a minimum grade of D- or COMM 543G with a minimum grade of D-) and (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D- or MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D- or MATH at GSC or in transfer with a score of MET) and (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-)) or Has Accred Bachelor Deg with a score of WAIV or ((CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and Has Accred Associate Deg with a score of WAIV).
Equivalent(s): IDIS 601G
Grade Mode: Letter Grading

IDIS 797 - Integrative Capstone: Project in Interdisciplinary Studies
Credits: 4
This capstone course for the Individualized Studies major builds on previous study in the field and provides an opportunity to apply learning in an in-depth project. Projects must employ applied research, demonstrate knowledge of key concepts and theories, and integrate reflection on developments within this chosen area of study. Students synthesize their knowledge of theory and practice to develop and implement a project in their own area of professional interest. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Grade Mode: Letter Grading

International Affairs (IA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

IA 401 - Foundations of International and Global Studies
Credits: 4
The world's most pressing political, environmental, and socio-economic challenges lack clear or easy resolutions. This course provides students with a broad, interdisciplinary engagement of key challenges in international affairs. Students will learn how to analyze complex international issues, ranging from topics such as climate change, trade and technology, global pandemics, and war and conflict. As the introductory course to the International Affairs and Global Studies programs, this course provides foundational knowledge and analytical skills to make sense of ongoing issues an in interconnected world. Required for the International Affairs and Global Studies majors and minor. IA 401 should be completed before the international experience, preferably during the 1st or 2nd year of study.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

IA 501 - From Ideas to Evidence: Researching Global Issues
Credits: 4
How do we study and make evidence-informed arguments in international affairs? This course is designed to familiarize students with conceptual foundations and methodological approaches in international affairs. Students will learn how to break down complex topics into a feasible independent research project. Topics vary with faculty expertise, and have included war and political violence, global environmental issues, social mobilization and protest, and development, race, and gender. IA 501 prepares students for their international experience and their capstone project in IA 701. This course is normally taken before the international experience and is required before enrollment in IA 701.
Attributes: Writing Intensive Course
Prerequisite(s): IA 401 with a minimum grade of D-.
Grade Mode: Letter Grading

IA 695 - Independent Study in IA
Credits: 2-4
Faculty supervised independent Study in International Affairs.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

IA 701 - Investigating the World: Seminar in International Affairs and Global Studies
Credits: 4
As the capstone seminar in International Affairs and Global Studies, this course explores important topics in international affairs through individualized research projects and collective study of important topics in international affairs. Students learn how to investigate global issues, analyze their manifestations in different social, cultural, economic, and political contexts, and formulate new insights and policy recommendations. Drawing upon their international experience, second language skills, and other IA course work, students complete individual capstone research projects, through which they learn how to generate empirical research and explore real-world applications of research findings.
Attributes: Writing Intensive Course
Prerequisite(s): IA 401 with a minimum grade of D- and IA 501 with a minimum grade of D-.
Grade Mode: Letter Grading

Italian (ITAL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ITAL 401 - Elementary Italian I
Credits: 4
For students without previous training in Italian. Aural comprehension, speaking, writing, reading, (No credit for students who have had two or more years of Italian in secondary school; however, any such students whose studies of Italian have been interrupted for seven years should consult the Program Coordinator about possibly receiving credit).
Grade Mode: Letter Grading

ITAL 402 - Elementary Italian II
Credits: 4
For students who have completed ITAL 401 or an equivalent. Aural comprehension, speaking, writing, reading. (No credit for students who have had two or more years of Italian in secondary school; however, any such students whose studies of Italian have been interrupted for seven years should consult the Program Coordinator about possibly receiving credit).
Attributes: Foreign Language Requirement
Grade Mode: Letter Grading

ITAL 425 - Introduction to Italian Studies
Credits: 4
This course explores Italian culture and society and examines the role of Italian art, cuisine, literature and history via readings, films, music, and lectures. What makes Italy Italy? What does it mean to be Italian? How do phenomena such as regionalism, the Mafia, and the European Union shape our understanding of contemporary Italy? The course analyzes the interactions among culture, politics, history, and society as a means of defining national identity.
Attributes: World Cultures(Discovery)
Equivalent(s): ITAL 425H
Grade Mode: Letter Grading

ITAL 444A - Italians Come to America: Representing Emigration and Immigration on Both Sides of the Atlantic
Credits: 4
Course is designed around the phenomenon of emigration from Italy to the United States over the last century or so, with particular attention to the time period between the end of the nineteenth century and the mid-twentieth century. While core media under examination are literature and film, we also draw on historical, anthropological, political and sociological readings to help us consider the many issues involved.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ITAL 444B - Mamma Mia! Italian Motherhood from the Virgin Mary to Carmela Soprano
Credits: 4
This course examines motherhood and the special role of the Italian mother - la mamma italiana - in past and present italian society. Through readings from a wide variety of disciplines - theology, history, medicine, and literature - as well as an examination of art and film, we will analyze the origins and conflicted nature of Italian attitudes toward motherhood. Topics include: maternal love and self-sacrifice, beliefs about generation and their influence on maternal and paternal roles, Italian family structure. Mussolini's promotion of motherhood, the phenomenon of mammismo or "Mama's boys", and Italian-American mothers, including Carmela Soprano.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ITAL 503 - Intermediate Italian I
Credits: 4
For students who have completed ITAL 402 or an equivalent. A complete review of the fundamentals of grammar and syntax. Selected readings as a general introduction to Italian civilization and culture. Films and activities.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Grade Mode: Letter Grading

ITAL 504 - Intermediate Italian II
Credits: 4
For students who have completed ITAL 503 or an equivalent. A review of the fundamentals of grammar and syntax. Selected readings as a general introduction to Italian civilization and culture. Films and activities.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): ITAL 503 with a minimum grade of D-.
Grade Mode: Letter Grading

ITAL 510J - Rome: The Eternal City in Italian Culture
Credits: 4
This course offers an interdisciplinary introduction to the Eternal City and its role in Italian culture from the Middle Ages to the present. Together, the online and on-site components of the course allow students to compare their theoretical historical, social and artistic knowledge of Italian culture (acquired through readings, films and online lectures) with experiential knowledge gained through first-hand exposure to contemporary Rome. All readings in English. Fulfills the World Cultures Discovery requirement.
Co-requisite: INCO 589
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ITAL 522 - Modern and Contemporary Italian Culture
Credits: 4
This course explores the culture and society of modern and contemporary Italy through major works of fiction and non-fiction. In examining the emergence of the new nation-state, the course poses such questions as: What does "We have made Italy; now we need to make the Italians" mean? What is Fascism? What is "la dolce vita?" How have climate change and the refugee crisis changed Italy and Italians? The unification of Italy, colonialism, Fascism, Made in Italy, La Dolce Vita, domestic terrorism, North vs South are some of the topics examined. No prerequisites and all work is in English.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ITAL 525 - Italian Cinema
Credits: 4
Italian Cinema is a survey of the development of the film industry in Italy and of major Italian films. Through film, the course explores the culture, society, history, and politics of Italy, as well as the aesthetics, technology, economics, and theory of cinema. No prerequisites and all work is in English.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

ITAL 526 - The Art of Cinema in Italy
Credits: 4
While studying in Italy students explore the relationship between cinema as art, the reception and distribution of films cinema historiography (including archives), and technology. Students read about movements, directors, and expectations of genre, and identify connections between artistic concerns and the technology involved in making, preserving and restoring films. Students visit the Cineteca di Bologna and attend the annual Cinema Ritrovato film festival.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ITAL 552 - Race, Gender and Identity in the Renaissance
Credits: 4
How were race and gender understood in the Renaissance? How did differential social power influence culture while impacting daily life? How might this relate to race and gender in American culture today? This course explores the various ways race, gender, and other forms of identity were represented in Renaissance literary and artistic works, and how literature, theater and art can impact culture, politics, and society, especially in Renaissance Italy and the contemporary United States.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

ITAL 553 - Containing Difference: Race and Identity in Contemporary Italy
Credits: 4
This course explores how marginality, difference, and memory intersect in the Black, Jewish, and Slav communities of contemporary Italy. Through analysis of literary texts, film, and historical representation, students will map points of connection between representations of the Holocaust, violence along Italy's eastern borderland, Italian colonialism, and contemporary migration to Italy across the Mediterranean. These connections are not intended to suggest historical equivalency but rather an opportunity to "think together" different histories of violence and explore how the legacies of colonialism, antisemitism, and racism intertwine in Italy.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ITAL 595 - Practicum
Credits: 2
Practical use of Italian language and culture through special projects outside the classroom.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): ITAL 595A
Grade Mode: Credit/Fail Grading

ITAL 631 - Advanced Conversation and Composition I
Credits: 4
Rapid review of basic grammatical structures and in-depth study of more complex linguistic patterns. Vocabulary building. Frequent written compositions and oral presentations using materials on contemporary culture taken from the various media. Phonetics and oral/aural skills development. May be repeated barring duplication of subject.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

ITAL 632 - Advanced Conversation and Composition II
Credits: 4
Advanced spoken and written Italian to attain aural-oral fluency. Advanced reading and composition. May be repeated barring duplication of subject.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

ITAL 635 - Italian Food Studies
Credits: 4
Italian Food Studies acquaints students with the principles of aesthetics as they pertain to our understanding of and relationship to food. The philosophical aspects of the course are complemented by experiential components that emphasize the particularity as well as the diversity of the Italian regions.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

ITAL 651 - Introduction to Italian Culture and Civilization I: Middle Ages, Renaissance, Baroque
Credits: 4
Survey of major representative writers and artists, studied against the backdrop of social and cultural history. Dante, Petrarch, Boccaccio, Machiavelli, Marino. (Not offered every year).
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ITAL 652 - Introduction to Italian Culture and Civilization II: Age of Enlightenment, Romanticism, Modernism
Credits: 4
Survey of major representative writers and artists, studied against a backdrop of social and cultural history. Parini, Goldoni, Leopardi, Manzoni, Pavese, Calvino. (Not offered every year).
Attributes: Writing Intensive Course
Prerequisite(s): ITAL 631 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ITAL 675 - Special Topics in Italian Studies
Credits: 4
Topics drawn from all aspects and periods of Italian Studies. May be repeated for credit barring duplication of materials.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

ITAL 681A - Ancient and Medieval Italy
Credits: 4
Taking an interdisciplinary, but historically centered perspective, this course examines the construction of Italy as both a nation and culture from the pre-Roman period to the fifteenth century.
Attributes: Historical Perspectives(Disc)
Equivalent(s): ITAL 681B
Grade Mode: Letter Grading

ITAL 681B - Ancient and Medieval Italy
Credits: 4
Taking an interdisciplinary, but historically centered perspective, this course examines the construction of Italy as both a nation and culture from the pre-Roman period to the fifteenth century.
Attributes: Humanities(Disc)
Equivalent(s): ITAL 681A
Grade Mode: Letter Grading

ITAL 682B - Italian Culture: Early Modern, Modern and Contemporary
Credits: 4
Taking an interdisciplinary, but humanistically-centered perspective, this course examines the construction of Italy as both a nation and culture from the fifteenth century to the contemporary era.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

ITAL 683 - UNH in Bologna Summer Program
Credits: 0-8
This is an administrative placeholder course for the UNH in Bologna summer program. Students can be registered for both this administrative course number and the course number(s) of course(s) being offered on site.
Co-requisite: INCO 589
Attributes: Foreign Language Requirement
Grade Mode: Credit/Fail Grading
Special Fee: Yes

ITAL 701W - Capstone Course
Credits: 4
Students will investigate the intersections of the fields of Classics, Humanities, and Italian Studies through the exploration of a common theme. Working across disciplines, students will learn how scholars from these fields have approached common issues. Students will also demonstrate their ability to conduct research by engaging in a semester-long specialized project connected to the course theme.
Attributes: Writing Intensive Course
Equivalent(s): CLAS 701W, HUMA 701W
Grade Mode: Letter Grading

ITAL 775 - Topics in Literary & Cultural Studies
Credits: 4
Advanced course on a literary/cultural topic. Possible topics include African Italian Literature, Dante, Poetry, Theatre, Italy and the European Union, Social & Political Movements, Environment, Sustainability, Film. Barring duplication of subject, the course may be repeated for credit.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

ITAL 795 - Independent Study in Italian Language and Literature
Credits: 1-4
Individual guided study.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

ITAL 796 - Independent Study in Italian Language and Literature
Credits: 1-4
Individual guided study in Italian.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

Justice Studies (JUST)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

JUST 401 - Introduction to Justice Studies
Credits: 4
Overview of justice studies as the study of law and law-like systems. Includes literature from both the law and society, and criminology. Topics will include morality versus legality, the American legal civil and criminal system, torts, and adult versus juvenile justice.
Grade Mode: Letter Grading

JUST 405 - Technology, Crime, and Society: A Forensic Exploration of High-Tech and Digital Crime
Credits: 4
This course addresses the ways in which technology, crime, and law converge in the wider society in the twenty-first century. While emerging technologies bring great benefits, they also bring unintended and unforeseen consequences. This course uses a social science orientation to explore a new and evolving field of forensic technology.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

JUST 410 - Sexual Harassment and Rape Prevention (SHARPP) Peer Advocacy
Credits: 2-4
SHARPP Peer Advocacy is designed to provide the training and development of peer advocates to work directly with survivors of interpersonal violence while staffing SHARPP's 24/7 support line. Under NH state law (NH RSA 173:C), to have confidentiality as an advocate, individuals must successfully complete a minimum of 30-hours of specialized training and complete 6 hours of annual continuing education. This course will give students the basic understandings and skills needed to serve as a peer advocate, though is not meant to be the only training they receive in this role or as a comprehensive overview of all information needed to work with survivors.
Grade Mode: Letter Grading

JUST 501 - Research Methods
Credits: 4
Overview of the various methodologies used in justice studies research: quantitative, qualitative, and legal. Topics include issues of design such as ethics, reliability, and validity measurement. Students will design and write up research proposals using one of the methods reviewed in the course.
Attributes: Inquiry (Discovery)
Prerequisite(s): ADMN 510 with a minimum grade of C- or MATH 439 with a minimum grade of C- or MATH 644 with a minimum grade of C- or PSYC 402 with a minimum grade of C- or SOC 402 with a minimum grade of C-.
Grade Mode: Letter Grading

JUST 505 - Breaking Down Breaking Bad: The Analysis of Hollywood Crime and Justice
Credits: 4
In this course, we will consider the intersections of justice studies, crime/delinquency, policy/law, and media. Employing case studies, we will critically analyze depictions of crime, criminals, and law enforcement in popular culture. Specific attention is placed to the following areas: the social construction of crime and justice; the structure and influence of media; and the implications of media portrayals of crime and justice; the structure and influence of media; and the implications of media portrayals of crime for policy, law, and our understandings of deviance. You are invited to explore a multitude of theories, ideas, and research as you learn about this dynamic field of study.
Grade Mode: Letter Grading

JUST 520 - Girls Gone Bad: Delinquent Girls in Cultural Context
Credits: 4
This course explores the important and under-studied intersection between gender/girls and delinquency. Who is the typical female delinquent? What causes her to get into trouble? What happens to her if she is arrested? Topics include the extent and nature of adolescent girl's delinquency and theoretical explanations for delinquency. Focus on social contexts (family, peers, school), developmental and social psychological factors and adolescent girls' experiences with the juvenile system.
Grade Mode: Letter Grading

JUST 535 - Homicide
Credits: 4
Introduces to theory and research in homicide studies, including a review of the origins of and social responses to homicide.
Equivalent(s): SOC 535
Grade Mode: Letter Grading

JUST 550 - Mock Trial
Credits: 2
Participation in American Mock Trial Association intercollegiate competition. Study and preparation for trial of national case (criminal or civil, alternate years). Year long course, 2 credit hours per semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

JUST 551 - Mock Trial
Credits: 2
Participation in American Mock Trial Association intercollegiate competition. Study and preparation for trial of national case (criminal or civil, alternate years). Year long course, 2 credit hours per semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

JUST 591 - Forensic Psychology
Credits: 4
Forensic psychology is one of the fastest growing sub-fields in psychology and in fact one of the fastest growing disciplines in the world of social science. Still, most people in the general population as well as many individuals within the study of psychology know very little about what forensic psychology actually is. This course is designed to cover the various roles and issues that constitute the science of forensic psychology and to help student deepen their understanding of the various roles forensic psychologists play in the real world. Needless to say, this course will not train you to be a forensic psychologist, but hopefully it will spark your interest about a very exciting topic and encourage you to study some of the issues we touch on, as you move on academically.
Grade Mode: Letter Grading

JUST 595 - Special Topics
Credits: 1-4
Special topics of advanced study in Justice Studies. Selected offerings reflect faculty expertise in teaching and research. May be repeated in different topic areas.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

JUST 601 - Internship
Credits: 4
Weekly class meeting and a semester-long field internship in justice studies (e.g., law enforcement, corrections, victim advocacy, criminal or civil courts etc.) or a research internship working with a UNH faculty member or in a campus research lab (e.g., Crimes against Children's Lab, Prevention Innovations Research Center etc.) Placement must be approved by the justice studies internship coordinator. 155 internship hours required.
Grade Mode: Letter Grading

JUST 701 - Senior Seminar
Credits: 4
Advanced material in which the instructor has specialized knowledge through research and study. Topics may include the death penalty, terrorism, psychology of the jury, ethics and morality, immigration, therapeutic jurisprudence, and juveniles tried as adults.
Attributes: Writing Intensive Course
Prerequisite(s): JUST 401 with a minimum grade of C-.
Grade Mode: Letter Grading

JUST 795 - Reading and Research
Credits: 1-4
An independent study that is arranged by the student and supervised by a Justice Studies faculty member. Course requirements include: assembling and reading a substantial bibliography in the field; completing several written assignments and in some cases participating in hands-on experiences such as data collection and analysis. This course is by permission only and requires a signed agreement/proposal prior to registration. May be taken for 1-4 credits and includes a minimum of 3 hours of coursework per week per credit hour. Writing intensive in some select cases.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

Kinesiology (KIN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

KIN 501 - First Aid: Responding to Emergencies
Credits: 1
Covers the American Heart Association HeartSaver First Aid/CPR/AED: Adult, Child, Infant curriculum, the National Association of EMTs Bleeding Control for the Injured (BCon) curriculum which meets the Department of Homeland Security's Stop the Bleed initiative, and training for civilian responses to critical incidents.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

KIN 505 - Activity, Injuries and Disease
Credits: 4
Sports and exercise are a part of American society and are used as entertainment, leisure activity as well as a means to better health. Unfortunately while we partake in these activities few individuals are aware of the risks they are exposing themselves to. In addition as more women engage in sports and exercise medical science is realizing that many conditions and injuries are gender specific. It is well known that women athletes deal with reproductive, orthopedic and nutritional issues that differ greatly from men. Also we know that individuals with varying diseases benefit greatly from exercise. This course will join, musculoskeletal anatomy, injuries, gender and special problems together to explain how an individual can enjoy activities safely. In addition this course addresses the interpretation of current medical literature and how to utilize new information.
Attributes: Biological Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

KIN 585 - Emergency Medical Responder
Credits: 4
Standards of practice that conform to the content of the US Department of Transportation curriculum for Emergency Medical Responder (EMR). Initial evaluation and stabilization of patients at the scene of medical emergencies, CPR, and other basic medical care for illness and injury. Prepares the student for the National Registry of EMT(NREMT)EMRcertifications exams. (Note: this is a different level of certification than Emergency Medical Technician (EMT). KIN 684 and KIN 685 prepares students for EMTcertification).
Co-requisite: KIN 585L
Grade Mode: Letter Grading

KIN 585L - Emergency Medical Responder Lab
Credits: 1
Standards of practice that conform to the content of the US Department of Transportation curriculum for Emergency Medical Responder (EMR). Initial evaluation and stabilization of patients at the scene of medical emergencies, CPR, and other basic medical care for illness and injury. Prepares the student for the National Registry of EMT(NREMT)EMRcertifications exams. (Note: this is a different level of certification than Emergency Medical Technician (EMT). KIN 684 and KIN 685 prepares students for EMTcertification).
Co-requisite: KIN 585
Grade Mode: Letter Grading
Special Fee: Yes

KIN 652 - Clinical Kinesiology
Credits: 4
The science of human movement from biomechanical, neuromuscular, and anatomical perspectives; human muscular, joint, and connective tissue anatomy; and actions of skeletal muscles are detailed.
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Grade Mode: Letter Grading

KIN 653A - Musculoskeletal Assessment
Credits: 2
Principles and methodology of joint range of motion, body mechanics, and muscle strength evaluation. Uses muscle palpation, goniometry, manual muscle testing, hand-held dynamometry to facilitate understanding of musculoskeletal anatomy and assessment.
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

KIN 668 - Ergogenic Aids in Sports
Credits: 2
In sports, faster, higher, stronger, longer, and better is what everyone wants. Athletes and coaches seek out sports ergogenics that will give them a training and performance advantage over their competition. This course introduces the use of sports ergogenics and their use in athletic competition.
Equivalent(s): AT 668
Grade Mode: Letter Grading

KIN 684 - Emergency Medical Care: Emergency Medical Technician (EMT)
Credits: 4
Based on the curriculum established by the U.S. Department of Transportation for Emergency Medical Technician, and authorized by the State of New Hampshire-Bureau of Emergency Medical Services (EMS). Topics covered include trauma; medical, environmental and psychiatric emergencies; childbirth; hazardous materials; and infection control procedures. Students participate in clinical observations in one of the region's hospital emergency departments. Students have the option to take the state of NH-EMS Practical Examination and the National Registry Written Examination for EMT. Passage of both these examinations leads to national certification as an EMT.
Co-requisite: KIN 685
Prerequisite(s): ANSC 511 (may be taken concurrently) with a minimum grade of D- or ANSC 512 (may be taken concurrently) with a minimum grade of D- or ZOOL 401 (may be taken concurrently) with a minimum grade of D- or BMS 507 (may be taken concurrently) with a minimum grade of D- or BMS 508 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

KIN 685 - Emergency Medical Care: EMT Lab
Credits: 2
Basic emergency health care, including trauma patients, medical and environmental emergencies, and childbirth. Includes clinical experience with a local hospital and ambulance service. Prepares the student for the National Registry of EMT's Examination.
Co-requisite: KIN 684
Prerequisite(s): (ANSC 511 (may be taken concurrently) with a minimum grade of D- and ANSC 512 (may be taken concurrently) with a minimum grade of D-) or ZOOL 401 (may be taken concurrently) with a minimum grade of D- or (BMS 507 (may be taken concurrently) with a minimum grade of D- and BMS 508 (may be taken concurrently) with a minimum grade of D-) or ZOOL 401 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

KIN 690 - Study Abroad in Kinesiology
Credits: 4
This course offers students the opportunity to explore cultural experiences through the international kinesiology landscape and gain new perspectives on the role of the kinesiology industry (Exercise Science, Health & Physical Education, Health Sciences, Sport Management & Leadership, or Kinesiology) in both American and other societies.
Co-requisite: INCO 588
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

KIN 693 - Teaching Assistantship
Credits: 2
A) Physical Education Pedagogy; B) Exercise Leader; C) Outdoor Education; D) Science Labs; E) Cardiac Rehabilitation; F) Coaching. Students serve as teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching assistants' and administrative duties. May take two different sections.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

KIN 696 - Independent Study
Credits: 2-4
An advanced, individual scholarly project under the direct supervision of a faculty member.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

KIN 696W - Independent Study
Credits: 2-4
An advanced, writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty Adviser will prepare a written proposal that outlines: the questions to be pursued, the methods of investigation, the student's qualifications to conduct the research, the nature of the finished written product (e.g. case study, position paper, extended lab report). This proposal must be approved by major faculty and the department chair prior to the student's registration for KIN 696 WI. All KIN 696 WI projects must include: Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): KIN 770W
Grade Mode: Letter Grading
Special Fee: Yes

KIN 706 - Neurology
Credits: 4
Development, morphology, internal configuration, physiology, histology, function, and pathology of the human nervous system.
Co-requisite: KIN 707
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Grade Mode: Letter Grading

KIN 707 - Neurology Lab
Credits: 2
Basic histology, neuroanatomy and neurophysiology of the human nervous system. Use of brain specimens, videos and pathology case studies to elucidate cell structure, sensory and motor systems, and spinal cord, brainstem and cortical organization and anatomy.
Co-requisite: KIN 706
Prerequisite(s): (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or COMM 521 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

KIN 770W - Research Methods in Kinesiology
Credits: 4
The focus of this course will be the process of conducting research, starting with the development of the research question and working through issues associated with methodology, data collection, analysis, and interpretation. The course will examine research traditions commonly employed in investigations in exercise science, health sciences, health & physical education, and sport management and leadership: group comparison designs, historical research, and behavioral analysis (single subject design). The goal of this course is to prepare students to conduct research and understand the components of the process.
Attributes: Honors course; Writing Intensive Course
Equivalent(s): EXSC 696W, KIN 696W
Grade Mode: Letter Grading

KIN 798 - Special Topics
Credits: 1-4
New or specialized courses not normally covered in regular course offerings. Special fee on some sections.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Languages, Literatures & Cultures (LLC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

LLC 444I - US Latinx Cities: Urban Culture, Society and Space
Credits: 4
This course will explore urbanism of four US Latinx Cities: Los Angeles, Chicago, Miami, and New York. We will examine how Hispanics have historically shaped and changed the landscape of each of these cities in the United States through various forms of cultural production such as literature, music, film and television as well as discuss the social issues that these cities and communities face such as social inequality, gentrification, race relations, sexuality/gender, and transportation.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

LLC 525 - Topics in World Cultures
Credits: 4
Topical examination of world cultures and cultural history across global regions. Topics might include histories of migration, sports, environmental movements, political movements, pop culture, etc. Conducted in English.
Attributes: World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

LLC 535A - Professional Culture in Europe
Credits: 4
Conducting business with countries of Europe. The course focuses on the central role played by professional culture and business practices in the global marketplace.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

LLC 540 - Film History
Credits: 4
Examines the historical development of film from a global perspective and the emergence of national cinemas as well as the cross-cultural influences that have produced the modern transnational film industry.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

LLC 552 - Comparative Literature: Masterpieces of World Literature II
Credits: 4
Comparative studies of major authors representative of important periods of literary achievement. Renaissance to modern. Studies the age of empires through the colonial and post colonial periods. Introduction to various concepts of literature and genre. Topics and approaches may vary from semester to semester.
Attributes: Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

LLC 555 - Discover Cuba: An Arts Experience
Credits: 4
This discovery course is designed to provide students with first-hand experience of the art, history, culture, music and visual arts of Cuba. The course combines an online academic class with on-site experiential learning though a fourteen day trip to Cuba. The course takes a highly contextual approach, locating the artwork in its historical, social, economic and cultural context for students to analyze and understand the complexities of modern Cuba.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

LLC 560 - Divine Madness and Dangerous Minds! - Mental Health in Literature and Art
Credits: 4
Analysis and interpretation of art, literature, film, and various other representations of mental health and 'madness' from across the globe. Discussions of 'madness' are informed by artistic, medical, theoretical, political, and historical perspectives.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

LLC 595 - Language Practicum
Credits: 2-4
Practical use of language skills outside the classroom through special projects.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

LLC 790 - World Languages Capstone
Credits: 4
The World Languages capstone consists of a semester-long exploration of the language learning enterprise, study of life-long language learning strategies, reflection on intercultural competence, and development of comprehensive digital portfolio, including a reflection on the course of study and a language assessment as well as a culminating project.
Grade Mode: Letter Grading

LLC 791 - Methods of Foreign Language Teaching
Credits: 4
Objectives, methods and techniques in teaching foreign languages from elementary grades through college. Discussion, demonstration, preparation of instructional materials, micro-teaching of the language skills, including developments in computer-aided instruction.
Equivalent(s): SPAN 791
Grade Mode: Letter Grading

Latin (LATN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

LATN 401 - Elementary Latin I
Credits: 4
Explore the world of the ancient Romans by learning the basic elements of Latin: the alphabet, vocabulary and grammar. By the end of the first semester students will be prepared to read short adapted passages on the history, mythology and culture of the Romans and the many cultures that they were associated with. Ideal preparation for exploration in politics, legal studies, music, myth/religion, theology, philosophy, medicine and the history of science.
Grade Mode: Letter Grading

LATN 402 - Elementary Latin II
Credits: 4
A continuation of LATN 401, this course expands students' abilities to read simple to moderately complex Latin passages, furthering their insights into the fascinating history and culture of the ancient Romans.
Attributes: Foreign Language Requirement
Grade Mode: Letter Grading

LATN 503 - Intermediate Latin I
Credits: 4
Review. Readings from Cicero, Caesar, Sallust, Livy, Catullus, Horace, Ovid, Plautus, Terence, and Seneca.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Grade Mode: Letter Grading

LATN 504 - Intermediate Latin II
Credits: 4
Review. Readings from Cicero, Caesar, Sallust, Livy, Catullus, Horace, Ovid, Plautus, Terence, and Seneca.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Grade Mode: Letter Grading

LATN 605 - Readings in Latin Literature
Credits: 4
Reading and analysis of major works of Latin literature. Focus on improving translation skills and comprehension of Latin grammar and Latin language. Introduction to the critical analysis of Latin literature in the context of Roman civilization and culture. Satisfies foreign language requirement.
Attributes: Foreign Language Requirement
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

LATN 606 - Readings in Latin Literature
Credits: 4
Reading and analysis of major works of Latin literature. Focus on improving translation skills and comprehension of Latin grammar and Latin language. Introduction to the critical analysis of Latin literature in the context of Roman civilization and culture. Satisfies foreign language requirement.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

LATN 753 - Advanced Studies in the Literature of the Golden Age
Credits: 4
A) Lucretius; B) Catullus; C) Caesar; D)Sallust; E) Vergil; F) Horace; G) Tibullus; H) Propertius; I) Ovid; J) Livy. Major Roman authors from the dictatorship of Sulla to the death of Augustus. Each special topic may be repeated two times for up to eight credits.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

LATN 754 - Advanced Studies in the Literature of the Golden Age
Credits: 4
A) Lucretius; B) Catullus; C) Caesar; D)Sallust; E) Vergil; F) Horace; G) Tibullus; H) Propertius; I) Ovid; J) Livy. Major Roman authors from the dictatorship of Sulla to the death of Augustus. Each special topic may be repeated two times.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

LATN 755 - Advanced Studies in the Literature of the Silver Age
Credits: 4
A) Seneca the Younger; B) Persius; C) Petronius; D) Lucan; E) Statius; F) Quintilian; G) Martial; H) Juvenal; I) Tacitus; J) Pliny the Younger. Major Roman authors from the reign of Nero to the death of Trajan. Each special topic may be repeated two times.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Leadership (LD) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

LD 600 - Becoming an Effective Leader
Credits: 4
This course is focused on the strengths and characteristics of effective leaders. Topics may include self-leadership, the difference between leadership and management, the importance of communication, trust, team building, systems leadership, change leadership and conflict resolution. Students may illustrate the value of diversity, systems leadership, change leadership and conflict resolution within teams and organizations, as well as assess personal leadership styles and the leadership of others.
Attributes: Writing Intensive Course
Equivalent(s): LD 600G
Grade Mode: Letter Grading

LD 660 - Leadership Theory
Credits: 4
This course guides participants in developing lifelong learning skills for leadership that apply to any organizational level in a wide variety of environments. Both historical and current leadership theory and practice are explored. By taking an active leadership role in this course, students examine the issues, challenges, and practical skills of leadership in today's workplace. Presentations, team activities, reflection, interviewing, and feedback may be activities of developmental components within the course.
Prerequisite(s): LD 600 with a minimum grade of D- or LD 600G with a minimum grade of D-.
Equivalent(s): LD 602G, MGMT 602G
Grade Mode: Letter Grading

LD 704 - Leading Teams
Credits: 4
Leadership is the process of motivating people to achieve project goals, usually in a dotted-line organizational setting. The success or failure of the project, and by extension the manager, is dependent upon the manager's ability to assess the team as a whole, (strengths and weaknesses), and to then apply that analysis to the individual team members. Within the course, students will have the opportunity to survey and discuss multiple methodologies used to evaluate teams. Students may analyze how organizational dynamics and structure impact the manager, limit or increase their power, and their ability to perform their job.
Prerequisite(s): (LD 600 with a minimum grade of D- or LD 600G with a minimum grade of D-) and (LD 660 with a minimum grade of D- or LD 602G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-).
Equivalent(s): LD 605G
Grade Mode: Letter Grading

LD 725 - Volunteer Leadership
Credits: 4
Volunteers are increasingly important in the United States. Not only do financially strapped organizations use volunteers to enhance their capacity, but policy makers and community leaders see volunteering as a vehicle to improve communities and solve public problems. This course may cover topics of volunteer administration: such as planning, marketing, recruitment, screening and selection, training, supervision, evaluation, and recognition. Students will gain an understanding of how the demographic of today's volunteer is changing, how best to deploy the talents of multi-generational volunteers, and how to provide a structured, objective framework to be accomplished by the volunteer corps. Legal issues surrounding the use of volunteers and designing effective volunteer policies may also be addressed.
Equivalent(s): LD 625G
Grade Mode: Letter Grading

Life Sciences & Agriculture (LSA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

LSA 400 - Freshman Academic Experience I
Credits: 1
Assistance to the undeclared student in identifying a major within the College of Life Sciences and Agriculture, including the biological, natural, and social sciences. The goal of this seminar is to support students in developing a sound academic program and assist them in making a successful transition from high school to college. The seminar also covers strategies for being a successful college student. Required for all first-semester LSA undeclared students.
Grade Mode: Credit/Fail Grading

LSA 401 - Scientific Research Exploration
Credits: 2
This course introduces incoming freshmen to the scientific research process via a hands-on approach, which includes case studies, group work, and a two-week research immersion experience under the guidance of the College of Life Sciences and Agriculture (COLSA) faculty. Course readings, discussions, and active participation in local research will facilitate the student's exploration of experimental design, hypothesis testing, data collection and analysis, interpretation of results, and effective communication of research findings. In the context of a group research project, students begin thinking like scientists, as well as strengthening their math, writing, an oral communication skills. Open to incoming freshmen only.
Grade Mode: Credit/Fail Grading

LSA 402 - Freshman Academic Experience II
Credits: 1
The second part of Freshman Academic Experience. This course reviews academic skills and focuses on your "academic career" as a student in COLSA including: major choices, opportunities for enrichment, networking, internships, and career paths. The goal of this seminar is to support students in developing a sound academic program and assist them in making a successful transition to college. The seminar also covers research strategies and building effective presentations. Required for all LSA undeclared students.
Prerequisite(s): LSA 400 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading

LSA 601 - P2Bio Professional Preparation Seminar
Credits: 1
This course is required for P2Bio transfer students entering UNH in the fall semester. The course provides students with opportunities to learn about career pathways and curricular opportunities available through the P2Bio program. Students will hone skills as developing sciences scholars with an emphasis on professional development and metacognition.
Grade Mode: Credit/Fail Grading

LSA 700 - Peer Advisor Leadership Experience
Credits: 2
Training course for peer advisors who lead/support LSA 400/402. The course meets twice a week; once in LSA 400/402 and once with the Program Coordinator. This course focuses on leadership training, teaching, group dynamics, and the UNH community. Students accepted into the role of Peer Advisor will be required to sign a contract committing to an entire year of Peer Advisor Role. This course prepares students to take on a teaching/advising/mentoring role with COLSA.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

Lifetime Activity Program (LAP)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

LAP 501 - Lifetime Activity Program: Special Topics
Credits: 2
The UNH Lifetime Activity Program UNH activity courses are designed to enhance the experience of UNH students of all abilities and contribute to the overall health and well-being of the UNH student population. Participate in a fun sport that combines elements of tennis, badminton, and ping-pong. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime. The same topic may be repeated once.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading
Special Fee: Yes

LAP 502 - Lifetime Activity Program: Pickleball
Credits: 2
Participate in a fun sport that combines elements of tennis, badminton, and ping-pong. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 503 - Lifetime Activity Program: Ultimate Frisbee
Credits: 2
Learn to play ultimate frisbee, a "Player defined and controlled non-contact team sport played with a flying disc on a playing surface with end zones in which all actions are governed by the "Spirit of the Game." Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 504 - Lifetime Activity Program: Strength Training
Credits: 2
Improve your fitness and learn how to safely strengthen the whole body. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 505 - Lifetime Activity Program: Intro to Running
Credits: 2
Learn the basics of how to run for fitness and overall wellbeing. This course will cover everything from how to choose the right running shoe to preparing for a 5k running race and beyond. Class time will be spent running outdoors. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 506 - Lifetime Activity Program: Fly Fishing
Credits: 2
This course is a basic introduction to fly fishing. It is a hands-on, educational fishing experience, with instruction and feedback from an experienced instructor. For the angler who really wants to learn how to fly fish on their own, this class is a tremendous value! You do not need any of your own equipment or experience. The course fee covers equipment rental and travel.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading
Special Fee: Yes

LAP 507 - Lifetime Activity Program: Yoga and Meditation
Credits: 2
This course introduces the lifelong skills of yoga and meditation. Learn how to practice different variations of yoga and meditation. You will gain skills in relaxation and mindful movement. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 508 - Lifetime Activity Program: Vinyasa Flow Yoga
Credits: 2
Are you looking to move and breath in a mindful practice? This yoga class emphasizes movement between yoga poses, guided by your breath. Expect to learn the fundamental skills of vinyasa flow yoga, a practice that will serve you throughout your lifetime. No previous yoga experience necessary.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 509 - Lifetime Activity Program: Standup Paddleboarding
Credits: 2
This course will teach students stand up paddle boarding skills, emphasizing paddle techniques, core strength, and more. No experience required. If you already know the basics, you'll walk away with new skills and techniques. Take time in your busy schedule to play outside and learn how to strengthen your whole body through paddling. The special fee covers equipment rental.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading
Special Fee: Yes

LAP 510 - Lifetime Activity Program: Indoor Rock Climbing
Credits: 2
Explore new heights! This course provides students with an introduction to rock climbing in an indoor setting. Students will learn the basics of rock climbing while gaining strength and confidence. This course can also provide a foundation for students who want to eventually learn to climb outdoors. No experience required. If you already know the basics, you'll walk away with new skills and techniques.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 511 - Lifetime Activity Program: Disc Golf
Credits: 2
Disc golf is a flying disc sport in which players throw a disc at a target; it is played using rules similar to golf. Unlike golf, this game uses natural landscapes as courses. This course will help students develop the fundamental skills to play disc golf. Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 512 - Lifetime Activity Program: Volleyball
Credits: 2
This course is designed to help students develop basic skills and knowledge in the game of volleyball. No experience required! Students will learn fundamental skills and rules of the game. Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 514 - Lifetime Activity Program: Wilderness First Aid (WFA)
Credits: 2
WFA is the perfect course for the outdoor enthusiast or trip leader who wants a basic level of first aid training. The course is taught by UNH faculty working with SOLO Wilderness Medicine. Certifications are provided by SOLO and are valid for two years. This course is approved to recertify SOLO Wilderness First Responders.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading
Special Fee: Yes

LAP 515 - Lifetime Activity Program: Lacrosse
Credits: 2
Learn and develop basic skills of North America's indigenous sport. Play no contact games including Speed Lacrosse and Sixes. No equipment or previous experience required. Lifetime Activity courses provide a fun, low risk, way to learn new activities and skills that will stick with you for a lifetime.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 516 - Lifetime Activity Program: Cycling
Credits: 2
Learn the basics of cycling for fitness and overall wellbeing. Class time will be spent cycling outdoors. Students of all cycling abilities are welcome. Students should plan to bring their own equipment (bike and helmet), though bikes may be available for students who need them. Contact the instructor prior to registration if you need equipment.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 517 - Lifetime Activity Program: Personal Training
Credits: 2
This course provides students with foundational understanding and knowledge of human movement science, functional assessment, and program design as it applies to the field of personal training. The course follows the National Academy of Sports Medicine (NASM) personal trainer curriculum.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading

LAP 518 - Lifetime Activity Program: Ice Climbing
Credits: 2
This course introduces students to the fundamentals of ice climbing including best practices for trip planning, equipment use, technical skills, and risk management necessary to develop basic ice climbing/rappelling movement techniques and skills. Student interaction and active practical skill development are emphasized. No previous experience is required. All specialized equipment and transportation are covered by the course fee.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading
Special Fee: Yes

LAP 520 - Lifetime Activity Program: Well-Being
Credits: 2
Well-being is a state of thriving that is influenced by both your individual choices and the communities in which you belong. In this course, you will learn the lifelong skills of caring for your wellness, harnessing your strengths, and making value-guided choices. Through this exploration you will come to understand what it means to live a life of authenticity and purpose. Opportunities to enhance existing and gain new coping skills will be provided. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

LAP 521 - Lifetime Activity Program: Aikido
Credits: 2
Aikido is a modern Japanese martial art that originated in the 20th century. Practitioners use dynamic throwing and pinning techniques that minimize an aggressor's power, regardless of an attacker's advantage in size or strength. While the techniques emphasize self-defense, the approach has benefits for mindfulness, conflict management, and stress reduction. Safety and mutual respect are paramount. We also believe that practice and learning should be fun!
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

LAP 522 - Lifetime Activity Program: Lifetime Activities Sampler
Credits: 2
The vision of this course is to provide students with an introduction to several lifetime activity areas. Activities include, but are not limited to yoga, health & well-being, hiking, cycling, pickleball, and meditation. The course is ideal for students interested in exploring several activities in one Lifetime Activity Program course. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

Linguistics (LING)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

LING 405 - Introduction to Linguistics
Credits: 4
Overview of the study of language: universal properties of human language, Chomsky's innateness hypothesis, language acquisition in children, dialects and language variation, language change. Includes an introduction to modern grammar (phonology, syntax, and semantics) and to scientific linguistic methodology.
Attributes: Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): LING 405H
Grade Mode: Letter Grading

LING 603 - Phonetics
Credits: 4
This course introduces students to the study of the physical properties of speech sounds, including the transcription of English and other languages using the International Phonetics Alphabet, basic anatomy and physiology of the vocal tract, and the acoustic properties of vowels and consonants. Additional topics to be covered include phonetic variation and change, and the perception of speech sounds.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): ENGL 603
Grade Mode: Letter Grading

LING 604 - Phonology
Credits: 4
This course introduces students to the study of phonology, or the mental organization of speech sounds. Topics covered include phonological typology, the concept of phonemes and mental representations of sounds, distinctive features and rule-based phonology, and a basic introduction to Optimality Theory.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): ENGL 604
Grade Mode: Letter Grading

LING 605 - Intermediate Linguistic Analysis
Credits: 4
Analysis and problem solving in phonology, morphology, and syntax using data from many languages. Emphasis is both practical (learning how to describe grammar and sound system of a language) and theoretical (understanding languages' behavior).
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): ENGL 605
Grade Mode: Letter Grading

LING 606 - Languages of the World
Credits: 4
A survey of the languages of the world from genetic, areal, and typological perspectives. Students learn about the geographic and demographic distribution of language families and language isolates, as well as about structural characteristics of languages, language families and language areas. Additional topics include language endangerment and the question of linguistic universals. Students work collaboratively on a project investigating a particular language family, giving in class presentations and writing up a final project report. Some prior knowledge of phonetics, phonology, morphology, and syntax is necessary.
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): ENGL 606
Grade Mode: Letter Grading

LING 607 - Syntax
Credits: 4
In this course, students explore the knowledge of sentence structure in an attempt to build a basic theoretical model of grammar. Students look at what we know when we know how to form phrases, sentences, and various grammatical constructions. In addition, students take an in-depth look at relationships between different elements within sentences and how best to formally account for these things. The course approaches all of this from a Chomskian/Generativist perspective in particular, although other frameworks will be discussed.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): ENGL 607
Grade Mode: Letter Grading

LING 608 - Semantics
Credits: 4
In this course we explore meaning in language in-depth and from many different angles. First we discuss the nature of meaning and the various levels we must describe to move towards a more complete understanding. Along the way we examine meaning in words and how these meanings are stored, related and represented both in our knowledge and in the mind/brain. From there we will spend a significant amount of time uncovering the meanings of sentences by looking at sentential meaning as a function of the sum of its parts.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Equivalent(s): ENGL 608
Grade Mode: Letter Grading

LING 695 - Senior Honors
Credits: 4
Open to senior LING majors who, in the opinion of the department, have demonstrated the capacity to do superior work.
Attributes: Honors course
Grade Mode: Letter Grading

LING 718 - Morphology
Credits: 4
Morphology is the study of word formation and the mental lexicon. This course explores processes of derivation, compounding and inflection that allow us to form new words. Students will become proficient in analyzing word formation processes in English and other languages, including deploying terminology used by morphologists. Students will learn and practice the conventions of "writing like a linguist".
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D-.
Equivalent(s): ENGL 718
Grade Mode: Letter Grading

LING 719 - Sociolinguistics Survey
Credits: 4
How language varies according to the characteristics of its speakers: age, sex, ethnicity, attitude, time, and class. Quantitative analysis methods; relationships to theoretical linguistics. Focus is on English, but some other languages are examined.
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): ENGL 719
Grade Mode: Letter Grading

LING 728 - Language and Gender
Credits: 4
This course will explore a variety of topics around the theme of language and gender, including the relationship between gender, language and power; the linguistic marking of gender; how people use language to construct and perform their gender; how gender intersects with other facets of identity, including sexuality and race and ethnicity.or.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or WS 401 with a minimum grade of D- or WS 405 with a minimum grade of D-.
Grade Mode: Letter Grading

LING 779 - Linguistic Field Methods
Credits: 4
Study of a non-Indo-European language by eliciting examples from an informant, rather than written descriptions of the language. Students learn how to work out the grammar of a language from raw data. (Not offered every semester).
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): ENGL 779
Grade Mode: Letter Grading

LING 790 - Special Topics in Linguistics Theory
Credits: 4
Advanced course on a topic chosen by the instructor. Inquire at the English department office for a full course description each time the course is offered. Topics such as word formation, dialectology, linguistic theory, and language acquisition, history of linguistics, language and culture, cross-disciplinary studies relating to linguistics. Barring duplication of subject, may be repeated for credit.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): ENGL 790
Grade Mode: Letter Grading

LING 793 - Phonetics and Phonology
Credits: 4
Sound system of English and of other languages viewed from the standpoint of modern linguistic theory, including the following topics: the acoustic and articulatory properties of speech sounds, the phonemic repertoires of particular languages, phonological derivations, and prosodic phenomena such as stress and intonation.
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): ENGL 793
Grade Mode: Letter Grading

LING 794 - Syntax
Credits: 4
Relationship of grammar and meaning viewed from the standpoint of modern linguistic theory. Emphasis on the syntax and semantics of English, with special attention to the construction of arguments for or against particular analyses.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 405 with a minimum grade of D- or LING 405 with a minimum grade of D- or ENGL 605 with a minimum grade of D- or LING 605 with a minimum grade of D-.
Equivalent(s): ENGL 794
Grade Mode: Letter Grading

LING 795 - Independent Study
Credits: 1-4
A) Synchronic Linguistics, B) Diachronic Linguistics, C) Linguistic Theory. For students showing a special aptitude for linguistics who desire to pursue a line of inquiry for which no appropriate course is offered. All requests must be forwarded by the faculty sponsor to the director of the Inter-departmental Linguistics Committee.
Grade Mode: Letter Grading

Management (MGMT) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MGMT 410 - Principles of Management
Credits: 4
This course examines a wide range of business theories and practical applications related to effective management. In addition to learning about what management is and what managers do, students also explore and assess their own management skills and styles. Students apply critical thinking skills to core business functions. Focus is on contributing factors to management styles such as communication, the role of the manager, design of the organization, ethical issues, social responsibility and globalization. Course format may include the application of these management roles and competencies through experiential activities, group exercises and case analysis.
Attributes: Writing Intensive Course
Equivalent(s): MGMT 500G
Grade Mode: Letter Grading

MGMT 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Management. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): MGMT 544G
Grade Mode: Letter Grading

MGMT 566 - Organizational Behavior
Credits: 4
This course focuses on practical application of current research and concepts in human behavior in order to understand and analyze organizations. Interpersonal processes, problem-solving, and managerial decision-making are considered through examination of the roles of power, politics, ethics, and conflict in organizations. Topics may include individual behavior, motivation and performance, interpersonal relations, small group relations, the role of leadership, and organizational culture.
Attributes: Writing Intensive Course
Equivalent(s): MGMT 566G
Mutual Exclusion: No credit for students who have taken BUS 620.
Grade Mode: Letter Grading

MGMT 569 - Budget Management
Credits: 4
One of the primary roles of a manager is to manage budgets and to communicate with accounting and finance professionals. This course is designed to provide budgeting skills to managers, enabling them to help in the decision-making process related to the financial health of their organizations. Students will have the opportunity to become familiar with processes related to development and management of the budgeting process, accounting practices, and financial oversight.
Prerequisite(s): CMPL 402 with a minimum grade of D- or CMPL 502G with a minimum grade of D- or MGMT 502G with a minimum grade of D- or CMPL 512 with a minimum grade of D- or CMPL 612G with a minimum grade of D-.
Equivalent(s): MGMT 569G
Grade Mode: Letter Grading

MGMT 595 - Practicum in Management
Credits: 4
This project-based practicum is an entry-level field experience designed to assist Business Management majors in exploring career and vocational settings in which they can use and apply their business-related knowledge and skills. The nature of the practicum is exploratory in nature, involves extensive student initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum mentor. A supplementary objective of the practicum is to explore and assess possibilities for settings and situations in which the learner may engage in an upper level Business Management Internship. Registration for this course is by permission of Academic Affairs. Earlier registration deadlines may apply.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): MGMT 540G
Grade Mode: Letter Grading

MGMT 608 - Fostering Inclusion and Diversity in the Workplace
Credits: 4
Today's workforce is diverse; individuals are frequently interacting with peers, managers and customers, each with different backgrounds, experiences, group affiliations, neurodiversity, sexual orientations, religions, and identities. With equity and respect, these differences can enhance performance and creativity; workplace diversity can also help to increase employee and customer engagement, contentment, and inclusion. This course explores ways in which employees and managers can cultivate an inclusive workplace culture and offers means for expanding appreciation of each individual's uniqueness. This course may review paradigms that limit and promote inclusion, such as unconscious biases, behavioral change, leadership, acknowledgement of the dimensions of diversity, and enforcement of patterns by employers, employees, and society as a whole. Recommended: MGMT 566.
Equivalent(s): MGMT 608G
Grade Mode: Letter Grading

MGMT 625 - Legal and Ethical Issues in Business Management
Credits: 4
This course addresses the nature, functions, and operations of the legal system and how legal rules affect business operations. Students examine the legal framework of laws, rules, health and safety regulations, and judicial opinions that have direct and profound impacts on managerial decision-making and practice. Considerable emphasis is placed on the federal, state, and local regulations that directly impact business practice; consumer laws, labor and employment law; and the social and ethical environment of business policy and management practice.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.
Equivalent(s): MGMT 625G
Grade Mode: Letter Grading

MGMT 626 - Project Management Strategies
Credits: 4
This course examines tools and methods used to manage projects of varying size and scope, and explores how these tools can be deployed to plan, schedule, execute, and assess projects from start to finish. Topics may include cost, risk, and quality management frameworks. While designed primarily for students in management-related and technology-related fields, the course takes a broad approach, recognizing the diversity of professions which require project management skills and knowledge. Students may be introduced to the roles and responsibilities of project and program managers in various settings, to the knowledge areas of the Project Management Institute, and to the significance of project management teams.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D-.
Equivalent(s): MGMT 626G
Grade Mode: Letter Grading

MGMT 634 - Contemporary Management Issues
Credits: 4
In this course, students examine how such issues as globalization, technology, the environment, business ethics, and business-government relations impact how businesses are managed. They also examine how leaders manage leaner and flatter organizations comprised of diverse employees working in teams. Students may explore the broad impacts of these contemporary management issues through reading, research, case studies, and active discussions.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D-.
Equivalent(s): MGMT 601G
Grade Mode: Letter Grading

MGMT 642 - International and Cross-Cultural Management
Credits: 4
Globalization, remote work environments, outsourcing, new technology, supply chains and current business practices require working across time zones, countries, and cultural norms, all of which challenge traditional assumptions about how to manage people and organizations. Students may study how growing worldwide interconnections impact globalization on managing organizations and people worldwide. This course reflects new and emerging individual and interrelated factors influencing international managers which may include legal, political, economic, competitive, socio/cultural, technological, and environmental factors. The class incorporates real-world examples, research, and practical application, allowing students to adjust, adapt, and navigate the changing global business landscape, assessing opportunities and addressing potential challenges.
Equivalent(s): MGMT 604G
Grade Mode: Letter Grading

MGMT 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in management. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject matter.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): MGMT 644G
Grade Mode: Letter Grading

MGMT 680 - Global Business
Credits: 4
This course introduces the concept of global business as a system and the theories which underlie it; institutions that are visual evidences of it; production, marketing, financial, legal, human resource management, culture, politics and other subsystems which comprise the total system. It also examines national governmental and international institutional controls and constraints, which impact the environment in which the system operates. Students may examine growing worldwide interconnections to gauge the impact of globalization on managing organizations and people worldwide. Global business has an impact on all businesses, regardless of size or location of your business.
Attributes: Writing Intensive Course
Equivalent(s): MGMT 633G
Grade Mode: Letter Grading

MGMT 685 - Global Innovation
Credits: 4
This course recognizes the deep connection between global trade, technology, and innovation. Combining studies in global business and its responsible management with the specialized knowledge of technology and global innovation management gives students the opportunity to prepare for successful careers in a global environment for firms that compete on the basis of innovation in products and services. Students may learn how the product life-cycle influences the commercialization of new technology products in a diverse and ever-changing global market.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): MGMT 632G
Grade Mode: Letter Grading

MGMT 695 - Internship in Management
Credits: 4
The upper level Business Management Internship is a field-based experience designed to develop and hone the practical application skills of a Business Management major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the general auspices of their faculty internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where business management-related knowledge and skills are applied. NOTE: It is recommended that learners have completed the majority of upper level course work in their major prior to enrolling in this course. Registration for this course is by permission of Academic Affairs. Earlier registration deadlines may apply.
Equivalent(s): MGMT 640G
Grade Mode: Letter Grading

MGMT 706 - Fundraising and Resource Development
Credits: 4
Fundraising is the act of soliciting for contributions or pledges. Development, on the other hand, refers to nurturing and building relationships over time between donors/philanthropists and organizations. The purpose of this course is to differentiate fundraising, grant writing, and development strategies in organizations. Students will examine the roles and responsibilities of the individuals within an organization that motivate, nurture, engage, and maintain donor relationships. This course may review ethics and transparency within fundraising, technology to facilitate resource development, social and business trends, and organizational adaptation.
Attributes: Writing Intensive Course
Equivalent(s): MGMT 605G
Grade Mode: Letter Grading

MGMT 707 - Nonprofit Management
Credits: 4
This course guides participants in understanding nonprofit organizations and their management. Topics may include motivations for starting nonprofit organizations as well as theories and strategies to balance the unique needs of nonprofits within market economies. This course covers considerations for staffing and volunteer management, funding sources, asset management, program evaluation and leadership structures as elements of identifying qualities of successful nonprofit organizations at various stages of development. Projects may include interviewing, building a nonprofit business plan, and presentations.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.
Equivalent(s): MGMT 638G
Grade Mode: Letter Grading

MGMT 715 - Financial Management for Nonprofit Organizations
Credits: 4
Nonprofit management is becoming a recognized specialty, with a growing number of individuals and entities specializing in nonprofit financial management. Concepts cover financial management considerations related to ethics, governance, policy and mission frameworks that are unique to nonprofit organizations and practices.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (MGMT 707 with a minimum grade of D- or MGMT 638G with a minimum grade of D-).
Equivalent(s): MGMT 639G
Grade Mode: Letter Grading

MGMT 795 - Integrative Capstone: Industry-Based Internship
Credits: 4
This capstone course is a field-based internship designed to develop and hone the practical application skills of a Business Management major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where management-related knowledge and skills are applied. Students will also be required to submit professional documents such as a cover letter, resume, and professional portfolio as part of the course. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): MGMT 651G
Grade Mode: Letter Grading

MGMT 796 - Individualized Studies Capstone
Credits: 2-9
This course is an independent learning experience used to satisfy the integrative requirement. The purpose of the integrative experience is to provide the learner with a capstone project in which to reflect on and synthesize his or her prior learning and apply it at a new, higher level of understanding. It is the final learning experience of your degree program and is undertaken after all other coursework is completed. This capstone may incorporate some new aspects of learning, but the project must integrate foundation and specialized coursework into the experience. No transfer, assessment or validation credit may be used to fulfill this requirement. Course content is approved by Academic Affairs.
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): MGMT 670AG
Grade Mode: Letter Grading

MGMT 797 - Integrative Capstone: Industry-Based Project
Credits: 4
This capstone course builds on all previous coursework. By completing a course project, students synthesize practical knowledge and academic theories to develop and implement effective managerial strategies in their own field of professional interest. Students will have the opportunity to explore current research in the field of management to meet their personal professional goals and goals of their organizations. Professional documents such as a cover letter, resume, and professional portfolio are developed by students in this course. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): MGMT 660G
Grade Mode: Letter Grading

MGMT 798 - Integrative Capstone: Strategic Management Experience
Credits: 4
This capstone course focuses on the concepts and techniques of business management. It analyzes the process of developing and executing strategies designed to maximize a company's competitive advantage. With this information, students will develop skills to determine the appropriate strategy to fit the company's unique resources and environment. Students will have the opportunity to participate in experiential learning that will allow them to apply previous learning and degree content by crafting and executing strategy. They will also apply their knowledge of strategic management to their own field of professional interest by completing a course project. Students will also be required to submit professional documents such as a cover letter, resume, and professional portfolio as part of the course. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): MGMT 650G
Grade Mode: Letter Grading

Management (MGT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MGT 520 - Topics in Management
Credits: 4
Special topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MGT 535 - Organizational Behavior
Credits: 4
Application of behavioral science concepts to work settings in profit and nonprofit organizations. Individual settings behavior, interpersonal relations, work groups, relations among groups studied in the context of organizational goals and structure. Experiential focus. For non-business administration majors and minors.
Equivalent(s): MGT 580
Mutual Exclusion: No credit for students who have taken ADMN 575.
Grade Mode: Letter Grading

MGT 540 - Leading with Impact: Strategies for Modern Leadership
Credits: 4
This course provides students with the opportunity to explore leadership through multiple modes of inquiry and learning experiences. The emphasis is on students' development of their philosophies of leadership through self-reflection, peer-to-peer dialogue, and experiential learning opportunities. By inventorying their strengths, values, and behavior, students will gain comprehension of and appreciation for collaborating effectively while also engaging in respectful discourse. By doing so, students in this class will define what leading means for them, and how they can leverage their abilities to plan and execute positive, strategic change.
Equivalent(s): MGT 585
Grade Mode: Letter Grading

MGT 620 - Topics in Management
Credits: 4
Special topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MGT 630 - Leading in Diverse Organizations
Credits: 4
This course is designed to help students navigate diverse organizational settings more effectively and improve their ability to work within and lead diverse teams and organizations. It also offers students the opportunity to develop their critical thinking on topics such as identity, relationships across difference, discrimination and bias, equality, and equity in organizations and society and how they relate to organizational issues of power, privilege, opportunity, inclusion, creativity and innovation and organizational effectiveness.
Prerequisite(s): PHIL 431 with a minimum grade of C- and ADMN 575 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 636 - Introduction to Entrepreneurship
Credits: 4
Welcome to the entrepreneurial revolution! Introduction to Entrepreneurship is an introductory course intended to provide students with a solid foundation in terms of the vital role played by entrepreneurs and entrepreneurship in the global economy. We will assess, explore, critique, and celebrate the phenomenon of entrepreneurship. Entrepreneurship is approached as a way of thinking and acting, as an attitude and a behavior. Our emphasis is on entrepreneurship as a manageable process that can be applied in virtually any organizational setting. Our principal focus will be on the creation of new ventures, the ways that they come into being, and factors associated with their success. This course is planned as a general overview of the beginning phase of starting a business and offers a brief view to the key concepts in Entrepreneurship. You will be encouraged to develop and defend your own set of conclusions regarding each of these issues. It is a course that mixes theory with practice, and you will be challenged to apply principles, concepts, and frameworks to real-world situations. The course will include a practical, hands-on, engagement project.
Grade Mode: Letter Grading

MGT 640 - Human Resource Management
Credits: 4
This course introduces the fundamentals of Human Resource Management (HRM) and how HR is using data to drive decision making (People Analytics). HRM should be an essential part of any business strategy to be integrated into the traditional trio of finance, marketing and operations. In most organizations, Human resource related costs are by far the number one line of operating expenses. But to earn and maintain a seat at the table, and help make data-informed strategic decisions, HR partners will need to bring a solid knowledge about gathering the right data, choosing appropriate analysis, and interpreting and communicating findings in a meaningful way.
Prerequisite(s): ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 642 - Talent Acquisition
Credits: 4
This course is designed to provide an understanding of organizational staffing and hiring with an emphasis on issues that impact staffing in modern organizations. It will cover multiple aspects of the staffing process, including recruitment, assessment, and selection methods and procedures. In addition, the utility of methods used in job analysis, performance measurement, and internal and external market analysis will be discussed. This course is project intensive; students will be responsible for creating job descriptions, developing recruitment strategies, and building basic selection systems.
Prerequisite(s): ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C- or HMGT 635 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 655 - Doing Business Globally
Credits: 4
This course introduce students both the macro- and micro-level aspects of international business. Topics include the formal and informal institutions of global business, international trade and economic regional integration, foreign exchange and international monetary system, international strategies for entering foreign markets and managing global growth.
Prerequisite(s): ADMN 575 with a minimum grade of C- or MGT 535 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 662 - Exploration in Entrepreneurial Management
Credits: 4
Examines the management of change and innovation, especially the role of entrepreneur in managing new ventures. Uses case analysis, guest speakers, and business plan preparation to study the characteristic behavioral, organizational, financial, and marketing problems of entrepreneurs and new enterprises.
Attributes: Writing Intensive Course
Prerequisite(s): (ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C-) and (ADMN 585 with a minimum grade of C- or MKTG 550 with a minimum grade of C- or MKTG 530 with a minimum grade of C-) and (ADMN 502 with a minimum grade of C- or ACFI 501 with a minimum grade of C- or ACCT 501 with a minimum grade of C-).
Equivalent(s): MGT 732, MGT 733
Grade Mode: Letter Grading

MGT 666 - Strategic Negotiation and Conflict Management
Credits: 4
Negotiation is the art and science of securing agreements between two or more interdependent parties seeking to maximize their outcomes. Negotiating and decision-making are essential managerial skills, necessary for influencing employees and stakeholders. This course will draw on the latest research, to help you learn how to negotiate successfully and with integrity. Topics covered include bargaining with one or more parties, influence strategies, ethical and social dilemmas, and negotiating with difficult people.
Prerequisite(s): ADMN 575 with a minimum grade of C- or MGT 580 with a minimum grade of C- or MGT 535 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 701 - Stakeholder Engagement & Sustainable Businesses
Credits: 4
Demands on strategy have expanded in a new era of capitalism. Businesses must assume responsibility for addressing complex issues at the intersection of business and society. This course prepares students to drive change by leading purpose-driven businesses that engage all stakeholders, not just shareholders and management. Conscious capitalism and realizing that everything connects to everything else - ethics, economics, politics, culture, technology, environment - is the foundation for growing businesses while simultaneously solving global societal challenges.
Prerequisite(s): ADMN 575 with a minimum grade of C-.
Equivalent(s): ADMN 701
Grade Mode: Letter Grading

MGT 713 - Leadership Assessment and Development
Credits: 4
Activities and exercises to help students determine their ideal job upon graduation as well as their career goals for the next three to five years. Students learn a matrix of key leadership behaviors and skills that distinguish high-performing managers and executives. Each student's behavior is assessed using this model so that students can determine the leadership behaviors and skills they most need to develop to meet their early career goals. Faculty assist students in developing a personal leadership development plan to focus professional energy, efforts, and achievements over the next three to five years.
Prerequisite(s): ADMN 575 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 714 - Organizational Changemaker Skills
Credits: 4
This course will leverage research from strategy, economics, organizational behavior, psychology, and sociology to understand organizations' dynamic and ever-changing nature. This multi-disciplinary view will cut across organizational levels to examine frame-breaking change at the macro level, like major strategy shifts to the more micro implications of team change like member churn. Students will learn how to diagnose organizational problems, communicate issues, options, and recommendations, and lead change efforts at the team and organizational level.
Prerequisite(s): ADMN 575 with a minimum grade of C-.
Equivalent(s): MGT 614
Grade Mode: Letter Grading

MGT 720 - Topics in Management II
Credits: 4
Special topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MGT 720W - Topics in Management II
Credits: 4
Special topics, vary by semester.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MGT 733 - Launch Ready: The Entrepreneur's Capstone
Credits: 4
This capstone course offers an immersive, incubator-style experience where students will apply the entrepreneurial concepts, financial knowledge, and management skills gained throughout the program to bring a business idea to a complete plan. Working in a structured, collaborative environment, students will receive mentorship from entrepreneurs and investors, participate in business development workshops, and gain access to resources such as co-working spaces (the e-center), legal and financial advisors, and potential investors. The course culminates in a final pitch to investors or a panel of industry experts (Holloway Competition).
Attributes: Writing Intensive Course
Prerequisite(s): DS 741 with a minimum grade of C- and (MGT 742 with a minimum grade of C- or DS 742 with a minimum grade of C-).
Equivalent(s): MGT 662, MGT 732
Grade Mode: Letter Grading

MGT 740 - Strategic HR & Analytics
Credits: 4
This course introduces the fundamentals of Human Resource Management (HRM) and analytical techniques most commonly used to make strategic HR decisions. While HR costs often are a company's number one operating expense, effective HR management is more than keeping costs down. HR professionals help shape a company's workforce and ensure that it has the skills and knowledge needed to successfully implement its strategy. Students will learn the analytical tools to make these decisions.
Prerequisite(s): ADMN 510 with a minimum grade of C- and ADMN 575 with a minimum grade of C-.
Grade Mode: Letter Grading

MGT 755 - Managing Business and People Across Borders
Credits: 4
This course examines how firms and managers operate in an increasingly interconnected global environment. It provides a comprehensive overview of the strategic, organizational, and interpersonal challenges involved in managing business activities and leading people across national, cultural, and institutional boundaries. Key topics include the global business environment, entry strategies, cross-cultural management, international negotiation, global organizational structure and design, global leadership, human resource management across countries, and ethics and corporate social responsibility in multinational contexts.
Attributes: Writing Intensive Course
Prerequisite(s): ADMN 575 with a minimum grade of C-.
Grade Mode: Letter Grading

Marine Sciences (MARI)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MARI 533 - Basic SCUBA
Credits: 3
A full semester rigorous introduction to the fundamentals of SCUBA diving, including diving physics, physiology, decompression issues, environment, equipment, and safety. Through a progressive series of classroom lectures and pool sessions, students gain the knowledge and skills necessary to conduct themselves with competence in New England waters. Emphasis on safety and problem prevention. Strong swimming ability required.
Equivalent(s): KIN 533
Grade Mode: Letter Grading
Special Fee: Yes

MARI 705 - Introduction to Marine Policy: Understanding US Ocean, Coastal and Great Lakes Policy
Credits: 3
Effective management of human activities in ocean, coastal and Great Lakes areas is critical to our future. This course provides a foundation for students from various backgrounds to understand US marine policy and how it relates to their future careers in research, policy, law, or management. While focused on US marine policy, the course also provides international context, including the UN Law of the Sea and other related conventions on pollution, fisheries, and resource protection.
Equivalent(s): INCO 705
Grade Mode: Letter Grading

MARI 730 - Research Diving Technologies
Credits: 4
Certified divers receive extensive training in the methods, specific techniques, and challenges required to conduct underwater research in the Gulf of Maine. Progressively builds upon basic diving skills and knowledge until the student is competent to formulate and implement an independent pilot research project. The results will be written up and presented to the class. Completion of 100-hour course may lead to UNH/AAUS Scientific Diver certification. SCUBA open water certification and a college level science course required prior to taking this course.
Equivalent(s): KIN 730, MEFB 730
Grade Mode: Letter Grading
Special Fee: Yes

MARI 735 - Advanced SCUBA
Credits: 4
Through this course students will become competent and highly educated in a variety of diving disciplines to prepare them to work underwater. Students will be exposed to a variety of diving-related topics through a series of lecture and hands-on practical applications. Topics covered are navigation, search and recovery, low visibility, night diving, surface supplied diving, boat driving, accident management, hyperbaric medicine, physics, physiology, working and scientific research methods for diving. Open water certification and college level science course required prior to taking course.
Equivalent(s): KIN 735
Grade Mode: Letter Grading
Special Fee: Yes

MARI 795 - Special Topics
Credits: 1-4
New or specialized topics not normally covered in regular course offerings.
Repeat Rule: May be repeated for a maximum of 5 credits.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

MARI 795W - Crafting Ocean Stories: Research & Writing for the Public in Marine Science & Ocean Engineering
Credits: 3
Clear, unbiased, and engaging communication of new developments in science and engineering can help foster a populace that is well-informed, thinks critically, and remains democratically engaged. In this course, students will learn to curate well-researched stories on topics in marine science and ocean engineering for a general audience. Topics covered include interviewing experts, making sense of scientific analysis, visualization of facts and data, and crafting compelling stories. The final course output will be a feature-length article reporting on UNH marine research or addressing a community-sourced question related to the marine environment. A 101-level course in college science is recommended prior to taking this course.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

Marine, Estuarine and Freshwater Biology (MEFB)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MEFB 401 - Marine Estuarine and Freshwater Biology: Freshmen Seminar
Credits: 1
The purpose of this course is threefold: First to acquaint freshmen MEFB majors to the wide range of topics that are included in the broad area of marine, estuarine and freshwater biology. Second, to introduce new UNH students to many of the MEFB faculty at UNH and give them the opportunity to become aware of the types of research that is being conducted at UNH. Finally, to begin teaching freshmen how to read the primary literature, write concise summaries of papers they read, give oral presentations to their peers, and understand how scientific knowledge is acquired and disseminated. Students attend a series of seminars presented by a wide range of MEFB faculty. The topics presented vary from year to year depending on the faculty that agree to participate. In addition students are required to read the current literature, write short papers and give presentations to the class.
Grade Mode: Credit/Fail Grading

MEFB 403 - Investigative Marine Biology Laboratory
Credits: 2-4
This course in an intensive marine-based introduction to the scientific method and experimental biology taught a Shoals Marine Laboratory. The course takes advantage of the unique learning opportunities afforded by the pristine marine environment (especially the intertidal) around Appledore Island. The overall course philosophy is to allow students to learn the scientific method by doing it themselves under the guidance of veteran marine biologists. The course is structured around two class projects that are designed to expose students to concepts and techniques in marine ecophysiology and biomechanics. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 410 - Marine Immersion
Credits: 2
An intensive 2-credit course for incoming freshmen, surveying a range of marine-related fields (with an emphasis on biology and ecology), research approaches, and organisms. The course is based at the Shoals Marine Laboratory on Appledore Island, where students, and some faculty, will be in residence. "Marine Immersion" introduces students to the breadth, excitement, and challenges of marine sciences through lectures, demonstrations, and field experiences offered by a cohort of UNH faculty, and through short research projects carried out on the island. It also introduces them to resources and opportunities available at UNH, provides an opportunity to get to know some of their professors, and lets them begin building a network among their peers even before they arrive in Durham. (Summers only at Shoals Marine Lab.)
Equivalent(s): ZOOL 410
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 460 - Biological Illustration
Credits: 4
In this course, students build a foundation of skills needed for biological illustration using the many visual opportunities that Appledore Island offers for natural science subjects. Lectures and demos introduce each of five projects using a variety of media including graphite and graphite dust, pen & ink, watercolor, and colored pencil. Basic standards needed in the creation of professional work are covered, include observational drawing, attention to detail and accuracy, composition, color, tonal values, and perspective. The class will visit many locations on the island for inspiration and visual reference. Students will create a final project demonstrating skills they have developed with one of the media covered in the course. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 503 - Introduction to Marine Biology
Credits: 3
Emphasizes the organization of marine biological communities. Various marine environments pelagic, benthic, temperate, tropical, and their characteristic communities. Major emphasis on the approaches (e.g., analysis of energy flow and predator-prey interactions) used to analyze marine communities as well as the sampling techniques employed for each approach and the characteristic habitat type.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading

MEFB 505 - Introduction to Applied Science Communication
Credits: 4
In this course students develop the capacity to solve increasingly challenging problems with greater independence. Students fill their science communication "tool box," learning how to engage a nonscientist audience. They will be introduced to video production, podcasts, Wikipedia editing, public science events, social media platforms, blogging and press release writing. After gaining basic skills with these communication platforms and tools, students will apply their skills to a topic of their own research interest on the island. Students will actively participate in a local public science event (Rock talks) and learn how to start a science cafe on their own. Students will receive feedback from their peers and their instructors, and by the end of this course they will become more effective science communicators. Skills gained in this course in this unique environment can be applied to any research field and are essential for every scientist. (Summers only at Shoals Marine Lab.)
Prerequisite(s): BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 506 - Marine Parasitology and Disease
Credits: 4
This course will focus on one of the most diverse and fascinating groups of marine organisms: parasites. The course will explore marine parasites and pathogens at multiple levels, including: (1) the evolutionary perspective with an emphasis on coevolutionary relationships; (2) parasitic diseases and life cycles (from simple to complex); (3) taxonomic and phylogenetic understanding of parasite and host groups (with a focus on metazoan parasites and hosts); (4) ecological implications of parasitism in marine systems at the population, community, and ecosystem levels; and (5) the effects of human induced global change on parasitism in marine communities. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 508 - Marine Ecosystem Research and Management
Credits: 4
This course challenges students with real-world problems in the Gulf of Maine related to ecosystem research and management. Students learn the tools to conduct field and laboratory research and how to apply these tools in a real-world conservation management problem. Students work in small groups to design and implement and short research project. Results are presented to local and regional conservation practitioners in the Gulf of Maine. One semester of college biology should be taken prior to this course.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 510 - Field Ornithology
Credits: 4
Introduces field ornithology focusing on the biology, ecology, and behavior of avifauna on the Isles of Shoals. Includes such ornithological field methods as censuring techniques, territory mapping, banding, behavioral observation, and creating a field notebook. Fieldwork is designed to supplement many classroom concepts, including territoriality, breeding biology, and survivorship. One year of college level biology required. Lab. (Summers only at Shoals Marine Lab.)
Equivalent(s): ZOOL 510
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 530 - Evolution and Marine Diversity
Credits: 5
Patterns of diversity and processes of evolution. Topics include the diversity of life, the fossil record, macro-evolutionary patterns, the genetics and developmental basis of evolutionary change, processes at the population level, evolution by natural selection, modes of speciation, long-term trends in evolution, and human evolution. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 535 - Marine Mammal Biology
Credits: 4
This course explores the biology and conservation of the whales and seals, with a particular focus on species of the Gulf of Maine. Lectures examine many facets of marine mammal science including: taxonomy and species diversity, morphological and physiological adaptations for life in the sea, foraging ecology and behavior, reproductive cycles, bio-acoustics, anthropogenic interactions, and management of threatened species. Land and open water observations of whale and seal behavior give students hands on opportunities to study marine mammals in the field. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 545 - Field Bioacoustics and Soundscape Ecology
Credits: 4
In this course students will gain hands-on introductory experience in bioacoustics and soundscape ecology research, including biological concepts behind animals' sound production and hearing, skills for deploying acoustic sensors in terrestrial and underwater habitats, and acoustic data analysis methods. The course will consist of several lectures covering fundamental concepts in acoustics, soundscapes, and digital sound signal processing. The majority of class time will be spent deploying and recovering acoustic sensors and conducting experiments in the field, as well as in computer-lab sessions to analyze and summarize collected data. We will primarily focus on "Passive Acoustic Monitoring (PAM)" which involves non-invasive recording of sounds present in an environment (i.e., soundscapes) with microphones (when deployed on land) or hydrophones (when deployed underwater). Gulls and other seabird residents of the Isles of Shoals will be the main focal animals for terrestrial field work, and opportunistic recordings may be made of other vocalizing animal inhabitants including mammals, fishes, and invertebrates. Students will further learn how to study the contributions of anthropogenic sounds (i.e., from human-made sources) to natural soundscapes. Students will also conduct field-based acoustic playback experiments to study how different properties of gull vocalizations influence gull behavior.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 590 - Coastlines in Crisis
Credits: 4
Pairing students from coastal geographies through synchronous online and in-person lecture, we'll explore trends threatening resilience of our coasts and their inhabitants. The science and public perception of coastal threats, sea level rise, and climate related issues will build a baseline for understanding the issues coastal communities face, including contributing factors, and the role of science, technology, and environmental policy in the delicate balancing act between nature and infrastructure.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 625 - Introduction to Marine Botany
Credits: 5
Life history, classification, and ecology of micro- and macroscopic marine plants, including phytoplankton, seaweed, and salt marsh plants, and the interactions between humans and marine plant communities. Occasional Saturday morning field trips. Lab.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D- or BIOL 409 with a minimum grade of D-.
Equivalent(s): PBIO 625
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 628 - Marine Invertebrate Evolution and Ecology
Credits: 4
Stresses the rich diversity of marine invertebrates by integrating phylogenetic trends with physiological and behavioral adaptation, and with ecological and symbiotic interactions. Offers a comparative survey of invertebrates from protozoans to protochordates; deals with aspects of form and function, development, evolution, classification, ecology, and natural history. Students work with live and preserved animals. Extensive dissections and a field component are required.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 633 - Quantitative Reasoning and Analysis for Marine Sciences
Credits: 4
Expand your statistical knowledge and resume by learning R. Use project-based learning to explore marine mammal populations, intertidal systems, and fisheries while learning statistical skills and R. In this course students will learn to become proficient in R (data manipulation, graphing, hypothesis testing, importing and cleaning data) and learn to effectively communicate statistical results. (Summers only at Shoals Marine Lab.)
Mutual Exclusion: No credit for students who have taken BIOL 633.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 674 - Ecology and Marine Environment
Credits: 4
Introduces the marine sciences with an emphasis on field work in natural habitats. Examines aspects of the systematics, morphology, physiology, behavior, and ecology of marine organisms, including intertidal plants and invertebrates, fishes, marine mammals and birds; fisheries biology; oceanography, marine geology; and human impacts on the marine environment. Sessions include lectures, discussions, field work, experience aboard a coastal research vessel, and excursions to distinctive habitats. Offered in cooperation with Cornell University. Students may not take Field Marine Science after taking Field Marine Biology and Ecology. One year of college level biology required. (Summers only at Shoals Marine Lab.)
Equivalent(s): ZOOL 674, ZOOL 675
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 675 - Marine Mammal Biology and Conservation
Credits: 3
This course is designed to be a detailed investigation into the biology of cetaceans, pinnipeds, and other marine mammals. In this course we will learn about the evolution of marine mammals, general adaptations to a marine existence, morphology, systematics and biogeography, reproduction, diving physiology, communication and echolocation, feeding and migratory behavior, and marine mammal/human interactions. The course will include a survey of major conservation concerns and potential management solutions, as well as a unit on cultural competencies and the historic relationship between humans and marine mammals.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-.
Equivalent(s): MEFB 535
Grade Mode: Letter Grading

MEFB 702 - Sustainable Marine Fisheries
Credits: 4
An intensive course for undergraduate students that introduces students to the complex challenges facing today's fishing industry, which is being asked to simultaneously sustain the livelihood of fishermen while meeting long-term conservation goals. The course is held both at the UNH Campus and at the Shoals Marine Laboratory. New England fisheries are used as a case-study for this course through global fishing management, trends, and issues are also discussed. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 714 - Field Animal Behavior
Credits: 4
An animal's behavioral patterns represent its abilities to deal with the environment dynamically. Course focuses on ecological and evolutionary significance of behavioral patterns found in all organisms, particularly those animals that inhabit coastal marine environments. Strong emphasis on methods of behavioral research and interpretation of behavioral patterns using field observations of diverse fauna of Appledore Island and surrounding waters. One year of college level biology required. (Summers only at Shoals Marine Lab.)
Equivalent(s): ZOOL 714
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 717 - Lake Ecology
Credits: 4
Introduces the ecology of freshwater systems with emphasis on lakes. Origins of lakes and the effects of watersheds on lake chemistry and nutrient cycling are explored. Other topics include the impact of human disturbances on productivity and aquatic food webs and methods used for the management and restoration of lakes. Comparisons are made of the structure and functions of lake ecosystems found in temperate, tropical and arctic regions. General biology required prior to taking this course.
Equivalent(s): BOT 717, PBIO 717, ZOOL 717
Grade Mode: Letter Grading

MEFB 719W - Field Studies in Lake Ecology
Credits: 4
Ecology of lakes and other freshwater habitats examined through field studies. Emphasizes modern methods for studying lakes; analysis and interpretation of data; and writing of scientific papers. Seminars on research papers and student presentations of class studies. Field trips to a variety of lakes, from the coastal plain to White Mountains; investigate problems, such as eutrophication, acidification, biodiversity and biotoxins. Capstone experiences include interaction with state agencies, lake stakeholders and the submission of written manuscripts for publication. Introductory Biology required prior to taking this one.
Attributes: Writing Intensive Course
Equivalent(s): MEFB 719, PBIO 719, ZOOL 719
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 720 - Marine Invasive Species: Ecology, Evolution and Management
Credits: 4
This course explores the spread, establishment, and impact of invasive species. Students will become familiar with ecological and evolutionary theories pertaining to species invasions, and methods for assessing their spread and impact at local and global scales. The course examines: (1) ecological impacts and predictors of invasive species; (2) evolutionary insights of invasions; (3) taxonomic identification and survey techniques; (4) management implications of invasive species; and (5) the effects of global change on their spread. One semester of college biology or equivalent should be taken prior to this course. Summers only at Shoals Marine Lab.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 725 - Marine Ecology
Credits: 3
This course is an exploration of marine ecology principles. Students will engage in field-based research projects to investigate ecological processes in marine environments. Emphasis will be placed on the structure and function of temperate rocky intertidal systems, the drivers of ecological change, statistical analysis of ecological data, and the influence of human activities on marine benthic systems. Key topics include recruitment ecology, physiological stress, competition, disturbance, trophic ecology, facilitation, and positive interactions.
Prerequisite(s): (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D-) and MEFB 503 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 730 - Underwater Research
Credits: 4
Hypothesis testing and experimental design, theoretical and practical aspects of sampling, and critiques of current research papers. Includes special problems of conducting research underwater (diving physics and physiology, theory and use of diving tables, hyperbaric medicine) and underwater techniques (underwater photography and video, photo quadrates, tagging and marking, cages and enclosures). Students must supply their own equipment. Required prior to taking this course: recognized scuba certification, a medical examination, one year of biology or other supporting science. See additional specific details about requirements here: https://www.shoalsmarinelaboratory.org/underwater-research. (Summers only at Shoals Marine Lab.)
Equivalent(s): KIN 730, MARI 730
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 741 - Sharks: Biology and Conservation
Credits: 4
The last 30 years have produced an explosion of new information on the biology of the approximately 1,000 living species of sharks, skates, rays, and chimaeras, which collectively make up the group Chondrichthyes. This course will cover advanced topics in the evolution, diversity, anatomy, functional morphology, physiology, sensory systems, behavior, reproduction, development, and conservation of cartilaginous fishes. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 747 - Aquatic Plants in Restoration/Management
Credits: 4
A field-intensive class focusing upon freshwater and marine vascular plants with an emphasis on species commonly associated with ecological restoration, the identification and conservation of rare species, and the adaptations and management of invasive species of aquatic habitats in New England. Field trips emphasize the flora of various wetland habitats, including open water and vegetated fresh water wetlands, as well as coastal and estuarine habitats. Lectures and readings examine the current trends in research and management focusing upon specific taxa and pertinent facets of their taxonomy, physiology, and natural history.
Equivalent(s): PBIO 747
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 751 - Research in Biology at the Shoals Marine Lab
Credits: 4
Introduces the adaptations of organisms to marine environments and the role these adaptations have in structuring marine communities using an experimental approach. Emphasizes experimental design, implementation, data analysis, and scientific presentations. Prereq: one year of college-level biology or permission. Additional experience in biology, ecology or physiology is recommended. (Summers only at Shoals Marine Lab.)
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 754 - Anatomy and Function of Marine Vertebrates
Credits: 4
The course is designed to introduce students to a comparative study of the principal organ systems of vertebrates (i.e., fishes, sea turtles, marine birds, marine mammals) that are specifically adapted to the marine environment. Rather than focusing only on description of anatomical structure, the anatomy of structures are investigated with function, biological role, and evolutionary relationships. Laboratory exercises cover osteology, dissection, behavior and biomechanics. One year of college biology required prior to taking this course. (Summers only at Shoals Marine Lab.)
Equivalent(s): ZOOL 753, ZOOL 754
Grade Mode: Letter Grading
Special Fee: Yes

MEFB 755 - Biological Oceanography
Credits: 3
Biological processes of the oceans, including primary and secondary production, trophodynamics, plankton diversity, zooplankton ecology, ecosystems and global ocean dynamics.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): ESCI 750, ZOOL 750
Grade Mode: Letter Grading

MEFB 772 - Fisheries Biology: Conservation and Management
Credits: 4
Globally, many fished populations are declining, but 3.2 billion people eat fish and the average human eats greater than 40 pounds of fish a year. This course identifies what biological characteristics are important to management and how they are measured. The course also explores quantitative methods describing fishery-population interactions and other management tools. Lastly, students will learn about the impacts of fishing on ecosystems.
Prerequisite(s): BIOL 411 with a minimum grade of D- and BIOL 412 with a minimum grade of D-.
Equivalent(s): ZOOL 772
Grade Mode: Letter Grading

MEFB 773 - Physiology of Fishes
Credits: 4
Investigates the physiological processes responsible for maintaining homeostasis in fishes. Focuses on the function and regulation of the major organ systems during stress and environmental adaptation. Topics include reproduction, osmoregulation, digestion, endocrinology, and sensory perception.
Grade Mode: Letter Grading

MEFB 795 - Independent Investigations in Marine, Estuarine, and Freshwater Biology
Credits: 1-4
Independent study in a topic related to Marine, Estuarine, or Freshwater Biology, arranged by the student with a faculty sponsor. Enrollment by permission only.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 5 times.
Grade Mode: Letter Grading

MEFB 796 - Shoals Undergraduate Research
Credits: 1
This course is for students who are participating in the Shoals Undergraduate Research Group and conducting independent research at the Isles of Shoals arranged by the student with a faculty sponsor. This course emphasizes hypothesis design, experimental design, implementation, data analysis, and scientific presentations. One year of college-level biology required prior to taking this course. (Summers only at Shoals Marine Lab.)
Repeat Rule: May be repeated for a maximum of 3 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

MEFB 799H - Honors Senior Thesis in Marine, Estuarine, and Freshwater Biology
Credits: 2-4
Independent research requiring a written proposal, a thesis, and a final public presentation (e.g. the Undergraduate Research Conference). Intended for MEFB majors completing Honors-in-major requirements. Contact MEFB program coordinator prior to senior year to arrange supervision and obtain permission. Two consecutive semesters. (4 credit minimum total; 8 credits maximum).
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Marketing (MKT) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MKT 510 - Principles of Marketing
Credits: 4
Marketing is the process of planning and executing the conception, pricing, promotion, and distribution of goods and services to maintain relationships that satisfy organizational and individual needs and wants. The course introduces students to terminology, functions, institutions, philosophy, consumer behavior, market decision-making and public policy issues. The course will provide students with the basic framework to understand the role and scope of marketing in the business environment.
Attributes: Writing Intensive Course
Equivalent(s): MGMT 514G, MKTG 514G
Mutual Exclusion: No credit for students who have taken BUS 610.
Grade Mode: Letter Grading

MKT 517 - Consumer Behavior
Credits: 4
This course focuses on consumer behavior in a variety of contexts. Understanding the decision process, attitude, and behavior of buyers is essential to developing marketing plans in today's competitive marketplace; sophisticated customer relationship management approaches are dependent upon knowing the customer. Students consider the major theoretical approaches to consumer behavior and examine how the concepts of affect and cognition, behavior, learning, and the environment can be used to design and maintain an effective marketing strategy. The course also offers students an opportunity to gain a better understanding of their own buying behavior.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 617G
Grade Mode: Letter Grading

MKT 523 - Introduction to Professional Sales
Credits: 4
This course presents students with current knowledge, data, and skills that are applicable in today's competitive business environments. The course provides students with an in-depth awareness of the sales discovery and presentation process within the professional selling environment. Students may demonstrate their persuasive skills in the context of a hypothetical job interview.
Equivalent(s): MKTG 523G
Grade Mode: Letter Grading

MKT 525 - Presentation Excellence in Sales
Credits: 4
This hands-on, highly interactive course prepares students to effectively develop, organize, present, support, and close a powerful program and presentation with confidence and conviction. The focus draws upon listening skill sets, oratory, personal communication social styles, and persuasive/informative techniques that result in the presenter engaging the audience. The course helps students to build competence and confidence through feedback and practice. The course prepares students to deliver persuasive and informative presentations that promote a specific outcome.
Equivalent(s): MKTG 525G
Grade Mode: Letter Grading

MKT 600 - Social Media Marketing
Credits: 4
This course is designed to build students' social media marketing, advertising, and communication skills by utilizing projects that give students hands-on experience implementing social media marketing strategies. The focus of this course will be understanding social media, developing social media marketing strategies, and tracking their effectiveness in an effort to maximize marketing efforts for businesses. It is expected that students have a basic understanding of various social media platforms. This course is NOT about how to use social media; rather it looks at how we can use social media for marketing efforts.
Attributes: Writing Intensive Course
Equivalent(s): MKTG 520G
Grade Mode: Letter Grading

MKT 610 - Marketing Hospitality Organizations
Credits: 4
This course provides a comprehensive overview of the role of marketing in the hotel, restaurant, and travel industries. Students in this course may use case studies and real-world events to explore the theories, principles, and application of both traditional and digital forms of marketing to select groups. This is an experiential course that may include assignments such as the creation of a marketing plan, advertising campaign or social media strategies for a partner organization. The focus of this course centers on the planning, implementation, and evaluating of marketing plans, strategies, budgets, and campaigns.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 610G
Grade Mode: Letter Grading

MKT 612 - Agile Marketing
Credits: 4
Marketing plays a fundamental role within an organization, yet in many organizations, marketing is siloed from other business units, teams, or departments. A successful marketing department must strategically place themselves into the business with innovation and adaptivity. This course may explore agile marketing techniques including outcomes, continuous improvement, and customer needs.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 612G
Grade Mode: Letter Grading

MKT 615 - Digital Storytelling and Brand Management
Credits: 4
This course introduces the role and philosophy of brand management in the strategic marketing process and the resulting effects on strategic and marketing decisions. Students learn to identify and establish brand positioning and values, design branding strategies, and grow and sustain brand equity. Topics may include the strategic brand building process, segmentation and positioning for building brands, consumer behavior, brand information systems, building brand equity, and the application of brand management using marketing principles. Students explore the critical role of brand management in successful marketing strategies.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 615G
Grade Mode: Letter Grading

MKT 618 - Sales Management
Credits: 4
This course focuses on the strategic and tactical aspects of selling and sales force management. The course develops an analytical understanding of the concepts, tools, and techniques of sales management, using real-world marketing problems. Students will apply the principles of personal selling, relationship building, salesforce prospecting, and sales call planning in a simulated sales management environment. Issues concerning international sales, social responsibility, and ethical considerations as they relate to sales management may be addressed.
Prerequisite(s): (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-) and (MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-).
Equivalent(s): MGMT 618G, MKTG 618G
Grade Mode: Letter Grading

MKT 645 - Marketing Research
Credits: 4
In this course, students explore the theories and techniques of planning, conducting, analyzing, and presenting market studies. Students may discuss ethical dimensions, emerging trends, and new skills associated with marketing research and how secondary data fit into the research process. Students may examine different methodologies with emphasis on primary research, including questionnaire design. The course addresses the growing role that technology plays in predicting marketing trends, addressing marketing problems, and the development of new products and services.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 515G
Grade Mode: Letter Grading

MKT 705 - Marketing for Nonprofits
Credits: 4
The course explores the use of traditional and nontraditional channels to promote nonprofits to an array of actual and potential audiences for a variety of purposes. Most nonprofit organizations must be visible to the public in order to fulfill their missions. Thus, nonprofit leaders must know how to promote their organizations to current and potential supporters, the broader public, and the mass media. Topics may include program and organizational branding, targeting respective audiences, preparing materials for greatest effect, and applying social media as appropriate.
Equivalent(s): MKTG 605G
Grade Mode: Letter Grading

MKT 720 - Digital Advertising
Credits: 4
Digital technologies have become an integral component of daily life for many organizations and consumers. This class will provide the student with the theoretical understanding of the internet marketplace necessary to adapt to its many changes, while also equipping the student with the skills needed to perform vital daily functions. The course may cover a wide spectrum of topics, including (but not limited to) marketing strategic approaches on the internet, analytics, online reputation management (ORM), digital positioning and branding, email marketing, paid search marketing, and integrated communications on digital media.
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 620G
Grade Mode: Letter Grading

MKT 723 - Marketing Design and Usability
Credits: 4
In the field of marketing, creating intuitive market interfaces (website, mobile applications, and e-commerce) is imperative for consumer engagement and retention. This course will explore web design, user interface (UI), user experience (UX), and experiential design principles within the context of digital marketing. Successful design leads to data-driven results. Students may have the opportunity to analyze universal web standards, design fundamentals, interface, usability, and design issues to enhance search engine optimization (SEO) and search engine marketing (SEM).
Prerequisite(s): MKT 510 with a minimum grade of D- or MKTG 514G with a minimum grade of D-.
Equivalent(s): MKTG 623G
Grade Mode: Letter Grading

Marketing (MKTG)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MKTG 520 - Topics in Marketing
Credits: 1-4
Special topics covering a variety of marketing principles, topics vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MKTG 530 - Survey of Marketing
Credits: 4
Focuses on marketing as the process of planning and executing the conception, pricing, promotion, and distribution of ideas, goods and services to create exchanges that satisfy individual and organizational objectives. For business administration minors and non-business administration majors.
Equivalent(s): MKTG 550
Mutual Exclusion: No credit for students who have taken ADMN 585, HMGT 600.
Grade Mode: Letter Grading

MKTG 547 - Promotion and Advertising
Credits: 4
Focuses on advertising and promotions while providing coverage of other marketing communication tools (direct marketing, point-of-purchase, personal selling, public relations). Examines both traditional and electronic/online/digital approaches to advertising and promotions as means to each audiences with messages that support the organization's goals.
Prerequisite(s): MKTG 550 with a minimum grade of D- or MKTG 530 with a minimum grade of D-.
Equivalent(s): MKTG 557
Grade Mode: Letter Grading

MKTG 620 - Topics in Marketing
Credits: 4
Special topics covering a variety of marketing principles, topics vary by semester.
Prerequisite(s): MKTG 550 with a minimum grade of C- or MKTG 530 with a minimum grade of C- or ADMN 585 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MKTG 620T - Topics in Marketing - Study Away
Credits: 4
Special topics covering a variety of marketing principles, topics vary by semester.
Prerequisite(s): MKTG 550 with a minimum grade of C- or MKTG 530 with a minimum grade of C- or ADMN 585 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MKTG 644 - Retail Management in an Omnichannel World
Credits: 4
Success in retail requires managing multiple channels - online, traditional brick & mortar, and hybrid combinations. This course examines a broad range of retail management topics covering retailer types, selection of channels and locations, understanding online and in-store shopper behavior, financial strategy, purchasing, merchandise assortments including across products and services retailing, pricing, visual merchandising, and customer service and experience.
Prerequisite(s): ADMN 585 with a minimum grade of C- or MKTG 550 with a minimum grade of C- or MKTG 535 with a minimum grade of C-.
Equivalent(s): MKTG 754
Grade Mode: Letter Grading

MKTG 649 - Foundations of Personal Selling
Credits: 4
The Foundations of Personal Selling combines heavy experiential learning with the academic principles of relationship selling to prepare students for the professional world. Students learn personal selling as they develop an understanding of, and appreciation for, applying the consultative sales process through partnering with customers. This course is ideal for those exploring a career in sales or simply interested in knowing how to sell their own strengths.
Equivalent(s): MKTG 559, MKTG 759
Grade Mode: Letter Grading

MKTG 650 - Professional Sales Group
Credits: 2
The Professional Sales Group is an elite experiential sales and leadership course where students actively train for, host, and compete in sales competitions and business networking events. These sales role-play competitions use real business case scenarios, with corporate professionals and alumni as buyers & judges, to simulate selling experiences for the students. Students in good standing may retake the course.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MKTG 652 - Digital Marketing Agency
Credits: 2
Voice Z gives students the opportunity to gain real-world marketing experience by working hand in hand with clients to create impactful and innovative digital marketing campaigns. Admission to the course is competitive through an application process each April for the following year. Students accepted into the Voice Z Digital Marketing Agency for the Fall Semester are expected to continue through the Spring semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MKTG 689 - Advanced Sales
Credits: 4
Advanced Sales is for students looking to enter a professional sales career upon graduation. This course builds on the consultative and relationship selling processes, concepts and experiences in their sales introductory course. Students learn and practice adaptability through cases, exercises, and role-plays while introducing, and using, increasingly important sales enabling technologies. Key skill components covered include prospecting, time management, and communicating value through storytelling.
Prerequisite(s): MKTG 559 with a minimum grade of C- or MKTG 649 with a minimum grade of C- or MKTG 759 with a minimum grade of C-.
Grade Mode: Letter Grading

MKTG 720 - Topics in Marketing II
Credits: 4
Special topics covering a variety of marketing principles, topics vary by semester.
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MKTG 720W - Topics in Marketing II
Credits: 4
Special topics covering a variety of marketing principles, topics vary by semester.
Attributes: Writing Intensive Course
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MKTG 750 - Marketing Strategy
Credits: 4
An integrative marketing course designed to provide the student with a cohesive understanding of marketing decision making through the exploration of marketing problems with an emphasis on qualitative analysis as well as strategy formulation. Through the use of case studies, the course is designed for students who want to learn and apply what they learn, and thus emphasizes both the understanding and the application of concepts and practices in marketing strategy. MKTG 752 and/or MKTG 753 are recommended prior to taking this course.
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Equivalent(s): ADMN 750
Grade Mode: Letter Grading

MKTG 752 - Marketing Research
Credits: 4
Understanding fundamental concepts, tools, and methods used in conducting a marketing research study. Taking general managerial problems and structuring them in terms of specific questions amenable to research. Developing a competence in designing and conducting common qualitative and quantitative research (e.g., survey research). Students will learn various statistic techniques commonly used in marketing research and be able to use these analyses to provide managerial recommendations.
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Equivalent(s): ADMN 752
Grade Mode: Letter Grading

MKTG 753 - Consumer/Buyer Behavior
Credits: 4
Covers concepts, models, and theories from the behavioral sciences applied to consumer decision making and purchasing behavior. Examines consumer behavior from economic, psychological, sociological, and anthropological perspectives. Topic coverage includes discussion of marketing strategies and tactics to understand and influence consumer choice.
Attributes: Writing Intensive Course
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Grade Mode: Letter Grading

MKTG 757 - Integrated Marketing Communication
Credits: 4
Provides balanced coverage of all marketing communication tools: advertising, sales promotion, public relations, direct marketing, personal selling, POP, packaging, sponsorships, licensing, and customer service. Emphasizes the integration of these tools to send target audiences a consistent, persuasive message that promotes the organization's goals.
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Grade Mode: Letter Grading

MKTG 760 - International Marketing
Credits: 4
Environmental factors affecting international trade: culture and business customs, political and legal factors and constraints, economic and technological development, and the international monetary system. Integration of these with the marketing management functions of market research and segmentation; product, promotion, distribution, and pricing decisions.
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Equivalent(s): ADMN 760
Grade Mode: Letter Grading

MKTG 763 - Marketing Analytics
Credits: 4
Marketing Analytics introduces students to the fascinating world of marketing analytics. It provides a broad perspective on product, consumer, marketing-mix, and digital analytics areas. It blends the art and science of marketing and orients students to the systematic use of data and empirical models, which enhance the decision-making of a company about its customers, competitors, and the industry.
Prerequisite(s): ADMN 585 with a minimum grade of C- and ADMN 580 (may be taken concurrently) with a minimum grade of C-.
Grade Mode: Letter Grading

MKTG 764 - New Product Development
Credits: 4
Tactical and strategic issues concerned with the development and marketing of product and service innovations. Equips students with the concepts, tools, and approaches useful in the development, management, and marketing of products and services. Provides an integrated experience of the process of uncovering customer problems, understanding these problems, and providing superior solutions.
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Grade Mode: Letter Grading

MKTG 765 - Applications in Digital Marketing
Credits: 4
This class will introduce students to the different disciplines that make up digital marketing in order to better prepare them for roles as either digital marketing generalists (where they will need to appreciate and possess a broad understanding of these disciplines), or as digital marketing specialists, (where they will need to focus on and master one of these disciplines).
Prerequisite(s): ADMN 585 with a minimum grade of C-.
Grade Mode: Letter Grading

MKTG 775 - Marketing Workshop
Credits: 4
This course is open only to senior marketing option students and serves as their capstone learning experience. Students work in small teams on a real-world marketing problem given them by outside business, non-profits, or government agencies. the trams conduct extensive field research, formulate strategy, and then implement, or test marketing campaign ideas and programs. Completion of two of the following courses required prior to taking this course; MKTG 752, MKTG 753, or MKTG 763.
Attributes: Writing Intensive Course
Prerequisite(s): (MKTG 752 with a minimum grade of C- and MKTG 753 with a minimum grade of C-) or (MKTG 752 with a minimum grade of C- and MKTG 763 with a minimum grade of C-) or (MKTG 753 with a minimum grade of C- and MKTG 763 with a minimum grade of C-).
Equivalent(s): MKTG 762
Grade Mode: Letter Grading

Materials Science (MS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MS 401 - Science of Stuff
Credits: 4
Materials Science is a relatively new and fast growing field that studies all types of materials, including metals, ceramics, polymers, semiconductors, and composites. Material Science explores how stuff is put together, how to change stuff and make it better, the properties and applications of stuff, and even how to make totally brand new stuff. This course explores materials from various topic areas, including sports, forensics, medicine and health, fashion, architecture and construction, music and art, food and transportation from the perspective of materials science. Students explore additional materials independently as well as practice the process of science through simple experimentation and data analysis.
Attributes: Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

Mathematics & Statistics (MATH)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MATH 400 - Freshman Seminar
Credits: 1
A seminar experience that presents a mathematical culture associated with first-year college mathematics, including the ideas of abstraction, theorem and proof, ad that provides a perspective of the diversity of mathematical areas of research and their interrelationships. Emphasis is on reading and writing mathematics.
Grade Mode: Credit/Fail Grading

MATH 417 - Precalculus for Business and Life Sciences
Credits: 4
Analysis and applications of algebraic and transcendental functions, with a special emphasis on exponential and logarithmic functions, and an introduction to limits and derivatives. The course is intended for students planning to take MATH 422 or MATH 424. Students planning to take MATH 425 should instead enroll in MATH 418. This course is not offered for credit for students in CEPS.
Mutual Exclusion: No credit for students who have taken MATH 418.
Grade Mode: Letter Grading

MATH 418 - Analysis and Applications of Functions
Credits: 0 or 4
Analysis and applications of algebraic and transcendental functions, with special emphasis on exponential, logarithmic, and trigonometric functions. Graphical analysis. Written projects are required on some or all of the following topics: rates of change, optimization, logarithmic or exponential modeling, and trigonometric functions. Intended for students planning to take MATH 425. Not offered for credit if credit is received for MATH 424 or MATH 425.
Attributes: Quantitative Reasoning(Disc)
Mutual Exclusion: No credit for students who have taken MATH 417.
Grade Mode: Letter Grading

MATH 420 - Finite Mathematics
Credits: 0 or 4
Topics selected from probability, systems of linear equations, matrix algebra, linear programming, mathematics of finance. Not a preparation for calculus. Not offered for credit to mathematics majors.
Attributes: Quantitative Reasoning(Disc)
Mutual Exclusion: No credit for students who have taken MATH 422.
Grade Mode: Letter Grading

MATH 421 - Pathways between Mathematics and the Arts
Credits: 4
Exploration of the interaction between mathematics and the arts on numerous levels. The course builds on basic knowledge of elementary number systems to illuminate such topics symmetry, fractals, light, color, sound structures and musical materials. Students immediately apply new knowledge and techniques to make computer generated 2-D and 3-D images, animations and sound/music.
Attributes: Quantitative Reasoning(Disc)
Grade Mode: Letter Grading

MATH 422 - Mathematics for Business Applications
Credits: 0 or 4
Functions, sets and their use in mathematical models in business, economics and finance, including probability, linear systems and mathematics of finance; basic concepts of differential calculus and relevant applications.
Attributes: Quantitative Reasoning(Disc)
Mutual Exclusion: No credit for students who have taken MATH 420.
Grade Mode: Letter Grading
Special Fee: Yes

MATH 424A - Calculus for Social Sciences
Credits: 4
Rational, exponential and logarithmic functions; associated derivatives and their applications; associated antiderivatives and their applications. Applications focus on contexts relevant to majors in the College of Liberal Arts and the Paul College. Not offered for credit to CEPS majors. Repeat rule applies for MATH 425 and MATH 424B. Students wanting a two-semester calculus course are strongly advised to take MATH 425-426. Those students who successfully complete MATH 424A and subsequently wish to continue their study of mathematics with MATH 426 are encouraged to complete supplementary modules available from the Mathematics Center (MaC).
Attributes: Quantitative Reasoning(Disc)
Equivalent(s): MATH 424B, MATH 425
Grade Mode: Letter Grading

MATH 424B - Calculus for Life Sciences
Credits: 0 or 4
Rational, exponential and logarithmic functions; associated with derivatives and their applications; associated with antiderivatives and their applications. Applications focus on contexts relevant to majors in the College of Life Sciences and Agriculture. Not offered for credit for CEPS majors. Repeat rule applies for MATH 425 and MATH 424A. Students wanting a two-semester calculus course are strongly advised to take MATH 425-426. Those students who successfully complete MATH 424B and subsequently wish to continue their study of mathematics with MATH 426 are encouraged to complete supplementary modules available from the Mathematics Center (MaC).
Attributes: Quantitative Reasoning(Disc)
Equivalent(s): MATH 424A, MATH 425
Grade Mode: Letter Grading

MATH 425 - Calculus I
Credits: 0 or 4
Calculus of one variable covering limits, derivatives of algebraic, trigonometric, exponential, and logarithmic functions; applications include curve sketching, max-min problems, related rates, and volume and area problems. Beginning in Spring 2019 students who have taken MATH 418 may not take the placement test as a means of entry into MATH 425. (Repeat rule applies for MATH 424A and MATH 424B).
Attributes: Quantitative Reasoning(Disc)
Prerequisite(s): MATH 418 with a minimum grade of C or ALEKS Math Assessment with a score of 80.
Equivalent(s): MATH 424A, MATH 424B, MATH 425H
Mutual Exclusion: No credit for students who have taken MTH 705.
Grade Mode: Letter Grading

MATH 425H - Honors/Calculus I
Credits: 4
Calculus of one variable covering limits, derivatives of algebraic, trigonometric, exponential, and logarithmic functions; applications include curve sketching, max-min problems, related rates, and volume and area problems. (Not offered for credit if credit is received for MATH 424.)
Co-requisite: INCO 425H
Attributes: Honors course; Quantitative Reasoning(Disc)
Prerequisite(s): MATH 418 with a minimum grade of C or ALEKS Math Assessment with a score of 80.
Equivalent(s): MATH 425
Grade Mode: Letter Grading

MATH 426 - Calculus II
Credits: 0 or 4
Second course in calculus of one argument, techniques and applications of integration, polar coordinates, and series.
Prerequisite(s): MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-.
Equivalent(s): MATH 426H
Mutual Exclusion: No credit for students who have taken MTH 707.
Grade Mode: Letter Grading

MATH 426H - Honors/Calculus II
Credits: 4
Second course in calculus of one argument, techniques and applications of integration, polar coordinates, and series.
Co-requisite: INCO 426H
Attributes: Honors course
Prerequisite(s): MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-.
Equivalent(s): MATH 426
Grade Mode: Letter Grading

MATH 439 - Statistical Discovery for Everyone
Credits: 4
Introduces the framework and concepts for learning with data. Emphasis on statistical discovery in everyday life and on drawing valid conclusion from data. Topics include: good and bad data, data ethics, how to conduct a valid survey, how to describe a population distribution; when to believe a poll; how to design an experimental study; how to avoid ambiguous results caused by "lurking" variables; how to make inference about an entire population based on a sample; how to describe relationships among variables; an understanding of the question of causation and chance in everyday life and in scientific studies, as well as the use and misuse of statistics in explaining what is statistical significance. This course has an activity-based learning component with lab exercises using statistical software for calculations without assuming a calculus background. The course may be used as a preparation for a more technical introductory statistics course. Science and Engineering students should take MATH 539 or MATH 644 according to their programs.
Attributes: Quantitative Reasoning(Disc)
Mutual Exclusion: No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, HMP 540, MATH 539, MATH 644, MTH 701, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

MATH 444 - Excursions in Quantitative Reasoning
Credits: 4
Problems involving quantitative reasoning (most are nontraditional, some are fun, while others are interdisciplinary) designed to inspire curiosity encourages students to formulate and evaluate questions, all the while slowly drawing them into the process of scholarly investigation. In this regard, in addition to traditional mathematics homework, students need to do research outside of class to write and present projects.
Attributes: Quantitative Reasoning(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

MATH 445 - Mathematics and Applications with MATLAB
Credits: 4
Through the use of the MATLAB computation software, this course reinforces and builds on a student's mathematics foundation and previews more advanced mathematical concepts. The power and limitations of modern computational algorithms to solve real world problems are introduced and shown to influence nearly every aspect of modern society. The state-of-the-art computational tools afforded by MATLAB provide the student with a strategy for enhancing their knowledge and comprehension in subsequent Science, Engineering, or Technology themed courses.
Attributes: Environment,TechSociety(Disc)
Prerequisite(s): MATH 418 with a minimum grade of D- or MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken IAM 550.
Grade Mode: Letter Grading

MATH 525 - Linearity I
Credits: 6
Approaches intermediate mathematics from a thematic standpoint, using linear structure as a rigorous foundation for developing applications across science and engineering. The course develops a rigorous theory for finite dimensional vector spaces, including solvability and approximation theory. This theory is applied to first order differential equations and differential multivariate calculus. Applications include linear regression, modeling with first order differential equations, a brief introduction to regular perturbation theory, and both constrained and unconstrained optimization problems. Lab.
Prerequisite(s): MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 526 - Linearity II
Credits: 6
Extends the application of the theory of linear spaces developed in 525 to handle systems of linear ordinary differential equations, higher order linear differential equations, Generalized Fourier series and their application to separation of variables for the canonical partial differential equations of mathematical physics, as well as covering multiple integration and vector integration. Green's theorem and the divergence theorem are covered. Lab.
Prerequisite(s): MATH 525 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 527 - Differential Equations with Linear Algebra
Credits: 0 or 4
Fundamental methods of solving first-order equations, essentials of matrix algebra; higher-order linear equations, and linear systems; series solutions; Laplace transforms; selected applications.
Prerequisite(s): MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-.
Equivalent(s): MATH 527H
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

MATH 528 - Multidimensional Calculus
Credits: 0 or 4
Partial differentiation; composite functions and chain rules; maximum and minimum; transformations; vector algebra; vector functions; gradient, divergence, and curl; curves and surfaces; multiple, line, and surface integrals; divergence, Green's and Stoke's theorem.
Prerequisite(s): MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

MATH 531 - Mathematical Proof
Credits: 4
Introduces reading and writing proofs in mathematics. The basic language of mathematics common to all branches of the subject, especially set theory and basic logic.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 539 - Introduction to Statistical Analysis
Credits: 0 or 4
A first course introducing concepts of probability and scientific methods for data analysis. Exploratory data analysis, survey sampling, probability, discrete and continuous distributions, confidence intervals, hypothesis testing, comparing samples, linear regression, analysis of variance. Statistical software is used. Offered primarily for mathematics majors; engineering majors should take MATH 644.
Prerequisite(s): MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken ADMN 420, ADMN 510, BIOL 528, COMP 490, EREC 525, HHS 540, HMP 540, MATH 439, MATH 644, PSYC 402, PSYC 402H, SOC 402, SOC 502, SOC 502H.
Grade Mode: Letter Grading

MATH 540 - Probability & Statistics
Credits: 0 or 4
This course provides a rigorous, proof#based introduction to probability and statistics. Core topics include study design, data collection and sampling, exploratory data analysis, probability rules, conditional probability, and Bayes' theorem, discrete and continuous probability distributions, joint distributions, linear combinations of random variables, estimation, hypothesis testing, and one#way Analysis of Variance (ANOVA). The emphasis is on frequentist inference, with a brief comparison to Bayesian ideas. This course is offered primarily for computer science, data science, and statistics majors at the sophomore level.
Prerequisite(s): MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 545 - Introduction to Linear Algebra
Credits: 4
Designed to reinforce ideas seen throughout the mathematics curriculum. Centered on a study of vector spaces and linear systems, beginning with a brief focus on systems of linear equations and progressing to a full discussion of linear transformation and vector spaces. The course includes a survey of properties of matrices, such as rank, kernel, eigenvalues, eigenvectors, and diagonalization.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken MATH 645, MATH 762, MTH 709.
Grade Mode: Letter Grading

MATH 601 - Exploring Mathematics for Teachers I
Credits: 4
Provides prospective elementary teachers with the opportunity to explore and master concepts involving number systems and operations, data analysis and probability. Additional topics may include geometry, measurement, and algebraic thinking. Mathematical reasoning, problem solving, and the use of appropriate manipulatives and technology are integrated throughout the course. Readings, class discussions, and assignments focus on mathematics content as well as applicable theories of learning, curriculum resources, and state and national recommendations. The course models instructional techniques that can be adapted to the elementary curricula.
Mutual Exclusion: No credit for students who have taken MATH 621, MATH 623.
Grade Mode: Letter Grading

MATH 624 - Analysis of Secondary School Mathematics A (Number Systems & Functions)
Credits: 4
Examines concepts from secondary school mathematics from the advanced mathematics perspective, emphasizing connecting and logically refining the concepts of number systems, theory of equations, function, limit, sequences, series, and rate of change. Includes an in-depth analysis of problems and topics spanning middle to high-school spectrum at the level of sophistication aligned with other collegiate mathematics courses. The course integrates both a hands-on and proof-based approach to the analysis of secondary mathematics topics.
Prerequisite(s): MATH 531 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 626 - Analysis of Secondary School Mathematics B (Geometry, Statistics, & Probability)
Credits: 4
Examines concepts from secondary school mathematics from the advanced mathematics perspective, emphasizing connecting and logically refining the concepts of geometry, matrices, statistics, modeling, probability, and topics in discrete mathematics. Includes an in-depth analysis of problems and topics spanning middle to high-school spectrum at the level of sophistication aligned with other collegiate mathematics courses. The course integrates both a hands-on and proof-based approach to the analysis of secondary mathematics topics.
Prerequisite(s): MATH 531 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 632 - Financial Mathematics
Credits: 4
A mathematical introduction to interest theory and an overview of mathematical models used to analyze and price standard financial instruments including: interest bearing accounts, stocks and bonds. Introduction to basic concepts used in mathematical finance including: random variables, mathematics of arbitrage, risk and diversification. Includes a substantive introduction to all aspects of the financial mathematics actuarial exam.
Grade Mode: Letter Grading

MATH 644 - Statistics for Engineers and Scientists
Credits: 0 or 4
Introduces the design of controlled experiments and the collection and analysis of scientific data. Other topics include exploratory data analysis, discrete and continuous probability distributions, statistical process control, confidence intervals, hypothesis testing, ANOVA, regression and correlation. The use of a statistical software package is an integral part of the course; interpreting and drawing conclusions from standard software output is emphasized.
Prerequisite(s): MATH 426 (may be taken concurrently) with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, COMP 490, EREC 525, HHS 540, HMP 540, MATH 439, MATH 539, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

MATH 645 - Linear Algebra for Applications
Credits: 4
Fundamental notions of vector space theory, linear independence, basis, span, scalar product, orthogonal bases. Includes a survey of matrix algebra, solution of systems linear equations, rank, kernel, eigenvalues and eigenvectors, the LU- and QR-factorizations, and least squares approximation. Selected applications in mathematics, science, engineering and business.
Prerequisite(s): MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken MATH 545, MATH 762.
Grade Mode: Letter Grading

MATH 647 - Complex Analysis for Applications
Credits: 4
Complex numbers, analytic functions, Cauchy-Riemann equations, conformal mapping, contour integration, Cauchy's integral formula, infinite series, residue calculus, Fourier and Laplace transforms. (Not offered for credit if credit is received for MATH 788.)
Prerequisite(s): MATH 528 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken MATH 788.
Grade Mode: Letter Grading

MATH 696 - Independent Study
Credits: 1-4
Individual projects of study developed by the student and a faculty sponsor. Intended for students with superior scholastic achievement. May be taken as writing intensive. A written proposal, including goals and assessment, endorsed by a faculty sponsor and approved by the department chairperson, must be submitted before registering.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): MATH 696W
Grade Mode: Letter Grading

MATH 696W - Independent Study
Credits: 1-4
Individual projects of study developed by the student and a faculty sponsor. Intended for students with superior scholastic achievement. A written proposal, including goals and assessment, endorsed by a faculty sponsor and approved by the department chairperson, must be submitted before registering.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): MATH 696
Grade Mode: Letter Grading

MATH 700 - Introduction to Mathematics Education
Credits: 4
General background information about mathematics education, such as theories of learning and teaching mathematics, mathematics curricula, classroom management, and techniques for the teaching and learning of mathematics that are common to all levels of mathematics education K-12.
Prerequisite(s): MATH 426 with a minimum grade of D- and EDUC 500 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken EDC 731.
Grade Mode: Letter Grading

MATH 703 - Teaching of Mathematics in Grades K-6
Credits: 4
Methods of teaching mathematics at the elementary school level; uses of technology, manipulatives, models, and diagrams; developing unit and lesson plans; assessment ; instructional formats; teaching reading and writing in mathematics.
Prerequisite(s): MATH 621 with a minimum grade of D- or MATH 601 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken EDC 724, EDC 733.
Grade Mode: Letter Grading

MATH 709 - Teaching of Mathematics in Grades 6-12
Credits: 4
Methods of teaching mathematics at the middle and high school levels; uses of technology, manipulatives, models, and diagrams; developing unit and lesson plans; assessment; instructional formats; teaching reading and writing in mathematics.
Prerequisite(s): MATH 700 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken EDC 733, EDC 734.
Grade Mode: Letter Grading

MATH 732 - Introduction to the R Software
Credits: 1
This course provides a basic introduction to the open-sources statistical software R for students who have never used this software or have never formally learned the basics of it. Topics include: Numeric calculations, simple and advanced graphics, object management and work-flow, RStudio, user-contributed packages, basic programming, writing of functions, statistical modeling and related graphs, distributed computing, reproducible research and document production via markup language.
Equivalent(s): MATH 759
Grade Mode: Credit/Fail Grading

MATH 734 - Statistical Computing
Credits: 4
This is a course on statistics-oriented programming and common computational methodologies used in statistics. Students will learn principles and techniques of sample-splitting, cross-validation, simulation, bootstrap, and optimization, and how to implement them in R. The students will gain experience of reading/modifying, writing and debugging code, and how to speed up computation.
Prerequisite(s): MATH 738 (may be taken concurrently) with a minimum grade of D- or MATH 739 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 736 - Advanced Statistical Modeling
Credits: 4
This is a course on statistical models behind normal linear model. Topics covered in this course include generalized linear model, linear mixed model, generalized additive model, generalized linear mixed model, generalized additive mixed model, and smoothing methods if time allows.
Prerequisite(s): MATH 739 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 737 - Statistical Methods for Quality Improvement and Design
Credits: 4
Six Sigma is a popular, data-focused methodology used worldwide by organizations to achieve continuous improvement of their existing processes, products and services or to design new ones. This course provides a thorough introduction to the Six Sigma principles, methods, and applications for continuous improvement (DMAIC process) and an overview of Design for Six Sigma (DFSS). Both manufacturing and non-manufacturing (transactional Six Sigma) applications are included. Emphasis is placed on the use of case studies to motivate the use of, as well as the proper application of, the Six Sigma methodology. Formal Six Sigma Green Belt certification from UNH may be attained by successfully completing TECH 696.
Prerequisite(s): MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 738 - Data Mining and Predictive Analytics
Credits: 4
An introduction to supervised and unsupervised methods for exploring large data sets and developing predictive models. Unsupervised methods include: market basket analysis, principal components, clustering, and variables clustering. Important statistical and machine learning methods (supervised learning) include: Classification and Regression Trees (CART), Random Forests, Neural Nets, Support Vector Machines, Logistics Regression and Penalized Regression. Additional topics focus on metamodeling, validation strategies, bagging and boosting to improve prediction or classification, and ensemble prediction from a set of diverse models. Required case studies and projects provide students with experience in applying these techniques and strategies. The course necessarily involves the use of statistical software and programming languages. Undergraduate students are required to have junior or senior status to in enroll in this course.
Prerequisite(s): MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

MATH 739 - Applied Regression Analysis
Credits: 4
Statistical methods for the analysis of relationships between response and input variables: simple linear regression, multiple regression analysis, residual analysis and model selection, multi-collinearity, nonlinear curve fitting, categorical predictors, analysis of variance, analysis of covariance, examination of validity of underlying assumptions, logistic regression analysis. Emphasizes real applications with use of statistical software.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 740 - Design of Experiments I
Credits: 4
Course in design of experiments with applications to quality improvement in industrial manufacturing, engineering research and development, or research in physical and biological sciences. Experimental factor identification, statistical analysis and modeling of experimental results, randomization and blocking, full factorial designs, random and mixed effects models, replication and sub-sampling strategies, fractional factorial designs, response surface methods, mixture designs, and screening designs. Focuses on various treatment structures for designed experimentation and the associated statistical analyses. Use of statistical software.
Prerequisite(s): MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 741 - Survival Analysis
Credits: 4
Explorations of models and data-analytic methods used in medical, biological, and reliability studies. Event-time data, censored data, reliability models and methods, Kaplan-Meier estimator, proportional hazards, Poisson models, loglinear models. The use of statistical software, such as SAS, JMP, or R, is fully integrated into the course. (Offered in alternate years in the spring semester.)
Prerequisite(s): MATH 739 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 743 - Time Series Analysis
Credits: 4
An introduction to univariate time series models and associated methods of data analysis and inference in the time domain and frequency domain. Topics include: auto regressive (AR), moving average (MA), ARMA and ARIMA processes, stationary and non-stationary processes, seasonal ARIMA processes, auto-correlation and partial auto-correlation functions, identification of models, estimation of parameters, diagnostic checking of fitted models, forecasting, spectral density function, periodogram and discrete Fournier transform, linear filters, parametric spectral estimation, dynamic Fournier analysis. Additional topics may include wavelets and long memory processes (FARIMA) and GARCH Models. The use of statistical software, such as JMP, or R, is fully integrated into the course. Offered in alternate years in the spring semester.
Prerequisite(s): MATH 739 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 744 - Design of Experiments II
Credits: 4
A second course in design of experiments, with applications in quality improvement and industrial manufacturing, engineering research and development, research in physical and biological sciences. Covers experimental design strategies and issues that are often encountered in practice: complete and incomplete blocking, partially balanced incomplete blocking (PBIB), partial confounding, intra and inter block information, split plotting and strip plotting, repeated measures, crossover designs, Latin squares and rectangles, Youden squares, crossed and nested treatment structures, variance components, mixed effects models, analysis of covariance, optimizations, space filling designs, and modern screening design strategies.
Prerequisite(s): MATH 740 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 745 - Foundations of Applied Mathematics I
Credits: 4
An introduction to Partial Differential Equations (PDEs) and associated mathematical methods and the analytical foundation for applied mathematics. Topics include: PDE classification, superposition, separation of variables, orthonormal functions, completeness, convergence, Fourier Series, Sturm-Liouville eigenvalue problems, and eigenfunctions. Methods are introduced for the analysis and solution of boundary value problems, in particular, the Heat, Wave, and Laplace equations.
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 747 - Introduction to Nonlinear Dynamics and Chaos
Credits: 4
The mathematics of chaos and nonlinear dynamics. Topics include linear and nonlinear systems of ordinary differential equations, discrete maps, chaos, phase plane analysis, bifurcations and computer simulations.
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D- and MATH 645 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 753 - Introduction to Numerical Methods I
Credits: 4
Introduces mathematical algorithms and methods of approximation. Topics include a wide survey of approximation methods. Methods examined include polynomial interpolation, root finding, numerical linear algebra, numerical integration, and the approximation of differential equations. Included in each case is a study of the accuracy and stability of a given technique, as well as its efficiency.
Prerequisite(s): MATH 426 with a minimum grade of D- and (MATH 445 with a minimum grade of D- or CS 410C with a minimum grade of D- or CS 410P with a minimum grade of D- or IAM 550 with a minimum grade of D-).
Grade Mode: Letter Grading

MATH 755 - Probability with Applications
Credits: 4
Introduces the theory, methods, and applications of randomness and random processes. Probability concepts, random variable, expectation, discrete and continuous probability distributions, joint distributions, conditional distributions; moment-generating functions, convergence of random variables.
Prerequisite(s): MATH 528 with a minimum grade of D- and (MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-).
Grade Mode: Letter Grading

MATH 756 - Principles of Statistical Inference
Credits: 4
Introduces the basic principles and methods of statistical estimation and model fitting. One- and two-sample procedures, consistency and efficiency, likelihood methods, confidence regions, significance testing, Bayesian inference, nonparametric and re-sampling methods, decision theory.
Prerequisite(s): MATH 755 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 757 - Mathematical Optimization for Applications
Credits: 4
This course introduces the foundations of mathematical optimization and reinforces them via applications. The content includes convex optimization, first and second-order methods, constrained problems, duality, linear and quadratic programming, as well as discrete and non-convex optimization. Applications will focus on machine learning methods but also include problems from engineering and operations research. Programming proficiency in MATLAB, R, Java, C, Python, or equivalent is required prior to taking this course.
Prerequisite(s): MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-.
Equivalent(s): CS 757
Grade Mode: Letter Grading

MATH 760 - Geometry
Credits: 4
Advanced approach to fundamental properties of Euclidean and other geometries through deductive reasoning and proof.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 761 - Abstract Algebra
Credits: 4
This course establishes the axiomatic framework that underlies number systems and similar mathematical structures, investigating basic properties of groups, rings, fields and their homomorphisms.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 763 - Abstract Algebra II
Credits: 4
This course extends the investigations of MATH 761 into more specialized situations related to old and new problems in mathematics, such as the nature of solutions of polynomial equations. It presents advanced properties of groups, rings, fields and their applications.
Prerequisite(s): MATH 761 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 765 - Introduction to Commutative Algebra and Algebraic Geometry
Credits: 4
Methods of determining solution sets of polynomial systems; affine varieties and their ideals; the 'algebra-geometry correspondence'; theory and applications of Grobner bases.
Prerequisite(s): MATH 761 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 767 - One-Dimensional Real Analysis
Credits: 4
Theory of limits, continuity, differentiability, and integrability.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 768 - Real Analysis II
Credits: 4
Theory of integration; series; power series and uniform convergence of power series.
Prerequisite(s): MATH 767 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 769 - Introduction to Differential Geometry
Credits: 4
Introduction to the study of geometric properties of curves and surfaces in 3-dimensional space.
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D- and MATH 645 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 770 - Foundations of Number Theory
Credits: 4
Factorization and prime numbers, arithmetic functions, congruences, reciprocity laws, quadratic forms, Diophantine equations, computational number theory. Offered in alternate years.
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 772 - Combinatorics
Credits: 4
Graph theory (including planar graphs, graph coloring, Hamiltonian circuits, trees); counting principles (including permutations, combinations, pigeonhole principle, inclusion-exclusion principle); and related topics.
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 783 - Set Theory
Credits: 4
Axiomatic set theory, including its history. Cantor's theory of infinite cardinal and ordinal numbers seemed laden with contradictions and paradoxes. A satisfactory treatment of these difficulties came with the axiomatic set theory of Zermelo and Fraenkel. This course develops the Zermelo-Fraenkel axioms and examines cardinal and ordinal arithmetic in the context they provide. The course then investigates the consequences of various additional axioms extending Zermelo-Fraenkel, such as the Axiom of Choice, the Continuum Hypothesis, large cardinal axioms of determinacy. Offered in alternate years.
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 784 - Topology
Credits: 4
Open sets, closure, base, and continuous functions; connectedness, compactness, separation axioms, and metrizability.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 767 with a minimum grade of D-.
Grade Mode: Letter Grading

MATH 788 - Complex Analysis
Credits: 4
Complex functions, sequences, limits, differentiation and Cauchy-Riemann equations, elementary functions, Cauchy's theorem and formula, Taylor's and Laurent's series, residues, conformal mapping. Not offered for credit if credit is received for MATH 647.
Prerequisite(s): MATH 767 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken MATH 647.
Grade Mode: Letter Grading

MATH 790 - Historical Foundations of Mathematics
Credits: 4
Historical development of number theory, geometry, probability, algebra, and analysis. Study of the significant mathematical contributions to these topics made by prominent mathematicians spanning several historical periods.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 531 with a minimum grade of D- or MATH 545 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken MTH 706.
Grade Mode: Letter Grading

MATH 797 - Senior Seminar
Credits: 4
Exploration of mathematical topics beyond the student's previous coursework in the seminar format. The course focus is on independent research, collaborative work and classroom engagement; oral presentations and written work are required.
Grade Mode: Letter Grading

MATH 798 - Senior Project
Credits: 4
Students work either individually or as a group under the direction of a faculty sponsor to plan and carry out an independent research project resulting in a written report and presentation to the department. Students must submit a written proposal approved by a faculty sponsor and by the department chairperson before registering.
Grade Mode: Letter Grading

MATH 799 - Senior Thesis
Credits: 2-4
Students work under the direction of a faculty sponsor to plan and carry out independent research resulting in a written thesis. Required for honors-in-major. Students must submit a written proposal approved by a faculty sponsor and by the department chairperson before registering.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

MTH 402 - Math for Our World
Credits: 4
This course takes an integrated approach to the study of mathematics, combining mathematical concepts with applications in the real world. It addresses topics in mathematics necessary in a college education, providing the reasoning strategies needed for mathematical problem solving in the workplace, the media, and everyday life. The course serves as the foundation for higher-level math courses and provides the quantitative skills necessary to be adequately prepared for coursework in other academic areas. The overarching goal is to learn to interpret quantitative and statistical information that we encounter daily. Students will understand how real-world problems can be analyzed using the power and rigor of mathematical and statistical models. Topics include: problem solving, math of finance, geometry, basic probability, and beginning statistical concepts with an emphasis on real world applications and interpreting information. The use of Excel will be incorporated into the topics of this course. Acceptable scores on Accuplacer Arithmetic and Elementary Algebra Accuplacer Classic or Next Generation Accuplacer assessments; or approved exemption based on previous high school transcripts: a grade of C or better in both Algebra and Geometry taken within the last five years; or SAT Math score of 500+ or ACT Math score of 18+ taken within five years of registration; or successful completion of the ALEKS Program Math Tutorial as determined by the college's math faculty required. Accuplacer or ALEKS assessments should be completed within five years of registering for course.
Attributes: Mathematics (Gen Ed); Quantitative Reasoning(Disc)
Prerequisite(s): (Classic Arithmetic Accuplacer with a score of 080 and CL Elem Algebra - Accuplacer with a score of 036) or (Arithmetic Accuplacer-Next Gen with a score of 263 and Quant,Alg,Stats Accp-Next Gen with a score of 237) or C MATH 405/or taken elsewhere with a score of WAIV or SAT Math with a score of 500 or ACT Reading with a score of 18 or GSC Math Workshop Completed with a score of WAIV.
Equivalent(s): MATH 502G
Grade Mode: Letter Grading

MTH 504 - Statistics
Credits: 4
This course addresses introductory statistical concepts, methods, and procedures important for making well-informed decisions in real world settings. It provides students with both theoretical principles and practical skills in statistics. Topics include an overview of descriptive and inferential statistics, specifically sampling, measurements of central tendency and dispersion, frequency distributions, graphing techniques, probability theory, hypothesis testing, normal distribution, regression and correlation, t-tests, and analysis of variance. An acceptable score on the Classic or Next Generation Accuplacer arithmetic and elementary algebra assessment. Accuplacer assessments should be completed within five years of registering for course. NOTE: Excel proficiency is expected prior to enrollment in this course.
Attributes: Mathematics (Gen Ed); Quantitative Reasoning(Disc)
Prerequisite(s): MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.
Equivalent(s): MATH 504G
Mutual Exclusion: No credit for students who have taken BUS 430, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

MTH 510 - Pre-Calculus
Credits: 4
This course is intended as a bridge course between algebra and calculus. The course focuses on strengthening the student's mathematical problem solving skills and developing a firm understanding of functions, their graphical representation, their behavior, and their use to model real-life situations. Various classes of functions will be highlighted: polynomials, rational, exponential, logarithmic, and trigonometric. Topics may also include: algebraic concepts, real number system, systems of equations and inequalities, complex numbers, and polar coordinates. An acceptable score on the Classic or Next Generation Accuplacer assessment(s) is accepted prior to taking this course. Accuplacer assessments should be completed within five years of registering for course. A graphing calculator is required.
Attributes: Mathematics (Gen Ed); Quantitative Reasoning(Disc)
Prerequisite(s): MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.
Equivalent(s): MATH 510G
Grade Mode: Letter Grading

MTH 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topic in mathematics. Course content will change from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): MATH 544G
Grade Mode: Letter Grading

MTH 701 - Probability and Statistics
Credits: 4
In this course students study topics in data analysis including: descriptive and inferential statistics, probability, odds and fair games, probability distributions, normal distributions, and estimation. Among the topics are numerical and graphical summaries for one and two variables, linear regression and correlation, confidence intervals and tests concerning means, sampling and experimentation, basic probability, confidence intervals, hypothesis testing, sampling distributions, two-sample t-tests for means, chi-squared tests, regress and correlation, and possible other topics. A standards statistical software package is used throughout the course to support the course format that includes: hands-on activities, computer-based simulations, creating and implementing student developed investigations, and actual secondary and middle school mathematics classroom activities. Throughout the course students are given opportunities to relate the mathematical concepts studied in this course to the mathematical concepts they will be teaching.
Prerequisite(s): MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.
Equivalent(s): MATH 603G
Mutual Exclusion: No credit for students who have taken MATH 439, MATH 623, PSYC 402, SOC 402, SOC 402H, SOC 502.
Grade Mode: Letter Grading

MTH 702 - Mathematical Proof
Credits: 4
This course introduces students to the language and methods used to create and write mathematical proofs and solve problems. Methods of proof will include: direct, contrapositive, contradiction, and induction. Methods of problem solving will be based on Polya's four steps for problem solving. Students will learn about and utilize the many functions of proof including: verification, explanation, communication, discovery, justification, and inquiry. The course will also explore the relationship between problem solving and the process of proving. Students will explore fundamental abstract concepts in mathematics chosen from the following areas: functions and relations, set theory, number theory, and logic, Euclidian and non-Euclidian geometry, algebra, mathematical reasoning, proof, and problem solving. Connections to middle and secondary school mathematics.
Prerequisite(s): MTH 510 with a minimum grade of D- or MATH 510G with a minimum grade of D-.
Equivalent(s): MATH 600G
Grade Mode: Letter Grading

MTH 703 - Number Systems
Credits: 4
This course examines the structure and properties of mathematics while focusing on the development of mental mathematics strategies and problem solving skills. Topics include sets, functions, applications of rational numbers, integers, fractions, decimals, percentages, and number theory. Appropriate grade level techniques are utilized to investigate algorithms, probability and statistics, counting techniques, scientific notation, complex numbers, exponents, geometry, and measurement. Students will also investigate ratios, proportion, data analysis, patterns, and the connections to algebra and geometry topics in the context of the 5-12 grades mathematics curriculum.
Prerequisite(s): MTH 702 with a minimum grade of D-.
Equivalent(s): MATH 601G
Mutual Exclusion: No credit for students who have taken MATH 621.
Grade Mode: Letter Grading

MTH 704 - Geometric Structures
Credits: 4
This course will examine concepts in Euclidean and non-Euclidean geometries. Course topics include area and volume, two- and three-dimensional perspective, congruence and similarity, properties of and relationships among geometric shapes and structures. Students will investigate graphing, vectors, motion, and symmetry. Students engage in course concepts through proofs, problem solving, dynamic geometric software, and through activities used in secondary and middle school mathematics. Throughout the course students will be given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.
Prerequisite(s): MTH 702 with a minimum grade of D-.
Equivalent(s): MATH 602G
Mutual Exclusion: No credit for students who have taken MATH 622.
Grade Mode: Letter Grading

MTH 705 - Calculus I
Credits: 4
This course is the first semester of a calculus sequence dealing with applications and modeling of the differential and integral calculus. The course focuses on functions and their graphs, limits, continuity, differentiation, integration, the derivative and its uses in optimization and mathematical modeling, as well as the Fundamental Theorem. Throughout the course students are given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching. Graphing calculators are used throughout the course to explore and represent concepts.
Prerequisite(s): MTH 510 with a minimum grade of D- or MATH 510G with a minimum grade of D-.
Equivalent(s): MATH 606G
Mutual Exclusion: No credit for students who have taken MATH 425.
Grade Mode: Letter Grading

MTH 706 - History of Mathematics
Credits: 4
This course addresses the historical development of major themes in mathematics, including calculation, numbers, geometry, algebra, infinity, and formalism in various civilizations ranging from the antiquity of Babylonia and Egypt through classical Greece, the Middle and Far East, and on to modern Europe. The course emphasizes how earlier civilizations influenced or failed to influence later ones and how the concepts evolved in these various civilizations.
Prerequisite(s): (MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D-) and MTH 702 with a minimum grade of D-.
Equivalent(s): MATH 608G
Mutual Exclusion: No credit for students who have taken MATH 790.
Grade Mode: Letter Grading

MTH 707 - Calculus II
Credits: 4
This course is the second semester of a calculus sequence dealing with applications of differential and multivariable calculus. Topics include the calculus of transcendental functions, applications of integration, some differential equations, sequences and series, differentiation and integration of trigonometric functions multidimensional calculus with applications, and an introduction to multivariable calculus. Throughout the course students are given opportunities to relate the mathematical concepts studies to the mathematical concepts they will be teaching. Graphing calculators are used throughout the course to explore and represent concepts.
Prerequisite(s): MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D-.
Equivalent(s): MATH 607G
Mutual Exclusion: No credit for students who have taken MATH 426.
Grade Mode: Letter Grading

MTH 708 - Discrete Mathematics
Credits: 4
This course is designed to introduce students to discrete and abstract mathematical topics. Topics include propositional and predicate logic; elementary set theory; introduction to proof techniques including mathematical induction; sets, relations, functions, and relations; recurrence relations, graph theory, as well as the properties of groups, rings, and fields. Students study number systems, mathematical induction, algorithms and complex number systems, matrix manipulation, combinatorics, graph theory, and finite differences. Course activities are based on secondary and middle school mathematics curricula. This course considers the basic objects of mathematics through real-world examples and the methods used to elucidate their properties.
Prerequisite(s): MTH 705 with a minimum grade of D- or MATH 606G with a minimum grade of D- or MTH 703 with a minimum grade of D-.
Equivalent(s): MATH 605G
Grade Mode: Letter Grading

MTH 709 - Topics in Linear and Abstract Algebra
Credits: 4
This course examines concepts in algebra including: patterns and functions, arithmetic sequences, geometric sequences, arithmetic and algebra of the integers, least common multiple and greater common divisor, inequalities, modular arithmetic and systems of numbers, properties of groups and fields, the field of complex numbers, polynomial arithmetic and algebra, linear equations. The course develops the mathematical structures, algebraic properties, and applications of matrices, determinants, vectors, vector spaces, systems of linear equations, and linear transformations. Students engage with these concepts through exploration, analysis, proof, and problem solving based on activities used in secondary and middle school mathematics. Throughout the course students are given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.
Prerequisite(s): MTH 707 with a minimum grade of D- or MATH 607G with a minimum grade of D- or MTH 708 with a minimum grade of D-.
Equivalent(s): MATH 604G
Mutual Exclusion: No credit for students who have taken MATH 545.
Grade Mode: Letter Grading

MTH 710 - Algebra Theory for Middle School Teachers
Credits: 4
This course will examine concepts in algebra including patterns and functions, arithmetic sequences, geometric sequences, arithmetic and algebra of the integers, least common multiple and greatest common divisor, inequalities, modular arithmetic and systems of numbers, basic properties of groups and fields, and polynomial arithmetic and algebra. This course will develop mathematical structures, algebraic properties, and applications of matrices. Students will engage with these concepts through exploration, analysis, proof, and problem solving based on activities used in middle school mathematics. Throughout the course students will be given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.
Prerequisite(s): MTH 708 with a minimum grade of D-.
Equivalent(s): MATH 609G
Mutual Exclusion: No credit for students who have taken MATH 625.
Grade Mode: Letter Grading

MTH 744 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in mathematics. Course content will change from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): MATH 644G
Grade Mode: Letter Grading

Mechanical Engineering (ME)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ME 400 - Mechanical Engineering First Year Seminar
Credits: 1
This course serves as an introduction to success strategies for Mechanical Engineering students, who are new to the University of New Hampshire's College of Engineering and Physical Sciences. Emphasis will be on skills needed to be successful as a Mechanical Engineering student, including academic support resources, specific career opportunities, and professional development.
Grade Mode: Credit/Fail Grading

ME 441 - Introduction to Engineering Design and Solid Modeling
Credits: 0 or 4
Why are some products better than others? What is the definition of "better"? This course uses an inquiry-guided approach to explore the product design process via team design projects and laboratory exercises. Everyday products are examined from historical, societal, design, safety and manufacturing perspectives. Topics include ideation, sketching, design constraints, solid modeling, decision making, statistical quality control, manufacturing methods and engineering analysis. Students develop an appreciation for good design and the ability to communicate design ideas via 3-D solid models, written and oral reports.
Attributes: Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): MATH 418 with a minimum grade of D- or MATH 425 (may be taken concurrently) with a minimum grade of D- or MATH 425H (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ME 477 - Introduction to Solid Modeling
Credits: 1
Introduction to solid modeling and engineering drawings using computer-aided design software. For Mechanical Engineering students, this course can only be taken with permission as an alternative to the required ME 441 Introduction to Engineering Design and Solid Modeling for students with extensive engineering design experience (e.g., high school or another university course), an engineering project based program (e.g., FIRST Robotics or Project Lead the Way), or similar experience (e.g., working in the industry). Students should not take both ME 441 and ME 477. Lecture and Lab.
Grade Mode: Letter Grading

ME 503 - Thermodynamics
Credits: 3
Properties of a pure substance, work and heat, laws of thermodynamics, entropy, thermodynamic relations, cycles.
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (CHEM 405 (may be taken concurrently) with a minimum grade of D- or CHEM 403 (may be taken concurrently) with a minimum grade of D-) and (MATH 528 (may be taken concurrently) with a minimum grade of D- or MATH 526 (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading

ME 525 - Statics
Credits: 4
Introduces statics. Two- and three-dimensional force systems, the concept of equilibrium, analysis of trusses and frames, centroids, bending moment and shear force diagrams, and friction.
Prerequisite(s): ((PHYS 407 with a minimum grade of C or PHYS 407S with a minimum grade of C or PHYS 407H with a minimum grade of C) and (MATH 426 with a minimum grade of C+ or MATH 426H with a minimum grade of C+)) or ((PHYS 407 with a minimum grade of C+ or PHYS 407S with a minimum grade of C+ or PHYS 407H with a minimum grade of C+) and (MATH 426 with a minimum grade of C or MATH 426H with a minimum grade of C)).
Equivalent(s): CEE 500
Grade Mode: Letter Grading

ME 526 - Mechanics of Materials
Credits: 3
Introduces strength of materials. Analysis of members under torsion, axial, shear and bending stresses, superposition of stresses, stability of columns.
Attributes: Writing Intensive Course
Prerequisite(s): ME 525 with a minimum grade of D- or CEE 500 with a minimum grade of D-.
Equivalent(s): CEE 501
Grade Mode: Letter Grading

ME 561 - Introduction to Materials Science
Credits: 4
The concepts of materials science and the relation of structure of material properties. Atomic structure, bonding material transport, mechanical properties of materials, solidification, phase diagrams, solid state transformations, and corrosion and oxidation. Laboratory exercises are carried out to demonstrate the basic concepts of the course.
Attributes: Writing Intensive Course
Prerequisite(s): (MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Equivalent(s): ME 661
Grade Mode: Letter Grading

ME 603 - Heat Transfer
Credits: 3
Analysis of phenomena; steady-state and transient conduction, radiation, and convection; engineering applications.
Prerequisite(s): MATH 527 with a minimum grade of D- and ME 608 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 608 - Fluid Dynamics
Credits: 0 or 3
Dynamics and thermodynamics of compressible and incompressible fluid flow; behavior of fluids as expressed by hydrostatic, continuity, momentum, and energy equations.
Prerequisite(s): ME 503 with a minimum grade of D- and (MATH 527 (may be taken concurrently) with a minimum grade of D- and IAM 550 (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): ME 508
Grade Mode: Letter Grading

ME 627 - Dynamics
Credits: 3
Introduction to particle and rigid body dynamics. Rectilinear and curvilinear motion, translation and rotation, momentum and impulse principles, and work-energy relationships.
Attributes: Writing Intensive Course
Prerequisite(s): ME 525 with a minimum grade of D- or CEE 500 with a minimum grade of D-.
Equivalent(s): CIE 527, ME 527
Grade Mode: Letter Grading

ME 643 - Machine Design
Credits: 3
Analysis, synthesis, and design of machine elements and systems. Development of engineering judgment; selection of materials stress and failure analysis; kinematic arrangement design for finite and infinite life. Open-ended design problems unify course topics.
Attributes: Writing Intensive Course
Prerequisite(s): (ME 526 with a minimum grade of D- or CEE 501 with a minimum grade of D-) and ME 561 with a minimum grade of D- and ME 627 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 646 - Experimental Measurement and Data Analysis
Credits: 0 or 4
Basic and advanced techniques of engineering and scientific parameter measurement including statistical data and error analysis, curve fitting, calibration and application of transducers, and technical writing. Laboratory experiments draw on concepts from mechanics, thermodynamics, and fluid mechanics.
Attributes: Writing Intensive Course
Prerequisite(s): (ME 526 with a minimum grade of D- or CEE 501 with a minimum grade of D-) and ME 608 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ME 670 - Systems Modeling, Simulation, and Control
Credits: 4
Lumped parameter models for mechanical, electrical, thermal, fluid, and mixed systems. Matrix representation, eigenvalues, eigenvectors, time domain solutions, frequency response plots, and computer simulations are used to explore system response. Design of system for desired responses. Introduces feedback control, stability, and performance criteria.
Attributes: Writing Intensive Course
Prerequisite(s): ECE 537 with a minimum grade of D- and ME 627 with a minimum grade of D- and MATH 527 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 701 - Transport and Mixing in the Environment
Credits: 3
This course will cover the application of fluid mechanics to transport and mixing in the environment. The class will cover the derivation and solutions to the differential form of mass conservation equations, fundamentals of turbulence, turbulent diffusion, and shear dispersion in steady and oscillatory flows and the effects of stratification. Application to rivers, wetlands, lakes, estuaries, the coastal ocean, and the lower atmosphere.
Prerequisite(s): ME 608 with a minimum grade of D- or CEE 650 with a minimum grade of D- or CHE 601 with a minimum grade of D- or ESCI 654 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 705 - Thermal System Analysis and Design
Credits: 4
Engineering design of thermal systems that involve real problems and analysis of performance of the design. Design criteria include function, performance, optimization, economy, safety, and others as appropriate for the system. Required for ME seniors.
Co-requisite: ME 608
Attributes: Writing Intensive Course
Prerequisite(s): ME 503 with a minimum grade of D-.
Equivalent(s): ME 605
Grade Mode: Letter Grading

ME 706 - Renewable Energy: Physical and Engineering Principles
Credits: 3
The goal of this course is to become "Fluent in energy" and to learn about the engineering fundamentals of renewable energy technologies. The course will begin by giving an overview of U.S. energy usage and sources, as well as history and trends. Various renewable energy topics will then be discussed. Where applicable, topics will be discussed in detail from a fluid and thermal sciences point of view. Guest lecturers and a field trip may be included. This course is open to all engineering seniors.
Prerequisite(s): ME 608 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 707 - Analytical Fluid Dynamics
Credits: 4
Kinematics of flow; constitutive relationships; development of the Navier-Stokes equations; vorticity theorems; potential flow.
Prerequisite(s): ME 608 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 709 - Computational Fluid Dynamics
Credits: 3
Conservation of mass, momentum, and energy, discretization schemes, boundary and initial conditions, turbulence and turbulence models, two-equation models, CFD software such as OpenFOAM, best practice guidelines for CFD. The class incorporates the use and creation of Open Educational Resources (OER).
Grade Mode: Letter Grading

ME 710 - Experimental Fluid Dynamics
Credits: 4
This is a senior/graduate level course that will introduce students to a variety of experimental methods and techniques for the measurement of fluid flows. Topics include signal processing and analysis, thermal anemometry, image velocimetry, and infrared fluid sensing. The knowledge gained in this course is intended to help students carry out advanced research in fluid mechanics at the graduate level or in an industrial research lab setting.
Prerequisite(s): ME 603 with a minimum grade of D- and ME 608 with a minimum grade of D- and ME 646 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 712 - Waves in Fluids
Credits: 3
Linear and nonlinear dynamics of hyperbolic and dispersive wave systems with application to acoustic waves, surface and internal gravity waves, Rossby waves, and capillary waves. Key physical concepts include wave-generation mechanisms, wavelength and amplitude dispersion, group velocity and energy propagation, steady streaming, and mode interactions.
Prerequisite(s): ME 608 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 717 - Marine Robotics and Applications
Credits: 3
The purpose of this course is to cover (in lecture and lab format) the broad spectrum of marine vehicles and applications, as well as what is involved in designing and building robotic vehicles for specific missions. Course topics include: marine applications, sensors for marine environments, vehicle subsystems, ocean and open water environment, dynamic modeling and control, and design/fabrication.testing. Various invited speakers (both scientists and engineers) provide learning modules on various marine robotic related topics.
Prerequisite(s): ME 670 with a minimum grade of D-.
Equivalent(s): OE 717
Grade Mode: Letter Grading

ME 726 - Fracture Mechanics
Credits: 4
The goal is to acquaint the student with understanding of the basic principles behind the derivation of the most common linear and non-linear fracture mechanical equations. The aim is also to gain knowledge in analytical predictions of the failure of materials and become familiar with the ongoing fracture mechanical research. The motivation for this course is that many practical problems in mechanical engineering, manufacturing and materials science have to do with material deformation and failure.
Prerequisite(s): ME 526 with a minimum grade of D- and ME 561 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 727 - Advanced Mechanics of Solids
Credits: 4
Stress, strain, stress-strain relations, anisotropic behavior, introduction to elasticity, plane stress/strain, bending and torsion of members with general cross-sections introduction to thin plates and shells, energy methods.
Prerequisite(s): ME 526 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 742 - Materials Processing in Manufacturing
Credits: 4
Description and analysis of major material shaping processes in modern manufacturing. Casting: fluid flow and heat transfer, solidification, casting processes, properties of cast components and geometric capabilities. Forming: plasticity and formability, bulk and sheet metal forming processes, properties of formed components and geometric capabilities. Machining: cutting forces and tool wear, machining processes, properties of machined components and geometric capabilities. Overview of some non-conventional processes. Lab demonstrations.
Prerequisite(s): ME 526 with a minimum grade of D- and ME 561 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 743 - Satellite Systems, Dynamics, and Control
Credits: 3
General satellite systems with emphasis on spacecraft dynamics and control. Topics include general satellite information such as types of satellites, missions, and orbits, as well as satellite subsystems. Basic spacecraft dynamics and orbital mechanics topics are covered. Advanced topics include attitude and orbit estimation, and automatic attitude control.
Prerequisite(s): ME 670 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 747 - Experimental Measurement and Modeling of Complex Systems
Credits: 0 or 4
Experimental measurements for evaluation, design, and control of mechanical, electrical, and thermal/fluid phenomena. Emphasizes the dynamic response of both sensors and systems and the interactions between physical processes. Experimental examples are drawn from mechanics, material science, thermal-fluid science and controls.
Attributes: Writing Intensive Course
Prerequisite(s): ME 646 with a minimum grade of D- and ME 670 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 755 - Senior Design Project I
Credits: 2
Part I of this two-part sequence emphasizes problem definition, analysis, development of alternative concepts, decision-making processes, synthesis of an optimum solution and the development of a conceptual design. Lectures on these and other topics are combined with seminars given by professionals from industry, government, and academia. Related topics include ISO9000 quality systems, engineering management, design review process, engineering economics, team building and communications. Students are organized into project teams to develop a conceptual design. Formal design reviews are conducted. A formal proposal documents the semester's work.
Attributes: Writing Intensive Course
Equivalent(s): ME 656
Grade Mode: Letter Grading

ME 756 - Senior Design Project II
Credits: 2
Continuation of Senior Design Project I, in which the proposal submitted in the previous course is developed into a prototype system. Part II emphasizes the development, assembly, testing and evaluation of the system designed in Part I. Lectures and seminars focus on the prototype development process, design verification and industry practices. A formal report documents the semester's work.
Attributes: Writing Intensive Course
Prerequisite(s): ME 755 with a minimum grade of D-.
Equivalent(s): ME 656
Grade Mode: Letter Grading

ME 772 - Control Systems
Credits: 0 or 4
Development of advanced control system design concepts such as Nyquist analysis, lead-lag compensation, state feedback, parameter sensitivity, controllability, observability, introduction to non-linear and modern control. Includes interactive computer-aided design and real-time digital control. Lab.
Prerequisite(s): ME 747 with a minimum grade of D-.
Equivalent(s): ECE 772, EE 772
Grade Mode: Letter Grading

ME 777 - Computer Aided Engineering
Credits: 4
In this course, modules of Solid Works (beyond its basic solid modeling capabilities) and other software is used to demonstrate how computer based tools can be used in engineering practice, in particular design analysis and optimization. Emphasis placed on using knowledge from past engineering courses to obtain theoretical calculations to compare with the results from the computer software package.
Attributes: Writing Intensive Course
Prerequisite(s): (ME 526 with a minimum grade of D- or CEE 501 with a minimum grade of D-) and ME 627 with a minimum grade of D- and ME 603 with a minimum grade of D- and ME 608 with a minimum grade of D-.
Grade Mode: Letter Grading

ME 786 - Introduction to Finite Element Analysis
Credits: 4
Topics include basic matrix theory, potential energy approach, direct stiffness method, calculus of variations, development of finite element theory, and modeling techniques. Applications in solid mechanics, heat transfer, fluids, and electromagnetic devices, via both commercially available codes and student-written codes. Lab.
Prerequisite(s): ME 526 with a minimum grade of D-.
Equivalent(s): CIE 786
Grade Mode: Letter Grading

ME 795 - Special Topics
Credits: 1-4
New or specialized courses and/or independent study.
Repeat Rule: May be repeated for a maximum of 20 credits.
Grade Mode: Letter Grading

ME 797 - Honors Seminar
Credits: 1
Course enrichment and/or additional independent study in subject matter pertaining to a 600- or 700-level ME course other than ME 695, ME 696, ME 697, or ME 795.
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 3 credits.
Grade Mode: Letter Grading

Military Science (MILT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MILT 400PT - Physical Training
Credits: 0
This course is intended to fulfill the U.S. Army Cadet Command requirement to conduct organized physical training at the program level.
Grade Mode: Credit/Fail Grading

MILT 401 - Leadership Laboratory I
Credits: 0
Open only to students taking another Military Science class, with different roles offered for students at different levels of the program. Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training programs. Students develop, practice and refine leadership skills by serving and being evaluated in a variety of supervisory positions. Specific events include a team-building leader reaction course, orientation to military weapons, basic tactical movement, and land navigation.
Grade Mode: Credit/Fail Grading

MILT 402 - Leadership Laboratory II
Credits: 0
Open only to students taking another Military Science class, with different roles offered for students at different levels of the program. Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training programs. Students develop, practice and refine leadership skills by serving and being evaluated in a variety of supervisory positions. Specific events include basic marksmanship, advanced tactical movement, orienteering and land navigation.
Grade Mode: Credit/Fail Grading

MILT 403 - United States Army History
Credits: 2
Develops an understanding of the effects the US military and society have on each other through the establishment and background of the United States Army. Presented in the context of broader US Military history and military strategy and global involvement. Through readings, oral and written presentations, and exams, students describe the role of the US Army, its evolution and its impact on society and technology; and critically analyze an armed conflict using the principles of war. This is a pre-commissioning requirement for professional military education (PME) required by the United States Army Cadet Command. It is open to non-ROTC students.
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Letter Grading

MILT 413 - Introduction to ROTC
Credits: 0 or 2
Make your first new peer group at college one committed to performing well and enjoying the experience. Increase self-confidence through team study and activities in physical fitness, rappelling, first aid, basic marksmanship, and basic drill. Learn fundamental concepts of leadership in both classroom and outdoor laboratory environments. One hour and a required leadership lab (MILT 401L) plus optional (mandatory for scholarship cadets) participation in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is also required for all cadets. Open to all college students, no military commitment required.
Grade Mode: Letter Grading

MILT 414 - Introduction to ROTC II
Credits: 2
Learn and apply principles of effective leadership. Reinforce self-confidence through participation in physically and mentally challenging exercises with other ROTC cadets. Continued activities in basic drill, physical fitness, rappelling, first aid, and basic marksmanship. Develop communication skills to improve individual performance and group interaction. One hour and a required leadership lab (MILT 402L) plus optional (mandatory for scholarship cadets) participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required for all cadets. Open to all college students; no military commitment required.
Grade Mode: Letter Grading

MILT 501 - Self/Team Development I
Credits: 0 or 2
Learn and apply ethics-based leadership skills that develop individual abilities and contribute to the building of effective teams of people. Develop skills in oral presentations, planning of events, advanced first aid, physical fitness, and land navigation. Learn techniques for training others as an aspect of continued leadership development. Two hours and a required leadership lab (MILT 401L), plus optional participation (mandatory for scholarship cadets) in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is required. Additional weekend exercises may be offered for optional participation. Open to all college students, no military commitment required.
Co-requisite: MILT 401
Grade Mode: Letter Grading

MILT 502 - Individual/Team Military Tactics
Credits: 0 or 2
Introduces individual and team aspects of military tactics in small unit operations. Includes use of radio communications, making safety assessments, movement techniques, planning for team safety/security, and methods of pre-execution checks. Practical exercises with other ROTC students. Learn techniques for training others as an aspect of continued leadership development. Two hours and a required leadership lab (MILT 402L), plus optional participation (mandatory for scholarship cadets) in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is required. Additional weekend exercises may be offered for optional participation. Open to all college students, no military commitment required.
Co-requisite: MILT 402
Grade Mode: Letter Grading

MILT 601 - Leading Small Organizations I
Credits: 0 or 4
Series of practical opportunities to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Plan and conduct training for other ROTC students in small unit offensive and defensive operations. Three hours and required leadership lab (MILT 401L) plus required participation in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is also required. Other weekend exercises are offered for optional participation.
Grade Mode: Letter Grading

MILT 602 - Leading Small Organizations II
Credits: 0 or 4
Continues the methodology from MILT 601. Analyze tasks; prepare written and oral guidance for team members to accomplish tasks. Delegate tasks and supervise. Plan for and adapt to the unexpected in organizations under stress. Examine and apply lessons from leadership studies. Examine importance of ethical decision making in setting a positive climate that enhances team performance. Three hours and a required leadership lab (MILT 402L) plus required participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.
Grade Mode: Letter Grading

MILT 611 - Seminar on Leadership and Management I
Credits: 0 or 4
Plan, conduct and evaluate activities of the ROTC cadet organization. Articulate goals and put plans into action to attain them. Assess organizational cohesion and develop strategies to improve it. Develop confidence in skills to lead people and manage resources. Learn/apply various Army policies and programs in this effort. Three hours and a required leadership lab (MILT 401L) plus required participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.
Grade Mode: Letter Grading

MILT 612 - Transition to Lieutenant
Credits: 0 or 4
Continues the methodology from MILT 611. Identify and resolve ethical dilemmas. Refine counseling and motivating techniques. Examine aspects of tradition and law as related to leading as an officer in the Army. Prepare for a future as a successful Army lieutenant. Three hours and a required leadership lab (MILT 402L) plus required participation in three one-hour sessions for physical fitness per week. Participation in one weekend exercise is also required, and one or two more weekend exercises may be offered for optional participation.
Grade Mode: Letter Grading

MILT 695 - Officer Internship
Credits: 1-4
Experiential learning through fieldwork in a military-type unit. Written analysis required.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Music (MUSI)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MUSI 401 - Introduction to Music
Credits: 4
Fundamental approach to analytical listening with attention to learning how to aurally recognize and apply the basic elements of music to a wide variety of specific musical works in oral and written contexts. Critical thinking and listening skills will be developed through study of music in a variety of cultural and historical perspectives. Some participation in musical life of the University may be required, unless this is the fully online version. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): MUSI 401H
Grade Mode: Letter Grading

MUSI 403 - Roots of Rock
Credits: 4
Focuses on the musical styles, traditions, and social circumstances that led to a distinctive form of American popular music in the 1950's and '60's. In addition to developing critical listening skills to discern subtle distinctions among such styles and sub-styles as blues, folk, jazz, and country, the course also considers the diverse social trends that helped drive changes and developments in the various styles and genres covered. While some attention will be devoted to rock music of the mid-late sixties, the course emphasizes the various musical styles that preceded rock.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

MUSI 404 - An Introduction to Music, Media, and the Moving Image
Credits: 4
Through selected readings, attentive listening, viewing, and discussion of a variety of films and multi-media productions, students develop a common vocabulary for analyzing music accompanying moving images. Students develop an understanding of the western and non-western musical conventions that work, often at a subconscious level, in conjunction with images to shape and cue audience responses to, and interaction with, visual cues. Media includes canonic Hollywood films, independent and foreign cinema, with explorations of non-Western films, video game scoring, television, and animation. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

MUSI 405 - Survey of Music in America
Credits: 4
From colonial times to the present, including various European influences, the quest for an American style, and the emergence of such indigenous phenomena as jazz. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program. (Formerly MUSI 511).
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

MUSI 406 - Country Music
Credits: 4
This course surveys the rich musical, cultural, and economic history of country music in the United States. Since its inception, country music has embodied a tension between tradition and progress. Country music thereby reflects a basic feature of the American story, valorizing our history while valuing social and technological development. Throughout the course, we consider this tension as it affects the musical content and cultural meaning of country music.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

MUSI 441 - Concert Choir
Credits: 0-1
Large, non-auditioned, SATB chorus specializing in the performance of choral art-song, masterworks, and symphonic choral repertoire. Open to all students. Pre-registration is encouraged. This class requires two concerts outside of the normal class meeting times.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 442 - Chamber Singers
Credits: 0-1
Auditioned SATB chorus specializing in unaccompanied choral repertoire. Choral experience and strong skills in musicianship are recommended. Auditions are open to all students and conducted the first week of the semester. Contact the instructor for further information. This class requires a number of concerts outside of the normal class meeting times; a schedule is included in the syllabus.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 444 - Music and Social Change
Credits: 4
The connections between music and social change with a twofold goal: 1) to heighten critical listening skills so as to become more aware of ways in which music can express social attitudes; and 2) to introduce the social, cultural, and political issues surrounding the music being studied. Course work consists of listening to selected repertoires, reading scholarly and popular essays about those repertories, and extensive in-class (and on-line) discussion about issues raised by the listening and reading. This course does not fulfill a music major program requirement nor does it satisfy the Fine and Performing Arts Discovery requirement for any music major program.
Attributes: FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

MUSI 448 - Vocal Arts Project
Credits: 0-1
This vocal performance course explores and prepares singers for a diverse and inclusive range of vocal repertory including but not limited to opera, music theatre, jazz, folk, country, contemporary commercial music, and original songs.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 450 - Symphony
Credits: 0-1
Presents several concerts during the year of repertoire ranging from the great, standard symphonic literature to large modern works.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 452 - Wind Symphony
Credits: 0-1
Select wind ensemble which performs difficult classical and contemporary literature.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 453 - Symphonic Band
Credits: 0 or 1
Original band music, transcription, marches, etc. For students whose program does not permit music as a major interest, but who are interested in maintaining their playing proficiency and continuing their study of music.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 454 - UNH Marching Band
Credits: 0 or 1
Open to all students; performs during football games. Rehearsals conclude at the end of the football season.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 455 - Collaborative Piano
Credits: 1
Drawing from available student instrumentalists and singers, pianists learn the art of performing in trios, duo sonatas, and two-piano works, and gain experience in Lieder accompaniment.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 456 - String Chamber Music
Credits: 0-1
Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 457 - Wind Chamber Music
Credits: 0-1
Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 459 - Percussion Ensemble
Credits: 0-1
Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 460 - Jazz Band
Credits: 0-1
Two jazz bands perform a wide spectrum of big band literature.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 462 - Pep Band
Credits: 0-1
Rehearsal and performance of a broad range of band music at hockey and basketball games.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 463 - Jazz Combo
Credits: 0-1
Groups of instrumentalists gain experience in the performance of literature for the smaller jazz ensemble.
Repeat Rule: May be repeated for a maximum of 9 credits.
Grade Mode: Letter Grading

MUSI 464 - Guitar Ensemble
Credits: 0-1
Groups of instrumentalists gain experience in the performance of literature for the smaller ensemble.
Repeat Rule: May be repeated for a maximum of 9 credits.
Grade Mode: Letter Grading

MUSI 471 - Theory I
Credits: 3
Introduces the tonal system; species counterpoint; principles of voice leading and harmonic progression through the analysis, realization, and composition of one-, two-,and four-voiced textures. Concept of triad inversion and consonant diatonic harmonies of the major and minor modes. Students should register for MUSI 473 and MUSI 474 concurrently.
Grade Mode: Letter Grading

MUSI 472 - Theory I
Credits: 3
Introduces the tonal system; species counterpoint; principles of voice leading and harmonic progression through the analysis, realization, and composition of one-, two-,and four-voiced textures. Concept of triad inversion and consonant diatonic harmonies of the major and minor modes. Students should register for MUSI 474 and MUSI 476 concurrently.
Prerequisite(s): MUSI 471 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 473 - Ear Training I
Credits: 1
Laboratory exercises to develop aural skills; sight-singing and dictation. Students should register for MUSI 471 and MUSI 472 concurrently.
Grade Mode: Letter Grading

MUSI 474 - Ear Training I
Credits: 1
Laboratory exercises to develop aural skills; sight-singing and dictation. Students should register for MUSI 472 and MUSI 476 concurrently.
Prerequisite(s): MUSI 473 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 475 - Functional Piano I
Credits: 1
Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.
Co-requisite: MUSI 471, MUSI 473
Grade Mode: Letter Grading

MUSI 476 - Functional Piano I
Credits: 1
Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.
Co-requisite: MUSI 472, MUSI 474
Prerequisite(s): MUSI 475 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 501 - The Western Musical Canon
Credits: 3
An introductory survey of the Western "classical" canon. Students will become familiar with the different style periods of church, court, and concert music from the ninth century to the present day. Some score reading involved; rudimentary knowledge of music theory encouraged.
Prerequisite(s): (MUSI 472 with a minimum grade of D- or MUSI 412 with a minimum grade of D-).
Grade Mode: Letter Grading

MUSI 502 - Musics in Context
Credits: 3
Through a series of case studies drawn from a variety of global musics past and present, including classical, traditional, and commercial, this course introduces students to different approaches to thinking about and analyzing music in conjunction with the specific case studies and in individual and small group projects. This approach equips students to investigate music that they perform, teach, and listen to - within or beyond the UNH curriculum - drawing on different branches of music study to place any type of music in historical, cultural, and social contexts and to share their findings in written, oral, or recorded formats. A core course for music majors, this course builds on concepts and repertories encountered in MUSI 501, MUSI 515 MUSI 471–476, 571–576 and prepares students for their 700- level courses in music history and theory.
Attributes: Inquiry (Discovery)
Prerequisite(s): MUSI 471 with a minimum grade of C- and MUSI 472 with a minimum grade of C- and MUSI 501 with a minimum grade of C- and MUSI 515 with a minimum grade of C-.
Grade Mode: Letter Grading

MUSI 515 - Music in World Cultures
Credits: 4
An introduction to musicking (participating in any way, including listening, in musical performance) beyond the Western tradition, this course offers students an opportunity to explore the music and culture of diverse regions from an ethnomusicological perspective. Through listening to and analyzing music, readings, lecture, discussion, and individual fieldwork projects, students discover how music functions within different world cultures and gain understanding of the ways people "make music meaningful and useful in their lives," as, through musicking, they articulate, resist, and transform cultural norms.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

MUSI 520 - Diction for Singers I
Credits: 2
Application of International Phonetic Alphabet (IPA) to English, French, German, and Italian. Emphasizes both written and spoken performance.
Grade Mode: Letter Grading

MUSI 540 - Recital Attendance
Credits: 0
This course is a requirement for all undergraduate music majors in the Department of Music. Students are required to attend at least twelve approved recitals or concerts during each semester they are enrolled in MUSI 540. This course must be completed six times with a grade of Credit (Satisfactory) for zero credit each time.
Grade Mode: Credit/Fail Grading

MUSI 541 - Piano
Credits: 1-4
Private instruction in piano. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 545 - Voice
Credits: 1-4
Private instruction in voice. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 546 - Violin
Credits: 1-4
Private instruction in violin. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 547 - Viola
Credits: 1-4
Private instruction in viola. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 548 - Violoncello
Credits: 1-4
Private instruction in violoncello. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 549 - String Bass
Credits: 1-4
Private instruction in string bass. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 551 - Flute
Credits: 1-4
Private instruction in flute. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 552 - Clarinet
Credits: 1-4
Private instruction in clarinet. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 553 - Saxophone
Credits: 1-4
Private instruction in saxophone. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 554 - Oboe
Credits: 1-4
Private instruction in oboe. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 555 - Bassoon
Credits: 1-4
Private instruction in bassoon. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 556 - French Horn
Credits: 1-4
Private instruction in French horn. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 557 - Trumpet
Credits: 1-4
Private instruction in trumpet. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 558 - Trombone
Credits: 1-4
Private instruction in trombone. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 559 - Euphonium
Credits: 1-4
Private instruction in euphonium. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 560 - Tuba
Credits: 1-4
Private instruction in tuba. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 561 - Percussion
Credits: 1-4
Private instruction in percussion. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 562 - Jazz Piano
Credits: 1-4
Private instruction in jazz piano. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 563 - Jazz Guitar
Credits: 1-4
Private instruction in jazz guitar. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 564 - Drum Set
Credits: 1-4
Private instruction in drum set. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 571 - Theory II
Credits: 3
Continuation of MUSI 471- MUSI 472. Compositional and analytical work stresses the treatment of dissonance within the tonal system; accessory tones, seventh chords, tonicization, modulation, basic principles of chromatic harmony, and harmonization of chorale melodies are covered. Students should register for MUSI 573 and MUSI 574 concurrently.
Prerequisite(s): MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 572 - Theory II
Credits: 3
Continuation of MUSI 471- MUSI 472. Compositional and analytical work stresses the treatment of dissonance within the tonal system; accessory tones, seventh chords, tonicization, modulation, basic principles of chromatic harmony, and harmonization of chorale melodies are covered. Students should register for MUSI 573 and MUSI 574 concurrently.
Prerequisite(s): MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D- and MUSI 571 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 573 - Ear Training II
Credits: 1
Laboratory exercises to develop aural skills further. Students should register for MUSI 571-572 concurrently.
Prerequisite(s): MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 574 - Ear Training II
Credits: 1
Laboratory exercises to develop aural skills further. Students should register for MUSI 571-572 concurrently.
Prerequisite(s): MUSI 472 with a minimum grade of D- and MUSI 474 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 575 - Functional Piano II
Credits: 1
Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.
Co-requisite: MUSI 571, MUSI 573
Prerequisite(s): MUSI 476 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 576 - Functional Piano II
Credits: 1
Basic instruction for music majors with no previous keyboard training. Piano technique, keyboard harmony geared to the practical harmonization of simple melodies, sight reading, transposition, and modulation. May involve both class instruction and periodic short individual lessons.
Co-requisite: MUSI 572, MUSI 574
Prerequisite(s): MUSI 575 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 595 - Special Topics in Music Literature
Credits: 0-4
Open to music majors and non-majors; topics in areas not easily covered in historical courses. May be repeated for credit.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

MUSI 691 - Music Internship I
Credits: 1-2
Music students will expand their professional experience in an educationally productive and effective manner while building community relationships. With the guidance of a UNH music internship coordinator and community partner supervisor, the student is expected to contribute effectively within the organization. Music Internship I is required of all music majors in their junior year.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading

MUSI 701 - Topics in Music History
Credits: 3
Courses offered under this number feature a variety of topics having to do with music history. Topics in given semesters reflet faculty expertise in teaching and research. For topic examples, see "Courses Taught" on relevant faculty web pages. May be repeated barring duplication of subject.
Attributes: Writing Intensive Course
Prerequisite(s): MUSI 501 with a minimum grade of C- and MUSI 502 with a minimum grade of C-.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

MUSI 709W - Music of the Romantic Period
Credits: 3
A survey of romanticism in music from Beethoven's late period to the end of the 19th century. The works of Schubert, Berlioz, Schumann, Mendelssohn, Chopin, Wagner, Verdi, Brahms, Austrian symphonists, French pre-impressionists, and national styles in European music.
Attributes: Writing Intensive Course
Prerequisite(s): MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.
Equivalent(s): MUSI 709
Grade Mode: Letter Grading

MUSI 711 - Music of the 20th and 21st Centuries
Credits: 3
Styles and techniques of composers from Debussy to the present. Special emphasis on tonal music before World War I, neoclassical trends, the emergence of atonality and serial techniques, electronic music.
Attributes: Writing Intensive Course
Prerequisite(s): MUSI 501 with a minimum grade of D- and MUSI 502 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 731 - Conducting
Credits: 2
Physical aspects, equipment of conductor, fundamental gestures and beats, baton techniques. Reading and analysis of full and condensed scores, study of transposition, psychology of rehearsal.
Prerequisite(s): MUSI 571 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 732 - Conducting
Credits: 2
Physical aspects, equipment of conductor, fundamental gestures and beats, baton techniques. Reading and analysis of full and condensed scores, study of transposition, psychology of rehearsal.
Prerequisite(s): MUSI 571 with a minimum grade of D- and MUSI 731 with a minimum grade of D-.
Grade Mode: Letter Grading

MUSI 741 - Piano
Credits: 1-4
Private instruction in piano. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 745 - Voice
Credits: 1-4
Private instruction in voice. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 746 - Violin
Credits: 1-4
Private instruction in violin. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 747 - Viola
Credits: 1-4
Private instruction in viola. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 748 - Violoncello
Credits: 1-4
Private instruction in violoncello. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 749 - String Bass
Credits: 1-4
Private instruction in string bass. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 750 - Classical Guitar
Credits: 1-4
Private instruction in classical guitar.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading

MUSI 751 - Flute
Credits: 1-4
Private instruction in flute. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 752 - Clarinet
Credits: 1-4
Private instruction in clarinet. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 753 - Saxophone
Credits: 1-4
Private instruction in saxophone. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 754 - Oboe
Credits: 1-4
Private instruction in oboe. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 755 - Bassoon
Credits: 1-4
Private instruction in bassoon. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 756 - French Horn
Credits: 1-4
Private instruction in French horn. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 757 - Trumpet
Credits: 1-4
Private instruction in trumpet. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 758 - Trombone
Credits: 1-4
Private instruction in trombone. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 759 - Euphonium
Credits: 1-4
Private instruction in euphonium. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 760 - Tuba
Credits: 1-4
Private instruction in tuba. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 761 - Percussion
Credits: 1-4
Private instruction in percussion. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 762 - Jazz Piano
Credits: 1-4
Private instruction in jazz piano. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 763 - Jazz Guitar
Credits: 1-4
Private instruction in jazz guitar. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 764 - Drum Set
Credits: 1-4
Private instruction in drum set. Special fee for non-majors.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 775 - Composition
Credits: 1-4
Studies in composition and score preparation resulting in the creation of original compositions to be performed on a student composers' concert in the Music Department.
Prerequisite(s): MUSI 572 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MUSI 776 - Composition
Credits: 1-4
Studies in composition and score preparation resulting in the creation of original compositions to be performed on a student composers' concert in the Music Department.
Prerequisite(s): MUSI 572 with a minimum grade of D- and MUSI 775 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

MUSI 777 - Advanced Composition
Credits: 1-4
Continuation of MUSI 776. Individual compositional projects. May be repeated for credit.
Prerequisite(s): MUSI 776 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 99 credits.
Grade Mode: Letter Grading

MUSI 779 - Reading and Writing Musical Scores
Credits: 3
This course is designed to assist music majors gain competence and confidence in working with full scores from music ensembles. Course activities will focus on the tasks of score reading and analysis, and the creation of new arrangements for ensembles the student is likely to lead in their professional life. Additionally, various aspects of programming repertoire for performances will be addressed. These skills will be of value to both music education and music performance majors.
Prerequisite(s): MUSI 471 with a minimum grade of C- and MUSI 472 with a minimum grade of C- and MUSI 571 with a minimum grade of C- and MUSI 572 with a minimum grade of C-.
Grade Mode: Letter Grading

MUSI 781W - Analysis: Form and Structure
Credits: 3
Introduces analytical techniques through the study of representative masterworks: formal and structural elements and their interrelationships. Analysis of 18th- and 19th century works.
Attributes: Writing Intensive Course
Prerequisite(s): MUSI 572 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

MUSI 791 - Music Internship II
Credits: 2-4
Music students will expand their professional experience in an educationally productive and effective manner while building community relationships. With the guidance of a UNH music internship coordinator and community partner supervisor, the student is expected to contribute effectively within the organization. Music Internship II is required of all music majors (apart rom music education majors) in their senior year.
Prerequisite(s): MUSI 691 with a minimum grade of CR.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

MUSI 795 - Special Studies
Credits: 1-4
A) J.S. Bach, B) Franz Schubert, C) Debussy and Ravel, D) the world of jazz, E) piano literature, F) 19th century French music, G) advanced analysis, H) advanced study in electronic music, I) composition through computer-generated sound, J) woodwind literature, K) brass literature, L) string literature, M) medieval performance practice, N) renaissance performance practice, O) baroque performance practice, P) classical performance practice, Q) 19th century performance practice, R) 20th century performance practice, S) woodwind repair, T) string repair, U) advanced jazz improvisation, V) advanced piano pedagogy, W) advanced accompanying, X) advanced conducting, Y) independent study. May be repeated for credit with permission.
Repeat Rule: May be repeated up to 4 times.
Equivalent(s): MUSI 795W
Grade Mode: Letter Grading

Music Education (MUED)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

MUED 741 - Techniques and Methods in Choral Music
Credits: 2
Methods for teaching choral music in 5-12th grade schools, the developing voice, vocal modeling, repertoire selection, choral conducting, rehearsal technique, sequencing and feedback, piano skills for choral rehearsal, in-school fieldwork. This class requires a fieldwork component. Students will conduct rehearsals at Oyster River Middle School 7:00am-7:50am at least once per week for a portion of the semester.
Prerequisite(s): EDUC 500 with a minimum grade of D- and MUSI 731 with a minimum grade of D- and MUSI 732 with a minimum grade of D-.
Grade Mode: Letter Grading

MUED 745 - Techniques and Methods in String Instruments
Credits: 2
Class and individual instruction. Intensive training on the violin, viola, cello, and double bass. Classroom procedures, establishment of string programs, and evaluation of available methods materials.
Grade Mode: Letter Grading

MUED 747 - Techniques and Methods in Woodwind Instruments
Credits: 2 or 3
Basic course in embouchure formation, tone production, tonguing, fingering and instrument care as applied to each of the woodwinds: flute, oboe, clarinet, bassoon and saxophone. Methods, studies, solos and ensembles most useful with school players of woodwind instruments.
Grade Mode: Letter Grading

MUED 749 - Techniques and Methods in Brass Instruments
Credits: 2
Basic course in embouchure formation, tone, tonguing, fingering, flexibility, accuracy, and range development as applied to the trumpet or baritone horn, French horn, and trombone. Methods, studies, solos, and ensembles most likely to be useful with school players of brass instruments.
Grade Mode: Letter Grading

MUED 751 - Techniques and Methods in Percussion Instruments
Credits: 2
Basic performance skills on snare drum, timpani, mallet instruments, and other percussion instruments used in bands and orchestras. Materials and methods of instruction.
Grade Mode: Letter Grading

MUED 755 - Vocal Pedagogy
Credits: 2
A study of vocal anatomy, vocal function, and teaching methods, with an emphasis on application for singers and voice teachers.
Grade Mode: Letter Grading

MUED 765 - Instrumental Music Methods
Credits: 2
Organization and delivery of instruction to groups of instrumental music students. Examination of appropriate curricula and materials, application of instrumental and conducting techniques, structure of rehearsals, assessment of student progress.
Grade Mode: Letter Grading

MUED 790 - Teaching Elementary School Music
Credits: 3
Experiential approach toward learning creative strategies for teaching elementary school music. Includes various curricula and methods; philosophy and psychology of music; demonstration of materials and instruments. Observation and teaching in schools. Piano proficiency recommended.
Grade Mode: Letter Grading

MUED 791 - Teaching Secondary School Music
Credits: 2
Assembling, managing, and teaching junior/senior high school music curriculum. Academic issues of philosophy, curriculum building, application of learning theories, administration, evaluation, motivation, and classroom management combined with field experience in lesson planning and teaching/rehearsal techniques.
Prerequisite(s): MUSI 731 with a minimum grade of D- and MUSI 732 with a minimum grade of D-.
Grade Mode: Letter Grading

MUED 795 - Special Studies
Credits: 1-4
Allows upper-level students to explore individually or in groups areas related to their specific professional interests.
Grade Mode: Letter Grading

National Security Intelligence Analysis (NSIA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

No courses are currently active in the course inventory for this subject prefix.

Native American Indigenous Studies (NAIS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NAIS 400 - Introduction to Native American and Indigenous Studies
Credits: 4
This course serves as an introduction to the interdisciplinary field of Native American and Indigenous Studies (NAIS). NAIS cultivates a broad understanding of the history, lands, culture, literature, language and artistic expression, science and technology, race and identity, and social organization and political statuses of Indigenous peoples, emphasizing self-determination, sovereignty, and survivance globally. Students will learn about significant events and issues from Indigenous perspectives and develop new ways of thinking about Native peoples.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

Natural Resources (NR)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NR 400 - Professional Perspectives in Natural Resources
Credits: 1
Lectures by departmental faculty provide an informal look at the various natural resource disciplines and professions represented by the Department of Natural Resources. These presentations acquaint students with our faculty and inform them of some of the exciting research being undertaken in the department. Students also learn of opportunities for professional involvement. Required for all first-semester Natural Resources majors.
Grade Mode: Credit/Fail Grading

NR 403 - Introduction to Environmental Science
Credits: 4
A multi-disciplinary introduction to Environmental Sciences, presenting basic concepts and controversies in geology, meteorology/hydrology, global biology and biogeochemistry, integrated through the study of the Earth as system. Intended primarily for declared or perspective majors in Environmental Sciences and related programs. Combines lecture and discussion with discovery and presentation experiences to address the history of ideas, and major questions and controversies, both settled and active.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading

NR 411 - Environmental and Resource Economics Perspectives
Credits: 4
Microeconomic theory and analysis in resource management and use decisions. Survey of significant resource problems from an economic perspective and the application of economic analysis.
Attributes: Social Science (Discovery)
Equivalent(s): ECN 412, ECN 412W, ECON 402, ECON 402A, ECON 402H, EREC 411
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

NR 415 - Natural Resources Field Methods
Credits: 2
This course is intended to serve first or second year students in Forestry, Wildlife and Conservation Biology, and Environmental Conservation and Sustainability. After taking this course, students are able to navigate successfully in wild terrain using pacing, map, compass, GPS; can conduct a simple planar survey including cartography; and can sample a forest in order to characterize the abundance and quality of forest resources. Moreover, students know the fundamental principles of navigation, surveying, and field sampling.
Grade Mode: Letter Grading

NR 417 - Sophomore Seminar: Wildlife and Conservation Biology
Credits: 2
This course provides a professional foundation and orientation for second-year Wildlife & Conservation Biology (WCB) students. Through readings, seminars, guest speakers, and conservation, students will explore the range of what it means to be a professional Wildlife & Conservation Biologist. After taking this course, students will be better able to navigate and critique the scientific literature, synthesize and communicate information, and understand and articulate the diverse field of Wildlife & Conservation Biology.
Grade Mode: Letter Grading

NR 425 - Field Dendrology
Credits: 4
Students study forest trees in natural communities and urban settings. Identification and nomenclature of important North American trees and shrubs is emphasized. Environmental factors influencing tree growth, combined with study of disturbance history, provide the context for understanding why tree species grow where they do. Students are introduced to the major forest regions of North America. Restricted to NR majors; others by permission.
Equivalent(s): EC 410, FOR 425, NR 420
Grade Mode: Letter Grading

NR 433 - Wildlife Ecology
Credits: 4
Historical, biological, ecological, and sociological factors influencing the wildlife resource and its management. Concepts in populations, communities, habitat, and contemporary wildlife issues. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading
Special Fee: Yes

NR 435 - Contemporary Conservation Issues and Environmental Awareness
Credits: 4
Explores the impacts of technology and human activity on our environment and natural resources. Key conservation issues are used as examples of past and present biological, social, and environmental conflicts.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): NR 435H
Grade Mode: Letter Grading

NR 435H - Honors/Contemporary Conservation Issues and Environmental Awareness
Credits: 4
Explores the impacts of technology and human activity on our environment and natural resources. Key conservation issues are used as examples of past and present biological, social, and environmental conflicts.
Attributes: Environment,TechSociety(Disc); Honors course
Equivalent(s): NR 435
Grade Mode: Letter Grading

NR 437 - Principles of Sustainability
Credits: 4
In this course, we investigate the foundational principles of the concept of sustainability. Our objectives include: understanding the many integrated dimensions of sustainability; examining illustrations of unsustainable human-environment relations; recognizing the complexity of sustainability problems and the challenges to finding solutions; comprehending that human-environment relations are a multi-level, complex and dynamic system, and appreciating that the sustainability of ecosystems is necessarily embedded in social, cultural and historical trends.
Equivalent(s): SUST 401, SUST 401H
Grade Mode: Letter Grading

NR 439 - Environmental Biology
Credits: 4
Environmental biology focuses on the origins, functions, and interactions of populations, communities, species and ecosystems in relation to dynamic environmental processes. The main course objective is to provide a basic understanding of ecosystem function and the ecological, evolutionary, and genetic principles necessary to understand biological diversity and its distribution.
Grade Mode: Letter Grading

NR 444 - The New Pirates of the Caribbean
Credits: 4
Inquiry into many facets of tourism from the standpoint of tourists and tour destination. Economic and institutional factors affecting human well-being from the use of land and water resources; discussions of distributional aspects of benefits from tourism activities.; environmental impacts; ownership patterns and uses; cultural attributes; and local economies in small Caribbean island nations. Cruise ships, time-shares, all-inclusive resorts, hurricanes, casinos, bars, rum, sex, and drugs are investigated through extensive readings and web surfing.
Attributes: World Cultures(Discovery); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): EREC 444
Grade Mode: Letter Grading

NR 501 - Studio Soils
Credits: 4
An overview of physical, chemical, and biological properties of soil. Sub-disciplines of soil chemistry, soil physics, soil microbiology, soil genesis, and classification. Lab.
Attributes: Writing Intensive Course
Equivalent(s): SOIL 501
Grade Mode: Letter Grading
Special Fee: Yes

NR 504 - Freshwater Resources
Credits: 4
Major determinants of freshwater resources including hydrologic cycle and water balance, precipitation, stream-flow measurement, pollution, water supply and sewage treatment, water resource management and regulation. Lab/field trips.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

NR 506 - Forest Entomology
Credits: 4
Insects are among the most diverse and abundant organisms on the planet and play a crucial role in forest ecosystems. Insects from the base of the consumer food web in forests and are key drivers of nutrient cycling, pollination, etc. This course surveys common and important insect orders, families, and species found in forest systems and provides the tools for basic identification and biological study of these fascinating creatures.
Equivalent(s): FOR 506
Grade Mode: Letter Grading
Special Fee: Yes

NR 507 - Introduction to our Energy System and Sustainable Energy
Credits: 4
This course introduces students to our domestic energy system and the expanding efforts to develop our use and acceptance of sustainable energy. It provides a historical context of our system that explains where we are today in terms of the grid, technologies, energy use and production and energy markets, primarily for electricity and building use. The course examines how our current impedes and enhances opportunities for innovation in renewable technologies and financing.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

NR 508 - Communicating Science
Credits: 4
Effective communication and community engagement with science are critical, particularly in our modern era of information overwhelm. In this course, we actively explore tools and techniques for oral, written, and visual communication of science in various mediums and with a range of publics and motivations. With an emphasis on critical and creative thinking, we will cultivate a set of skills and best practices as students develop a personal philosophy for communicating science with diverse audiences.
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401H with a minimum grade of D-.
Grade Mode: Letter Grading

NR 527 - Forest Ecology
Credits: 4
Introduces basic and applied ecology of forests, with emphasis on ecosystem processes, including water, energy, and nutrient cycles; biological interactions, including biodiversity and plant-plant, plant-animal, and plant-microbe relationships; and human impacts, including forest management, land-use/land cover-change, and changes in atmospheric chemistry. Lab.
Equivalent(s): FORT 527
Grade Mode: Letter Grading

NR 561 - Chemistry of the Environment
Credits: 4
The course is designed for students who desire a deeper understanding of chemical principles in environmental- and ecology-related disciplines. This course will focus on understanding key principles that underline many of the important chemical processes that influence the functioning and health of environmental systems. These include reaction rates, oxidation-reduction, kinetics and enzyme dynamics, pH and acid-base equilibria, organic transformations, colloids and particulate behavior, and analytical approaches to understanding environmental chemistry.
Prerequisite(s): CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D- or CHEM 411 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NR 564 - Urban Forestry and Arboriculture
Credits: 4
This course offers a comprehensive understanding of urban forested landscapes & arboricultural practices to maintain their health & function. In this course, we will explore the ecological benefits of urban trees, learn practical skills in tree care, & evaluate the socio-economic impacts of urban forests in communities. Tangible skills covered include tree climbing & pruning for tree maintenance, safety procedures in the industry, hazard tree assessment, & proper tree planting techniques.
Prerequisite(s): NR 527 with a minimum grade of D-.
Equivalent(s): FORT 564
Grade Mode: Letter Grading

NR 572 - Introduction to Natural Resource Economics
Credits: 4
Introduces theory, methods of analysis, and current literature of natural resource economics and policy. Topics include multiple use, taxation, optimal harvest scheduling, market failure, property rights, public goods, benefit-cost analysis, amenity values, non-market resource services and natural resource policy. Topics applied to forests and forestry, wildlife management, outdoor recreation, public lands, agriculture, fisheries, water, energy and mining/nonrenewable resources.
Equivalent(s): EREC 572
Grade Mode: Letter Grading

NR 575 - Forest Operations
Credits: 2
A study of harvesting methods and their relation to forest management and silviculture of the state and region. Theory and practice of conventional harvesting systems with strong emphasis on hands-on application of technique and protecting the environment and the safety and health of workers.
Grade Mode: Letter Grading

NR 576 - Forest Products
Credits: 2
The course will cover the structure and properties of wood as a raw material as well as conversion of logs to lumber at the UNH Thompson School sawmill. Lumber and log grading and measurement along with studies in processing efficiency, lumber drying, and physical plant operations will also be covered. There will be an introduction to paper making, veneering, chipping, and marketing of forest products. The course will also cover other non-timber forest products with an emphasis on maple syrup. Sugarbush management, sap extraction and collection, production and finishing of maple products will be covered.
Equivalent(s): FORT 576
Grade Mode: Letter Grading
Special Fee: Yes

NR 579 - Wildland Fire Ecology and Management
Credits: 4
An exploration of the historical context of wildland fire and how our changing climate and past management practices influence future fire regimes at local and national scales. This course will provide instruction in fire ecology, and prescribed fire theory and methods. Students will learn the basic knowledge of forest fire control and use and will focus on firefighting, the impacts of fire on vegetation, and the use of prescribed fire in forest and wildlife management.
Equivalent(s): FORT 479, FORT 579
Grade Mode: Letter Grading
Special Fee: Yes

NR 600 - Work Experience
Credits: 0
As part of their degree program, students are expected to engage in a work experience or internship under professional supervision and approved by natural resources faculty. This experience may occur at any time during their sophomore through senior years. Students are responsible for arranging their own experience in consultation with their advisor and NREN faculty members.
Equivalent(s): NR 599
Grade Mode: Credit/Fail Grading

NR 602 - Natural Resources and Environmental Policy
Credits: 4
Contemporary natural resource and environmental policy problems/issues are addressed from a policy sciences perspective with emphasis on domestic policy solutions. Critical assessment of major policy initiatives and their implementation toward sustainable resource use and a healthy environment. Public policies are analyzed to determine the extent to which their implementation strategies have succeeded, and to assess their adequacy within a bioregional or ecosystem approach, and/or capacity to integrate economic and environmental decisions. Cases include national and local policies in their global context. Students apply public policy analysis and decision tools in laboratory sessions.
Attributes: Writing Intensive Course
Equivalent(s): EC 702
Grade Mode: Letter Grading
Special Fee: Yes

NR 606 - International Energy Topics
Credits: 4
This course introduces students to international energy topics. Students will be exposed to a historical context and current status of several energy-related issues from an international perspective. Topics range from energy poverty, energy and climate change and global fossil fuel subsidies. Studies of specific technologies will be delivered through the context of international leaders, Iceland and geothermal, the UK and offshore wind and solar in Germany.
Grade Mode: Letter Grading

NR 608 - Economics of Sustainability
Credits: 4
The concept of sustainability stands on 3 pillars: Ecology, Economy, & Equity. From the standpoint of the economy in general and social equity, there are specific economic tools that help project leaders and policy advocates perform sustainability evaluations. This course equips students with powerful economic tools they can use for such evaluations. These include Benefit-Cost Analysis, Life-Cycle Cost Analysis, and Regional Economic Impact Analysis. Students will use real data to perform evaluations.
Prerequisite(s): EREC 411 with a minimum grade of D- or NR 411 with a minimum grade of D- or EREC 572 with a minimum grade of D- or NR 572 with a minimum grade of D- or ECON 402 with a minimum grade of D-.
Grade Mode: Letter Grading

NR 615 - Wildlife Habitats
Credits: 4
Introduces animal-habitat associations, including an examination of spatial and temporal features of wildlife habitat, the evolution of habitat selection, and how habitat suitability/productivity is evaluated.
Attributes: Writing Intensive Course
Prerequisite(s): BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D-.
Equivalent(s): WILD 615
Grade Mode: Letter Grading
Special Fee: Yes

NR 640 - Wildlife Population Ecology
Credits: 4
An overview of the mechanisms that influence the characteristics of terrestrial wildlife populations. Lecture covers concepts and theory, with a central focus on population growth, how it is influenced by demographic rates of survival, recruitment, immigration/emigration, with additional consideration given to predation and competition, and how population status is monitored for wildlife, including occupancy, abundance, and viability. Lab provides hands-on exercises, often using computer software, with analysis and interpretation of data from local case studies.
Prerequisite(s): (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-) and (BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D-) and (MATH 424B with a minimum grade of D- or MATH 420 with a minimum grade of D-).
Grade Mode: Letter Grading

NR 641 - Wildlife Disease Ecology
Credits: 4
This lecture and discussion-based course will provide an overview of the importance of wildlife diseases in the context of their emergence, One Health implications, and disease management using an ecological approach. In addition, the epidemiological, and evolutionary principles of diseases will be considered, as well as how to perform wildlife disease investigations. Diseases will be discussed for each of the major terrestrial and aquatic groups of animals. Guest lectures will be provided by experts in their fields.
Prerequisite(s): (NR 439 with a minimum grade of D- or BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading

NR 642 - Introduction to Biogeography
Credits: 4
Biogeography is an integrative field of inquiry that unites concepts and information from evolutionary biology, ecology, systematics, geology, and physical geography. Students are introduced to the distribution patterns of wild animals and plants and to the factors that determine these patterns. In this course, the emphasis is on evolutionary aspects of biogeography, biodiversity, and implications for conservation issues.
Prerequisite(s): BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D-.
Grade Mode: Letter Grading

NR 643 - Economics of Forestry
Credits: 4
Intermediate-level analysis of supply and demand for forest-based goods and services, managerial economics, taxation, capital investments.
Prerequisite(s): EREC 411 with a minimum grade of D- or ECON 402 with a minimum grade of D- or NR 411 with a minimum grade of D-.
Equivalent(s): FOR 643
Grade Mode: Letter Grading

NR 650 - Principles of Conservation Biology
Credits: 4
Examines the major issues relevant to conservation of biodiversity from the genetic to the ecosystem level. In addition to addressing ecological and biological principles, the interdisciplinary nature and challenges of managing for conservation biology, including the role of economic and social factors are examined.
Equivalent(s): EC 502
Grade Mode: Letter Grading
Special Fee: Yes

NR 658 - Introduction to Geographic Information Systems
Credits: 4
Introduces the use of geographic information systems (GIS) for natural resources and related fields. Data models/structures, map projections, data input/output/storage, data analysis/modeling, interpolation, and data quality/standards. Hands-on lab using ArcGIS Pro software.
Grade Mode: Letter Grading

NR 660 - Ecology and Biogeography of New Zealand
Credits: 5
Covers the principles of ecology and biogeography, with a distinct focus on New Zealand. Students investigate the processes that have shaped the New Zealand landmass and its biota. Impact of human settlement on New Zealand's ecosystems is explored in-depth. Methods and techniques of scientific research are incorporated in this course. Field exercises focus on topical case studies in a variety of ecosystems and are designed to strengthen students' conceptual knowledge, enable students to apply this knowledge, as well as develop field skills including classification systems, mapping, habitat assessment, field identification, and sampling techniques.
Co-requisite: INCO 588, NR 661, NR 662, NR 663
Equivalent(s): EC 660
Grade Mode: Letter Grading
Special Fee: Yes

NR 661 - Restoration Ecology and Ecosystem Management in New Zealand
Credits: 4
Current restoration projects and strategies for management of natural resources in New Zealand form the framework for this course. Solving problems related to introduced species, changes in habitat, the preservation of ecological processes and watershed management are the major foci of this course. Management of resources for multiple uses, as well as primary and extractive industries is included. Field exercises focus on topical case studies in a variety of terrestrial and coastal-marine ecosystems and include the identification of habitats and communities, stresses on the environment, and risk analysis.
Co-requisite: NR 660, NR 662, NR 663
Equivalent(s): EC 661
Grade Mode: Letter Grading
Special Fee: Yes

NR 662 - Environmental Policy, Planning and Sustainability in New Zealand
Credits: 3
Introduces students to politics in New Zealand. Investigating policy pathways and planning forms part of the curriculum. Students assess scope of legislation, including the Resource Management Act (1991), for the economic and socio-political environment in New Zealand. Government obligations to the Treaty of Waitangi, and customary uses of resources are included as part of this course. Students are exposed to diverse perspectives of local authority planners and policy makers, local iwi (tribes), the Department of Conservation, and community groups. Students examine case studies involving the resource consent process at several levels of decision-making. Case studies provide a comprehensive overview of the interactions between the environment and people and their cultural and socio-economic needs.
Co-requisite: NR 660, NR 661, NR 663
Equivalent(s): EC 662
Grade Mode: Letter Grading
Special Fee: Yes

NR 663 - Applied Directed Research in New Zealand
Credits: 4
Working closely with faculty, student teams investigate selected ecological, resource management or policy issues. All projects have scientific and societal relevance, and contribute to ongoing/existing projects in the region. Students use the scientific method to design and carry out their projects. Development of rigorous field investigations, experimental design, data analysis, and scientific writing are emphasized. Students prepare a research report and present their findings in a seminar that includes stakeholders and people from the local community.
Co-requisite: NR 660, NR 661, NR 662
Attributes: Writing Intensive Course
Equivalent(s): EC 663
Grade Mode: Letter Grading
Special Fee: Yes

NR 664 - Conservation Genetics and Applied Evolution
Credits: 4
This course provides an overview of key concepts of conservation genetics and the use of genetic tools and data to address them. It addresses how evolutionary theory underpins processes and solutions relevant to biodiversity conservation. Major topics include genetic diversity and variation in natural populations, inbreeding, captive management, genetic rescue), genetic monitoring, and evolutionary responses to anthropogenic impacts. Practical exercises and case studies explore the application of genetic techniques and the analysis of genetic data.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or NR 439 with a minimum grade of D- or BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-) and (BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D-).
Mutual Exclusion: No credit for students who have taken GEN 705.
Grade Mode: Letter Grading

NR 703 - Watershed Water Quality Management
Credits: 4
Principles of land use as they relate to water quality and quantity. Lectures focus on biogeochemical cycles and the watershed approach to land and water resource management. Labs and field trips focus on methods of water sampling and analysis. One year of chemistry is recommended. Lab/field trips.
Prerequisite(s): NR 504 with a minimum grade of D-.
Equivalent(s): WARM 703
Grade Mode: Letter Grading
Special Fee: Yes

NR 706 - Soil Ecology
Credits: 4
Examines the ecological relationships between soil microorganisms and their biotic and abiotic environment, with emphasis on the role of soil microorganisms in biogeochemical cycling. Specific objectives are to examine the biodiversity present in soil systems, factors controlling microbial community composition and diversity, and linkages between soil microbial communities, soil physical properties, and soil organic matter and nutrient cycling dynamics. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D- or BIOL 409 with a minimum grade of D-) and CHEM 403 with a minimum grade of D-.
Equivalent(s): SOIL 706
Grade Mode: Letter Grading
Special Fee: Yes

NR 707 - Environmental Modeling
Credits: 4
Environmental Modeling introduces students to a range of key mathematical and computer modeling concepts and the ways they can be used to address important scientific questions. The course is divided into four topical sections: Population and Community Ecology, Hydrology, Biogeochemistry, and Ecosystems. In each section, modeling concepts and skills are presented together with environmental information to emphasize the linkage between quantitative methods and relevant scientific results.
Prerequisite(s): MATH 425 with a minimum grade of D- or MATH 424B with a minimum grade of D-.
Grade Mode: Letter Grading

NR 708W - Environmental Economics
Credits: 4
Environmental pollution, the market economy, and optimal resource allocation; alternative control procedures; levels of environmental protection and public policy; property right issues.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 605 with a minimum grade of D-.
Equivalent(s): EREC 708, RECO 708
Grade Mode: Letter Grading

NR 712 - Mammalogy
Credits: 4
Evolution, ecology, behavior, physiology and diversity of mammals. The focus of the course is on conceptual issues, such as the relation of structure, function, physiology and ecology of species; reproductive physiology and life history strategies; and the evolution of mating systems and social structure. Familiarity of mammalian groups to the family level and identification of local fauna to species will be required. Lab.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or NR 439 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

NR 713 - Quantitative Ecology
Credits: 4
Basic quantitative concepts applied to ecological systems including: population and community dynamics, experimental design, spatial patterns, species abundance and diversity, community organization, metapopulations, and landscapes.
Prerequisite(s): (BIOL 528 with a minimum grade of D- or EREC 525 with a minimum grade of D- or NR 525 with a minimum grade of D-) and (NR 527 with a minimum grade of D- or BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D-).
Equivalent(s): FORS 713
Grade Mode: Letter Grading

NR 720 - International Environmental Politics and Policies for the 21st Century
Credits: 4
Students examine policies for managing human activities to sustain the health of regional ecosystems and planetary life-support systems. Selected problems of the international commons (oceans, marine resources, atmosphere, migratory species); global and regional carrying capacity (population, resource consumption), internationally shared ecosystems (transboundary watersheds and waterbodies, tropical forests); and the relevant international institutions and politics for policy formation, conflict resolution, and implementation. Using a policy-analytic framework, students develop case studies to assess international policies and institutional arrangements to achieve the objectives of Agenda 21--Earth Summit Strategy to Save the Planet.
Attributes: Writing Intensive Course
Equivalent(s): EC 720
Grade Mode: Letter Grading

NR 724 - Resolving Environmental Conflicts
Credits: 4
Theories and practices of environmental dispute settlement. Roles of public, non-governmental and governmental organizations. Effectiveness of public participation initiatives in influencing public policy decisions and/or resolving environmental conflicts. Alternative approaches to consensus (policy dialogues, joint problem solving; strategic planning; negotiation, mediation) as well as litigation. Specific cases are critiqued and evaluated; conflict resolution skills are developed. Students observe and/or participate in ongoing local decision processes. Lab.
Attributes: Writing Intensive Course
Equivalent(s): EC 724
Grade Mode: Letter Grading
Special Fee: Yes

NR 729 - Silviculture
Credits: 4
The science and art of establishing, growing, and tending forests to meet multiple objectives. Basics of forest stand dynamics applied to the problems of timber management, wildlife habitat, water quality, and carbon sequestration.
Prerequisite(s): NR 425 with a minimum grade of D- and NR 527 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NR 730 - Terrestrial Ecosystems
Credits: 4
Processes controlling the energy, water, and nutrient dynamics of terrestrial ecosystems; concepts of study at the ecosystem level, controls on primary production, transpiration, decomposition, herbivory; links to earth-system science, acid deposition, agriculture.
Prerequisite(s): (BIOL 409 with a minimum grade of D- or BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D- or NR 439 with a minimum grade of D-) and (CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D- or CHEM 411 with a minimum grade of D-) and (BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D-).
Equivalent(s): EOS 730, FOR 730, FORS 730
Grade Mode: Letter Grading

NR 731 - Agriculture and Environmental Change: Challenges and Solutions
Credits: 4
Agriculture is the foundation of civilization, providing the food, fuel and fiber needed to sustain a growing human population. From the original land clearing to today, agriculture has profoundly impacted the environment and is now recognized as a major contributor to soil and water degradation and climate change. At the same time, climate change and other large-scale environmental changes are forcing adaptation of agricultural practices. This course examines interactions between agricultural systems and global environmental processes, including climate change, carbon cycling, nitrogen pollution and water resources. Students will develop an in-depth understanding of how agricultural practices contribute to environmental changes from local to global scales and the underlying biogeochemical drivers of change. We will evaluate frameworks like agroecology, regenerative agriculture, agroforestry, and climate-smart agriculture for their potential to mitigate environmental impacts. Students will learn to apply interdisciplinary thinking to develop solutions that balance crop productivity and environmental sustainability in a changing world. The course emphasizes biogeochemical understanding across spatial and temporal scales and couples to agroecosystem management frameworks to consider solutions.
Prerequisite(s): (NR 439 with a minimum grade of D- or BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading

NR 734 - Tropical Ecology
Credits: 4
This course introduces students to the ecology of different tropical ecosystems, and involves students in analyzing and interpreting ecological field data and remotely sensed data. An important emphasis is to understand patterns and processes across scales - from individual plants to ecosystems and landscapes. The course also addresses important global issues in the tropics, including climate change, land use change, diverse ecosystem services, and sustainable resource management.
Prerequisite(s): NR 527 with a minimum grade of D- or BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D-.
Equivalent(s): FOR 734
Grade Mode: Letter Grading

NR 740 - Inventory and Monitoring of Ecological Communities
Credits: 4
Provides an introduction to the major concepts associated with monitoring change in ecological communities. Students develop an appreciation for such issues as: identification of appropriate baselines for comparison; use of indicator species; the tools used to inventory common, rare, and secretive species; how trend data are analyzed; and the implications of failing to detect an indicator species. Lab.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

NR 743 - Addressing Arctic Challenges
Credits: 4
Students will gain knowledge on the effect of climate change on Arctic environmental, social, and built systems, and apply transdisciplinary approaches to addressing arctic challenges. This course employs inquiry-based, peer-to-peer, and self-driven approaches. Students will tackle a research project, including data analysis, with the aim of contributing new knowledge in the form of a proposal, publication, outreach product, or other.
Prerequisite(s): BIOL 528 with a minimum grade of D- or SOC 402 with a minimum grade of D- or MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.
Grade Mode: Letter Grading

NR 744 - Biogeochemistry
Credits: 4
Examines the influence of biological and physical processes on elemental cycling and geochemical transformations from the molecular to the global scale, involving microorganisms, higher plants and animals and whole ecosystems; factors that regulate element cycles including soils, climate, disturbance and human activities; interactions among the biosphere, hydrosphere, lithosphere, and atmosphere; transformations of C, N, S, and trace elements.
Prerequisite(s): (BIOL 409 with a minimum grade of D- or BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D- or NR 439 with a minimum grade of D-) and (CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D- or CHEM 411 with a minimum grade of D-) and (BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D-).
Grade Mode: Letter Grading

NR 745 - Forest Management
Credits: 4
Forest land ownership, management objectives, forest inventory regulation and policy, forest administration, professional responsibilities and opportunities. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): NR 527 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NR 746 - Maps and Environmental Equity
Credits: 4
Environmental justice ensures the right to a safe, healthy, productive and sustainable environment for everyone, regardless of income, race, color, origin or income. Maps have become critical tools in environmental justice because maps bring visibility and definition to social-environmental problems. As diagrams – or representations of data – showing distributions over space and time, maps orient us, steer us, and make meaning of complex information. We trust them in depictions of, for example, cancer clusters or contaminated water. Yet maps are also capable of creating environmental injustice. Historical redlining, for example, used maps to limit financial services in certain neighborhoods in the 1930s-50s with long-term environmental impacts into the 2020s. Maps are not simply good or bad. This course thus explores environmental justice and injustice as depicted on maps, but also as embedded in the maps themselves. Who chooses their boundaries, for what purpose, and what consequence? How do maps make meaning and construct knowledge and to what social and political ends? What power dynamics do maps reflect and how do they become powerful themselves? Whose space and time do maps employ? Over the semester, we will make our own maps and bring awareness to the maps we create, including their values and assumptions, how they reflect and exercise power, and their potentials to create change. The goals of the course are to 1) bring a greater awareness to environmental justice and injustice in the maps we use and, 2) to create just maps.
Prerequisite(s): NR 658 with a minimum grade of D- or NR 760 with a minimum grade of D- or ESCI 777 with a minimum grade of D- or GEOG 591 with a minimum grade of D-.
Grade Mode: Letter Grading

NR 749 - Forest Inventory and Modeling
Credits: 4
Applied sampling and statistical techniques for assessing current forest conditions and predicting future growth, yield, and structure. Topics include plot and point sampling, ecological inventory, and evaluation of site quality and stand density.
Prerequisite(s): NR 415 with a minimum grade of D- and BIOL 528 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NR 750 - Sustaining Biological Diversity
Credits: 4
This course examines the approaches to recover and restore declining populations and at-risk communities. Major concepts addressed include: population viability analysis; use of simulation models to explore conservation alternatives; integrating the political, economic, and social realities that affect natural resource management; the adaptive nature of any restoration of rare organisms and communities; and preparing for the challenges associated with invasive organisms and climate change.
Grade Mode: Letter Grading
Special Fee: Yes

NR 751 - Aquatic Ecosystems
Credits: 4
Energy flow and nutrient cycling in streams, rivers and lakes, with an emphasis on understanding the control of primary productivity, decomposition and community structure by both hydrologic and biotic drivers. Role of aquatic ecosystems in carbon and nitrogen budgets at watershed, regional, and global scales. Impacts of environmental changes such as global climate change and suburbanization on aquatic ecosystems. Lab.
Prerequisite(s): NR 504 with a minimum grade of D-.
Grade Mode: Letter Grading

NR 753 - Sustainability as Abundance
Credits: 2
"Instead of protecting the planet from human impact, why not redesign our activity to improve the environment? We can have a beneficial, sustainable footprint. Abundance for all." McDonough & Braungart in The Upcycle. A growing perspective is emerging in the sustainability field that refocuses attention away from managing scarcity, to creating new abundant possibilities. Managing scarcity is grounded in the continuing paradigm of what the human-environment relationship has been. Creating sustainability by tapping into and increasing abundance is grounded in a paradigm of what the human-environment relationship can be. Students will explore and expand their understanding of this perspective by utilizing and honing their critical reading, thinking, presentation and writing skills; by way of discussion, as well as individual and group research.
Grade Mode: Letter Grading

NR 754 - Sense of Place
Credits: 2
Costa Rica is the happiest country on Earth. Bhutan is a living laboratory for education. Bolivia has a Law of Mother Earth in its constitution. Cities and towns in the US create local solutions to problems of resource sustainability while the national dialogue stagnates. What drives some places to lay the foundations for sustainable futures, while others do not? Sense of Place is a powerful lends though which to view the relative achievements of places and organizations toward creating a sustainable future. The goals of this seminar are (1) to survey the Sense of Place literature and to analyze case studies of the role of Sense of Place in the success of sustainability efforts nationally and internationally; and (2) to research the role of Sense of Place in our local community environment and to relate it to stated goals in existing sustainability plans. To be considered as a capstone option for majors in Environmental and Conservation Sustainability, students must also register for NR 753 in the Fall semester.
Grade Mode: Letter Grading

NR 757 - Remote Sensing of the Environment
Credits: 4
Practical and conceptual presentation of the use of remote sensing and other geospatial technologies for mapping and monitoring the environment. This course begins with the use of aerial photographs (photogrammetry, and photo interpretation) and includes measures of photo scale and area, parallax and stereo viewing, object heights, flight planning, photo geometry, the electromagnetic spectrum, camera systems and vegetation/land cover mapping. The course concludes with an introduction to other geospatial technologies including digital image analysis, global positioning (GPS), and geographic information systems (GIS). Conceptual lectures are augmented with practical homework assignments and hands-on lab exercises. Lab.
Equivalent(s): FOR 757, FORS 757, GEOG 757
Grade Mode: Letter Grading
Special Fee: Yes

NR 759 - Digital Image Processing for Natural Resources
Credits: 4
Introduces digital remote sensing including multispectral scanners (Landsat and SPOT) radar, and thermal imagery. Hands-on image processing including filtering, image display, ratios, classification, registration, and accuracy assessment. GIS as it applies to image processing. Discussion of practical applications. Use of ERDAS image-processing software. Knowledge of PCs required.
Prerequisite(s): NR 757 with a minimum grade of D-.
Equivalent(s): FOR 759, FORS 759, GEOG 759
Grade Mode: Letter Grading

NR 760 - Geographic Information Systems in Natural Resources
Credits: 4
This course in geographic information systems (GIS), covers advanced theory, concepts, and applications of GIS for natural resource and related disciplines. Discussion of database structures, data sources, spatial data manipulation/analysis/modeling, data quality and assessment. Students conduct a project of their design exploring aspects of GIS most useful to them. Lecture emphasizes concepts and applications through a text and selected peer-reviewed articles. Lab uses the latest version of ArcGIS software and provides hands-on experience.
Prerequisite(s): NR 658 with a minimum grade of D-.
Equivalent(s): FOR 760, FORS 760, GEOG 760
Grade Mode: Letter Grading

NR 761 - Environmental Soil Chemistry
Credits: 4
Chemical transformations in soils are the basis for soil fertility and plant productivity in natural and managed ecosystems, and also influence key ecosystem processes including soil organic matter turnover and soil-atmosphere exchange of trace gases. This class will explore soil chemistry processes and transformations related to soil nutrient cycling, plant nutrient acquisition, and other critical environmental services.
Grade Mode: Letter Grading

NR 765 - Community Ecology
Credits: 4
Properties of biotic communities, especially biodiversity. Effects of physical stress, disturbance, competition, predation, positive interactions, and dispersal on community properties. Community dynamics, including succession and stability. Lecture and discussion.
Prerequisite(s): BIOL 528 with a minimum grade of D- and (BIOL 541 with a minimum grade of D- or BIOL 541W with a minimum grade of D- or NR 527 with a minimum grade of D- or FORT 527 with a minimum grade of D-).
Grade Mode: Letter Grading

NR 767W - Social Impact Assessment
Credits: 4
Provides a cross-disciplinary perspective on the issues, problems, and methods of Social Impact Assessment (SIA). Provides analytic approach and theoretical framework for the assessment of diverse events, including changes in the natural environment, the local economy, or dominant technology. SIA is required of most U.S. and Canadian federal- and state-sponsored projects that come under the National Environmental Protection Act, as well as all projects funded by international donor agencies.
Attributes: Writing Intensive Course
Equivalent(s): TOUR 767
Grade Mode: Letter Grading

NR 781 - Agroforestry
Credits: 4
This course introduces students to the principles and practice of agroforestry—the integration of trees with crops and/or livestock to provide multiple benefits. Students gain knowledge of Indigenous and modern agroforestry systems, their global distribution and characteristics, the scientific principles underlying interactions between trees, crops, and livestock, and their management to optimize benefits. Students explore the potential for agroforestry to serve as a climate-smart, sustainable strategy for enhancing food production and ecosystem services, and gain practical field experience in designing agroforestry systems appropriate for New England.
Prerequisite(s): NR 527 with a minimum grade of D- or AGFS 502 with a minimum grade of D- or SAFS 502 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NR 782 - Forest Health in a Changing World
Credits: 4
Forests cover over 30% of the land surface of the Earth and are incredibly important ecologically, economically, and to the health of the planet. While forests show great capacity to withstand disturbance, these ecosystems are increasingly threatened worldwide by climate change, native and introduced insects and disease, poor management practices, land clearing, drought, fire, and pollution. This course offers an overview of the dominant threats to forests, their causes and consequences, and options for monitoring, management, and mitigation.
Grade Mode: Letter Grading
Special Fee: Yes

NR 784 - Sustainable Living - Global Perspectives
Credits: 4
The pursuit of sustainable solutions to living in our contemporary world is a global endeavor. In this course, the concept of living sustainably is explored from a broad international perspective. Global scale issues impacting sustainable resource use are considered, including population growth, economic globalization and development, social equity, and cultural values. We will expand our awareness of alternatives to those current practices that impede the sustainability of human societies as part of the earth's natural systems. We will also pursue an understanding of the interrelated socio-economic conditions, combined with social and personal ethics and values necessary to move toward a more sustainable future. And each of us will come to value what sustainable living means for our own lives.
Prerequisite(s): NR 437 with a minimum grade of D- or NR 435 with a minimum grade of D- or NR 435H with a minimum grade of D-.
Equivalent(s): EC 784
Grade Mode: Letter Grading

NR 785 - Systems Thinking for Sustainable Solutions
Credits: 4
The problems facing our world are complex and multi-dimensional. This course introduces students to the basics of systems thinking and the socio-ecological systems framework, a marriage of both social and natural science approaches to understanding problems. Using this framework, we will dive into complex natural systems, such as tropical marine fisheries and probe the sustainability of coffee to understand driving factors that inhibit (or enable) successful resource management. These factors may include the culture and history of resource users alongside the relevant ecosystem interactions. Students should expect to conduct their own research through the application of learned research methods on systems of their interest.
Prerequisite(s): NR 437 (may be taken concurrently) with a minimum grade of D- or NR 435 (may be taken concurrently) with a minimum grade of D- or NR 435H with a minimum grade of D-.
Equivalent(s): EC 785
Grade Mode: Letter Grading

NR 786 - Leadership for Sustainability
Credits: 4
In this course we review and evaluate current knowledge and practice regarding the attainment of sustainability in social and environmental relations. We particularly focus on the meaning and qualities of leadership for achieving a sustainable future. Along the way, we also reflect on our own leadership styles and qualities. Topics include the role of leaders and leadership practices in government, business, academia etc; concepts and theories for achieving social change; and case studies exemplifying a range of leaders and approaches toward sustainability.
Attributes: Writing Intensive Course
Prerequisite(s): NR 437 with a minimum grade of D- or NR 435 with a minimum grade of D- or NR 435H with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NR 787 - Advanced Topics in Sustainable Energy
Credits: 4
This course engages students in advanced topics in sustainable energy. Course reviews basic structures of our energy system, energy markets and economics, and the environmental, economic and technological of energy landscape. Focus is on electricity and building use with introductions to the transportation system. Students gain the knowledge to evaluate innovations in technology, policy and financing necessary to implement sustainable energy goals from conservation and efficiency to renewables and energy storage.
Grade Mode: Letter Grading
Special Fee: Yes

NR 795 - Investigations
Credits: 1-4
Investigations in Natural Resources may include topics in environmental conservation, forestry, soil and watershed management, ecosystems, and wildlife management. Special fee on some topics.
Grade Mode: Letter Grading
Special Fee: Yes

NR 795W - Investigations
Credits: 1-4
Investigations in Natural Resources may include topics in environmental conservation, forestry, soil and watershed management, ecosystems, and wildlife management.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

NR 799 - Honors Senior Thesis
Credits: 1-4
Honor/thesis students conduct an independent research project, relevant to the student's area of specialization in the major, under the direction of a faculty sponsor. Students submit a research proposal, write a final report, and provide an oral presentation. One or two semester sequence.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Neuropsychology (NPSY)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NPSY 600 - Behavioral Neuroscience
Credits: 4
This course is an introduction to behavioral neuroscience, with a focus on clinical applications. The course begins with an in-depth overview of the structure and function of neurons and then moves into topics such as sensory processing, psychopathology, and cognition. Students will learn about neural networks that give rise to these behaviors, and how the brain interacts with other organs. Additionally, students will learn through case studies.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

NPSY 700 - Neuroimaging: Theory and Application
Credits: 4
Neuroimaging techniques are commonly used in both clinical and research settings. This course introduces students to the fundamental principles governing neuroimaging. Topics covered include neuroanatomy and neurobiology reviewed in the context of different neuroimaging methods such as computed tomography, magnetic resonance imaging, electroencephalogram, and position emission tomography. We will review the various methods for processing structural, functional, and multimodal imaging datasets. Students will also gain hands on experience processing neuroimaging data during computer lab simulations. Anatomy coursework is recommended but not required.
Prerequisite(s): PSYC 401 with a minimum grade of D- and PSYC 402 with a minimum grade of D- and (PSYC 531 with a minimum grade of D- or NPSY 600 with a minimum grade of D-).
Grade Mode: Letter Grading

NPSY 795 - Independent Study
Credits: 1-4
Arranged by the student with a neuropsychology, psychology or biology faculty sponsor. Learner/sponsor contract required. Minimum time commitment: three hours per credit per week.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and NPSY 600 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

NPSY 798 - Capstone
Credits: 0
This is a zero credit course to indicate on the transcript that the capstone requirement is fulfilled.
Grade Mode: Credit/Fail Grading

Neuroscience and Behavior (NSB)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NSB 400 - Topics Neuroscience & Behavior
Credits: 1
This seminar type course is designed as an introductory experience for incoming first-year students, although it may be taken by students transferring into the major. Topics covered will include sensory biology, learning and memory, homing and navigation, neuromodulators and stress, reproductive behaviors. The format will rely heavily on discussion, prompted either by assigned readings or presentations by program faculty on their areas of expertise.
Grade Mode: Credit/Fail Grading

NSB 500 - Fundamentals of Neuroscience and Behavior I
Credits: 3
The course will introduce students to the fundamental neural processes underlying behavior. It will begin with a detailed examination of the properties of individual neurons and then move on to demonstrate how neurons can communicate together to produce complex behaviors. Some of the basic concepts that will be covered will include: the molecular basis of electrical and chemical communication, sensory transduction and processing, neuropharmacology, the neural basis of reflexes and simple behavior, development of the nervous system and the influence of external stimuli on neural processing.
Co-requisite: NSB 501
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-).
Grade Mode: Letter Grading

NSB 501 - Fundamentals of Neuroscience and Behavior I Laboratory
Credits: 2
The course is designed to expose students to some of the classic experiments in cellular and molecular Neurobiology. They will record from sensory and motor neurons, stain and view neurons, carry out simple behavior experiments and record from muscles in freely behaving animals. The laboratory exercises will run parallel with the concepts taught in lecture and complement the lecture material in many ways. Students will conduct actual experiments, analyze the results and write lab reports as well.
Co-requisite: NSB 500
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

NSB 502 - Fundamentals of Neuroscience and Behavior II/Systems Neuroscience
Credits: 3
This course is an introduction to the questions addressed by scientists who aim to understand the biological basis of behavior and cognition. This semester we will review the major organization of the central nervous system and how these systems interact with each other to produce behavior and cognition. Major topics will include: the development and emergence of behavior; movement; the neural basis of cognition, and language, thought, affect and learning.
Co-requisite: NSB 503
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D-) and CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D- and NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D-.
Grade Mode: Letter Grading

NSB 503 - Fundamentals of Neuroscience and Behavior II Laboratory
Credits: 2
This laboratory class with compliment the material being taught in NSB 502. The laboratory will focus on behavioral and cognitive neuroscience experiments. Students will learn about neuroanatomy and neuroscience research methods, including experimental design, data collection, statistical analysis, data interpretation, and manuscript preparation through conducting actual experiments. Students will write research reports describing their experiments and will receive some basic computer programming and research ethics training.
Co-requisite: NSB 502
Prerequisite(s): NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NSB 600 - Field Experience in Neuroscience and Behavior
Credits: 1-4
A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities relevant to neuroscience and behavior. Must be approved by a faculty advisor selected by the student.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

NSB 710 - Brain & Behavior: A Systems Approach
Credits: 3
The goal of this course is to explore foundational concepts in neuroscience with an emphasis on a systems-based perspective. Topics will span molecules to behavior including the cellular basis on neural communication, sensory processing, motor control, homeostasis, emotion, cognitive behavior, and disease of the nervous system. Over the course of the semester, students will read primary literature in the field of neuroscience and develop skills to understand and apply a systems neuroscience perspective.
Prerequisite(s): NSB 500 with a minimum grade of C- and NSB 501 with a minimum grade of C- and NSB 502 with a minimum grade of C- and NSB 503 with a minimum grade of C-.
Grade Mode: Letter Grading

NSB 727 - Animal Communication
Credits: 4
This course examines the principles underlying how animals communicate with each other and why they communicate the way they do by using perspectives drawn from a broad range of disciplines including physics, chemistry, ecology, psychology, economics, and behavioral ecology. Students will explore the primary literature, and work in teams to conduct independent research. The course is intended for advanced undergraduate or graduate students interested in neuroscience and behavior, evolution, wildlife and conservation biology, or zoology.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-.
Grade Mode: Letter Grading

NSB 795 - Special Investigations
Credits: 1-4
Independent research with any member of the NSB faculty in various areas including, but not limited to, neuroscience, neuroendocrinology, animal behavior.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): NSB 795W
Grade Mode: Letter Grading

NSB 798 - Capstone
Credits: 0
This is a 0 credit course to indicate on the transcript that capstone requirement is fulfilled.
Grade Mode: Credit/Fail Grading

NSB 799 - NSB Senior Thesis
Credits: 2-4
Working under the direction of a faculty sponsor, the student plans and executes independent research resulting in a written thesis and public presentation. Limited to students entering their senior year. A two-semester sequence 2-4 credits each semester. IA (continuous grading) given first semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

NSB 799H - Honors Senior Thesis
Credits: 2-4
Working under the direction of a faculty sponsor, the student plans and executes independent research resulting in a written thesis and public presentation. Limited to student entering their senior year or under exceptional circumstances their junior year. Required for students working toward University Honors or Honors-in-Major. A two-semester sequence 2-4 credits each semester. IA (continuous grading) given first semester.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Nursing (NUR) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NUR 600 - Enhancing Your Nursing Career
Credits: 2
This course provides the RN to BSN student the opportunity to explore the contemporary nursing issues related to the major concepts that form a basis for the program outcomes and the additional nursing courses. Nursing knowledge is gained through a combination of experiential, evidence based, and classroom experiences. This course introduces the structure of evaluation and includes emphasis on evidence based practice, professional trends, and an opportunity to explore potential capstone project ideas.
Equivalent(s): NUR 600G
Grade Mode: Letter Grading

NUR 615 - Evidence-Based Nursing
Credits: 4
The contemporary nurse is continually faced with a wide variety of problems encountered in the care of patients. Thus the nurse must have a repertoire of problem-solving skills that is based on sound evidence. Identification, evaluation, application, and/or compilation of evidence from a variety of resources to apply to health-related problems of individuals, families, communities, and the health care delivery system are essential tools of the contemporary nurse. Students will identify problems encountered in practice and find pertinent resources to assist in resolving them. The student will apply specific criteria to assess the quality of evidence, and as part of a team, will discuss whether it could feasibly and ethically be applied to care of patients. In addition, students will identify a problem or aspect of a problem to be researched, find relevant resources and/or literature, and determine what additional information is needed to resolve the problem. In collaboration with team members, a method of gathering pertinent data will be developed. Active R.N. License, or transfer credit in Statistics accepted as requirements prior to taking this course.
Prerequisite(s): (NUR 600 with a minimum grade of C or NUR 600G with a minimum grade of C) and (MTH 504 with a minimum grade of C or MATH 504G with a minimum grade of C).
Equivalent(s): NUR 602G
Grade Mode: Letter Grading

NUR 635 - The Nurse as Leader
Credits: 4
The nurse of today and tomorrow must inevitably be a leader, whether at the bedside in assisting an individual patient toward enhanced health or leading health care organizations, public policy initiatives, and professional associations to maximize their contributions to the health of the nation. The nurse, as the most plentiful, versatile, and wide-spread of health care providers, must be prepared to develop and implement new visions and models of care delivery, applications of technology, stewardship of costly resources, evaluation and improvement of health care quality, and delivery of safe, effective health care in a variety of settings. The student will explore leadership theories and styles, evaluate appropriate application of several leadership approaches, practice the leadership role in a project to create a health-care related change, and offer collegial peer evaluation of classmates' work. Active R.N. License required prior to taking this course.
Prerequisite(s): NUR 615 with a minimum grade of C or NUR 602G with a minimum grade of C.
Equivalent(s): NUR 606G
Grade Mode: Letter Grading

NUR 670 - Nursing Care of Populations
Credits: 4
This course expands the student's focus from the care of individual patients to the care of aggregates. Aggregates may range from small to large, and include families, groups, communities, and the global population. Students will investigate the concept of community assessment and use a systems-based epidemiological model to organize data about health problems and populations at risk. Health challenges of specific diverse populations will be investigated along with resources for change and health promotion within the community. Students will perform a problem-focused literature review about a selected problem and create a community-based plan of care. Students will also become familiar with public health resources and functions. This course involves a clinical experience which comprises thirty hours spent in virtual simulation.
Prerequisite(s): NUR 615 with a minimum grade of C or NUR 602G with a minimum grade of C.
Equivalent(s): NUR 603G
Grade Mode: Letter Grading
Special Fee: Yes

NUR 700 - Nursing Implications of Genetics and Genomics
Credits: 4
The human genome project has forever changed the understanding of human nature, health, illness, and approaches to patient care. During this course, topics will include current applications of genomic information and genetic interventions in health care. Students will learn to assess patients for possible genetic risk factors, genetic mutations occurring as a consequence of person-environment interaction, and specific health problems with known genetic bases. The nurse's role in assessment, case-finding, referral, and intervention will be emphasized. Students will also determine present regional applications of genetic medicine and familiarize themselves with existing community resources for assisting individuals with genetic issues.
Prerequisite(s): NUR 615 with a minimum grade of C or NUR 602G with a minimum grade of C.
Equivalent(s): NUR 607G
Grade Mode: Letter Grading

NUR 740 - Nursing Care of Vulnerable Populations
Credits: 4
Nursing care of vulnerable populations requires the nurse to integrate concepts of vulnerability, disparities, and social determinants of health with prior knowledge in caring for individuals and populations. This course includes information from different cultures and at-risk groups of individuals considered to be vulnerable. Key concepts to be covered include, understanding of the unique challenges in caring for the vulnerable, relevant health care research, and skills required to work with and advocate for vulnerable populations.
Prerequisite(s): NUR 670 with a minimum grade of C or NUR 603G with a minimum grade of C.
Equivalent(s): NUR 604G, NUR 610G
Grade Mode: Letter Grading

NUR 795 - Integrative Capstone: Nursing Practicum
Credits: 4
This course offers the opportunity to develop and implement a personalized precepted experience. The experience will include a project designed to solve an evidence-based problem or improve the quality of an aspect of nursing practice in the work place. The student will incorporate throughout the practicum the knowledge, skills, and enhanced professionalism acquired in the B.S.N. program. The role of the faculty will be that of consultant. The project will be presented and/or implemented in the work place as well as in the peer group, and the student will elicit evaluation of his/her work from colleagues and peers. Using evaluation feedback, the student will hypothesize and present ways of improving the project's quality. Prior to capstone enrollment, students are expected to complete the majority of their required major courses along with having an Active R.N. License. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of C or CRIT 602G with a minimum grade of C or CRIT 502G with a minimum grade of C) and (IDIS 601 with a minimum grade of C or IDIS 601G with a minimum grade of C).
Equivalent(s): NUR 655G
Grade Mode: Letter Grading

Nursing (NURS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NURS 450 - Making Babies: Technology, Nature, and Social Context
Credits: 4
Examines the process of human birth focusing on the emergent technologies of human genetics, assisted fertility technologies, prenatal diagnosis and treatment, as well as the appropriate and inappropriate use of technology through the labor, delivery, and post-partum experience. The social, cultural, political, and historical context for the development and application of these technologies is explored.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): HHS 450
Grade Mode: Letter Grading

NURS 500 - Introduction to Professional Nursing
Credits: 2
The course provides an overview of professional nursing with a focus on reflective thinking. A synthesis of current and projected trends in nursing practice and education, with an introduction to topics on ethical, social, and legislative issues, are explored. This course is divided into five modules: nursing as a career, nursing as a profession, nursing as art and science, nursing as communication, and nursing and relationship-centered care.
Equivalent(s): NURS 530
Grade Mode: Letter Grading
Special Fee: Yes

NURS 501 - Research for Nursing Professionals
Credits: 4
The course focuses on the translation of current evidence into nursing practice through the identification of practice issues, appraisal and application of evidence, and the evaluation of outcomes. Development of evidence is examined using the research process. Concepts explored include research ethics and legal precepts, clinical judgment in knowledge development and application, and the integration of client values and preferences. Students learn to use reliable evidence to inform practice and make clinical judgments to promote nursing best practice.
Equivalent(s): HHS 598, NURS 531, NURS 641
Grade Mode: Letter Grading
Special Fee: Yes

NURS 504 - Disease and Drugs I
Credits: 4
The two semester course advances knowledge of human physiology and the pathophysiological variations in selected global disease states in adults and children. Student explore how the human body uses its adaptive powers to maintain a steady state and how alterations affect normal processes. Pharmacological agents used on these alterations are examined.
Prerequisite(s): BMS 507 with a minimum grade of C and BMS 508 with a minimum grade of C and BMS 501 (may be taken concurrently) with a minimum grade of C.
Equivalent(s): NURS 532
Grade Mode: Letter Grading

NURS 505 - Diseases and Drugs II
Credits: 4
The two semester course advances knowledge of human physiology and the pathopsychological variations in selected global disease states in adults and children. Students explore how the human body uses its adaptive powers to maintain a steady state and how alterations affect normal processes. Pharmacological agents used on theses alterations are examined.
Co-requisite: NURS 506, NURS 601
Prerequisite(s): NURS 500 with a minimum grade of C.
Equivalent(s): NURS 532
Grade Mode: Letter Grading

NURS 506 - Human Development, Interaction and Learning Across the Lifespan
Credits: 4
The course emphasizes human development, interaction and learning across the lifespan as essential to safe, effective relationship-centered care. An exploration of selected theoretical perspectives on human development, education and learning and group development prepares students to engage in professional practice.
Co-requisite: NURS 505, NURS 601
Prerequisite(s): NURS 500 with a minimum grade of C.
Grade Mode: Letter Grading

NURS 516 - Health Assessment and Nursing Fundamentals
Credits: 0 or 4
Focuses on the acquisition of psychomotor and assessment skills required for the delivery of safe nursing care. Students begin by learning clinical skills in the simulation setting and then using those skills with supervision in the clinical setting. An additional focus of this course is understanding fundamental nursing concepts as they pertain to providing safe, effective care.
Co-requisite: NURS 516C
Equivalent(s): NURS 534
Grade Mode: Letter Grading

NURS 516C - Health Assessment and Nursing Fundamentals Clinical
Credits: 2
This clinical course is designed to provide experiences to apply the knowledge to the skills required to perform a systematic examination of a healthy adult, to perform basic psychomotor skills and to record findings appropriately. Students implement the nursing process by obtaining health histories, performing physical and psychosocial assessments, establishing a database, and formulating initial nursing plans. Students become familiar with the nursing simulation lab.
Co-requisite: NURS 516
Equivalent(s): NURS 534
Grade Mode: Letter Grading

NURS 517C - Clinical Integration
Credits: 0 or 2
This course focuses on continued development of nursing skills necessary for promoting health in adults. Clinical practicum focuses on restorative care by providing supervised professional nursing practice for development of multidimensional assessment skills, decision-making processes, and evidence-based strategies and interventions for patients transitioning across the health care continuum. Application of evidence-based practice may include rehabilitative, end of life and palliative care.
Grade Mode: Letter Grading

NURS 530 - Professional Nursing Concepts and Theories
Credits: 4
This course introduces students to the foundational concepts, theories, and professional values of nursing. Emphasizing person-centered care, interprofessional collaboration, and systems-based practice, students explore the evolving role of the nurse within diverse healthcare environments. Key topics include nursing theory, ethics, population health, quality and safety, informatics, and leadership development. The course aligns with multiple AACN Essentials domains to support professional identity formation and readiness for practice.
Equivalent(s): NURS 500
Grade Mode: Letter Grading

NURS 531 - Evidence Based Innovations in Nursing
Credits: 4
Evidence-Based Innovations in Nursing utilizes competency-based learning strategies to introduce students to the foundational principles of evidence-based practice, interdisciplinary collaboration, and innovation in healthcare. Through the integration of research, theory, policy, and population health data, students will explore factors influencing health outcomes and evaluate nursing practices in diverse settings. Emphasis is placed on ethical, culturally responsive, and patient-centered decision-making. Students will engage in critical inquiry to identify performance gaps and health inequities, apply evidence to support practice change, and develop advocacy strategies to improve quality and safety in care delivery. The course fosters the use of data, effective communication, and teamwork to propose innovative, evidence-informed solutions in nursing practice.
Equivalent(s): NURS 501
Grade Mode: Letter Grading

NURS 532 - Integrative Pathopharmacology in Nursing
Credits: 4
This competency-based course explores key concepts in pathophysiology and pharmacology related to common and complex health conditions. Students will explore disease mechanisms alongside pharmacological interventions emphasizing drug actions, indications, side effects, and nursing responsibilities. The course supports the development of clinical judgment and evidence-based decision-making. Competency attainment is demonstrated through application of knowledge and case--based scenarios and critical analysis of current clinical guidelines.to ensure safe, effective and equitable treatment planning.
Prerequisite(s): BMS 501 (may be taken concurrently) with a minimum grade of D- and BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Equivalent(s): NURS 504, NURS 505
Grade Mode: Letter Grading
Special Fee: Yes

NURS 534 - Fundamentals of Nursing Practice
Credits: 6
This foundational course introduces essential nursing competencies that support the art and science of nursing. Emphasis is placed on competency-based learning experiences that foster clinical judgement, cultural humility, inter-professional collaboration, and the promotion of safe care delivery. Through reflective practice and faculty-guided feedback, learners will cultivate professional identity, uphold ethical standards, and advance a commitment to lifelong learning within a dynamic healthcare environment.
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D- and BMS 501 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): NURS 516, NURS 516C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 535 - Death and Dying
Credits: 4
Encompasses peoples' responses to death throughout the lifecycle. Theories of death, dying, and grieving discussed. Students explore cultural influences, legal, and ethical dilemmas; the biopsychosocial needs of people facing life-threatening situations; resources for care of the dying; death rituals; and surviving a major loss.
Attributes: Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

NURS 601 - Function and Wellbeing of Older Adults
Credits: 2
This course focuses on developing knowledge necessary for promoting healthy aging and wellness across the lifespan. Multidimensional assessment skills are utilized to develop appropriate evidence-based interventions to assist individuals and families to maintain wellness and promote healthy lifestyles, and enhance the quality of life for older adults with acute and chronic conditions. Students will explore nursing issues and principles of promoting wellness across the health care continuum including end of life and palliative care.
Grade Mode: Letter Grading

NURS 611 - Care of the Adult with Acute Illness I
Credits: 0 or 4
The first of two courses focused on adult health nursing of clients with commonly occurring disease states in the acute care setting. Course builds on previously learned knowledge of physical assessment and technical skills to focus on key components of acute care nursing. Special emphasis placed on the etiology, clinical evaluation and use of evidence-based nursing interventions to manage specific health problems related to cardiovascular, hematologic, pulmonary, endocrine and renal systems. The advanced skills and techniques required to care for clients with commonly occurring disease states is included.
Co-requisite: NURS 611C
Equivalent(s): NURS 630
Grade Mode: Letter Grading

NURS 611C - Care of the Adult with Acute Illness I Clinical
Credits: 2
Designed to provide the student with opportunities to apply the nursing process and clinical judgment within an acute care setting to clients with commonly occurring disease states. The experience focuses on the application of knowledge and skills, evidence-based practice, clinical judgment and relationship-centered care.
Co-requisite: NURS 611
Prerequisite(s): NURS 505 with a minimum grade of C.
Equivalent(s): NURS 630
Grade Mode: Letter Grading

NURS 612 - Care of the Adult with Acute Illness II
Credits: 0 or 4
This is the second of two courses focused on adult health nursing of clients with commonly occurring disease states in acute care nursing. The course builds on previously learned knowledge of physical assessment and technical skills to focus on key components of acute care nursing. Special emphasis is placed on the etiology, clinical evaluation and use of evidence-based nursing interventions to manage specific health problems related to gastrointestinal, neurological, musculoskeletal systems and clients undergoing surgery. Complex client issues related to oncologic, immunologic and shock states are introduced. The advanced skills and interventions required to care for clients with commonly occurring disease states and those undergoing surgery are included.
Co-requisite: NURS 612C
Prerequisite(s): NURS 611 with a minimum grade of C.
Equivalent(s): NURS 631
Grade Mode: Letter Grading

NURS 612C - Care of the Adult with Acute Illness II Clinical
Credits: 2
Course is designed to provide the student with opportunities to apply the nursing process and clinical judgment within an acute care setting to clients with commonly occurring disease states and those undergoing surgery. The experience focuses on the application of knowledge and skills, evidence-based practice, clinical judgment and relationship-centered care.
Co-requisite: NURS 612
Prerequisite(s): NURS 611 with a minimum grade of C.
Equivalent(s): NURS 631
Grade Mode: Letter Grading
Special Fee: Yes

NURS 616 - Living with Mental Illness
Credits: 2
This course is designed to provide an understanding of the concepts of mental health and major factors affecting human behavior and interaction. Specific theoretical concepts guiding nurse-client interactions are utilized as a vehicle for supporting the person's and family's optimum state of well-being.
Co-requisite: NURS 616C
Equivalent(s): NURS 632
Grade Mode: Letter Grading

NURS 616C - Living with Mental Illness Clinical
Credits: 2
In this psychiatric nursing clinical course the nursing process and a situation-based interpretive approach serve as framework for professional nursing action. A special focus is placed on the integration of personal knowledge, therapeutic use of self and communication skills inherent in nurse-client relationships. Through a variety of clinical experiences, the student applies mental health concepts and principles of therapeutic communication in caring for people and families with alterations in mental health.
Co-requisite: NURS 616
Equivalent(s): NURS 632
Grade Mode: Letter Grading

NURS 621 - Maternal and Newborn Nursing
Credits: 0 or 2
The course allows students an opportunity to develop necessary knowledge, attitudes and skills required for the provision of safe care to child bearing women and their families. Childbirth is viewed as part of the life cycle with emphasis on women and family-centered care, normal physiological childbirth, client advocacy and the provision of therapeutic nursing practice.
Co-requisite: NURS 621C
Equivalent(s): NURS 633
Grade Mode: Letter Grading

NURS 621C - Maternal Newborn Nurs Clin
Credits: 2
This clinical component of NURS 621, a course that has family as the focus for nursing practice, introducing the student to the care of young families throughout pregnancy, birth, and child-rearing periods. The health needs of the young family are discussed in terms of major morbidity/mortality and contemporary issues. This clinical course offers students experiences in various clinical settings in order to provide opportunities for the development of professional practice roles in maternal health.
Co-requisite: NURS 621
Equivalent(s): NURS 633
Grade Mode: Letter Grading

NURS 627 - Clinical Judgment in Nursing
Credits: 4
This course is designed to apply and analyze clinical reasoning and judgement in a variety of situations, focusing on the ability to prioritize and individualize evidence-based nursing interventions.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

NURS 630 - Nursing Care of Adults with Chronic Conditions
Credits: 6
This nursing course focuses on the management of chronic conditions in adult populations across diverse care settings, with particular emphasis on evidence-based, protocol-driven approaches to promote optimal patient outcomes. Students will build on foundational nursing skills to plan and deliver individualized care that integrates patient-specific factors, clinical judgment, and effective communication strategies. Emphasis is placed on seamless care transitions, continuity planning, and collaborative team coordination to manage complex, chronic conditions.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D-.
Equivalent(s): NURS 611, NURS 611C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 631 - Nursing Care of Adults with Acute Conditions
Credits: 6
This course prepares nursing students to deliver safe, evidence-informed care to adults experiencing acute health conditions. Building on foundational knowledge in physical assessment, pathophysiology, and technical skills, students will explore etiology, clinical evaluation, and nursing interventions associated with acute illness. Emphasis is placed on developing clinical judgment, applying nursing science, and integrating interdisciplinary theories to guide individualized care. Through simulation, case studies, and clinical experiences, learners will strengthen competencies in professional identity, evidence-based practice, systems thinking, and informatics, while fostering relationship-centered care and a culture of safety.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D-.
Equivalent(s): NURS 612, NURS 612C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 632 - Psychiatric-Mental Health Nursing
Credits: 6
This course prepares nursing students to deliver holistic, evidence-based care to individuals, families, and communities experiencing mental health challenges. Emphasizing culturally responsive and ethically sound practice, students will integrate psychosocial, neurobiological, and legal considerations into care planning. Through interprofessional collaboration, data analysis, and use of health technologies, students will design and evaluate mental health interventions. Reflective practice and professional accountability are central to developing therapeutic relationships and promoting safe, compassionate psychiatric nursing care.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D-.
Equivalent(s): NURS 616, NURS 616C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 633 - Nursing Care in Reproductive and Sexual Health
Credits: 6
This course prepares students to assess the physiological, psychological, and sociocultural dimensions of reproductive and sexual health across diverse populations. Students apply evidence-based practices to promote safe, high-quality care within complex healthcare systems. Learners evaluate health policies and advocate for equitable access to services, emphasizing interprofessional collaboration and ethical decision-making. Through classroom, clinical and simulated experiences, students demonstrate leadership, accountability, and professional values in the provision of person and family-centered care. The course integrates generalist nursing competencies to prepare students for holistic, culturally responsive practice.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D-.
Equivalent(s): NURS 621, NURS 621C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 648W - Nursing Honors Seminar I
Credits: 1-4
Honors seminar is designed to expand the knowledge and skills to develop a research thesis or quality improvement capstone project. Literature review and methods development will be a major focus under the direction of a faculty advisor.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 5 credits.
Grade Mode: Letter Grading

NURS 695 - Independent Study
Credits: 2-4
In-depth study with faculty supervision. May be repeated for different topics.
Grade Mode: Letter Grading

NURS 700 - Nursing Teaching Assistantship Practicum
Credits: 1-2
This course covers best practices, norms, and expectations in performing the duties of a teaching assistant. Strategies for effective communication with students and instructors, and institutional policies are explored and reinforced. Students serve as teaching assistants in assigned class and/or lab activities. Assignments to be made by the course instructor may include teaching and/or lab duties.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 2 times.
Grade Mode: Credit/Fail Grading

NURS 702 - Child Health Nursing
Credits: 0 or 2
The course considers the child in the context of family as the focus for nursing practice, introducing the student to the care of children using a developmental approach. Commonly occurring health transitions and alterations occurring from infancy through adolescence are examined. A survey of child health explores both professional practice roles of the pediatric nurse in health promotion and illness as well as acute and chronic conditions that impact children at various stages of development.
Equivalent(s): NURS 730
Grade Mode: Letter Grading
Special Fee: Yes

NURS 702C - Child Health in the Community Clinical
Credits: 2
Semester long clinical course focused on the practice of pediatric nursing in the community.
Co-requisite: NURS 702
Equivalent(s): NURS 730
Grade Mode: Letter Grading

NURS 704 - Public Health Nursing
Credits: 4
This course prepares the student for population-focused practice. Emphasis is placed on the synthesis of concepts, theories, knowledge and practice from nursing and public health sciences. Students explore the concepts of: community as client, community assessment, health promotion, health protection, illness prevention and vulnerability from a public health nursing perspective.
Equivalent(s): NURS 734
Grade Mode: Letter Grading

NURS 704P - Public Health Nursing Project
Credits: 2
Semester long experience working in teams with a community organization to address a current public health issue. Learning focuses on working in teams to develop a strategic understanding of the identified public health issue and to design, implement, and evaluate a targeted intervention project.
Grade Mode: Letter Grading

NURS 705 - Contemporary Leadership within Health Care Systems
Credits: 4
The course explores the dynamic nature of the healthcare system and practice environments that impact nursing. Emphasis is placed on relationship of ethics, power, change, conflict, communication and politics in health care systems. Focus is placed on the use of models of leadership and management to effectively negotiate change, provided safe quality care, and promote professional practice in the delivery of relationship-centered care.
Co-requisite: NURS 721
Equivalent(s): NURS 732W
Grade Mode: Letter Grading

NURS 711 - Clinical Judgment in Complex Illness
Credits: 0 or 2
This course further develops and refines critical thinking skills by student participation in clinical scenarios and de-briefings. Students prepare for the care of patients with complex illness and engage in health assessment, psychomotor skills, and implementing the nursing process to develop a plan of care. May be waived with special circumstances.
Grade Mode: Letter Grading

NURS 721 - Integrating Professional Nursing Practice
Credits: 2
Weekly seminar provides an opportunity for the analysis, synthesis, refinement and integration of nursing knowledge. Standardized testing provides timely feedback to facilitate transition to professional practice.
Co-requisite: NURS 721C
Equivalent(s): NURS 733
Grade Mode: Letter Grading

NURS 721C - Integrating Professional Nursing Practice Clinical
Credits: 6
Clinical synthesis experience to refine and integrate previously learned knowledge and skills into professional practice through a cooperatively designed learning experience. Students plan, deliver and manage care under the supervision of a licensed preceptor.
Co-requisite: NURS 721
Equivalent(s): NURS 733
Grade Mode: Letter Grading

NURS 730 - Integrated Pediatric and Family Nursing
Credits: 6
The course considers the child within the context of family as the focus for relationship-centered nursing practice. Students are introduced to the care of children from a developmental perspective through an examination of commonly occurring transitions and alterations to health from infancy through adolescence. Students explore professional nursing practice roles in health promotion, illness prevention and care of children with acute and chronic conditions at various developmental stages.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D- and NURS 630 with a minimum grade of D- and NURS 631 with a minimum grade of D- and NURS 632 with a minimum grade of D- and NURS 633 with a minimum grade of D-.
Equivalent(s): NURS 702, NURS 702C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 732W - Nursing Leadership within Healthcare Sysems
Credits: 4
This course prepares nursing students to lead within complex healthcare systems. Students explore leadership theories, organizational structures, healthcare delivery models, and policy/financial influences on care. Emphasis is placed on safety, interprofessional communication, team dynamics, and professional identity. This course promotes critical thinking, ethical decision-making, and the development of a personal leadership style that fosters health equity and enhances quality outcomes.
Attributes: Writing Intensive Course
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D- and NURS 630 with a minimum grade of D- and NURS 631 with a minimum grade of D- and NURS 632 with a minimum grade of D- and NURS 633 with a minimum grade of D-.
Equivalent(s): NURS 627
Grade Mode: Letter Grading

NURS 733 - Transition to Professional Nursing Practice
Credits: 8
This capstone course prepares pre-licensure nursing students for the transition from student to professional nurse. Through a combination of didactic instruction, high-fidelity simulation, and immersive clinical experiences, students will integrate and apply knowledge, skills, and professional values essential for safe, effective, and person-centered care. Students will engage in reflective practice, demonstrate accountability, and collaborate with interprofessional teams to manage complex patient care across diverse settings. Simulation and clinical practicum experiences are designed to enhance readiness for entry-level practice and licensure, with a focus on prioritization, delegation, communication, and evidence-based decision-making.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D- and NURS 630 with a minimum grade of D- and NURS 631 with a minimum grade of D- and NURS 632 with a minimum grade of D- and NURS 633 with a minimum grade of D-.
Equivalent(s): NURS 721, NURS 721C
Grade Mode: Letter Grading
Special Fee: Yes

NURS 734 - Perspectives in Population Health Nursing
Credits: 6
This course prepares nursing students for population-focused practice by integrating principles from nursing theory and public health sciences to promote equitable health outcomes across diverse communities. Students will develop competencies in community assessment, health promotion, illness prevention, and evidence-based practice, with a focus on identifying and analyzing health risks. The course emphasizes the impact of Social Drivers of Health and guides students in designing sustainable, culturally responsive interventions in collaboration with community stakeholders. Additionally, students will explore the role of health policy and advocacy in addressing public health and environmental challenges across the lifespan.
Prerequisite(s): NURS 530 with a minimum grade of D- and NURS 531 with a minimum grade of D- and NURS 532 with a minimum grade of D- and NURS 534 with a minimum grade of D- and NURS 630 with a minimum grade of D- and NURS 631 with a minimum grade of D- and NURS 632 with a minimum grade of D- and NURS 633 with a minimum grade of D-.
Equivalent(s): NURS 704, NURS 704P
Grade Mode: Letter Grading
Special Fee: Yes

NURS 748W - Nursing Honors Thesis I
Credits: 1
Honors seminar designed to expand the knowledge and skills presented in previous honors in major courses. Focuses on a project relevant to the discipline of nursing under the direction of a faculty adviser. Open to honors-in-major and senior nursing majors.
Attributes: Honors course; Writing Intensive Course
Prerequisite(s): NURS 648W with a minimum grade of D-.
Equivalent(s): NURS 797
Grade Mode: Letter Grading

NURS 749W - Nursing Honors Thesis II
Credits: 4
Honors seminar designed to expand the knowledge and skills presented in previous honors in major courses. Focuses on a project relevant to the discipline of nursing under the direction of a faculty adviser. Open to honors-in-major and senior nursing majors.
Attributes: Honors course; Writing Intensive Course
Prerequisite(s): NURS 648W with a minimum grade of D- and NURS 748W with a minimum grade of D-.
Equivalent(s): NURS 797
Grade Mode: Letter Grading

NURS 794 - Special Topics
Credits: 0-4
Specialized courses covering information not normally presented in regular course offerings. Description of topics varies. May be repeated but not in duplicate areas of content. Special fee on some sections.
Grade Mode: Letter Grading

NURS 794W - Special Topics
Credits: 1-4
Specialized courses covering information not normally presented in regular course offerings. Description of topics varies. May be repeated but not in duplicate areas of content. Special fee on some sections.
Attributes: Writing Intensive Course
Equivalent(s): NURS 794
Grade Mode: Letter Grading
Special Fee: Yes

Nutrition (NUTR)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

NUTR 400 - Nutrition in Health and Well Being
Credits: 0 or 4
Addresses scientific principles of human nutrition to promote health and well-being. Overview of the biological significance of food and nutrition, specific nutrient functions, and how the supply and demand of food impacts physical health and well-being. Emphasis on scientific literacy and an appreciation of the ways in which we gain scientific knowledge and understanding. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): ANSC 400, NUTR 400H, NUTR 475
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 401 - Professional Perspectives on Nutrition
Credits: 1
Examines the many opportunities for dietitians and nutrition science professionals, from farm to fork, to health and nutrition outcomes. Students meet and interact with faculty and explore career paths and nutrition strategies in the food and nutrition science fields. Legal and ethical considerations for these professionals are discussed. Content areas for specialization in nutritional sciences, dietetics, health and wellness are reviewed, as well as the Ecogastronomy dual major.
Grade Mode: Credit/Fail Grading

NUTR 403 - Culinary Arts Skills Development
Credits: 4
This laboratory class explores classical culinary and basic cooking techniques. Classical recipes for stocks, mother sauces, soups and pie crust, quick and yeast breads are featured with hands-on experiential learning using common practices and techniques of the food service industry. Students will gain an understanding of basic ingredients, fabrication, storage, cooking, hygiene and sanitation, equipment usage in modern culinary through demonstration, practice and evaluation.
Equivalent(s): CAN 403
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 405 - Food and Society
Credits: 4
Consideration of the cultural significance of food, emphasizing historical, psychological, social, political, and economic aspects. (Spring semester only.)
Attributes: Social Science (Discovery)
Equivalent(s): ANSC 405, NUTR 405W
Grade Mode: Letter Grading

NUTR 476 - Nutritional Assessment
Credits: 4
Designed for the student who plans to enter the health care profession. Introduces the concepts of nutritional assessment and the practical application of these concepts in the nutritional care of clients in clinical, community, and research settings.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 506 - Nutrition and Wellness
Credits: 4
Course assists students in making informed decisions affecting personal and societal wellness. Emphasis on the dimensions of wellness, including the impact of psychological, emotional and physical health, as well as environmental influences that affect behavior.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken EXSC 527, KIN 527.
Grade Mode: Letter Grading

NUTR 525 - Food and Culture in Italy
Credits: 4
Students will be introduced to the Italian culture and its traditions, with a special focus on food. Part of the course will involve out-of-class activities and tasting experiences in the city of Ascoli Piceno, Italy. Only open to students studying abroad in the UNH-in-Italy Program.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

NUTR 530 - Critical Analysis in Food Studies
Credits: 4
The course aims to investigate concepts and ideas that are essential to food studies. The philosophical aspects of the course are complemented by the experiential components that emphasize the particularity of the Italian environment. Only open to students studying abroad in the UNH-in-Italy Program.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

NUTR 535 - History of Food in Italy
Credits: 4
Students will examine the history of food in Italy and explore the interconnected sociological, cultural, political and environmental histories. Only open to students studying abroad in the UNH-in-Italy Program.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

NUTR 546 - Nutrition in Exercise and Sports
Credits: 4
Advanced nutritional strategies to optimize health, fitness, and athletic performance. Emphasis is on nutrition before, during, and after exercise for fitness, training, and competitions. Topics include healthy strategies for building muscle and losing body fat, as well as dietary manipulation in an effort to gain a competitive advantage.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Equivalent(s): NUTR 646
Grade Mode: Letter Grading

NUTR 550 - Food Science: Principle and Practice
Credits: 4
Application of scientific principles associated with the study of foods. Topics include: food composition, food additives and regulations, food safety, food biotechnology, product development and sensory evaluation. Principles of scientific inquiry as food ingredients are manipulated in a kitchen lab environment. Lab.
Prerequisite(s): NUTR 400 with a minimum grade of D- and NUTR 403 with a minimum grade of D- and (CHEM 411 with a minimum grade of D- or CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D-).
Equivalent(s): NUTR 500, NUTR 501
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 560 - Introduction to Research in Nutrition
Credits: 2
Introduction to research methods in nutritional assessment. Students gain both conceptual knowledge and hands-on experience in a collaborative setting while working with the College Health and Nutrition Assessment Project.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 595 - Mediterranean Diet and Culture
Credits: 4
Is there a diet that allows one to eat, drink, and still be healthy? While Americans struggle with rising rates of obesity and related health conditions, inhabitants of the Mediterranean region enjoy relatively low rates of heart disease, cancer, and obesity. Offers a unique on-site experience in Ascoli Piceno, Italy to investigate the cultural and scientific importance of the Mediterranean Diet. Students review basic nutrition concepts as well as the history and evolution of the Mediterranean diet. Combining lecture, discussion, and experiential activities, NUTR 595 is offered through the UNH Italy Study Abroad Program during the summer session.
Co-requisite: INCO 589
Grade Mode: Letter Grading

NUTR 600 - Field Experience in Nutrition
Credits: 1-4
Supervised field experience in public and private agencies with planned learning objectives related to clinical and community nutrition and food service management. Students are responsible for their own transportation; faculty member coordinates arrangements with fieldwork sites.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Credit/Fail Grading

NUTR 610 - Nutrition Education and Counseling
Credits: 4
The principles, methods and materials needed to provide nutrition education and counseling services. Emphasis on motivational interviewing, behavior change and developing skills needed to be an effective nutrition educator and counselor.
Prerequisite(s): NUTR 400 with a minimum grade of D- and NUTR 476 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 625 - From Farm to the Italian Table
Credits: 4
Students will gain an appreciation for food production (harvesting, processing), culinary preparation, and tasting. Hands-on experience will be emphasized through field trips and will provide a broad, informed perspective on farming and sustainable agriculture. Only open to students studying abroad in the UNH-in-Italy Program.
Grade Mode: Letter Grading

NUTR 628 - Culinary Nutrition Practicum
Credits: 4
This course builds on basic cooking techniques learned in NUTR 403 with an emphasis on the study and use of whole food ingredients to prepare and critically evaluate healthy recipes/meals. Techniques such as recipe modification and menu development will be addressed. The course culminates with the development of a multi-course menu developed, prepared and presented by the students in the class.
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 650 - Life Cycle Nutrition
Credits: 4
Comprehensive review of the nutritional issues related to the life cycle. Nutrient requirements of each life cycle stage are analyzed in the context of their metabolic functions. Practical application of theory at each stage of the life cycle through projects and discussion. Recommended BMS 507 and BMS 508.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 686 - UNH-in-Italy Study Abroad
Credits: 0
Provides a unique opportunity to study abroad in Ascoli Piceno, Italy during the semester. Open only to students studying abroad in the UNH-in-Italy Program.
Grade Mode: Not graded
Special Fee: Yes

NUTR 699 - Independent Study
Credits: 1-4
Scholarly project in an area of the nutritional sciences under the guidance of a faculty adviser.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 4 times.
Equivalent(s): NUTR 699W
Grade Mode: Letter Grading

NUTR 700 - Career Development in Dietetics
Credits: 2
Preparation for applying to dietetic internship programs and/or graduate school. Topics include writing resumes and personal statements, interviewing, professional skills, and navigating the online internship application.
Grade Mode: Letter Grading

NUTR 704 - Managerial Skills in Dietetics
Credits: 4
Emphasis on the basic principles of managing in dietetic fields such as clinical, community, and food service operations is the focus of course content. This includes personnel management, in-service and on-the-job training, effective leadership, decision making, assessing employee motivation, productivity and competence, and financial management.
Grade Mode: Letter Grading

NUTR 709 - Nutritional Epidemiology
Credits: 4
This course introduces basic concepts and methods in key areas of nutritional epidemiology, and discusses practical considerations related to designing, analyzing, and evaluating population-based nutrition studies. Research methods used in nutritional epidemiology will be taught to provide students with the ability to critically evaluate the nutritional epidemiological evidence. Learning will be enhanced by practical experiences in the collection, management, and analysis of nutritional epidemiological data during lab and in-class activities.
Prerequisite(s): NUTR 400 with a minimum grade of D- and (PSYC 402 with a minimum grade of D- or SOC 502 with a minimum grade of D- or BIOL 528 with a minimum grade of D-).
Grade Mode: Letter Grading

NUTR 710 - Advanced Diabetes Care
Credits: 2
Advanced Diabetes Care is a 2-credit course designed to build on foundational knowledge of diabetes care and education. During the semester, students will explore the pathophysiology of diabetes as well as modern medications and technology used to improve blood sugar management. Students will apply their knowledge of diabetes and nutrition to interpret data and deliver effective, compassionate care.
Prerequisite(s): NUTR 400 with a minimum grade of D- and BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 715 - Advanced Sports Nutrition
Credits: 4
The focus of the course is placed on the application of evidence-based knowledge to sport-specific scenarios. Insight and skills gained in this course will expand students' abilities in assisting and recommending proper nutritional strategies for athletes during training and competition. Additionally, this discusses strategies to combat common issues athletes may encounter, such as injuries, illness, eating disorders, and gastrointestinal discomfort.
Prerequisite(s): NUTR 546 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 720 - Community Nutrition
Credits: 4
Identification of causes of complex public health nutrition problems (such as food insecurity and escalating obesity rates) and cost-effective community-based interventions required to solve them. Provides skills and tools needed to assess design, and evaluate community nutrition and wellness interventions.
Attributes: Writing Intensive Course
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Equivalent(s): ANSC 610, ANSC 720
Grade Mode: Letter Grading

NUTR 730 - From Seed to Sea: Examining Sustainable Food Systems
Credits: 4
Integration of diverse human and natural system interactions in a seminar-based course to understand issues in food system sustainability. Examination of food system structure and function from coupled human and natural systems perspectives. Current and topical issues of food and agriculture include: exploration of using natural resources to meeting growing population demands; conflicting views on meeting food and nutrition requirements; impacts of increased stress on natural resources; inequities and discrimination in the food system; impact on dietary guidelines on the environment.
Prerequisite(s): NUTR 400 with a minimum grade of D- or NUTR 405 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 740 - Nutrition for Children with Special Needs
Credits: 4
Nutritional assessment and care of children with special needs resulting in feeding difficulties requiring medical nutrition therapy.
Prerequisite(s): NUTR 400 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 750 - Nutritional Biochemistry
Credits: 4
Digestion, absorption, transport, and utilization of food nutrients. Role of macro- and micro-nutrients as substrates and catalysts for metabolic pathways, and the role of these pathways in maintaining human health at the cellular, organ, and whole body levels.
Attributes: Writing Intensive Course
Prerequisite(s): (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-) and BMCB 658 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 751 - Nutritional Biochemistry of Micronutrients
Credits: 4
Investigation of the nutritional and biochemical aspects of micronutrient metabolism. All essential vitamins and minerals, as well as some phytonutrients and quasi-nutrients, are explored in depth. Nutrients are examined for their molecular, cellular, metabolic and biomedical functions, as well as the biochemical and clinical consequences of their deficiency or excess.
Prerequisite(s): NUTR 750 with a minimum grade of D-.
Grade Mode: Letter Grading

NUTR 755 - Concepts and Controversies in Weight Management
Credits: 3
Overview of the risk factors associated with obesity; evidence-based recommendations for assessment and treatment of obesity. Counseling skills important to successful weight management and non-diet approaches are also explored.
Co-requisite: NUTR 758
Prerequisite(s): NUTR 400 with a minimum grade of D- and NUTR 476 with a minimum grade of D- and NUTR 610 with a minimum grade of D-.
Equivalent(s): NUTR 756
Grade Mode: Letter Grading

NUTR 758 - Practicum in Nutrition and Wellness
Credits: 2
Assist clients in making lifestyle and dietary changes over a 10-week period and develop skills in marketing, advertising, counseling, an oral communication related to weight management.
Co-requisite: NUTR 755
Prerequisite(s): NUTR 400 with a minimum grade of D- and NUTR 476 with a minimum grade of D- and NUTR 610 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): NUTR 680
Grade Mode: Letter Grading

NUTR 773 - Clinical Nutrition
Credits: 4
Principles and mechanisms of disease that result in altered nutrient requirements in humans.
Prerequisite(s): NUTR 400 with a minimum grade of D- and BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Equivalent(s): ANSC 773, ANSC 774, NUTR 774
Grade Mode: Letter Grading

NUTR 775 - Practical Applications in Medical Nutrition Therapy
Credits: 4
Combination of lecture and supervised practical experience in medical nutrition therapy in a New England hospital. Emphasizes nutritional counseling, assessment, and instruction of patients with nutrition-related disorders.
Prerequisite(s): NUTR 476 with a minimum grade of D- and ((BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-)) and (BMCB 658 with a minimum grade of D- or BMCB 658A with a minimum grade of D-).
Equivalent(s): ANSC 775
Grade Mode: Letter Grading
Special Fee: Yes

NUTR 780 - Critical Issues in Nutrition
Credits: 4
Critical review and analysis of controversial topics in nutrition; emphasis on developing oral and written communication skills and critical thinking skills.
Attributes: Writing Intensive Course
Prerequisite(s): NUTR 773 with a minimum grade of D-.
Equivalent(s): ANSC 780
Grade Mode: Letter Grading

NUTR 790 - Undergraduate Teaching Experience
Credits: 1-2
Assist graduate teaching assistants or faculty in preparing, presenting, and executing NUTR courses/laboratories.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

NUTR 795 - Investigations
Credits: 1-4
Scholarly research project in an area of the nutritional sciences under the guidance of a faculty adviser.
Equivalent(s): NUTR 795W
Grade Mode: Letter Grading

NUTR 795W - Investigations
Credits: 1-4
Scholarly research project in an area of the nutritional sciences under the guidance of a faculty adviser.
Attributes: Writing Intensive Course
Equivalent(s): NUTR 795
Grade Mode: Letter Grading

NUTR 799H - Honors Senior Thesis
Credits: 1-4
A special project conducted under faculty supervision and resulting in a written honors thesis. Students must initiate discussion of the project with an appropriate faculty member.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

Occupational Therapy (OT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

OT 444 - Living and Doing with Technology
Credits: 4
This course draws upon the knowledge from emerging product design concepts and principals and advocates for inclusiveness of all consumers regardless of their age, abilities, disabilities, and personal affinities. Students will apply critical thinking and hands-on learning to evaluate day-to-day technologies by use of various design criteria, identify usability problems, and design technology solutions. Course work will include readings, interactive activities, discussions, quizzes, and group projects.
Attributes: Environment,TechSociety(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

OT 500 - Behavior and Development of Children
Credits: 4
Introduces the biological, psychosocial, and cultural aspects of human development from birth through adolescence. Emphasizes theories that help explain human behavior; discusses implications of developmental research.
Grade Mode: Letter Grading

OT 501 - Developmental Tasks of Adulthood
Credits: 4
Includes the biological and psychosocial context of development for adults. Developmental tasks relate to the accomplishment of prior tasks, physiological change, socioeconomic status, and psychosocial development.
Grade Mode: Letter Grading

OT 510 - Exploring Occupational Therapy and Occupation
Credits: 4
Occupational therapy is introduced as a human service profession through experiential and academic activities, which illustrate the personal and professional skills required to practice in a variety of settings and roles. Basic concepts of human occupation and the therapeutic use of occupation are explored. Comparisons are made to related human service careers. Students are encouraged to do a personal assessment of their interest and potential for further study of occupational therapy.
Grade Mode: Letter Grading

OT 513 - Stressed Out: The Science and Nature of Human Stress
Credits: 0 or 4
The human stress response system, research investigating the sequelae of stress on health, protective strategies for stress, managing personal stress effectively, and strategizing stress modulation as an intervention technique. Course format includes two hours of weekly lecture/discussion followed by one hour of experiential laboratory in which students research and/or apply new information.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading
Special Fee: Yes

OT 520 - Happy and Healthy at Work: Promoting Wellness, Diversity and Inclusion
Credits: 4
Offers improved understanding and ability to effectively manage a diverse and healthy workforce. Addresses key diversity, inclusion, and wellness issues int he workplace of a general, technical, and social nature with an emphasis on disability and health promotion.
Attributes: Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): HMGT 520, HMGT 598, OT 598
Grade Mode: Letter Grading
Special Fee: Yes

OT 595 - Special Topics
Credits: 4
Coursework on selected topics or special interest subjects that would not normally be covered by other courses in the curriculum.
Grade Mode: Letter Grading
Special Fee: Yes

OT 610 - Occupation, Identity, Disability
Credits: 4
Students develop skills and knowledge for analyzing daily existence, patterns of activity and the occupational choices pursued by humans. Students explore how the self-identity of individuals with and without disability is influenced by participation in everyday activities, and contextual factors: Through reading, reflective writing and collecting personal narratives of individuals with disability, students examine the relations among engagement in daily occupations and the orchestration of routines and social participation with self identity and well-being.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

OT 620 - Medical Terminology
Credits: 2
This course provides an introduction to medical terminology. The origin, roots, prefixes and suffixes of common scientific and medical terms will be examined as well as common abbreviations and terms used in medical records documentation and within the medical, and allied health literature. Content is appropriate for students majoring in the Biological Sciences, Medical Sciences and Allied Health fields.
Equivalent(s): OT 720
Grade Mode: Letter Grading

OT 685 - Psychosocial Disorders and Everyday Life
Credits: 4
The study of abnormal behavior in the context of its effect on everyday function. Provides background information on adult psychosocial disorders commonly seen by service providers in the mental health system. Students learn to observe and describe behavior in terms of functional impairment, diagnostic criteria, and causative factors. General psychosocial and biological treatments are studied. This course or its equivalent is a prerequisite for entry to the professional master's degree program in occupational therapy. Students are expected to bring to this course a basic knowledge of psychosocial aspects of human development.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

OT 695 - Independent Study
Credits: 2-4
In-depth study with faculty supervision.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

OT 710 - OT Practice and Professional Roles
Credits: 3
Students are introduced to foundation knowledge, values and philosophy of occupational therapy practice. Students learn skills to apply professional behaviors and skills required to be ethical practitioners. They learn about various practice settings and systems within which occupational therapists practice to prepare them to begin to make decisions regarding their fieldwork site selections. They are introduced to models of OT practice.
Grade Mode: Letter Grading
Special Fee: Yes

OT 715 - Introduction to Group Process: Theory and Application
Credits: 2
This course provides a theoretical foundation of group process in occupational therapy practice across practice settings. It explores several group theory perspectives and applies them to OT practice considering multiple group models, group leadership concepts, group process, therapeutic use of self, and contexts/environments. Students will learn to articulate core principles of group process and identify the role of occupational therapy practitioners in using groups as an intervention method and/or service delivery model.
Grade Mode: Letter Grading

OT 730 - Assistive Technology for Enhancing Occupational Performance
Credits: 3
This course provides instruction on how occupational therapy practitioners use and apply assistive technology in the context of client evaluation and intervention, to improve quality of life and functional capacities. Students learn and apply clinical reasoning skills related to the selection, procurement, modification and training in the use of assistive technology solutions. OT majors only.
Co-requisite: OT 730L
Grade Mode: Letter Grading

OT 730L - Assistive Technology for Enhancing Occupational Performance Lab
Credits: 1
Co-Requisite Laboratory for OT 730 and OT 830 Assistive Technology for Enhancing Occupational Performance. Students are provided hands-on learning experiences regarding the fabrication, identification, adaptation and training in the use of assistive technology for individuals with functional problems associated with disability or impairment. OT evaluation and interventions related to the application of assistive technology are addressed. OT majors only.
Co-requisite: OT 730
Grade Mode: Credit/Fail Grading
Special Fee: Yes

OT 731 - Introduction to Assistive Technology Principles
Credits: 2
This course presents an overview of the various assistive technology service delivery models, assessment tools, legislation, funding, and assistive technology across the lifespan.
Grade Mode: Letter Grading

OT 733 - Assistive Technology for Physical Access I: Electronic Technologies
Credits: 2
This course focuses on switch and computer access solutions; programming switch interfaces for computers and iPads; alternative mice and keyboards; switch access recipes; iPad mounting solutions; electronic aids for daily living, voice controlled solutions for the phone, computer, and activation of household appliances. Students will learn how to make, modify, and mount various switches an electronic devices. Intensive hands-on AT exploration will be completed on campus or virtual evidence provided will be accepted.
Grade Mode: Letter Grading

OT 734 - Assistive Technology for Physical Access II: Mobility, Seating, and Transportation
Credits: 2
This course focuses on assistive technology solutions to maximize independence at home, in the community, and on the job for individuals who experience physical disabilities. Students will acquire skills in conducting accessibility assessments, Topics explored include wheelchair seating and mobility; ergonomic hand tools, independent living aids; ramps and lifts; vehicle modifications; and modifications for canes, crutches, walkers, and wheelchairs. Intensive hands-on AT exploration will be completed on campus or virtual evidence provided will be accepted.
Grade Mode: Letter Grading

OT 735 - Assistive Technology for Communication and Cognition
Credits: 2
This course focuses on alternative and augmentative communication devices and devices that benefit individuals who experience cognitive impairments. This course explores assistive technology solutions for note taking, devices and apps for self-regulation, organization, and reminders. Students will learn how to conduct cognitive demand analysis for devices and apps to help users select appropriate accommodations and assistive technology solutions. Intensive hands-on AT exploration will be competed on campus or virtual evidence provided will be accepted.
Grade Mode: Letter Grading

OT 736 - Assistive Technology for Vision and Hearing
Credits: 2
This course focuses on assistive technology for blind and low vision; deaf and hard of hearing; and deaf/blindness. Students will use an assortment of magnification devices; amplification systems; and assistive listening devices as well as learn how to create a variety of approaches to accommodate for vision and hearing impairments. Intensive hands-on AT exploration will be completed on campus or virtual evidence provided will be accepted.
Grade Mode: Letter Grading

OT 741 - Human Occupation
Credits: 4
This course introduces students to the broad concept of occupation by exploring ways people acquire skills for occupational performance. Students develop an understanding of the relations between health and occupation, disability and occupation, and explore how humans find meaning in their lives through occupational engagement.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

OT 744 - Fieldwork and Professionalism - Level 1
Credits: 1
This course prepares students to enter level 1 fieldwork with confidence and working knowledge of expectations for a full-time two-week level 1 fieldwork experience.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

OT 745 - Administration and Management for Occupational Therapy Practice
Credits: 4
This course aims to increase the student's understanding of systems of practice, and to business fundamentals associated with occupational therapy service delivery. Specific topics covered include and analysis of practice settings, reimbursement, supervision of professional and non-professional staff, program evaluation methods, ethics, OT management practices, marketing, health policy including medicare, Human Rights and Education Legislation, and the impact of policy decisions for the delivery of OT services. OT majors only.
Grade Mode: Letter Grading

OT 746 - Fieldwork & Prof Level II
Credits: 1
This course is designed to deepen understanding of professionalism needed for success on Level II fieldwork. We will explore role changes that accompany leaving the academic world and entering the larger realm of professional practice. Students analyze factors that contribute to successful professional development and ethical practice. Students use the results of their analyses to plan their individual transition to fieldwork and entry-level practice.
Prerequisite(s): OT 744 with a minimum grade of D- and OT 792 with a minimum grade of D-.
Grade Mode: Letter Grading

OT 750 - Neuro-Occupation: The Relationship Between Occupation and the Brain
Credits: 3
The course explores brain development, neuroplasticity and occupation across the lifespan. Following a contextual review of the neuroanatomy and physiology, the students will explore the mind-body relationship across multiple domains of occupational therapy practice. There are four primary content areas: Applied neurology, nature with nurture: occupational engagement and the development of the brain, the brain, occupation and behavior, and neuroplasticity as the basis for improving motor behavior.
Prerequisite(s): OT 500 with a minimum grade of D- and OT 501 with a minimum grade of D- and KIN 707 with a minimum grade of D- and PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

OT 751 - Mind Body Systems/Neurologically Based Function and Dysfunction
Credits: 3
This course applies an occupational science perspective to study disease, illness, medical conditions, and impairments to human body structures and functions across the lifespan. A self-directed method is used to examine the perceptual, cognitive, biopsychosocial basis of these disorders. A basic overview of human mind-body systems is provided with an emphasis on pathology, the recognition of symptoms, their causes and the occupational implications of the disorders. The emphasis is on how disease and impairments in body systems, and physical and mental functioning interact with the human condition, the uniqueness of individuals, social determinants of health (SDOH), and the environments within which people live to impact occupational performance, one's overall health, well-being, and life quality.
Grade Mode: Letter Grading

OT 752 - Human Movement and Environmental Effects on Everyday Occupations
Credits: 3
Integrates the student's prerequisite knowledge of occupation. Develops skills required for interpretation of biomechanical analysis for creating successful occupational performance for individuals with varied musculoskeletal, cardiac and respiratory dysfunction. Integration of the occupational therapy clinical reasoning process and the use of occupations as a therapeutic mechanism for change are emphasized. The analysis of environment as it relates to human movement and participation in desired occupations is explored.
Co-requisite: OT 752L
Grade Mode: Letter Grading
Special Fee: Yes

OT 752L - Human Movement Lab
Credits: 1
Human Movement Lab.
Co-requisite: OT 752
Grade Mode: Credit/Fail Grading
Special Fee: Yes

OT 760 - Psychosocial Evaluation and Intervention
Credits: 3
Examines the evaluation of psychosocial and psycho-emotional areas of occupational performance and the planning and implementation of occupation-based interventions across domains of practice and client populations. Course addresses developing a client's occupational profile, narrative reasoning and therapeutic use of self, behavioral change, illness representation, and adjustment to chronic disorders. A specific focus of the course is evaluation of and intervention for clients' presenting with mental health disorders. Open to OT majors only.
Co-requisite: OT 760L, OT 760R
Grade Mode: Letter Grading

OT 760L - Psychosocial Evaluation and Intervention Lab
Credits: 1
This is the co-requisite lab for OT 760. Lab provides hands-on experiences regarding the evaluation and intervention of psychological and psycho-emotional areas of occupational performance. Course focuses on the evaluation and intervention for clients presenting with mental health disorders and also addresses narrative reasoning, therapeutic use of self, behavioral change, illness representation and adjustment to chronic disorders.
Co-requisite: OT 760
Grade Mode: Credit/Fail Grading
Special Fee: Yes

OT 760R - Psychosocial Evaluation & Intervention Recitation
Credits: 0
Psychosocial Evaluation and Intervention Recitation provides additional hands-on and experiential learning opportunities in an established community program for all students enrolled in OT 760. This recitation allows students the opportunity to develop the skills needed to work in mental/behavioral health settings.
Co-requisite: OT 760
Grade Mode: Credit/Fail Grading

OT 762 - Occupational Therapy Evaluation and Intervention for Children
Credits: 3
In this course, students will develop entry-level practice skills for conducting occupational therapy (OT) evaluations and interventions for children. Organized around the OT Practice Framework, students will learn how to collaborate with families and other professionals, develop clinical observation skills, and learn frequently used standardized assessments. Additionally, students will use primary OT frames of reference to plan and implement interventions. Students will apply their understanding of typical and atypical child development, and extend their clinical reasoning skills in order to develop competencies for providing OT services for children and with a variety of conditions across common practice settings.
Co-requisite: OT 762L, OT 762R
Grade Mode: Letter Grading
Special Fee: Yes

OT 762L - Occupational Therapy Evaluation and Intervention for Children Lab
Credits: 1
The co-requisite labs provide hands-on experiences to compliment lecture material from OT 762, and to provide opportunities for the practical application of knowledge.
Co-requisite: OT 762
Grade Mode: Credit/Fail Grading
Special Fee: Yes

OT 762R - Occupational Therapy Evaluation and Intervention for Children Recitation
Credits: 0
The recitation provides hands-on experiences to compliment lecture material from OT 762 and OT 762L, and to provide opportunities for the practical application of knowledge.
Grade Mode: Credit/Fail Grading

OT 763 - Occupational Therapy Evaluation and Intervention for Adults
Credits: 3
Students will develop entry-level practice skills related to the synthesis of evaluation, intervention planning and goal writing. The student will be introduced to a variety of standardized evaluation tools and implement OT interventions within various contexts of practice through case studies. Specific intervention techniques based on accepted frames of reference and research evidence that helps clients engage successfully in the daily occupations will be emphasized.
Co-requisite: OT 763L
Prerequisite(s): OT 751 with a minimum grade of B-.
Grade Mode: Letter Grading
Special Fee: Yes

OT 763L - Occupational Therapy Evaluation and Intervention for Adults Lab
Credits: 1
This lab is a co-requisite course to accompany OT 763 Occupational Therapy Evaluation and Intervention for Adult Dysfunction. The lab course provides opportunity for the students to engage in experiential learning and application of principles and techniques learned in the lecture course.
Co-requisite: OT 763
Grade Mode: Credit/Fail Grading

OT 763R - Occupational Therapy Evaluation and Intervention for Adults Recitation
Credits: 0
The recitation provides hands-on experiences to compliment lecture material from OT 763 and OT 763L, and to provide opportunities for the practical application of knowledge.
Co-requisite: OT 763, OT 763L
Grade Mode: Credit/Fail Grading

OT 771 - Enabling Participation in Community Groups
Credits: 2
Students will learn about a community organization partnership, the people served by the organization, and principles of conducting therapeutic groups within the organization. Emphasis of content includes group process, clinical documentation, intervention planning and OT services with adults with cognitive impairments.
Co-requisite: OT 771L
Grade Mode: Letter Grading
Special Fee: Yes

OT 771L - Enabling Participation in Community Groups Lab
Credits: 2
Students will work in an organization, learn about the people served by this organization and conduct therapeutic groups. This lab serves as a Level I Fieldwork placement.
Co-requisite: OT 771
Grade Mode: Credit/Fail Grading
Special Fee: Yes

OT 781 - Introduction to Research and Evidence-Based Practice
Credits: 3
This course introduces students to basic principles of scientific inquiry that contribute to OT evaluation and intervention evidence base. Students will explore quantitative, qualitative and mixed research methods and will learn the fundamental steps in conducting research such as formulating research questions and identifying appropriate research designs, instruments for measurement and outcomes. Students will have hands-on experience in identifying a research topic, reviewing the literature, retrieving, reading and synthesizing research articles. Prereq: Statistics.
Prerequisite(s): HHS 540 with a minimum grade of D- or PSYC 402 with a minimum grade of D- or SOC 402 with a minimum grade of D-.
Grade Mode: Letter Grading

OT 782 - Research Methods and Application
Credits: 3
The course provides students an in depth understanding of quantitative, qualitative, and mixed methods designs. The students will learn the necessary knowledge and skills required to critically appraise research evidence. Emphasis will be given to various analytical approaches used to examine qualitative/quantitative evidence, such as understanding differences between experimental and quasi-experimental study designs. Students will work in teams to identify a research topic, review and appraise pertinent evidence, identify and describe gaps in existing knowledge. Students will further use this information to develop a research proposal that addresses the identified gaps.
Prerequisite(s): OT 781 with a minimum grade of D-.
Grade Mode: Letter Grading

OT 789 - Using iPads to Support Children with Disabilities
Credits: 3
The iPad is changing the way we teach and learn. This technology embraces Universal design principles (UDL) and enables children with significant disabilities to learn in ways never thought possible five years ago. It is a tool for delivering multimedia content and embraces the use of Multi modal learning. This technology finally levels the playing field to support all students including students with disabilities.
Grade Mode: Letter Grading

OT 791 - Senior Honors Thesis
Credits: 1-4
Completion of a research project relevant to the study of occupation or occupational therapy, under the direction of a faculty mentor. Dissemination of findings is expected, as a written thesis paper and an oral presentation. This course is required for graduation with departmental honors in the occupational therapy major. A multiple-semester sequence of 1-4 credits is permitted.
Attributes: Honors course
Prerequisite(s): OT 781 with a minimum grade of D- and OT 782 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

OT 792 - Level I Fieldwork
Credits: 1
Provides occupational therapy students an opportunity to experience occupational therapy in a clinical setting. Students attend a seminar prior to beginning their placement. The Level I placement is scheduled between the fall and spring semesters of the senior year. During fieldwork, students observe an occupational therapist as well as participate in the planning and implementing of the occupational therapy assessment or intervention process for a client.
Grade Mode: Credit/Fail Grading

OT 795 - Special Topics
Credits: 1-4
Formal courses given on selected topics or special interest subjects. Work may be directed in one of the following areas: A) Administration; B) Clinical Education; C) Pediatrics; D) Physical Disabilities; E) Mental Health; F) Gerontology/Geriatrics; G) School-based Practice, and others.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

Ocean Engineering (OE)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

OE 400 - Ocean Engineering Seminar
Credits: 1
A seminar based course considering contemporary topics involved in ocean exploration. Faculty and guest speakers will describe thematic ocean engineering subareas through weekly presentations. The presentations will provide examples of engineering applications and ocean exploration. Class participation credit can be earned through oral discussions, presentation of contemporary OE topics, or hands on projects.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading

OE 401 - Ocean Engineering Seminar
Credits: 1
A seminar based course considering contemporary topics involved in ocean exploration. Faculty and guest speakers will describe thematic ocean engineering subareas through weekly presentations. The presentations will provide examples of engineering applications and ocean exploration. Class participation credit can be earned through oral discussions, presentation of contemporary OE topics, or hands on projects.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading

OE 490 - Introduction to Ocean Engineering
Credits: 4
Survey of engineering applications in the ocean environment. Topics vary an include hydrodynamics, waves, tides, underwater sound, instrumentation, marine geomechanics, and naval architecture. Includes guest lectures by faculty members from the Engineering departments.
Co-requisite: PHYS 407
Grade Mode: Letter Grading

OE 610 - Ocean Instrumentation Lab
Credits: 4
An investigation of the discrete and integrated electronics typically used in the design and implementation of ocean instruments. Topics include both passive and active analog electronic elements typically used for signal conditioning of common oceanographic sensors (e.g., thermistors, pressure sensors, acoustic transducers); A/D and D/A conversion, sensor sampling criteria and rules, with examples from contemporary ocean instruments; embedded micro-controller/microcomputer modules for autonomous or remote sensing in ocean environments; inter-instrument communications methods typically used in ocean instruments (e.g., serial and network communications). Laboratory time will be used to develop practical experience in specification, design, development and testing of various ocean instrument components based on the material presented.
Prerequisite(s): MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D- and ECE 537 with a minimum grade of D- and IAM 550 with a minimum grade of D-.
Grade Mode: Letter Grading

OE 677 - Seamanship and Marine Weather for Ocean Engineers and Scientists
Credits: 2
A survey of basic principles of seamanship and marine weather intended for ocean engineers and ocean scientists. Reviews ship and vessel nomenclature, shipboard safety, techniques for equipment handling and instrument deployment, common shipboard evolutions associated with scientific cruises, navigation principles, and marine weather phenomena and products. Includes field trips and practical applications.
Grade Mode: Credit/Fail Grading

OE 717 - Marine Robotics and Applications
Credits: 3
The purpose of this course is to cover (in lecture and lab format) the broad spectrum of marine vehicles and applications , as well as what is involved in designing and building robotic vehicles for specific missions. Course topics include: marine applications, sensors for marine environments, vehicle subsystems, ocean and open water environment, dynamic modeling and control, and design/fabrication/testing. Various invited speakers (both scientists and engineers) provide learning modules on various marine robotic related topics.
Co-requisite: ME 670
Equivalent(s): ME 717
Grade Mode: Letter Grading

OE 720 - Design of Recirculating Aquaculture Systems
Credits: 3
The purpose of this course is to provide a practical engineering approach to the design of land-based, recirculating aquaculture systems. The course includes an introductory background on the state of our global seafood industries and the need for sustainable production approaches in fresh, brackish, and saltwater environments with various types of systems presently in use. With a focus on recirculating aquaculture systems, this course will include topics such as environmental chemistry and water quality, stoichiometric analyses, nitrification, the potential of hydrogen, temperature, dissolved oxygen, carbon dioxide, the carbonate cycle and alkalinity. A systems design approach will then be covered to include developing plans for assessing biomass growth, system oxygen consumption and total nitrogen and carbon dioxide production. System design will consider processes associated with tank hydrodynamics, waste settling, solids removal, biofiltration, UV treatment, temperature control, aeration, degassing, pumps, and piping systems. Mass balance approaches through control volumes will be examined. A hands-on, student led system design project will be required and examined using engineering economic principles such as the time value of money, inflation, taxes, and internal rates of return. Use of computer tools will be necessary.
Prerequisite(s): (MATH 426 with a minimum grade of D- or MATH 424B with a minimum grade of D-) and (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D- or (PHYS 401 with a minimum grade of D- and PHYS 402 with a minimum grade of D-)) and (CHEM 405 with a minimum grade of D- or (CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D-)).
Grade Mode: Letter Grading

OE 753 - Ocean Hydrodynamics
Credits: 3
Fundamental concepts of fluid mechanics as applied to the ocean, continuity, Euler and Navier-Stokes equations, Bernoulli equation, stream function, potential function, moment theorem, turbulence and boundary layers are developed with ocean applications.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CEE 650 with a minimum grade of D- or ME 608 with a minimum grade of D-).
Grade Mode: Letter Grading

OE 754 - Ocean Waves and Tides
Credits: 4
Small amplitude, linear wave theory, standing and propagating waves, wave energy, refraction, diffraction, transformation in shallow water, statistics of random seas, spectral energy density, generating eave time series using the random phase methods forces on structures, Froude scaling of wave tank experiments, nonlinear effects. Description of tides as long waves, equilibrium tide, mathematical modeling including friction, nonlinear effects, and Coriolis forces, tidal analysis, the Great Bay Estuarine System as a case study.
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-.
Grade Mode: Letter Grading

OE 757 - Coastal Engineering and Processes
Credits: 3
Introduces small amplitude and finite amplitude wave theories. Wave forecasting by significant wave method and wave spectrum method. Coastal processes and shoreline protection. Wave forces and wave structure interaction. Introduction to mathematical and physical modeling.
Prerequisite(s): CEE 650 with a minimum grade of D- or ME 608 with a minimum grade of D-.
Grade Mode: Letter Grading

OE 758 - Design of Ocean Structures
Credits: 3
The foundational information necessary for the design of ocean structures. Topics include analysis and design of floating body, fixed body and moored line hydrostatics; wave forces on small and large bodies; dynamic response of floating bodies; and pile and gravity foundation geotechnics.
Prerequisite(s): (ME 526 with a minimum grade of D- or CEE 502 with a minimum grade of D-) and (ME 608 with a minimum grade of D- or CEE 650 with a minimum grade of D-) and OE 754 with a minimum grade of D- and MATH 527 with a minimum grade of D-.
Grade Mode: Letter Grading

OE 765 - Underwater Acoustics
Credits: 3
An introduction to acoustics in the ocean. Fundamental acoustic concepts including the simple harmonic oscillator, waves on strings, and the acoustic wave equation; the sonar equation; sound generation and reception by underwater acoustic transducers and arrays; basics of sound propagation; reflection and scattering from ocean boundaries. Spring semester offered every year; satisfies core course requirement in Ocean Engineering.
Prerequisite(s): (PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-) and MATH 527 with a minimum grade of D-.
Grade Mode: Letter Grading

OE 770 - Geodesy for Ocean Mapping
Credits: 3
Ocean mapping requires precise positioning and navigation. For this we need to precisely know Earth's shape, gravity field, and orientation in space. Data used for this purpose include satellite-based positioning, gravity measurements, and ground surveys. Reference frames can then be created allowing the integration of geometric observations for the creation of mapping products.
Prerequisite(s): (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-) and (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 401 with a minimum grade of D-).
Grade Mode: Letter Grading

OE 771 - Positioning for Ocean Mapping
Credits: 4
Ocean mapping necessitates accurate positioning and navigation, which, in turn, rely on a comprehensive grasp of measurement methodologies. This course will comprehensively examine various positioning techniques, including spirit leveling, total stations, Global Navigation Satellite Systems (GNSS), inertial navigation systems (INS), and underwater acoustic positioning systems. Emphasis will be placed on the observational methodologies associated with each technology, along with the propagation of observation uncertainty.
Prerequisite(s): (ESCI 770 with a minimum grade of D- or OE 770 with a minimum grade of D-) and (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-) and (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 401 with a minimum grade of D-).
Equivalent(s): ESCI 771
Grade Mode: Letter Grading

OE 774 - Integrated Seabed Mapping Systems
Credits: 4
Overview of typical applications that involve mapping the sediment-water interface in the ocean and adjacent waters. Emphasis on defining the task-specific resolution and accuracy requirements. Fundamentals of acoustics relevant to seabed mapping. Progression through typical configurations involving single beam, sidescan, phase differing and multibeam systems. Integration of asynchronous 3D position, orientation and sound speed measurements with sonar-relative acoustic travel time and angles. Analysis of impact of offsets, mis-alignments and latency in all integrated sensors.
Grade Mode: Letter Grading

OE 795 - Special Topics
Credits: 2-4
New or specialized courses and/or independent study. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

OE 796 - Independent Study
Credits: 1-4
Independent study for exceptional students. Individual reading, writing, or laboratory work carried out under the tutelage of a faculty member. May be used as a technical elective for the ocean engineering major if taken for 3-4 credits.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

OE 797 - Honors Seminar
Credits: 1
Course enrichment and/or additional independent study in subject matter pertaining to 600- or 700-level OE courses.
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 3 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

Operations Management (OPS) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

OPS 600 - Operations Management
Credits: 4
This course analyzes complex operating situations faced by technical and business managers. Students learn the role of the operations manager in the enterprise as well as demonstrate an understanding of the scope of an operations strategy. Students develop operations strategies to meet organizational requirements while analyzing operations processes. The course also offers students an opportunity to apply knowledge that contributes to the operations success of organizations.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): MGMT 627G, OPS 627G
Grade Mode: Letter Grading

OPS 605 - Quality Management
Credits: 4
This course provides students with understanding and knowledge of the philosophies and methods used to improve effectiveness and efficiency of organizational processes for businesses. Topics may include statistical methods for quality improvement in manufacturing and service operations. Emphasis is given to both the technical and managerial issues in understanding and implementing quality as a component for success in today's global business environment.
Prerequisite(s): (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-) and (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-).
Equivalent(s): MGMT 619G, OPS 619G
Grade Mode: Letter Grading

OPS 610 - Sustainable Facility Operations
Credits: 4
This course provides an overview of the role of an operations manager in facility and venue management. Sustainable facility management includes maintenance, cleaning/housekeeping, engineering, heating, ventilation, and air conditioning (HVAC), utility usage management, budgets, security, crisis management/emergency management, and production. This course covers the general systems and processes related to the planning, programming, design, construction, and occupancy of facilities, including long-range, strategic and tactical planning, the relationship between facility planning and business planning, organization of sites, and buildings.
Prerequisite(s): DAT 510 with a minimum grade of D- or DATA 510G with a minimum grade of D-.
Equivalent(s): OPS 610G
Grade Mode: Letter Grading

OPS 720 - Fundamentals of LEAN Process Improvement
Credits: 4
This course promotes an understanding of the theoretical and practical aspects of LEAN processes, and how LEAN thinking can be applied in a variety of contexts and applications. Students will be exposed to a range of LEAN tools that prepare learners to actively participate in LEAN processes and events in support of the development of a LEAN organizational culture. Developing capacity in facilitation and change management, students will prepare to become LEAN practitioners, learning to guide a group through problem solving circumstances, while considering the challenges of organizational change.
Attributes: Writing Intensive Course
Equivalent(s): OPS 628G
Grade Mode: Letter Grading

Outdoor Education (OUT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

OUT 444A - Risk and the Human Experience
Credits: 4
Explores the construct of risk in two phases: 1) knowledge building, focusing on the historical development of risk and its current manifestations in contemporary society; and 2) knowledge application, which focuses on applying conceptions of risk to various case study examples. The second phase of the course employs a problem-based learning approach with four distinct modules that ask students to apply, experience, and evaluate risk in a variety of contexts. Each module includes: a) a case study description, b) an experiential exercise, and c) a collaborative debriefing of the experience and reflective application to broader societal issues.
Attributes: Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): KIN 444A
Grade Mode: Letter Grading

OUT 515 - History of Outdoor Pursuits in North America
Credits: 4
Voluntary pursuits in the outdoors have defined American culture since the early 17th century. Over the past 400 years, activities in outdoor recreation an education have reflected Americans' spiritual aspirations, imperial ambitions, social concerns, and demographic changes. This course will give students the opportunity to learn how Americans' experiences in the outdoors have influenced and been influenced by major historical developments of the 17th, 18th, 19th and 20th, and early 21st centuries. This course is cross-listed with RMP 515.
Attributes: Historical Perspectives(Disc)
Equivalent(s): KIN 515, RMP 515
Grade Mode: Letter Grading

OUT 539 - Artificial Climbing Wall Management
Credits: 2
The primary purpose of this course is an introduction to the procedures, methods, and techniques of artificial climbing wall management. Within the scope of this course, students will be introduced to operations, supervision, equipment and facility use/maintenance, risk management strategies, route setting, individual an group programming/facilitation/ teaching, technical skills and rescues/emergency procedures. A variety of teaching styles will be used to familiarize students with each topic area. Optional certification fee.
Equivalent(s): KIN 539
Grade Mode: Letter Grading
Special Fee: Yes

OUT 540 - Top Rope Rock Climbing
Credits: 4
Provides students with an understanding of the equipment, techniques, and procedures necessary for the setup and management top rope rock climbing and rappelling sites, including advanced rescue skills. Students also develop basic climbing movement techniques and skills, an understanding of the pedagogical techniques used in climbing, and the requisite knowledge/skill development to conduct safe top rope experiences in multiple settings. The format of this course is a combination of demonstration/lecture and "hands-on" learning with the emphasis upon student interaction and practical skill development.
Equivalent(s): KIN 540
Grade Mode: Letter Grading
Special Fee: Yes

OUT 541 - Technical Operation of Aerial Adventure Courses
Credits: 2
Advanced technical skills course will provide students with the skills necessary to manage high ropes courses/canopy tours and ziplines in instructional and commercial environments. Focuses on the development of technical skills and judgment associated with facilitating/guiding clients at height. Topics include equipment management, traditional and advanced belay techniques, self-belayed climbing, gear rescues, and risk management. Course occurs at the UNH Browne Center.
Grade Mode: Letter Grading
Special Fee: Yes

OUT 542 - Sea Kayaking
Credits: 2
An introduction to the technical, teaching, and leadership skills required to assist with kayaking programs on protected waterways. Emphasis is on individual kayaking skills, self- and group-assisted rescues, safety and group management. Students will be introduced to marine environments including ocean travel and navigation. Travel to off-campus sites required.
Grade Mode: Letter Grading
Special Fee: Yes

OUT 545 - High Angle Rescue
Credits: 2
Provides students with the skills necessary to perform self and group rescues in a variety of steep terrain and high angle environments. Students also gain the basic skills necessary for the implementation of self- and partner-rescues while in a technical climbing environment. The skills learned from this class will adapt readily to climber rescue, crevasse rescue, big wall rescue, cave rescue, and vertical urban rescue.
Equivalent(s): KIN 545
Grade Mode: Letter Grading
Special Fee: Yes

OUT 546 - Whitewater Canoeing
Credits: 3
Introduces white water canoeing skills. Students gain a basic understanding of the equipment, techniques, and procedures to conduct canoeing activities in flat water, moving water, and white water environments. Emphasizes development of individual paddling skills, safe and conscientious paddling, and group management on moving water and white water.
Equivalent(s): KIN 546
Grade Mode: Letter Grading
Special Fee: Yes

OUT 547 - Lead Rock Climbing
Credits: 3
Advanced climbing course designed to provide students with a structured environment to transition from top rope rock climbing or sport climbing to multi-pitch traditional lead climbing. Focuses on the development of the technical skills and judgment associated with leading in a multi-pitch environment. Specific topics include use of artificial protection, belay anchor construction, multi-pitch rappelling, knots, rope/belay station management, climbing technique, and multi-pitch leading considerations.
Equivalent(s): KIN 547
Grade Mode: Letter Grading
Special Fee: Yes

OUT 549 - Wilderness Navigation
Credits: 4
Introduces the methods and techniques of wilderness navigation. Topics include map interpretation, compass use, global positioning systems, and other navigation methods. A variety of teaching styles are used to familiarize the students with each topic area, and occur in both classroom and wilderness settings.
Equivalent(s): KIN 549
Grade Mode: Letter Grading
Special Fee: Yes

OUT 551 - Adventure Programming: Backcountry Based Experience
Credits: 4
Introduces the leadership of land-based backpacking programs. Students develop an understanding of backpacking equipment, trip planning and organization, instruction of basic camping skills, implementation of safety procedures and group management on backpacking trips.
Equivalent(s): KIN 551
Grade Mode: Letter Grading
Special Fee: Yes

OUT 552 - Adventure Programming: Water Based Experiences
Credits: 4
Introduces the leadership of canoe expeditions. Students develop an understanding of necessary canoeing equipment, trip planning and organization, instruction of basic canoeing strokes, implementation of safety procedures, and group management on canoe expeditions.
Equivalent(s): KIN 552
Grade Mode: Letter Grading
Special Fee: Yes

OUT 681 - Foundations of Adventure Education
Credits: 4
Through experiential activities, personal reflections, readings, and group and independent projects, students will gain an understanding of models and theories underpinning adventure education. The course includes content such as adventure education history, outdoor leadership, personal growth, group development, risk taking and risk management, educational philosophy, and learning theory. Students learn to apply theoretical principles to practice in a variety of settings.
Attributes: Writing Intensive Course
Equivalent(s): KIN 681
Grade Mode: Letter Grading

OUT 682 - Experiential Teaching & Leadership
Credits: 2
This class provides an orientation to experiential learning, teaching, and leadership in outdoor recreation, education, and instructional settings. Students develop and implement program designs and lesson plans, gaining practice with teaching methods, activity facilitation, leadership styles, and risk management considerations in outdoor recreation programs.
Prerequisite(s): RMP 411 (may be taken concurrently) with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading
Special Fee: Yes

OUT 686 - Wilderness Emergency Medical Care
Credits: 4
Standards of practice for professional providing emergency medical care in remote areas. Consideration of prolonged transport times, severe environments, and the use of portable and improvised equipment. Topics include wilderness trauma and illness, search and rescue operations, and environmental emergencies.
Equivalent(s): KIN 686
Grade Mode: Letter Grading
Special Fee: Yes

OUT 693 - Teaching Assistantship
Credits: 2
Students serve as teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching and administrative duties.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

Paul College Business & Economics (PAUL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PAUL 405 - FIRE: First-Year Innovation and Research Experience I
Credits: 1
FIRE (First Year Innovation and Research Experience) is designed to support a successful transition to college life, both personally and academically. Mentored by upperclassmen, this course assists students in navigating campus resources, developing academic success strategies, and working collaboratively with their peers. The course encourages goal setting, innovation, research skills, and builds the foundation to be successful in the university and at Paul College through a year-long group project that extends into PAUL 406. PAUL 405 and 406 are required for all first-year students in Paul College.
Grade Mode: Credit/Fail Grading

PAUL 406 - First-Year Innovation and Research Experience II
Credits: 1
Building on the foundation established in PAUL 405: FIRE I, this course guides students through the culmination of their year-long research projects with a focus on professional development, business plan creation, and effective presentation skills. Students refine their research into actionable strategies, incorporate sustainability and ethical considerations, and prepare polished business plans for real-world application. The course emphasizes professional communication, teamwork, and critical thinking, culminating in the FIRE Undergraduate Research Conference where projects are evaluated by alumni, faculty, and staff. PAUL 406 provides students with the skills, experience, and confidence to translate research into impact.
Grade Mode: Credit/Fail Grading

PAUL 407 - Paul Scholars Seminar
Credits: 1
Weekly seminar curriculum is designed to guide academically talented students to achieve their full potential, enhancing their overall educational experience at UNH. The course will expose the Paul Scholars to the high-impact opportunities available at UNH (study abroad, study away, research, etc.) and guide students in evaluating current and desired skillsets leading to the identification of experiences to close their skills gap. Students are responsible for attending and participating in all class sessions and other activities as assigned throughout the course.
Grade Mode: Credit/Fail Grading

PAUL 408 - Inclusive Leadership Fellows Seminar
Credits: 1
This course is designed to empower the Inclusive Leadership Fellows through mentorship, skill development, and exposure to diverse perspectives. The aim is to enhance leadership skills, foster a sense of belonging, and provide opportunities for networking and professional growth.
Grade Mode: Credit/Fail Grading

PAUL 409 - Paul Academic Recovery Course
Credits: 1
PARC is a semester-long course designed for first-year Paul College students who have received an academic notice. The course focuses on helping students regain good academic standing by developing essential academic skills and strategies. Using the foundational pillars of preparation, action, reflection, and connection, students will learn to manage their time effectively, utilize resources, and foster a growth mindset. By the end of the course, students will be equipped with the tools needed for continued success at Paul College and beyond.
Grade Mode: Credit/Fail Grading

PAUL 450 - Personal Finance
Credits: 4
This course will provide an overview of the personal financial planning process, including the establishment of goals and objectives, forecasting of lifetime income and expenditures, evaluation of investment options, money management, and understanding of all the many ways a person can achieve their financial goals through various strategies. The course covers the concepts, theories and analytical methods used in professional personal financial planning. Students analyze the effects of inflation, changing interest rates and taxation (high level taxation) on their investment decisions. The course is designed to expose students to all of the directly applicable mathematical formulas involved in the finance world that we utilize on a daily basis.
Attributes: Quantitative Reasoning(Disc)
Grade Mode: Letter Grading

PAUL 505 - FOCUS: Finding Opportunities, Careers, and University Success
Credits: 2
This course supports the success of second-year students at Paul College by helping them build a strong academic and professional foundation. Through online assignments, peer-led workshops, program events, and campus partnerships, students will explore academic pathways, prioritize personal and professional development opportunities, and connect their interests to future career opportunities. Emphasizing both individual growth and community engagement, the FOCUS Program fosters an inclusive environment that elevates student well-being, university success, and career readiness. PAUL 505 is required for all second-year students at Paul College.
Grade Mode: Credit/Fail Grading

PAUL 520 - Topics I
Credits: 1-4
Special Topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

PAUL 620 - Topics
Credits: 4
Special topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

PAUL 626 - Supervised Student Teaching
Credits: 2-4
Participants are expected to perform such functions as leading discussion groups, assisting faculty in undergraduate courses that they have successfully completed. For juniors and seniors with 3.0 or better cumulative GPA. No more than four credits may be earned for their role as an instructional assistant in any one course. Permission of instructor and undergraduate programs office required.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Credit/Fail Grading

PAUL 660 - BiP-Social Intelligence Topics
Credits: 2
Business in Practice: Social Intelligence develops students' abilities to navigate complex social relationships and environments. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course details.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

PAUL 670 - BiP-Analytical Intelligence Topics
Credits: 2
Business in Practice: Analytical Intelligence develops students' abilities to analyze ideas, solve problems and make decisions. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded n the section or additional course details.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

PAUL 680 - BiP-Competitive & Professional Intelligence Topics
Credits: 2
Business in Practice: Competitive Intelligence develops students' abilities to gather, analyze, and distribute information and ideas about products, customers, competitors or the external environment. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course description.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

PAUL 690 - BiP-Professional Intelligence Topics
Credits: 2
Business in Practice: Professional Intelligence develops students' abilities to achieve professional success. An emphasis is placed on experiential learning and instruction from business professionals. Rotating topic courses are offered to meet the needs of the ever-changing business environment. Cr/F, unless noted as letter graded in the section or additional course details.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

PAUL 705 - Supervised Student Teaching: Peer Advisor
Credits: 0-2
Training course for peer advisors to prepare for leading student FIRE Teams. For Paul College juniors and seniors with 3.0 or better cumulative GPA. Permission from Undergraduate Programs Office required.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Credit/Fail Grading

PAUL 720 - Topics II
Credits: 4
Special topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

PAUL 725 - Independent Study
Credits: 1-4
Individual research projects that are student designed. Initial sponsorship of a Paul College faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

PAUL 725W - Independent Study
Credits: 1-4
Individual research projects that are student designed. Initial sponsorship of Paul College faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

PAUL 790 - Honors/The Workshop
Credits: 2
Open to students enrolled in the Paul Honors Program, this workshop is specifically designed for honors students starting the program in their junior year. It is designed to enable students to share the work they are doing for the honors designated course. The workshop will also include guest speakers and other programming of interest to Paul Honors Students.
Attributes: Honors course
Equivalent(s): ADMN 790
Grade Mode: Credit/Fail Grading

PAUL 792 - Honors Seminar
Credits: 2
This course is designed to broaden perspectives, creating a socially conscious mindset of the impact of business activity. Students will explore a variety of topics with a focus that is open to various global issues, the future of business, or learn about faculty research interests in a relaxed environment. This seminar will allow students to see the cross-disciplinary nature of business practices and research.
Attributes: Honors course
Equivalent(s): ADMN 792
Grade Mode: Credit/Fail Grading

PAUL 794 - Honors/The Research Process
Credits: 2
Open to students enrolled in the Paul Honors Program, this course is designed to help students formulate a thesis topic, learn the skills needed to write a thesis and serve as a mechanism for pairing students with a faculty thesis advisor. In addition, students will be expected to attend several research seminars.
Attributes: Honors course
Equivalent(s): ADMN 794
Grade Mode: Credit/Fail Grading

PAUL 795 - Internship
Credits: 1-4
The internship is designed to provide practical experience in a major related field (organizations may include: business, industry, health, public service, non-profit), Supervision to be provided by a qualified individual in the organization, with student consultation by a faculty sponsor. Written report required. Initial sponsorship of an Paul College faculty member must be obtained followed by approval of PAUL advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.
Repeat Rule: May be repeated for a maximum of 12 credits. May be repeated up to 4 times.
Equivalent(s): ADMN 795
Grade Mode: Credit/Fail Grading

Philosophy (PHIL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PHIL 401 - Introduction to Philosophy
Credits: 4
This course gives a basic grounding in Philosophy. We explore enduring questions that we have all grappled with: Does God exist? Do we have free will? How can we lead fulfilling lives? No background in philosophy is needed, only an open and inquiring mind.
Attributes: Humanities(Disc)
Equivalent(s): PHIL 401H, PHIL 401W
Grade Mode: Letter Grading

PHIL 405 - Critical Thinking
Credits: 4
One of the most salient features of our culture is that there is so much BS. Most people are overconfident about their ability to avoid being taken in by it. This course aims to sharpen your BS detection skills and help you to diagnose errors in reasoning. You will learn how to check your (often unreliable) gut reactions, improve your critical thinking skills, and identify specious arguments across a range of topics.
Attributes: Humanities(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

PHIL 410 - Happiness, Well-Being , and a Good Life
Credits: 4
A sustained exploration of happiness, well-being, and a good life. Are they the same? If not, do any include the others, and can they conflict? What sorts of things might contribute to or detract from happiness, well-being, and having a good life? Comparing work on these topics in philosophy and psychology will be a key theme in the course.
Attributes: Humanities(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

PHIL 412 - Beginning Logic
Credits: 4
Principles of reasoning and development of symbolic techniques for evaluating arguments.
Attributes: Quantitative Reasoning(Disc)
Equivalent(s): PHIL 412H
Grade Mode: Letter Grading

PHIL 417 - God, Religion, and the Meaning of Life
Credits: 4
An introductory philosophical exploration of the relationship between reason and religious experience, particularly as this relationship has developed in and in response to, the great world religions.
Attributes: Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

PHIL 419 - Race, Gender and Social Justice
Credits: 4
We are in the midst of a social reckoning in the United States. Black Lives Matter and #Me Too have turned a spotlight on the murder of black people by police officers and the sexual assault of women. Public health events reveal racialized health care inequities and unfair domestic and care work for women. This course provides philosophical tools that help us to understand our social world, its history, and to consider how to contribute solutions.
Attributes: Humanities(Disc); Inquiry (Discovery)
Equivalent(s): PHIL 419W
Grade Mode: Letter Grading

PHIL 420 - Introduction to Philosophy of Law and Justice
Credits: 4
Introduction to debates regarding how ethical values relate to law and justice. Is justice universal or relative? Are laws making progress toward justice? How should we balance liberty and equality? Should freedom of speech be an absolute right? Does the state have too much power, or too little? Are laws applied fairly by police and the justice system? Why do we punish? What is the relationship between wealth, race, and justice? Discussion.
Attributes: Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

PHIL 421 - Philosophy and the Arts
Credits: 4
Contemporary philosophic concerns and perspectives as reflected in one or more of the arts (literature, theatre, film, music, plastic art).
Attributes: FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): PHIL 421H
Grade Mode: Letter Grading

PHIL 424 - The Future of Humanity: Science, Technology, and Society
Credits: 4
Consideration of the impacts of science and technology on humanity from a philosophical perspective. Topics often include genetic engineering, automated labor, advanced weaponry, artificial intelligence, social media and data extraction, space exploration, alien contact, virtual realities, transhumanism, and the future of humanity as an interplanetary species.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): PHIL 424H
Grade Mode: Letter Grading

PHIL 424H - Honors/The Future of Humanity: Science, Technology, and Society
Credits: 4
Consideration of the impacts of science and technology on humanity from a philosophical perspective. Topics often include genetic engineering, automated labor, advanced weaponry, artificial intelligence, social media and data extraction, space exploration, alien contact, virtual realities, transhumanism, and the future of humanity as an interplanetary species.
Attributes: Environment,TechSociety(Disc); Honors course
Equivalent(s): PHIL 424
Grade Mode: Letter Grading

PHIL 430 - Ethics and Society
Credits: 4
Critical study of principles and arguments advanced in discussion of current moral and social issues. Possible topics: violence, rules of warfare, sexual morality, human rights, punishment, abortion.
Attributes: Humanities(Disc)
Equivalent(s): PHIL 430H, PHIL 430W
Grade Mode: Letter Grading

PHIL 430W - Ethics and Society
Credits: 4
Critical study of principles and arguments advanced in discussion of current moral and social issues. Possible topics: violence, rules of warfare, sexual morality, human rights, punishment, abortion.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): PHIL 430, PHIL 430H
Grade Mode: Letter Grading

PHIL 431 - Business Ethics
Credits: 4
An interdisciplinary study of ethical issues in business. This course, taught collaboratively by business school and philosophy department faculty, applies philosophical perspectives, critical thinking, and analysis to ethical decision-making and implementation in the workplace as well as the broader context of other businesses, customers, society, and the environment.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

PHIL 432 - Ethics Bowl: Developing and Discussing Arguments about Current Events
Credits: 4
The Association for Practical and Professional Ethics releases approximately fourteen case studies each year for the annual regional Intercollegiate Ethics Bowl, and students in this course will learn to develop, defend, and discuss their views on these cases. Students will learn to apply various ethical theories to these nuanced problems in current events. Depending on interest and experience, some students will have the opportunity to represent UNH in the regional Ethics Bowl competition—and potentially advance to the national tournament. Students do not have to commit to being on the UNH Ethics Bowl team to take this class, and being in the class does not guarantee a spot on the team. Class meetings will often involve scrimmages on the cases to practice ethical reasoning and oral communication skills. Because the cases change annually, the course can be repeated for credit.
Repeat Rule: May be repeated for a maximum of 16 credits. May be repeated up to 4 times.
Grade Mode: Letter Grading

PHIL 435 - Human Nature and Evolution
Credits: 4
Philosophy of biology and the evolutionary process. Readings of scientists and philosophers' commentary on scientists. Examination of the differences between scientific debate and philosophic debate. Philosophical study of scientific theory stressing humans' place in the natural world and the ethical implication of humans as natural beings in the evolutionary process.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): PHIL 435H
Grade Mode: Letter Grading

PHIL 436 - Social and Political Philosophy
Credits: 4
Examines social and political thought that may include texts from ancient through contemporary times, addressing topics such as natural rights, revolution, law, freedom, justice, power. Questions may include: What is a community, and how are individuals related to communities? Can any particular form of government be morally justified, and if so, what kind of government? Can anarchism work? Is there something wrong with a society in which there is private ownership of property? What is oppressive? What is freedom, and are we free? What roles should different forms of power play in a society? Could and should there be a genderless society? Is ethnic diversity valuable?.
Attributes: Humanities(Disc); Inquiry (Discovery)
Equivalent(s): PHIL 436H, PHIL 436W, PHIL 437
Grade Mode: Letter Grading

PHIL 436H - Honors/Social and Political Philosophy
Credits: 4
Examines social and political thought that may include texts from ancient through contemporary times, addressing topics such as natural rights, revolution, law, freedom, justice, power. Questions may include: What is a community, and how are individuals related to communities? Can any particular form of government be morally justified, and if so, what kind of government? Can anarchism work? Is there something wrong with a society in which there is private ownership of property? What is oppressive? What is freedom, and are we free? What roles should different forms of power play in a society? Could and should there be a genderless society? Is ethnic diversity valuable?.
Attributes: Honors course; Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): PHIL 436, PHIL 436W, PHIL 437
Grade Mode: Letter Grading

PHIL 436W - Social and Political Philosophy
Credits: 4
Examines social and political thought that may include texts from ancient through contemporary times, addressing topics such as natural rights, revolution, law, freedom, justice, power. Questions may include: What is a community, and how are individuals related to communities? Can any particular form of government be morally justified, and if so, what kind of government? Can anarchism work? Is there something wrong with a society in which there is private ownership of property? What is oppressive? What is freedom, and are we free? What roles should different forms of power play in a society? Could and should there be a genderless society? Is ethnic diversity valuable?.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): PHIL 436, PHIL 436H, PHIL 437
Grade Mode: Letter Grading

PHIL 440A - Honors/Who Are You? Personal Identity and Humanity
Credits: 4
What makes you you? Are you the same person over time? What does it mean to be a person? How is being a person related to being a human being? This course is part of an Honors Symposium on the nature of personhood and humanity. We will explore a number of philosophical questions related to personal identity over time, the social construction of the self, and the relationship between being a member of homo sapiens and being a person.
Attributes: Honors course; Humanities(Disc)
Grade Mode: Letter Grading

PHIL 440B - Honors/Who's Human Now?
Credits: 4
When we call someone human or a person, what do we mean, and what are we trying to do? How has the concept of personhood expanded or contracted to include more or fewer beings and why? Are fetuses persons? Are corporations persons? Are chimps persons? Who counts as a person now, and who will count as a person in the future? How and why are human persons subject to dehumanization? Readings and texts will draw from historical sources and contemporary philosophy. No credit if credit earned for PHIL 780.
Attributes: Honors course; Humanities(Disc)
Grade Mode: Letter Grading

PHIL 440C - Honors/The Copernican Lens: Finding a Place for Humanity
Credits: 4
How do humans fit into the cosmos? Once, we thought we were central players; most human societies believed they played a starring role, second only to the gods. Developments in the sciences have led modern humanity to a far more modest view: our existence is full of contingency and without cosmic significance. Humanity's self-conception is now recognized to be deeply culturally conditioned: is an objective view of humanity's place even possible?.
Attributes: Honors course; World Cultures(Discovery); Writing Intensive Course
Grade Mode: Letter Grading

PHIL 447 - A.I., Robots, and People
Credits: 4
The historical origins of the science of computation. The implications of the nature of information-processing for understanding the mind-body relation. Examines the possible social, economic, and educational consequences of the computer revolution.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): PHIL 447H
Grade Mode: Letter Grading

PHIL 450 - Environmental Ethics
Credits: 4
Thoughtful people cannot help escape considering hard questions about our relationship to the natural world and what it means for the future of life on earth. In this course we think philosophically about these crucial concerns. We try to answer questions about our responsibilities to the environment and to future generations.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): PHIL 450H
Grade Mode: Letter Grading

PHIL 495 - Tutorial Reading
Credits: 1-4
Basic introductory reading under faculty direction on topics of philosophical importance. Books offered for tutorial reading may be in any area the instructor chooses or on independent study basis.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

PHIL 500 - Workshop
Credits: 4
Introduces methods of studying philosophical texts. Emphasizes reading philosophical texts and arguments for comprehension, and on writing philosophically with accuracy and clarity. Open to PHIL majors (PHIL minors may enroll if they receive permission).
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PHIL 510 - Philosophy and Feminism
Credits: 4
Focuses on philosophical issues in feminism primarily through the work of historical and contemporary philosophers. Topics include the question of the nature of women, feminism as an ethical and political theory, feminism as an exploration and transformation of the self, feminism as a philosophical methodology, and the institutions of marriage and motherhood.
Attributes: Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

PHIL 520 - Introduction to Eastern Philosophy
Credits: 4
Major Eastern traditions of philosophy. Concentration on Indian, Chinese, and Japanese systems may vary from semester to semester.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

PHIL 525 - Existentialism
Credits: 4
Readings from existential philosophy and literature. Selections may be drawn from the works of Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, de Beauvoir, Buber, Bultman, Merleau-Ponty, Tillich, Kafka, and others.
Attributes: Humanities(Disc); Inquiry (Discovery)
Equivalent(s): PHIL 525H
Grade Mode: Letter Grading

PHIL 530 - Ethics
Credits: 4
Critical examination of the development of philosophical thinking regarding human values, rights, and duties.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PHIL 531 - Topics in Professional and Business Ethics
Credits: 4
Content variable. Examines a topic or topics related to ethical issues in professional and business situations. Some variations of the course will look in-depth at a specific issue, such as consumer behavior, medical ethics, discrimination, or the theory of the film. Alternatively, the course may examine, from one or more ethical perspectives, a wide range of issues related to business activity, workplace culture, regulation, and economic practices.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

PHIL 560 - Philosophy Through Fiction
Credits: 4
Philosophical implications of representative literary works, read in tandem with philosophical literature. The content will vary. The literary works explored may be drawn from ancient times through modern times. For examples, the classic Greek tragedy "Antigone" might be explored for its implications regarding moral, political, and feminist philosophy, or the philosophical implications of an anti-utopian contemporary work like "Brave New World" might be explored, or short stories drawn from science fiction and other speculative fiction might be used to explore the possibility of time travel or of machines with mental lives.
Attributes: Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

PHIL 565 - Philosophy Through Film
Credits: 4
Philosophical exploration of film as a medium for developing philosophical ideas and for stimulating philosophical thinking about various issues reflected in film, from traditional philosophical issues to the pressing social and cultural issues of our time. The content will vary. Philosophical texts are read in tandem with screenings of a range of movies from Hollywood blockbusters and art house films to films made for TV. Philosophical issues such as the nature of consciousness, appearance and reality, God and evil, the good life, and time and memory might be explored. Film might also be used to examine representations of race and gender or violence in society; and the power of movies to influence society might be explored through documentaries and propaganda films. Required evening film screenings in addition to regular class meetings.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PHIL 570 - Ancient Philosophy
Credits: 4
Development of Western philosophy from its beginnings in Greece to the Roman period, with particular emphasis on the thought of Plato and Aristotle. Attention is paid to the historical context and the development of ideas in culture.
Attributes: Humanities(Disc)
Equivalent(s): PHIL 570H
Grade Mode: Letter Grading

PHIL 580 - Modern Philosophy from Descartes to Kant
Credits: 4
The birth and development of distinctively modern philosophy in the thought of such creative minds as Galileo, Descartes, Hobbes, Leibniz, Spinoza, Locke, Berkeley, Hume, Rousseau, Reid, Kant, and others.
Grade Mode: Letter Grading

PHIL 620 - 20th Century European Philosophy
Credits: 4
Major figures or philosophical movements such as phenomenology, existentialism, critical social theory, and post-modernism. Content will vary. Consult Time and Room Schedule for topics.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

PHIL 630 - Neuroscience and Philosophy
Credits: 4
This course has a double focus. It investigates theories concerning the nature of the mind/brain relation, especially in light of recent work in the neurosciences. It also considers the particular presuppositions of and methodological challenges endemic to the neurosciences, along with the relations neuroscience bears to neighboring disciplines.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PHIL 631 - Topics in the Philosophy of Science
Credits: 4
Many people think that philosophy and science are miles apart. But philosophy of science is a dynamic field. It asks questions like: are scientific explanations always true and what's the difference between science and other ways of knowing? It explores issues such as the relation of science to common sense, the relation of theory to observation, the claim to objectivity in the natural and social sciences, and the role of values in scientific research.
Attributes: Writing Intensive Course
Equivalent(s): PHIL 725
Grade Mode: Letter Grading

PHIL 660 - Law, Medicine, and Ethics
Credits: 4
Critical examination of the diverse legal and moral issues facing the profession of health care. Variable topics may include: duty to provide care; nature of informed consent to treatment; problems of allocating limited health-care resources (e.g., withdrawal of life-support systems, quality-of-life decisions, etc.); patient's right to confidentiality. Problems relating to involuntary preventive care (e.g., involuntary sterilization, psycho-surgery, etc.)
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PHIL 780 - Special Topics
Credits: 4
Advanced study of special topics: a problem, figure, or movement in the history of philosophy, or selected issues, thinkers, or developments in contemporary philosophy. Repeatable with permission.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to 4 times.
Grade Mode: Letter Grading

PHIL 795 - Independent Study
Credits: 1-8
For students who are adequately prepared to do independent, advanced philosophical work; extensive reading and writing. Before registering, students must formulate a project and secure the consent of a department member who will supervise the work. Conferences and/or written work as required by the supervisor.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

PHIL 798 - Senior Thesis
Credits: 4
Two-course sequence (798, then 799) open only to senior philosophy majors in the University Honors Program, the philosophy department honors-in-major program, or by special permission from the department. All senior thesis candidates must have a proposal approved in the spring of their junior year and a thesis adviser assigned by the chair of the department before registering for 798. Students must orally defend their theses before the department. (See department guidelines for further details).
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PHIL 799 - Senior Thesis
Credits: 4
Two-course sequence (798, then 799) open only to senior philosophy majors in the University Honors Program, the philosophy department honors-in-major program, or by special permission from the department. All senior thesis candidates must have a proposal approved in the spring of their junior year and a thesis adviser assigned by the chair of the department before registering for 799. Students must orally defend their theses before the department. (See department guidelines for further details).
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

Physics (PHYS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PHYS 400 - Physics Seminar I
Credits: 1
An informal reading and discussion course to introduce students to the general culture of physics, including career possibilities, historical and philosophical aspects of physics, current research at UNH and elsewhere, and physics in the news. Topics vary based on interests of the class. Students in their first year as physics majors (either as freshmen or transfers) are strongly encouraged to take this class.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading

PHYS 401 - Introduction to Physics I
Credits: 0 or 4
Broad survey of classical physics including Newtonian mechanics and fluids. Designed to enable students to appreciate the role of physics in society and technology. Emphasizes the fundamental laws of nature on which all science is based, with applied examples of interest to Life Science. Knowledge of high school algebra, geometry, and trigonometry essential. This course has a lab component. Students must also register for a particular lab. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 402 - Introduction to Physics II
Credits: 0 or 4
Broad survey of classical physics including Thermal properties, Oscillations, Waves, Electricity & Magnetism and Optics. Designed to enable students to appreciate the role of physics in society and technology. Emphasizes the fundamental laws of nature on which all science is based, with applied examples of interest to Life Science. Knowledge of high school algebra, geometry, and trigonometry essential. This course has a lab component. Students must also register for a particular lab. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Prerequisite(s): PHYS 401 with a minimum grade of D- or PHYS 407 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 405 - Intro to Modern Astronomy
Credits: 4
Starting with a survey of the night sky and the daily motions of the stars and planets, this course surveys our current understanding of the Universe. It traces the development of the tools of the modern astronomer and how those tools have led to out theories of the solar system, the life cycle of stars, the formation of elements, the formation of galaxies and the evolution of the universe. Students explore in depth an astronomical topic of their choice through a term paper. The course includes direct experience with astronomical techniques and concepts through the use of the UNH Observatory and Small Radio Telescope, and a visit to a planetarium. Recommended for liberal arts and beginning science students. Knowledge of high school algebra is assumed. Note that this is the same course as PHYS 406, except for the substitution of a term paper instead of a lab. Cannot be taken for credit if credit received for PHYS 406.
Attributes: Physical Science(Discovery)
Equivalent(s): PHYS 406
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 406 - Introduction to Modern Astronomy
Credits: 0 or 4
Starting with a survey of the night sky and the daily motions of the stars and planets, this course surveys our current understanding of the Universe. It traces the development of the tools of the modern astronomer and how those tools have led to our theories of the solar system, the life cycle of stars, the formation of elements, the formation of galaxies and the evolution of the universe. The course includes direct experience with astronomical techniques and concepts through the use of the UNH Observatory and Small Radio Telescope, and a visit to a planetarium. Recommended for liberal arts and beginning science students. Knowledge of high school algebra is assumed. Note that this is the same course as PHYS 405, except for the substitution of a lab instead of a term paper. Cannot be taken for credit if credit received for PHYS 405. This course has a lab component. Students must also register for a particular lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Equivalent(s): PHYS 406H
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 407 - General Physics I
Credits: 0 or 4
Introductory course emphasizing motion, forces, energy, momentum, rotation, and oscillations. Recommended for the student specializing in science and engineering. This version is the traditional format with three lectures, one recitation (problem solving section), and one lab each week. Students in this version must also register for a particular recitation and lab. Prereq: thorough knowledge of algebra, geometry, and trigonometry. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Prerequisite(s): MATH 425 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): PHYS 407H, PHYS 407J, PHYS 407S
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 407H - Honors/General Physics I
Credits: 0 or 4
Introductory course emphasizing motion, forces, energy, momentum, rotation, and oscillations. Recommended for the student specializing in science and engineering. The honors version covers the same material as the traditional lecture course, but with three two-hour classes per week,most of which is spent working on activities in groups (rather than lecture). Students in the Honors section must be co-enrolled in MATH 425H so that strong connections can be made between math and physics. 407H students work in groups in every class meeting. Students in this version do not register for a recitation or lab, since these activities are integrated into the regular class meetings. Prereq: thorough knowledge of algebra, geometry, and trigonometry. Lab.
Co-requisite: MATH 425H
Attributes: Discovery Lab Course; Honors course; Physical Science(Discovery)
Equivalent(s): PHYS 407, PHYS 407S
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 407S - General Physics I Studio
Credits: 4
Introductory course emphasizing motion, forces, energy, momentum, rotation, and oscillations. Recommended for the student specializing in science and engineering. The Studio version covers the same material as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). Students in this version do not register for a recitation or lab since these activities are integrated into the regular class meetings. Prereq: thorough knowledge of algebra, geometry, and trigonometry. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Prerequisite(s): MATH 425 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): PHYS 407, PHYS 407H
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 408 - General Physics II
Credits: 0 or 4
Introductory course emphasizing waves, sound, heat, electricity and magnetism. Recommended for students specializing in science and engineering. This version is the traditional format with three lectures, one recitation (problem solving section), and one lab each week. Students in this version must also register for a particular recitation and lab. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (MATH 426 (may be taken concurrently) with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): PHYS 408H, PHYS 408S
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 408H - Honors/General Physics II
Credits: 0 or 4
Introductory course emphasizing electricity and magnetism. Other topics may include fluids, waves, and thermodynamics. Recommended for students specializing in science and engineering. The honors version covers the same material as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). Students in the Honors section are encouraged to co-enrolled in MATH 426H so that strong connections can be made between math and physics. 408H students work in groups in every class meeting. This course has a lab component, but students in this version do not register for a recitation or lab, since these activities are integrated into the regular class meetings. Lab.
Co-requisite: INCO 426H
Attributes: Discovery Lab Course; Honors course; Physical Science(Discovery)
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (MATH 426 with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): PHYS 408, PHYS 408S
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 408S - General Physics II Studio
Credits: 4
Introductory course emphasizing electricity and magnetism. Other topics may include fluids, waves, and thermodynamics. Recommended for students specializing in science and engineering. The Studio version covers the same materials as the traditional lecture course, but with three two-hour classes per week, most of which is spent working on activities in groups (rather than lecture). This course has a lab component, but students in this version do not register for a recitation or lab, since these activities are integrated into the regular class meetings. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (MATH 426 (may be taken concurrently) with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): PHYS 408, PHYS 408H
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 409 - Investigating Physics
Credits: 4
Elementary physics course where students develop a conceptual understanding of topics such as the solar system, phases of the moon, seasons, electrical circuits, electromagnets, light and color, sound and simple machines. The course is based on hands-on-activities, small groups, and discussions. This course is intended for students with little or no previous experience in physics who do not intend to take any other physics course. Cannot be taken for credit if credit received for PHYS 401, 402, 407 or 408. Not open to Physics majors.
Attributes: Discovery Lab Course; Physical Science(Discovery); Inquiry (Discovery)
Equivalent(s): PHYS 401, PHYS 402, PHYS 407, PHYS 408
Grade Mode: Letter Grading

PHYS 440A - Hon/Searching for Our Place in the Universe: Foundation and Limits of Certainty in Physical Science
Credits: 4
We explore models of the universe and our place in it. We discuss the foundation of ideas about motion on Earth and in space, as well as the history of modern physics and astronomy, which have changed how we understand space and time. We consider the sources and limitations of human knowledge concerning the origin of the universe, the mystery of the origin of life and evidence that our description of reality is incomplete.
Attributes: Honors course; Physical Science(Discovery); Writing Intensive Course
Grade Mode: Letter Grading

PHYS 505 - General Physics III
Credits: 3
Electromagnetic waves, geometrical and physical optics, relativity, atomic physics, elementary quantum mechanics, molecular physics, and nuclear physics.
Prerequisite(s): PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 506 - General Physics III Laboratory
Credits: 1
Structured laboratory experience in optics and modern physics. Lab.
Co-requisite: PHYS 505
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 508 - Thermodynamics and Statistical Mechanics
Credits: 4
Classical and statistical approach to thermodynamics, kinetic theory.
Prerequisite(s): PHYS 505 (may be taken concurrently) with a minimum grade of D- and (MATH 525 (may be taken concurrently) with a minimum grade of D- or MATH 527 (may be taken concurrently) with a minimum grade of D- or MATH 528 (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading

PHYS 601 - Computational Physics Recitation I
Credits: 1
This course bridges students' computer science class and their physics classes by applying computational tools to basic physics problems. Students will write, check, and document two physics codes. This course focuses on solving differential equations. The course will support students as they work on computational assignments from their core physics courses. Corequisite: PHYS 505 or PHYS 508.
Prerequisite(s): CS 410 with a minimum grade of D- or IAM 550 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading

PHYS 602 - Computational Physics Recitation II
Credits: 1
This course bridges students' computer science class and their physics classes by applying computational tools to basic physics problems. Students will write, check, and document two physics codes. This course focuses on data processing. The course will support students as they work on computational assignments from their core physics courses. Corequisite: PHYS 605 or PHYS 615.
Prerequisite(s): (CS 410 with a minimum grade of D- or IAM 550 with a minimum grade of D-) and PHYS 601 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading

PHYS 605 - Experimental Physics I
Credits: 5
Circuit design with passive and active elements including transistors and operational amplifiers; electrical measurements for experimental physics; digital electronics, microprocessors, and interfacing techniques. Lab.
Prerequisite(s): (PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-) and (MATH 525 with a minimum grade of D- or MATH 527 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

PHYS 615 - Classical Mechanics and Mathematical Physics I
Credits: 4
Analytical treatment of classical mechanics covering the dynamics of particles and rigid bodies at an intermediate level. Advanced mathematical analysis (complex numbers, differential equations, Fourier series, multiple integrals) are reviewed or introduced as needed to analyze physical situations.
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (IAM 550 with a minimum grade of D- or CS 410P with a minimum grade of D-) and ((MATH 527 (may be taken concurrently) with a minimum grade of D- and MATH 528 (may be taken concurrently) with a minimum grade of D-) or (MATH 525 (may be taken concurrently) with a minimum grade of D- and MATH 526 (may be taken concurrently) with a minimum grade of D-)).
Grade Mode: Letter Grading

PHYS 616 - Classical Mechanics and Mathematical Physics II
Credits: 4
Analytical treatment of classical mechanics covering the dynamics of particles and rigid bodies, at an intermediate level. Advanced mathematical analysis (complex numbers, differential equations, Fourier series, multiple integrals) are reviewed or introduced as needed to analyze physical situations.
Prerequisite(s): PHYS 505 with a minimum grade of D- and PHYS 615 with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 701 - Quantum Mechanics I: Foundations, Quantum Information, and Quantum Computing
Credits: 4
Physics 701 provides a modern introduction to quantum mechanics, quantum information science, and quantum computing. The first two thirds of the course cover the foundations of quantum mechanics, including the Stern-Gerlach experiment, spin-1/2 particles, Dirac (bra-ket) notation, Hilbert space, the Schrödinger equation, operators, eigenvalues, eigenvectors, symmetries, entanglement, and Bell's theorem. The final third covers topics in quantum information science, including quantum computational algorithms, entropy, open systems, and error-correcting codes for quantum computation and communication. Quantum Mechanics I (this course) and Quantum Mechanics II (Physics 702) together provide a solid foundation for graduate study in physics.
Prerequisite(s): PHYS 616 (may be taken concurrently) with a minimum grade of D- and (MATH 525 with a minimum grade of D- or MATH 528 with a minimum grade of D-) and (MATH 526 with a minimum grade of D- or MATH 545 with a minimum grade of D- or MATH 645 with a minimum grade of D-).
Grade Mode: Letter Grading

PHYS 702 - Quantum Mechanics II: Applications to Continuous Systems
Credits: 4
Physics 702 is the second course (after Physics 701) in a two-course sequence on quantum mechanics. Physics 702 covers continuous systems, wave functions, wave packets, the dynamics of a free particle, spin and angular momentum, ladder systems, many-particle systems, stationary states in 1D and 3D, the hydrogen wave function, perturbation theory, the hyper-fine structure of the hydrogen atom, and scattering. Quantum Mechanics I (Physics 701) and Quantum Mechanics 2 (this course) together provide a solid foundation for graduate study in physics.
Prerequisite(s): PHYS 616 with a minimum grade of D- and PHYS 701 with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 703 - Electricity and Magnetism I
Credits: 4
Foundation of electromagnetic theory; electrostatics, dielectric theory, electromagnetism, magnetic properties of matter, alternating currents, Maxwell's field theory.
Prerequisite(s): (PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-) and PHYS 615 with a minimum grade of D- and ((MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-) or (MATH 525 with a minimum grade of D- and MATH 526 with a minimum grade of D-)).
Grade Mode: Letter Grading

PHYS 704 - Electricity and Magnetism II
Credits: 4
Foundation of electromagnetic theory; electrostatics, dielectric theory, electromagnetism, magnetic properties of matter, alternating currents, Maxwell's field theory.
Prerequisite(s): PHYS 703 with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 705 - Experimental Physics II
Credits: 4
Modern physics experiments and special project problems assigned to individual students. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): PHYS 605 with a minimum grade of D- and PHYS 505 with a minimum grade of D- and (CS 410P with a minimum grade of D- or IAM 550 with a minimum grade of D-).
Grade Mode: Letter Grading

PHYS 708 - Optics
Credits: 4
Geometrical optics, electromagnetic theory of light, interference, diffraction, polarization, related phenomena and nonlinear optics. Lab.
Prerequisite(s): PHYS 505 with a minimum grade of D- and PHYS 615 with a minimum grade of D- and PHYS 616 with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 710 - Astrophysics I
Credits: 4
A comprehensive review of modern astrophysics. Topics covered include the celestial sphere, celestial mechanics, the tools of the modern astronomer (including different types of telescopes for studying the electromagnetic radiation from space), stellar spectra, stellar atmospheres, stellar interiors, the formation of stars, stellar evolution, and the stellar graveyard (white dwarfs, neutron stars, and black holes).
Prerequisite(s): ((MATH 525 with a minimum grade of D- and MATH 526 with a minimum grade of D-) or (MATH 527 with a minimum grade of D- and MATH 528 with a minimum grade of D-)) and PHYS 505 with a minimum grade of D- and PHYS 506 with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 711 - Astrophysics II
Credits: 4
A continuation of the comprehensive review of modern astrophysics. Topics covered include the degenerate stellar remnants (white dwarfs, neutron stars, black holes), the interstellar medium, the Milky Way Galaxy, the nature of galaxies, the evolution of galaxies, the structure of the Uni verse, active galaxies, cosmology, and the early Universe.
Prerequisite(s): PHYS 710 with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 712 - Space Plasma Physics
Credits: 4
Introduces space plasma physics, including solar physics, heliospheric physics, magnetospheric physics, and ionospheric physics. An overview of the basic phenomena and processes (e.g., particle acceleration and transport, shock formation, magnetic structures and reconnection, wave propagation, wave-particle interactions, instabilities), theoretical techniques (e.g., single-particle orbits, kinetic and fluid descriptions), and experimental techniques. (Alternate years only.)
Prerequisite(s): (PHYS 408 with a minimum grade of D- or PHYS 408S with a minimum grade of D- or PHYS 408H with a minimum grade of D-) and PHYS 508 with a minimum grade of D- and PHYS 616 with a minimum grade of D-.
Equivalent(s): EOS 712
Grade Mode: Letter Grading

PHYS 718 - Quantum Materials
Credits: 4
Theory underlying the behavior of solid state and quantum materials. Crystal symmetries, electronic, thermal, and optical properties of metals and semiconductors; selected topics in modern quantum materials and quantum applications.
Prerequisite(s): PHYS 508 with a minimum grade of D- and PHYS 701 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 720 - Nuclear Physics
Credits: 4
Nuclear phenomenology, reactions, models, radiation, interaction of radiation with matter; accelerators; properties and interactions of elementary particles; symmetries and symmetry breaking; standard model.
Prerequisite(s): PHYS 702 (may be taken concurrently) with a minimum grade of D- and PHYS 703 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

PHYS 764 - General Relativity and Cosmology
Credits: 4
Review of special relativity, and the motivation for considering gravity in terms of curvature of space time. Introduction to Riemannian geometry, general relativity and Einstein's equations. Application of general relativity in the study of black holes, gravitational waves, cosmology, as well as recent results on inflation and quantum gravity. (Alternate years only.)
Prerequisite(s): PHYS 505 with a minimum grade of D- and PHYS 508 with a minimum grade of D- and PHYS 616 with a minimum grade of D- and (CS 410P with a minimum grade of D- or IAM 550 with a minimum grade of D-) and (MATH 645 with a minimum grade of D- or MATH 545 with a minimum grade of D- or MATH 525 with a minimum grade of D-).
Grade Mode: Letter Grading

PHYS 795 - Independent Study
Credits: 1-8
Individual project under direction of a faculty adviser.
Grade Mode: Letter Grading

PHYS 797 - Senior Design Project
Credits: 2
Four credits of this course is the required Senior Design Project for BSEP majors and fulfills their capstone requirement; the course is taken for two credits in each of the last two semesters before graduation. Students work under the direction of a faculty sponsor on the design aspect of a specific project, which might include trade studies, design reviews, cost-benefit analyses, etc. all leading to an optimal design solution. Acceptable designs can include detailed hardware aspects of a system or sub-system, numerical modeling of a system, or paper studies of a system concept. Students are required to submit a final report and to present their work at a public forum. Restricted to BSEP seniors.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

PHYS 798 - Senior Project
Credits: 2-4
Students complete an independent project and submit a written report. Students can choose from a range of projects, including (but not limited to)a research or numerical project, and extensive literature review on an advanced physics topic, building an apparatus, or developing a new or existing experiment in Physics 705. A student intending to take Physics 798 must arrange to have a faculty advisor for the project and should work with this advisor to develop a one-page project proposal. The student must submit this proposal to the Physics Undergraduate Curriculum Committee by the tenth week of the semester preceding the semester in which the student takes Physics 798. This course satisfies the capstone requirement in Physics.
Grade Mode: Letter Grading

PHYS 799 - Thesis
Credits: 4
Students work under the direction of a faculty sponsor to plan and carry out independent research resulting in a written thesis. Required for honors-in-major.
Attributes: Writing Intensive Course
Prerequisite(s): PHYS 795 with a minimum grade of D- or INCO 790 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Political Science (POL) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

POL 450 - American Government and Politics
Credits: 4
This course introduces the learner to the historical background, the institutions, and the political processes within the United States national government. The focus is on process, but the appropriate attention is given to the institutions of government in which the political processes occur, such as Congress, the courts, and local governments. The course employs a systems model of politics to identify how politics works in the United States. Both process and institutions are studied from a systems perspective so that critical functions and decision points can be identified, described, and assessed. Specific attention will be paid to the legislative process, elections, and enacting change.
Attributes: HumanBehavSocial Sys (Gen Ed); Writing Intensive Course
Equivalent(s): POL 550G
Grade Mode: Letter Grading

POL 554 - Law and Society
Credits: 4
This course is designed to provide an interdisciplinary approach to study of the law, incorporating history, philosophy, economics, political science, sociology, and psychology. Students are introduced to law in society by focusing on social and legal theory analysis from a critical perspective. Beginning with a historical overview of the law, learners explore the variety of forces that shape the law as well as its impact on society at large. In addition, the course provides a basic introduction to legal reasoning and the law in the context of society. Landmark United States Supreme Court criminal and civil cases will also be examined.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): POL 554G
Grade Mode: Letter Grading

POL 690 - The US in World Affairs
Credits: 4
This course examines U.S. foreign relations since WWII with a particular focus on the late twentieth century through modern day. Students will explore patterns of U.S. policy in a volatile environment marked by fundamental changes to the international system of states since the collapse of the Soviet Union. Students trace the transformation in international relations that has led to the creation of world trade and globalized institutions, the proliferation of regional ethnic and religious conflicts, and most challenging of all, the emergence of transnational terrorism. Students will have the opportunity to analyze the international system and relevant political theories, develop competence in defining both transient and enduring national interests, and build confidence in appraising the policy responses of national actors to those challenges.
Attributes: HumanBehavSocial Sys (Gen Ed); Historical Perspectives(Disc); Writing Intensive Course
Equivalent(s): POL 600G
Grade Mode: Letter Grading

Political Science (POLT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

POLT 401 - Politics and Society
Credits: 4
Introduces the nature of politics and political institutions. Emphasizes political behavior and continuing issues of modern politics, such as power, authority, legitimacy, freedom, and order.
Attributes: Humanities(Disc)
Equivalent(s): POLT 401H
Grade Mode: Letter Grading

POLT 402 - American Politics and Government
Credits: 4
Foundational course to help students understand the institutions and actors of American politics and government, the decision-making process of government, and the political considerations that drive American government.
Attributes: Social Science (Discovery)
Equivalent(s): POLT 402H
Mutual Exclusion: No credit for students who have taken PS 402.
Grade Mode: Letter Grading

POLT 403 - United States in World Affairs
Credits: 4
Introduces students to key concepts, actors, and events in U.S. foreign policy. After examining the early foundations of American foreign policy, this course concentrates on the United States' international engagement from the Cold War to the present. Students develop the analytical skills they need to form their own opinions on contemporary issues in U.S. foreign policy, and defend these opinions articulately based on a solid knowledge of historic and current events.
Attributes: Historical Perspectives(Disc)
Equivalent(s): POLT 403H, POLT 403W
Grade Mode: Letter Grading

POLT 404 - Introduction to Comparative Politics
Credits: 4
What are states and how do they develop over time? What are the differences between democracies and authoritarian states and why do countries transition between these forms? How does identity affect politics within countries? Why does violence erupt in some countries? These are some of the questions addressed by this course. This course provides students with an introduction to the field of comparative politics, which focuses on understanding politics within countries. Through case studies, theoretical frameworks, and cross-national analyses, students will explore how political institutions, social structures, and conflicts shape governance and public life around the world. Students will also be introduced to common methods of data collection and analysis in political science, allowing them to understand and engage with academic research.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

POLT 440A - Honors/Global Justice
Credits: 4
The course exposes students to different understandings of global justice and the institutions and approaches used to address genocide and mass human suffering. Students explore several modern conflicts and different cultural understandings of these conflicts and views on justice. The class also examines the political dynamics of international and domestic institutions, power politics, and international activism. Students also examine the globalization of accountability and post-conflict transitions from violence to peace.
Attributes: Honors course; World Cultures(Discovery)
Grade Mode: Letter Grading

POLT 444 - Politics and Policy in a Warming World
Credits: 4
Uses the issue of climate change to explore the relationships between scientific and technical research and debate, policymaking at the international and domestic (U.S.) levels, and public understanding and interpretation of complex technical issues. The course is interdisciplinary.
Attributes: Environment,TechSociety(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

POLT 444B - Cruel and Unusual in a Federal System
Credits: 4
This course is an exploration of the US/state constitutional language of 'cruel and unusual' as an important limitation on governmental power. Students study its historical origins, interpretations, and applications across time periods and types of regimes. Particular attention will be paid to its association with the death penalty in the contemporary United States.
Attributes: Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

POLT 500 - American Public Policy
Credits: 4
Foundational public policy course examining policy choices and conflicts, how policy decisions are made, how policies are assessed, the development of potential policy solutions, and the politics of policy making. Students engage in a task force project that simulates public policy processes and culminates in a policy recommendation at the end of the semester.
Attributes: Writing Intensive Course
Mutual Exclusion: No credit for students who have taken PS 500.
Grade Mode: Letter Grading

POLT 502 - State and Local Government
Credits: 4
Examines power, policies, political culture, and constitutional settings of state and local governments in the United States. Students study how state legislatures, governors, courts, political parties, and interest groups interact to shape political outcomes at the state and local levels.
Grade Mode: Letter Grading

POLT 504 - American Presidency
Credits: 4
The President as administrator, policy maker, and political leader. The relationship between the President and the public, the media, and other governmental institutions. Historical and constitutional background of the Presidency, role, and powers of the President in domestic and foreign affairs.
Grade Mode: Letter Grading

POLT 505 - American Congress
Credits: 4
Role and powers of Congress as national lawmaker and check on the executive branch: committee structure, concepts of representation, legislative oversight and party cleavage, federal budget control, and foreign policy involvement.
Grade Mode: Letter Grading

POLT 506 - Parties, Interest Groups, and Voters
Credits: 4
Role of political parties as organizers and managers of social conflict. Role of voters in controlling parties and government. Influence of interest groups in the electoral process and in governmental decision making.
Grade Mode: Letter Grading

POLT 507 - Politics of Crime and Justice
Credits: 4
Criminal justice in theory and practice; contemporary role of police, prosecutors, judges, juries, counsel, and interest groups in the administration of criminal justice.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 508 - Supreme Court and the Constitution
Credits: 4
Supreme Court treated as a political institution whose historic mission is to decide all controversies arising under the Constitution between the nation and the states, the President and Congress; the role of the judiciary in defining its own powers, rights, and duties.
Attributes: Writing Intensive Course
Equivalent(s): PS 508
Grade Mode: Letter Grading

POLT 509 - Managing Bureaucracy in America
Credits: 4
Growth and development of the bureaucratic state. Roles and powers of administrative officials, decision making in bureaucratic settings, citizen participation, and the influence of interest groups on bureaucratic policymaking.
Grade Mode: Letter Grading

POLT 511 - Women & Politics
Credits: 4
This class provides a survey of the intersection of women, sex, and gender with politics.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 512 - Public Opinion in American Politics
Credits: 4
Relationship of mass and elite opinion within the context of American political culture. Impact of public opinion on American governmental policies, especially with respect to major issues facing the President and Congress. Appraisal of responsiveness to influence and responsibility to lead.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

POLT 513 - Civil Rights and Liberties
Credits: 4
Analysis of four major areas of constitutional rights and liberties, political freedom, equal protection of the laws, and due process with particular attention to their impact on such problems as political protest, discrimination, school segregation, students' rights and the relationship between government and religion.
Grade Mode: Letter Grading

POLT 522 - Dissent and the Political Community
Credits: 4
Current political ideologies and controversies in America and abroad; liberal democracy and its critics since the 19th century.
Grade Mode: Letter Grading

POLT 523 - American Political Thought
Credits: 4
Introduces the student to the key questions about politics and government asked and answered by American thinkers and actors, as well as the ways in which those "answers" have shaped our institutions and political processes. Emphasizes the idea of property.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 524 - Politics and Literature
Credits: 4
This course examines classical and contemporary works of literature to explore perennial issues in the study of politics, such as: exceptionalism, individualism, justice, and equality.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

POLT 544 - Of Dictators and Democrats
Credits: 4
Why are some countries democratic, while others are ruled by dictators? In this course, we answer this question by examining the different paths democratizing nations have taken. Following a theoretical overview, we examine early cases of democratic practices, then turn to study cases from each of the “waves” of democracy. In the first wave (18th and 19th centuries) we focus on the United States, testing the ability of theories to predict the emergence of American democracy. In our study of the second wave (post World War II), we investigate Germany’s transition from dictatorship to democracy. To explore the third wave (1980s to the 2000s), we examine the case of Chile. The course concludes with an examination of contemporary trends of democratic reversals and the rise of authoritarian populists. The goal of this course is to provide students with a solid understanding of the process of democratization, and the analytical tools necessary for evaluating democratic development. By the end of this course, students will be able to explain and evaluate different theories of democratization, describe key democratic milestones in the selected countries, and use this theoretical and empirical knowledge to assess current political events around the world.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 545 - People and Politics in Asia
Credits: 4
This course is an introduction to Northeast Asia, with special emphasis on the politics of the region's major actors. Will China be the next global hegemon? Is Japan moribund? Is Taiwan an independent country? Is Hong Kong a democratic bastion? Why does Kim Jong-un keep threatening to attack the United States? This is a mid-level, writing intensive course that will prepare students for more advanced courses on the nations and issues of the Asia-Pacific rim.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 546 - Wealth and Politics in Asia
Credits: 4
Different paths to modernization, industrialization, and development in nations of the Asia-Pacific Rim. In-depth examinations of the challenges faced by Japan, China, Hong Kong/Macao, Taiwan, and the Koreas in their search for the correct path to economic growth and prosperity, with special emphasis on each nation's distinct society and history. Companion course to POLT 545, but either may be taken separately.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 548 - Drug Wars
Credits: 4
The Americas have hosted several wars against drugs, but these militarized campaigns have not curtailed the global consumption of opiates, cocaine, and cannabis. Perhaps even more sobering, the drug wars have coincided with spiraling rates of violent crime. Given this track record, policymakers have begun to reevaluate drug policies in the US and abroad. This course evaluates these contemporary changes, particularly in light of the successes and failures of past drug control policies.
Grade Mode: Letter Grading

POLT 549 - The Politics of Markets
Credits: 4
This course surveys some major debates in comparative political economy, focusing especially on the creation, evolution, and reform of market institutions. The course emphasizes the ways in which the market is embedded in social and political institutions. Main topics include: 1) Theoretical foundations of political economy, 2) Patterns of industrialization, 3) Capitalist institutions in contemporary industrialized countries, 4) Challenges of development, 5) Transitions from communism to a market economy, and current challenges facing capitalism.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

POLT 550 - Comparative Government and Society
Credits: 4
Introduces students to key concepts and themes in comparative politics through the study of revolutions, ideologies, institutions, and/or social movements. This course compares interactions between citizens and their governments in various types of democracies as well as authoritarian regimes, and spans industrialized and developing countries.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

POLT 551 - Ethnicity ,Violence, Democracy
Credits: 4
What is ethnic identity and why do ethnic differences result in violence? Are diverse societies prone to conflict? The course provides a broad perspective to these questions by examining diversity and conflict in the Middle East, Europe, Africa, Asia, Latin America and the US. Racial and ethnic politics in the US, while not a primary focus, are compared to identity and conflict in other countries. Students will understand how identity evolves and shapes the world.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 552 - Contemporary European Politics
Credits: 4
Analyzes politics, governments, and societies in contemporary Europe; focuses on basic characteristics of political life in different countries as well as pressing economic, political, and social issues.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 554 - Revolution and Protest in Latin America
Credits: 4
Throughout Latin American history, economic and political models have been heavily contested. Advocates of state intervention in the economy have clashed with free market forces, and these clashes have often spilled into the political arena where they have been further complicated by divisions between dictators and democrats. This course examines these twin processes in Latin American politics, tracing economic and political development from the time of independence to the present.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 556 - Politics in China
Credits: 4
Dynamics of China's domestic political and economic policy processes - from massive starvation of the Great Leap Forward and the ideological upheavals of the Great Proletarian Cultural Revolution to the "Opening of China to the Outside World."
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 559 - Comparative Politics of the Middle East
Credits: 4
Examines the dynamics of political and economic change in states and societies of the Middle East. Covers state formation, nationalism and colonialism, authoritarianism and opposition movements, and the origins of the Israeli-Palestinian conflict.
Grade Mode: Letter Grading

POLT 560 - World Politics
Credits: 4
The course explores the primary issues of world politics with a focus on conflict, cooperation and development. Students are introduced to the principal theories and concepts in the analysis of world politics and encouraged to apply these theories and concepts to contemporary global issues.
Attributes: Social Science (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

POLT 562 - Strategy and National Security Policy
Credits: 4
This course develops an understanding of: 1) strategy and its relationship to national security policy and 2) American national security issues and the process of creating and implementing American national security policies. A primary theoretical and practical consideration is the relationship between the use of force and diplomacy. Among the specific issues are: the nuclear world, the U.S. defense posture, military interventions, and the broadening definition of security.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 566 - International Security in Asia
Credits: 4
Asian international relations continue to challenge global power structures. As the world's most vital region, Asia is characterized by explosive economic growth, diverse political systems, modernizing militaries, and advanced technologies. This course explores the regional political and economic dilemmas, starting with the breakdown of the old imperialist order, Japan's expansion, the Asian Cold War, Korean and Chinese unification, China's post-1978 emergence, North Korea nuclear weapons, and the growing conflict over the Pacific Ocean's marginal seas.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 568 - International Security
Credits: 4
Explores central issues related to security in international politics, including: intelligence collection, emerging technologies, the rise and fall of major interstate wars, nuclear weapons, climate change, terrorism, civil wars, and coercion.
Prerequisite(s): POLT 403 with a minimum grade of D-.
Grade Mode: Letter Grading

POLT 569 - The Rise of China
Credits: 4
Analysis of China's struggle for political and economic power in Asia and the world. Examines the legacy of China's historical encounters with the outside world, interactions with the international system since 1949, domestic determinants of foreign political and economic policies, and theories of decision making.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 580 - Selected Topics Am Politics
Credits: 4
Special topics in American Politics, such as politics and public affairs in New Hampshire, women in politics, and civil liberties. See departmental listings for semester offerings.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

POLT 584 - Selected Topics in Political Thought
Credits: 4
Special issues in political theory, such as liberalism and conservatism, radical political thought, the American character, and others. Not offered every semester. See departmental listings for semester offerings.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 588 - Selected Topics in Comparative Politics
Credits: 4
Specialized areas or issues such as regional politics, national politics, judicial systems, administrative law, constitutions, etc.
Grade Mode: Letter Grading

POLT 592 - Selected Topics in International Politics
Credits: 4
Examines specialized issues in international politics. Topics may include ethnic conflict, non-proliferations and global security, economic and political globalization, etc. Not offered every semester. See departmental listings for semester offerings.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 595 - Smart Politics
Credits: 4
An introduction to empirical research methods in political science, both qualitative and quantitative. Students study all aspects of the research process, including hypothesis-building, concepts and variables, measurement, research design, sampling, and empirical observations. Special attention paid to the use of statistical software.
Attributes: Inquiry (Discovery); Writing Intensive Course
Mutual Exclusion: No credit for students who have taken PS 595.
Grade Mode: Letter Grading

POLT 602A - Internship
Credits: 4
Field experience in a governmental or nongovernmental organization at the local, state, national, or international level. Arrangements must be made through the political science department. Open to juniors and seniors with at least a 3.2 GPA. Permission of the undergraduate curriculum committee of the department is required prior to the internship.
Grade Mode: Letter Grading

POLT 602D - Internship
Credits: 2-12
Field experience in governmental or nongovernmental organization at the local, state, national, or international level. Arrangements must be made through the political science department. Open to juniors and seniors with at least 3.2 GPA. Permission from the undergraduate curriculum committee of the department is required. From 2 to 12 credits maybe taken.
Grade Mode: Credit/Fail Grading

POLT 695 - Independent Study
Credits: 2-4
Designed to meet special interests of students and instructors in exploring issues in political science. Upon satisfying eligibility requirements set forth by departmental guidelines (in departmental office and online), students must have the approval of a faculty sponsor. Students submit the form and all supporting evidence by mid-semester prior to the planned semester of independent study for departmental approval. Does not meet the major's four field-course requirement; maximum of eight (8) credits can be counted toward the non-field major requirements.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

POLT 696 - Independent Study
Credits: 2-4
Designed to meet special interests of students and instructors in exploring issues in political science. Upon satisfying eligibility requirements set forth by departmental guidelines (in departmental office and online), students must have the approval of a faculty sponsor. Students submit the form and all supporting evidence by mid-semester prior to the planned semester of independent study for departmental approval. Does not meet the major's four field-course requirement; maximum of eight (8) credits can be counted toward the non-field major requirements.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

POLT 700 - Political Science Pro-Seminar
Credits: 4
Familiarizes students with political science as a profession. Briefly surveys the scope of the discipline in terms of the substantive fields and methodological approaches. Examines the logic of research design and explores diverse methods of inquiry (e.g., archival, experimental, case study, comparative analysis, field study, survey, etc.), including the process of generating a presentable research paper.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 701 - Courts and Public Policy
Credits: 4
Impact of judicial decisions on public policy and influences on judicial decision making at the federal, state, and local levels.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 705 - Elections in the United States
Credits: 4
Students will study various aspects of elections in the United States while observing and analyzing case studies during campaign season.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 709 - Reforming American Government
Credits: 4
Why is American government designed the way that it is (and how does it change?)? Whose interests are protected and whose interests are limited by its design? What do successful reforms tell us about the future of reform?.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 721 - Feminist Political Theory
Credits: 4
Familiarizes students with trends feminist political thinking; exploring issues of race, ethnicity, class, religion/spirituality, sexual orientation, ability, age as they relate to gender and the development of feminist political theory. Attention is paid to critical thinking and analysis using the paradigm of gender as a prism through which to view our lives and ideas.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 740 - States and Societies in the Middle East
Credits: 4
This seminar explores the comparative politics of selected countries and conflicts in the contemporary Middle East and North Africa. We focus on understanding the causes and consequences of popular uprisings, civil wars, and protracted conflicts. The class is taught through discussion, with students taking active, participatory roles. Themes include changing forms of governance, changing practices of warfare, gender and minority rights, economic and environmental problems, protest and activism, state-society relations, and migration and refugees. Students read memoir, journalistic accounts, and theoretical articles in comparative politics to understand important developments. Specific country and issue cases change each year; recent seminars have addressed Israel-Palestine, Syria, Egypt, Iran, and Iraq. Writing, reading, and discussion intensive class. Designed as follow-on course to POLT 559, Comparative Politics of the Middle East, counts as capstone course for the Middle East Minor.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 742 - Beyond Bollywood: Politics of India & South Asia
Credits: 4
India and its neighbors in South Asia - Afghanistan, Pakistan, Bangladesh, and more - are critical to understand. In particular, Pakistan and Afghanistan’s complicated relationship with terrorist organizations hold important implications for global stability. This course explores India and the rest of South Asia’s domestic politics and their complex relations with each other and the rest of the world. As suggested in the title, some of the course material will include movies and documentaries of and about the region to understand the region through its own eyes.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 748 - Food and Wine Politics
Credits: 4
Food and wine politics provides a lens through which to analyze contrasting perspectives on production organization, market structures, quality constructs, consumer preferences, and health and safety regulation. This course draws upon texts from economic history, political economy, economic sociology, and public policy to shed light on comparative political and market organization across Europe, the United States, and emerging market economies.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 751 - Comparative Environmental Politics and Policy
Credits: 4
This seminar explores environmental politics comparatively, across national boundaries and over time. The course aims to provide students with a basic theoretical understanding of key themes in comparative politics as applied to the study of environmental politics and policy. We explore these issues by comparing governments, political parties, social movements, economic development paths, and systems of energy production and consumption, with particular focus on questions of environmental justice and inequality. The approach is interdisciplinary, as the politics of the environment cannot be adequately grasped through one discipline. Independent projects allow students to incorporate themes, concepts, and analytical tools provided in the course to pursue their own interests.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 760 - Theories of International Relations
Credits: 4
Theoretical approaches of international politics, international organization, and international political economy with particular emphasis on systems theories, domestic determinants of foreign policy and theories of decision making.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 762 - International Political Economy
Credits: 4
This course has been designed to introduce advanced undergraduates and graduate students to the current theoretical discussions in international political economy. The course analyzes the development of current international economic regimes, as well as looks at systemic theories (interdependence, hegemonic stability), domestic determinants (bureaucratic, interest group), and decision-making theories (rational choice). By monitoring current economic and political news, students are challenged to apply these ideas to explain the current problems in political economy.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 778 - International Organization
Credits: 4
This course is about cooperation at the international level. With a focus on international organizations, we examine what roles international institutions (both IGOS and NGOS) play in global governance and their effects in various issue areas. We examine their historical origins, functions, and the international and domestic political forces that impact their effectiveness. The course also considers the role of international organizations on world order including conflict resolution, peacekeeping, development, and human rights.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 779 - Technology and War
Credits: 4
How does weapons technology affect how states fight and the ways in which international politics work? This course considers the relationship between technology and war by considering three key questions: in what context did different weapons develop? have any weapons had a revolutionary effect on war? how have different war strategies changed the conduct of international politics? We will consider the development and effects of weapons including gunpowder, tanks, submarines, nuclear weapons, and drones. Students will leave this course with a greater understanding of the systemic pressures and individual variables that affect technological development and diffusion, and an understanding of how those technologies are used in pursuit of international political goals. Students will also learn how to write a substantial research paper. Every student will leave this class with a 3-5 page writing sample to use for future internship and job applications. As a seminar, this is a writing- and participation-intensive course. Students are expected to complete various types of writing, including weekly discussion posts and multiple types of papers. There is also a significant professionalization component to this course, including an emphasis on proper email communication!
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 795 - Advanced Study
Credits: 1-4
Senior POLT majors, with a cumulative average of 3.20 or greater, may undertake advanced study (political science), in an area of their choice, in consultation with member(s) of the faculty. Normally, the result of the project is a significant written product of a quality comparable to that done at the 700 course level. Student must initiate the project discussion and obtain approval of the undergraduate curriculum committee of the department before undertaking the project.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 796 - Advanced Study
Credits: 4
Senior POLT majors, with a cumulative average of 3.20 or greater, may undertake advanced study (political science), in an area of their choice, in consultation with member(s) of the faculty. Normally, the result of the project is a significant written product of a quality comparable to that done at the 700 course level. Student must initiate the project discussion and obtain approval of the undergraduate curriculum committee of the department before undertaking the project.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 797B - Seminar in American Politics
Credits: 4
Advanced analysis and individual research.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 797C - Seminar in Comparative Politics
Credits: 4
Advanced analysis focusing on government and politics in foreign nations or regions. Areas of interest may include: constitutional structures, political parties and interest groups, legislatures, bureaucracy, and public policy. Topics address such concerns as religion and politics, patterns of economic development, ethnic strife, and political leadership.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 797E - Seminar in International Politics
Credits: 4
Advanced analysis focusing on problems of theory and contemporary issues in international politics. Areas of interest may include: democratic norms in international relations, NATO expansion and European security, the peace process in the Middle East, etc. See department listings for semester offerings.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 798B - Seminar in American Politics
Credits: 4
Advanced analysis and individual research.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

POLT 799 - Honors Thesis
Credits: 4
Senior POLT honors-in-major students (see department for honors-in-major requirements), with a cumulative average of 3.20 or greater, may undertake a special honors project in an area of their choice. The result of this special project is a significant written product constituting an honors thesis, under the supervision of a faculty sponsor. Students must initiate the project discussion and obtain approval of the undergraduate curriculum committee before undertaking the project. The honors thesis constitutes the tenth course in the major.
Attributes: Honors course; Writing Intensive Course
Grade Mode: Letter Grading

Politics and Society (PS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PS 402 - Practical Politics
Credits: 4
With particular attention to the development and evolution of US political institutions over time, this course seeks to help students understand how national politics affects them and their communities and how they can, in turn, use that insight to affect national politics. We will work to develop not just new knowledge, but to foster tools and practices of civic engagement.
Attributes: Historical Perspectives(Disc)
Mutual Exclusion: No credit for students who have taken POLT 402.
Grade Mode: Letter Grading

PS 425 - Exploring Leadership
Credits: 1-4
Exploring Leadership is an introductory course on the foundations of student development and leadership, with an emphasis on applying the formal literature on leadership to help students develop and articulate their own personal philosophy of leadership and enact a leadership action plan for their club/organization/leadership position. no credit for students who have taken.
Equivalent(s): UMST 525
Grade Mode: Letter Grading

PS 426 - Social Justice & Leadership
Credits: 1-4
An exploration of social justice through personal and institutional lenses to analyze power and privilege, discrimination and prejudice, inclusion and equity through the intersections of multiple social identities to develop student leaders who will promote an equitable and inclusive environment and serve as social change agents in the college and community.
Equivalent(s): UMST 526
Grade Mode: Letter Grading

PS 430 - The Mindful Leader
Credits: 2
Research has shown that mindfulness and emotional intelligence positively impact leadership, job performance and satisfaction, and work-life balance. This course will introduce students to mindfulness and emotional intelligence through research, discussion, and personal experience. Students will explore how to lead mindfully and develop their emotional intelligence to better manage personal and professional stress and support a culture of vulnerability, non-judgment, and being in the present moment. This course is open to all undergraduate students. Credit cannot be earned if taken UMST 599: The Mindful Leader.
Grade Mode: Letter Grading

PS 500 - Wicked Problems: Puzzles in Public Policy
Credits: 4
Meaningful change in the US is difficult under the best of circumstances, and it's almost never the best o circumstances. As a result, the richer your understanding of the complex and often irrational US policy-making system, the better the chance that you will be able to understand why certain policies are made (or not made), why they take the form that they do, and how to alter them.
Attributes: Social Science (Discovery); Writing Intensive Course
Mutual Exclusion: No credit for students who have taken POLT 500.
Grade Mode: Letter Grading

PS 506 - Civil Society and Public Policy
Credits: 4
Explores how grassroots advocacy organizations and social movements mobilize human and material resources in order to shape public policy and what tactics and organizational and communication strategies lead to success. Provides students with hand-on learning through service learning project at a local organization. Policy areas may include immigration, environmental conservation, women's issues and more.
Grade Mode: Letter Grading

PS 515 - New Hampshire Politics in Action
Credits: 4
A hands-on course on New Hampshire politics and policymaking, in which students will identify a Bill currently active in the NH General Court and develop and execute a step-by-step plan for helping get it enacted or defeated. Periodic travel to the State Capitol in Concord will be required.
Attributes: Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

PS 595 - Research for Political and Policy Action
Credits: 4
This course offers an overview of how the social sciences--political science especially--decide which questions to ask and how to design the research projects that will help them develop answers to those questions. As we explore these methods of inquiry and analysis, students undertake their own multi-methods research project to better understand something that interests or puzzles them while experiencing first hand the challenges inherent in sound research.
Attributes: Inquiry (Discovery); Writing Intensive Course
Mutual Exclusion: No credit for students who have taken POLT 595.
Grade Mode: Letter Grading

PS 701 - Senior Seminar/Internship in Public Service
Credits: 4
Students undertake internships or other approved field projects with organizations such as political campaigns, media organizations, government offices, business or community groups. The seminar component enables students to share and analyze these experiences, employing readings, discussions, collective behavior games, and speakers.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

PS 731 - Community Leadership - Capstone
Credits: 4
Culminating experience for the Community Leadership Minor, but open to other students with instructor's permission. Working alone or in groups, students will design and execute a project of benefit to a community partner.
Equivalent(s): UMST 531, UMST 701
Grade Mode: Letter Grading

Portuguese (PORT)

Professional and Technical Communication (PTC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PTC 500 - Business Communication
Credits: 4
This course focuses on writing skills used in the business world. Frequent writing assignments include letters, emails, reports and resumes. The drafting, feedback and revision method is used. Required for the BUS degree and should be taken within the first 2 semesters. No credit if ENGL 595 "Literary Topics: Business Communications" taken.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- or ENGL 401A with a minimum grade of D-.
Grade Mode: Letter Grading

Project Management (PM)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PM 611 - Advanced Project Management
Credits: 4
This course builds on the foundation of MGMT 626 by introducing coverage of advanced topics in project scheduling, risk and quality management, and cost control as well as providing comprehensive knowledge of scheduling and other project management tools. The course also addresses the appropriate use and application of Agile Project Management.
Prerequisite(s): MGMT 626 with a minimum grade of D-.
Grade Mode: Letter Grading

PM 613 - Organizational Behavior and Projects
Credits: 4
This course details the relationship between the organizations that host the projects and the projects themselves. Projects are a key vehicle for the execution of organizational strategy, and the effectiveness of that execution is determined to a large extent by the environment that the organization itself creates for those projects. This course addresses topics including project organization and context, strategic project management, and ethics and professionalism. It also explores the benefits of implementing a project portfolio management practice within an organization.
Prerequisite(s): PM 611 with a minimum grade of D-.
Grade Mode: Letter Grading

Psychology (PSY) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PSY 410 - Introduction to Psychology
Credits: 4
This survey course provides an introduction to the science of psychology. It examines many of the major areas of applied and experimental psychology. A selection of topics from the following specialty areas are covered: History of Psychology, Research Methods, Biological Psychology, Cognition, Learning, Memory, Human Development, Stress, Emotion, Health Psychology, Personality Theories, Psychopathology, and Social Psychology. Students will apply knowledge of these topics to interpret personal experiences, current events, societal issues, and practical problems.
Attributes: HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)
Equivalent(s): PSY 501G
Mutual Exclusion: No credit for students who have taken PSYC 401.
Grade Mode: Letter Grading

PSY 470 - Child Development
Credits: 4
This course focuses on the development of children from birth to early adolescence. It includes the major developmental theories and perspectives as well as an overview of the research methodology used in the field. Through reflective writing, current research in the areas of physical, cognitive, and social and emotional development is explored in the context of the child's environment.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): PSY 508G
Mutual Exclusion: No credit for students who have taken PSYC 581.
Grade Mode: Letter Grading

PSY 480 - Infant and Toddler Development
Credits: 4
This course focuses on major theoretical perspectives of child development with particular attention to infant and toddler development. Topics include the physical, social, emotional, and cognitive milestones of the growing child along with factors that contribute to optimal development. There is an emphasis on the importance of creating high quality, safe, and supportive environments as well as on attachment and the role of communication in the development of trust and autonomy. Students observe children to develop strategies for creating and maintaining developmentally appropriate environments. Prior completion of PSY 525 or PSY 470 recommended.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): PSY 510G
Grade Mode: Letter Grading

PSY 525 - Human Development
Credits: 4
This course focuses on the development of the individual from conception to death. Major developmental theories, milestones, processes, and influences are covered. Research findings about these topics are examined. Growth and development are viewed as products of interacting biological, psychological, and social factors. The risks and opportunities in the developing person's social environment, as well as the application of theories and research findings, are emphasized.
Attributes: HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)
Equivalent(s): PSY 509G
Grade Mode: Letter Grading

PSY 530 - Social Psychology
Credits: 4
Social Psychology is the scientific study of how individuals, groups, organizations, and culture influence and are influenced by their social environment. This course provides an overview of classic and contemporary work in this field and explores topics such as aggression, attitude formation and change, social thinking, individual and group influence, prejudice, friendships and romantic relationships, leadership, social influence, altruism, and/or conformity.
Attributes: HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)
Equivalent(s): PSY 502G, PSY 608G
Mutual Exclusion: No credit for students who have taken PSYC 552.
Grade Mode: Letter Grading

PSY 550 - Fundamentals of Applied Behavior Analysis
Credits: 4
This course serves as an introduction to the foundational concepts and principles of applied behavior analysis (ABA) with an emphasis on the skills from the Behavior Analyst Certification Board's (BACB) Registered Behavior Technician (RBT) Task List. It provides students with the opportunity to examine how the principles of basic measurement, assessment, skill acquisition, behavior reduction, and professional conduct are applied in ABA settings. Students will also review the development and history of applied behavior analysis.
Prerequisite(s): (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-) and (IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-).
Grade Mode: Letter Grading

PSY 565 - Core Principles of Addiction
Credits: 4
This course introduces students to the basic issues discussed by addiction support workers, including the Twelve Core Functions of the alcohol and other drug (AOD) counselor. Students will also have an opportunity to explore the possible professional certifications (e.g., Certified Recovery Support Worker (CRSW), Licensed Alcohol and Drug Counselor (LADC), etc.) within this career. A wide array of topics related to addiction may be discussed in this beginning-level course. Topics may include the economic, political, and/or cultural consequences of addiction and potential consequences of addiction on the individual's relationships, mental health, and physical health.
Equivalent(s): PSY 515G
Grade Mode: Letter Grading

PSY 602 - Theories of Personality
Credits: 4
This course examines specific theories of personality for the purpose of explaining normal and abnormal development and behavior. Psychoanalytic, trait, humanistic, existential, cognitive, behavioral, and social learning theories, among others, are reviewed and critiqued based on research evidence. Each theory or theoretical perspective is presented in terms of historical context, basic assumptions, and hypothetical constructs. Students explore behaviors and motivations from the perspective of different personality theories. The application of personality theories in helping-profession contexts is introduced.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.
Equivalent(s): PSY 602G
Mutual Exclusion: No credit for students who have taken PSYC 553.
Grade Mode: Letter Grading

PSY 603 - Crisis Intervention
Credits: 4
This course focuses on crisis theory, methods of crisis intervention, and specific crises that occur with individuals and families such as suicide, unemployment, natural disasters, illness, divorce, and death. Students are expected throughout the course to apply their exploration of theory to their work and life experiences.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): PSY 603G
Grade Mode: Letter Grading

PSY 620 - Behavioral Assessments and Interventions in Applied Behavior Analysis I
Credits: 4
This course provides students with the opportunity to apply basic knowledge of assessments and use assessment results to inform intervention plans. Students will learn about various assessments used to address maladaptive behaviors, as well as skill development for replacement behaviors. Research methods for summarizing and analyzing data and single-subject experimental designs will also be studied.
Prerequisite(s): PSY 550 with a minimum grade of D-.
Grade Mode: Letter Grading

PSY 626 - Educational Psychology
Credits: 4
This course focuses on the study of teaching and learning, including several theoretical perspectives specific to human and cognitive development. Course topics include motivation, critical thinking, student assessment and achievement, and implications of approaches to each. The course critically examines the relationship between research and education, including the contributions and limitations of measurement in instructional settings and the interplay with educational policy.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): (IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-) and (EDC 500 with a minimum grade of D- or EDU 510G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D-).
Equivalent(s): PSY 606G
Grade Mode: Letter Grading

PSY 630 - Psychology of Adulthood
Credits: 4
This course is a life-span developmental approach to adulthood in contemporary American society that includes the major theoretical perspectives regarding developmental transitions and age-related tasks. The following topics are included: 1) methodological issues related to the study of development, 2) patterns of stability and change across adulthood with regard to processes such as biological functioning, sensation and perception, cognition, personality, identity, gender and social roles, relationships, career, and mental health, and 3) death and dying as the final stage of life. Students can consider their own development in light of this content.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.
Equivalent(s): PSY 615G
Grade Mode: Letter Grading

PSY 646 - Psychology of Occupational Stress
Credits: 4
This course focuses on occupational stress research, including the identification of organizational and psychosocial sources of stress. It defines workplace stress and eustress and explores factors including work environments, stress perception, diversity stress, personality, and interpersonal relationships with managers, staff, and co-workers. This course evaluates measurement tools, prevention and remediation strategies for individuals and organizations, and other approaches that create healthy workplaces. Each area is examined from the individual worker's perspective and that of management. Learners apply the major theoretical principles and processes to their own experiences as employees, employers, or military personnel.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D- or PSY 502G with a minimum grade of D- or PSY 530 with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): PSY 616G
Grade Mode: Letter Grading

PSY 654 - Counseling Theories
Credits: 4
This course provides an overview of counseling theories developed by major theorists. The course examines how both the historical context and the scientific knowledge of the time helped to shape the theories developed during the past century. Research findings evaluating the effectiveness of therapeutic modalities are reviewed. Important elements of the counseling process, which include assessments, confidentiality, the therapeutic alliance, and the impact of funding sources on decision making, are examined.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.
Equivalent(s): PSY 604G
Grade Mode: Letter Grading

PSY 660 - Ethics in Applied Behavior Analysis
Credits: 4
This course reviews ethical standards of practice within the field of applied behavior analysis and how these standards are used within applied settings. This course will also address preparing practitioners for supervisory responsibilities. Students will have the opportunity to propose methods for applying the Guidelines for Responsible Conduct from the Behavior Analyst Certification Board in a variety of practical client situations.
Prerequisite(s): PSY 550 with a minimum grade of D-.
Grade Mode: Letter Grading

PSY 665 - Principles of Assessment
Credits: 4
This course is a survey of assessment issues and methods for students pursuing studies in education-related fields or the behavioral sciences. Topics include differences between formal and informal assessment and evaluation, reliability and validity, differences between norm-referenced and criterion-referenced tests, development of assessment and evaluation instruments and plans, methods for observing and recording behavior, and how to use assessment information to develop and/or modify programs and environments. NOTE: MTH 402 or MTH 504 is recommended.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): PSY 605G
Grade Mode: Letter Grading

PSY 675 - Foundations of Addictions Counseling
Credits: 4
This course provides students with an opportunity to study the important theories, strategies, and skills of addictions-related counseling. Topics are derived from the Twelve Core Functions of Addiction Counselors and will include concepts like screening, referral, intake, assessment, crisis management, treatment, recovery, support, and/or client education.
Prerequisite(s): PSY 565 with a minimum grade of D- or PSY 515G with a minimum grade of D-.
Equivalent(s): PSY 625G
Grade Mode: Letter Grading

PSY 685 - Principles of Psychopathology
Credits: 4
The focus of this course is on the societal definitions and impact of abnormal and deviant behavior, and what is considered psychopathology. It examines both how mental illness is recognized and regarded, and how its treatment may vary, in different societies and cultures. It deals with major disorders and personality syndromes considered to be abnormal or deviant and examines the various etiologic factors known or believed to play a role in each of the disorders, considering them from varying perspectives, such as psychoanalytic, cognitive behavioral, biological, and humanistic.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.
Equivalent(s): PSY 617G
Mutual Exclusion: No credit for students who have taken PSYC 561.
Grade Mode: Letter Grading

PSY 710 - The Biology of Addiction
Credits: 4
This course introduces the biological mechanisms of substance use and misuse (e.g., nervous system activity, tolerance, withdrawal, and metabolism) and the resulting behavioral and health consequences. Students will also examine the classification of various substances, epidemiological data and trends, the diagnoses and diagnostic criteria of substance use disorders, genetic and biological influences on addiction, and biological theories of addiction. Other potential topics include behavioral addictions (e.g., gambling, eating, video games, or sex) and the effects of drugs on individuals, families, and society.
Attributes: Phys Natural World (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D-.
Equivalent(s): PSY 610G
Mutual Exclusion: No credit for students who have taken PSYC 733.
Grade Mode: Letter Grading

PSY 720 - Behavioral Assessments and Interventions in Applied Behavior Analysis II
Credits: 4
This course extends the student's initial inquiry into behavioral assessments and interventions beyond the prerequisite course to practice advanced techniques. Students will appraise the needs of case-based situations, then select intervention strategies inclusive of shaping, discrimination training, instructional control, imitation training, and differential reinforcement. Behavior change will be addressed across settings and populations.
Prerequisite(s): PSY 620 with a minimum grade of D-.
Grade Mode: Letter Grading

PSY 725 - Cognitive Psychology
Credits: 4
This course introduces some of the major topics related to human cognition, including perception, attention, memory, knowledge acquisition, language, problem solving, reasoning, and decision making. Students will explore the historical context, current theories, neurobiological underpinnings, research methods, and empirical research relevant to the field of cognitive psychology. Comprehension will be enhanced through the application of cognitive principles to understand everyday behavior and solve practical problems.
Attributes: HumanBehavSocial Sys (Gen Ed); Writing Intensive Course
Prerequisite(s): IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-.
Equivalent(s): PSY 609G
Mutual Exclusion: No credit for students who have taken PSYC 513.
Grade Mode: Letter Grading

PSY 740 - Biopsychology
Credits: 4
This course addresses the relationship between the brain and behavior to provide an overview of the biological basis of thoughts, actions, and feelings. Topics may include basic functional neuroanatomy and physiology, sleeping and dreaming, emotion, biopsychological research methods, learning and memory, development of the brain, sensation and perception, motor control, language and lateralization, substance use and neuropharmacology, emotion, and behavioral health problems (for example, stress-related disorders, anxiety, depression, or schizophrenia) and their pharmacological treatment. Comprehension will be enhanced through the application of biopsychological principles to understand everyday behavior and solve practical problems. NOTE: SCI 490 recommended.
Attributes: Phys Natural World (Gen Ed); Writing Intensive Course
Prerequisite(s): IDIS 560 with a minimum grade of D- or IDIS 501G with a minimum grade of D-.
Equivalent(s): PSY 601G, SCI 600G
Mutual Exclusion: No credit for students who have taken PSYC 531.
Grade Mode: Letter Grading

PSY 795 - Integrative Capstone: Internship in Applied Psychology
Credits: 4
This capstone course is a field-based internship designed to develop and hone the practical application skills of an Applied Psychology major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where psychology-related knowledge and skills are applied. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): BEHS 651G
Grade Mode: Letter Grading

PSY 797 - Integrative Capstone: Project in Applied Psychology
Credits: 4
This capstone course in applied psychology requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students will complete an independent project that requires conducting scholarly research on a chosen topic, critically evaluating the relevant literature, and synthesizing peer-reviewed sources into a scientific paper that conforms to APA formatting standards. Students will become familiar with the APA ethical standards regarding human research, and students choosing to conduct an empirical study collecting data from human participants will be required to undergo a review and approval process by the Institutional Review Board (IRB). Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): BEHS 650G
Grade Mode: Letter Grading

Psychology (PSYC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PSYC 400 - Psychology Freshmen Advising Seminar
Credits: 1
This course is an introduction to our program, the various areas of Psychology and faculty research, some employment opportunities after graduation, academic standards, and management skills essential for success as a declared psychology major in the University. The goal of this course is to help students make a positive academic transition into UNH. Students will learn about the resources UNH has to offer to support their success and how to navigate UNH academic planning tools. This course will introduce students to the different areas of psychology and expectations for a psychology major. This course is required for all first-year declared Psychology majors.
Grade Mode: Credit/Fail Grading

PSYC 401 - Introduction to Psychology
Credits: 4
Psychology as a behavioral science; its theoretical and applied aspects. Includes research methods, behavioral neuroscience, sensation and perception, cognition, learning, development, personality, psychopathology, and social psychology. To experience actively the nature of psychological research students have an opportunity to participate in a variety of studies as part of a laboratory experience.
Attributes: Social Science (Discovery)
Equivalent(s): PSYC 401H
Mutual Exclusion: No credit for students who have taken PSY 410.
Grade Mode: Letter Grading

PSYC 402 - Statistics in Psychology
Credits: 4
Design, statistical analysis, and decision making in psychological research. Probability, hypothesis-testing, and confidence intervals. Conceptualization, computation, interpretation, and typical applications for exploratory data analysis (including measures of central tendency, variability), t-tests, correlations, bivariate regression, one-way analysis of variance, and chi square. Introduction to computer methods of computation.
Attributes: Quantitative Reasoning(Disc)
Equivalent(s): PSYC 402H
Mutual Exclusion: No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, HMP 540, MATH 439, MATH 539, MATH 644, MTH 504, MTH 701, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

PSYC 440A - Honors/Understanding the Human Brain
Credits: 4
First, we will examine the evolution of the brains of hominids to understand what are characteristics are uniquely human and what are conserved across species. We then explore selected topics in neuroscience that alter neural functioning, for example, the impact of neuro-prosthetics, cognitive enhancement, racial discrimination. Finally, we will discuss the benefit and limitations of using animal models to understand human neural functioning.
Attributes: Biological Science(Discovery); Honors course
Grade Mode: Letter Grading

PSYC 502 - Research Methods in Psychology
Credits: 4
Research design, including experimental and correlation design; internal versus external validity; measurement; writing a research report; graphic and statistical methods for summarizing data; sampling; and special problems such as experimenter effects, reactivity of measurement, and others. The use of hypothesis testing and data analysis in research.
Attributes: Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): PSYC 401 with a minimum grade of D- and PSYC 402 with a minimum grade of D-.
Equivalent(s): SOC 601, SW 601, SW 601W
Mutual Exclusion: No credit for students who have taken IDIS 560.
Grade Mode: Letter Grading

PSYC 511 - Sensation and Perception
Credits: 4
The study of how humans (and some other animals) sense and perceive their environment. Topics include seeing (vision), hearing (audition), tasting (gustation), smelling (olfaction), feeling (somatosensation), and the variety of state-of-the-art methods used by psychologists to study these senses. Illusions and other sensory and perceptual phenomena are treated.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 512 - Psychology of Primates
Credits: 4
A comparative analysis of primate cognitive, linguistic, and social processes. The origins of human behavior are explored from the perspectives of history, evolution, and contemporary work in neuropsychology, linguistic, sociobiology, and related fields.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 513 - Cognitive Psychology
Credits: 4
The study of human cognition, its basic concepts, methods, and major findings. Human knowledge acquisition and use. Attention, perception, memory, imagery, language, reading, problem solving, and decision making.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken PSY 725.
Grade Mode: Letter Grading

PSYC 521 - Behavior Analysis
Credits: 4
Principles derived from the experimental study of human and animal learning and their theoretical integration. Respondent and operant conditioning. Reinforcement and punishment, stimulus control, choice and preference, conditioned reinforcement.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 522 - Behaviorism
Credits: 4
Introduction to behaviorism as a philosophy of science. Some historical background, but concentration on modern behaviorism as exemplified in the works of B. F. Skinner. No credit for students who have completed PSYC 722. Offered only in Manchester.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 531 - Psychobiology
Credits: 4
Introduces the behavioral neurosciences. Surveys research conducted by psychologists to learn about the biological basis of behavior: development, sensation, perception, movement, sleep, feeding, drinking, hormones, reproduction, stress, emotions, emotional disorders, learning, and memory.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken PSY 740.
Grade Mode: Letter Grading

PSYC 552 - Social Psychology
Credits: 4
Behavior of individuals as affected by other individuals, groups, and society. Topics include attitude change and social influence, conformity, social interaction, interpersonal attraction, impression formation, research.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken PSY 530.
Grade Mode: Letter Grading

PSYC 553 - Personality
Credits: 4
Major theories, methods of assessment, and research.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken PSY 602.
Grade Mode: Letter Grading

PSYC 561 - Psychopathology
Credits: 4
Causes, diagnosis, and treatment of psychopathology. Implications of varying theoretical viewpoints.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken PSY 685.
Grade Mode: Letter Grading

PSYC 571 - Pioneers of Psychology
Credits: 4
An introduction to the development and evolution of psychology as an academic discipline and applied science. The lives and works of innovators in psychology are placed in socio-political context.
Attributes: Historical Perspectives(Disc)
Equivalent(s): PSYC 571H
Grade Mode: Letter Grading

PSYC 581 - Child Development
Credits: 4
The developing child in the context of his/her society. Current problems in, and influences on, development of the child. Personality and cognitive development; exceptional children.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken PSY 470.
Grade Mode: Letter Grading

PSYC 595 - Applications of Psychology
Credits: 1-4
Arranged by the student or offered by psychology faculty for supervised field, academic, or research experience related to psychology. A) Field experience: supervised internship at a business or human services setting, B) Academic experience: specialized classroom experience or supervised teaching assistance, C) Research experience: supervised research experience or laboratory work. Psychology instructors sponsor academic credit for appropriate experience combined with a relevant academic component. Requires a signed learning agreement prior to registration.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

PSYC 705 - Tests and Measurement
Credits: 4
Testing intelligence, creativity, achievement, interests, and personality. Test construction; evaluation; relation to psychological theory, research, and practice.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Equivalent(s): PSYC 705H
Grade Mode: Letter Grading

PSYC 710 - Visual Perception
Credits: 4
The study of how humans (and some other animals) see. Topics include color vision, depth perception, form and pattern vision, visual learning and development, eye movements, diseases of the visual system, illusions, and other visual phenomena.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 511 with a minimum grade of D- or PSYC 531 with a minimum grade of D-)) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Grade Mode: Letter Grading

PSYC 712W - Psychology of Language
Credits: 4
Theories of language structure, functions of human language, meaning, relationship of language to other mental processes, language acquisition, indices of language development, speech perception, reading.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 512 with a minimum grade of D- or PSYC 513 with a minimum grade of D-).
Equivalent(s): PSYC 712
Grade Mode: Letter Grading
Special Fee: Yes

PSYC 713 - Psychology of Consciousness
Credits: 4
Explores questions of consciousness What is it? How does it develop? Are infants and animals conscious? Why did consciousness evolve? Includes a review of historical background, including the ideas of Jaynes, Paiget, James, Freud, and others. Contemporary topics may include the role of language and other representational systems, blindsight, subliminal perception, priming and other implicit cognitive phenomena, hypnosis, confabulation and attribution, dreaming, multiple personality and conceptions of self and free will, from simultaneous perspectives of phenomenology, behavior, and neuroscience. Specific topics governed by class interests.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 513 with a minimum grade of D-.
Equivalent(s): PSYC 713H
Grade Mode: Letter Grading

PSYC 713W - Psychology of Consciousness
Credits: 4
Explores questions of consciousness What is it? How does it develop? Are infants and animals conscious? Why did consciousness evolve? Includes a review of historical background, including the ideas of Jaynes, Paiget, James, Freud, and others. Contemporary topics may include the role of language and other representational systems, blindsight, subliminal perception, priming and other implicit cognitive phenomena, hypnosis, confabulation and attribution, dreaming, multiple personality and conceptions of self and free will, from simultaneous perspectives of phenomenology, behavior, and neuroscience. Specific topics governed by class interests.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 513 with a minimum grade of D-.
Equivalent(s): PSYC 713, PSYC 713H
Grade Mode: Letter Grading

PSYC 715W - MindCraft: Revolutions in Thinking about Thinking
Credits: 4
What does it mean to have a mind? What does it mean to think? These deceptively simple questions lie at the heart of this course. We explore diverse perspectives on the "mind", from long-standing philosophical debates to contemporary theories in psychology. By grappling with these questions, students consider how different answers shape the study of psychology, its methods, goals, and fundamental assumptions. The course emphasizes critical evaluation and challenges students to reflect on their own views about the nature of the mind. The semester is organized around three major themes: The mind–body problem: Whether, and in what sense, the mind is distinct from the brain. Through the history of psychological science, we compare behaviorism and cognitivism as contrasting approaches to studying the mind. Finally, we investigate probabilistic theories of cognition, which blend computation and psychology to address enduring questions about reasoning and thinking.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- or PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 720 - Animal Cognition
Credits: 4
Do animals use language or have a culture? Can birds count? Do animals use tools and understand how they function? How do ants navigate their environment to find food and then return to their nest? How animals perceive, attend to, process, store, and represent information from their environment. Research on animal learning and behavior as a framework for investigating cognitive processes in animal learning. Quantitative versus qualitative nature of differences between people and non-human animals. Multidisciplinary approach including the fields of anthropology, physiology, philosophy and biology.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 401 with a minimum grade of D- and PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 513 with a minimum grade of D- or PSYC 521 with a minimum grade of D-)) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Grade Mode: Letter Grading

PSYC 722 - Behaviorism, Culture, and Contemporary Society
Credits: 4
Introduces behaviorism as a philosophy of science. Concentration on modern behaviorism as exemplified in the works of B.F. Skinner. Implications of behaviorism for the development and evolution of cultures. Consideration of societal issues (for example pollution, overpopulation, conflict, drug abuse) from a behavioral framework. No credit for students who have completed PSYC 522.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 521 with a minimum grade of D-.
Equivalent(s): PSYC 522
Grade Mode: Letter Grading

PSYC 731 - Brain and Behavior
Credits: 4
Neuropsychology, the study of brain/behavior relationships including clinical topics related to the analysis of neurological diseases in humans and more basic experimental topics related to integrative functions of the brain. The main focus is on cerebral cortex and functions related to perception, movement, attention, memory, and language.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

PSYC 733 - Drugs and Behavior
Credits: 4
Introduces the principles of psychopharmacology and the effects of psychoactive substances on behavior. Focuses on the therapeutic and recreational use of drugs and the mechanisms of drug action, that is how the drugs affect the brain. Neuropsychiatric function and dysfunction are discussed as they relate to the use or abuse of particular drugs.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Mutual Exclusion: No credit for students who have taken PSY 710.
Grade Mode: Letter Grading

PSYC 735 - Neurobiology of Mood Disorders
Credits: 4
Neurobiological and neurochemical substrates underlying various psychopathologies, using both animal models and human data. Study of disorders from the field of biological psychiatry including aggression, anxiety, panic disorder, obsessive-compulsive disorder, unipolar depression, bipolar affective disorder, schizophrenia, and post-traumatic stress disorder. The effectiveness of current behavioral and pharmacological therapy.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Grade Mode: Letter Grading

PSYC 736 - Attention Disorders
Credits: 4
Attention encompasses several cognitive functions including, but not limited to, the ability to select relevant from irrelevant stimuli, to maintain goal-directed behavior over time, and to process multiple streams of information at once. This course explores how the normal brain "attends", and the consequences of dysfunction in neurochemical systems hypothesized to mediate these abilities including dementia, attention-deficit hyperactivity disorder (ADHD) and schizophrenia.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 531 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Grade Mode: Letter Grading

PSYC 741W - Special Topics
Credits: 4
New or specialized courses are presented under this listing. Advanced material not normally covered in a regular course in which instructor has specialized knowledge through research and study. May be repeated for different topics.
Attributes: Writing Intensive Course
Prerequisite(s): (PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-) or (NSB 500 with a minimum grade of D- and NSB 501 with a minimum grade of D- and NSB 502 with a minimum grade of D- and NSB 503 with a minimum grade of D-).
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): PSYC 741, PSYC 741A, PSYC 741B, PSYC 741C, PSYC 741D
Grade Mode: Letter Grading

PSYC 755 - Psychology and Law
Credits: 4
Applications of psychology to the study of the law, including theories of legal and moral judgment, participants in the legal system (judges, police, victims, witnesses), the trial process, and plea bargaining. Special focus on the death penalty, the insanity plea, and child witnesses.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Equivalent(s): PSYC 755H
Grade Mode: Letter Grading

PSYC 756 - Psychology of Crime and Justice
Credits: 4
Examines the psychological aspects of crime and justice, including the following origins and causes of crime: developmental, biological, biopsychological, learning, and mental disorder. Focuses on issues related to homicide, profiling, and serial killers. Examines aggression and violence as well as causes and consequences of criminal homicides. Discussion of the future of crime.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 757 - Psychology of Happiness
Credits: 4
Overview of empirical research in Positive Psychology. We will discuss factors that may influence happiness and subjective well-being; and effects that well-being may have on other life outcomes such as physical health. Learning involves reading and writing about evidence from research and also experimental exercises (such as doing an act of kindness).
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 758 - Health Psychology
Credits: 4
Survey of current topics in health psychology, including social stress and the etiology of disease, Type A and other personality factors related to health, modification of risk factors, the practitioner-patient relationship, chronic pain, and the emotional impact of life-threatening illness.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 759W - Emotion and the Embodied Mind
Credits: 4
This course introduces the scientific study of emotions, including where they come from and how they shape our perception of the world around us. We will discuss the ways in which action and thought are grounded in ongoing bodily needs and activity, how the mind makes meaning of external and internal sensations, and how emotions both emerge from and shape these processes. This is a writing intensive course. You will be asked to engage critically with primary source articles reporting on original research and theory, including both classic and contemporary work in the science of emotion. You are expected to contribute to class discussions and submit regular written content based on these readings (details below). Primary goals of this course include improving scientific literacy, practicing critical thinking, and building effective communication skills.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 760W - Ecopsychology
Credits: 4
Ecopsychology is a theory of the relationship between humans and nature. Ecopsychology is a focus of interest within Division 34 (Society for Environmental, Population, and Conservation Psychology) of the American Psychological Association. We will explore the impact of people's relationships with the natural world, which includes land, waterways, plants, and animals. Different cultures will be studied as we explore people's relationships with nature. The significance of the ways in which people connect or disconnect with nature will be studied in relation to the effect on one's mental (and physical) health, behaviors, and worldviews. This is a writing intensive course that meets the requirement for a Group II 700 level / writing intensive course for the Psychology major. Within the Department of Psychology we have the three courses of Counseling, Health Psychology, and Psychology of Happiness, that address factors related to one's overall well-being. This course has an ecological context in which psychological health, the health of the earth, and culture are studied; this course complements those three courses. Ecotherapy, which is applied Ecopsychology, will be explored through empirical studies and other important writings. The Ecopsychology course is also part of the interdisciplinary Native American and Indigenous Studies Minor at UNH.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 561 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 761W - Sport and Performance Psychology
Credits: 4
This is a writing intensive course that is an introduction to sport and performance psychology. It is a comprehensive study that is informed by current research and contemporary practice in the field of sport and performance psychology. We will explore learning, motivation and social interaction in sport, mental training skills for performance enhancement, and the enhancement of health and well-being for the athletes through sport psychology. The prevention and reporting of misconduct and abuse within sport is discussed. We will also consider the application of mental training skills for optimal performance outside of the context of sport. Students will be expected to develop a psychological skills training program as part of this course.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 762 - Counseling
Credits: 4
Theories of counseling, ethical considerations, professional and paraprofessional activities in a variety of work settings.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 553 with a minimum grade of D- or PSYC 561 with a minimum grade of D-).
Grade Mode: Letter Grading

PSYC 762W - Counseling
Credits: 4
Theories of counseling, ethical considerations, professional and paraprofessional activities in a variety of work settings.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and (PSYC 553 with a minimum grade of D- or PSYC 561 with a minimum grade of D-).
Grade Mode: Letter Grading

PSYC 764W - Clinical Child Psychology
Credits: 4
A developmental perspective on psychopathology. The first half of the course will cover psychological disorders commonly observed in children and adolescents (emotional and behavioral disorders, Autism Spectrum Disorder, Attention Deficit-Hyperactivity Disorder, etc.). The second half of the semester will include an overview of child and family-focused treatments for childhood psychopathology, involving counseling skills practice specific to children and families.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 581 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 782W - Autobiographical Memory
Credits: 4
This course will explore autobiographical memory from a lifespan developmental perspective. Topics include flashbulb memories; the origins of personal memory in infancy and early childhood; memory and trauma; exceptional memory abilities; memory and the self; memories of life transitions; false memories; and gender and cultural differences in memory performance. Classes will be discussion-based and interactive.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 785 - Social Development
Credits: 4
Examines development of social interactions. Emphasizes important social relationships for the child (e.g., attachment to parents and friendships with peers). Considers other topics of relevance to social developmentalists, such as temperament, aggression, social cognition, and sex roles.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 581 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 791 - Special Topics
Credits: 4
New or specialized courses are presented under this listing. Advanced material not normally covered in a regular course in which instructor has specialized knowledge through research and study. May be repeated for different topics.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 16 credits. May be repeated up to 4 times.
Equivalent(s): PSYC 791W
Grade Mode: Letter Grading

PSYC 791W - Special Topics
Credits: 4
New or specialized courses are presented under this listing. Advanced material not normally covered in a regular course offering in which instructor has specialized knowledge through research and study. May be repeated for different topics.
Attributes: Writing Intensive Course
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Repeat Rule: May be repeated up to 4 times.
Equivalent(s): PSYC 791
Grade Mode: Letter Grading

PSYC 793 - Internship
Credits: 4-8
Supervised practicum in one of several cooperating New Hampshire mental health/rehabilitation facilities. Coursework knowledge applied to meaningful work and team experience. Commitment includes a negotiated number of weekly work hours and weekly seminars. Supervision by institution personnel and the instructor. A maximum of 4 credits may be applied to the Psychology major. Course applications accepted beginning in March for fall term and October for spring term.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D- and PSYC 561 with a minimum grade of D- and PSYC 762 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 794 - Advanced Internship
Credits: 1-8
Supervised advanced practicum experience in co-operating New Hampshire mental health/rehabilitation facilities. Expands and builds on experiences and skills acquired in PSYC 793. Commitment includes a negotiated number of hours of work per week and participation in weekly seminars. Supervision done by institution personnel and instructor.
Prerequisite(s): PSYC 793 with a minimum grade of D-.
Grade Mode: Letter Grading

PSYC 795 - Independent Study
Credits: 1-4
A) Physiological, B) Perception;, C) History and Theory, D) Behavioral Analysis, E) Social, F) Cognition, G) Statistics and Methods, H) Experimental, I) Personality, J) Developmental, K) Counseling, L) Psychotherapy, M) Research Apprenticeship, N) Teaching of Psychology, O) Advanced Externship (content area to be determined). Arranged by the student with a psychology faculty sponsor. Learner/sponsor contract required. Minimum time commitment: three hours per credit per week.
Prerequisite(s): PSYC 402 with a minimum grade of D- and PSYC 502 with a minimum grade of D-.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): PSYC 795H, PSYC 795W
Grade Mode: Letter Grading

PSYC 797 - Senior Honors Tutorial
Credits: 4
For senior psychology honors students. Students propose honors theses under the supervision of psychology faculty. Theses proposed and begun in this course are completed in PSYC 799. (Typically offered in fall.)
Attributes: Honors course
Grade Mode: Letter Grading

PSYC 798 - Capstone
Credits: 0
This is a zero credit course to indicate on the transcript that the capstone requirement is fulfilled. PSYC majors only.
Grade Mode: Credit/Fail Grading

PSYC 799 - Senior Honors Thesis
Credits: 4
Under supervision of psychology department faculty members, students complete the honors projects proposed and begun in PSYC 797. The honors project, which should be empirical in nature, culminates in an oral presentation at the end of the semester. (Typically offered in spring).
Attributes: Honors course
Prerequisite(s): PSYC 797 with a minimum grade of D-.
Grade Mode: Letter Grading

Public Administration (PA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PA 700 - Foundations and Theories of Public Administration
Credits: 4
The foundations and Theories of Public Administration will explore the theoretical foundations of public administration and their practical applications. It will look to the early literature that helped shape the field along with a contemporary perspective of public administration. Students will understand the theoretical foundations of public administration, understand the different roles of the public sector, understand the historical roots of public administration, and understand the applied aspects of public administration.
Grade Mode: Letter Grading

PA 709 - Organization and Management in Public and Nonprofit Sectors
Credits: 4
This course is about management theory and practice. It provides the opportunity to acquire the theoretical knowledge as well as the practical methods necessary to manage organizations in the public and nonprofit sectors. Embedded in this idea of management learning is the proposition that theory and practice of management are closely connected.
Grade Mode: Letter Grading

PA 718 - Nonprofit Management
Credits: 4
Nonprofits play a major role in our lives although we may not be aware of their influence. The nonprofit sector in the United States has grown exponentially over he past twenty-five years, more rapidly than the government and for-profit sectors, making it the fastest growing segment of our economy. This course provides students with a practical hands-on approach to the non-profit sector, its governance and management including finance, fundraising, personnel management, strategic planning, and risk management.
Grade Mode: Letter Grading

Public Administration (PADM) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PADM 500 - Introduction to Public Administration
Credits: 4
This course introduces concepts of effective leadership for public service programs in the governmental and public sectors. Students will have the opportunity to become acquainted with public administration and policy as fields of study, such as the nature of bureaucracy, public policy, allocation of resources and public budgeting, leadership, supervision, and organization of civil servants.
Equivalent(s): MGMT 501G, PADM 500G
Grade Mode: Letter Grading

PADM 600 - Public Policy Development and Implementation
Credits: 4
This course is an overview of policy formulation and administration in the context of U.S. federal, state, and local governments. The relationship between politics and administration is explored with reference to the classical policy/administration dichotomy. The content of this course aims to familiarize students with the public policy process, equipping students with analytical frameworks and practical tools to improve their engagement with the process through their work. By the conclusion of this course, students will have the opportunity to develop their knowledge and skills to effectively apply these tools as future elected public officials, public agency managers, policy analysts, and public service providers.
Attributes: Writing Intensive Course
Prerequisite(s): PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D-.
Equivalent(s): PADM 600G
Grade Mode: Letter Grading

PADM 645 - Public Sector Budget and Finance
Credits: 4
This course examines public budgeting in the context of its institutional, procedural, and political dimensions. Students will have the opportunity to learn about budgeting, accounting, and financial management concepts and techniques necessary for planning, analysis, and decision making in government and public sector organizations. This course also presents an overview of budgetary reforms, budget theories and techniques, and comparative perspectives of federal, state, and local budgeting methods. Further topics may include types of budgets and budget reports; the budgeting process at the local, state, and federal levels; basic expenditure and revenue forecasting and analysis; and communication strategies for financial and budgetary matters.
Equivalent(s): PADM 610G
Grade Mode: Letter Grading

PADM 670 - Human Resources in the Public Sector
Credits: 4
This course will focus on human resources in public sector practices. The history and changing role of public sector human resource strategies will be explored by students to develop an understanding of how individuals from diverse backgrounds, interests, and skill sets can work together and contribute towards an organization's mission. Students will have the opportunity to build capacity to influence people both inside and outside of an organization, optimize the structure and culture of their organization, make effective decisions, resolve conflicts, and drive change for higher organizational performance. Further, students will be given the opportunity to develop and enhance their supervisory and leadership skills so they can manage and lead high-performing, successful organizations.
Attributes: Writing Intensive Course
Equivalent(s): PADM 615G
Grade Mode: Letter Grading

Public Policy (PPOL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

PPOL 706 - Fundamentals of Policy Analysis
Credits: 4
This foundational course in public policy analysis will introduce students to the policymaking process. Students will learn about the connection between research and policy, and develop fundamental skills in research design. Tools and techniques for policy analysis will be explored. The importance of effectively conveying results to stakeholders will be discussed, and students will work in teams to design and present a substantial policy research and analysis project.
Grade Mode: Letter Grading

PPOL 712 - Strategies for Policy Impact
Credits: 4
This course explores how to develop and implement strategies that drive policy change. You will learn how to analyze various approaches to changing policy, consider context for the change (timing, climate for change, opposition) and then identify the most viable option to use to influence policy change. This class is about influencing change versus the mechanics of designing policy. Students will review different influence models, discuss which ones work best in various situations, and identify how influence models connect to campaigns that influence legislative and institutional policy. You will better understand policy change efforts by reviewing examples and learning the central elements of a successful endeavor. Finally, students, in teams, will choose their own adventure and create their own policy change strategy.
Grade Mode: Letter Grading

PPOL 722 - Media Strategy and Communication
Credits: 4
In this course, we will introduce contemporary media strategies and learn how to use them to influence public policy. We will focus on: Recognizing the dynamics of the news cycle and how to identify opportunities in a saturated media landscape; Developing a message and a strategy to convey the message; Writing to advance a message in different media; Verbal skills to deliver a policy message via TED talk, panel or news conference; Nuance and differences when interacting with TV, radio, print, and social social; Introducing and practicing interview skills for TV, video, radio, print, and online media; and Understanding the power of image and authenticity.
Grade Mode: Letter Grading

Race & Ethnic Studies (RES)

Recreation Management & Policy (RMP)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

RMP 400 - Recreation Management and Policy Continuing Enrollment
Credits: 0
This course enables BS students to maintain continuous enrollment in RMP as part of their matriculation plan until after their degree is formally awarded.
Repeat Rule: May be repeated up to 2 times.
Grade Mode: Not graded

RMP 411 - Applied Recreation Risk Management
Credits: 3
This course prepares students to enter the recreation profession by focusing on foundational risk management principles, skills, and certifications. Topics include types of risk, personal and organizational risk awareness, first aid, CPR, AED, defensive driving, sexual harassment prevention, youth/child protection, and bloodborne pathogen management. By the end of the course, students will have the training and certification necessary to assume early-stage recreational leadership roles on and off campus.
Grade Mode: Letter Grading

RMP 444A - Taking the "Dis" out of Disability
Credits: 4
In contrast to the traditional view of disability as a defect, students learn how disability provides a unique vantage point on our world and can be perceived as an ordinary part of the twists and turns of life. Examines the history of social responses to disability, with an emphasis on the present day concepts of inclusion and self-determination. Students explore expressions of the disability experience through print and visual media.
Attributes: Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

RMP 490 - Recreation & Tourism in Society
Credits: 4
This course provides an overview of the historical and philosophical framework for the comparison of concepts, theories, and the inter-relationships between factors (social, economic, political, psychological) that influence our recreation and tourism experiences. Students explore how recreation is reflected in arts, literature, history, philosophy, psychology, sociology, economics, and anthropology, and will be introduced to different delivery systems, as well as a variety of relevant professional associations and career opportunities.
Attributes: Social Science (Discovery)
Equivalent(s): RMP 490H
Grade Mode: Letter Grading

RMP 500 - Therapeutic Recreation Methods in Physical Rehabilitation Settings
Credits: 1
This course introduces students to a variety of assistive techniques, devices and equipment used in Therapeutic Recreation settings that allow individuals with illnesses and disabilities achieve maximum independence and functional capacity to maintain optimal health and leisure functioning. Students learn and apply skills in anatomical orientation and positioning, universal precautions, assistive technology and adapted equipment for recreation including manual, power, sports, and all-terrain wheelchairs, wheelchair mobility skills, proper body mechanics, transfer and lifting techniques, ambulation assists, and sighted guide techniques.
Co-requisite: RMP 503
Grade Mode: Letter Grading

RMP 501 - Diversity, Equity, Inclusion, and Justice for Recreation Services
Credits: 4
Required course for all students in the Department of Recreation Management and Policy. Presents and discusses the concepts of Diversity, Equity, Inclusion and Justice (DEIJ) of marginalized groups for recreation services (e.g., disability, gender, race, LGBTQIA+, etc.). Students will learn and apply DEIJ concepts to recreation policies, planning, programming, implementation, and evaluation practices. Emphasis on volunteer experiences (lab), classroom activities, lectures, discussions, and experiential learning.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

RMP 502 - Foundations of Therapeutic Recreation
Credits: 4
History and professional concepts of therapeutic recreation and the roles and functions of the therapeutic recreation specialist.
Grade Mode: Letter Grading

RMP 503 - Therapeutic Recreation Rehabilitation Principles & Interventions
Credits: 4
Introduces the rehabilitation principles and recreational therapy interventions used by therapeutic recreation specialists to improve functioning for people with physical and cognitive impairments. Students learn and apply fundamental processes of clinical reasoning and treatment program planning to improve quality of life. A lab provides students with the opportunity to use a variety of assistive techniques, adaptive devices, and equipment to support individuals and achieve maximum independence and promote a healthy leisure lifestyle.
Co-requisite: RMP 500
Grade Mode: Letter Grading
Special Fee: Yes

RMP 504 - Therapeutic Recreation Mental Health Principles and Interventions
Credits: 4
Introduces mental health principles and recreational therapy interventions to improve functioning for people with emotional, social, and behavioral impairments. Students will learn and apply fundamental processes of clinical reasoning and treatment program planning to improve quality of life for persons with emotional, social, and behavioral impairments. Restricted to RMP majors.
Grade Mode: Letter Grading

RMP 505 - Therapeutic Recreation: Aging Services Principles & Interventions
Credits: 4
This course is designated to introduce the student to the field of therapeutic recreation and its nexus with the older adult population. We will explore the role leisure and recreation, in concert with the recreational therapist, plays in the well-being of older adults. Topics of study will include: Health Promotion and Prevention; Geriatric Syndromes, Chronic Health Conditions; Roles of Recreational Therapist in Geriatrics; Common Illness, Health Settings; and Interventions.
Grade Mode: Letter Grading

RMP 511 - Issues of Wilderness and Nature in American Society
Credits: 4
Provides students with an overview of the evolving relationship between wilderness/nature and American society. Examines the philosophy, ethics, and societal values in American society and its relationship to our natural wilderness. Recent issues are used as case studies in order for students to articulate, defend, and critique the ethical issues presented. Students are responsible for understanding and applying philosophical approaches developed by philosophers, writers, and activists associated with the wilderness, sustainability, biodiversity, hunting, suburban sprawl, environmental activism, endangered species, organic foods, and genetic engineering.
Attributes: Humanities(Disc)
Grade Mode: Letter Grading

RMP 515 - History of Outdoor Pursuits in North America
Credits: 4
Voluntary pursuits in the outdoors have defined American culture since the early 17th century. Over the past 400 years, activities in outdoor recreation an education have reflected Americans' spiritual aspirations, imperial ambitions, social concerns, and demographic changes. This course will give students the opportunity to learn how Americans' experiences in the outdoors have influenced and been influenced by major historical developments of the 17th, 18th, 19th and 20th, and early 21st centuries.
Attributes: Historical Perspectives(Disc)
Equivalent(s): KIN 515, OUT 515
Grade Mode: Letter Grading

RMP 557 - Program and Event Design
Credits: 4
This course introduces students to a range of approaches to recreation program and event design, and focuses on providing leisure experiences for all populations. Course topics include foundations of programming, program theories, needs assessment techniques, vision, mission, goals, and objectives, processes of group planning, public relations, program promotion, and program evaluation. Students will design and deliver a recreation program using a team approach.
Prerequisite(s): RMP 490 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 559 - Tourism and Event Marketing
Credits: 4
This course prepares students to apply marketing principles and strategies to recreation programs and events, including procedures for developing marketing plans for recreation and event organizations. Course content includes planning the marketing mix, with a focus on the recreation or event product, price, place, and promotion. The course covers the application of marketing and communication strategies delivered through social and audio-visual media. The culminating project consists of a marketing and communication plan for a recreation/leisure service agency.
Prerequisite(s): RMP 490 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 560 - Recreational Sport Management
Credits: 4
Explores and examines the theoretical foundations and basic skill methods, and techniques necessary for the effective and efficient delivery of recreational sport programs within a variety of collegiate, public, quasi-public, and private settings, agencies and/or organizations.
Grade Mode: Letter Grading

RMP 561 - Campus Recreation Applied Leadership
Credits: 2
This course will provide students with foundational understanding needed to lead and facilitate programs in campus recreation settings. Students will learn about the principles underlying campus recreation staffing, supervision, and program policies.
Grade Mode: Credit/Fail Grading

RMP 563 - Recreation Management and Policy Practicum
Credits: 3
Designed to provide first and second year RMP majors the opportunity to observe and practice leadership skills and risk management practices in clinical and community-based settings. Students complete a 45 hour practicum at an approved site. Successful completion of a practicum is prerequisite to the professional internship, RMP 764. Students are responsible for transportation and housing if required.
Prerequisite(s): RMP 490 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Credit/Fail Grading

RMP 571 - Mountain Resort Practicum
Credits: 3
Designed to provide UNH undergraduate students interested in ski industry and mountain resort management the opportunity to observe and practice leadership skills and risk management practices in a destination mountain resort setting. Students complete a 45 hour practicum at an approved site within the ski, snowboard, or mountain resort industry. Successful completion of RMP 571 serves as a prerequisite for the RMP professional internship, RMP 764. This course is required for Ski Resort Management Cognate candidates.
Repeat Rule: May be repeated for a maximum of 6 credits. May be repeated up to 2 times.
Grade Mode: Credit/Fail Grading

RMP 593 - Special Topics
Credits: 2-4
A) Camping and Outdoor Education for Individuals with Disabilities, B) State Parks: Their Management and Role, C) Therapeutic Recreation in the School Setting, D) Social Psychology of Leisure, E) New Hampshire's Recreation/Ski Industry, F) Child Life Internship, J) Campus Recreation Applied Leadership, K-Z) Interdisciplinary. Specialized courses covering information not presented in regular course offerings. Description of topics available in department office during preregistration. May be repeated but not in duplicate areas. Special fee for RMP 593G.
Equivalent(s): RMP 593W
Grade Mode: Credit/Fail Grading
Special Fee: Yes

RMP 603 - New Hampshire Ski Industry Management
Credits: 4
This course examines the New Hampshire ski and snowboard industry from several distinct but interrelated perspectives: social, technological, environmental, historical, economic, and operational. Students will explore skiing as a holistic and fulfilling segment of the outdoor recreation field, while gaining an understanding of its interdependence with the state's economy, the natural environment, and New Hampshire's unique cultural history. The influence of New Hampshire's ski industry on the history and growth of the American ski industry will be examined, and the impacts of climate change and other environmental issues will be investigated in light on ongoing societal shifts and relevant technological advancements.
Grade Mode: Letter Grading

RMP 612 - Therapeutic Communication and Facilitation Techniques in Therapeutic Recreation
Credits: 0 or 4
Addresses specific clinical knowledge and skills essential to therapeutic recreation service delivery including clinical interviewing, group process, leisure education, treatment approaches, and intervention techniques.
Prerequisite(s): RMP 502 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 613 - Interventions and Documentation in Therapeutic Recreation
Credits: 0 or 3
This course emphasizes theory and concepts in clinical intervention within therapeutic recreation settings. Students learn to identify and select appropriate facilitation techniques for a variety of client needs. Students also learn to write and interpret practice-based documentation. Students are afforded the opportunity to practice and apply concepts learned.
Co-requisite: RMP 612
Prerequisite(s): RMP 502 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 614 - Assessment and Treatment Planning in Therapeutic Recreation
Credits: 4
Addresses the principles of activity analysis, client assessment, documentation, individualized program planning, selection of interventions, and collaboration with a treatment team.
Attributes: Writing Intensive Course
Prerequisite(s): RMP 502 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 615 - Clinical Lab in Therapeutic Recreation
Credits: 2
A clinical lab that provides students with the opportunity to apply principles central to the effective delivery of therapeutic recreation individualized treatment planning, client assessment, documentation, and activity analysis with members of one of two community sites located in the Seacoast region. Students are required to participate in weekly sessions (five to six hours per week) for a total of 15 weeks.
Co-requisite: RMP 614
Prerequisite(s): RMP 502 with a minimum grade of C.
Grade Mode: Credit/Fail Grading

RMP 641 - Group Facilitation and Leadership
Credits: 4
Course provides students with an introduction to the facilitation and leadership skills necessary to manage a diverse range of client groups and modalities. Students will learn how to prepare and deliver a program or meeting to address client objectives. Specific topics include group process, framing and sequencing, meeting management/facilitation, operating procedures for group initiative challenges, and remote meeting facilitation. Course occurs at the UNH Browne Center.
Grade Mode: Letter Grading

RMP 654 - Professional Development and Ethics
Credits: 3
Focuses on preparing students for the internship experience through the identification of career goals, selection of an approved internship site, and administration of risk audits of selected sites. A portfolio emphasizing process skills in resume construction, interviewing techniques, establishing internship goals and objectives, institutional and personal risks, and self-assessment is developed. Documenting Certification in Basic First Aid and CPR (infant, child, adult) is a component of this course.
Prerequisite(s): RMP 490 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 661 - Organizational Leadership in Recreation Services
Credits: 4
This course explores the principles of organizational leadership and management within parks, recreation, tourism, and related organizations. Students examine organizational behavior, team leadership, and systems thinking to understand how leaders plan, organize, staff, direct, and control resources to achieve mission-driven goals. Through applied learning, students practice key operational skills in supervision, communication, human resource processes, and decision-making while managing teams ethically and effectively. Coursework also develops strategic management competencies, including change management, organizational culture analysis, and adaptive leadership. By the end of the course, students will be equipped to lead people and organizations with integrity, adaptability, and vision in dynamic recreation environments.
Prerequisite(s): RMP 490 with a minimum grade of C.
Equivalent(s): HMGT 635
Grade Mode: Letter Grading

RMP 663 - Financial Management in Recreation Services
Credits: 4
This course provides students with an understanding of the methods, tools, and approaches used by recreation, parks, outdoor, and event planning agencies to manage financial resources effectively. Students will examine diverse funding sources, budgeting and accounting principles, and ethical approaches to procurement, partnerships, and capital improvement. Emphasis is placed on strategic and transparent financial planning that supports sustainable operations and long-term impact in various organizational contexts.
Prerequisite(s): RMP 490 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 668 - Youth Culture and Programs
Credits: 4
Emphasizes the identification of community and personal issues youth face in growing up as well as institutional and programmatic support available to assist youth. The course also examines the leadership, administrative, financial, and marketing tools necessary to develop successful youth programs and services. Service learning fieldwork and the completion of a background check are required.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

RMP 670 - Venue Management Design & Operations
Credits: 4
Provides students with an orientation to the management, design, operation, and functions of various recreation venues. Topics include venue management, operational considerations, support features, and auxiliary functions that impact the manager's role. Students gain insight into key areas of venue management, design, and operations through visits to actual recreation venues.
Grade Mode: Letter Grading
Special Fee: Yes

RMP 680 - Festival and Community Event Planning
Credits: 4
Introduces the planning, marketing, management, and evaluation of festivals and community events. Explores the theories and practices relevant to successful event planning for host community residents and visitors.
Grade Mode: Letter Grading

RMP 693 - Teaching Assistantship
Credits: 2
Students serve as teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching and administrative duties.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

RMP 700H - Senior Honors Project
Credits: 4-6
Under the direction of an RMP faculty member, students complete either a supervised research or applied field study project that builds on their honors coursework. Students submit a written proposal for approval and present the results at the completion of their project. Applied studies address a specific need or problem of a local agency or organization.
Attributes: Honors course
Grade Mode: Letter Grading

RMP 711 - Recreation Resource Management
Credits: 4
Examines the supply and demand of natural resources for outdoor recreation uses, with emphasis on relationships between public and private roles and responsibilities. Social, environmental, and economic impacts of outdoor recreation use are discussed. Current principles and techniques of recreation resource planning and management are outlined.
Grade Mode: Letter Grading

RMP 720 - Adaptive Sport Facilitation for Recreation Therapy and Related Professions
Credits: 4
This course takes a strengths-based approach to examining adaptive sports and recreation for recreational therapists and related professions, with a focus on best practices and risk management in community-based settings. This is an experiential learning course, whereby students will learn how to design, plan, and facilitate a variety of adaptive sports for people with disabilities. Students will learn and apply processes for assessing, selecting, and fitting adaptive sports and recreation equipment for individuals with disabilities.
Grade Mode: Letter Grading

RMP 724 - Research, Evaluation, and Data-Driven Decisions
Credits: 4
This course explores the applications and limitations of research and evaluation within the recreation field, emphasizing the practical application of concepts and tools within recreation, event, and allied health services. Topics include the utility and feasibility of evaluation, evaluation planning and design (including quantitative and qualitative research design, methods, and analysis), evaluation management and data collection, analysis and reporting, and decision-making based on evaluation data.
Attributes: Writing Intensive Course
Prerequisite(s): RMP 490 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 740 - Therapeutic Recreation Service Delivery in Community Settings
Credits: 4
This course provides specialized knowledge and skills related to the practice of Recreational Therapy in a community setting. The course will encourage students to expand their understanding of philosophical constructs, public policy, and professional programs. Specific facilitation techniques and treatment modalities will be introduced as well as information specific to the therapeutic process as it is observed in these settings.
Prerequisite(s): RMP 502 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 764 - Internship
Credits: 8 or 12
Supervised professional work experience in an approved recreation, park, tourism, or healthcare agency. Students participate in a 10 week (400 hour) or 14 week (560 hour) internship experience after receiving approval from their Academic Advisor and the Internship Coordinator.
Prerequisite(s): RMP 654 with a minimum grade of C.
Grade Mode: Credit/Fail Grading

RMP 768 - Theories and Philosophies of Youth Development
Credits: 4
This course provides students with a foundation in the theories and philosophies associated with the field of youth development. Students will analyze the strengths and limitations of various theories, philosophies, and ideas as they are applied in practice and represented in research studies. Examples include: Ecological systems theory, positive youth development, sociocultural perspectives, risk/protective factors, and developmental assets.
Grade Mode: Letter Grading

RMP 772 - Law and Public Policy in Leisure Services
Credits: 4
Topics including the law of torts, contracts, property, civil rights, risk management, and legal research are addressed in the context of leisure services and recreation resources. Public policy and professional advocacy implications are examined in relation to legislative and judicial systems.
Attributes: Writing Intensive Course
Prerequisite(s): RMP 490 with a minimum grade of C.
Grade Mode: Letter Grading

RMP 775 - Entrepreneurial and Commercial Recreation
Credits: 4
Principles of business planning and development as applied to the private sector leisure services industry. Emphasizes knowledge of key commercial leisure services profiles and their intersection with allied professions such as hospitality and tourism. Course topics include entrepreneurship, business planning, needs assessment, product development, selling, financing, legal designations, and business operations leading to the development of a business plan for a new entrepreneurial recreation enterprise.
Grade Mode: Letter Grading

RMP 776 - Human Dimensions of Natural Environments
Credits: 4
This course draws on research and theories that illuminate the profound connections between nature and human health and wellbeing. Students will explore contemporary philosophical, psychological, and cultural perspectives to understand how both organized and unstructured experiences in the outdoors support human flourishing. Students review research and gain hands-on practice with ideas in the context of outdoor recreation, resource management, education, and other human service fields.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

RMP 780 - Event and Experience Design
Credits: 4
This course will explore social and technical aspects of event coordinating, with a focus on the production associated with management, strategic planning and evaluation of event. Throughout the course, students will gain hands-on experience working with volunteers and clients. Students will have the opportunity to plan and execute an event. Students will hone their skills in planning, executing, marketing, risk management and budgeting, while discovering how best practices are applicable to effective event coordinating.
Grade Mode: Letter Grading

RMP 796 - Independent Study
Credits: 1-4
Individual study and/or research relating to leisure-oriented topics.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): LMT 796, RMP 796W
Grade Mode: Letter Grading

RMP 796W - Independent Study
Credits: 1-4
Individual study and/or research relating to leisure-oriented topics.
Attributes: Writing Intensive Course
Equivalent(s): RMP 796
Grade Mode: Letter Grading

Religious Studies (RS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

RS 483 - History of World Religions
Credits: 4
Introduces the religions of the world in terms of historical development, relationship to society, belief system, central texts, and ritual practices. Begins with the religions of small and tribal societies (e.g., African, Native American), moves through religions of complex societies (e.g., Hinduism), and then studies the various traditions that emanated from ancient revelations: Zoroastrianism, Buddhism, Judaism, Christianity, Islam, and certain new forms of Christianity.
Attributes: Historical Perspectives(Disc)
Equivalent(s): HIST 483
Grade Mode: Letter Grading

RS 505 - Introduction to Religion
Credits: 4
This course provides an introduction to religion, exploring the various ways that this phenomenon has been understood, approached, practiced, and studied across human history. The course will examine the different ways that religion can be defined, drawing from a variety of humanities and other disciplines. Foundational theories explaining the origins, persistence, and continued relevance of religion will be compared and applied to different traditions. Topics include concepts of divinity, rituals, myth, mysticism and spirituality, pilgrimage, death and the afterlife, and ultimate reality.
Attributes: Humanities(Disc)
Equivalent(s): HUMA 505
Grade Mode: Letter Grading

Russian (RUSS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

RUSS 401 - Elementary Russian I
Credits: 4
For students without previous training in Russian. An introduction to contemporary standard Russian. Includes a cultural component. Topics include those which enable students to function in Russian in everyday situations (i.e. food, leisure activities, literature, transportation, music, sports, daily life).
Grade Mode: Letter Grading

RUSS 402 - Elementary Russian II
Credits: 4
For students without previous training in Russian. An introduction to contemporary standard Russian. Includes a cultural component. Topics include those which enable students to function in Russian in everyday situations (i.e. food, leisure activities, literature, transportation, music, sports, daily life.) Cannot be taken separately except with permission of instructor.
Attributes: Foreign Language Requirement
Prerequisite(s): RUSS 401 with a minimum grade of D-.
Grade Mode: Letter Grading

RUSS 503 - Intermediate Russian I
Credits: 4
Continued work in grammar, and writing with cultural components. A review of the fundamentals of grammar and syntax. Readings and cultural material included. Topics include: the university, student life, everyday routines, holidays.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): RUSS 402 with a minimum grade of D-.
Grade Mode: Letter Grading

RUSS 504 - Intermediate Russian II
Credits: 4
Continued work in grammar, and writing with cultural components. A review of the fundamentals of grammar and syntax. Readings and cultural material included. Topics include: description of people, living arrangements, weather, cities, travel.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): RUSS 503 with a minimum grade of D-.
Grade Mode: Letter Grading

RUSS 515 - Introduction to Russia: Contemporary Society and Culture
Credits: 4
Introduction to contemporary Russian society and culture in English. Examines the "Russian mind" (as it was before 1917), the "Soviet mind," and how the two have clashed. Included is also a close examination of how Russians are adapting to the changes that have taken place in their country since the collapse of communism. Material includes readings, films, and realia. Themes to be discussed include leadership; authority and power; the Russian soul; family, women, youth, education, holidays and celebrations; and the new Russians.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

RUSS 521W - Devils, Deities, and Madness in Russian Literature
Credits: 4
Introduces Russian literature from a variety of perspectives. Selected works by famous and lesser known Russian writers on the themes of devils, deities, and madness. Literary texts, as well as film versions of literary texts, are considered in their historical and cultural contexts. Lectures, readings, and discussions in English. Open to all students, including freshmen.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): RUSS 521
Grade Mode: Letter Grading

RUSS 525 - Russia: Mythology and Propaganda
Credits: 4
Exploration of the relationship between mythology and culture as a part of the cultural identity of the Russian people, before the 1917 Revolution, during the Communist period, and since the fall of the Soviet Union. Focus on pre 1917 Slavic pagan, Christian, and folk mythology vis-a-vis Western mythology, on 20C propaganda and control of the "public mind" designed to reshape national identity and on the current deconstruction, reform, and rebirth of the old mythology.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

RUSS 631 - Advanced Russian Conversation and Composition
Credits: 4
Advanced spoken and written Russian designed to include all four language skills (speaking, reading, writing, listening.) Readings on contemporary cultural topics and vocabulary building. Composition and conversation based on Russian-language media and literature.
Attributes: Foreign Language Requirement
Prerequisite(s): RUSS 504 with a minimum grade of D-.
Grade Mode: Letter Grading

RUSS 632 - Advanced Russian Conversation and Composition
Credits: 4
Advanced spoken and written Russian designed to include all four language skills (speaking, reading, writing, listening.) Readings on contemporary cultural topics and vocabulary building. Composition and conversation based on Russian-language media and literature.
Attributes: Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): RUSS 504 with a minimum grade of D-.
Grade Mode: Letter Grading

RUSS 691W - Readings in Russian Literature
Credits: 1-4
Linguistic and stylistic characteristics of one of the major works in Russian literature. Study of the epoch when the work was written, as well as reading the literary work and discussing it. Students learn to analyze a literary work in the target language. Readings, class discussions, and papers conducted entirely in Russian.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

RUSS 733 - History of Slavic Languages and Culture
Credits: 4
Students look at modern Russian (standard and dialects) through the perspective of the history of the language. Focuses on the evolution of phonetics and grammar as well as etymology. Russian's relation to other Slavic languages is discussed. Students look at the language through the lens of history, culture, and politics.
Equivalent(s): RUSS 790
Grade Mode: Letter Grading

RUSS 795 - Independent Study
Credits: 1-4
Open to highly qualified juniors and seniors. To be elected only with permission of the Russian program coordinator and the supervising faculty member or members. Barring duplication of subject, may be repeated for credit.
Repeat Rule: May be repeated up to 4 times.
Grade Mode: Letter Grading

RUSS 797 - Special Studies in Russian Language, Literature, and Culture
Credits: 2 or 4
Selected topics in language, literature, and culture. Barring duplication of subject, may be repeated for credit.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Science (SCI) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SCI 412 - Introduction to Astronomy
Credits: 4
Through a variety of activities, this course provides the student with a basic background in astronomy which enhances appreciation of the universe and the technology used in our attempt to understand it. This course exposes the student to the real, measurable, and verifiable connections that exist between the universe and life on Earth. Readings, observations, discussions, and other activities will explicate that what goes on out there can and does have a real and measurable influence on what happens down here.
Attributes: Physical Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 512G
Grade Mode: Letter Grading

SCI 470 - Physical Geography
Credits: 4
Physical Geography is the study of planet Earth. In this course, students examine the nature of the Earth's six spheres: the atmosphere (the layer of gases); hydrosphere (the water in oceans, streams, lakes, etc.); cryosphere (the ice in glaciers); geosphere (the solid earth), biosphere (life); and anthrosphere (humans and human activities). By investigating the processes operating within each sphere and how these spheres interact with each other to shape all aspects of our planet, students gain an understanding of how the Earth works and how landscape features have formed.
Attributes: Physical Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 518G
Grade Mode: Letter Grading

SCI 480 - Introduction to Oceanography
Credits: 4
This course examines the ocean, including the processes that control its major features, the life within it, and its impact on earth processes. An ecological approach is used to integrate the geological, biological, chemical, and physical aspects of oceanography. Special emphasis is placed on the coastal environment.
Attributes: Physical Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 520G
Mutual Exclusion: No credit for students who have taken ESCI 501.
Grade Mode: Letter Grading

SCI 490 - Human Biology
Credits: 4
This course is an introductory study of anatomy and physiology that provides a foundation in biological science and the structure and function of the human body. Topics explored include cellular biology and molecular composition, tissues, organs, and how the human body systems perform and adapt. The building of a relevant vocabulary and a foundation of facts and concepts provides the background needed for further understanding of developments in bioscience and biomedicine.
Attributes: Biological Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 505G
Grade Mode: Letter Grading

SCI 502 - Nutrition and Health
Credits: 4
This course provides the student with a foundation in the science of human nutrition and metabolism. The research supporting direct and indirect links between nutrition and disease is introduced. Topics covered may include the biological functions and food sources of each nutrient; nutrition guidelines and standards; digestion and absorption of nutrients; nutrition throughout the lifecycle; food safety and technology; energy balance and weight management; eating disorders and disturbances; and physical activity.
Attributes: Biological Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 502G
Grade Mode: Letter Grading

SCI 508 - Issues in Women's Health
Credits: 4
This course examines women's health and women's health care from biological, medical, historical, political, and social perspectives. It begins with the study of endocrinology and the physiological processes unique to women. Factors related to health care issues specific to women are examined. Societal and health care constraints, which hinder women from achieving their full health potential are also addressed. The course also presents information on women's health care practices, including the concept of self-care, and relates this to the development of educated consumerism in the health care industry.
Attributes: Biological Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 508G
Grade Mode: Letter Grading

SCI 528 - Natural History of Northern New England
Credits: 4
This course focuses on the evolutionary adaptations of plants and animals that allow them to survive and thrive through all of New England's seasons. Students are introduced to the origin and development of the diverse ecosystems of our region and their relationship to the resident and migratory wildlife of Northern New England. The effects of the Ice Age on northern New England's topography and on the rhythms of the animal and plant life cycles are investigated.
Attributes: Phys Natural World (Gen Ed)
Equivalent(s): SCI 528G
Grade Mode: Letter Grading

SCI 541 - Introduction to Environmental Science
Credits: 4
An introductory survey of global environmental problems such as global warming, acid rain, nuclear waste storage, agricultural runoff, and heavy metal contamination. This course explores the interrelationship between the natural environment and the effects of human activity resulting in pollution of air, water, and land. A major focus of the course is critical examination of ecological, economic, and political aspects of pollution in a global context.
Attributes: Physical Science(Discovery); Phys Natural World (Gen Ed); Writing Intensive Course
Equivalent(s): SCI 541G
Grade Mode: Letter Grading

SCI 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Science. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): SCI 544G
Grade Mode: Letter Grading

SCI 550 - Wellness and the Human Body
Credits: 4
This course examines the integration of the human body systems. Common pathologies that interfere with normal physiological function and quality of life are examined and evidence-based practices for disease prevention and wellness are addressed. Recommended: SCI 490.
Attributes: Biological Science(Discovery); Phys Natural World (Gen Ed)
Equivalent(s): SCI 603G
Grade Mode: Letter Grading

SCI 575 - Introduction to Lifestyle Medicine
Credits: 4
This course introduces students to the domain of lifestyle medicine, where they will discover how everyday choices can transform well-being and health outcomes. Emphasizing evidence-based strategies, students explore the six essential pillars of lifestyle medicine – nutrition, physical activity, sleep, stress management, social connections, and avoidance of risky substance use – and develop skills to apply these concepts in personal and professional contexts.
Attributes: Biological Science(Discovery); Phys Natural World (Gen Ed)
Grade Mode: Letter Grading

SCI 604 - Principles of Exercise Science
Credits: 4
This is an applied course addressing exercise physiology and integrated kinesiology principles. Students will examine how the mind and body respond to various intensities and modalities of exercise as well as explore various methods of measuring physiological variables such as cardiovascular fitness, muscular strength and endurance, flexibility, and body composition. Topics include: energy systems, neuromuscular concepts, and functions of the cardiovascular and respiratory systems during rest and exercise. Students enrolled in this course are required to complete the college's risk waiver prior to participating in any physical activity.
Attributes: Biological Science(Discovery); Phys Natural World (Gen Ed)
Prerequisite(s): SCI 490 with a minimum grade of D- or SCI 505G with a minimum grade of D-.
Equivalent(s): SCI 604G
Grade Mode: Letter Grading

SCI 610 - Contemporary Issues in Personal and Global Health
Credits: 4
This course explores current issues in health from a scientific lens. Students will examine diverse factors that influence the wellness-illness continuum related to a specific topic. Perspectives include the biological, sociocultural, behavioral, and public health implications, to these personal and global health challenges.
Attributes: Environment,TechSociety(Disc); Phys Natural World (Gen Ed); Writing Intensive Course
Equivalent(s): SCI 610G
Grade Mode: Letter Grading

SCI 615 - Fitness and Health
Credits: 4
This course presents the concepts of physical activity and exercise that connect to our health and well-being. Students will study how exercise is a mechanism to improve fitness, control weight, cope with life stressors, and optimize mindset. Students will have the opportunity to explore how the body and mind respond to different types of physical activity and the resulting health improvements of physical activity recommendations. Health behaviors and tools that support physical activity as part of a holistic approach to wellness will be addressed.
Attributes: Phys Natural World (Gen Ed)
Equivalent(s): SCI 615G
Grade Mode: Letter Grading

SCI 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in Science. Course content changes from term to term. It is expected that the student will have prior course work or experience in the subject area.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): SCI 644G
Grade Mode: Letter Grading

Sign Language Interpreting (INTR)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

INTR 430 - Introduction to Interpretation
Credits: 4
A survey of traditional and contemporary perspectives on interpretation and interpreters; introduces the cognitive processes involved in interpretation and factors that influence those processes. Several models of interpretation explored. Particular attention given to interpretation as an intercultural, as well as inter-lingual, process. Students engage in a research project related to course content.
Grade Mode: Letter Grading

INTR 438 - A Socio-cultural Perspective on the Deaf Community
Credits: 4
Introduction to the deaf community and deaf culture. Discussion of similarities to, and differences from, mainstream hearing culture. Supplemental videotapes focus on aspects of culture including deaf education, autobiographical sketches, deaf norms and values, and deaf literature and folklore. Theoretical issues of culture and linguistics applied to deaf culture, American Sign Language, and the variety of cultural perspectives of the deaf community. Students engage in a research project related to course content.
Attributes: Social Science (Discovery); Writing Intensive Course
Prerequisite(s): ENGL 401 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 439 - Ethics and Professional Standards for Interpreters
Credits: 4
Seminar course using readings, theory, and discussion of hypothetical situations and role plays to explore ethical standards and dilemmas in ASL-English interpretation. Covers personal and professional values, ethics, and morality; professional principles; power, responsibility, and group dynamics; the interpreter's role; cross-cultural issues; and the decision-making process. Students engage in a research project related to course content.
Attributes: Writing Intensive Course
Prerequisite(s): INTR 430 with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 539 - Comparative Linguistic Analysis for Interpreters
Credits: 4
Examines the basic similarities and differences between the linguistic structure of American Sign Language and spoken English; focuses on each language's communication functions and how they serve these functions. Students engage in a research project related to course content.
Prerequisite(s): ASL 532 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 540 - Translation
Credits: 0 or 4
Introduction to theory and practice of translation. Students analyze pre-prepared interpretations and translations to discover how expert interpreters and translators construct meaning in the alternate language. Particular attention paid to the form/meaning distinction. Students prepare translations from texts of their choosing. Lab.
Prerequisite(s): ASL 532 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 599 - Special Topics
Credits: 1-4
Occasional offerings dependent on availability and interest of faculty. Barring duplication of subject, may be repeated.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

INTR 630 - Consecutive Interpretation I
Credits: 0 or 4
Introduction to the theory and practice of consecutive interpretation. Analyzes and integrates specific subtasks of the interpreting process culminating in the performance of prepared and spontaneous consecutive interpretations. Students work with a variety of texts, language models, and settings with the goal of engaging in the consecutive interpreting process by chunking information and constructing meaning in the alternate language. Lab.
Prerequisite(s): INTR 540 with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 636 - Consecutive Interpretation II
Credits: 0 or 4
Continues and advances the theory and practice of consecutive interpretation and introduces simultaneous interpretation. The focus of this course is on interactive discourse (dialogues). Particular attention is given to processes involved in the transition from consecutive to simultaneous interpreting, and determining when to use each mode of interpretation. The advantages and limitations of both types of interpreting are compared. Students apply theoretical information to the process of simultaneous interpreting. Students also engage in a research project related to course content. Lab.
Prerequisite(s): INTR 630 with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 732 - Simultaneous Interpretation
Credits: 0 or 4
Focuses on simultaneous interpretation of expository discourse (presentations). Students further explore and apply theory learned in INTR 636 to a variety of texts, language models, and settings. Students engage in a research project related to course content. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): INTR 636 with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 734 - Field Experience and Seminar I
Credits: 4
Gives students the opportunity to observe professional working interpreters, with some direct interpreting experience as deemed appropriate. Students integrate knowledge, theoretical understanding, and skills acquired in the interpreting program by working closely with on-site supervisors (interpreters) in addition to attending a bi-weekly seminar with the UNHM field experience coordinator.
Prerequisite(s): INTR 732 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

INTR 735 - Field Experience and Seminar II
Credits: 4
Gives students the opportunity to gain supervised interpreting experience. Students engage in actual interpreting assignments and receive support and mentorship from a professional interpreter, enabling them to integrate knowledge, theoretical understanding, and skills acquired in the interpreting program. Students work closely with on-site supervisors (interpreters) in addition to attending a biweekly seminar with the UNHM field coordinator.
Prerequisite(s): INTR 734 with a minimum grade of D-.
Grade Mode: Letter Grading

Social Science (SOSC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SOSC 445 - Race & Diversity in the U.S.
Credits: 4
This course offers an introduction to the body of research and understanding about race and diverse identities and cultures, particularly in the context of the United States. Students will identify and describe terminology relating to race and diversity and will explore and describe the concepts of race, culture, class, sex, and gender identity as social constructs. Students will be asked to think critically about assumptions related to race- and sex-based hierarchical ideas and the effects of those assumptions on equitable economic, social, and political participation in the United States. Students will explore, and explain, the meaning of intersectionality as it relates to diverse identities (e.g. race, ethnicity, sex and gender, etc.).
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): SOSC 505G
Grade Mode: Letter Grading

SOSC 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Social Science. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): SOSC 544G
Grade Mode: Letter Grading

SOSC 602 - Men and Women in Cross-Cultural Perspectives
Credits: 4
This course provides a basis for analyzing alternatives in the relationships between men and women by looking at the roles women play in widely different societies; for example, in peasant, socialist, and capitalist industrial societies. The range of women's and men's roles in a variety of cultures is explored.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): SOSC 602G
Grade Mode: Letter Grading

SOSC 610 - Multicultural Perspectives in Education
Credits: 4
In this course, students will demonstrate an understanding of the major principles, theories, and research pertaining to the influence of cultural groups and subgroups on language learning, school achievement, and acculturation. Students will explore the role of cultural and social identities and demonstrate the ability to apply this knowledge in identifying environments that support both students' identities and academic needs. The role of the dominant culture and its impact on students will be explored.
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): EDU 631G
Grade Mode: Letter Grading

SOSC 630 - Aspects of Aging and Older Adulthood in a Modern Society
Credits: 4
The course introduces the physical, psychological, economic, and social aspects of aging. Attention is given to these key aspects of aging and their relationship to the characteristics of our aging population in the United States. The course also explores the impact of culture, family structure, and societal values on older adults in our society.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): SOSC 630G
Grade Mode: Letter Grading

SOSC 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in Social Science. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject area.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): SOSC 644G
Grade Mode: Letter Grading

SOSC 675 - Dynamics of Family Relationships
Credits: 4
This course examines evolving family structures in contemporary American society. The functions that a family serves are reviewed. The stages of family life and development, a variety of communication patterns, and the causes of breakups are addressed. The focus of the course is on helping students develop an ability to assess the strengths of a family system, evaluate the decision-making processes used by a family, and discuss the resiliency of the family. The course reviews a range of intervention methods that can be used to improve family relationships.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.
Equivalent(s): SOSC 604G
Grade Mode: Letter Grading

SOSC 680 - Stress and the Family
Credits: 4
This course examines the characteristics of both healthy and troubled families as they progress through each developmental stage. Change is a constant in each person's life; the family's response to change and the resulting stress is reviewed. A family's ability to manage extraordinary stressors, from both external and internal sources, is discussed. There is an emphasis on maladaptive patterns including family violence, runaways, and self-harming patterns. NOTE: Completion of SOSC 675 is recommended.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.
Equivalent(s): SOSC 605G
Grade Mode: Letter Grading

SOSC 710 - Social Stratification and Inequality
Credits: 4
This course explores the diversity of life experiences in contemporary America and assesses structured inequality in terms of socioeconomic, racial, gender, and sexuality differences. Using the theoretical framework of the social construction of race, gender, economic class, sexual orientation, and disability in historical contexts, the course examines how and why stratification systems emerge and are reproduced. Students then consider alternatives to the categories of difference and the processes, philosophical developments, institutions, and conditions that lead to and rely on power and privilege in modern society.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.
Equivalent(s): SOSC 637G
Grade Mode: Letter Grading

Social Work (SW)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SW 424 - Introduction to Social Work
Credits: 4
Introduces the learner to the field of social work with emphasis on the "person-in-environment" and attention to a range of practice approaches to understanding and assisting of the human condition. An overview of the history, values, and ethics of the profession. Includes various fields of practice in which social workers are employed.
Equivalent(s): SW 524
Grade Mode: Letter Grading

SW 440A - Honors/Healthy Communities: Environmental Justice and Social Change
Credits: 4
This course provides students with opportunities to examine and promote health within communities. Students explore components of healthy communities, with a focus on equity, sustainability, and social and environmental justice. The class examines historical, contemporary, and future factors that empower and constrain community residents and systems. Students practice skills for social change and engage in experiential activities and discussion designed to foster consideration of community health and social justice.
Attributes: Honors course; Social Science (Discovery)
Grade Mode: Letter Grading

SW 500 - I'm Old, So What! An introduction to aging in the United States
Credits: 4
This is the first of two mandatory courses for the GERO Minor, but any student may take it as an elective. It introduces the learner to the field of gerontology (the study of how people age). It explores the biological, psychosocial, and cognitive changes within the context of society. The history of ageism and its influence on how it has affected the individual, families, and society is presented. The range of independence among older people is examined. Various disciplines that work within the field of gerontology are reviewed. Lectures, novels, films and guest speakers help to examine growing old in the U.S.
Equivalent(s): GERO 500
Grade Mode: Letter Grading

SW 501 - Research Methods in Social Work
Credits: 4
This course introduces students to practitioner-researcher role in social work. The class includes critical evaluation of, and introduction to research including project design, survey and evaluative methodologies. The course introduces students to statistics used in research process. Each student completes an individual research project.
Attributes: Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): SW 424 with a minimum grade of D-.
Equivalent(s): SW 601
Grade Mode: Letter Grading

SW 525 - Social Welfare Policy: History of Social and Economic Justice
Credits: 4
Course considers the history and current status of social welfare policy in the United States, with specific considerations of policies related to immigration, social benefits, housing, labor, health, criminal justice, education, and child welfare. Students build skills related to: the critical consumption of information across perspectives, authors, and historical contexts; the integration of personal experiences in understanding the impact of social welfare policy; and the analysis of historical and current policies with a focus on their impacts on inclusivity, diversity, equity, anti-racism, and anti-oppression.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

SW 550 - Human Behavior and Social Environment I
Credits: 4
Introduces human behavior and development as it influences and is influenced by multiple factors in the social environment, including individual genetic and biological composition, race, gender, age, socioeconomic status, ethnicity, geographic location, physical appearance, and ability. How these factors operate throughout the life cycle. Provides a knowledge base and perspective to understand a client's behavior, attitude, and values in relation to the attitudes and values of the social work professional and the larger society.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

SW 551 - Human Behavior and Social Environment II
Credits: 4
Agents of socialization that most significantly affect family, group, and organizational development and behavior within an ecosystems framework. Particular attention is paid to the influence of class, gender, race, ethnicity, religion, age, sexual orientation and other aspects of diversity on development and behavior of larger systems.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

SW 565 - Introduction to Child Life
Credits: 4
When facing acute, chronic, or life-threatening illness and traumatic injuries, children and families have unique needs within the medical system. The purpose of this course is to provide an introduction to the theory and practice of the child life profession and family centered care. Topics include children's emotional reactions to hospitalization, use of play, preparation, and family support, designing healing environments, and specializations within the field.
Equivalent(s): HDFS 565
Grade Mode: Letter Grading

SW 611 - Behavioral Health and Well Being
Credits: 4
This course provides an overview of behavioral health and wellbeing through a social justice lens. While students will learn about the traditional approach to behavioral health including the diagnosis and assessment of "mental illness", they will also explore contemporary perspectives that view our behavioral health as inseparable from our bodies, families, communities, and other social determinants of health.
Equivalent(s): SW 711
Grade Mode: Letter Grading

SW 622 - Social Work Practice: Interventions with Individuals and Families
Credits: 4
Introduces students to the basic values, theories, and skills of social work practice. This is accomplished using lectures, discussions, readings, written exercises, and using laboratory and practice sessions. The intent is for students to use the experiential parts of the course (group work and interview simulations) to apply the conceptual and theoretical knowledge gained from lectures, class discussions and readings.
Prerequisite(s): SW 424 with a minimum grade of C.
Grade Mode: Letter Grading
Special Fee: Yes

SW 623 - Social Work Practice: Interventions with Groups, Organizations and Communities
Credits: 4
Continuation of SW 622. Delineation and study of intervention and change strategies differentiated with individuals, groups, and communities.
Attributes: Writing Intensive Course
Prerequisite(s): SW 622 with a minimum grade of C and SW 424 with a minimum grade of C.
Grade Mode: Letter Grading

SW 625 - Social Welfare Policy: Analysis, Activism, and Advocacy
Credits: 4
Course examines the role of and sources of power in policy development and policy implementation. Students develop skills related to: the critical analysis of power and privilege in the policy process; the continuous processes of self-reflection that are essential for social workers working in communities experiencing oppression; and the implementation of activism and advocacy efforts in the abolition of systems of oppression and the pursuit of social justice.
Attributes: Writing Intensive Course
Prerequisite(s): SW 424 with a minimum grade of C and SW 525 with a minimum grade of C.
Grade Mode: Letter Grading
Special Fee: Yes

SW 630 - Anti Oppressive Practice in Social Work
Credits: 4
The nature and impact of oppression will be defined and understood through historical, structural, intergroup, and psychological perspectives to support the development of human service majors. The social construction of individual and group identities and their relationship to oppression, prejudice, discrimination and powerlessness in social and interpersonal contexts will be explored and their impact on individuals, families, groups, organizations and communities. Students will have an opportunity to examine their own experiences of both privilege and oppression. Implications for practice that is strengths oriented and culturally sensitive will be explored. The unique challenges and dilemmas that historically marginalized groups experience will be examined. Students will learn to critically examine theories, concepts, and models of practice for all forms of bias. The course will combine lecture, discussion, and experiential learning as students have an opportunity to learn and apply skills of anti-oppressive practice.
Prerequisite(s): SW 525 with a minimum grade of D-.
Grade Mode: Letter Grading

SW 660 - Exploring Issues in Housing and Homelessness
Credits: 4
This course examines the meaning we attach to shelter in our society, and will examine multiple perspectives on the issues of housing and homelessness. The course will begin with a macro perspective and will draw on economic, humanistic, and historical perspectives to respond to this question, is housing a right? Students will also examine community development approaches to housing and their neighborhood effects. The course will conclude with an in-depth look at the complexities of homelessness.
Grade Mode: Letter Grading

SW 697 - Special Topics in Social Welfare
Credits: 4
Seminar for advanced majors. Topics may include: Alcohol and Alcoholism, Drugs and Chemical Dependency, Income Maintenance, Health Care, Child Welfare, Aging, Mental Health, or Developmental Disabilities. or study travel experiences. May be repeated for different topics.
Repeat Rule: May be repeated up to 1 time.
Grade Mode: Letter Grading
Special Fee: Yes

SW 702 - Aging and Society
Credits: 4
This course is designed to formalize students with biological, psychological, and sociological perspectives of aging and social services and policies for older people. This course covers a broad range of theories and contemporary issues in the field of aging. It also focuses on the strengths and limitations of existing programs and policies such as Social Security, Medicare, Medicaid, Supplemental Security Income, and other community services. Comparisons to developments in other countries will be made throughout the course to provide a broader context for understanding aging and programs/policies in the U.S.
Grade Mode: Letter Grading

SW 704 - Adolescents with Emotional and Behavioral Challenges
Credits: 4
This course focuses on the characteristics and needs of youth with emotional and behavioral challenges based upon socio-cultural and ecological theories, and provides exposure to family- and youth-driven practices and approaches that represent System of Care values and principles.
Grade Mode: Letter Grading

SW 705 - Child and Adolescent Risks and Resiliency: Program, Policy and Practice
Credits: 4
In this course, students apply an anti-oppressive lens in exploring the major social work practices, policies, and programs in the fields of child welfare and child/family services. Students will be introduced to current research related to the impact of trauma across the lifespan, with an emphasis on risk/resiliency factors within the family system. Students will learn how past/current child welfare policy and practice perpetuates social injustice, oppression, and trauma. Alternative approaches to support children and caregivers within the family, home, and community will be emphasized.
Grade Mode: Letter Grading

SW 707 - Child Maltreatment
Credits: 4
This course introduces students to advanced concepts in child welfare with an emphasis on child maltreatment assessment and child protective services. The course addresses emerging assessment practices, data informed child protective service provision, the role of technology in child welfare practice, and workforce development.
Grade Mode: Letter Grading

SW 710 - SW and the Digital Age
Credits: 4
This course focuses on the ever-changing landscape of technology as it relates to the Social Work field. Students will explore topics such as telehealth, online communities, assistive technology as well as digital advocacy. Ethical implications of the integration of technology into Social Work will be explored throughout the course. Students will work independently or collaboratively at a distance to create a multi-media project focused on a topic of interest within Digital Social Work.
Grade Mode: Letter Grading

SW 712 - Understanding Developmental Disabilities
Credits: 4
Analysis of the complex social contexts of people with developmental disabilities. Explores and questions traditional approaches and the current system. Examines family and community services and resources.
Grade Mode: Letter Grading

SW 713 - School Social Work
Credits: 4
The course examines the school as a social institution that serves to educate and socialize children into US society and the role of the social worker in the school setting. Readings, activities, and discussions provide practical skills and theory for school social work practice. The course content addresses the history of school social work integrating social work values into a school setting, systemic needs within school settings, the importance of networking and professional collaboration, and working with diverse and at-risk youth and their families. Students also examine the role of school social workers in helping students, schools and families adjust to and cope with trauma, special education needs, and related topics.
Grade Mode: Letter Grading

SW 715 - Affirming Practice with Lesbian, Gay, Bisexual, Transgender, Queer+ People
Credits: 4
This course addresses the task of clinical practice with lesbian, gay, bisexual, transgender, queer, questioning, asexual, intersex, two-spirit, genderqueer, pansexual, and beyond (LGBTQ+) people on both personal and professional levels for the social worker. The class makes use of personal narratives, as well as theoretical and clinical practice readings. Students are expected to explore and examine their own attitudes, beliefs, and assumptions about LGBTQ+ people.
Grade Mode: Letter Grading

SW 721 - International Social Work
Credits: 4
This course introduces the growing field of international social work. It addresses the impact of globalization on social work practice, provides an overview of the social work profession around the world, and considers current challenges and suggested ways social workers can contribute to solutions. Human rights and globalization are dominant themes underlying international social work and serve as unifying concepts for examining various global issues. The focus of the course is on global social issues with particular attention to human rights, development, racism, status of women and children, climate change, immigrants and refugees, HIV/AIDS, and aging populations. Linkages between international and domestic social work practice are emphasized, making the course relevant to all students and their future practice.
Grade Mode: Letter Grading

SW 740 - Social Work Internship Experience
Credits: 4
Majors are placed in a social welfare setting for a minimum of 225 hours; individual arrangements with faculty coordinate. (No credit toward a minor).
Co-requisite: SW 740A
Prerequisite(s): SW 622 with a minimum grade of C.
Equivalent(s): SW 640
Grade Mode: Credit/Fail Grading
Special Fee: Yes

SW 740A - Social Work Internship Experience I: Seminar
Credits: 4
This weekly seminar, held concurrently with SW 740 Social Work Internship Experience I, integrates the internship experience with Social Work theory and concepts learned throughout the curriculum through class discussion, exercises, readings, and written assignments. Seminar I is an opportunity for orientation to internship, continued development of your social work professional identity, review and application of the NASW Code of Ethics, integration of Anti-Oppressive (AOP) social work practices, and the use of small group discussion for problem solving. Students learn to use supervision effectively, to participate in the helping process, and to manage their own stress. Students assess the impact of policy on the client system, agency, and worker and to use research to inform practice.
Co-requisite: SW 740
Prerequisite(s): SW 622 with a minimum grade of C.
Equivalent(s): SW 640A
Grade Mode: Letter Grading

SW 741 - Social Work Internship Experience II
Credits: 4
A continuation of SW 740 with a minimum of 225 hours required in this term.
Co-requisite: SW 741A
Prerequisite(s): SW 740 with a minimum grade of C and SW 740A with a minimum grade of C.
Equivalent(s): SW 641
Grade Mode: Credit/Fail Grading

SW 741A - Social Work Internship Experience II: Seminar
Credits: 4
This is a continuation of Social Welfare Internship Experience I: SW 740A and builds upon the concepts presented in the student's first internship practice seminar. This seminar meets weekly for two and a half hours and is held concurrently with the internship placement. It is designed to integrate the internship experience with social work concepts through class discussion, reading and written assignments. Topics include but are not limited to, understanding and using agency structure to enhance client interactions, preparing client assessment and other documents, enhancing the client-worker therapeutic interaction, effective use of supervision, effective use of self in practice, prevention of burn-out, termination with clients and with agency staff, and values and ethics.
Co-requisite: SW 741
Prerequisite(s): SW 740 with a minimum grade of C and SW 740A with a minimum grade of C.
Equivalent(s): SW 641A
Grade Mode: Letter Grading

SW 770 - Intimate Partner Violence
Credits: 4
This course examines intimate partner violence or domestic violence from its historic roots to the present. In accordance with an historical and contextual approach, the course examines theories that explain and describe the phenomenon, research that attempts to define it, as well as social policies, social movements, and intervention from a social work perspective. Intimate partner violence, cuts across ethnics, racial, and class boundaries and impedes a victim's wellbeing and social participation.
Grade Mode: Letter Grading

SW 785 - Study Abroad: Comparative Social Welfare Systems
Credits: 4
Students examine the historical development of social welfare in another country including an analysis of the underlying values and attitudes that dictate practice and policy decisions. Includes agency site visits, lectures, themed readings, and visits to important cultural sites.
Co-requisite: INCO 687
Grade Mode: Letter Grading
Special Fee: Yes

SW 795 - Independent Study in Social Service
Credits: 1-6
Independent work under department faculty guidance. Enrollment by permission only through arrangement with specific faculty. May be repeated with a different focus. 12 hours in social work coursework required.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

SW 796 - Independent Study: Teaching Assistantship
Credits: 1-6
Participating students provide leadership and supervision for small groups of social work majors in social work practice simulations. Student teaching assistants work closely with, and under the direction of, department faculty.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

SW 797 - Special Topics in Social Welfare
Credits: 4
Seminar for advanced majors cross-listed with SW 897. Topics may include: alcohol and alcoholism, drugs and chemical dependency, income maintenance, health care, child welfare, aging, mental health, or developmental disabilities or study travel experiences. May be repeated for different topics.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

SW 798 - Undergraduate Thesis in Social Work
Credits: 1-6
Collaborating with a faculty adviser, students propose, develop, and implement a thesis research project for both oral and written presentation. The thesis must be a significant research project through which the student independently demonstrates their expertise in a specific topic area.
Prerequisite(s): SW 601 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 6 credits.
Equivalent(s): SW 798H
Grade Mode: Letter Grading

SW 798H - Honors Thesis
Credits: 2-4
Working with an assigned faculty adviser, students propose and develop a thesis project for both oral and written presentation before the end of the semester. 16 hours in social work coursework required. This course requires registration over multiple terms prior to earning final grade.
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Letter Grading

SW 799 - Senior Project
Credits: 1-6
Working with an assigned faculty adviser, students propose and develop a community project for both oral and written presentation during the senior year.
Prerequisite(s): SW 601 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 6 credits. May be repeated up to 3 times.
Mutual Exclusion: No credit for students who have taken SW 799H.
Grade Mode: Letter Grading

SW 799H - Honors Project
Credits: 1-6
Working with an assigned faculty adviser, students propose and develop a community project for both oral and written presentation during the senior year. Admission to the SW Honors Program required. This course requires registration over multiple terms prior to earning final grade.
Attributes: Honors course
Prerequisite(s): SW 601 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 6 credits. May be repeated up to 3 times.
Mutual Exclusion: No credit for students who have taken SW 799.
Grade Mode: Letter Grading

Sociology (SOC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SOC 400 - Introductory Sociology
Credits: 4
Overview of sociology as the scientific study of human social and cultural relationships. Social theory, methods and techniques of research, and current research findings on a wide range of social issues.
Attributes: Social Science (Discovery)
Equivalent(s): SOC 400H, SOC 400W
Grade Mode: Letter Grading

SOC 402 - Statistics
Credits: 4
Elementary applied statistical techniques; tables, graphs, cross-clarifications; central tendency and dispersion; correlation and linear regression; confidence intervals and hypothesis testing. Other statistical classes including ADM 430, BIOL 528, ADMN 420, EREC 525, HHS #540, MATH 439, MATH 539, PHIL 412, MATH 644, PSYC 402 cannot be used to satisfy the major requirement. This is, all majors must take SOC 402 even if they have taken an introductory statistics course in another department. A student can, however, petition to receive eight credits for two introductory statistics courses, if and only if, SOC 402 is taken after the student became a sociology major and took their first statistics course prior to declaring SOC as their major. Majors cannot receive credit for statistics courses taken after they have declared SOC.
Attributes: Quantitative Reasoning(Disc)
Equivalent(s): SOC 402H, SOC 502, SOC 502H
Mutual Exclusion: No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, HMP 540, MATH 439, MATH 539, MATH 644, MTH 504, MTH 701, PSYC 402, PSYC 402H.
Grade Mode: Letter Grading

SOC 444A - Honors/Society in the Arctic
Credits: 4
Introduction to societies of the far North today, from Alaska and Canada through Greenland, Iceland, northern Scandinavia and Russia. Reviews interconnected issues of social change, environment, sustainable development, local control, and modernization vs. traditions. Arctic dilemmas highlight some basic questions facing all societies in the 21st century.
Attributes: Environment,TechSociety(Disc); Honors course; Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

SOC 450 - Contemporary Social Problems
Credits: 4
This course introduces students to the study of major social problems in contemporary society, including poverty, discrimination, inequality, crime, violence, and environmental degradation. Explores how and why people come to view certain social conditions as problematic. Also explores the consequences of and possible solutions to contemporary social problems.
Attributes: Social Science (Discovery)
Equivalent(s): SOC 540
Grade Mode: Letter Grading

SOC 515 - Introductory Criminology
Credits: 4
Introduces the scientific study of crime. Reviews the different forms of criminal behavior, theories of crime, and strategies of crime control.
Grade Mode: Letter Grading

SOC 520 - Family
Credits: 4
Sociological study of marriage and the family in American society. Following a life-cycle approach, topics include gender roles, communication and conflict, dating and mate selection, work and family economics, the transition to parenthood, middle- and late-life family, divorce, and remarriage.
Equivalent(s): SOC 520H
Grade Mode: Letter Grading

SOC 525 - Juvenile Crime and Delinquency
Credits: 4
Crime, violence, and the criminal justice system as it affects children and youth in the role of both perpetrators and victims.
Grade Mode: Letter Grading

SOC 530 - Sociology of Race and Ethnicity
Credits: 4
This course examines how social scientists study racial and ethnic groups. Students first gain knowledge of important sociological concepts, and then read from a diverse array of social theorists. Towards the end of the course, students engage with cutting-edge applied research on race and ethnicity across many dimensions including wealth, health, crime, love, and technology. By the end of the course, students should be able to identify, explain, and apply various sociological concepts and theories pertaining to race and ethnicity; and be able to conceptualize, hypothesize, and design a line of scientific inquiry on race.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

SOC 535 - Homicide
Credits: 4
An introduction to theory and research in homicide studies, including a review of the origins of and social responses to homicide.
Grade Mode: Letter Grading

SOC 555 - Death and Dying in America
Credits: 4
This course will explore a cultural and structural overview of death and dying in American society. Topics include the historical contexts of the care and treatment of the dying and the dead; attitudes toward death; bereavement over the life course; socialization to death; anticipatory grief and terminal illness; funeral rituals and their social functions; burial, mourning and grief practices; and suicide and assisted suicide. Cannot earn credit if previously taken SOC 597 "Special Topics: Death and Dying in America".
Grade Mode: Letter Grading

SOC 565 - Environment and Society
Credits: 4
Environment and Society focuses on the complex interactions between human communities and the natural world. The course considers the interconnected ways that social systems, the built environment, and related technologies produce environmental changes, and in turn how shifts in resources, air, water quality, climate, biodiversity, and ecosystems force societies to adapt. This course fulfills in the Environment, Technology, and Society category of UNH's Discovery Program.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

SOC 570 - Sexual Behavior
Credits: 4
This course approaches sexuality as a social phenomenon. We examine variability in sexual practices, sexual identities, and sexual behaviors throughout history, across cultures, and throughout the life course of individuals. Particularly, we focus on the social control of sexuality and the extent to which sexualities are socially constructed. We consider the media and other cultural influences on a diverse range of sexual experiences and take a straightforward, non-stigmatizing approach to tackling controversial issues.
Grade Mode: Letter Grading

SOC 595 - Independent Reading and Research
Credits: 2-8
Independent study of advanced or specialized topics in sociology requiring extensive reading and writing. Before registering, students must develop a project in consultation with a faculty supervisor and submit a proposal to the undergraduate committee. Students are required to complete 12 sociology credits prior to taking this course.
Grade Mode: Letter Grading

SOC 598 - Sociological Theory
Credits: 4
Analysis of the origins and development of sociological theory. Includes the classical works of Marx, Weber, and Durkheim and their connections to the major strands of present day research.
Attributes: Writing Intensive Course
Equivalent(s): SOC 611
Grade Mode: Letter Grading

SOC 599 - Sociological Analysis
Credits: 4
Basic skills essential to sociological study, including: development of critical reading skills; evaluation of theory construction and evidence; analysis of classic and contemporary works, research, writing, and use of library resources. To be taken by sociology majors no later than the junior year.
Attributes: Inquiry (Discovery); Writing Intensive Course
Equivalent(s): SOC 599W
Grade Mode: Letter Grading

SOC 601 - Methods of Social Research
Credits: 4
Overview of major research methods: survey analysis, personal interview, participant observation, content analysis, and experimental design. Each student designs and completes a research project.
Attributes: Writing Intensive Course
Prerequisite(s): SOC 599 with a minimum grade of D-.
Equivalent(s): PSYC 502, SW 601, SW 601W
Grade Mode: Letter Grading

SOC 620 - Drugs and Society
Credits: 4
Provides students with an overview of drug using behavior as viewed from a sociological perspective. Highlights historical and current drug use trends, examines the social correlates of drug use, considers societal responses to drug use including treatment, prevention, and policy, and engages students in key controversial debates confronting U.S. citizens and policymakers. Provides a foundation for understanding of drugs and society.
Grade Mode: Letter Grading

SOC 625 - Mental Health and Society
Credits: 4
This course introduces students to sociological approaches for studying and understanding mental health and illness in society. With an emphasis on the importance of social stress, we examine the distribution of mental illness in the United States and identify the factors that help to explain mental health differences across social roles and statuses.
Grade Mode: Letter Grading

SOC 627 - Sociology of Fashion
Credits: 4
This course explores how clothing, accessories, and bodily adornment are socially constructed processes. We apply a sociological lens to uncover how fashion intersects with: social identities and aspirations; fads and trends; historical forces; how we modify our bodies; production and consumption of clothing and shoes; race, class, and gender; labor and human rights; globalization and trade; technology, and environmental issues in clothing production. Cannot earn credit if previously earned credit for SOC 697 "Special Topics Sociology of Fashion".
Grade Mode: Letter Grading

SOC 635W - Medical Sociology
Credits: 4
Health and Illness are considered as a sociocultural phenomenon. Meanings are attached to health and illness as they are influenced by our social values and our cultural beliefs, which to a large degree are influenced by available medical technologies. People's experiences of health and illness are shaped by a range of social factors (e.g., race, class, gender) and follow clear patterns of social inequality. A critical approach is taken to examine topics such as the social determinants of health, illness and healthcare; the social construction of illness; the medicalization of society; and the social organization of health care.
Attributes: Writing Intensive Course
Equivalent(s): SOC 635
Grade Mode: Letter Grading

SOC 636 - Sociology of Justice
Credits: 4
In this course, students will begin to understand how individuals, groups, and societies perceive justice, how to research those perceptions, and how those perceptions shape our lives. By the end of this course, students should have an advanced understanding of justice research and be able to apply sociological research principles to examining wide variety of real-world issues.
Grade Mode: Letter Grading

SOC 645 - Class, Status and Power
Credits: 4
Focuses on the major dimensions of inequality, including class, gender, and race, by exploring the distribution of economic, political, and social resources within contemporary societies.
Equivalent(s): SOC 645W
Grade Mode: Letter Grading

SOC 647 - Sociology of Work and Well-Being
Credits: 4
What constitutes a 'good job' or a 'bad job'? What characteristics of jobs are harmful, and which job conditions protect worker health and wellbeing? In this course, we focus heavily on the nature of job stress, where it comes from, and why some people experience more of it than others. Topics will include socioeconomic disparities in stress exposure, gender and racial discrimination in the workplace, gig work and online platforms, social protection policies, and COVID-19. Cannot earn credit if already taken SOC 697 under the special topic "Work and Well-Being".
Grade Mode: Letter Grading

SOC 665 - Environmental Sociology
Credits: 4
Interactions between society and the physical environment, including environmental constraints, population and economic growth, social impacts of resource development, large-scale environmental change, and the social bases of environmental attitudes, behavior, and politics.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

SOC 693 - Global Change and Social Sustainability
Credits: 4
Achieving "social sustainability" has become a goal for societies around the world, but what does it mean and how can they achieve it? Sociology provides scientific tools to help answer these questions. In this course, students will learn sociological approaches for investigating and analyzing global social challenges ranging from climate change and food insecurity to drug trafficking and health pandemics and consider applications of these insights to inform on-the-ground efforts to advance social sustainability.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

SOC 697 - Special Topics
Credits: 4
Occasional or experimental offerings. May be repeated for different topics.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to 2 times.
Grade Mode: Letter Grading

SOC 720 - Sociology of Drug Use
Credits: 4
Examines licit and illicit drug use from a sociological perspective. Draws primarily from the sociology of mental health and criminology to explore a variety of drug-related topics including historical and current U.S. drug trends, dominant theoretical approaches about the initiation into, and continued use of drugs, drug-related crime, therapeutic use of drugs, prevention and treatment of drug problems, and drug-related policies.
Grade Mode: Letter Grading

SOC 725 - Social Demography
Credits: 4
Social demography examines the linkages between changes in the size, composition and distribution of the population and changes in social, environmental, economic and political factors. The course examines demographic methods and the materials and the analytical techniques used by demographers to analyze population redistribution, fertility, work, marriage, migration and mortality. The policy implications of demographic change will be examined with attention to the U.S. as well as the developed and developing world.
Grade Mode: Letter Grading

SOC 730 - Communities and the Environment
Credits: 4
People and the natural environments in which they live fundamentally structure communities around the globe. Economic change, expanding development , and human migration are transforming social and environmental conditions in both rural and urban settings, altering the identities of many communities as well as their relationships with the natural world. The importance of these emerging social and environmental issues has made them a focus for social science inquiry. This course exposes students to a range of sociological concepts, theories, and research approaches related to the study of communities and environmental issues. Some of the substantive themes that are covered include: population dynamics and environmental change; social capital and social networks; political economy and community development; collective action and social movements; science, technology, and environmental risks; and environmental racism and justice. The principal assignment for the course will be a research project where students investigate a community or environmental issue of their own interest.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

SOC 740 - Sociology of Mental Health
Credits: 4
Introduces students to different sociological approaches for studying and understanding mental health and illness. Students examine the social distribution of mental illness in the United States and the social-structural factors that help to explain mental health variations. Also addresses issues surrounding mental health treatment, systems, and policies for the mentally ill.
Grade Mode: Letter Grading

SOC 773 - Childhood and Social Policy
Credits: 4
Exposes students to a variety of sociological perspectives about childhood in American society. Stimulates analysis about how social institutions, like the modern family, school, economic system, justice system and communications media affect children. Assumes prior understanding of important sociological concepts, critical thinking skills and social science writing ability.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

SOC 792 - Internship Independent Study
Credits: 2-8
Provides upper level sociology majors with an opportunity to apply what they have learned in the classroom to the real world. This will provide the opportunity for students to work individually with a faculty member on an Internship with the option of variable credit. There is no formal class time required. Students will arrange meetings with supervising faculty to plan assigned readings, update internship progress and complete semester projects. Project ideas are developed with faculty and internship site supervisor.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

SOC 799 - Senior Thesis
Credits: 4 or 8
Independent work in the library or field culminating in a written senior thesis. Recommended for, but not confined to, majors intending to pursue graduate studies. Students must arrange for supervision from two faculty members and submit a proposal to the Undergraduate Committee before registering. May be completed in one or two successive semesters during the senior year.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 2 times.
Equivalent(s): SOC 699
Grade Mode: Letter Grading

SOC 799H - Senior Honors Thesis
Credits: 4 or 8
Independent work in the library or field culminating in a written senior honors thesis and a formal research presentation. Recommended for, but to confined to, majors intending to pursue graduate studies. Required for students participating in the departmental honors program as part of their 16 honors credits. Students must arrange for supervision from two faculty members and submit a proposal to the Undergraduate Committee before registering. May be completed in one or two successive semesters during the senior year.
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): SOC 699H
Grade Mode: Letter Grading

Sociology (SOCI) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SOCI 410 - Introduction to Sociology
Credits: 4
This course introduces basic concepts, theories, and methods in the discipline of sociology that reveal the relationship between the individual and society and challenge students to develop a sociological perspective. Students are exposed to diverse cultures and social structures with an emphasis on the dynamics of power and inequality on the local, national, and global levels as they are influenced by the social constructs of race, ethnicity, class, gender and sexuality.
Attributes: HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)
Equivalent(s): SOC 501G
Grade Mode: Letter Grading

SOCI 601 - Society and the Individual
Credits: 4
This course explores the interface between individuals and their social context. It uses sociological perspectives such as symbolic interactionism, functional theory, and conflict theory to examine the relationships we as individuals have with our society. The course also examines the extent to which our roles and statuses are determined at birth, and the roles we play in shaping ourselves as well as the institutions in which we live. How social factors influence individual perceptions and choices is viewed in the context of the institution of marriage; family structure and relationships; demographics such as age, gender, race, ethnicity, and class; attitudes and moral behavior; violence and aggression; and work and authority.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): SOC 601G
Grade Mode: Letter Grading

SOCI 603 - Work and Society
Credits: 4
This course analyzes the social nature of work in industrial societies. Topics include the study of occupations, training, automation, unemployment, and the role of minorities in the workplace. Through ethnographic case studies and recent articles, the course compares work structures in North America, Asia, and Europe.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): SOC 603G
Grade Mode: Letter Grading

SOCI 675 - Child Abuse and Neglect
Credits: 4
This course provides an examination of child maltreatment from a variety of perspectives, including theoretical, cultural, historical, and legal. It offers definitions of the types of child abuse and neglect, and allows students to reflect on how culture and history play roles in the defining process. Students learn to identify signs and symptoms resulting from maltreatment, and take an in-depth look at how trauma affects all areas of child development. The roles of child protection workers, the complex child protection system, and the legal systems are explained. Students have the opportunity to critically review current research and debate emotionally charged ethical issues. This course challenges students to consider the dynamics that may lead people to harm children and connect the development of prevention strategies to these variables.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or PSY 525 with a minimum grade of D- or PSY 509G with a minimum grade of D- or PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): SOC 607G
Grade Mode: Letter Grading

SOCI 680 - Issues of Addiction in Special Populations
Credits: 4
This course explores important complications that arise when dealing with addiction-related issues of special populations (e.g., children, homeless, criminal justice system involvement, gender, sexual orientation). Emphasis will be placed on exploring the ways to educate and connect people to the services available.
Prerequisite(s): (PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-) and (PSY 565 with a minimum grade of D- or PSY 515G with a minimum grade of D-).
Equivalent(s): SOC 612G
Grade Mode: Letter Grading

Spanish (SPAN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SPAN 401 - Elementary Spanish I
Credits: 4
For students with no previous knowledge of Spanish. Development of listening comprehension, speaking, reading, and writing skills, as well as cultural awareness of the Hispanic world. No credit for students who have had two or more years of Spanish in secondary school; however, any such students whose studies of Spanish have been interrupted for 5 years or more should consult the coordinator of elementary Spanish. SPAN 401-402 taken together satisfy the foreign language requirement.
Grade Mode: Letter Grading

SPAN 402 - Elementary Spanish II
Credits: 4
Conducted in Spanish. Development of listening comprehension, speaking, reading, and writing skills, as well as cultural awareness of the Hispanic world. Cannot be taken separately without permission of the instructor. SPAN 401-402 taken together satisfy the foreign language requirement.
Attributes: Foreign Language Requirement
Prerequisite(s): SPAN 401 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken HUMN 565.
Grade Mode: Letter Grading

SPAN 403 - Review of Spanish
Credits: 4
Conducted in Spanish. Accelerated elementary Spanish course, designed for those who have had only 2 years of High school Spanish. Does not satisfy the foreign language requirement. Preparation for Spanish 503.
Grade Mode: Letter Grading

SPAN 503 - Intermediate Spanish I
Credits: 4
Conducted in Spanish. Further development of reading, writing, speaking, and listening skills. Development of intercultural awareness through discussion and short papers in Spanish based on authentic texts from the Hispanic world. Counts toward the major and the minor in Spanish. Satisfies the Foreign Language Requirement.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Equivalent(s): SPAN 503H
Grade Mode: Letter Grading

SPAN 504 - Intermediate Spanish II
Credits: 4
Conducted in Spanish. Further development of reading, writing, speaking, and listening skills. Development of intercultural awareness through discussion and short papers in Spanish based on authentic texts from the Hispanic world. Counts towards the major and minor in Spanish. Satisfies the foreign language requirement.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): SPAN 503 with a minimum grade of D-.
Equivalent(s): SPAN 504H
Grade Mode: Letter Grading

SPAN 525 - Introduction to Spanish Cultures
Credits: 4
Historical, geographical, and artistic expressions of Spanish cultures that have formed the character of contemporary Spanish culture. Majors may take either SPAN 525 or SPAN 526 or another English language course with advisor approval, but only one can be counted for major credit.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

SPAN 526 - Introduction to Latin American Cultures
Credits: 4
Significant historical, geographical, and artistic expressions of pre-Colombian and Latin America cultures. Conducted in English. Counts towards the major and the minor in Spanish.
Attributes: World Cultures(Discovery)
Equivalent(s): SPAN 526H
Grade Mode: Letter Grading

SPAN 595 - Practicum
Credits: 2-4
Practical use of Spanish language or cultural skills outside the classroom through special projects.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

SPAN 631 - Advanced Conversation and Composition I
Credits: 4
Emphasis on presentational, interpersonal, written or spoken Spanish through in-class and online discussions and frequent out of class assignments based on cultural and literary readings and films.
May include service learning option. Satisfies the foreign language requirement. Required for Spanish major and minor. The course sequence SPAN 631-SPAN 632 may be taken in any order.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): SPAN 504 with a minimum grade of D-.
Equivalent(s): SPAN 631H
Grade Mode: Letter Grading

SPAN 632 - Advanced Conversation and Composition II
Credits: 4
Emphasis on presentational, interpersonal, written or spoken Spanish through in-class and online discussions and frequent out of class assignments based on cultural and literary readings and films.
May include service learning option. Satisfies the foreign language requirement. The course sequence SPAN 632-SPAN 631 may be taken in any order.
Attributes: World Cultures(Discovery); Writing Intensive Course; Foreign Language Requirement
Prerequisite(s): SPAN 504 with a minimum grade of D-.
Equivalent(s): SPAN 632H
Grade Mode: Letter Grading

SPAN 641 - Spanish Language Variation & Change
Credits: 4
This course introduces students to the variation in the Spanish spoken today in Spain, Latin America, and the U.S. Students will improve speaking and listening skills through close study of pronunciation and language variation (geographic, social class, age, gender/sexuality, etc.). Students will deepen their understanding of language and culture through examining the relationship between language variation and language change in the Spanish-speaking world. This class is conducted in Spanish.
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Grade Mode: Letter Grading

SPAN 645 - Intro to Spanish Linguistics
Credits: 4
Establishes the basis for future application of linguistic principles. Explores different areas of linguistics including morphology, word formation and verbal inflection. Issues in syntax and semantics are analyzed both in isolation and in terms of their relationship to each other. Students will be equipped with the skills necessary to apply these linguistic concepts to actual Spanish language data and to achieve a better understanding of the structures governing the language they are studying. Conducted in Spanish.
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Grade Mode: Letter Grading

SPAN 647 - Topics in Hispanic Cultural Studies
Credits: 4
Contemporary approaches to the study of Hispanic cultural practices and perspectives that examine the intersections of politics, art, religion and the forces of globalization with the aim of further development of intercultural competence. Conducted in Spanish. May be taken more than once for credit if no duplication of content.
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

SPAN 648 - The Hispanic World Today
Credits: 4
This course focuses on researching and discussing contemporary issues in Spain and/or Latin America while improving reading and oral performance. Primary sources include newspapers, resources from the internet, and/or archival materials.
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Equivalent(s): SPAN 691, SPAN 692
Grade Mode: Letter Grading

SPAN 650 - Hispanic Literature and Popular Culture
Credits: 4
The study of literary texts and popular literary art forms.
Attributes: Writing Intensive Course
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Grade Mode: Letter Grading

SPAN 652 - Introduction to Spanish Literature and Thought
Credits: 4
This course provides an overview of contemporary Spanish literature spanning the eighteenth, nineteenth, and twentieth centuries. Through the examination of its most representative texts, the course explores how these works serve as expressions of aesthetic-literary movements and specific historical periods. The curriculum covers the Romantic period, realism and naturalism, the Generation of '98 and modernism, the Generation of '27 and avant-garde movements, the literature generated by the Civil War, and the production of the second half of the twentieth century. Upon completion of the course, students should acquire a comprehensive understanding of the key authors and texts of contemporary Spanish literature. They should also develop the ability to discern various literary styles and movements through textual analysis. Additionally, students should be able to connect literary texts to contemporary historical, philosophical, and aesthetic factors and periods.
Attributes: Writing Intensive Course
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Grade Mode: Letter Grading

SPAN 654 - Introduction to Latin American Literature and Thought
Credits: 4
Reading and analysis of major works within the historical, cultural, and social background of Latin America. Emphasis on works in the 20th-21st century. Conducted in Spanish.
Attributes: Humanities(Disc); Writing Intensive Course
Prerequisite(s): SPAN 631 with a minimum grade of D- or SPAN 632 with a minimum grade of D-.
Grade Mode: Letter Grading

SPAN 683 - Summer Study in Costa Rica
Credits: 0 or 8
Studies in San Joaquin de Flores, Costa Rica. Six week summer immersion program for undergraduate students. Interested students should contact the program director.
Co-requisite: INCO 589
Attributes: Foreign Language Requirement
Grade Mode: Credit/Fail Grading
Special Fee: Yes

SPAN 686 - Study Abroad/Granada
Credits: 0 or 20
Studies in Granada, Spain. Noncredit orientation meetings required during semester prior to departure. Interested students should consult with the program directors. (An IA [continuous grading] grade will be assigned until official transcript is received from the foreign institution.)
Co-requisite: INCO 588
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

SPAN 790 - Topics in Second Language Acquisition/Pedagogy/ Methodology
Credits: 4
A) Introduction to Second Language Acquisition, B) Internet Technologies and Second Language Learning. May be taken more than once if no duplication of content.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

SPAN 795 - Independent Study
Credits: 1-4
Guided individual study with training in bibliography and organization of materials. Topics selected by instructor and student in conference. Barring duplication of content, may be repeated for credit.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): SPAN 797
Grade Mode: Letter Grading

SPAN 797 - Topics in Hispanic Literary and Cultural Studies
Credits: 4
A) Medieval Spanish Literature, B) Spanish Literature of the Renaissance and the Golden Age, C) Spanish Literature of the 18th and 19th Centuries, D) Spanish Literature of the 20th Century (Poetry/Theater/Prose,), E) Contemporary Spanish Literature, F) Spanish Cultural Studies, G) Latin American Literature of the 16th and 17th Centuries, H) Latin American Literature of the 18th and 19th Centuries, I) 20th Century Latin American Literature (Poetry/Theater/Prose), J) Contemporary Latin American Literature, K) Cyberliterature and Cyberculture, L) Transatlantic Studies, M) Spanish and Latin American Philosophy and Essay, N) Indigenous Cultural Expression of the Americas, O) Hispanic Film Studies, P) U.S. Hispanic Cultural Studies, Q) Latin American Cultural Studies, R) Senior Seminar, S) Other. May be taken more than once for credit if no duplication of content. Any course in this category can be counted as your major discover capstone. Consult with your advisor.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 16 credits.
Equivalent(s): SPAN 799
Grade Mode: Letter Grading

SPAN 798 - Topics in Hispanic Linguistics and Cultural Studies
Credits: 4
A) History of the Spanish Language, B) Study of Spanish Mood and Aspect, C) Sociolinguistics of Spanish, D) Discourse Analysis, E) Politeness and Pragmatics, F) Bilingualism and Spanish in the U.S., G) Spanish Pronouns, Agreement and Modifiers, H) Regional and Social Variation in Spanish Phonetics, I) Other. May be taken more than once for credit if no duplication of content. Any course in this category can be counted as your major discovery capstone. Consult with your advisor.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

SPAN 799 - Senior Honors
Credits: 4
For senior Spanish majors with a minimum cumulative grade-point average of 3.40 and the same or better average in the major who want to undertake a special honors project in an area of Spanish language or literature of their choice.
Attributes: Honors course
Grade Mode: Letter Grading

Speech Language Assistant (SLA) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SLA 500 - Role of the Speech-Language Assistant
Credits: 4
This course is designed to provide students with an overview of the profession of a Speech-Language Assistant. Topics include professional ethics, an introduction to the American Speech-Language Hearing Association's (ASHA) guidelines for becoming a registered Speech Language Assistant (SLA), and the roles and responsibilities of a SLA. Observing, documenting, defining, and writing goals and objectives in educational and medical settings is also addressed. Acknowledging the difference between immediate and long-term accommodations, working as part of a team, recognizing appropriate health and safety precautions, and working effectively with cultural differences in diverse populations are core aspects of the course.
Attributes: Writing Intensive Course
Equivalent(s): COMM 511G, INST 511G
Grade Mode: Letter Grading

SLA 501 - Survey of Communication Disorders
Credits: 4
This course provides students with knowledge of the basic components and development of speech and language. Historical aspects of Speech-Language and Audiology are addressed. Various disorders including language, articulation, voice, fluency, and hearing are explored.
Prerequisite(s): SLA 500 with a minimum grade of D- or COMM 511G with a minimum grade of D-.
Equivalent(s): COMM 512G, INST 512G
Grade Mode: Letter Grading

SLA 502 - Anatomy and Physiology of Speech and Hearing
Credits: 4
This course is designed to provide students in the speech-language concentration with knowledge of the basic anatomy and physiology of the speech production and perception systems to support understanding of directions from a Speech-Language Pathologist. The focus is on those aspects of anatomy and physiology that are critical for clinical implementation. Measurement tools and instrumentation used in the field are discussed.
Prerequisite(s): SLA 500 with a minimum grade of D-.
Equivalent(s): COMM 513G, INST 513G
Grade Mode: Letter Grading

SLA 503 - Articulation and Phonological Disorders
Credits: 4
This course introduces phonetic principles, categorization of sounds, and various applications of these concepts. Students become familiar with the International Phonetic Alphabet (IPA), learn to read a Speech-Language Pathologist's transcription, and develop their own transcription skills. Articulation and phonological disorders are presented and distinctions and direct connections discussed, with the primary emphasis on intervention and remediation strategies. Additional topics include children and adults for whom English is a second language, and individuals with dialectic and/or cultural differences.
Prerequisite(s): SLA 500 with a minimum grade of D-.
Equivalent(s): COMM 514G, INST 514G
Grade Mode: Letter Grading

SLA 504 - Introduction to Audiology and Aural Rehabilitation
Credits: 4
This course is designed to equip Speech-Language Assistant students with knowledge of the hearing process, symptoms of hearing impairment, basic methods by which an audiologist diagnoses hearing difficulties, and elements of rehabilitative approaches for persons with hearing impairment. An overview of various causes of hearing impairment is explored.
Prerequisite(s): SLA 500 with a minimum grade of D-.
Equivalent(s): COMM 515G, INST 515G
Grade Mode: Letter Grading

SLA 506 - Language Acquisition
Credits: 4
This course introduces research, theory, and practical applications pertinent to first language acquisition. The development of language is explored through its five major components: phonology, pragmatics, semantics, morphology, and syntax. Stages of acquisition are traced from pre-linguistic communication in infancy through adolescents' use of abstract thinking and expressions. Distinctions between language disorders and developmental differences are considered, as are relationships between language and literacy skills (reading and writing).
Attributes: Writing Intensive Course
Prerequisite(s): SLA 500 with a minimum grade of D-.
Equivalent(s): PSY 521G
Grade Mode: Letter Grading

SLA 550 - Clinical Practicum I
Credits: 2
This course offers supervised clinical experience in speech-language pathology. Students gain practical experience in techniques and theories as applied in a therapeutic setting. Requires students to be on-site at an approved setting for a minimum of twenty-five hours during the term.
Prerequisite(s): SLA 500 with a minimum grade of D- and SLA 501 with a minimum grade of D-.
Equivalent(s): COMM 516G, INST 516G
Grade Mode: Letter Grading

SLA 551 - Clinical Practicum II
Credits: 2
This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.
Prerequisite(s): SLA 550 with a minimum grade of D- or COMM 516G with a minimum grade of D-.
Equivalent(s): COMM 516AG, INST 516AG
Grade Mode: Letter Grading

SLA 552 - Clinical Practicum III
Credits: 2
This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.
Prerequisite(s): SLA 551 with a minimum grade of D- or COMM 516G with a minimum grade of D-.
Equivalent(s): COMM 516BG, INST 516BG
Grade Mode: Letter Grading

SLA 553 - Clinical Practicum IV
Credits: 2
This course provides students in the Speech-Language Assistant concentration with a series of introductory fieldwork experiences during which they will observe Speech-Language Pathologists as they provide speech and language therapy to clients. Students gain practical experience in observing techniques and theories as applied in a therapeutic setting. Twenty-five hours of observation are required for each two-credit practicum, in settings approved by the clinical faculty.
Prerequisite(s): SLA 552 with a minimum grade of D- or COMM 516BG with a minimum grade of D-.
Equivalent(s): COMM 516CG, INST 516CG
Grade Mode: Letter Grading

SLA 555 - Clinical Practicum II
Credits: 6
This course offers supervised clinical experience in speech-language pathology. Students gain practical experience in techniques and theories as applied in a therapeutic setting. Requires students to be on-site at an approved setting for a minimum of seventy-five hours during the semester.
Prerequisite(s): SLA 500 with a minimum grade of D- and SLA 501 with a minimum grade of D- and SLA 502 with a minimum grade of D- and SLA 503 with a minimum grade of D- and SLA 504 with a minimum grade of D- and SLA 506 with a minimum grade of D- and SLA 550 with a minimum grade of D-.
Grade Mode: Letter Grading

Sports Management & Leadership (SML)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SML 521 - Theory of Coaching Basketball
Credits: 2
Individual team offense and defense, rules of the game. Problems in team handling and conditioning.
Prerequisite(s): (SPST 565 (may be taken concurrently) with a minimum grade of D- or SML 565 (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): KIN 521, SPST 521
Grade Mode: Letter Grading

SML 522 - Theory of Coaching Football
Credits: 2
Systems of play, team and individual offensive and defensive fundamentals, theory and strategy of team play, coaching methods, physical conditioning, rules.
Equivalent(s): KIN 522, SPST 522
Grade Mode: Letter Grading

SML 523 - Theory of Coaching Ice Hockey
Credits: 2
Basic hockey skills. Fundamentals of individual and team offense and defense; coaching methods; rules. Student must have basic skating skills prior to taking course.
Prerequisite(s): (SPST 565 (may be taken concurrently) with a minimum grade of D- or SML 565 (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): KIN 523, SPST 523
Grade Mode: Letter Grading
Special Fee: Yes

SML 525 - Theory of Coaching Soccer
Credits: 2
Fundamental and advanced skills and techniques; offensive and defensive principles of team play; tactical formations and strategy; methods of training and practicing; rules.
Equivalent(s): KIN 525, SPST 525
Grade Mode: Letter Grading

SML 528 - Theory of Coaching Track and Field
Credits: 2
Starting, sprinting, middle-distance and distance running, relay, hurdling, high and broad jumping, pole vault, shot putting, discus, hammer, and javelin. Methods of training and practicing.
Equivalent(s): KIN 528, SPST 528
Grade Mode: Letter Grading

SML 560 - Sport Psychology
Credits: 4
Introduction to the discipline of sport psychology. Explores behavioral, cognitive, and social psychology in relation to elite, collegiate and high school athletes, as well as recreational sport participants.
Equivalent(s): KIN 560, SPST 560
Grade Mode: Letter Grading

SML 561 - History of American Sport and Physical Culture
Credits: 4
Major individuals, organizations, and trends that influenced the development of an American industry in sports, active recreation, and physical fitness. Readings, discussions, and research projects provide experience in the craft and utility of history.
Attributes: Historical Perspectives(Disc)
Equivalent(s): KIN 561, KIN 561W, SPST 561, SPST 561W
Grade Mode: Letter Grading

SML 561W - History of American Sport and Physical Culture
Credits: 4
Major individuals, organization and trends that influenced the development of an American industry in sports, active recreation, and physical fitness. Reading, discussions and research projects provide experience in the craft and utility of history.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Equivalent(s): KIN 561W, SPST 561W
Grade Mode: Letter Grading

SML 562 - Sport Media Relations
Credits: 4
A survey of basic concepts of sports media relations for students considering careers in school or college sports coaching or administration, media or related fields. The focus is on developing necessary skills, techniques and recommended media relations practices as well as social implications of the media in sports public relations including print, radio, television, the World Wide Web and social media.
Equivalent(s): KIN 562, SPST 562
Grade Mode: Letter Grading

SML 564 - Introduction to Sport Marketing
Credits: 4
An introductory study of sport marketing, which includes the basic principles, key scholars, relevant scholarship, and necessary experiential elements to aid students in understanding the discipline's applied and academic aspects. This course will introduce traditional marketing concepts as well as focus on the marketing of sport and through sport.
Equivalent(s): KIN 564, SPST 564
Grade Mode: Letter Grading

SML 565 - Principles of Coaching
Credits: 4
Overviews current theory and practice in coaching education, including sport pedagogy, physiology, psychology, administration and risk management. Issues of performance and competition specific to child, youth and collegiate coaching are addressed.
Equivalent(s): KIN 565, SPST 565
Grade Mode: Letter Grading

SML 565A - Clinical Practice in Coaching
Credits: 2
Students will learn and utilize best practices in the field to create safe, positive and effective coaching environments while teaching technical and tactical sport skills. Group management, motivation skill progression, evaluation and feedback will be explored. An emphasis will be placed on writing and implementing practice objectives, as well as effective practice design and execution. This course will include weekly practical coaching sessions.
Prerequisite(s): SML 565 with a minimum grade of D- or SPST 565 with a minimum grade of D-.
Equivalent(s): SPST 565A
Grade Mode: Letter Grading

SML 568 - Global Perspectives in Sport
Credits: 4
Global Perspectives in Sport explores the intersections of management and the cross cultural context of sport in examining issues and challenges in sport around the globe. This course will prepare students to think critically about the organization, governance, business activities, and cross-cultural context of modern sport on an international level.
Equivalent(s): KIN 568, SPST 568
Grade Mode: Letter Grading

SML 580 - Sport Industry
Credits: 4
Overviews the various segments that make up the sport industry, including governing bodies, the mass media, sporting goods firms, players' and coaches' associations, public regulatory agencies, and secondary and higher education. Readings and discussions consider the development and structure of each segment. interaction between segments, legal issues, and policy implications. While the course will focus on the United States, there is some comparison to other countries.
Equivalent(s): KIN 580, SPST 580
Grade Mode: Letter Grading

SML 630 - Sport Facility and Event Management
Credits: 4
Students learn the principles and processes involved in effective sport facility and event management. In terms of facilities, students explore the concepts of facility design, planning, systems, risk management, marketing, and ownership. In terms of events, students explore the concepts of creation, impact(s) on host communities, marketing/ sponsorship, and the potential positive and negative outcomes of sport events.
Equivalent(s): KIN 630, SPST 630
Grade Mode: Letter Grading
Special Fee: Yes

SML 631 - Sport Media Production
Credits: 4
Sport media professionals are expected to write their own scripts, produce their own content, and distribute that content on multiple digital platforms. Sport Media Production is designed to combine media management with production work in digital media, video, podcasting and website design. This course examines many of the current distribution platforms (Twitter, Facebook, Youtube, blogs, mobile applications) and the tools to create media for these outlets. In this course, students will create media using Adobe Creative Cloud and current video-editing systems.
Prerequisite(s): (SML 562 with a minimum grade of D- or SPST 562 with a minimum grade of D-).
Equivalent(s): KIN 631, SPST 631
Grade Mode: Letter Grading

SML 634 - Sport Sponsorship and Sales
Credits: 4
The goal of this course is for students to develop an understanding of all aspects of sport sales and sponsorship. This course will explain the intricacies of both sport sales and sport sponsorship as well as demonstrate the ways they overlap and differ. Specifically, this course will cover concepts such as aftermarketing, up-selling, benefit selling, and sponsorship proposals.
Equivalent(s): KIN 634, SPST 634
Grade Mode: Letter Grading

SML 643 - Social Media Marketing in Sport
Credits: 4
Students examine the use of social media as a tool in the marketing of sport and sport-related products. They are expected to effectively analyze and prescribe different ways in which social media can enhance the marketing profile of such products upon course completion. Student work should facilitate a deep understanding of social media in its constituent forms as they apply to sport and students should be able to examine such use critically.
Equivalent(s): KIN 643, SPST 643
Grade Mode: Letter Grading

SML 645 - Leadership in Sport
Credits: 4
This course examines leadership theories and behavior as it relates to the sport industry. Students will study leadership behavior as it relates to coaching, administering athletic departments or programs, and directing sport-related businesses. Additionally, this course will explore the ethical issues dilemmas, and ethical decision-making process sport managers face in professional, collegiate and interscholastic sport.
Equivalent(s): SPST 645
Grade Mode: Letter Grading

SML 650C - Internship in Sport Management and Leadership
Credits: 1-4
Experiential learning in a setting appropriate to the major option and to student's objectives. A 4-credit internship requires a minimum of 150 hours experience; fewer credits will require proportionally fewer hours. May be on- or off-campus with an approved organization. Student must participate in securing the internship. A journal, bi-weekly reports and a final paper required. May be repeated, with no more than 8 credits taken in any given semester.
Repeat Rule: May be repeated for a maximum of 12 credits. May be repeated up to 2 times.
Equivalent(s): KIN 650C, SPST 650C
Grade Mode: Letter Grading

SML 650D - Internship in Coaching
Credits: 2-4
Experiential learning in a setting appropriate to student's learning objectives in coaching. May be on- or off-campus with an approved organization. Student must participate in securing the assistantship. A journal, bi-weekly reports, and final report required.
Prerequisite(s): (SPST 565 with a minimum grade of D- or SML 565 with a minimum grade of D-).
Repeat Rule: May be repeated for a maximum of 12 credits.
Equivalent(s): KIN 650D, SPST 650D
Grade Mode: Letter Grading

SML 693 - Teaching Assistantship
Credits: 2
A) Physical Education Pedagogy; B) Exercise Leader; C) Outdoor Education; D) Science Labs; E) Cardiac Rehabilitation; F) Coaching. Students serve as teaching teaching assistants in assigned class activities. Assignments to be made by the class instructor may include teaching assistants' and administrative duties. May be repeated barring duplication of subject.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): KIN 693, SPST 693
Grade Mode: Credit/Fail Grading

SML 696 - Independent Study
Credits: 2-4
An advanced, individual scholarly project under the direct supervision of a faculty member.
Equivalent(s): KIN 696, SPST 696
Grade Mode: Letter Grading

SML 696W - Independent Study
Credits: 2-4
An advanced writing-intensive, individual scholarly project under the direct supervision of a faculty member. Student and Faculty advisor will prepare a written proposal that outlines: questions to be pursued, methods of investigation, students qualifications to conduct the research, nature of finished written product (e.g. case study, position paper, extended lab report). Proposal must be approved by major faculty and dept. chair prior to students registration for SML 696W. All SML 696W projects must include Some forms of informal, ungraded writing such as a journal, reading summaries, draft chapters, or invention activities. Regular writing interaction between student and faculty adviser (i.e. at least weekly or biweekly), to include written feedback from the adviser. A finished product that is polished via revision. Faculty sponsors and students should consult the resources and guidelines of the UNH Writing Program.
Attributes: Writing Intensive Course
Equivalent(s): KIN 696W, SPST 696W
Grade Mode: Letter Grading

SML 699H - Honors Project
Credits: 4
Project first involves tutorial sessions to introduce the student to the experimental design, after which a research question is developed. After an appropriate literature review, the student collects and analyzes data, forms conclusions, and prepares a written report on the findings.
Attributes: Honors course
Equivalent(s): KIN 699H, SPST 699H
Grade Mode: Letter Grading

SML 738 - Sport Finance
Credits: 4
This course examines the financial tools that sport managers use to run their sport businesses. Therefore it explores traditional and innovative methods of revenue acquisition and financial management in sports organizations, the financial business structure of sports organizations, and the financial planning and forecasting processes that make organizations effective. Various other aspects of finance are discussed as they relate to sport organizations, including the tie value of money, capital structuring, stocks, inventory management, and taxation.
Equivalent(s): SPST 738
Grade Mode: Letter Grading

SML 740 - Athletic Administration
Credits: 4
Introduces basic management components and processes used in the successful administration of school and college athletic programs. Topics include planning, organizing, and managing sports programs, personnel, and policies; game scheduling; finances and facilities; equipment and event management; student support services; and key legal issues.
Equivalent(s): KIN 740, SPST 740
Grade Mode: Letter Grading

SML 741W - Social Issues in Contemporary Sports
Credits: 4
Investigation of interrelationships among sport, culture, and society in an attempt to understand the role and function of sport in contemporary society. Overview of selected socio-cultural factors that influence and result from participation in sports.
Attributes: Writing Intensive Course
Equivalent(s): KIN 741, SML 741, SPST 741
Grade Mode: Letter Grading

SML 761 - Career Development in Sport Management and Leadership
Credits: 4
Career Development in Sport Management & Leadership is the capstone course for majors in Sport Management & Leadership. A Capstone, by definition, is "a stone that forms the top of a wall or building … a final touch, a crowning achievement, a culmination." The capstone experience is designed to bring reflection and focus to the student's experiences at UNH. This course builds upon and extends the knowledge developed in prior required and elective courses, while tying in previous and current readings and discussions into the student's future in the sport industry. In addition, all students will develop several skills in the areas of professional writing, public presentation, and action-based research. Throughout the course, students will work individually and in groups. Prior to taking this course 150 Hours of documented sport related experience is required.
Equivalent(s): KIN 761, SPST 761
Grade Mode: Letter Grading

SML 764 - Advanced Sport Marketing
Credits: 4
An advanced course covering sport marketing, which includes a review of key sport marketing terms/concepts, in-depth experience writing s a sport marketer, and practical experience acting as a sport marketer. This course will instruct students n how to complete all aspects of an in-depth marketing plan. This is an undergraduate/graduate dual student course.
Prerequisite(s): (SPST 564 with a minimum grade of D- or SML 564 with a minimum grade of D- or ADMN 585 with a minimum grade of D-).
Equivalent(s): KIN 764, SPST 764
Grade Mode: Letter Grading

SML 765 - Advanced Topics in Coaching
Credits: 4
This course goes beyond the basic principles of coaching and addresses advanced topics in coaching (talent identification, talent development) from both the science and the art of coaching technique and strategies. This course is structured as an upper division course in Sport Studies. Content includes topics related to the development of the field of coaching. The class makes extensive use of case studies and analysis of practical coaching situations for the betterment of coach development. This course combines lecture, small group discussion and practical application of material.
Prerequisite(s): (SML 565 with a minimum grade of D- or SPST 565 with a minimum grade of D- or KIN 565 with a minimum grade of D-).
Equivalent(s): KIN 765, SPST 765
Grade Mode: Letter Grading

SML 770 - Sport Analytics
Credits: 4
An introduction to the concepts and practice of sports analytics. Students learn core analytical skills—visualization, exploratory analysis, correlation, probability, and entry-level predictive modeling—to answer real questions in both sport performance and sport business contexts. Emphasis is placed on framing problems, interpreting results responsibly, and presenting insights in decision-focused formats (brief reports, visuals, and dashboards).
Prerequisite(s): PSYC 402 with a minimum grade of C or SOC 402 with a minimum grade of C or ADMN 510 with a minimum grade of C or HMP 540 with a minimum grade of C or MATH 439 with a minimum grade of C or MATH 539 with a minimum grade of C or BIOL 528 with a minimum grade of C.
Grade Mode: Letter Grading

SML 780 - Psychological Factors in Sport
Credits: 4
Factors of outstanding athletic achievement; psychological variables in competition; the actions and interactions of sport, spectator, and athlete. Special attention directed to strategies for coaches, teachers, and athletic trainers to utilize sport psychology in their professional practice.
Prerequisite(s): PSYC 401 with a minimum grade of D-.
Equivalent(s): KIN 780, SPST 780
Grade Mode: Letter Grading

SML 798 - Special Topics
Credits: 1-4
New or specialized courses not normally covered in regular course offerings. Special fee on some sections.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): KIN 798, SPST 798
Grade Mode: Letter Grading
Special Fee: Yes

Supply Chain Management (SC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SC 671 - Supply Chain Analytics
Credits: 4
The course focuses on the quantitative side of Supply Chain Management (SCM) by applying both Descriptive and Prescriptive Analytics to SCM business scenarios. In Descriptive Analytics, students learn to use the principles of data visualization, data cleanup and wrangling, advanced data analysis and visualization tools, and dashboard design to develop and communicate Supply Chain Performance Metrics. In Prescriptive Analytics, students learn how to use advanced spreadsheet modeling/programming, optimization techniques, and sensitivity analyses to model, analyze, and optimize Supply Chain Networks.
Prerequisite(s): ADMN 410 with a minimum grade of C- and ADMN 510 with a minimum grade of C-.
Mutual Exclusion: No credit for students who have taken DS 671.
Grade Mode: Letter Grading

SC 680 - Global Supply Chain Management
Credits: 4
Global Supply Chain Management is a required course in the Supply Chain Management Option offered by the Decision Sciences Department at the Peter T. Paul College of Business and Economics. In this course students will explore various aspects of today's global supply chains as we cover five integrated learning modules: (1) Networks, Technology & People. (2) Supply & Demand Planning. (3) Sourcing & Supplier Management. (4) Operations & Logistics. (5) Margin Optimization & Customer Management.
Grade Mode: Letter Grading

SC 770W - Supply Chain Management External Experience
Credits: 4-8
This course is a credit-bearing, experiential learning course which may be taken as an alternative to SC 775 (SCM Team Capstone) by senior students in the Supply Chain Management (SCM) option. In this course, students engage in a semester-long, paid co-op experience working in a supply chain-related role within an external organization. Students apply SCM concepts and tools in a professional setting, gaining firsthand exposure to industry practices, challenges, and workflows. The experience is supported by academic deliverables that encourage reflection, integration of theory with practice, and professional development. A faculty advisor oversees the academic component, coordinates with the employer, and evaluates student performance.
Attributes: Writing Intensive Course
Equivalent(s): SC 775
Grade Mode: Letter Grading

SC 775 - Supply Chain Management Project Experience
Credits: 4
The Supply Chain Management Project Experience (DS 776) course is a required course in the undergraduate Supply Chain Management (SCM) option. In this course, students will work in groups of four (adjusted as needed based on course size and projects) on projects identified by sponsoring organizations. Students will actively engage in projects in the supply chain management space to deliver value to a real-world client. Project activities may include, but not be limited to, strategic sourcing analysis, logistics network optimization, new product launch strategy, inventory analysis, supplier sustainability audits, product model and pricing rationalization, etc. Students will participate in meetings and discussions with clients and project team members including project managers. In addition, students will work closely with a faculty member who will help them integrate the conceptual frameworks and SCM tools learned at Paul College with the challenges of their real-world experience.
Attributes: Writing Intensive Course
Prerequisite(s): SC 680 (may be taken concurrently) with a minimum grade of C-.
Equivalent(s): SC 770W
Grade Mode: Letter Grading

Supply Chain Management (SCM) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SCM 570 - Supply Chain Purchasing Management
Credits: 4
In this course, students will learn how purchasing and supply management have become increasingly visible in a world where supply is a major determinant of corporate survival and success. Supply chain performance and influences will be examined as they are not only operational and financial risks but also reputational risk. Extending the supply chain globally into emerging regions places new responsibilities on the supplier and supply, not only to monitor environmental, social, political, and security concerns, but also to influence them. Thus, students will develop a more in-depth understanding of the job of the supply manager of today as they go beyond the scope of supply chain efficiency and value for money spent to search for competitive advantage in the supply chain.
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): SCM 510G
Grade Mode: Letter Grading

SCM 610 - Supply Chain Management
Credits: 4
This course explores the management and flow of materials in a typical enterprise supply chain. Students examine a complete overview of material flow, from internal and external suppliers, to and from the enterprise. Topics may include basic elements of the supply chain, just-in-time (JIT), total quality management (TQM), enterprise resource planning (ERP), demand planning, and capacity management.
Prerequisite(s): (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-) and (CMPL 402 with a minimum grade of D- or CMPL 502G with a minimum grade of D- or MGMT 502G with a minimum grade of D-) and (MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-).
Equivalent(s): MGMT 610G, SCM 610G
Grade Mode: Letter Grading

SCM 715 - Logistics Management
Credits: 4
Logistics is planning and managing the movement of goods along the supply chain. This course provides students opportunity to identify and apply logistical and advanced managerial terms and theories. Designing effective development and management of the supply chain network is an invaluable source of sustainable, competitive advantage in today's turbulent global marketplace. In the contemporary scenario, demand is difficult to predict and the supply chain needs to be more flexible and customer-focused.
Prerequisite(s): SCM 610 with a minimum grade of D- or SCM 610G with a minimum grade of D-.
Equivalent(s): SCM 615G
Grade Mode: Letter Grading

Sustainability (SUST)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

SUST 401 - Exploring Sustainability
Credits: 4
How can we ensure dignity and wellbeing for all people, now and in the future, while protecting the earth's life supporting systems? We'll explore answers to this question through the transdisciplinary science, philosophy, and practice of sustainability. You'll develop systems thinking skills to analyze the environmental, social, and economic aspects of complex, interrelated challenges like climate change, global inequality, hunger, and biodiversity loss. Through active discussions, hands-on projects, and examples from UNH and our surrounding community, you'll learn about the many ways we can take action to create a more sustainable world.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): NR 437, SUST 401H
Grade Mode: Letter Grading

SUST 401H - Honors/Exploring Sustainability
Credits: 4
How can we ensure dignity and wellbeing for all people, now and in the future, while protecting the earth's life supporting systems? We'll explore answers to this question through the transdisciplinary science, philosophy, and practice of sustainability. You'll develop systems thinking skills to analyze the environmental, social, and economic aspects of complex, interrelated challenges like climate change, global inequality, hunger, and biodiversity loss. Through active discussions, hands-on projects, and examples from UNH and our surrounding community, you'll learn about the many ways we can take action to create a more sustainable world.
Attributes: Environment,TechSociety(Disc); Honors course
Equivalent(s): NR 437, SUST 401
Grade Mode: Letter Grading

SUST 501 - Sustainability in Action
Credits: 4
This course explores what sustainability action entails from academic and practitioner perspectives. One of the goals of the course is to encourage strategic thinking and leadership development. We look at the interdependent nature of social and ecological challenges, consider effects of paradigms, mindsets, and power dynamics, and explore sustainability tools including systems thinking, inter-and transdisciplinary approaches, sustainability leadership strategies, effective messaging and communication, creating shared value (CSV), and stakeholder theory and analysis. We apply these tools by brainstorming viable sustainability solutions for business, non-profit, government, educational, or other organizations and provide current and local context for the material we cover.
Attributes: Writing Intensive Course
Prerequisite(s): SUST 401 with a minimum grade of D- or SUST 401H with a minimum grade of D-.
Grade Mode: Letter Grading

SUST 600 - Sustainability Independent Study
Credits: 1-4
SUST 600 will provide an independent study to students who are interested in studying of a topic in sustainability in depth. Due to the highly personalized nature of SUST 600, the specific readings, activities and assignments will vary based on student interests and disciplinary backgrounds. At a minimum, students will be guided in how to prepare a project proposal, place their work within the current literature on the topic, and complete a final project.
Prerequisite(s): SUST 401 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

SUST 605 - Sustainability Internship
Credits: 1-4
This course will provide credit for practical work or a project experience in sustainability. The purpose of the course is to gain practical experience working in a sustainability field while simultaneously achieving specific learning goals pre-identified by the student and faculty mentor.
Prerequisite(s): SUST 401 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

SUST 750 - Sustainability Capstone
Credits: 4
The Sustainability Capstone is the culminating experience for students in the Sustainability Dual Major (SDM). The overall format of the course is to: 1) synthesize learning from other core and elective courses taken for the SDM and 2) work in groups to apply knowledge to a community-based, action-research project that addresses a specific sustainability issue at UNH or in the broader community. All groups present their work at UNH's Undergraduate Research Conference, submit a research paper, and complete other deliverables as needed to meet their project goals. Students will develop competence in community-based action-research methodologies and professional skills in facilitative leadership, collaborative project management and writing, community engagement, and equity assessments. Students will also create an online professional portfolio that highlights their sustainability experience and perspectives.
Attributes: Writing Intensive Course
Prerequisite(s): SUST 401 with a minimum grade of C- and SUST 501 with a minimum grade of C-.
Grade Mode: Letter Grading

Sustainable Agriculture & Food Systems (SAFS)

Courses previously under the SAFS subject prefix are now under the following new subject prefix:

Agriculture & Food Systems (AGFS) (p. 759)

Technology (TECH)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

TECH 400 - Introduction to CEPS Programs
Credits: 1
An overview of programs offered by the College of Engineering and Physical Sciences with an emphasis on skills needed to be successful academically, career opportunities and professional development. Required course of all undeclared majors in CEPS.
Grade Mode: Credit/Fail Grading

TECH 401 - Scientific Research Exploration
Credits: 2
This course introduces incoming freshmen to the scientific research process via a hands-on approach, which includes case studies, group work, and a two-week immersion experience under the guidance of the College of Engineering and Physical Sciences (CEPS) faculty. Course readings, discussions, and active participation in local research will facilitate the student's exploration of experimental design, hypothesis testing, data collection and analysis, interpretation of results, and effective communication of research findings. In the context of a group research project, students begin thinking like scientists, as well as strengthening their math, writing, an oral communication skills.
Grade Mode: Credit/Fail Grading

TECH 402 - Introduction to CEPS Career Exploration
Credits: 1
Although not a pre-requisite -this course will build on TECH 400's academic exploration and guide CEPS students as they identify ways to self-reflect and build experience to become well-rounded applicants for experiential learning opportunities (internships and research), graduate school, and their future careers. An emphasis will be placed on identifying ways to harness transferable skills through hands-on experiences beyond the classroom (jobs, volunteer work, clubs and orgs) applicable to the student's field(s) of interest.
Grade Mode: Credit/Fail Grading

TECH 411 - Innovation Scholars I
Credits: 2
A research driven introduction to the university experience. Science, mathematical, and engineering principles will be applied within a cohort research experience for first year students. Under the direction of a faculty mentor(s), student teams will be guided through a year-long research experience culminating in a presentation of research results at the Undergraduate Research Conference, or equivalent activity.
Grade Mode: Credit/Fail Grading

TECH 412 - Innovation Scholars II
Credits: 2
A research driven introduction to the university experience. Science, mathematical, and engineering principles will be applied within a cohort research experience for first year students. Under the direction of a faculty mentor(s), student teams will be guided through a year-long research experience culminating in a presentation of research results at the Undergraduate Research Conference, or equivalent activity.
Attributes: Inquiry (Discovery)
Prerequisite(s): TECH 411 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading

TECH 602 - Machine Shop Training
Credits: 1
In this course, the operation of the basic metal-cutting machine tools (e.g., engine lathe, milling machine, drill press, band saw, cut-off saw, etc.) are demonstrated. The students receive introductory training on the safe operation of these machines as well as on safe practices in the machine shop. Two small projects are completed to demonstrate basic machine shop abilities by the end of the course. Students must successfully complete an online shop safety quiz prior to the first day of the course. Offered spring and fall semesters only.
Equivalent(s): TECH 602A
Grade Mode: Credit/Fail Grading
Special Fee: Yes

TECH 750 - Intellectual Asset Management for Engineers and Scientists
Credits: 4
This course provides an introduction to the most important topic in the 21 century--intellectual assets. Students will receive an overview in practical, real-world aspects of managing intellectual assets (copyright, patents, trademarks, trade secrets, etc.). Students taking this course will be exposed to lectures, guest presentations, and case studies aimed at increasing their understanding of intellectual property strategies and related legal issues; technology assessment; technology valuation; licensing issues, strategies and negotiation techniques; business planning and start-up company development; and strategies for attracting investment for new ideas. The instructors and guest speakers for the course are involved in managing, protecting, investing in, or commercializing intellectual property assets in real world settings such as university technology transfer offices, patent law firms, venture capital firms, start-up companies, and related settings.
Equivalent(s): UMST 750
Grade Mode: Letter Grading

TECH 780 - Intellectual Property Law for Engineers & Scientists
Credits: 3
This course will cover the major doctrines of trade secrets, patents, copyrights, and trademarks, including what kinds of information qualify for protection, what must be done to obtain that protection, what rights owners and others have to use the information, and the underlying policy choices made by legislators and courts.
Grade Mode: Letter Grading

TECH 797 - Undergraduate Ocean Research Project
Credits: 2
Students work as members of interdisciplinary project teams on contemporary ocean-related problems under the guidance of a faculty adviser. Student team defines problem, prepares a budget, conducts literature surveys, engages in dialogue with experts in the community, deals with vendors, designs, and builds a working engineering model, gathers and analyzes scientific data or conducts a comprehensive study, makes interim reports, and defends the results before a jury of experts. A yearlong effort: 2 credits each semester, 4 credits total, an IA (continuous course) grade given at the end of the first semester.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to 1 time.
Equivalent(s): TECH 697
Grade Mode: Letter Grading

Theatre & Dance (THDA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

THDA 401 - New Student Seminar
Credits: 1
This course is an introduction to being a theatre and dance major. Students will examine academic standards expected in our department as well as management skills essential for success in balancing rehearsal and practicum schedules with academic responsibilities for all classes. This course is focused on helping majors understand expectations of being a Theatre and Dance major along with ways to cope with the stress.
Grade Mode: Credit/Fail Grading

THDA 435 - Introduction to Theatre
Credits: 4
Introduces all aspects of theatrical production: play writing, acting, directing, design, technical theatre and construction, and theatre management. Cultural and social context of theatre in our time and through the ages. Introduces major classical and modern types of theatre. Selected plays are read and discussed, and attendance at theatrical production is required.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 436 - History of Theatre I
Credits: 4
The history of theatre and its drama is introduced through close study of the world's greatest plays from the Greeks through the end of the 17th century -- How these plays were performed then, how they are performed now, their political, social, and cultural urgencies.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Equivalent(s): THDA 436H
Grade Mode: Letter Grading

THDA 438 - History of Theatre II
Credits: 4
The history of theatre and its drama is introduced through close study of the world's greatest plays of the 19th, 20th, and 21st centuries -- How these plays were performed then, how they are performed now, their political, social and cultural urgencies.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Equivalent(s): THDA 438H
Grade Mode: Letter Grading

THDA 439 - In Bed with the Bard: Shakespearean Seduction from Romeo and Juliet to Leonardo and Claire
Credits: 4
Introduces the imaginative process by which actors and directors bring Shakespeare's plays to life on the stage. Detailed study of eight plays.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

THDA 441 - Exploring Musical Theatre
Credits: 4
This is an introductory course designed to enhance the student's enjoyment and understanding of musical theatre. Course content and internet exploration as well as play attendance are designed to acquaint students with and nurture an appreciation for musical theatre. This course is intended for introductory students of all majors who are interested in studying musical theatre elements, styles, and significance.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): THDA 440
Grade Mode: Letter Grading
Special Fee: Yes

THDA 442 - Introduction to the Art of Acting
Credits: 4
Designed for non-THDA major students interested in the art of acting. Students broaden and deepen their own creativity, gain a deeper understanding of human behavior and interaction, and strengthen analytical skills through class work and projects. Focuses on the basic skills of acting: the ability to effectively communicate, to gain access to the full spectrum of human emotions, and increase spontaneity. Important innovators and theorists in the field of theatre and acting are covered, such as Sanford Meisner, Constantine Stanislavski, Bertolt Brecht, Jerzy Grotowsky, Agusto Boal, and Jacques Lacoq. Additional topics include contemporary plays and playwrights, an historical perspective of the art of acting, and the current state of live theatrical performance. Theatre majors not allowed.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): THDA 551
Grade Mode: Letter Grading
Special Fee: Yes

THDA 444B - Famous Dancers of the 20th Century
Credits: 4
The purpose of this course is to provide an introduction to the dancers of the twentieth century whose contributions to the art form have made dance an important cultural necessity. This includes examining how their style of dance and unique personalities has had a major influence on our perceptions of dance and how they have had an effect on society.
Attributes: FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

THDA 450 - History of Musical Theatre in America
Credits: 4
Study of the development of the musical and its relationship to American social history.
Equivalent(s): THDA 440
Grade Mode: Letter Grading
Special Fee: Yes

THDA 455 - Musicianship and Beginning Vocal Techniques for Musical Theatre
Credits: 2
This course is a combination course designed to help musical theatre students develop the appropriate musicianship skills as well as beginning vocal techniques. Musicianship skills include melodic and rhythmic sight reading, harmony reading and singing, basic piano skills, as well as key signature and interval recognition. Beginning vocal techniques include breath management, strengthening vocal fold closure, releasing tension and creating space in the acoustic chamber (throat and mouth). These skills will help musical theater students develop the ability to overlap strong vocal work with strong musicianship specifically for industry standard auditions and performances in Musical Theatre.
Grade Mode: Letter Grading

THDA 458 - Costume Construction
Credits: 4
Study and development of costuming techniques, including hand and machine sewing, pattern drafting, alterations, and fabric manipulation. Emphasis on demonstrated understanding.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 459 - Stagecraft
Credits: 0 or 4
Elements of play production: basic building components, tools, and materials for producing the scenery; equipment and shop layouts supporting all of the areas of the set, lighting, and costume designs; and consideration of various stage spaces and theatrical venues. Practical application on University theatre productions. Lab.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 460 - Elements of Design
Credits: 4
Course is designed for students who are interested in theatrical design elements including scenery, costume, lighting and sound. Class encompasses lecture, discussion, presentation and studio (work in class) formats. Critique and discussion are essential to the creative thinking that a designer needs to have. Throughout the course, each student is expected to complete projects that incorporate the design elements they have studied.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 462 - Ballet I
Credits: 4
Introductory lecture and dance technique course focusing on the fundamentals of ballet technique and the historical development of ballet from the Renaissance to modern times. This ballet class will improve strength, flexibility, coordination, agility, endurance, and musicality while incorporating an appreciation for artistry. No dance experience required, only willingness to develop at your own pace. Open to both majors and non-majors.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

THDA 463 - Theatre Dance I
Credits: 4
Introductory lecture and dance technique course focusing on how technology, industrialization and popular culture impact the art by discussing dancers, choreographers, films and musicals of the 20th century. Jazz and tap class will improve strength, flexibility, coordination, and musicality. No Dance experience required, only willingness to develop at your own pace. Students with prior experience are expected to register for THDA 563 or THDA 663. Instructor determines appropriate level. Class open to both majors and non-majors.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 464 - Ballet Cross-Training
Credits: 1
Traditional ballet exercises will be modified to focus on repetition and body mechanics to improve athletic skills through dance. This ballet class will help students further develop strength, coordination, speed, agility, flexibility, fluidity, balance, efficiency of movement, and mental focus. Particular emphasis will be given to psychomotor skill development through challenges that require applying unfamiliar ballet vocabulary while moving to music. No dance experience required, only willingness to develop at your own pace in a fun, judgment-free environment.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

THDA 475 - Stage Makeup
Credits: 2
Fundamentals of juvenile, old age, character, and special stage makeup techniques.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 487 - History of Dance
Credits: 4
This course will be a study of dance from prehistory to the present. Through an interactive approach students will gain methods to perceive, create and respond to the history of dance through integrated arts and technology. Activities both in and out of the classroom will aid in the understanding of dance and how it has evolved throughout history both socially and as a means of entertainment. This course will also examine how dance has influenced or collaborated with other art forms.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

THDA 500 - Musical Theatre Voice I
Credits: 0 or 1
This course provides students with a foundation in healthy, relaxed, and dynamic singing of primarily musical theatre repertoire. In addition to expanding the student's knowledge of and ability to sing various styles of musical theatre repertoire, this course provides a venue to explore and develop analytical skills relating to character and script.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

THDA 522 - Storytelling, Story Theatre, and Involvement Dramatics
Credits: 4
This course actively explores storytelling techniques based on individual needs. An examination of story theatre and involvement styles leads to practical experience in individual performances. Participants will actively develop performance techniques that reflect a variety of styles and approaches for storytelling. We will examine the historical significance of storytelling in Eastern and Western civilizations and develop a perspective on its role in culture and religion. Applications for both educational and entertainment purposes will be explored through acting and vocal techniques, games, media, felt board, and puppetry. This course will include an examination of story theatre and involvement styles and the development of the ensemble for performance. The projects will include individual performances and group collaboration of selected stories appropriate for a wide range of audiences. The final project will reflect the participant's individual needs and utilize storytelling techniques developed in the course.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): THDA 622
Grade Mode: Letter Grading
Special Fee: Yes

THDA 531 - The London Experience: Discovery
Credits: 4
Learn about one of the greatest cities in the world during this 10-day trip to London. This Discovery class begins as a two-week, on-line course and then packs in a busy schedule visiting amazing sights and taking in some of the best theatre in the English speaking world. The course offers an insight into the history, politics, society and culture of London through the lens of art, architecture, music, and of course, theatre.
Co-requisite: INCO 589
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 532 - The London Experience
Credits: 2
Exploration of the culture and history of London while enhancing study of live theatre prior to active study in the country. IA (continuous grading).
Co-requisite: INCO 589
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): THDA 592C
Grade Mode: Letter Grading
Special Fee: Yes

THDA 541 - Arts Administration and Entrepreneurship
Credits: 4
This course will explore multiple facets of the business of running an arts-based organization. The course will also examine business-related issues relevant to individuals seeking to build a career in the arts. The class will provide an overview of the essential knowledge needed for effective arts management and to cultivate the skillset needed to develop, fund, promote and deliver arts-based projects.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 546 - Costume Design for the Theatre
Credits: 4
How to design costumes for the theatre, not figure drawing, although drawing techniques are taught. Script analysis and research and presentational techniques for costume design explored and implemented.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 548 - Stage Lighting Design and Execution
Credits: 4
This class is designed for students who are interested in theatrical lighting design. The class meets 3 hours per week. It is a project-based course taught in various formats including lectures, hands-on practices, class discussions, and presentations. The class will help students develop the skills for lighting design and creative thinking that are essential for a critical thinker.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 549 - Vectorworks Computer-Aided Design Drafting for the Theatre
Credits: 2
This course will help students develop essential drafting skills used to present design ideas, technical solutions, and communication in productions. Drafting is a form of visual presentation that brings the design ideas to realization. Throughout the semester, students will learn about the basic graphic standard in the industry, gain proficiency in VectorWorks software, and develop a clear and accurate presentation for their designs.
Grade Mode: Letter Grading

THDA 551 - Acting I
Credits: 4
Development of fundamental vocal and physical stage techniques for actors and directors through exercises, improvisation and theatre games.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 552 - Acting II
Credits: 4
Focuses on strengthening the actor's ability to achieve a higher level of truth, presence, and spontaneity on stage. Building on the approach devised by Sanford Meisner, this highly intensive class creates a bridge to connect these developing skills to various forms of text.
Prerequisite(s): THDA 551 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 554 - Stage Combat
Credits: 4
This course actively explores stage combat techniques for unarmed combat as well as basic rapier swordplay. Students are expected to prepare hand-to-hand acting projects as well as a final rapier fight project which demonstrates proper stage combat techniques learned during the semester.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 555 - Acting The Song
Credits: 4
Foundations of solo musical theatre performance, with a special focus on Acting the Song. Students will review beginner acting techniques and transfer their work from the realm of the monologue into the realm of the musical theatre solo assessed through solo performances and written assignments.
Grade Mode: Letter Grading

THDA 562 - Ballet II
Credits: 2
This dance technique class is taught at an intermediate level and is an extension of Ballet I with a focus on developing ballet vocabulary and artistry. Open to both majors and non-majors.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

THDA 563 - Theatre Dance II
Credits: 2
This dance technique class is an extension of THDA 463. Students will become versatile in a variety of dance styles, including contemporary and musical theatre style jazz and tap dance. Technical execution, artistry and improvisation will be explored. Open to both majors and non-majors.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 564 - Compocinema
Credits: 4
Compocinema examines dance/movement as an interdisciplinary form that integrates the human body, digital video camera, the computer program, and site-specific and/or collaborative formats. Emphasizing conceptual and practical approaches, students (individually and in groups) will take turns developing and performing movement as well as planning, designing, shooting, editing, observing, describing, analyzing, and revising video of dance/movement as artistic expression.
Grade Mode: Letter Grading

THDA 565 - Aerial Dance I
Credits: 2
This class focuses on beginning aerial dance language and skills as well as body conditioning. Apparatuses including fabric, trapeze and lyra are introduced.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

THDA 570 - Movement & Vocal Production
Credits: 4
Expansion of the student's body-voice awareness, utilizing basic theories and lessons of Lessac Kinesensics and other somatic voice and body practices. Students will build breath-body connection and capacity, expand resonance and articulation, explore body alignment and expressiveness to build a foundation for a healthy and dynamic body-voice for stage and screen performance.
Prerequisite(s): THDA 551 with a minimum grade of D-.
Equivalent(s): THDA 470
Grade Mode: Letter Grading
Special Fee: Yes

THDA 576 - Pointe
Credits: 2
This class is taught at an intermediate level focusing on developing pointe technique and artistry. Classical variations are incorporated to study the history of ballet through practical application. 1-2 years of pointe technique required. If interested in beginning the study of pointe technique, contact the instructor. Open to both majors and non-majors.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

THDA 583 - Introduction to Puppetry
Credits: 4
Introduces the art of puppetry for general appreciation, entertainment, application in the classroom, and as a therapeutic tool. Emphasis on constructing a variety of puppets (e.g., hand, rod, shadow, and scarf) and adapting literary sources for scripts and performance.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

THDA 589 - Practicum
Credits: 1
The practicum ensures a breadth of experience in the major, including sets, costumes, lighting, props, box office, marketing, and performing. Students must register for practicum every semester. They are notified of their practicum assignment at the beginning of each semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): THDA 689
Grade Mode: Credit/Fail Grading

THDA 600 - Musical Theatre Voice II
Credits: 0 or 1
This course is a continuation of THDA 500: Musical Theatre Voice I. Students build on the groundwork in vocal technique, analysis, and performance established in Musical Theatre Voice I and continue to explore and develop these skills.
Grade Mode: Letter Grading

THDA 624 - Theatre for Young Audiences
Credits: 4
Introduces coaching and directing techniques for classical and contemporary acting styles in theatre for young audiences. Historical contents leads into practical exploration of actor training and coaching , production and design, choreography, and business management for theatre and for youth programs. Students develop teaching strategies for young performers and participate in a culminating project.
Equivalent(s): THDA 624A, THDA 624B, THEA 624A, THEA 624B
Grade Mode: Letter Grading
Special Fee: Yes

THDA 632 - Interpretation of Shakespeare in Theatre
Credits: 4
Increases understanding of Shakespeare's language and action, and improves ability to speak his verse and prose with clarity and verve. Students achieve insights into Shakespeare's plays through the medium of performance. Weekly oral and written assignments.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 633 - Dance Composition
Credits: 4
Practical, developmental approach to process of creating dances.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 640W - Playwriting
Credits: 4
To illuminate and guide each student through the art and craft of writing for performance. This course explores the fundamental principles needed to build a realistic play that is intended to be produced upon the stage. Though the course is built around the construction of plays, the principles, writing exercises, readings, and other assignments serve as a solid base for any form of dialogue driven writing.
Attributes: Writing Intensive Course
Equivalent(s): THDA 540, THDA 540W, THDA 750
Grade Mode: Letter Grading
Special Fee: Yes

THDA 641 - Stage Management
Credits: 4
Introduces to the concepts and skills needed for stage management. Stage managers perform a central role in the theatrical production, coordinating artistic and technical elements. They need a thorough understanding of the script, strong management skills, and a solid background in all aspects of the theatre. Prepares students to function as a stage manager in productions at any theatre.
Equivalent(s): THDA 592B
Grade Mode: Letter Grading
Special Fee: Yes

THDA 652 - Scene Design
Credits: 4
Scene design from script to finished design. Both aesthetic and practical viewpoints considered. Emphasis on presentational techniques: study of perspective and finished rendering.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 655 - Musical Theatre Scene Study
Credits: 4
Builds on and expands the techniques learned in Acting I and Musical Theatre Voice I, with a special emphasis on partner work and scene study.
Prerequisite(s): (THDA 442 with a minimum grade of D- or THDA 551 with a minimum grade of D-) and THDA 555 with a minimum grade of D-.
Grade Mode: Letter Grading

THDA 662 - Ballet III
Credits: 2
Advanced-level course in technique. Open to both majors and non-majors.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

THDA 663 - Theatre Dance III
Credits: 2
This dance technique class is an extension of THDA 563. Students will become seasoned in contemporary jazz, musical theatre style jazz and tap dance. Technical execution, choreographic artistry and improvisation will be explored. Class open to both majors and non-majors.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 665 - Aerial DanceII
Credits: 2
The study of aerial arts including two and one point trapeze and fabric. Class open to both majors and non-majors.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 668 - Aerial Dance Teacher Training
Credits: 2
Students who show mastery of aerial dance performance may receive permission to take Aerial Dance Teacher Training. This course will result in a certificate verifying students have completed a 75-hour training program focusing on the fundamental skills needed to safely teach Aerial Dance, including: Teaching aerial skills on a variety of apparatuses, safety practices, stretching methods, conditioning, physical preparation and injury prevention.
Prerequisite(s): THDA 565 with a minimum grade of D- and THDA 665 with a minimum grade of B-.
Grade Mode: Letter Grading

THDA 670 - Dialects
Credits: 4
Study and practice in basic dialect acquisition for performers.
Prerequisite(s): THDA 551 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 672 - Audition
Credits: 4
Business aspects of creating and maintaining a performance career, including resumes, photos, agents, casting directors, website building, networking, unions, trade publications, audition material, cold-reading, camera acting, and voice over.
Prerequisite(s): THDA 551 with a minimum grade of D-.
Grade Mode: Letter Grading

THDA 683 - Advanced Puppetry
Credits: 4
In-depth study of the theory and practice of puppetry for the advanced student. Students develop skills in manipulation and construction of selected puppet forms and apply these skills in performance. Examines historical perspectives and the application of puppetry in the classroom and as a therapeutic tool.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 700 - Musical Theatre Voice III
Credits: 0 or 1
This course is a continuation of THDA 600: Musical Theatre Voice II. Students continue to develop their skills of vocal technique, analysis, and performance established in Musical Theatre Voice II, while focusing these skills towards their application in auditioning for, and performing in, professional theatre.
Repeat Rule: May be repeated for a maximum of 3 credits.
Grade Mode: Letter Grading

THDA 721 - Arts Integration
Credits: 4
This course examines the value and practical application of incorporating the arts into non-arts educational settings. From the perspective of multiple intelligences and varied learning styles, students investigate how the arts can enhance teaching methodology by developing and implementing lesson plans for a variety of non-arts subject areas. Active theatre involvement is limited; the focus is on practicing teaching methods.
Attributes: Writing Intensive Course
Equivalent(s): THDA 621
Grade Mode: Letter Grading
Special Fee: Yes

THDA 727 - Methods of Teaching Theatre
Credits: 4
This course is the culminating experience for theatre education. The purpose is to provide practical information and skills that theatre teachers will use as source material for the classroom and to prepare for the education job search. Students will examine a variety of teaching models in order to articulate a personal teaching philosophy, write comprehensive semester curricula and course syllabi, and create an extracurricular program plan and philosophy.
Attributes: Writing Intensive Course
Equivalent(s): THDA 627
Grade Mode: Letter Grading
Special Fee: Yes

THDA 729 - Community Oriented Drama Programs
Credits: 1-4
Advanced practicum in designing, developing, and producing drama programs for the school and community. Includes audience analysis and marketing skills as well as adapting spaces, soliciting volunteers, and working with a limited budget.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 732 - Choreography
Credits: 4
Theoretical and practical consideration of the creative and aesthetic aspects of ballet, modern, and theatre dance.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 741 - Directing
Credits: 4
A process oriented approach to the art of stage directing. The course begins with an in-depth focus on script analysis. Students then develop their skills as the "master storyteller" through imagination, interpretation, communication, and style.
Prerequisite(s): THDA 551 with a minimum grade of D- and THDA 552 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 742 - Directing II
Credits: 4
In-depth study of the theory and practice of stage direction for the advanced student. Builds on 741, Directing. Students strengthen and expand their existing knowledge of the subject area. Exploration focuses on three areas of directorial communication: application to periods and styles, exploration of avant-garde theory, and directorial technique. Concludes with a major project mounted for public performance.
Prerequisite(s): THDA 741 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 755 - Musical Theatre Repertoire
Credits: 4
Students learn to integrate and expand on techniques in previous acting, musical theatre, and voice classes, with special emphasis given to audition techniques, repertoire expansion and specialization, and in-depth analysis of the business and personal requirements necessary to be a successful artist in the professional theatre.
Prerequisite(s): (THDA 442 with a minimum grade of D- or THDA 551 with a minimum grade of D-) and THDA 555 with a minimum grade of D-.
Grade Mode: Letter Grading

THDA 758 - Acting III
Credits: 4
Applies the principles and techniques acquired by students in THDA 551 and THDA 552 to various genres, such as epic and absurdist, and to mediums such as television and film. Special attention is given to characterization beyond the student's standard range and the development of the actor as a creative artist, using the techniques of such methodologists as Lacoq, Laban, and Grotowski.
Prerequisite(s): THDA 551 with a minimum grade of D- and THDA 552 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 759 - Acting: Period and Style
Credits: 4
Techniques of style analysis and period research. For the first time in the students' undergraduate actor training, students synthesize their basic actor training with the heightened language and archetypal characterization inherent in the classical theatre of the ancient Greeks, the Commedia dell' Arte, the Renaissance, the Neoclassical period, and the Restoration period.
Prerequisite(s): THDA 551 with a minimum grade of D- and THDA 552 with a minimum grade of D- and (THDA 436 with a minimum grade of D- or THDA 438 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

THDA 760 - Teacher Planning for Theatre
Credits: 4
Focuses on lesson and unit planning for the areas of high school theatre history, play analysis, and play writing. Students will practice various methods of teaching these areas of drama.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 765 - Aerial Dance III
Credits: 2
Aerial Dance III is an advanced-level course designed for experienced aerial dance students who have successfully completed Aerial Dance II (THDA 665) or equivalent training. This course deepens technical proficiency on multiple aerial apparatus while emphasizing choreographic development, ensemble creation, and performance artistry. Students will work on complex sequences, dynamic transitions, drops, and multi-apparatus work (including cube, triangle, rope, and triple trapeze), expand their rigging literacy, and collaborate to create large-scale group works. The semester culminates in an Aerial Dance Showcase in which Aerial III students are responsible for opening and closing multi-apparatus group pieces, and a solo or duet aerial work on an apparatus of their choice (approved by instructor).
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

THDA 786 - Dance Pedagogy
Credits: 4
Methods course that focuses on the art and science of teaching the movement forms of ballet, modern, jazz and tap. Designed to prepare students who are seeking dance certification with a M.Ed. or a M.A.T., or who wish to open their own studio. Provides background into the nature of teaching, standards that make up good teaching, awareness of National/State standards, and study and practice of lesson plans in K-12 school curricula or private studios.
Grade Mode: Letter Grading

THDA 791 - Internship in Theatre and Dance
Credits: 2-8
Fieldwork with a regional or touring theatre or with a theatre education program. This advanced-level internship allows the student to experience a professional theatre/theatre education setting prior to graduation. Normally supervised by a qualified theatre professional, with frequent consultation with a faculty sponsor. Written report required. May be part- or full-time with credits assigned accordingly.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

THDA 795 - Independent Study
Credits: 1-8
Advanced individual study. Specific independent study opportunities are sometimes posted in the Theatre and Dance Department Office. Project, which includes a substantial piece of writing, must be developed with supervising instructor.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): THDA 795W
Grade Mode: Letter Grading

THDA 795W - Independent Study
Credits: 1-8
Advanced individual study. Specific independent study opportunities are sometimes posted in the Theatre and Dance Department Office. Project, which includes a substantial piece of writing, must be developed with supervising instructor.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): THDA 795
Grade Mode: Letter Grading

THDA 796 - Independent Study
Credits: 1-8
Advanced individual study. Specific independent study opportunities are sometimes posted in the Theatre and Dance Department Office. Project, which includes a substantial piece of writing, must be developed with supervising instructor.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): THDA 796W
Grade Mode: Letter Grading

THDA 798 - Senior Thesis
Credits: 2
Supervised research leading to the presentation of a major research paper.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

THDA 799 - Capstone Project
Credits: 2 or 4
This required course incorporates and tests the knowledge that majors have learned over their careers in the Department of Theatre and Dance. Capstone experiences are tailored to each student through conference with their adviser in their specific Theatre and Dance track.
Attributes: Writing Intensive Course
Equivalent(s): THDA 799H
Grade Mode: Letter Grading

THDA 799H - Honors/Capstone Project
Credits: 4
See description for THDA 799.
Attributes: Honors course; Writing Intensive Course
Equivalent(s): THDA 799
Grade Mode: Letter Grading

Tourism Planning & Development (TOUR)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

TOUR 400 - Introduction to Tourism
Credits: 4
Provides an informational foundation in tourism and gives a more extensive knowledge of the tourism industry. Examines historical perspectives, tourism organization, and supply and demand of the tourism industry. Discusses the dynamic and pluralistic nature of the tourism industry.
Equivalent(s): HMGT 401
Grade Mode: Letter Grading

TOUR 510 - Tourism and Global Understanding
Credits: 4
Introduces ways in which tourism can act as a vehicle to understanding foreign cultures. Responsible tourism, has the potential to help bridge cultural and psychological distances that separate people of different races, religions, and socio-economic classes. Through responsible tourism we can learn to appreciate, trust, and respect the human diversity that our world has to offer. Helps students gain an informed acquaintance with other cultures and customs, and to understand the central role of tourism in international and cross-cultural understanding.
Grade Mode: Letter Grading

TOUR 798 - Independent Study
Credits: 1-4
Special assignments in readings, investigations, field problems. May include teaching experience.
Equivalent(s): TOUR 798W
Grade Mode: Letter Grading

TSAS Social Science (SSCI)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

No courses are currently active in the course inventory for this subject prefix.

TSAS Thompson School Applied Science (TSAS)

No courses are currently active in the course inventory for this subject prefix.

TSAS 495 - Thompson School:Special Topics
Credits: 1-4
New or specialized courses not normally covered in regular course offerings. May involve one, two or more program areas within the Thompson School of Applied Science. Topics and prerequisites (if any) to be announced before registration. May include a lab.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): TSAS 295
Grade Mode: Letter Grading

UNHM Independent Study (UMIS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

UMIS 599 - Independent Study
Credits: 1-4
Independent study with the approval and sponsorship of UNHM faculty of material not covered in regular course offerings. Barring duplication of subject, may be repeated.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

UNHM Special Topics (UMST)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

UMST 401 - First Year Seminar
Credits: 2
This two-credit seminar is part of UNH Manchester's continued commitment to the success of first year students. The focus of this course is not on a specific academic subject or field of study; instead, the focus is on YOU – the student. This course is designed to help you transition into your first semester as a college student on the Manchester campus. Together we will learn how to incorporate health and well-being into our daily lives through the exploration of resiliency skill building, mindfulness practice, peer-to-peer discussions, and personal reflections.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

UMST 402 - Transfer Seminar
Credits: 1
The Transfer Seminar focuses on students' adjustment to being at UNH Manchester. By incorporating topics such as campus resources, financial literacy, internship and career planning, self-reflection, and information literacy, the goal of this course is to foster the development of skills or strategies that are both applicable and valuable across disciplines as well promoting personal success during and after college.
Grade Mode: Letter Grading

UMST 472 - Beyond Google: An Introduction to Information Literacy
Credits: 2
Beyond Google is a 2-credit introduction to the six frameworks of information literacy for high education created by the Association of College and Research Libraries. Students learn the critical thinking skills necessary to identify, evaluate, and use diverse information sources to meet varied information needs.
Grade Mode: Letter Grading

UMST 500 - Internship
Credits: 1-4
The UNHM internship places students in a variety of business and organizational settings under the direction of a faculty adviser and workplace supervisor. Students fulfill the obligations of the workplace internship plan, as well as complete individually-designed projects of academic merit under the direction of UNH faculty. Open to matriculated students with a 2.5 GPA or better. Students must receive approval of the UNHM internship coordinator.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

UMST 521 - Tutor Development
Credits: 3
This interdisciplinary course, team-taught by the Director and Assistant Director of the Learning Center, is intended to prepare undergraduates for working as peer tutors. Students will study theories of adult development, learn several approaches to tutoring in their discipline(s), and practice their tutoring and communication skills. Cannot be repeated.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

UMST 572 - Knowledge in Action: Research in the Workplace
Credits: 2
This 2-credit course guides students toward critical thinking competencies and evaluative skills necessary for successful information-seeking strategies in workplace settings. By discovering and assessing a variety of career-specific information sources, students will explore how professional organizations develop questions to address problems of practice. Students will interrogate the contexts in which professionals create and disseminate knowledge; engage in fact-checking and other assessment activities; and address workplace issues through the effective use of relevant professional information sources.
Grade Mode: Letter Grading

UMST 582 - Internship and Career Planning Seminar
Credits: 1
This course is strongly encouraged for any student seeking internship and/or employment opportunities. Participants will research and evaluate opportunities related to their career interests, conduct informational interviews, create tailored resumes and cover letters, use LinkedIn as a networking and job search resource, and participate in employer-based resume reviews and mock interviews. This course is open to all students in all majors and is suited for students interning and/or seeking employment within the next six months. Letter grades are assigned. This course cannot be repeated for credit. Students who enrolled in UMST 599 Internship and Career Planning Seminar previously are not eligible to take this course for credit.
Grade Mode: Letter Grading

UMST 599 - Special Topics
Credits: 1-4
Occasional offerings dependent on availability and interest of faculty, barring duplication of subject, may be repeated for credit.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

UMST 750 - Business Applications of Intellectual Property in Science and Engineering
Credits: 4
Students will receive an overview of practical, real-world aspects of managing and leveraging intellectual assets (copyrights, patents, trademarks, trade secrets, etc) in business. Students taking this course will be exposed to lectures, guest presentations, and case studies aimed at increasing their understanding of intellectual property strategies and related legal issues; technology assessment; technology valuation; commercialization issues, strategies, and negotiation techniques; business planning and start-up company development; and strategies for attracting investment for new ideas. Your instructor and guest speakers for the course are involved in managing, protecting, enabling, investing in, or commercializing intellectual property assets in real world settings such as university technology transfer offices, patent law firms, venture capital firms, start-up companies, incubators, accelerators, and related settings.
Equivalent(s): TECH 750
Grade Mode: Letter Grading

UMST 799 - Pre-Pharmacy Concurrent Enrollment
Credits: 0-20
Registration place-holder for students completing the fourth year of their B.A. Biology Program at Massachusetts College of Pharmacy and Health Studies in the Pre-Pharmacy articulation program.
Grade Mode: Credit/Fail Grading

Veterinary Technology (VTEC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

VTEC 424 - Introduction to Veterinary Technology
Credits: 2
An overview of the veterinary technology field. Topics in veterinary office practice management are covered, including, appointment scheduling, inventory control, financial transactions, client communication and regulatory, legal, and ethical aspects of veterinary practice. Other topics include veterinary technician and animal science career options, professional development and domestic animal management including breed identification, terminology, and husbandry.
Grade Mode: Letter Grading

VTEC 430 - Companion Animal Behavior and Handling Techniques
Credits: 4
Overview of the development, selection, genetics, and function of specific breeds of companion animals. Canine and feline handling and restraint skills will be demonstrated and practiced. General dog and cat, as well as breed-specific, behavior is included. Other companion animals such as parrots, rabbits, and pigs are reviewed as time allows.
Equivalent(s): AAS 430
Grade Mode: Letter Grading

VTEC 435 - Animal Health and Laboratory Diagnostics
Credits: 4
Covers the principles of maintaining animal health by preventing and managing disease via husbandry, immunization, and diagnostic testing. Focus is on domestic species; primarily dogs, cats, horses and cows. Topics include parasitology, microbiology, immunology, and clinical, gross and histopathology. Laboratory activities include fecal flotation, urinalysis, complete blood count and blood chemistry, bacterial culture and sensitivity testing, gram staining, serology, laboratory safety, and principles of sample collection and quality control. VTEC and AAS majors only.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading
Special Fee: Yes

VTEC 449 - Clinical Animal Nursing Techniques I
Credits: 4
Essential skills and knowledge for the care of small animals, focusing on companion animal species. Wellness protocols an basic nursing skills (medication administration, nail trimming, ear cleaning, anal gland expression, wound care, injections, phlebotomy, electrocardiogram, blood pressure measurement) will be discussed and practiced.
Prerequisite(s): VTEC 430 with a minimum grade of C+.
Equivalent(s): AAS 449
Grade Mode: Letter Grading
Special Fee: Yes

VTEC 497 - Veterinary Technology Work Experience
Credits: 0
Provides students supervised introductory hands-on experience in a veterinary medical facility. Students apply skills learned in animal handling and nursing, laboratory methods, client communication and practice management courses. Students are responsible for obtaining a position in an approved veterinary facility and need to complete a minimum of 80 hours of work to fulfill course requirements. Must have rabies vaccine series completed prior to the start of the semester.
Prerequisite(s): VTEC 449 with a minimum grade of C+.
Grade Mode: Credit/Fail Grading

VTEC 550 - Clinical Animal Nursing Techniques II
Credits: 4
Builds on materials presented in VTEC 449, Clinical Animal Nursing Techniques I. Covers veterinary imaging modalities including radiographic and ultrasonographic techniques and safety; nursing care of hospitalized patients, emergency medicine, and laboratory animal and exotic companion animal medicine.
Prerequisite(s): VTEC 449 with a minimum grade of C+.
Equivalent(s): AAS 550
Grade Mode: Letter Grading
Special Fee: Yes

VTEC 565 - Pharmacology for Veterinary Technicians
Credits: 4
This course provides study in the area of veterinary medicines emphasizing classes and actions of drugs, calculating dosages, proper administration, and dispensing of drugs. Topics include general pharmacology, calculating dosages, pharmacy regulation guidelines and record keeping. Case-based learning is utilized to correlate common diseases in companion animals with associated pharmacological agents. Specifically, disease pathogenesis, diagnosis, and treatment options are discussed along with pertinent technician interventions and evaluations.
Prerequisite(s): AAS 428 with a minimum grade of C+.
Equivalent(s): VTEC 265
Grade Mode: Letter Grading

VTEC 575 - Veterinary Anesthesia and Surgical Assisting
Credits: 4
This course provides the theoretical knowledge and practical experience necessary to provide safe and effective anesthesia and analgesia to veterinary patients; including providing nursing care and assistance in all aspects of veterinary surgery and anesthesia.
Prerequisite(s): VTEC 565 (may be taken concurrently) with a minimum grade of C+.
Equivalent(s): VTEC 275
Grade Mode: Letter Grading
Special Fee: Yes

VTEC 579 - Small Animal Practicum I
Credits: 4
This course provides veterinary technology students service learning opportunities. Students manage a wellness clinic for pets, developing staffing/appointment schedules, and performing appropriate procedures on pets. Additionally, students travel off-campus to provide medical, husbandry, and behavioral care for shelter animals. Successful ascertainment and use of correct veterinary terminology is required. A surgical rotation is conducted to introduce techniques in anesthesia, surgical nursing, and dentistry.
Prerequisite(s): VTEC 449 with a minimum grade of C+ and VTEC 565 with a minimum grade of C+.
Grade Mode: Letter Grading
Special Fee: Yes

VTEC 580 - Small Animal Practicum II
Credits: 4
Students manage a wellness clinic for pets, developing staffing/appointment schedules, and perform appropriate procedures on pets. Additionally, students travel off campus to provide medical care for shelter animals. A surgical rotation is conducted to reinforce techniques in anesthesia/surgical nursing and dentistry. Nursing care assignments are due throughout the semester to aid students in the integration of knowledge gain during their academic coursework. This is a four-credit course offered for VTEC majors only, and by permission only.
Prerequisite(s): VTEC 579 with a minimum grade of C+ and VTEC 575 with a minimum grade of C+.
Grade Mode: Letter Grading
Special Fee: Yes

VTEC 583 - Large Animal Practicum
Credits: 2
An applied large animal class covering basic veterinary nursing care and procedures, focusing on horses and cows. The majority of class time is spent practicing hands-on skills with animals. Restricted to veterinary technology students only.
Prerequisite(s): AAS 421 with a minimum grade of C+ and VTEC 449 with a minimum grade of C+.
Equivalent(s): VTEC 283
Grade Mode: Letter Grading

VTEC 595 - Veterinary Technology Internship
Credits: 3
Provides students supervised hands-on experience in a veterinary medical facility within a clinical setting, students apply skills learned in animal handling and nursing, diagnostics and laboratory, client communication and practice management courses. Students are responsible for obtaining a position in an approved veterinary facility prior to the start of the semester. Open to veterinary technology students only.
Prerequisite(s): VTEC 550 with a minimum grade of C+ and VTEC 579 with a minimum grade of C+.
Equivalent(s): VTEC 295
Grade Mode: Credit/Fail Grading

VTEC 599 - Comprehensive VTNE Review
Credits: 4
Course will prepare veterinary technology students for the Veterinary Technician National Examination (VTNE). Topics include VTNE qualification and registration procedures and standardized test-taking strategies but will primarily focus on a systematic review of the ten knowledge domains covered on the VTNE. Specific course content will vary based on yearly changes to VTNE content and based on students' performance on a VTNE readiness assessment at the start of the course.
Prerequisite(s): VTEC 435 with a minimum grade of C+ and VTEC 550 with a minimum grade of C+ and VTEC 575 with a minimum grade of C+ and VTEC 579 with a minimum grade of C+.
Grade Mode: Letter Grading
Special Fee: Yes

Women's and Gender Studies (WGS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

WGS 401W - Introduction to Women's Studies
Credits: 4
Interdisciplinary survey of the major areas of women's studies: women's history, cross-cultural perspectives, women in literature, psychology of women, etc. Basic principles and concepts fundamental to more advanced women's studies research. Topics vary. Required for major and minor.
Attributes: Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): WS 401, WS 401H
Grade Mode: Letter Grading

WGS 403 - Gender Interactions in College Sports Culture
Credits: 2
An integrative view of growing up as an athlete in American culture. Analysis of major perspectives on human development and implications in sports and education. With emphasis on gender, sexual assault, and racism.
Equivalent(s): WS 403
Grade Mode: Credit/Fail Grading

WGS 405 - Gender, Power and Privilege
Credits: 4
This course explores the diversity of women's lives through the dynamics of status, power, privilege, and inequality in contemporary United States. Students will examine women's diverse experiences by using the theoretical framework of the social construction of race, gender, economic class, and sexual orientation in historical context. We will examine categories of difference and the processes, philosophical developments, institutions, and conditions that lead to and rely on power and privilege in modern American society.
Attributes: Humanities(Disc)
Equivalent(s): WS 405
Grade Mode: Letter Grading

WGS 444A - Race Matters
Credits: 4
Class examines race categories in the United States and how these historically changing categories shape our diverse realities across racial, ethnic, gendered, classed, and national identities. Students examine race as a category of difference and explore the multiple ways that individuals claim racial identities. Specific attention focuses on how diverse women have made history in their own lives and in the lives of others by resisting the interlocking systems of oppression.
Attributes: Historical Perspectives(Disc); Inquiry (Discovery)
Equivalent(s): WS 444A
Grade Mode: Letter Grading

WGS 505 - Survey in Women's Studies
Credits: 4
In-depth study of topics not covered in regular course offerings. The course explores the breadth and depth of Women's Studies from a historical perspective. In order to understand Women's Studies currently, students look at the historical foundations that contribute social, political, and economic influences on the topics. Barring duplication of topic, may be repeated for credit.
Attributes: Historical Perspectives(Disc); Inquiry (Discovery)
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): WS 505
Grade Mode: Letter Grading

WGS 510 - Framing Feminism: Gender Politics in Film
Credits: 4
This course examines the history of feminist struggle in the U.S. by critically viewing and analyzing diverse films from the 1970s to the present. Students learn about the three waves of feminism and the various sociocultural, economic, sexual and political issues faced by women in the long and ongoing quest to achieve gender equality. Students explore methods of historical inquiry and film criticism to enable complex analyses of historical developments and contemporary arrangements of power. Attention is paid to how multiple identities and forms of oppression intersect in women's diverse lived experiences.
Attributes: Historical Perspectives(Disc)
Equivalent(s): WS 510
Grade Mode: Letter Grading

WGS 632W - Feminist Thought
Credits: 4
Theories of women's oppression and emancipation explored from various historical, political, cultural, and social perspectives. A major goal of the course is to increase awareness of historical and contemporary feminist approaches to understanding women's experiences, representations, and relative positions in societies. The course also considers the interrelation of theory and practice and the impact of past feminist theories on feminist movements.
Attributes: Writing Intensive Course
Prerequisite(s): WS 401 with a minimum grade of D- or WS 405 with a minimum grade of D- or WGS 401W with a minimum grade of D- or WGS 405 with a minimum grade of D-.
Equivalent(s): WS 632
Grade Mode: Letter Grading

WGS 795 - Independent Study
Credits: 1-4
For advanced students who have the preparation to carry out an individual project of supervised research on a specific women's studies topic. Preparation should include WS 401 or equivalent, and/or other women's studies courses. Barring duplication of topic, may be repeated.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): WS 795
Grade Mode: Letter Grading

WGS 796 - Advanced Topics
Credits: 4
Advanced or specialized topics not normally covered in regular course offerings. May be repeated, but not in duplicate areas.
Repeat Rule: May be repeated up to 2 times.
Equivalent(s): WS 796, WS 796W
Grade Mode: Letter Grading

WGS 797 - Internship
Credits: 4
Students gain practical experience in a woman-focused agency or organization. Plan of study and requirements are developed together with a faculty adviser and the student's workplace adviser. Bi-monthly seminar with all internship students and instructor.
Repeat Rule: May be repeated up to 2 times.
Equivalent(s): WS 797
Grade Mode: Letter Grading

WGS 798W - Colloquium
Credits: 4
Intensive study of specialized topic for advanced students. Topics vary with instructor. Barring duplication of topic, may be repeated for credit.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated up to 8 times.
Equivalent(s): WS 798
Grade Mode: Letter Grading

WGS 799H - Honors Thesis
Credits: 4-8
With a faculty sponsor, students enrolled in the honors-in-major program develop an independent, investigative project in women's studies. Written thesis.
Attributes: Honors course
Equivalent(s): WS 799
Grade Mode: Letter Grading

Zoology (ZOOL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ZOOL 400 - Professional Perspectives in Zoology
Credits: 1
Presentations by departmental faculty provide an informal overview of various zoological topics and professional opportunities. The course acquaints students with faculty, provides information on departmental research projects, and facilitates early research involvement for students. Required for all first-year zoology majors.
Grade Mode: Credit/Fail Grading

ZOOL 401 - Human Biology
Credits: 0 or 4
How does the human body function in the face of constant flux In this introductory biology course you will explore the molecules, cells, and organ systems that keep you healthy though the multidisciplinay lenses of chemistry, genetics, and homeostatis. Hands-on experimentation allows you to investigate common health-related questions such as the effects of caffeine on reaction time and the effects of handwashing on bacterial growth and transmission. Cannot be taken for credit after BMS 507 and BMS 508. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): ZOOL 507, ZOOL 508
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 518 - Comparative Morphology and Biology of Vertebrates
Credits: 0 or 4
Why are vertebrates so successful on Earth? In this hands-on comparative biology course you will systematically examine the evolutionary history of form and function by exploring key adaptations that allowed vertebrates to diversify and thrive in the aquatic, terrestrial, and arboreal habitats they occupy today. In lab you will hone your dissection skills as you track ancestral and derived characteristics in 5 representative species on the vertebrate tree of life. Lab.
Prerequisite(s): BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or NR 439 with a minimum grade of D- or BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 529 - Developmental Biology
Credits: 0 or 4
Developmental biology explores how organisms construct themselves in each generation, and how those processes interact with ecological and evolutionary forces. The course examines development in various phyla, with an overarching focus on the design and interpretation of experiments using both classical and modern techniques. Labs include student-designed experiments and observation of development in several species of vertebrate embryos. Lab.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 542 - Ornithology
Credits: 4
Students explore the biology, behavior and biodiversity of birds in this animal survey course. Ethical birdwatching, census techniques, and identification skills will be developed by observing resident and migrant species throughout the semester. Avian diversity across the UNH campus will be documented and compared at multiple time points and locations. Lecture, Lab, and Optional off-campus field trips.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-.
Grade Mode: Letter Grading

ZOOL 555 - Introduction to Entomology
Credits: 4
This course is about insects, the animal taxon that represents 50% of all life forms on Earth. During this course students will explore this incredible diversity by studying insects from inside out and learning about major evolutionary events in the last 500 million years that shaped this incredible diversity. This course will also highlight the beneficial and detrimental roles insects play in human society: students will gain insights into medical and veterinary entomology, coastal entomology, principles of sustainable pest management and insect conservation. Throughout the course, students will broadly apply online tools for insect identification and will be exposed to community driven nature conservation and monitoring efforts using online applications, such as inaturalist and bugguide. Lab.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 566 - Herpetology
Credits: 4
This course will serve as an introduction to the morphology, behavior, and evolutionary ecology of reptiles (tuataras, turtles, snakes, lizards, and crocodilians) and amphibians (frogs, salamanders, and caecilians), with a special emphasis on New England taxa. The course will include field excursions, short-term research projects, and the comparative examination of specimens.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 600 - Field Experience
Credits: 1-4
A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty advisor selected by the student.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

ZOOL 610 - Principles of Aquaculture
Credits: 4
Introduces the culture practices employed for production of aquatic organisms. Topics include ecological and environmental considerations, selective breeding, nutrition, diseases, processing, and marketing. Emphasis on finfish.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading

ZOOL 613W - Animal Behavior
Credits: 5
In this course we will first investigate the mechanisms of behavior--how do animals behave the way they do? We'll then spend the bulk of the semester exploring the ecology and evolution of behavior--why do animals behave the way they do? In lab, we will use hands-on activities to complement material from class, and you'll gain first-hand research experience when you design and conduct your own animal behavior study. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-.
Equivalent(s): ZOOL 613
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 625 - Principles of Animal Physiology
Credits: 3
Introduces the principles of animal function. The major systems (digestion, metabolism, respiration, circulation, osmotic and ionic regulation, nerve-muscle function, endocrine control) are covered with emphasis on functional mechanisms at the cell and tissue levels.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): ANSC 627
Grade Mode: Letter Grading

ZOOL 626W - Animal Physiology Laboratory
Credits: 2
Basic training in the measurement of function in animals, data analysis and expression, and the development of scientific communication skills.
Co-requisite: ZOOL 625
Attributes: Writing Intensive Course
Equivalent(s): ZOOL 626
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 690 - Evolution
Credits: 4
Evolutionary biology is about uncovering the past, understanding the present, and predicting the future of animals, plants, and microbes. Is also offers insight into how scientific ideas change through time. This course covers natural selection and adaptation, phylogeny, population genetics and structure, origins and extinction of species, domestication, and evolutionary medicine. Additional topics may include human evolution and evolutionary impacts, biogeography, and social evolution, as well as the intersections between evolution, ecology and development.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): ZOOL 690W
Grade Mode: Letter Grading

ZOOL 690W - Evolution
Credits: 4
Evolutionary biology is about uncovering the past, understanding the present, and predicting the future of animals, plants, and microbes. Is also offers insight into how scientific ideas change through time. This course covers natural selection and adaptation, phylogeny, population genetics and structure, origins and extinction of species, domestication, and evolutionary medicine. Additional topics may include human evolution and evolutionary impacts, biogeography, and social evolution, as well as the intersections between evolution, ecology and development.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): ZOOL 690
Grade Mode: Letter Grading

ZOOL 708 - Stream Ecology
Credits: 4
Ecological relationships of organisms in flowing water; streams as ecosystems. Lectures on physical and chemical features of streams, floral and faunal communities, and factors controlling populations and behavior of stream organisms. Lab exercises employ both field and laboratory experimental techniques. Lab. (Not offered every year.)
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 710 - Sharks and Bony Fishes
Credits: 0 or 4
Some fish swimming today are hundreds of years old, whereas others complete their life cycle in two months! This course provides an introduction to the diversity of fishes found across the globe, including elasmobranchs (sharks, skates, and rays) and teleosts (bony fishes). Particular attention will be paid to fishes local to New Hampshire and New England. Students will learn about fish anatomy, physiology, and ecology. Lab. (Offered in alternative years.)
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 726 - Conservation Behavior
Credits: 4
What's the best way to deter an elephant from raiding crops? Is it with chili peppers? Bees? This is one example from the new interdisciplinary field of "conservation behavior," which uses the study of animal behavior to inform how we manage wildlife populations. This course targets students well-versed in either animal behavior or wildlife ecology who wish to learn more about the other side. We will focus heavily on reading, writing, discussion, and career preparation.
Prerequisite(s): ZOOL 613 with a minimum grade of D- or ZOOL 613W with a minimum grade of D- or NR 433 with a minimum grade of D- or NR 650 with a minimum grade of D-.
Grade Mode: Letter Grading

ZOOL 733W - Behavioral Ecology
Credits: 0 or 4
Behavioral ecology is the evolution of animal behavior played out on the stage of ecology--why might a certain behavior be adaptive in a certain context? In this course, we will pursue in-depth, high-level explorations of the central topics of animal behavior, all through the lens of evolution. We will also focus heavily on improving reading, writing, and presentation skills.
Attributes: Writing Intensive Course
Prerequisite(s): ZOOL 613 with a minimum grade of D- or ZOOL 613W with a minimum grade of D-.
Equivalent(s): ZOOL 733
Grade Mode: Letter Grading

ZOOL 736 - Genes and Behavior
Credits: 4
Genes and behavior examines the genetic underpinnings of animal behavior, and how behavior evolves on a genetic level. The course primarily relies on readings from the primary literature, using examples from laboratory model organisms, animals in their natural habitats, and humans. Topics include aggressiveness, social behavior, personality, parental care, communication, mating behavior, novelty seeking behavior, and foraging. This interdisciplinary course examines these behaviors at multiple levels, including genomics, population genetics, molecular genetics, epigenetics, endocrinology, and neurobiology.
Prerequisite(s): (GEN 604 with a minimum grade of D- or ANSC 612 with a minimum grade of D-) and (ZOOL 613 with a minimum grade of D- or ZOOL 613W with a minimum grade of D-).
Grade Mode: Letter Grading

ZOOL 740 - Acoustic Ecology
Credits: 4
This course examines the acoustic environment and how alterations to the acoustic environment from human activities and climate change result in permanent changes to animal behavior and the resulting soundscape. Focusing on using acoustics as a tool to monitor species and habitats, students will learn quantitative approaches and best practices for acoustic ecology investigations. Students will explore the emerging field of ecological acoustics through primary literature and hands-on, independent research in habitats surrounding UNH campus. This course is intended for advanced undergraduate or graduate students interested in animal behavior, ecology, wildlife and conservation biology, or zoology.
Prerequisite(s): BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ZOOL 777W - Neuroethology
Credits: 3
Students taking this course will discover how some of the most remarkable behavioral adaptations in animals can be understood by examining specialized sensory systems and neural circuits. By exploring the complex interactions between animal behavior, neural systems, evolutionary relationships, anatomy, physiology and ecology, students will be better equipped to understand the neural basis of behavior. A culminating writing project will help sharpen students' scientific writing skills, and the ability to understand the primary neuroethology literature.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): ZOOL 777
Grade Mode: Letter Grading

ZOOL 795 - Independent Investigations in Zoology
Credits: 1-4
Independent study in a topic related to Zoology, arranged by the student with a faculty sponsor. Enrollment by permission only.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 5 times.
Grade Mode: Letter Grading

ZOOL 799H - Honors Senior Thesis
Credits: 1-4
Working under the direction of a faculty sponsor, the student plans and carries out independent research resulting in a written thesis. Limited to students entering their senior year; required for students in the honors program or working toward honors-in-major. A two-semester sequence. 2-4 credits each semester. IA (continuous grading) given at the end of the first semester.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ZOOL 799
Grade Mode: Letter Grading
