Major Elective		3-4
General Elective		4
General Elective		4
	Credits	**14-16**
	Total Credits	**126-132**

1 Students applying to health profession schools need a full year of English. ENGL 415C, ENGL 419, ENGL 501, ENGL 502, or ENGL 503 is suggested in addition to ENGL 401. The second course may be taken any semester.

2 Students applying to health profession schools need a full year of Organic Chemistry CHEM 651/CHEM 653 and CHEM 652/CHEM 654 should be taken in place of CHEM 545/CHEM 546.

Student Learning Outcomes

Program Learning Outcomes

Critical Thinking & Problem Solving

- Apply the scientific method to form hypotheses, examine experimental evidence, and draw informed conclusions.
- Apply core knowledge and statistical methods to critically interpret scientific data, and troubleshoot unexpected outcomes.

Quantitative Literacy, Inquiry & Analysis

- Utilize graphs, charts, and tables to represent scientific data.

Oral & Written Communication

- Demonstrate proficiency in the written, oral, and visual communication skills required to convey scientific information.

Core Knowledge in Microbiology

- Compare and contrast cellular and non-cellular microorganisms.
- Explain the basic structure-function relationships of microorganism components, and how specific microbial components contribute to a microorganism's growth and survival.
- Describe how genetic information is maintained and transferred, how mutation can affect viability and contribute to evolution, and how gene expression is regulated.
- Detail how microorganisms interact and influence each other, other organisms, and their environment.
- Understand the principles of microbial pathogenesis and the immune response to infection.
- Analyze and evaluate the complex interactions between microbial communities and their hosts by applying the principles of microbial pathogenesis and microbial ecology.

Neuroscience and Behavior (NSB)

Neuroscience is one of the fastest-growing scientific fields, and the discoveries that are being made today are having an immediate and significant impact on our society. The importance of understanding animal behavior is likewise increasing, particularly in the face of a rapidly-changing environment. The B.S. in Neuroscience and Behavior is a great way for students to combine interests in neurobiology and animal behavior. The curriculum prepares students for various post-graduate

degrees, including medical, veterinary, and graduate school, and we offer students a variety of opportunities to get hands-on research experience.

Animal Behavior Minor

https://www.unh.edu/program/minor/animal-behavior

Description

This minor is designed for students who are interested in learning more about animal behavior, including the mechanisms that underlie behaviors and the evolutionary forces that may have shaped them. Students will also gain practical skills in the methods used to study animal behavior in laboratory and field settings.

Requirements

Academic policies related to Minors.

Code	Title	Credits
Required		
ZOOL 613W	Animal Behavior	5
Electives		
Minimum of 15 additional credits; At least two of the four electives must come from the Category I list below; the remaining courses may be from either Category I or Category II.		
Category I:		
MEFB 714	Field Animal Behavior	4
NSB 727	Animal Communication	4
PSYC 720	Animal Cognition	4
ZOOL 726	Conservation Behavior	4
ZOOL 733W	Behavioral Ecology	4
ZOOL 736	Genes and Behavior	4
ZOOL 740	Acoustic Ecology	4
ZOOL 777W	Neuroethology	4
ZOOL 795	Independent Investigations in Zoology	1-4
Category II:		
AAS 421	Large Animal Behavior and Handling Techniques	2
BIOL 720	Plant-Animal Interactions	4
BMS 718	Mammalian Physiology	4
PSYC 512	Psychology of Primates	4
ZOOL 625	Principles of Animal Physiology	3
ZOOL 690	Evolution	4

Neuroscience and Behavior Major (B.S.)

https://www.unh.edu/program/bachelor-science/neuroscience-behavior

Description

The major in neuroscience and behavior (NSB) offers an interdisciplinary approach to human and non-human behavior, focusing on the evolution and adaptiveness of certain behaviors, as well as their underlying neural mechanisms. Students who have always been fascinated by how the brain functions will be well served by this major, as will those who love wild animals and wish to better understand their behavior. The B.S. in neuroscience and behavior is based on a solid foundation in biology, chemistry, physics, statistics, and genetics (foundation courses). These are followed by a two-semester course sequence that covers the fundamentals of neuroscience and behavior. Students can then pick five or more electives focusing on areas of interest.

NSB students are encouraged to take advantage of research experiences in the laboratories of the psychology and biology faculty in the program. This provides valuable experience with cutting-edge equipment and techniques. Some students may share aspects of a larger project, whereas others may be relatively independent and design their own project under supervision. In either case, important skills are gained by the discipline of gathering data, analyzing and interpreting it, and presenting it to a broader audience.

The curriculum provides most of the requirements and recommended courses for students seeking admission to graduate school and to professional schools in medicine and veterinary medicine. Students who might choose not to go on to advanced degrees are well-prepared for employment as skilled technicians in research laboratories or, if their interests are in animal behavior, as field research assistants or animal trainers. With additional courses in education, the B.S. in NSB also qualifies graduates to teach at the elementary, junior high, and high school levels.

Faculty participating in the NSB major combine a love of teaching and student mentoring with a passion for research, and encourage student participation. Research facilities that students can use include the Integrative Animal Behavior and Ecoacoustics laboratory, the confocal imaging center, the Hubbard Center for Genomic Studies, and the many marine, freshwater, and estuarine laboratories associated with UNH programs. Students can also take summer courses at the Shoals Marine Laboratory.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

Major GPA requirements as indicated.

Major Requirements

- Students majoring in NSB are required to take foundation courses in basic science, core courses, and five electives from an extensive list of courses, including some offered by other departments including biochemistry, molecular and cellular biology, and natural resources.
- Minimum grade of D- or better is required in CHEM 403, CHEM 404, CHEM 545/CHEM 546, and PHYS 401; minimum grade of C- or better is required in all other courses.
- A capstone experience is required. This may be independent research, an advanced seminar, or other special student activity. It is meant to integrate prior experience and take the student to a new level in an area of special interest.

Code	Title	Credits
Foundation Courses		
NSB 400	Topics Neuroscience & Behavior	1
BIOL 411 & BIOL 412	Introductory Biology: Molecular and Cellular and Introductory Biology: Evolution, Biodiversity and Ecology (2 semesters)	8
CHEM 403 & CHEM 404	General Chemistry I and General Chemistry II (2 semesters)	8
CHEM 545 & CHEM 546	Organic Chemistry and Organic Chemistry Laboratory	5
BMCB 658 & BMCB 659	General Biochemistry and General Biochemistry Lab	5
PHYS 401	Introduction to Physics I	4
PSYC 402	Statistics in Psychology	4
or BIOL 528	Applied Biostatistics I	
GEN 604	Principles of Genetics	4
NSB 500 & NSB 501	Fundamentals of Neuroscience and Behavior I and Fundamentals of Neuroscience and Behavior I Laboratory	5
NSB 502 & NSB 503	Fundamentals of Neuroscience and Behavior II/Systems Neuroscience and Fundamentals of Neuroscience and Behavior II Laboratory	5
Electives		
Select five courses from the following:		20-22
BIOL 541W	Ecology	
BIOL 714W	Model Organisms in Biological and Medical Research	
BIOL 775	Plant Rx (C)	
BMCB 605	Principles of Cell Biology	
BMCB 760	Pharmacology	
BMS 507 & BMS 508	Human Anatomy and Physiology I and Human Anatomy and Physiology II [1]	
BMS 702	Endocrinology	
BMS 711		
BMS 718	Mammalian Physiology	
COMM 798	Special Topics (Neural Bases of Cognition and Language, C)	
GEN 706	Human Genetics	
KIN 706 & KIN 707	Neurology and Neurology Lab [1]	
MEFB 714	Field Animal Behavior (SML, C)	
NSB 727	Animal Communication (C)	
PHIL 630	Neuroscience and Philosophy	
PSYC 511	Sensation and Perception	
PSYC 512	Psychology of Primates	
PSYC 513	Cognitive Psychology	
PSYC 521	Behavior Analysis	
PSYC 710	Visual Perception (C)	
PSYC 720	Animal Cognition (C)	
PSYC 731	Brain and Behavior (C)	
PSYC 733	Drugs and Behavior (C)	
PSYC 735	Neurobiology of Mood Disorders (C)	
PSYC 736	Attention Disorders (C)	
PSYC 741W	Special Topics (C) (Approved topics only see footnote) [1]	
ZOOL 613W	Animal Behavior	
ZOOL 625 & ZOOL 626W	Principles of Animal Physiology and Animal Physiology Laboratory [2]	
ZOOL 690	Evolution	
ZOOL 726	Conservation Behavior (C)	
ZOOL 733W	Behavioral Ecology (C)	
ZOOL 736	Genes and Behavior (C)	
ZOOL 740	Acoustic Ecology (C)	
ZOOL 777W	Neuroethology (C)	
795/796 or 799 Independent Study, (C) [3]		
Capstone		
Select from the following options: [4]		
1.) Complete a Capstone designated course (C) from above		
2.) One semester of Capstone Research:		
BIOL 795	Independent Investigations in Biology	
or PSYC 795	Independent Study	
or INCO 790	Advanced Research Experience	
3.) Honor's Thesis:		
NSB 799H	Honors Senior Thesis	
or BIOL 799H	Honors Senior Thesis	
or PSYC 797	Senior Honors Tutorial	
or PSYC 799	Senior Honors Thesis	
4.) Advisor approved alternative		
Total Credits		**69-71**

[1] Must be one of the following approved topics: Fundamentals of Substance Abuse, Neurobiology of Spatial Cognition, Fundamentals of Cognitive Science, Neuroscience of Memory, Behavioral Neuroscience, or Science of Daydreaming.

[2] Both must be taken to count as one of the 5 required major electives

[3] One experience totaling at least 4 credits, but can be earned over the course of two consecutive semesters provided the experience is with the same research mentor. Can only substitute for one elective.

[4] Courses that are eligible to fulfill the Capstone requirement are indicated with a (C) and must be taken senior year. You can: 1) designate a course as a Capstone course, with additional requirements as determined by the instructor; 2) complete one semester of Capstone Research course 3) do an honors thesis in Neuroscience and Behavior or Biology or Psychology or; 4) participate in an alternative activity with approval from the student's academic advisor.

Discovery Program Requirements

NSB majors may use BIOL 411, BIOL 412, CHEM 403, CHEM 404, PHYS 401, PHYS 407 and either PSYC 402 or BIOL 528 to fulfill the Biological Sciences, Physical Sciences, Discovery Lab, and Quantitative Reasoning Discovery requirements.

Additional Information

Students transferring into the NSB program from other UNH majors must hold a cumulative GPA of at least 3.2 at the time of requested major change.

Student Learning Outcomes

Program Learning Outcomes

Students demonstrate that they understand basic principles of neuroscience and behavior.

- Apply the core principles of biology, chemistry, physics, and statistics to more advanced concepts in neuroscience and behavior.
- Apply the principles of evolution and genetics to understand how genotype and phenotype affect the structure and function of animal nervous systems and behavior.
- Describe the basic features of animal nervous system development, organization, signaling, integration, and higher-level processing, and how these are altered in diseases of the nervous system.
- Explain the four levels of analysis emphasized in modern animal behavior research: causation, development, function, and evolution.
- Describe molecular and cellular approaches to the study of brain structure, function, and development, as well as behavioral and cognitive neuroscience approaches to studying higher level brain functions.

Students demonstrate that they can undertake scientifically valid methods of inquiry.

- Apply appropriate research methods, laboratory techniques, and statistical methods to investigate scientific questions in neuroscience and behavior.

Students demonstrate that they can think critically and analytically.

- Read and critique primary research literature related to the nervous system, how nervous system function generates behavior, and how behavior addresses fitness-related challenges across a diversity of species.

Students demonstrate that they can communicate effectively.

- Demonstrate scientific writing skills, and proficiency in delivering oral presentations related to both the primary literature and findings from student investigations in neuroscience and behavior.
- Students practice science responsibly and ethically, and acknowledge the influence of cultural and historical biases in the sciences.

Nutrition (NUTR)

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition degree prepares students for entry-level positions in health care, education, community health, or the biotechnology industry. The

curriculum also supports entry into post-baccalaureate professional programs such as graduate programs in dietetics, medical or dental school, physician associate/physician assistant programs, as well as other graduate or advanced degree programs. Nutrition faculty have expertise in clinical nutrition, community nutrition, and food science, as well as assessing risk factors of chronic disease (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult). Undergraduate students may actively participate in ongoing research projects in these areas.

Students pursuing the B.S. degree in Nutrition choose from one of three areas of specialization: Dietetics, Health and Wellness, or Nutritional Sciences.

The curriculum for the Dietetics option is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). Students who complete the B.S. in Nutrition with the Dietetics option are eligible to apply for a masters degree and dietetic internship, a prerequisite for becoming a registered dietitian.

Students who complete the Health and Wellness option are prepared for jobs in agencies or businesses that have an emphasis on health and wellness, including schools, fitness centers, and non-profit or community organizations. They are also well prepared for various graduate schools and advanced degree programs.

Students in the Nutritional Sciences option often enroll in a post-graduate degree program (e.g., medical school, graduate school, physician associate/physician assistant program, etc.) or enter the biomedical/biotechnology workplace.

Pre-Professional Health Programs

Students interested in postgraduate careers in the health care professions should visit UNH's Pre-Professional Health Programs Advising Office. Requirements for specific types of professional schools (e.g., medical, dental, physician associate/physician assistant, pharmacy, etc.) are also provided by the Pre-Professional Health Advising Office. While many of the prerequisite courses required by professional schools are also requirements of the Nutrition major, you should consult with your advisor to create a plan of study that best prepares you for pursuing a career in one of these health professions.

Culinary Nutrition and Food Studies Minor

https://www.unh.edu/program/minor/culinary-nutrition-and-food-studies

Description

The Culinary Nutrition & Food Studies Minor provides students the ability to explore the foundation of nutritional sciences and gain a practical appreciation of the culinary arts while building an understanding of our food environment & culture as it applies to human health. The minor offers students hands-on learning experiences in culinary arts and the flexibility to incorporate study abroad coursework via the UNH in Italy program.

The minor may be of interest to students preparing for future careers in allied health or health promotion and who recognize the growing need for training in culinary nutrition. Dietitians, physicians, wellness coaches, nurses, and other health care providers with strong culinary skills will likely be better equipped to empower clients to choose and prepare healthier food choices.

Requirements

Academic policies related to Minors.

The minor consists of completing five courses (20 credits).

Nutrition Major (B.S.)

https://www.unh.edu/program/bachelor-science/nutrition

Description

Nutrition is the study of food, the nutrients found in food, and the body's metabolism of these nutrients to maintain and promote health. Nutrition is an interdisciplinary science based on biochemistry and physiology, but also integrates sociology, psychology, molecular biology, and genetics.

Students have three curriculum options within the major to pursue a bachelor's degree in nutrition. The option is declared within the nutrition major before the end of the second year in the program. Options include:

- **Dietetics option** - is the first step to becoming a registered dietitian. The Didactic Program in Dietetics (DPD) curriculum is accredited by The Accreditation Council for Education in Nutrition and Dietetics (ACEND). It prepares you for a master's degree and dietetic internship.
- **Health and Wellness option** - provides a foundation in chemistry, anatomy, physiology and microbiology and includes courses on wellness and community health. Students gain real-world experience providing hands-on nutrition and health guidance.
- **Nutritional Sciences option** - provides a comprehensive background in biology, chemistry, physiology, nutrition, and biochemistry, and includes courses on nutritional assessment, life cycle nutrition, nutrition and health, and careers in nutrition.

The program prepares students for success by offering real-world learning opportunities throughout the curriculum. These opportunities include applied research, field experiences, internships, community engagement, and study abroad offerings. Our diverse group of faculty are dedicated to student success in and outside of the classroom. Coursework supports diverse postgraduate pathways including allied health programs, medical and dental schools, and graduate school. The rigorous curriculum is designed to offer a science-based foundation and foster critical-thinking and strong communication skills for future professional success of our students.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Dietetics Capstone Experience

One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Dietetics students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 780 Critical Issues in Nutrition during their senior year.

Both NUTR 720 and NUTR 780 are required courses; one of these courses must be taken during the student's senior year to fulfill the university's capstone requirement.

Student Learning Outcomes

Program Learning Outcomes

Students will be able to:

- Demonstrate how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.
- Select and use appropriate current information technologies to locate and apply evidence-based guidelines and protocols.
- Apply critical thinking skills.
- Demonstrate effective and professional oral and written communication and documentation.
- Describe the governance of nutrition and dietetics practice, such as the Scope of Practice for the Registered Dietitian Nutritionist and the Code of Ethics for the Profession of Nutrition and Dietetics.
- Assess the impact of a public policy position on nutrition and dietetics practice.
- Discuss the impact of health care policy and different health care delivery systems on food and nutrition services.
- Identify and describe the work of interprofessional teams and the roles of others with whom the registered dietitian nutritionist collaborates.
- Demonstrate cultural humility, awareness of personal biases and an understanding of cultural differences as they contribute to diversity, equity, and inclusion.
- Describe contributing factors to health inequity in nutrition and dietetics including structural bias, social inequities, health disparities and discrimination.
- Participate in a nutrition and dietetics professional organization and explain the significant role of the organization.
- Defend a position on issues impacting the nutrition and dietetics profession.
- Use the Nutrition Care Process and clinical workflow elements to assess nutritional parameters, diagnose nutrition related problems, determine appropriate nutrition interventions and develop plans to monitor the effectiveness of these interventions.
- Develop an educational session or program/educational strategy for a target population.
- Demonstrate counseling and education methods to facilitate behavior change and enhance wellness for diverse individuals and groups.
- Practice routine health screening assessments, including measuring blood pressure and conducting waived point-of-care laboratory testing (such as blood glucose or cholesterol).
- Describe concepts of nutritional genomics and how they relate to medical nutrition therapy, health, and disease.
- Develop nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs.
- Apply management theories to the development of programs or services.
- Evaluate a budget/financial management plan and interpret financial data.
- Demonstrate an understanding of the regulation system related to billing and coding, what services are reimbursable by third party payers, and how reimbursement may be obtained.
- Apply the principles of human resource management to different situations.
- Apply safety and sanitation principles related to food, personnel, and consumers.
- Explain the processes involved in delivering quality food and nutrition services.
- Evaluate data to be used in decision-making for continuous quality improvement.
- Perform self-assessment that includes awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement.
- Identify and articulate one's skills, strengths, knowledge and experiences relevant to the position desired and career goals.
- Practice how to self-advocate for opportunities in a variety of settings (such as asking for needed support, presenting an elevator pitch).
- Practice resolving differences or dealing with conflict.
- Promote team involvement and recognize the skills of each member.
- Demonstrate an understanding of the importance and expectations of a professional in mentoring and precepting others.

Nutrition Major: Health and Wellness Option (B.S.)

https://www.unh.edu/program/bachelor-science/nutrition-health-wellness

Description

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, research, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, telehealth, epidemiology, and food science, as well as assessing risk factors of chronic disease (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult).

Students who complete the Health and Wellness option are prepared for jobs in agencies or businesses that have an emphasis on disease prevention and health promotion, including schools, employee wellness agencies, fitness centers, and non-profit or community organizations. They are also prepared for entry into post-baccalaureate graduate and professional programs.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

A minimum grade of C-minus or better must be earned in all NUTR courses required by the major.

Code	Title	Credits
Foundation Courses		
BMS 507	Human Anatomy and Physiology I	4
BMS 508	Human Anatomy and Physiology II	4
SOC 400	Introductory Sociology	4
or PSYC 401	Introduction to Psychology	
Select one statistics course from the following:		4
BIOL 528	Applied Biostatistics I	
HMP 540	Statistics for Health and Human Service Professionals	
PSYC 402	Statistics in Psychology

Electives		
Select NUTR elective		4
Select 600-level or 700-level elective		4-5

Nutrition and Wellness Capstone Experience

One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Wellness students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 755 Concepts and Controversies in Weight Management during their senior year.

Both NUTR 720 and NUTR 755 are required courses; one of these courses must be taken during the student's senior year to fulfill the university's capstone requirement.

Degree Plan

Student Learning Outcomes

Program Learning Outcomes

Students will be able to:

- Locate, interpret, evaluate and use professional literature to make ethical, evidence-based conclusions and decisions.
- Apply critical thinking skills.
- Deliver effective and professional oral and written communication.
- Demonstrate cultural humility, awareness of personal biases and an understanding of cultural difference they contribute to diversity, equity, and inclusion.
- Articulate aspects of nutrition and wellness for various populations across the lifespan.
- Discuss the impact of policies and guidelines on food and nutrition services.

Nutrition Major: Nutritional Sciences Option (B.S.)

https://www.unh.edu/program/bachelor-science/nutrition-nutritional-sciences

Description

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, research, or the biotechnology industry, or entry into post-baccalaureate graduate and professional programs. Nutrition faculty have expertise in clinical nutrition and food science, as well as assessing risk factors of chronic disease (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult), and populations that are underrepresented in research.

Students in the Nutritional Sciences option often enroll in a post-graduate educational degree programs (e.g., medical school, graduate school, physician assistant program, etc.) or enter the biomedical/biotechnology workplace.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

NUTR 780	Critical Issues in Nutrition	4
NUTR 790	Undergraduate Teaching Experience	1-2
NUTR 799H	Honors Senior Thesis	1-8
Select an additional elective outside the Major at 600- or 700-Level		*4*

Nutritional Science Capstone Experience

One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Nutritional Sciences students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 751 Nutritional Biochemistry of Micronutrients.

NUTR 751 is a required course; and will only fulfill the university's capstone requirement if taken during the student's senior year.

Student Learning Outcomes

Program Learning Outcomes

Students will be able to:

- Locate, interpret, evaluate and use professional literature to make ethical, evidence-based conclusions and decisions.
- Apply critical thinking skills.
- Deliver effective and professional oral and written communication.
- Demonstrate cultural humility, awareness of personal biases and an understanding of cultural difference they contribute to diversity, equity, and inclusion.
- Articulate the nutritional requirements for various populations across the lifespan.
- Explain macronutrient and micronutrient metabolism.
- Demonstrate an understanding of the scientific method and how it is used to generate knowledge in nutrition science.

Nutrition Minor

https://www.unh.edu/program/minor/nutrition

Description

The nutrition minor is particularly suited to students interested in pursuing professional careers related to human health and wellness.

Requirements

Academic policies related to Minors.

- The minor consists of completing a minimum of 20 credits.

Code	Title	Credits
Required Course		
NUTR 400	Nutrition in Health and Well Being	4
Electives [1]		
Select a minimum of 16-credits from the following courses: (At least 4-credits must be at the 600- or 700-level)		
NUTR 403	Culinary Arts Skills Development	4
NUTR 405	Food and Society	4
NUTR 476	Nutritional Assessment	4
NUTR 506	Nutrition and Wellness	4

[1] Students can customize the Nutrition minor to align with their personal interests or professional goals. Please note that many courses have prerequisites and/or require special permission.

Sustainable Energy

- Sustainable Energy Minor (p. 448)

Sustainable Energy Minor

https://www.unh.edu/program/minor/sustainable-energy

Description

The Minor in Sustainable Energy provides the flexibility and focus that allows for students to expand their exposure to the topic within the context of their own major. The goal of the program is to match the developing nature of the field with the skills needed to understand sustainable energy in the greater context of its opportunities and challenges. Courses in the minor will build on existing competencies and create an experience that provides an exposure to new the perspectives and conceptual framework that is at the core of the developing field of sustainable energy.

Objectives

The objectives of the Minor in Sustainable Energy are to provide students with the educational experience necessary to participate in one of the fastest growing fields of employment. Coupled with an ability to focus on meaningful employment, is our challenge to confront a changing climate; students will be given an opportunity to be a part of the solution.

Curriculum and Requirements

The curriculum and requirements for the minor are based on exposure to three competencies that reflect the exposure necessary to grasp the basic understanding of sustainable energy:

- Technical – Requires a basic understanding of the grid, energy flow, energy usage and the technologies of efficiency, generation and management of energy and generation sources.
- Economics and Finance – Requires a basic understanding of utility structure, energy markets and utility rate-making. An additional focus includes the business aspect of financing and projecting the cost-effectiveness of energy generation sources and fuels – including the development of innovative business models for deploying sustainable energy.
- Policy – Requires a basic understanding in policy-making and implementation, including a historic perspective of our utilities, incentives and subsidies and their impact on market forces. An additional focus includes the policy impacts of aspects related

to sustainable energy deployment, including, interconnection, net metering and feed in tariffs and tax incentives.

Requirements

Academic policies related to Minors.

- Appropriate course substitutes from other study-abroad programs may also be used with permission.

Sustainability Dual Major

UNH is a proud national leader in sustainability. From our low-carbon campus, to our Green Restaurant dining halls and community, belonging, access, and inclusion initiatives, UNH is the place to study and live sustainability. The Sustainability Dual Major (SDM) is a unique transdisciplinary program that enhances the value of your degree with real-world problem solving and systems thinking skills highly sought after in today's workplace. We support and encourage students to understand and address today's most pressing challenges like climate change, poverty, hunger, and biodiversity loss (to name just a few), with hands-on experiences through coursework, internships, fellowships and more. UNH is the perfect place to jumpstart your career and become an agent of change in a complex world.

Sustainability Dual Major

https://www.unh.edu/program/dual-major/sustainability

Description

The sustainability dual major is a unique opportunity to enhance your impact and the value of your degree. As a science and practice, sustainability seeks solutions to our world's greatest challenges while ensuring social, economic, and environmental wellbeing at local to global scales. You can pair the dual major with any other major on campus, developing the knowledge and skills you'll need to problem-solve and create a world where people and nature can thrive – now and in the future.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Student Learning Outcomes

Program Learning Outcomes

Comprehend Grand Challenges

- Students gain knowledge of the fundamental aspects of complex sustainability challenges.

Think in Systems

- Students have an ability to analyze and synthesize the interconnections among environmental, social, and economic aspects of complex systems, as well as how problems manifest at different scales (local to global) and at different times (connections between past, present, and future).

Advocate for Values

- Students can identify, assess, respect, and navigate the diverse values, interests, and types of knowledge inherent in sustainability challenges, while simultaneously addressing power imbalances and promoting social justice.

Apply Knowledge to a Lifetime of Action

- Personal practice: Students understand how sustainability impacts their lives and can assess how their actions impact sustainability at personal, institutional, and societal levels.
- Professional practice: All students, regardless of major, understand how their professional work contributes to sustainable communities, can apply disciplinary and other forms of knowledge and skills to contribute to sustainable solutions.
- Collaborative practice: Students learn how to collaborate across disciplines and across sectors to jointly determine project goals, create knowledge, and develop innovative and effective solutions to sustainability challenges.

Wildlife and Conservation Biology

The Wildlife & Conservation Biology major provides students with the knowledge and tools to study, conserve, and manage wildlife and their habitats.

Our students combine science with their passion for nature and the outdoors. Our courses emphasize hands-on experience and place fundamental principles within an applied context. Students are encouraged to conduct research alongside faculty, and faculty actively assist students in obtaining internships.

Our students become research biologists and resource managers at state/federal agencies and non-profit organizations, conservation law officers, and environmental educators. Many go on to obtain an advanced degree.

Wildlife and Conservation Biology Major (B.S.)

https://www.unh.edu/program/bachelor-science/wildlife-conservation-biology

Description

The Wildlife & Conservation Biology major provides students with the knowledge and tools to study, conserve, and manage wildlife and their habitats.

Our students combine science with their passion for nature and the outdoors. Our courses emphasize hands-on experience and place fundamental principles within an applied context. Students are encouraged to conduct research alongside faculty, and faculty actively assist students in obtaining internships.

Our students become wildlife biologists and resource managers at state/federal agencies and non-profit organizations, conservation law officers, and environmental educators. Many go on to obtain an advanced degree.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

In addition to the Wildlife and Conservation Biology degree requirements (below), students must complete the University Discovery Program and the University Writing Requirements. Given the flexibility of this major, students may also complete a minor or dual major in a second area of interest, or apply for certification by The Wildlife Society.

Code	Title	Credits
Required Courses		
NR 433	Wildlife Ecology	4
BIOL 411	Introductory Biology: Molecular and Cellular	4
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
NR 411	Environmental and Resource Economics Perspectives	4
NR 425	Field Dendrology	4
Math Foundations		
MATH 424B	Calculus for Life Sciences	4
or MATH 420	Finite Mathematics	
Chemistry Foundations

Student Learning Outcomes

Program Learning Outcomes

Students will:

- Understand the ecological and societal value of biodiversity, sustainability, and environmental stewardship;

- learn/understand ecological concepts and fundamental principles and techniques to manage and conserve wildlife habitat and populations;
- know the taxonomy, ecology, and natural history of the majority of native flora and fauna in New England;
- locate, evaluate, and summarize information from both print and electronic media relevant to wildlife and conservation biology issues;
- effectively communicate scientific information in written and oral formats;
- master mathematical, statistical, and study design knowledge and skills, and use state-of-the-art software, hardware, and analytical techniques relevant to wildlife and conservation biology;
- be familiar with a variety of natural resource laws and regulations;
- understand how to integrate relevant social sciences and human dimensions approaches to address wildlife and conservation biology issues as part of multidisciplinary teams.

Wildlife and Conservation Biology Minor

https://colsa.unh.edu/natural-resources-environment/program/minor/wildlife-conservation-biology

Description

The minor in Wildlife and Conservation Biology serves as a concentrated study, beyond a student's primary major, that allows students to explore their interest in wildlife ecology and conservation and their passion for nature and the outdoors.

Requirements

Academic policies related to Minors.

- The minor consists of completing a minimum of five courses (20 credits).
- Up to 8 credits can be used to satisfy both major and minor requirements.
- A maximum of two EcoQuest courses may be used to satisfy minor requirements.
- Additional courses from other study-abroad programs may be used toward the minor with permission.

Code	Title	Credits
Required Courses		
Category 1		
Select one course from the following:		4
NR 433	Wildlife Ecology	
NR 650	Principles of Conservation Biology [1,2,6]	
Category 2		
Select at least one (up to 2) of the following courses:		4
NR 425	Field Dendrology	
NR 506	Forest Entomology	
or ZOOL 555	Introduction to Entomology	
NR 712	Mammalogy	
MEFB 628	Marine Invertebrate Evolution and Ecology	
ZOOL 542	Ornithology	
ZOOL 566	Herpetology	
ZOOL 710	Sharks and Bony Fishes	
Category 3		
Select at least two (up to 3) of the following courses (and note that many have pre-requisites):		12
NR 615	Wildlife Habitats [2,3]	
NR 640	Wildlife Population Ecology [2]	
NR 641	Wildlife Disease Ecology	
NR 642	Introduction to Biogeography [3]	
NR 650	Principles of Conservation Biology [1,2,6]	
NR 664	Conservation Genetics and Applied Evolution	
NR 713	Quantitative Ecology	
NR 734	Tropical Ecology	
NR 740	Inventory and Monitoring of Ecological Communities [2,4]	
NR 765	Community Ecology [3]	
NR 795	Investigations [5]	
ZOOL 613W	Animal Behavior	
or ZOOL 733W	Behavioral Ecology	
Total Credits		**20**

1. NR 661 is considered an appropriate equivalent for NR 650.
2. Enrollments are capped and admission is not guaranteed to those pursuing a minor.
3. NR 660 (at UNH-EcoQuest) can be used as a replacement for one, NR 615, NR 642, **or** NR 765.
4. NR 663 (at UNH-EcoQuest) is considered an appropriate equivalent for NR 740.
5. NR 795 requires working with an individual WCB faculty member on a special problem/issue.
6. NR 650 can only count towards *either* Category 1 *or* Category 3 (but not both).

Zoology (ZOOL)

Zoology is a field within the biological sciences that is dedicated to the study of animals: their classification, evolution, and development along with their habits, behaviors, and relationships. The zoology majors (B.S. and B.A.) build on the core biology curriculum by including courses in comparative morphology, physiology, and a wide selection of animal survey classes. In the Bachelor of Science degree program, you will take a series of foundational courses in biology, chemistry, physics, statistics, and ecology while having the flexibility to specialize within the major and/or the pursuance of a minor. The Bachelor of Arts degree in zoology is designed as a flexible program, allowing you to pursue an interdisciplinary or dual major for a career in fields such as education, conservation, and public relations.

The University's location and facilities provide unique opportunities for the study of aquatic and terrestrial animals due to its access to the seacoast and the lakes region of New Hampshire, White Mountain National Forest, and the presence of two coastal marine laboratories, as well as estuarine and freshwater facilities. There is a strong teaching and research emphasis on ecological and physiological processes in aquatic animals and ecosystems. Major strengths of the program are the hands-on approach to teaching and emphasis on involving undergraduates in research.

- Zoology Major (B.S.) (p. 456)
- Zoology Minor (p. 459)

Faculty

Department of Biological Sciences Faculty

Zoology Major (B.A.)

https://www.unh.edu/program/bachelor-arts/zoology

Description

Built upon the common background of the biology core curriculum, the Bachelor of Arts (B.A.) in Zoology is designed for students to create an interdisciplinary or dual major, particularly if they want to pursue public relations, teaching, or other careers in combination with a liberal arts background. Students have more flexibility when choosing courses from the biology core and may enter this program as freshmen or transfer in from other liberal arts or science programs.

New England Regional Student Program

The bachelor's degree in zoology is one of the specialized curricula recognized by the New England Board of Higher Education and participates in the New England Regional Student Program. Please refer to the Tuition Break Online Database for a list of eligible New England States.

General Science Certification

See Department of Education

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Minimum grade of D# or better is required in CHEM 411, PHYS 401, and MATH 424B (if taken); minimum grade of C# or better is required in all other courses.

ZOOL 600, BIOL 695, ZOOL 795, or ZOOL 799H may substitute for one elective with academic advisor approval, if taken for a minimum of four credits. The four credits may be spread over multiple semesters if they are consecutive and with the same faculty mentor.

Students must fulfill a foreign language requirement in lieu of one advanced elective.

NR 661	Restoration Ecology and Ecosystem Management in New Zealand	4
NR 662	Environmental Policy, Planning and Sustainability in New Zealand	3
NR 663	Applied Directed Research in New Zealand (C)	4

[1] A single course cannot be used for both a core requirement and an elective (e.g., ZOOL 542 cannot be used to fulfill the animal survey requirement and as an elective).

[2] A 600, 695, 795, or 799 experience may substitute for one elective with academic advisor approval, but only if taken for at least four credits. These four credits may be spread over multiple semesters if they are consecutive and with the same faculty mentor

Capstone Experience

As part of the University of New Hampshire's Discovery Program requirements, all students must complete a capstone experience during their senior year (after earning at least 90 credits). **The capstone experience for students majoring in Biology consists of BOTH (1) an approved individual experience AND (2) the successful completion of the BIOL 780 Capstone Companion Course.** Students will not be approved for graduation until capstone certification has been granted.

1) The individual experience

The individual experience may be satisfied through various forms of experiential learning (e.g., Honors thesis, mentored research project, internship) or a course denoted with a "(C)" in the courses listed above. The individual experience must fulfill **at least one** of the University's capstone criteria:

- synthesizes and applies disciplinary knowledge and skills
- fosters reflection on undergraduate learning and experience
- demonstrates emerging professional competencies
- applies, analyzes, and/or interprets research, data, or artistic expression
- explores areas of interest based on the integration of the prior learning

Before beginning *any* capstone individual experience, students MUST SUBMIT A COMPLETED CAPSTONE APPROVAL FORM to their Program Coordinator.

Students can obtain this form on the Department's Capstone page or from their Program Coordinator. Here they will describe their proposed individual experience and how it fulfills at least one of the University's capstone criteria listed above. If the student is selecting a "C" course for their individual experience, they should obtain the course syllabus from the instructor for information about the course's content and learning objectives.

2) Enrollment in BIOL 780 Capstone Companion Course

Students will also be required to enroll in BIOL 780 (1 cr.) **during the semester of their individual experience.** BIOL 780 is offered every Fall and Spring semester.

- If the individual experience is a two-semester thesis, BIOL 780 should be taken during the second semester.
- If the individual experience occurs during the summer (e.g., internship), BIOL 780 should be taken during the Fall semester that immediately follows.
- Note: Because BIOL 780 is not offered during the summer, students cannot complete their individual experience during the summer *and graduate during that same September*. Summer experiences could only be used as individual capstone experiences if completed the summer before the student's senior year.

[1] Students can explore a second major, minor, study abroad and/or general electives.

Student Learning Outcomes

Program Learning Outcomes

Students demonstrate that they understand basic principles of Zoology.

- Understand the biodiversity and ecological roles of selected animal taxa.
- Demonstrate understanding of animal physiology and structure at the cellular and organismal levels.
- Describe and apply key principles and mechanisms of evolution and genetics.
- Comprehend the relationship between organisms and their environments.

Students demonstrate that they can undertake scientifically valid methods of inquiry.

- Demonstrate proficiency in searching, reading, and understanding scientific literature.

Students demonstrate that they can think critically and analytically.

- Analyze and present data using appropriate quantitative and graphical tools.

Students demonstrate that they can communicate effectively.

- Develop effective written and oral communication skills for conveying scientific information effectively to a wide audience.
- Students practice science responsibly and ethically, and acknowledge the influence of cultural and historical biases in the sciences.

Zoology Major (B.S.)

https://www.unh.edu/program/bachelor-science/zoology

Description

The Bachelor of Science (B.S.) in Zoology builds from the common background of the biology core curriculum to provide ample time for third- and fourth-year students to concentrate in specialized disciplines such as marine and freshwater biology, behavior, cell and developmental biology, ecology, evolution, fisheries, physiology, and neurobiology while giving students the foundation from which they can specialize in the area of zoology. Undergraduate students are encouraged to conduct field or lab-based research which helps determine advanced education disciplines for graduate studies. Many students ultimately work in the government, environmental agencies, education as well as agricultural, pharmaceutical, and biotechnology industries, where they conduct advanced research and/or teaching. Zoology majors had the second highest income and lowest unemployment rate according to data from the 2016 U.S. Census Bureau's American Community Survey.

New England Regional Student Program

ZOOL 625 & ZOOL 626W	Principles of Animal Physiology and Animal Physiology Laboratory	5
ZOOL 690	Evolution	4
Capstone		
BIOL 780	Capstone Companion Course	1
Zoology Electives		
Animal Survey Courses		4-5
Select one course from the following:		
ZOOL 542	Ornithology	
ZOOL 555	Introduction to Entomology	
ZOOL 566	Herpetology	
MEFB 510	Field Ornithology	
MEFB 628	Marine Invertebrate Evolution and Ecology	
ZOOL 710	Sharks and Bony Fishes	
NR 712	Mammalogy	
Electives		
Select three courses from the following: [1]		
ANTH 660	Human Osteology	4
BIOL 695	Biology Teaching Practices	1-4
BIOL 700	Current and Controversial Issues in Biology (C)	4
BIOL 706	Data Science with R for the Life Sciences	4
BIOL 720	Plant-Animal Interactions (C)	4
BMS 718	Mammalian Physiology	4
BMS 503/504	General Microbiology	3
MEFB 503	Introduction to Marine Biology	4
MEFB 510	Field Ornithology	4
MEFB 628	Marine Invertebrate Evolution and Ecology	5
MEFB 675	Marine Mammal Biology and Conservation	3
MEFB 717	Lake Ecology	4
MEFB 755	Biological Oceanography (C)	3
MEFB 772	Fisheries Biology: Conservation and Management	4
MEFB 773	Physiology of Fishes	4
NR 640	Wildlife Population Ecology	4
NR 642	Introduction to Biogeography	4
NR 650	Principles of Conservation Biology	4
NR 712	Mammalogy	4
NSB 727	Animal Communication (C)	4
TECH 797	Undergraduate Ocean Research Project (C) [2]	2
ZOOL 529	Developmental Biology	4
ZOOL 542	Ornithology	4
ZOOL 555	Introduction to Entomology	4
ZOOL 613W	Animal Behavior	5
ZOOL 566	Herpetology	4
ZOOL 600	Field Experience [3]	1-4
ZOOL 610	Principles of Aquaculture	4
ZOOL 708	Stream Ecology (C)	4
ZOOL 710	Sharks and Bony Fishes	4
ZOOL 726	Conservation Behavior (C)	4
ZOOL 733W	Behavioral Ecology (C)	4
ZOOL 736	Genes and Behavior (C)	4
ZOOL 740	Acoustic Ecology (C)	4
ZOOL 777W	Neuroethology (C)	4
ZOOL 795	Independent Investigations in Zoology [3]	1-4
ZOOL 799H	Honors Senior Thesis (C)	1-4
Shoals Courses:		
MEFB 505	Introduction to Applied Science Communication	4
MEFB 506	Marine Parasitology and Disease	4
MEFB 510	Field Ornithology	4
MEFB 530	Evolution and Marine Diversity	4
MEFB 535	Marine Mammal Biology	4
MEFB 674	Ecology and Marine Environment	4
MEFB 702	Sustainable Marine Fisheries	4
MEFB 714	Field Animal Behavior	4
MEFB 730	Underwater Research	4
MEFB 741	Sharks: Biology and Conservation	4
MEFB 751	Research in Biology at the Shoals Marine Lab	4
MEFB 754	Anatomy and Function of Marine Vertebrates	4
Study Abroad Courses:		
NR 660	Ecology and Biogeography of New Zealand	5
NR 661	Restoration Ecology and Ecosystem Management in New Zealand	4
NR 662	Environmental Policy, Planning and Sustainability in New Zealand	3
NR 663	Applied Directed Research in New Zealand (C)	4

1 A single course cannot be used for both a core requirement and an elective (e.g., ZOOL 542 cannot be used to fulfill the animal survey requirement and as an elective).

2 This class requires enrollment in both fall and spring sections, 2 credits/semester for a total of 4 credits.

3 A 600, 695, 795, or 799 experience may substitute for one elective with academic advisor approval, but only if taken for at least four credits. These four credits may be spread over multiple semesters if they are consecutive and with the same faculty mentor.

Capstone Experience

As part of the University of New Hampshire's Discovery Program requirements, all students must complete a capstone experience during their senior year (after earning at least 90 credits). **The capstone experience for students majoring in ZOOLOGY BS consists of BOTH (1) an approved individual experience AND (2) the successful completion of the BIOL 780 Capstone Companion Course.** Students will not be approved for graduation until capstone certification has been granted.

1) The individual experience

The individual experience may be satisfied through various forms of experiential learning (e.g., Honors thesis, mentored research project, internship) or a course denoted with a "(C)" in the courses listed above. The individual experience must fulfill **at least one** of the University's capstone criteria:

- synthesizes and applies disciplinary knowledge and skills
- fosters reflection on undergraduate learning and experience
- demonstrates emerging professional competencies
- applies, analyzes, and/or interprets research, data, or artistic expression
- explores areas of interest based on the integration of the prior learning

Before beginning *any* capstone individual experience, students must submit a completed capstone approval form to their Program Coordinator.

Students can obtain this form on the Department's Capstone page or from their Program Coordinator. Here they will describe their proposed individual experience and how it fulfills at least one of the University's capstone criteria listed above. If the student is selecting a "C" course for their individual experience, they should obtain the course syllabus from the instructor for information about the course's content and learning objectives.

2) Enrollment in BIOL 780 Capstone Companion Course

Students will also be required to enroll in BIOL 780 Capstone Companion Course **during the semester of their individual experience.** BIOL 780 is offered every Fall and Spring semester.

- If the individual experience is a two-semester thesis, BIOL 780 should be taken during the second semester.
- If the individual experience occurs during the summer (e.g., internship), BIOL 780 should be taken during the Fall semester that immediately follows.
- Note: Because BIOL 780 is not offered during the summer, students cannot complete their individual experience during the summer *and graduate during that same September*. Summer experiences could only be used as individual capstone experiences if completed the summer before the student's senior year.

Degree Plan

Sample Degree Plan

This sample degree plan serves as a general guide; students collaborate with their academic advisor to develop a personalized degree plan to meet their academic goals and program requirements.

First Year		
Fall		**Credits**
ENGL 401	First-Year Writing	4
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
CHEM 403	General Chemistry I	4
ZOOL 400	Professional Perspectives in Zoology	1
Discovery Course		4
	Credits	**17**
Spring		
BIOL 411	Introductory Biology: Molecular and Cellular	4
CHEM 404	General Chemistry II	4
MATH 424B	Calculus for Life Sciences [1]	4
Discovery Course		4
	Credits	**16**
Second Year		
Fall		
CHEM 545 & CHEM 546	Organic Chemistry and Organic Chemistry Laboratory	5
ZOOL 518	Comparative Morphology and Biology of Vertebrates	4
Animal Survey or Discovery Course		4
BIOL Elective or Discovery Course		4-5
	Credits	**17-18**
Spring		
BIOL 541W	Ecology	4
BIOL 528	Applied Biostatistics I	4
BMCB 658A	General Biochemistry	3
Animal Survey or Discovery Course		4
	Credits	**15**
Third Year		
Fall		
ANSC 612 or GEN 604	Genetics of Animals or Principles of Genetics	4
ZOOL 690	Evolution	4
PHYS 401	Introduction to Physics I	4
BIOL Elective or Discovery Course		4-5
	Credits	**16-17**
Spring		
ZOOL 625 & ZOOL 626W	Principles of Animal Physiology and Animal Physiology Laboratory	5
PHYS 402	Introduction to Physics II	4
WI Discovery Course		4
BIOL Elective		4-5
	Credits	**17-18**
Fourth Year		
Fall		
Major Capstone		4
BIOL 780	Capstone Companion Course	1
BIOL 633 or BIOL 706	Data Analysis for Life Science [1] or Data Science with R for the Life Sciences	4
BIOL Elective or Discovery Course		4
General Elective [2]		4
	Credits	**17**
Spring		
Animal Survey or Discovery Course		4
General Elective [2]		4
General Elective [2]		4
General Elective [2]		4
	Credits	**16**
	Total Credits	**131-134**

[1] These courses are all options for the second quantitative course (in addition to BIOL 528 Applied Biostatistics I).

[2] Students can explore a second major, minor, study abroad and/or general electives.

Student Learning Outcomes

Program Learning Outcomes

Students demonstrate that they understand basic principles of Zoology.

- Understand the biodiversity and ecological roles of selected animal taxa.
- Demonstrate understanding of animal physiology and structure at the cellular and organismal levels.
- Describe and apply key principles and mechanisms of evolution and genetics.
- Comprehend the relationship between organisms and their environments.

Students demonstrate that they can undertake scientifically valid methods of inquiry.

- Demonstrate proficiency in searching, reading, and understanding scientific literature.

Students demonstrate that they can think critically and analytically.

- Analyze and present data using appropriate quantitative and graphical tools.

Students demonstrate that they can communicate effectively.

- Develop effective written and oral communication skills for conveying scientific information effectively to a wide audience.
- Students practice science responsibly and ethically, and acknowledge the influence of cultural and historical biases in the sciences.

Zoology Minor

https://www.unh.edu/program/minor/zoology

Description

The Zoology Minor is designed to provide a general introduction to animals and their ecology, while requiring in-depth knowledge of the diversity of at least one group (Animal Survey Course), a course dealing with animal structure, behavior, or physiology, and an additional animal-focused course of the student's choice.

Requirements

Academic policies related to Minors.

- The Zoology minor consists of completing five courses.

Code	Title	Credits
Required Courses		
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
Category I: Animal Survey		
Select one course from the following:		4-5
MEFB 628	Marine Invertebrate Evolution and Ecology	5
MEFB 510	Field Ornithology	4
NR 712	Mammalogy	4
ZOOL 542	Ornithology	4
ZOOL 555	Introduction to Entomology	4
ZOOL 566	Herpetology	4
ZOOL 710	Sharks and Bony Fishes	4
Category II: Animal Form, Function, Development & Behavior		
Select two courses from the following:		4-5
ZOOL 518	Comparative Morphology and Biology of Vertebrates	4
ZOOL 529	Developmental Biology	4
ZOOL 625	Principles of Animal Physiology	3
BMS 718	Mammalian Physiology	4
MEFB 773	Physiology of Fishes	4
NSB 727	Animal Communication	4
ZOOL 613W	Animal Behavior	5
ZOOL 690	Evolution	4
ZOOL 736	Genes and Behavior	4
Category III: Ecology		
Select one course from the following:		4-5
BIOL 541W	Ecology	4
MEFB 717	Lake Ecology	4
MEFB 741	Sharks: Biology and Conservation	4
MEFB 772	Fisheries Biology: Conservation and Management	4
NR 660	Ecology and Biogeography of New Zealand	5
NR 661	Restoration Ecology and Ecosystem Management in New Zealand	4
ZOOL 708	Stream Ecology	4
ZOOL 733W	Behavioral Ecology	4
ZOOL 740	Acoustic Ecology	4

College of Professional Studies (CPS)

The College of Professional Studies includes two distinct academic units.

University of New Hampshire Manchester (UNHM)
Dawn Albertson, Interim Dean
Sonic Woytonik, Interim Associate Dean of Academic Affairs
Stephanie Kirylych, Assistant Dean of Student Success

College of Professional Studies Online (CPSO)
Tamara Von George, Associate Provost for Online Learning
Nicole Horne, Senior Director of Advising & Student Engagement

The University of New Hampshire College of Professional Studies expands access to students seeking a world-class UNH education, both online and on campus. Bringing together career-driven programs, outstanding faculty talent, and top-ranked online learning solutions, we prepare students for success in their chosen field — and connect them to the wealth of opportunities in the region.

CPS Online (UNH-Granite State College) offers online undergraduate, post-baccalaureate, graduate, and certificate programs. UNH Manchester offers in-person and hybrid undergraduate, post-baccalaureate, and both in-person and online graduate and certificate programs. Both units offer traditional, continuing, and professional education.

Faculty
The College of Professional Studies faculty is its greatest asset. Faculty members—both online and in-person—have earned reputations for excellent teaching, scholarly achievement in their fields, and service to the community. They are recognized scholars and have acquired national and international reputations. Adjunct faculty members bring applied experience and a commitment to teaching to the classroom. Most importantly, the college's dedicated faculty members are outstanding teachers who care about each individual student.

Divisions

UNH Manchester (p. 633)

CPS Online (p. 460)

CPS Online

The UNH College of Professional Studies (CPS) Online (UNH-Granite State College) undergraduate programs are nationally ranked and cater to working adults who balance personal and professional responsibilities. CPS Online admission and transfer policies are designed to ensure that motivated individuals have access to a high quality college education. Our expert faculty are passionate about providing a transformative learning experience for every student.

Most CPS Online undergraduate students transfer credits from previous education, and those with prior knowledge, job training, or relevant experience may receive credit towards their degree. Students with an associate degree can benefit from Transfer Pathways, which waive most general education requirements for bachelor's degrees and provide opportunities for additional tuition savings. Supporting workforce development is a top priority for the University of New Hampshire and CPS Online demonstrates this commitment through cultivation of tuition partnerships across many industries.

Degrees

CPS Online offers associate and baccalaureate undergraduate degree programs.

Liberal Arts, Communication, and General Education (p. 592)

Learning Outcomes

Outcomes-Based Learning

Our greatest concern is that our graduates develop a specific set of skills and abilities.

The College's outcomes-based degree programs and curriculum:

- Provide standards to be met in demonstrating competence.
- Form a base from which to design and pursue learning activities.
- Foster the ability to demonstrate self-directed learning.

In addition to individual student assessment and grading, learning outcomes assessment is conducted in all programs to ensure the quality of our programs and to prompt ongoing improvements in teaching and learning.

CPS Online Learning Outcomes

At the College of Professional Studies-Online, at all levels and in all programs, we provide opportunities for students to learn to:

Communicate: To successfully receive and deliver messages through a variety of means (such as verbal, non-verbal, written, and visual) using the appropriate tools and practices for a given professional or community-based situation.

Think Critically and Comprehensively: To effectively collect, evaluate, and analyze information; define problems; make judgments; and draw conclusions that matter in real-world settings.

Apply Knowledge to Workplace and Community: To engage with diverse individuals, groups, or cultural frameworks; develop solutions to shared challenges; and reflect on professional practice and community engagement.

Gain Specialized Knowledge: To use essential frameworks, research methods, and professional practices of a field or discipline to further personal and professional growth.

Programs of Study

- Applied Psychology (p. 461)
- Behavioral Sciences (p. 483)
- Business (p. 492)
- Criminal Justice (p. 533)
- Education (p. 536)
- Health Care and Nursing (p. 568)
- Human Services (p. 577)
- Liberal Arts, Communication, and General Education (p. 592)
- Nonprofit and Public Sector Management (p. 616)
- Technology (p. 620)

Applied Psychology

- Addictions Studies (Minor) (p. 461)
- Applied Psychology (Minor) (p. 461)
- Applied Psychology Major: Addictions Studies Option (B.S.) (p. 462)
- Applied Psychology Major: Applied Behavior Analysis Option (B.S.) (p. 464)
- Applied Psychology Major: Counseling Foundations Option (B.S.) (p. 466)
- Applied Psychology Major: Court Advocacy Option (B.S.) (p. 468)
- Applied Psychology Major: Education Advocacy Option (B.S.) (p. 470)
- Applied Psychology Major: Emergency Management Strategy and Planning Option (B.S.) (p. 472)
- Applied Psychology Major: Family Studies Option (B.S.) (p. 474)
- Applied Psychology Major: Human Services Option (B.S.) (p. 476)
- Applied Psychology Major: Organizational Psychology Option (B.S.) (p. 478)
- Applied Psychology Major: Wellness and Prevention Option (B.S.) (p. 480)
- Counseling Foundations (Minor) (p. 482)
- Organizational Psychology (Minor) (p. 482)

Addictions Studies (Minor)

https://www.unh.edu/program/minor/addictions-studies

Description

This minor introduces students to the issues associated with supporting people involved with addictive behaviors. Students will study the foundational principles of providing counseling services to individuals with addiction issues as well as the disease model and characteristic needs of this population.

NOTE: This minor may not be declared with the following majors: BS Human Services: Addictions Studies or BS Applied Psychology: Addictions Studies.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Code	Title	Credits
Required Courses		
PSY 565	Core Principles of Addiction	4
PSY 654	Counseling Theories	4
PSY 675	Foundations of Addictions Counseling	4
PSY 710	The Biology of Addiction	4
SOCI 680	Issues of Addiction in Special Populations	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Identify the characteristics and behaviors of people with addictive behaviors, such as substance use disorder, gambling, video gaming, eating disorders, sex addiction, and other compulsive behaviors.
- Describe explanations for addictive behaviors.
- Apply knowledge of addictive behaviors to suggest treatment strategies.

Applied Psychology (Minor)

https://www.unh.edu/program/minor/applied-psychology

Description

The minor in applied psychology is designed to provide the student with the foundational education in psychology.

NOTE: This minor may not be declared with the following majors: BS Human Services: Applied Psychology or BS Applied Psychology (all options).

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits
PSY 410	Introduction to Psychology	4
IDIS 560	Research Methods in the Behavioral Sciences	4
MTH 504	Statistics	4
or PSY 530	Social Psychology	
PSY 740	Biopsychology	4
or PSY 725	Cognitive Psychology	
Select one of the following:		4
PSY 470	Child Development	
PSY 525	Human Development	
PSY 530	Social Psychology	
PSY 602	Theories of Personality	
PSY 685	Principles of Psychopathology	
SOSC 602	Men and Women in Cross-Cultural Perspectives	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Demonstrate a breadth of knowledge and application of psychological ideas to simple problems.
- Interpret behavior to draw conclusions about psychological phenomena.
- Demonstrate familiarity with the formal regulations that govern professional ethics in psychology and begin to embrace the values that will contribute to positive outcomes in work settings and in building a society responsive to multicultural and global concerns.
- Present information using a scientific approach and express ideas with clarity.

Applied Psychology Major: Addictions Studies Option (B.S.)

https://www.unh.edu/program/bachelor-science/applied-psychology-addictions-studies

Description

The Bachelor of Science degree in Applied Psychology provides an understanding of human behavior within a socio-cultural context. Students explore the variables affecting human behavior within both individual and group settings. The major positions students for either post-college employment or advanced education. The addictions studies option introduces students to the issues associated with supporting people involved with addictive behaviors.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Code	Title	Credits
ENG 420	The Writing Process	4

IDIS 601A	Interdisciplinary Seminar: Being Happy	4
or IDIS 601B	Interdisciplinary Seminar: Business of Beer	
or IDIS 601C	Interdisciplinary Seminar: Paranormal Activities	
Total Credits		**40**

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Differentiate and critically analyze biological, developmental, cognitive, and sociocultural theories that provide an understanding of behavior and communicate this knowledge effectively.
- Use computer technology, as well as quantitative and scientific reasoning, to function as informed consumers of psychological research.
- Apply ethical principles that guide and inform the conduct of research and clinical practice.

Applied Psychology Major: Applied Behavior Analysis Option (B.S.)

https://www.unh.edu/program/bachelor-science/applied-psychology-applied-behavior-analysis

Description

The Bachelor of Science degree in Applied Psychology provides an understanding of human behavior within a socio-cultural context. Students explore the variables affecting human behavior within both individual and group settings. The major positions students for either post-college employment or advanced education. The applied behavior analysis option introduces students to procedures and research in applied behavior analysis (ABA). Courses in this option cover evidence-based practices and concepts in ABA and how they are applied in professional ABA practice.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

Student Learning Outcomes

Program Learning Outcomes

- Differentiate and critically analyze biological, developmental, cognitive, and sociocultural theories that provide an understanding of behavior and communicate this knowledge effectively.
- Use computer technology, as well as quantitative and scientific reasoning, to function as informed consumers of psychological research.
- Apply ethical principles that guide and inform the conduct of research and clinical practice.
- Develop strategies to implement behavioral methods and assessments with individuals to change behavior and increase socially significant behaviors.

Applied Psychology Major: Counseling Foundations Option (B.S.)

https://www.unh.edu/program/bachelor-science/applied-psychology-counseling-foundations

Description

The Bachelor of Science degree in Applied Psychology provides an understanding of human behavior within a socio-cultural context. Students explore the variables affecting human behavior within both individual and group settings. The major positions students for either post-college employment or advanced education. The counseling foundations option introduces students to the theory and process of delivering counseling services.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Differentiate and critically analyze biological, developmental, cognitive, and sociocultural theories that provide an understanding of behavior and communicate this knowledge effectively.
- Use computer technology, as well as quantitative and scientific reasoning, to function as informed consumers of psychological research.
- Apply ethical principles that guide and inform the conduct of research and clinical practice.

Applied Psychology Major: Emergency Management Strategy and Planning Option (B.S.)

https://www.unh.edu/program/bachelor-science/applied-psychology-emergency-management-strategy-planning

Description

The Bachelor of Science degree in Applied Psychology provides an understanding of human behavior within a socio-cultural context. Students explore the variables affecting human behavior within both individual and group settings. The major positions students for either post-college employment or advanced education. The emergency management strategy and planning option prepares students to address the psychological factors, prescriptive and descriptive models of decision making, cognitive biases, heuristics, risk perception, social influences, and past experiences that together help explain why people tend to be under prepared for potential natural and human-made disasters.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Total Credits		**40**

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

Total Credits		**56**

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Differentiate and critically analyze biological, developmental, cognitive, and sociocultural theories that provide an understanding of behavior and communicate this knowledge effectively.
- Use computer technology, as well as quantitative and scientific reasoning, to function as informed consumers of psychological research.
- Apply ethical principles that guide and inform the conduct of research and clinical practice.

Applied Psychology Major: Wellness and Prevention Option (B.S.)

https://www.unh.edu/program/associate-science/behavioral-science-wellness-prevention

Description

The Bachelor of Science degree in Applied Psychology provides an understanding of human behavior within a socio-cultural context. Students explore the variables affecting human behavior within both individual and group settings. The major positions students for either post-college employment or advanced education. The wellness and prevention option introduces students to the key factors that impact the mental and physical well-being of individuals as well as strategies for prevention and health promotion.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Differentiate and critically analyze biological, developmental, cognitive, and sociocultural theories that provide an understanding of behavior and communicate this knowledge effectively.
- Use computer technology, as well as quantitative and scientific reasoning, to function as informed consumers of psychological research.
- Apply ethical principles that guide and inform the conduct of research and clinical practice.

Counseling Foundations (Minor)

https://www.unh.edu/program/minor/counseling-foundations

Description

This minor enables students to focus on issues and methods associated with providing counseling to individuals in distress. Students will study the personal and situational factors that can cause individuals to seek counseling. Students will also gain knowledge of the methods associated with communicating with individuals in distress to help them to solve problems.

NOTE: This minor may not be declared with the following majors: BS Human Services: Counseling Foundations or BS Applied Psychology: Counseling Foundations.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
PSY 602	Theories of Personality	4
PSY 603	Crisis Intervention	4
PSY 654	Counseling Theories	4
PSY 665	Principles of Assessment	4
or COM 460	Interpersonal Communication and Group Dynamics	
PSY 685	Principles of Psychopathology	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Identify personal and situational factors that lead individuals to seek counseling.
- Differentiate between different counseling theories and practices.

Organizational Psychology (Minor)

https://www.unh.edu/program/minor/organizational-psychology

Description

This minor explores the crossover of psychology and business by studying the principles of individual, group, and organizational behavior and applying this knowledge to the solution of problems at work. Principles include organizational culture, stress and conflict in the workplace, and maintaining psychological health within the context of work and organizations.

NOTE: This minor may not be declared with the following majors: BS Applied Psychology: Organizational Psychology, BS Business Management: Organizational Psychology, or BS Human Resource Management.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits
MGMT 566	Organizational Behavior	4
HRM 580	Change Management	4
PSY 646	Psychology of Occupational Stress	4
SOCI 603	Work and Society	4
Select one of the following:		4
HRM 635	Managing Conflict	
HRM 740	Workplace Coaching	
COM 675	Organizational Communication	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Discuss the role of groups in organizations and how they can influence organizational decision-making, efficiency, and effectiveness.
- Articulate the nature of interpersonal dynamics within organizational systems that facilitate or impede functionality and affect the change process in organizations.
- Describe the elements of occupational health and the effects of job stress and how to reduce it.

- Behavioral Science Major: Human Services Option (A.S.) (p. 489)
- Behavioral Science Major: Wellness and Prevention Option (A.S.) (p. 490)
- Emergency Management Strategy and Planning Minor (p. 491)

Behavioral Science Major: Addictions Studies Option (A.S.)

https://www.unh.edu/program/associate-science/behavioral-science-addictions-studies

Description

The Associate in Science in Behavioral Science provides an interdisciplinary approach to understanding human behavior within a global world view. Foundation courses at an associate level introduce behavioral science students to the biological, psychological, social, and cultural variables of human behavior. This degree prepares students for a smooth transition to the B.S. in Applied Psychology, Health & Wellness, Human Services, or Criminal Justice. The addictions studies option introduces students to the issues associated with supporting people involved with addictive behaviors.

Student Learning Outcomes

Program Learning Outcomes

- Attain proficiency in the basic concepts, theories, and methods of inquiry in behavioral sciences.
- Evaluate ethical principles of the behavioral sciences.
- Prepare for seamless transition to the Bachelor of Science in Applied Psychology, Health & Wellness, Human Services, or Criminal Justice.

Behavioral Science Major: Criminal Justice Option (A.S.)

https://www.unh.edu/program/associate-science/behavioral-science-criminal-justice

Description

The Associate in Science in Behavioral Science provides an interdisciplinary approach to understanding human behavior within a global world view. Foundation courses at an associate level introduce behavioral science students to the biological, psychological, social, and cultural variables of human behavior. This degree prepares students for a smooth transition to the B.S. in Applied Psychology, Health & Wellness, Human Services, or Criminal Justice. The criminal justice option introduces students to the justice system as well as the rights and behaviors of people in the system.

Requirements

Degree Requirements

Minimum Credit Requirement: 60 credits

Minimum Residency Requirement: 16 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: General Education Program

Major, Option, and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of one course overlap between the Major and General Education areas.

Code	Title	Credits
ENG 420	The Writing Process	4
COM 460	Interpersonal Communication and Group Dynamics	4
COM 480	Visual Communication	4
CRIT 501	Introduction to Critical Inquiry	4
Select one of the following:		4

Behavioral Science Major: Emergency Management Strategy and Planning Option (A.S.)

https://www.unh.edu/program/associate-science/behavioral-science-emergency-management-strategy-planning

Description

The Associate in Science in Behavioral Science provides an interdisciplinary approach to understanding human behavior within a global world view. Foundation courses at an associate level introduce behavioral science students to the biological, psychological, social, and cultural variables of human behavior. This degree prepares students for a smooth transition to the B.S. in Applied Psychology, Health & Wellness, Human Services, or Criminal Justice. Emergency management strategy and planning involves multidimensional efforts to reduce our vulnerability to natural and human-caused disasters, to diminish the impact of disasters, and to prepare for, respond to, and recover from disasters. This option introduces students to emergency management approaches in order to develop skills and knowledge relating to emergency management strategy and policy development.

Emergency Management Strategy and Planning Minor

https://www.unh.edu/program/minor/emergency-management-strategy-planning

Description

The minor in emergency management strategy and planning enables students to develop knowledge and skills related to emergency management strategy and policy development. It is a comprehensive study of the disaster management cycle, including emergency preparedness, mitigation, response, and recovery. The world is becoming a crowded place with a dense population and increasingly frequent natural and human-made hazards. Thus, there is a high demand for risk reduction and educated, prepared public leadership. Students who complete a minor in emergency management strategy and planning gain insight and knowledge that will strengthen their marketable skills in various international, federal, state, and local governments, private sector businesses, and nonprofit organizations.

NOTE: This minor may not be declared with the following majors: BS Applied Psychology: Emergency Management Strategy and Planning or BS Business Management: Emergency Management Strategy and Planning.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
BEHS 445	Homeland Security and Emergency Management	4
BEHS 510	National Incident Management Systems (NIMS)	4
BEHS 610	Community Emergency Response	4
BEHS 665	Disaster Management	4
BEHS 675	Terrorism: Domestic and International	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Attain proficiency in the fundamental skills needed to successfully participate in an emergency management team.
- Evaluate the integrated emergency management systems with resources and capabilities networked together, developing the means to address natural and human-made hazards.
- Explain how different partners and core capabilities contribute to emergency management in their community by building on the

resources necessary for developing a comprehensive emergency operations plan.

Accounting (Minor) CPSO

https://www.unh.edu/program/minor/accounting

Description

This minor provides foundational accounting skills for careers requiring bookkeeping and knowledge of organizational processes in the field. The program prepares graduates to help organizations manage budgets, utilize accounting information systems, and gain knowledge in taxation.

NOTE: This minor may not be declared with the following majors: BS Accounting and Finance or BS Business Management: Accounting.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Code	Title	Credits
Required Courses		
ACCT 533	Managerial Accounting	4
ACCT 550	Accounting Information Systems	4
ACCT 600	Intermediate Accounting I	4
ACCT 601	Intermediate Accounting II	4
ACCT 635	Taxation	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Acquire knowledge of professional accounting practices and research in the field of accounting.
- Demonstrate working knowledge of essentials in the field of accounting, enabling them to manage their personal and organizational bookkeeping.

Accounting and Finance Major (B.S.)

https://www.unh.edu/program/bachelor-science/accounting-finance

Description

The Bachelor of Science in Accounting and Finance blends content knowledge in accounting and finance with corresponding knowledge of organizational processes in the field. This program prepares graduates to help organizations better leverage assets, manage budgets, gain efficiencies, and maximize investments. The program provides a foundation for individuals whose future goals may include earning the credential of Certified Public Accountant.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Demonstrate knowledge of essentials in the fields of accounting and finance to provide sound information through valid processes to users of accounting and financial services.
- Show thorough competence in understanding quantitative and qualitative methods as applied to problem-solving in the fields of accounting and finance.
- Communicate effectively, both verbally and in writing, to explain, evaluate, and present financial and accounting information to varied audiences.
- Employ integrity, ethics and social responsibility in accounting and financial practices.

Applied Studies Major: Management Option (B.S.)

https://www.unh.edu/program/bachelor-science/applied-studies-management

Description

This transfer-friendly program is designed for students with an Associate's Degree from a regionally accredited college in a technical or specialized field who already have the "hands- on" skills and want to develop the business competencies that will help them advance in their field in a management capacity. The program integrates the technical and general skills developed in an associate degree with the business competencies needed to succeed as a manager in their chosen profession. The focus is on the application of business skills to the student's professional field. Professional licensure, certification or training may serve as a foundation to this degree, upon approval by academic affairs.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

- Identify patterns of individual and group behavior in organizations and apply management theories and approaches that enhance the effectiveness and efficiency of organizations.
- Demonstrate leadership skills that enhance organizational performance through application of theories of leadership, motivation, change management, conflict management and managing diversity.
- Apply accounting and finance skills and best practices to enhance the effectiveness of financial decision-making in organizations.
- Integrate legal and ethical principles into decision-making to assure organizational and individual adherence to corporate ethics and social responsibility.
- Integrate and apply management theories and techniques to a specific applied field through an in-depth capstone experience.

Business Major: Digital Marketing Option (A.S.)

https://www.unh.edu/program/associate-science/business-digital-marketing

Description

The Associate in Science degree in Business is designed for students interested in gaining a solid foundation in the field of business. The program includes an overview of general management theory and introduces students to the fundamental concepts of economics, marketing, finance, and organizational behavior. Students are able to further customize their degree by choosing from an array of three-course concentrations to gain specialized knowledge. This degree prepares students for a smooth transition to the B.S. in Business Management or related degree.

Requirements

Degree Requirements

Student Learning Outcomes

Program Learning Outcomes

- Attain proficiency in the basic concepts, theories, and methods of inquiry in business.
- Evaluate ethical principles that guide businesses.
- Prepare for seamless transition to the Bachelor of Science in Business Management program.

Business Management Major: Artificial Intelligence and Machine Learning Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-management-artificial-intelligence-machine-learning

Description

The Bachelor of Science degree in Business Management offers students the appropriate breadth and depth of study with a concentration of five courses to pursue other areas of interest in management.

The degree is responsive to the education needs of businesses and includes an appropriate foundation for further graduate study. The outcomes-based program is built upon a foundation of six essential competencies that are integrated throughout the curriculum: critical thinking, effective oral and written communication, applied quantitative analysis, managing in a global environment, ethical practice, and leadership.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Apply business management theories related to production and operations, organizational behavior, human resource management, and leadership throughout various functional areas of organizations.
- Communicate organizational information effectively across an organization through the use of information systems, to a broad spectrum of audiences and in a variety of business situations.
- Apply quantitative tools and information systems in business analysis and decision-making.
- Critically analyze, research and articulate organizational strengths and weaknesses in areas such as competitive advantage, operations, human resources, marketing, financial and strategic positioning.
- Make legal and ethical individual and business decisions based on legalities, evaluation of business sustainability (environmental, socio/cultural, economic, institutional) and ethical practice.

- Manage and lead to enhance the effectiveness of individuals, teams, and business organizations in a global environment.
- Design intelligent systems that solve real world problems through the use of artificial intelligence, machine learning principles, algorithm development, model training and evaluation, ethical considerations, data handling, and deployment strategies.

Student Learning Outcomes

Program Learning Outcomes

- Apply business management theories related to production and operations, organizational behavior, human resource management, and leadership throughout various functional areas of organizations.
- Communicate organizational information effectively across an organization through the use of information systems, to a broad spectrum of audiences and in a variety of business situations.
- Apply quantitative tools and information systems in business analysis and decision-making.
- Critically analyze, research and articulate organizational strengths and weaknesses in areas such as competitive advantage, operations, human resources, marketing, financial and strategic positioning.
- Make legal and ethical individual and business decisions based on legalities, evaluation of business sustainability (environmental, socio/cultural, economic, institutional) and ethical practice.
- Manage and lead to enhance the effectiveness of individuals, teams, and business organizations in a global environment.
- Develop feasible entrepreneurial business strategies through clear stakeholder communication, command of the innovation process, funding resources, market research, and the formation of creative culture.

Student Learning Outcomes

Program Learning Outcomes

- Apply business management theories related to production and operations, organizational behavior, human resource management, and leadership throughout various functional areas of organizations.

- Communicate organizational information effectively across an organization through the use of information systems, to a broad spectrum of audiences and in a variety of business situations.
- Apply quantitative tools and information systems in business analysis and decision-making.
- Critically analyze, research and articulate organizational strengths and weaknesses in areas such as competitive advantage, operations, human resources, marketing, financial and strategic positioning.
- Make legal and ethical individual and business decisions based on legalities, evaluation of business sustainability (environmental, socio/cultural, economic, institutional) and ethical practice.
- Manage and lead to enhance the effectiveness of individuals, teams, and business organizations in a global environment.

Business Management Major: Organization and Business Administration Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-management-organization-business-administration

Description

The Bachelor of Science degree in Business Management offers students the appropriate breadth and depth of study with a concentration of five courses to pursue other areas of interest in management.

The degree is responsive to the education needs of businesses and includes an appropriate foundation for further graduate study. The outcomes-based program is built upon a foundation of six essential competencies that are integrated throughout the curriculum: critical thinking, effective oral and written communication, applied quantitative analysis, managing in a global environment, ethical practice, and leadership.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

- Make legal and ethical individual and business decisions based on legalities, evaluation of business sustainability (environmental, socio/cultural, economic, institutional) and ethical practice.
- Manage and lead to enhance the effectiveness of individuals, teams, and business organizations in a global environment.
- Employ standard project management processes to achieve the stated project objectives, working within the identified constraints to deliver business value.

Data Analytics Minor

https://www.unh.edu/program/minor/data-analytics

Description

The minor in data analytics addresses the knowledge, skills, and ability to answer data-driven questions within a student's discipline or industry. Students will have the opportunity to prepare data for analysis, draw conclusions based on data, and present the results of data analysis.

NOTE: This minor may not be declared with the following majors: BS Business Management: Data Analytics or BS Computer Information Technology: Data Analytics.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
DAT 510	Introduction to Data Analytics	4
DAT 535	Data Mining, Cleaning, and Visualization	4
DAT 610	Data Analytics and Technologies	4
DAT 620	Data Analytics in Business Intelligence	4
DAT 670	Advanced Data Analytics	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Utilize the data analytics process to address industry-specific challenges.
- Practice data mining, cleaning, and visualization techniques.
- Define ethical and legal issues related to data analytics.

Digital Marketing Minor

https://www.unh.edu/program/minor/digital-marketing

Description

The focus of marketing revolves around the consumer and a minor in digital marketing will allow the student to identify consumers, evaluate consumer interest, and meet consumer needs and wants through

marketing research, consumer behaviors, and customer relations on a local, national, and global level. Students with a minor in marketing can complement their major areas of study with essential skills that provide students with insight into the modern external functional area of business.

NOTE: This minor may not be declared with the following majors: BS Marketing or BS Business Management: Digital Marketing.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
MKT 517	Consumer Behavior	4
MKT 612	Agile Marketing	4
MKT 615	Digital Storytelling and Brand Management	4
Select two of the following:		8

COM 647	Writing for Visual Media	
MKT 600	Social Media Marketing	
MKT 645	Marketing Research	
MKT 720	Digital Advertising	
MKT 723	Marketing Design and Usability	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Apply relevant marketing theories and models to contemporary marketing issues and professional practice.
- Identify and discuss promotional skills and competencies for marketing products, services, and ideas.
- Analyze contemporary marketing problems and situations.

Entrepreneurship and Innovation Minor

https://www.unh.edu/program/minor/entrepreneurship-innovation

Description

The minor in entrepreneurship and innovation is designed to provide the student the opportunity to develop entrepreneurship knowledge, skills, and ability applicable to a wide range of organizational settings, including startup business, new ventures, and social ventures including not- for-profit organizations. The minor in entrepreneurship is suitable for those who might want to have their own business or work in an entrepreneurial environment.

NOTE: This minor may not be declared with the following major: BS Business Management: Entrepreneurship and Innovation or BS Computer Information Technology: Entrepreneurship and Innovation.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
ENT 500	The Entrepreneurial Mindset	4
ENT 600	Launching and Managing Entrepreneurial Ventures	4
ENT 611	Entrepreneurial Marketing	4
ENT 703	Entrepreneurial Finance	4
ENT 707	Legalities and Ethics of Entrepreneurship	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Understand and assess the feasibility of entrepreneurial endeavors.
- Effectively utilize their analytical skills to solve entrepreneurial problems.
- Demonstrate the ability to find an attractive market that can be reached economically.

Finance Minor

https://www.unh.edu/program/minor/finance

Description

This minor provides foundational skills for careers related to finance. It can also prepare the student to be a member of the financial management team in small or mid-sized enterprises or for self-employment.

NOTE: This minor may not be declared with the following major: BS Accounting and Finance or BS Business Management: Finance.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
ECO 580	International Economics	4
FNC 611	Money and Banking	4
FNC 612	Investment Principles	4
FNC 665	Financial Management	4
FNC 675	Financial Modeling and Decision-Making	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Demonstrate working knowledge of essentials in the field of finance so as to accurately interpret financial data and processes to users of financial services and business financial processes.
- Ask critical questions about information and research in the field of Finance.

Human Resource Management Major (B.S.)

https://www.unh.edu/program/bachelor-science/human-resource-management

Description

The Bachelor of Science in Human Resource Management provides a strong foundation in business essentials with specialization in the areas of employee development and organizational performance. Studies include the fundamentals for H.R. professionals, as well as explorations in the management of change, conflict, diversity, and in the psychosocial dimension of organizations. Graduates will be prepared for careers that allow them to contribute to strategic advancement in business settings, in the nonprofit sector, and in the public sphere.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Student Learning Outcomes

Program Learning Outcomes

- Gain competency in the fundamentals of human resources management.
- Engage key concepts in organizational development.
- Explore psychosocial dimensions and their impact on individuals and organizations.
- Demonstrate awareness of and competency with diverse cultures in a global workforce.
- Analyze information effectively to guide evidence-based decision-making.
- Recognize and apply ethical principles and legal standards appropriate to human resources and business practice.
- Advance organizational objectives by deploying human resources knowledge in the context of strategic management.

Human Resource Management Minor

https://www.unh.edu/program/minor/human-resource-management

Description

This minor develops skills for the varied and significant roles that the human resources professional fills in an organization. The minor focuses on developing leadership and managerial skills for the HR professional as an agent of organizational change in the workplace.

NOTE: This minor may not be declared with the following major: BS Human Resource Management.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
HRM 420	Human Resource Management	4
HRM 470	Human Resource Application in Today's Organizations	4
HRM 710	Law and Ethics in Human Resource Management	4
MGMT 566	Organizational Behavior	4
Select one of the following:		4
HRM 580	Change Management	
HRM 635	Managing Conflict	
HRM 660	Recruitment, Selection, and Employee Development	
HRM 680	Compensation and Performance Management	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Apply key concepts and legal/ethical frameworks in human resources to effectively resolving real or potential challenges in organizations.
- Ask critical questions about information and research in the field of human resources.

Leadership, Change, and Social Responsibility Minor

https://www.unh.edu/program/minor/leadership-change-social-responsibility

Description

Leadership is the process of motivating people to achieve project goals. Leadership varies from management, and not all leaders are managers. Courses within this minor allow students to define leadership, explore the leadership qualities within one's self and others, investigate the role of leadership in organizations, and assess leadership theories. Within the minor, students will survey and discuss multiple methodologies used to evaluate teams. Students will analyze how organizational dynamics and structure impact the leader, limit or increase their power, and the ability to perform their job.

NOTE: This minor may not be declared with the following major: BS Business Management: Leadership, Change, and Social Responsibility.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
LD 600	Becoming an Effective Leader	4
LD 660	Leadership Theory	4
LD 704	Leading Teams	4
MGMT 566	Organizational Behavior	4
HRM 740	Workplace Coaching	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Use basic as well as advanced management terms and theories.
- Compare and contrast multiple motivational and management models.
- Identify and apply multiple conflict resolution techniques.
- Identify a leader's source and types of power.
- Survey and discuss multiple methodologies used to evaluate teams.
- Analyze how organizational dynamics and structure impact the leader, limit or increase their power, and the ability to perform their job.

Management Major (A.B.S.)

https://www.unh.edu/program/applied-bachelor-science/management

Description

The **Applied Bachelor of Science (A.B.S.) in Management** is a comprehensive 90-credit, three-year program designed to develop students' leadership capabilities, critical thinking, and professional competencies essential for today's evolving business landscape. This applied program emphasizes practical learning, strategic decision-making, and problem-solving skills grounded in real-world business scenarios. The curriculum integrates core business principles with current industry practices and prepares students for a wide range of management roles across various sectors. Aligned with key competencies valued by employers, the program equips graduates with the analytical tools, organizational insight, and communication strategies necessary to lead teams, manage resources, and drive organizational success.

Requirements

Degree Requirements

Minimum Credit Requirement: 90 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral

Core Curriculum Required: General Education Program

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. All General Education requirements must be taken prior to the capstone.

- Demonstrate leadership and communication skills that enhance team performance and organizational outcomes.
- Incorporate ethical principles and social responsibility into business.
- Assess personal and professional growth in relation to management competencies and career objectives.

Disclosures

Degree Type: Applied Bachelor of Science (A.B.S.)

UNH's Applied Bachelor's in Management 90-credit, three-year degree is not equivalent to a traditional, four-year baccalaureate degree. It is an accelerated degree program that some graduate programs, professional schools, and employers may not recognize or accept. Any student who wishes to may, at any time during their course of study, seamlessly transition from the 90-credit, three-year to the 120-credit, four-year Management degree program. UNH's applied bachelor's programs are eligible for Title IV federal financial aid. However, students who leave UNH having completed an applied bachelor's degree but later choose to return to UNH or attend another institution to complete additional undergraduate credits, either to earn a certificate of post-baccalaureate studies or to earn a second bachelor's degree, will not be eligible for federal grant aid and may have limited eligibility for other federal aid programs. Please reach out to UNH CPSO Admissions at 1-855-472-4255 or admissions.cps@unh.edu if you have questions or need additional information.

Student Learning Outcomes

Program Learning Outcomes

- Demonstrate knowledge of the theory and practice of operations, supply chain, and logistics management.
- Apply qualitative and quantitative methods to problem-solving in business analysis and operational decision-making.
- Manage and lead strategically to enhance performance for individuals, teams, and organizations.
- Analyze operational, supply chain, and logistics strengths and weaknesses from multiple perspectives, including ethical, legal, fiscal, and quality.
- Communicate and interact productively in culturally responsive ways with a diverse and changing workforce.

Operations, Supply Chain, and Logistics Minor

https://www.unh.edu/program/minor/operations-supply-chain-logistics

Description

This minor explores how the fast and efficient flow of products in from suppliers and out to customers ensures growth in revenue that would otherwise be unobtainable.

NOTE: This minor may not be declared with the following major: BS Operations, Supply Chain, and Logistics Management.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits
Required Courses		
SCM 570	Supply Chain Purchasing Management	4
OPS 600	Operations Management	4
SCM 610	Supply Chain Management	4
SCM 715	Logistics Management	4
OPS 720	Fundamentals of LEAN Process Improvement	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Develop knowledge of supply chain management theories, approaches and practices.

- Demonstrate an understanding of logistics and operations, the global business environment, purchasing practices, and relationship management through course projects.

Organization and Business Administration Minor

https://www.unh.edu/program/minor/organization-business-administration

Description

The minor in organization and business administration is designed to provide the student with content and additional in-depth education in marketing, management, accounting, information systems, legal, and ethical issues in business.

NOTE: This minor may not be declared with the following major: BS Business Management: Business Administration.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits
Requirements		
Select 5 courses from the following:		20
ACCT 533	Managerial Accounting	
CMPL 643	Managing Information Technology	
ECO 470	Principles of Economics	
ECO 580	International Economics	
ENT 500	The Entrepreneurial Mindset	
FNC 665	Financial Management	
FNC 675	Financial Modeling and Decision-Making

OPS 605	Quality Management	
OPS 720	Fundamentals of LEAN Process Improvement	
SCM 610	Supply Chain Management	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Learn the foundations of the various business disciplines and how they function together to create a sustainable business operation.
- Research business methods and how to base decisions from your findings.
- Assess legal and ethical issues in business situations.

Criminal Justice

- Court Advocacy Minor (p. 533)
- Criminal Justice Major (B.S.) (p. 533)
- Criminal Justice Minor (p. 535)

Court Advocacy Minor

https://www.unh.edu/program/minor/court-advocacy

Description

This minor explores the issues associated with supporting crime victims as they navigate the criminal justice system. Students will study criminal behavior, the criminal justice system, and the issues of both child and adult victims of crime.

NOTE: This minor may not be declared with the following majors: BS Human Services: Court Advocacy or BS Applied Psychology: Court Advocacy.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
CRIM 410	Introduction to Criminology	4
CRIM 555	The Criminal Justice System	4
CRIM 645	Crime Victim Rights and Remedies	4
SOCI 675	Child Abuse and Neglect	4
SOSC 710	Social Stratification and Inequality	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Identify the needs of crime victims (both child and adult).
- Describe the behaviors of victims and criminals.

Criminal Justice Major (B.S.)

https://www.unh.edu/program/bachelor-science/criminal-justice

Description

This program is designed to prepare individuals for entry or advancement in the following fields related to Criminal Justice: law enforcement, corrections, probation and parole, administration, domestic violence

prevention, mental health, and other community-based programs that exist for victims, offenders, and their families.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Employ theories, policies, and practices of criminal justice to analyze contemporary societal issues through psychosocial, cultural, ethical, and political lenses.
- Integrate relevant legal statutes, codes of ethics, and established ethical decision-making models to justify courses of action in professional criminal justice settings.
- Critically interpret criminal justice-related information, such as research findings, case files, and reports, and convey their meaning and implications to diverse audiences.
- Develop evidence-based recommendations for discipline-specific policy or practice through analysis of the structures and functions of the criminal justice system and the constitutional principles that guide their operation.

Criminal Justice Minor

https://www.unh.edu/program/minor/criminal-justice

Description

This minor explores the roles of law enforcement, corrections, and criminals within the U.S. criminal justice system. Students will gain a foundational understanding of the theories and practices of individuals in each aspect of the criminal justice system.

NOTE: This minor may not be declared with the following majors: BS Criminal Justice.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Develop sufficient understanding of adult learner behaviors and capacities to enable the student to respond effectively to possible professional scenarios.

- Apply knowledge of adult development and learning to solving problems in the context of the student's professional field.
- Ask critical questions about information and research in the field.

Applied Studies Major: Education and Training Option (B.S.)

https://www.unh.edu/program/bachelor-science/applied-studies-education-training

Description

This option is designed for students with an area of technical or other specific expertise who wish to train or teach adults. Courses in this option focus on adult learning and the theory and practice of teaching adults. An Associate Degree in an applied field from a regionally accredited college or the equivalent is the required foundation for this program.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

- Communicate effectively, both in writing and verbally, with families, children, co-workers and stakeholders in Early Childhood settings.

Early Childhood Development (B.S.)

https://www.unh.edu/program/bachelor-science/early-childhood-development

Description

This program is designed for individuals seeking career options in early childhood care settings. Courses in this program prepare individuals to be qualified early childhood education and childcare providers. This major offers a model curriculum which addresses standards set by the National Association for the Education of Young Children. The completion of this degree qualifies individuals for the Early Childhood credential through the New Hampshire Child Development Bureau, Department of Health and Human Services. This degree does not lead to public school teacher licensure through the Department of Education.

Total Credits		**40**

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

Student Learning Outcomes

Program Learning Outcomes

- Create inclusive, nurturing, and culturally responsive learning environments aligned with the developmentally appropriate practices framework.
- Analyze strategies for building and sustaining respectful, reciprocal partnerships with families and communities.
- Compare and analyze various assessment strategies to understand and support each child's development and learning, inform instruction, and engage families in the assessment process.
- Plan, implement, and evaluate equitable, engaging curriculum and teaching practices that promote progress across developmental domains and reflect children's diverse needs, interests, and cultural contexts.
- Integrate knowledge of academic content areas (language, literacy, math, science, social studies, arts, physical development) into meaningful, interdisciplinary learning experiences for young children.
- Plan for continuous professional development in the field of early childhood education to create equitable, high quality learning experiences for birth to age 8 children.

Early Childhood Development Minor

https://www.unh.edu/program/minor/early-childhood-development

Description

The Early Childhood Development minor is designed for individuals seeking to supplement non-education degrees with courses that may be applied towards DHHS credentialing in early childhood. Courses in this minor model curriculum standards set forth by the National Association for the Education of Young Children.

NOTE: This minor may not be declared with the following majors: BS Early Childhood Development or BS Early Childhood Education with Teacher Certification in Early Childhood Education and Early Childhood Special Education.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits
Required Courses		
EDC 501	Foundations of Early Childhood Education	4
EDC 601	Positive Behavior Guidance in Early Childhood Education	4
EDC 606	Young Children with Exceptionalities in Early Childhood Settings	4
EDC 712	Observation and Assessment in Early Childhood Education	4
PSY 470	Child Development	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Develop knowledge and skills in promoting child development with an understanding and application of developmentally appropriate practice.
- Apply knowledge and skills to develop, implement, and evaluate meaningful curriculum for all children.

Early Childhood Education / Early Childhood Education and Early Childhood Special Education (B.S.)

https://www.unh.edu/program/bachelor-science/early-childhood-education

Description

Individuals who complete this dual licensure program will be eligible for the New Hampshire Department of Education teacher licensure in Early Childhood (N-3) and Early Childhood Special Education (Birth-Age 8). Additionally, completion of this degree qualifies individuals for the New Hampshire Child Development Bureau, New Hampshire Department of Health and Human Services Credential. The Early Childhood license will prepare individuals to teach children in public schools beginning at the nursery school level to Grade 3, and Early Childhood Special Education license will prepare individuals to work with infants, toddlers and children who are at risk of being identified as needing special education services or who are already identified as needing special education services.

This program is for qualified participants working or volunteering in approved programs or education settings. The key components of this program include mentorship of the teacher candidates by highly skilled professionals, the hands-on experience of working with children in educational settings, and the opportunity to build your teaching capacity over time. Graduates of this program will be eligible for licensure and highly qualified in both early childhood and early childhood special education.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

Student Learning Outcomes

Program Learning Outcomes

- Develop a working understanding of current brain research and its implications for teaching and learning.
- Develop the skills to access and utilize technology as a tool to empower teaching and learning.
- Develop a solid understanding of the utilization of formative and summative assessment for program design, monitoring student progress and evaluating teaching effectiveness.
- Work with colleagues to observe, analyze and provide feedback on student progress and teaching effectiveness.
- Utilize research methods and materials, pedagogies and assessment strategies to teach for understanding and application specific to content area.

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

A **minimum GPA of 3.0** is required for state licensure.

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

or EDC 733	Middle Level Mathematics Methods	
EDC 798	Culminating Teaching Experience and Seminar	4
Total Credits		**85**

[1] Required prior to beginning the last 60 credits of degree program

[2] Passing BASA scores must be submitted prior to taking EDC 700 Introduction to Clinical Experience

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

State Licensure Requirements

The following requirements must be completed in order to be recommended to the state for teacher licensure:

- A **minimum GPA of 3.0** is required for state licensure.
- **Basic Academic Skills Assessment (BASA): Pearson Essential Academic Skills or Praxis Core Academic Skills For Educators Exam** required. Passing BASA Exam scores must be submitted prior to taking EDC 700 Introduction to Clinical Experience.
- **Licensure Exams: Pearson Special Education, Pearson Foundations of Reading, and Pearson General Curriculum Subtests I and II.**

Candidates who qualify for K-8 licensure must also complete a Middle School Content Exam and 15 content area credits.

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate

students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Develop a working understanding of current brain research and its implications for teaching and learning.
- Develop the skills to access and utilize technology as a tool to empower teaching and learning.
- Develop a solid understanding of the utilization of formative and summative assessment for program design, monitoring student progress and evaluating teaching effectiveness.
- Work with colleagues to observe, analyze and provide feedback on student progress and teaching effectiveness.
- Utilize research methods and materials, pedagogies and assessment strategies to teach for understanding and application specific to content area.
- Apply content knowledge to develop PK-12 students' skills in reading, writing, and critical thinking.
- Identify and explore connections between content areas and teaching methodologies.
- Create learning experiences to foster PK-12 students' independent, collaborative, and creative problem-solving skills.
- Devise strategies to facilitate mastery of course content using technology.

Disclosures

English Language Arts/Elementary Education and General Special Education (B.S.)

Location/Delivery: College of Professional Studies [Online Program]

This program is designed to prepare graduates for professional licensure/certification as follows:

Teacher Licensure

Elementary Education (K-5 or K-8) and General Special Education (ages 5-22)

*The University of New Hampshire has determined this program **meets** the educational requirements for licensure/certification in:*[1]
Maine, Massachusetts, New Hampshire, Vermont

Additional information and related resources are available on the Registrar's Office website.

[1] State specific post-education requirements are subject to change. Students are responsible for confirming these requirements in their state of residence and intended practice.

English Language Arts / General Special Education (B.S.)

https://www.unh.edu/program/bachelor-science/english-language-arts-general-special-education

Description

Individuals who complete this program will be eligible for the New Hampshire Department of Education teacher licensure in General Special Education (ages 5-22). The program aligns with the NH Department of Education's standards for teacher credentialing.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

A **minimum GPA of 3.0** is required for state licensure.

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

Code	Title	Credits
Major in Math Studies, General Special Education		
MTH 510	Pre-Calculus	4
MTH 701	Probability and Statistics	4
MTH 702	Mathematical Proof	4
MTH 703	Number Systems	4
MTH 704	Geometric Structures	4

EDC 721	Assessment of Students with Disabilities	4
Advanced Level Education Courses		
EDC 723	Teaching Language Arts and Literacy	6
EDC 798	Culminating Teaching Experience and Seminar	4
Total Credits		**69**

1 Required prior to beginning the last 60 credits of degree program
2 Passing BASA scores must be submitted prior to taking EDC 700 Introduction to Clinical Experience

State Licensure Requirements

The following requirements must be completed in order to be recommended to the state for teacher licensure:

- A **minimum GPA of 3.0** is required for state licensure
- **Basic Academic Skills Assessment (BASA): Pearson Essential Academic Skills or Praxis Core Academic Skills For Educators Exam** required. Passing BASA Exam scores must be submitted prior to taking EDC 700 Introduction to Clinical Experience.
- **Licensure Exams: Pearson Special Education and Pearson Foundations of Reading** exams required. Students must attempt to pass these exams prior to taking the Culminating Teaching Experience & Seminar. Passing exam scores are required for state licensure.

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Develop a working understanding of current brain research and its implications for teaching and learning.
- Develop the skills to access and utilize technology as a tool to empower teaching and learning.
- Develop a solid understanding of the utilization of formative and summative assessment for program design, monitoring student progress and evaluating teaching effectiveness.
- Work with colleagues to observe, analyze and provide feedback on student progress and teaching effectiveness.
- Utilize research methods and materials, pedagogies and assessment strategies to teach for understanding and application specific to content area.

Disclosures

Math Studies/General Special Education (B.S.)

Location/Delivery: College of Professional Studies [Online Program]

This program is designed to prepare graduates for professional licensure/certification as follows:

Teacher Licensure
General Special Education (ages 5-22)

*The University of New Hampshire has determined this program **meets** the educational requirements for licensure/certification in:*[1]
Maine, Massachusetts, New Hampshire, Vermont

Additional information and related resources are available on the Registrar's Office website.

[1] State specific post-education requirements are subject to change. Students are responsible for confirming these requirements in their state of residence and intended practice.

Math Studies, Middle Level (B.S.)

https://www.unh.edu/program/bachelor-science/math-studies-middle-level

Description

Individuals who complete this program will be eligible for the New Hampshire Department of Education teacher licensure in Mathematics (Middle Level).

This program is for qualified participants working or volunteering in approved programs or education settings. The key components of this program include mentorship of the teacher candidates by highly skilled professionals, the hands-on experience of working with children in educational settings, and the opportunity to build your teaching capacity over time. Graduates of this program will be eligible for licensure and highly qualified in mathematics, middle level.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Develop a working understanding of current brain research and its implications for teaching and learning.
- Develop the skills to access and utilize technology as a tool to empower teaching and learning.
- Develop a solid understanding of the utilization of formative and summative assessment for program design, monitoring student progress and evaluating teaching effectiveness.
- Work with colleagues to observe, analyze and provide feedback on student progress and teaching effectiveness.
- Utilize research methods and materials, pedagogies and assessment strategies to teach for understanding and application specific to content area.

Disclosures

Math Studies/Mathematics Upper Level (B.S.)

Location/Delivery: College of Professional Studies [Online Program]

This program is designed to prepare graduates for professional licensure/certification as follows:

Teacher Licensure

Mathematics (Upper Level)

*The University of New Hampshire has determined this program **meets** the educational requirements for licensure/certification in:*[1]

Maine, Massachusetts, New Hampshire, Vermont

Additional information and related resources are available on the Registrar's Office website.

[1] State specific post-education requirements are subject to change. Students are responsible for confirming these requirements in their state of residence and intended practice.

Social Studies / Elementary Education / General Special Education (B.S.)

https://www.unh.edu/program/bachelor-science/social-studies-elementary-education-general-special-education

Description

Individuals who complete this dual licensure program will be eligible for the New Hampshire Department of Education teacher licensure in Elementary Education (K-6) and General Special Education (ages 5-22).

This program is for qualified participants working or volunteering in approved programs or education settings. The key components of this program include mentorship of the teacher candidates by highly skilled professionals, the hands-on experience of working with children in educational settings, and the opportunity to build your teaching capacity over time. Graduates of this program will be eligible for licensure in elementary education and general special education. Additionally, graduates of this program will be highly qualified in elementary education.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

A **minimum GPA of 3.0** is required for state licensure.

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

[1] Required prior to beginning the last 60 credits of degree program
[2] Passing BASA scores must be submitted prior to taking EDC 700 Introduction to Clinical Experience

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

State Licensure Requirements

The following requirements must be completed in order to be recommended to the state for teacher licensure:

- A **minimum GPA of 3.0** is required for state licensure.
- **Basic Academic Skills Assessment (BASA): Pearson Essential Academic Skills or Praxis Core Academic Skills For Educators exam** required. Passing BASA exam scores must be submitted prior to taking EDC 700 Introduction to Clinical Experience.
- **Licensure Exams:** Students must attempt to pass licensure exams prior to taking the Culminating Teaching Experience & Seminar. Passing exam scores are required for state licensure.
  - **Pearson Foundations of Reading Exam**
  - **Pearson Special Education Exam**
  - **Pearson General Curriculum Subtests I and II**
  - ***K-8 Licensure: Middle Grades Social Sciences Exam** (plus 15 content area credits)

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Attain proficiency in the concepts, theories, and methods of inquiry pertinent to allied health leadership.
- Develop essential competencies in organizational management, including skills for inter-professional collaboration.
- Integrate knowledge of an allied health care field with the dynamics and complexity of the health care industry.
- Apply ethical principles that guide leadership practice in community care settings.
- Demonstrate strategies to incorporate a variety of cultural frameworks into allied health practice.
- Understand data gathering tools for analysis and decision-making in health care settings.

Communication Sciences and Disorders (A.S.)

https://www.unh.edu/program/associate-science/communication-sciences-disorders

Description

The Associate in Science in Communication Sciences and Disorders offers an intensive course of study in the area of speech and language disorders, including supervised field experience in a variety of settings. Upon completion of the Associate in Science in Communication Sciences and Disorders degree program, the graduate is eligible to apply for certification as a Speech Language Pathology Assistant to the New Hampshire Allied Health Speech Language Pathology Governing Board. The program is designed to meet guidelines of the American Speech-Language-Hearing Association. Speech Language Pathology Assistant courses are also available without the Associate in Science degree for those not seeking certification.

If you reside in another state, please check with the appropriate agency to determine if this program meets requirements in that state.

Requirements

Degree Requirements

Minimum Credit Requirement: 60 credits

Minimum Residency Requirement: 16 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: General Education Program

Major, Option, and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of one course overlap between the Major and General Education areas.

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Gain knowledge, field experience, and core technical skills within the field of speech language pathology assisting.
- Meet professional standards in keeping with state and national guidelines for competency and ethics.

Disclosures

Communication Sciences and Disorders (A.S.)

Location/Delivery: College of Professional Studies [Online Program]

This program is designed to prepare graduates for professional licensure/certification as follows:

Speech Language Pathology Assistant
New Hampshire Allied Health Speech Language Pathology Governing Board

*The University of New Hampshire has determined this program **meets** the educational requirements for licensure/certification in:*[1]
Maine, Massachusetts, New Hampshire, Vermont

Additional information and related resources are available on the Registrar's Office website.

[1] State specific post-education requirements are subject to change. Students are responsible for confirming these requirements in their state of residence and intended practice.

Health and Wellness Major (B.S.)

https://www.unh.edu/program/bachelor-science/health-wellness

Description

The Bachelor of Science in Health and Wellness focuses on preparing students for opportunities to help people lead healthier lifestyles. The curriculum provides foundational principles related to health coaching, health education, and wellness planning to optimize individual and population health. The program can be paired with a variety of minors to further customize skills and prepare for post-graduate work.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Demonstrate knowledge of health care systems and the organization and integration of clinical and community support services that lead to optimal patient care.
- Assess health care financial models and processes to enhance managerial decision making and organizational performance and to strategically support patients and communities.
- Examine the fundamental rights, ethical principles, and overarching policies that guide health care professionals.
- Evaluate the efficacy of employing information technology tools to improve health care delivery and optimize health outcomes.
- Explore how socio-cultural, familial, and individual perspectives influence the operation, delivery, and use of health care systems.
- Demonstrate competency in communication, interpersonal relations, management, and leadership to support organizational effectiveness and inter-professional collaboration.

Health Care Management Minor

https://www.unh.edu/program/minor/health-care-management

Description

This minor explores significant areas of the dynamic and complex health care industry. This minor provides a solid foundation for health care managers and staff, human resource professionals, and others whose work responsibilities intersect with this growing industry.

NOTE: This minor may not be declared with the following majors: BS Health Care Management or BS Allied Health Leadership.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Code	Title	Credits
Required Courses		
HLTC 550	The Emerging U.S. Health Care System	4
HLTC 590	Introduction to Fiscal Management in Health Care	4
HLTC 690	Law and Ethics for Health Care and Human Services	4

SCI 575	Introduction to Lifestyle Medicine	
SOSC 630	Aspects of Aging and Older Adulthood in a Modern Society	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Apply general management or human resource management skills to realistic situations in the field of health care
- Ask critical questions about information and research in the field of health care.

Nursing Major (B.S.N.) CPSO

https://www.unh.edu/program/bachelor-nursing/nursing

Description

RN to BSN

The mission of the RN to BSN program is to prepare registered nurses to meet the dynamic health care needs of diverse populations in New Hampshire and beyond while working in collaborative, inter-professional and evidence-based practice environments. The program is accredited by Commission on Collegiate Nursing Education.

Additional Admissions Criteria for Full Acceptance to the RN to BSN Program

- **License**: An active RN license issued from the state where the student is currently practicing; and
- **Education**: Graduate from a regionally and nationally accredited nursing program.

Conditional Admissions

Those who have not yet fulfilled the additional criteria can begin as a conditionally admitted student. During this time, you can take the following courses:

- Non-NUR courses
- NUR 600 Enhancing Your Nursing Career

Academic Advisor approval is required for course registration to be processed.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Core Curriculum General Education Requirements-Satisfied with Associate Degree

An applicant with a Bachelor's or Master's Degree in another discipline will be required to take only the 30 credits of nursing courses, in addition to meeting the Writing Intensive requirements. MTH 504 Statistics will be required if not satisfied in transfer.

Major Requirements

A minimum grade of C is required in all Major coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only one overlap being utilized between the Major and Minor.

For CRIT 602, SOCI/SOSC Elective, and IDIS 601: Students who do not achieve a C or better may repeat each course one time only.

For all HLTC and NUR courses: Students are allowed to repeat only one of these required courses. Any other course failures may only be repeated with departmental approval. Subsequent failures will result in dismissal from the nursing program.

A minimum GPA of 2.5 in the major is required.

Prerequisite: Conferred Associate Degree in Nursing Required, Registered Nursing License Required

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

HLTC 720	Health Program Planning and Evaluation	4
SCI 502	Nutrition and Health	4
HLTC 612	Population Health	4
or SCI 550	Wellness and the Human Body	
or SCI 575	Introduction to Lifestyle Medicine	
Select one of the following:		4
HLTC 550	The Emerging U.S. Health Care System	
MTH 504	Statistics	
SCI 604	Principles of Exercise Science	
SCI 610	Contemporary Issues in Personal and Global Health	
SCI 615	Fitness and Health	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Determine the evidence-based best practices that are common to the field of health and wellness.
- Recognize the health-related problems of an individual, a community or agency.
- Apply knowledge of health and wellness concepts to determine interventions that affect behavior change and enhance the overall well-being of an individual or group.

Human Services

- Education Advocacy Minor (p. 577)
- Family Studies Minor (p. 578)
- Human Services Major: Addictions Studies Option (B.S.) (p. 578)
- Human Services Major: Applied Psychology Option (B.S.) (p. 580)
- Human Services Major: Counseling Foundations Option (B.S.) (p. 582)
- Human Services Major: Court Advocacy Option (B.S.) (p. 584)
- Human Services Major: Education Advocacy Option (B.S.) (p. 586)
- Human Services Major: Family Studies Option (B.S.) (p. 588)
- Human Services Major: Wellness and Prevention Option (B.S.) (p. 590)
- Human Services Minor (p. 592)

Education Advocacy Minor

https://www.unh.edu/program/minor/education-advocacy

Description

This minor introduces students to the issues associated with supporting individuals who have specific instructional needs. Students will investigate laws, mechanisms of communication, and specific accommodations associated with education of individuals with needs.

NOTE: This minor may not be declared with the following majors: BS Human Services: Education Advocacy or BS Applied Psychology: Education Advocacy.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
EDC 506		4
or EDC 716	Students with Disabilities	
EDC 601	Positive Behavior Guidance in Early Childhood Education	4
EDC 701	Special Education Law	4
EDC 713	Family and Community Relations in Early Childhood Education	4

SOSC 610	Multicultural Perspectives in Education	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Identify the instructional needs of individuals based on culture, race, ethnicity, or disability.
- Communicate possible accommodations.

Family Studies Minor

https://www.unh.edu/program/minor/family-studies

Description

This minor explores evolving family structures in contemporary American society.

NOTE: This minor may not be declared with the following majors: BS Human Services: Family Studies or BS Applied Psychology: Family Studies.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
PSY 470	Child Development	4
or PSY 480	Infant and Toddler Development	
PSY 630	Psychology of Adulthood	4
or SOSC 630	Aspects of Aging and Older Adulthood in a Modern Society	
SOSC 680	Stress and the Family	4
or SOSC 675	Dynamics of Family Relationships	
SOCI 675	Child Abuse and Neglect	4
or PSY 646	Psychology of Occupational Stress	
SOSC 710	Social Stratification and Inequality	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Develop a foundation of knowledge related to evolving and diverse familial structures within the American Society.
- Apply knowledge of relationship dynamics to social, human service, or psychological professional contexts.

Human Services Major: Addictions Studies Option (B.S.)

https://www.unh.edu/program/bachelor-science/human-services-addictions-studies

Description

The Bachelor of Science in Human Services is designed for students with career interests in human services. This program offers graduates the opportunity to provide access to assistance programs, offer support, and improve the quality of life for those in need while working with individuals and the community at both the local and state level. The addictions studies option introduces students to the issues associated with supporting people involved with addictive behaviors.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		

One Writing Intensive course at the 600-level or above	
One Additional Writing Intensive Course	

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

Prior to capstone enrollment, students are expected to complete all General Education program requirements. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Refer to the Degree Plan for a sample course sequence. Academic Advisor approval is required for registration to be processed.

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

- Differentiate and critically analyze the concepts, theories, and methods of inquiry pertinent to human services.
- Apply the concepts, theories, and methods of human services.
- Apply ethical principles that inform and guide practice in human services and relevant subfields.
- Communicate in multiple modalities the needs of a diversity of client populations.

Human Services Major: Education Advocacy Option (B.S.)

https://www.unh.edu/program/bachelor-science/human-services-education-advocacy

Description

The Bachelor of Science in Human Services is designed for students with career interests in human services. This program offers graduates the opportunity to provide access to assistance programs, offer support, and improve the quality of life for those in need while working with individuals and the community at both the local and state level. The education advocacy option introduces students to the issues associated with supporting individuals who have specific instructional needs.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

https://www.unh.edu/program/minor/human-services

Description

This minor enables a student to examine the organization and delivery of a wide range of human services and professions. Focus areas include ethical practice, intervention approaches, and skill development and theory that students can apply in support roles in a variety of social service and health care agencies.

Note: This minor may not be declared with the following majors: B.S. in Applied Psychology: Human Services or B.S. in Human Services (all options).

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
HMSV 424	Human Services and the Helping Process	4
HLTC 690	Law and Ethics for Health Care and Human Services	4
SOSC 710	Social Stratification and Inequality	4
Select one of the following:		4
COM 460	Interpersonal Communication and Group Dynamics	
HRM 635	Managing Conflict	
PSY 654	Counseling Theories	
Select one of the following:		4
PSY 525	Human Development	
SOSC 675	Dynamics of Family Relationships	
MGMT 566	Organizational Behavior	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Develop knowledge of a diverse array of psychological and social theories, approaches and practices.
- Apply knowledge of human and social behaviors across social and health care professional settings.
- Ask critical questions about information and research in the field of Human Services.

Liberal Arts, Communication, and General Education

Liberal Arts, Communication, and General Education programs include degrees related to the humanities, communication, and individualized studies and is the hub for the college's unique general education program. These programs are built upon a broad-based, flexible, liberal arts core that develops professional and critical thinking skills.

- Digital Communication Design Major: Digital Marketing Option (B.S.) (p. 593)
- Digital Communication Design Major: Graphic Design Option (B.S.) (p. 595)
- General Studies (A.A.) CPSO (p. 597)
- Graphic Design Minor (p. 598)
- Historical Studies Major (B.A.) (p. 598)
- Historical Studies Minor (p. 601)
- Individualized Studies Major: Behavioral and Social Sciences Option (B.S.) (p. 601)
- Individualized Studies Major: Business and Finance Option (B.S.) (p. 602)
- Individualized Studies Major: Health and Human Services Option (B.S.) (p. 603)
- Individualized Studies Major: Humanities Option (B.A.) (p. 604)
- Individualized Studies Major: Management Option (B.S.) (p. 606)
- Individualized Studies Major: Media and Communication Option (B.S.) (p. 607)
- Individualized Studies Major: Public Safety Option (B.S.) (p. 608)
- Interpersonal and Organizational Communication Minor (p. 609)
- Professional Communication Major: Business and Strategic Communication Option (B.S.) (p. 610)
- Professional Communication Major: Interpersonal and Organizational Communication Option (B.S.) (p. 612)
- Professional Communication Major: Visual Communication and Social Media Option (B.S.) (p. 614)
- Visual Communication and Social Media Minor (p. 616)

Business and Strategic Communication Minor

https://www.unh.edu/program/minor/business-strategic-communication

Description

The minor in Business and Strategic Communication focuses specifically on communication that is external to businesses and organizations. Extensive consideration is given to an organization's image: how to define it, promote it, enhance it, and manage it in times of crisis. However, because a solid external image is predicated upon sound internal structure and communication, the "business communication" component

of this minor encompasses topics such as: managerial communication, presentations, and leadership.

NOTE: This minor may not be declared with the following majors: BS Professional Communication: Business and Strategic Communication.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Code	Title	Credits
Required Courses		
COM 590	Professional Communication	4
COM 710	Managerial Communication	4
COM 765W	Strategic Communication	4
MGMT 566	Organizational Behavior	4
LD 600	Becoming an Effective Leader	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Assess the profound impact of an organization's external image upon its current reputation and future success.
- Analyze strategies by which organizations establish, promote, and maintain their external image.
- Identify strategies by which organizations manage their image in times of crisis, and how they rebuild it in the aftermath.
- Develop knowledge of managerial communication in the areas of leadership, direction, and meetings.

Digital Communication Design Major: Digital Marketing Option (B.S.)

https://www.unh.edu/program/bachelor-science/digital-communication-design-digital-marketing

Description

The Bachelor of Science in Digital Communication Design prepares students for the expanding fields of digital communication and social media as used in business and the public sphere to market products, establish brands, enhance an organization's presence in the public eye, and support the democratization of society. The program integrates technical and creative disciplines through the study of communication modes, media design, marketing fundamentals, and information technology. The B.S. in Digital Communication Design fosters learning that prepares graduates to make a strategic contribution in public and private enterprises that require the ability to convey messages effectively, manage information appropriately, respond to emerging environments, and employ technology strategically in a digital environment.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Express ideas and concepts through the development of digital content.
- Employ industry-standard information design, usability, and accessibility principles throughout the digital communication design process.
- Use optimal composition applications and technologies for specific media and design objectives.
- Develop various process models for digital content creation that reflect project aims, resources, constraints, and other variables.
- Develop methods of communication and content development for individuals, groups, and mass media informed by theories of communication and global culture.
- Develop digital content according to codes of ethics, privacy, conflict, and citizenship.

Digital Communication Design Major: Graphic Design Option (B.S.)

https://www.unh.edu/program/bachelor-science/digital-communication-design-graphic-design-option

Description

The Bachelor of Science in Digital Communication Design prepares students for the expanding fields of digital communication and social media as used in business and the public sphere to market products, establish brands, enhance an organization's presence in the public eye, and support the democratization of society. The program integrates technical and creative disciplines through study of communication modes, media design, marketing fundamentals, and information technology. The B.S. in Digital Communication Design fosters learning that prepares graduates to make a strategic contribution in public and private enterprises that require the ability to convey messages effectively, manage information appropriately, respond to emerging environments, and employ technology strategically in a digital environment.

General Studies (A.A.) CPSO

https://www.unh.edu/program/associate-arts/general-studies

Description

The Associate Degree in General Studies offers a flexible pathway for students with diverse educational backgrounds or schedules. This program allows students to build on prior learning, explore a variety of disciplines, and create a general studies degree that aligns with their personal and career goals. Designed for students who want to explore their academic and professional interests before choosing a specific career path, the program emphasizes critical thinking, communication, and problem-solving skills essential for success in a wide range of fields.

Requirements

Degree Requirements

Minimum Credit Requirement: 60 credits

Student Learning Outcomes

Program Learning Outcomes

- Organize, draft, edit, and revise writing in order to communicate effectively.
- Engage in verbal and/or online interactions with others and use communication skills to influence others.
- Apply quantitative reasoning to real-world problems.
- Think critically to analyze information and craft informed arguments.
- Articulate the key concepts, methodologies, and applications of a concentrated area of academic and/or professional interest.
- Use key elements of career exploration to develop an integrated career and academic plan.
- Practice ways of thinking in and across areas of knowledge.

Graphic Design Minor

https://www.unh.edu/program/minor/graphic-design

Description

The minor in Graphic Design enables students to develop and enhance creative and critical thinking in the field of graphic design. Students apply technical skills to transform ideas into a variety of media and utilize visual communication to meet specific needs. The Graphic Design minor complements a variety of disciplines, as it pairs well with professional communication, marketing, and digital media.

NOTE: This minor may not be declared with the following major: BS Digital Communication Design: Graphic Design.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

COM 545	Digital Illustration	4
COM 665	Media and Strategic Communication	4
COM 645	Advanced Digital Illustration	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Visualize appropriate concepts for projects targeted toward a specific purpose and audience.
- Plan and research successful design solutions that meet established needs and deadlines.
- Create, present, and clearly communicate the purpose and rationale for completed design projects.
- Apply learned digital software skill to solve visual design problems.
- Evaluate and constructively critique projects throughout the design process.

Historical Studies Major (B.A.)

https://www.unh.edu/program/bachelor-arts/historical-studies

Description

The Bachelor of Arts degree in Historical Studies hones the skills of critical thinking, analytical reading, effective writing, and information synthesis. The B.A. in Historical Studies provides a sound foundation for a variety of careers and generalizes well to a range of industries. The degree also provides the necessary background for further study for those seeking a graduate degree in history or historic preservation, or in a closely related field such as law or political science.

Requirements

Degree Requirements

or HIS 602	History of New England	
or HIS 718	History of World War II	
or HIS 727	Vietnam War: An Historical Perspective	
or POL 690	The US in World Affairs	
Integrative Capstone		
HIS 795	Integrative Capstone: Internship in History	4
or HIS 797	Integrative: Project in History	
Total Credits		**48**

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

* The Bachelor of Arts degree requires proficiency in a foreign language. This requirement may be fulfilled by completing the equivalent of a full-year elementary-level course in a language not previously studied, or by completing the equivalent of a semester of a course in a foreign language at the intermediate or higher level, or by earning credit through an approved Advanced Placement or College Board foreign language achievement test (minimum scores vary). The proficiency in a foreign language requirement must be satisfied by the end of the sophomore year. No credit is awarded for elementary year college coursework if the student has had two or more years of that language in high school. It is strongly advised that students check with academic departments to identify department-advised specific foreign language proficiency options.
  Note: A student with a documented disability who wishes accommodation on the basis that the disability will prevent them from

successfully mastering a foreign language requirement, or whose foreign language requirement was waived in high school because of a documented disability, must contact Student Accessibility Services, Smith Hall, (603) 862-2607 (Voice/TDD).

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Sample Course Sequence

First Year		
Fall		**Credits**

Student Learning Outcomes

Program Learning Outcomes

- Appraise and contextualize information in order to convey both the particularity of past lives and the scale of human experience.
- Evaluate the multiple causes of complex events and phenomena using a multitude of sources and perspectives.
- Analyze U.S. history from the period of native peoples through the present.
- Explore world history, emphasizing major trends that influenced multiple nations and regions.

- Investigate the contributions and experiences of diverse peoples to national and world events.
- Craft well-supported historical narratives, arguments, and reports of research findings in a variety of media using discipline-specific writing and citation conventions.

Historical Studies Minor

https://www.unh.edu/program/minor/historical-studies

Description

The minor in historical studies is designed to provide an overview of world history, including the study of U.S. history in greater depth. The courses provide students with a foundation in historical research, evaluation of sources, the diversity of human experience, and the opportunity to explore modern society from the context of the past.

NOTE: This minor may not be declared with the following major: BA Historical Studies.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
HIS 590	Historical Methods	4
HIS 611	Themes in World History	4
Select two of the following:		8
HIS 402	Great Civilizations	
HIS 410	United States History to 1865	
HIS 411	United States History: 1865 to the Present	
HIS 512	European History: Renaissance through the Industrial Revolution	
POL 450	American Government and Politics	
Select one of the following:		4
HIS 602	History of New England	
HIS 718	History of World War II	
HIS 727	Vietnam War: An Historical Perspective	
POL 690	The US in World Affairs	
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Demonstrate a breadth of knowledge in world history.
- Articulate key patterns of social, cultural, and political change.
- Accurately apply all of the techniques in historical methods, source evaluation, and written analysis.
- Appraise and contextualize information in order to convey both the particularity of past lives and the scale of human experience.
- Craft well-supported historical research using discipline-specific writing and citation conventions.

Individualized Studies Major: Behavioral and Social Sciences Option (B.S.)

https://www.unh.edu/program/bachelor-science/individualized-studies-behavioral-social-sciences

Description

The Bachelor of Science (B.S.) in Individualized Studies provides an opportunity for interdisciplinary or specialized study in the following focus areas: Behavioral & Social Sciences, Business & Finance, Health & Human Services, Management, Media & Communication, and Public Safety.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Code	Title	Credits
ENG 420	The Writing Process	4
COM 460	Interpersonal Communication and Group Dynamics	4
COM 480	Visual Communication	4
CRIT 501	Introduction to Critical Inquiry	4
Select one of the following:		4
MTH 402	Math for Our World	
MTH 504	Statistics	
MTH 510	Pre-Calculus	
Knowledge of Human Behavior & Social Systems (p. 34)		4
Knowledge of the Physical & Natural World (p. 34)		4
Knowledge of Human Thought & Expression (p. 34)		4
CRIT 602	Advanced Critical Analysis and Strategic Thinking	4

IDIS 601A	Interdisciplinary Seminar: Being Happy	4
or IDIS 601B	Interdisciplinary Seminar: Business of Beer	
or IDIS 601C	Interdisciplinary Seminar: Paranormal Activities	
Total Credits		**40**

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

Major Requirements: A minimum of 40 semester credit hours is required in the major with at least sixteen credits at the upper level taken at the University of New Hampshire.

The IS degree provides a path for students who wish to build a major that combines various courses into a distinct area of study. The IS major must be distinct from any existing program offered at CPSO. Courses in the major must provide breadth and depth of study and form a cohesive program. Students will work closely with advisors and program directors to ensure their major has both academic rigor and alignment with their career and educational goals. Prospective Individualized Studies students must submit a proposal after consulting with their advisor and program director and will need to be approved by the appropriate subject matter faculty and director.

Prior to capstone enrollment, students are expected to complete the majority of their required major courses along with CRIT 602 Advanced Critical Analysis and Strategic Thinking and IDIS 601 . Students should consult with their advisor regarding specific major courses that may be completed with their capstone. Academic Advisor approval is required for registration to be processed.

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

Degree Plan

The **Individualized Studies (IS) Degree** is designed for self-directed students who seek to pursue a unique course of study not available through existing degree programs at UNH-CPSO. This flexible and customizable major allows students to tailor their academic journey to focus on a specific issue or topic in-depth, rather than following a traditional program.

Student Learning Outcomes

Program Learning Outcomes

- Synthesize personal, professional, and scholarly interests into a coherent individualized program of study composed of a full range of foundational knowledge through upper-level professional practice and scholarly inquiry.
- Use research and analytical methods to substantiate proficiency in the knowledge and skills of a coherent area of study.
- Analyze complex problems and deliver evidence-based solutions using a domain-specific or interdisciplinary approach.
- Evaluate academic progression according to programmatic standards for academic performance and disciplinary expertise.

Individualized Studies Major: Business and Finance Option (B.S.)

https://www.unh.edu/program/bachelor-science/individualized-studies-business-finance

Students will work closely with advisors and program directors to ensure their major has both academic rigor and alignment with their career and educational goals. Prospective Individualized Studies students must submit a proposal after consulting with their advisor and program director and will need to be approved by the appropriate subject matter faculty and director.

Prior to capstone enrollment, students are expected to complete the majority of their required major courses along with CRIT 602 Advanced Critical Analysis and Strategic Thinking and IDIS 601 . Students should consult with their advisor regarding specific major courses that may be

completed with their capstone. Academic Advisor approval is required for registration to be processed.

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

Degree Plan

The **Individualized Studies (IS) Degree** is designed for self-directed students who seek to pursue a unique course of study not available through existing degree programs at UNH-CPSO. This flexible and customizable major allows students to tailor their academic journey to focus on a specific issue or topic in-depth, rather than following a traditional program.

Student Learning Outcomes

Program Learning Outcomes

- Synthesize personal, professional, and scholarly interests into a coherent individualized program of study composed of a full range of foundational knowledge through upper-level professional practice and scholarly inquiry.
- Use research and analytical methods to substantiate proficiency in the knowledge and skills of a coherent area of study.
- Analyze complex problems and deliver evidence-based solutions using a domain-specific or interdisciplinary approach.
- Evaluate academic progression according to programmatic standards for academic performance and disciplinary expertise.

Individualized Studies Major: Media and Communication Option (B.S.)

https://www.unh.edu/program/bachelor-science/individualized-studies-media-communication

Description

The Bachelor of Science (B.S.) in Individualized Studies provides an opportunity for interdisciplinary or specialized study in the following focus areas: Behavioral & Social Sciences, Business & Finance, Health & Human Services, Management, Media & Communication, and Public Safety.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Code	Title	Credits
ENG 420	The Writing Process	4

or IDIS 601B	Interdisciplinary Seminar: Business of Beer	
or IDIS 601C	Interdisciplinary Seminar: Paranormal Activities	
Total Credits		**40**

Writing Program Requirements

All bachelor's degree candidates are required to complete four writing intensive courses as part of the University Writing Program Requirements as follows:

Code	Title	Credits
ENG 420	The Writing Process	
One Writing Intensive course in the Major		
One Writing Intensive course at the 600-level or above		
One Additional Writing Intensive Course		

Writing Intensive courses are identified with the label "Writing Intensive Course" in the "Attributes" section of the course description and/or a W following the course number.

Major Requirements

A minimum of 40 semester credit hours is required in the major with at least sixteen credits at the upper level taken at the University of New Hampshire.

The IS degree provides a path for students who wish to build a major that combines various courses into a distinct area of study. The IS major

must be distinct from any existing program offered at CPSO. Courses in the major must provide breadth and depth of study and form a cohesive program. Students will work closely with advisors and program directors to ensure their major has both academic rigor and alignment with their career and educational goals. Prospective Individualized Studies students must submit a proposal after consulting with their advisor and program director and will need to be approved by the appropriate subject matter faculty and director.

Prior to capstone enrollment, students are expected to complete the majority of their required major courses along with CRIT 602 Advanced Critical Analysis and Strategic Thinking and IDIS 601 . Interpersonal and Organizational Communication Minor

https://www.unh.edu/program/minor/interpersonal-organizational-communication

Description

The minor in Interpersonal and Organizational Communication focuses specifically on communication that is internal to organizations. Students will survey theories of organizational communication, and explore key internal responsibilities and challenges that all organizations face, including: team dynamics, diversity, conflict, privacy, identifying and inspiring talent, and defining and achieving goals, among others. This minor is interdisciplinary in that the topics covered traverse many areas of study.

Note: This minor may not be declared with the following major: B.S. Professional Communication: Interpersonal and Organizational Communication.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
COM 560	Intercultural Communication	2
COM 562	Gender and Communication	2
COM 590	Professional Communication	4
COM 675	Organizational Communication	4
HRM 580	Change Management	4
MGMT 566	Organizational Behavior	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Identify the foundational theories of organizational communication.
- Assess challenges common to organizations, including conflict, stasis, and privacy, and devise actionable steps toward resolution.
- Explore strategies to enhance the internal workings of organizations from the perspectives of various stakeholders.

Professional Communication Major: Business and Strategic Communication Option (B.S.)

https://www.unh.edu/program/bachelor-science/professional-communication-business-strategic-communication

Description

The Bachelor of Science in Professional Communication hones the skills of analytical thinking, compelling writing, effective persuasion, and clear expression to prepare graduates to work in an information-based economy and to be engaged citizens of a media-driven culture. The major is well-suited to students interested in careers or further studies in such areas as public relations, public service, nonprofit advocacy, and corporate communications. Courses provide students the opportunity to study fundamental theory and multiple sectors of practice in the discipline of communication and to prepare to contribute to public and private enterprises that consistently need to convey messages effectively, manage information appropriately, and respond ethically and effectively to opportunities and to crises.

Requirements

Student Learning Outcomes

Program Learning Outcomes

- Survey foundational theories of communication relating to individuals, groups, and mass media.
- Create and deploy distinct messages suited to specific audiences and situations, in written, verbal, and digital formats.
- Compose, design, and deliver targeted and engaging presentations.
- Identify and respond to complex communication practices and challenges within organizations, and effect strategic improvements thereto.
- Analyze and critique rhetorical strategies and communication methods specific to cultural and industry norms.
- Employ an understanding of the impact of cultural differences on communication in a global context.

- Integrate individual reflection on questions of ethics and citizenship, particularly in digital contexts, to include the personal and professional ramifications of netiquette, digital footprint, and digital citizenship.
- Demonstrate aptitude with research methods, both quantitative and qualitative, as these inform and are applied in the field of professional communication.
- Develop specialized knowledge and skill in a specific aspect or professional practice within professional communication.

Student Learning Outcomes

Program Learning Outcomes

- Survey foundational theories of communication relating to individuals, groups, and mass media.

- Create and deploy distinct messages suited to specific audiences and situations, in written, verbal, and digital formats.
- Compose, design, and deliver targeted and engaging presentations.
- Identify and respond to complex communication practices and challenges within organizations, and effect strategic improvements thereto.
- Analyze and critique rhetorical strategies and communication methods specific to cultural and industry norms.
- Employ an understanding of the impact of cultural differences on communication in a global context.
- Integrate individual reflection on questions of ethics and citizenship, particularly in digital contexts, to include the personal and professional ramifications of netiquette, digital footprint, and digital citizenship.
- Demonstrate aptitude with research methods, both quantitative and qualitative, as these inform and are applied in the field of professional communication.
- Develop specialized knowledge and skill in a specific aspect or professional practice within professional communication.

Visual Communication and Social Media Minor

https://www.unh.edu/program/minor/visual-communication-social-media

Description

The minor in Visual Communication and Social Media enables students to refine their skills in creating, analyzing, and deploying visual communication. Students will be challenged to think critically about the capacity for visual communication to transcend traditional modes, such as written and verbal communication, while carefully considering how to effectively align the mode of communication with message and audience. Particular emphasis is given to the intersection of visual communication with the fields of marketing and advertising.

Note: This minor may not be declared with the following major: B.S. Professional Communication: Visual Communication & Social Media.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits
COM 504	Web Development I	4
COM 670	Advanced Visual Communication	4
COM 680	Trends in Digital and Social Media	4
MKT 600	Social Media Marketing	4
MKT 720	Digital Advertising	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Develop the ability to lead and manage in the public interest.
- Participate in, and contribute to, the policy process.
- Articulate, apply, and advance a public service perspective.

Nonprofit and Public Sector Management

- Fire Service Administration Major (B.S.) (p. 616)
- Nonprofit Management Minor (p. 618)
- Public Administration and Policy Minor (p. 618)
- Public Administration Major (B.S.) (p. 619)

Fire Service Administration Major (B.S.)

https://www.unh.edu/program/bachelor-science/fire-service-administration

Description

The Bachelor of Science in Fire Service Administration degree prepares fire service professionals with the leadership, management, and administrative knowledge and skills essential to advance in the fire service field. The program integrates knowledge and skills necessary to mitigate the ethical, moral, social, and situational challenges of fire and emergency services. Entry into this program requires a conferred Associate Degree in Fire Science or an approved field, and certification as an NFPA 1001 Firefighter II issued by a Pro Board or IFSAC-accredited agency.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are

considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Demonstrate leadership skills and utilize administrative techniques related to the organizational management of fire and emergency services.
- Integrate research, critical thinking, and analytical decision-making skills to address challenges faced in the delivery and execution of modern fire and emergency services.
- Apply principles of ethics to evaluate fire and emergency services moral and social issues and make principle-based decisions.
- Identify and prioritize public safety threats and hazards and develop fire and emergency service community risk reduction plans.
- Conduct dynamic situational assessments and apply knowledge of risk reduction to develop strategic incident action plans that are consistent with professional standards and best practices to mitigate emergencies or disasters in the community.

Nonprofit Management Minor

https://www.unh.edu/program/minor/nonprofit-management

Description

The minor in nonprofit management provides a comprehensive view of not-for-profit organizations. The topics discussed in the minor revenue streams, development, and fundraising.

NOTE: This minor may not be declared with the following major: BS Business Management: Nonprofit Management.

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Minor Requirements

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

- Apply computing principles, programming methodologies, data analysis, and security assessments to design, develop, and optimize secure, effective solutions across diverse computing environments.
- Apply ethical, legal, and professional standards in the development, security, and management of technology solutions, ensuring compliance with industry best practices.
- Adapt professional communication to convey complex technical concepts to various stakeholder audiences.
- Employ industry-standard teamwork and coordination strategies to collaborate constructively within multidisciplinary teams to develop and deploy computing solutions that address business needs.

Disclosures

Degree type: Applied Bachelor of Science (A.B.S.)

UNH's Applied Bachelor's in Computer Information Technology 90-credit, three-year degree is not equivalent to a traditional, four-year baccalaureate degree. It is an accelerated degree program that some graduate programs, professional schools, and employers may not recognize or accept. Any student who wishes to may, at any time during their course of study, seamlessly transition from the 90-credit, three-year to the 120-credit, four-year Computer Information Technology degree program. UNH's applied bachelor's programs are eligible for Title IV federal financial aid. However, students who leave UNH having completed an applied bachelor's degree but later choose to return to UNH or attend another institution to complete additional undergraduate credits, either to earn a certificate of post-baccalaureate studies or to earn a second bachelor's degree, will not be eligible for federal grant aid and may have limited eligibility for other federal aid programs. Please reach out to UNH CPSO Admissions at 1-855-472-4255 or admissions.cps@unh.edu if you have questions or need additional information.

Computer Information Technology Major: Artificial Intelligence and Machine Learning Option (B.S.)

https://www.unh.edu/program/bachelor-science/computer-information-technology-artificial-intelligence-machine-learning-option

Description

The major in Computer Information Technology focuses on information, its management, and processing within an organization, as well as the application of technology to create, exchange, store, and use information in that context. The focus is on the business use of information and the application of computing technology. Graduates will typically follow career paths as application development programmers, planners, and designers of information systems, as well as information systems managers within organizations. The degree provides versatility through a best practices approach to the core areas of Information Technology.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major,

Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Address the needs of organizational IT challenges using software programming fundamentals, network systems design, machine learning techniques, database management, code libraries, and web-based interface and application development.
- Develop solutions to IT challenges according to process models that align with information technology theories and industry-based strategies.
- Use applied analysis and evaluation strategies to plan, gather information, execute, optimize, and troubleshoot hardware, software, and network systems.
- Assess the needs of IT system end-users and develop strategies to fulfill them through hardware- and software-based design solutions.
- Develop cybersecurity strategies for the legal and ethical use of cryptography to protect IT assets from criminal threats.

Computer Information Technology Major: Cloud Computing Option (B.S.)

https://www.unh.edu/program/bachelor-science/computer-information-technology-cloud-computing

Description

The major in Computer Information Technology (CIT) with an option in Cloud Computing prepares students to design, manage, and optimize secure, scalable cloud environments that support modern IT operations. Through courses in cloud infrastructure, virtualization, security and privacy, financial management, and advanced applications, students gain practical skills in configuring, automating, and troubleshooting multi-cloud and hybrid systems. Emphasis is placed on industry best practices, governance, compliance, and identity management, as well as integrating AI and machine learning solutions within cloud platforms. Graduates of this option are well-equipped for careers such as cloud architect, cloud security specialist, DevOps engineer, or cloud financial manager. They are prepared to help organizations maximize the value of their cloud investments.

- Manage the infrastructure, migration strategies, security measures, financial management, AI leveraging, and performance optimization of virtual environments according to industry-standard cloud computing principles.

Computer Information Technology Major: Cybersecurity Option (B.S.)

https://www.unh.edu/program/bachelor-science/computer-information-technology-cybersecurity

Description

The major in Computer Information Technology (CIT) with an option in Cybersecurity prepares students to protect systems, networks, and data from evolving digital threats. Courses in cryptography, security risk assessment, digital forensics, ethical hacking, and cybersecurity law provide both technical and strategic perspectives on safeguarding information assets. Students gain hands-on experience identifying vulnerabilities, responding to incidents, and applying legal and ethical frameworks that govern the field. Graduates are prepared for roles such as security analyst, security engineer, digital forensics specialist, penetration tester, or compliance officer, ensuring organizations remain resilient against cyberattacks and data breaches.

Computer Information Technology Major: Data Analytics Option (B.S.)

https://www.unh.edu/program/bachelor-science/computer-information-technology-data-analytics

Description

The major in Computer Information Technology (CIT) with an option in Data Analytics prepares students to apply data-driven methods to solve real-world problems and support organizational decision-making. Through courses in data mining, data cleaning, data visualization, advanced analytics, and business intelligence, students develop the technical and analytical skills necessary to manage and interpret complex datasets. Emphasis is placed on using modern tools and technologies to uncover patterns, generate insights, and communicate findings effectively. Graduates are prepared for careers such as data analyst, business intelligence specialist, or data engineer, helping organizations transform raw data into actionable knowledge.

Student Learning Outcomes

Program Learning Outcomes

- Address the needs of organizational IT challenges using software programming fundamentals, network systems design, machine learning techniques, database management, code libraries, and web-based interface and application development.
- Develop solutions to IT challenges according to process models that align with information technology theories and industry-based strategies.
- Use applied analysis and evaluation strategies to plan, gather information, execute, optimize, and troubleshoot hardware, software, and network systems.
- Assess the needs of IT system end-users and develop strategies to fulfill them through hardware- and software-based design solutions.
- Employ a range of technical, statistical, and predictive methods to analyze and communicate quantitative data for business decisions.

Computer Information Technology Major: Software Development Option (B.S.)

https://www.unh.edu/program/bachelor-science/computer-information-technology-software-development

Description

The major in Computer Information Technology (CIT) with an option in Software Development prepares students to design, build, and deploy applications across multiple platforms. Courses in Python, JavaScript, web application development, and mobile application development provide a strong foundation in programming and software engineering practices. Students gain hands-on experience creating functional, user-centered solutions while learning industry-relevant tools and frameworks. Graduates are prepared for careers such as software developer, full-stack developer, application programmer, or web and mobile app developer, equipped with the skills to contribute to innovative software solutions in a variety of organizational settings.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Code	Title	Credits

Electives

Open electives are courses students will need to take in addition to their general education and major requirements in order to satisfy the remaining credit totals for their programs. Open electives are defined as any credit course offered by the College not already included in the student's general education, major, option or minor. Students will need 120 credits total to graduate with a bachelor's degree from the Online Division of the College of Professional Studies.

Degree Plan

This degree plan is a sample and does not reflect the impact of transfer credit or current course offerings. UNH CPS Online undergraduate students should develop individual academic plans with their academic advisor during their first year at UNH.

Student Learning Outcomes

Program Learning Outcomes

- Address the needs of organizational IT challenges using software programming fundamentals, network systems design, machine learning techniques, database management, code libraries, and web-based interface and application development.
- Develop solutions to IT challenges according to process models that align with information technology theories and industry-based strategies.
- Use applied analysis and evaluation strategies to plan, gather information, execute, optimize, and troubleshoot hardware, software, and network systems.
- Assess the needs of IT system end-users and develop strategies to fulfill them through hardware- and software-based design solutions.
- Design, implement, test, and maintain software solutions using industry-standard programming languages, frameworks, and development methodologies, with a focus on creating scalable, secure, and user-centered applications.

Computer Information Technology Minor

https://www.unh.edu/program/minor/computer-information-technology

Description

This minor enables managers at any level to understand and use information technology as a resource to improve an organization's efficiency.

Note: This minor may not be declared with the following majors: B.S.Technology Management or B.S. Computer Information Technology (all options).

Requirements

All minor courses must be completed with a minimum grade of C-, and a 2.0 grade point average must be maintained in courses for the minor. Two courses must be at the upper level (600 or 700). Only 8 credits may overlap between major and minor.

Required Courses

Code	Title	Credits
CMPL 415	Programming Fundamentals	4
CMPL 512	Advanced Software Tools	4
CMPL 614	Computer and Network Systems	4
CMPL 641	Database Management Systems	4
CMPL 642	Systems Analysis and Design	4
Total Credits		**20**

Student Learning Outcomes

Program Learning Outcomes

Students will have the opportunity to:

- Acquire managerial knowledge of informational technology software, hardware and programming.
- Apply technological skills to advance efficiency of professional settings.
- Ask critical questions about information and research in the field of Information Technology.

Technology Management Major (B.S.)

https://www.unh.edu/program/bachelor-science/technology-management

Description

The Technology Management major provides technology proficiency together with the managerial know-how that employers need. With a sound base of knowledge in the core areas of programming, networks, databases, web, and digital media, combined with both fundamental upper-level management courses such as leadership, organizational development, and project management, graduates will be capable of managing technical staff and projects, but will also develop their capacities as strategic leaders who understand changing organizations and can make a contribution even as trends continuously emerge.

Requirements

Degree Requirements

Minimum Credit Requirement: 120 credits

Minimum Residency Requirement: 30 credits must be taken at UNH

Minimum Cumulative GPA: 2.0 is required for conferral*

Core Curriculum Required: General Education Program

Major, Option and Elective Requirements as indicated.

**GPA: Major and any state certification GPA requirements may be higher and are indicated in program details.*

A minimum grade of C- is required in all Major coursework. Some programs may have higher grade requirements for Major coursework as noted in the Major requirements section below. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor, and General Education requirements with only 8 credits overlapped between the Major and Minor. Please note that Option requirements are considered part of the Major. Students must complete 16 upper-level credits in majors within the College of Professional Studies, Online.

General Education Program Requirements

A minimum grade of D- is required in all General Education coursework. Students are allowed a maximum of two course overlaps. Overlaps can be used between Major, Minor and General Education requirements with only 8 credits overlapped between the Major and Minor.

All General Education requirements must be taken prior to the capstone.

Student Learning Outcomes

Program Learning Outcomes

- Demonstrate a sound understanding of fundamental management and accounting practices.
- Possess proficiency in technology, including fundamentals of programming, network systems, databases, and the web.
- Lead teams, manage projects and make decisions effectively.
- Communicate successfully to and with technical and non-technical audiences.
- Engage with emerging trends in the rapidly evolving environments of technology and business, and understand their potential applications and risks.
- Assess the contributions that effective technology management makes to organizational goals and their achievement.
- Apply, integrate, and synthesize competencies gained from technical and management courses to make a strategic contribution to business enterprise.

UNH Manchester

Welcome to the Manchester division of the College of Professional Studies, the university's campus in the heart of the Merrimack Valley. Our mission is to provide the world-class UNH education and degree in the state's business hub.

Here, we capitalize on our location in the revitalized millyard of New Hampshire's largest city. Our campus on the banks of the Merrimack River is a few blocks from the heart of the state's financial and corporate center and home to many of the region's non-profit and government offices. Led by faculty who are experts in their fields, our career-driven programs equip students to succeed in high-demand fields ranging from business to computer science, liberal arts to biotechnology, engineering to language studies.

We are uniquely equipped to support regional economic development, creating a campus environment in which students, faculty, business/industry, government and nonprofits collaborate on mutually beneficial projects and initiatives. As a community partner, we have a commitment to the region's economic vitality, respond to educational and economic opportunities and support innovation and student access to programs designed and delivered for the future.

Bringing together career-driven programs, faculty talent and a focus on experiential learning, the Manchester division of CPS prepares students for success in their chosen field — and connects them to the wealth of opportunities in the region and beyond.

Accreditation

The University of New Hampshire at Manchester was established in 1985 as the sixth undergraduate college of the University of New Hampshire. UNH Manchester merged with Granite State College in 2023 to form the UNH College of Professional Studies, which expands online offerings across UNH and enhances support of online and on campus learners in the state and region. The University of New Hampshire is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.), which accredits schools and colleges in the six New England states. Accreditation indicates that the institution has been carefully reviewed and found to meet or exceed standards agreed upon by nationally recognized educators.

Faculty

The Manchester faculty is our greatest asset. Residential faculty members have earned reputations for excellent teaching, scholarly achievement in their fields and service to the community. They are recognized scholars and have acquired national and international reputations for their expertise. Adjunct faculty members bring applied experience and a commitment to teaching to the classroom. Most importantly, our dedicated faculty are not just teachers—they are mentors who are invested in the success of each student.

Analytics and Data Science

With an explosion of big data initiatives in organizations worldwide, the demand for data-savvy individuals has never been higher. Our Analytics and Data Science program is specifically designed to prepare the next generation of innovative data scientists and analysts.

The Analytics and Data Science program in the Applied Engineering and Sciences Department at UNH Manchester prepare students with cutting-edge technical skills they need to manage, distill, and interpret data for all economic sectors, from finance to healthcare to marketing and advertising. Through experiential learning that include real-world course projects, internship experiences, and capstone courses, students master programming languages and techniques using modern platforms to derive actionable information from data.

Analytics and Data Science Major: Analytics Option (B.S.) Manchester

https://manchester.unh.edu/program/bs/analytics-data-science-major-analytics-option

Description

The option in Analytics is intended for students interested in either heading into industry immediately upon graduation, or pursuing graduate

work in a professionally oriented program at UNH. The option in Analytics places its emphasis on applications of data science in industry.

This program has been designed to prepare students for professional careers working with data, with an emphasis on the extraction of meaning from data. The program is not targeted to any one industry; rather, it provides a flexible, practical skillset that can be applied widely. This skillset includes elements of computer science, applied mathematics and statistics, communication skills, and business savvy. During the course of the program, students will demonstrate their acquisition of these skills by successfully completing their program coursework, their internship experience, and their capstone project.

For additional information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University's Discovery program, completing all of the 21 required courses in the major as listed below, including the capstone course, the internship preparedness course, and an internship. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

Student Learning Outcomes

Analytics and Data Science focuses on the extraction of meaning from data through the application of computer science, mathematics and business domain knowledge. Within a few years of obtaining a bachelor's degree in Analytics and Data Science, our alumni will have:

Program Learning Outcomes

- Engaged in successful career areas of analytics and data science and will already have, or be pursuing, advanced degrees in Analytics, Data Science, Computer Science, Mathematics or related fields.
- Applied the full range of core Data Science concepts and techniques to fill the analytics needs of an organization.
- Communicated effectively with diverse stakeholders as well as functioned appropriately in a team environment.
- Navigated the complex interconnections between data, computing technology, and the goals and constraints of the organization served.
- Understood the pervasive and changing role of data in global society, and participated responsibly as both an Analytics and Data Science professional and citizen.

Analytics and Data Science Major: Data Science Option (B.S.) Manchester

Description

Beginning in the 2025-2026 academic year, the Analytics and Data Science: Data Science Option B.S. major will no longer be accepting new students. Current Analytics and Data Science: Data Science Option students will continue to have access to the same high-quality education and resources until they graduate.

The option in Data Science is intended for students interested in pursuing advanced degrees and conducting original research in data science. The option in data science places its emphasis on a rigorous introduction to the theoretical mathematical and computational underpinnings of modern data science.

During the course of the program, students will demonstrate their acquisition of these skills by successfully completing their program coursework, their internship experience, and their capstone project.

For additional information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Successful completion of the program entails earning at least 128 credits, meeting the requirements of the University's Discovery program, and completing all of the 18 required courses in the major as listed below. In all major courses, the minimum allowable grade is a C-. The minimum overall GPA for graduation is 2.0. Transfer students may transfer up to a maximum of 32 credits to satisfy major requirements (not counting those courses used to satisfy Discovery requirements).

Students who enroll in the Data Science Option may need to take some required courses on the Durham campus.

Code	Title	Credits
Mathematics		
MATH 425	Calculus I	4
MATH 426	Calculus II	4

MATH 528	Multidimensional Calculus	4
MATH 531	Mathematical Proof	4
COMP 570	Statistics in Computing and Engineering	4
MATH 645	Linear Algebra for Applications	4
MATH 755	Probability with Applications	4
MATH 756	Principles of Statistical Inference	4
Computing		
COMP 424	Applied Computing 1: Foundations of Programming	4
or CS 415	Introduction to Computer Science I	
COMP 525	Data Structures Fundamentals	4
or CS 416	Introduction to Computer Science II	
COMP 625	Data Structures and Algorithms	4
or CS 515	Data Structures and Introduction to Algorithms	
CS 420	Foundations of Programming for Digital Systems	4
CS 659	Introduction to the Theory of Computation	4

Student Learning Outcomes

Analytics and Data Science focuses on the extraction of meaning from data through the application of computer science, mathematics and business domain knowledge. Within a few years of obtaining a bachelor's degree in Analytics and Data Science, our alumni will have:

Program Learning Outcomes

- Engaged in successful career areas of analytics and data science and will already have, or be pursuing, advanced degrees in Analytics, Data Science, Computer Science, Mathematics or related fields
- Applied the full range of core Data Science concepts and techniques to fill the analytics needs of an organization
- Communicated effectively with diverse stakeholders as well as functioned appropriately in a team environment
- Navigated the complex interconnections between data, computing technology, and the goals and constraints of the organization served
- Understood the pervasive and changing role of data in global society, and participated responsibly as both an Analytics and Data Science professional and citizen

Analytics Minor (Manchester)

https://manchester.unh.edu/program/minor/analytics

Description

The demand for data-savvy individuals has never been higher, and the analytics minor gives you an introduction to the tools you'll need for a career involving data science and analytics, focused on the application of data science in industry. In addition to courses in mathematics, computer science and analytics, you can study neural networks and big data. Combine this minor with a major in the sciences, computer science, business, marketing or social sciences to bring enhanced skills to your career or graduate studies. With the experience provided by this minor, you'll gain a competitive advantage in this rapidly growing field. The objective of this minor is to provide a basic background in analytics for those interested in applications of data science.

Requirements

Academic policies related to Minors.

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C- grade.

Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval.

Some preparation in MATH 425 Calculus I and programming COMP 424 Applied Computing 1: Foundations of Programming is required.

Code	Title	Credits
Required Courses		
DATA 557	Introduction to Data Science and Analytics	4
COMP 525	Data Structures Fundamentals	4
COMP 570	Statistics in Computing and Engineering	4
MATH 645	Linear Algebra for Applications	4
Select one course from the following:		4
DATA 674	Predictive and Prescriptive Analytics I	
DATA 675	Predictive and Prescriptive Analytics II	
DATA 750	Neural Networks	
DATA 757	Mining Massive Datasets	
Total Credits		**20**

Data Science Minor (Manchester)

https://manchester.unh.edu/program/minor/data-science

Description

The objective of this minor is to provide a basic background in data science for those who are more interested in the theoretical underpinnings of analytics and data science.

Requirements

Academic policies related to Minors.

Students must complete five courses (20 credits) with a cumulative minimum grade point average of 2.0 and with no grade below a C- grade.

Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval.

Some preparation in MATH 425 Calculus I and programming (COMP 424 Applied Computing 1: Foundations of Programming or CS 415 Introduction to Computer Science I) is required.

Code	Title	Credits
Required Courses		
CS 515	Data Structures and Introduction to Algorithms	4
Select one course from the following:		4
COMP 525	Data Structures Fundamentals	
CS 416	Introduction to Computer Science II	
Select three courses from the following: [1]		12
CS 730	Introduction to Artificial Intelligence	
CS 750	Machine Learning	
CS 753	Information Retrieval and Generation Systems	
CS 775	Database Systems	
MATH 645	Linear Algebra for Applications	
MATH 736	Advanced Statistical Modeling	
MATH 738	Data Mining and Predictive Analytics	
MATH 739	Applied Regression Analysis	
DATA 750	Neural Networks	
DATA 757	Mining Massive Datasets	
Total Credits		**20**

[1] Must select at least one CS and one MATH course. Must select CS 750 Machine Learning or MATH 738 Data Mining and Predictive Analytics.

ASL/English Interpreting

Preparing skillful interpreters through interaction and immersion

In the nation's first accredited interpreting program and one of only 15 accredited programs in the country, you'll learn American Sign Language and the foundation of ASL/English interpreting from distinguished faculty, all of whom are native ASL signers and/or certified interpreters.

The demand for skilled interpreters is on the rise, with the Bureau of Labor Statistics projecting 18 percent growth in the interpreting field between 2016 and 2026. Our program prepares you to work with the Deaf community by teaching you the intricacies of American Sign Language and Deaf culture, as well as the skills you need to pursue a career as an ASL/English interpreter.

Members of the Deaf community are integrated with students into the learning experience, both inside and outside the classroom, which is a very unique feature of our ASL/English Interpreting program. During your senior year internship, you will be paired with a nationally certified mentor and use your interpretation and ASL skills throughout the state.

Our graduates have pursued careers in ASL/English interpreting, deaf education, rehabilitation, healthcare, audiology, social work, counseling and the media. From medicine to law, education to performing arts — your career opportunities as a bilingual and bicultural graduate are vast.

Programs

- American Sign Language and Deaf Studies Minor (p. 639)
- ASL/English Interpreting Major (B.S.) (p. 639)

Faculty

ASL/English Interpreting Faculty

American Sign Language and Deaf Studies Minor

https://manchester.unh.edu/program/minor/american-sign-language-deaf-studies

Description

American Sign Language is a visual language that is predominately used by Deaf and hard of hearing communities in the United States and many parts of Canada. Developing fluency in American Sign Language and expertise in the community and culture provides a foundation for careers that work with the American Deaf community.

Requirements

Academic policies related to Minors.

To earn a minor in American Sign Language and Deaf Studies, students must complete 24 credits, with no individual grade lower than C-.

Code	Title	Credits
Required Courses		
ASL 435	American Sign Language I	4
ASL 436	American Sign Language II	4
INTR 438	A Socio-cultural Perspective on the Deaf Community	4
Electives		
Select three courses from the following:		12
ASL 531	American Sign Language III	
ASL 532	American Sign Language IV	
ASL 621	Advanced American Sign Language Discourse I	
ASL 622	Advanced American Sign Language Discourse II	
INTR 539	Comparative Linguistic Analysis for Interpreters	
Total Credits		**24**

ASL/English Interpreting Major (B.S.)

https://manchester.unh.edu/program/bs/aslenglish-interpreting-major

Description

The American Sign Language (ASL)/English Interpreting program at UNH Manchester is a specialized, in-depth program with a national reputation for quality. In 1999, the program became the first interpreting program in the country to be found in compliance with the National Interpreter Education Standards of the Conference of Interpreter Trainers (CIT). In 2007, the program became the first interpreting program in the nation to be accredited by the Commission on Collegiate Interpreter Education (CCIE), and, in 2017, the program became the first program to be re-accredited by CCIE. UNH Manchester also houses one of northern New England's most comprehensive collections of books and media materials on ASL/English Interpreting.

The program is guided by the premise that deaf people, as a linguistic minority, possess their own cultural values, literature, history, traditions, and social conventions. Interpretation requires bilingual and bicultural competence in spoken English and American Sign Language. The ASL/English Interpreting program at UNH Manchester provides students with a strong theoretical foundation as generalists in ASL/English Interpreting and helps prepare students for either state-level interpreter screening or national Registry of Interpreters for the Deaf (RID) interpreter certification, depending on students' skill level and experience.

Graduates may go on to pursue specialty areas in interpretation or related fields of study.

Students who complete the bachelor of science degree in ASL/English Interpreting graduate with a varied and flexible academic base. Interpreting requires skills such as sustained powers of concentration, versatility in dealing with a variety of people and content areas, fast-thinking and excellent communication skills in the respective languages. Students seeking to become interpreters receive a foundation in American Sign Language, Deaf culture, and the interpreting process, and their programs of study often include elective courses examining specific specialized settings such as Healthcare or on special topics such as theater and translation. Students also gain a thorough grounding in the liberal arts through the University's Discovery program.

Graduates of the ASL/English Interpreting program may pursue careers in ASL/English interpreting, deaf education, rehabilitation, health care, audiology, social work, counseling, and the media. The program provides students with a varied and flexible academic base. Graduates are prepared for further study in such fields as psychology, communication, linguistics, sociology, and anthropology.

For more information, the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

- Students must complete 64 credits in the major, 40 credits in the University's Discovery program, and 24 credits in elective courses.
- Students must complete 64 credits in the major with a grade of C or better. Students who earn less than a C on a particular course may repeat that course only once.
- Students must achieve a GPA of 2.5 or better in major courses and must pass both ASL 532 and INTR 630 with at least a B- (or successfully demonstrate competence in American Sign Language and consecutive interpretation, respectively).
- Transfer students must complete a minimum of eight ASL/English Interpreting courses at UNH Manchester.

Code	Title	Credits
Language Courses		
ASL 435	American Sign Language I	4
ASL 436	American Sign Language II	4
ASL 531	American Sign Language III	4
ASL 532	American Sign Language IV	4
ASL 621	Advanced American Sign Language Discourse I	4
ASL 622	Advanced American Sign Language Discourse II	4
Culture and Linguistics Courses		
INTR 438	A Socio-cultural Perspective on the Deaf Community [1]	4
INTR 539	Comparative Linguistic Analysis for Interpreters	4
Interpreting Courses		
INTR 430	Introduction to Interpretation	4
INTR 439	Ethics and Professional Standards for Interpreters	4
INTR 540	Translation	4
INTR 630	Consecutive Interpretation I	4
INTR 636	Consecutive Interpretation II	4
INTR 732	Simultaneous Interpretation	4
INTR 734	Field Experience and Seminar I	4
INTR 735	Field Experience and Seminar II	4
Total Credits		**64**

[1] ASL/English Interpreting majors cannot use this course to fulfill the SS Discovery Program requirement.

Capstone Experience

The capstone experience in the bachelor of science degree program in ASL/English Interpreting is met by INTR 735 Field Experience and Seminar II, which is a senior-level course and the last in the sequence of courses required for the major. In addition, students participate in a research experience. Starting in INTR 636 Consecutive Interpretation II and continuing in INTR 732 Simultaneous Interpretation, students identify an area of interest, conduct a literature review, and design and complete a research project. At the end of INTR 732, students submit a completed paper and present on their findings. These courses meet the following two criteria of the capstone experience for this major:

1. the capstone synthesizes and applies disciplinary knowledge and skills
2. the capstone demonstrates emerging professional competencies.

Student Learning Outcomes

Program Learning Outcomes

- Development of language competency in both American Sign Language and English to foster entry into the field of interpreting.
- Development of competencies needed for meaning transfer.
- Development of skills for self-assessment for process and product of interpreting.
- Development of decision-making skills and critical thinking to assess an interpreted situation and the source language, target language, setting and participants.

Biological Sciences

Explore the living world through hands-on experience in the lab and in the field

Discover the inner workings of living organisms from molecules to ecosystems in our Biological Sciences program. As our largest and most popular major, the Biological Sciences program is designed to give you the degree you want — through self-designed concentrations, independent study, research projects, internships, job shadows, study abroad, and more.

You'll work with faculty mentors to customize your degree around your interests, allowing you to focus your learning in these diverse areas of study:

- Biology Teaching
- Biomaterials
- Cancer biology
- Ecology
- Genomics
- Microbiology
- Pre-Professional Health (Dental, Medical, Optometry, Pharmacy, Physician Assistant, Physical/Occupational Therapy, Veterinary, etc.)

All students, in consultation with their advisor, develop a self-designed concentration where they select a group of upper-level courses that represents their interest.

Research is central to this program, empowering you to explore, question and invent. Side-by-side with your classmates and professors, you'll conduct experiments in our state-of-the-art labs: general biology, advanced biology, microbiology, general chemistry and organic chemistry, as well as the cell culture research lab, microbiology research lab, and molecular biology research lab.

You'll also have the opportunity to apply your skills in the real world through experiential learning, including:

- robust job shadows at the Elliot Hospital Laboratory and other local medical facilities
- internships at Manchester Water Works, ARMI (Advanced Regenerative Manufacturing Institute), and biotechnology firms on campus in our Biotechnology Innovation Center as well as in the nearby Millyard
- summer research courses at Shoals Marine Laboratory
- study away opportunities such as investigating biological diversity in Costa Rica or microbial ecology in Iceland

Through diverse areas of study, faculty experts and hands-on experience, you'll be prepared for success in graduate, medical or professional studies, and careers in industries from healthcare to agriculture to education.

- Biological Sciences Minor (p. 645)

Faculty

Biological Sciences Faculty

Biological Sciences (A.S.)

https://manchester.unh.edu/program/as/biological-sciences

Description

Biology is the study of living organisms in both laboratory and field conditions. It concerns itself with questions of understanding the living world, its complex interrelationships, and the role of human beings within it.

The associate of science in biological sciences program at UNH Manchester is designed to serve either as a terminal degree or as a springboard for students interested in the life sciences, which include majors in biology, biotechnology, microbiology, zoology, plant biology, wildlife management, environmental conservation, biochemistry, and animal sciences. Employment opportunities in the public and private sectors include education; food, water, wastewater and other industrial laboratories; clinical laboratories; biotechnology; environmental research and monitoring; and health careers.

For more information, contact the Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 64 credits

Minimum Residency Requirement: 16 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery Program

Major, Option, and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Students must complete a minimum of 64 credits to graduate. There are two tracks in the A.S. degree program at UNH Manchester: biology and microbiology.

Biology Track Requirements

Code	Title	Credits
MATH 425	Calculus I	4
or MATH 424B	Calculus for Life Sciences	
PSYC 402	Statistics in Psychology [1]	4
BIOL 413	Principles of Biology I	4
BIOL 414	Principles of Biology II	4
CHEM 403	General Chemistry I	4
CHEM 404	General Chemistry II	4
BMS 503 & BMS 504	General Microbiology and General Microbiology Laboratory	5
CHEM 545 & CHEM 546	Organic Chemistry and Organic Chemistry Laboratory	5
BMCB 658 & BMCB 659	General Biochemistry and General Biochemistry Lab	5
BIOL 541W	Ecology	4
GEN 604	Principles of Genetics	4
Total Credits		**47**

[1] Other statistics courses such as BIOL 528 Applied Biostatistics I or BUS 430 Introduction to Business Statistics may be used to satisfy this requirement.

Microbiology Track Requirements

Students opting for the microbiology track must complete all courses listed in the biological sciences program with the exception of BIOL 541W Ecology. In addition, students must complete the following courses. From time to time, other microbiology courses may be offered. With approval of the Program Coordinator, they may substitute for courses within the Microbiology Track.

Code	Title	Credits
BMS 602 & BMS 603	Pathogenic Microbiology and Pathogenic Microbiology Laboratory	5
Total Credits		**5**

Note: Students preparing for professional or graduate programs may need to complete: CHEM 651 Organic Chemistry I/CHEM 653 Organic Chemistry Laboratory and CHEM 652 Organic Chemistry II/CHEM 654 Organic Chemistry Laboratory. These courses may substitute for CHEM 545 Organic Chemistry/CHEM 546 Organic Chemistry Laboratory and BMCB 658 General Biochemistry/BMCB 659 General Biochemistry Lab. Please consult your academic advisor.

	Total Credits	**68-69**

Student Learning Outcomes

Program Learning Outcomes

A student successfully completing the Biological Sciences program will be able to:

- Understand the fundamentals of basic biological principles, concepts, and theories.

- Demonstrate the ability to evaluate, apply, and synthesize biological information and ideas.
- Be competent in basic biology and chemistry laboratory skills and with the use of common laboratory equipment and instrumentation.
- Demonstrate the ability to communicate technical information related to biological sciences related topics in scientific writing and oral presentations.
- Understand, analyze, and evaluate primary research literature involving biological sciences related topics.
- Understand and apply the process of the scientific method, including being able to formulate hypotheses, design and conduct experiments with adequate controls to test hypotheses, interpret and evaluate data, and draw conclusions.
- Gather, analyze, organize, evaluate, and present scientific data, including the use of technology to solve problems and communicate information.
- Demonstrate the ability to function as a member of a team.
- Compete effectively for entry-level employment and for admission to baccalaureate schools in their chosen area and be successful in these endeavors.

Biological Sciences Major (B.A.)

https://manchester.unh.edu/program/ba/biological-sciences-major

Description

Biology is the study of living organisms in both laboratory and field conditions. It concerns itself with questions of understanding the living world, its complex interrelationships, and the role of human beings within it.

The B.A. in biological sciences at UNH Manchester is designed to:

- allow students to earn a baccalaureate degree in biology at UNH Manchester;
- allow students to combine study in biology with other programs and disciplines by completing a second major, a minor, or a self-designed set of elective courses along with their biology degree;
- provide an opportunity for students to complete a baccalaureate degree in biology while preparing to pursue a Master's degree in biology, biotechnology, or other fields. These degree programs could be undertaken after completion of the B.A. Alternatively, UNH offers several accelerated Master's programs where excellent senior students in the Biological Sciences major can complete coursework towards their undergraduate and graduate degrees at the same time;
- allow students to complete a major in biology while taking required courses in education in preparation for the five-year M.A.T. or M.Ed. programs and state certification in secondary science education; or alternative state certification pathway;
- provide an opportunity for students to complete a baccalaureate degree in biology while completing the required courses for admission to medical, dental, veterinary, physician assistant, pharmacy, physical therapy, optometry, and other professional or graduate programs.

Employment opportunities in the public and private sectors include education; industrial, clinical, and research laboratories; biotechnology; and environmental field research.

For more information, contact the Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Each course required in the major must be completed with a minimum grade of C-. Students must attain a minimum GPA in the major of 2.0. Transfer students must complete at least 24 credits in the major at UNH. BIOL 413 Principles of Biology I, BIOL 414 Principles of Biology II may be used to satisfy the biological sciences Discovery requirement and CHEM 403 General Chemistry I, CHEM 404 General Chemistry II may be used to satisfy the Physical Sciences Discovery requirement. PSYC 402 Statistics in Psychology may be used to satisfy the Quantitative Reasoning Discovery requirement; however, students interested in graduate or professional programs are encouraged to take MATH 425 Calculus I, or MATH 424B Calculus for Life Sciences, to satisfy the Quantitative Reasoning requirement.

The UNH Manchester B.A. in biological sciences program is structured with three levels of coursework.

Code	Title	Credits
Biology Courses		
BIOL 411	Introductory Biology: Molecular and Cellular	4
or BIOL 413	Principles of Biology I	
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
or BIOL 414	Principles of Biology II	
BMS 503 & BMS 504	General Microbiology and General Microbiology Laboratory	5
BSCI 505	Biosciences Sophomore-Junior Seminar	2
BIOL 541W	Ecology	4
GEN 604	Principles of Genetics	4
Chemistry Courses		
CHEM 403 & CHEM 404	General Chemistry I and General Chemistry II	8
Mathematics Courses		
Select one of the following:		4
MATH 418	Analysis and Applications of Functions	
MATH 425	Calculus I	
MATH 424B	Calculus for Life Sciences	
Statistics Course		
PSYC 402	Statistics in Psychology	4
or BIOL 528	Applied Biostatistics I	
or BUS 430	Introduction to Business Statistics	
Total Credits		**39**

Self-Designed Concentration in Biology

Students will select, in consultation with their advisor, four biology courses at the 600-700 level to be taken at UNH Manchester or UNH Durham.

Capstone Experience

Code	Title	Credits
BSCI 701	Senior Seminar I (during either semester of senior year) [1]	1
In consultation with your academic advisor, select a capstone experience:		4
BSCI 792	Research	
BSCI 793	Internship	
BSCI 795	Independent Study	
Total Credits		**5**

[1] BSCI 701 will meet weekly during either semester of the senior year in a seminar format. Students will share information about capstone experiences, listen to presentations on timely issues in biology, develop career preparation skills, and receive training in poster production. Other methods of oral presentation and scientific writing are explored as students prepare to present the results of their capstone activities at the Undergraduate Research Conference or other venues.

In addition, all students will take elective courses to fulfill the 128-credit requirement for a B.A. degree. These elective courses could fulfill the requirements for a major or minor in another program or they could fulfill a self-designed interdisciplinary concentration. Where appropriate, a student could include some of the biology-related supporting science courses listed above. These courses would be selected in consultation with the advisor and the appropriate faculty advisor in another program.

Depending on specific academic and career goals, in particular, students preparing for professional or graduate programs, may, in consultation with their advisor, elect to take additional supporting science courses such as:

Code	Title	Credits
CHEM 545 & CHEM 546	Organic Chemistry and Organic Chemistry Laboratory (one semester)	5
CHEM 651 & CHEM 653	Organic Chemistry I and Organic Chemistry Laboratory (two semesters)	5
CHEM 652 & CHEM 654	Organic Chemistry II and Organic Chemistry Laboratory (two semesters)	5
BMCB 658 & BMCB 659	General Biochemistry and General Biochemistry Lab	5
MATH 426	Calculus II	4
PHYS 401	Introduction to Physics I	4
PHYS 402	Introduction to Physics II	4

These courses are often required for admission to medical, professional, and other graduate programs. Medical and dental graduate schools also require PSYC 401 Introduction to Psychology and SOC 400 Introductory Sociology.

Degree Plan

Sample Degree Plan

This sample degree plan serves as a general guide; students collaborate with their academic advisor to develop a personalized degree plan to meet their academic goals and program requirements.

Student Learning Outcomes

Program Learning Outcomes

A student successfully completing the Biological Sciences program will be able to:

- Understand the fundamentals of basic biological principles, concepts, and theories.
- Demonstrate the ability to evaluate, apply, and synthesize biological information and ideas.
- Be competent in basic biology and chemistry laboratory skills and with the use of common laboratory equipment and instrumentation.
- Demonstrate the ability to communicate technical information related to biological sciences related topics in scientific writing and oral presentations.
- Understand, analyze, and evaluate primary research literature involving biological sciences related topics.
- Understand and apply the process of the scientific method, including being able to formulate hypotheses, design and conduct experiments with adequate controls to test hypotheses, interpret and evaluate data, and draw conclusions.
- Gather, analyze, organize, evaluate, and present scientific data, including the use of technology to solve problems and communicate information.
- Demonstrate the ability to function as a member of a team.
- Compete effectively for entry-level employment and for admission to graduate or professional schools in their chosen area and be successful in these endeavors.

Biological Sciences Minor

https://manchester.unh.edu/program/minor/biological-sciences

Description

The minor in biological sciences introduces students to the field of biological sciences in a five-course sequence that will provide substantial education and training in scientific concepts, science communication and laboratory skills, as well as the central content areas of biology, including biomolecules, cell biology, genetics, physiology, ecology and evolution. The biological sciences minor is a valuable credential to any major, indicating a substantial additional skillset in the biosciences.

To ensure a course counts in the minor, it is required that students consult the minor coordinator, Dr. Patricia Halpin, (Patricia.Halpin@unh.edu) before enrolling in the course.

Requirements

Academic policies related to Minors.

The minor requires students to complete five courses (20-21 credits, depending on the courses chosen). The minimum acceptable grade in these courses is a C-, and the average grade for these courses must be a C or better.

Courses for non-majors (for example, BMS 507 Human Anatomy and Physiology I/BMS 508 Human Anatomy and Physiology II; BIOT 422 , BSCI 410 Contemporary Health Issues, BSCI 421 , BSCI 432 Medical Terminology; BIOL 520 Our Changing Planet) will not count towards the minor.

Students are advised that to take some upper-level courses; BMS 503 General Microbiology/BMS 504 General Microbiology Laboratory and GEN 604 Principles of Genetics are frequently prerequisite courses.

Code	Title	Credits
Required courses		
Select one of the following		8
BIOL 411 & BIOL 412	Introductory Biology: Molecular and Cellular and Introductory Biology: Evolution, Biodiversity and Ecology	
BIOL 413 & BIOL 414	Principles of Biology I and Principles of Biology II	
Select one of the following		4-5
BIOL 541W	Ecology	
BMS 503 & BMS 504	General Microbiology and General Microbiology Laboratory	
GEN 604	Principles of Genetics	
Select two courses [1]		8
Total Credits		**20-21**

[1] Must be majors-level courses in the biological sciences

Biotechnology

Channeling scientific curiosity to fuel discovery and innovation

You're a scientist at heart — curious about how everything works, right down to the smallest detail. Exploring topics like biochemistry, molecular biology and genetics, our Biotechnology program puts you at the heart of one of the newest and fastest-growing scientific fields.

Whatever your scientific passion, studying biotechnology can bring you to its doorstep — preparing you to create advancements that can change lives and improve the world around you.

You'll work with faculty mentors to customize your biotechnology degree around your interests, allowing you to focus your learning in these diverse areas of study:

- Biomaterials
- Cancer biology
- Cell Biology
- Microscopy and Bioimaging
- Genomics
- Microbiology
- Stem Cells
- Biotechnology Teaching
- Biotechnology Entrepreneurship
- Pre-Professional Health (Dental, Medical, Optometry, Pharmacy, Physician Assistant, Physical/Occupational Therapy, Veterinary, etc.)

All students, in consultation with their advisor, develop a customized educational plan from a suite of upper-level courses to develop their skills and experience in areas of their interest.

Research is central to this program, empowering you to explore, question and invent, in the classroom and outside the classroom. Side-by-side with your classmates and professors, you'll conduct experiments in our state-of-the-art labs: general biology, advanced biology, microbiology, general chemistry and organic chemistry, as well as the cell culture research lab, microbiology research lab, and molecular biology research lab.

You'll also have the opportunity to apply your skills in the real world through experiential learning, including:

- internships at Manchester Water Works, ARMI (Advanced Regenerative Manufacturing Institute), and biotechnology firms on campus in our Biotechnology Innovation Center as well as in the nearby Millyard
- robust job shadows at the Elliot Hospital Laboratory and other local medical facilities
- research fellowships and placements on campus and off through UNH's Hamel Center for Undergraduate Research and New Hampshire's IDeA Networks of Biomedical Research Excellence program (funded by the National Institutes of Health)
- summer research courses at Shoals Marine Laboratory
- study away opportunities such as investigating biological diversity in Costa Rica or microbial ecology and geology in Iceland

Through in-depth and hands-on training in lab techniques, advanced microbiology, and cell biology, with faculty experts and great facilities, you'll be prepared for success in graduate, medical or professional studies, and careers in industries from biotech to healthcare to education.

Programs

- Biotechnology Major (B.S.) (p. 646)
- Biotechnology Minor (p. 648)

Faculty

Biotechnology Faculty

Biotechnology Major (B.S.)

https://manchester.unh.edu/program/bs/biotechnology-major

Description

Biotechnology is the use of living organisms, biological systems, and small chemicals and biomolecules in technology. Biotechnology has applications in the treatment of diseases, the production of food, the protection of ecosystems, and the generation of energy, as well as in the basic science study of many biological questions.

The B.S. in biotechnology at UNH Manchester is designed to:

- allow students to earn a baccalaureate degree in biotechnology at UNH;
- allow students to combine study in biotechnology with other programs and disciplines by completing a minor, or a self-designed set of elective courses along with their biotechnology degree;
- provide an opportunity for students to complete a baccalaureate degree in biotechnology while preparing to pursue a Master's degree in biology, biotechnology, or other fields. These degree programs could be undertaken after completion of the B.S. Alternatively, UNH offers several accelerated Master's programs where excellent senior students in the Biological Sciences major can complete coursework towards their undergraduate and graduate degrees at the same time;
- allow students to complete a major in biotechnology while taking required courses in education in preparation for the five-year M.A.T. or M.Ed. programs and state certification in secondary science education; or alternative state certification pathway;
- provide an opportunity for students to complete a baccalaureate degree in biotechnology while completing the required courses for admission to medical, dental, veterinary, physician assistant, pharmacy, physical therapy, optometry, and other professional or graduate programs.
- allow students to complete a baccalaureate degree in biotechnology while completing the required courses for admission to graduate research programs (M.S. or Ph.D.) in the life sciences and related fields.

Employment opportunities in the public and private sectors include biotechnology research, development, and manufacturing; education; research laboratories; clinical laboratories; forensic laboratories; jobs in diverse areas from research to quality control to sales in the pharmaceutical industry; industrial positions in the food industry; water and wastewater laboratories and facilities; and environmental research and monitoring.

For more information, contact the Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

- Courses required in the major must be completed with a minimum grade of C-. Students must attain a minimum GPA in the major of 2.0.
- Transfer students must complete at least 24 credits in the major at UNH.
- BIOL 413 Principles of Biology I, BIOL 414 Principles of Biology II may be used to satisfy the biological sciences Discovery Program requirement.

- CHEM 403 General Chemistry I, CHEM 404 General Chemistry II may be used to satisfy the Physical Sciences Discovery Program requirement.
- PSYC 402 Statistics in Psychology or MATH 424B Calculus for Life Sciences/MATH 425 Calculus I may be used to satisfy the Quantitative Reasoning Discovery Program requirement.
- The UNH Manchester B.S. in biotechnology program is structured with three levels of coursework.

Code	Title	Credits
Core Courses		
BIOL 411	Introductory Biology: Molecular and Cellular	4
or BIOL 413	Principles of Biology I	
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
or BIOL 414	Principles of Biology II	
BIOT 501	Ethical Issues in Biology	4
BMCB 658 & BMCB 659	General Biochemistry and General Biochemistry Lab	5
BMS 503 & BMS 504	General Microbiology and General Microbiology Laboratory	5

III. Advanced Microbiology courses		
BMS 602 & BMS 603	Pathogenic Microbiology and Pathogenic Microbiology Laboratory	
BMS 706 & BMS 708	Virology and Virology Laboratory	
BSCI 737	Microbial Genomics and Biotechnology Lab	
BSCI 740	Aquatic Microbiology	
Total Credits		**76**

[1] BMS 705 Immunology, may optionally be taken with or without BMS 715 Immunology Laboratory.

Depending on their specific academic and career goals and in consultation with their advisor, students may elect to take additional supporting science courses and a full year of physics (e.g., take PHYS 402 Introduction to Physics II in addition to PHYS 401 Introduction to Physics I; or PHYS 408 General Physics II in addition to PHYS 407 General Physics I). These courses are often required for admission to medical, veterinary, and other professional and graduate programs.

Code	Title	Credits
Capstone Experience		
BSCI 701	Senior Seminar I (during either semester of the senior year)	1
Select a capstone experience:		4
BSCI 792	Research	
BSCI 793	Internship	
BSCI 795	Independent Study	
Total Credits		**5**

BSCI 701 Senior Seminar I will meet weekly during either semester of the senior year in a seminar format. Students will share information about capstone experiences, listen to presentations on timely issues in biology, develop career preparation skills, and receive training in poster production. Other methods of oral presentation and scientific writing are explored as students prepare to present the results of their capstone activities at the Undergraduate Research Conference or other venues.

In addition, all students will take elective courses to fulfill the 128-credit requirement for a B.S. degree. These elective courses could fulfill the requirements for a major or minor in another program or they could fulfill a self-designed interdisciplinary concentration. These courses would be selected in consultation with their advisor.

Student Learning Outcomes

Program Learning Outcomes

A student successfully completing the Biotechnology program will be able to:

- Understand the fundamentals of basic biological principles, concepts, and theories.
- Demonstrate the ability to evaluate, apply, and synthesize biological information and ideas.
- Be competent in basic biology and chemistry laboratory skills and with the use of common laboratory equipment and instrumentation.
- Be competent in advanced laboratory techniques and microbiological methods.
- Understand the professional and ethical responsibilities involved with current and emerging topics in biology.
- Demonstrate the ability to communicate technical information related to biological sciences and biotechnology related topics in scientific writing and oral presentations.
- Understand, analyze, and evaluate primary research literature involving biological sciences and biotechnology related topics.
- Understand and apply the process of the scientific method, including being able to formulate hypotheses, design and conduct experiments with adequate controls to test hypotheses, interpret and evaluate data, and draw conclusions.
- Gather, analyze, organize, evaluate, and present scientific data, including the use of technology to solve problems and communicate information.
- Demonstrate the ability to function as a member of a team.
- Understand current and emerging topics in biotechnology.
- Compete effectively for entry-level biotechnology industry employment and for admission to graduate or professional schools in their chosen area and be successful in these endeavors.

Biotechnology Minor

https://manchester.unh.edu/program/minor/biotechnology

Description

The Minor in Biotechnology will introduce students to the field of biotechnology in a five-course sequence that will provide substantial education and training in bioethics, as well as the central content areas of biology and biotechnology, with a focus on genetics and laboratory techniques. Students adding the biotechnology minor will be adding a valuable credential to their major, indicating a substantial additional skill set in the laboratory-focused and dynamic field of biotechnology.

To ensure a course counts toward the minor, it is required that students consult the minor coordinator, before enrolling in the course.

Requirements

Students must complete five courses (20-21 credits, depending on the courses chosen). The minimum acceptable grade in these courses is a C-, and the average grade for these courses must be a C or better. Transfer course approval for the minor is limited to, at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval. Courses for non-majors will not count towards the minor.

Academic policies related to Minors.

Code	Title	Credits
Required Courses		
BIOT 501	Ethical Issues in Biology	4
GEN 604	Principles of Genetics [1, 3]	4
Biotechnology lab techniques course [1, 2]		**4-5**
Select one of the following:		8
BIOL 411 & BIOL 412	Introductory Biology: Molecular and Cellular and Introductory Biology: Evolution, Biodiversity and Ecology	
or BIOL 413 & BIOL 414	Principles of Biology I and Principles of Biology II	
Total Credits		**20-21**

[1] Biotechnology majors-level course.
[2] BMS 503 General Microbiology/BMS 504 General Microbiology Laboratory may be an additional pre-requisite course.
[3] Students in majors with 3+ course overlap (e.g., Neuropsychology) will need a different course than GEN 604 Principles of Genetics within the Biotechnology major. BMS 503 General Microbiology/BMS 504 General Microbiology Laboratory is a recommended alternative.

Business

Leadership Through Innovation, Collaboration and Real-World Experience.

Located in the economic heart of New Hampshire, our Business program gives you the skills, resources and connections to become a successful, innovative leader. Small class sizes offer you individualized attention from faculty, while our vast network of business partners gets you the practical experience employers want. Courses include a focus on learning sought-after business skills such as the use of Microsoft Office Suite and data analytics tools.

Our faculty members bring years of industry experience to the classroom, and this approach means you'll apply concepts and theories to real, hands-on work. Senior capstone experience brings your learning to life through: an internship or project at a local business, case studies, business ethics study, and developing your professional self. Another internship is required to be taken junior or senior year to support career decision-making.

This highly interdisciplinary program is designed to explore your interests and prepare you for a lucrative career, offering areas of focus in:

- accounting & finance
- business economics
- data analytics
- entrepreneurship
- finance
- management and human resources
- marketing and sales
- self-designed in business

Working hand-in-hand with local businesses through internships, capstone experience, and involvement in our Students Consulting Organizations program, you'll get the real-world experience and leadership skills that today's employers look for.

Business Faculty

Accounting (Minor) Manchester

https://manchester.unh.edu/program/minor/accounting

Description

Opportunities for growth in the field of accounting continue at an impressive rate, with solid employment opportunities for anyone who qualifies for, and wants a job in the field of accounting. Students will find value in adding this minor to a major of their choice. Upon completion of the Accounting Minor, students should be able to:

- demonstrate an understanding of skills and techniques to be able to recognize transactions and how to record them
- explain and analyze the impact of transactions on an entity's status
- pursue an expanded use of the UNH degree with options to specialize in financial recording and the ability to understand financial statements
- consider the pursuit of certifications that supplement their career potentials, such as the Certified Public Accountant (CPA) or Certified Management Accountant (CMA)

The Accounting Minor can also be used to gain financial skills in all career paths or entrepreneurial aspirations. While the minor is not all-inclusive to train or qualify students to take the CPA exam, it can be used to expose students to the basics of accounting, and may lead to further study of specialization areas in accounting. Faculty assigned to these courses offer expertise and/or certifications in the specific content areas, adding a professional distinction to the program.

Requirements

Academic policies related to Minors.

All five courses (20 credits) applied to the minor must be completed with a minimum grade of C- and an overall GPA of 2.0.

Student Learning Outcomes

Program Learning Outcomes

At the conclusion of the Business program, students should be able to demonstrate:

- Breadth and Depth of Business Knowledge:\\nStudents are expected to demonstrate a growing knowledge across business subfields and understand their inter-relationships, with an aspiration, if desired, to further business studies in a B.A. in Business Administration degree.

At the conclusion of the Business program, students should be able to demonstrate:

- Critical Thinking and Data Analysis: \\nStudents are introduced to the application of qualitative and quantitative analysis with an emphasis on Excel and other business analyses and problem-solving to make informed decisions in business.

- Information Literacy and Communication Skills: \\nStudents acquire and demonstrate skills in retrieving, analyzing, and communicating information from multiple sources across business fields. This includes basic communication skills through written, oral, and visual methods, including reports, case studies, and data visualizations.
- Preparation for Success in Continuing Studies in Business:\ \nStudents will acquire a basic knowledge of business skills, information literacy, communication skills, critical thinking. and data analysis in business. This includes professionalism, cultural sensitivity, and ethical citizenship within business contexts.

Business Major (B.A.)

https://manchester.unh.edu/program/ba/business-major

Description

The bachelor of arts in business has a strong interdisciplinary focus. The curriculum adheres to a philosophy that effective decision making requires a broad understanding of the institutional and cultural climate within which businesses are operating. The program uses the resources of Manchester's business community and its economic strengths to provide students with skills, knowledge, and opportunities.

The business program offers areas of focus in business economics, data analytics, entrepreneurship, finance, management (including human resources), and marketing/sales. Students with a unique interest can create a self-designed concentration with approval of their advisor and the coordinator of the business program.

The culminating capstone experience enables students to apply their knowledge in the form of an internship or applied senior project. Because this is a bachelor of arts program, students fulfill the foreign language requirement. Students have the opportunity to enhance their knowledge through community experiences and internships. Graduates of UNH Manchester's business program are in demand because they offer future employers a portfolio of practical skills and theoretical knowledge, coupled with applied experiences through internships, leading to effective communication and leadership.

For more information, contact the Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

BUS 675	Special Topics in Business Administration	
BUS 690	Business Program Internship (in Marketing or Communication)	
BUS 695	Independent Study in Business (Marketing/Communication Project)	
COMP 405	Introduction to Web Design and Development	
COMP 415	Mobile Computing First and For Most	
Total Credits		**16**

Code	Title	Credits
Self-Designed		
Select four courses (or 16 credit hours) with faculty approval, including at least one course at the 500-level or above.		16
Total Credits		**16**

1 Experiential learning is required prior to the last semester at the University. BUS 690 Business Program Internship as an internship course satisfies this requirement. Most students will take two internships at UNH Manchester - (BUS 690 Business Program Internship and BUS 750 Business Capstone Senior Seminar - Internship.)

2 Business Capstone Experience (two courses: BUS 705 Business Ethics and one senior business seminar [BUS 750 Business Capstone Senior Seminar - Internship or BUS 760 BUS SR SEM - Research Project], fulfills the Discovery Program capstone requirement for business majors and is taken during the senior year).

Note: Because this is a bachelor of arts program, students must fulfill a language requirement. Efforts will be made to enhance fluency through subsequent courses and community experiences.

Student Learning Outcomes

Program Learning Outcomes

At the conclusion of the Business program, students should be able to demonstrate:

- Apply breadth and depth of knowledge about business and economic concepts, theories and methodologies, especially in the sub-field concentrations of accounting, finance, management, business ethics, leadership, organizational behavior, human resources, marketing/sales, statistics, business computer/software applications, and business data analytics, and how these varying fields are inter-related and complementary.
- Apply critical thinking skills to the qualitative and quantitative analysis of data through working knowledge of office suite products such as Microsoft Word, Excel, and PowerPoint, PowerBI or Tableau, including analysis of the data's impact on business decision making in local, national, and global business situations.
- Information literacy, including the ability to find, retrieve, analyze, and communicate information from online or traditional venues in the fields of business, economics, accounting, finance, management, human resources, entrepreneurship, leadership, organizational behavior, marketing, and business ethics.
- Effective interpersonal writing and presentation skills in all types of business and professional communications: memoranda, case studies, analytical reports, data visualizations, slide presentations, and project reports, along with the ability to convey this information with audiences in the private and public sectors, including the ability to lead discussion groups and multi-task project teams.
- Professionalism in the workplace, including sensitivity to cultural differences and an appreciation for the diversity of human experience and perspectives, as well as an understanding of the meaning of engaged citizenship as members of an ethical business community.

Business Major: Accounting Option (B.A.)

https://manchester.unh.edu/program/ba/business-major-accounting-option

Description

The Accounting Option is offered in response to the growing demand for accounting graduates in public accounting firms as well as in industry. Many local public accounting firms have expressed that with an expected high retirement rate among "baby boomers", there appears to be a need for graduates with robust accounting credentials. Representatives from well-known CPA exam prep course firms expressed the opinion that accountants are in high demand and the unemployment rate in this industry is very low.

The Accounting Option offers students the necessary courses to enable them to sit for the CPA exam, which is one of the major steps in obtaining a CPA license. The requirements for sitting for the CPA exam in the State of New Hampshire are a bachelor's degree, 24 credits in business subjects, and 30 credits in accounting subjects. The Accounting Option within the Business program provides these required credits.

This program also provides the students an opportunity to seek professional accounting positions in corporate environments. Students would be encouraged to take the CMA (Certified Management Accountant) exam, leading to this desirable certification.

For more information, contact the Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Students must complete 128 credits to graduate. Each required course must be completed with a minimum grade of C-. Students must attain a minimum GPA of 2.0 in major courses required for graduation. Majors cannot use BUS 430, ECN 411, or ECN 412 to satisfy both Discovery Program and major requirements. Transfer students must complete at least half of their credits in the major and the 8-credit capstone experience courses in-residence at UNH Manchester.

Business Minor

https://manchester.unh.edu/program/minor/business

Description

The minor in business allows students to pursue their interests in the liberal arts and sciences while building a foundation of business skills and adding a valuable credential to their portfolio and resume.

Requirements

Academic policies related to Minors.

- Students must complete five courses (20 credits) for the minor, with a cumulative minimum grade point average of 2.0 and with no grade below a C- grade.
- Transfer course approval for the minor is limited to at most, two relevant courses successfully completed at another accredited institution, subject to syllabi review and approval.
- Students must complete a minimum of 20 credits for the minor, with a maximum of 8 credits transferred from accredited institutions and a minimum of 12 credits completed in residence at UNH.

Code	Title	Credits
Required Courses		
BUS 400	Introduction to Business	4
BUS 532	Introduction to Financial Accounting	4
ECN 412	Introduction to Microeconomic Principles	4
or ECN 411	Introduction to Macroeconomic Principles

BUS 610	Marketing Principles and Applications	
BUS 620	Organizational Behavior	
Total Credits		**20**

Other 600- or 700-level courses in business (BUS) or economics (ECN) may be substituted for courses listed above with permission of the business program coordinator. This may include an Internship course (BUS 690 Business Program Internship), Special Topics courses (BUS 675 Special Topics in Business Administration or an Independent Study in Business (BUS 695 Independent Study in Business).

Forensic Accounting Minor

https://manchester.unh.edu/program/minor/forensic-accounting

Description

Opportunities for growth in the field of Forensic Accounting continue at an impressive rate. Career options for students who add the minor in Forensic Accounting can include investigative and litigation support to accounting firms, banks, police departments, government agencies and other organizations. The knowledge attained in this minor can help a homeland security expert or accountant investigate the rampant fraud that is often tied to homeland security or business threats, including non-accounting fraud issues.

In addition to following the knowledge content of the Certified Fraud Examiner (CFE) certification exam offered by the Association of Certified Fraud Examiners, the skills attained in the Forensic Accounting minor will augment the students' potential in a variety of career opportunities in homeland security and fraud investigation. The CFE consists of four parts: Fraud Prevention and Deterrence, Financial Transactions and Fraud Schemes, Investigation, and Law. This credential is highly regarded in the security industry, corporate risk management, law offices, and in government agencies such as the Federal Bureau of Investigation.

The Forensic Accounting minor will appeal to students who would like to add specialized skills to their Homeland Security degree. In addition, the Forensic Accounting minor can be used as a minor in other degree paths (except for the B.A. in Business, Accounting option). While it is not

training students to pursue the CPA or careers more focused in traditional accounting, it can be used to expose students to the field of accounting.

Requirements

Academic policies related to Minors.

The Forensic Accounting minor requires students to complete five courses (20 credits) as outlined below.

Courses must be completed with a minimum grade of C- and an overall GPA of 2.0 to count for the minor.

Students must take at least three 500-level or above courses to complete the minor.

Communication Arts

Shaping skilled communicators through creativity, technology and hands-on experience

With expert faculty, state-of-the-art media studios and a diverse network of internship opportunities, our Communication Arts program gives you the skills and experience to turn your passion into a profession. Our highly adaptable program helps bring your future into focus and opens doors to limitless career possibilities — shaping the next generation of filmmakers, digital content producers, screenwriters, social media and public relations specialists, HR professionals and beyond.

Recent data from the American Academy of Arts & Sciences shows that Communication Arts is the largest and most popular of the humanities disciplines. Part of this interest is because we live in a world where communication is a vital part of daily life, regardless of career or industry. But another part, potentially even more important, is the inherent flexibility that students find — not only during college, but in the job market after graduation.

Your interests inspire what you study, allowing you to focus your degree in areas like Advertising and Public Relations, Cinema and Media Arts, Digital Media, and Human Relations. Students can also further their professional and creative interests by doing real-world internships for credit.

Through hands-on learning in our classrooms, in the field and in our audio, video and editing studios, you'll shape the social, creative, critical thinking, and technical communication skills you need for success in industries from media to business, healthcare, education, and more.

Programs

- Communication Arts Major (B.A.) (p. 656)
- Communication Arts Major: Advertising and Public Relations Option (B.A.) (p. 659)
- Communication Arts Major: Cinema and Media Arts Option (B.A.) (p. 661)
- Communication Arts Major: Digital Media Option (B.A.) (p. 663)
- Communication Arts Major: Human Relations Option (B.A.) (p. 665)
- Communication Arts Minor (p. 668)

Faculty

Communication Arts Faculty

Communication Arts Major (B.A.)

https://manchester.unh.edu/program/ba/communication-arts-major

Description

Communication Arts majors explore the creativity, artistry, and impact of human communication. The program offers a rich variety of learning experiences, including:

- Working with cutting-edge digital media in state-of-the-art sound and video production studios and a high-definition editing suite with full Adobe creative cloud access.
- Discovering how communication theories and practices shape personal identity, social skills, professional relationships, and human relations.
- Enhancing your media writing, social media, public relations, and strategic communication skills.
- Exploring the history of media using a super-tech screening room with surround sound.
- Developing hands-on research activities, creative media projects, and internship experiences that link students with businesses, nonprofits, and the community.

To complete the major, students can take courses from across the Communication Arts curriculum, or they may choose to focus their coursework in one of four suggested areas of study: Advertising and Public Relations*, Cinema and Media Arts*, Digital Media*, or Human Relations*.

A degree in Communication Arts prepares students for today's communication-driven society. The program offers students the knowledge and skills they need to succeed as professional communicators, media artists, and entrepreneurs working in a variety of careers. Our alumni have gone on to work in fields such as radio, television, film, web, digital video, corporate communications, journalism, public relations, social media, advertising, sales, strategic communication, audience research, counseling, conflict mediation, human resources, and more. A Communication Arts degree also creates pathways to careers in government, social services, public education,

and community affairs, where employers seek graduates who can think creatively and communicate effectively to a variety of audiences and constituents.

Communication Arts faculty bring exceptional expertise to the classroom and are actively engaged in their own creative and scholarly work. They regularly share their knowledge with audiences around the state, the country, and the world. Some are also experienced professionals who bring current, real-world knowledge from the workplace to the classroom. In addition to classroom instruction, the program also provides students with exceptional access to experiential learning opportunities (internships, community-based research, service learning, and media production projects) that occur within real-life settings.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

* Advertising and Public Relations, Cinema and Media Arts, Digital Media, and Human Relations are **Degree Options** that appear on the official UNH transcript and diploma. The specific requirements for each Degree Option are presented elsewhere in this catalog. Students are encouraged to contact the Communication Arts program coordinator or their academic advisor to discuss whether a Degree Option is the right choice for them.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Communication Arts (CA) majors must complete 10 courses (40 credits) and maintain a minimum overall grade point average of 2.0 in the major. Transfer students must complete at least 20 credits in the Communication Arts major at UNH. Communication Arts majors may use up to two CMN and/or CA courses toward both the Communication Arts major and UNH Discovery Program requirements.

Code	Title	Credits
I. Required Core Courses [1]		
CMN 455	Introduction to Media Studies	4
CMN 456	Propaganda and Persuasion	4

CA 612	Narrative	
CA 615	Film History/Theory and Method	
CA 618	Documentary	
CA 720	Seminar	
CA 795	Independent Study	
Total Credits		**8**

Capstone Requirement

The capstone requirement will be satisfied in a student's senior year by completion of a specific four-credit capstone course at the 600 or 700 levels. Students may not enroll in a capstone course until they have completed all three CA program core courses (CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction) and at least one Area A course and one Area B course. Students must also have completed the prerequisites for the particular capstone course they seek to take. Exceptions to this rule must be approved by the student's academic advisor and CA program coordinator. The capstone course can also fulfill an Area C course requirement.

The capstone experience offers seniors an opportunity to synthesize and apply knowledge and skills gained throughout their communication arts

major coursework. The capstone course requires students to conduct an original research study, a creative media project, an internship, community-based research, or an advanced service learning project in communication arts under the close supervision of a communication arts faculty member. Students are strongly encouraged to share their capstone projects with the larger UNH community through participation in the Undergraduate Research Conference, a presentation in the Brown Bag lunch series, publication in the UNH undergraduate journal *Inquiry*, or presentation in some other public venue. Students should work closely with their advisors to make sure the capstone requirement has been satisfied.

Courses that satisfy this requirement include, but are not limited to:

Code	Title	Credits
Capstone Courses		
CA 612	Narrative	4
CA 615	Film History/Theory and Method	4

Student Learning Outcomes

Program Learning Outcomes

Upon completion of the Communication Arts program, students will be able to:

- Analyze how creativity, artistry, narrative, identity, persuasion, and ethics shape messages and relationships produced within a variety of social, organizational, and industry contexts.
- Demonstrate knowledge and skills that give them expertise and proficiency in areas such as human relations, social media, digital video, audio production, graphic design, writing, and speaking.
- Know the history of communication practices and understand how media technologies and messages have impacted societies, cultures, organizations, and businesses.
- Effectively research and creatively explore communication practices, experiences, and trends using high quality sources of information, multiple modes of inquiry, and multiple presentation formats.
- Identify professional interests or career paths by working with the Internship and Career Planning Office and by engaging with communication settings outside the classroom through internships, service learning, field trips, and independent studies.

Communication Arts Major: Advertising and Public Relations Option (B.A.)

https://manchester.unh.edu/program/ba/communication-arts-major-advertising-public-relations-option

Description

Students in the Advertising and Public Relations option develop knowledge and skills relating to the use of strategic communication practices within a variety of settings such as ad agencies, commercial businesses, and nonprofit organizations. A dynamic mix of historical, social, ethical, organizational, creative, analytical, and experiential perspectives is used to create a strong foundation for professional success and graduate study. Coursework covers topics such as earned and paid media, social media, graphic design, media writing, data analytics, and audience research. Some courses use field trips and guest speakers to keep students up-to-date with current trends. An internship in advertising and public relations is required.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Communication Arts (CA) majors must complete 10 courses (40 credits) and maintain a minimum overall grade point average of 2.0 in the major. Transfer students must complete at least 20 credits in the Communication Arts major at UNH. Communication Arts majors may use up to two CMN and/or CA courses toward both the Communication Arts major and UNH Discovery Program requirements.

Code	Title	Credits
I. Required Core Courses [1]		
CMN 455	Introduction to Media Studies	4
CMN 456	Propaganda and Persuasion	4
CMN 457	Introduction to Language and Social Interaction	4

CA 795	Independent Study [1]	
Select one course from the following:		4
CA 501	Internship/Communication in the Urban Community [1]	
UMST 500	Internship [1]	
Total Credits		**24**

[1] Topic must be related to advertising and public relations, and approved by advisor.

Capstone Requirement

The capstone requirement will be satisfied in a student's senior year by completion of a specific four-credit capstone course at the 600 or 700 levels. Students may not enroll in a capstone course until they have completed all three CA program core courses (CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction) and at least one Area A course and one Area B course. Students must also have completed the prerequisites for the particular capstone course they seek to take. Exceptions to this rule must be approved by the student's academic advisor and CA program coordinator. The capstone course can also fulfill an Area C course requirement.

The capstone experience offers seniors an opportunity to synthesize and apply knowledge and skills gained throughout their communication arts major coursework. The capstone course requires students to conduct an original research study, a creative media project, an internship, community-based research, or an advanced service learning project in communication arts under the close supervision of a communication arts faculty member. Students are strongly encouraged to share their capstone projects with the larger UNH community through participation in the Undergraduate Research Conference, a presentation in the Brown Bag lunch series, publication in the UNH undergraduate journal *Inquiry*, or presentation in some other public venue. Students should work closely with their advisors to make sure the capstone requirement has been satisfied.

Courses that satisfy this requirement include, but are not limited to:

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

Upon completion of the Communication Arts program, students will be able to:

- Analyze how creativity, artistry, narrative, identity, persuasion, and ethics shape messages and relationships produced within a variety of social, organizational, and industry contexts.
- Demonstrate knowledge and skills that give them expertise and proficiency in areas such as human relations, social media, digital video, audio production, graphic design, writing, and speaking.
- Know the history of communication practices and understand how media technologies and messages have impacted societies, cultures, organizations, and businesses.
- Effectively research and creatively explore communication practices, experiences, and trends using high quality sources of information, multiple modes of inquiry, and multiple presentation formats.
- Identify professional interests or career paths by working with the Internship and Career Planning Office and by engaging with communication settings outside the classroom through internships, service learning, field trips, and independent studies.

Communication Arts Major: Cinema and Media Arts Option (B.A.)

https://manchester.unh.edu/program/ba/communication-arts-major-cinema-media-arts-option

Description

Students choosing the Cinema & Media Arts Option study the creative media industries with a focus on developing professional skills and knowledge relating to careers in film, television and radio. Courses cover topics such as narrative, screenwriting, audio and video production, film history and criticism, documentary, and audience research methods. Students may elect to take an internship in the area of cinema and media arts to help fulfill requirements for the Option.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Communication Arts Major: Digital Media Option (B.A.)

https://manchester.unh.edu/program/ba/communication-arts-major-digital-media-option

Description

Students choosing the Digital Media option use coursework and hands-on learning to explore the intersections of technology, creativity and artistry with a focus on audio, video and web-based media. Students gain a comprehensive overview of the different stages of a digital media project, from writing and pre-production through production and post-production. Courses cover topics such as web authoring and multimedia, audio and video production, social media and public relations, ethics and law in the digital age, and motion graphics. An internship in the area of digital media is required.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Communication Arts Major: Human Relations Option (B.A.)

https://manchester.unh.edu/program/ba/communication-arts-major-human-relations-option

Description

Students choosing the Communication Arts Human Relations option explore practical, theoretical, and historical perspectives on the study of human relationships in professional and personal contexts. With so many of today's employers emphasizing the value of human communication skills in potential employees, the Human Relations Option offers students the knowledge and hands-on learning they need to develop their oral and written communication skills, as well as their ability to work in teams. Coursework covers topics such as verbal and nonverbal communication, perception, identity, conflict, human resource management, power, health, social psychology, human development, and counseling. An internship in the area of human relations is required.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

B. Communication Practices: Organization, History, and Policy		
Select two courses from the following:		8
CA 527	History of Film	
CA 531	History and Organization of Advertising	
CA 532	Typography I	
CA 536	LGBT Images and Perspectives	
CA 538	Gender	
CA 539	Communicating in Families	
CA 540	Public Relations	
CA 542	Social Media for Organizations and Business	
CA 550	Special Topics in Communication Organization, History, and Policy	
COMP 560	Ethics and the Law in the Digital Age	
ENGL 534	21st Century Journalism: How the News Works	
PHIL 565	Philosophy Through Film	
Total Credits		**8**

Code	Title	Credits
C. Communication Practices: Theory and Research		
Select two courses from the following:		8
CA 610	Communication Technologies and Culture	
CA 612	Narrative	
CA 615	Film History/Theory and Method	
CA 618	Documentary	
CA 720	Seminar	
CA 795	Independent Study	
Total Credits		**8**

Human Relations Option Requirements

The option in Human Relations consists of 24 credits as distributed below. Note that some courses may also be used to fulfill the requirements of the Communication Arts major. Courses applied to the option must be completed with a minimum grade of C- and overall GPA of 2.0. Transfer students must complete a minimum of 12 credits, including the Human Relations Internship, at UNH Manchester.

Code	Title	Credits
Human Relations Option		
Requirements		
Select four courses from the following: [1]		16
ANTH 411	Global Perspectives on the Human Condition: An Introduction to Anthropology	
CA 507	Relational Violence	
CA 508	Conflict in Relational Communication	
CA 520	Special Topics in Applied Communication [2]	
CA 538	Gender	
CA 539	Communicating in Families	
CA 542	Social Media for Organizations and Business	
CA 550	Special Topics in Communication Organization, History, and Policy [2]	
INTR 438	A Socio-cultural Perspective on the Deaf Community	
PSYC 401	Introduction to Psychology	
PSYC 552	Social Psychology	
PSYC 581	Child Development	
PSYC 762	Counseling	
PSYC 791W	Special Topics [2]	
Select one course from the following:		4
CA 612	Narrative	
CA 720	Seminar [2]	
CA 795	Independent Study [2]	
Select one course from the following:		4
CA 501	Internship/Communication in the Urban Community [2]	
UMST 500	Internship [2]	
Total Credits		**24**

1. At least two courses must be above the 400 level.
2. Topic must be related to Human Relations.

Capstone Requirement

The capstone requirement will be satisfied in a student's senior year by completion of a specific four-credit capstone course at the 600 or 700 levels. Students may not enroll in a capstone course until they have completed all three CA program core courses (CMN 455 Introduction to Media Studies, CMN 456 Propaganda and Persuasion, and CMN 457 Introduction to Language and Social Interaction) and at least one Area A course and one Area B course. Students must also have completed the prerequisites for the particular capstone course they seek to take. Exceptions to this rule must be approved by the student's academic

advisor and CA program coordinator. The capstone course can also fulfill an Area C course requirement.

The capstone experience offers seniors an opportunity to synthesize and apply knowledge and skills gained throughout their communication arts major coursework. The capstone course requires students to conduct an original research study, a creative media project, an internship, community-based research, or an advanced service learning project in communication arts under the close supervision of a communication arts faculty member. Students are strongly encouraged to share their capstone projects with the larger UNH community through participation in the Undergraduate Research Conference, a presentation in the Brown Bag lunch series, publication in the UNH undergraduate journal *Inquiry*, or presentation in some other public venue. Students should work closely with their advisors to make sure the capstone requirement has been satisfied.

Courses that satisfy this requirement include, but are not limited to:

Code	Title	Credits

Student Learning Outcomes

Program Learning Outcomes

Upon completion of the Communication Arts program, students will be able to:

- Analyze how creativity, artistry, narrative, identity, persuasion, and ethics shape messages and relationships produced within a variety of social, organizational, and industry contexts.
- Demonstrate knowledge and skills that give them expertise and proficiency in areas such as human relations, social media, digital video, audio production, graphic design, writing, and speaking.
- Know the history of communication practices and understand how media technologies and messages have impacted societies, cultures, organizations, and businesses.
- Effectively research and creatively explore communication practices, experiences, and trends using high quality sources of information, multiple modes of inquiry, and multiple presentation formats.
- Identify professional interests or career paths by working with the Internship and Career Planning Office and by engaging with communication settings outside the classroom through internships, service learning, field trips, and independent studies.

Communication Arts Minor

https://manchester.unh.edu/program/minor/communication-arts

Description

The communication arts minor allows students in other majors to broaden their understanding of human communication while also developing deeper knowledge and practical skills that can enhance their professional lives and complement their major field of study.

Requirements

The communication arts minor requires completion of five courses (20 credits), as outlined below. A minimum GPA of 2.0 in minor courses is required, with no individual grade lower than a C-. Courses used to satisfy Discovery Program requirements may be used to satisfy CA minor requirements. Students should work with their advisor to ensure that any prerequisites for CA courses have been met, or that permission to enter the course has been granted by the course instructor.

Academic policies related to Minors.

Code	Title	Credits
I. Breadth Courses		
Select any two of the following, as long as they are NOT from the same category:		8
Category A:		
CMN 457	Introduction to Language and Social Interaction	
Category B:		
CMN 455	Introduction to Media Studies	
CA 502	Image and Sound	
Category C:		
CMN 456	Propaganda and Persuasion	
CA 450	Introduction to Public Speaking	
II. Depth Courses		
Select any three 500-level (or above) CA courses: [1]		12
Total Credits		**20**

[1] Except CA 501 Internship/Communication in the Urban Community

Note: Students who use CA 502 Image and Sound as a "breadth" course may not use it as a "depth" course.

Computing

The undergraduate computing programs in the Applied Engineering and Sciences Department at UNH Manchester prepare students for successful careers in computer science and information technology and further education in computing-related graduate studies. In our computing programs, students learn computing principles and computational practices to understand how computing machineries, including networks and clouds, work; design and build efficient systems; and apply computations and tools to develop and operate next generation of computing applications.

Programs

- Applied Computing Minor (p. 668)
- Computer Information Systems Major (B.S.) (p. 668)
- Computer Science Major (B.A.) (p. 670)

Faculty

Computing Faculty

Applied Computing Minor

https://manchester.unh.edu/program/minor/applied-computing

Description

Fusing the theory and application of computer science, the applied computing minor develops technical knowledge and real-world skills in IT, programming languages, web development and more. Applied computing focuses on critical thinking and problem solving, which prepares students from all majors with skills that can contribute to the mission of virtually any organization.

Requirements

Academic policies related to Minors.

- The minor requires five COMP courses (20 credits) as outlined below.
- Students must earn grades of at least C- in each course and maintain an overall GPA of 2.0 in minor courses.

Code	Title	Credits
Required Courses		
COMP 405	Introduction to Web Design and Development	4
or COMP 415	Mobile Computing First and For Most	
COMP 424	Applied Computing 1: Foundations of Programming	4
COMP 525	Data Structures Fundamentals	4

COMP 430	Systems Fundamentals	
COMP 500	Discrete Structures	
COMP 520	Database Design and Development	
COMP 530	Machine and Network Architecture	
COMP 625	Data Structures and Algorithms	
Total Credits		**20**

Computer Information Systems Major (B.S.)

https://manchester.unh.edu/program/bs/computer-information-systems-major

Description

The computer information systems (CIS) or information technology (IT) field, in its broadest sense, encompasses all aspects of computing technology. During their program of study, students develop a strong skillset to effectively select, develop, apply, integrate, and administer secure computing technologies to accomplish user goals.

The bachelor of science degree in Computer Information Systems prepares graduates with knowledge, skills, and professional practices to work in the highly integrated field of computing and to grow into leadership positions. The program also enables graduates to further their studies at the graduate level and pursue research in a computing-related discipline.

Career opportunities for students with an undergraduate CIS degree are varied, but may include such areas as software applications developer, data security specialist, database developer/administrator, e-commerce analyst/programmer, help desk manager, multimedia developer, network/system administrator, technical writer, technology trainer, user support specialist, testing and quality assurance specialist, or web developer. Career options exist in a wide range of organizations as all businesses, industries, and nonprofits continue to use, develop, and integrate information technology solutions.

Program Educational Objectives

Within five years of graduation, a CIS student should be able to:

- Apply knowledge and skills in core and advanced information technologies to help an organization achieve its goals.
- Advocate for users of information technologies, whether they are end users of information systems, managers of enterprise applications, developers of IT solutions, or customers of IT-reliant work systems.
- Develop, manage, and evaluate computing and communication systems and services.
- Live and work as contributing, well-rounded members of society.

For additional information contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Students majoring in computer information systems must complete 128 credits to graduate, satisfy the University's Discovery Program, and complete 81 credits in the major with a minimum of C- in each course. Students must maintain an overall cumulative GPA of 2.0 or better.

Transfer students who elect to major in computer information systems must earn 81 approved credits for completion of the their major, of which at least 24 credits must be completed at UNH Manchester.

Concentration to Broaden and Advance Student Learning of Computing Innovations [4]		
Select four courses		16
Total Credits		**81**

1. Any of these courses, except for COMP 500 Discrete Structures, may be used to satisfy the Quantitative Reasoning Discovery requirement.
2. The program prepares students for the workforce and further education in a holistic way by emphasizing communication, collaboration, team work, initiative, appreciation for diversity, and self-direction and responsibility.
3. Advisor permission required.
4. Majors can creatively design a concentration of courses that meet their academic and professional goals and career plans. Four courses can be selected across a wide university curriculum, reflecting majors' interests in a liberal arts, scientific, engineering, interdisciplinary, or professional area of study. The concentration must be approved by the student's advisor before the student's junior year.

Student Learning Outcomes

Program Learning Outcomes

- Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Use systemic approaches to select, develop, apply, integrate, and administer secure computing technologies to accomplish user goals.

The student learning outcomes are aligned with criteria for accrediting information technology programs as recommended by the ABET Computing Accreditation Commission and the ACM Computing Curricula – IT 2017 Information Technology guidelines.

Computer Science Major (B.A.)

https://manchester.unh.edu/program/ba/computer-science

Description

The computer science program combines a solid foundation in computing necessary to succeed in today's start-up and high-tech environments. The program is designed in response to market demand for students proficient in computer science.

Students in the computer science program gain real-world experience through extensive project work and opportunities to interact with industry experts through internships and sponsored research.

Career prospects for students with an undergraduate computer science degree are varied, and may include such areas as applications developer, computer and information research scientist, data security specialist, database administrator, database developer, multimedia developer, network architect, product development manager, quality assurance analyst, software systems developer, user experience designer, or web developer.

Program Educational Objectives

Within five years of graduation, a CS student should be able to:

- Demonstrate mastery of the core areas of computer science
- Invent, develop, manage, and evaluate computing systems and services
- Exercise professional responsibility and have appreciation of the social, legal, ethical, and cultural issues inherent in the computing field.

For additional information contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu), (603) 641-4150.

Student Learning Outcomes

Program Learning Outcomes

- Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

The student learning outcomes are aligned with criteria for accrediting computer science programs as recommended by the ABET Computing Accreditation Commission and the ACM Computing Curricula – CS 2013 Computer Science guidelines.

Engineering Technology

With topics including communications theory, digital signal processing, analog systems, and digital systems. The ABET-accredited **Electrical Engineering Technology** program gives you the practical experience to meet both industry demand and your career goals. Small class sizes mean opportunities to collaborate with faculty who are industry experts, giving you one-on-one attention to excel in the dynamic, highly rewarding field of electronics.

From advanced manufacturing concepts to complex machine design, the ABET-accredited **Mechanical Engineering Technology** program will ignite your fascination with how things work. You'll work alongside faculty experts to learn mechanical design, fluid/thermal technology, production systems, automation engineering and more. Through hands-on experience in the classroom and in the field, this applied degree program gives you the practical experience to turn your passion into a career.

The **Computer Engineering Technology** program blends hardware and software expertise, preparing you to design, test and maintain cutting-edge computer firmware. With hands-on experience and industry-aligned coursework, you'll graduate ready to meet the demand for skilled computer engineers in fields like embedded systems, networking, digital signal processing and more.

Faculty

Engineering Technology Faculty

Computer Engineering Technology Major (B.S.)

https://manchester.unh.edu/program/bs/computer-engineering-technology-major

Description

Computer Engineering Technology (CET) is the fusion of hardware and software engineering, focusing on the design, development and testing of computer firmware. Unlike traditional electrical engineering, CET emphasizes both programming and digital hardware, preparing graduates to work with microcontrollers, networking and system architecture. This discipline is essential in industries like telecommunications, automation and cybersecurity, where professionals bridge the gap between electronics and computing solutions.

Student Learning Outcomes

Program Learning Outcomes

General Engineering Technology

- Problem Solving: an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline.
- System Design: an ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline.
- Communication Skills: an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
- Testing, Measurements, and Interpretation: an ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes.
- Teamwork: an ability to function effectively as a member as well as a leader on technical teams.

Computer Engineering Technology

- Application of electric circuits, computer programming, associated software applications, analog and digital electronics, microcontrollers, operating systems, local area networks, and

engineering standards to the building, testing, operation, and maintenance of computer systems and associated software systems.
- Application of natural sciences and mathematics at or above the level of algebra and trigonometry to the building, testing, operation, and maintenance of computer systems and associated software systems.
- Analysis, design, and implementation of computer system hardware and software.
- Application of project management techniques to computer systems.
- Utilization of statistics/probability, transform methods, discrete mathematics, or applied differential equations in support of computer systems and networks.

Electrical Engineering Technology Major (B.S.)

https://manchester.unh.edu/program/bs/electrical-engineering-technology-major

Description

Engineering technology requires the application of engineering and scientific knowledge and methods combined with technical skills in support of engineering activities. Graduates may work in a variety of areas including engineering design, manufacturing, field service, testing, and sales and may work in management positions related to engineering, manufacturing, and computer technology.

The UNH Manchester BS in Electrical Engineering Technology is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, www.abet.org.

The programs at UNH Manchester are designed to meet the needs of both full- and part-time students with a mix of classes scheduled during the day and in the evening.

For more information, contact the Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Each course required in the major must be completed with a minimum grade of C-. Students must attain a minimum GPA in the major of 2.0.

Code	Title	Credits
Required Courses		
CHEM 405	Chemical Principles for Engineers	4
COMP 424	Applied Computing 1: Foundations of Programming	4
COMP 560	Ethics and the Law in the Digital Age	4

Student Learning Outcomes

Program Learning Outcomes

Engineering Technology program, the student outcomes must include, but are not limited to, the following learned capabilities:

- An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
- An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
- An ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and
- An ability to function effectively as a member as well as a leader on technical teams.

English Studies

- English Minor (Manchester) (p. 676)
- English Studies: Literary Studies Major (B.A.) (p. 677)

English Minor (Manchester)

https://manchester.unh.edu/program/minor/english

Description

With a minor in English, you can complement your major with five classes from our areas of study. We think you'll find that even subjects that seem far apart have an uncanny way of intersecting.

In our literature courses, you might read and research a novel about bioengineering, even as our writing classes give you an opportunity to study the many genres of creative and occupational writing. English study expands your portfolio of transferable skills while keeping your imaginative faculties in high gear.

Employers from across the professional spectrum are looking for employees with skill sets that include those of an English minor—for instance, the ability to think critically, parse challenging texts, and express new ideas persuasively and creatively. You'll be amazed at what an English minor can do for you both personally and professionally.

Requirements

Academic policies related to Minors.

To minor in English at UNH Manchester, students must complete five courses (20 credits).

Code	Title	Credits
Required Courses		
ENGL 419	How to Read Anything	4
Electives [1]		16
Total Credits		**20**

1. ENGL 401 First-Year Writing and ENGL 415s, "Literature and..." courses and ENGL 444s cannot be applied toward the English minor. No more than two transfer courses may be applied toward the English minor. The minimum acceptable grade for each course is C-.

English Studies: Literary Studies Major (B.A.)

https://manchester.unh.edu/program/ba/literary-studies-major

Description

Beginning in the 2025-2026 academic year, the English Studies: Literary Studies major will no longer be accepting new students. Current English Studies: Literary Studies students will continue to have access to the same high-quality education and resources until they graduate.

Students in the English Studies: Literary Studies program advance their power to analyze keenly and write incisively by studying leading-edge and foundational literary works in print, graphic and digital forms. Gaining a mastery of aesthetics and genre, literary theory and cultural history, our students learn to see how language shapes the world on every scale. English Studies: Literary Studies students take an array of literature classes as well as core courses in digital creative writing and professional and technical communication, making them just the sort of versatile, critically aware graduates prized in workplaces today.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

For the English Studies: Literary Studies program at UNH Manchester, students must complete a minimum of 128 credits and satisfy the University's Discovery Program and foreign language requirements, and complete a minimum of 40 credits in major coursework with a minimum grade of C-. The major requirements consist of a minimum of 10 courses. These 10 courses (40 credits) must include the capstone requirement.

Students must earn C- or higher in ENGL 419 How to Read Anything, ENGL 502 Professional and Technical Writing, and ENGL 595 Literary Topics in order for these classes to count towards the major.

Code	Title	Credits
Core Courses		
ENGL 419	How to Read Anything	4
ENGL 502	Professional and Technical Writing	4
ENGL 595	Literary Topics (Digital Creative Writing)	4
Development/Extension [1]		
Select three courses of the following:		12
Any 500 or 600-level ENGL courses in literature, literary theory, poetics, or narrative		
Specialization/Practice [1]		
ENGL 787	English Major Seminar [2]	4
ENGL 797	Special Studies in Literature [3]	4
Select two courses of the following:		8
Any 600 or 700 level ENGL electives in literature, literary theory, poetics, or narrative		
Total Credits		**40**

1. Students must take *two* pre-1800 literature courses in the major. These courses can be taken either in Development/Extension OR Specialization/Practice categories OR from both categories.
2. Capstone course. Students must have earned 90 credits before taking the course.
3. Variable topic seminar colloquium.

Student Learning Outcomes

Program Learning Outcomes

Students will be able to:

- Produce clear, compelling, contextually appropriate and well-supported writing.
- Engage with writing as a rhetorical, collaborative, and recursive process from invention to product.
- Demonstrate versatility in writing and speaking within a variety of academic and professional contexts and platforms (including professional and vocational contexts in the form of internships and/or capstone projects).
- Expertly read and analyze texts--literary and non-literary--from diverse time periods, genres, and authorial perspectives.
- Recognize language as culturally, historically, and socially constructed.
- Adeptly use information literacy and technology skills.

English Teaching

Programs

- English Teaching Major (B.A.) Manchester (p. 678)

English Teaching Major (B.A.) Manchester

https://manchester.unh.edu/program/ba/english-teaching-major

Description

Beginning in the 2025-2026 academic year, the English Teaching major will no longer be accepting new students. Current English Teaching students will continue to have access to the same high-quality education and resources until they graduate.

Inspire others to share your love of reading and writing with our English Teaching program. Considered one of the region's best, our program gives you the tools, guidance and real-world experience for a rewarding career in English education.

Our faculty are not only master teachers but also thoughtful mentors to those seeking to become educators. They offer a diverse spectrum of expertise—from Shakespeare to 21st-century literature and media, from philosophies of teaching to deep knowledge of standards-based literacy instruction.

The Accelerated Master's program in Durham allows you to work on requirements for your Master of Arts in Teaching degree while still in the bachelor's program. Upon acceptance into the master's program, you can apply 12 undergraduate credits to the advanced degree. Once you've finished your B.A., you'll complete graduate-level coursework in the master's program and undertake a year-long teaching internship where you'll collaborate with a teacher to apply your knowledge in a classroom.

Students who complete the master's program are uniquely well prepared to become leaders in the profession over the long term. State certification is transferable to most other states, and, after five years, 88.7% of UNH master's program graduates report that they are teaching or employed in an education-related job. Join the English Teaching major and turn your passion for English into a fulfilling career serving your community!

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

All English Teaching majors must complete 10 courses (40 credits). Six of 10 courses must be at the 600-level or above. The English Teaching major prepares prospective teachers of middle- and high-school English (grades 5-12). This degree does not provide state certification. Students who wish to be certified must apply for admission to graduate study within the Education Department. Certification requires an additional year of course work and internship at the graduate level. The graduate coursework and internship can typically be completed in the 12 months following completion of the B.A. in English Teaching.

- Prospective English Teaching majors should enroll in EDUC 500 Exploring Teaching in their sophomore year, or, if a transfer student, as soon as possible thereafter.
- ENGL 419 must be completed with a minimum grade of C. All other major courses must be completed with a minimum grade of C-.
- English Teaching majors must have a 2.5 GPA in the following program requirements:

Code	Title	Credits
Required Courses		
ENGL 419	How to Read Anything	4
ENGL 514W	British Literature III: Revolts, Renewals, Migrations [1]	4
ENGL 516W	American Literature II Money, Migration, and Modernity: Huck Finn to Beloved	4
ENGL 657	Shakespeare	4
ENGL 710	Teaching Writing	4
ENGL 791	English Grammar	4
ENGL 792	Teaching Literature and Literacy	4
Select one additional 500/600/700-level English course		4
Select two additional 600/700-level literature courses		8
Total Credits		**40**

Diversity Requirement

Students must take one course that focuses on diversity in race, ethnicity, religion, gender or class, and theories concerning them. This course counts toward the ten courses described above. Consult with your advisor about courses that will fulfill this requirement.

Capstone Requirement

Students must take one capstone course during their senior year from any approved ENGL 700-level course in the major. Students must have earned 90 credits before taking the course. Consult with the program coordinator about courses that will fulfill this requirement.

[1] Cannot be repeated under different course title.

Student Learning Outcomes

Program Learning Outcomes

Students will:

- Design activities, lessons, and units to meet established standards and objectives in writing and language use.
- Adapt materials for a variety of students' needs, including exceptional learners.
- Identify teaching resources among mentors, professional literature, conferences, organizations (e.g., National Council of Teachers of English [NCTE]), technology, and websites.
- Reflect and write on the theoretical bases for instructional decisions, evaluating professional literature and using appropriate academic conventions.
- Deliver engaging, on-point writing and language instruction appropriate to audience and content; practice a variety of presentation and discussion strategies.

General Studies

The Associate in Arts in General Studies offers students academic flexibility in a program that combines the foundations of a liberal arts education and elective courses that satisfy personal interests.

Programs

- General Studies (A.A.) Manchester (p. 680)

Faculty

https://manchester.unh.edu/directory/all

General Studies (A.A.) Manchester

https://manchester.unh.edu/program/aa/general-studies

Description

The associate of arts in general studies offers students academic flexibility in a program that combines the foundations of a liberal arts education and elective courses that satisfy personal interests. The A.A. in general studies is the first two years of a baccalaureate program, and all 400-level courses transfer to and fulfill the University's Discovery requirements. Students who earn an A.A. in general studies have a foundation for continued study in any major while they develop problem-solving skills, cognitive skills, and learning techniques that are vital to a lifetime of learning. Many students begin their college study in the A.A. general studies program. Depending on personal interests and academic goals, students may choose to apply to a baccalaureate degree program prior to completion of the A.A. degree.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 64 credits

Minimum Residency Requirement: 16 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery Program

Major, Option, and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

To graduate with an associate of arts degree in general studies, students must complete 64 credits, earn a minimum cumulative GPA of 2.0, and fulfill two types of requirements: University Discovery Program and degree requirements. The program includes nine courses from the Discovery Program core curriculum. Working with their advisors, students enhance their program of study with elective courses where they can explore their interests and possible baccalaureate degree majors. The last 16 credit hours must be UNH courses completed following admission and matriculation, unless permission is granted to transfer coursework from another institution.

Code	Title	Credits
Discovery Foundations		
Two writing-intensive courses, one of which must be:		8
ENGL 401	First-Year Writing	

One course in quantitative reasoning (must be completed within the first 32 credits)	4
One Inquiry or Inquiry attribute course (must be completed within the first 25 credits)	4
Discovery Categories	
Two courses from two of the following categories (one must be a lab course):	8
Biological Science	
Physical Science	
Environment, Technology, and Society	
One course in Historical Perspectives	4
One course in World Cultures or Fine and Performing Arts	4
One course in Social Science	4
One course in Humanities	4
Completion of the Interdisciplinary Core Requirement (may also fill the Humanities category requirement)	4
HUMA 411 Humanities I	
or HUMA 412 Humanities II	
Elective courses	**20**
Total Credits	**64**

Homeland Security

Preparing innovative, dynamic problem-solvers for a safer tomorrow

Today's threat environment is complex and dynamic and includes catastrophic natural disasters, small- to large-scale attacks of violence or terrorism, cybersecurity challenges, climate change, and pandemics. The Homeland Security (HLS) program will give students the tools to help organizations, communities, and the nation be safe and resilient.

Programs

- National Security Intelligence Minor (p. 685)
- Terrorism Studies Minor (p. 685)

Faculty

Homeland Security Faculty

Corporate Security Minor

https://manchester.unh.edu/program/minor/corporate-security

Description

Security threats are all around us. Modern society has demonstrated that all organizations face risks from natural disasters, to disgruntled employees, to foreign terrorists groups such as the Islamic State or Al Qaeda, to domestic terrorists/criminals, to active shooters, cyber-attacks, bioterror threats such as EBOLA, SARS, and anthrax. Further, weather-related events such as Hurricanes Katrina and Sandy, or massive snow storms causing extended shut downs of businesses, tornadoes, earthquakes and potential flood and rain events are always possible and can be devastating to the financial solvency of any organization. Consequently, threats like these have changed how employers evaluate and manage risk.

The relatively rapid rise of the Corporate Security Officer (CSO) in the private sector indicates the deep commitment many organizations now have to enterprise risk management of security threats across all industrial sectors. Corporate security professionals (not "security guards") plan for future potential events, develop and implement risk management, preparedness and resilience strategies that avoid, transfer

or reduce the risk to the organization posed by these threats. The need for corporate security expertise has likely never been greater.

Students should expect that minor courses will only be available on the Durham campus.

Requirements

The corporate security minor requires students to complete five courses (20 credits).

All five courses applied to the corporate security minor must be completed with a minimum grade of C- and an overall GPA of 2.0.

Academic policies related to Minors.

Students must take at least three 500-level or above courses to complete the minor, noting no more than two courses (8 credits) may also be used in the HLS major.

Code	Title	Credits
Required Courses		
HLS 415	Fundamentals of Corporate Security	4

Cybersecurity Policy Minor

https://manchester.unh.edu/program/minor/cybersecurity-policy

Description

The Minor in Cybersecurity Policy introduces students to the basics of cybersecurity, as well as to societal and business mandates for incorporating cybersecurity into an organization's policies and governance structures. We study techniques for communicating about cybersecurity, and we explore solutions for sustaining cybersecurity within a variety of organizations.

This minor is available to CPS Online, Durham, and Manchester students. Students must be accepted into a participating accelerated master's program to complete this minor.

Depending on the courses chosen, this minor may be completed 100% online or in a hybrid format (online/in-person courses). Some courses may be taken at any time, but other courses may be taken only *after a student is accepted into one of the following participating accelerated master's programs*:

- Master of Science in Cybersecurity Policy and Risk Management (MS CPRM)
- Master in Public Policy (MPP)
- Master of Public Administration (MPA)

Requirements

Academic policies related to Minors.

- Some courses may be taken at any time, but other courses may be taken only after a student is accepted into one of the participating accelerated master's programs.
- The minor requires at least five courses. All courses for the minor must be completed with a minimum grade of C- and an overall GPA of 2.0.
- Note that higher minimum grades and GPA may be required for these courses to count toward an undergraduate major or master's degree.
- No more than two courses used to satisfy undergraduate major requirements may be used for the minor.
- If a student is enrolled in both sections of a dual-listed course, only one course section will be counted toward the minor requirements.

Pursuant to Graduate School policy for accelerated master's*, students must complete 90 credits before enrolling in 800-level courses. Students apply to the accelerated master's program in their junior year and once admitted complete 800-level courses in their senior year.*

Code	Title	Credits

Emergency Management Minor

https://manchester.unh.edu/program/minor/emergency-management

Description

The Federal Emergency Management Agency (FEMA) defines Emergency Management (EM) as "the managerial function charged with creating the framework within which communities reduce vulnerability to hazards and cope with disasters." Students completing this minor will have a composite view of emergency management, and its integral role in Homeland Security and resilience, as well as how to design emergency management plans, continuity of operations plans and how to design and evaluate exercises in both the public and private sectors. As such, the minor in EM formalizes an academic credential in an area vital to Homeland Security and of interest to several other disciplines and professions such as business, law enforcement, urban and community planning, environmental studies, and government and military affairs.

Students should expect that minor courses will only be available on the Durham campus.

Requirements

Academic policies related to Minors.

The Minor in Emergency Management will require five courses (20 credits). Two courses are also required by the Homeland Security major (Department of Security Studies) which provides the foundation for the minor and two from the Geography Department. One additional course from a list of electives is required to complete the minor. Students may take an unlisted course as an elective but only with prior approval by the minor coordinator.

Code	Title	Credits

Homeland Security Major (B.S.)

https://manchester.unh.edu/program/bs/homeland-security-major

Description

Though some administrative aspects of the Homeland Security major are managed in Manchester, NH, the program is delivered and academically supported in Durham, NH.

Beginning in the 2025-2026 academic year, program admission has been paused for the Manchester campus.

The UNH Homeland Security program is built upon the expertise and advice of subject matter experts from around the nation. Its proven curriculum includes practical experiences, service and experiential learning opportunities, and applied projects and mentored research that together empower students to manage programs and to lead people. HLS provides students with an impressive array of tools including how to do strategic planning, how to build emergency management and continuity plans, how to perform an organization-wide security and risk assessments, and how to design and evaluate exercises. The 4-year curriculum is flexible and incorporates the ability for students to complete coursework of "breadth" as either two minors, a double major, or a minor and study abroad experience. Students transferring with an associate's degree automatically satisfy the breadth requirement. Ultimately, the Homeland Security program empowers students to be successful on the job market or in graduate school in a broad array of security-related fields.

Homeland security is a broad-field, applied liberal arts degree teaching students critical thinking, writing and analysis skills. As a result, HLS creates several graduate school opportunities and opens students to dozens of career paths in both the public sector (i.e., local, state or federal government), and the private sector or the military. Students will find diverse and rewarding career opportunities in cyber security/ information assurance, intelligence analysis, civil or Foreign Service, diplomatic security, law enforcement at the local, state or federal levels, emergency and disaster management, immigration, border and transportation security, policy making, corporate security, risk management, critical infrastructure protection, human security and more.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

All courses within the major must be completed with a grade of C- or above and an overall GPA of 2.0 or above in major courses.

Code	Title	Credits
Core Major Requirements		
HLS 410	Introduction to Homeland Security	4
HLS 415	Fundamentals of Corporate Security	4
HLS 455	Introduction to Cybersecurity	4
HLS 480	Professional Skills in Homeland Security	4
HLS 505	Political Violence and Terrorism	4
HLS 510	Fundamentals of Emergency Management	4

HLS 770	Internship in Homeland Security	4
or HLS 799	Senior Thesis in Homeland Security	

HLS 790	Capstone in Homeland Security	4
Total Credits		**56**

Breadth Requirement
In addition to the core HLS courses, students must complete 40 additional credits from either Durham or Manchester campuses, or both, in one of five ways:

1. two minors;
2. a minor and a "coherent block"/self-designed concentration (i.e., ROTC credits, or credits earned from another major). The coherent block needs to be approved by the HLS coordinator;
3. a second major or a UNH dual degree;
4. an associate's degree transferred in to UNH;
5. some other combination of coursework with consent of the HLS program coordinator.

Student Learning Outcomes

Program Learning Outcomes

- Conduct research and work collaboratively to deliver professional, written papers, presentations, and briefs.
- Demonstrate knowledge of contemporary or emergent threats, challenges or issues including natural manmade and technological hazards.
- Apply knowledge and tools gained throughout the HLS program to complete a capstone project.
- Complete an internship in HLS (or a senior thesis in HLS).
- Recognize the concepts of ethics and professionalism in the homeland security enterprise.

Homeland Security Minor

https://manchester.unh.edu/program/minor/homeland-security

Description

Today's threat environment is complex and dynamic and includes threats from small- to large-scale attacks of violence or terrorism, to cybersecurity to catastrophic natural disasters such as hurricanes, wildfires, tornadoes and earthquakes. The Homeland Security (HLS) minor will give students an excellent glimpse at what it takes to keep the nation safe and resilient.

The minor in Homeland Security (HLS) is designed to provide a professional experience to students ***not*** majoring in Homeland Security, but who are interested in aspects of the homeland security profession. Students will see how Homeland Security issues, challenges, and tools are related to their specific major and how Homeland Security can be used to embellish their careers. Courses for the HLS minor are offered on the Durham campus only. Students at other locations should contact their advisor to explore alternative options.

Students should expect that minor courses will only be available on the Durham campus.

Requirements

- The minor in homeland security requires five courses (20 credits).
- Students must earn a minimum grade of C- in each course and an overall GPA of 2.0 in minor courses.
- Transfer students may transfer up to two courses, subject to the approval of the HLS program coordinator.
- Courses taken on a pass/fail basis may not be used for the minor.
- Homeland Security majors cannot use the HLS minor as a breadth area.

Academic policies related to Minors.

National Security Intelligence Minor

https://manchester.unh.edu/program/minor/national-security-intelligence

Description

The objective of this academic minor is to allow students to study intelligence issues and challenges related to US national security.

National security intelligence is a secret state activity to understand, influence, or defend against a threat to gain an advantage. Students may take courses in multiple disciplines across UNH while pursuing the national security intelligence minor. Students completing this minor will have a composite view of national security intelligence and related topics that may support career path in the government, private sector, and not for profit realms.

Requirements

Academic policies related to Minors.

The Minor in National Security Intelligence requires five courses. Student completing the minor must take three courses originating in the Department of Security Studies which provide the foundation for the minor. Students will build upon this foundation with two additional intermediate course electives from the Department of Security Studies or other departments across UNH.

Code	Title	Credits
Required courses		
HLS 550	History and Structure of the U.S. Intelligence Community	4

Terrorism Studies Minor

https://manchester.unh.edu/program/minor/terrorism-studies

Description

Terrorism is often a top priority of US national and homeland security agencies such as the Department of Defense, Intelligence Community, FBI, CIA, Department of Homeland Security, and State Department. The terrorism studies minor explores the causes, dynamics, and prevention of violent extremism at home and abroad. Courses explore different types of violent extremism and the range of counterterrorism strategies used in the US and other countries from interdisciplinary perspectives.

Students should expect that minor courses will only be available on the Durham campus.

Requirements

Academic policies related to Minors.

The terrorism studies minor requires students to complete five courses (18-20 credits).

- All courses for the minor must be completed with a minimum grade of C- and an overall GPA of 2.0.
- Students must take at least three 500-level or above courses to complete the minor.
- Transfer students may transfer up to two courses, with approval of the Homeland Security program coordinator.

Code	Title	Credits

POLT 403	United States in World Affairs	
Total Credits		**18-20**

Humanities

- Humanities Major (B.A.) Manchester (p. 686)

Humanities Major (B.A.) Manchester

Description

Beginning in the 2025-26 academic year, the Humanities major will no longer be accepting new students. Current Humanities students will continue to have access to the same high-quality education and resources until they graduate.

The UNH Manchester Humanities program focuses on the world's great cultures and how humans interact with the world. Students take an interdisciplinary approach in studying works from an array of regions and time periods, exploring how cultural productions emerge from a rich social environment. Drawing from history, literature, art, philosophy, politics, and the sciences, the Humanities program not only provides foundational skills in the true liberal arts tradition but also gives students the flexibility to design a program of study keyed to their own interests.

The program attracts highly motivated students who wish to assume significant responsibility for the content and direction of their studies. Individually designed programs may cover the full range of student interests: for example, the social and ethical implications of genetic engineering or the examination of a historical period through study of its literature, arts, history, philosophy, and sciences. Humanities students develop skills of analysis, critical assessment, and effective communication, completing their major with two capstone seminars. The first seminar, explores the nature of creativity through the lives and works of individuals such as Leonardo da Vinci, Kathe Kollwitz, Mozart, Freud, Einstein, and Georgia O'Keeffe. The second seminar, explores current social and political issues with a focus on developments in public policy, science, and business, and their impact on social values.

A Humanities major or minor can complement work in other majors such as English Teaching, Business, Communication Arts, Psychology, or Computing Information Systems. Humanities majors find employment in a wide range of fields or pursue graduate study in subjects such as law or education. The skills and knowledge developed through the major are important in virtually all social and career responsibilities.

For more information, contact the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Student Learning Outcomes

Program Learning Outcomes

Students will be able to:

- Think critically, and across disciplines, in analyzing and comparing works produced within given cultures or historical periods.
- Conduct and present multidisciplinary research in written, oral, or other forms.
- Identify and evaluate primary and secondary sources appropriate for research within the humanities.

Neuropsychology

Explore the human brain to fuel research, innovation, and discovery

Channel your curiosity about the human brain and behavior in our cutting-edge Neuropsychology program. Fusing core components of biology and psychology, this program prepares students for an impactful career in the growing field of neuroscience.

You'll explore the concepts behind normal human behavior, from learning and memory to sensation and perception. You'll also examine complex neurological conditions like dementia, addiction and mood and movement disorders.

Guided by faculty experts in our innovative research labs, you'll gain the empirical, analytic and communication skills that will make you stand out in your career — or in your application to graduate or medical school.

Programs

- Neuropsychology Major (B.S.) (p. 687)

Faculty

Neuropsychology Faculty

Neuropsychology Major (B.S.)

https://manchester.unh.edu/program/bs/neuropsychology-major

Description

Neuropsychology is the study of the human brain and its relation to behavior. The UNH Manchester program focuses on the biological basis of human functioning in both normal and pathological states (e.g., dementia, depression) and therefore, prepares students for careers working with individuals with various mental health and neurological conditions. This interdisciplinary program offers a concentration of core and advanced courses in psychology and biology while providing sufficient flexibility for students to customize their education in order to

meet specific requirements for their chosen career path, including the health professions.

The neuropsychology program prepares students for a variety of careers within the field of neuroscience, including bachelor-level positions and graduate training in research and health professions. At the bachelor-level, students are prepared for positions in healthcare (e.g., clinical laboratory technologist, psychometrician) and biomedical research (research assistant). The program is also designed to provide the flexibility needed to prepare students for graduate training in the health professions, such as being a physician, physician assistant, psychologist, neuropsychologist, or occupational therapist. Students interested in medical school are able to complete premedical requirements within four years.

For more information contact, the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Students majoring in neuropsychology must complete a minimum of 128 credits and satisfy the University's Discovery Program, and complete 56 credits in the major with a minimum of C- in each course and a 2.0 overall grade-point average in all major requirements. Three courses in the major can be used to fulfill both a major requirement and a Discovery requirement, providing students with more flexibility to customize their education.

Transfer students who elect to major in neuropsychology must complete at least 32 credits in the program at UNH to qualify for the degree in neuropsychology. The department's academic advisors will determine the distribution of these credits. Transfer students should note that courses are allotted only the number of credits granted by the original institution (after adjustments for semester-hour equivalents). Thus, students transferring from an institution at which courses carry less than four credits each must make up for any credit deficit created by acceptance of transfer credits into the neuropsychology major.

Specific course selections should be discussed with the advisor. Exceptions to the requirements for the major require a petition to the department.

Code	Title	Credits
Core Courses in Psychology and Biology		
BIOL 413 & BIOL 414	Principles of Biology I and Principles of Biology II (both with lab)	8

Student Learning Outcomes

Program Learning Outcomes

A student successfully completing this program will obtain the following competencies:

- Understand fundamental principles of research in the sciences (i.e. psychology and biology) such as the scientific method and statistical analysis.
- Understand ethical issues in research and clinical applications of neuropsychology.
- Understand the biological basis for normal human behavior (e.g. sensation, perception, learning and memory, etc.) and for common neurological disorders (e.g. dementia, addictions, etc.).
- Demonstrate the ability to gather, analyze, evaluate, and integrate peer-reviewed scientific articles.
- Effectively communicate complex neurobiological topics both orally and in writing consistent with the discipline (i.e. American Psychological Association).

Philosophy

Programs

- Philosophy Minor (Manchester) (p. 689)

Philosophy Minor (Manchester)

https://manchester.unh.edu/program/minor/philosophy

Description

Philosophy is the study of the fundamental nature of truth, existence, beauty, morality, and justice. People study philosophy to understand the basic principles of science, art, and the human condition.

Though this sounds abstract, a background in philosophy is excellent training for any walk of life. Philosophy offers training for a variety of careers by providing a unique combination of life-long skills: analytic and interpretive skills, critical reasoning skills, the enhanced capacity to detect problems and to solve them, excellence in oral and written presentation and defense of one's ideas, skill at asking probing and central questions about the ideas of others (as well as about one's own ideas), and skill at effectively understanding, organizing, and evaluating complex systems of thought.

Requirements

A philosophy minor consists of five (5) philosophy courses (for a total of 20 credits) with a grade of C- or above.

Code	Title	Credits
PHIL course at 500-level or higher		4
Four elective PHIL courses		16
Total Credits		**20**

PHIL 495 Tutorial Reading and PHIL 795 Independent Study may be used towards the minor only with special approval.

Psychology

Explore the biopsychosocial factors that drive thoughts and behaviors

Explore the science of behavior and mental processes in our Psychology program, bringing classroom learning to life in our research labs and in the field. Guided by faculty who are experts in their disciplines, you'll develop a broad background in the field — including perceptual, biological, clinical/counseling, and developmental psychology.

Our program prepares you for careers aimed at improving lives ranging from research assistant to mental health worker, social welfare caseworker to teaching. You'll also foster skills that are attractive and useful in all industries, including critical and logical thinking, data analysis, research, scientific communication and more.

- Psychology Minor (Manchester) (p. 692)

Faculty

Psychology Faculty

Psychology Major (B.A.) Manchester

https://manchester.unh.edu/program/ba/psychology-major

Description

Psychology is the scientific study of behavior and mental processes. The UNH Manchester psychology program provides students with a broad background in psychology, introducing them to both the experimental and clinical perspectives in the field.

The psychology program, through its independent study and internship programs, offers opportunities for participation in cooperating New Hampshire mental health, human services, and rehabilitation facilities. Students have worked in hospitals, halfway houses, mental health centers, and other agencies. The department also invites guest speakers to discuss important issues in the field and sponsors a Psychology/ Neuropsychology Club.

Psychology graduates find employment as trained research assistants, mental health aides in a wide variety of human services agencies, social welfare caseworkers, teachers in special education programs, and professionals in government, business, and industry. It is normally expected that students who wish to do professional clinical work will need to pursue graduate training at the master's or doctoral level.

For more information contact, the UNH Manchester Office of Admissions (unhm.admissions@unh.edu) at (603) 641-4150.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Students majoring in psychology must complete a minimum of 128 credits, satisfy the University's Discovery Program and foreign language requirements, and complete 44 credits with a minimum of C- in each course and a 2.0 overall grade-point average in all major requirements.

Transfer students who elect to major in psychology must complete at least 24 credits in the program at UNH/UNH Manchester to qualify for the degree in psychology. Transfer students must earn a total of 44 approved credits for completion of the psychology major. The department's academic advisors will determine the distribution of these credits. Transfer students should note that courses are allotted only the number of credits granted by the original institution (after adjustments for semester-hour equivalents). Thus, students transferring from an institution at which courses carry less than four credits each must make up for any credit deficit created by acceptance of transfer credits into the psychology major. Only courses taken in a psychology department can be transferred into the psychology major. Of the four 700-level courses required for the major, at least three must be taken at UNH.

The courses listed below are offered on the UNH Manchester and/or Durham campuses; specific course selections should be discussed with the advisor. Exceptions to the requirements for the major require a petition to the department.

Code	Title	Credits
Core Courses		
PSYC 401	Introduction to Psychology	4
PSYC 402	Statistics in Psychology	4

PSYC 791W	Special Topics	
PSYC 793	Internship	
Discovery Capstone		
See below options		
Total Credits		**44**

[1] May be substituted for a Group I or Group II course, but they may not both be used to fill the same group.

Discovery program requirements

- Major department courses may not be used to satisfy Discovery category requirements except for PSYC 402 Statistics in Psychology, which may be used to satisfy the Quantitative Reasoning (QR) Discovery requirement and the major requirement.
- PSYC 401 cannot be used to fulfill a Social Science.
- PSYC 571 cannot be used to fulfill a Historical Perspective.
- In the case that Psychology is a second major, major courses can be counted toward the Discovery requirements.

Discovery Capstone

The Discovery Program capstone requirement, taken during the senior year, may be fulfilled by completing one of the following options:

1. PSYC 793 Internship: This will count towards fulfilling the capstone and a group II 700-level psychology course. By taking PSYC 793 Internship, the capstone will be considered fulfilled.
2. PSYC 795 Independent Study: Students can designate a 4 credit independent study as their capstone experience. Students should also register for PSYC 798 Capstone, a 0 credit course to reflect that the capstone experience is fulfilled.
3. One 700-level course designated as capstone. A capstone designated 700-level course will count towards fulfilling the capstone and a 700-level course. Students will register for PSYC 798 Capstone, a 0 credit course to reflect the capstone experience is fulfilled. **See guidelines below**:

- You may take any eligible 700-level Psychology course in your **senior year** (90+ completed credits) for Capstone credit.
- Ask your professor about the possibility of taking the course for Capstone credit. Remember that your professor is not obligated to designate a course for Capstone credit. Please be respectful in approaching your professor, and if the answer is no, please accept this decision.
- Meet and discuss with your professor what you will be doing to constitute your Capstone experience. In some cases, it will be an extra assignment; in others it will involve the expansion of existing class work. Your professor will use his/her professional discretion to determine what constitutes as your Capstone experience.
- If approved, you will register for PSYC 798 Capstone in addition to the 700-level course.

The psychology department does not accept other departments' statistic courses toward the psychology major. Students who have taken a statistics course other than PSYC 402 Statistics in Psychology must pass a competency exam in order to declare the major and/or register for PSYC 402 Statistics in Psychology.

Students who plan to transfer to Durham should consult with their advisor.

Student Learning Outcomes

Program Learning Outcomes

- Demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings in psychology.
- Understand basic research methods in psychology including design, data analysis, and interpretation; and utilize this knowledge to conduct their own psychological research, with an appreciation of the ethical issues involved in human and non-human research.
- Engage in scientific reasoning and problem solving so that they can evaluate the quality and implications of scientific research.
- Write empirical research reports and literature reviews in American Psychological Association style and present findings from scientific research.

Psychology Minor (Manchester)

https://manchester.unh.edu/program/minor/psychology

Description

The Psychology minor brings a unique perspective on society and human behavior to your studies and adds a set of skills that makes you stand out to employers in a variety of industries.

Requirements

Academic policies related to Minors.

Code	Title	Credits
Required Courses		
PSYC 401	Introduction to Psychology	4
Select two PSYC courses at the 500-level or higher		8
Select two additional PSYC courses		8
Total Credits		**20**

Additional Information

- No more than 4 credits of PSYC 795 Independent Study may be applied to the minor.
- A maximum of 9 approved psychology transfer credits can be applied to the UNH psychology minor.
- Transfer courses must be evaluated for their equivalency. Only courses taken in a psychology department can be applied towards the minor.
- Three-credit transfer courses can be applied as only three credits. Students must make up the credit deficit created by acceptance of transfer courses, with one exception: one three-credit course accepted in transfer may be applied for a total of 19 credits.
- AP Psychology transferred into UNH is equivalent as PSYC 401 Introduction to Psychology.

Public Service and Nonprofit Leadership

Programs

- Public Service and Nonprofit Leadership Major (B.S.) (p. 692)

Public Service and Nonprofit Leadership Major (B.S.)

Description

Beginning in the 2023-2024 academic year, the Public Service and Nonprofit Leadership major will no longer be accepting new students. Current Public Service and Nonprofit Leadership students will continue to have access to the same high-quality education and resources until they graduate.

The bachelor of science degree in public service and nonprofit leadership provides an interdisciplinary, applied approach to the study of public and not-for-profit institutions and actors. Students explore the ways that leaders and citizens work in and around governments to address the complex problems confronted by New Hampshire and the United States today.

All students choose a path that enables them to complete an accelerated Masters in Public Policy or Masters in Public Administration, where they take their most advanced courses in the Major alongside graduate students in the UNH Carsey School of Public Policy. Those courses count as 12 credits toward their BS degree and as 9 credits toward a UNH-Carsey MPP or MPA, should a student choose to continue on to a Masters. Most students entering as first-year students will be able to complete a combined BS/MPA or BS/MPP within five years.

Public Service majors develop essential, transferable skills in critical thinking, practical problem solving, communication, teamwork, leadership, civic and community engagement, research, and data analysis. Coursework emphasizes experiential learning, such as interning at the N.H. State House or with local lobbying firms, engaged research in the real world, and hands-on service learning at a range of not-for-profit organizations in health, human services, advocacy, and the arts. All students must undertake at least one semester-long internship and at least one independent research project to be presented at the UNH Undergraduate Research Conference.

Public service and nonprofit leadership graduates can pursue careers in state and local government, political campaigns, advocacy, non-profit organizations, journalism, education, and more, and are prepared to pursue graduate studies in law, public policy, public administration, community development, and public health.

For more information, contact the UNH Manchester Admissions office (unhm.admissions@unh.edu). For current students, contact the UNH Manchester Academic Advising office (unhm.advising@unh.edu).

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Students must complete 128 credits to graduate, including 44 credits in the public service and nonprofit leadership major. Students must maintain an overall cumulative GPA of 2.0 and a cumulative GPA in the major of 2.0. No credit toward the major will be given for any course in which the student receives a grade of less than C-. Students also must fulfill the UNH Discovery Program requirements. Up to three courses may be used toward both the public service and nonprofit leadership major and UNH Discovery Program requirements. Transfer students must take at least 28 credits in the major at UNH Manchester.

Student Learning Outcomes

Program Learning Outcomes

By the end of their degree program, Public Service & Nonprofit Leadership majors should be able to demonstrate the following knowledge, skills, and core values so that they are positioned to be leaders in public and nonprofit organizations and effective analysts of and advocates for effective public policies.

Knowledge

- Describe key theories of policymaking, and explain which of them they think is most useful to make sense of particular issues in particular historical periods.
- Describe the relations between the public, private, and not-for-profit sectors as they effect politics, power, and policy making and explain how those relationships have changed over time.
- Describe the legislative process in the US and their state, offering specific examples of why some Bills become law and others do not.
- Develop and articulate a Theory of Change that encapsulates their own understanding of how political change has happened in the US in the past and of the ways in which political and policy changes that they care about might be enacted in the present and future.

Skills

- Design and execute an original multi-methods research project, including being able to: craft a well-formulated, researchable research question; develop credible hypotheses; produce a literature review that lays out the context in which their research will take place; design an appropriate means by which their hypotheses might be tested; conduct such original research; analyze those results using quantitative and/or qualitative methods, as appropriate; evaluate the meaning of their findings; produce visual representations (charts, graphs, tables) of their findings.
- Produce a polished, professional-quality Policy Brief.
- Design and execute a legislative advocacy strategy
- Identify sources for relevant, reliable, ethically gathered data and research and retrieve such data, evaluating its validity and reliability.
- Synthesize complex data and information and present it in written or oral form concisely and coherently.
- Effectively present research findings to a public audience, in-person and online.
- Communicate, in writing and verbally, clearly and professionally.
- Work effectively in groups and teams.
- Assume leadership roles if and when appropriate.
- Apply theories of leadership and management to their actually existing workplaces.
- Demonstrate capacity for graduate-level work in Public Policy, Public Administration, and related disciplines in the social sciences and human services.

Values

- Embody and act upon knowledge of cultural differences and an appreciation for the diversity of human experience and perspectives.
- Articulate the value of open democracy and engaged citizenship in building healthy communities at the local, national and global levels.
- Describe their own professional mission and their ethic of service.

Peter T. Paul College of Business and Economics

Lucy Gilson, Dean
Luciana Echazu, Associate Dean for Undergraduate Education
Victoria A. Parker, Associate Dean of Graduate Education and Faculty Administration

The Peter T. Paul College of Business and Economics (Paul College) empowers students to be mindful, dynamic leaders through rigorous academics and experiential-learning opportunities led by industry experts and researchers—creating an engaged academic and professional community. Paul College prepares students for careers in Business, Economics, and Hospitality Management. Each program has its unique disciplinary traditions and the simultaneous commitment to broad educational excellence in critical thought, communication, analytic skills, digital literacy, and ethical reasoning.

Paul College's undergraduate curricula combine a breadth of liberal education with specifics of professional education in business administration, economics, and hospitality management. In tandem with their studies at Paul College, undergraduates enrolled in Paul College programs take part of their coursework in other colleges in the University in order to fulfill the Discovery Program requirements. Beyond those requirements, students are encouraged to elect additional courses in the arts, social sciences, humanities, mathematics, and sciences. Thus, students who complete the Paul College programs in business administration and economics programs develop an impressive portfolio of marketable skills and knowledge base that may be applied to a variety of fields.

Accreditation

Peter T. Paul College of Business and Economics is accredited by the Association to Advance Collegiate Schools of Business (AACSB) for the degree programs of business administration and hospitality management.

Degrees

- Bachelor of Arts (B.A.) in Economics
- Bachelor of Science (B.S.) in Analytical Economics
- Bachelor of Science (B.S) in Business Administration

For information concerning advanced degrees, see the Graduate Catalog.

Degree Requirements

Paul College degree candidates must satisfy all of the University Discovery Program requirements for graduation as well as the particular requirements of their individual major programs. Modifications tend to occur in major(option) programs during the four-year period of a student's undergraduate career; Students are expected to conform to these changes. In addition, candidates must complete a math course (MATH 422 Mathematics for Business Applications, MATH 424A Calculus for Social Sciences, or equivalent transfer course. Economics majors must also satisfy specific requirements associated with the bachelor of arts degree (see bachelor of arts degree requirements).

In order to graduate, students must achieve a grade-point average of at least 2.3 (2.0 for the B.A. in economics) in the major courses and a minimum grade of C- (for graded courses) or CR (for credit/fail courses) in each major course. Course listings are provided by program, or in the case of business administration by department:

- Accounting and Finance (ACFI)
- Business Administration (ADMN)
- Decision Sciences (DS)
- Economics (ECON)
- Hospitality Management (HMGT)
- Management and Entrepreneurship (MGTE)
- Marketing (MKTG)

Prior to attaining junior rank, students will be considered "provisional Paul" students. Students are limited to two Paul College major required courses per semester during this period. A minimum overall GPA of 2.3 at UNH must be maintained by all Paul students in order to remain in the College. If the minimum overall GPA drops below 2.3 during the provisional period, the student will be placed on Paul College probation for one (1) semester. Failure to achieve a minimum overall GPA of 2.3 after the probationary semester will require the student to change to a major outside Paul College.

Paul College courses may not be taken on a pass/fail basis by a student majoring in business administration or economics. Any Paul College major required course in which a grade below C- is obtained must be repeated. No more than two Paul College courses may be repeated and each course may be repeated at most one time.

Students transferring into Paul College from other universities must have major courses reviewed and approved by the faculty through the Paul College Undergraduate Programs Office to be considered for major requirements. Transfer credit is normally granted only for 400- and 500-level courses, and normally only when the transferring institution is AACSB-accredited.

Paul College Programs

FIRE (First-year Innovation and Research Experience)

FIRE is an integrated, team-based, and game-like experience, developed for first-year students. Launched in the 2015-2016 academic year and under the direction of the Undergraduate Programs and Advising Office, this program was designed to expand upon the principles and mission of the Peer Advising program by engaging first-year students in developing habits and strategies for success. Students complete a one-credit, credit/fail course each semester (PAUL 405 FIRE: First-Year Innovation and Research Experience I/PAUL 406 First-Year Innovation and Research Experience II), guided by peer mentors (selected upper-class students) and alumni. Students collaborate and compete, both individually and in teams, through academic challenges, research, and game scenarios culminating in participation at the Undergraduate Research Conference (URC). PAUL 405 FIRE: First-Year Innovation and Research Experience I and PAUL 406 First-Year Innovation and Research Experience II are required for all first-year students.

More information can be found on the FIRE webpage.

FOCUS (Finding Opportunities, Careers, and University Success)

Dedicated to second-year student success**,** the FOCUS Program bridges academic and experiential learning through its emphasis on

skill development and exploration. Through PAUL 505 FOCUS: Finding Opportunities, Careers, and University Success, a two-credit, credit/fail course, students will explore academic pathways, prioritize personal and professional development opportunities, and connect their interests to future career opportunities. The FOCUS Program fosters an inclusive environment that elevates student well-being, university success, and career readiness. PAUL 505 is required for all second-year students.

International Programs

International education is a high priority of Paul College with many Education Abroad opportunities available. Through semester abroad and short-term programs, students have the ability to immerse themselves in a variety cultural environments to better prepare for a career in a globalized business industry. Paul College students may engage in a diverse array of opportunities:

- Study abroad in countries including, but not limited to: Australia, China, Hungary, Ireland, Italy, Korea, Portugal, and Spain
- Faculty-led programs to destinations such as Italy, Cuba, Greece, and England.
- International internships
- Research grant programs
- Volunteer or non-profit work

Students are encouraged to begin planning their international experiences early on in their academic careers by visiting the Paul College Undergraduate Programs and Advising Office. In most cases, students are able to take a semester abroad without losing any time towards graduation. Paul College students are highly encouraged to study abroad at schools accredited by the AACSB (Association to Advance Collegiate Schools of Business) and/or EQUIS (European Quality Improvement System). More information about international experiences can be found on the Paul College website as well as by programs offered through UNH Global.

Transfer Credit Policy

Students transferring credits from other universities to a Paul College major must have the courses reviewed and approved by the faculty through the Paul College Undergraduate Programs Office to be considered for major requirements. Transfer credit is normally granted only for 400- and 500-level courses, and normally only when the transferring institution is AACSB-accredited.

Current Enrolled UNH Student Transfer Credit Policy

All international and domestic transfer coursework must be approved in advance.

Subject to approval of each individual course, students may transfer from other universities:

- No more than 50% of the coursework for the option
- No more than 30% of the coursework for the major core courses

In total, Paul College students may transfer no more than 50% of their major coursework from domestic and study abroad programs combined.

External Transfer Student Transfer Credit Policy

All major related coursework taken prior to enrolling at UNH must be evaluated by the academic department. This review will determine if the course(s) will satisfy major requirements. Although the university may have accepted credit for your transfer courses, this does not necessarily mean they will satisfy specific major requirements. Students have up to one semester after matriculation to reconcile transfer credit.

After individual course evaluations:

- Students must complete at minimum of 6 major courses at UNH.
- Students must complete at least 50% of their option coursework at UNH.
- Students may transfer up to 50% of the coursework for the option and no more than 60% of their option and core coursework combined.

Advising System

Undergraduate advising in the Paul College is carried out jointly by dedicated academic advisors and faculty. The academic advisors are based in the Paul College Undergraduate Programs and Advising Office, where student academic records are kept. The advisors assist students in program planning, preregistration, understanding and meeting general academic/degree requirements, and general career planning. In addition, the advisors coordinate study abroad opportunties and cohort programs.

Undergraduates are encouraged to develop an advisory relationship with one or more faculty members with whom they have mutual interests. By providing their own experience and expertise, faculty may provide additional support to students for course, program, and career selection. All students are urged to seek as much assistance as they need from appropriate sources, but are reminded that theirs is the ultimate responsibility for knowing and meeting the various academic requirements for a degree.

Five-Year Programs

Four-One Program: BS – MSBA

The accelerated MS in Business Analytics program offers students the opportunity to start their graduate education while completing their undergraduate degree. This innovative program reduces the time required to earn a highly sought-after master's degree in BusinessAnalytics. Students take up to two dual-credit courses during their senior year, saving time and graduate tuition. Designed for students with a strong interest in data and analytics, this program emphasizes real-world applications, including coursework in Python programming and access to the UNH Center for Business Analytics. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits, and details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MSE

The accelerated MS in Economics program is designed for students interested in careers in business, government, or academia. The program provides flexibility through its industry and academic tracks and enables students to gain real-world experience through an industry consulting project. Students begin their graduate studies with up to three dual-credit courses, saving both time and tuition while positioning themselves for success in fields requiring strong analytical and economic expertise. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits, and details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MSF

The accelerated MS in Finance program allows students to begin their graduate education while completing their undergraduate degree,

preparing them for careers in financial management, investments, or fintech. This program enables students to take up to four dual-credit courses during their senior year, saving time and graduate tuition. Students can tailor their education by selecting a track in Financial Analytics and Fintech, Investments, or a Self-Directed option. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits, and details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MBA

After completion of the bachelor's degree program, students may apply tothe Paul College Master of Business Administration full-time program.This innovative curriculum is designed specifically to accelerate yourprogress through this highly-ranked AACSB-accredited MBA program.Details are provided in the Programs of Study sections of this catalog andthe Graduate Catalog.

Four-One Program: BS – MSA

The American Institute of Certified Public Accountants (AICPA), thenational association of professional accountants, mandated that fiveyears of university education be required for national certified publicaccountant (CPA) certification as of the year 2000. Most states haveapproved similar requirements for licensing/certification. PaulCollege offers an accelerated master's program that can be completed in as little as 4.5 years, designed for students who desire aprofessional accounting career. The program leads to the joint awardingof a Bachelor of Science in Business Administration and a Master of Science in Accounting degree. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits. Details are provided in thePrograms of Study sections of this catalog and the Graduate Catalog.

Paul College—Minors and Courses for Non-majors

Minors

Paul College faculty has developed a group of courses for non-majors, which, when combined with certain other courses, can constitute a minor in Accounting and Financial Information, Business Administration, Economics, Entrepreneurship, Hospitality Management, Real Estate Finance and Investments, or Sales.

Non-majors

Paul College also serves the needs of undergraduates elsewhere in the University, within the limits of its resources, for whom selected courses in business administration, economics, or hospitality management are desirable complements to their primary course of study. To the extent that space is available after majors have enrolled, a limited number of Paul College courses are open to non-majors who have the prerequisite preparation. A maximum of 32 credits in courses offered by the Peter T. Paul College of Business and Economics may be taken by non-Paul College students. Students interested in these courses should contact the Paul College Undergraduate Programs and Advising Office.

Independent Study/Internship

Juniors or seniors in high academic standing in the Paul College may elect the internship or independent study course for variable credit. For either course, the student must secure a faculty sponsor in the area of interest and submit a written proposal prior to the start of the semester in which the project is to be undertaken. Independent study normally involves research, while internships are usually undertaken with cooperation of an off-campus organization and involve a non-routine but practical application of skills and concepts acquired in a student's program.

Independent studies and internships require considerable self-direction and self-monitoring on the part of the student, who must be in high academic standing. Careful prior review of requirements with the undergraduate adviser and faculty sponsor is necessary. Students may earn no more than 16 credits combined in internships, independent studies, field experience, and supervised student teaching experience.

Accounting and Financial Information (Minor)

https://www.unh.edu/program/minor/accounting-financial-information

Description

The **Minor in Accounting and Financial Information** course of study will help students develop a stronger understanding of the accounting data used for analytical decision-making across all disciplines. Accounting is "the language of business" and every entity uses accounting information for decision-making purposes.

Professionals with greater accounting knowledge can provide greater value to clients and employers by understanding not just "top-level" numbers, but also the relationships between these numbers and how accounting choices and management decisions influence these numbers. Complementing competency in other disciplines, the Minor in Accounting and Financial Information will enable students with the knowledge and skills needed to measure and analyze the effects of business decisions and transactions. Further, the minor will help students understand how specific accounting choices can alter the information used in decision-making and affect outcomes. These skills are critical regardless of career path or employer type (i.e.,corporations, small and

medium sized businesses, start-ups, government entities and non-profit organizations all use accounting information for decision-making purposes).

The Minor in Accounting and Financial Information will provide students with a broader set of career opportunities and a knowledge base that enhances their judgment and decision-making skills both in their professional career and personal lives.

Requirements

Academic policies related to Minors.

The Minor in Accounting and Financial Information is open to both Paul College and Non-Paul College students. Paul College students must complete Path 1 all other students can select Path 1 or 2. The minor consists of two required courses (8 credits) and three elective courses (12 credits).

- A minor consists of 20 semester hours with a grade of C- or better and a 2.0 grade point average.
- Courses taken on a pass fail basis my not be used to satisfy minor requirements.
- No more than 8 credits used to satisfy major requirements may be used for the minor.
- Students are responsible for checking pre-requisites for all courses listed.
- All transfer courses must be evaluated for equivalency.
- No more than two transfer courses may be applied to the minor.
- Capacity may be limited.

Code	Title	Credits
PATH 1: Paul College Students		
Required Courses		
ADMN 502	Financial Accounting	4
ADMN 503	Managerial Accounting	4
Select three Elective Courses		12
PATH 2: Non-Paul College Students		
Required Courses		
ACC 501	Survey of Accounting	4
ACC 520	Topics in Accounting (Survey of Accounting II) [1]	4
Select three Elective Courses		12

Code	Title	Credits
Electives [2]		
Three elective courses are required.		
Select a minimum of two ACC elective courses from the following:		
ACC 621	Intermediate Financial Accounting I	
ACC 622	Intermediate Financial Accounting II	
ACC 623	Advanced Managerial Accounting	
ACC 626	Introduction to Federal Taxation	
ACC 627	Financial Statement Analysis	
ACC 620	Topics in Accounting (Accounting Analytics) [1]	
Additional Elective Courses		
If only two ACC courses are selected one additional elective course must be selected from the following:		
PAUL 450	Personal Finance (If only two ACC courses are selected one additional elective from the below:)	
HMGT 618	Uniform Systems for the Hospitality Industry	
HMP 740	Health Care Financial Management (department approval required)	
TECH 750	Intellectual Asset Management for Engineers and Scientists (department approval required, fall semester course only)	
Additional course(s) by petition to the Department of Accounting and Finance		

1 For course as “Topics in Accounting” (or equivalent), please make sure that the course has the same title (not simply the same number) as the listed course for it to count for the minor.

2 Suggested Pathways: The Minor has been designed to allow students from varied backgrounds to pursue study in accounting. The following are NOT required but simply presented as possible groups of courses representing what may be an underlying motivation for studying this Minor.

Suggested Paths and Elective Course Selection [2]		
Certified Management Accountant (CMA) or Chartered Global Management Accountant (CGMA)		
ACC 621	Intermediate Financial Accounting I	
ACC 623	Advanced Managerial Accounting	
ACC 627	Financial Statement Analysis	
Chartered Financial Analyst (CFA) and Financial Analytics		
ACC 621	Intermediate Financial Accounting I	
ACC 622	Intermediate Financial Accounting II	
ACC 627	Financial Statement Analysis	
or ACC 620	Topics in Accounting	
Management Accounting		
ACC 621	Intermediate Financial Accounting I	
ACC 623	Advanced Managerial Accounting	
HMGT 618	Uniform Systems for the Hospitality Industry	
or HMP 740	Health Care Financial Management	
or TECH 750	Intellectual Asset Management for Engineers and Scientists	
Certified Financial Planner (CFP) and Personal Finance		
ACC 626	Introduction to Federal Taxation	
PAUL 450	Personal Finance	
ACC 620	Topics in Accounting (Accounting Analytics)	
or ACC 621	Intermediate Financial Accounting I	
or ACC 623	Advanced Managerial Accounting	

Real Estate Finance and Investments (Minor)

https://www.unh.edu/program/minor/real-estate-finance-investments

Description

The Minor in Real Estate Finance and Investments will prepare students from various backgrounds for a career in the real estate industry. The curriculum is practice-oriented and will develop students’ analytical and problem-solving skills, especially as pertains to finance and real estate. Further, the coursework and related training will enhance a students’ ability to communicate financial information. The Minor is designed to be aligned with the real estate industry’s trends and demands, and it will provide students with exposure to the many aspects of real estate, including investing, financing, appraisal, law, regulation, development, property management, and local and regional real estate rules and regulations.

Coursework for the minor provides students with the foundation required for more advanced study of real estate finance, including critical concepts of time value of money and capital budgeting. Required coursework is additionally aimed at preparing students for the New Hampshire real estate licensing exam and directly related to functional areas of the real estate industry (property development, law, and internship). Students select the final course to complete the minor from a list of approved elective courses offered in a variety of interest areas.

Real estate is relevant to individual lives and practically all aspects of our society. The Minor is intended for undergraduate students from all majors of UNH to develop a strong acumen of real estate finance. In addition, certain majors may have strong synergies with this course of study. This Minor can be particularly beneficial for students majoring in Business Administration, Hospitality Management, Economics, Geography, History, Sociology, Civil and Environmental Engineering, Community and Environmental Planning, and Environmental Sciences to gain valuable knowledge and skills and prepare them for their chosen career path, including in the real estate industry.

Requirements

Academic policies related to Minors.

Minor Requirements

- Students must complete five courses for a total of 20 credits with a grade of C- or better and a 2.0 GPA.
- Students are responsible for checking and fulfilling any prerequisites for courses listed.
- No more than 8 credits used to satisfy Major requirements may be used for the Minor.
- No more than 8 credits may be from transfer coursework.
- Courses taken on a pass/fail basis may not be used for a Minor.

Code	Title	Credits
Required Courses		
ADMN 570	Introduction to Financial Management	4
or FIN 501	Survey of Finance	
or HMGT 655	Hospitality Finance and Development	
FIN 608	Real Estate Finance	4
CEP 672	Fundamentals of Real Estate	4
FIN 620	Topics in Finance I (Real Estate Development and Law) [1]	4
or FIN 695	Real Estate Internship	
Select one additional course from the following:		4
FIN 620	Topics in Finance I (Real Estate Development and Law) [1]	
FIN 695	Real Estate Internship	
ACC 501	Survey of Accounting	
ADMN 502	Financial Accounting	
ECON 653	Law and Economics

GEOG 582	Global Trade and Local Development	
GEOG 591	Making Maps: GIS Fundamentals	
HIST 511	History of New Hampshire	
HIST 618	American Environmental History	
SOC 693	Global Change and Social Sustainability	
SOC 730	Communities and the Environment	
Total Credits		**20**

[1] If a course is listed with "Topics" in the title, students must take the specified section of the course matching the title noted in parenthesis for the course to count towards the minor.

Students may petition to substitute one course on the list by a course of choice approved by the Minor Program Coordinator, provided that university policy for minors is followed.

Student Learning Outcomes

Program Learning Outcomes

- Students will demonstrate knowledge of basic areas of finance and investments as they are related to real estate.
- Students will demonstrate familiarity in subjects pertaining to national and regional real estate, such as types of property ownership, financing, contracts, appraisal, brokerage, property listings, commissions, and property management.
- Students will demonstrate analytical skills in real estate property budgeting and valuations.
- Students will demonstrate the ability to review and analyze real estate capital markets, mortgages, and investments.
- Students will demonstrate an understanding of the development process, product assessment, and legal considerations in the real estate industry.

Business Administration (ADMN)

The business administration program provides students with the pillars of a business education as well as specialized options to propel them on their career paths. The curriculum consists of fifteen core courses as well as option/major courses, which imparts students with expertise in one or two areas of business. At the same time, Paul College students achieve a well-rounded education by selecting courses in the liberal arts and the sciences from other colleges and schools in the University, including to complete University Discovery requirements.The Peter T. Paul College's program in business administration is accredited by the Association to Advance Collegiate Schools of Business (AACSB) and is separate from the business program at the UNH-Manchester campus.

Core Curriculum

The business administration's core curriculum constitutes the fundamental theories, principles, concepts, and skill sets necessary for students to thrive in the professional business world. Each required core course equips students with the knowledge and skills utilized in key areas of business, while building upon their social, competitive, and analytical intelligence. The business administration program also augments its core curriculum with math, ethics, and economics.

In order to graduate, students must achieve a grade-point average of at least 2.3 in the major courses and a minimum grade of C- in each Paul College major course. Core courses are generally completed in the first five semesters of enrollment at Paul College, with the exception of the capstone course.

Options in the Business Administration Program

As students advance, they must declare an option within the business administration program (students can complete two options by choice and only course course can overlap between the two options). Declaration of an option occurs during second semester sophomore year, thus focusing on a particular area of business during their last two years.

The option declaration date is February 15th of the sophomore year. Students are encouraged to discuss their interests with several faculty

members and an academic adviser in this decision-making process. Options comprise a minimum of five courses, but requirements do vary by option and are determined by the nature of the career field. Current business administration options are:

- Accounting
- Entrepreneurial Studies
- Finance
- Hospitality Management
- Information Systems and Business Analytics
- International Business and Economics
- Management
- Marketing
- Supply Chain Management
- Student-Designed

Due to the dynamic nature of the business world, the portfolio of options offered may change from time to time. Students are expected to stay attuned to these changes through Paul College Undergraduate Programs and Advising Office. A change of option/major may only be made once per semester.

Business in Practice (BiP) Program

The Business in Practice (BiP) program enhances Paul College's rigorous academics by bridging the gap between theory and practical application. Through experiential learning projects, you work directly with industry leaders and companies to acquire a deeper grasp of real business issues and responsibilities, giving you the tools, skills and know-how to launch a successful and meaningful business career. The program is designed to be flexible and optimizes your skill level in key intelligence areas most valued by employers.

BiP INTELLIGENCES AND LEARNING GOALS

Students take a minimum of two courses*, one in each intelligence area:

- PAUL 670 BiP-Analytical Intelligence Topics - ability to analyze and evaluate ideas, solve problems and make decisions.
- PAUL 680 BiP-Competitive & Professional Intelligence Topics - ability to gather, analyze and distribute information and ideas about products, customers, competitors or the external environment and professional development.

*Other Paul College courses may be assigned a BiP Intelligence attributes and satisfy a BiP course requirement. Please check with Paul College Undergraduate Programs Office for other potential courses designated with a BiP Intelligence attribute.

Faculty

Business Administration Department Faculty

Business Administration Major (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration

Description

A Bachelor of Science in business administration will help you build the skills, knowledge and experience to land a job and thrive in today's evolving economy. Graduates are in demand in a variety of industries including accounting, finance, information systems and business analytics, management and marketing. Whether you aspire to work for a high-powered firm, start-up or non-profit or launch your own business, a business administration degree opens the doors to many career opportunities.

At Paul College, students in the business administration major take foundation courses in their freshman and sophomore years that cover the fundamental theories, principles, concepts and skill sets in key areas of business, while building upon their social, analytical, competitive and professional intelligence. These foundation courses prepare you to move into a variety of fields and companies. You also must declare an option within your major during the second semester of your sophomore year that provides deeper expertise in a specific business area to propel you on your career path. Many students choose more than one! Options within the major include: accounting, entrepreneurial studies, finance, hospitality management, information systems and business analytics, international business and economics, management, marketing, supply chain management, and student designed.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

The following courses are major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted in those program descriptions. For a detailed schedule/plan of study for each option, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

A typical plan of study follows, showing the major-required courses.

Student Learning Outcomes

Program Learning Outcomes

Business Concepts & Analytical Reasoning Goal 1: Graduates will apply core business knowledge and critical thinking to address organizational challenges and opportunities.

- Analyze organizational challenges and opportunities using core business concepts.
- Apply data-driven reasoning to business decisions using appropriate analytical approaches.

Communication & Collaboration Goal 2: Graduates will communicate effective and work productively in teams.

- Communicate original thoughts clearly and professionally in written and oral formats.
- Contribute effectively to teams, demonstrating individual and collaborative accountability.

Global & Social Responsibility Goal 3: Graduates will demonstrate integrity and responsibility in ethical, social and global business contexts.

- Evaluate ethical and social responsibility issues and recommend actions from multiple stakeholder perspectives.
- Analyze how global and cultural factors shape responsible business decisions.

Business Administration Major: Accounting Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-accounting

Description

The Option in Accounting prepares students for careers in a "recession proof profession" with excellent placement and salary statistics.

Accounting is referred to as the "language of business" because all businesses rely on accounting information for decision-making.

Because accounting is inherently subjective, accounting students learn the analytical skills necessary to make idiosyncratic decisions.

However, in contrast to other professions, accountants also learn a technical knowledge base that allows them to understand how accounting choices can affect the information used for decision-making in all disciplines. This deeper understanding of business data helps accounting professionals provide value to clients and employers.

Because every business relies on accounting information, accounting students can select an industry and position that aligns with their personal interests. Examples of commonly selected positions include audit, tax, financial consulting, and management. The Option provides students with the requisite knowledge to obtain certifications in a variety of areas, including accounting (CPA), management (CMA), internal auditing (CIA), forensics (CFE), and information systems (CISA). In addition to obtaining an undergraduate degree in four years or less, students can apply to the MSA Financial Leadership in Accounting (MSA FLA) pathway to earn both a B.S. and a M.S. in Accounting in 4.5 years. This unique program positions students as a leader in the field and allows them to save on tuition without delaying their entry into the profession. The MSA FLA provides a structured route to two degrees and well-paid internship opportunities. Students may also take advantage of the four-one (5 year) program to earn a M.S. in Accounting at Paul College, which can speed career progression. Irrespective of the position or educational pathway an individual student selects, the demand for accounting professionals exceeds supply, making accounting a great career choice.

Student Learning Outcomes

Program Learning Outcomes

Goal 1: Business Concepts & Analytical Reasoning, Graduates will apply core business knowledge and critical thinking to address organizational challenges and opportunities.

- Analyze organizational challenges and opportunities using core business concepts.
- Apply data-driven reasoning to business decisions using appropriate analytical approaches.

Goal 2: Communication & Collaboration, Graduates will communicate effective and work productively in teams.

- Communicate original thoughts clearly and professionally in written and oral formats.
- Contribute effectively to teams, demonstrating individual and collaborative accountability.

Goal 3: Global & Social Responsibility, Graduates will demonstrate integrity and responsibility in ethical, social and global business contexts.

- Evaluate ethical and social responsibility issues and recommend actions from multiple stakeholder perspectives.
- Analyze how global and cultural factors shape responsible business decisions.

Business Administration Major: Entrepreneurial Studies Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-entrepreneurial-studies

Description

The Option in Entrepreneurial Studies is designed for students interested in entrepreneurship and creativity and who seek to learn about starting high growth business, working for a new venture, investing in start-ups or becoming involved in a new venture creation within an established organization. The ES option fosters an entrepreneurial culture throughout the program with a priority on applied learning in the dynamic environment of entrepreneurial ventures. Students apply what they've learned to a senior project and in conducting due diligence for investors. The ES option studies entrepreneurship from the entrepreneurs, employees and the investor's perspective.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.

**Major GPA requirements as indicated.*

Major Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For an individual schedule/plan of study, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

- Evaluate ethical and social responsibility issues and recommend actions from multiple stakeholder perspectives.
- Analyze how global and cultural factors shape responsible business decisions

Business Administration Major: Finance Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-finance

Description

The Option in Finance provides students with the knowledge and analytical skills necessary to make informed financial decisions for themselves and their organizations. Business students interested in numbers, quantitative analysis, problem solving, utilizing creativity, and practical applications will appreciate this option. Opportunities exist in a variety of fields, including commercial and investment banking, insurance, corporate finance, money management, venture capital, risk management, and real estate.

The job outlook for finance students is strong, and starting and mid-career salaries are typically among the highest of all majors at a university. Many premier jobs in business, such as hedge fund manager, investment banker, and CFO, are in finance.

Business Administration Major: Hospitality Management Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-hospitality-management

Description

The Hospitality Management option in the BS in Business Administration is a specialized program that blends fundamental business principles with a focus on the hospitality industry. Students will be equipped with knowledge and skills essential for managing various facets of hospitality operations, including hotels, restaurants, resorts, and event planning. The required business core courses provide a solid and rigorous foundations in areas like finance, marketing, human resources management, and strategic planning; while the hospitality management specific courses explore industry specific issues, trends, and best practices. The goal is to prepare graduates for leadership roles within the hospitality sector, where they can oversee operations, develop strategies to enhance guest experiences, and drive business growth.

Business Administration Major: Information Systems and Business Analytics Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-information-systems-business-analytics

Description

The Option in Information Systems and Business Analytics (ISBA) will appeal to students who wish to learn how to take advantage of contemporary technologies to solve complex business problems. Pivotal contributors to the success of any venture must be able to understand and communicate both the business needs as well as the technical details of solutions. The option prepares students for a career in a wide range of industries by helping them master the fundamentals of information systems and business analytics, as well as the ability to implement solutions or provide leading-edge, analytics-based solutions to real business problems. Students work on real-world industry projects and apply concepts and problem-solving skills learned in the classroom. All students in the option develop functional knowledge and skills in information systems and business analytics. Beyond the required courses in the option, students may choose between an emphasis in Information Systems or an emphasis in Business Analytics. The ISBA option can be completed as a single or dual option. In either case, the graduate will have tangible knowledge and skills. Regardless of one's interest area or degree, employers look for people that can help them solve problems efficiently and effectively. The ISBA option prepares students to do just that, and continue learning as technology and business continue to change.

Student Learning Outcomes

Program Learning Outcomes

Goal 1: Business Concepts & Analytical Reasoning, Graduates will apply core business knowledge and critical thinking to address organizational challenges and opportunities.

- Analyze organizational challenges and opportunities using core business concepts.
- Analyze organizational challenges and opportunities using core business concepts.

Goal 2: Communication & Collaboration, Graduates will communicate effective and work productively in teams.

- Communicate original thoughts clearly and professionally in written and oral formats.
- Contribute effectively to teams, demonstrating individual and collaborative accountability.

Goal 3: Global & Social Responsibility, Graduates will demonstrate integrity and responsibility in ethical, social and global business contexts.

- Evaluate ethical and social responsibility issues and recommend actions from multiple stakeholder perspectives.
- Analyze how global and cultural factors shape responsible business decisions.

Business Administration Major: International Business and Economics Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-international-business-economics

Description

The Option in International Business and Economics offers an interdisciplinary course of study, providing strong business training for students pursuing careers at organizations with an international focus, particularly in multinational corporations, international banks, and government agencies. It achieves this by combining general business training with in-depth knowledge in economics, finance, and management. Students are strongly encouraged to round out their education with either an internship at an international organization or by studying abroad for one semester.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For an individual schedule/plan of study, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

[1] Students can explore a second option, second major, minor, or general electives.

[2] The International Business and Economics option also requires and international experience which can be satisfied through an approved study abroad or an approved internship at an international organization. Students should discuss their plan to complete the experience requirement with their advisor.

Student Learning Outcomes

Program Learning Outcomes

Goal 1: Business Concepts & Analytical Reasoning, Graduates will apply core business knowledge and critical thinking to address organizational challenges and opportunities.

- Analyze organizational challenges and opportunities using core business concepts.

Goal 1: Business Concepts & Analytical Reasoning, Graduates will apply core business knowledge and critical thinking to address organizational challenges and opportunities.

- Apply data-driven reasoning to business decisions using appropriate analytical approaches.

Goal 2: Communication & Collaboration, Graduates will communicate effective and work productively in teams.

- Communicate original thoughts clearly and professionally in written and oral formats.
- Contribute effectively to teams, demonstrating individual and collaborative accountability.

Goal 3: Global & Social Responsibility, Graduates will demonstrate integrity and responsibility in ethical, social and global business contexts.

- Evaluate ethical and social responsibility issues and recommend actions from multiple stakeholder perspectives.
- Analyze how global and cultural factors shape responsible business decisions.

Business Administration Major: Management Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-management

Description

The Option in Management provides students with the knowledge and skills to assess organizational effectiveness, identify challenges, develop solutions, and implement changes in order to improve internal and external performance. Courses emphasize critical thinking, problem-solving, planning, interpersonal skills related to ethical leadership in the global economy, managing innovation and technology, organizational change and sustainability, and international and cross-cultural issues in organizations.

The option emphasizes the generalist's mindset in concert with a specialist's functional understanding of the firm. This is an excellent option for students who see themselves as "big picture" people. Future career paths include an array of management, supervisory, entrepreneurial, human resources, and other positions in for-profit and non-profit organizations. The option is also recommended for students considering graduate education in management or law.

Business Administration Major: Marketing Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-marketing

Description

The Option in Marketing focuses on how to develop, establish, and maintain products and services of high value for customers as well as how to deliver and communicate them, from both digital and traditional perspectives. The option addresses key linkages critical to effective customer and brand management, from understanding customer needs and problems to delivering appropriate solutions and services. It further examines decision choices facing managers concerning market selection, entry timing, positional advantage to be pursued, targeting, and executional approaches. The option emphasizes digital marketing and analytics across its courses.

- Analyze how global and cultural factors shape responsible business decisions.

Business Administration Major: Student Designed Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-student-designed

Description

A Student-Designed Option (SDO) in Business Administration is for highly motivated and disciplined students to pursue a course of study that is not available through any of the other current options in Paul College. The SDO should be different from any of the existing options and should serve to further the students' intellectual development and future career goals.

The SDO cannot be used to avoid portions of existing options that are presumed to be uninteresting or difficult. For example, the SDO cannot consist of all courses from an existing option with one or two substitutions. The SDO will consist of courses from Paul College, and courses from outside of Paul College from existing disciplines (e.g., Psychology, Art, Homeland Security, etc.).

Students should begin planning for their designed major in their sophomore year by finding a faculty advisor and work with them to draft the proposal. All proposals should be submitted by the fall of the student's junior year.

If you are considering this option you should begin your proposal no later than the second semester of your sophomore year. The formal application deadline is Oct. 15 of your Junior year. To be eligible you must have a cumulative grade point average of at least 3.0.

Requirements

Major Requirements

A typical plan of study follows, showing the major-required courses. Students take 16-18 credits per semester. Discovery Program requirements (including the Inquiry requirement in the first two years) and elective courses are taken as well. Students are expected to follow this course plan. In the first three semesters, students cannot take more than two major courses in a single semester. The options have additional requirements as noted. For an individual schedule/plan of study, students should check with the Paul College Undergraduate Programs and Advising Office for specific recommendations.

PAUL 680	BiP-Competitive & Professional Intelligence Topics	2

[1] This is the capstone course in the business administration program, and satisfies the capstone requirement of the Discovery Program. Students may be required to concurrently enroll in ADMN 700 PAUL Assessment of Core Knowledge (zero credits) for AACSB accreditation purposes.

Depending of the choice of option and the specific requirements thereof, students may be able to take PAUL or non-PAUL electives in their junior or senior year.

Student-Designed Option

Code	Title	Credits
Student Designed Option (SDO) Requirements		**20**
Students will work with a faculty advisor to draft a proposal to be submitted to the Undegraduate Curriculum Committee. Proposals must be submitted by fall of Junior Year. The option must consist of at least 5 courses and include: [1]		
At least two (2) courses from ACC, DS, FIN, MGT, or MKTG departments that meet approval		
At least two (2) other courses from outside of Paul College		
One (1) Additional Course chosen in consultation with your faculty advisor.		

[1] Students interested in the Student Designed Option must meet with their advisor to discuss their interest and obtain the proposal application.

Student Learning Outcomes

Program Learning Outcomes

Goal 1: Business Concepts & Analytical Reasoning, Graduates will apply core business knowledge and critical thinking to address organizational challenges and opportunities.

- Analyze organizational challenges and opportunities using core business concepts.
- Apply data-driven reasoning to business decisions using appropriate analytical approaches.

Goal 2: Communication & Collaboration, Graduates will communicate effective and work productively in teams.

- Communicate original thoughts clearly and professionally in written and oral formats.
- Contribute effectively to teams, demonstrating individual and collaborative accountability.

Goal 3: Global & Social Responsibility, Graduates will demonstrate integrity and responsibility in ethical, social and global business contexts.

- Evaluate ethical and social responsibility issues and recommend actions from multiple stakeholder perspectives.
- Analyze how global and cultural factors shape responsible business decisions.

Business Administration Major: Supply Chain Management Option (B.S.)

https://www.unh.edu/program/bachelor-science/business-administration-supply-chain-management

Description

The Supply Chain Management (SCM) Option is designed for students eager to leverage data analytics and sustainable practices to optimize the flow of goods and services in global markets. Recognizing the pivotal role of supply chains in today's business landscape, the SCM Option equips future leaders with the skills needed to tackle operational challenges and formulate strategic solutions. SCM students will be well-prepared to navigate diverse industries, equipped with an understanding of essential supply chain functions such as planning, forecasting, procurement, logistics, distribution, and price optimization. Graduates will be ready to drive innovation and deliver impactful solutions to real-world business challenges.

Business Administration Minor

https://www.unh.edu/program/minor/business-administration

Description

The Minor in Business Administration offers students majoring in other disciplines the opportunity to develop a well-rounded business background. Students complete coursework in core business areas such as accounting, marketing, management, as well as economics. The minor enables students to enter their selected industries with skills and experience that distinguish them as professionals.

Requirements

Academic policies related to Minors.

- The Business Administration minor consists of completing five courses (20 credits) with a grade of C- or better and a 2.0 grade-point average.
- The following courses only count toward minor requirements and do not carry credit toward Paul College major requirements: ACC 501 , MKTG 530 , and MGT 535

Code	Title	Credits
Required Courses		
ECON 402	Principles of Economics (Micro)	4
ACC 501	Survey of Accounting	4
or ADMN 502	Financial Accounting	
MKTG 530	Survey of Marketing	4
or ADMN 585	Marketing	
MGT 535	Organizational Behavior	4
or ADMN 575	Behavior in Organizations	
Elective		
Select one course from the folllowing:		4
ADMN 510	Business Analytics and Statistics	
ADMN 503	Managerial Accounting

Total Credits		**20**

Pre-Business Path (B.S.)

https://paulcollege.unh.edu/admissions/path-paul-pre-business-program

Description

Path to Paul is a one semester (fall only) pre-business program for academically promising students who don't meet the minimum academic requirements for direct admission to a Paul College of Business and Economics major. Entering first year prospective students who apply to Paul College and are not eligible for direct admission will automatically be considered on a space available basis. To be eligible, students must have a minimum 3.2 high school GPA.

Once enrolled in the pre-business path program, students complete five courses in math, economics, and two discovery program courses, as well as enroll in the Freshman Academic Experience. Upon successful completion of this first semester program with a minimum 2.3 cumulative GPA students can then officially declare a Paul College major.

Requirements

- **Program Length**: one semester (17 credits); upon successful completion, students declare a Paul College major.
- **Major:** students enter as a pre-business major.
- Minimum 2.3 cumulative GPA required.

Code	Title	Credits
Required Courses		
MATH 417	Precalculus for Business and Life Sciences	4
or MATH 422	Mathematics for Business Applications	
ECON 401	Principles of Economics (Macro) [1]	4
or ECON 402	Principles of Economics (Micro)	
PAUL 405	FIRE: First-Year Innovation and Research Experience I	1
Discovery Program Courses		
Select two Discovery Program Courses		8
Total Credits		**17**

[1] ECON 401 or ECON 402 must be completed with a C- or better.

EcoGastronomy

Programs

- EcoGastronomy (Dual Major) (p. 411)

Economics (ECON)

Economics is the study of how societies organize themselves to produce goods and services and to distribute those products among the members of society. In the modern world, a combination of market forces, public policies, and social customs perform these basic economic tasks. Economists use concepts, models, and data to analyze efficiency of resource use, fairness of economic outcomes, and development of global and national economies. The economics programs are designed to introduce students to the tools of economic analysis and to show students how they can use those tools to analyze and better understand real-world situations.

Undergraduate training in economics is an excellent background for a variety of careers, including banking and financial services, journalism, international business, public service, the diplomatic corps, entrepreneurial ventures, and government administration. An undergraduate major in economics is also excellent preparation for those interested in graduate work in law, business administration, and international relations.

The department offers the choice of a B.A. degree in economics or a B.S. degree in analytical economics.The B.A. degree is designed to offer students maximum flexibility in designing a program of study. Students are encouraged to take a wide variety of courses, double major, and take advantage of study abroad programs. The B.S. degree differs from the B.A. degree in that it requires more quantitative and data analysis courses but does not require a foreign language. It provides more structure and direction than the B.A. degree and is more technically focused. Please see Economics programs for further information.

Courses in economics are open to non-majors on a space-available basis. An economics minor is also available, as students majoring in other programs have found that certain economics courses are useful supplements to their own majors and a help in gaining employment.

- Economics Minor (p. 728)

Faculty

Economics Department Faculty

Analytical Economics Major (B.S.)

https://www.unh.edu/program/bachelor-science/analytical-economics

Description

B.S. in Analytical Economics emphasizes the predictive and prescriptive modeling skills that are in high demand in today's labor market. Predictive modeling draws on econometrics and machine learning to uncover patterns in data, estimate causal relationships, and forecast economic and business outcomes. Prescriptive modeling builds on economic theory and quantitative methods to evaluate tradeoffs, optimize strategic decisions, and design effective policy or business strategies. Together, these analytical tools prepare students to translate data and theory into actionable insight for firms, governments, and nonprofit organizations.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: No

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

- B.S. analytical economics majors must complete eleven courses in economics with a grade of at least a C- (1.67) in each Paul College major course and an average grade of 2.3 or better in the major courses.
- In addition, majors must complete MATH 424A and ADMN 403, ADMN 410, and ADMN 510.
- ECON 775 is the capstone course for the B.S. major and satisfies the capstone requirement of the University Discovery Program.

Code	Title	Credits

ECON 720W	Economic Problems	
Total Credits		**61**

[1] Major credit toward ECON 606 Intermediate Microeconomics with Calculus and/or ECON 611 Intermediate Macroeconomic Analysis will be awarded to transfer students only if equivalent courses have been taken at the upper level. Transfer students must take at least five of their economics courses at UNH. All economics-related courses taken at other institutions must be approved by the economics department in order for them to count toward the major.

[2] Or other Department approved quantitative course

[3] ECON 775 Applied Research Skills for Economists is the capstone course for the B.S. major and satisfies the capstone requirement of the University Discovery Program.

Additional Information

- Students may petition to substitute one business administration course for an economics elective if the course is at the 600 level or above and if a grade of C- or better is earned.
- Students may earn no more than 16 credits in internships, independent studies, field experience, and supervised student teaching experience.
- All Analytical Economics majors must satisfy the bachelor of science degree requirements, and all Discovery Program requirements.
- Students satisfy the Inquiry requirement of the Discovery Program before the end of their sophomore year by completing an Inquiry or Inquiry-attribute course within the Paul College, or another course offered by another college at the University.

Student Learning Outcomes

Program Learning Outcomes

- Students have core proficiency in microeconomics. They understand key concepts including opportunity cost, marginal analysis, voluntary exchange, diminishing marginal returns, equilibrium and market structure.
- Students have core proficiency in macroeconomics. They understand key concepts including GDP, inflation, interest rates, business cycles, exchange rates, financial institutions and fiscal and monetary policy.
- Students have strong oral communication skills. This includes fundamental skills in preparing and delivering presentations, as well as being able to explain technical material clearly and concisely.
- Students are able to apply a statistical model to an economic question and interpret the results.
- Students are proficient in applying a programming language to statistical analysis.

Economics Major (B.A.)

https://www.unh.edu/program/bachelor-arts/economics

Description

Bachelor of Arts in Economics emphasizes economic reasoning, data literacy, and versatile communication skills. Upper-level courses apply economic analysis to business and policy problems, integrate substantive data work, and include a significant oral or written communication component. The curriculum offers students exceptional flexibility in designing their programs of study and provides a solid foundation for a wide range of careers. Students are encouraged to participate in interdisciplinary work, double majors, and study abroad programs. Economics majors may choose to focus their electives to fulfill the requirements of the Public Policy and Sustainability option.

[1] Students can explore a second option, second major, minor, or general electives.

Student Learning Outcomes

Program Learning Outcomes

- Students have core proficiency in microeconomics. They understand key concepts including opportunity cost, marginal analysis, voluntary exchange, diminishing marginal returns, equilibrium and market structure.
- Students have core proficiency in macroeconomics. They understand key concepts including GDP, inflation, interest rates, business cycles, exchange rates, financial institutions and fiscal and monetary policy.
- Students have strong oral communication skills. This includes fundamental skills in preparing and delivering presentations, as well as being able to explain technical material clearly and concisely.
- Students are able to use economic models to understand real-world issues relevant to business, public policy and society.
- Students are able to communicate economic concepts clearly in writing. This involves having strong fundamental writing skills as well as being able to explain technical material clearly and concisely.

Economics Major: Public Policy and Sustainability Option (B.A.)

https://www.unh.edu/program/bachelor-arts/economics-public-policy-sustainability

Description

The Option in Public Policy and Sustainability (B.A. degree) examines the factors that influence economic, social, and environmental outcomes, such as unemployment, poverty, economic inequality, health disparities, technological innovation, and pollution. Students will develop the institutional knowledge and theoretical perspective to understand the impact that decisions of individuals, firms, communities, and

governments have on such outcomes. Students will analyze the impact of specific government policies and potential reforms, theoretically and empirically.

This option is designed for students seeking careers in policy analysis and research positions at government agencies; think tanks such as RAND Corporation, Urban Institute, and Mathematica Policy Research; consulting firms such as Abt Associates; and non-governmental organizations.

Requirements

Degree Requirements

Minimum Credit Requirement: 128 credits

Minimum Residency Requirement: 32 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery & Writing Program Requirements

Foreign Language Requirement: Yes

All Major, Option and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Major Requirements

Economics majors must complete eleven courses in economics plus ADMN 510 with a grade of at least C- (1.67) in each Paul College major course and an average grade of 2.0 or better in major courses.

B.A. economics majors may choose to focus their major electives to satisfy the requirements of the option.

Code	Title	Credits

1. Students can explore a second option, second major, minor, or general electives.
2. Students can use three ECON elective courses to satisfy both the Public Policy and Sustainability option and the Economics Elective requirement for the core major required courses.

Student Learning Outcomes

Program Learning Outcomes

- Students have core proficiency in microeconomics. They understand key concepts including opportunity cost, marginal analysis, voluntary exchange, diminishing marginal returns, equilibrium and market structure.
- Students have core proficiency in macroeconomics. They understand key concepts including GDP, inflation, interest rates, business cycles, exchange rates, financial institutions and fiscal and monetary policy.
- Students have strong oral communication skills. This includes fundamental skills in preparing and delivering presentations, as well as being able to explain technical material clearly and concisely.
- Students are able to use economic models to understand real-world issues relevant to business, public policy and society.
- Students are able to communicate economic concepts clearly in writing. This involves having strong fundamental writing skills as well as being able to explain technical material clearly and concisely.

Economics Minor

https://www.unh.edu/program/minor/economics

Description

Students pursuing a minor in Economics acquire the analytical tools needed to analyze how individuals and firms make decisions and how their interactions shape market outcomes. Students develop skills in economic reasoning, data interpretation, and critical thinking that complement majors across the social sciences, business, and liberal arts. For business students, the minor provides a deeper understanding of foundational issues such as incentives, market behavior, and agency concerns. For liberal arts majors, it offers a framework for evaluating public policy and social outcomes. The Economics minor enhances preparation for careers in business, government, consulting, and nonprofit work, as well as for graduate study in law, business, and public policy.

Requirements

Academic policies related to Minors.

- The minor in economics consists of completing five courses (20 credits).
- A minimum of three courses must be taken at UNH.
- All transfer courses must be evaluated for equivalency.

Code	Title	Credits
Required Courses		
ECON 401	Principles of Economics (Macro) [2]	4
ECON 402	Principles of Economics (Micro) [2]	4
Select one course from the following:		4

ECON 765	Machine Learning for Economics	
Any 600 or 700 level ECON course [3]		
Total Credits		**20**

1 ECON 605, ECON 611, ECON 635, may only be applied towards the minor requirements once.

2 Note that many of the elective courses have ECON 401 and ECON 402 as prerequisites.

3 ECON 501 Business and Economic History cannot be used toward the minor.

Entrepreneurship

- Entrepreneurship Minor (p. 729)

Entrepreneurship Minor

https://www.unh.edu/program/minor/entrepreneurship

Description

The Minor in Entrepreneurship in the Peter T. Paul College of Business and Economics is for non-business majors. The minor provides non-business students with concepts, tools and techniques to become creative thinkers, conceptualize and articulate problem statements, construct innovative solutions, and explore and seek opportunities. The focus of the minor is not about creating startups, although this may be an ancillary outcome, rather on entrepreneurial thinking that make the students engage in successful careers in their respective disciplines.

The minor consists of required courses offered by Paul College and two courses from a selective list offered by other UNH Colleges. The Paul courses are designed to follow a proscribed sequence that take the student through the entrepreneurial process.

Requirements

Academic policies related to Minors.

Code	Title	Credits
Required Courses		
MGT 520	Topics in Management (Thinking like an Entrepreneur)	4
MKTG 520	Topics in Marketing (Understanding Your Customer)	4
DS 520	Topics in Entrepreneurship/Decision Sciences (Realizing the Entrepreneurial Dream)	4
Select two courses from the following:		8
HIST 522	Science in the Modern World	
HMP 721	Managing Health Care Organizations	
HMP 722	Health Care Management II	
RMP 775	Entrepreneurial and Commercial Recreation	
TECH 750	Intellectual Asset Management for Engineers and Scientists	
*For other course options contact the Associate Dean for Undergraduate Education		
Total Credits		**20**

Please note:

- The remaining two courses can be from Paul College or the student's home college, depending on suitability and availability of the courses as well as a student's interest to specialize in a specific area within the Minor, and subject to approval – please contact Undergraduate Programs and Advising Office to discuss approval process.
- Some of the listed courses are "special topics" (or equivalent). Please make sure that the course has the same title (not simply the same number) as the listed course in order for it to count for the minor.
- The Entrepreneurship Minor also follows UNH policy for minors

Hospitality Management (HMGT)

The hospitality management program at UNH provides a world-class education, personal attention and support, and real-world and international experience, setting students apart from the competition and ensuring they are well prepared for a successful and meaningful career.

The hospitality management program develops graduates to be senior executives. This is accomplished through personal attention and support, training on cutting-edge industry-specific software and technology, career development, mentoring and placement, and the network connection of seasoned alumni in top industry positions. Graduates have accepted management positions in lodging and resorts, food service beverage, event planning and design, software companies, tourism, travel and recreation, among the many potential opportunities.

An important aspect of the program is the required professional development, which includes practical work experiences, career development, mentoring, and placement, preparing students to be more competitive in the job market and for a successful and rewarding career. Employers look for individuals with relevant industry experience, and this is provided through the required 400 hours of an approved work experience.

The hotel and hospitality management program offers a wide range of international education options to study abroad. We have partnered with business schools in countries such as Spain, Australia, Croatia, United Kingdom, and Italy.

Programs

- Hospitality and Services Management Minor (p. 730)

Faculty

Hospitality Management Department Faculty

Hospitality and Services Management Minor

https://www.unh.edu/program/minor/hospitality-services-management

Description

Hospitality and Services Management Minor is offered as a professional educational opportunity for students as an entree to the world's largest industry, hospitality and tourism. Students pursuing the minor will have opportunities to interview with major hospitality companies for staff and management training positions. In addition, students will be better able to secure meaningful working experiences in the industry during their college career as they progress towards the minor.

The required courses have been selected to ensure all students have a well-rounded learning experience that will strengthen their ability to succeed.

Requirements

Academic policies related to Minors.

The minor consists of completing five courses (20 credits) and is comprised of three required and two elective courses.

- The following courses MKTG 530 and ACC 501 count toward the minor only and do not carry credit toward Paul College majors.

Code	Title	Credits
Required Courses		
HMGT 405	Introduction to Food and Service Management [1]	4
HMGT 601	Management of Customer Services and Experiences	4
HMGT 681	Contemporary Resort Development and Management	4
Electives		
Select two courses from the following:		8
HMGT 570	International Food and Culture	
HMGT 635	Leadership and HR Management in Hospitality and Tourism	
HMGT 661	Event Design, Planning, and Management	
HMGT 667	Advanced Food & Beverage Operations & Event Management (by permission only)	
HMGT 771	International Wine and Beverage	
HMGT 777	Casino Management	
HMGT 798	Topics	
ECOG 401	Introduction to Ecogastronomy	
ACC 501	Survey of Accounting	
or ADMN 502	Financial Accounting	
MKTG 530	Survey of Marketing	
or ADMN 585	Marketing	
Total Credits		**20**

[1] **Practicum Requirement:** Students completing the minor will work at one of the Gourmet Dinner weekends. This will typically be completed during the semester HMGT 405 is taken.

Sales

- Sales Minor (p. 730)

Sales Minor

https://www.unh.edu/program/minor/sales

Description

Minor in Sales – The modern sales professional helps customers solve business problems through active listening, insightful questions, deep empathy, domain competency, and the understanding and communicating of value. The Sales Minor will prepare you to start your career journey into sales by teaching you to sell yourself first and giving you the skills and experience to succeed in your first role. More college graduates will go into sales than any other profession. Why not be prepared and differentiate yourself for the best opportunities by earning a sales minor and developing skills that are transferrable to any profession.

Requirements

Academic policies related to Minors.

The Minor in Sales is open to both Paul College and Non-Paul College students. Please reference the required courses depending on college. The minor consists of three required courses (marketing, sales level-one, sales level-two), two elective courses, and one sales experience. Please contact the Paul College Undergraduate Advising and Programs Office for an up-to-date list of approved elective courses or sales experiences.

- Students are responsible for checking pre-requisites for all courses listed
- All transfer courses must be evaluated for equivalency
- No more than 2 transfer courses may be applied to the minor
- Capacity in courses may be limited
- Some of the listed courses are "special topics" (or equivalent). Please make sure that the course has the same title (not simply the same number) as the listed course in order for it to count for the minor.
- The Sales Minor also follows UNH policy for minors

Code	Title	Credits

School of Marine Science and Ocean Engineering

The School of Marine Science and Ocean Engineering (SMSOE) is the University of New Hampshire's first interdisciplinary school, designed to address today's highly complex ocean and coastal challenges through integrated graduate education, research and engagement. As such, it serves as an interdisciplinary nexus for marine science and ocean engineering teaching and research across the University.

Combining traditional faculty and program strengths in oceanography, marine biology and ocean engineering with an emerging marine policy focus, the School of Marine Science and Ocean Engineering provides its students with the scientific underpinnings of these disciplines while training them to contribute to and engage in scientifically-informed policy and resource management. Both the graduate and undergraduate degree programs and undergraduate minors are offered through programs that are integrated between the school and the appropriate colleges and departments at UNH.

Marine Policy Minor

https://www.unh.edu/program/minor/marine-policy

Description

Marine policy (also referred to as coastal or ocean policy) is a field of study and practice focused on public policy and governance as it relates to marine, ocean, and coastal resources. Effective management of human activities in ocean, coastal, and Great Lakes areas is critical to our future,which includes the setting of public policy as it relates to these systems. Combine this minor with a major such as ocean engineering, biology, wildlife conservation, environmental conservation and sustainability, political science, or others to enhance your career opportunities or prepare for graduate study in science, management, law, or policy.

For more information contact Professor, Gregg Moore, (603) 862-5138.

Requirements

Fellowship Office

The **UNH Office of National Fellowships** provides information, counsel, and editorial support to highly motivated and high-achieving students applying for national and international fellowships and scholarships. The office also assists faculty members who serve as mentors and recommenders and arranges for members of the faculty to take part in interviews and serve on screening committees.

In recruiting, advising, and supporting students who excel in various areas, the office collaborates campus-wide with other offices and departments of the University, including the Beauregard Center, the McNair program, the Honors College, the Global Education Center, and the Hamel Center for Undergraduate Research, in support of the University's Academic Plan.

The services of the Fellowships Office are available to undergraduates, graduate students, and alumni of the University. The office is located in Conant Hall Room 118A and Huddleston Hall Room 201A and can be contacted by phone at (603) 862-0733 or email at national.fellowships@unh.edu. Learn more on the website.

Hamel Center for Undergraduate Research

www.unh.edu/undergrad-research/

The **Hamel Center for Undergraduate Research** encourages students to design and carry out research, scholarly, or creative projects in collaboration with faculty mentors. To facilitate this, the Hamel Center offers a variety of competitive research awards and fellowships specifically for undergraduate students. Research may take place during the academic year (including J-Term) or over the summer, with a wide range of programs available to suit each student's particular needs:

- Research Experience and Apprenticeship Program (REAP) offers high-achieving students the opportunity to apprentice with a UNH faculty mentor for ten weeks of full-time research in the summer after their first year.
- Undergraduate Research Awards (URAs) are available each semester (including J-Term and summer) for students at all levels: first year through senior year. The research time commitment is flexible.
- Summer Undergraduate Research Fellowships (SURFs) for the U.S. offer support for ten weeks of full-time research in the summer following sophomore or junior year.
- The International Research Opportunities Program (IROP) offers support for nine weeks of full-time research abroad in the summer following junior year.
- Also, by registering for INCO 590 Student Research Experience or INCO 790 Advanced Research Experience, students at any level can work directly with faculty members while receiving academic credit and support for research expenses.

Once projects are completed, student researchers may receive further support from a Research Presentation Grant to present their work at a conference off campus. Students may also publish their research findings in UNH's online undergraduate research journal, Inquiry*;* write about their research experience on the Hamel Center's Undergraduate Research Blog; and/or present their research at UNH's Undergraduate Research Conference (URC).

Hamel Center research opportunities are available to students across ALL disciplines.

By conducting research at the undergraduate level, students gain professional skills, hands-on experience, and the opportunity to present and publish their findings in professional venues. Awards from the Hamel Center for Undergraduate Research open doors on real-world disciplinary practice, graduate school, post-baccalaureate fellowships, and professional careers. For information about undergraduate research awards and programs, the *Inquiry* journal, or the URC, contact the Hamel Center for Undergraduate Research at 118 Conant Hall, (603) 862-4323, or visit the website at www.unh.edu/undergrad-research.

Hamel Honors and Scholars College

The Hamel Honors and Scholars College (HHSC) was established in 2024, an evolution of the University Honors Program (UHP) that was created in 1983. The HHSC aspires to be regionally, nationally, and globally recognized as a unique academic community where students and faculty can collaborate on innovative transformative thought, learning, and scholarship. It provides a community for motivated, inquisitive, high-achieving students to interact with outstanding faculty while engaging in experiential and community-based learning, external engagement, and meaningful scholarship.

Admissions

The Office of Admissions collaborates with the Honors College to identify a number of qualified incoming first-year students to be admitted to the Honors College. Transfer students are also reviewed for invitation to the Honors College.#After matriculating at UNH, a number of first-year students whose first semester grades are in the top tier of their year in each college are invited to join the Honors College in January. Students may also apply to join the Honors College if they have a GPA of at least 3.5.

Curriculum

To graduate with a designation of University Honors, students must complete 32 Honors Units. Students who transfer to UNH having earned the equivalent of 3 semesters of credits or more at their previous institutions may complete University Honors with 24 Honors Units, but must meet the minimum for each curricular category as described below.

Students choose which Honors Units they will pursue from a menu of academically enriching opportunities, in consultation with Honors College advisors. Units can be earned from both credit-bearing and non-credit activities. Credit-bearing activities typically award the same number of Honors Units as credits (a 4-credit Honors course is worth 4 Honors Units). For non-credit activities, Honors Units are calculated based on

time spent, with each Honors Unit representing approximately 45 hours of work.

Students must complete Honors Units in 4 categories, each of which specifies a minimum number of units. These minimum requirements account for 14 Honors Units; students may choose what courses and experiences will comprise the remaining 18 Honors Units.

1. **Honors Gateway Experiences:** 2 Honors Units
2. **Honors Courses:** At least 8 Honors Units
3. **Cocurricular Learning:** At least 2 Honors Units
4. **Culminating Experience:** At least 2 Honors Units

Honors Gateway Experiences

To support student belonging and connection, the Honors College offers a variety of Gateway Experiences, which are both learning and social activities. Gateway Experiences range from attending campus events followed by facilitated discussions to place-based experiences exploring New Hampshire's natural environment. Upon completion of 4 Gateway Experiences, students are awarded 2 Honors Units.

Honors Courses

Each semester, the Honors College offers a range of courses designed for enhanced academic rigor and depth. Most of these also fulfill UNH Discovery program requirements. Enrollment in these courses is restricted to members of the Honors College. Students who are not members of the Honors College, but who wish to take an Honors course, may email honors.college@unh.edu#to request permission. Most Honors courses are 4 credits, and confer 4 Honors Units.

Students may also designate regular courses as Honors by making an agreement with the professor and completing the Honors Designation Form, specifying additional Honors-level work that engages with the course material on a deeper level. Honors-designated courses earn 2 Honors Units by default. However, if the student and professor agree that the Honors work will be less or more than the standard amount, they may propose that the course count for 1, 3, or 4 Honors Units.

At least 8 units of Honors coursework are required for graduation with University Honors.

Cocurricular Learning

High-impact cocurricular learning opportunities allow Honors students to focus and expand on areas of interest outside the traditional classroom. These experiences include study abroad, research work and experiences, academic peer mentoring and teaching, applying for certain national fellowships, specially designed community-based projects, and more. Students may select experiences from a pre-approved list or propose their own. Each cocurricular experience is assigned a number of Honors Units based mainly on the required time commitment. Students must complete at least 2 Honors Units of cocurricular experiences in order to graduate with University Honors.

Culminating Experiences

In order to graduate with University Honors, each student must complete a Culminating Experience. The Culminating Experience counts for at least 2 and generally for no more than 8 Honors Units, and is usually completed in the Junior or Senior year. Students may complete the Culminating Experience in the following ways:

- **Honors Thesis:** a work of sustained and independent scholarship completed under faculty supervision. Each major sets its own requirements for the thesis, and students register for the thesis course designated by the department. Alternatively, students may elect to write a thesis outside their primary department. This may be appropriate when a student seeks to work with a specific faculty advisor outside their own department or program, or when the envisioned subject or goals of a thesis would not meet the thesis requirements established for their major. In these circumstances, students may seek the help of Honors College advising staff in locating an appropriate faculty advisor. Students are expected to begin thesis planning and communication with faculty well in advance of the semester in which they register. Honors Units will correspond to credits.
- **As Determined by Honors in Major:** Some departments choose to specify a different final Honors experience in their Honors in Major program (a group design project or theatrical performance, for example). Any thesis or Honors final project that has been successfully completed by a student under the applicable requirements for Honors in Major will also be accepted as the Culminating Experience for earning University Honors. Honors Units will correspond to credits.
- **Honors Synthesis:** The Synthesis is an alternative for students who seek a more holistic, less field-specific final Honors experience. It is an exercise in which students reflect on meaningful learning from throughout their college career, create an appropriate deliverable, and communicate their experience with the Honors peer community. Students must seek prior approval of their Synthesis through a proposal that specifies what deliverable they will produce and why this is the best culmination of their Honors journey. Students are also expected to engage in peer review and to share their Synthesis with other Honors students. The Honors Synthesis counts for 2 Honors Units.

Remaining in the Honors College

Honors College students must maintain a minimum cumulative GPA of 3.5 and make continued progress in their accumulation of Honors Units. Students who do not meet these requirements can lose Honors privileges, including priority registration. If requirements are not met for 2 consecutive semesters, students can be removed from the Honors College. Students will have the opportunity to petition to remain in the Honors College before a decision is made.

A grade of B or higher is required for the Honors Thesis and other final Honors experiences.

Graduating with University Honors

Students are responsible for ensuring that all of their Honors experiences are accurately documented in the Honors Unit Dynamic Dashboard in time to be certified to graduate with University Honors. Students must have a final cumulative GPA of at least 3.5 to be awarded University Honors upon graduation. A grade of B or higher is required for the Honors Thesis and other culminating Honors experiences.

Honors in Major

Most majors at UNH include an option for Honors in Major. Requirements are set by each department, not by the Honors College. Experiences

counting toward Honors in Major typically also count toward Honors College completion, but the awards are separate. Students may graduate with University Honors, Honors in Major, or both.

More Information

More information is available at theHamel Honors and Scholars College#website. Honors College students can track their progress and sign up for Gateways and other experiences via the Honors Unit Dynamic Dashboard. You may also#emailhonors.college@unh.edu, call#(603) 862-3928, or visit the Honors College suite on the second floor of Huddleston Hall.

Health Professions Continuing Education Program

Description

Offered in Durham and Manchester.

WHAT IS THE HEALTH PROFESSIONS Continuing Education Program?

UNH's Health Professions Continuing Education Program, offered at both our Durham and Manchester campuses, is designed for individuals who have earned a bachelors from an accredited college or university but need to complete the prerequisite requirements for admission to a professional healthcare program. Some individuals may need to enhance their existing academic record by retaking some or all their prerequisite coursework to increase the competitiveness of their application. Other individuals may want to change careers and need to complete all their prerequisite coursework.

WHY COMPLETE YOUR Program AT UNH?

You will complete a rigorous academic program and engage in hands-on learning through fieldwork supported by our state-of-the-art facilities. Our Pre-Professional Health Advising Office helps students interested in pursuing professional degrees make the right academic and extracurricular choicest to prepare for the extremely competitive application process. Students who participate in the Health Professions Continuing Education Program will be provided with personalized advising from the Pre-Professional Health Programs Advisor to assist in course registration, answer questions about the application process, review application documents, and navigate other admissions requirements.

WHAT CLASSES DO I NEED TO COMPLETE?

While most professional programs require similar courses, the classes you need to take depend on the type of program you are planning to apply to in the future. It also depends on what type of student you are. Record enhancers may want to retake all their prerequisite courses to improve upon their grades or only retake the classes where they earned below B. Career changers, who may have taken some of the non-science prerequisite courses, may want to retake these courses if they are over 5 years old.

Most students apply to medical, dental, and physician assistant programs; the commonly required courses are listed below:

Code	Title	Credits
Medical & Dental		
BIOL 411	Introductory Biology: Molecular and Cellular	4
or BIOL 413	Principles of Biology I	
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
or BIOL 414	Principles of Biology II	
CHEM 403	General Chemistry I	4
CHEM 404	General Chemistry II	4
CHEM 651 & CHEM 653	Organic Chemistry I and Organic Chemistry Laboratory	5
CHEM 652 & CHEM 654	Organic Chemistry II and Organic Chemistry Laboratory	5
BMCB 658 & BMCB 659	General Biochemistry and General Biochemistry Lab	5
English - one year		8
Psychology - one semester		4
Sociology - one semester		4
Statistics		4
Calculus		4
Physician Assistant		
BIOL 411	Introductory Biology: Molecular and Cellular	4
or BIOL 413	Principles of Biology I	
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
or BIOL 414	Principles of Biology II	
CHEM 403	General Chemistry I	4
CHEM 404	General Chemistry II	4
CHEM 545 & CHEM 546	Organic Chemistry and Organic Chemistry Laboratory	5
BMCB 658	General Biochemistry	3
BMS 503 & BMS 504	General Microbiology and General Microbiology Laboratory	5
BMS 507	Human Anatomy and Physiology I	4
BMS 508	Human Anatomy and Physiology II	4
Psychology - one semester		4
Statistics - one semester		4

Pre-law Advising

The faculty and staff advisors of the UNH Pre-law Advising Committee work closely with students and alumni to identify interests and explore opportunities within legal education. The committee helps students undertake the best possible preparation for legal education while also bringing the excitement of law to UNH students. The committee achieves this goal through careful consideration of the American Bar Association's (ABA) statement on preparation for legal education.

In that statement, the ABA explains why no single major or course is required or recommended for students wishing to explore or prepare for legal study. The ABA does, however, describe certain skills and values that are essential to success in law school and to life as a lawyer. These include analytic and problem solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, task organization and management skills, and the values of serving others and promoting justice.

Pre-law Advising implements the ABA statement by working with student interests and strengths to select UNH courses, internships, leadership opportunities, and experiences that will develop those skills and values. Programmatically, the committee offers individual appointments, sponsors visits to local law schools, and organizes discussions with law school students, admission and financial aid representatives, and with members of the legal community. The committee also provides advising support for LSAT preparation, law school search, writing personal statements, and the application and selection processes.

The Pre-law Advising Office is located in 110 Murkland Hall. Additional information and to schedule an appointment visit the Pre-Law website.

Accelerated Academic Programs

UNH offers three accelerated programs that allow students to earn both a bachelor's degree and a law degree in six years instead of seven:

- English Major: Law 3+3 Option
- History Major: Law 3+3 Option
- Political Science Major: Law 3+3 Option

https://cola.unh.edu/pre-law

Pre-Professional Health Advising

The Pre-Professional Health Programs Advising Office in Rudman Hall provides advising for all students preparing for postgraduate careers in healthcare including, but not limited to: medicine, dentistry, chiropractic, naturopathic medicine, optometry, pharmacy, physical therapy, and physician assistant programs. There is no pre-health major at UNH since professional healthcare programs do not evaluate applicants based on undergraduate major. Interested UNH students should register with the Pre-Professional Health Programs Advising Office online by joining the pre-health email list and be kept informed of important events, opportunities, and deadlines regarding preparing for the upcoming application cycle.

Identifying as a pre-health student at UNH consists of the following:

1. *Taking the prerequisite courses for admission.* A list of the specific prerequisite courses for each intended health profession can be found on the UNH Pre-Health website.
2. *Gaining volunteer and healthcare experience.* Applicants to health professional programs will be expected to demonstrate a sustained involvement in volunteer and community service. It is also expected that applicants have shadowed healthcare providers. Many students volunteer in various healthcare and non-healthcare settings and some students seek out licensure and certificates to provide hands-on patient care. These experiences often include working as an EMT, LNA/CNA, MA, or phlebotomist.
3. *Preparing for entrance exams.* Many professional healthcare programs require their applicants to take a standardized entrance exam prior to matriculation. Students applying to medical school are required to take the MCAT exam. Students applying to dental programs are required to take the DAT. Students applying to optometry programs must take the OAT. The MCAT, DAT, and OAT are standardized, comprehensive exams that test students' knowledge of biological and physical sciences as well as verbal reasoning and writing skills. Exams are usually taken once the student has completed prerequisite coursework. Students applying to physician assistant and physical therapy programs may be required to take the GRE, a more general exam similar to the SAT in structure and content.

Application Process

The Pre-Professional Health Programs Advising Office works with the Pre-Professional Health Advisory Committee, a group of 12-15 UNH faculty members and local healthcare providers, to provide students with comprehensive, confidential evaluation services at the time of application. An application information meeting is held each fall to outline the application process and establish timetables and deadlines. Students should note that the medical and dental school application process begins a full two years before matriculation; e.g., in the fall of a student's junior year if they wish acceptance following graduation. However, a delay of a year or more between graduation and admission is neither unusual nor detrimental, and in many cases, students can use this time to improve their credentials by taking additional courses and/or gaining exposure to the profession.

It is important that students understand that in order to gain admission to a health professional program they must not only satisfy the prerequisite requirements, they must satisfy these requirements at a high level of achievement. The Pre-Professional Health Programs Advising Office can provide students with information on competitive GPA and entrance exam scores for each of the postgraduate health professional programs.

The Pre-Professional Health Programs Advising Office is located in Rudman Hall and can be contacted by phone at (603) 862-3831 or by email at Prehealth.Advising@unh.edu (Premed.Advising@unh.edu).

https://colsa.unh.edu/academics/pre-professional-health-advising

Regional Student Exchange Programs

New Hampshire Consortium (NHCUC) Student Exchange Program

Under the Student Exchange Program of the New Hampshire College and University Council (NHCUC), UNH students may be eligible to enroll for one course per semester, one full semester of courses, or a full year of coursework at a member school on a space-available basis. The NHCUC exchange allows matriculated undergraduates to use educational resources that are not available at the home campus and are considered appropriate for their degree programs. Approval of the UNH academic advisor and exchange coordinator is required, and students must meet all UNH Study Away eligibility standards. Institutions that participate in the NHCUC student exchange consortium include Colby-Sawyer College, Franklin Pierce University, Hellenic American University, New England College, Southern New Hampshire University, Rivier University, Saint Anselm College, UNH Durham, UNH College of Professional Studies, Keene State College, and Plymouth State University. Students will remain as degree candidates and continue to pay normal UNH tuition and fees, but must make their own room and board arrangements if they plan to spend a full semester at another consortium school. For more information and an application, students should contact the UNH Registrar's Office at Registrars.Office@unh.edu.

New England Land-Grant Exchange Program

In order to provide students at the New England land-grant universities with expanded access to unique programs and faculty expertise, the institutions have agreed to encourage student exchanges of one, but not more than two, semesters. To qualify, students must identify a course or combination of courses related to their area of academic interest and not available on their home campus, be degree candidates in good standing with at least a 2.5 grade-point average, be at least first-semester sophomores, and receive permission from the appropriate university exchange authorities at both the home and host institutions. For more information students should contact the UNH Registrar's Office at Registrars.Office@unh.edu.

Reserve Officer Training Corps Programs

Students attending the University of New Hampshire may enroll in the **Air Force Reserve Officer Training Corps** (AFROTC) or in the **Army Reserve Officer Training Corps** (AROTC) at the University.

The Army ROTC and Air Force ROTC offer programs leading to a commission as a second lieutenant in their respective services. Students in either ROTC program may pursue any University curriculum that leads to a baccalaureate or higher degree.

Two- and four-year programs are available. The four-year program is open to freshmen, sophomores, and transfer students. The two-year program is open to students who have at least two academic years remaining in their college/university degree program. In addition to on-campus course requirements, students must attend an officer-preparatory training session for a part of one summer.

ROTC scholarships are offered on a competitive basis by both the Army ROTC and Air Force ROTC. Entering freshmen may compete for four-year scholarships during their last year of high school. Additionally, incoming students may compete for scholarships while already in college if they meet specific ROTC requirements. Scholarships may pay up to full tuition, mandatory fees, and required textbooks for college courses. Incoming students with either a four-year or three-year ROTC scholarship may receive a full or partial room and board grant for the entire time they are on an ROTC scholarship. In addition, all scholarship recipients receive a tax-free monthly subsistence allowance. Non-scholarship students in the last two years of the ROTC program also receive the tax-free monthly subsistence allowance.

Both ROTC programs have administrative and medical requirements, which must be met to qualify for a scholarship and a commission.

More specific information about ROTC programs may be obtained by contacting Army ROTC at (603) 862-1078 or Air Force ROTC at (603) 862-1480.

Army ROTC website

Air Force ROTC website

Air Force Leadership Minor

Description

The minor in Air Force Leadership consists of courses in aerospace studies, two semester-long leadership positions and field training as outlined in the requirements.

Requirements

Academic policies related to Minors.

1. Minimum GPA of 3.20 in Aerospace Studies courses.
2. Successful completion of 8 semesters of AERO 301[1].
3. Held at least two semester-long leadership positions, one of which was a leadership position in the AFROTC Group.
4. Successful completion of Field Training.

Code	Title	Credits
Required Courses		
AERO 415	Heritage and Values of the United States Air Force I [1]	2
AERO 416	Heritage and Values of the United States Air Force II [1]	2
AERO 541	Team and Leadership Fundamentals I	2
AERO 542	Team and Leadership Fundamentals II	2
AERO 671	Leading People and Effective Communication I	4
AERO 672	Leading People an Effective Communication II	4
AERO 681	National Security Affairs/Preparation for Active Duty I	4
AERO 682	National Security Affairs/Preparation for Active Duty II	4
Total Credits		**24**

[1] The program often has National Guard or Reserve service members join the program to transition onto active duty with a commission. Students with this status are exempt from the first year of ROTC requirements because they have already gained this experience during their time in service. As such, AERO 415, AERO 416, and two semesters of AERO 301 are waived for these students in the pursuit of the minor.

Study Abroad Programs

UNH Global

The University offers opportunities for full-time degree candidates meeting eligibility criteria to pursue a wide variety of education abroad experiences, including study, intern, service and research in many countries around the world. UNH faculty-led and exchange study programs are described in this section. Program availability is subject to UNH international risk management policies. All students who study abroad pay a program fee or tuition, study abroad administration fee and an international travel insurance fee. For more information, contact UNH Global at (603) 862-2398 or study.abroad@unh.edu.

Belize

ANTH 674 Archaeological Survey and Mapping in Belize

A January-term course, ANTH 674 Archaeological Survey and Mapping in Belize, offers students hands-on training in survey and mapping techniques, as well as digital cartography using ArcGIS mapping software. For more information, visit cola.unh.edu/belize-mapping.

British Virgin Islands

MEFB 590 Coastlines in Crisis

This spring semester course travels to the British Virgin Islands during spring break. We will explore trends threatening resilience of our coasts and their inhabitants. The science and public perception of coastal threats, sea level rise, and climate-related issues will build a baseline for understanding the issues coastal communities face, including contributing factors, and the role of science, technology, and environmental policy in the delicate balancing act between nature and infrastructure. For more information, visit https://colsa.unh.edu/study-abroad.

Costa Rica

UNHM BSCI 620 Global Science Exploration

BSCI 620 Global Science Exploration includes a spring break trip to Costa Rica investigating living organisms in their natural habitat. Students will participate in pre-trip seminars on the country, local flora, fauna and habitats they will visit. Students will design a project to integrate their personal interests and objections with in-country investigation. Post-

trip seminar will focus on preparation of project and its presentation. Permission required.

Cuba

LLC 555 Discover Cuba - January Term

A January Term course, LLC 555 Discover Cuba: An Arts Experience, illuminates the rich and lively art, history, culture, music, and architecture of Cuba through lectures, tours, guided readings, and site visits. Led by Prof. Lucia Montás (lucia.montas@unh.edu), UNH Spanish Program, students will participate in an online academic component prior to a 10-day experiential learning trip to Cuba. The program will be based in Havana in partnership with Abroadia. All course and site work conducted in English – no knowledge of Spanish required. For more information, visit https://cola.unh.edu/cola-study-abroad/programs/cuba-discover-cuba-j-term.

Germany & German-speaking countries

study abroad in GermanY

Students may study for a semester or a full year through an approved study abroad Partner Program or, in special cases, by applying directly to universities in Germany, Austria, or Switzerland. Many programs require a minimum grade-point average of 3.0 and a B average in the major. Programs vary greatly in academic focus, size, language of instruction, living arrangements, services, and extra-curricular programming provided, and cost. Study abroad goals and requirements should be discussed with a German adviser as early as freshman year. Program and application materials may be obtained through the UNH Global Education Office. For credit in the German major or minor, the program must be conducted in German. After consultation with the major adviser and the study abroad adviser to establish possible UNH course equivalents and fulfillment of major and/or Discovery Program requirements, students submit a planning form indicating the planned course of study abroad. To ensure proper credit transfer, especially if seeking to transfer credits directly from a university abroad without benefit of a Partner Program, students should keep syllabi, course descriptions, and all written work. Students planning study at a university in Germany, Austria, or Switzerland should note major differences in academic calendar (winter semester October-February, summer session April-July), which may be shortened by the Partner Program to accommodate U.S. academic calendars.

German Internship

Students who have completed GERM 504 Intermediate German II or equivalent may apply for a 4-8 credit internship placement in a German-speaking firm or organization. The internship does not alone fulfill the study abroad requirement for the major, but may count toward the minor and may be coupled with academic course work through UNH or any study abroad program to fulfill the major study abroad requirement.

Greece

UNH in GREECE SUMMER PROGRAM

The 5-week UNH-in-Greece Sumer Program is open to any undergraduate at UNH who is interested in the long history of civilization in Greece, from the classical period to the present day. Athens is famous as the most important city-state in ancient times and as the site of some of the world's most famous and influential architecture and art, but it is also the vibrant capital of modern Greece (The Hellenic Republic), and that combination of antiquity and modernity, as well as the city's position between West and East, makes it an extraordinary location for on-site, experiential learning. Students earn a total of 10 credits from courses taught by both UNH and Hellenic American University faculty. For more information, visit cola.unh.edu/greece.

Hungary

Budapest justice studies and humanities program

The UNH Budapest Spring Semester Program is open to any student interested to deepening their knowledge of modern European history, culture, and justice systems. Students take a combination of four courses taught by the UNH faculty member in-residence and course offerings from Károli Gáspár University of Budapest. Situated along the Danube River, Budapest is an exciting and cosmopolitan city, close to other beautiful European cities such as Prague and Vienna. Under the supervision of a UNH faculty member also in residence, students carry a four-course load, two of which are taught by the UNH faculty member. The program satisfies Historical Perspectives, World Cultures, and, depending on course selection, Humanities and Fine & Performing Arts Discovery Program requirements. All courses are taught in English. For more information, visit cola.unh.edu/budapest.

Ireland

SW 785 Study Abroad: Comparative Social Welfare Systems / SW 885 Study Abroad Summer Program

Students studying abroad on SW 785 Study Abroad: Comparative Social Welfare Systems/SW 885 Study Abroad Summer Program, examine the historical development of social welfare in another country, including an analysis of the underlying values and attitudes that direct practice and policy decisions. This 10-day, 4-credit class includes agency site visits, lectures, themed readings, and visits to important cultural sites. Prerequisites are SW 424 Introduction to Social Work and SW 525 Social Welfare Policy: History of Social and Economic Justice. Previous programs have visited Ireland, England, Scotland, and Latvia.

ENGL 565 Literary Dublin: Short-Term Study Abroad summer program

This two-week UNH program allows students to re-imagine what we mean by "Irish" and "Irish American." It introduces a racially diverse side of Dublin specifically, and Ireland broadly, in concert with Irish Americanness as racially other at one time, and subsequently racially white. Through writing, reading, on-site visits and tours, and a host of lectures, students will gain an appreciation of Ireland's many challenges of self- and other identity related to its location, conquest, colonization, emigration, religions, and recent global immigration. The course will provide students who identify as Irish an opportunity to research their genealogy. Student will earn 4 credits for this course, ENGL 565 Literary Dublin: Short-Term Study Abroad. The experience begins in the U.S. with virtual meetings for one week (Monday through Friday, three hours daily), then moves overseas to Dublin for 10 days. For more information, visit https://cola.unh.edu/cola-study-abroad/programs/ireland-literary-dublin

Italy

UNH-in-Italy Program

Semester & Summer Programs. In partnership with the UNH Department of Agriculture, Nutrition & Food Systems, the UNH-in-Italy Program offers students the opportunity to experience living abroad in the medieval city of Ascoli Piceno, for either a four-course, 13-week semester or a two-course, 5-week summer session. The curriculum focuses on the links between food culture, sustainably-focused agriculture, and the policies and issues impacting the food system. Experiential activities, field trips, and group excursions encourage students to immerse

themselves in the unique educational opportunity. Students live in apartments in the historic center of the city and take UNH courses taught in English. The program is open to all UNH students and fulfills the International Experience requirement of the EcoGastronomy Dual major. For more information, please contact Jesse Stabile Morrell (jesse.morrell@unh.edu).

Rome J-Term Program

The Rome Program provides the opportunity to take a January term course in Rome, Italy. Students earn 4 credits and the Fine and Performing Arts Discovery requirement through CLAS 510 Building Rome *or* 4 credits and the World Cultures Discovery requirement through ITAL 510J Rome: The Eternal City in Italian Culture. Experience the history, architecture, and art history of the ancient Romans the way they did—in Rome, Pompeii and other sites itself—and get a sense of the majesty and miracle that was the ancient Roman Empire. A five-day online component prepares students for the on-site portion so that they will be ready to soak in the monuments of the past. For more information, visit cola.unh.edu/rome.

Bologna Summer PROGRAM

This 6-week summer program in Bologna, Italy, will introduce UNH students to the history and contemporary culture of the city of Bologna. Students choose between two academic tracks — either language or culture — in addition to completing a 2-credit experience in Italian cinema based on their participation in the prestigious Cinema Ritrovato film festival. All students will earn 10 credits during the program. Bologna is a city of approximately 400,000, located in north/central Italy, known for its rich cultural life and rich cuisine. Students will visit locations such as its numerous historic libraries and museums, its contemporary art spaces, the FICO Eataly World (the largest food park in the world), and parks and gardens throughout the city. For more information, visit https://cola.unh.edu/cola-study-abroad/programs/italy-bologna.

Japan

Saitama University Exchange Program

Accelerated Japanese language learning on Saitama University's park-like campus, just outside Tokyo. With its moderate size (9,000 students), generous scholarship opportunities, dynamic student life and recreation facilities, Saitama is an ideal fit for UNH students interested in Japanese language and culture. The university also has a wide variety of courses taught in English, which draws students from around the world. Saitama is known as the "Oasis of Tokyo"—a historic city whose forests were planted centuries ago by peace-loving Samurais who nurtured the land instead of living by the sword. Saitama is the famous backdrop for Japanese animated films. Tokyo is less than an hour away by train. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

Waseda University Exchange Program

Study abroad at one of Japan's "Ivy League" universities while paying UNH tuition. Spend a semester or academic year studying in central Tokyo, with over 50,000 students, including 5,000 international students from more than 100 countries. UNH students can enroll in a wide range of courses in English in the liberal arts, business, social sciences, political science and economics, and of course, Japanese language and culture. Waseda has a unique volunteer center, which combines lectures with hands-on activities in the field. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

Namibia

ANSC 690 Livestock and Wildlife in Namibia: Challenges, Opportunities and Geography

This semester-long course explores the economic, historic, geographic, scientific and cultural aspects of livestock and wildlife management in Namibia and includes a spring break trip to Namibia. Its people developed unique models of conservation, as alternatives to national parks and private land in managing wildlife and livestock. Students will gain insight into this unique country and its animals, through lecturers, research, writing and direct interaction with practitioners in the study abroad component. Contact Professor Drew Conroy (drew.conroy@unh.edu), the instructor for this course.

The Netherlands

Radboud University Nijmegen Exchange program

Nijmegen is the oldest city in the Netherlands: it was founded by the Romans more than two thousand years ago. It is a vibrant, green, and safe student town of about 175,000 people, just a few miles from the German border. It only takes a little over an hour by train to get to Amsterdam, and it has great international train connections to Brussels, Paris and Berlin. The city has a very active student life and is also a host to countless festivals and sports activities like the Four Day Marches. Radboud University Nijmegen has about 23,000 students (about 11% of them are international). The campus is beautiful, with lots of green space, incredible buildings and has a state-of-the-art sports center. This semester exchange is open to all Majors. General info can be found at www.ru.nl/exchangestudents. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

Utrecht University Exchange Program

Open to undergraduate and graduate students in all fields, Utrecht University is one of the top research universities in Europe, with the largest undergraduate population and the largest research budget in the Netherlands. The size, status, and international population of the university ensure that courses in all areas of study are offered in English; these include the humanities, social and behavioral studies, law, economics, governance, and geosciences. Utrecht is the fourth largest city in the Netherlands. It has a classically old-Dutch city center with 17th century buildings, a medieval church, several high-quality museums, and terraced canals that encircle the old city. A university town since the medieval period, Utrecht has long enjoyed a vibrant student culture. Utrecht is easily navigable by foot, bicycle, and bus; the center of the Dutch rail system, it enjoys easy access to other cities in the Netherlands and Europe (Amsterdam is 35 minutes away; Paris three hours; London a day trip by plane). For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

University College Utrecht Exchange Program

An honors exchange is available at the University College Utrecht (UCU), which is an international Liberal Arts and Sciences Honors College of Utrecht University. UCU's mission is to offer ambitious students an academic environment aimed at transforming their broad academic and social interests and their international orientation into academic excellence, intellectual independence, and world citizenship. UCU specializes in undergraduate education and students choose

from courses in humanities, science, and social sciences. Among the special characteristics are the college's small classes and individual attention. Students have access to all academic, social, and recreational facilities that Utrecht University has to offer. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

New Zealand

UNH-ECOQUESt: Ecology in action

In partnership with COLSA's Department of Natural Resources and the Environment, the EcoQuest Education Foundation offers an intensive program of applied field studies in ecology, resource management, and environmental policy. New Zealand offers an ideal context for multidisciplinary, field-oriented studies, with its rich cultural traditions, diverse ecosystems, expansive natural areas, and history of innovative approaches to resource management. EcoQuest students engage hands-on in New Zealand's restoration ecology and sustainable resource management initiatives. Semester participants have the opportunity to carry out team oriented, directed research projects while working closely with a faculty mentor and in association with New Zealand research partners. The rural seaside campus is located about an hour's drive southeast of Auckland. Students travel throughout New Zealand's North and South Islands, from the mountains to the sea, to learn more about the unique ecosystems and local culture

Students may choose either a four-course, 15-week fall or spring term for 16 credit hours, or a two-course, five-week summer session for eight credit hours. The UNH-EcoQuest Academic Coordinator is Kimberly Babbitt, Associate Dean of Academic Affairs, COLSA. Contact Donna Dowal, EcoQuest Director of Admissions, at (603) 862-2036 or Eco.Quest@unh.edu.

UNH-EcoQuest: Sustainable Agriculture and Food Systems Aotearoa (SAFSA)

In partnership with COLSA's Department of Agriculture, Nutrition, & Food Systems, the EcoQuest Education Foundation offers an intensive field studies program in sustainable agriculture, land management, systems thinking, and food production. Students will gain an in-depth understanding of global trends in agricultural sustainability and the challenges and manifestations of these trends in Aotearoa New Zealand.

Students engage with various agribusinesses in New Zealand and consider agriculture in an ecosystems framework, aligning land use with land use capability, while examining the political, economic and cultural context. The Maori agribusiness sector is distinctive and offers unique opportunities for collaborative models. The integration of people, communities, and values with primary production systems can ultimately result in vibrant and multi-cultural approaches to food systems.

Four fully integrated courses focus on land use capability and sustainability, agroecology and sustainable land management, and pathways to sustainable agriculture and food systems. Each semester, students will spend time in farm or agricultural placements. These practical, hands-on experiences will allow students to gain transferable skills and develop a comprehensive understanding of sustainability initiatives and practices in food systems. Program participants will gain life and professional skills to engage with sustainable food systems as pro-active, solution-focused practitioners.

Students may choose either a four-course, 15-week fall or spring semester term for 16 credit hours. The UNH-EcoQuest Academic Coordinator is Kimberly Babbitt, Associate Dean of Academic Affairs, COLSA. Contact Donna Dowal, EcoQuest Director of Admissions, at (603) 862-2036 or Eco.Quest@unh.edu.

Norway

University of Southeastern Norway - Bø, Norway

If you want to learn about and practice Norwegian outdoor life (or "friluftsliv") than this program is meant for you! The main focus will be on hiking, canoeing and sailing. The study includes both day excursions and extended overnight trips on waterways, in the mountains and forests and at the coastline. You will also get a thorough introduction to the history and development of Norwegian outdoor life and have the opportunity to develop your own relationship with nature! Through excursions into nature during the fall combined with theoretical lectures students will gain practical and theoretical knowledge needed in nature guiding, nature management and outdoor leadership. Students will go on extended excursions along waterways, forests and mountains and at the coastline. For more information, contact Professor James Hannon (jhannon@plymouth.edu) at PSU or the Study Abroad Office at UNH.

Spain

Universidad Carlos III de Madrid Exchange Program

Study abroad in Madrid, Spain's historic and artistic capital that never sleeps. Universidad Carlos III de Madrid, named after a former king of Spain, offers a dynamic campus of 18,000 students and the largest offering of courses taught in English in Spain. Courses are available in the areas of engineering, business (AACSB accredited), finance, accounting, economics, and political science. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

United Kingdom

England

Lancaster University Exchange Program

Lancaster University is a comprehensive university similar to UNH in size, setting, and program offerings. The program allows students to spend a semester or a year in Lancaster while still making normal progress toward their UNH degree. Lancaster enjoys a diverse campus and is centrally located for travel to Scotland, Wales, Ireland, and London. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

London Spring Program

The London Program offers students the chance to spend the spring semester at Regent's University in the heart of London, choosing from courses in the arts, humanities, social sciences, business, and a wide range of other basic subjects. Students take a combination of courses taught by the UNH faculty-in-residence and Regent's offerings, while living on the well-positioned campus. For more information, visit https://cola.unh.edu/cola-study-abroad/programs/england-unh-london-program.

THDA 531 The London Experience J-term program

This course THDA 531 provides a wonderful opportunity to learn about one of the greatest cities in the world. Travel to the United Kingdom for nine nights/ten days during the January term. See the many amazing historical and cultural sights and take in some of the best theatre in the English-speaking world. The course offers insight into the politics, society, and culture of London and the United Kingdom as students walk,

tube, and double-decker bus their way through 2000 years of history. The 4-credit class fulfills the Fine and Performing Arts Discovery requirement. For more information, visit cola.unh.edu/london-experience.

ENGL 703 London Travel Writing january term program

ENGL 703 Travel Writing is for the adventurous. In three weeks, students will learn to navigate London, one of the world's greatest cities, and craft compelling, vivid essays about what they've discovered. Through curiosity, research, and writing they will transcend from tourist to traveler, gaining a confidence in their ability to master the unfamiliar as well as pen publishable stories about place. Prerequisite of ENGL 501 Introduction to Creative Nonfiction or permission of instructor. For more information, visit cola.unh.edu/london-writing.

Scotland

Heriot-Watt University Exchange Program

College of Engineering and Physical Sciences students are eligible to participate in a spring semester exchange with Heriot-Watt University in Edinburgh, Scotland. Heriot-Watt is one of the UK's leading universities for business and industry and has a reputation for innovative education, enterprise, and leading-edge research in science, business, engineering, and design. Often referred to as Scotland's international University, a third of on-campus students in Scotland come from outside the UK, there are campuses in Dubai and Malaysia, and 50 international academic learning partners in 30 countries. The current program is designed for civil and environmental engineering majors. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

Wales

Cardiff University Exchange Program

Study abroad at one of the UK's "Ivy League" universities while paying UNH tuition. Founded in 1883, Cardiff University is recognized as one of the leading research and teaching universities in the UK and a member of the Russell Group, the UK's "Ivy League" of world-class universities. Spend a semester or academic year studying at Cardiff and benefit from learning with professors who are pioneers in their fields. Over 27,000 students have been drawn to Cardiff University, coming from Wales, the rest of the UK and more than 100 countries. UNH students can enroll in a wide range of courses and are guaranteed housing in student halls of residence, living among British and other international students. Cardiff is an excellent match for majors in music, computer science, communications, and journalism. The University boasts over one hundred clubs, sporting teams, and societies. Cardiff University is located in the center of the capital of Wales, an exciting and diverse city and the heart of Welsh history, culture, street life, and politics. There is something for everyone in the Welsh capital, with the excitement of the small city campus located just minutes from the beautiful coastlines, hills, walking trails, and green countryside for which Wales is famous. For more information, contact UNH Global, (603) 862-2398, email study.abroad@unh.edu or visit www.unh.edu/global/education-abroad.

https://www.unh.edu/global/

Thompson School of Applied Science

The Thompson School of Applied Science (TSAS), established in 1895, is an academic unit of the College of Life Sciences and Agriculture (COLSA) offering the associate in applied science degree in two program areas. Curricula comprise a balance of professional, science-related, and general education courses that prepare students to meet the specific demands of a technical or applied profession, continuing education, and the general demands of life.

The Thompson School of Applied Science offers dedicated professional faculty who deliver a career-relevant education for students who want an associate degree; students who value a college education combining hands-on experiences and academic knowledge in a small learning environment within the campus of the University of New Hampshire.

Thompson School faculty and staff are committed to educate, train, and retain students to be entrepreneurs, to be solid in their knowledge, to be competent in acquired skills and to be aware of the communities they impact. This is accomplished through the development of mentorships with faculty and advisors, business and industry partnerships, unique programs of study with relevant facilities, and excellent job placement.

Thompson School of Applied Science Overview

Faculty members at the Thompson School have significant work experience in industry and business; extensive and up-to-date knowledge of their specialties; ongoing contacts with practicing professionals; dedication to students and to excellence in teaching; and a commitment to practical, science-based education. They work closely with students, providing academic advising, career counseling, and special assistance, even outside the classroom, when needed.

Detailed information on our program areas and concentrations follow.

- **Applied Animal Science** students pursuing this associate's degree prepare for a successful career in animal production and management, whether working on a farm or in a related business. Students handle farm animals starting week one, and develop a strong foundation in the science and business of animal agriculture, including breeding, feeding, health care, law and regulations, housing, and marketing. On-campus facilities include the Thomas P. Fairchild Dairy Teaching and Research Center and UNH's Organic Dairy Research Farm.

- **Veterinary Technology** students have the unique opportunity to work with both small and large animals at UNH and have access to professional facilities both on and off campus. On-campus facilities include the Thompson School PAWS Veterinary Clinic, Thomas P. Fairchild Dairy Teaching and Research Center, UNH's Organic Dairy Research Farm, and UNH's equine facilities. The program also partners with the New Hampshire SPCA (Stratham, N.H.), Cocheco Valley Humane Society (Dover, N.H.), and Pope Memorial SPCA (Concord, NH). The program is accredited by the American Veterinary Medical Association (AVMA). Students who graduate from an accredited program are eligible to take the Veterinary Technician National Exam (VTNE) to become a credentialed veterinary technician.

Transfer Opportunities

Students completing an associate degree program often apply for transfer into a baccalaureate program. The Applied Animal Science and Veterinary Technology programs have two plus two articulations with the B.S. in Animal Science. Thompson School students can also transfer into many other baccalaureate majors. A final cumulative grade-point average of at least 2.5 is required for transfer to most programs; some UNH baccalaureate programs require a higher cumulative grade-point average. Other colleges and universities, especially those within the University System of New Hampshire, also welcome graduates from the Thompson School.

https://colsa.unh.edu/thompson-school-applied-science

Programs

- Applied Animal Science (AAS) (p. 742)
- Veterinary Technology (VTEC) (p. 744)

Programs of Study

- Applied Animal Science (AAS) (p. 742)
- Veterinary Technology (VTEC) (p. 744)

Applied Animal Science (AAS)

Applied Animal Science (AAS) provides students with hands-on practical skills with farm animals. The core program offers a solid background in animal behavior, handling, anatomy, physiology, nutrition, health, and animal breeding. The curriculum is focused on animal agriculture and emphasizes decision-making, technologies, and processes that address the realities of modern agriculture.

Practical learning experience is provided at the Thomas P. Fairchild Dairy Teaching and Research Center and the UNH Organic Dairy Farm. The Thompson School also operates its own veterinary clinic and biology laboratories. The curriculum has a number of animal-related educational partnerships that include field trips to numerous animal-related businesses.

Faculty

Thompson School of Applied Science Faculty

Applied Animal Science (A.A.S.)

https://www.unh.edu/program/associate-applied-science/applied-animal-science

Description

The demand for and production of meat, milk and fiber from animals is expected to continue to grow for decades to come. Students interested

in working in the highly technical, rapidly changing field of farm animal production and management, must become well versed in the many species of farm animals, including breeding, feeding, health care, housing and marketing. In the animal agriculture concentration, students apply many of the skills learned in the classroom on farms in the first few semesters of the program. Students learn to work safely with farm livestock and/or poultry. They visit farms and engage in hands-on activities with their instructors. Students will learn to balance rations, identify and treat diseases. They will design appropriate buildings, fences, and learn how to properly care for the land and environment necessary to support farm animals. Students visit and interact with nearby farms with sheep, goats, swine as well as dairy and beef cattle.

Students are encouraged to embrace opportunities to work and study at the University's farms. UNH maintains two modern and well-equipped dairy teaching and research centers, and as an option students interested in dairy cattle can also collaborate to manage the CREAM (Cooperative for Real Education in Agriculture) herd. All students will also study at the UNH Organic Dairy Research Farm. Students will have the chance to also work with horses, sheep, and poultry on campus.

Students learn the business of farming through field exercises in land management, forage production, financial management, and computer use on a farm as well as through continued practical experience with farm livestock, poultry and dairy cattle. The program prepares students to work both on the farm and in related businesses.

The Thompson School's Animal Agriculture program is in a unique position with the baccalaureate animal science major. Students may start with the Thompson School program, obtain their associate in applied science (A.A.S.) degree then transfer to a four-year major. There they would obtain a B.S. with two additional academic years of full-time study. This allows students to receive two degrees in as little as four years or obtain their A.A.S. degree and work in the field to later return for a B.S. Students wishing to follow this course of action need to work closely with their adviser and maintain a grade of C or better in key applied animal science courses.

Career Opportunities

Herd or flock manager, agricultural sales and/or service employee, farm manager, artificial insemination (AI) technician, crop manager, farm owner, or animal care or training professional.

Admissions Requirements

Applicants to the applied animal science program area must present four years of college preparatory English and at least two years, preferably three years of satisfactory work in college preparatory science (one of the sciences being biology, with a lab). One year of laboratory college preparatory chemistry is highly recommended. Also required are three years of social science, and three years of college preparatory mathematics.

Requirements

Degree Requirements

Minimum Credit Requirement: 64 credits

Minimum Residency Requirement: 16 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery Program

Major, Option, and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Applied Animal Science Major Requirements

Applied Animal Science (AAS) students must maintain a minimum 2.0 cumulative grade-point average. Students with averages lower than 2.0 must repeat classes with lower grades and raise their average to the required 2.0 before taking additional classes. Students must have a minimum cumulative 2.0 grade-point average in AAS classes to qualify for graduation from the program.

All Applied Animal Science students are required to take:

Code	Title	Credits
AAS 423	Dairy Selection	2
AAS 432	Introduction to Forage and Grassland Management	3
AAS 434	Equipment and Facilities Management	3
AAS 597	Applied Animal Science Work Experience	0
ADMN 400	Introduction to Business	4
ANSC 406	Careers in Animal Science	1
ANSC 421	Introduction to Animal Science	4
ANSC 543	Technical Writing in Animal Sciences	2
ANSC 548	Agricultural Business Management	4
ANSC 698	Cooperative for Real Education in Agricultural Management (CREAM) [1]	4
or ANSC 603	Introduction to Livestock Management	
or ANSC 605	Poultry Production and Health Management	
or ANSC 427	Introduction to Equine Science	
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
ENGL 401	First-Year Writing	4
PAUL 450	Personal Finance (or other Quantitative Reasoning Discovery)	4
VTEC 435	Animal Health and Laboratory Diagnostics	4
Discovery Social Science		4
Discovery Course		4
Electives [2]		13
Total Credits		**64**

20 credits of Discovery courses are required, including Writing Skills (ENGL 401 First-Year Writing), Biological Science (VTEC 435 Animal Health and Laboratory Diagnostics), Quantitative Reasoning (PAUL 450 Personal Finance or other), Social Science, and Discovery elective.

1. Students that wish to take ANSC 698 Cooperative for Real Education in Agricultural Management (CREAM) must take ANSC 425 Introduction to Dairy Herd Management in their first semester. CREAM is a two semester course (fall/spring).
2. Students without large animal experience are encouraged to enroll in AAS 421 Large Animal Behavior and Handling Techniques, as an elective.

Degree Plan

Sample Degree Plan

This sample degree plan serves as a general guide; students collaborate with their academic advisor to develop a personalized degree plan to meet their academic goals and program requirements.

First Year		
Fall		**Credits**
ANSC 421	Introduction to Animal Science	4
ENGL 401	First-Year Writing (DISC)	4

Elective or Discovery if AAS 425 was taken Freshman year [1]		3
	Credits	**14**
	Total Credits	**64**

1 CREAM must be taken both fall and spring semesters

2 20 credits of Discovery required; including ENGL 401 First-Year Writing, VTEC 435 Animal Health and Laboratory Diagnostics, a Quantitative Reasoning course, a Social Sciences course, and 1 other Discovery course

Student Learning Outcomes

Program Learning Outcomes

- Students will be able to describe the significance and unique characteristics of animal agriculture in New England, including species and breeds most appropriate for various agricultural enterprises.
- Students will demonstrate they can handle and restrain a variety of domestic animals for routine care, health management practices and training purposes.
- Students will be able to identify and describe the significant anatomical parts of and differences between horses, cattle, small ruminants and poultry.
- Students will understand the basis of disease, major pathogens causing disease, the techniques used in identifying parasites and pathogens, as well as keeping animals healthy through biosecurity measures.
- Students will gain an applied understanding of animal nutrition, animal selection and breeding and animal health practices through experiential coursework with dairy cattle, livestock and/or poultry.
- Students will be able to articulate the career opportunities available in the field of Animal Science.
- Students will be able to identify appropriate land, farm management strategies and forage crops in New England for farm animal feeding in the form of hay, silage and pasture.
- Students will demonstrate written and oral communication skills necessary for marketing animal products and services, information transfer, and animal related business development and promotion.
- Finally, students will demonstrate through the development of an animal related business plan that they understand the importance of market analysis, product promotion, sales techniques, labor management, financial statements, insurance and labor management.

Veterinary Technology (VTEC)

The Veterinary Technology program provides students with a broad understanding of veterinary medicine and the role of animals in society. Through instruction in the knowledge and methods of veterinary technology, students develop the skills needed to become veterinary technicians who are strong advocates for animals, deliver compassionate and accurate care, act professionally in their decisions and judgment, and value lifelong learning and self-improvement.

Faculty

Thompson School of Applied Science Faculty

Veterinary Technology (A.A.S.)

https://www.unh.edu/program/associate-applied-science/veterinary-technology

Description

The primary goal of the Veterinary Technology program is to equip students with exceptional technical, clinical reasoning, and professional skills that prepare graduates to successfully pass the Veterinary Technician National Exam (VTNE) and to become immediate and valuable members of the veterinary medical team. The program emphasizes both

farm animal and companion animal veterinary practice and includes coursework in basic sciences, veterinary nursing, and veterinary practice management. A strong focus on hands-on, practical learning is woven throughout the curriculum. Students gain foundational knowledge and technical skills related to major domestic animal species, including dogs, cats, horses, and cattle. Integrated instruction in communication, veterinary ethical and legal considerations, clinical reasoning, and technical competencies prepares graduates to provide high-quality, compassionate, and expert care for both small and large animals.

Practical learning experience is provided at the PAWS Veterinary Teaching Clinic, the UNH Equine Facilities and the Thomas P. Fairchild Dairy Teaching and Research Center. The program has a number of animal-related educational partnerships, including those with the New Hampshire SPCA in Stratham, N.H.

The program is accredited by the American Veterinary Medical Association (AVMA). Students who graduate from an accredited program are eligible to take the Veterinary Technician National Exam (VTNE) and pursue credentialing.

Admissions Requirements

Applicants to the Veterinary Technology program must have completed four years of college-preparatory English and a minimum of three years each of social sciences, college-preparatory mathematics, and college-preparatory sciences. At least two of the science courses must be college-preparatory biology and chemistry with laboratory components. Prior experience working with animals in a professional setting is strongly recommended, and applicants should include a statement in their application describing this experience. Successful applicants typically have a minimum cumulative GPA of 3.0 on a 4.0 scale.

Requirements

Degree Requirements

Minimum Credit Requirement: 64 credits

Minimum Residency Requirement: 16 credits must be taken at UNH

Minimum GPA: 2.0 required for conferral*

Core Curriculum Required: Discovery Program

Major, Option, and Elective Requirements as indicated.
**Major GPA requirements as indicated.*

Veterinary Technology Requirements

Students must demonstrate all of the following for retention in and completion of the veterinary technology program:

1. Courses must be completed in proper sequence, according to pre-requisites listed in the course catalog.
2. To progress in the program, students must:
   a. Earn a minimum of 70% on their exam average in each VTEC course.
   b. Earn a minimum of 80% on their skills grades in VTEC 579 and VTEC 580.
   c. Receive a minimum grade of C+ (2.33 grade point) or better in all required AAS and VTEC courses.
3. Students who fail to meet retention requirements after 3 semesters will not be allowed to progress further in the program until retention requirements have been met.
   a. Students are allowed to repeat any major course once. If the student does not meet the grade standard on the retake, they must repeat the class again before taking other major courses.
   b. Students are allowed to repeat no more than two major courses.
   c. Students who fail to meet program grade standards in a third course will not be allowed to proceed in the program.
4. Students must maintain a 2.5 GPA in major courses to take additional courses in major.
5. Students must have a minimum cumulative 2.5 GPA in major to qualify for graduation from the program.
6. Students must successfully complete all required skills listed in the Veterinary Technology Essential and Recommended Skills List developed by the AVMA (the accrediting body for this program).
7. All coursework in the veterinary technology curriculum should be completed within five years of initial program enrollment. If this cannot be accomplished, the student may be required to reapply to the program for a new admission status and all veterinary technology specific courses may have to be repeated.

Students must show proof of pre-exposure rabies immunization or adequate rabies titer prior to enrollment in the program. Transportation is provided to students for practicum coursework. Students are responsible for providing their own transportation during internship experiences.

Student Learning Outcomes

Program Learning Outcomes

- The primary goal of the veterinary technology program is to provide students with exceptional technical and clinical reasoning skills and knowledge in veterinary technology such that graduates will be prepared to pass the Veterinary Technician National Exam (VTNE) and to be immediate and valuable members of a veterinary medical team. Additionally, the program aims to develop a firm foundation in both farm animal and companion animal veterinary practices. Courses in the program cover basic sciences, veterinary nursing, and veterinary practice management, with a strong focus on hands-on practical knowledge throughout the curriculum. Students gain basic knowledge and skills for the major domestic animal species (dog, cat, horse, and cow). Integration of knowledge in communication, veterinary ethical and legal issues, veterinary practice management, clinical reasoning skills, and hands-on technical skills allow students to become complete veterinary technicians, capable of providing high-quality, compassionate, and expert care to animals both small and large.
- Specific skills and decision making abilities are outlined by the American Veterinary Medical Association (AVMA) accrediting body.

Disclosures

Veterinary Technology (A.A.S.)

Location/Delivery: Thompson School of Applied Science, Durham Campus [In-Person Program]

This program is designed to prepare graduates for professional licensure/certification as follows:

Veterinary Technician

Veterinary Technician National Examination (VTNE)

*The University of New Hampshire has determined this program **meets** the educational requirements for licensure/certification in:*[1]
Alabama, Alaska, American Samoa, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Federated States of Micronesia, Florida, Georgia, Guam, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Northern Mariana Islands, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, Republic of Palau, Republic of the Marshall Islands, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, U.S. Virgin Islands, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming.

State contact information.

Additional information and related resources are available on the Registrar's Office website.

[1] State specific post-education requirements are subject to change. Students are responsible for confirming these requirements in their state of residence and intended practice.

Continuing Education

Continuing education provides public access to higher education for individuals not formally admitted to a UNH degree program. Taking courses as a non-degree student is an excellent way to prepare for matriculation into a degree program, help advance or change careers or study a topic of interest.

Course Enrollment

Eligibility Requirements

The University does not require students to apply for admission to enroll in courses as a continuing education non-degree student. Students must meet the following eligibility requirements:

Undergraduate Courses

Students registering for undergraduate courses (numbered 200-799) must meet the following eligibility requirements:

- A high school diploma or equivalent (GED)
- Demonstrated successful academic performance
- Completed all course prerequisites
- Not currently under disciplinary sanctions from UNH Durham/ Manchester, another college or university, or court-ordered probation or other sanctions.

Graduate Courses

Students registering for graduate courses (numbered 800-999) must meet the eligibility requirements above and have a bachelor's degree. Graduate coursework is advanced study and presumes completion of adequate preparation at the undergraduate level in the same or allied field in which the student wishes to pursue graduate coursework.

Internships

Continuing education students are not permitted to register for internships through UNH.

Prerequisites

Individuals are responsible for meeting all course prerequisites before registering for classes. Prerequisite information is included in undergraduate and graduate course descriptions.

The University reserves the right to restrict registration to those who cannot demonstrate the completion of the above eligibility requirements and to bar registration or withdraw a student who upon request fails to provide proper documentation or who demonstrates unacceptable academic performance once enrolled.

Registration

Continuing education student course registration opens as follows:

- **Fall Semester** – Opens in July
- **January Term** – Opens in October
- **Spring Semester** – Opens in December
- **Summer Session** – Opens in March

Important Dates and Deadlines

A comprehensive calendar with dates and deadlines for add/drop, refunds, registration, withdrawal and more information can be found on the University Master Academic Calendar.

New Students

New Continuing Education students must complete the Continuing Education Registration Request form to register for first time and will be set up with a UNH student account.

Returning Students

Returning students who have taken a continuing education course within the last year can use their existing UNH student account to log into Webcat and register for courses when registration is open.

If it has been over a year since you last registered for a continuing education course or you're a returning UNH alumni, you will need to complete the Continuing Education Registration Request form to re-activate your UNH student account.

Payment in full (tuition & fees) is due at the time of registration. Non-payment will result in the student being dropped from courses.

Credit Load Policies

Undergraduate Non-Degree Students

Fall/Spring Semester

Non-degree students may register for a maximum of 19 credits.
**Students will be subject to full tuition and fees if registered for 12 or more credits.*

Summer Session

Non-degree students may register for a maximum of 12 credits.
**Petitions (p. 16) for an exception must be approved by the Academic Standards and Advising Committee.*

January Term

Non-degree students are limited to one course for a maximum of 4 credits.

A non-degree student not actively enrolled in courses for one year will be inactivated. Inactivated students may visit the UNH Continuing Education website for more information about returning.

Graduate non-degree students

Graduate courses (numbered 800-999) are open to individuals with a baccalaureate degree from an accredited college or university.

Fall/Spring Semester

Non-degree students may register for a maximum of 16 credits.

**Students will be subject to full tuition and fees if registered for 9 or more credits.*

Summer Session

Non-degree students do not have a credit maximum

January Term

Non-degree students are limited to one course for a maximum of 4 credits

A non-degree student not actively enrolled in courses for one year will be inactivated. Inactivated students may visit the UNH Continuing Education website for more information about returning.

Tuition and Fees

Tuition for continuing education students varies depending on the course campus, credits per course, and student residency. For current per credit hour tuition rates see the UNH Student Accounts website.

Continuing education students may also be subject to mandatory fees for registration, student services, technology, and special course fees. Fees are posted to student's Webcat account within 72 hours of registration. See more information about how to use Webcat. Payment is required within one week of registration to avoid being unregistered.

NH Senior Citizen Tuition Waiver

New Hampshire residents who are age 65 or older and are not enrolled in a degree program are eligible to take a maximum of two credit-bearing courses (some exceptions apply) per fiscal year (Summer Session/Fall/January Term/Spring) tuition-free.

Registration begins on the first day of continuing education registration each semester. Complete the following steps prior to registering:

- Provide a copy of NH State Driver's License and a completed Waiver Agreement Form to Business Services.
- Review the course schedule for additional permissions required prior to registration.
- Students interested in auditing a course must complete an Audit Course Form (instructor signature required).

Additional Information

- Registration is on a space-available basis.
- Prospective students must be 65 years of age as of the first day of the course.
- Waivers will only be granted at the time of registration (not retroactively).
- Non-credit courses, workshops, etc. are not covered by the tuition waiver.

* Certain credit-bearing courses offered at UNH but administered by other institutions (such as Isles of Shoals and Library Science courses) are not covered by the tuition waiver.

Capacity is limited in all UNH academic courses and enrollment is first come, first serve, with no guarantee of availability or acceptance.

All scholarships and waivers used to cover tuition, fees, books, supplies, and equipment may have tax implications. If you have any questions about potential tax implications, please consult a tax advisor.

Financial Aid

Continuing education students are not eligible to receive federal financial aid or scholarships for enrollment expenses, unless they are enrolled in an approved degree or certificate program. For more information visit the UNH Financial Aid Office.

Transfer Credit and Articulation

UNH cannot guarantee that earned credits will be valid towards all matriculated degree and certificate programs at UNH, will transfer to other universities, or will be accepted for credit from other universities.

Continuing education students should discuss credit articulation with the department they would like to transfer credit to prior to starting any coursework.

Resources and Services

Upon successful course enrollment, nondegree students will receive more information about additional services needed to participate in course work and accessing campus resources such as obtaining a UNH student ID, visiting campus, and accessing courses online.

- **Parking:** Explore Commuter parking pass options, campus parking maps, visitor parking, and more.
- **Dining**: View UNH's dining options, or visit the Campus Services Office to purchase a community member meal plan.
- **Student ID:** Request a UNH Student ID to use at the library, for Wildcat Transit Buses, and more.
- **Transcript Requests:** UNH non degree continuing education students can request their academic transcript through the Office of the Registrar.

Policies and Regulations

University of New Hampshire non-degree continuing education students are responsible to review and adhere to the rules and regulations governing the university.

- Academic Policies
- Student Rights, Rules and Responsibilities
- USNH Policy Manual
- Family Educational Rights and Privacy Act (FERPA)

Academic Standards and Expectations

At the University New Hampshire a cumulative grade-point average of 2.00 (C grade) is the minimum acceptable level for undergraduate work and 2.67 (B- grade) is the minimum acceptable level for graduate work at the University. The records of non-degree students are examined periodically and academically deficient students may be warned or excluded from registering.

Programs

CATS Program

The **CATS (Challenging Academically Talented Students) Program** is open to highly motivated and academically strong high school juniors and seniors who want to enrich their academic experience with a college-level course. Students may choose from freshman-level courses (400-500 numbered courses).

Pre-Admission Program

The **Pre-Admission Program** allows students an opportunity to strengthen their academic credentials in preparation for admission to a baccalaureate program by completing coursework that satisfies both general education and introductory-level major requirements. Students complete two semesters in the program, register for up to 12 credits per semester, and then transfer to a baccalaureate program upon successful completion of the outlined criteria.

Professional Development and Training

Professional Development & Training is a unit of UNH's Office of Outreach and Engagement and serves individuals, businesses, and organizations by offering a wide range of non-credit professional development opportunities throughout the year. Programs are designed to assist professionals in developing new or advanced knowledge and skills in a variety of fields.

Summer Session

Summer Session provides a wide range of credit courses, institutes, and programs in a variety of term lengths from May to August. From youth-enrichment programs to advanced-level institutes, Summer Session

provides educational opportunities for learners of all ages. On-campus housing is available for students enrolled in summer credit courses. Summer credit courses are held to the same academic standards as regular term courses but are typically offered at an accelerated pace.

January Term

January Term is a three-week learning opportunity held during winter break. Online, on-campus, and study-away credit courses are available in a variety of academic disciplines at both the undergraduate and graduate levels. Because of the intensive course of study, students may register for only one course during January Term.

Contact Information

If you have any questions about enrolling in continuing education courses at the University of New Hampshire, contact UNH Online & Continuing Education (non.degree@unh.edu).

Accounting (ACC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ACC 501 - Survey of Accounting
Credits: 4
Survey of basic accounting concepts, including exposure to financial statements, accounting processes, decision making, and budgeting. This course is designed for students pursuing a Business Administration minor, a minor in Accounting and Financial Information or exploring basic accounting. Not for Paul College Business Administration students.
Equivalent(s): ACFI 501, ADMN 502
Grade Mode: Letter Grading

ACC 520 - Topics in Accounting
Credits: 4
Special Topics in Accounting, vary by semester.
Prerequisite(s): ACC 501 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

ACC 620 - Topics in Accounting
Credits: 4
Special Topics in Accounting, topics vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

ACC 621 - Intermediate Financial Accounting I
Credits: 4
Examination of the nature and applicability of accounting theory and the conceptual framework of accounting. Development of the capacity to address and resolve issues and problems in financial reporting. Topics include financial statements, revenue recognition, and accounting for assets.
Prerequisite(s): ADMN 502 with a minimum grade of C- or ACC 520 with a minimum grade of C-.
Equivalent(s): ACC 721, ACFI 621
Grade Mode: Letter Grading

ACC 622 - Intermediate Financial Accounting II
Credits: 4
Selected topics within financial reporting such as accounting for leases, pensions, stock options, and deferred taxes. Focus on how and why these issues are accounted for in the manner prescribed by current GAAP.
Prerequisite(s): ACC 621 with a minimum grade of C- or ACFI 621 with a minimum grade of C- or ACC 721 with a minimum grade of C-.
Equivalent(s): ACC 722, ACFI 622
Grade Mode: Letter Grading

ACC 623 - Advanced Managerial Accounting
Credits: 4
Builds on the basic managerial accounting course by continuing the theme of accounting as a management tool. Emphasis is on cost accounting as a source of data for measuring and improving the economic condition of the enterprise. Newly evolving management themes are integrated into the traditional topics of planning and control, cost analysis, overhead allocation, transfer pricing, and decision modeling.
Prerequisite(s): ADMN 503 with a minimum grade of C- or ACC 520 with a minimum grade of C-.
Equivalent(s): ACC 723, ACFI 723
Grade Mode: Letter Grading

ACC 626 - Introduction to Federal Taxation
Credits: 4
Federal Income tax concepts and law applicable to individuals. Coverage includes taxable income and deductions, passive activities, alternative minimum tax, property transactions, and compensation.
Prerequisite(s): ADMN 502 with a minimum grade of C- or ACC 520 with a minimum grade of C-.
Equivalent(s): ACC 726, ACFI 726
Grade Mode: Letter Grading

ACC 627 - Financial Statement Analysis
Credits: 4
Methods and tools of analysis and interpretation of financial statement data. Use of financial information in a variety of decision making situations including a prediction of corporate earnings, debt ratings, and financial distress; lending decisions; risk analysis; and equity valuations.
Prerequisite(s): ACC 621 (may be taken concurrently) with a minimum grade of C- or ACC 721 (may be taken concurrently) with a minimum grade of C- or ACFI 721 (may be taken concurrently) with a minimum grade of C-.
Equivalent(s): ACC 727, ACFI 725
Grade Mode: Letter Grading

ACC 720 - Topics in Accounting
Credits: 4
Special Topics in Accounting, vary by semester.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

ACC 724 - Auditing
Credits: 4
Philosophy and environment of auditing, with attention to an understanding of the major auditing concepts and objectives and its judgement process. Emphasis on the nature and economic purpose of audits, standards, professional ethics, auditors' legal liability, internal control, and audit evidence. Includes audit procedures, reports, and computer software.
Attributes: Writing Intensive Course
Prerequisite(s): ACFI 621 (may be taken concurrently) with a minimum grade of C- or ACC 721 (may be taken concurrently) with a minimum grade of C- or ACC 621 (may be taken concurrently) with a minimum grade of C-.
Equivalent(s): ACFI 724
Grade Mode: Letter Grading

ACC 725 - Independent Studies in Accounting
Credits: 1-4
Student-designed individual research projects, approved by a faculty sponsor. Paper required. Course credits vary according to the nature of the project, to be determined by the faculty sponsor. Seniors in high standing; by permission.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

ACC 747 - Business Law
Credits: 4
This course will introduce students to various legal issues interact with and impact business decision making. Topics include a majority of the legal principles tested within the REG section of the CPA exam: professional responsibility and fiduciary obligations, contract formation and performance, agency and third-party relationships, secured transactions, Uniform Commercial Code and sale of goods, negligence and professional malpractice, business entity format, formation and management. Other topics include intentional and negligent torts, the civil process of modern legal proceedings, overview of the U.S. Constitution, general civil and criminal liability. Historical and current legal cases will be addressed with an emphasis on developing skills in identifying, presenting, and discussing all sides of a legal argument.
Equivalent(s): MGT 747
Grade Mode: Letter Grading

ACC 751 - Forensic Accounting and Fraud Examination
Credits: 4
This course builds on audit coursework, but is not limited to an audit perspective. It covers the major schemes used to defraud organizations and individuals. Students develop skills in the areas of fraud protection, detection, analysis, and skills relating to investigations.
Prerequisite(s): ACC 724 with a minimum grade of C-.
Grade Mode: Letter Grading

ACC 795 - Internship in Accounting
Credits: 1-8
Accounting fieldwork in a business or other type of organization. Supervision is provided by the organization, and consultation is provided by the faculty sponsor. Written report required. Course credits vary according to the nature of the fieldwork and hours worked; to be determined by the faculty sponsor. Juniors and seniors in high standing; by permission.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Credit/Fail Grading

ACC 799 - Honors Thesis in Accounting
Credits: 4-8
Supervised research leading to the completion of an honors thesis or project in accounting; required for graduation from the honors program in administration for students in the accounting option. Permission of director of undergraduate programs and Accounting and Finance department chair.
Attributes: Honors course
Grade Mode: Letter Grading

Accounting (ACCT) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ACCT 532 - Financial Accounting
Credits: 4
This course provides a study and overview of accounting theory, practice, issues, and objectives. The course focuses on the proper interpretation of financial information to understand the financial condition of any type of organization. The course may cover the nature, function, and environment of accounting, the basic accounting statements, and key financial accounting ratios. Excel proficiency is expected prior to enrollment in this course. Students should consider completing CMPL 402 Excel if they have not completed an Excel course in transfer.
Prerequisite(s): MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.
Equivalent(s): ACCT 511G, MGMT 511G
Mutual Exclusion: No credit for students who have taken BUS 532.
Grade Mode: Letter Grading

ACCT 533 - Managerial Accounting
Credits: 4
This course builds upon fundamental knowledge developed in ACCT 532 Financial Accounting. Students apply the concepts and methods of managerial accounting. Students will learn the differences between variable, fixed and mixed costs. Fundamental ethical principles of accounting as applied in real-world situations will be examined. Topics may include the business environment, cost concepts and classifications, job-order costing, process costing, cost behavior, relationships to volume and profits, variable costing, activity based costing, profit planning, standard costs, relevant costs, applications of differential cost analysis, cash flows, and economic value added.
Prerequisite(s): (MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-) and (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-).
Equivalent(s): ACCT 515G, MGMT 510G
Mutual Exclusion: No credit for students who have taken BUS 533.
Grade Mode: Letter Grading

ACCT 550 - Accounting Information Systems
Credits: 4
Accountants use, evaluate, and control information systems as a core dimension of their work with financial data. Information systems shape the capture, processing, and communication of accounting data in organizations. This course provides a thorough introduction to the ways that accounting and information systems intersect. Students may explore both the conceptual and the practical aspects of accounting information systems, including effective communication of information systems needs, the design and development of such systems, and the evaluation of their effectiveness. The dimensions of security, controls, and auditing may be addressed.
Prerequisite(s): ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-.
Equivalent(s): ACCT 550G
Grade Mode: Letter Grading

ACCT 600 - Intermediate Accounting I
Credits: 4
In this course, students expand their understanding of the accounting process and of reporting. Students will demonstrate how depreciation, impairments, and depletion are relevant to business operations and management decision making. The course builds the conceptual framework for generally accepted accounting principles, which may cover the accounting cycle, net income, financial statement preparation, measuring equity, current assets including cash, receivables, and inventories, as well as depreciation, impairments, and depletion.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (ACCT 533 with a minimum grade of D- or ACCT 515G with a minimum grade of D- or MGMT 510G with a minimum grade of D-).
Equivalent(s): ACCT 600G
Grade Mode: Letter Grading

ACCT 601 - Intermediate Accounting II
Credits: 4
In the second half of the intermediate accounting sequence, students may develop a greater understanding of the principles that dictate accounting applications and will apply those principles in increasingly advanced scenarios. Students will apply accounting principles to the development of individual pensions, employee benefit plans, shareholders equity, and the disposition of operational assets. The course also places emphasis on developing advanced spreadsheet techniques and research capabilities.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (ACCT 533 with a minimum grade of D- or ACCT 515G with a minimum grade of D- or MGMT 510G with a minimum grade of D-) and (ACCT 600 with a minimum grade of D- or ACCT 600G with a minimum grade of D-).
Equivalent(s): ACCT 601G
Grade Mode: Letter Grading

ACCT 629 - Cost Accounting
Credits: 4
This course covers cost and management accounting environments and various cost management systems which contribute to financial decisions. Students may apply general principles of activity-based cost systems, capital budgeting, and financial management to the financial objectives of an organization. The course helps students develop and use short and long-term organizational performance measures to determine organizational needs.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (ACCT 533 with a minimum grade of D- or ACCT 515G with a minimum grade of D- or MGMT 510G with a minimum grade of D-) and (FNC 665 with a minimum grade of D- or MGMT 613G with a minimum grade of D-).
Equivalent(s): ACCT 610G
Grade Mode: Letter Grading

ACCT 635 - Taxation
Credits: 4
This is an introductory course in Federal income tax law relating to individuals and businesses, including proprietorship, partnership and corporation. Topics may include gross income, deductions, losses, tax credits, property transactions, deferred compensation, tax planning and preparation of tax returns.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (ACCT 533 with a minimum grade of D- or ACCT 515G with a minimum grade of D- or MGMT 510G with a minimum grade of D-) and (ACCT 600 with a minimum grade of D- or ACCT 600G with a minimum grade of D-) and (ACCT 601 with a minimum grade of D- or ACCT 601G with a minimum grade of D-).
Equivalent(s): ACCT 612G
Grade Mode: Letter Grading

ACCT 705 - Advanced Accounting
Credits: 4
This course is designed to familiarize students with advanced accounting concepts such as foreign currency translations, accounting for consolidations, and partnerships. Students will practice accurately and appropriately journalizing transactions related to these and other advanced accounting scenarios, such as liquidation and reorganization according to GAAP standards. Upon completion of this course, students may articulate why businesses might use such strategies, as well as how to conduct accounting ethically in complex accounting situations.
Prerequisite(s): ACCT 601 with a minimum grade of D- or ACCT 601G with a minimum grade of D-.
Equivalent(s): ACCT 602G
Grade Mode: Letter Grading

ACCT 710 - Governmental and Not-For-Profit Accounting
Credits: 4
The purpose of this course is to familiarize students with the basic differences between accounting for profit-driven entities and accounting for governmental or not-for-profit organizations. The course will help students distinguish how fund accounting for governmental entities operates, including the general fund, capital projects fund, and special revenue fund. Students may learn to identify and implement best practices in accounting within governmental or not-for-profit organizations, in keeping with the regulatory and ethical context of such practices.
Prerequisite(s): ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-.
Equivalent(s): ACCT 603G
Grade Mode: Letter Grading

ACCT 720 - Auditing
Credits: 4
This course focuses on the principles and practice of investigating a business's financial statements and supporting financial documents. Students will interpret and explain the roles, responsibilities, procedures, ethical codes, and legal environment of the auditor in business operations according to Generally Accepted Auditing Standards (GAAS). Topics may include roles and responsibilities of the auditor, types of audits, auditing standards, internal control and professional ethics.
Prerequisite(s): (ACCT 532 with a minimum grade of D- or ACCT 511G with a minimum grade of D- or MGMT 511G with a minimum grade of D-) and (ACCT 533 with a minimum grade of D- or ACCT 515G with a minimum grade of D- or MGMT 510G with a minimum grade of D-) and (ACCT 600 with a minimum grade of D- or ACCT 600G with a minimum grade of D-) and (ACCT 601 with a minimum grade of D- or ACCT 601G with a minimum grade of D-).
Equivalent(s): ACCT 615G
Grade Mode: Letter Grading

ACCT 730 - Advanced Data Analytics for Accounting Professionals
Credits: 4
In this course, students will learn the tools and skills necessary to successfully perform data analytics and provide data-driven insights and recommendations. Students will be exposed to both a Microsoft track (Excel, Power Pivot, and Power BI) and a Tableau track (Tableau Prep and Tableau Desktop). Using multiple tools allows students to learn which tool is best suited for the necessary data analysis, data visualization, and communication of the insights gained. Students should leave this course with the skills necessary to translate accounting and business problems into actionable proposals that they can competently present to internal and external stakeholders.
Prerequisite(s): ACCT 550 with a minimum grade of D- or ACCT 550G with a minimum grade of D-.
Grade Mode: Letter Grading

Administration (ADMN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ADMN 400 - Introduction to Business
Credits: 0 or 4
This course will introduce students to business organizations, the business disciplines and critical issues in contemporary business. The priority will be in having students develop strong intellectual foundations in business, knowledge of core disciplines of business, and an awareness of businesses' role in the economy and in the larger society. The course will include once a week lectures and also small group discussion sessions. The lectures will be organized by the lead PAUL faculty person and include visits and discussions with executives from New Hampshire companies.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ADMN 401W - Introduction to Responsible Business Management
Credits: 4
Students will learn the importance of, and be exposed to, responsible business management practices that need to be applied throughout an organization (e.g., Human Resources, Finance, Accounting, Marketing) to maximize economic performance and ensure ethical conduct. In this course, students will be introduced to foundational concepts in ethics and sustainability, along with inclusion, diversity, equity, and accessibility (IDEA) as pillars of responsible business management and economic performance. Students will explore the ethical dimensions of business decisions, the role of sustainability in management practices, and the importance of fostering inclusive, accessible organizational cultures as foundational to organizational success. This course emphasizes the value of multiple perspectives, critical thinking, innovation, oral and written expression, presentation, and reflection.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ADMN 403 - Computing Essentials for Business
Credits: 0 or 1
Self-paced course covering the fundamental skills and proficiency of general business software applications. Topics will include word processing and spreadsheet applications.
Grade Mode: Credit/Fail Grading

ADMN 410 - Management Information Systems
Credits: 0 or 4
This course provides an introduction to computer literacy, basic computer hardware and software concepts, business applications of information technology and computer ethics. Hands-on exercises include spreadsheets, databases and web pages. Students registering for this course are expected to be able to bring a laptop computer to each class session running the Windows version of Microsoft Office Professional (including Microsoft Access).
Prerequisite(s): ADMN 403 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

ADMN 502 - Financial Accounting
Credits: 4
Fundamentals of financial accounting concepts and procedures for analyzing economic events and the preparation and use of financial statements.
Equivalent(s): ACC 501, ACFI 501
Grade Mode: Letter Grading

ADMN 503 - Managerial Accounting
Credits: 0 or 4
The use of information by managers to (1) determine the cost and profitability of the organization's products or services; (2) plan, control, and evaluate routine operations; and (3) make special non-routine decisions. The demand for managerial accounting information is derived from an integrated treatment of organizational objectives, an orientation to customers, and a focus on activities as the unit of analysis for measurement of cost, quality, and time.
Prerequisite(s): ADMN 502 with a minimum grade of C-.
Grade Mode: Letter Grading

ADMN 510 - Business Analytics and Statistics
Credits: 4
Introductory coverage of analytics and statistical methods for managerial decision-making: data usage and visualization, probability, descriptive and inferential statistics, and regression modeling. Quantitative techniques common to many introductory statistics courses are covered, but the emphasis is on understanding concepts such as uncertainty, inferences from sample data, and model formulation, with particular emphasis on utilizing data for decision-making.
Attributes: Quantitative Reasoning(Disc)
Prerequisite(s): ADMN 403 with a minimum grade of D- and (MATH 420 with a minimum grade of D- or MATH 422 with a minimum grade of D- or MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D-).
Equivalent(s): ADMN 420
Mutual Exclusion: No credit for students who have taken ADM 430, BIOL 528, BUS 430, EREC 525, HHS 540, HMP 540, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

ADMN 570 - Introduction to Financial Management
Credits: 4
The investments, financing, and dividend decisions of the firm in a global setting. Topics include capital budgeting, designing and issuing securities, manager performance evaluation, resolution of agency problems, and working capital management.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C- or EREC 411 with a minimum grade of C-) and ADMN 510 (may be taken concurrently) with a minimum grade of C- and ADMN 502 (may be taken concurrently) with a minimum grade of C- and (ECON 402 (may be taken concurrently) with a minimum grade of C- or ECON 402H (may be taken concurrently) with a minimum grade of C-).
Grade Mode: Letter Grading

ADMN 575 - Behavior in Organizations
Credits: 4
Behavioral science concepts applied to work settings. Focus on understanding and analyzing individual beliefs, values, goals, perceptions, motivation, commitment, and decision making; group structures and processes (interpersonal skills, communication, conflict resolution, leadership, and team work); organizational control systems (rewards, task design, performance appraisal); outcomes (satisfaction and development of the person as well as the organization); and organizational change.
Attributes: Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): (ADMN 400 with a minimum grade of C- or ADMN 401W with a minimum grade of C-) and ADMN 502 with a minimum grade of C-.
Equivalent(s): BUS 620
Mutual Exclusion: No credit for students who have taken MGT 535, MGT 580.
Grade Mode: Letter Grading

ADMN 580 - Quantitative Decision Making
Credits: 4
Introduction to the use of quantitative tools in the decision-making process of an organization. Planning and operational problems in the manufacturing and services sectors are emphasized. Topics include forecasting, capacity planning, optimization, project scheduling, simulation and risk analysis, quality, inventory management, and waiting lines.
Prerequisite(s): ADMN 420 with a minimum grade of C- or ADMN 510 with a minimum grade of C-.
Grade Mode: Letter Grading

ADMN 585 - Marketing
Credits: 4
Covers marketing as the process of planning and developing goods and services to satisfy the needs of target customers: consumers, other businesses, institutions. Focus on how marketing contributes to the firm's goals through product planning, pricing, promotion, and distribution policies, through both digital and traditional channels.
Prerequisite(s): (ADMN 400 with a minimum grade of C- or ADMN 401W with a minimum grade of C-) and (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-).
Mutual Exclusion: No credit for students who have taken HMGT 600, MKTG 530, MKTG 550.
Grade Mode: Letter Grading

ADMN 700 - PAUL Assessment of Core Knowledge
Credits: 0
One of the learning objectives in the Business Administration Program is that all students will graduate with an understanding of these core knowledge assembled from the various disciplines that contribute courses to the program. We assess this learning as part of our Assurance of Learning Program. The zero credit course provides an administrative mechanism for accomplishing this goal.
Co-requisite: ADMN 775
Grade Mode: Credit/Fail Grading

ADMN 775 - Strategic Management: Decision Making
Credits: 4
Capstone course: Problem-solving, decision-making, and strategic thinking relative to managerial, economic, ethical, legal, political, social, and technological aspects of an organization's environment. Integrates the functional discipline skills within the role of the general manager as leader and chief strategist, organizational builder and doer. Case discussion and analysis, industry and competitive analysis, environmental scanning, industry simulation, strategic audit, stakeholder analysis, values, ethics and social issues management within the public policy process are important course components.
Co-requisite: ADMN 700
Prerequisite(s): ADMN 570 with a minimum grade of C- and ADMN 575 with a minimum grade of C- and ADMN 580 with a minimum grade of C- and ADMN 585 with a minimum grade of C-.
Equivalent(s): ADMN 703
Grade Mode: Letter Grading

ADMN 799 - Honors Thesis/Project
Credits: 4-8
Supervised research leading to the completion of an honors thesis or project; required for graduation from the honors program in administration.
Attributes: Honors course; Writing Intensive Course
Mutual Exclusion: No credit for students who have taken FIN 799H.
Grade Mode: Letter Grading

Aerospace Studies (AERO)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

AERO 301 - Leadership Laboratory
Credits: 0
Taken by all AFROTC cadets throughout enrollment in AFROTC. Command and staff leadership experiences in cadet corps. Air Force customs and courtesies, drill and ceremonies, career opportunities, and life and work of the junior officer. Student leadership potential developed in a practical, supervised laboratory.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Credit/Fail Grading

AERO 302 - AFROTC Physical Training
Credits: 0
Taken by all AFROTC cadets throughout enrollment in AFROTC. Prepares cadets to pass the Air Force Fitness Assessment by introducing a year-round physical conditioning program that emphasizes total fitness that includes proper aerobic conditioning, strength and flexibility training, and healthy eating. Command and staff leadership experiences, Air Force customs and courtesies, and the reinforcement of unit cohesion, military good order and discipline, and esprit de corps.
Co-requisite: AERO 301
Grade Mode: Credit/Fail Grading

AERO 415 - Heritage and Values of the United States Air Force I
Credits: 2
Heritage and Values of the United States Air Force I, is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.
Grade Mode: Letter Grading

AERO 416 - Heritage and Values of the United States Air Force II
Credits: 2
Heritage and Values of the United States Air Force II, is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. This is a continuation of AERO 415.
Grade Mode: Letter Grading

AERO 541 - Team and Leadership Fundamentals I
Credits: 2
Team and Leadership Fundamentals I, focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer cadet.
Grade Mode: Letter Grading

AERO 542 - Team and Leadership Fundamentals II
Credits: 2
Team and Leadership Fundamentals II, focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. This is a continuation of AERO 541.
Grade Mode: Letter Grading

AERO 671 - Leading People and Effective Communication I
Credits: 4
Leading People and Effective Communication I, teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.
Grade Mode: Letter Grading

AERO 672 - Leading People an Effective Communication II
Credits: 4
Leading People an Effective Communication II, teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. This is a continuation of AERO 671.
Grade Mode: Letter Grading

AERO 681 - National Security Affairs/Preparation for Active Duty I
Credits: 4
National Security Affairs/Preparation for Active Duty I, is designed for college seniors an gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty.
Grade Mode: Letter Grading

AERO 682 - National Security Affairs/Preparation for Active Duty II
Credits: 4
National Security Affairs/Preparation for Active Duty II, is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. This is a continuation of AERO 681.
Grade Mode: Letter Grading

AERO 796 - AFROTC Internship
Credits: 1-4
This internship is an Air and Space Studies program which prepares students for careers as Air Force Officers by providing experiential learning in an AFROTC detachment. History or Political Science majors are preferred. The internship is supervised by an Air Force Officer.
Prerequisite(s): AERO 415 with a minimum grade of D- and AERO 416 with a minimum grade of D- and AERO 541 with a minimum grade of D- and AERO 542 with a minimum grade of D- and AERO 671 with a minimum grade of D- and AERO 672 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

Agricultural Mechanization (AM)

No courses are currently active in the course inventory for this subject prefix.

Agriculture & Food Systems (AGFS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

AGFS 403 - Green Thumb Workshop
Credits: 2
The objective of this course is to instill a life-long appreciation for garden plants and the many aesthetic, therapeutic, and culinary roles they play in enhancing our lives and landscapes. This course emphasizes hands-on learning of key horticultural skills and techniques (e.g. garden design, propagation, pruning, plant breeding, and problem diagnosis), complemented by activities designed to bring the beauty and utility of plants to life (e.g. flower arranging, botanical drawing, dyeing, and tastings).
Equivalent(s): SAFS 403
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 405 - Sustainable Agriculture and Food Production
Credits: 4
This course will introduce you to sustainable agriculture and the food system more broadly. We will explore the impacts of different food production systems, with an emphasis on those common in the United States. We will explore key issues and challenges facing sustainable agriculture and food systems, and you will learn how to explore primary research to dig deeply into the questions you care about. Throughout, we will consider the role you have in influencing our food system, either as a producer, consumer, educator, and/or policymaker.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): SAFS 405
Grade Mode: Letter Grading

AGFS 410 - A Taste of the Tropics
Credits: 4
This course will expose students to the exciting world of tropical agriculture and the ways that people in the tropics utilize a diverse array of food crops. Our lives as consumers in the developed world are touched by tropical products every single day. Whether it's the cinnamon in your tea, the vanilla in your cookies, the black pepper on your salad, or your cup of hot coffee, you likely consume tropical crops whether you know it or not. Ever stop to wonder where these items are from and how they are produced? We will examine agriculture and food culture throughout the tropical world's four principle areas: Latin America, Tropical Asia, Tropical Africa, and the South Pacific. Production systems ranging from large scale modern high input operations to home subsistence gardens are explored. Tropical crops are examined in five major groups: grains and legumes, starchy roots, exotic vegetables, tropical fruit, and herbs, spices, medicinal plants. Cultural uses of these crops throughout the tropical world are given special emphasis.
Attributes: World Cultures(Discovery)
Equivalent(s): SAFS 410
Grade Mode: Letter Grading

AGFS 415 - The Science of Fermentation: A Culinary Journey from Bread to Beer
Credits: 4
This course introduces students to the science, history, and global traditions of food and beverage fermentation. Students explore how microbes transform raw ingredients into flavorful, nutritious, and socially significant foods and drinks — from bread, cheese, and kimchi to beer, wine, and kombucha. Through case studies, tastings, and demonstrations, students gain an appreciation for fermentation's role in human culture and the biological principles behind it. Students will explore product scale-up, industry practices, and food safety through expert guest lectures. There is no age restriction to taking this course as we will not be consuming alcohol.
Attributes: Biological Science(Discovery)
Equivalent(s): SAFS 415
Grade Mode: Letter Grading

AGFS 421 - Introductory Horticulture
Credits: 0 or 4
This course will introduce the disciplines of plant science and horticulture. Students will learn the fundamentals of plant structure and how cells, tissues, organs and whole plants develop and function. Students will then explore how environmental factors affect growth and development, and how humans manipulate them to produce horticultural crops: fruits, vegetables, flowers and landscape plants. Labs are designed to emphasize and reinforce the principles covered in lecture and will give students a hands-on introduction to horticulture. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): PLSC 421
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 502 - Agroecology
Credits: 4
This course introduces students to the discipline and practice of agroecology, with an emphasis on relevant ecological theory within the context of production agriculture. Students are exposed to key ecological principles from population, community, and ecosystem ecology and agronomy. Students learn about the history and consequences of modern industrial agricultural systems and the need for more sustainable management practices that consider ecological interactions.
Equivalent(s): SAFS 502
Grade Mode: Letter Grading

AGFS 515 - Technical Brewing
Credits: 4
Technical brewing will focus on learning skills needed in the brewing industry. This hands-on class will focus on sensory, the brewing process, quality control, safety, and sanitation in the brew house. Must be 21 to enroll in the course.
Prerequisite(s): SAFS 415 with a minimum grade of D- or AGFS 415 with a minimum grade of D-.
Equivalent(s): SAFS 515
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 601 - Fruit Crop Production
Credits: 4
Fruit crops represent an important component of both our dietary needs and our agricultural production systems. This course explores the origin, distribution, botany, physiology, and culture of fruit crops. Emphasis will be given to temperate fruit crops adapted to New England growing conditions. The course also explores integrating fruit crops into landscapes, organic and conventional cultural practices, and post-harvest handling.
Prerequisite(s): SAFS 421 with a minimum grade of D- or AGFS 421 with a minimum grade of D-.
Equivalent(s): SAFS 601
Grade Mode: Letter Grading

AGFS 602 - Emphasis Development and Professional Pathways in Sustainable Agriculture and Food Systems
Credits: 1
In this 1 credit required course, AGFS juniors convene as a cohort to develop their personal Student-Designed Emphases, a defining component of the AGFS major. Having completed the broad suite of AGFS Foundation Courses and at least some Program Electives by this time, AGFS juniors are well-positioned to reflect upon their evolving interests and chart a thoughtful, upper-level academic path that aligns with their personal and professional goals. Through writing prompts, facilitated peer-to-peer discussions, and faculty-guided development and revisioning of their written emphasis declarations, each student will learn to effectively articulate their area of focus within AGFS while honing their writing and communication skills. To help students connect their Emphases and professional aspirations to University resources, experiential opportunities, and the wide range of careers in the food system, weekly class time will feature interactive guest presentations from AGFS upperclassmen/alumni, program representatives, and food system practitioners.
Equivalent(s): SAFS 602
Grade Mode: Letter Grading

AGFS 620 - Food Systems & Community Resilience
Credits: 4
This course is designed to provide a broad overview of the emerging field of food systems. We will use a systems perspective to better understand how the U.S. food system shapes the food we eat, and the character and health of our communities and environment. In the second half of the course, we will critically evaluate alternative food system development, policies, and initiatives aimed at improving farmers' livelihoods, environmental sustainability, food justice, and community resilience.
Prerequisite(s): SAFS 405 with a minimum grade of D- or AGFS 405 with a minimum grade of D-.
Equivalent(s): SAFS 620
Grade Mode: Letter Grading

AGFS 632 - Urban Agriculture
Credits: 4
Urban agricultural systems play an important role in local food production. Production systems range from community gardens to completely controlled production environments. Urban farmers face unique challenges developing sustainable business models due to high land costs, waste management, post-harvest storage, and limited technical experience. This course provides a practical, hands-on understanding of urban agricultural production systems. Emphasis is placed on controlled environmental agriculture from an urban farmer's perspective through classroom discussion and production systems operation.
Equivalent(s): SAFS 632
Grade Mode: Letter Grading

AGFS 651 - Plant Pathology
Credits: 4
Plant pathology is the science of plant diseases, with implications for human and ecological health. Many principles of animal and human pathology also apply to plants; however, a plant pathologist's goal is to reduce loss and damage to plant populations caused by disease, to increase crop quality, yield, and grower profit. This course provides a survey of plant pathogens, their life cycles, introductory concepts of infection, disease spread, and management. Students will learn about interactions between plants, beneficial and pathogenic microbes, and the environment as well as biological and other methods to control and prevent plant diseases.
Prerequisite(s): BIOL 409 with a minimum grade of D- or SAFS 421 with a minimum grade of D- or AGFS 421 with a minimum grade of D-.
Equivalent(s): BOT 651, PBIO 651, SAFS 651
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 670 - Systems Thinking: Land Use Capability and Sustainability in Aotearoa New Zealand
Credits: 4
This course establishes a conceptual framework in systems thinking to critically examine New Zealand and global examples of the challenges that have arisen from the mismatch between land use and land use capability. Students investigate downstream effects of the rural-urban divide (food-justice), on people, health, services and the environment. Food security, ethical foods, as well as the influence of climate change on food supply and the viability of agribusiness are included.
Co-requisite: AGFS 671, AGFS 672, AGFS 673, INCO 588
Equivalent(s): SAFS 670
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 671 - Agroecology and Sustainable Land Management in Aotearoa New Zealand
Credits: 4
Agroecology is a way of thinking and acting. Using this lens, students investigate the interface of agriculture and the natural environment. Through first-hand experiences with agribusiness, students explore enduring solutions for sustainable food systems. The emphasis will be on dimensions of agroecology that are relevant in a framework of sustainable land management; and on gaining confidence in evaluating processes and science associated with the biological an physical process in agroecosystems.
Co-requisite: AGFS 670, AGFS 672, AGFS 673, INCO 588
Equivalent(s): SAFS 671
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 672 - Pathways to Sustainable Agriculture and Food Systems in Aotearoa New Zealand
Credits: 4
This course empowers students to pursue knowledge and understanding of food systems around the interface of policy, practice, and science to build pathways toward technically robust, economically sound and viable solutions which enable transformation in the rural landscape. Topics include: value systems, socio-cultural benefits of re-thinking food systems at sale, carbon-forestry, carbon offsets, nutrient cap-and-trade models, (Integrated) Catchment Management and Climate Smart Agriculture. Critical thinking and risk assessment tools are integral components.
Co-requisite: AGFS 670, AGFS 671, AGFS 673, INCO 588
Equivalent(s): SAFS 672
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 673 - Agricultural Production and Business Practice in Aotearoa New Zealand
Credits: 4
In this experiential course students will spend time in farm or agri-business placements. Practical, hands-on experience of the workings of agribusiness provides students with opportunities to enhance their autonomy and capacity as active learners. Students will gain transferable skills, increase competency and develop a comprehensive understanding of sustainability initiatives and practices of food systems. Students can transfer insights from classroom work to a practical setting and bring previously developed skills to a new context.
Co-requisite: AGFS 670, AGFS 671, AGFS 672, INCO 588
Equivalent(s): SAFS 673
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 679 - Food Production Field Experience I
Credits: 4
This is part one of a two course series to be taken during spring semester. Course provides students with hands-on experience in growing food and managing a small farm business. We will be growing fresh vegetables and some fruits for the UNH Dairy Bar. Lectures, readings, and hands-on activities during Part I focus on all aspects of production: propagation, crop establishment, irrigation, crop management, soil considerations, and pest and disease practices.
Equivalent(s): SAFS 679
Grade Mode: Letter Grading

AGFS 680 - Food Production Field Experience II
Credits: 4
This is part of a two course series to be taken during fall semester. Course provides students with hands-on experience in growing food and managing a small farm business. We will be growing fresh vegetables and some fruits for UNH Dining Services. Lectures, readings, and hands-on activities in part two focus on crop harvesting and maturity, post-harvest considerations, marketing, special event planning and execution, record keeping, and small farm business management.
Equivalent(s): SAFS 680
Grade Mode: Letter Grading

AGFS 689W - Greenhouse Management and Operation
Credits: 4
Course provides introduction to greenhouse construction, design, environmental control, and current trends in the industry. Fundamentals of starting a greenhouse business including safety and labor, marketing, and post-harvest considerations also covered. Efforts towards making the greenhouse industry more sustainable are explored alongside with certification options and procedures. Crops representative of current major New England crops are grown during lab. Students learn about crop selection and practices including IPM, irrigation, and fertility management. Lab. (Offered alternate years).
Attributes: Writing Intensive Course
Prerequisite(s): SAFS 421 with a minimum grade of D- or AGFS 421 with a minimum grade of D-.
Equivalent(s): PBIO 689, SAFS 689
Grade Mode: Letter Grading
Special Fee: Yes

AGFS 690 - Agricultural and Food Policy
Credits: 4
This course will provide students with a broad understanding of the agri-food sector in the US and the role of government and other stakeholders in developing policies that influence food production, distribution and consumption. It will equip students with tools to analyze public policies and prepare them to effectively engage in real world contemporary debates and problem solving in this field.
Equivalent(s): EREC 680, EREC 704
Grade Mode: Letter Grading

AGFS 733W - Advanced Topics in Agriculture and Food Systems
Credits: 4
In this writing-intensive, capstone course, AGFS juniors and seniors engage in critical, student-led discussion of instructor-chosen and student-selected works related to food systems sustainability across scales, local to global. With these discussions as context, students pursue individual, semester-long projects to practically address a specific issue of interest. The course aims to improve critical reading, writing, discussion, and presentation skills; build cohort cohesiveness; and challenge students' beliefs and working assumptions about agriculture and food systems sustainability.
Attributes: Writing Intensive Course
Equivalent(s): SAFS 733
Grade Mode: Letter Grading

AGFS 750 - Food System Solutions; Increasing Sustainability and Equity
Credits: 4
We will study a range of solutions to address cross-cutting issues in the food system, including unsustainable farming systems, inequitable access to nutritious food, dietary patterns that promote chronic disease, and the lack of sustainable livelihoods for farmers and food chain workers. Students will learn to critically examine policies, programs and social movements aimed at increasing the equity and sustainability of the food system. We will identify the strengths and weaknesses of these approaches, recognizing the limits and blind spots, uneven impacts, and leverage points of the proposed solutions we study.
Prerequisite(s): SAFS 620 with a minimum grade of D- or AGFS 620 with a minimum grade of D- or NUTR 730 with a minimum grade of D-.
Equivalent(s): SAFS 750
Grade Mode: Letter Grading

AGFS 760W - Integrated Pest Management
Credits: 4
This course explores integrated pest management (IPM) in agricultural systems, which uses the fundamentals of pest biology and identification to develop practical and effective pest management plans. In the context of this course, pests include insects, plant pathogens, and weeds. In this course, you will practice written and oral communication of science-based information and practical pest management approaches, and will hone your skills in finding, understanding, and summarizing scientific literature and identifying reliable sources of web-based information.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): PBIO 760, SAFS 760
Grade Mode: Letter Grading

AGFS 795 - Investigations
Credits: 1-4
With faculty guidance, students work on individual projects related to sustainable agriculture and food systems.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): AGFS 795W, SAFS 795, SAFS 795W
Grade Mode: Letter Grading

AGFS 795W - Investigations
Credits: 1-4
With faculty guidance, students work on individual projects related to sustainable agriculture and food systems.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): AGFS 795, SAFS 795
Grade Mode: Letter Grading

AGFS 799H - Honors Senior Thesis
Credits: 1-4
Independent research requiring a written proposal, thesis, and presentation of research results to an audience of faculty and/or students. Intended for students completing AGFS Honors-in-Major requirements. Contact AGFS Program coordinator prior to senior year to arrange supervision and obtain permission. Two-semester sequence; students typically register for 5 credits over two semesters.
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): SAFS 799
Grade Mode: Letter Grading

American Sign Language (ASL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ASL 435 - American Sign Language I
Credits: 0 or 4
Introduction to American Sign Language with emphasis on visual receptive and expressive use of language, as well as providing opportunities for other forms of visual communication such as facial expression, mime, and gesture. Participants develop their skills through videotapes, classroom participation, and readings that cover issues important to the Deaf community. A weekly, one-hour language laboratory is required as part of this course. Limited to 15 students. No credit if credit has been received for COMM 401 (previously COMM 533).
Equivalent(s): COMM 401
Grade Mode: Letter Grading

ASL 436 - American Sign Language II
Credits: 0 or 4
Introduction to American Sign Language with emphasis on visual receptive and expressive use of language, as well as providing opportunities for other forms of visual communication such as facial expression, mime, and gesture. Participants develop their skills through videotapes, classroom participation, and readings that cover issues important to the Deaf community. A weekly, one-hour language laboratory is required as part of this course. Limited to 15 students. No credit if credit has been received for COMM 401 (previously COMM 533).
Prerequisite(s): ASL 435 with a minimum grade of D-.
Grade Mode: Letter Grading

ASL 531 - American Sign Language III
Credits: 0 or 4
Continuation of ASL 436. Expands on groundwork and grammatical principles established in ASL I and II. Introduces the sociolinguistics aspects of ASL as it functions within the deaf cultural context. Limited to 15 students. Lab.
Prerequisite(s): ASL 436 with a minimum grade of D-.
Grade Mode: Letter Grading

ASL 532 - American Sign Language IV
Credits: 0 or 4
Continuation of ASL 531. Expands on the groundwork and grammatical principles established in ASL I, II, and III. Introduces the sociolinguistic aspects of ASL as it functions within the deaf cultural context. Areas of investigation include use of formal versus informal sign register; sign variation by region, age, and gender; social factors that give rise to code switching; and political and cultural evolution of the U.S. deaf community. Taught in the target language using the direct experience method. Limited to 15 students. Lab.
Prerequisite(s): ASL 531 with a minimum grade of D-.
Grade Mode: Letter Grading

ASL 599 - Special Topics
Credits: 1-4
Occasional offerings dependent on availability and interest of faculty. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

ASL 621 - Advanced American Sign Language Discourse I
Credits: 0 or 4
Focuses on the use of ASL discourse in formal as well as informal settings. Students explore the genres of public speaking, artistic expression, formal discussion, interview, and narrative. Development of ASL vocabulary in specialized areas not covered in previous courses. Lab.
Prerequisite(s): ASL 532 with a minimum grade of D-.
Grade Mode: Letter Grading

ASL 622 - Advanced American Sign Language Discourse II
Credits: 0 or 4
In this advanced course, students give two PowerPoint presentations on their research on two selected cutting-edge/current Deaf Studies topics, and are assessed on itemized public speaking skills, grammatical features (linguistics) studies that are a culmination of previous ASL courses, and pragmatic language functions. These presentations are to use high/academic register, appropriate for a large academic audience, demonstrating sensitive awareness of visual acuity and its impact on signing production. Lab.
Prerequisite(s): ASL 621 with a minimum grade of D-.
Grade Mode: Letter Grading

American Studies (AMST)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

AMST 444C - Picturing America: The Arts & Social Change
Credits: 4
How has the camera shaped the way we see ourselves, and the world around us? How are photographers and writers--sometimes self-consciously and sometimes unwittingly affected by the definitions of what it means to be an American? What does something American look like? In this class, we'll try to answer that question in all its complexity by looking at both photographic and written documents, from the late nineteenth century, when photography was a relatively new technology, to the present. How can we "read" a photograph? What kinds of ethical and aesthetic concerns are involved in recording "reality?" What is the relationship between art and social concerns? How do photographs tell stories, and with what consequences?.
Attributes: FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

AMST 444D - Long-Ago Stories Behind Everyday Life
Credits: 4
This interdisciplinary course focuses on the culture of the United States during a specific and short periods of time (1885-1915; 1915-1940; etc). Emphasis is as much on methods of interdisciplinary studies as on the material itself: we'll approach culture through primary sources from a variety of different disciplines: history, sociology, literature, art, architecture, music, film.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

Analytics (DATA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

DATA 557 - Introduction to Data Science and Analytics
Credits: 4
An introduction to data science and analytics. The landscape of analytics, including an overview of industries and sectors using analytics or expected to use analytics in the near future. Data generation, data management, data cleaning, and data preparation. Ethical use of data. Focus on visual and exploratory analysis. Project-based, with an emphasis on collaborative, experiential learning. Programming and statistical software will be used, but previous experience is not required.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

DATA 674 - Predictive and Prescriptive Analytics I
Credits: 4
A first course in predictive and prescriptive analytics. Supervised learning models including linear models and CART models. Model assessment and scoring methods, including cross-validation. Regularization and model tuning. Unsupervised learning models including k-means clustering. Project-based, with an emphasis on collaborative, experiential learning. Statistical software will be used and programming required.
Prerequisite(s): MATH 425 with a minimum grade of D- and COMP 570 with a minimum grade of D- and DATA 557 with a minimum grade of D-.
Grade Mode: Letter Grading

DATA 675 - Predictive and Prescriptive Analytics II
Credits: 4
A second course in predictive and prescriptive analytics. Time series analysis and model ensembles. Bootstrapping, simulation, optimization. Monte Carlo methods. Project-based, with an emphasis on collaborative experiential learning. Statistical software will be used and programming required.
Prerequisite(s): DATA 674 with a minimum grade of D-.
Grade Mode: Letter Grading

DATA 690 - Internship Experience
Credits: 1-4
A field-based learning experience via placement in a business, non-profit, or government organization using analytics. Under the guidance of a faculty advisor and workplace supervisor, students gain practical experience solving problems and improving operational processes using analytics. May be repeated but no more than 4 credits may fill major requirements.
Prerequisite(s): UMST 582 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

DATA 750 - Neural Networks
Credits: 4
Artificial neural networks power the recent advances in computer vision, speech recognition, and machine translation. This is a first course on neural networks with a focus on applications in computer vision and natural language processing. Topics will include generic feedforward neural networks, convolutional neural networks for computer vision tasks, and recurrent neural networks with application to natural language processing, with other topics to be selected based on the interests of the instructor and the class.
Equivalent(s): COMP 750
Grade Mode: Letter Grading

DATA 757 - Mining Massive Datasets
Credits: 4
A first course in large-scale analytics and data science. Characteristics of big data and the emerging software stack for working with massive datasets, including Hadoop and MapReduce. Algorithms for extracting information from massive datasets. A first course in linear algebra is not a prerequisite, but is recommended.
Prerequisite(s): MATH 425 with a minimum grade of D- and DATA 557 with a minimum grade of D-.
Grade Mode: Letter Grading

DATA 790 - Capstone Project
Credits: 4
Under direction of a faculty mentor, students work in teams to find solutions to complex real-world problems using analytics. Projects may come from internal or external sources. Students define the problem, obtain the necessary data, develop suitable models and solutions, and present their results.
Grade Mode: Letter Grading

Animal Sciences (ANSC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ANSC 401 - Animals and Society
Credits: 0 or 4
Through an interdisciplinary and historical lens, students delve into the interaction and interdependence of animals and people, the changes and patterns over time, and the resulting implications for the animal industry and the quality of life for animals, people, and the planet. Topics covered include agricultural production, organic farming, sustainability, global agriculture, Community Supported Agriculture (CSAs), research, nutrition, food safety, genetics, animal health, aquaculture, animal welfare, breeding, recreation, companionship, and the reproduction of domestic animals. What are the major changes in meat consumption by humans? What is the effect of these changes on the environment and large and small farm operations? What are the effects of biotechnological research performed on animals for human benefits? What is the difference between animal welfare and animal rights? Why should we care? In what ways does this affect us?.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 402 - Horsemanship Lab
Credits: 1
For intermediate and advanced riders. Lab (lesson) format with required co-requisite (hybrid or on-line). Correct position and technique for dressage and combined training with application of appropriate theory. Allow time before and after lab for horse care. For the safety of horse and rider, there is a rider weight limit of 200 pounds for all mounted activities in the UNH Equine Program, including ANSC 402.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

ANSC 406 - Careers in Animal Science
Credits: 1
Students explore a variety of career opportunities within the fields of biotechnology, agriculture, animal science and veterinary medicine. Through class presentations and guest speakers students will learn about steps they could take to enhance their prospects for career success, including the internships, career related employment, research, and study abroad opportunities. Students will also prepare a draft and final resume, articulate a career plan, and write reviews about each of the guest speakers and panelists.
Grade Mode: Letter Grading

ANSC 419 - Horse Power
Credits: 4
Students explore the enduring bond between the horse and man and the effect of that bond on civilization by considering: How has the horse and man's use of the horse shaped civilization and contributed to societal change? How has the progress of civilization and societal change affected the horse and its role in society? What does our use of the horse say about us as individuals and as a society? Cannot receive credit if credit received for ANSC 444B.
Attributes: Humanities(Disc)
Equivalent(s): ANSC 444B
Grade Mode: Letter Grading

ANSC 421 - Introduction to Animal Science
Credits: 4
This course provides an overview of the scope and diversity of animal agriculture at the global, national and local levels. It also provides an introduction to the animal sciences through which students 1) learn basic animal science terminology 2) acquire an appreciation of the objectives of various animal enterprises and 3) gain understanding of contemporary trends, challenges and opportunities within animal agriculture.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 425 - Introduction to Dairy Herd Management
Credits: 4
The course explores economic, scientific and practical aspects of dairy herd management. The topics covered include history, cattle selection, nutrition, housing, milking, and disease prevention strategies. There are a number of field trips and weekly labs emphasizing management and hands-on experience.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 427 - Introduction to Equine Science
Credits: 4
This course familiarizes students with different aspects of equine management through practical work and a hands-on approach. Topics include selection, fit and care of English tack, bits, grooming, clipping, wound care, safe bandaging techniques, equine behavior, basic health care and monitoring, parasite control, and facility requirements and layout. Students will have hands-on work experience in the UNH stable for a total of 16 hours for the semester. Responsibilities include feeding, cleaning, turnout, and basic care of the University herd.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 500 - Equine Assisted Services
Credits: 4
Comprehensive examination of Equine Assisted Services including types of therapeutic riding and its physical, cognitive, and emotional benefits for clients with a variety of disabilities. Topics include hippotherapy, therapeutic riding, equine-facilitated mental health, youth at risk, therapeutic vaulting, carriage driving, equipment needs/modifications, special considerations for selecting and training the therapy horse, and the role of the volunteer therapist and instructor. Students have the opportunity to work with horses and riders in the UNH Therapeutic Riding Program during labs, as well as view other programs on mandatory field trips.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 511 - Animal Anatomy and Physiology I
Credits: 0 or 4
This course focuses on the presentation and discussion of vertebrate (primarily mammalian) anatomic forms and physiologic processes. Lectures are heavily devoted to examining molecular, cellular, tissue, organ, and systems physiology while labs provide the opportunity to correlate this information with investigation of anatomic structures. The course includes an introduction to anatomic terminology and exploration of the mechanisms of major processes and the systematic aspects of the integumentary, musculoskeletal, reproductive, and digestive systems.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Mutual Exclusion: No credit for students who have taken BMS 507.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 512 - Animal Anatomy and Physiology II
Credits: 0 or 4
This course focuses on the presentation and discussion of vertebrate (primarily mammalian) anatomic forms and physiologic processes. Lectures are devoted to examining molecular, cellular, tissue, organ, and systems physiology while labs provide the opportunity to correlate this information with investigation of anatomic structures and application to animal health. Content includes the major physiologic processes and anatomic aspects of the central and autonomic nervous systems; cardiovascular, respiratory, immune, lymphatic, urinary and endocrine systems, and special senses.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and ANSC 511 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken BMS 508.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 515 - Explorations in Veterinary Medicine
Credits: 2
This course will introduce the diversity of career paths available in veterinary medicine and aid students in understanding and preparing for the process of applying to veterinary school. Students will also be exposed to current, significant challenges in the US veterinary medical field and will gain hands-on experience in the UNH PAWS veterinary clinic.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 522 - Ethical Horsemanship - Considerations and Theory
Credits: 3
For riders of all levels who are enrolled in ANSC 402 for the first time AND for students wishing to learn the concepts of ethical horsemanship theory and practices without enrolling in horsemanship (riding) lab. Hybrid format, includes weekly face-to-face and online lectures/content with optional lab (ANSC 402). Use of an animal for purposes of sport and recreation is a privileged and optional activity, which is not necessary to human survival as the horse's traditional roles once were. Ethical use of the animal in such a context requires thorough knowledge and analysis of the horse's physical and psychological traits, as well as critical evaluation of the rider's goals and techniques in relation to the animal's needs and well-being.
Co-requisite: ANSC 402
Attributes: Writing Intensive Course
Equivalent(s): ANSC 405
Grade Mode: Letter Grading

ANSC 526 - Equine Conformation, Movement, and Performance
Credits: 4
Unique among domesticated species, the horse's primary role is performance rather than food, fiber, or companionship. Although horses are inherently athletic, not all individuals have the same athletic ability, and even individuals with superior physical traits require athletic development to realize them in performance. This class will examine the interrelated concepts of equine conformation, movement, and performance with the goal of understanding the relationship between an animal's natural qualities, its fitness, its athletic potential, and its limitations.
Prerequisite(s): ANSC 437 with a minimum grade of D- or ANSC 427 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 536 - Preparation and Competition Techniques for the Modern Sport Horse
Credits: 4
Course addresses the safe handling and appropriate grooming and clipping techniques for modern sport horses as they are prepared for competition. Additional topics include trailering, studding, post-workout care an other industry skills. Students will evaluate selection and movement of sport-horses while in-hand and demonstrate knowledge by showing horses in best practice for the type and style. Students will demonstrate horse-handling proficiency while showing their assigned horse in-hand at the annual Little Royal Livestock & Horse Show. Lecture and lab format, including industry guest speakers and demonstration.
Prerequisite(s): (ANSC 427 with a minimum grade of D- or ANSC 437 with a minimum grade of D-) and (ANSC 522 with a minimum grade of D- or ANSC 422 with a minimum grade of D-).
Equivalent(s): AAS 536
Grade Mode: Letter Grading

ANSC 538 - Equine Handling/Longeing
Credits: 1
This seven-week intensive course provides students with the opportunity to learn to longe a variety of University horses in an enclosed arena under private instruction. The emphasis is on safety and welfare of the horse and handler. Proper equipment and fit are addressed along with different training techniques used to improve the horse's quality of movement.
Equivalent(s): AAS 538
Grade Mode: Letter Grading

ANSC 543 - Technical Writing in Animal Sciences
Credits: 2
Emphasis on writing scientific articles and articles for the end user on subjects pertaining to the animal science industry. Students are expected to make several oral presentations. Resume preparation is also included.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Equivalent(s): ANSC 743
Grade Mode: Letter Grading

ANSC 548 - Agricultural Business Management
Credits: 4
This course is designed to provide students with language, knowledge, techniques, and skills necessary for a career in the agriculture industry, specifically for agricultural service providers or farm business operators. Students will gain foundational context regarding agricultural and financial record keeping and building financial statements. They will then apply their knowledge in collaboratively developing a realistic, detailed whole farm record keeping plan and financial statement package for a model farm.
Equivalent(s): AAS 548, ANSC 635
Grade Mode: Letter Grading

ANSC 600 - Field Experience
Credits: 1-4
A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty adviser selected by the student. Permission of supervising faculty member required.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

ANSC 602 - Animal Rights and Societal Issues
Credits: 4
To explore all aspects of human-animal interaction and welfare, emphasizing social, ethical, biological, historical and economic aspects of animal care and use.
Attributes: Writing Intensive Course
Equivalent(s): ANSC 407
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 603 - Introduction to Livestock Management
Credits: 4
This course explores the economic, scientific, and practical aspects of livestock management in New England, related to swine, beef, cattle, sheep, goats, and rabbits. This will include breed selection, feeding, reproduction, health, and housing systems. Product harvesting and food safety regulations related to sales and marketing are explored. Students will also be required to manage and care for a flock of sheep at UNH as part of their weekly laboratory exercises.
Prerequisite(s): ANSC 421 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 605 - Poultry Production and Health Management
Credits: 4
This course focuses on understanding how the management practices used in raising domestic poultry can promote the production of healthy birds. Discussion centers on chickens in both large and small commercial flocks. Topics covered include breed and stock selection, anatomy & physiology, hatcher and brooder management, commercially important diseases, biosecurity and preventative health care, applicable food safety practices, and welfare. Students will gain hands-on experience working with live poultry during this course.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 609 - Principles of Animal Nutrition
Credits: 0 or 4
The study of nutrition is grounded in physiology, and linked to other fields, including anatomy, biochemistry, and microbiology. This course introduces important nutritional concepts fundamental to understanding the digestion and metabolism of carbohydrates, fat, and protein, as well as the primary functions of vitamins and minerals. Students gain an integrated understanding of the physiological requirements and functions of protein, energy, and the major vitamins and minerals that are determinants of health in animal species.
Prerequisite(s): CHEM 403 with a minimum grade of D- and CHEM 404 with a minimum grade of D- and ANSC 511 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 612 - Genetics of Animals
Credits: 0 or 4
Application of the physical and chemical bases of heredity to the inheritance patterns and allele frequencies related to qualitative, quantitative, and sex-linked traits in animals. Overview of current genetic, genomic, and biotechnological applications to the health, behavior, and evolutionary relationships of domestic and wild animals.
Prerequisite(s): BIOL 411 with a minimum grade of C- or BIOL 411H with a minimum grade of C- or BIOL 413 with a minimum grade of C-.
Grade Mode: Letter Grading

ANSC 622 - Further Explorations in Horsemanship Theory
Credits: 2
For intermediate and advanced riders who have already completed ANSC 522. Online format, with required lab (ANSC 402) as a co-requisite. Students will use online content and independent study projects for in-depth explorations of more advanced topics related to the theory of dressage, jumping, and horsemanship, with particular attention to the application of correct theory to the individual rider's current skills, goals, and lab activities. May be repeated, with a different focus in subsequent semesters.
Co-requisite: ANSC 402
Prerequisite(s): ANSC 522 with a minimum grade of D- or ANSC 405 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 10 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 625 - Animal Diseases
Credits: 4
This course focuses on concepts of animal health and disease primarily as they relate to domestic agricultural species. Basic principles of diagnosis, transmission treatment, and prevention are introduced and applied to the presentation of specific disease conditions. The course is divided into sections that focus on the primary body system that is affected by the disease or disorder and a heavy emphasis is placed on learning the skills necessary to recognize and prevent disease.
Prerequisite(s): ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 627 - Animal Health Applications
Credits: 4
This course will use a case-based approach to integrate foundational concepts of animal anatomy and physiology with animal health and disease. Independent research of specific animal diseases cases will inform discussion of body systems in a variety of domestic animal species, targeting primarily farm animals, horses, dogs and cats. Hands-on laboratory experiences will use live domestic animals on campus to apply principles of disease diagnostics, prevention and treatment learned in class.
Prerequisite(s): ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 640 - Principles of Riding Instruction
Credits: 4
Introduction to the principles, theory and practice of Riding Instruction. Includes discussion of styles of learning and instruction as applied to a riding environment, student assessment, skill acquisition, lesson planning, horse selection and principles of group and private riding instruction. Students will use lab time to observe, assist and practice teaching in sections of ANSC 402, which will be matched according to their abilities and interests. Students will prepare for ARIA licensing examinations as part of class. Fall semester only. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): ANSC 522 with a minimum grade of D- or ANSC 405 with a minimum grade of D-.
Grade Mode: Letter Grading

ANSC 641 - Principles of Dressage Instruction
Credits: 2
Advanced principles and theory of dressage and advanced concepts in teaching and coaching dressage. Students will use lab time to observe, assist and practice teaching in dressage-only sections of ANSC 402. Students will prepare for ARIA licensing examinations as part of class. Spring semester only. Lab.
Prerequisite(s): ANSC 640 with a minimum grade of D-.
Grade Mode: Letter Grading

ANSC 642 - Principles of Jumping Instruction
Credits: 2
Advanced principles and theory of jumping and advanced concepts in teaching and coaching over fences in the arena and cross-country. Students use lab time to observe, assist and practice teaching in intermediate I and II level sections of ANSC 402. Lab. Offered spring semester of every odd numbered year.
Prerequisite(s): ANSC 640 with a minimum grade of D-.
Grade Mode: Letter Grading

ANSC 643 - Principles of Therapeutic Riding Instruction
Credits: 4
Principles and theory of teaching therapeutic riding, including special considerations of teaching in a therapeutic environment and methods of instruction for individuals with a variety of disabilities. Lab consists of observing, assisting and practice-teaching in UNH Therapeutic Riding Program as preparation for PATH International CTRI instructor certification. Spring semester only, biannually, odd numbered years.
Prerequisite(s): ANSC 500 with a minimum grade of D- and (ANSC 437 with a minimum grade of D- or ANSC 402 with a minimum grade of D-).
Grade Mode: Letter Grading

ANSC 647 - Equine Stable Management
Credits: 4
Students learn to make equine management decisions based upon science and business principles through managing a subset of the UNH horse herd. Students will collectively manage the routine care of horses 7 days a week; completing daily barn chores, monitoring nutrition and health parameters and maintaining records. Lecture topics will complement the barn management tasks including herd health and husbandry, human resources, and stable design. Field trips highlight different-sized equine enterprises.
Prerequisite(s): ANSC 427 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 650 - Dairy Industry Travel Course
Credits: 1
Extended field trip (5-6 days) to a variety of dairy farms and dairy related businesses with students and faculty from other New England land grant universities. Includes discussion sessions, case study, problem solving, and journal report. Additional travel costs may vary based on location of the extended field trip, which can include New England or other regions of the US and Canada.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 665 - Agricultural & Equine Event Design, Planning and Management
Credits: 2
This course provides students with theory and hands-on involvement in the organizational process of planning, managing and executing an agricultural event. Topics include budgeting, logistics, working with forms, sponsorship, publicity, prizes & awards with a focus on facilities, risk, volunteer, and personnel management. Throughout the course, students will apply real-world problem-solving skills and decision-making techniques. Fall semester the class meets for the 1st half and Spring semester, the 2nd half of the term.
Grade Mode: Letter Grading

ANSC 670 - Exotic Companion Species Health and Management
Credits: 4
This course focuses on concepts of health and disease as they relate to companion zoological species (i.e. exotic pets and those species kept in small, living collections) management. Developing an understanding of species specific needs and utilizing this knowledge to promote physical and mental health in a captive environment will be core themes of the course. Previous coursework in animal anatomy & physiology recommended.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading

ANSC 690 - Livestock and Wildlife in Namibia: Challenges, Opportunities and Geography
Credits: 4
This course explores the economic, historic, geographic, scientific and cultural aspects of livestock and wildlife management in Namibia. Its people developed unique models of conservation, as alternatives to national parks and private land in managing wildlife and livestock. Students will gain insight into this unique country and its animals, through lecturers, research, writing and direct interaction with practitioners in the study abroad component.
Attributes: World Cultures(Discovery); Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 695 - Supervised Teaching Experience
Credits: 1-2
Participants are expected to perform such functions as leading discussion sections, directing and assisting in laboratories, and assisting students with their problems in courses that participants have completed successfully. Enrollment is limited to juniors and seniors who have a minimum 3.00 cumulative average.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

ANSC 698 - Cooperative for Real Education in Agricultural Management (CREAM)
Credits: 4
CREAM (Cooperative for Real Education in Agricultural Management) is a 2-semester course in which students perform the work and make the financial management decisions associated with the CREAM dairy herd. Students assume complete responsibility for the management and care of the 25-cow herd for the entire academic year. CREAM provides students with a unique experiential learning model that will help them understand how to work together to manage and operate a small business, the decision-making skills required in production agriculture and the application of science to the management of a dairy herd. Two semesters of 4 cr. each are required.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): AAS 275, ANSC 615
Grade Mode: Letter Grading

ANSC 701 - Physiology of Reproduction
Credits: 4
Comparative aspects of embryology, anatomy, endocrinology, and physiology of reproduction. Lab.
Grade Mode: Letter Grading

ANSC 704 - Advanced Equine Physiology and Lameness
Credits: 4
This course will provide the student with an overview of equine specific anatomy and physiology through the context of important pathologic equine conditions. This course focuses on the major causes of lameness in horses and the process of diagnosing and treating them. Students will work through clinical cases in a discussion format to determine the cause of the lameness and develop treatment plans for each case.
Prerequisite(s): (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-) or (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-).
Grade Mode: Letter Grading

ANSC 710 - Dairy Nutrition
Credits: 4
Feeding management of dairy cattle. Emphasis on feedstuffs, nutritional requirements, and diet formulation for efficient production and optimum health.
Prerequisite(s): ANSC 609 with a minimum grade of D- or NUTR 750 with a minimum grade of D-.
Grade Mode: Letter Grading

ANSC 715 - Physiology of Lactation
Credits: 4
Examines the biological and biochemical influences of the lactation process. Emphasis on the physiological effects of environments, hormones, and nutrition on milk synthesis and secretion, mammary physiology, and maternal response.
Prerequisite(s): ANSC 511 with a minimum grade of D-.
Grade Mode: Letter Grading

ANSC 724 - Reproductive Management and Artificial Insemination
Credits: 0 or 4
Focus on goals and fundamentals of reproductive management of horses, dairy and livestock animals, and through actual experience, development of competency in performing modern breeding techniques for equine and bovine reproduction. Lab.
Prerequisite(s): ANSC 511 with a minimum grade of D-.
Equivalent(s): ANSC 652
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 727 - Advanced Dairy Management I
Credits: 4
Advanced management evaluation of milking procedures, reproduction, genetics, herd health, feeding, housing, and milking systems.
Equivalent(s): ANSC 615
Grade Mode: Letter Grading

ANSC 728 - Advanced Dairy Management II
Credits: 4
Advanced management evaluation of record keeping, financial and business management, personnel management, waste management, and marketing.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading
Special Fee: Yes

ANSC 750 - Collaborative Farm Design and Development
Credits: 4
As a semester long group project, students will design an economically feasible, fully operational, diversified small farm. Students will need to consider site selection, infrastructure, equipment, labor, animal production and health, financing options, marketing and sales, etc. in their design. The final project will be presented in both an oral and a written format. Independent initiative and group collaboration are both integral to success in this project.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANSC 795 - Investigations
Credits: 1-4
Investigations in genetics, nutrition, management, diseases, histology, equestrian management/agribusiness, physiology, cell biology, microbiology, dairy management, or teaching experience.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): ANSC 795W
Grade Mode: Letter Grading

ANSC 795W - Investigations
Credits: 1-4
Investigations in genetics, nutrition, management, diseases, histology, equestrian management/agribusiness, physiology, cell biology, microbiology, dairy management, or teaching experience.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): ANSC 795
Grade Mode: Letter Grading

ANSC 797 - Equine Capstone Experience
Credits: 4
This course allows students to review critical professional skills, concepts and theories necessary for success within the equine industry and then to demonstrate competence in these areas, to a panel of equine program faculty. Students also coordinate logistics and content of an outreach Equine Education Day. Successful completion allows students to showcase professional skills and abilities to the non-academic equestrian community.
Prerequisite(s): ANSC 796 with a minimum grade of D-.
Grade Mode: Letter Grading

ANSC 799 - Honors Senior Thesis
Credits: 1-4
Independent research culminating with a written honors thesis in A) Genetics; B) Nutrition; C) Management; D) Diseases; E) Histology; F) Light Horsemanship; G) Physiology; H) Cell Biology; I) Microbiology; J) Dairy Management.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Anthropology (ANTH)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ANTH 411 - Global Perspectives on the Human Condition: An Introduction to Anthropology
Credits: 4
This course introduces students to the core concepts, methods, and research of contemporary cultural anthropology, as well as to the ways in which the discipline is relevant to their daily lives. Students will learn how anthropology approaches the study of culture, language and communication, family and kinship, gender and sexuality, race and ethnicity, economic relationships, political systems, religion, social change and globalization. Ethnographic material from both the U.S. and cross-culturally, as well as a series of hands-on, experiential and interactive activities, will demonstrate anthropological concepts and questions.
Attributes: World Cultures(Discovery)
Equivalent(s): ANTH 411H, ANTH 411W
Grade Mode: Letter Grading

ANTH 411W - Global Perspectives on the Human Condition: An Introduction to Anthropology
Credits: 4
This course introduces students to the core concepts, methods, and research of contemporary cultural anthropology, as well as to the ways in which the discipline is relevant to their daily lives. Students will learn how anthropology approaches the study of culture, language and communication, family and kinship, gender and sexuality, race and ethnicity, economic relationships, political systems, religion, social change and globalization. Ethnographic material from both the U.S. and cross-culturally, as well as a series of hands-on, experiential and interactive activities, will demonstrate anthropological concepts and questions.
Attributes: World Cultures(Discovery); Writing Intensive Course
Equivalent(s): ANTH 411, ANTH 411H
Grade Mode: Letter Grading

ANTH 412 - Broken Pots and Buried Cities: Introduction to World Archaeology
Credits: 4
Traces the history of archaeology's most spectacular finds and how those moments of adventure and glory developed into a scientific discipline. Provides an introduction to the methods used by archaeologists to recover, analyze, and interpret data in their ongoing effort to understand humanity through the analysis of those small things left behind.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

ANTH 415 - The Human Story: Evolution, Fossils and DNA
Credits: 4
This course uses an evolutionary approach to investigate human biological and bio-cultural variation in time and space. Through a study of the basics of population genetics, an evaluation of our closest living relatives, nonhuman primates, and an exploration of the biological and cultural pathways traversed by our ancestors to become modern Homo sapiens, students learn the depth and complexity of the human story. Laboratory exercises dealing with human genetics, hominin fossils, and evolution are integrated with lectures to give students hands-on learning experience. No credit earned if credit received for ANTH 413.
Attributes: Biological Science(Discovery)
Equivalent(s): ANTH 413
Grade Mode: Letter Grading

ANTH 440A - Medicine and Culture: Science, Technology and the Body
Credits: 4
This course offers an introduction to medical anthropology, an interdisciplinary inquiry of the social and natural sciences, by using approaches from science and technology studies (STS). It surveys several key concepts from STS as well as case studies of current medical and biotechnologies—how they 'work,' their context of development, how expert-designed use mis-matches users' embodied experience, and how individuals and communities adopt, resist, or seek alternative medical explanations and treatments based on their experience cross-culturally.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

ANTH 500 - Peoples and Cultures of the World
Credits: 4
Explores cultures and peoples from specific geographic regions of the world. Broadly considers social, gendered, economic, and political changes in ecological and historical context, focusing on precolonial, colonial, and contemporary societies and globalization. Sections: A. North America, B. Latin America, C. Middle East and North Africa, D. Africa, E. Southeast Asia. May be repeated barring duplication of subject.
Attributes: World Cultures(Discovery)
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): ANTH 500W
Grade Mode: Letter Grading

ANTH 501 - World Archaeological Cultures
Credits: 4
Explores past peoples and societies from specific geographic regions of the worlds through archaeological material culture, such as tools, art, and architectural remains. Broadly considers social, gendered, economic, and political dynamics of ancient (premodern) societies in ecological and historical context and the role of material culture in the present. Sections: A) North America; B) Mesoamerica; C) South America; D) Near East; E) Europe; F) Asia. May be repeated barring duplication of subject.
Attributes: World Cultures(Discovery)
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

ANTH 513 - Ethnographic Methods
Credits: 4
The course introduces students to social science research and differences between quantitative and qualitative research methods, and provides a hands-on experience to develop skills in interviewing, participant-observation, life-history, surveying, socio-linguistics, fieldnotes, and ethics of the research.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading

ANTH 514 - Method and Theory in Archaeology
Credits: 0 or 4
Basic method and theory; techniques in recovering and interpreting data; laboratory exercises in ceramic and lithic analysis. Critical evaluation of archaeological literature.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading

ANTH 525 - Anthropology of the Body: Fat, Fitness and Form
Credits: 4
This course surveys the way our human bodies are valued, transformed, experienced and made subject to control in different societies around the world. It explores cultural constructions of fatness and obesity, fitness and sports as sites of politics, economics and social change, and bodily modification and dis-integration in tattooing, injury, biomedical technology, disability, aging, and extreme environments of war and outerspace. Uses anthropological and feminist theories and introduces ethnographic methods.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

ANTH 527 - Humanities and Religion
Credits: 4
This course examines the role of religion, religious ideas and religious practice in world cultures using a combination of methodologies drawn from different humanities disciplines, with a particular emphasis on comparative approaches and investigating how religion is used to create and express cultural identity around the globe.
Attributes: World Cultures(Discovery); Writing Intensive Course
Equivalent(s): HUMA 527
Grade Mode: Letter Grading

ANTH 530 - Multispecies Planet: Animals, Plants, and Landscapes Across Cultures
Credits: 4
This course takes a big-picture approach to investigating how humans in diverse cultures have related to the non-human world, placing an emphasis on landscapes and plant and animal species. Comparing our Western worldviews and practices with Indigenous approaches, we will identify the underlying assumptions with which humans and their technologies have encountered, modified, and impacted the natural world. Designed with an experiential component, the course invites us to rethink our philosophies and sustainability of the human/non-human interface.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

ANTH 550 - Introduction to Forensic Anthropology
Credits: 4
This course provides an overview of forensic anthropology, a sub-field of biological anthropology that applies knowledge of skeletal anatomy to problems of medico-legal significance (i.e., identification of human skeletal remains and interpretation of the circumstances surrounding death). This course outlines concepts underlying the recovery and analysis of human remains, the determination of the biological profile (including age, sex, ancestry, and stature), and the interpretation of skeletal trauma and pathology.
Attributes: Biological Science(Discovery)
Grade Mode: Letter Grading

ANTH 610 - Medical Anthropology: Illness and Healing
Credits: 4
Intermediate-level introduction to medical anthropology through sociocultural and bioarchaeological approaches to describing health-related ideas and practices in cross-cultural, historical and ecological contexts. Focuses on human illness and religious experiences of disease and the end of life. Considers how suffering, diagnosis, treatment, prevention, and care are shaped by: religion and ritual; symbolism and language; age, gender and sexuality; families, social movements, and governments; and the worldwide expansion of biomedical expertise and technologies.
Grade Mode: Letter Grading

ANTH 611 - History of Anthropological Theory
Credits: 4
Provides a grounding in the history of social thought in cultural anthropology and sister disciplines from 19th century evolutionism to the present. Course reading is based on primary sources - original essays written by theorists central to the discipline. Assessment is partly based on students' ability to apply theoretical concepts to novel contexts, as well as the ability to evaluate and compare theories on the basis of logic and evidence.
Grade Mode: Letter Grading

ANTH 612 - Applied Anthropology
Credits: 4
Introduces students to the ways anthropological questions, concepts, and methods are applied to real world problems. Students learn how anthropological knowledge and methods can be used in a wide range of disciplines and careers. The course includes experiential learning where students engage with professionals doing work within applied anthropology. Students gain perspective on the practical possibilities in their major and acquire skills to position themselves for future careers.
Grade Mode: Letter Grading

ANTH 620 - Ritual and Religion of Ancient Mesoamerica
Credits: 4
This course examines the religious beliefs and ritual practices of ancient Mesoamerican cultures, such as the Olmec, Maya, and Aztecs. Students learn about the meaning of ritual practices (like human sacrifice and burial rites) and the myths that underlie this mysterious ritual behavior from an archaeological perspective. This class is writing intensive and involves primarily in-class discussion. Students are evaluated based on their participation, oral presentations, and a number of writing assignments.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 625 - Sexuality in Cross-Cultural Perspective
Credits: 4
This course examines the ideologies and practices associated with sexuality from a broad perspective that incorporates diverse case studies from the ethnographic record. Working from the argument that much of human sexual behavior is culturally constructed rather than biologically determined, the course invites students to expand their notion of the "normal" and to consider the human condition from a cross-cultural perspective. Topics discussed include cross-cultural varieties of transgendered experience, same-sex sexualities, and heteronormative identities.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 640 - Anthropology of Islam: Muslims' Everyday Lives in Contemporary Communities
Credits: 4
This course introduces students to different ways of being Muslim in contemporary world, focusing on Muslim communities residing in Central Asia (post-Soviet independent countries, China, and Afghanistan); the United States and some parts of Europe; and the Middle East and North Africa (MENA).
Grade Mode: Letter Grading

ANTH 645 - Cultural Sustainability and the Role of Public Archaeology
Credits: 4
In archaeology, the sustainability movement has encouraged increased outreach and education in an effort to make archaeology relevant to the public and to sustain past lifeways, especially cultural traditions threatened of being erased in our increasingly homogenized and globalized world. Students will be introduced to this field and experience for themselves how to translate academic archaeology to the masses through public programming, from designing museum exhibits to participating in "open archaeology" education for the public.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 650 - Anthropology of Migration and Movement
Credits: 4
This course uses an anthropological framework to gain a more nuanced understanding of the complexities of global migration and human movement. It will examine the theoretical underpinnings of an anthropological perspective on migration and movement, and will explore a variety of ethnographic case studies to explore the significant political, economic, environmental, legal, and social issues that influence global migration.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 655 - Bioarchaeology of the Human Past
Credits: 4
Bioarchaeology is the study of human remains from ancient and historical sites. Past populations can be examined by utilizing principles of skeletal and dental biology, as well as archaeological context and ethnohistory, to address anthropological questions. This course will encompass a global survey of bioarchaeological sites and research, and focus on historically marginalized groups like women and children in the past. Students will explore ethical issues, controversies, excavation methods, and inclusion of indigenous communities.
Prerequisite(s): ANTH 415 with a minimum grade of C.
Grade Mode: Letter Grading

ANTH 660 - Human Osteology
Credits: 4
This course is an introduction to the human skeletal system through a combination of lectures, online resources, laboratory work, and case studies. The course covers the growth and development of the human skeleton, identification of bones and teeth, siding of bones and teeth, and major cranial landmarks. The focus of the course is on learning and developing osteological identification skills, though the main concepts of the biological profile (e.g., population affinity, skeletal sex, stature, and age estimation) are introduced. The skills developed in this course are prerequisites for advanced training in identifying pathological conditions, trauma analysis, and biological profile creation for bioarchaeology and forensic anthropology.
Grade Mode: Letter Grading

ANTH 661 - Advanced Human Osteology
Credits: 4
This course will build on the skills and topics covered in ANTH660 (Human Osteology). This course will focus on methods in osteology, applicable to those interested in forensic anthropology and/or bioarchaeology. This hands-on course will delve into the most current standards for estimations of the biological profile (osteological sex, age-at-death, biogeographic ancestry, and stature), as well as the interpretation of evidence of pathological conditions and traumatic injuries on skeletal and dental tissues. Further, this course will continue to refine students' skills with commingled and fragmentary remains—a reality of working in either forensic anthropology or bioarchaeology.
Prerequisite(s): ANTH 660 with a minimum grade of D-.
Grade Mode: Letter Grading

ANTH 665W - Forensic Cold Case Investigation
Credits: 4
This course introduces students to the issues involved in investigating and solving cold cases in forensic anthropology. Often, forensic anthropologists are contacted by law enforcement to assist with recovery and identification of human remains that have been discovered years after a crime was committed. In addition to covering the basics of forensic anthropology (e.g. age and sex estimation from human remains, search and recovery methods, interpretation of skeletal trauma), this course will focus on topics such as ethics in investigation, addressing media bias, forensic genealogy and new techniques in solving crimes, and understanding the "missing missing." New Hampshire cases will be discussed and students will become familiar with the processes of solving cold cases in their home state. A special focus on social justice and activism work surrounding cold cases will be pursued in this course. By the end of the course, students interested in criminal justice, anthropology, and social work will have a better understanding of the issues and problems involved in resolving long-standing cold cases.
Attributes: Writing Intensive Course
Prerequisite(s): JUST 401 with a minimum grade of D- or ANTH 411 with a minimum grade of D- or ANTH 412 with a minimum grade of D- or ANTH 415 with a minimum grade of D- or ANTH 550 with a minimum grade of D-.
Grade Mode: Letter Grading

ANTH 674 - Archaeological Survey and Mapping in Belize
Credits: 4
Involves hands-on training in field reconnaissance, survey and mapping of archaeological sites, and the use of ARCGIS mapping software. This field course takes place in Belize (Central America) and will be of interest to students studying anthropology, geography and geospatial technologies, among others.
Co-requisite: INCO 589
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ANTH 685 - Gender, Sexuality and HIV/AIDS in Africa
Credits: 4
HIV/AIDS has been defined as one of the exceptional global pandemics of the Millennium. This course traces the rise and global spread of HIV and AIDS and the introduction of antiretroviral therapies and preventions in African and its Diasporas with a focus on sex and gender. Includes findings on heterosexual and LGBTIQA individuals, couples, and communities and perspectives on: kinship, marriage, love, transactional sex, reproduction, contraception, gender-based violence, and activist movements. Uses ethnographies and health sciences databases.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 695 - Globalization and Global Population Health
Credits: 4
This anthropology course focuses on the study of human population health, in particular the coevolution of humans and diseases as well as disease causation and impacts on the human species globally. This course pulls from evolutionary theory, bioarchaeological evidence, and contemporary medical anthropological and global public health approaches to examine how human populations are formed and sustain themselves through time and space. Specific topics vary, but may include historic urbanization and proliferation of crowd-diseases, the spread of novel pathogens through global exploration and colonization, the re-emergence of infectious diseases, the politics of global health interventions, and sustainable health movements.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 697 - Special Topics
Credits: 4
Occasional or experimental offerings. May be repeated for different topics. Operates on a seminar format.
Attributes: Writing Intensive Course
Prerequisite(s): ANTH 411 with a minimum grade of D- or ANTH 412 with a minimum grade of D- or ANTH 415 with a minimum grade of D-.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

ANTH 699 - Senior Thesis
Credits: 4 or 8
Thesis-driven course consisting of independent work in the library, collections, or field sites. Recommended for, but not confined to, majors intending to pursue graduate studies or anthropological or archaeological career. Contact a faculty member to obtain approval and arrange supervision prior to senior year. Thesis will be taken over the course of 2 semesters for 8 credits total. As a continuous course, an IA grade will be given at the end of the first semester.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ANTH 699H - Honors Senior Thesis
Credits: 4 or 8
Independent work in the library or field; recommended for, but not confined to, majors intending to pursue graduate studies; required for honors candidates. Contact staff to obtain approval and arrange supervision prior to senior year. 4 or 8 credit 2 semesters, 8 credits required for honors; an IA grade (continuous course) given at end of first semester.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ANTH 699
Grade Mode: Letter Grading

ANTH 700 - Internship
Credits: 1-4
Provides student with supervised practical experience in anthropology in one of the following areas: A) professional or community support work within an academic or applied anthropology setting; B) teaching; C) museum work; D) archaeological laboratory or fieldwork; E) research on a faculty research project; F) editorial work on a journal or faculty book project.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ANTH 785 - The Anthropology of Dreams and Dreaming
Credits: 4
This course emphasizes the "dream theories" of indigenous societies and how beliefs and practices associated with dreaming are integrated into cultural, ontological, political, economic, and religious systems. Western theories are also examined from within a comparative perspective--from basic Freudian models to contemporary scientific debates about the neurological origin and significance of dreaming.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ANTH 795 - Reading and Research
Credits: 1-8
A) Cultural/Social Anthropology; B) Anthropological Linguistics; C) Archaeology; D) Physical Anthropology.
Grade Mode: Letter Grading

ANTH 796 - Reading and Research
Credits: 1-8
A) Cultural/Social Anthropology; B) Anthropological Linguistics; C) Archaeology; D) Physical Anthropology.
Grade Mode: Letter Grading

ANTH 797 - Advanced Topics
Credits: 4
Advanced or specialized courses presenting material not normally covered in regular course offerings. May be repeated, but not in duplicate areas. Course descriptions on file in the department office during registration. A) Social Organization; B) Economic Anthropology; C) Anthropology of Religion; D) Political Anthropology; E) Social Impact Analysis; F) Cultural Ecology; G) Prehistoric Archaeology; H) Historic Archaeology; I) Cultural Resources Conservation; J) Lithic Analysis; K) Ceramic Analysis; L) Faunal Analysis; M) Human Evolution; N) Human Variations; O) Anthropological Theory. Operates on a seminar format.
Attributes: Writing Intensive Course
Prerequisite(s): ANTH 411 with a minimum grade of D- or ANTH 412 with a minimum grade of D- or ANTH 415 with a minimum grade of D-.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

Applied Animal Science (AAS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

AAS 421 - Large Animal Behavior and Handling Techniques
Credits: 2
Introduction to domestic large animal behavior and handling techniques. Cattle, horses, swine, and sheep are used in this course. Students perform routine health-related procedures and gain valuable hands-on skills and safe animal handling techniques which can be applied to the fields of veterinary medicine, animal research, commercial agriculture, and animal control. 1 lec/1 lab.
Equivalent(s): ANSC 408, ANSC 508
Grade Mode: Letter Grading

AAS 423 - Dairy Selection
Credits: 2
Selection techniques used in cattle for purchase, breeding, and genetic improvement through the use of visual evaluation, pedigrees, production, and progeny information. 1 lec/1 lab.
Grade Mode: Letter Grading
Special Fee: Yes

AAS 432 - Introduction to Forage and Grassland Management
Credits: 3
Introduction to grasslands of the world and their management. Special emphasis on the identification, production, and utilization of New England forage crops for feeding domestic farm animals. The course includes the selection of local plant species and varieties, including their management and recommended harvesting practices. The course also includes a basic introduction to soils, as well as nutrient and fertility management.
Grade Mode: Letter Grading
Special Fee: Yes

AAS 434 - Equipment and Facilities Management
Credits: 3
Operation of agricultural equipment and maintenance of agricultural facilities as found in New England. Development of the essential skills and technical information needed to manage and supervise agricultural facilities and equipment. 2 lec/1 lab.
Grade Mode: Letter Grading

AAS 439 - Fundamentals of Animal Health
Credits: 2
Covers the principles of maintaining animal health by preventing and managing disease via husbandry, immunization, diagnostic testing and treatment. Focus is on domestic species; primarily dogs, cats, horses and cows. Topics include external and internal parasitology, microbiology, immunology including vaccination, and disease treatment. Course is designed to be taken along with the appropriate lab section: AAS 439A for Applied Animal Science majors or AAS 439B for VTEC majors, respectively. No credit earned if credit was received for VTEC 439.
Equivalent(s): VTEC 439
Grade Mode: Letter Grading

AAS 597 - Applied Animal Science Work Experience
Credits: 0
Employment (12 weeks, generally in the summer following the first year) in an approved animal-related position.
Equivalent(s): AAS 297
Grade Mode: Credit/Fail Grading

Applied Business Management (ABM)

No courses are currently active in the course inventory for this subject prefix.

Applied Studies (APST) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

APST 405 - Career Development and Planning
Credits: 2
This course engages participants in the career development and life planning process. The course may help students explore and apply to their own life situations knowledge of adult and career development and the skills and methods of career planning. Students may define and articulate the elements important to personal career satisfaction and develop strategies to achieve it. The course may include self-assessments, researching career information, decision-making, goal setting, and job search strategies. NOTE: Students in the A.S. Business and B.S. Business Management programs should take APST 405 and CMPL 402 together.
Equivalent(s): APST 505G
Grade Mode: Letter Grading

APST 605A - Practicum Business & Technology
Credits: 4
This project-based practicum provides students in both the Computer Information Technology and Business Management Bachelor of Applied Studies programs with a hands-on opportunity to apply their skills in real-world professional settings. Students will design and complete a supervised project or field experience aligned with their career interests. Whether in IT fields such as cybersecurity, data analysis, or software development, or in management areas such as organizational leadership, operations strategy, or business process improvement, the practicum emphasizes initiative, professionalism, and the integration of classroom learning with practical application, while fostering problem-solving, communication, and workplace readiness across both technical and managerial domains. A secondary goal of the practicum is to help students explore potential career paths and assess opportunities for an advanced internship, capstone, or industry certification experience.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

APST 695A - Integrative Capstone
Credits: 4
This integrative capstone course serves as the culminating experience for students in Business Management, Technology Management, and Computer Information Technology programs. It provides students the opportunity to synthesize and apply the knowledge, skills, and competencies gained throughout their program of study in a professional, project-based, or internship setting. Students will demonstrate their ability to analyze complex organizational and technological challenges, develop strategic solutions, and implement best practices aligned with their field of specialization and career goals. The course emphasizes the integration of management principles, innovation, and technology to address real-world problems across diverse industries.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

APST 705 - Grant Writing
Credits: 4
This course prepares participants to effectively write different types of grant narratives based on organizational need(s). Topics include the strategic purpose of grants, basic grant elements, effective grant-writing strategies, and grant management and stewardship. Projects may include a completed grant proposal, creation of grant management, and stewardship processes and tools.
Attributes: Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-.
Equivalent(s): APST 515G, APST 615G
Grade Mode: Letter Grading

Arabic (ARBC)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ARBC 401 - Elementary Arabic I
Credits: 4
This course introduces students to the language of Arabic and the culture of the Middle East. It teaches writing and pronunciation of Arabic letters and words, as well as a number of common phrases, such as greetings and cordial interactions. Both modern standard Arabic and colloquial Egyptian are taught. It also introduces students to basic aspects of Arabic culture and history.
Grade Mode: Letter Grading
Special Fee: Yes

ARBC 402 - Elementary Arabic II
Credits: 4
This course builds on skills of learning Arabic acquired in ARBC 401. It continues with the teaching of these skills, which are listening, reading, writing, and speaking. It expands the students' acquisition of grammar, and widens their familiarity with the Middle East culture. It teaches both modern Standard Arabic and colloquial Egyptian.
Attributes: Foreign Language Requirement
Prerequisite(s): ARBC 401 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ARBC 425 - Introduction to Arabic Culture
Credits: 4
Conducted in English. This course offers an introduction to Arabic culture and explores its historical, linguistic, social, religious, cultural, and artistic foundations. Students can expect to develop cultural awareness and communicative skills useful when interacting with people from the Arab world, in addition to critical analytical thinking skills through discussion of various Arabic cultural topics.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

ARBC 503 - Intermediate Arabic
Credits: 4
This intermediate level course builds on the skills of reading comprehension and the writing and speaking of Modern Standard Arabic that were acquired in first-year Arabic. It takes students to the next level of familiarity with, and the practice of, Arabic. It also puts a heavier weight on using the Egyptian dialect of Arabic in conversation.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): ARBC 402 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ARBC 504 - Intermediate Arabic
Credits: 4
This intermediate level course builds on the skills of reading and reading comprehension and the writing and speaking of Modern Standard Arabic that were acquired in Arabic 503. Students begin to read Arabic newspapers, websites, and other simple reading materials. An emphasis on using the Egyptian dialect of Arabic in conversation continues.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): ARBC 503 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ARBC 595 - Arabic Practicum
Credits: 2
Practical use of Arabic language and culture through special projects outside the classroom.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

ARBC 631 - Advanced Arabic I
Credits: 4
This advanced intermediate level course builds on the skills of reading and reading comprehension, and the writing and speaking, of Modern Standard Arabic that were acquired in ARBC 504. Students continue to read Arabic newspapers, websites and other materials, and bring their findings to share in class discussions. An even greater emphasis than in lower levels of Arabic, are placed on acquiring and practicing the Egyptian dialect of Arabic in class conversations.
Attributes: Foreign Language Requirement
Prerequisite(s): ARBC 504 with a minimum grade of D-.
Grade Mode: Letter Grading

ARBC 632 - Advanced Arabic II
Credits: 4
This advanced intermediate level course builds on the skills of reading and reading comprehension, and the writing and speaking, of Modern Standard Arabic. Students continue to read Arabic newspapers, websites and other materials, and bring their findings to share in class discussions. An even greater emphasis than in lower levels of Arabic, are placed on acquiring and practicing the Egyptian dialect of Arabic in class conversations.
Attributes: Foreign Language Requirement
Prerequisite(s): ARBC 631 with a minimum grade of D-.
Grade Mode: Letter Grading

ARBC 795 - Independent Study in Arabic
Credits: 1-4
Guided individual study. Topics selected by instructor and student in conference. Barring duplication of content, may be repeated for credit.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

Art History (ARTH)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ARTH 400 - Topics in Art History
Credits: 4
Art History will be presented thematically. At least three distinct chronological periods will be treated; students will develop research skills and give oral presentations. Topics will vary: "Art Writers: Their Sources and Their Effects;" "Rome from Romulus to the Fascists;" "Cults of the Original and Cultures of the Copy." Repeatable up to a maximum of 12 credits with different topics. May count towards Architectural Studies Minor if papers take the appropriate emphasis.
Attributes: FinePerformingArts(Discovery); Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 12 credits.
Equivalent(s): ARTS 400
Grade Mode: Letter Grading

ARTH 440A - From Digging to Digital: Preserving and Displaying the Past
Credits: 4
This course introduces the methods for the digital preservation of artifacts and the ethics of cultural conservation. Students will work with objects from the UNH museum to assess digital tools available to conservators, art historians, and archaeologists. We will explore photogrammetry, 3D modeling, virtual reality, web publishing software, and digital applications to study objects and preserve our cultural heritage. Discussion sections will address the social role of museums and international affairs.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): ARTS 440A
Grade Mode: Letter Grading

ARTH 444 - Mona Lisa to Much Ado About Nothing: An Introduction to Renaissance Culture
Credits: 4
What did Michelangelo and Shakespeare have in common? This course will read primary sources about the period called the Renaissance, which looked back to Greek and Roman paganism but which also launched Europe toward modernity due to its new emphasis on individual ambition and civic pride.
Attributes: FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): ARTS 444
Grade Mode: Letter Grading

ARTH 444B - Art and Money
Credits: 4
This course explores the relationship between art and money from a variety of perspectives. Topics will range from the art market boom in seventeenth-century Holland, to money as subject matter in twentieth-century art. How do we determine the value of art? How do markets influence taste? How do we define authenticity? What is at stake in the opposition between art and money, and can they be reconciled?.
Attributes: FinePerformingArts(Discovery); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): ARTS 444B
Grade Mode: Letter Grading

ARTH 474 - Introduction to Architectural History
Credits: 4
Survey of representative buildings from the entire history of architecture with analysis of structure, form, and symbolic content, concentrating on major works such as pyramids, the Roman Pantheon, the Gothic cathedral, the Renaissance palace, the Baroque church, and the modern skyscraper. In addition to the overarching narrative of architectural history, further topics include materials and building technologies, design theories, aesthetic principles, and the role of the architect in society.
Attributes: Historical Perspectives(Disc)
Equivalent(s): ARTS 574
Grade Mode: Letter Grading

ARTH 480 - Introduction to Art History
Credits: 4
Analysis of the central forms and meanings of art history through intensive study of selected artists and monuments. Includes works of architecture, sculpture, painting, and the graphic arts. Topics will vary but might include the Parthenon, Chartres Cathedral, Michelangelo's Sistine Chapel ceiling. Rembrandt's self-portraits, Monet's landscapes, Picasso's Guernica, Frank Lloyd Wright's Falling water, Georgia O'Keeffe's abstractions, ukiyo-e prints, and Benin sculpture.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): ARTS 480
Grade Mode: Letter Grading

ARTH 485 - Introduction to Global Art History
Credits: 4
What is art? Or, what does art do? In this course we will try to answer these questions by surveying works of art from a range of different cultures across the globe that represent tens of thousands of years of human history. The majority of our time will be spent studying non-western art and art created by historically marginalized artists and communities. This class will be divided into modules centralized around important themes in art history that will allow us to consider why art is made, how art is made, and why art is so important to human history.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

ARTH 501 - Introduction to Mediterranean Archaeology
Credits: 4
Survey of representative archaeological sites, architecture, and objects produced by the cultures surrounding the Ancient Mediterranean. The course will focus on the structure, form, and symbolic content, or sanctuaries, cities, tombs, housing, as well as material culture such as pottery and sculpture. In addition to the overarching narrative of the history of classical archaeology, further topics include cross-cultural influences, materials and building technologies, archaeological theory and practice, and aesthetic principles.
Attributes: World Cultures(Discovery)
Equivalent(s): CLAS 501
Grade Mode: Letter Grading

ARTH 502 - Ancient Pompeii and the Bay of Naples
Credits: 4
This course analyzes the cultural development of Pompeii and adjacent sites buried by the eruption of Vesuvius in AD 79. The aim is to understand the architectural layout and material culture of the cities, their development over time, as well as understand how social norms, politics and cultural influences shaped the appearance and the built environment in the seven hundred years that Pompeii existed prior to its destruction. Through the lens of the surviving art, architecture, and material culture students will learn about everyday life in ancient Pompeii and how different social classes interacted in the city.
Attributes: World Cultures(Discovery)
Equivalent(s): CLAS 502
Grade Mode: Letter Grading

ARTH 583 - Baroque Art: Realism, Caricature, Shock
Credits: 4
The last period of Italian world prominence in the visual arts, the Baroque witnessed a shift of artistic power toward Spain, France, and the Netherlands. The private collecting of pictures, controversies over the legitimacy of religious images, the exploration of etching, pastels, and monotypes, and the serious pursuit of less august subject matter for the visual arts all served to separate Baroque art from its esteemed predecessor, the Renaissance. Bernini, Borromini, Caravaggio, Velazquez, Rembrandt, Rubens, and Poussin are among the artists to be studied.
Attributes: Writing Intensive Course
Equivalent(s): ARTH 683
Grade Mode: Letter Grading

ARTH 600 - Internship in Art History
Credits: 1-4
Elective only. Cannot be used to fulfill art history requirements.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ARTS 600
Grade Mode: Letter Grading

ARTH 674 - Greek Art and Architecture
Credits: 4
Ancient Greece has long been a source of emulation and inspiration. From the legendary Bronze Age palaces of Mycenae and Knossos, through the classical ideas of the city state and its ultimate diffusion through Alexander the Great, this course explores ancient Greek culture through the lens of its art and architecture. We will consider the monuments and surviving artifacts that have influenced art and architecture through the ages and continue to shape the modern world.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 674
Grade Mode: Letter Grading

ARTH 678 - Romanesque and Gothic Art
Credits: 4
From the fall of the Roman Empire to the fourteenth century, through plague and destruction, glory and honor, heaven and hell, this course tackles the culmination of medieval artistic development, focusing especially on major architectural monuments and their sculptural programs. Treating also the art of tombs, relics, manuscripts, and devotional painting. Connections between social, religious, and art history are emphasized.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 678
Grade Mode: Letter Grading

ARTH 681 - Early Renaissance Art
Credits: 4
How did Europe recover from the Black Death in 1348? How was it possible for Florence to become the center of western creativity both before and after that catastrophe? How did Renaissance art develop elsewhere during the fourteenth and fifteenth centuries? Was was "primitive" about Botticelli?.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 681
Grade Mode: Letter Grading

ARTH 682 - The High Renaissance
Credits: 4
Examines the trajectory from Leonardo to the deaths of Michelangelo and Titian: painting, sculpture, architecture, and works on paper.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 682
Grade Mode: Letter Grading

ARTH 686 - Sex and Sensuality in 18th-Century Art
Credits: 4
European art of the "long" eighteenth century (1680-1815) experienced radical shifts in aesthetic, social, and political orientation: from the splendors of absolutism to the austere neoclassicism of revolutionary art. This course explores painting and sculpture (and works in other media) in relation to the development of a public sphere, the emergence of individualism, the invention of personal domestic comfort, the introduction of women to artistic power, the scientific revolution, and the birth of global consumer culture.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 686
Grade Mode: Letter Grading

ARTH 688 - Histories of Late 19th & 20th Century European Modernism
Credits: 4
An examination of European and American art from Symbolism to Surrealism, from the 1890s to World War II. The course focuses on a series of topics related to the political, social, scientific, and artistic upheavals of the era. Among the topics to be considered are Gauguin and "Primitivism"; Picasso, Cubism, and film; the Bauhaus and Utopian Architecture; Modernist Philosophy; Surrealism and Freud; and the fate of art under Hitler and Stalin.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 688
Grade Mode: Letter Grading

ARTH 694 - Vision and Modernity: From Panorama to Early Film
Credits: 4
The course examines the emergence of modern visual culture between the end of the 18th century and the beginning of the 20th century. It tracks the development of new technologies and conditions of viewing—from the panorama to photography to early cinema—and situates those developments in relation to larger social, intellectual, and cultural shifts in our conceptions of subjectivity, collectivity, and the mechanics of optical perception. The visual material at the center of our discussions will include nineteenth- and twentieth-century photographs, as well as paintings, prints, film, and other forms of visual entertainment and ephemera.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 694
Grade Mode: Letter Grading

ARTH 695 - Topics in Art History
Credits: 4
Topics and prerequisites to be announces before registration. May be repeatable twice with different topics.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ARTS 695
Grade Mode: Letter Grading

ARTH 697 - Topics in Asian Art
Credits: 4
A thematic study of the major artistic achievements in India, China, and/or Japan from pre-history to the twentieth century. Works of art in various media, including painting, sculpture, ceramics, calligraphy, prints, architecture, and gardens, will be examined in relation to philosophical concepts and to their cultural/historical contexts. May be repeated twice with different topics.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 697
Grade Mode: Letter Grading

ARTH 699 - Museum Studies
Credits: 4
Introduction to the history and practice of American museums, including their purposes, organization, interpretation, policies and practices. Use of the UNH Museum of Art with occasional visits to other museums and art conservators. This course may not be used by studio art/art ed or B.F.A majors to fulfill the art history requirements.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 699
Grade Mode: Letter Grading

ARTH 795 - Understanding Art History: An In-Depth Overview
Credits: 4
Art history is by its nature interdisciplinary, and so this course, while it is intended as the capstone for art history majors, also welcomes voices (and eyes) from other disciplines. We will look at a variety of case studies addressing works of art and architecture, and students will research their own topics, in an effort to understand better the strengths and weaknesses of art historical thought, both past and present.
Attributes: Writing Intensive Course
Equivalent(s): ARTS 795
Grade Mode: Letter Grading

ARTH 796 - Independent Study: Art History
Credits: 1-4
Open to highly qualified juniors or seniors who have completed the advanced level courses. May be repeated for a maximum of 8 credits. Written proposal required and permission from supervising faculty member.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ARTS 796
Grade Mode: Letter Grading

ARTH 799 - Seminar in Art History
Credits: 4
Topics and prerequisites to be announced before registration. May be repeated with permission of instructor.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ARTS 799
Grade Mode: Letter Grading

Arts & Culture (ART) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ART 401 - Introduction to Drawing
Credits: 4
This studio art course fosters a hands-on approach to basic drawing and composition. Students explore, comprehend, and employ the basic elements and principles of art, use various graphic media, and become familiar with the vocabulary, concepts, and techniques of drawing. Projects emphasize composition and guide students toward mastering the skills needed to produce an effective and expressive drawing.
Attributes: FinePerformingArts(Discovery); Human Thought Exp (Gen Ed)
Equivalent(s): ARTS 501G
Grade Mode: Letter Grading

ART 403 - Introduction to Watercolor
Credits: 4
This is a course for all levels of students, including students with no previous studio art experience. The course introduces students to a variety of approaches to the watercolor medium through the use of hands-on experience, demonstrations, instructor and peer feedback, and discussions. Students will develop watercolor painting skills and visual literacy through recognizing and practicing common watercolor techniques leading to a portfolio of work by the end of the term.
Attributes: FinePerformingArts(Discovery); Human Thought Exp (Gen Ed)
Equivalent(s): ARTS 503G
Grade Mode: Letter Grading

ART 512 - Fundamentals of Design
Credits: 4
This course introduces the design elements, principles, and skills needed to succeed in the graphic design industry. Students will have the opportunity to learn the fundamentals of professional layout using Adobe Creative Cloud while demonstrating an understanding of composition, color, typography, vectors, and bitmap creation, along with other essential attributes of graphic design. The design process, design as visual communication, and the designer's role in concept development for media, web, and video will also be emphasized.
Attributes: FinePerformingArts(Discovery); Human Thought Exp (Gen Ed)
Equivalent(s): ARTS 504G, ARTS 512G
Grade Mode: Letter Grading

ART 515 - Digital Photography
Credits: 4
This course explores the fundamentals of digital photography. It is structured to help the student master the technical tools of digital photography and image-editing software while cultivating the ability to perceive and understand the world visually and artistically. Students practice constructively critiquing their own work and that of others. This course also examines the unique place photography has within the context of other art forms, such as painting, cinema, music, and literature. In order to meet the learning outcomes of this course, students must have access to a standalone digital camera (DSLR) for required use in the class.
Attributes: Environment,TechSociety(Disc); Human Thought Exp (Gen Ed)
Equivalent(s): ARTS 515G
Grade Mode: Letter Grading

ART 544 - Special Topics: Lower Level
Credits: 4
A study of current and variable topics in Arts and Culture. Course content changes from term to term. Lower level.
Equivalent(s): ARTS 544G
Grade Mode: Letter Grading

ART 550 - Art History: Western World
Credits: 4
The primary goal of this course is to develop an appreciation of the important role that the arts and the individual artist have played through the ages. The course examines the formal qualities and technical achievements of important works from each major period in Western art, as well as the historical and cultural context in which they were created.
Attributes: FinePerformingArts(Discovery); Human Thought Exp (Gen Ed)
Equivalent(s): ARTS 550G
Grade Mode: Letter Grading

ART 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in Arts and Culture. Course content changes from term to term. Upper level.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): ARTS 644G
Grade Mode: Letter Grading

Arts/History & Studio (ARTS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ARTS 501 - Introductory Ceramics
Credits: 4
Theory and practice of basic ceramics; includes all methods of basic construction, decoration, glazing, and kiln firing. Emphasis on each individual's perceptual development. Lab.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 510 - Principles of Design
Credits: 4
An introduction to the principles of design. Students will explore the foundational elements and processes of design principles found in the development of the fine and commercial arts. Lectures will explore the history of design concepts and movements, while studio/lab sessions will enable students to develop their own projects and animation designs. Students will develop basic proficiencies in design software programs.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 515 - Principles of Interior Design
Credits: 4
Students will explore the foundational elements and processes in the design of interior spaces. Lectures will explore the history of interior design; the fundamentals of workign with materials, objects, textures, colors and lighting; how to create plans, maps and diagrams; and how to work with clients. Studio/lab sessions will enable students to develop their own projects and designs. Students will develop proficiencies in related software programs.
Grade Mode: Letter Grading

ARTS 520 - Principles of Architectural Design
Credits: 4
An entry level architectural design studio. Course assignments feature hand drafting, hand rendering, model building, and project presentations while developing skills in verbal, written, and graphic communication. Drafting, hand-rendering, and model making materials and tools are required for this course. Knowledge of CAD or 3-D computer modeling is required.
Grade Mode: Letter Grading

ARTS 522 - Topics in Architecture Design Studio
Credits: 4
Topics in Architectural Design Studio presents foundational architectural design concepts through a rotation of courses. Each course will present unique concepts to contextualize foundational design skills and processes. Concepts such as the relationship between the built and natural environment, sustainable and regenerative design and topics in the use of new technologies in design are among some of the topics that will be considered through a rotation of Workshop course offerings. As students develop basic skills in drafting, model making and design thinking they will focus on addressing the challenges and concepts unique to the topic presented.
Repeat Rule: May be repeated for a maximum of 12 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

ARTS 525 - Introductory Woodworking
Credits: 4
This course introduces students to the process of designing and building furniture with wood as the primary material. Students think creatively to brainstorm and develop their own, individual designs and use a variety of hand tools, power tools, and machines to build their objects. This course is a prerequisite to upper level woodworking and furniture design workshop courses, which subsequently investigate more sophisticated furniture concepts and woodworking techniques. Studio.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 532 - Introductory Drawing
Credits: 4
This course is an introduction to the basic principles of studio drawing. Students work towards mastering the technical skills to produce drawings from observation, a working knowledge of the historical time line in drawing, and insight into the complexities of the creative process. A variety of materials are explored, pencil, charcoal, ink and collage. Art historical and contemporary drawing practices are shown in lectures and books to amplify the concepts introduced in the daily studio work.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): ARTS 532H
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 532H - Honors/Introductory Drawing
Credits: 4
This course is an introduction to the basic principles of studio drawing. Students work towards mastering the technical skills to produce drawings from observation, a working knowledge of the historical time line in drawing, and insight into the complexities of the creative process. A variety of materials are explored, pencil, charcoal, ink and collage. Art historical and contemporary drawing practices are shown in lectures and books to amplify the concepts introduced in the daily studio work.
Attributes: FinePerformingArts(Discovery); Honors course
Equivalent(s): ARTS 532
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 535 - Introduction to Printmaking: Monotypes and Collagraphs
Credits: 4
Studio arts course in Printmaking. This course is an introduction to monotype and collagraph printmaking. Distinct from intaglio and relief printmaking, monotypes and collagraphs develop unique image prints with more direct application of ink and plate construction. Students will explore these concepts and techniques through the construction of plate surfaces and direct ink application. Course instruction includes: lectures, demonstrations, class critiques and direct, hands-on practice.
Grade Mode: Letter Grading

ARTS 536 - Introduction Printmaking: Intaglio
Credits: 4
Study of intaglio printmaking techniques, including etching, dry point, and engraving. Lab.
Prerequisite(s): ARTS 532 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 538 - Introduction to Printmaking: Relief
Credits: 4
This class is an introduction to printmaking as an art form with emphasis on relief printing techniques. The history of print, both as a tool for communication and as an art medium, will be discussed. While this studio class will be comprised of project based, hands-on learning – lecture, live demos and the practice of documenting one's process in a process notebook will also be included. Students will learn how to correctly use wood carving tools, oil-based ink and its modifiers, as well as safe handling of etching presses. We will be using nontoxic best-practices for using, storing and cleaning up printmaking ink as well as nontoxic studio maintenance. Students will engage with the relief printmaking techniques of block-print pattern design, multi-block woodcuts using a key block, 4-color reduction linocuts and printing with found objects. Each assignment will build on the last and all will include strategies for color printing, registration techniques and what it means to create an edition. They will also acquire skills in color separation, layering transparent colors to create a full spectrum, graphic depth and compositional considerations, planning a project in steps and safe studio practices. At the end of the semester students will have a solid foundation in the process of relief printmaking – as well as a buildable toolbox of skills that can be applied to other artistic mediums.
Grade Mode: Letter Grading

ARTS 546 - Painting Design I: Perceptual Painting and Color Theory
Credits: 4
Color is the central formal issue in painting. This course explores in some detail all basic aspects of color, introducing color terms and examining the meaning of color contrast. Students become familiar with the color wheel and perform color-mixing assignments. Ideas about color are related to paintings done in class based on a variety of subjects. Students receive training on the essential vocabulary of color (as well as materials, techniques, etc.). Lectures on great colorist, critiques and outside assignments are also featured as part of the studio routine of this course.
Prerequisite(s): ARTS 532 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 551 - Introduction to Darkroom Photography
Credits: 4
This studio course introduces the fundamentals of photographic practice. Students learn technical aspects of exposure, developing and printing in the darkroom as they explore and respond to the visual qualities of the medium. The format includes class demonstrations, lab work, field assignments and critiques. Manual 35mm film camera will be provided.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 552 - Introductory Digital Photography
Credits: 4
Introduction to the basic principles and applications of digital photography. The philosophical and technical relationship between camera and computer is an integral part of today's digital literacy needs. Techniques learned correspond to traditional darkroom processes and include creative shooting, editing and image manipulation. The students uses new skills and techniques towards developing a unique artistic vision. Digital camera required (point and shoot or DSLR).
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 567 - Introductory Sculpture
Credits: 4
Introduces the beginning student to the theory and practice of designing three-dimensional compositions using a series of progressive assignments. The student develops a practical understanding of sculptural elements, including line, form, space, mass, and plane. Multiple materials are explored including clay, plaster, wire and wood. This course is a prerequisite to upper level sculpture workshop courses, which subsequently focus on in-depth investigations of a particular topic.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 596 - Special Topics in Studio Art
Credits: 4
Introductory level topics to be announced before registration. Topics can be either a lecture or studio course. May be repeated with different topics.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

ARTS 598 - An Artist's Life
Credits: 4
This course looks at the visual arts from the standpoint of artists. Biographies of artists and their environments are emphasized. Studio methods, professional activities, and ideas of historical and contemporary artists are also studied. The semester includes readings, discussions, and field trips. The course encourages students to develop ideas about the relationship of the visual arts to other disciplines in fine arts, literature and the sciences.
Attributes: Inquiry (Discovery)
Grade Mode: Letter Grading

ARTS 600 - Internship in Studio Art
Credits: 1-4
Internship can be taken for university elective credits or can be applied to a major concentration requirement with approval.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ARTS 601 - Ceramics Workshop
Credits: 4
Application of new ceramic materials and techniques, with emphasis on ideas and their expression through form and content. Experimentation encouraged. Specific focus to be announced each semester. Lab.
Prerequisite(s): ARTS 501 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 610 - Principles of Typography
Credits: 4
Introduction to the principles of typography. Students will explore the foundational elements and processes of typographic principles used in graphic design and publishing. Lectures will explore the history of typographic concepts and movements, while studio/lab sessions will enable students to develop their own projects and typographic designs. Students will develop basic proficiencies in design software programs.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 611 - Animation and Motion Design
Credits: 4
This course is an introduction to animation and motion design, and will cover the history and aesthetics of animation and motion design, ways to think in time and space, techniques and methods for planning motion sequences, how to create and use storyboards and scripts, how to use live action video footage in your designs, and the use of motion-specific industry-standard software tools (AfterEffects, Flash, Premier and others).
Grade Mode: Letter Grading

ARTS 612 - Interaction & Game Design
Credits: 4
This course is an exploration of the principles of interaction design as they relate to physical and digital space, with a focus on designing user-centered artifacts, games, and experiences. Theoretical concepts like ethnography, user-testing, and the use of mapping in design will be explored. We will also examine the landscape of technology as it relates to interaction, and the use of appropriate tools and software to create prototypes and functioning digital designs.
Grade Mode: Letter Grading

ARTS 613 - Design and Place
Credits: 4
This course is an exploration of designing objects and experiences for spaces and places, both physical and digital. This branch of design is known as experiential and/or environmental graphic design. Lectures will focus on wayfinding, sense making, accessibility and universal design, and others. Studio work will engage students in creating projects like signage systems, exhibition design, packaging and design for retail spaces, and 3-dimensional digital spaces.
Grade Mode: Letter Grading

ARTS 614 - Design and People
Credits: 4
An exploration of designing with and for people and communities. How do designers create work for specific audiences, and how do they collaborate with people to make useful designs? Lectures will explore communication theory, user observation and ethnography, participatory design, modes of persuasion, system design, sustainability, how to design for niche audiences, and others. Studio work will focus on connecting students to specific audiences to create design projects that solve problems or address social issues.
Grade Mode: Letter Grading

ARTS 625 - Wood/Furniture Design Workshop
Credits: 4
In this studio course students learn how to design and build furniture and non-functional objects using a variety of techniques, hand tools, and machines. Emphasis is on challenging and exploring creativity to examine preconceived ideas about what furniture forms should look like while developing a solid understanding of various techniques.
Prerequisite(s): ARTS 525 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 636 - Printmaking Workshop
Credits: 4
Emphasis on development of the individual's imagery in lithography and/or intaglio, including an introduction to multicolor printmaking.
Prerequisite(s): ARTS 536 with a minimum grade of C- or ARTS 537 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

ARTS 640 - Drawing Workshop
Credits: 4
This is a studio course in drawing. This course will offer a range of conceptual, formal, material and technical content on a rotating basis. Each workshop will present a topic through which students will engage a variety of historical and cultural expressions as they develop their own work.
Prerequisite(s): ARTS 532 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 12 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

ARTS 651 - Photography Workshop
Credits: 4
Individualized projects involving creative methods, including color, manipulative, and documentary techniques. Students provide their own cameras. Lab.
Prerequisite(s): ARTS 551 with a minimum grade of C- or ARTS 552 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 660 - Painting Workshop
Credits: 4
This is a studio course in painting. This course will offer a range of conceptual, formal, material and technical content on a rotating basis. Each workshop will present a topic through which students will engage a variety of historical and cultural expressions as they develop their own work.
Prerequisite(s): ARTS 546 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 12 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

ARTS 667 - Sculpture Workshop
Credits: 4
Design and production of sculpture focusing on various materials and techniques and how they relate to composition and content. Emphasis on understanding visual language while developing an individual style. Lab.
Prerequisite(s): ARTS 567 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 780 - Advanced Studio Seminar
Credits: 4
Course provides a framework for individual art/design projects or to explore a specific topic within art/design, with a focus on interdisciplinary and/or hybrid making practices. The course will also cover professional practices within art/design (including portfolio development, social media practices, understanding job descriptions, creative resumes, and more). In-class sessions will include lectures about the creative process and professional practices, peer workshopping of project proposals and progress, critiques of work in progress, and discussions of related topics. Course is limited to studio art majors and minors; other advanced students may elect with instructor's permission. Any 3 studio arts (ARTS) courses, where 2 must be at the 600 level or above, required prior to taking this course.
Grade Mode: Letter Grading

ARTS 791 - Art Education (Elementary)
Credits: 4
Children's creative growth as revealed through their visual expression. Development of elementary art education programs with emphasis on objectives, methods, materials and techniques to foster creativity. EDUC 500 is suggested to take prior to this course.
Grade Mode: Letter Grading

ARTS 792 - Art Education (Secondary)
Credits: 4
The creative process in the visual arts in relation to the development and skills of middle and high school students in the public schools; mechanics of beginning and maintaining a secondary art program; exploring resources for art education programs on the secondary level. EDUC 500 is suggested to take prior to this course.
Grade Mode: Letter Grading

ARTS 796 - Independent Study: Studio Art
Credits: 1-8
Open to highly qualified juniors or seniors who have completed the advanced level courses. May be repeated for a maximum of 12 credits with no more than 8 credits in a single medium. Same term multi-enrollment in different media only. A) Photography, B) Sculpture, C) Drawing, D) Painting, E) Printmaking, F) Watermedia, G) Design, H) Architectural Design, J) Ceramics, K) Wood Design. Special fee in some mediums. Written proposal and permission required.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading
Special Fee: Yes

ARTS 798 - Seminar/Senior Thesis
Credits: 4-8
Readings and discussions oriented toward the intellectual premises of art. Culminates in mounting an exhibition of the student's work. Required of all students in the B.F.A program. Other advanced students may elect with instructor's permission. A year-long course; an IA grade (continuous course) will be given at the end of the first semester. Lab. B.F.A. majors must take 8 credits total. Special fee for Photography students.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

Behavioral Science (BEHS) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BEHS 445 - Homeland Security and Emergency Management
Credits: 4
This course presents an overview of the homeland security and emergency management field and enables students entering the profession or expanding their roles to function effectively given a broad array of emergency management issues. This course provides students with a broad view of issues that focus on policy considerations and align with the five National Preparedness System mission areas of prevention, protection, mitigation, response, and recovery. Students learn critical concepts such as the Department of Homeland Security all-hazards approach of emergency management, risk prevention, counter-terrorism, and consequence management and mitigation. This course takes a behavioral science risk-based approach, assessing capabilities and identifying gaps within existing emergency management programs. This approach is instrumental to planning future homeland security and emergency management programs, which facilitate our nation's ability to improve emergency management.
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOC 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D-.
Equivalent(s): BEHS 505G
Grade Mode: Letter Grading

BEHS 510 - National Incident Management Systems (NIMS)
Credits: 4
This course examines the comprehensive approach guiding the whole community - all levels of government (federal, state, county, and town), nongovernmental organizations (NGOs), and the private sector - to work together seamlessly to prevent, protect against, mitigate, respond to, and recover from the effects of emergency incidents. The course provides students with an understanding of National Incident Management Systems (NIMS) concepts, principles, and components.
Prerequisite(s): BEHS 445 with a minimum grade of D- or BEHS 505G with a minimum grade of D-.
Equivalent(s): BEHS 510G
Grade Mode: Letter Grading

BEHS 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Behavioral Science. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): BEHS 544G
Grade Mode: Letter Grading

BEHS 595 - Practicum in Behavioral Science
Credits: 4
This practicum is an entry-level field experience designed to assist behavioral science majors in exploring career and vocational settings in which they can use and apply their behavioral science knowledge and skills. The nature of the practicum is exploratory, involves extensive initiative in designing and implementing the practicum, and is conducted under the supervision of the practicum instructor. A supplementary objective of the practicum is to explore and assess possibilities for settings and situations in which the student may engage in an upper-level behavioral science internship. Earlier registration deadlines may apply.
Prerequisite(s): PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOC 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or CRIM 410 with a minimum grade of D-.
Equivalent(s): BEHS 540G
Grade Mode: Letter Grading

BEHS 610 - Community Emergency Response
Credits: 4
The focus of this course is on disaster preparedness and training and organizing teams that can support communities during disasters. The course provides disaster response process knowledge, such as fire safety, light search and rescue, and disaster medical operations. Community emergency response knowledge is used to develop strategies to protect families, neighbors, and co-workers if a disaster occurs. How to plan, execute, and evaluate disaster preparedness desktop exercises will be addressed.
Prerequisite(s): BEHS 445 with a minimum grade of D- or BEHS 505G with a minimum grade of D-.
Equivalent(s): BEHS 610G
Grade Mode: Letter Grading

BEHS 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in Behavioral Science. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject area.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): BEHS 644G
Grade Mode: Letter Grading

BEHS 665 - Disaster Management
Credits: 4
This course provides a comprehensive overview of emergency management principles as they relate to fire departments, emergency services, community stakeholders, and partner agencies. Students will explore the five phases of emergency management – mitigation, preparedness, protection, response, and recovery – and examine the roles of key agencies and stakeholders in each phase. Emphasis is placed on understanding the legal framework governing emergency operations, analyzing community vulnerabilities, coordinating resources, and employing effective communication strategies.
Prerequisite(s): BEHS 445 with a minimum grade of D- or BEHS 505G with a minimum grade of D- or FSA 605 with a minimum grade of D- or FSA 605G with a minimum grade of D-.
Equivalent(s): BEHS 617G
Grade Mode: Letter Grading

BEHS 675 - Terrorism: Domestic and International
Credits: 4
This course is designed to acquaint students with the major issues in the growing threat of domestic and global terrorism. Topics include an overview of the history and development of terrorism, types of terrorism, terrorist groups, the psychology of terrorism, the structure and dynamics of terrorist groups, terrorists' techniques, financing of terrorism, the media and terrorism, legal issues, and terrorism of the future.
Equivalent(s): BEHS 615G
Grade Mode: Letter Grading

BEHS 695 - Internship in Behavioral Science
Credits: 4
This course is a field-based internship designed to develop and hone the practical application skills of a Behavioral Science major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the general auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where behavioral science-related knowledge and skills are applied. NOTE: It is recommended that students have completed the majority of upper level course work in their major prior to enrolling in this course. Registration for this course is by permission of Academic Affairs. Earlier registration deadlines may apply.
Equivalent(s): BEHS 640G
Grade Mode: Letter Grading

Biochemistry, Molecular & Cellular Biology (BMCB)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BMCB 501 - Biological Chemistry
Credits: 4
Survey of the molecular basis of life with a focus on the mechanisms of biochemical reactions in metabolic pathways, beginning with an overview of functional groups and organic reactions relevant for living organisms. Bioenergetics of carbohydrate, lipid, and nitrogen metabolic pathways.
Prerequisite(s): (CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-)) or CHEM 411 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken BMCB 658, BMCB 751, BMCB 752.
Grade Mode: Letter Grading

BMCB 605 - Principles of Cell Biology
Credits: 4
Cell and developmental biology of multicellular eukaryotic organisms. Structure and function of major cellular compartments; mechanisms of cellular communication and dynamics; embryonic development. Special topics: subcellular organization and function; membrane biogenesis; signal transduction; mitogenesis; apoptosis; autophagy; tumor suppressors and cell cycle regulation; cytokinesis; cytoskeletal dynamics; cellular shape and motility; stem cell biology; organogenesis; morphogenesis and patterning.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BMS 507 with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and ((CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-)) or CHEM 405 with a minimum grade of D-).
Equivalent(s): BIOL 605, BSCI 735
Grade Mode: Letter Grading

BMCB 658 - General Biochemistry
Credits: 3
Comprehensive, introductory course emphasizing the cellular metabolism and the structure and function of proteins, nucleic acids, carbohydrates, and lipids.
Co-requisite: BMCB 659
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or BMS 507 with a minimum grade of D- and ((CHEM 545 with a minimum grade of D- or CHEM 547 with a minimum grade of D- or CHEM 651 with a minimum grade of D- and (CHEM 546 with a minimum grade of D- or CHEM 548 with a minimum grade of D- or CHEM 652 with a minimum grade of D-).
Equivalent(s): BMCB 658A
Mutual Exclusion: No credit for students who have taken BMCB 501.
Grade Mode: Letter Grading

BMCB 658A - General Biochemistry
Credits: 3
Comprehensive, introductory course emphasizing the cellular metabolism and the structure and function of proteins, nucleic acids, carbohydrates, and lipids. This course is intended for programs that do not require a biochemistry laboratory.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or BMS 507 with a minimum grade of D-) and ((CHEM 545 with a minimum grade of D- or CHEM 547 with a minimum grade of D- or CHEM 651 with a minimum grade of D-) and (CHEM 546 with a minimum grade of D- or CHEM 548 with a minimum grade of D- or CHEM 652 with a minimum grade of D-)).
Equivalent(s): BMCB 658
Mutual Exclusion: No credit for students who have taken BMCB 501.
Grade Mode: Letter Grading

BMCB 659 - General Biochemistry Lab
Credits: 2
Structured laboratory experiments that provide training in analytical and preparative techniques fundamental to modern biochemistry and molecular biology.
Co-requisite: BMCB 658
Equivalent(s): BCHM 659, BMCB 659W
Grade Mode: Letter Grading
Special Fee: Yes

BMCB 659W - General Biochemistry Lab
Credits: 2
Structured laboratory experiments that provide training in analytical and preparative techniques fundamental to modern biochemistry and molecular biology.
Co-requisite: BMCB 658
Attributes: Writing Intensive Course
Equivalent(s): BCHM 659, BMCB 659
Grade Mode: Letter Grading
Special Fee: Yes

BMCB 751 - Principles of Biochemistry I
Credits: 4
In-depth survey of biochemistry: macromolecular structure; structure and function of proteins, nucleic acids, carbohydrates, and lipids; introduction to metabolic pathways.
Prerequisite(s): (CHEM 547 with a minimum grade of D- and CHEM 548 with a minimum grade of D-) or (CHEM 651 with a minimum grade of D- and CHEM 652 with a minimum grade of D-).
Mutual Exclusion: No credit for students who have taken BMCB 501.
Grade Mode: Letter Grading

BMCB 752 - Principles of Biochemistry II
Credits: 4
In-depth survey of biochemistry: metabolism of amino acids, nucleotides, carbohydrates and lipids; synthesis and regulation of macromolecules; molecular biology of the eukaryotic cell.
Prerequisite(s): BMCB 751 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken BMCB 501.
Grade Mode: Letter Grading

BMCB 753 - Cell Culture
Credits: 5
Principles and technical skills fundamental to the culture of animal and plant cells, tissues, and organs. Introduction to the techniques of sub-culturing, establishing primary cultures, karyotyping, serum testing, cloning, growth curves, cryopreservation, hybridoma formation and monoclonal antibody production, and organ cultures. Application of cell culture to contemporary research in the biological sciences. Lab.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): ANSC 751, MICR 751, PBIO 751
Grade Mode: Letter Grading
Special Fee: Yes

BMCB 754 - Molecular Biology Research Methods
Credits: 5
Theory and application of current technologies to manipulate DNA. Hands-on research experience that includes DNA isolation and quantitation methods, cloning, PCR, DNA sequencing, and analysis of gene products. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): GEN 604 with a minimum grade of D-.
Equivalent(s): BCHM 754, BSCI 765, GEN 754, PBIO 754
Grade Mode: Letter Grading
Special Fee: Yes

BMCB 755 - Protein Biochemistry Laboratory
Credits: 5
Application of modern approaches to the characterization and purification of proteins. Emphasis on recombinant protein production and purification, analytical techniques for characterization of proteins, enzyme kinetics, and molecular visualization of protein structure.
Attributes: Writing Intensive Course
Prerequisite(s): BMCB 658 with a minimum grade of D- or BMCB 751 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

BMCB 760 - Pharmacology
Credits: 4
Introduction to the basic principles and fundamental concepts of pharmacology, with a focus on molecular mechanisms and pathological basis of therapeutics and their curative effects. Topics include: foundations of pharmacology including pharmacodynamics and pharmacogenomics; drugs affecting other systems; chemotherapeutic drugs.
Prerequisite(s): BMCB 658 with a minimum grade of D- or BMCB 751 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken BSCI 680.
Grade Mode: Letter Grading

BMCB 763 - Biochemistry of Cancer
Credits: 4
Evaluation of the hallmarks of cancer, including molecular mechanisms of carcinogenesis, roles of oncogenes and dysregulated cell development, function and metabolism, tumor immunology, and the biological basis of cancer therapy.
Prerequisite(s): (BMCB 658 with a minimum grade of D- or BMCB 751 with a minimum grade of D-) and BMCB 605 with a minimum grade of D-.
Equivalent(s): BCHM 763
Grade Mode: Letter Grading

BMCB 790 - Undergraduate Teaching Experience
Credits: 1-4
Provide academic support to graduate teaching assistants or faculty in preparing, presenting, and executing Biochemistry, Molecular and Cellular Biology lectures or labs.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

BMCB 794 - Protein Structure and Function
Credits: 4
Analysis of how the three-dimensional architecture of soluble and membrane proteins contributes to their biochemical function; methods for determining the structure of proteins; protein folding; protein targeting; mechanisms of enzyme catalysis. Computer resources used for protein modeling and structural prediction.
Prerequisite(s): BMCB 658 with a minimum grade of D- or BMCB 751 with a minimum grade of D- or BMCB 658A with a minimum grade of D-.
Grade Mode: Letter Grading

BMCB 795 - Investigations in Molecular and Cellular Biology
Credits: 1-4
Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply advanced knowledge and techniques of the major to a specific problem or question.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BCHM 795, BCHM 795W, BMCB 795W
Grade Mode: Letter Grading

BMCB 795W - Investigations in Molecular and Cellular Biology
Credits: 1-4
Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply advanced knowledge and techniques of the major to a specific problem or question.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BCHM 795, BCHM 795W, BMCB 795
Grade Mode: Letter Grading

BMCB 799 - Senior Thesis
Credits: 1-4
Independent research project under the direction of a faculty sponsor for seniors in biochemistry, molecular and cellular biology. Final product is a written thesis. One or two semesters.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BCHM 699, BCHM 799, BCHM 799H, BMCB 799H
Grade Mode: Letter Grading

BMCB 799H - Honors Senior Thesis
Credits: 1-4
Independent research project under the direction of a faculty sponsor for seniors in biochemistry, molecular and cellular biology and in the Honors Program. Final product is a written thesis. One or two semesters.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BMCB 799
Grade Mode: Letter Grading

Biological Science (BSCI)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BSCI 401 - The Secret Lives of Whales
Credits: 4
The evolution and classification of whales living in their global ocean ecosystem will be investigated along with the influence and impact of humans on whale populations throughout history. Current research methods used to perform whale research will be presented. The implementation and current status of the effects of regulation, enforcement, management on the conservation of whale populations will be discussed. The impact of climate change, pollution and ocean water quality will be investigated.
Attributes: Biological Science(Discovery)
Grade Mode: Letter Grading

BSCI 410 - Contemporary Health Issues
Credits: 4
This course exposes students to the three major dimensions of health - physical, emotional, and social. Nutrition, infectious diseases, substance abuse and addiction, mental health, sexual health, aging and stress management are among the issues that will be discussed. Students will learn to intelligently relate health knowledge to the social issues of the day.
Attributes: Biological Science(Discovery)
Grade Mode: Letter Grading

BSCI 432 - Medical Terminology
Credits: 2
This course is an introduction to medical terminology. The origin, roots, prefixes and suffixes of common scientific and medical terms are examined. Course is totally online and includes assigned online interactive material. Appropriate for biology majors, prePA, premed, and other interested majors.
Grade Mode: Letter Grading

BSCI 441 - Exploring NH Forests: Drawing to Discover the Tree Community
Credits: 4
Discover the hidden stories of New Hampshire's forests as you learn to see like an artist and think like an ecologist. This course combines foundational drawing techniques (no prior drawing skills required!) with hands-on exploration of the forest community and current forest ecology research topics. Through guided outdoor sessions students will sharpen their ability to observe and document the natural world. In-class activities, discussion and readings will provide opportunities to discover the ecological principles and breaking research that describe how trees connect to each other and their community. Inspired by their forest experiences, students will engage in a research project of interest to create an illustrated report.
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading

BSCI 450 - The Small Microbial World
Credits: 0 or 4
An introduction to the invisible world of microbes and microorganisms and their impact on human life and ecosystems. Laboratory will be an opportunity for science and non-science students to learn the scientific method while they participate in citizen or crowdsourced science and contribute to scientific knowledge. Vaccines, antibiotics, and other topics will be presented.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading
Special Fee: Yes

BSCI 505 - Biosciences Sophomore-Junior Seminar
Credits: 2
The Biosciences Sophomore/Junior Seminar is tailored for Biological Sciences and Biotechnology students in their sophomore or junior years. This seminar serves as a platform to help students plan for and work towards the successful completion of their Capstone project during their senior year. In addition, the seminar is intended to proactively prepare students for careers in the biosciences through refinement of professional and career skills useful for applications for jobs or further education.
Grade Mode: Credit/Fail Grading

BSCI 599 - Special Topics in Biology
Credits: 1-4
This course explores and investigates topics in biology that would not normally be covered in other courses in the curriculum.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

BSCI 620 - Global Science Exploration
Credits: 4
This course includes a spring break trip abroad investigating living organisms in their natural habitat. Students will participate in pre-trip seminars on the country, local flora, fauna and habitats they will visit. Students will design a project to integrate their personal interests and objections with in-country investigation. Post-trip seminar will focus on preparation of project and its presentation. May be repeated if the spring break trip is to a different country.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 413 with a minimum grade of C- and BIOL 414 with a minimum grade of C-) or (BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-).
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

BSCI 650 - Antibiotic Discovery Lab
Credits: 3
Advanced students with microbiology experience will participate in a research project focused on the discovery of novel antibiotics from soil bacteria. Each student will work with faculty to generate hypotheses and carry out one or more short antibiotic discovery and/or antibacterial chemical experiments. Satisfies the Advanced Microbiology requirement for Biotechnology majors. No credit earned if previously taken BSCI 797/Antibiotic Discov Research and BSCI 798/Antibiotic Discovery.
Co-requisite: BSCI 651
Attributes: Writing Intensive Course
Prerequisite(s): (BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-) or BSCI 450 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

BSCI 651 - Antibiotic Discovery
Credits: 3
Advanced students with microbiology experience will participate in a research project focused on the discovery of novel antibiotics from soil bacteria. Each student will work with faculty to generate hypotheses and carry out one or more short antibiotic discovery and/or antibacterial chemical experiments. Satisfies the Advanced Microbiology requirement for Biotechnology majors. No credit earned if previously taken BSCI 797/Antibiotic Discov Research and BSCI 798/Antibiotic Discovery.
Co-requisite: BSCI 650
Prerequisite(s): (BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-) or BSCI 450 with a minimum grade of C-.
Grade Mode: Letter Grading

BSCI 670 - Clinical Pathophysiology
Credits: 4
This course covers the principles and mechanisms of disease at the cellular, tissue, organ, and system levels, including responses to cell injury, death and adaptation, and inflammation. Acute and chronic disease processes as well as trauma are used to both understand the impact of these processes on body function as well as a means to gain a better understanding of integrative body systems. No credit if credit earned for BMS 794 or UMST 599 Clinical Pathophysiology.
Prerequisite(s): (BIOL 413 with a minimum grade of C- and BIOL 414 with a minimum grade of C-) or (BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-) or (BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-).
Equivalent(s): BMS 704
Grade Mode: Letter Grading

BSCI 680 - Pharmacology
Credits: 4
This course is designed to cover the concepts of basic pharmacology and drug therapy. It includes examination of the body systems and the related drugs therapy within each system. It explores the basic drug groups, key similarities and differences among drugs in each group. Emphasis is placed on the mechanism of action for each group and how these medications act in relation to normative and pathophysiology. The therapeutic use and adverse effects of drugs as well as understanding recreational drug use will be included. No credit if credit received for UMST 599 Pharmacology.
Prerequisite(s): (BIOL 413 with a minimum grade of C- and BIOL 414 with a minimum grade of C-) or (BMS 507 with a minimum grade of C- and BMS 508 with a minimum grade of C-) or (BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-).
Mutual Exclusion: No credit for students who have taken BMCB 760.
Grade Mode: Letter Grading

BSCI 695 - Exploring Biology Teaching
Credits: 1-4
Students assist in teaching labs in undergraduate courses supervised by the lab coordinator/instructor. Responsibilities include facilitating lab endeavors, giving a presentation, and writing a report.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): BIOL 695
Grade Mode: Letter Grading

BSCI 701 - Senior Seminar I
Credits: 1
To be taken during the last two semesters of the senior year as students complete their Capstone project. Course emphasizes written and oral communication, discussion of current topics in biology, and career guidance. Fall and spring semester.
Grade Mode: Credit/Fail Grading

BSCI 737 - Microbial Genomics and Biotechnology Lab
Credits: 3
Provides a combined wet-lab and computational experience in microbial genomics and biotechnology, including microbial cultivation and biochemical testing, genome analysis, and bioprocess-relevant workflows. Students will conduct experiments relevant to genomic characterization while learning approaches for detecting, preventing, and mitigating microbial contamination in laboratory and biomanufacturing settings. Bioinformatics modules introduce hands-on genome assembly, annotation, and comparative analysis using current tools. Emphasis is placed on experimental design, data interpretation, and communication of findings.
Co-requisite: BSCI 738
Prerequisite(s): GEN 604 with a minimum grade of C- and BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

BSCI 738 - Microbial Genomics and Biotechnology
Credits: 3
This course focuses on microbial genome biology and the biotechnological applications of microbes and microbial systems. Topics include genome structure, comparative and metagenomic approaches, microbial engineering, and applications in health, industry, synthetic biology, and biomanufacturing . Microbial contamination and control in bioprocessing and research environments are also included.
Co-requisite: BSCI 737
Prerequisite(s): GEN 604 with a minimum grade of C- and BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-.
Grade Mode: Letter Grading

BSCI 740 - Aquatic Microbiology
Credits: 4
Lectures and labs focus on Lake Massabesic and its use as the source of supply as the drinking water for approximately 160,000 New Hampshire residents. The course covers a basic history of the Lake, the importance of watershed protection, EPA regulations, and standards and the various techniques and methods available to analyze water for basic quality. No credit for students who have earned credit for UMST 599 Aquatic Microbiology.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-.
Grade Mode: Letter Grading
Special Fee: Yes

BSCI 750 - Cancer Biology: From Benchtop Research to Therapeutic Interventions
Credits: 4
The development and progression of cancer can be defined by several molecular and cellular biological characteristics. In this course, we will utilize primary literature to begin to understand (1) how specific cellular processes are altered during cancer initiation and progression; (2) how different cancers and the genetic landscape underlying them are being studies using models in the laboratory; and (3) how innovative therapeutics are being designed to target tumors based upon their individual molecular signatures.
Prerequisite(s): GEN 604 with a minimum grade of C-.
Grade Mode: Letter Grading

BSCI 792 - Research
Credits: 1-4
Advanced independent research under the direction of a faculty mentor. Content area to be determined in consultation with faculty member. Prereq: permission. Up to 4 credits may be applied to self-designed concentration. Up to 4 credits may be applied to the Capstone requirement. Fall and spring semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

BSCI 793 - Internship
Credits: 1-4
Field-based learning opportunities in the biological sciences through placement in the appropriate outside agency, under the direction of a faculty mentor and representative of outside agency. Content area to be determined in consultation with faculty mentor. Up to 4 credits may be applied to self-designed concentration. Up to 4 credits may be applied to the Capstone requirement. Fall and spring semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

BSCI 795 - Independent Study
Credits: 1-4
Advanced individual study under the direction of a faculty mentor. Content area to be determined in consultation with faculty mentor. Up to 4 credits may be applied to self-designed concentration. Up to 4 credits may be applied to the Capstone requirement. Fall and spring semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

BSCI 797 - Special Topics in Biology
Credits: 1-4
This course explores and investigates topics in biology and biotechnology that would not normally be covered in other courses in the curriculum.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

BSCI 798 - Special Laboratory Topics in Biology
Credits: 0-4
This laboratory course explores and investigates advanced topics in biology that would not normally be covered in other courses in the curriculum.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

Biology (BIOL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BIOL 400 - Professional Perspectives on Biology
Credits: 1
Where can a degree in biology take me? This course views the scope of biology and explores professional opportunities for biological science majors. Guest speakers from on- and off-campus present seminars and lead discussions on contemporary issues in biology. This course will help you learn the skills required to succeed in biology and develop strategies for college success. Today, the field is multidimensional, offering many career opportunities for the future. Required for all first semester biology majors.
Grade Mode: Credit/Fail Grading

BIOL 402 - Biology in our Daily Lives
Credits: 4
Students will learn about the nature and practice of science as it relates to biology, and the ways in which our activities have a biological impact on the world around us. Throughout the course, the students will examine the biological messages with which we are constantly bombarded, and by linking background scientific principles to those messages, practice distinguishing science from pseudoscience.
Attributes: Biological Science(Discovery)
Grade Mode: Letter Grading

BIOL 408 - Plants and Civilization
Credits: 4
Global experience of human interactions with plants, and the ways in which plants have contributed to the development and the flourishing of human societies. Includes role of plants in providing sustenance, clothing and shelter, quest for spices, the historical consequences of plant explorations and exploitations, the power to heal or kill, plants in mythology and spiritual endeavors, plants that alter consciousness, plant diseases and human history, plants as energy for society, and the Green Revolution in global change and feeding the world in the future.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): PBIO 400
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 409 - Green Life: Introducing the Botanical Sciences
Credits: 0 or 4
All human and other animal life on earth depends upon green life: i.s., the plant world. In its diverse forms, green life is the ultimate source of our food, and of the atmospheric breath of life: oxygen. This course explores the structure, function, growth, reproduction, and remarkable evolutionary diversity of plants in their natural and human-influenced environments. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): BOT 412, PBIO 412
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 411 - Introductory Biology: Molecular and Cellular
Credits: 0 or 4
Introduction to structure and function of cells; tissues and organs; physiological processes; genes and heredity. Required for majors in the biological sciences. Lab. Students not permitted to enroll in BIOL 411 and BIOL 412 in the same semester.
Attributes: Biological Science(Discovery); Discovery Lab Course; Inquiry (Discovery)
Equivalent(s): BIOL 411H
Mutual Exclusion: No credit for students who have taken BIOL 413.
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 411H - Honors/Introductory Biology: Molecular and Cellular
Credits: 0 or 4
Introduction to structure and function of cells, tissues and organs, physiological processes and genes and heredity. Required for majors in the biological sciences. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course; Honors course; Inquiry (Discovery)
Equivalent(s): BIOL 411
Mutual Exclusion: No credit for students who have taken BIOL 413.
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 412 - Introductory Biology: Evolution, Biodiversity and Ecology
Credits: 0 or 4
Evolution is the paradigm through which we understand Biology. This course will introduce students to evolutionary concepts that underlie the tremendous biodiversity present on Earth, and explore the ecological interactions that occur among individuals and species. Indoor and outdoor lab activities. Required for majors in the biological sciences. Students are not permitted to enroll in BIOL 411 and BIOL 412 in the same semester. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course; Inquiry (Discovery)
Equivalent(s): BIOL 412H
Mutual Exclusion: No credit for students who have taken BIOL 414.
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 412H - Honors/Introductory Biology: Evolution, Biodiversity, and Ecology
Credits: 0 or 4
Evolution is the paradigm through which we understand Biology. This course will introduce students to evolutionary concepts that underlie the tremendous biodiversity present on Earth, and explore the ecological interactions that occur among individuals and species. Indoor and outdoor lab activities. Required for majors in the biological sciences. Students are not permitted to enroll in BIOL 411 and BIOL 412 in the same semester. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course; Honors course; Inquiry (Discovery)
Equivalent(s): BIOL 412
Mutual Exclusion: No credit for students who have taken BIOL 414.
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 413 - Principles of Biology I
Credits: 0 or 4
Lecture and Laboratory introduction to biological principles; cell structure, function, replication, energetics and transport mechanisms; physiological processes; Mendelian, molecular genetics and gene technology. Required for students majoring in the life sciences. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course; Inquiry (Discovery)
Mutual Exclusion: No credit for students who have taken BIOL 411, BIOL 411H.
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 414 - Principles of Biology II
Credits: 0 or 4
Lecture and laboratory survey of the five kingdoms of life; physiology of cells, tissues, organs, and organ systems; evolution; human impact on the biosphere. Required for students majoring in the life sciences. Cannot be taken for credit after BIOL 412 or equivalent. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Mutual Exclusion: No credit for students who have taken BIOL 412, BIOL 412H.
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 420 - Introduction to Forensic Sciences
Credits: 0 or 4
Explore the forensic sciences! How do you collect, preserve, and analyze evidence related to a crime scene investigation? Hear from the experts and apply scientific principles and techniques in laboratory exercises that follow a crime scene scenario. The goal of this class will be to provide students with an understanding of what criminalistics entails and to prepare them for additional, more in-depth classes in criminalistics or forensic science.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 428 - Quantitative Biosciences
Credits: 4
Quantitative Biosciences introduces first and second-year students in the life sciences to the quantitative approaches used in molecular biology, behavior/physiology, and ecology. Through lectures (e.g., focused on quantitative concepts and biological material) and recitations (e.g., focused on applying quantitative concepts to biological case studies), students will learn to apply mathematical models, perform data analysis, and use computational tools to address biological questions. This course emphasizes the integration of quantitative methods across multiple biological scales—from molecules to ecosystems. Students are expected to have had high school biology. Previous undergraduate coursework in biology in helpful, but not required.
Attributes: Quantitative Reasoning(Disc)
Grade Mode: Letter Grading

BIOL 430 - Biology of the City
Credits: 4
This course explores biological systems, functions, and interaction of organisms in an urban environment. Using the campus as our laboratory, the course will progress from exploring the effects of urbanization on biodiversity, biological responses to urbanization, urban forestry, urban agriculture, and conclude with topics in sustainable urban development and conservation. Students in the course will develop an understanding of ecological concepts, problems, and solutions to improving ecological systems of urban areas.
Attributes: Biological Science(Discovery); Discovery Lab Course
Grade Mode: Letter Grading

BIOL 444B - Current Controversial Issues in Biology
Credits: 4
An inquiry into current controversial issues in biology and their scientific and technical bases, but with an emphasis on exploring the various perspectives or beliefs related to each topic and their social and environmental implications.
Attributes: Biological Science(Discovery); Inquiry (Discovery)
Grade Mode: Letter Grading

BIOL 510 - Mushrooms, Molds, and Mildews: Introduction to the Fungal Kingdom
Credits: 4
Fungi are a fascinating group of organisms that occupy nearly every habitat on the planet. We encounter fungi in everyday life from the dangerous to the delicious. This course is a fun, approachable introduction to the world of fungi. Students will learn about the role fungi play in human society, review basic concepts of fungal biology and discuss important issues of our time: how we use fungi to make medicines, how fungi feed us, how plant diseases and food spoilage affect food supply, and how fungi contribute to ecosystem functioning.
Grade Mode: Letter Grading

BIOL 520 - Our Changing Planet
Credits: 4
Ecosystem interrelations and factors critical to maintain sustainability will be addressed in this course. Environmental issues such as water usage, pollution, and treatment; air and soil quality; fossil fuels and alternative energy sources will be presented. Not for credit if credit earned for ENE 520.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): CEE 520, ENE 520
Grade Mode: Letter Grading

BIOL 528 - Applied Biostatistics I
Credits: 4
Knowledge of biostatistics is essential to understanding our observations of life on Earth and properly design and conduct scientific research. Students develop skills in organizing data and performing, presenting, and interpreting statistical analyses. Theoretical concepts are applied using statistical software(s) and prepared biological data. Topics include descriptive statistics, continuous and discrete probability distributions, inferential statistics, confidence intervals, hypothesis testing for a difference of means and proportions, linear regression, non-parametric hypothesis testing, and graphing.
Attributes: Quantitative Reasoning(Disc)
Mutual Exclusion: No credit for students who have taken ADM 430, ADMN 420, ADMN 510, EREC 525, HHS 540, HMP 540, MATH 439, MATH 539, MATH 644, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

BIOL 541W - Ecology
Credits: 0 or 4
Physical and biological factors affecting distribution, abundance, and adaptations of organisms. Population, community, and ecosystem structure and function. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D- or NR 439 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Equivalent(s): BIOL 541
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 566 - Systematic Botany
Credits: 0 or 4
Scientific basis of plant taxonomy and the identification and classification of major plant families, native trees, shrubs, and wildflowers. Field trips, plant collection. Lab.
Prerequisite(s): (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D- or BIOL 409 with a minimum grade of D-).
Equivalent(s): PBIO 566
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 600 - Field Experience
Credits: 1-4
A supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty adviser selected by the student.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

BIOL 633 - Data Analysis for Life Science
Credits: 4
Expand your statistical knowledge and resume by learning R. Use project-based learning to explore topics such as inequalities of life expectancy, heart disease and risk behaviors, biomagnification of ecotoxins, and impacts of ticks on wildlife populations while learning statistical skills and R. In this course students will learn to become proficient in R (data manipulation, graphing, hypothesis testing, importing and cleaning data) and learn to effectively communicate statistical results.
Prerequisite(s): BIOL 528 with a minimum grade of D- or ADMN 510 with a minimum grade of D- or EREC 525 with a minimum grade of D- or HHS 540 with a minimum grade of D- or MATH 439 with a minimum grade of D- or MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D- or PSYC 402 with a minimum grade of D- or PSYC 402H with a minimum grade of D- or SOC 402 with a minimum grade of D- or SOC 402H with a minimum grade of D- or SOC 502 with a minimum grade of D- or SOC 502H with a minimum grade of D-.
Grade Mode: Letter Grading

BIOL 695 - Biology Teaching Practices
Credits: 1-4
Students assist instructor in biology course labs. Responsibilities may include assisting instructors with field trips, lab set-up and clean-up, helping students during lab and field exercises, presenting material, and creating a project that enhances the curriculum. You may be expected to present material or create a project that enhances the curriculum. This course is by invitation only.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): BSCI 695
Grade Mode: Letter Grading

BIOL 700 - Current and Controversial Issues in Biology
Credits: 4
This course explores current issues in the biological sciences that are controversial and have a significant impact on individuals and society. Issues related to human population growth, evolution, cloning, synthetic biology, genetically modified organisms, free will, etc. Biology capstone. Only open to Animal Science, Zoology, Neuroscience and Behavior, Biology, Marine & Freshwater Biology, and Sust Agriculture& Food Systems majors.
Grade Mode: Letter Grading

BIOL 701 - Plant Physiology
Credits: 4
This course covers general principles of plant physiology relating plant structure to function and introduce basic physiological processes underlying plant growth and development and plant responses to the environment. Course topics include plant cell structure, plant water relations, plant mineral nutrition, metabolism, photosynthesis, plant respiration, signal transduction, plant growth regulators, photomorphogenesis, plant development, reproduction, senescence, and stress physiology. Course format consists of lectures and laboratory session. The laboratory session is designed to accompany lectures in plant physiology. The laboratories' core objective is to help students visualize main basic concepts and common techniques in plant physiology by running basic experiments, analyze data, and present results.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 704 - Plant-Microbe Interactions
Credits: 3
Microbes and plants have developed intriguing strategies to encourage, resist or profit from their coexistence. The primary objective of the course is to provide students with a comprehensive overview of the various ways in which microbes interacts with plants, the outcomes of that interplay, and applications of these interactions and explore how these interactions impact ecosystem function.
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-) and (GEN 604 with a minimum grade of D- or (BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-)).
Grade Mode: Letter Grading

BIOL 706 - Data Science with R for the Life Sciences
Credits: 4
Introduces students to the basic data analysis and programming tools commonly used throughout the life sciences. Students will become proficient in R programming, data wrangling and cleaning, the principles of open and reproducible science, SQL database management, version control via Git/Github, building maps, and Bash command lines. Data sets and case studies from across the life sciences will be used throughout the course. The class culminates with an small group project.
Grade Mode: Letter Grading

BIOL 711 - Experimental Design & Analysis
Credits: 4
Design and analysis of biological and ecological research experiments. "Real world" studies used to discuss the identification of hypotheses, appropriate experimental design, and the application of statistical analyses including ANOVA, ANCOVA, correlation and regression, cluster analysis, classification and ordination techniques. Theoretical statistical concepts tailored to consider students' own thesis and dissertation research, allowing statistical problems to be addressed at various stages of the research process. Common computer packages used for analyses include Excel, JMP, Systat, and R.
Grade Mode: Letter Grading

BIOL 714W - Model Organisms in Biological and Medical Research
Credits: 2
Animals, plants, and microbes serve as powerful tools for both basic and biomedical research. This course integrates historical, philosophical, sociological, and biological perspectives to examine how models are chosen and used. and how to evaluate their strengths and weaknesses. Students will study particular model species in depth, and address general epistemological questions about the choice and use of model organisms. This course is designed for graduate students and advanced undergraduates interested in research. 58 hours of Undergrad Coursework, including advanced study in at least one specified area required.
Attributes: Writing Intensive Course
Equivalent(s): BIOL 714
Grade Mode: Letter Grading

BIOL 720 - Plant-Animal Interactions
Credits: 4
Animals and plants engage in a range of interactions, from plant-pollinator and plant-ant mutualisms to plant-herbivore and carnivorous plant antagonisms. This course will explore the consequences of a variety of interactions on the evolution of traits in both animals and plants, considering implications for both conservation and agriculture. Weekly recitation.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-).
Grade Mode: Letter Grading

BIOL 752 - New England Mushrooms: a Field and Lab Exploration
Credits: 4
This is a hands-on field, lab and lecture course in the identification, classification, life histories, and ecology of mushrooms and other macrofungi. Lectures focus on macrofungal ecology and systematics. Laboratory instruction emphasizes morphological, microscopic, and molecular identification techniques, plus the use of smart-phone field note recording and on-line resources. Several field trips are required in addition to the weekly laboratory. Previous experience with fungi is not required. Grades are based on a collection, a project, and presentations.
Prerequisite(s): ((BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) or (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-)) or BIOL 409 with a minimum grade of D-.
Equivalent(s): BOT 752, PBIO 752
Grade Mode: Letter Grading
Special Fee: Yes

BIOL 775 - Plant Rx
Credits: 3
This course will explore the biomedical and neuroscientific applications of plants. Through lectures, discussions and readings, the centuries old reliance of humans on plants to treat basic ailments, as well as how plants and their metabolites have catalyzed countless advances and inspired major discoveries in neuroscience, pharmacology, and medicine will be examined. The focus of the course will be split between understanding the biology of how and why plants produce secondary metabolites with medicinal properties and understanding how these signaling molecules have been used by humans to treat various ailments and expand the mind.
Prerequisite(s): BMCB 658 with a minimum grade of D- or BMCB 658A with a minimum grade of D-.
Grade Mode: Letter Grading

BIOL 780 - Capstone Companion Course
Credits: 1
This course is the required companion course to a student's individual capstone experience. It must be taken during the same semester as the individual experience, or in the fall immediately following a summer experience. This course will help connect a student's individual capstone experience to their broader academic program, and will be a forum for sharing individual experiences with peers. Thesis students should enroll in BIOL 780 during the second semester of the thesis. Should also be taken with a pre-approved individual capstone experience.
Grade Mode: Credit/Fail Grading

BIOL 795 - Independent Investigations in Biology
Credits: 1-4
Independent study in a topic related ot Biology, arranged by the student with a faculty sponsor. Enrollment by permission only.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 5 times.
Equivalent(s): BIOL 795W
Grade Mode: Letter Grading

BIOL 795W - Independent Investigations
Credits: 1-4
Topics may include teaching or research practicum in a biological science, supervised by a faculty member.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): BIOL 795
Grade Mode: Letter Grading

BIOL 799H - Honors Senior Thesis
Credits: 2-8
Independent research requiring a written proposal, a thesis, and a final public presentation (e.g. the Undergraduate Research Conference). Intended for biology majors completing biology Honors-in-major requirements. Contact biology program coordinator prior to senior year to arrange supervision and obtain permission. Two consecutive semesters. (4 credit minimum total; 8 credits maximum).
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BIOL 799
Grade Mode: Letter Grading

Biomedical Science (BMS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BMS 407 - Germs 101
Credits: 4
Societal and technological impact of the invisible microbial world on our lives and on the planet. Weekly extra-class activities enable students to use the scientific method of inquiry to explore topics like bacteria that use sunlight to live or use of bacteria in genetic engineering. Presents germs from different perspectives: as living organisms, as human enemies or friends, and as represented in newspapers or on TV. Especially useful for people with microphobia. No credit for BMS or Biology majors.
Attributes: Biological Science(Discovery)
Equivalent(s): BIOL 407, BMS 408, MICR 407
Grade Mode: Letter Grading

BMS 501 - Microbes in Human Disease
Credits: 0 or 4
Identification, pathogenesis, epidemiology, treatment, and prevention of medically important microorganisms. The biology of clinically relevant bacteria, viruses, fungi, and parasites is presented in relation to disease progress and host defense mechanisms. Clinical correlations that indicate microbes are causative agents of disease are emphasized. The laboratory introduces techniques for identification of pathogenic microorganisms to reinforce and expand the theoretical content. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): BMS 501H
Grade Mode: Letter Grading
Special Fee: Yes

BMS 503 - General Microbiology
Credits: 3
Principles of microbiology; morphology, physiology, genetics, culture, and classification of bacteria and other microorganisms; relationships of microbes to agriculture, environment, industry, sanitation, and infectious diseases.
Co-requisite: BMS 504
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BMS 507 with a minimum grade of D- or BIOL 413 with a minimum grade of D- and (((CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D-) or (CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Equivalent(s): MICR 503
Grade Mode: Letter Grading

BMS 504 - General Microbiology Laboratory
Credits: 2
Practical laboratory training in general microbiology. Topics include safe handling, visualization, and physiological identification of microorganisms with special attention given to aseptic technique.
Co-requisite: BMS 503
Grade Mode: Letter Grading
Special Fee: Yes

BMS 507 - Human Anatomy and Physiology I
Credits: 0 or 4
Cellular and systematic aspects of the human body. Laboratory exercises utilize preserved specimens, dissectible models, living tissue and computer-aided instruction. Systems covered include: the cell, chemistry, tissues, integument, osseous tissue and the skeleton, muscular tissue and muscles, nerves, the brain, spinal cord, autonomic nervous system, and special senses. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Mutual Exclusion: No credit for students who have taken ANSC 511.
Grade Mode: Letter Grading
Special Fee: Yes

BMS 508 - Human Anatomy and Physiology II
Credits: 0 or 4
Cellular and systematic aspects of the human body. Laboratory exercises utilize preserved specimens, dissectible models, living tissue and computer-aided instruction. Systems covered include: endocrine, blood, cardiovascular, respiratory, immune, digestive and metabolism, urinary, acid-base and electrolyte balance, reproductive.
Attributes: Biological Science(Discovery); Discovery Lab Course
Prerequisite(s): BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BMS 507 with a minimum grade of D- or BIOL 413 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken ANSC 512.
Grade Mode: Letter Grading
Special Fee: Yes

BMS 560 - Body Fluids
Credits: 3
The study of diseases and disorders through the analysis of extra-vascular body fluids. Emphasizes renal anatomy and physiology, and diseases and metabolic disorders affecting renal function.
Equivalent(s): BMS 660, MEDT 665, MLS 660, MLS 665
Grade Mode: Letter Grading

BMS 561 - Body Fluids Laboratory
Credits: 1
Practical experience in the performance and clinical correlation of urinalysis and selected body fluid procedures.
Co-requisite: BMS 560
Equivalent(s): BMS 661, MEDT 665, MLS 661, MLS 665
Grade Mode: Letter Grading
Special Fee: Yes

BMS 600 - Field Experience
Credits: 1-4
Supervised experience providing the opportunity to apply academic experience in settings associated with future professional employment and/or related graduate opportunities. Must be approved by a faculty advisor selected by the student. Only 4 credits can be used toward the major.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BMS 600W, MICR 600, MICR 600W
Grade Mode: Credit/Fail Grading

BMS 602 - Pathogenic Microbiology
Credits: 3
An introduction to microbial disease, with a focus on bacterial and viral diseases in humans and animals. This course examines the clinical presentation, laboratory diagnosis, and treatment of specific microbial pathogens. Molecular aspects of both microbial infection and host immune response are discussed. Case studies based on real clinical and research microbiology problems are presented.
Prerequisite(s): BMS 501 with a minimum grade of D- or (BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-).
Equivalent(s): MICR 602, MICR 700
Grade Mode: Letter Grading

BMS 603 - Pathogenic Microbiology Laboratory
Credits: 2
An introduction to morphologic, cultural, biochemical and pathogenic characteristics of microorganisms causing human and animal diseases. Laboratory exercises focus on both classical and modern laboratory diagnostic testing.
Co-requisite: BMS 602
Prerequisite(s): BMS 501 with a minimum grade of D- or (BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

BMS 610 - Biomedical Lab Management
Credits: 4
Overview of biomedical laboratory management, including lab operation, compliance, financial management, personnel management, information systems, and leadership.
Attributes: Writing Intensive Course
Equivalent(s): MEDT 610, MLS 610
Grade Mode: Letter Grading

BMS 616 - Microbial Ecology
Credits: 3
This course provides an introduction to microbial ecology across environments, covering: community interactions and assembly, microbial dispersal, microbiomes on hosts, microbial effects on environments, and changes through time.
Prerequisite(s): BMS 503 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 623 - Histology: Microscopic Cellular Structure and Function
Credits: 4
Cellular structure, function, and physiology, as well as the interactions between cells in different organ systems, are examined at the microscopic level. Digital microscopic images are utilized to examine the cellular structure of all organ systems and the interactions between cells in these organs. Hybrid course with online lab.
Prerequisite(s): (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-) or ((BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BMS 507 with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and BMS 508 with a minimum grade of D-).
Grade Mode: Letter Grading

BMS 635 - Preceptorial in Prehospital Care
Credits: 2
Practice and evaluation of prehospital care. Understand the roles of different provider levels in a healthcare setting. Students participate in ambulance activities, then discuss assessment and treatment of patients in the prehospital setting. Licensure by the New Hampshire Bureau of EMS required before course start date.
Prerequisite(s): KIN 684 with a minimum grade of D- and KIN 685 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

BMS 640 - Phlebotomy Theory
Credits: 2
Theory and demonstration of procedures involved in blood collection with an emphasis on safety and professionalism. Hands-on practice of selected techniques.
Grade Mode: Letter Grading
Special Fee: Yes

BMS 641 - Phlebotomy Clinical Internship
Credits: 1-2
Students obtain experience and proficiency in routine blood collection techniques at a health care facility (80 to 120 hours).
Prerequisite(s): BMS 640 with a minimum grade of D-.
Equivalent(s): MLS 641, MLS 650B
Grade Mode: Credit/Fail Grading
Special Fee: Yes

BMS 642 - Clinical Immunology and Serology
Credits: 2
Innate and specific immunity in the context of chemical and cellular responses to antigenic challenge. Also introduces the immunologic basis of autoimmunity, immune proliferation and deficiency, and hypersensitivity. Current clinical analytical methodologies and diagnostic criteria used to identify, differentiate and/or monitor these responses and conditions included.
Prerequisite(s): ((BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and (BIOL 412 with a minimum grade of D- or BIOL 412H with a minimum grade of D- or BIOL 414 with a minimum grade of D-)) or (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-).
Equivalent(s): MEDT 651, MLS 642, MLS 651
Grade Mode: Letter Grading

BMS 643 - Clinical Serology Laboratory
Credits: 2
Performance, interpretation and application of serological techniques for the diagnosis of immune system disorders.
Co-requisite: BMS 642
Equivalent(s): MEDT 651, MLS 643, MLS 651
Grade Mode: Letter Grading
Special Fee: Yes

BMS 644 - Clinical Hematology
Credits: 3
Human blood cell physiology in both health and disease. Includes benign and malignant conditions of red blood cells and white blood cells.
Equivalent(s): MLS 644, MLS 652
Grade Mode: Letter Grading

BMS 645 - Clinical Hematology Laboratory
Credits: 2
Analysis of whole blood for cellular components with special emphasis on differentiating benign from malignant processes, as well as cellular identification by morphologic characteristics and cytochemical staining.
Co-requisite: BMS 644
Equivalent(s): MLS 645, MLS 652L
Grade Mode: Letter Grading
Special Fee: Yes

BMS 646 - Clinical Hemostasis
Credits: 1
Introduction to hemostasis through evaluation of platelets, blood vessels, coagulation factors and fibrinolysis, including dysfunction and disease states.
Prerequisite(s): BMS 644 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 650 - Molecular Diagnostics
Credits: 4
Fundamental principles of molecular technology and techniques used in clinical laboratories such as nucleic acid extraction, DNA amplification, sequencing and hybridization, gel electrophoresis, and chromosome analysis. Prediction and detection of human disease (infectious disease, cancer, and other inherited disease), identity testing, molecular epidemiology, pharmacogenetics, and ethical issues. Previous knowledge of genetics and biochemistry lab techniques is highly recommended.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): BMS 755, BSCI 765, MLS 755
Grade Mode: Letter Grading

BMS 655 - Human and Animal Parasites
Credits: 3
Introduction to the parasitic process in humans and different animals indigenous to domestic and foreign areas of the world. Topics include epidemiology, infection, control, genetics, and immunology, as well as global economic consequences.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 656 - Immunohematology
Credits: 3
The immunology of blood, including blood group systems and the critical role they play in safe transfusion medicine. Additional topics include blood collection, component use, transfusion reactions, and transfusion-transmitted infections.
Equivalent(s): MEDT 653, MLS 653, MLS 656
Grade Mode: Letter Grading

BMS 657 - Blood Banking Laboratory
Credits: 1
Hands-on experience in clinical blood banking practices including blood typing, antibody screening and identification, cross matching, and confirmatory testing.
Co-requisite: BMS 656
Equivalent(s): MEDT 653, MLS 653, MLS 657
Grade Mode: Letter Grading
Special Fee: Yes

BMS 658 - Medical Biochemistry
Credits: 3
Use of body fluids to assess specific disease states including the pathophysiology of the disease, pre-analytical issues, analytical methodologies, and instrumentation. Topics include the biochemistry of analytes (amino acids, proteins, enzymes, tumor markers, non-protein nitrogen metabolites, carbohydrates, lipids, electrolytes, blood gases, etc.), clinical endocrinology, toxicology and therapeutic drug monitoring.
Prerequisite(s): ((BMCB 658 with a minimum grade of D- and BMCB 659 with a minimum grade of D-) or BMCB 751 with a minimum grade of D-) and (BIOL 528 with a minimum grade of D- or PSYC 402 with a minimum grade of D- or SOC 402 with a minimum grade of D- or MATH 439 with a minimum grade of D-).
Equivalent(s): MEDT 654, MLS 654, MLS 658
Grade Mode: Letter Grading

BMS 659 - Clinical Chemistry Laboratory
Credits: 2
Measurement of blood analytes such as proteins, glucose, electrolytes, and cholesterol, etc. Screening for drugs in urine and evaluation of clinical significance in human specimens. Principles of spectrometry, immunoassay, point-of-care testing, chromatography, mass spectrometry, electrophoresis, automation, and ion selective electrodes, with emphasis on instrumentation, quality control, and pre-analytical and analytical issues.
Co-requisite: BMS 658
Equivalent(s): MLS 654L, MLS 659
Grade Mode: Letter Grading
Special Fee: Yes

BMS 702 - Endocrinology
Credits: 4
Structure and function of vertebrate endocrine systems through the lens of physiology, biochemistry, and cell and molecular biology, with special reference to mammals. Current investigations of the body's major endocrine glands, such as the brain, thyroid, pancreas, adrenals and gonads, as regulators and integrators of biological systems. Principles of Cell Biology recommended prior to taking this course.
Grade Mode: Letter Grading

BMS 703 - Infectious Disease and Health
Credits: 4
Principles underlying the nature of infectious disease agents, including representative parasites, fungi, bacteria, viruses, and prions. Established pathogens and emerging human and animal disease agents highlighting zoonotic diseases. Epidemiology, pathogenesis, host immune response, disease transmission, treatment, and control. Weekly review and discussion of current world disease events.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): MICR 702
Grade Mode: Letter Grading

BMS 704 - Pathologic Basis of Disease
Credits: 4
Principles and mechanisms of disease at the cellular and tissue levels, including responses to cell injury, death and adaptation, inflammation, circulatory disturbances, disorders of the immune system, and neoplasia. ANSC 511 and ANSC 512, or BMS 507 and BMS 508 recommended.
Equivalent(s): ANSC 704
Grade Mode: Letter Grading

BMS 705 - Immunology
Credits: 3
An introduction to the fundamental mechanisms of immune function. Topics include the cells and organs of the immune system, humoral and cellular immune responses, the generation of immune cells, and how immune cells fight various infectious pathogens. Coreq: BMS 715 for BMS:MM majors only.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): MICR 705
Grade Mode: Letter Grading

BMS 706 - Virology
Credits: 3
Principles of animal and selected plant and bacterial virology in relation to infection and disease. Emphasizes the molecular biology of viruses, viral replication, isolation, propagation, assay, pathogenesis, diagnosis, detection, epidemiology, and control. Coreq: BMS 708 for BMS:MM majors only.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): MICR 706
Grade Mode: Letter Grading

BMS 708 - Virology Laboratory
Credits: 2
Principles and practices of animal, selected plants, and bacterial virological methods for the propagation, detection and enumeration of viruses.
Co-requisite: BMS 706
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

BMS 712 - Experiences in Applied Veterinary Diagnostics
Credits: 2
Students interact with different components of a working veterinary diagnostic laboratory. Through group reviews of New Hampshire Veterinary Diagnostic Lab cases, students learn about diseases using cases tailored to individual student interests. Pathologists and NHVDL staff provide information on disease processes, pathogenesis, and testing modalities. Students observe diagnostic techniques and archived gross and digital tissue specimens. Emphasis is on integrating knowledge of anatomy, physiology, microbiology, immunology, etc. within the context of molecular pathogenesis.
Prerequisite(s): (BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-) or (ANSC 511 with a minimum grade of D- and ANSC 512 with a minimum grade of D-).
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 2 times.
Grade Mode: Letter Grading

BMS 715 - Immunology Laboratory
Credits: 2
This applied immunology laboratory course highlights both historic and current methodologies important for elucidation and diagnosis of immune function. Techniques used to study phagocytosis, antibody production, immunodiffusion, and T-cell function will be introduced. Applications of the antibody technologies to other scientific disciplines (ELISA, immunofluorescence microscopy, immunoblotting, etc.) will also be covered.
Co-requisite: BMS 705
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): MICR 715
Grade Mode: Letter Grading
Special Fee: Yes

BMS 718 - Mammalian Physiology
Credits: 4
Advanced study of the systems that control mammalian functions with emphasis on cellular and molecular mechanisms. Includes the nervous, muscular, cardiovascular, renal, gastrointestinal, and endocrine systems.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 507 with a minimum grade of D- or BMS 508 with a minimum grade of D- or ANSC 511 with a minimum grade of D- or ANSC 512 with a minimum grade of D-.
Equivalent(s): ANSC 718
Grade Mode: Letter Grading

BMS 719 - Host-Microbe Interactions
Credits: 4
An examination of the way microorganisms interact with their hosts, with an emphasis on the pathogenic and commensal organisms of humans. Course material is introduced via reading, analysis and group presentations of primary scientific literature. Students are not only introduced to different types of host-microbe interactions, but different methods, systems and model organisms used to study these interactions.
Prerequisite(s): (BMS 501 with a minimum grade of D- or (BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-)) and GEN 604 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 720 - Mycology, Parasitology, and Virology
Credits: 3
Theoretical basis of the pathogenesis, epidemiology, and diagnosis of fungal, parasitic, and viral infections.
Prerequisite(s): BMS 602 with a minimum grade of D- and BMS 603 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 721 - Mycology, Parasitology, and Virology Laboratory
Credits: 2
Practical experience in medical mycology and parasitology diagnostic techniques. Isolation and identification of mycological and parasitological specimens. Principles and practices of proper specimen collections, analysis, and interpretation of results.
Co-requisite: BMS 720
Equivalent(s): MLS 720L, MLS 721
Grade Mode: Letter Grading
Special Fee: Yes

BMS 725 - Cell Phenotyping and Tissue Engineering Laboratory
Credits: 4
Introduction to culture and phenotyping of mammalian cells (cell line models), with applications to bioengineering and biomedical sciences. Skills, techniques, and knowledge covered include sterile technique, cell culture, cell line models, cell proliferation, cell survival, cell migration, cell adhesion, and drug response. Inquiry-based team projects investigate cell proliferation, cell death, transfection, flow cytometry, 3D scaffolds, or cell imaging.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): BMS 620
Grade Mode: Letter Grading
Special Fee: Yes

BMS 730 - Ethical Issues in Biomedical Science
Credits: 4
An examination of the importance of scientific integrity in the biomedical sciences. Students are introduced to the ethical issues that scientists must be familiar with when conducting research. Issues include scientific record keeping, authorship and peer review, conflicts of interest, use of animals and humans in research, and recombinant DNA technology. Class is discussion-based, encouraging both an appreciation of established guidelines and an opportunity to critically examine them.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 411 with a minimum grade of D- or BIOL 411H with a minimum grade of D- or BIOL 413 with a minimum grade of D-) and GEN 604 with a minimum grade of D- and BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-.
Equivalent(s): MICR 718
Grade Mode: Letter Grading

BMS 735 - Molecular and Cellular Parasitology
Credits: 4
Parasites continue to present a major challenge to public health. Despite their significant impact on human health, many aspects of the molecular and cellular biology of these diverse organisms remain unknown. This course explores the latest research on these fascinating organisms through analysis and discussion of original research papers focusing on three of the major human parasites.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 503 with a minimum grade of D- and GEN 604 with a minimum grade of D- and (BMS 655 with a minimum grade of D- or BMS 720 with a minimum grade of D-).
Grade Mode: Letter Grading

BMS 740 - Human Microbiome
Credits: 4
The human microbiome is a new, rapidly growing field of microbiology that has already made important contributions to the understanding of human health. This laboratory course utilizes current research methodology to investigate the microbiome of the human skin. Students gain hands-on experience in PCR, genomics, bioinformatics, and modern clinical identification techniques. They also generate primary data to make their own contribution to this important field of research. Lab.
Prerequisite(s): (BMS 501 with a minimum grade of D- or (BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D-) and GEN 604 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

BMS 747 - Case Studies in Bloodbanking
Credits: 1
Patient case studies are analyzed in immunohematology. Correlation of patient history with clinical presentation and interpretation of clinical laboratory results. Learn to interpret given information, recognize abnormal results and their clinical significance, generate etiologic possibilities, and determine the best diagnosis for the patient condition including appropriate treatment and recommended follow-up testing.
Prerequisite(s): BMS 656 with a minimum grade of D- and BMS 657 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 748 - Case Studies in Medical Biochemistry
Credits: 1
Patient case studies are analyzed in medical biochemistry. Correlation of patient history with clinical presentation and interpretation of clinical laboratory results. Learn to interpret given information, recognize abnormal results and their clinical significance, generate etiologic possibilities, and determine the best diagnosis for the patient condition including appropriate treatment and recommended follow-up testing.
Prerequisite(s): BMS 658 with a minimum grade of D- and BMS 659 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 749 - Case Studies in Hematology and Immunology
Credits: 2
Patient case studies are analyzed in hematology and immunology. Correlation of patient history with clinical presentation and interpretation of clinical laboratory results. Learn to interpret given information, recognize abnormal results and their clinical significance, generate etiologic possibilities, and determine the best diagnosis for the patient condition including appropriate treatment and recommended follow-up testing.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 642 with a minimum grade of D- and BMS 643 with a minimum grade of D- and BMS 644 with a minimum grade of D- and BMS 645 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 750 - Case Studies in Microbiology
Credits: 3
This course will draw upon microbiology knowledge gained in previous courses. The case studies discussed will broaden student understanding of clinical and diagnostic information as they relate to microbial pathogens. Additionally, students will work to recognize abnormal results, their clinical significance, and generate etiologic possibilities. Clinical test results will be used to determine the diagnosis for the patient condition, appropriate treatment, and recommended follow-up testing.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 602 with a minimum grade of D- and BMS 603 with a minimum grade of D- and BMS 720 with a minimum grade of D- and BMS 721 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 751 - Advanced Clinical Microbiology Internship
Credits: 4
Instruction and clinical practice of microbiology-related techniques and their applications in the medical laboratory setting. Includes the principles and practices of proper specimen collection, clinical diagnosis testing, and interpretation of results.
Prerequisite(s): BMS 720 with a minimum grade of D- and BMS 721 with a minimum grade of D-.
Equivalent(s): BMS 751W
Grade Mode: Letter Grading
Special Fee: Yes

BMS 752 - Advanced Hematology Internship
Credits: 4
Instruction and clinical practice of hematology-related techniques and their applications in the medical laboratory setting. Includes the principles and practices of special hematology procedures including diagnostic staining, advanced hemostasis studies, and evaluation of blood cells in disease states.
Equivalent(s): BMS 752W
Grade Mode: Letter Grading

BMS 753 - Advanced Immunohematology Internship
Credits: 4
Introduction and clinical practice of immunohematology-related techniques and their applications in the medical laboratory setting. Includes the principles and practices of advanced blood-banking procedures, including antibody identification, and component therapy.
Prerequisite(s): BMS 656 with a minimum grade of D-.
Equivalent(s): BMS 753W
Grade Mode: Letter Grading

BMS 754 - Advanced Clinical Chemistry Internship
Credits: 4
Instruction and clinical practice of clinical chemistry-related techniques and their applications in the medical laboratory setting. Includes the principles and practices of advanced laboratory analysis of body fluid chemistries. Enzymology, isotopes, hormones, blood gases, and toxicology. Theory, operation, evaluation and maintenance of automated chemistry systems.
Prerequisite(s): BMS 658 with a minimum grade of D-.
Equivalent(s): BMS 754W
Grade Mode: Letter Grading

BMS 780W - Clinical Human Pathophysiology
Credits: 3
This course provides an in-depth exploration of the mechanisms of disease, emphasizing the physiological dysfunction resulting in clinical symptomology. Students will examine the etiology, progression, clinical manifestations, and therapeutic foundations of major pathological conditions affecting bodily systems. We will approach pathophysiology through a biomedical and physiological focus on disorders of morphologic, genetic, infectious, inflammatory, developmental, autoimmune, or of acquired origin. Conditions managed primarily through lifestyle changes, nutritional, or behavioral intervention are excluded, as this course emphasizes underlying pathophysiological mechanisms.
Attributes: Writing Intensive Course
Prerequisite(s): BMS 507 with a minimum grade of D- and BMS 508 with a minimum grade of D-.
Grade Mode: Letter Grading

BMS 790 - Undergraduate Teaching Experience
Credits: 1-4
Provide academic support to graduate teaching assistants or faculty in preparing, presenting, and executing Biomedical Science lectures or labs.
Repeat Rule: May be repeated for a maximum of 4 credits.
Equivalent(s): MICR 790
Grade Mode: Letter Grading

BMS 795 - Investigations in Biomedical Science
Credits: 1-8
Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply knowledge and techniques of the major to a specific problem or question.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BMS 795W, MICR 795, MICR 795W
Grade Mode: Letter Grading

BMS 795W - Investigations in Biomedical Science
Credits: 1-8
Advanced research or scholarly projects developed and conducted under the supervision of a faculty member. Provides the opportunity to apply knowledge and techniques of the major to a specific problem or question.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BMS 795, MICR 795W
Grade Mode: Letter Grading

BMS 799 - Senior Thesis
Credits: 1-4
Independent research project under the direction of a faculty sponsor for seniors in biomedical sciences. Final product is a written thesis. One or two semesters.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BMS 799H
Grade Mode: Letter Grading

BMS 799H - Senior Honors Thesis
Credits: 1-4
Independent research project under the direction of a faculty sponsor for seniors in biomedical sciences and in the Honors Program. Final product is a written thesis. One or two semesters.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): BMS 799
Grade Mode: Letter Grading

Biotechnology (BIOT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BIOT 415 - Millyard Scholars Seminar
Credits: 2
Through in-class activities, workshops and guest speakers, students in the Millyard Scholars Program will explore career paths, and develop resources and skills for academic success. All student work, planning and experiences will be showcased in a digital portfolio.
Equivalent(s): BSCI 415
Grade Mode: Letter Grading

BIOT 418 - Phage Bioinformatics Lab
Credits: 2
In the course, students undertake a hands-on undergraduate research experience to describe, document, and publish the discovery of new bacteriophages (bacterial viruses). In doing so, students will elucidate how the genome codes biological information. The aim of the course is for students to develop further research and computational analysis skills while preparing to publish their scientific discoveries. The course will focus on research data analysis and presentation of research data to scientists and the public.
Equivalent(s): BSCI 418
Grade Mode: Letter Grading

BIOT 501 - Ethical Issues in Biology
Credits: 4
This course is an introduction to the ethical issues associated with current and future use of biotechnology. Students will think critically about different ethical problems that emerge from scientific research and its applications to medical technology. The focus will be on personal and public policy decision making.
Attributes: Writing Intensive Course
Prerequisite(s): (BIOL 413 with a minimum grade of C- and BIOL 414 with a minimum grade of C-) or (BIOL 411 with a minimum grade of C- and BIOL 412 with a minimum grade of C-).
Equivalent(s): BSCI 501
Grade Mode: Letter Grading

BIOT 510 - Introduction to Biofabrication
Credits: 4
This project-based course introduces students to the techniques and challenges of biofabrication. Students learn how additive manufacturing is used to combine cells with a variety of biolinks to create living tissues such as skin, cartilage, vascularized bone, and blood vessels. During this process students learn how to design for and operate 3D printing and bioprinting equipment. An emphasis will be placed on the ways in which this emerging technology impacts our society.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): BSCI 510
Grade Mode: Letter Grading

BIOT 655 - Advanced Phage Biology
Credits: 4
Students undertake an advanced exploration of bacteriophage biology through wet-lab and/or bioinformatic investigation of previously-discovered bacterial viruses. In the setting of bacteriophage genome study, students develop working fluency with coding of genetic information, annotation of genomes, publication and presentation of discoveries, and design of experiments to assess questions in viral structure and function.
Prerequisite(s): BSCI 418 with a minimum grade of C- or BMS 503 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

BIOT 704 - New and Emerging Biotechnology
Credits: 4
In this course students investigate emerging technologies, innovations and new products in the biotechnology industry, through case studies and scientific literature. Modern biotechnology focuses mainly on medicine. New treatments for rare and complex diseases as well as genetic testing to identify genetically-inherited diseases are continually being developed and discovered. Technology that makes these and other advances possible is the focus of this course.
Attributes: Writing Intensive Course
Prerequisite(s): GEN 604 with a minimum grade of C-.
Grade Mode: Letter Grading

BIOT 730 - Neurobiotechnology
Credits: 4
Why is the human brain so difficult to understand? When scientists uncover basic science principles of the neuron, how does that scale up to system-wide understanding or to clinical treatments? The instruments that help us investigate the function of an individual neuron are very different from the instruments needed to parse subjective human experience. This notion of scale, in both time and space, will be integral to exploring the obstacles of neuroscience research and to surveying the neurobiotech tools that help answer these difficult questions.
Grade Mode: Letter Grading

BIOT 753 - Cell Culture Lecture
Credits: 3
Fundamental biological principles that underlie cell culture and its applications are the foundation of the lecture component of this course. Applications of cell culture techniques to current research areas in academic and biopharmaceutical settings will be discussed.
Co-requisite: BIOT 754
Prerequisite(s): BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-.
Equivalent(s): BENG 620, BMCB 753, BMS 620
Grade Mode: Letter Grading

BIOT 754 - Cell Culture Lab
Credits: 3
Fundamental biological principles that underlie cell culture and its applications are the foundation of the lecture component of this course. Applications of cell culture techniques to current research areas in academic and biopharmaceutical settings will be discussed.
Co-requisite: BIOT 753
Prerequisite(s): BMS 503 with a minimum grade of C- and BMS 504 with a minimum grade of C-.
Equivalent(s): BENG 620, BMCB 753, BMS 620
Grade Mode: Letter Grading
Special Fee: Yes

BIOT 755 - Advanced Therapies
Credits: 4
In this course students will gain an understanding of the fundamentals of biomaterials, gene therapy, cell therapy, and tissue engineering. We will cover chemical, structural, and biological aspects of therapeutic materials along with systemic literature reviews involving advanced therapy medical products (ATMPs) utilizing molecules, genes, cells, and tissues. We will also discuss synthetic polymers and biomolecules such as peptides, proteins, polysaccharides and oligonucleotides. No credit for students who have taken BSCI 797 "SpcTop/Advanced Therapies".
Prerequisite(s): CHEM 404 with a minimum grade of C- and (BIOL 414 with a minimum grade of C- or BIOL 412 with a minimum grade of C-).
Grade Mode: Letter Grading

BIOT 760 - Numerical & Statistical Analysis in Biotechnology
Credits: 0 or 4
In this course, students will gain an understanding of how best to conduct data analysis experiments utilizing data specific to biotechnology applications. Hands-on exercises involve using computer software programs such as Matlab and JMP. Data input/manipulation, descriptive and inferential statistics, hypothesis testing, curve fitting, and Matlab coding will be covered. Upon completion of the course, students should be able to conduct data analysis experiments within the context of biotech. No credit for students who have taken BSCI 797 "SpcTop/Num & Statistical Analysis".
Prerequisite(s): CHEM 403 with a minimum grade of C- and (BIOL 413 with a minimum grade of C- or BIOL 411 with a minimum grade of C-).
Grade Mode: Letter Grading

BIOT 766 - Protein and Immunologic Techniques Lab
Credits: 3
Laboratory course focused on application of molecular biology techniques for the isolation, quantitation, detection, analysis, and use of proteins. Substantial emphasis on the use of immunoassays and antibodies in protein work. Modern proteomics techniques are also discussed. Emphasis on recombinant protein expression in the field of biotechnology.
Co-requisite: BIOT 767
Prerequisite(s): GEN 604 with a minimum grade of C-.
Equivalent(s): BSCI 766
Grade Mode: Letter Grading
Special Fee: Yes

BIOT 767 - Protein and Immunologic Techniques
Credits: 3
Laboratory course focused on application of molecular biology techniques for the isolation, quantitation, detection, analysis, and use of proteins. Substantial emphasis on the use of immunoassays and antibodies in protein work. Modern proteomics techniques are also discussed. Emphasis on recombinant protein expression in the field of biotechnology.
Co-requisite: BIOT 766
Prerequisite(s): GEN 604 with a minimum grade of C-.
Grade Mode: Letter Grading

BIOT 770 - Stem Cell and Biomaterials Engineering Lab
Credits: 3
Introduction to stem cells and how biomaterials are utilized in their applications involving biotechnology and biomedical engineering. Lab topics such as aseptic technique, stem cell cultures, biomaterials engineering, bioprinting, biocompatibility and bioactivity analyses will be covered. Lectures will focus on the current literature while the lab portion involves inquiry-based projects that will investigate how biomaterials and molecules modulate stem cell proliferation and differentiation.
Co-requisite: BIOT 771
Prerequisite(s): CHEM 403 with a minimum grade of C- and (BIOL 414 with a minimum grade of C- or BIOL 412 with a minimum grade of C-).
Grade Mode: Letter Grading

BIOT 771 - Stem Cells and Biomaterials Engineering
Credits: 3
Introduction to stem cells and how biomaterials are utilized in their applications involving biotechnology and biomedical engineering. Lecture topics will include aseptic technique, stem cell cultures, biomaterials engineering, bioprinting, biocompatibility and bioactivity analyses will be covered. Lectures will focus on both traditional contents and the current literature. There will be a focus on preparing a research proposal and a final review paper that will summarize how specific biomaterials coupled with soluble factors allow for stem cell engineering.
Co-requisite: BIOT 770
Prerequisite(s): (BIOL 414 with a minimum grade of C- or BIOL 412 with a minimum grade of C-) and CHEM 403 with a minimum grade of C-.
Grade Mode: Letter Grading

BIOT 772 - Pluripotent Stem Cell Laboratory
Credits: 3
Introduction to human pluripotent stem cells (hPSCs) and how they are utilized in biomedical applications. Labs will focus on hPSC basic training and pluripotent stem cell characterizations before and after differentiation. Special focus will be given to induced pluripotent stem cell (iPSC) culture systems and their applications. Students must have previous cell culture experience.
Co-requisite: BIOT 773
Prerequisite(s): (BIOT 753 with a minimum grade of D- and BIOT 754 with a minimum grade of D-) or BIOT 770 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

BIOT 773 - Pluripotent Stem Cells in Research
Credits: 3
Introduction to human pluripotent stem cells (hPSCs) and how they are utilized in biomedical research. Lecture topics will include basic hPSC techniques, derivation and differentiation of hPSCs. Lectures will focus on both traditional content and the current literature including industry practices. There will be a focus on preparing a research proposal and a final review paper that will summarize how specific biomaterials coupled with soluble factors allow for stem cell engineering.
Co-requisite: BIOT 772
Prerequisite(s): (BIOT 753 with a minimum grade of D- and BIOT 754 with a minimum grade of D-) or BIOT 770 with a minimum grade of D-.
Grade Mode: Letter Grading

BIOT 775 - Biopharmaceutical Production Processes
Credits: 0 or 5
This course will provide students with an overview of biopharmaceutical production processes through lectures. The course begins by introducing students to the proteins and biotechnology companies and to cGMP. During lab, students will use mammalian cells to produce and monoclonal antibody, by developing manufacturing SOPs, including upstream and downstream processing, and quality control and assurance. Students will also gain experience with T-cell culture as part of the CAR-T technology utilized in personal medicine.
Prerequisite(s): CHEM 651 with a minimum grade of C- and CHEM 653 with a minimum grade of C-.
Mutual Exclusion: No credit for students who have taken ANSC 651, CHBE 651, CHE 651.
Grade Mode: Letter Grading

BIOT 777 - Molecular Biology and Biotechnology Lab
Credits: 3
The organization, expression, and control of RNA and protein-coding genes in prokaryotic an eukaryotic cells. The focus of the course is on mechanisms of genetics at the molecular level and the application of modern techniques to laboratory biotechnology projects.
Co-requisite: BIOT 778
Prerequisite(s): GEN 604 with a minimum grade of C-.
Equivalent(s): BSCI 777
Grade Mode: Letter Grading
Special Fee: Yes

BIOT 778 - Molecular Biology and Biotechnology
Credits: 3
The organization, expression, and control of RNA and protein-coding genes in prokaryotic and eukaryotic cells. The focus of the course is on mechanisms of genetics at the molecular level and the application of modern techniques to laboratory biotechnology projects.
Co-requisite: BIOT 777
Prerequisite(s): GEN 604 with a minimum grade of C-.
Grade Mode: Letter Grading

BIOT 780 - Techniques in Microscopy and Image Analysis
Credits: 0 or 4
Laboratory course focused on application of microscopy techniques (light, fluorescent, confocal) and the subsequent analysis strategies for investigating biological specimens. Special focus will be directed towards cellular microscopy-based assays, both structural and functional. Image analysis topics will touch on filtering, segmentation, and registration.
Prerequisite(s): BMS 504 with a minimum grade of C-.
Grade Mode: Letter Grading

BIOT 788 - Advanced Studies
Credits: 1-2
Advanced scholarly work at the undergraduate level supervised by a graduate faculty member for students enrolled in Accelerated Masters programs. The particular area of study will vary according to the semester or the specific course offering with which this course is paired.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

BIOT 799 - Seminar in Biotechnology
Credits: 2
The seminar in biotechnology will run from time to time with different topics, including the following: 1) Cutting-edge issues facing the biotechnology industry. 2) Instrumentation and technologies utilized in the biotechnology industry.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Credit/Fail Grading

Business (BUS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

BUS 400 - Introduction to Business
Credits: 4
Introduces the study of business: examines the origins and development of American business, its place in a global economy, and its legal and ethical roles in modern society. Includes an overview of the functional areas of business such as finance, marketing, and organizational behavior. Designed for business majors as well as for students considering a major in business.
Equivalent(s): ADMN 400
Grade Mode: Letter Grading

BUS 405 - Introduction to Business Computer Applications
Credits: 4
This course is designed to prepare students for both their computer related course work in other classes, but also for both internship and permanent professional problems. The skills and knowledge contained in this class are critical to early student success, and should be taken on arrival to the UNHM Business program. These skills are: word processing, presentation development, database creation and access, and spreadsheet data display and analysis. Open to all majors.
Equivalent(s): COMP 411
Grade Mode: Letter Grading

BUS 430 - Introduction to Business Statistics
Credits: 0 or 4
The use of statistical methods for managerial decision making. Emphasis is on understanding concepts, including inferences from sample data and model formulation, as aids in decision-making. Lab: Using class-focused statistics problems, designed to provide opportunity to develop course-specific problem solving strategies; to adapt from mathematical to statistical thinking; to analyze and communicate significance and meaning of numerical outcomes; to develop course-specific test taking prowess.
Attributes: Quantitative Reasoning(Disc)
Prerequisite(s): MATH 420 with a minimum grade of D- or MATH 422 with a minimum grade of D- or MATH 425 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken ADM 430, ADMN 420, ADMN 510, BIOL 528, EREC 525, HHS 540, MATH 439, MATH 539, MATH 644, MTH 504, PSYC 402, PSYC 402H, SOC 402, SOC 402H, SOC 502, SOC 502H.
Grade Mode: Letter Grading

BUS 453 - Leadership for Managers
Credits: 4
This course provides the critical element of analytical and intellectual examination and reflection of certain core issues in the practice of leadership. These objectives are achieved through open discussion, honest self-assessment, experiential exercises, and observation of real-life leadership practice. What is valued in this course are honest relationships and dialogue, risk-taking, dedication to the topic of leadership, initiative, and exploring the confusion and gray areas involved in these topics.
Prerequisite(s): BUS 400 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 492 - American Business History
Credits: 4
This course explores the historical development of American business institutions from the colonial era to the present. Thematic units organize the material focusing in turn on the most significant developments in the American business environment. The goal is a cumulative understanding of the development of the system. A great deal of our discussion and reading centers on the interaction of market operations and social values and how these interactions influenced the business environment at different times. It is the study of business in the context of past times that makes this course different from a course in business methods or institutions. Through the study of the past students develop their critical thinking and writing skills.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

BUS 515 - Introduction to Business Analytics
Credits: 4
This course provides introductory review and application of data analytics in business, including the analysis of raw data in datasets and how it can be transformed into usual visualizations. Students will practice the use of several data analytics tools, such as Excel, and review the use of Tableau and Power BI. Students should have access to a current version of Excel on a laptop or Mac (Excel online version will not work correctly).
Mutual Exclusion: No credit for students who have taken DAT 510.
Grade Mode: Letter Grading

BUS 530 - Personal Finance
Credits: 4
This course is designed to give students some expertise in the life decisions that almost everyone must make concerning tax planning, purchasing or renting of a home or automobile, medical, life, auto and home insurance needs. Investments and planning for retirement among other financial decisions that adults must make.
Attributes: Quantitative Reasoning(Disc)
Grade Mode: Letter Grading

BUS 532 - Introduction to Financial Accounting
Credits: 4
Fundamental concepts of accounting and their impact on the business world and society as a whole. Emphasis on the recording of economic transactions, and preparation and analysis of financial statements. No credit for students who have had ACFI 501, ACFI 502, ADMN 502.
Mutual Exclusion: No credit for students who have taken ACCT 532.
Grade Mode: Letter Grading

BUS 533 - Introduction to Managerial Accounting
Credits: 4
Emphasizes how organizational managers use accounting information to support their functions of planning, control, and decision making. Examples taken from corporations, small business, and not-for-profit organizations. No credit for students who have received credit for ACFI 503, ADMN 503.
Mutual Exclusion: No credit for students who have taken ACCT 533.
Grade Mode: Letter Grading

BUS 535 - Federal Taxation
Credits: 4
Introduction to the basics of the federal income tax rules for individuals. Basic concepts in federal taxation include gross income, exclusions, adjusted gross income, deductions, exemptions, and credits. Additional tax concepts included are cash and accrual methods, passive loss rules, and like-kind exchange. No credit for taking BUS 710 (Federal Taxation) or BUS 675 (Special Topic Federal Taxation).
Equivalent(s): BUS 710
Grade Mode: Letter Grading

BUS 565 - Selling and Sales Management
Credits: 4
The sales and selling management (SSM) course covers both the strategies, and the tactics, of selling, from the wide-ranging perspectives of sales people and customers. Management topics include: motivation and behavior, sales methodologies, channel optimization, recruiting and selecting representatives, training, compensation, and evaluation. Class also covers in-depth through the class practice sales tactics such as: prospecting and sales call planning, communicating the sales message, negotiating for win-win situations, overcoming objections, closing the sale, and follow-up management. Reflecting the nature of practice selling, the SSM course is offered in a short series of longer days. BUS 400 or BUS 610 are encouraged to take prior to this course. No credit earned if credit earned for BUS 675 if listed as Selling and Sales Management.
Grade Mode: Letter Grading

BUS 575 - Students Consulting Organizations
Credits: 2
A hands-on course where students will work directly with organizations in the Manchester area helping to solve, marketing, financial, managerial, and technology issues. Clients are secured through the SBDC at UNH. The class will meet once a week for one hour where strategy sessions with the clients take place, lectures on business strategy are given, and presentations from guest speakers will be given. It is expected that students will have to do some outside work based on the needs of the clients. At the end of the semester, students will make a formal, professional presentation and provide a document for action to the client. This course can be applied to the management option requirement.
Prerequisite(s): BUS 400 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

BUS 601 - Financial Management
Credits: 4
Study of investment, finance, and dividend decisions of the business firm. Topics include capital budgeting, designing and issuing securities, management of working capital and evaluating manager performance.
Prerequisite(s): BUS 400 with a minimum grade of D- and BUS 532 with a minimum grade of D- and BUS 533 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken FNC 665.
Grade Mode: Letter Grading

BUS 603 - Intermediate Financial Accounting I
Credits: 4
The first of two in-depth financial accounting courses. Course provides student with the in-depth understanding of the theory, conceptual framework, and development of generally accepted accounting principles giving them the knowledge necessary to properly account for and present information in financial statements prepared for external uses. Topics include the income statement, the statement of cash flows and balance sheet with an emphasis on asset accounts. No credit if credit received for BUS 675 Intermediate Accounting I.
Prerequisite(s): BUS 532 with a minimum grade of D- and BUS 533 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 610 - Marketing Principles and Applications
Credits: 4
Studies the process of planning and distributing goods and services to the marketplace. Topics include product planning, pricing, promotion, and distribution. Emphasis on the application of marketing principles to real world business cases.
Prerequisite(s): BUS 400 with a minimum grade of D- and (ECN 412 with a minimum grade of D- or ECN 412W with a minimum grade of D-).
Equivalent(s): ADMN 585
Mutual Exclusion: No credit for students who have taken MKT 510.
Grade Mode: Letter Grading

BUS 615 - Intermediate Financial Accounting II
Credits: 4
The second of two in-depth financial accounting courses. Course provides students with an in depth understanding of the theory, conceptual framework, and development of generally accepted accounting principles giving them the knowledge necessary to properly account for and present information in financial statements prepared for external users. Topics include time value of money, current and non-current liabilities, leases, deferred taxes, retirement benefits, stockholders equity, earning per share, accounting changes and errors, and statement of cash flows. No credit if credit received for BUS 675 Intermediate Accounting.
Prerequisite(s): BUS 603 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 620 - Organizational Behavior
Credits: 4
Applications of behavioral science concepts to work settings. Topics include worker incentives and perceptions toward work, group versus individual decision making, conflict resolution, interpersonal and leadership skills, and the study of other behaviors relevant to effective managing of a business organization.
Attributes: Writing Intensive Course
Prerequisite(s): PTC 500 with a minimum grade of D-.
Equivalent(s): ADMN 575
Mutual Exclusion: No credit for students who have taken MGMT 566.
Grade Mode: Letter Grading

BUS 640 - Business Communication and Conflict
Credits: 4
This course is designed to give students a comprehensive view of communication, its scope and importance in business, and the role of communication in establishing a favorable outside the firm environment as well as an affective internal communications program. The various types of business communication media are covered. This course also develops an awareness of the importance of succinct written expression to modern business communication.
Prerequisite(s): BUS 455 with a minimum grade of D-.
Equivalent(s): ADM 640
Grade Mode: Letter Grading

BUS 645 - Real Estate Investment & Finance
Credits: 4
Learn and appreciate the value of owning real estate, whether as a homeowner or investor. Explore real estate principles, issues of legal protection, mortgage techniques, appraisal, brokerage, risk analysis, investment analysis for commercial properties and apartments, construction, and real estate development financing, as well as documents used in this field. This course explores real estate as a vehicle for profit. The theory of value and the methods to evaluate value are learned, so as to allow entry into banking, private or institutional investment, or general real estate fields. The gathering of data and establishing investment criteria, tempered by risk analysis and the constraints of available financial resources, forms the focus of the course.
Grade Mode: Letter Grading

BUS 662 - Digital Marketing Applications
Credits: 4
This course introduces students to a broad range of marketing applications and digital marketing concepts. The goal is to provide them with hands-on learning opportunities to apply these concepts to real-world marketing problems. A range of marketing and data management tools will be taught to foster understanding and student credentialing on a variety of key 'Software as a Service' platforms. No credit if students have taken BUS 675 - Special Topics - Marketing Demand Applications.
Prerequisite(s): BUS 400 with a minimum grade of D- and BUS 610 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 663 - Services Marketing and Operations Management
Credits: 4
This course is designed to prepare students for NH business and marketing careers by understanding the issues, challenges, and terminology inherent in industries as diverse as health care, construction, education, professional and technical offices, transportation, information and publishing, tourism, retailing, etc. Case studies are used throughout the term. We study many of these sectors, both as academicians and as consumers, to build a portfolio of understanding across divergent sectors. Students learn about services marketing strategies and management models that: increase customer satisfaction, improve customer retention and create dominant service brands that can create a competitive advantage for firms in any given industry. No credit if credit earned for BUS 675 or BUS 685 if listed as Services Marketing.
Prerequisite(s): BUS 400 with a minimum grade of D- and BUS 610 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 675 - Special Topics in Business Administration
Credits: 1-4
Provides students with an opportunity to explore a topic in business administration such as marketing, management, finance, or accounting. Topics will vary. Barring duplication of subject, may be repeated for credit.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

BUS 690 - Business Program Internship
Credits: 1-4
Supervised internship practicum within the private, public or non-profit sector. Focus is for the student to gain valuable insights into both professional and managerial positions, applying their college knowledge to a variety of roles and projects, influencing their career trajectory through 'real world' experience. Can be taken multiple times for credit, with credit varying from 1-4 hours based on time spent on the internship. For the 16 credit concentration, up to 4 BUS 690 credits can be applied. Credits beyond will be applied to general credits. Does not substitute for the internship required as part of the Business Capstone Course BUS 750 - Business Internship Senior Seminar. Offered, Fall, Spring and Summer.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Credit/Fail Grading

BUS 695 - Independent Study in Business
Credits: 1-4
Independent study exploring a special topic emphasizing the managerial, organizational, strategic, political or economic context(s) within which business decisions are made.
Prerequisite(s): BUS 400 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): ADM 695
Grade Mode: Letter Grading

BUS 705 - Business Ethics
Credits: 4
Because Business Ethics is a capstone course, it is imperative that students understand the business psychology concepts relative to power, politics, communication, and decision making to name a few. Organizational Behavior provides knowledge in those areas and this will give students greater depth and cognitive analysis when addressing and applying principles in the ethics course.
Attributes: Writing Intensive Course
Prerequisite(s): BUS 620 with a minimum grade of D- and BUS 610 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 712 - Accounting Information Systems
Credits: 4
Course centers on how organizations collect, record, process, and store accounting information and data. Topics include information systems concepts, transaction cycles and processing, flowcharting, XBRL, e-business and ERP systems, computer fraud and IT security, internal controls, auditing with AIS, Quickbooks processing, and ethics. Topics include introduction to data analytics and blockchain technology.
Prerequisite(s): BUS 615 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 720 - Auditing
Credits: 4
Introduction to the basics of auditing and other assurance services theory and practice. It provides an overview and understanding of the public accounting profession and the professional auditing standards. The class also integrates auditing material with previous financial and managerial accounting course. No credit if credit received for BUS 675 Auditing.
Prerequisite(s): BUS 532 with a minimum grade of D- and BUS 533 with a minimum grade of D- and BUS 603 with a minimum grade of D- and BUS 615 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 725 - Financial Statement Analysis
Credits: 4
This course will examine: financial reporting, the quality of accounting information, and US GAPP and IFRS. The flexibility which is built into GAAP will be examined, noting how firms may take advantage of this flexibility to manipulate financial information while staying within the bounds of the rules for proper reporting. Also examined will be the relationships found within the reported numbers by comparing various elements of the financial statements.
Prerequisite(s): BUS 720 with a minimum grade of D-.
Grade Mode: Letter Grading

BUS 750 - Business Capstone Senior Seminar - Internship
Credits: 4
The capstone seminar course in which students complete their degree with an internship, while also conducting case analyses, class exercises, and a variety of reflective writings via selected readings. written and oral student reports.
Prerequisite(s): BUS 400 with a minimum grade of C- and BUS 405 with a minimum grade of C- and BUS 430 with a minimum grade of C- and BUS 532 with a minimum grade of C- and BUS 533 with a minimum grade of C- and BUS 610 with a minimum grade of C- and BUS 620 with a minimum grade of C- and BUS 690 with a minimum grade of C- and BUS 705 with a minimum grade of C- and ECN 411 with a minimum grade of C- and ECN 412 with a minimum grade of C- and (COMP 405 with a minimum grade of C- or COMP 415 with a minimum grade of C-) and (MATH 420 with a minimum grade of C- or MATH 425 with a minimum grade of C-) and PTC 500 with a minimum grade of C-.
Mutual Exclusion: No credit for students who have taken BUS 760.
Grade Mode: Letter Grading
Special Fee: Yes

BUS 760 - BUS SR SEM - Research Project
Credits: 4
The capstone seminar course is for students with extensive professional experience. Extensive independent research and writing required. Also conducting case analyses, class exercises, and a variety of reflective writings via selected readings, written and oral student reports.
Prerequisite(s): BUS 400 with a minimum grade of C- and BUS 405 with a minimum grade of C- and BUS 430 with a minimum grade of C- and BUS 532 with a minimum grade of C- and BUS 533 with a minimum grade of C- and BUS 610 with a minimum grade of C- and BUS 620 with a minimum grade of C- and BUS 690 with a minimum grade of C- and BUS 705 with a minimum grade of C- and ECN 411 with a minimum grade of C- and ECN 412 with a minimum grade of C- and (COMP 405 with a minimum grade of C- or COMP 415 with a minimum grade of C-) and (MATH 420 with a minimum grade of C- or MATH 425 with a minimum grade of C-) and PTC 500 with a minimum grade of C-.
Mutual Exclusion: No credit for students who have taken BUS 750.
Grade Mode: Letter Grading

Chemical Engineering & Bioengineering (CHBE)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CHBE 400 - Chemical and Bioengineering Lectures
Credits: 1
Introduces the profession, the process engineer as designer and problem solver; and the goals of the chemical engineering/bioengineering curriculum. Lectures by faculty and practitioners. Introduction to computer skills, engineering ethics, safety, and careers in chemical engineering and bioengineering.
Equivalent(s): CHE 400
Grade Mode: Credit/Fail Grading

CHBE 410 - Energy and Environment
Credits: 4
Energy supply in this country and the world; conventional fuel reserves: coal, oil, natural gas; alternative sources: nuclear, solar, geothermal, et. Forecasts and strategies to meet needs. Environmental pollution, sources, and economic and environmental impacts. Methods for pollution control. Regulatory standards for environmental protection.
Attributes: Physical Science(Discovery)
Equivalent(s): CHE 410
Grade Mode: Letter Grading

CHBE 501 - Material Balances
Credits: 3
Systems of units; material balances and chemical reactions; gas laws; phase phenomena.
Prerequisite(s): (MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (CHEM 405 with a minimum grade of D- or (CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-))).
Equivalent(s): CHE 501
Grade Mode: Letter Grading

CHBE 502 - Energy Balances
Credits: 3
Energy and material balances for systems with and without chemical reactions; design case studies.
Attributes: Inquiry (Discovery)
Prerequisite(s): (CHBE 501 with a minimum grade of D- or CHE 501 with a minimum grade of D-) and MATH 527 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): CHE 502
Grade Mode: Letter Grading

CHBE 601 - Fluid Mechanics and Unit Operations
Credits: 3
Continuity, momentum, and energy equations; laminar and turbulent flow in pipes; rheology. Applications to flow in porous media, filtration, and fluidization.
Prerequisite(s): CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-.
Equivalent(s): CHE 601
Grade Mode: Letter Grading

CHBE 602 - Heat Transfer and Unit Operations
Credits: 3
Thermal properties of materials, steady-state and transient conduction and convection; radiation; applications to heat exchangers and process equipment.
Prerequisite(s): CHBE 601 with a minimum grade of D- or CHE 601 with a minimum grade of D-.
Equivalent(s): CHE 602
Grade Mode: Letter Grading

CHBE 603 - Applied Mathematics for Chemical Engineers
Credits: 4
Mathematical modeling and analysis of chemical engineering problems. Analytical methods for firstand second-order differential equations; numerical solutions; series solutions; Bessel functions; Laplace transforms; matrix algebra. Interpretation and solution of partial differential equations. Lab.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 603
Grade Mode: Letter Grading

CHBE 604 - Chemical Engineering Thermodynamics
Credits: 3
Volumetric and phase behavior of ideal and real gases and liquids; cycles; steady-flow processes; chemical equilibrium.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 604
Grade Mode: Letter Grading

CHBE 612 - Chemical Engineering Laboratory I
Credits: 3
Selected experiments in fluid mechanics, heat transfer, and unit operations.
Attributes: Writing Intensive Course
Prerequisite(s): (CHBE 601 (may be taken concurrently) with a minimum grade of D- or CHE 601 with a minimum grade of D-) and (CHBE 602 (may be taken concurrently) with a minimum grade of D- or CHE 602 with a minimum grade of D-).
Equivalent(s): CHE 612
Grade Mode: Letter Grading

CHBE 614 - Separation Processes
Credits: 3
Adsorption, Chromatography, Membrane Separations, Liquid-liquid Extraction and Crystallization.
Prerequisite(s): CHBE 604 with a minimum grade of D- or CHE 604 with a minimum grade of D-.
Equivalent(s): CHE 614
Grade Mode: Letter Grading

CHBE 651 - Biotech Experience/Biomanufacturing
Credits: 4
Course begins by introducing students to the proteins and companies of biotechnology and to current good manufacturing practices.
For remainder of the course, students use cell culture of bacteria, mammalian and yeast cells to produce human proteins using the tools and manufacturing standards, operating procedures of biotechnology, including upstream and downstream processing of proteins, and quality control of protein production.
Prerequisite(s): (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 651
Mutual Exclusion: No credit for students who have taken BIOT 775.
Grade Mode: Letter Grading

CHBE 695 - Chemical Engineering Project
Credits: 1-4
Independent research problems carried out under faculty supervision.
Equivalent(s): CHE 695
Grade Mode: Letter Grading

CHBE 696 - Independent Study
Credits: 1-4
Permission of the adviser and department chairperson required; granted only to students having superior scholastic achievement.
Equivalent(s): CHE 696
Grade Mode: Letter Grading

CHBE 703 - Mass Transfer and Stagewise Operations
Credits: 3
Diffusion in gases, liquids, and solids; design and analysis of distillation, absorption, and other stagewise equipment and operations.
Prerequisite(s): CHBE 604 with a minimum grade of D- or CHE 604 with a minimum grade of D-.
Equivalent(s): CHE 703
Grade Mode: Letter Grading

CHBE 705 - Fossil Fuels and Renewable Energy Sources
Credits: 4
Processing and refining of coal, crude oil, natural gas, tar sands and shale oil. Biomass co-combustion, biofuel extraction, impediments to widespread utilization. Exploration of environmental issues with energy generation and consumption. Lab.
Prerequisite(s): (CHEM 405 with a minimum grade of D- or (CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-))) and (PHYS 407 with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 407S with a minimum grade of D-) and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 705
Grade Mode: Letter Grading

CHBE 706 - Electrochemical Methods: Fundamentals and Applications
Credits: 4
Fundamentals and applications of thermodynamics of electrochemical processes; kinetics of electrochemical reactions; examples in electrochemistry current technology.
Prerequisite(s): CHEM 684 with a minimum grade of D- or CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-.
Equivalent(s): CHE 706
Grade Mode: Letter Grading

CHBE 707 - Chemical Engineering Kinetics
Credits: 3
Use of laboratory data to design commercial reactors. Continuous, batch, plug-flow, and stirred-tank reactors for homogeneous and catalytic multiphase reactions.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 707
Grade Mode: Letter Grading

CHBE 708 - Chemical Engineering Design
Credits: 4
Introduction to cost engineering. Application of acquired skills to design of chemical processes. Individual major design project required. Safety for industrial processes. Lab.
Attributes: Writing Intensive Course
Equivalent(s): CHE 708
Grade Mode: Letter Grading

CHBE 709 - Fundamentals of Air Pollution and Its Control
Credits: 4
The origin and fate of air pollutants. Fundamentals of atmospheric meteorology, chemistry, and dispersion phenomena. Control of air pollutants and the related equipment. Current issues. Lab.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHBE 502 with a minimum grade of D or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 709
Grade Mode: Letter Grading

CHBE 712 - Introduction to Nuclear Engineering
Credits: 4
Development of nuclear reactors; binding-energy; radioactivity; elements of nuclear reactor theory; engineering problems of heat transfer, fluid flow, materials selection, and shielding; environmental impacts.
Prerequisite(s): MATH 527 with a minimum grade of D- and (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 712
Grade Mode: Letter Grading

CHBE 713 - Chemical Engineering Laboratory II
Credits: 3
Selected experiments in mass transfer, stagewise operations, thermodynamics, and kinetics.
Attributes: Writing Intensive Course
Prerequisite(s): (CHBE 703 (may be taken concurrently) with a minimum grade of D- or CHE 703 with a minimum grade of D-) and (CHBE 707 (may be taken concurrently) with a minimum grade of D- or CHE 707 with a minimum grade of D-).
Equivalent(s): CHE 713
Grade Mode: Letter Grading

CHBE 714 - Chemical Sensors
Credits: 4
Interdisciplinary approach using thermodynamic, physical and surface chemistry, kinetic, electrochemical, and optical principles to analyze and design chemical sensors. Topics will include selectivity and sensitivity pf sensors, biosensors, electrochemical sensors, mass sensors, optical sensors, and multivariate sensors. Lab.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHEM 405 with a minimum grade of D- or (CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-))) and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 714
Grade Mode: Letter Grading

CHBE 722 - Introduction to Microfluidics
Credits: 4
Fundamentals and applications of microfluidics; scaling laws; microfabrication technology; hydrodynamics and electrodynamics; interfacial phenomena; capillary effects and diffusion; microvalves; micropumps; lab-on-a-chip systems; biochips.
Prerequisite(s): CHBE 601 (may be taken concurrently) with a minimum grade of D- or CHE 601 with a minimum grade of D-.
Equivalent(s): CHE 722
Grade Mode: Letter Grading

CHBE 725 - Cell Phenotyping and Tissue Engineering Laboratory
Credits: 4
Introduction to culture and phenotyping of mammalian cells (cell line models), with applications to bioengineering and biomedical sciences. Skills, techniques, and knowledge covered include sterile technique, cell culture, cell line models, cell proliferation, cell survival, cell migration, cell adhesion, and drug response. Inquiry-based team projects investigate cell proliferation, cell death, transfection, flow cytometry, 3D scaffolds, or cell imaging.
Prerequisite(s): BMS 503 with a minimum grade of D- and BMS 504 with a minimum grade of D- and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): BENG 725
Grade Mode: Letter Grading

CHBE 735 - Interfacial Engineering and Nanotechnology
Credits: 4
Fundamentals of interfacial phenomena and nanotechnology and applications in chemical engineering and bioengineering. Topics will include thermodynamics, surface forces, surface tension, adhesion and surface chemistry and characterizations, colloidal stability in paint, thin film technologies, self-assembly of micelles and lipid bilayers, nanoparticles for drug delivery, adsorption in biomaterials, and crystallization. Lab.
Prerequisite(s): (CHEM 405 with a minimum grade of D- or (CHEM 403 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-))) and (PHYS 407 with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 407S with a minimum grade of D-).
Grade Mode: Letter Grading

CHBE 744 - Corrosion
Credits: 4
Fundamentals of corrosion processes in industrial and environmental settings; thermodynamics, kinetics, and mass transport in local corrosion cells; protection by electrochemical, chemical, surface modification or barrier methods; instrumental methods in corrosion science. Lab.
Prerequisite(s): CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-.
Equivalent(s): CHE 744
Grade Mode: Letter Grading

CHBE 752 - Process Dynamics and Control
Credits: 4
Dynamic behavior of chemical engineering processes described by differential equations; feedback control concepts and techniques; stability analysis. Lab.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 752
Grade Mode: Letter Grading

CHBE 755 - Computational Molecular Bioengineering
Credits: 4
Introduction to fundamental concepts in bioengineering with primary emphasis on understanding details of biomolecular structures integrated with molecular modeling, simulation, and visualization techniques. The course will introduce structural details of various biomolecules (proteins, nucleic-acids, sugars, and lipids), followed by concepts in thermodynamics and physical chemistry (such as intermolecular forces, energy, entropy, chemical potential, and Boltzmann's distribution), the applications of which will be discussed in the context of drug-receptor interactions, molecular recognition, biomolecular folding, enzyme catalysis, allosteric communication, diffusion, and transport. The laboratory will include training and learning about advanced simulation and visualization software engines. Preference will be given to bioengineering majors.
Prerequisite(s): CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-.
Equivalent(s): BENG 755
Grade Mode: Letter Grading

CHBE 761 - Biochemical Engineering
Credits: 4
Immobilized enzyme technology, microbial biomass production, transport phenomena in microbial systems, biological reactor design, process instrumentation and control, applications in separation and purification processes. Lab.
Prerequisite(s): MATH 527 with a minimum grade of D- and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): CHE 761
Grade Mode: Letter Grading

CHBE 762 - Biomedical Engineering
Credits: 4
Overview of the biomedical engineering through topical studies such as drug delivery and sensors. Discussion of modern engineering methods through primary research sources. Differential equations and statistics required prior to taking this course.
Attributes: Writing Intensive Course
Prerequisite(s): MATH 527 with a minimum grade of D- and (MATH 644 (may be taken concurrently) with a minimum grade of D- or MATH 740 (may be taken concurrently) with a minimum grade of D-) and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): BENG 762, CHE 762
Grade Mode: Letter Grading

CHBE 763 - Bioengineering Design I
Credits: 2
Bioengineering design course will cover safety, regulations and ethics for development of bioengineering devices and processes. Topics include product design, benchmarks, design team functioning, marketing and finances. Students will also learn about current Good Manufacturing Practices, process validation and intellectual property considerations. Students will produce the following documents during the course: preliminary design, materials and supplies list, project schedule and budget, innovation map, FDA approval plan.
Attributes: Writing Intensive Course
Equivalent(s): BENG 763
Grade Mode: Letter Grading

CHBE 764 - Bioengineering Design II
Credits: 4
Team based laboratory course focuses on developing the project planned in CHBE 763. Major report is due at mid-semester after first prototype is completed. A second report is due at the end of the semester to indicate improvements on initial design.
Attributes: Writing Intensive Course
Equivalent(s): BENG 764
Grade Mode: Letter Grading

CHBE 766 - Biomaterials
Credits: 4
Fundamental principles of biology and material science, along with latest topics in biomaterials research. Topics include cell biology, wound healing, host response to foreign materials, polymers, hydrogels, diffusion and methods of material characterization. Specific medical applications of biomaterials such as orthopedic and dental implants, heart valves, artificial blood vessels, cochlear and ophthalmic implants and tissue engineering. Laboratory. Students are expected to have some background in chemistry, mathematics, and high school biology.
Prerequisite(s): (CHEM 545 (may be taken concurrently) with a minimum grade of D- or CHEM 651 (may be taken concurrently) with a minimum grade of D-) and (PHYS 407 with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 407S with a minimum grade of D-) and (CHBE 502 with a minimum grade of D- or CHE 502 with a minimum grade of D-).
Equivalent(s): BENG 766, CHE 766
Grade Mode: Letter Grading

Chemistry (CHEM)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CHEM 400 - Freshman Seminar
Credits: 1
An introduction to the chemistry profession. Talks and workshops on the career of a chemist in academia, industry, medicine, law, teaching and government. Required for chemistry majors.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading

CHEM 403 - General Chemistry I
Credits: 0 or 4
Fundamental laws and concepts applied to nonmetals, metals, and their compounds. For students who plan to take further chemistry courses. Previous chemistry recommended. Knowledge of algebra, exponentials, and logarithms required. Lab. Cannot be taken for credit if credit received for CHEM 405. Required for chemistry majors.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Equivalent(s): CHEM 405
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 404 - General Chemistry II
Credits: 0 or 4
Fundamental laws and concepts applied to nonmetals, metals, and their compounds. For students who plan to take further chemistry courses. Previous chemistry recommended. Knowledge of algebra, exponentials, and logarithms required. Required for chemistry majors. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Prerequisite(s): CHEM 403 with a minimum grade of D-.
Equivalent(s): CHEM 404H, CHEM 405, CHEM 415, CHEM 416
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 404H - Honors/General Chemistry II
Credits: 0 or 4
Fundamental laws and concepts applied to nonmetals, metals, and their compounds. For students who plan to take further chemistry courses. Previous chemistry recommended. Knowledge of algebra, exponentials, and logarithms required. Required for chemistry majors. Lab. Honors course is designed for students who have enrolled in the honors degree program. Lab. Cannot be taken for credit if credit received for CHEM 402.
Attributes: Discovery Lab Course; Honors course; Physical Science(Discovery)
Prerequisite(s): CHEM 403 with a minimum grade of D-.
Equivalent(s): CHEM 404, CHEM 405, CHEM 415, CHEM 416
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 405 - Chemical Principles for Engineers
Credits: 0 or 4
Basic principles; atomic structure, bonding, equilibria, and thermodynamics. One year of high school chemistry, algebra, and knowledge of logarithms. Cannot be taken for credit if credit received for CHEM 403 and CHEM 404. Required for chemical engineering, mechanical engineering, electrical and computer engineering, environmental engineering: industrial majors. Not applicable for credit for majors in chemistry or biochemistry.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Equivalent(s): CHEM 403, CHEM 404, CHEM 404H, CHEM 413, CHEM 414
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 408 - Green Goggles: Introduction to Green Chemistry
Credits: 4
In this course, we investigate the principles and practice of Green Chemistry as they connect to real world examples. Green Chemistry is the field of science that uses a principle-based approach to design chemical reactions and processes to make them more sustainable. In exploring green chemistry, many of the fundamental concepts of a general chemistry course are investigated. Some topics include use of renewable feedstocks, atom economy, catalysis, waste prevention, and design for degradation.
Attributes: Physical Science(Discovery)
Equivalent(s): CHEM 444G
Grade Mode: Letter Grading

CHEM 409 - Chemistry and Society
Credits: 4
Elementary survey of chemistry; integrates principles and applications. For students who do not intend to take any other chemistry courses and those interested in satisfying a general education science requirement. Not a prerequisite for any other chemistry courses. (Not offered every year.) Chemistry majors are excluded from taking this course.
Attributes: Physical Science(Discovery); Inquiry (Discovery)
Grade Mode: Letter Grading

CHEM 411 - Introductory Chemistry for Life Sciences
Credits: 0 or 4
Fundamental and pragmatic aspects of chemistry, particularly as foundation for nutritional biochemistry. Includes basics of bonding, acid/base behavior, reaction energy, intermolecular forces, stoichiometry, and equilibrium. High school chemistry not required. This course is not a replacement to CHEM 403 and is not an acceptable pre-requisite for CHEM 404.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 413 - General Chemistry Lecture I
Credits: 3
Fundamental laws and concepts applied to nonmetals, metals, and their compounds. For students who plan to take further chemistry courses. Previous chemistry recommended. Knowledge of algebra, exponentials, and logarithms required. Not offered every summer. Cannot be taken for credit if credit received for CHEM 401, CHEM 403, CHEM 405, or CHEM 409.
Equivalent(s): CHEM 403, CHEM 405
Grade Mode: Letter Grading

CHEM 415 - General Chemistry Lecture II
Credits: 3
Fundamental laws and concepts applied to nonmetals, metals, and their compounds. For students who plan to take further chemistry courses. Previous chemistry recommended. Knowledge of algebra, exponentials, and logarithms required. Cannot be taken for credit if credit received for CHEM 402 or CHEM 404.
Prerequisite(s): (CHEM 403 with a minimum grade of D- or CHEM 413 with a minimum grade of D-).
Equivalent(s): CHEM 404, CHEM 404H
Grade Mode: Letter Grading

CHEM 416 - General Chemistry Lab II
Credits: 1
Lab application of fundamental laws and concepts applied to nonmetals, metals and their compounds. Previous general chemistry lecture required. Special permission. Not offered every summer. Cannot be taken for credit if credit received for CHEM 402 or CHEM 404. Not open to Chemistry majors.
Prerequisite(s): (CHEM 403 with a minimum grade of D- or CHEM 414 with a minimum grade of D-).
Equivalent(s): CHEM 404, CHEM 404H
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 501 - Peer-led Team Learning in Chemistry
Credits: 2
Initial experience as peer instructional leader. Practical application of theories of cognition, group dynamics, learning, and motivation to helping other students learn chemistry in general chemistry. Requires one weekly meeting with students.
Prerequisite(s): (CHEM 403 with a minimum grade of D- or CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 502 - Advanced Peer-led Team Leadership in Chemistry
Credits: 1
Development and assessment of leadership skills. Practical application of theories of cognition, group dynamics, learning, and motivation to helping other students learn chemistry in general chemistry. Requires one weekly meeting with students.
Prerequisite(s): CHEM 501 with a minimum grade of D- or INCO 501 with a minimum grade of D-.
Grade Mode: Letter Grading

CHEM 503 - Mentoring for Peer Team Learning
Credits: 1
Experienced leaders mentor a new leader in implementation of PLTL model, including initial co-leading and observational formative assessment. Mentors report on mentee development, visit other experienced leaders, and provide a final evaluation. Mentors lead their own weekly group and assist part-time in the PLTL leader meetings.
Prerequisite(s): CHEM 501 with a minimum grade of D-.
Grade Mode: Letter Grading

CHEM 517 - Introduction to Chemical Measurement Science
Credits: 3
Application of chemical principles, particularly equilibrium, to quantitative measurement of chemical substances. Measurement design and control, accuracy and precision, calibration of instruments, sample representativeness and integrity.
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 518 - Practical Chemical Measurement Techniques and Instrumentation
Credits: 2
Development of practical skills for quantitative measurement of chemical substances, proper use of laboratory tools and instruments. Introduction to analytical separations, ion-selective electrodes, spectrophotometry.
Co-requisite: CHEM 517
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 545 - Organic Chemistry
Credits: 3
Introductory study of carbon compounds for those who desire a brief terminal course. This course is a one semester course only. CHEM 545 and 546 are not applicable for pre-med, pre-vet, pharmacological majors or minors requiring a year long course of organic. CHEM 545 and CHEM 546 cannot be used to meet semester 1 of the year long-organic course (CHEM 547 or CHEM 651). CHEM 545 and CHEM 546L are co-requisites and must be taken together.
Co-requisite: CHEM 546
Prerequisite(s): CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-.
Grade Mode: Letter Grading

CHEM 546 - Organic Chemistry Laboratory
Credits: 2
Introductory study of carbon compounds for those who desire a brief terminal course. Lab.
Co-requisite: CHEM 545
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 547 - Organic Chemistry I
Credits: 3
Principal classes of organic compounds, aliphatic and aromatic; class reactions and structural theory. Intended primarily for chemistry and biochemistry majors. Students receiving credit for CHEM 547-548 may not receive credit for either CHEM 545 or CHEM 651 and CHEM 652.
Co-requisite: CHEM 549
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Equivalent(s): CHEM 651
Grade Mode: Letter Grading

CHEM 548 - Organic Chemistry II
Credits: 3
Principal classes of organic compounds, aliphatic and aromatic; class reactions and structural theory. Intended primarily for chemistry and biochemistry majors. Students receiving credit for CHEM 547 and CHEM 548 may not receive credit for either CHEM 545 or CHEM 651 and CHEM 652. Only listed majors allowed: Chemistry (BS), Chemistry (BA), Bchmmolcebio, and Biochemistry.
Co-requisite: CHEM 550
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-) and CHEM 547 with a minimum grade of D-.
Equivalent(s): CHEM 652
Grade Mode: Letter Grading

CHEM 549 - Organic Chemistry Laboratory
Credits: 2
Lab.
Co-requisite: CHEM 547
Equivalent(s): CHEM 546, CHEM 653
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 550 - Organic Chemistry Laboratory
Credits: 2
Organic Chemistry Laboratory.
Co-requisite: CHEM 548
Equivalent(s): CHEM 654
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 574 - Chemistry Across the Periodic Table
Credits: 4
Ninety-eight elements form the building blocks of every substance on Earth-they are elegantly organized into what we now call The Periodic Table. This course will discuss the structure/property/reactivity patterns inherent in The Periodic Table, their origins according to the quantum mechanical model of the atom, and how they are manifest in current research advancements and modern applications of main group element chemistry, transition metal chemistry, and the chemistry of solids and materials.
Attributes: Inquiry (Discovery)
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 576 - Experimental Inorganic Chemistry
Credits: 2
This laboratory course is an introduction to synthetic methods in inorganic chemistry and the study of the elements across the periodic table. This course will emphasize the use of spectroscopic and analytical techniques specifically aimed at characterizing and identifying inorganic compounds, such as multi-nuclear NMR, UV\Vis, IR spectroscopy, X-ray diffraction and mass spectrometry. An introduction to scientific writing will be included.
Prerequisite(s): CHEM 574 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 651 - Organic Chemistry I
Credits: 3
Principal classes of organic compounds, aliphatic and aromatic, class reactions and structural theory. Intended primarily for pre-healing arts, biological science, and health science students. Students receiving credit for CHEM 651 and CHEM 652 may not receive credit for either CHEM 545 or CHEM 547 and CHEM 548.
Co-requisite: CHEM 653
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Equivalent(s): CHEM 547
Grade Mode: Letter Grading

CHEM 652 - Organic Chemistry II
Credits: 3
Principal classes of organic compounds, aliphatic and aromatic, class reactions and structural theory. Intended primarily for pre-healing arts, biological science, and health science students.
Co-requisite: CHEM 654
Prerequisite(s): (CHEM 651 with a minimum grade of D- and (CHEM 653 with a minimum grade of D-.
Equivalent(s): CHEM 548
Grade Mode: Letter Grading

CHEM 652A - Organic Chemistry II
Credits: 3
Principal classes of organic compounds, aliphatic and aromatic, class reactions, and structural theory. Intended primarily for pre-healing arts, biological science, and health science students. Students receiving credit for CHEM 651 and CHEM 652 may not receive credit for either CHEM 545 or CHEM 547 and CHEM 548. This course is for Chemical Engineers only.
Prerequisite(s): CHEM 651 with a minimum grade of D- and CHEM 653 with a minimum grade of D-.
Grade Mode: Letter Grading

CHEM 653 - Organic Chemistry Laboratory
Credits: 2
Lab.
Co-requisite: CHEM 651
Equivalent(s): CHEM 546, CHEM 549
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 654 - Organic Chemistry Laboratory
Credits: 2
Organic Chemistry Laboratory.
Co-requisite: CHEM 652
Equivalent(s): CHEM 550
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 683 - Physical Chemistry I
Credits: 3
Topics may be chosen from: properties of gases, liquids, and solids; thermochemistry, and thermodynamics; chemical equilibria; reaction rates; quantum chemistry and spectroscopy.
Co-requisite: CHEM 685
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-) and (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-) and (PHYS 402 (may be taken concurrently) with a minimum grade of D- or PHYS 407 (may be taken concurrently) with a minimum grade of D- or PHYS 407H (may be taken concurrently) with a minimum grade of D- or PHYS 407S (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 684 - Physical Chemistry II
Credits: 3
Topics may be chosen from: properties of gases, liquids, and solids; thermochemistry, and thermodynamics; chemical equilibria; reaction rates; quantum chemistry and spectroscopy.
Co-requisite: CHEM 686
Prerequisite(s): CHEM 683 with a minimum grade of D- and (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 685 - Physical Chemistry Laboratory
Credits: 2
Measurement of thermodynamic properties, chemical kinetics, and methods of determining the structure of matter.
Co-requisite: CHEM 683
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-) and (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-) and (PHYS 407 (may be taken concurrently) with a minimum grade of D- or PHYS 407H (may be taken concurrently) with a minimum grade of D- or PHYS 402 (may be taken concurrently) with a minimum grade of D- or PHYS 407S (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 686 - Physical Chemistry Laboratory
Credits: 2
Measurement of thermodynamic properties, chemical kinetics, and methods of determining the structure of matter.
Co-requisite: CHEM 684
Prerequisite(s): CHEM 683 with a minimum grade of D- and CHEM 685 with a minimum grade of D- and (PHYS 407 (may be taken concurrently) with a minimum grade of D- or PHYS 407H (may be taken concurrently) with a minimum grade of D- or PHYS 402 (may be taken concurrently) with a minimum grade of D- or PHYS 407S (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 696 - Independent Study
Credits: 1-4
For exceptional students. Individual reading, writing, or laboratory work carried out under the tutelage of a faculty member. May be used to replace specific required courses in chemistry.
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 404H with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 708 - Spectroscopic Investigations of Organic Molecules
Credits: 3
Identification and structural analysis of chemical compounds by selected instrumental methods. Typical topics include proton and carbon-13 NMR spectroscopy, IR and UV spectroscopy, and mass spectrometry.
Grade Mode: Letter Grading

CHEM 740 - Chemical Biology
Credits: 3
How does the COVID vaccine work? What is an antibody conjugate? What is bioconjugation? How do we see mRNA in living cells? How do we evolve enzymes? Chemical Biology is the interdisciplinary study of the chemicals and chemical reactions involved to probe, manipulate, and control biological systems in vitro and in vivo. This course is designed for biologists, chemists, and engineers who want to understand cutting edge and relevant research techniques used in modern medicine.
Attributes: Biological Science(Discovery)
Prerequisite(s): (CHEM 547 with a minimum grade of D- and CHEM 548 with a minimum grade of D-) or (CHEM 651 with a minimum grade of D- and CHEM 652 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 741 - Chemical Biology Laboratory
Credits: 4
In this course we will perform 3 month-long experiments that will demonstrate the three major pillars of chemical biology: Perceive, profile, and perturb. This will demonstrate how chemical entities can be used to further understand biological systems and organisms.
Prerequisite(s): CHEM 740 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 755 - Advanced Organic Chemistry
Credits: 3
Methods of synthesis and determination of structure, including stereochemistry of complex organic compounds.
Prerequisite(s): (CHEM 548 with a minimum grade of D- or CHEM 652 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 762 - Advanced Chemical Analysis Instrumentation
Credits: 3
Theory, instrumentation, and application of methods to qualitative identification and quantitative measurement of trace chemical substances including environmental pollutants. Includes methods of such as atomic spectroscopy, gas and liquid chromatography, IR and UV-VIS spectrophotometry, electrochemistry, fluorescence, mass spectrometry, X-ray techniques.
Co-requisite: CHEM 763
Prerequisite(s): CHEM 517 with a minimum grade of D- and CHEM 518 with a minimum grade of D-.
Grade Mode: Letter Grading

CHEM 763 - Advanced Chemical Instrumentation Laboratory
Credits: 2 or 3
Hands-on experience with modern instrumentation for trace chemical analysis described in CHEM 762. Performance capabilities and limitations, care, and safety.
Co-requisite: CHEM 762
Prerequisite(s): CHEM 518 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 774 - Inorganic Chemistry
Credits: 3
Basic theoretical concepts and their applications to inorganic reactions and compounds.
Prerequisite(s): (CHEM 548 with a minimum grade of D- or CHEM 652 with a minimum grade of D-).
Grade Mode: Letter Grading

CHEM 777 - Advanced Synthesis and Characterization
Credits: 0 or 3
This is an advanced laboratory course involving the synthesis and characterization of organic and inorganic compounds. Students will leave this course with sufficient proficiency to reproduce synthetic procedures and prepare compounds from the chemical literature.
Prerequisite(s): CHEM 550 with a minimum grade of D- and CHEM 576 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

CHEM 795 - Special Topics
Credits: 2-4
New or specialized topics not covered in regular course offerings.
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

CHEM 798 - Senior Seminar
Credits: 1
Student reports on topics of interest.
Attributes: Writing Intensive Course
Prerequisite(s): (CHEM 548 with a minimum grade of D- or CHEM 652 with a minimum grade of D-) and CHEM 684 with a minimum grade of D-.
Equivalent(s): CHEM 698
Grade Mode: Credit/Fail Grading

CHEM 799 - Senior Thesis
Credits: 4
Yearlong investigation in a selected topic, with background and experimental investigation. For chemistry majors who have completed CHEM 548, CHEM 694, and CHEM 762. Required for B.S. majors. Strongly recommended for B.A. chemistry majors. 2.50 average and approval of department chairperson. Lab. Two semesters of 4 credits each are required.
Attributes: Writing Intensive Course
Prerequisite(s): CHEM 548 with a minimum grade of D- and CHEM 684 with a minimum grade of D-.
Repeat Rule: May be repeated up to 1 time.
Equivalent(s): CHEM 699
Grade Mode: Letter Grading

Chinese (CHIN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CHIN 401 - Elementary Chinese I
Credits: 4
Designed for students without previous knowledge of Chinese. Focuses on developing communicative proficiency in listening, speaking, reading, and writing. Students will learn basic vocabulary and sentence structures for use in essential everyday situations, as well as aspects of Chinese culture and society related to the course materials.
Grade Mode: Letter Grading

CHIN 402 - Elementary Chinese II
Credits: 4
Focuses on developing communicative proficiency in listening, speaking, reading, and writing. Students will learn basic vocabulary and sentence structures for use in essential everyday situations, as well as aspects of Chinese culture and society related to the course materials. CHIN 401 and CHIN 402 taken together satisfies the foreign language requirement. Cannot be taken separately without permission of the instructor.
Attributes: Foreign Language Requirement
Prerequisite(s): CHIN 401 with a minimum grade of D-.
Grade Mode: Letter Grading

CHIN 425 - Introduction to Chinese Culture
Credits: 4
Conducted in English. This course offers a critical introduction to Chinese culture, including its three philosophical foundations (Confucianism, Daoism, Buddhism), various branches of cultural production (e.g. language, food, painting, military strategy), and modern transformation. Explores the intellectual, literary, artistic, and socio-political issues that have shaped Chinese culture for the past two and a half millennia. Students can expect to gain in-depth knowledge of some major elements that define the Chinese tradition.
Attributes: World Cultures(Discovery)
Grade Mode: Letter Grading

CHIN 503 - Intermediate Chinese I
Credits: 4
Focuses on developing communicative proficiency in listening, speaking, reading, and writing. Students will strengthen the language skills learned at previous levels, and acquire more advanced vocabulary and sentence patterns, as well as related cultural knowledge, to deal with more complicated everyday situations.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): CHIN 402 with a minimum grade of D-.
Grade Mode: Letter Grading

CHIN 504 - Intermediate Chinese II
Credits: 4
Focuses on developing communicative proficiency in listening, speaking, reading, and writing. Students will strengthen the language skills learned at previous levels, and acquire more advanced vocabulary and sentence patterns, as well as related cultural knowledge, to deal with more complicated everyday situations. Cannot be taken separately without permission of the instructor.
Attributes: World Cultures(Discovery); Foreign Language Requirement
Prerequisite(s): CHIN 503 with a minimum grade of D-.
Grade Mode: Letter Grading

CHIN 631 - Advanced Chinese Conversation and Composition I
Credits: 4
Focuses on developing communicative proficiency in listening, speaking, reading, and writing at an advanced level. While students continue to consolidate their speaking and listening skills, more emphasis will be placed on reading and writing skills.
Attributes: Foreign Language Requirement
Prerequisite(s): CHIN 504 with a minimum grade of D-.
Grade Mode: Letter Grading

CHIN 632 - Advanced Chinese Conversation and Composition II
Credits: 4
Focuses on developing communicative proficiency in listening, speaking, reading, and writing at an advanced level. While students continue to consolidate their speaking and listening skills, more emphasis will be placed on reading and writing skills. Cannot be taken separately without permission of the instructor.
Attributes: Foreign Language Requirement
Prerequisite(s): CHIN 631 with a minimum grade of D-.
Grade Mode: Letter Grading

CHIN 795 - Independent Study
Credits: 1-4
Open to highly qualified juniors and seniors. To be taken only with the permission of department chairperson and of the supervising faculty member or members. Barring duplication of subject, may be repeated for credit.
Repeat Rule: May be repeated up to 4 times.
Grade Mode: Letter Grading

Civil & Environmental Engineering (CEE)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CEE 400 - Introduction to Civil and Environmental Engineering
Credits: 0 or 4
Introduction to the civil and environmental engineering profession, including topics like structural, geotechnical, water resources, materials, transportation, site design, energy infrastructure, climate change, sustainability, natural hazards, solid and hazardous waste management, remediation, water/wastewater treatment, and air pollution. The course provides an overview of the civil and environmental project process, including the creative design process, problem solving, interdisciplinary teamwork, and presentation. Students will learn about engineering ethics, societal impacts of projects, professional licensure, and the triple bottom line along with information about campus resources, the curriculum for the programs, and career opportunities. The course also includes an introduction to relevant computer skills and software, like Excel and will require students to produce professional engineering documents which will include technical writing and calculations.
Attributes: Environment,TechSociety(Disc); Inquiry (Discovery)
Equivalent(s): CIE 402
Grade Mode: Letter Grading

CEE 402 - 2D Computer Aided Design
Credits: 3
This course will serve as an introduction to some of the fundamental principles of building design and land planning. You will prepare plans representative of building construction and land development commonly used in the architectural, engineering, surveying and construction fields. The emphasis will be on the end result: Preparing complete and professional plans. Through this, you will acquire basic skills in designing and plan layout required by these industries. We will approach this material by designing and drafting using computer software (AutoCAD). Another end outcome is that you will gain a certain level of competency with this AutoCAD software, a program used by the majority of the firms in these professions.
Equivalent(s): TECH 564
Grade Mode: Letter Grading

CEE 403 - GIS for Civil and Environmental Engineering
Credits: 3
This course will serve as an introduction to some of the fundamental principles of Geographic Information Systems integral to Civil and Environmental Engineering. Students will develop an understanding of imagery and data acquisition; develop skills in identification, interpretation, and mapping of civil and land features, terrain analysis, and achieve an understanding of map projections; gain experience in GIS software to perform fundamental geoprocessing and mapping techniques.
Grade Mode: Letter Grading

CEE 404 - Surveying and Mapping
Credits: 0 or 4
Principles of land measurements by ground, photogrammetric and satellite methods to model the environment. Application of theory of measurements to perform and adjust engineering survey. Conformal mapping and its application to state plane coordinates. Digital mapping and Geographic Information Systems. Construction and cadastral surveying. Lab.
Prerequisite(s): MATH 425 (may be taken concurrently) with a minimum grade of D- or MATH 425H (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): CIE 505
Grade Mode: Letter Grading

CEE 420 - Environmental Engineering Gateway
Credits: 3
Introduces the profession, the environmental engineer as planner, designer, problem solver, and interdisciplinary team player; and the goals of the environmental engineering curriculum. Lectures by faculty and practitioners. Introduction to computer skills required for environmental engineering. Engineering ethics.
Equivalent(s): ENCV 400, ENE 400
Grade Mode: Letter Grading

CEE 500 - Statics for Civil Engineers
Credits: 3
Introduction to statics with emphasis on civil engineering topics; two and three dimensional force systems; static equilibrium; friction; analysis of trusses and beams; centroids; and moment and shear diagrams for flexural members.
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and (MATH 426 (may be taken concurrently) with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-).
Equivalent(s): ME 525
Grade Mode: Letter Grading

CEE 501 - Strength of Materials
Credits: 3
Strength of materials with emphasis on civil engineering applications. Virtual work; work and energy relationships; analysis of members subjected to flexure, torsion, and axial loads; stresses and strains; and stability of columns.
Prerequisite(s): (CEE 500 with a minimum grade of D- or ME 525 with a minimum grade of D-) and MATH 426 with a minimum grade of D-.
Equivalent(s): ME 526
Grade Mode: Letter Grading

CEE 502 - Project Engineering
Credits: 3
Techniques for financial analysis, and operation and management of engineering systems, engineering economics, material take-offs, estimating, scheduling, modeling physical systems, and decision-making. CEE major or permission.
Equivalent(s): CIE 533, CIE 633, CIE 733
Grade Mode: Letter Grading

CEE 505 - Introduction to Sustainable Engineering
Credits: 3
This course begins with exploration of the precept that we live in, and must design engineering works for, a world with a finite supply of natural resources and with limited life support capacity. Tools for sustainability engineering are the focus of the course, which includes life cycle analysis and life cycle impact analysis, the metrics and mass and energy flow analyses used in the field of industrial ecology, and environmental management systems.
Grade Mode: Letter Grading

CEE 520 - Environmental Pollution and Protection: A Global Context
Credits: 0 or 4
Introduces environmental science and engineering and the anthropogenic causes of environmental change. Emphasizes the causes, effects, and controls of air, water, and land pollution. The political, ecological, economic, ethical, and engineering aspects of environmental pollution and control are discussed. Field trips.
Attributes: Environment,TechSociety(Disc); Writing Intensive Course
Equivalent(s): BIOL 520, ENCV 520, ENE 520
Grade Mode: Letter Grading

CEE 620 - One Water Engineering
Credits: 4
Application of fundamental concepts on water engineering as a single resource. Students will learn core design principles for integrated physical, chemical, and biological treatment processes combined with planning and system integration for sustainable and equitable drinking water, wastewater, graywater, and stormwater management.
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-) and CEE 650 with a minimum grade of D- and CEE 520 with a minimum grade of D-.
Equivalent(s): ENCV 645, ENE 645
Grade Mode: Letter Grading

CEE 635 - Engineering Materials
Credits: 0 or 4
Structural properties and applications of the various materials used in civil engineering projects, including steel, cement, mineral aggregates, concrete, timber, and bituminous materials. Microstructure and properties of common metals, plastics, and ceramics. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): CEE 501 with a minimum grade of D- or ME 526 with a minimum grade of D-.
Equivalent(s): CIE 622
Grade Mode: Letter Grading

CEE 650 - Fluid Mechanics
Credits: 0 or 4
Properties of fluids, fluid statics, continuity, momentum and energy equations, resistance to flow, boundary layer theory, flow in open channels and piping systems, dimensional analysis, similitude, drag, and lift. Laboratory exercises on measurement of fluid properties, energy principles, flow resistance, discharge measurements, momentum, hydropower, groundwater flow, and settling of spheres. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-.
Equivalent(s): CIE 642
Grade Mode: Letter Grading

CEE 665 - Soil Mechanics
Credits: 0 or 4
Soil classification and physical properties. Permeability, compressibility, consolidation, and shearing resistance are related to the behavior of soils subjected to various loading conditions. Lab.
Prerequisite(s): CEE 635 with a minimum grade of D- and CEE 650 with a minimum grade of D-.
Equivalent(s): CIE 665
Grade Mode: Letter Grading

CEE 680 - Classical Structural Analysis
Credits: 3
Analytical stress and deflection analysis of determinate and indeterminate structures under static and moving loads by classical methods.
Prerequisite(s): CEE 501 with a minimum grade of D-.
Equivalent(s): CIE 681
Grade Mode: Letter Grading

CEE 700 - Building Information Modeling
Credits: 3
Building Information Modeling (BMI) is the process of generating and managing project data during its life cycle by integrating 3D multidisciplinary drawings with dynamic scheduling and visualization. BIM provides a digital representation of project data to facilitate the exchange of information beyond the standard two dimensional plan set. This course introduces students to the fundamentals of model creation, scheduling, material take-offs, visualizations, and animations that improve the communication of information to potential clients.
Prerequisite(s): CEE 402 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): CIE 780
Grade Mode: Letter Grading

CEE 703 - Site Design and Project Development
Credits: 3
Provides an in-depth introduction to the various design activities undertaken for Land Development (Site Design) projects. Investigates aspects of site design: parking, grading, drainage, traffic, due diligence, permitting, cost estimating, and financing. Introduces concepts of Project Development process including project management, financing, delivery methods, design development, client relations, and construction administration. Course format will include lectures, guest presenters, and site visits. Grading based upon writing examination, assignments, group project, and professional development activities.
Prerequisite(s): CEE 502 with a minimum grade of D-.
Equivalent(s): CIE 753
Grade Mode: Letter Grading

CEE 706 - Environmental Life Cycle Assessment
Credits: 3
This course teaches knowledge and hands-on-skills in conducting environmental life cycle assessment (LCA), which is a widely used technique by industries, academics, and governments. Students will learn to use popular LCA software (e.g. SimaPro), apply proper LCA techniques, critically analyze LCA results, and provide client-oriented suggestions during this course. Class time is primarily devoted to a combination of lectures and computer labs.
Grade Mode: Letter Grading

CEE 707 - Systems thinking and modeling
Credits: 3
This course teaches knowledge and hands-on skills in computational systems modeling, which is one of the most commonly used tools in analyzing the mechanisms, tradeoffs, and feedbacks in environmental, social, and economic procedures and systems. Students will also be trained with the ability of systems thinking during this course. Class time is primarily devoted to a combination of lectures and computer labs.
Grade Mode: Letter Grading

CEE 719 - Green Building Design
Credits: 3
This course gives an overview of green designs and sustainable practices in building construction. We will cover technical topics and requirements of a nationally recognized rating system (LEED), with a specific focus on Green Building Design and Construction. Students are introduced to basic building designs and systems related to sustainability. Additionally, they learn about green design topics such as site plans, water and energy efficiency, material and resources usage, environmental quality and renewable energy source. As an outcome of the course, students are able to assess and incorporate green technologies and designs into building projects.
Equivalent(s): CIE 781
Grade Mode: Letter Grading

CEE 720 - Waste Management and Site Remediation
Credits: 3
The course has two main areas of focus: (1) solid and hazardous waste management, including the key regulations and engineering approaches, such as landfills, waste-to-energy combustion, composting, and material recovery facilities; and (2) contaminated site remediation, including the key regulations, site characterization, risk-based decision making, transport and fate of contaminants, and an introduction to remediation technologies.
Equivalent(s): ENCV 742, ENE 742
Grade Mode: Letter Grading

CEE 721 - Environmental Sampling and Analysis
Credits: 4
Theory of analytical and sampling techniques used in environmental engineering. Topics include potentiometry, spectroscopy, chromatography, automated analysis, quality control, sampling design, and collection methods. Methods discussed in lecture are demonstrated in labs. Lab.
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Equivalent(s): CEE 721W, ENE 743, ENE 743W
Grade Mode: Letter Grading

CEE 722 - Introduction to Marine Pollution and Control
Credits: 4
Introduces the sources, effects, and control of pollutants in the marine environment. Dynamic and kinetic modeling; ocean disposal of on-shore wastes, shipboard wastes, solid wastes, dredge spoils, and radioactive wastes; and oil spills.
Prerequisite(s): CEE 620 with a minimum grade of D-.
Equivalent(s): ENCV 747, ENE 747
Grade Mode: Letter Grading

CEE 723 - Environmental Engineering Chemistry
Credits: 4
Chemical equilibrium principles of thermodynamics, acids/bases, precipitation/dissolution, oxidation/reduction, and complexation applied to surface water, groundwater, water and wastewater treatment. Applications to legacy and emerging organic and inorganic contaminants.
Prerequisite(s): CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-.
Equivalent(s): ENCV 749, ENE 749
Grade Mode: Letter Grading

CEE 724 - Environmental Engineering Microbiology
Credits: 4
Concepts of environmental engineering microbiology. Topics include taxonomy of species important in environmental engineering processes; microbial metabolism, interaction, and growth kinetics in environmental treatment processes; biogeochemical cycling in water; and effects of environmental parameters on environmental engineering microbial processes. Laboratories focus on microbiological methods and laboratory-scale biological treatment experiments. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): CEE 520 with a minimum grade of D- and CEE 650 with a minimum grade of D-.
Equivalent(s): ENCV 656, ENE 656, ENE 756
Grade Mode: Letter Grading

CEE 729 - Sources, Control, and Stewardship of Air Pollution
Credits: 4
Sources and fate of air pollutants from natural and engineered systems. Fundamentals of pollutant chemistry, atmospheric dispersion, and engineering controls. Includes regulatory policy, environmental, and social justice issues.
Grade Mode: Letter Grading

CEE 730 - Public Health Engineering for Rural and Developing Communities
Credits: 3
The application of environmental health engineering and sanitation principles in disease prevention and control are discussed. Special emphasis is given to areas of the world where communicable and related diseases have not yet been brought under control and to what can happen in more advanced countries when basic sanitary safeguards are relaxed. The following topics are covered: water-related diseases to include their transmission and control; safe water development, treatment, distribution and storage; and on-site wastewater treatment and disposal system.
Equivalent(s): ENCV 740, ENE 740
Grade Mode: Letter Grading

CEE 731 - Advanced Water Treatment Processes
Credits: 4
The advanced design of physical, chemical, and biological treatment processes for water and wastewater systems. Emphasis on both conventional and innovative treatment processes, including technologies for emerging issues and contaminants.
Prerequisite(s): CEE 723 with a minimum grade of D- and CEE 620 with a minimum grade of D-.
Grade Mode: Letter Grading

CEE 732 - Solid Waste Facility and Remediation System Design
Credits: 4
Focuses on the design of solid waste facilities, including landfills, waste-to-energy facilities and materials recovery facilities, and the design of remediation systems including soil vapor extraction and thermal treatment. Landfill design will include the basic design principles of the liner, leachate collection system, and landfill gas management. Remediation system design will focus on cleanup technologies implemented at contaminated sites.
Prerequisite(s): CEE 720 with a minimum grade of D-.
Equivalent(s): ENCV 748, ENE 748
Grade Mode: Letter Grading

CEE 733 - Public Infrastructure Asset Management
Credits: 4
This course is designed to provide a thorough examination of the engineering field of Public Infrastructure Asset Management (PIAM). The course will enable the student to design a PIAM system. The course will touch upon all types of public infrastructure (buildings, roads, bridges, airports, stadiums, water, wastewater and stormwater) with a particular focus on road and water infrastructure for the semester project. Students will build upon their engineering economics and project engineering skills and use simple PIAM software. Students will also be exposed to the growing number of PIAM software systems being used today. Practice leaders from the industry will be invited as guest speakers several times during the semester. Sustainability considerations will be incorporated into the PIAM decisions made with a focus on the "triple bottom line" or the Societal, Environmental and Economic aspects of management decisions. The format of the course will be a modified team-based learning experience providing practice in processing of technical lecture material, personal performance evaluation (quizzes) and team-based performance evaluations (TBLs or PSets). A term project designing a PIAM system will be performed in groups and a final written report and oral presentation on the real-world project will provide a major part of this design course grade.
Prerequisite(s): CEE 502 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): ENE 739
Grade Mode: Letter Grading

CEE 734 - Sustainable Biosolids Engineering
Credits: 3
Overview of traditional and emerging approaches to biosolids management strategies for municipal wastewater, agriculture, and industrial processes leading up to the current regulatory framework in New England. Mass, contaminant, energy, policy, and economic concepts of dewatering/drying, composting, digestion, and thermal treatment technologies. Biosolids generation calculations will be performed with BioWIN software. Involves lectures, guest speakers, laboratory/modeling activities, and field tours. Satisfies Design requirement in BSEnvE program.
Prerequisite(s): CEE 620 with a minimum grade of D-.
Grade Mode: Letter Grading

CEE 735 - Properties and Production of Concrete
Credits: 3
Basic properties of hydraulic cements and mineral aggregates, and their interactions in the properties of plastic and hardened concrete; modifications through admixtures; production handling and placement problems; specifications; quality control and acceptance testing; lightweight, heavyweight, and other special concretes.
Prerequisite(s): CEE 635 with a minimum grade of D-.
Equivalent(s): CIE 722
Grade Mode: Letter Grading

CEE 736 - Asphalt Mixtures and Construction
Credits: 3
Specification of asphalt cements, aggregates and proportioning of mixture constituents for paving applications. Asphalt mixture design methods, production, construction, and quality control are discussed. Current new material production and construction technologies are introduced.
Prerequisite(s): CEE 635 with a minimum grade of D-.
Equivalent(s): CIE 723
Grade Mode: Letter Grading

CEE 737 - Pavement Rehabilitation, Maintenance, and Management
Credits: 3
This course covers the technical and financial strategies to extend the life of highway and airfield pavements. The course topics will include: Assessment of pavement functional and structural condition, suitability of pavement maintenance and repair techniques, use of pavement preservation processes, and application of asset management to extend the life of pavement infrastructure.
Prerequisite(s): CEE 635 with a minimum grade of D-.
Grade Mode: Letter Grading

CEE 749 - Pavement Design and Analysis
Credits: 4
Introduction to flexible and rigid pavement design and analysis for highways and airports. Examines design inputs, materials, analysis methods, design tools, and maintenance treatments. Students will conduct a pavement design project. This course satisfies a senior level materials principal design elective in the CEE department.
Prerequisite(s): CEE 635 with a minimum grade of D- and CEE 665 with a minimum grade of D-.
Equivalent(s): CIE 721
Grade Mode: Letter Grading

CEE 751 - Open Channel Flow
Credits: 3
Energy and momentum principles in open channel flow; flow resistance; channel controls and transitions; unsteady flow concepts and dam failure studies. Modeling with HEC programs.
Prerequisite(s): CEE 650 with a minimum grade of D-.
Equivalent(s): CIE 741
Grade Mode: Letter Grading

CEE 753 - Snow Hydrology
Credits: 3
Snow is a significant component of the hydrologic cycle in high latitude and high elevation environments. It is also a part of engineering design and practice that is frequently overlooked. In this course, we will examine spatial controls on snow accumulation and the dynamics of snowmelt processes through readings in snow hydrology, field assays of snow distribution, and analytical exercises. Of particular interest will be the role of snow in water resource engineering.
Prerequisite(s): CEE 650 with a minimum grade of D- and (MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-).
Grade Mode: Letter Grading

CEE 754 - Engineering Hydrology
Credits: 3
Hydrologic cycle, probability theory related to hydrology and the design of water resources structures, water law, flood discharge prediction, hydrograph development, hydraulic and hydrologic river routing, reservoir routing, theory of storage, reservoir operations, hydropower development, modeling of watershed hydrology with program HEC-1, HEC-HMS, multipurpose projects.
Equivalent(s): CIE 745
Grade Mode: Letter Grading

CEE 755 - Design of Pressurized Water Transmission Systems
Credits: 4
Theory developed for individual components to large complex systems. Analysis and designs of components and systems. Topics include: steady and unsteady closed conduit flow, valves and meters, pump requirements, pump selection, system planning and layout, water hammer, and system operation and maintenance. Pressure system modeling with program EPANET.
Prerequisite(s): CEE 650 with a minimum grade of D-.
Equivalent(s): CIE 755
Grade Mode: Letter Grading

CEE 758 - Stormwater Management Designs
Credits: 3
Historic review of stormwater management leading up to the current regulatory framework. Overview of stormwater management strategies, strategy selection, and the targeting of specific contaminants, contaminant removal efficiencies, construction and site selection, and system maintenance. Hydrologic concepts including watershed and storm characteristics, design hydrology (peak flows, storm and treatment volumes), hydrograph routing, and critical review of hydrology and drainage reports. Design and sizing of treatment systems including: conventional, BMPs, low impact development, and manufactured devices. Rainfall runoff calculations with US SCS TR55 model.
Prerequisite(s): CEE 650 with a minimum grade of D-.
Equivalent(s): CIE 758
Grade Mode: Letter Grading

CEE 759 - Stream Restoration
Credits: 4
The assessment, planning, design, engineering, and monitoring of stream and watershed practices intended to protect and restore the quality and quantity of flowing surface waters and stream corridors. Lecture material covers hydrology, geomorphology, and ecosystems, with the intent of understanding the variables associated with stream systems and their interplay. Students measure field variables and then are challenged with actual designs. Examples of stream restoration issues include: in-stream flow, dam removal, induced recharge, improvements to fish habitat, and channel stabilization.
Prerequisite(s): CEE 650 with a minimum grade of D-.
Equivalent(s): CIE 759
Grade Mode: Letter Grading

CEE 765 - Engineering Behavior of Soils
Credits: 4
Review of stress and strain in soil. Introduction to continuum mechanics. Development of engineering soil properties. Application of soil mechanics to shear strength and stress-strain behaviors of soils. Failure states and residual strength. Application of stress paths in engineering problems. Unstaturated soil mechanics. Laboratory exercises using direct shear test, triaxial test, and soil-water retention measurements.
Equivalent(s): CIE 767
Grade Mode: Letter Grading

CEE 766 - Introduction to Geotechnical Earthquake Engineering
Credits: 3
Overviews earthquake source mechanisms; magnitude and intensity; seismicity of the United States. Dynamics of simple structures; response spectra. Selection of design parameters; source, magnitude, input records. Measurement of dynamic characteristics of soils; site response, liquefaction, and ground deformation.
Prerequisite(s): CEE 778 with a minimum grade of D-.
Equivalent(s): CIE 762
Grade Mode: Letter Grading

CEE 768 - Geo-Environmental Engineering
Credits: 3
Soil composition and structure; contaminant fate and transport; containment design including landfills, geo-synthetics for liners and covers, and leachate collection systems; vertical cutoff walls and slope stability analyses; geo-environmental site characterization and investigation using geotechnical and geophysical methods; ground water, soil and gas monitoring and sampling; remediation including in situ and ex situ techniques and treatment methods.
Equivalent(s): CIE 766
Grade Mode: Letter Grading

CEE 769 - Marine Geotechnics
Credits: 3
This course is designed to introduce students to fundamental principles and techniques commonly used in the field of coastal and marine geotechnical engineering. This interdisciplinary course illustrates the connection between fluid and soil mechanics for analyzing infrastructure within the coastal zone.
Grade Mode: Letter Grading

CEE 778 - Foundation Design I
Credits: 4
Foundation design based on subsurface investigation and characterization using current methods of laboratory and in situ testing. Use of consolidation theory and bearing capacity theory for the design of shallow foundations including footings and rafts. Basic design of pile foundations. Earth pressure theory applied to design of retaining walls. Slope stability theory and applications.
Prerequisite(s): CEE 665 with a minimum grade of D-.
Equivalent(s): CIE 760
Grade Mode: Letter Grading

CEE 779 - Foundation Design II
Credits: 3
Advanced pile and pier design under vertical and lateral loads. Slope stability by circular and noncircular arc methods. Design of flexible bulkhead walls and mechanically stabilized walls. Excavation and dewatering. Soil and site improvement.
Prerequisite(s): CEE 778 with a minimum grade of D-.
Equivalent(s): CIE 761
Grade Mode: Letter Grading

CEE 780 - Matrix Structural Analysis and Modeling
Credits: 3
Modeling and analysis of determinate and indeterminate structures by matrix computer methods. Creation of matrix elements using compatibility, equilibrium, and constitutive relationships. Plane trusses, beams, frames, and space trusses.
Prerequisite(s): CEE 680 with a minimum grade of D-.
Equivalent(s): CIE 685, CIE 783
Grade Mode: Letter Grading

CEE 781 - Dynamics of Structures
Credits: 3
Dynamics of single- and multi-story buildings. Response due to earthquakes, blasting, traffic, and mechanical equipment. Analysis in the time domain and through the Fourier Transform. Fundamentals of structural vibration measurement.
Prerequisite(s): CEE 780 with a minimum grade of D-.
Equivalent(s): CIE 787
Grade Mode: Letter Grading

CEE 789 - Timber Design
Credits: 3
Introduces the design of timber structures. Structural properties of wood, determination of horizontal and vertical loads, horizontal and vertical load-resisting systems, and design of horizontal diaphragms, shear walls, beams, and columns. Bolted, screwed, and nailed connections.
Prerequisite(s): CEE 680 with a minimum grade of D-.
Equivalent(s): CIE 782
Grade Mode: Letter Grading

CEE 790 - Structural Design in Masonry
Credits: 3
Introduces the design of reinforced masonry structural members by the stress and strength method and considering deflection and other serviceability performance crtieria. Includes development of wind and seismic load, curtain wall, shear wall, lintels and columns. Prereq: CEE 635, CEE 680; or permission.
Prerequisite(s): CEE 635 with a minimum grade of D- and CEE 680 with a minimum grade of D-.
Equivalent(s): CIE 776
Grade Mode: Letter Grading

CEE 791 - Reinforced Concrete Design
Credits: 0 or 4
Introduces the design of reinforced concrete structural members by the strength method and considering deflection performance. Includes loads, approximate analyses, slabs, beams, and columns.
Prerequisite(s): CEE 635 with a minimum grade of D- and CEE 680 with a minimum grade of D-.
Equivalent(s): CIE 774
Grade Mode: Letter Grading

CEE 792 - Pre-stressed Concrete
Credits: 3
Analysis and design of prestressed and post-tensioned concrete sections in flexure and shear. Strength, deflection, and losses in flexural members. Optimization of section and prestressing force selection.
Prerequisite(s): CEE 791 with a minimum grade of D-.
Grade Mode: Letter Grading

CEE 793 - Structural Design in Steel
Credits: 4
Introduction to steel member design, including horizontal and vertical members for design and analysis of buildings. Examines design inputs, material choice, analysis methods and design and construction methodologies.
Prerequisite(s): CEE 635 with a minimum grade of D- and CEE 680 with a minimum grade of D-.
Equivalent(s): CIE 793
Grade Mode: Letter Grading

CEE 794 - Bridge Design
Credits: 3
Analysis of two-span, continuous, slab and beam bridges using the AASHTO LRFD Bridge Design Specifications. Use of influence lines, load distribution, load factoring, deck design, analysis and design of composite beams and plate girders. Bridge aesthetics.
Prerequisite(s): CEE 791 with a minimum grade of D- and CEE 793 (may be taken concurrently) with a minimum grade of D-.
Equivalent(s): CIE 792
Grade Mode: Letter Grading

CEE 795 - Independent Study
Credits: 1-4
Seniors in good standing may pursue independent studies under faculty guidance. A written culminating report is required.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CIE 795
Grade Mode: Letter Grading

CEE 796 - Special Topics
Credits: 1-4
Advanced or specialized topics not normally covered in regular course offerings. May be repeated, but not in duplicate areas.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CIE 795
Grade Mode: Letter Grading

CEE 797 - Introduction to Project Planning and Design
Credits: 2
Part one of a two-part sequence. Student groups develop a project statement to address a large-scale civil engineering system design. Each team prepares a project plan to be executed in CEE 798, part two of this sequence.
Equivalent(s): CIE 784
Grade Mode: Letter Grading

CEE 798 - Project Planning and Design
Credits: 2
Student groups are formed into design teams to prepare a design plan for a large-scale civil engineering system including consideration of budgetary constraints, building code criteria, and environmental impacts. Each team prepares a final written report and gives a formal presentation.
Attributes: Writing Intensive Course
Prerequisite(s): CEE 797 with a minimum grade of D-.
Equivalent(s): CIE 682, CIE 788
Grade Mode: Letter Grading

CEE 799H - Senior Honors Thesis
Credits: 1-3
Students in the honors program in Civil and Environmental Engineering need to complete a total of 4 credits of honors thesis during the senior and junior years, which may be used to fulfill a CEE non-design elective. CEE 799H is a two-semester thesis project guided by a faculty advisor and resulting in a written thesis in a journal article format. Students are to register for 1 credit of honors thesis during the first semester and 3 credits of honors thesis during the second semester. The student should meet with potential honors thesis faculty advisors in advance and work out what will be required with the professor willing to serve.
Attributes: Honors course
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 2 times.
Equivalent(s): CIE 799H
Grade Mode: Letter Grading

Civil Technology (CT)

No courses are currently active in the course inventory for this subject prefix.

Classics (CLAS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CLAS 400 - Exploring and Experiencing the Ancient World and its Legacy
Credits: 2
Covers aspects of the ancient world and its subsequent importance not found in the rest of the Classics curriculum or dealt with only briefly. Topics are chosen to be timely by connecting antiquity to current events, including pop culture, or to be enduring but under-appreciated. Emphasis on active and engaged learning and, where possible, experiential activities. May be repeated on different topics. Does not satisfy major requirements.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

CLAS 401 - Classical Mythology
Credits: 4
Survey of myths and sagas of ancient Greece and Rome. No classical preparation necessary. Background course for majors in English, the arts, music, history, modern languages, classics.
Attributes: Humanities(Disc)
Equivalent(s): CLAS 401H
Grade Mode: Letter Grading

CLAS 403 - Introduction to Greek Civilization
Credits: 4
A broad historical exploration of Greek civilization. Topics include: architecture, art, law, literature, philosophy, poetry, politics, religion, society, warfare, and the Greeks' legacy to the modern world. Open to all students. No prior knowledge of the ancient world assumed; all readings are in English. Ideal background for students of English, philosophy, history, Latin, Greek, the arts, music, modern languages.
Attributes: Historical Perspectives(Disc)
Equivalent(s): CLAS 405, HIST 403
Grade Mode: Letter Grading

CLAS 404 - Introduction to Roman Civilization
Credits: 4
A broad historical exploration of Roman civilization. Topics include: architecture, art, law, literature, philosophy, poetry, politics, religion, society, warfare, and the Romans' legacy to the modern world. Open to all students. No prior knowledge of the ancient world assumed; all readings are in English. Ideal background for students of English, philosophy, history, Latin, Greek, the arts, music, modern languages.
Attributes: Historical Perspectives(Disc)
Equivalent(s): CLAS 406, HIST 404
Grade Mode: Letter Grading

CLAS 444 - Individual and Society in the Ancient World
Credits: 4
This class examines one of the major issues faced by people throughout history, whether and under what circumstances an individual should act against the wishes of society. The great philosophical and historical works of the ancient world shed light not only on how the Greeks and Romans approached the idea of personal responsibility but also on the assumptions we today make about human nature and the relationships on which society depends. No prior knowledge of the ancient world required. All readings are in English.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

CLAS 444D - Athens, Rome, and the Birth of the United States
Credits: 4
What did Washington, Jefferson, Adams (John and Abigail), Madison and Paine have in common? They were all instrumental in shaping the US political system, but they were also educated in the classics. When building the framework of our democratic republic, they continually looked to Athens and Rome as models, inspirations and warnings. The course examines ancient political systems and how they helped fashion our founder's notion of the ideal government and continue to do so.
Attributes: Historical Perspectives(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

CLAS 501 - Introduction to Mediterranean Archaeology
Credits: 4
Survey of representative archaeological sites, architecture, and objects produced by the cultures surrounding the Ancient Mediterranean.
The course will focus on the structure, form, and symbolic content, or sanctuaries, cities, tombs, housing, as well as material culture such as pottery and sculpture. In addition to the overarching narrative of the history of classical archaeology, further topics include cross-cultural influences, materials and building technologies, archaeological theory and practice, and aesthetic principles.
Attributes: World Cultures(Discovery)
Equivalent(s): ARTH 501
Grade Mode: Letter Grading

CLAS 502 - Ancient Pompeii and the Bay of Naples
Credits: 4
This course analyzes the cultural development of Pompeii and adjacent sites buried by the eruption of Vesuvius in AD 79. The aim is to understand the architectural layout and material culture of the cities, their development over time, as well as understand how social norms, politics and cultural influences shaped the appearance and the built environment in the seven hundred years that Pompeii existed prior to its destruction. Through the lens of the surviving art, architecture, and material culture students will learn about everyday life in ancient Pompeii and how different social classes interacted in the city.
Attributes: World Cultures(Discovery)
Equivalent(s): ARTH 502
Grade Mode: Letter Grading

CLAS 510 - Building Rome
Credits: 4
An introduction to the buildings and structures for which the Romans remain famous, such as the Pantheon, the Colosseum, and the aqueducts that allowed Rome to become a metropolis. A major focus is the connection between the changes in Roman society and the development of Roman architecture. Looks at both Rome and other important cities in the Roman Empire. All readings are in English. No prior knowledge of the ancient world required.
Co-requisite: INCO 589
Attributes: FinePerformingArts(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

CLAS 511 - Special Studies in Greek History
Credits: 4
The course uses historical and literary sources in conjunction with the city of Athens itself and its archaeological remains to explore the history of a particular theme, cultural practice or institution in ancient Greek civilization. The topics changes with different instructors but always takes a fundamentally historical orientation to the material and the city, even if interdisciplinary approaches are incorporated into the coursework. CLAS 511 is offered only as part of a study abroad program.
Attributes: Historical Perspectives(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

CLAS 520A - Classical Society, Politics and Ethics: Democracies and Republics
Credits: 4
We frequently use the terms "democracy" and "republic" to describe our own political system, but where did these words and ideas originally come from? This course examines the historical development of the original democracies in Greece (primarily Athens) and the Roman Republic, as well as the particular institutions and practices that were associated with each. Course will also cover the development of democratic and republican institutions in the modern world.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

CLAS 520B - Classical Society, Politics and Ethics: Happiness and Ancient Views of the Good Life
Credits: 4
How did the Greeks and Romans define happiness and was happiness considered an essential component of the "good life"? How do ancient concepts of the "good life" influence later views of human flourishing and how do specific historical circumstances alter utopian visions of a life well lived? This course traces the concept of the "good life" from ancient Greece to today and challenges students to create their own vision of a "good life".
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

CLAS 520C - Classical Society, Politics and Ethics: Sports, Spectacle and Competition
Credits: 4
This course treats the details of athletic training and competition, but its primary focus is on investigating the importance of athletics to society and how athletics reflected the broader cultural values of the Greeks and Romans. Open to all students. All readings in English.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

CLAS 520D - Classical Society, Politics and Ethics: Greek and Roman Religion
Credits: 4
This course traces the historical development of ancient Greek and Roman religion from its antecedents in Near Eastern, Minoan, and Mycenaean culture to the rise of Christianity in Rome's early imperial period. This course also introduces students to the methods and materials of historians of religion. Topics covered in this course include: changing conceptions of divinity, animal sacrifice, sanctuaries, festivals, death and the afterlife, divination, magic, and mystery cults.
Attributes: Historical Perspectives(Disc)
Equivalent(s): CLAS 520
Grade Mode: Letter Grading

CLAS 530A - Classical Literary Performance Genres: War and Adventure in Ancient Epic
Credits: 4
Storytelling has long been one of the primary means to preserve and transmit cultural ideas and traditions. In this course students read and analyze the earliest epic tales from the Greek and Roman period with a view toward understanding the roots and nature of epic, the myths it told, and the influence it has had on subsequent literature. No credit earned if credit received for CLAS 444B.
Attributes: Humanities(Disc); Writing Intensive Course
Equivalent(s): CLAS 444B
Grade Mode: Letter Grading

CLAS 530B - Classical Literary and Performance Genres: Tragedy and Comedy on the Ancient Stage
Credits: 4
Investigations into the dramatic works of the Greek and Romans, the power of performance, and the cultural importance of stage productions. Readings include the tragedies of Aeschylus, Sophocles, and Euripides, and the comedies of Aristophanes, Menander, and Plautus. Ideal background for students of all theatrical and performance traditions. Open to all students. All readings in English.
Attributes: Humanities(Disc)
Equivalent(s): CLAS 530
Grade Mode: Letter Grading

CLAS 540A - Environment, Technology and Ancient Society: Sustaining Ancient Rome Ecology and Empire
Credits: 4
This course examines the interplay between the ancient Roman environment, Roman technological innovations, and the values of Roman imperial society. Examining Roman innovations in water supply, building technology, mining, and more, this course explores the ethical questions that arise through the use of ancient Roman technology, evaluates the effects of these technologies on the environment and Roman society, and determines whether Roman values encouraged or discouraged a responsible approach to technology and the environment.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): CLAS 515
Grade Mode: Letter Grading

CLAS 540B - Environment, Technology and Ancient Society: Roman Houses, Domestic Space and Public Life
Credits: 4
The Romans used the house as a communication technology for defining and expressing their identities in society and in the natural world. In this course, we examine literary and visual sources for Roman houses, apartments, villas, and palaces, and we compare and contrast the role of the house in the ancient world and in American society. We pay special attention to how domestic space shapes and is shaped by environment, politics, and culture.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

CLAS 540C - Environment, Technology and Ancient Society: Tech, Tools and Engineering in the Ancient World
Credits: 4
This course examines positive and negative impacts of ancient technological advances: engineering (fire, metallurgy), writing technology (scripts, including the alphabet, the emergence of papyrus and vellum), military technology (shipbuilding, defensive and offensive technologies, and navigation), artistic (invention of dyes, lost-wax methods of bronze casting), infrastructure (roads, bridges, and aqueducts), and monumentality (Stonehenge, Greek temples, and the Roman Colosseum). Focus on the ways in which societal and environmental factors influenced technological development and vice versa.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

CLAS 550A - Identities and Difference in the Ancient World: Greek and Roman Women
Credits: 4
The impact of women on society in Greece and Rome throughout Antiquity. The role of women in public, religious, and private life as well as their legal status through law codes. Men's views of women in different literary texts. Especially concentrating on the few existing texts written by women. All readings are in English.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Equivalent(s): CLAS 550
Grade Mode: Letter Grading

CLAS 550B - Identities and Difference in the Ancient World: Slaves and Masters
Credits: 4
Students explore the different ways slavery developed in the Greek and Roman worlds with an emphasis on the connections to other historical developments such as the practice of warfare, changes in political systems, and ancient views about human rights. To better understand the development of Greek and Roman slavery, we look at how the ancient systems compare to slavery in the American South and modern human trafficking.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

CLAS 550C - Identities and Difference in the Ancient World: Sex and Desire in Greece and Rome
Credits: 4
This course provides an introduction to ancient Greek and Roman conceptions of desire and sexuality, to how these conceptions developed and changed over time, and how they differ from modern ways of understanding sex, desire, and sexuality. Topics discussed include "romantic" love, attitudes towards homosexual practices, man-boy love, lesbianism, ancient views of "cross-dressing," and attitudes towards prostitution, among others.
Attributes: Historical Perspectives(Disc); Writing Intensive Course
Grade Mode: Letter Grading

CLAS 551 - Race, Ethnicity, Class & Classics
Credits: 4
Examines race, ethnicity, and class, and the ways in which they intersect with the study of the ancient world. The approach will use critical lenses alert to the impact of power imbalances both on how we view these subjects in the ancient world and how the ancients have been used to create and reinforce hierarchies in the modern world. The exact focus will vary by semester (students may repeat once if on a different topic).
Attributes: World Cultures(Discovery)
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

CLAS 575 - Ancient Near East
Credits: 4
From the Neolithic revolution to the time of Alexander the Great. Rise of civilization; nature of human artistic and intellectual development in the earliest civilizations of Mesopotamia and Egypt; Judaism in its historical setting. Course meets the History major requirements for Group III.
Equivalent(s): HIST 575
Grade Mode: Letter Grading

CLAS 601 - Classical Myth II: The Power and Persistence of Myth
Credits: 4
An in-depth look at the myths of the Greeks and Romans, at the power of myth as a cultural force, and at the importance of myth both in the ancient period as well as the modern era. The focal point is on the myths of the Greeks and Romans, but the myths of other cultures are addressed. All readings are in English.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

CLAS 675 - History of Ancient Greece
Credits: 4
Discover the exciting, turbulent, and innovative world of the Greeks through their history, from the emergence of small cities in the archaic period to the empire of Alexander the Great. Special focus will be on the political, economic and social developments in the rise of the polis (city), the Persian and Peloponnesian Wars, the rise of Macedon and Alexander the Great's conquests. CLAS 403/HIST 403 is encouraged but not necessary.
Equivalent(s): HIST 675
Grade Mode: Letter Grading

CLAS 676 - Topics in Ancient Greek History
Credits: 4
Advanced historical study of a particular period or theme in ancient Greek history. May be repeated barring duplication of subject.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): HIST 676
Grade Mode: Letter Grading

CLAS 677 - History of Ancient Rome
Credits: 4
Discover the fascinating and tumultuous history of the ancient Roman world, from its small beginnings in the early Republic to the high Empire, when Rome controlled the whole Mediterranean basin. Special focus will be on the political and economic conflicts between social classes, the Punic Wars, the fall of the Republic, its transformation into a monarchy, and the golden age of imperial rule. CLAS 404/HIST 404 is encouraged but not necessary.
Equivalent(s): HIST 677
Grade Mode: Letter Grading

CLAS 678 - Topics in Ancient Roman History
Credits: 4
Advanced historical study of a particular period or theme in ancient Roman history. May be repeated barring duplication of subject.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): HIST 678
Grade Mode: Letter Grading

CLAS 686 - UNH in Greece Study Abroad
Credits: 0-6
Study abroad in Greece. Interested students should consult a Classics advisor. Students should be advised they must meet program and university requirements for study abroad. (IA grade will be assigned until official transcript is received from the foreign institution.)
Co-requisite: CLAS 511, INCO 589
Grade Mode: Credit/Fail Grading
Special Fee: Yes

CLAS 694 - Supervised Practicum
Credits: 2 or 4
Participants earn credit for suitable pre-professional activities, including high school outreach, assisting in undergraduate courses and work with professional organizations, museum work. Enrollment limited to juniors and seniors who are Classics, Latin, or Greek majors or minors and have above-average G.P.A.s. Writing assignments are required. Course does not count toward Classics, Latin, or Greek major or minor requirements.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

CLAS 695 - Special Studies
Credits: 2 or 4
Advanced work in classics. Research paper. Not open to freshmen and sophomores.
Grade Mode: Letter Grading

CLAS 696 - Special Studies
Credits: 2 or 4
Advanced work in classics. Research paper. Not open to freshmen and sophomores.
Grade Mode: Letter Grading

CLAS 701W - Capstone Course
Credits: 4
Students will investigate the intersections of the fields of Classics, Humanities, and Italian Studies through the exploration of a common theme. Working across disciplines, students will learn how scholars from these fields have approached common issues. Students will also demonstrate their ability to conduct research by engaging in a semester-long specialized project connected to the course theme.
Attributes: Writing Intensive Course
Equivalent(s): HUMA 701W, ITAL 701W
Grade Mode: Letter Grading

College of Liberal Arts (COLA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

COLA 401 - Liberal Arts Advising Seminar
Credits: 1
Extended Orientation course for COLA first year students.
Grade Mode: Credit/Fail Grading

COLA 402 - Digging Deep: Cool COLA Research
Credits: 1
This course, featuring research presentations and Q&A with select faculty, introduces students to what is entailed in doing research from within Liberal Arts. It will showcase the range of research projects and methods used by COLA faculty and taught to COLA students. Presentations will also illuminate how research in COLA disciplines enriches and complements other fields (e.g., natural resources, marine science, computer science, business, finance, health services) and teaches skills applicable to numerous careers tracks.
Grade Mode: Credit/Fail Grading

COLA 458 - Global Preparedness for Budapest
Credits: 1
This course is delivered online in the weeks leading up to the start of the Budapest Spring Semester Program and while students are abroad. The course will prepare students to get more out of their study abroad experience in Hungary by developing knowledge of the destination city, the procedures and features of the program, and basic intellectual training. All students participating in the program must enroll in this course.
Grade Mode: Credit/Fail Grading

COLA 500 - Pathfinder - Career Planning for Liberal Arts Majors
Credits: 2
Explore existing and emerging employment opportunities for liberal arts majors in fields including technology, health & wellness, marketing, education & training, sales, financial services, and consulting. Weekly panel conversations with industry experts, self-reflection exercises, and career assessments will facilitate this exploration. Ultimately, you will develop a tailored Career Development Plan based on your skills, values, and interests.
Grade Mode: Credit/Fail Grading

COLA 505 - Hired: A Career Boot Camp for Liberal Arts Majors
Credits: 2
This 7-week boot camp style course equips liberal arts students with the tools needed to land a job or internship. Specifically, students craft resumes, cover letters, and online profiles that effectively communicate their values, interests, and strengths. Students also execute organized job and internship searches, critique job offers and benefits packages, and hone interview skills that enable them to speak confidently about the transferable skills they have gained throughout their academic and co-curricular experience.
Equivalent(s): COLA 400
Grade Mode: Credit/Fail Grading

COLA 510 - COLA Peer Navigator Mentor Training
Credits: 0-2
The purpose of this course is to develop your leadership skills and prepare you to support first-year and transfer students through their first semester at UNH. Peer Navigators serve an important role in COLA and in the lives of first-year transfer students, serving as a bridge to the UNH campus and community. As part of this course, you will learn to facilitate activities and discussions in-class and online, give positive feedback, hold office hours, refer students to campus resources, and act as a learning coach and student advocate.
Repeat Rule: May be repeated for a maximum of 6 credits.
Grade Mode: Credit/Fail Grading

COLA 610 - Interdisciplinary Internship Seminar
Credits: 2
A weekly seminar that supports students in making meaning of their semester-long, non-clinical work-based learning experience. Through guided discussion, journaling, and readings, students explore workplace expectations, communication, supervision, teamwork, professional identity, and the future of work. A final presentation and reflective activities help students connect their liberal arts education to their professional goals and articulate the value of their internship for future employment or graduate school applications.
Co-requisite: COLA 611
Grade Mode: Letter Grading

COLA 611 - Interdisciplinary Internship
Credits: 1-6
Supervised non-clinical work-based learning experience in a professional setting related to a student's career interests and goals. Students complete approximately 45 hours of fieldwork per credit over the term.
Co-requisite: COLA 610
Grade Mode: Credit/Fail Grading

COLA 653 - Introduction to British Culture
Credits: 4
Why do the British say “Sorry” for everything? What is the role of the monarchy? Does the British class system still exist? What is it like being British-born of Indian parents? How many languages are spoken in London? What is a stiff upper lip anyway? These are only a tiny fraction of the questions that will surface during your stay in London. Through class discussions, readings, written ruminations, and excursions, you will in this course explore a range of cultural elements and challenges unique to the United Kingdom in general and London in particular, from the light (British etiquette) to the substantial (the impact of immigration).
Co-requisite: COLA 655, COLA 670, INCO 588
Grade Mode: Letter Grading

COLA 655 - London Program
Credits: 0-18
Enables students to pursue a semester or academic year of in UNH's programs in London, England. Students must be admitted before enrolling in the course. For information and application forms, consult program secretary. IA (continuous grading) grade will be assigned until official transcript is received. Program fee.
Co-requisite: COLA 653, INCO 588
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

COLA 658 - Humanities Spring Budapest Program
Credits: 0-16
Enables students to pursue a spring semester in UNH's program in Budapest, Hungary. The program is designed to provide undergraduates with an intensive study abroad experience focusing on modern Hungarian and Central European history and culture. Students study at Karoli Gaspar University and take courses taught by Hungarian and University of New Hampshire faculty. Under the supervision of a UNH faculty member in residence, students carry a four course load, two of which (HUMA 550 and HUMA 551) are taught by the UNH faculty member. All courses are taught in English. Students must be admitted before enrolling in this course.
Attributes: World Cultures(Discovery)
Grade Mode: Credit/Fail Grading
Special Fee: Yes

COLA 670 - The London Project
Credits: 4
The London Project will be one of the two UNH courses that UNH students participating in the UNH London Program will be required to take. This course will guide students through the research, writing/producing, and presentation of a project that explores one very narrow slice of London. The goal is to allow each student to gain insight and understanding of a subject that intrigues him/her and to present findings in a form that is appropriate for the subject and the talents of the author. Those forms could range from an academic research paper, a piece of creative writing, a multimedia slide show, a video, a podcast, or perhaps a Power Point presentation. By asking students to become fluent in one London issue, this course complements the other UNH course, Introduction to British Culture, which covers a range of British customs, challenges, and cultural elements.
Co-requisite: COLA 653
Grade Mode: Letter Grading

Communication (CMN)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CMN 440A - Honors/The Language of Addiction: Stigma, Social Relations, and Drug Use
Credits: 4
How does our culture relate to and talk about people who use drugs? Discussions of the "opioid epidemic" often rely on models of addiction - the "moral model," "disease model," and "psychosocial model" - that emerge from a view of individuals as self-contained, without taking social contexts into account. As a result, people who use drugs - especially those who inject drugs - are stigmatized as morally bankrupt, disease-ridden, or psychosocially maladjusted individuals. This course will explore how stigma functions as a byproduct of a system of social relations in which various forms of inequality are reproduced through the discourses around drugs. Through readings, discussions, and assignments, we will pull back the veil on language and social relationships to better understand how we think about ourselves, our social institutions, and what we are capable of doing about substance misuse.
Attributes: Honors course; Social Science (Discovery)
Grade Mode: Letter Grading

CMN 455 - Introduction to Media Studies
Credits: 4
Nature, development, and the effects of mass media. Overview of mass communication history and theory.
Attributes: Social Science (Discovery)
Equivalent(s): CMN 455H
Grade Mode: Letter Grading

CMN 456 - Propaganda and Persuasion
Credits: 4
Introduction to theories of propaganda and persuasion. Examination of symbolic strategies designed to secure or resist social and institutional change. Attention given to case studies of social, political, economic, and religious reformation. Special consideration of the ethical ramifications of such efforts.
Attributes: Humanities(Disc)
Equivalent(s): CMN 456H
Grade Mode: Letter Grading

CMN 457 - Introduction to Language and Social Interaction
Credits: 4
An introduction to the study of the conversational basis of social reality. Presents an overview of interpersonal communication processes and the ways in which they influence the formation of identity, personal relationships, gender, interactional patterns, conflict, culture, and power. Readings and class material from a variety of authors in the communication discipline as well as related fields in the humanities and the social sciences.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

CMN 500 - Public Speaking
Credits: 4
Performance course buttressed by practical theories of public discourse. Focus on analysis of speaking situations and audiences, message construction, presentation, and critical evaluation. Does not count towards the CMN major.
Equivalent(s): CA 450
Grade Mode: Letter Grading

CMN 504 - Introduction to Argumentation
Credits: 4
Persuasive discourse as inquiry and advocacy grounded in practical inductive and deductive reasoning. Discovery, analysis, and testing of practical arguments. The nature and function of proof. Some emphasis on applied presentation.
Attributes: Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 505 - Analysis of Popular Culture
Credits: 4
Locates the development of popular cultural artifacts and practices within the 20th-century social history of the U.S. Examines the political-economic forces that underpinned the commercialization of art, leisure, sports, and other elements of culture in industrial and postindustrial America.
Attributes: Inquiry (Discovery)
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 507 - Introduction to Rhetorical Theory and Analysis
Credits: 4
Major precepts of rhetorical theory. Application of those precepts in analysis and understanding of a wide range of human communication. Consideration of how precepts and issues of rhetorical theory apply to contemporary issues and problems.
Attributes: Inquiry (Discovery)
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 514 - Analysis of Online Identity
Credits: 4
This course will explore how digital media technologies inform strategies of self-presentation and practices of identity formation. We will situate contemporary practices of self-presentation within the historical development of the internet and sociological theories of identity. Students will be encouraged to examine how the internet and mobile technologies challenge existing understandings of concepts such as anonymity, authenticity, reputation, and privacy. Throughout the course, students will be asked to think critically about the ways in which traditional identity markers - such as race, gender, and class - are both challenged and reproduced in digital environments. Drawing on the current digital media landscape, we will explore several contemporary issues including privacy and reputation, self-branding and microcelebrity, online dating, and self-tracking. Throughout the semester, students will use academic literature to identify and address real-world problems.
Prerequisite(s): CMN 455 with a minimum grade of D- or CMN 456 with a minimum grade of D- or CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CMN 519 - Advertising as Social Communication
Credits: 4
Social role of advertising, public policy debates concerning advertising, influence of advertising on culture, and methods of analyzing advertising messages.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 525 - Persuasion & Public Relations
Credits: 4
An exploration of the persuasion genres, techniques, roles, and stages in the practice of public relations across the full range of rhetorical situations and organizations.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of D- or CMN 456 with a minimum grade of D- or CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CMN 529 - Data for Sale: Capitalism and the Surveillance Economy
Credits: 4
Surveillance, the practice of tracking and recording information about people, is central to modern capitalist societies. Capitalists rely on surveillance systems to supervise workers and managers, identify customer markets, keep accounts, and calculate the risk of investments and innovations. While such practices can increase profits, they also pose threats for privacy and individual freedom. This course explores the relationship between capitalism and surveillance, and considers the role of surveillance as a mode of economic world-building and social control in the past and present.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

CMN 535 - Digital Democracies
Credits: 4
This course explores how emerging digital technologies alternately enhance and obstruct the pursuit of democratic values, broadly conceived. We examine the history and meaning of terms like democracy and freedom in the context of both politics (campaigns, voting, legislation) and culture (music, entertainment, and the arts); the history of computers and the Internet; and the impact of digital media on international politics and professional journalism.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 540 - Special Topics in Communication
Credits: 4
Selected topics not covered by existing Communication courses. Topics may vary. Courses are available in the department office or online prior to each semesters registration period. May be repeated barring duplication of topic.
Prerequisite(s): CMN 455 with a minimum grade of D- or CMN 456 with a minimum grade of D- or CMN 457 with a minimum grade of D-.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

CMN 545 - Media, Religion, and Culture
Credits: 4
This course examines the impact of media on religious belief, practice, and institutions in an American context. We cover the rise of evangelicalism; the development of religious denominations and political parties; the birth of religious broadcasting including the rise of televangelism; and the decline of institutional religion with the emergence of a "spiritual marketplace." We examine religious representations in popular film, music, and news, and ask whether digital technologies have become imbued with religious meaning.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 562 - Collaborative Leadership in the 21st Century
Credits: 4
This course grounds the study of interaction in groups via theories of inter-organizational collaboration. Students will leave this course with a very specific set of knowledge and skills related to dialogue, principled negotiation, constructive conflict, consensus decision making and appreciative inquiry. Lessons focus on the development of a responsible ethic regarding how to share power among diverse group members. This ethic prepares you to lead collaborative groups in organizations, communities, and as family members.
Grade Mode: Letter Grading

CMN 567 - Gender, Race, and Class in the Media
Credits: 4
The purpose of this course is to introduce students to contemporary critical scholarship on the construction of gender, race, and class in the media - particularly popular media. Subjects such as the portrayal of ethnic groups, ideal body image, blue collar men, and gay, lesbian, bisexual, and transgender groups are case studies. This course is one that introduces students to performing communication analysis.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 576 - Introduction to Civil Discourse
Credits: 4
From our classrooms to our social media feeds, and our living rooms to our legislature, the vibrancy of our democracy hinges on how we talk about complex public issues, problems, and decisions that impact our communities. Yet these conversations are often difficult and make it tough to work together productively. We will contemplate the question:#How do we talk about issues we are concerned about in ways that encourage more meaningful thinking, community collaboration, and problem-solving?#To answer this question, we examine civil discourse in practice, including the role it plays in our U.S. democracy and civic structure, the civility/un-civility of collective action and protest; the possibilities of public dialogue and deliberation as part of a participatory democracy; and the role of collaborative inquiry in addressing public problems. Using a case study about the first amendment and freedom of expression on U.S. college campuses for critical reflection, we will consider the complex dynamics of our civic landscape, the various mindsets necessary for engaging in civil discourse across these contexts, and the potential for cultivating more productive civil discourse around contentious issues in diverse contexts.#Our primary objective will be to appraise the challenges and opportunities for fostering civil discourse in contemporary democratic discussion and decision-making in politics, organizations, on campus, and in our communities. We also will practice civil discourse, dialogue, deliberation, and collaborative inquiry, and consequently, this course is very discussion-focused and prioritizes partnered and small group work.
Attributes: Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): CMN 585H
Grade Mode: Letter Grading

CMN 580 - Lying, Deception and the Truth
Credits: 4
The ability to lie is a defining feature of the social life of higher order primates and humans. Deceiving, concealing, lying and evading are forms of communication which are a basic part of everyday human life. This course will explore the structure and function of lying, deception and evasion in the course of communication. As we do so we will also explore the nature of truth as it applies to human interaction in the world.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 585H - Honors/Civil Discourse for Complex Problems
Credits: 4
In this course, we will contemplate the question: How do we talk about issues we are concerned about in ways that encourage more meaningful individual and community engagement? Civil discourse is a means of bringing people together to solve public problems. This course engages students in how to build interpersonal connections, cultivate a sense of belonging, increase problem-solving capacity, and foster more productive citizenship in our communities. Through project-based learning, students will become empowered with the professional currency needed to thrive in the 21st century workplace: collaboration and leadership skills, critical thinking, and the ability to frame and solve complex problems. As a class, we will examine civil discourse in practice, including the role it plays in our U.S. civic structure, the civility/uncivility of advocacy, activism, and protest; the possibilities of public dialogue and deliberation as part of a participatory democracy; and the role of collaborative inquiry in addressing public problems. Our primary objective will be to appraise the challenges and opportunities for fostering civil discourse through dialogue and deliberative decision-making in politics, organizations, on campus, and in our communities. In small groups and via facilitated classroom conversations, we will practice civil discourse, dialogue, deliberation, and collaborative inquiry while we contemplate the complex dynamics of our civic landscape and various mindsets necessary for engaging in civil discourse across these contexts. Honors students will work together to ask critical questions about “How should we learn and work with AI in the university context?” and make recommendations to UNH community stakeholders regarding best practices, goals, resources, and recommendations for community-engaged civil discourse interventions.
Attributes: Honors course; Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): CMN 576
Grade Mode: Letter Grading

CMN 588 - Analyzing Institutional Interaction
Credits: 4
Examinations of institutional interactions in emergency services, justice/law, medicine, family school encounters, journalism and politics. Shows how the work of society gets done through interaction. Students get hands-on experience analyzing persons' conduct in these interactions. This course is designed to develop students' analytic skills in studying social interaction in institutions, using recorded data in the form of naturally-occurring interactions in these settings.
Attributes: Inquiry (Discovery)
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 596 - Special Topics in Media Studies
Credits: 4
Selected topics not covered by existing courses in media studies. Topics vary; course descriptions are available in department office during preregistration. May be repeated for credit if topics differ.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 598 - Special Topics in Interpersonal Studies
Credits: 4
Selected topics not covered by existing courses in interpersonal communication. Topics vary; course descriptions are available in department office during registration. May be repeated for credit if topics differ.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

CMN 599 - Internship
Credits: 1-4
Internships are designed to integrate classroom study and supervised practical experience in a work setting. Each student is required to write a series of reports focusing on aspects of the work experience that are related to coursework in the Communications Department. These assignments are designed to enhance a student's ability to reflect critically on the internship experience and to merge theory and practice. Assignments are available, depending on the number of credits granted (1-4). Students are expected to hold the common exam time (TR, 1240-2) open for occasional meetings. Before starting the internship, students must submit a written proposal to both the work supervisor and the faculty sponsor. The proposal should include detailed information on the duties and responsibilities to be undertaken at the internship site and on the goals and learning objectives as relevant to the Communication Department curriculum.
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

CMN 607 - Persuasion in American Politics
Credits: 4
Study of the forms and strategies of persuasive discourse employed by contemporary American political leaders. Analysis of important political addresses of the 20th century, with attention to theoretical and critical issues in political communication and public address. Discussion of the status of rhetoric in modern politics, and the impact of persuasive discourse on campaigns, policy decisions, crisis management, political scandal, and the national identity. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 614 - Gender, Race and Technology
Credits: 4
Why do digital assistants have women's voices? Are highways racist? This course explores the influence of gender and race on communication technologies. Drawing on communication, gender studies, critical race studies, and science and technology studies, this class engages in a social examination of everyday technologies. We examine the historical relationship between gender, race, and technology and understand how design decisions influence the meanings of communication tools. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 620W - Global Media, Culture, and Power
Credits: 4
This past century, communication and transportation technologies connected the world as never before. As people and ideas move with increasing ease, how are traditional notions of culture being challenged worldwide? This course uses theory and examples from politics and popular culture to explore the construction of culture and cultural difference. It examines the political an economic consequences of mediated ideas of culture, including their relationship to race, nationalism, and transnational inequities. Completion of two CMN 500-level courses required prior to taking this course.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of D- or CMN 456 with a minimum grade of D- or CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CMN 622 - Digital Rhetoric
Credits: 4
This course examines how traditional rhetorical theories and methods apply in contemporary digitized environments. It asks whether we can employ, as is, traditional theories and methods, many of which were developed centuries ago, or whether we need to develop new approaches in order to understand persuasion in online contexts. As it explores these issues, this course tackles both rhetorical production and rhetorical analysis. That is, it asks students to both create and analyze digital rhetoric. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 634 - Media and Politics
Credits: 4
The goal of this course is to study the role of the media in American politics, and what media evolution means for future politics. Topics such as political campaigns, media effects, news reporting, framing terrorists, etc. are studied in depth. Timely topics such as "are the media liberal or conservative?" are debated in class. Research projects and papers study questions related to important social issues such as women in the media. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 635 - Contemplative Media Studies
Credits: 4
Contemplative Media Studies involves the application of contemplative practices and principles to the critical analysis of media content, technology, and institutions. It links Media Studies to Contemplative Studies, which integrates empirical social-science research (neuroscience, psychology) to first-person practices like meditation, yoga, and art therapy. Through academic essays and arts-based assignments, students strive to become more mindful digital citizens-creative yet critical, hopeful yet judicious with regard to the current and future course of technical development. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 637 - Controversy and Reasoning in Law
Credits: 4
Uses rhetorical analysis and criticism to evaluate communication practices in courtroom disputes. Compares conventional American litigation to alternative methods. Explains how stages of a trial shape communication options and norms. Illustrates common subjects and forms for judicial reasoning. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 647 - Rhetorical Criticism of Media
Credits: 4
Use of rhetorical approaches and methods in the analysis and criticism of contemporary forms of visual media culture. Students examine the social, political, and aesthetic implications of contemporary media forms from within a framework of rhetorical theory. Emphasis on practical analysis employing various rhetorical approaches with a goal of understanding persuasive elements in contemporary media (including television, film, print & broadcast advertising, internet, and social media). Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 650W - Critical Perspectives on Film
Credits: 4
Advanced, focused study of film theory as cultural practice. Topics vary from year to year and with instructor. May be repeated for different topics. Focus may range from general considerations of film theory, criticism, and history, to specific analyses of selected genres, directors, national cinemas, and periods. Course descriptions available in department office during preregistration. Students are required to have taken two 500 level CMN courses (C-) prior to this course, unless granted instructor permission. May be repeated for credit if topic is different.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 12 credits.
Equivalent(s): CMN 650
Grade Mode: Letter Grading
Special Fee: Yes

CMN 656 - Environmental Communication and Rhetoric
Credits: 4
Working from a rhetorical perspective toward communication as persuasive action, students learn to analyze environmental communication in public spheres. Communication about the environment is examined in visual and popular culture, print and digital news, advertising and marketing, science communication, corporate communication and advertising, and campaigns and movements. Special attention to issues of public engagement, citizen activism, and public advocacy. Students work on a semester long case study in which they analyze, evaluate, and respond to communication about an environmental problem in a local town. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 657W - Media and the Environment
Credits: 4
There are few topics, beyond communication itself, which better reflect our interconnected humanity than "the environment." Mediated environmental messages surround us, whether about expansive issues like climate change or the newest, organic or sustainable product. These mediated messages often come together or diverge around conceptualizations of our environment hinging on risks and uncertainties about the fundamentals of contemporary society. This course will look at the study and practice of the environment and media through a range of concepts, ranging from the "sacrificial landscape" reflected in television shows such as the first season of HBO's True Detective to the "growth machine," as a persistent framework to understanding risk amid the imperative of economic growth in contemporary capitalism.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of D- or CMN 456 with a minimum grade of D- or CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CMN 662 - Public Dialogue and Deliberation
Credits: 4
This course explores the theory behind the practice of public dialogue and deliberation. It considers the distinctions and appropriateness of different types and aims of public participation, and how to best facilitate conversations important in the public sphere. The course anchors civil discourse as vital to democracy. Students will design, organize, and implement a public dialogue on campus, facilitating discussions on a relevant topic serving our community. Students marry practice with deep consideration of issues of equity, diversity, voice, representation, neutrality, and power. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 666 - Conversation Analysis
Credits: 4
Exploration in how participants in interpersonal communication display their orientation to the fundamental orderliness of conversational sequences in everyday, institutional, and mass media settings. Basic concepts covered include the interactional co-construction of turn-taking, repair, overlap, openings, closings, silences, adjacency, pairs, disagreement, preference, and the role of various linguistic, paralinguistic, and nonlinguistic features in the conversation process. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 667 - Popular Music Studies
Credits: 4
This course provides an opportunity to critically examine and study popular music. Popular music represents one of the most significant global cultural industries, transcending borders and economies, especially as technology ushers in new ways to listen, share, produce, and perform music. This course will look at the role of contemporary popular music in providing a mediated form of communication and culture by examining its historical and cultural development. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 670 - From Silicon Valley to Foxconn: Global Digital Capitalism
Credits: 4
From young Internet users in Ghana's Internet cafe to American teenagers to Chinese factory workers assembling iPhones, and Indian coders migrating to Australia, this course exposes you to the multifaceted lived experiences under global digital capitalism while grounding them in the history and theory of capitalism as an uneven world system. The design of this course encourages you to think critically about what's new and not so new about capitalism in its contemporary digital/neoliberal phase. It helps identify the on-going technology-driven social transformations on a global scale. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 675 - Civil Discourse Lab: Public Dialogue, Equity, & Authenticity
Credits: 2
Students will learn the theoretical underpinnings of civil discourse to promote public dialogue on "should questions" by connecting research to social/civic policy and ethics (e.g. What should we do to increase equitable access to sustainable energy for our communities? Or, what should we do to create more ethical leaders in our local communities?) The class will teach students public engagement processes framed through a dialogic ethic that fosters relationships based on honesty, respect, reciprocity, humility, and trust. Students will examine and think together about issues important to a civil society through a public dialogue and deliberation framework. Students that complete both 2-credit courses CMN 675 and CMN 676, may use the courses together to fulfill one (1) writing intensive course requirement.
Grade Mode: Letter Grading

CMN 676 - Civil Discourse Lab: Public Deliberation and Issue Framing
Credits: 2
Students will learn the theoretical underpinnings of civil discourse to promote public deliberation on "should questions" by connecting research to social/civic policy and ethics (e.g. What should we do to increase equitable access to sustainable energy for our communities? Or, what should we do to create more ethical leaders in our local communities?) The class will focus on public deliberation with special emphasis on creating a students' citizen's initiative review impact statement. Students that complete both 2-credit courses CMN 675 and CMN 676, may use the courses together to fulfill one (1) writing intensive course requirement.
Grade Mode: Letter Grading

CMN 685 - Gendered Rhetorics
Credits: 4
This course focuses on exploration of the social, rhetorical, and communicative construction of gender through contemporary contexts. We will examine popular and political discourse and discuss how such discourse structures and disciplines our everyday experiences of sex (male/female) and gender (how society shapes understanding of those categories). Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading
Special Fee: Yes

CMN 696W - Seminar in Media Studies
Credits: 4
Variable topics in media research, theory, and practice. May be repeated for different topics. Topic descriptions available in department office during preregistration. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to 1 time.
Equivalent(s): CMN 696
Grade Mode: Letter Grading

CMN 697 - Seminar in Rhetorical Study
Credits: 4
Variable topics in rhetorical research, theory, and practice. May be repeated for different topics. Topic descriptions available in department office during preregistration. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to 1 time.
Equivalent(s): CMN 697H
Grade Mode: Letter Grading

CMN 698 - Seminar Interpersonal Studies
Credits: 4
Variable topics in interpersonal research, theory, and practice. May be repeated for different topics. Topic descriptions available in department office during preregistration. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to 2 times.
Grade Mode: Letter Grading

CMN 702 - Seminar in Interpersonal Communication Theory
Credits: 4
In-depth concentration on a particular theoretical orientation in interpersonal communication. Original works are read. Theoretical orientation varies by semester. May be repeated for different topics. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

CMN 703 - Seminar in Rhetorical Theory
Credits: 4
Focused study of problems in rhetorical theory construction through examination and criticism of selected theoretical frameworks used to explain or interpret rhetorical phenomena. May be repeated for different topics. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

CMN 719 - Surveillance and Society
Credits: 4
Surveillance is fundamentally concerned with social control. The course tracks the historical development of surveillance, from its origins in embodied experience and record keeping through the rise of computing, social media and big data. This history provides a backdrop against which critical theories of surveillance are introduced, drawing attention to how power is exercised through systems of identification, social classification, visibility, and statistical knowledge. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 735 - Media & Ethics
Credits: 4
This course asks how human beings can flourish (i.e. lead meaningful and purposeful lives) in the context of increasingly complex systems of digital media and information systems. We do so through the lens of virtue ethics, meaning that we place special emphasis on concepts like authenticity, wisdom, courage, and integrity. The course's capstone project asks students to develop a clear and well-informed ethical framework for the mass-mediated aspects of their personal, professional, and civic lives. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 740 - Seminar in Communication Research and Theory
Credits: 4
In-depth concentration on particular theoretical and methodological orientations within communication research. Orientations vary by semester. May be repeated barring duplication of subject. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

CMN 756 - Rhetorics of Display
Credits: 4
This course examines a selection of displays with the goal of acquiring perspective for understanding and evaluating how they engage with people who come into contact with them. Displays examined range among oratory, photographs, advertisements, films, architecture, monuments, and statuary, public demonstrations, and presentations of self. Attention is given to questions about identity and belonging, authenticity and simulation, and public memory. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading
Special Fee: Yes

CMN 762 - Organizational Communication and Society
Credits: 4
This course will demonstrate how communication is key to understanding how organizations work. Through such topics as culture, identity, structure, systems, globalization, and change, the course examines the ways individuals and society are shaped by interactions with the organizations. Through case studies, we examine the way people communicate in organizational contexts, and the social, ethical, and sometimes political implications. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 772 - Seminar in Media Theory
Credits: 4
Detailed analysis of major theories related to the interaction of communication technologies and society. Application to current examples in politics, advertising, and entertainment. May be repeated for a different topic. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C or CMN 456 with a minimum grade of C or CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

CMN 780 - Communication and Sports Coaching
Credits: 4
There is a long-standing literature on what makes for good or bad coaching in sports, but less in what interactional practices are involved in the actual activities of coaching. Here we learn about the processes of Communication used by Coaches and Athletes when in sports settings. The course will explore the basic process of communication underpinning learning in settings of movement and learning. Students will develop a focal project on practices of Communication in Coaching.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

CMN 785 - Communication and Deliberation Across Differences
Credits: 4
This course will focus on the art of rhetoric in a civic context, or how students may engage with the rhetorical tradition to focus on connections among communication, democracy, knowledge, power, and equity. Students will focus on learning the skill of deliberation, or bringing people together in conversation across difference to discover shared values, and to identify key tensions, in order to explore possible solutions to thorny public problems. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C and CMN 456 with a minimum grade of C and CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 788 - Opening Everyday Interaction
Credits: 4
Examination of how everyday human social interactions begin. Provides hands-on experience analyzing verbal and nonverbal social actions during naturally occurring interactions, including telephone conversations and especially face-to-face encounters between previously acquainted and unacquainted persons socializing and/or doing work. Explores how parties use the openings of interactions to (re)-create and maintain social relationships. Encourages students to develop intellectual curiosity about everyday social life. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of C and CMN 456 with a minimum grade of C and CMN 457 with a minimum grade of C.
Grade Mode: Letter Grading

CMN 795 - Independent Study
Credits: 1-4
Advanced individual study in rhetoric, media, or interpersonal communication. Project to be developed with supervising instructor.
Repeat Rule: May be repeated for a maximum of 8 credits.
Equivalent(s): CMN 795W
Grade Mode: Letter Grading

CMN 796 - Comm-Entary Journal
Credits: 1
Serve on the editorial board of student run communication journal. Elective credit which does not count toward the major. Students are required to have taken two 500 level CMN courses (C-) to take this course, unless granted instructor permission.
Prerequisite(s): CMN 455 with a minimum grade of C and CMN 456 with a minimum grade of C and CMN 457 with a minimum grade of C.
Repeat Rule: May be repeated for a maximum of 2 credits.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

CMN 799H - Honors Thesis
Credits: 4
Written thesis based on substantial and original research under the direction of a full-time member of the communication faculty. Thesis must be in the form and style of a publishable, scholarly work. Restricted to seniors seeking honors in major.
Attributes: Honors course
Grade Mode: Letter Grading

Communication (COM) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

COM 440 - Persuasive Communication
Credits: 4
This course provides an in-depth understanding of persuasive principles with the purpose of identifying and critiquing communication strategies encountered on a daily basis. Students are introduced to the theory and practice of persuasive communication with an understanding of how classical modes of rhetoric offer an excellent framework for improving information-age communication skills. Speaking, listening, leading, motivating, negotiating, creating and delivering a message, and engaging with an audience are emphasized as key elements of persuasive communication. Students will be able to recognize the persuasive strategies used in interpersonal and mass communication settings, critique the effectiveness of the strategies used, and develop persuasive strategies for themselves.
Attributes: Writing Intensive Course
Equivalent(s): COMM 540G
Grade Mode: Letter Grading

COM 460 - Interpersonal Communication and Group Dynamics
Credits: 4
Designed to provide both a theoretical and practical introduction to interpersonal communication and group dynamics, this course explores the unique process, purposes, problems and possibilities of communication. Emphasis is placed on participation and awareness of communication behaviors, both in interpersonal settings and in small groups, as portrayed in the generic roles of member, leader, and process observer. The course challenges students to analyze the complex nature of relationships by applying the concepts of collaboration, cohesiveness, group decision-making, conflict resolution, the function of teams, and the role of facilitation. COM 460 students are guided in developing basic interpersonal, intercultural, and group communication skills that they can apply to personal and professional encounters in everyday life.
Attributes: Communication (Gen Ed)
Equivalent(s): COMM 542G
Grade Mode: Letter Grading

COM 465 - Communication Theory
Credits: 2
This course introduces students to the major theories of communication that are foundational to the discipline. Students will conceptualize how theory can be used to describe, analyze, and explain communication issues and events. Attention is also given to the ethical implications of theory in various contexts.
Equivalent(s): COMM 510G
Grade Mode: Letter Grading

COM 480 - Visual Communication
Credits: 4
In contemporary communication, visual information has become the predominant means to convey messages and information. Students will explore and analyze the different ways images can be used to communicate information, concepts, and narratives, as well as to support persuasive arguments in oral presentations. Students will apply what they have learned to two major projects, each designed to communicate a central message to a defined audience. An introduction to copyright, Fair Use, and Creative Commons is included.
Attributes: Communication (Gen Ed)
Equivalent(s): COMM 543G
Grade Mode: Letter Grading

COM 504 - Web Development I
Credits: 4
This course is an introduction to multimedia design with an emphasis on website creation. Students gain an understanding of the terminology, development tools, and fundamental skills related to designing a successful website. Current software applications are learned as appropriate to the process.
Equivalent(s): COMM 504G
Grade Mode: Letter Grading

COM 535 - Visual Media Production
Credits: 4
This course focuses on how to create visual narratives through digital media. Course projects and use of visual media production software provide an opportunity to carefully execute each step of the production process, to include: conceptualizing, outlining, writing script for voiceover, creating the storyboard, recording, editing, and sharing. Attention to copyright, attribution, and other ethical considerations are also addressed. Recommended: COM 480 Visual Communication.
Equivalent(s): COMM 505G
Grade Mode: Letter Grading

COM 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Communication. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): COMM 544G
Grade Mode: Letter Grading

COM 545 - Digital Illustration
Credits: 4
This course introduces Adobe Photoshop and Illustrator. Course assignments focus on creating and preparing raster and vector-based images for print and web. Students will have the opportunity to attain basic proficiency with both software programs while applying knowledge and skill to a variety of projects. Concepts such as photo manipulation, use of digital illustration in layout, basic animation, storage and file management, and copyright and ethical issues are addressed.
Prerequisite(s): ART 512 with a minimum grade of D- or ARTS 512G with a minimum grade of D-.
Equivalent(s): COMM 545G
Grade Mode: Letter Grading

COM 560 - Intercultural Communication
Credits: 2
Effective intercultural communication skills are important in a multicultural society, particularly for those individuals working in positions that require effective interactions with people from diverse cultures. This course is a study of cross-cultural contacts and will include analysis of verbal and nonverbal communication and related factors within and between various cultures, predictions of patterns and effects, and communication barriers. The course provides opportunities for students to develop both an appreciation for cultural differences and effective intercultural communication skills.
Equivalent(s): COMM 560G
Grade Mode: Letter Grading

COM 562 - Gender and Communication
Credits: 2
In this course, students examine multiple influences that have shaped definitions of masculinity and femininity over time. Students explore the impact of these definitions on "appropriate" prescriptions for verbal and nonverbal communication, and on interactions in personal and professional contexts. Through the analysis and critique of the effects of gender on communication in diverse relationships (family, friendships, romantic, professional) and in diverse contexts (personal and professional spheres), as well as how gender is depicted in the media, students recognize the profound impact that gender has upon our lives.
Equivalent(s): COMM 562G
Grade Mode: Letter Grading

COM 590 - Professional Communication
Credits: 4
This course prepares students to navigate the complexity of professional communication in the 21st-century workplace, with a particular emphasis upon refining the writing skills that are essential to clear, concise, and professional communication. The types of professional writing addressed may include: proposals, emails, newsletters, presentations, and agendas, among others. Emphasis is also placed upon how to discern which channel--written, verbal, or digital--is most appropriate relative to context, purpose, and audience.
Attributes: Writing Intensive Course
Prerequisite(s): (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-) and (COM 460 with a minimum grade of D- or COMM 542G with a minimum grade of D-) or (Has Accred Associate Deg with a score of WAIV or Has Accred Bachelor Deg with a score of WAIV).
Equivalent(s): COMM 605G
Grade Mode: Letter Grading

COM 595 - Writing for Voiceover
Credits: 2
Writing and performing voiceover audio is a specialty skill all media producers will be called upon to develop. A well-written script for voiceover will enable the audience to clearly understand messages and meaning according to the producer's goal. This course introduces students to the foundational principles of writing voiceover copy and provides opportunities to refine voiceover performances to engage the audience and establish credibility. Through a workshop format, students will create original works and performances as well as adapt and refine works written by others.
Equivalent(s): COMM 648G
Grade Mode: Letter Grading

COM 644 - Special Topics: Upper Level
Credits: 1-4
The study of current and variable topics in Communication. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject area.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): COMM 644G
Grade Mode: Letter Grading

COM 645 - Advanced Digital Illustration
Credits: 4
This course builds upon COM 545 Digital Illustration by challenging students to advance their skills in Adobe Photoshop and Illustrator. Course projects entail combining vector and raster images, advanced image manipulation, and utilizing web graphics, print images, and interactive motion graphics for web and video. Effective application of design elements and principles in concept generation will be emphasized. Through peer review, instructor feedback, and reflection, students explore each phase of the design process in depth. Strategies for assembling a digital portfolio are also explored.
Prerequisite(s): COM 545 with a minimum grade of D- or COMM 545G with a minimum grade of D-.
Equivalent(s): COMM 645G
Grade Mode: Letter Grading

COM 647 - Writing for Visual Media
Credits: 4
By emphasizing the interplay between text and image in the production of meaning, this course introduces students to the unique attributes of writing for visual media. In a workshop format, students will refine skills in areas such as blogging, copy writing, landing pages, social media, and public relations. The course surveys various stages in the writing process, to include concept, drafting, integrating stakeholder feedback, and revision, in order to produce a final product.
Attributes: Writing Intensive Course
Equivalent(s): COMM 547G
Grade Mode: Letter Grading

COM 660W - Leveraging AI in Workplace Communication
Credits: 4
This course focuses on developing effective workplace communication skills across professional contexts such as reports, presentations, emails, memos, and social media posts. Students will evaluate strategies for promoting clarity, efficiency, and audience engagement, and design communication approaches tailored to specific organizational scenarios. Building on these foundations, the course explores how artificial intelligence (AI) tools—such as chatbots, virtual assistants, sentiment analysis, and content generation—can be applied to enhance, but not replace, core communication practices. Students will also analyze the ethical, professional, and organizational implications of AI in workplace communication, critically evaluating its impact on collaboration, adaptability, and overall effectiveness.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

COM 665 - Media and Strategic Communication
Credits: 4
This course explores the use of media in strategic communication toward the attainment of organizational objectives. Students will explore the impact of public relations, media outreach, marketing, branding, and leadership communication on both internal and external audiences in a variety of settings and sectors. The role and purpose of the organizational spokesperson, the function of the leader as the chief communicator, the strategic alignment of message and messenger, and effective use of technology in business communications will be discussed. This course provides knowledge of opportunities and pitfalls of the media environment, particularly in the digital, 24-hour news cycle age.
Attributes: Writing Intensive Course
Prerequisite(s): COM 590 with a minimum grade of D-.
Equivalent(s): COMM 602G
Grade Mode: Letter Grading

COM 670 - Advanced Visual Communication
Credits: 4
This course builds upon the foundation in analyzing and curating visual media established in COM 480 by focusing on how to compose, design, and deliver presentations using industry standard software (such as Microsoft PowerPoint) and web-based tools (such as Zoom, Screencast-o-matic and Prezi), among others. Equal time is devoted to each of the three stages of producing effective presentations- writing, technological design, and delivery-all of which contribute to achieving the intended purpose.
Prerequisite(s): COM 480 with a minimum grade of D- or COMM 543G with a minimum grade of D- or Has Accred Associate Deg with a score of WAIV or Has Accred Bachelor Deg with a score of WAIV.
Equivalent(s): COMM 615G
Grade Mode: Letter Grading

COM 675 - Organizational Communication
Credits: 4
Organizations are a fundamental component of human life: from schools, to workplaces, as well as volunteer and recreational groups, we all function within in organizations. This course examines the multi-level communication that occurs within organizations - among leaders, members, committees, teams, and departments - as vital to its success and longevity. Students analyze how organizations rely upon effective communication to anticipate and mitigate conflict. Students also devise strategies to utilize various forms of communication to contribute uniquely and meaningfully to organizations.
Attributes: Writing Intensive Course
Equivalent(s): COMM 620G
Grade Mode: Letter Grading

COM 680 - Trends in Digital and Social Media
Credits: 4
This course provides an opportunity for students to explore key technical, ethical, and experiential elements in contemporary digital and social media and integrate them into a project-based solution of the student's choosing. Topics are drawn from immediate trends and are interrogated for their effects on individuals, communities, society, and the world. Students also select a topic of their own for further study.
Attributes: Writing Intensive Course
Equivalent(s): COMM 601G
Grade Mode: Letter Grading

COM 685 - Web Development II
Credits: 4
Building on skills learned in Web Development I, students continue to gain an understanding of the terminology, development tools, and fundamental skills related to designing a successful website. Current software applications are learned as appropriate to the process.
Prerequisite(s): COM 504 with a minimum grade of D- or COMM 504G with a minimum grade of D-.
Equivalent(s): COMM 604G
Grade Mode: Letter Grading

COM 707 - Communication for Training and Performance Improvement
Credits: 2
The ability to write, design, speak, and record media for the purpose of training instruction draws upon specialized communication skills and knowledge of a systematic creative process. This course prepares students to contribute meaningfully to teams and organizations by introducing them to the foundational principles of instructional design as a form of communication, and then facilitates practice in the technical skills to produce media for the purpose of addressing a training or performance improvement need.
Prerequisite(s): COM 535 with a minimum grade of D- or COMM 505G with a minimum grade of D-.
Equivalent(s): COMM 607G
Grade Mode: Letter Grading

COM 710 - Managerial Communication
Credits: 4
Managerial roles increasingly emphasize negotiation, coaching, collaboration, and consensus building. Situational analysis and planning are key attributes of effective managerial communication. As such, this course develops and sharpens students' decision-making, team-building, and analytical problem-solving abilities. The course also embraces peer and instructor feedback as tools to refine students' impromptu and formal presentation skills in managerial contexts.
Attributes: Writing Intensive Course
Prerequisite(s): COM 590 with a minimum grade of D- or COMM 605G with a minimum grade of D-.
Equivalent(s): COMM 610G
Grade Mode: Letter Grading

COM 743 - Synthetic Media and the Construction of Reality
Credits: 4
In the past 25 years, electronic media, mobile devices, and algorithmically optimized information networks have intensified how humans have engaged with mediated information. This course examines the collateral effects of this phenomenon on our habits, norms, beliefs, and cognitive processing. Students will study the historical, political, and theoretical narrative that has led to questions about the construction of social worlds, the construct of reality, and the legitimacy of information. A special focus will be made in studying the implications of synthetic deepfake and AI-driven text generating systems in accelerating these effects.
Equivalent(s): COMM 643G
Grade Mode: Letter Grading

COM 765W - Strategic Communication
Credits: 4
In contrast to Organizational Communication, the study of Strategic Communication focuses on how organizations communicate with their external publics, to include vendors, clients, and shareholders, among others. This course surveys public relations, insofar as it explores how an organization crafts, maintains, and redefines its image, in times of success as well as crisis. Students practice producing reliable strategic writing in the form of press releases, newsletters, and brochures, with particular emphasis upon skills in instant response, clarifying and simplifying complex information, as well as considerations of privacy, ethics, and legality.
Attributes: Writing Intensive Course
Prerequisite(s): COM 675 with a minimum grade of D-.
Equivalent(s): COM 565, COMM 565G
Grade Mode: Letter Grading

COM 797 - Integrative Capstone: Project in Professional Communication
Credits: 4
This capstone course for the Professional Communication major builds on previous study in the field and provides an opportunity to apply learning in an in-depth project. Projects must employ applied research, demonstrate knowledge of communication theory, and integrate reflection on cultural and/or organizational dimensions of communication. Students synthesize their knowledge of theory and practice to develop and implement a project in their own area of professional interest. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): COMM 650G
Grade Mode: Letter Grading

COM 798 - Integrative Capstone: Project in Digital Communication Design
Credits: 4
The Capstone course for the Digital Communication Design major enables the student to apply what they have learned throughout their academic career within a project of their choosing. Students will propose, design, develop, and report on a project that touches upon each of the Programmatic Outcomes for their major and concentration to demonstrate their knowledge and proficiency. Students will work in partnership with faculty to create a project that meets the requirements, output, and format of Capstone-level research. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): COMM 651G
Grade Mode: Letter Grading

Communication Arts (CA)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CA 450 - Introduction to Public Speaking
Credits: 4
Theories of rhetoric applied to the practice of speech composition, oral performance, and critical evaluation. Focus on student speeches for a variety of situations and audiences. Not for credit if credit earned for CMN 500.
Equivalent(s): CMN 403, CMN 500
Grade Mode: Letter Grading

CA 500 - Media Writing
Credits: 4
An introduction to business, creative and freelance writing for a variety of media. Writing, editing and rewriting in areas such as video scripts, short magazine articles, audio scripts, ads, press releases, news, short one-act plays, blogs and more.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 501 - Internship/Communication in the Urban Community
Credits: 1-4
Field-based learning experiences. Connects students to the urban community and integrates their classroom education within a business or organizational setting. Students work under the direction of a faculty advisor and workplace supervisor to fulfill the obligations of the workplace internship plan and to complete individually-designed academic projects. Projects must be approved in advance by the faculty advisor. Open to matriculated students with a GPA of 2.50 or better and junior standing. Permission of instructor required. May be repeated, with 4 credits maximum accepted toward satisfaction of requirements for the CA major.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

CA 502 - Image and Sound
Credits: 4
Image and Sound is a foundation course in the aesthetics of motion picture and sound production. This course explores the aesthetic principles that are used to communicate stories, emotions and messages in popular media. Students will study film, television and new media and survey production methods. This is not a production course per se, but is particularly helpful to students interested in video and film production. No credit for students who have completed CA 444.
Attributes: FinePerformingArts(Discovery)
Equivalent(s): CA 444
Grade Mode: Letter Grading

CA 507 - Relational Violence
Credits: 4
This course explores relational violence and its impact on individuals, families, and communities. Topics include relational violence as a continuum, types of relational violence (domestic, gangs, hate crimes), causes of relational violence, PTSD, responding to relational violence, silencing, compassion fatigue, and restorative justice.
Prerequisite(s): CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 508 - Conflict in Relational Communication
Credits: 4
Introduces communication theories relevant to the study of conflict interaction in interpersonal relationships. Considers interpersonal concerns contributing to conflict such as power, face-saving, and goals. Examines behaviors that affect our ability to resolve conflict, and strategies, such as mediation, to resolve conflict. Develops the ability to diagnose productive and destructive conflict patterns in relationships. The course is both theoretical and practical in orientation. A combination of lecture, discussion, case studies, and in-class group assignments are employed.
Prerequisite(s): CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 512 - Screenwriting
Credits: 4
Examines the preproduction phase of moving image media, focusing especially on the art and business of writing for the screen. Covers the process of developing student work from original story idea to completed, first draft screenplay. Topics include script formats, narrative structure, plot development, characterization, style, and marketing strategies. Cannot receive credit if credit received for CA 512 Scriptwriting.
Attributes: Writing Intensive Course
Prerequisite(s): ENGL 401 with a minimum grade of D- and (CMN 455 with a minimum grade of D- or CMN 456 with a minimum grade of D-).
Grade Mode: Letter Grading

CA 514 - Fundamentals of Video Production
Credits: 4
Beginning electronic field production using digital video and nonlinear editing formats. Covers basic aesthetic principles and practices of video communication. Introduces techniques for effective image and sound recording in the field, fundamentals of shot and sequence construction, and basic postproduction practices on nonlinear editing systems. Preference given to CA majors.
Prerequisite(s): ENGL 401 with a minimum grade of D- and (CA 502 with a minimum grade of D- or CA 444 with a minimum grade of D-) and CMN 455 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 515 - Advanced Video Production
Credits: 4
Advanced electronic field production and post production using digital video and nonlinear editing formats. Emphasizes original student work of increasing conceptual, formal, and technical complexity that begins to incorporate a wider range of images, sounds, and editing techniques. Preference given to CA majors. May be repeated with permission.
Prerequisite(s): CA 514 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

CA 517 - Fundamentals of Audio Prod
Credits: 4
This course provides students with an introduction to the history, principles, and techniques of audio production. Through hands-on experience, class projects, and homework assignments, student learn how to use voice, music, writing, sound effects, and audio hardware and software to design sound and tell a story. This class will also look at the radio industry and how sound design is being used by a variety of industries.
Grade Mode: Letter Grading

CA 520 - Special Topics in Applied Communication
Credits: 1-4
New or specialized topics in applied communication not covered in regular course offerings. Topics vary; descriptions listing course content and any prerequisites are available during preregistration. May be repeated for credit if topics differ. Prerequisite requirements are contingent on topic.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

CA 522 - Graphic Design I
Credits: 4
Presents fundamentals of Graphic Design while touching on foundation art theories and vocabulary. Through examination and analysis of professional graphic design, students become familiar with the relationship between graphic design process, creative solutions and critical thinking. Students work with a variety of traditional and digital media, with an emphasis on the process of design, composition and typography. Class includes a significant amount of computer lab and creative studio time.
Grade Mode: Letter Grading

CA 523 - Graphic Design II
Credits: 4
Students explore the creative process that helps them communicate ideas and information to a target audience. Higher level, theoretical ideas related to communication, design and cognitive theories will be introduced. Students will engage in intermediate design projects through software and traditional media. Class includes a significant amount of computer lab and creative studio time.
Prerequisite(s): CA 522 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 527 - History of Film
Credits: 4
Historical analysis of the development of film in the U.S. and abroad from the end of World War II and the rise of TV to today's era of video streaming and digital cinema. Covers topics such as film and the cold war, the decline of the Hollywood studio system, major international stylistic movements, independent cinema, film distribution and exhibition trends, the impact of new technologies, globalization, and economic consolidation, among others.
Attributes: Historical Perspectives(Disc)
Grade Mode: Letter Grading

CA 531 - History and Organization of Advertising
Credits: 4
Examines the development of advertising in historical context, focusing on the evolving structure and function of advertising agencies, market research practices, advertising design, anthropological approaches to advertising and consumer culture, and contemporary policy issues.
Prerequisite(s): CMN 455 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 532 - Typography I
Credits: 4
Typography is the formal study of letterforms. Students gain perspective into this important field by starting with a focus on early visual communication, symbols, handwritten letterforms, calligraphy and the development of movable type. Students explore ways to categorize type into families and identify and define similarities and subtle differences in classical typefaces. Class discussions, projects, critiques and lectures focus of typography terminology, as well as the aesthetic discipline of using type effectively as designer.
Grade Mode: Letter Grading

CA 536 - LGBT Images and Perspectives
Credits: 4
This course explores the perspectives and images of lesbian, gay, bisexual, trans, and queer individuals, from antiquity through modern day. Topics include: history, aging, religion, the media, and the law.
Prerequisite(s): CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 538 - Gender
Credits: 4
How gender is created, maintained, repaired, and transformed through communication in particular historical, cultural, and relational contexts. Examines a variety of topics including the relationship between sex and gender, language, cultural mythologies, identity, health care, sexuality, and strategies for resisting conventional gender definitions. May not be taken for credit if student has already taken CA 506: Gender.
Prerequisite(s): CMN 457 with a minimum grade of D-.
Equivalent(s): CA 506
Grade Mode: Letter Grading

CA 539 - Communicating in Families
Credits: 4
Explores the role of communication in the creation, maintenance, and transformation of family systems. Focus on how meanings of "family" are constructed through familial and popular discourses, and the consequences these communication practices have for lived experience.
Prerequisite(s): CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 540 - Public Relations
Credits: 4
This course provides students with an overview of the field of public relations, including its history, ethics, and current practices. Will include case studies of major public relations issues that have occurred both historically and in recent years; individual and class projects that enable students to determine how best to plan for and respond to public relations issues; and quest practitioners who work in various fields, including business, government, the non-profit sector, and education.
Prerequisite(s): CMN 456 with a minimum grade of D- or CMN 455 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 542 - Social Media for Organizations and Business
Credits: 4
Focuses on the history, development and practical use of social media for organizational and business communications. A primary focus is on the latest social media tools and their use in developing social media campaigns. Hands-on student work is an important part of the course. Cannot receive credit if earned for CA 520 Social Media for Organizations and Business.
Prerequisite(s): ENGL 401 with a minimum grade of D- and (CMN 455 with a minimum grade of D- or CA 500 with a minimum grade of D-).
Grade Mode: Letter Grading

CA 550 - Special Topics in Communication Organization, History, and Policy
Credits: 1-4
New or specialized topics in the organization, history, and policy of communication practices not covered in regular course offerings. Topics vary; descriptions of course content and any prerequisites are available during preregistration. May be repeated if topics differ.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

CA 610 - Communication Technologies and Culture
Credits: 4
The role of communication technologies in shaping cultural meanings and human consciousness. Covers the work of Innis, McLuhan, Ong, Postman, Carey and others to understand the historical development of shifting communication technologies and patterns of culture from orality to computer communication. Also explores the dynamic between mass culture and sub-cultural appropriations of media forms and content. Students must complete two 500 level CA courses (excluding CA 501), at least one of which has CMN 455 as a prerequisite, prior to taking this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 612 - Narrative
Credits: 4
Considers the ways humans make sense of experience through the stories we construct within particular relational, cultural, and historical contexts. Explores a variety of topics including narrative conventions, canonical stories, subjectivity and reflexivity, the relationship between story and audience, space and time, memory and imagination, and narrative truth. Each student will conduct an original narrative research project. Students must complete two 500 level CA courses (excluding CA 501) prior to taking this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 457 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 615 - Film History/Theory and Method
Credits: 4
Intensive study of philosophical, rhetorical, and methodological issues in film history research. Examines a series of selected historical problems in the areas of social, aesthetic, industrial, and technological film history up to 1948 and reviews existing historiography on these problems. Focus is on original student research. Students must complete two 500 level CA courses (excluding CA 501), at least one of which has CMN 455 as a prerequisite, prior to taking this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 618 - Documentary
Credits: 4
Exploration of the historical development, ethics, funding, socio-cultural significance, and communication strategies of documentary film and video. May focus on a particular genre or genres. Students must complete two 500 level CA courses (excluding CA 501), at least one of which has CMN 455 as a prerequisite, prior to taking this course, unless granted instructor permission.
Attributes: Writing Intensive Course
Prerequisite(s): CMN 455 with a minimum grade of D-.
Grade Mode: Letter Grading

CA 720 - Seminar
Credits: 4
Intensive readings and research course in a highly focused area of study. Topics vary. Descriptions of course content and any prerequisites are available during preregistration. May be repeated if topics differ.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

CA 795 - Independent Study
Credits: 1-4
Advanced individual study under the direction of a faculty member. Content area and research project to be developed in consultation with faculty supervisor. May be repeated, with 4 credits maximum accepted toward satisfaction of requirements for the CA major.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Communication Sciences & Disorders (COMM)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

COMM 420 - Survey of Communication Disorders
Credits: 4
This course provides an introduction of Communication Sciences and Disorders (CSD) as it relates to the CSD undergraduate major and the professions of Speech-Language Pathology and Audiology. Students will learn about foundational knowledge of the speech and hearing mechanism, language development, normal communication processes, diagnoses, and treatment across different communication disorders and lifespans. Given the importance of communication, the course information can be applied to various human service careers.
Equivalent(s): COMM 520
Grade Mode: Letter Grading

COMM 504 - Basic Audiology
Credits: 4
This course provides an overview of the profession and practice of Audiology. Students will learn about the causes of hearing loss and the diagnostic process. The anatomy and physiology of the auditory system will be reviewed. The physical properties of sound will be studied, particularly as these relate to hearing loss.
Prerequisite(s): COMM 521 with a minimum grade of C and COMM 636 with a minimum grade of C.
Equivalent(s): COMM 704
Grade Mode: Letter Grading

COMM 521 - Anatomy and Physiology of the Speech and Hearing Mechanisms
Credits: 4
This course provides the fundamentals of anatomy, physiology, neurology, and function of the mechanisms associated with speech, language, swallowing, and hearing. Multi-media platforms, class and group discussions, and problem-based learning will be utilized. Students will gain the essential foundation and knowledge for assessment, treatment, and management related to communication and swallow disorders.
Prerequisite(s): BMS 507 with a minimum grade of D-.
Grade Mode: Letter Grading

COMM 522 - Language Acquisition
Credits: 4
This course is an introduction to typical language acquisition. The progression of language development is examined within a linguistic framework, phonology, morphology, syntax, semantics, and pragmatics. Theories of language acquisition overviewed.
Prerequisite(s): COMM 524 with a minimum grade of C and (LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-).
Grade Mode: Letter Grading

COMM 524 - Clinical Phonetics
Credits: 4
This course focuses on the application of the International Phonetic Alphabet to describe adult, child, and disordered speech production. Students will learn to use broad and narrow transcriptions of speech. Information on basic speech science, acoustic and articulatory phonetics, and acoustic analysis of speech production will be provided.
Prerequisite(s): LING 405 with a minimum grade of D- or ENGL 405 with a minimum grade of D-.
Grade Mode: Letter Grading

COMM 636 - Speech and Hearing Science
Credits: 4
This course provides the student with information on the understanding and application of waveform analysis (acoustic and aerodynamic), basic processing of auditory information, and physiological and cultural bases of hearing and speech production/perception.
Prerequisite(s): COMM 521 with a minimum grade of C.
Grade Mode: Letter Grading

COMM 705 - Introduction to Aural Rehabilitation
Credits: 4
This course provides an overview of auditory perception and the re(h)abilitive process for individuals with hearing loss and auditory disorders. The principles of intervention, communication options, and vocational/educational resources will be studied. Students will learn about amplification systems and other technology used to improve audition, including hearing aids and cochlear implants.
Prerequisite(s): COMM 504 with a minimum grade of D-.
Grade Mode: Letter Grading

COMM 707 - Language Science
Credits: 4
This course explores the cognitive and psychological processes involved in understanding and producing language, with applications to communication sciences and disorders. Students examine how individuals access and comprehend words, construct and interpret sentences, manage ambiguity, and use linguistic and extralinguistic context to derive meaning in real time. The course also investigates the influence of identity, dialect, and communication setting on language processing and language use. Through readings, discussion, and analysis of experimental research, students gain insight into how language processing reveals the workings of the human mind and informs both language science and clinical practice. Clinical translation is integrated throughout, consistent with ASHA Standards.
Prerequisite(s): LING 405 with a minimum grade of D- and PSYC 401 with a minimum grade of D-.
Grade Mode: Letter Grading

COMM 723 - Observation Skills in Speech-Language Pathology
Credits: 2
This course is designed to provide opportunities to observe clients with communication disorders. Observations will include both assessment and intervention techniques. Students successfully completing this course will accrue observation hours that can be applied to the requirement for graduate studies.
Co-requisite: COMM 741
Prerequisite(s): COMM 522 with a minimum grade of D- and COMM 524 with a minimum grade of D-.
Grade Mode: Credit/Fail Grading

COMM 724 - Senior Capstone
Credits: 4
This course is designed to provide undergraduate students with a culminating learning experience in their Senior year. The course focuses on ethical principles in healthcare, understanding how bias and noise can lead to errors in decision making, and learning to write peer review critiques of articles in CSD. The class will explore how to identify sources of error, how to measure them, and how to reduce them through systematic audits of noise and bias, using case studies and examples from CSD (both audiology and speech-language pathology). This information is intended to provide you with. The course is designed to provide foundational information to prepare students for a career as an Audiologist or a Speech-Language Pathologist, graduate school, or other healthcare related activities. Students completing this course will satisfy the writing intensive within major requirement.
Attributes: Writing Intensive Course
Prerequisite(s): COMM 420 with a minimum grade of C and COMM 522 with a minimum grade of C and (COMM 504 with a minimum grade of C or COMM 604 with a minimum grade of C).
Equivalent(s): COMM 635
Grade Mode: Letter Grading

COMM 740 - Treatment of Adults with Acquired Brain Injury
Credits: 1-4
This course provides a "hands-on" interdisciplinary experience. Students will acquire clinical skills and professional competence in a community-based day program. This experience includes assisting adults with acquired brain injury to meet their physical, emotional, cognitive-linguistic, social, spiritual, recreational, and vocational needs.
Grade Mode: Letter Grading

COMM 741 - Pediatric Speech and Language Disorders: Foundations in Clinical Decision-Making
Credits: 4
This course provides foundational knowledge related to pediatric speech and language disorders, as well as exposure to principles of assessment and treatment in these populations. Students extend their knowledge of language development in the areas of morphology, syntax, semantics, and pragmatics as well as their knowledge of how the speech mechanism works, to learn about communication breakdowns that may occur during childhood.
Prerequisite(s): COMM 522 with a minimum grade of D- and COMM 524 with a minimum grade of D-.
Equivalent(s): COMM 631, COMM 731
Grade Mode: Letter Grading

COMM 742 - Neurological Foundations of Communication Disorders Across the Lifespan
Credits: 4
This course provides the neurologic bases for understanding the communication disorders from birth to geriatrics, with an emphasis on motor, linguistic, and cognitive communication disorders. Introduction to common approaches to treatment for these disorders is also provided.
Prerequisite(s): COMM 504 with a minimum grade of C and COMM 521 with a minimum grade of D- and COMM 636 with a minimum grade of D- and KIN 706 with a minimum grade of D- and KIN 707 with a minimum grade of D-.
Equivalent(s): COMM 630
Grade Mode: Letter Grading

COMM 744 - Seminar in Advanced Child Language Acquisition
Credits: 3
Young infants and children are in a process of continual learning. This course takes an advanced and interactive approach to understanding child language acquisition, exploring specific aspects of early language development as well as the interaction of different developmental processes. We will delve deeper into how language acquisition interacts with cognitive development, prosodic development and assessment, multilingual and multicultural populations, and populations that are developing along a different path.
Prerequisite(s): COMM 522 with a minimum grade of D-.
Equivalent(s): COMM 844
Grade Mode: Letter Grading

COMM 795 - Independent Study
Credits: 1-8
Individual or group projects involving directed study of an area of communication sciences and disorders that students wish to explore in greater depth than is covered in the required curriculum.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

COMM 798 - Special Topics
Credits: 1-4
New or specialized topics not covered in regular course offerings. Special fee on some topics.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading
Special Fee: Yes

COMM 799 - Honors Thesis
Credits: 1-4
The purpose of this course is to complete a capstone project in the communication sciences and disorders, culminating students' experiences that introduce them to the research process in CSD.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

Community & Environmental Planning (CEP)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CEP 415 - Community Development Perspectives
Credits: 4
This course introduces students to a range of community development and environmental issues facing communities as they undergo social, economic, and environmental change. Through class discussion and examination of case studies, the course describes basic principles and processes of community development, planning and policy formulation. Community and environmental topics covered in the course include affordable housing, rural development, economic development, local food systems, community health care, neighborhood revitalization, community infrastructure, disaster recovery, environmental stewardship, resilience and climate change, civic engagement and social capital.
Attributes: Social Science (Discovery)
Grade Mode: Letter Grading

CEP 508 - Applied Community Development
Credits: 4
Students work in small teams with an actual public or nonprofit organization on a community development topic of interest to that organization. Students assist the organization to identify community development policy needs and problems, assess requirements and resources, and analyze pertinent primary and secondary economic, social, political, and physical data on the organization's community development topic. Based on this analysis, students make recommendations to the organization for new or improved community policies, programs or processes.
Prerequisite(s): CEP 415 with a minimum grade of D- or CEP 672 with a minimum grade of D- or TOUR 510 with a minimum grade of D-.
Grade Mode: Letter Grading

CEP 614 - Fundamentals of Planning
Credits: 4
This course introduces the community planning process in non-metropolitan and metropolitan communities through the practical application of planning techniques. The course covers key planning topics such as data gathering and analysis, the comprehensive plan, zoning regulations, urban, suburban and rural design, and citizen participation. The course also covers community planning components such as: housing, jobs and economic development, neighborhoods, recreation, transportation and community infrastructure, environment and sustainability, and the administrative structure for planning.
Attributes: Writing Intensive Course
Prerequisite(s): (EREC 411 with a minimum grade of D- or NR 411 with a minimum grade of D- or ECON 402 with a minimum grade of D-) and CEP 415 with a minimum grade of D-.
Grade Mode: Letter Grading

CEP 627 - Community Economics
Credits: 4
Economic factors affecting community and local government decisions. Emphasizes use of economic theory for decision making and community problem solving.
Prerequisite(s): EREC 411 with a minimum grade of D- or NR 411 with a minimum grade of D-.
Equivalent(s): CD 627, EREC 627, RECO 627
Grade Mode: Letter Grading

CEP 672 - Fundamentals of Real Estate
Credits: 4
This course covers timely subjects in National and regional real estate, such as types of property ownership, easements, financing, contracts, appraisal, brokerage, property listings, commissions, fair housing, and property management. The goal of this class is to prepare students to pass the New Hampshire Real Estate Sales Agent License Exam and/or be knowledgeable real estate investors.
Grade Mode: Letter Grading

CEP 673 - Green Real Estate
Credits: 4
This class covers issues related to existing and new real estate development with respect to history, law (state statutes and federal legislation), economics, and technology. The course looks at impacts of green development from an individual building level, and out to regional and global levels. We look at common problems and solutions, review case studies, and discuss emerging trends in "green development."
Grade Mode: Letter Grading

CEP 777 - Topics in Community Planning
Credits: 4
This capstone course focuses on advanced treatment of the concepts and tools required for effective local and regional planning and community development. Students select a community and environmental planning or development topic of their choice to focus on throughout the semester. The student gathers, evaluates and writes about information related to their chosen topic and assesses and makes recommendations for effective planning and policy approaches. At the conclusion of this course, the student has built substantive expertise in their chosen topic area, as well as local information collection, planning and community policy implementation processes.
Attributes: Writing Intensive Course
Prerequisite(s): CEP 614 with a minimum grade of D-.
Grade Mode: Letter Grading

CEP 794 - Community and Environmental Planning Internship
Credits: 4-12
Fieldwork in a planning office for student's professional development. Student must be supervised by a qualified planner or faculty-approved supervisor throughout the internship and remain in consultation with a faculty advisor. A Memorandum of Understanding between the student, the internship supervisor, and the faculty advisor, as well as midterm and final written reports are required. May be taken for 4 credits with 150 hours of internship up to a maximum of 12 credits for 450 hours of internship.
Repeat Rule: May be repeated for a maximum of 12 credits.
Equivalent(s): CD 794
Grade Mode: Credit/Fail Grading

CEP 795 - Investigations
Credits: 2-4
Special assignments in readings, investigations, or field problems, or teaching experience. May be repeated.
Equivalent(s): CD 795, CD 795W, CEP 795W
Grade Mode: Letter Grading

Community Leadership (CSL)

No courses are currently active in the course inventory for this subject prefix.

Computer Science (CS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CS 400 - Introduction to Computing
Credits: 2
Introduces students to the available computing-related majors and a variety of topics foundational to success in computing-related fields. Coverage includes ethics, skills, and knowledge applicable to a broad range of computing disciplines.
Grade Mode: Letter Grading

CS 408 - Living in a Networked World: The Good, the Bad, and the Ugly
Credits: 4
The objective of this course is to explore the implications of living in a networked world. The course surveys the fundamental technologies and practices that make up the Internet and then ask the student to examine the ramifications of using the technologies. Users of the technologies should understand the technology in order to make educated decisions about how to use it safely and effectively. Students have the opportunity to self-publish by using various current technologies including blogs, discussion boards, email and creating web pages using xhtml.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

CS 410C - Introduction to Scientific Programming/C
Credits: 0 or 4
Introduces the concepts and techniques of computer programming. Particular emphasis on computer programming as a problem-solving technique in science and engineering applications. Good programming style is stressed. Significant out-of-class programming required.
Equivalent(s): CS 410P, CS 415
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

CS 410P - Introduction to Scientific Programming/Python
Credits: 0 or 4
Introduces the concepts and techniques of computer programming. Particular emphasis on computer programming as a problem-solving technique in science and engineering applications. Good programming style is stressed. Significant out-of-class programming required. Not open to students who have completed CS 415 or the equivalent.
Equivalent(s): CS 410C, CS 415
Grade Mode: Letter Grading

CS 415 - Introduction to Computer Science I
Credits: 0 or 4
Theory and practice of computer science. Algorithm development and analysis; data abstraction techniques; elementary data structures; dynamic memory manipulation; debugging; and program design issues. Computer systems and applications. Intended for CS majors.
Equivalent(s): CS 410C, CS 410P
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

CS 416 - Introduction to Computer Science II
Credits: 0 or 4
Theory and practice of computer science. Algorithm development and analysis; data abstraction techniques; elementary data structures; dynamic memory manipulation; debugging; and program design issues. Computer systems and applications. Intended for CS majors.
Prerequisite(s): CS 410C with a minimum grade of D- or CS 410P with a minimum grade of D- or CS 415 with a minimum grade of D-.
Equivalent(s): CS 417
Grade Mode: Letter Grading

CS 417 - From Programs to Computer Science
Credits: 0 or 4
Programming techniques for students with programming experience from an introductory programming course. Covers basic algorithm analysis. Topics include basics of classes, inheritance, and data abstraction; linear data structures (vectors, lists, stacks and queues); trees and simple graphs; hash tables; sorting and searching; recursion; and basic graph traversal algorithms. Numerous labs and programming assignments build skills in planning, problem solving, and debugging: this is a hands on course.
Prerequisite(s): CS 410P with a minimum grade of C- or CS 410C with a minimum grade of C- or CS 415 with a minimum grade of C-.
Equivalent(s): CS 416
Grade Mode: Letter Grading

CS 419 - Computer Science for Engineers and Scientists
Credits: 4
This course provides an accelerated coverage of programming techniques for students with programming experience from an introductory programming course. Topics covered include: basics of classes, inheritance, and data abstraction; linear data structures (vectors, lists, stacks, and queues); trees and simple graphs; hash tables; sorting and searching; and recursion. Students will learn basic algorithm analysis. Numerous labs and programming assignments will build skills in planning, problem solving, and debugging: this is a hands-on course.
Prerequisite(s): CS 410C with a minimum grade of D-.
Grade Mode: Letter Grading

CS 420 - Foundations of Programming for Digital Systems
Credits: 0 or 4
A systems-oriented introduction to C, with an emphasis on low-level operations, memory management, and debugging. Foundational digital systems concepts and methods will be introduced, including Boolean algebra, basic logic gates, number systems & conversions, integer representation, and theoretical aspects of combinational and sequential logic. Aspects of effective programming such as incremental development, appropriate structure and commenting, and basic testing will be stressed.
Prerequisite(s): CS 410C with a minimum grade of C- or CS 410P with a minimum grade of C- or CS 414 with a minimum grade of C- or CS 415 with a minimum grade of C-.
Grade Mode: Letter Grading

CS 450 - AI and the World
Credits: 4
This course is a nontechnical introduction to Artificial Intelligence (AI) as it exists in the modern world, focusing on machine learning, neural networks, and generative AI models such as ChatGPT and its contemporaries. The course covers the foundations of how these models work, applications and practical use of generative AI models, and the current limitations and future of AI. Students will emerge from the course better prepared to thrive in an increasingly AI-affected world, as well as to further their AI skills if they so choose. This is a discovery course in the Environment, Technology and Society (ETS) category, and is meant for everyone, requiring no technical background or other prerequisites. The coursework chiefly consists of classroom activities, readings, and written responses. Many course assignments will ask students to envision the application of varying aspects of AI to their own major or field of interest, and the implications and ethical considerations thereof.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

CS 457 - Introduction to Data Science and Analytics
Credits: 4
An introduction to data science and analytics. Overview of the use of analytics by industry, government, and nongovernmental organizations. Impact of analytics on society, ethical use of analytics. Methods of data generation, data management, data cleaning, and data preparation, with a focus on visual and exploratory analysis. Project-based, with an emphasis on collaborative, experiential learning. Design and implementation of programs, use of statistical software.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): DATA 557
Grade Mode: Letter Grading

CS 501 - Professional Ethics and Communication in Technology-related Fields
Credits: 4
A mixed lecture/seminar course intended to improve both reasoning and ability to communicate effectively in front of an audience. Students learn basic forms of ethical argument, they read about ethical situations in which technology and technology professions play a key role, and they participate in student-led discussions about the reading. Students also make oral presentations about both ethical and technical topics, and evaluate each other's presentations in order to improve their sense for what makes a good presentation.
Attributes: Environment,TechSociety(Disc); Inquiry (Discovery)
Prerequisite(s): ENGL 401 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 515 - Data Structures and Introduction to Algorithms
Credits: 0 or 4
Reviews basic data structures. Covers the mechanics and relative efficiencies of advanced data structures. Students will implement several data structures such as AVL trees, heaps, hash tables, and adjacency lists. Discusses abstract data types such as maps, priority queues, and graphs. Introduction to algorithm analysis, sorting algorithms, and graph algorithms.
Prerequisite(s): CS 416 with a minimum grade of C- or CS 417 with a minimum grade of C-.
Grade Mode: Letter Grading

CS 518 - Introduction to Software Engineering
Credits: 0 or 4
Study of software development practices and processes in the following areas: software life cycle; system validation and verification; development pipeline; cloud infrastructures; virtual machines, and containers; logging, instrumentation, and performance; fundamental security concepts. Experience working in groups. Restricted to students not in Senior Standing.
Prerequisite(s): CS 416 with a minimum grade of D- or CS 417 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 520 - Computer Organization and System-Level Programming
Credits: 0 or 4
Study software/hardware interaction, understand data and program representation. Topics include fundamentals of computer organization, CPU, memory, registers, addressing modes, instruction sets, assemblers, linkers, concurrency, memory hierarchy and memory management.
Prerequisite(s): CS 420 with a minimum grade of C- and CS 515 with a minimum grade of C-.
Grade Mode: Letter Grading

CS 527 - Fundamentals of Cybersecurity
Credits: 4
An entry-level introduction to a wide range of fundamental cybersecurity topics: authentication, authorization, auditing, cryptography, human element, network security, OS security, mobile & IoT security. The emphasis is to explain basic concepts with real world examples.
Prerequisite(s): CS 415 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 550 - Foundations of Machine Learning
Credits: 4
The course introduces fundamental methods in machine learning and artificial intelligence. Students will understand and appreciate the main challenges in building and using classical and contemporary machine learning models, including generative artificial intelligence. Throughout the course, students will gain hands on experience applying theoretical concepts to concrete problems. The course requires prior programming experience in a scripting language such as Python, R, Julia, or MATLAB.
Prerequisite(s): (ADMN 510 with a minimum grade of D- or BIOL 528 with a minimum grade of D- or BUS 430 with a minimum grade of D- or HMP 540 with a minimum grade of D- or MATH 439 with a minimum grade of D- or MATH 539 with a minimum grade of D- or MATH 540 with a minimum grade of D- or MATH 644 with a minimum grade of D- or PSYC 402 with a minimum grade of D-) and (MATH 422 with a minimum grade of D- or MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D-).
Mutual Exclusion: No credit for students who have taken CMPL 572.
Grade Mode: Letter Grading

CS 619 - Introduction to Object-Oriented Design and Development
Credits: 4
Principles of problem analysis and software design applied to the development cycle of a software system (i.e. from system requirements specification to design, implementation, and system test). Design and implementation using object-oriented principles, patterns, and tools. Experience in understanding and debugging software systems. Experience in working in groups.
Prerequisite(s): CS 515 with a minimum grade of C- and CS 518 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 620 - Operating System Fundamentals
Credits: 4
Introduces operating system concepts and design. Process and memory management; scheduling; file systems; storage devices; inter-process communication.
Prerequisite(s): CS 520 (may be taken concurrently) with a minimum grade of D-.
Grade Mode: Letter Grading

CS 659 - Introduction to the Theory of Computation
Credits: 4
Review of sets, relations, and languages. Induction and diagonalization. Finite automata, context-free languages, pushdown automata. Basic complexity theory.
Prerequisite(s): MATH 531 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 674 - Fundamentals of Statistical Learning I
Credits: 4
A first course in statistical learning. Supervised learning models including linear models and CART models. Model assessment and scoring methods, including cross-validation. Regularization and model tuning. Unsupervised learning models including k-means clustering. Statistical software will be used, and programming required.
Prerequisite(s): (MATH 539 with a minimum grade of C- or MATH 644 with a minimum grade of C-) and CS 415 with a minimum grade of C-.
Equivalent(s): DATA 674
Grade Mode: Letter Grading

CS 675 - Fundamentals of Statistical Learning II
Credits: 4
A second course in statistical learning. Supervised learning models includes regression trees, bagging, and random forests. Model assessment and scoring methods, including cross-validation. Regularization and model tuning. An introduction to neural networks including convolutional and recurrent networks. Unsupervised learning models including Principal Component Analysis. Statistical software will be used, and programming required.
Prerequisite(s): CS 674 with a minimum grade of C-.
Equivalent(s): DATA 675
Grade Mode: Letter Grading

CS 696 - Independent Study
Credits: 1-6
Individual projects developed and conducted under the supervision of a faculty member.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CS 696W
Grade Mode: Letter Grading

CS 696W - Independent Study
Credits: 1-6
Individual projects developed and conducted under the supervision of a faculty member.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 1 time.
Equivalent(s): CS 696
Grade Mode: Letter Grading

CS 699 - Internship
Credits: 1
Provides the opportunity to apply academic experience in settings associated with future professional employment. A written proposal for the internship must be approved by the instructor. The proposal must specify what the student will learn from the internship, why the student is properly prepared for the internship and what supervision is available during the internship. A mid-semester report and final report are required. Prereq: permission.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 3 times.
Grade Mode: Credit/Fail Grading

CS 712 - Compiler Design
Credits: 4
Formal languages and formal techniques for syntax analysis and parsing; organization of the compiler and its data structures; code generation. LL and LR parsing; automatic generation of scanners and parsers from high level descriptions. Implementation of features from imperative and object-oriented languages. Students required to design and implement a compiler for a simple language.
Prerequisite(s): CS 520 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 720 - Systems Programming
Credits: 4
Study and simulation of various types of systems that include assemblers, linkers, memory management, concurrency and other resource management techniques.
Prerequisite(s): CS 520 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 722 - Cloud Computing Systems
Credits: 4
The course covers a variety of topics in cloud computing systems, or more precisely, distributed systems that enable modern cloud computing. The topics include virtualization and its impact on configuration management. The course also covers the latest advancements in cloud computing/systems, IoT, edge, and fog computing.
Prerequisite(s): CS 620 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 723 - Performance Evaluation of Computer Systems
Credits: 4
Introduces the main concepts, techniques, and tools needed to evaluate the performance of computer systems under various configurations and workloads. The techniques allow one to perform capacity planning based on quality of service requirements of users and workload characteristics. Course is mainly based on the use of analytic queuing network models of computers systems. The performance techniques are applied to study the performance of centralized, distributed, parallel, and client/server systems. The course also discusses performance measuring tools for operating systems such as Unix and Windows NT.
Prerequisite(s): CS 620 with a minimum grade of D- and (MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-).
Grade Mode: Letter Grading

CS 725 - Computer Networks
Credits: 4
Introduction to fundamental concepts of computer networks and exploration of widely-used networking technologies. Topics include principles of congestion and error control; network routing; local, wireless and access networks; application protocol design; and network programming. In-depth discussion of the Internet suite of protocols.
Prerequisite(s): CS 520 with a minimum grade of D-.
Equivalent(s): IT 725
Grade Mode: Letter Grading

CS 727 - Software Security
Credits: 4
Mechanisms and implementation of techniques in software security. Various fundamental security topics include cryptography, access control, protocols, software vulnerabilities, and reverse engineering.
Prerequisite(s): CS 520 with a minimum grade of C- and CS 527 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 730 - Introduction to Artificial Intelligence
Credits: 4
In-depth introduction to artificial intelligence, concentrating on aspects of intelligent problem-solving. Topics include situated agents, advanced search techniques, knowledge representation, logical reasoning techniques, reasoning under uncertainty, advanced planning and control, and learning.
Prerequisite(s): CS 515 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 733 - Mobile Robotics
Credits: 4
An introduction to the foundational theory and practices in mobile robotics. Topics include Kinematics of wheeled mobile robots, Sensors for mobile robots, Robot navigation and perception, Robot vision, Localization and mapping of mobile robots. Hands-on experience directed towards implementation with a real robot. Programming course required prior to taking this course.
Grade Mode: Letter Grading

CS 735 - Introduction to Parallel and Distributed Programming
Credits: 4
Programming with multiple processes and threads on distributed and parallel computer systems. Introduces programming tools and techniques for building applications on such platforms. Course requirements consist primarily of programming assignments.
Prerequisite(s): CS 761 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 745 - Formal Specifications and Verification of Software Systems
Credits: 4
Course focuses on the formal specification and verification of reactive systems, most notably concurrent and distributed systems. Topics relevant to these systems, such as non-determinism, safety and liveness properties, asynchronous communication or compositional reasoning, as discussed. We rely on a notation (TLA+, the Temporal Logic of Actions) and a support tool (TLC, the TLA+ Model Checker).
Prerequisite(s): CS 520 with a minimum grade of D- and CS 659 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 750 - Machine Learning
Credits: 4
The course covers machine learning methods and their applications. Students will gain an in-depth understanding of when and why machine learning is effective and how to apply it successfully. The course will study foundational machine learning models to build intuition and then explore contemporary machine learning methods. Students will use a scripting language to gain hands-on experience with real-world datasets. The course requires prior programming experience in a scripting language such as Python, R, Julia, or MATLAB. It also requires some familiarity with linear methods in the form of an introductory linear algebra or linear models course.
Prerequisite(s): CS 550 with a minimum grade of D- or MATH 525 with a minimum grade of D- or MATH 527 with a minimum grade of D- or MATH 545 with a minimum grade of D- or MATH 645 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

CS 751 - Reinforcement Learning
Credits: 4
Reinforcement learning studies how agents can learn to act to achieve goals in complex, stochastic environments. This course introduces students to fundamental theoretical concepts of reinforcement learning, standard algorithms, and practical techniques. In addition to theoretical topics, the course involves implementing basic algorithms in a high-level programming language.
Prerequisite(s): (CS 415 with a minimum grade of D- or CS 410P with a minimum grade of D-) and (MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-).
Grade Mode: Letter Grading

CS 752 - Foundations of Neural Networks
Credits: 4
Neural networks are a class of machine learning models which have recently revolutionized many applied machine learning domains such as natural language understanding, image/video processing, bioinformatics, time series analysis. This course teaches students to develop new neural network architectures from scratch and customize them. The course covers all necessary foundations of neural networks including gradient descent optimization and vector calculus. Students will learn how to design models using idioms such as observed variables, latent variables, gate variables and different functions as well as a wide range of state-of-the-art architectures as design examples.
Prerequisite(s): CS 515 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 753 - Information Retrieval and Generation Systems
Credits: 4
Fundamental algorithms and techniques for text processing and text-based information retrieval, synthesis, and generation systems. Topics include how to build an end-to-end information access system, such as a Web search engine or a chat agent.
Attributes: Writing Intensive Course
Prerequisite(s): CS 515 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 755 - Computer Vision
Credits: 4
Studying techniques that make a machine 'see' and 'understand' the world in a human-like fashion. The course discusses the theory behind common computer vision techniques and trains students on designing their own algorithms for understanding image or video.
Prerequisite(s): MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 757 - Mathematical Optimization for Applications
Credits: 4
This course introduces the foundations of mathematical optimization and reinforces them via applications. The content includes convex optimization, first and second-order methods, constrained problems, duality, linear and quadratic programming, as well as discrete and non-convex optimization. Applications will focus on machine learning methods but also include problems from engineering and operations research. Programming proficiency in MATLAB, R, Java, C, Python, or equivalent required.
Prerequisite(s): MATH 426 with a minimum grade of D-.
Equivalent(s): MATH 757
Grade Mode: Letter Grading

CS 758 - Algorithms
Credits: 4
An introduction to important concepts in the design and analysis of algorithms and data structures, including implementation, complexity analysis, and proofs of correctness.
Prerequisite(s): CS 420 with a minimum grade of C- and CS 515 with a minimum grade of C- and CS 659 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 759 - Natural Language Processing
Credits: 4
This class covers natural language processing, including both methods and well-known applications. Methods discussed will range from classical probabilistic methods such as Naive Bayes and Hidden Markov Models, to contemporary neural network methods, including word vector models, recurrent neural networks, and Transformer-based models. Applications discussed will include text classification, machine translation, and conversation systems.
Prerequisite(s): CS 515 with a minimum grade of D- and (MATH 539 with a minimum grade of D- or MATH 644 with a minimum grade of D-).
Grade Mode: Letter Grading

CS 760 - Human-Computer Interaction
Credits: 4
This course is a broad introduction to designing, prototyping, and evaluating user interfaces in the context of Human-Computer Interaction (HCI) theory and practice. Additional topics may include the history of computer interfaces, theories of human cognition and perception, observational techniques, and experimental design. Coursework includes lectures, programming assignments, writing assignments, class presentations, and group projects.
Attributes: Writing Intensive Course
Prerequisite(s): CS 416 with a minimum grade of C- or CS 417 with a minimum grade of C-.
Equivalent(s): IT 760W
Mutual Exclusion: No credit for students who have taken CMPL 622.
Grade Mode: Letter Grading

CS 761 - Programming Language Concepts and Features
Credits: 4
Explores the main features of modern, high-level, general-purpose programming languages from the user (programmer) standpoint. Students learn how specific features of programming languages can be used effectively in solving programming problems. The course is also an opportunity to use paradigms that expand on simple imperative programming, such as object-oriented, functional and concurrent programming. Some knowledge of Java required.
Prerequisite(s): CS 520 with a minimum grade of C-.
Equivalent(s): CS 671
Grade Mode: Letter Grading

CS 770 - Computer Graphics
Credits: 4
Input-output and representation of pictures from hardware and software points of view; interactive techniques and their applications; three-dimensional image synthesis techniques and their applications.
Prerequisite(s): CS 515 with a minimum grade of C- and CS 520 with a minimum grade of C-.
Grade Mode: Letter Grading

CS 775 - Database Systems
Credits: 4
Introduction to database management systems --- design, implementation, and usage --- with focus on the relational model. Data description, manipulation, and query language in the context of MySQL. Schema design and normalization; indexes, transaction processing. Web access of databases (PHP); overview of XML and noSQL systems.
Prerequisite(s): CS 515 with a minimum grade of D-.
Mutual Exclusion: No credit for students who have taken IT 775.
Grade Mode: Letter Grading

CS 780 - Topics
Credits: 1-4
Material not normally covered in regular course offerings. May be repeated barring duplication of subject.
Repeat Rule: May be repeated up to unlimited times.
Grade Mode: Letter Grading

CS 781 - Data Science for Knowledge Graphs and Text
Credits: 4
This course covers advanced text processing and machine learning algorithms and techniques for data science with knowledge graph and text data. This includes a wide range of algorithms for neural networks, machine learning, graph processing, text processing, and information retrieval with a focus of gaining insights into the knowledge stored in data. This an implementation-intensive research-oriented seminar, where a particular data science application will be developed by reading research publication and implementing a software prototype.
Prerequisite(s): CS 752 with a minimum grade of B- or CS 753 with a minimum grade of B- or CS 759 with a minimum grade of B-.
Grade Mode: Letter Grading

CS 791 - Senior Project I
Credits: 2
First semester of the capstone design experience. Modern software engineering practices and tools are surveyed and applied in team projects. Students begin development on software projects proposed by faculty or external sponsors, including initial stages of design, implementation, and documentation, with an interim presentation of progress expected toward the end of the semester. Principles of security, testability, and maintainability are stressed.
Prerequisite(s): CS 520 with a minimum grade of C- and ((CS 619 with a minimum grade of D- and CS 620 with a minimum grade of D-) or (CS 620 with a minimum grade of D- and (CS 727 with a minimum grade of D- or IT 666 with a minimum grade of D-))).
Grade Mode: Letter Grading

CS 792 - Senior Project II
Credits: 2
Continuation of CS 791: Senior Project I. Students complete the project by implementing their design. Students work in teams. Successful completion of this course fulfills the Capstone Experience requirement for Computer Science majors.
Attributes: Writing Intensive Course
Prerequisite(s): CS 791 with a minimum grade of D-.
Grade Mode: Letter Grading

CS 799 - Thesis
Credits: 1-5
Students work under the direction of a faculty sponsor to plan and carry out independent research resulting in a written thesis. Required for honors-in-major. Additional CS 600-level course required. Minimum GPA should be 3.4 or higher.
Attributes: Writing Intensive Course
Prerequisite(s): CS 520 with a minimum grade of C- and CS 619 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Computer/Information Tech (CMPL)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CMPL 402 - Excel
Credits: 2
A comprehensive examination of spreadsheet software. Students will build a variety of spreadsheets using simple and complex formulas, functions, graphics, database features, sorts, linkages within spreadsheet and between spreadsheets, and macros. Basic Algebra and knowledge of computer operating system required. This course is valuable for all Business students and Computer Science Students. It provides competency and fluency in the standard software used for business analysis and as a link between large computer software systems and the end user.
Equivalent(s): CMPL 502G, MGMT 502G
Grade Mode: Letter Grading

CMPL 415 - Programming Fundamentals
Credits: 4
The course is designed to provide students with a sound background in structured programming logic and design. These foundational concepts can be applied regardless of which programming languages a student eventually uses to write programs. The demonstration language for programming concepts will be C++. The course covers the key mathematical and logical constructs that are the basis of much programming. Topics include the software development life cycle, particularly the programming phase, structured programming techniques, problem-solving and algorithm development, decision control structures, including selection (IF/CASE) and repetition (looping) structures, variables and arrays, and data structures. Proficiency in Excel is necessary for success in this course.
Prerequisite(s): MTH 402 with a minimum grade of D- or MATH 502G with a minimum grade of D-.
Equivalent(s): CMPL 515G
Grade Mode: Letter Grading

CMPL 512 - Advanced Software Tools
Credits: 4
This is a project-oriented software applications course to help the student gain competency with advanced features of office productivity software and to introduce more advanced database application concepts. NOTE: Excel is recommended for success in this course.
Equivalent(s): CMPL 612G
Grade Mode: Letter Grading

CMPL 525 - Foundations of Cybersecurity
Credits: 4
This course addresses the foundations of cybersecurity, including threats and vulnerabilities as well as the tools, technologies, and strategies used to manage those threats and vulnerabilities.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): CMPL 525G
Grade Mode: Letter Grading

CMPL 530 - Python Programming I
Credits: 4
In this introductory programming with Python course, students will have the opportunity to learn about data types, control flow, object-oriented programming, and graphical user interface-driven applications. The examples and problems used in this course are drawn from diverse areas such as text processing, simple graphics creation, and image manipulation. This course will explore the large standard library of Python 3, which supports many common programming tasks.
Prerequisite(s): CMPL 415 with a minimum grade of D- or CMPL 515G with a minimum grade of D-.
Equivalent(s): CMPL 530G
Grade Mode: Letter Grading

CMPL 540 - Best Practices in Website Design
Credits: 2
This hands-on course outlines the fundamentals of web design. Students consider ethical use of information and best practices when creating websites using free web page design programs. Working with a basic design program, students explore layout, graphics, text, color, links, tables, frames and content. Students use website design software to create a simple website of their own, as well as examine publication and promotion options. NOTE: Basic computer competence is required. This course is not appropriate for Information Technology majors and may not be combined with other Information Technology courses to satisfy degree requirements.
Equivalent(s): CMPL 540G
Grade Mode: Letter Grading

CMPL 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Computer Science. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CMPL 544G
Grade Mode: Letter Grading

CMPL 550 - CompTIA Cloud Computing I
Credits: 4
This course provides a foundational understanding of cloud computing concepts, preparing students for the CompTIA Cloud+ certification. Students will explore key topics, including the principles of cloud computing, virtual hardware infrastructure, and strategies for migrating systems to the cloud. The course also covers cloud networking fundamentals and provides troubleshooting guidance for connectivity issues. Through hands-on activities and real-world scenarios, students will gain practical skills in managing cloud environments and addressing common challenges in cloud computing.
Grade Mode: Letter Grading

CMPL 552 - Cloud Security and Privacy
Credits: 4
This course provides a comprehensive introduction to the principles and practices of securing cloud environments, preparing students for careers in cloud security. Topics include understanding cloud service providers, identifying risks in cloud computing, and implementing key cloud security principles and governance strategies. Students will explore practical tools, develop a roadmap for managing cloud security, and examine pathways for professional growth in the field. Through hands-on exercises and case studies, students will gain the skills needed to address security and privacy challenges in cloud computing environments.
Grade Mode: Letter Grading

CMPL 564 - Introduction to Cryptography
Credits: 4
This course will introduce students to the foundations of modern cryptography with an eye toward practical applications. The course will cover the role of cryptography in privacy topics, such as passwords, privacy in school settings, and privacy in social media platforms.
Prerequisite(s): CMPL 525 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 566 - Security Risk Assessment
Credits: 4
In this course, students will learn about the general information security risk management framework and its practices. Students will also learn how to identify and model information security risks and apply both qualitative and quantitative risk assessment methods.
Prerequisite(s): CMPL 525 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 570 - Foundations of AI: A Business Perspective
Credits: 4
This course explores the foundational concepts, tools, and societal implications of AI technologies that are reshaping how we live, work, and learn. Students will examine the history and evolution of AI, including machine learning, natural language processing, computer vision, robotics, and generative AI. Emphasis is placed on real-world applications across business, education, healthcare, cybersecurity, and customer service. Through hands-on activities and critical analysis, students will investigate the ethical challenges, potential biases, and transformative power of AI, gaining practical insights into how AI is impacting the modern workforce and future careers.
Grade Mode: Letter Grading

CMPL 572 - Foundations of Machine Learning
Credits: 4
This course provides a comprehensive introduction to the fundamental principles of machine learning, focusing on key concepts, algorithms, and practical applications. Students will explore both supervised and unsupervised learning techniques, neural networks, deep learning, and natural language processing (NLP). The course emphasizes hands-on learning, guiding students through model evaluation, data preprocessing, and feature selection while considering the ethical implications of AI and machine learning. By the end of the course, students will have the knowledge and skills needed to apply machine learning techniques in real-world scenarios.
Grade Mode: Letter Grading

CMPL 610 - Artificial Intelligence for Information Technology Professionals
Credits: 4
This course introduces IT students to the core concepts, applications, and implications of artificial intelligence in modern technology environments. Through a practical, industry-focused lens, students will explore intelligent systems, machine learning, natural language processing, AI-driven automation, and ethical considerations. Emphasis is placed on how AI is transforming data analysis, IT operations, and user interaction in professional settings.
Grade Mode: Letter Grading

CMPL 614 - Computer and Network Systems
Credits: 4
This course offers a practical study of the hardware and software of modern computing systems and networks. Course topics include operating system software by studying the functions and interactions of computer and peripheral components such as central processing units (CPU), memory, storage, print engines, etc. Learners also study the workings of network components such as protocols, hubs, routers, and switches. Through exposure to a mix of theory, extensive vocabulary, and specific knowledge about trends in contemporary systems, learners develop skills to effectively communicate with others regarding the specification, purchase, and installation of an office or home computer system/network.
Prerequisite(s): CMPL 415 with a minimum grade of D- or CMPL 515G with a minimum grade of D- or CMPL 512 with a minimum grade of D- or CMPL 612G with a minimum grade of D-.
Equivalent(s): CMPL 614G
Grade Mode: Letter Grading

CMPL 618 - Mathematics for AI and Machine Learning
Credits: 4
This course introduces the fundamental concepts of linear algebra and calculus, two core areas of mathematics that power AI and machine learning algorithms. Students will explore vectors, matrices, eigenvalues, derivatives, gradients, and optimization techniques, gaining an intuitive and practical understanding of how these mathematical principles shape AI. With a focus on real-world applications and hands-on problem-solving, this course demystifies complex mathematical concepts and bridges the gap between theory and implementation in machine learning.
Grade Mode: Letter Grading

CMPL 620 - Virtualization and Cloud Computing
Credits: 4
In this course students will have the opportunity to learn the fundamental concepts, components, infrastructure, as well as security and privacy considerations of cloud computing and virtualization systems. Course activities will address the skills and knowledge necessary to install, configure, and manage virtual environments and how to effectively plan, implement, and manage cloud computing.
Prerequisite(s): (CMPL 614 with a minimum grade of D- or CMPL 614G with a minimum grade of D-) and (CMPL 525 with a minimum grade of D- or CMPL 525G with a minimum grade of D-).
Equivalent(s): CMPL 620G
Grade Mode: Letter Grading

CMPL 622 - Human Computer Interaction
Credits: 4
This course builds an understanding of human behavior with interactive objects, focusing on how to develop and evaluate interactive software using a human-centered approach. This includes examining the many different types of interactive software, understanding the principles of effective graphical user interface design, evaluating human-centered software and software development and exploring aspects of collaboration and communication as they affect individual and group interaction with software systems.
Attributes: Environment,TechSociety(Disc); Writing Intensive Course
Equivalent(s): CMPL 622G
Mutual Exclusion: No credit for students who have taken CS 760, IT 760W.
Grade Mode: Letter Grading

CMPL 630 - CompTIA Cloud Computing II
Credits: 4
This course builds on foundational cloud computing concepts, focusing on advanced topics essential for managing secure and efficient cloud environments. Students will explore securing cloud resources, implementing identity and access management (IAM), and optimizing cloud storage solutions. The course also covers performance management strategies and introduces automation techniques to streamline cloud operations. Through practical applications and case studies, students will develop the expertise needed for advanced cloud management and prepare for the CompTIA Cloud+ certification.
Prerequisite(s): CMPL 550 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 632 - Cloud Financial Management
Credits: 4
This course explores the principles and practices of managing financial resources in cloud environments, with an emphasis on the discipline of FinOps (Cloud Financial Operations). Students will learn how to establish financial accountability within the variable spend model of cloud computing, enabling organizations to maximize value while maintaining cost efficiency. Topics include understanding and forecasting cloud spending, cost allocation strategies, leveraging rate discounts, and fostering collaboration between engineering and finance teams. The course also covers the automation of cost management tasks and sustainable practices in cloud spending. Through real-world examples and hands-on activities, students will develop the skills needed for data-driven decision-making and effective cloud financial management.
Grade Mode: Letter Grading

CMPL 637 - Python Programming II
Credits: 4
Students will have the opportunity to take their Python programming skills to the next level with this intermediate course. This course includes a review of basic concepts such as lists, strings, and dictionaries, and more advanced topics such as threading, multiprocessing, context managers, and generators.
Prerequisite(s): CMPL 530 with a minimum grade of D- or CMPL 530G with a minimum grade of D-.
Equivalent(s): CMPL 537G
Grade Mode: Letter Grading

CMPL 640 - Digital Forensics
Credits: 4
In this course, students will study the application of digital forensic technology to collect, analyze, document, and present information while maintaining a documented chain of custody. Overview of ethics, crime, and other legal regulations. Includes an overview of tools used for forensic analysis of digital devices in investigations.
Prerequisite(s): CMPL 525 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 641 - Database Management Systems
Credits: 4
This course provides prospective users of data base management systems with a solid theoretical and practical foundation for using these systems in a variety of contemporary organizational environments. The course traces the nature of DBMS from general conceptual structures, through the design, interface and implementation of actual database systems. The course includes a mix of classical database theory with practical hands-on application using state of the art DBMS packages; similar to those used today by large and small organizations alike to run their information systems.
Prerequisite(s): (CMPL 415 with a minimum grade of D- or CMPL 515G with a minimum grade of D-) and (CMPL 512 with a minimum grade of D- or CMPL 612G with a minimum grade of D-).
Equivalent(s): MGMT 622G
Grade Mode: Letter Grading

CMPL 642 - Systems Analysis and Design
Credits: 4
This hands-on course introduces students to the role of the systems analyst in the development of information systems for organizations. The systems analyst is a problem-solver. As such, this course emphasizes development of effective solutions and communicating those solutions to the development team. Use of accepted design techniques, project management approaches, written and verbal communication, collaboration and teamwork, and organizational tools prepares the learner for the many demands of an entry-level systems analyst.
Prerequisite(s): (MTH 504 with a minimum grade of D- or MATH 504G with a minimum grade of D-) and (CMPL 512 with a minimum grade of D- or CMPL 612G with a minimum grade of D- or CMPL 415 with a minimum grade of D- or CMPL 515G with a minimum grade of D-).
Equivalent(s): MGMT 623G
Grade Mode: Letter Grading

CMPL 643 - Managing Information Technology
Credits: 4
This course helps students understand the important role of information technology in business strategy. Emphasizing the management of information technology rather than specific technical aspects, students explore the alignment of information technology with organizational goals, efficiencies gained through technology solutions, project management and the implementation of information technology, and organizational and industry changes driven by information technology. Investments in information technology for competitive advantage, the positioning of information technology in the organization, the pace of innovation in a digital economy, and emerging trends in information technology are discussed.
Attributes: Writing Intensive Course
Prerequisite(s): MGMT 410 with a minimum grade of D- or MGMT 500G with a minimum grade of D- or PADM 500 with a minimum grade of D- or PADM 500G with a minimum grade of D- or MGMT 501G with a minimum grade of D- or MGMT 566 with a minimum grade of D- or MGMT 566G with a minimum grade of D-.
Equivalent(s): MGMT 624G
Grade Mode: Letter Grading

CMPL 644 - Special Topics: Upper Level
Credits: 1-4
The study of current and variable topics in Computer Science. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject area.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CMPL 644G
Grade Mode: Letter Grading

CMPL 645 - Ethical Hacking
Credits: 4
This course introduces students to the basics of ethical hacking and penetration testing (pen-testing), including some common attack types, terminology, types of security tests, reconnaissance phases, documentation, pen-testing types, attack phases, and security control assessment methods.
Prerequisite(s): CMPL 525 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 648 - Programming with JavaScript
Credits: 4
This hands-on and comprehensive course is designed to introduce students to the fundamental concepts and practical applications of JavaScript, one of the most widely used programming languages for building interactive and dynamic websites. Students will practice collaborative project management methods in several web application projects.
Prerequisite(s): CMPL 415 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 665 - Web Application Development
Credits: 4
This course covers modern website design and development using Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), and JavaScript. Students will learn the history and overall structure of the Internet and its key paradigms and technologies. Students will also learn how to design and code websites for various audiences and client technologies. The course will also cover current website management technologies including content management systems, JavaScript libraries, and website development frameworks.
Prerequisite(s): CMPL 530 with a minimum grade of D- or CMPL 530G with a minimum grade of D-.
Equivalent(s): CMPL 638G
Grade Mode: Letter Grading

CMPL 725 - Advanced Programming with Python
Credits: 4
This course introduces advanced programming skills and focuses on the core concepts of object-oriented programming (OOP) using Python, a high-level language. OOP shifts the focus from thinking about code as a sequence of actions, to looking at your program as a collection of objects that interact with each other. The course focuses on the understanding and practical mastery of object-oriented concepts such as classes, objects, data abstraction, methods, and the three tenets of OOP. encapsulation, inheritance, and polymorphism.
Prerequisite(s): CMPL 637 with a minimum grade of D- or CMPL 537G with a minimum grade of D-.
Equivalent(s): CMPL 625G
Grade Mode: Letter Grading

CMPL 744 - Cybersecurity Law
Credits: 4
This course is a study of cybersecurity law, standards, and regulations from a layperson's perspective. This course is essential for students entering the cybersecurity field to understand the legal and regulatory parameters that cybersecurity programs must adhere to. This course focuses on U.S. and international cybersecurity law, civil and criminal procedures relating to cybercrime, cyber offense case law, privacy, and violation defense. The course also provides an overview of industry cybersecurity rules and statutes.
Prerequisite(s): CMPL 525 with a minimum grade of D-.
Grade Mode: Letter Grading

CMPL 750 - Programming for AI with Python
Credits: 4
This course provides a comprehensive, hands-on introduction to Python programming with a focus on applications in artificial intelligence (AI). Students will learn Python fundamentals, explore AI concepts, and develop practical skills for working with data, building intelligent systems, and applying deep learning techniques. Through structured lessons, real-world examples, and project-based learning, participants will progress from foundational programming concepts to implementing AI-driven applications, while also examining the ethical and societal implications of AI technologies.
Grade Mode: Letter Grading

CMPL 760 - Mobile Application Development
Credits: 4
This course introduces students to programming technologies, design, and development related to mobile applications. Topics include application user interfaces, styling, navigation, simple animation, and Android - and iOS-specific components and APIs. Students will program cross-platform mobile applications using JavaScript and React Native, an open-source user interface framework. Through course activities, students will have the opportunity to develop the skills needed to create basic applications for mobile devices.
Prerequisite(s): CMPL 648 with a minimum grade of D-.
Equivalent(s): CMPL 633G, CMPL 660
Grade Mode: Letter Grading

CMPL 795 - Integrative Capstone: Internship in Computer Information Tech and Tech Management
Credits: 4
This upper level course is a field-based experience designed to develop and hone the practical application skills of students in a Computer Information Technology or Technology Management major. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their GSC internship mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where Computer Information Technology or Technology Management knowledge and skills are applied. This course is the capstone for the BS in Computer Information Technology and BS in Technology Management. NOTE: Registration for this course as an internship is by permission of the Office of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): CMPL 651G
Grade Mode: Letter Grading

CMPL 797 - Integrative Capstone: Best Practices in Information Technology
Credits: 4
This course is a project-oriented capstone learning experience that is designed to integrate learning from coursework with related work or other experience. Students focus on best practices in information technology and project management, with specific attention to their area of specialization. Students will complete an integrative project related to their program option and career interests. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): CMPL 650G
Grade Mode: Letter Grading

Computing Technology (COMP)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

COMP 405 - Introduction to Web Design and Development
Credits: 4
Students learn the fundamentals of how the Internet works, gain practice with foundational technologies that power websites and learn how to solve problems like a programmer. A significant portion of he course covers web front-end design and development; students create a website using HTML/CSS, and are introduced to JavaScript language and responsive web design techniques. Topics include Internet history and structure, legal and ethical issues. No prior programming experience is required.
Attributes: Environment,TechSociety(Disc)
Equivalent(s): IT 403
Grade Mode: Letter Grading

COMP 415 - Mobile Computing First and For Most
Credits: 4
This course examines how mobile computing is transforming our everyday lives and the society and environment in which we live. In this course the students will engage the mobile ecosystem by inventing apps and solving problems of personal, social, and environmental relevance. Students will learn computational thinking skills and create mobile apps using AppInventor, a free and open source visual blocks-based programming environment. Students will share their creative apps with peers and communities. They will also exercise inclusion, civic engagement, and peer learning in the context of innovating with free and open source software that empower individuals and communities.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

COMP 424 - Applied Computing 1: Foundations of Programming
Credits: 4
Integrates three essential computing competencies: Problem solving, data analysis, and programming. Problems are chosen from data-driven real-world examples such as astronomy, cryptography, environmental simulation, image processing, and video games. Emphasis is on formulating problems, thinking creatively about how computations can solve problems, and expressing solutions clearly and accurately. Using Python, students learn design, implementation, testing, and analysis of algorithms and programs.
Equivalent(s): CS 410, CS 414, CS 415
Grade Mode: Letter Grading

COMP 430 - Systems Fundamentals
Credits: 4
The underlying hardware and software infrastructure upon which applications are constructed is collectively described by the term "computer systems." Computer systems broadly span the subdisciplines of operating systems, parallel and distributed systems, communications networks, and computer architecture. The class will present an integrative view of these fundamental concepts in a unified albeit simplified fashion, providing a common foundation for the different specialized mechanisms and policies appropriate to the particular domain area.
Grade Mode: Letter Grading

COMP 500 - Discrete Structures
Credits: 4
This course prepares students for understanding computational complexity; i.e., what makes a given task/problem hard and how hardness is measured. It accomplishes this through the study of algorithms, permutations, combinations, probability, graph theory, and trees.
Grade Mode: Letter Grading

COMP 520 - Database Design and Development
Credits: 4
An introduction to developing database applications with business users. Topics include fundamentals of the relational model, structured query language, data modeling and database design and implementation. Students use a variety of database management system tools to model, code, debug, document, and test database applications. Students complete real-world team projects.
Grade Mode: Letter Grading

COMP 525 - Data Structures Fundamentals
Credits: 4
Data structures and algorithms are fundamental to developing solutions for computational problems. In this course students design and implement data and functional abstractions; analyze and select appropriate data structures to solve computational problems; practice programming and software development techniques to implement computational solutions.
Prerequisite(s): COMP 424 with a minimum grade of D- or COMP 425 with a minimum grade of D-.
Equivalent(s): CS 416, CS 417
Grade Mode: Letter Grading

COMP 530 - Machine and Network Architecture
Credits: 4
Examines the following topics. Machine organization: program and data representation; registers, instructions, and addressing modes; assemblers and linkers. Impact of hardware on software and software on hardware. Introduces the Internet protocol suite and network tools and programming and discusses various networking technologies.
Prerequisite(s): COMP 430 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 550 - Networking Concepts
Credits: 4
Explores the fundamentals of data communications and networking requirements for an organization, including the standard layers of network organization; network technologies; and protocols for LANs, WANs, wireless networks, and switched and routed networks. Includes issues of security, topology, management, and future developments.
Grade Mode: Letter Grading

COMP 560 - Ethics and the Law in the Digital Age
Credits: 4
Examines classical and ethical and legal constructs as they pertain to current and topical issues. Students develop and articulate a personal point of view on a broad range of issues based on sound ethical principles and consider the impact of such views on co-workers, employers, and society in general. Topics also include: major social issues involving intellectual property, privacy, current U.S. and international relations relevant to ethical theories. The interplay between ethics and law is explored through current case studies and students formulate and support conclusions based on ethical constructs presented in class. Case study analysis is a major component in course delivery.
Attributes: Humanities(Disc); Writing Intensive Course
Grade Mode: Letter Grading

COMP 570 - Statistics in Computing and Engineering
Credits: 4
An introduction to tools from probability and statistics that are needed by computing and engineering professionals. Exploratory data analysis including graphic data analysis. discrete and continuous probability distributions, inference, linear regression, and analysis of variance, with applications from artificial intelligence, machine learning, data mining, and related topics. Project work and use of statistical software are an integral part of the course.
Prerequisite(s): MATH 425 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 625 - Data Structures and Algorithms
Credits: 4
An introduction to object-oriented design, analysis, and implementation of data structures and algorithms. Students apply concepts and techniques to develop information processing applications. Best programming practices of editing, debugging, documentation, testing, and code review are stressed. Familiarity with an object-oriented programming language and experience with application development are required.
Prerequisite(s): COMP 425 with a minimum grade of D-.
Equivalent(s): CS 515
Grade Mode: Letter Grading

COMP 630 - Systems Software
Credits: 4
Today's organizations need to deliver applications and services by automating processes that develop and deploy software and manage scalable computing infrastructures. Students will learn how to integrate development, operations, and cloud computing and gain experience with design approaches, version control, continuous integration, cloud-based APIs, and monitoring metrics. Key to systems software tools and automation processes are increased communication and collaboration practiced in the course team projects. Students who took COMP 698 Sp/Topic Systems Software cannot repeat for credit.
Prerequisite(s): COMP 530 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 650 - Network Administration and Maintenance
Credits: 4
Advances the understanding of networks through practical application of administering and maintaining and intranet and its servers. Students use a modern server operating system and network management tools. Routine tasks include: install and configure servers, setup directory services and access privileges, tune network services, understand and implement network security, perform routine maintenance, and practice troubleshooting techniques.
Prerequisite(s): COMP 550 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 690 - Internship Experience
Credits: 4
The internship provides field-based learning experience through placement in a computing field. Students gain practical computing experience in a business, non-profit, or government organization. Under the direction of a faculty advisor, the student is expected to contribute to the information technology products, processes, or services of the organization. Majors only. May be repeated but no more than 4 credits may fill major requirements.
Prerequisite(s): UMST 582 with a minimum grade of D-.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

COMP 705 - Full Stack Development
Credits: 4
Students work in teams and implement, test, document, demonstrate, and deploy web systems that solve organizational needs expressed by real clients. Emphasis is on advanced server-side and client-side programming and integration of web application with database and web server applications. Free and open source development and communication tools are used to carry out the course project.
Grade Mode: Letter Grading

COMP 715 - Information Security
Credits: 4
Topics include general security principles and practices, network and system security, access control methodology, and cryptography. Students develop a simple cryptographic system based on sound mathematical principals, work to improve it, and find ways to attack it. Some programming required.
Grade Mode: Letter Grading

COMP 720 - Database Systems and Technologies
Credits: 4
This is a project course that provides practical experience with developing a storage subsystem of a computer information system. Topics include data modeling, database design, system implementation, and integration with a target application. Emphasis is on implementation activities, database application development artifacts, project communication, and supporting system development and project management tools.
Grade Mode: Letter Grading

COMP 721 - Big Data for Data Engineers
Credits: 4
In this course students gain practical experience developing data-oriented applications in modern infrastructure frameworks, also known as the cloud data solutions. Guided by what a data scientist profile is, students become familiar with the use cases of data oriented applications. They will apply key data modeling and data design concepts to meet business requirements. Students will also apply modern software development to iteratively construct solutions using established reference architectures. Project work will be based in Google Cloud Platform and Amazon Web Services.
Grade Mode: Letter Grading
Special Fee: Yes

COMP 725 - Programming Languages
Credits: 4
Explores the main features of modern, high-level, general purpose programming languages from the user point of view. Provides students with an opportunity to use non-imperative programming paradigms, such as object-oriented, functional, and visual, and to learn how specific features of such languages can be used efficiently in solving problems. The purpose is to gain knowledge regarding the languages studied as well as providing the basis to conduct analysis related to comparisons and divergence in capabilities.
Grade Mode: Letter Grading

COMP 730 - Software Development
Credits: 4
Presents an iterative methodology for developing software systems. Development activities include requirements elicitation and analysis, system and object design, implementation and testing, project and configuration management, infrastructure maintenance, and system deployment to end user. Students work in teams, assume developer roles, build models of a real-world system, and deliver a proof-of-concept or prototype.
Attributes: Writing Intensive Course
Prerequisite(s): COMP 525 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 735 - Secure Networking Technology
Credits: 4
In this course students study modern computer networking and focus on principles, architectures, protocols, security, and cloud. Modern IT and cloud computing call for expertise in security, which is a theme across all computing subjects, as well as a core area of study. Course requirements include both programming and administrative exercises to explore and gain practice with networking topics. Students who have taken COMP 780-Special Topics (Networking Technologies) cannot receive credit for COMP 735.
Grade Mode: Letter Grading

COMP 740 - Machine Learning Applications and Tools
Credits: 4
Introduces students to practical approaches of machine learning. The course is an exploration of creative applications of artificial intelligence using modern machine learning components and tools. Different application domains are considered, such as computer vision, natural language processing, and cyber security. Students learn to evaluate machine learning systems as well as their potential prediction problems. Cannot receive credit if credit earned for COMP 780 AdvTop/ML Tools & Appl.
Grade Mode: Letter Grading

COMP 741 - Practical Artificial Intelligence
Credits: 4
Balancing the science of AI with its engineering applications, the course focuses on AI foundations and principles for building intelligent computational systems. Reasoning, planning, learning, explaining, and acting with certainty and uncertainty are AI areas in which students will practice how to build AI systems that solve real-world problems. Particular attention is given to the impact of AI applications on our society and related ethical, privacy, security, and safety implications.
Prerequisite(s): COMP 525 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 742 - Fundamentals of Computer Vision
Credits: 4
This course provides a comprehensive introduction to computer vision with topics covering both the theoretical and practical skills needed to pursue a career in computer vision, pattern recognition, image processing, and signal processing. Students will learn basic concepts as well as hands on experience to solve various real-life problems in image processing, feature extraction, object recognition, and image understanding. Not offered for credit if credit is received for COMP780/ COMP 880 Computer Vision.
Grade Mode: Letter Grading

COMP 755 - Digital Forensics
Credits: 4
This course studies cyber-attack prevention, planning, detection, response, and investigation with the goals of counteracting cybercrimes. The topics covered in this course include fundamentals of digital forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anti-forensics techniques, anonymity and pseudonymity, computer security policies and guidelines, and methods and standards for extraction and preservation of digital evidence.
Prerequisite(s): COMP 525 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 760 - Data Visualization & Communication
Credits: 4
Through hands-on experience with a leading data visualization tool, the course introduces the concepts of data visualization to allow students to communicate and analyze data effectively using visual techniques.
Grade Mode: Letter Grading

COMP 765 - Secure Software Principles
Credits: 4
This course will explore the fundamentals of software security, covering important software vulnerabilities and attacks that exploit them. This includes, but not limited to, such topics as buffer overflows, SQL injection, session hijacking and considers defenses that prevent or mitigate these attacks, including advanced testing and program analysis techniques. Will look at techniques at each phase of the development cycle that can be used to strengthen the security of software systems.
Prerequisite(s): COMP 525 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 780 - Advanced Topics in Computing
Credits: 1-4
The course includes advanced topics and emerging areas in computing. Barring duplication of subject, the course may be repeated for credit.
Grade Mode: Letter Grading

COMP 785 - Applied Cryptography
Credits: 4
This course aims to give students an overview of cryptographic concepts and methods, a good knowledge of some commonly used cryptographic primitives and protocols, a sound understanding of theory and implementation, as well as limitations and vulnerabilities, and an appreciation of the engineering difficulties involved in employing cryptographic tools to build secure systems. Some programming required.
Prerequisite(s): COMP 525 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 790 - Capstone Project
Credits: 4
This course requires the development of a real world project that responds to an IT organizational need. The project is undertaken by a team of students. An iterative approach is used to incrementally address the project requirements while constructing a prototype of the IT solution to the original problem.
Attributes: Writing Intensive Course
Prerequisite(s): COMP 690 with a minimum grade of D- and CIS 610 with a minimum grade of D-.
Grade Mode: Letter Grading

COMP 791 - Senior Thesis
Credits: 4
This course requires the development of a real world project representative of the computing discipline of their major. An iterative approach is used to incrementally address the project requirements while constructing a prototype of the solution to the original problem. A thesis, describing the work, will be the final product, submitted at the end of the course and presented to a committee of faculty.
Prerequisite(s): COMP 690 with a minimum grade of D-.
Equivalent(s): COMP 790
Grade Mode: Letter Grading

COMP 795 - Independent Study
Credits: 1-4
Advanced individual study under the direction of a faculty mentor. Content area to be determined in consultation with faculty mentor. May be repeated.
Grade Mode: Letter Grading

Criminal Justice (CRIM) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CRIM 410 - Introduction to Criminology
Credits: 4
This course introduces the learner to the field of criminology by reviewing the historical underpinnings of the modern-day study of crime and criminals, examining the theoretical causes of crime and criminality, and evaluating society's responses to crime. Learners are introduced to the sociological, biological, and psychological schools of criminological thought. Topics include crime statistics and social and legal mechanisms used to address criminal activity and the individual criminal.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): CRIM 500G
Grade Mode: Letter Grading

CRIM 425 - Juvenile Justice
Credits: 4
This course will take an in-depth view of how the components of the criminal justice system address juvenile delinquency. How and why a juvenile is entered into the criminal justice system will be examined and alternatives to entry will be explored. These alternatives include diversionary programs and second-chance protocols. Social and economic disparities will be discussed regarding how those factors figure into the propensity of crimes being committed by juveniles. Additionally, youthful offender procedures that result in juveniles being charged, tried, and, in some cases, incarcerated in the adult system will be explored. Lastly, the course will explore the basic competencies of professionals who interact with juveniles in the criminal justice system and in the agencies that contribute to the rehabilitation and reintegration of juveniles after a finding of delinquency.
Attributes: HumanBehavSocial Sys (Gen Ed); Social Science (Discovery)
Equivalent(s): CRIM 525G
Grade Mode: Letter Grading

CRIM 544 - Special Topics: Lower Level
Credits: 1-4
A study of current and variable topics in Criminology. Course content changes from term to term.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CRIM 544G
Grade Mode: Letter Grading

CRIM 555 - The Criminal Justice System
Credits: 4
This course presents an overview of the criminal and juvenile justice systems and the variety of agencies charged with the detection, prosecution, and subsequent application of penalties. The course begins with an examination of the extent and nature of crime in the U.S. It then reviews the subsystems associated with the criminal and juvenile justice fields, including the police, criminal and juvenile courts, and corrections and treatment processes. The review of each subsystem includes a discussion of its historical development as well as issues currently confronting the profession. Students also explore and evaluate differing philosophies underlying corrections. The course concludes with an examination of the future of the criminal and juvenile justice systems from political and sociological perspectives.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): CRIM 555G
Grade Mode: Letter Grading

CRIM 600 - Crime Prevention and Control
Credits: 4
This course focuses on situational crime prevention by both law enforcement personnel and the general public. Theoretical and practical aspects of techniques of situational prevention are examined. Students formulate their own theories on crime prevention and control, and evaluate methods for the reduction of crime and corresponding financial and social costs.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-.
Equivalent(s): CRIM 600G
Grade Mode: Letter Grading

CRIM 644 - Special Topics: Upper Level
Credits: 1-4
A study of current and variable topics in Criminology. Course content changes from term to term. It is expected that the learner will have prior coursework or experience in the subject area.
Repeat Rule: May be repeated up to unlimited times.
Equivalent(s): CRIM 644G
Grade Mode: Letter Grading

CRIM 645 - Crime Victim Rights and Remedies
Credits: 4
The course examines the various relationships between the crime victim and the police, courts, advocates, and other agencies such as the media. Specific categories of crime victims are studied, including drunk driving victims, sexual assault victims, domestic violence and stalking victims, hate crime victims, and child and elderly victims.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOC 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D-.
Equivalent(s): CRIM 603G
Grade Mode: Letter Grading

CRIM 680 - Corrections, Probation and Parole
Credits: 4
This course presents an extensive examination of the organization and operations of correctional, probation and parole agencies as particular segments of the United States criminal justice system. Learners study corrections, probation and parole from a variety of standpoints, including historical and philosophical foundations, the theoretical concerns that the options present, as well as the practical aspects of those services. Other topics include a review of community-based corrections, options for treatment and intermediate sanctions, issues surrounding court orders and pre-sentence reports, and an examination of correctional and probation and parole officers' professional roles, and the legal decisions affecting practice in this field.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): (CRIM 410 with a minimum grade of D- or CRIM 500G with a minimum grade of D-) and (CRIM 555 with a minimum grade of D- or CRIM 555G with a minimum grade of D-).
Equivalent(s): CRIM 606G
Grade Mode: Letter Grading

CRIM 707 - Constitutional Law
Credits: 4
This course examines how the U.S. Supreme Court and state supreme courts interpret constitutional issues of major societal importance through critical analysis of key decisions and cases. Through reading primary material, students will trace the historical development of constitutional law with an emphasis on studying the contextual factors that have shaped the Court's controversial decisions.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-) and (POL 554 with a minimum grade of D- or POL 554G with a minimum grade of D-).
Equivalent(s): CRIM 607G
Grade Mode: Letter Grading

CRIM 725 - Ethical Decision Making in the Criminal Justice System
Credits: 4
This course introduces students to the discipline of ethical decision making by criminal justice professionals in a system where great authority is given, and even greater responsibility is expected. The concept of discretion will be an ever-present factor in discussions of critical decisions made by law enforcement, the courts, and corrections. In this course, students will be exposed to ethical scenarios, and they will be asked to discuss what the proper course of action was, or should have been. In addition to real-life case studies, students will be asked to work through challenging hypotheticals that test their understanding of ethical dilemmas in the criminal justice field. In sum, the student of this course will have the opportunity to develop a much greater awareness of the ethical tests faced by criminal justice professionals on a daily basis and the expectations of society in that regard.
Attributes: Writing Intensive Course
Prerequisite(s): CRIM 555 with a minimum grade of D- or CRIM 555G with a minimum grade of D-.
Equivalent(s): CRIM 610G
Grade Mode: Letter Grading

CRIM 795 - Integrative Capstone: Internship in Criminal Justice
Credits: 4
This capstone course is a field-based internship designed to develop and hone the practical application skills of a Criminal Justice major. The course requires students to integrate the knowledge and skills gained from other courses in the program and to demonstrate the ability to apply their knowledge to new subject matter and practical situations. Students apply for an internship at a self-selected site and negotiate the terms of the internship experience with a site supervisor under the auspices of their faculty mentor. The internship requires documented evidence of eighty hours of supervised experience and practice in a field setting where criminal-justice-related knowledge and skills are applied. NOTE: Registration for this course, an internship, is by permission of Academic Affairs. Early registration deadlines may apply. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): CRIM 651G
Grade Mode: Letter Grading

CRIM 797 - Integrative Capstone: Project in Criminal Justice
Credits: 4
This capstone course in the Criminal Justice degree program is designed to offer learners the opportunity to reflect upon and synthesize prior learning and to apply it at a higher level of understanding. Knowledge and skills from other courses in the program and from experience are integrated in focused individual projects. Such projects might include independent research or a work-related or other applied project. Analysis of the individual project in light of theory and research in the field is a key component of this course. Prior to capstone enrollment, students are expected to complete the majority of their required major courses. Students should consult with their advisor regarding specific major courses that may be completed with their capstone. NOTE: Students who were admitted to the college before Fall 2019 and have remained active in their original catalog year are not required to take IDIS 601.
Attributes: Writing Intensive Course
Prerequisite(s): (CRIT 602 with a minimum grade of D- or CRIT 602G with a minimum grade of D- or CRIT 502G with a minimum grade of D-) and (IDIS 601 with a minimum grade of D- or IDIS 601G with a minimum grade of D-).
Equivalent(s): CRIM 650G
Grade Mode: Letter Grading

Critical Thinking (CRIT) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

CRIT 501 - Introduction to Critical Inquiry
Credits: 4
Introduction to Critical Inquiry provides the foundation for an informed and meaningful college experience through the cultivation of intellectual curiosity. Through the study of media and popular culture and the completion of short writing assignments, students learn how to develop and scale a personally-motivated research question, refine their topic, determine effective search strategies for finding credible and appropriate information, and learning to recognize bias and logical fallacies. Important aspects of the research process are learning how to analyze different types of argument and to evaluate information sources from a variety of venues. Critical Inquiry fosters the self-awareness and intellectual perspective that are the hallmarks of well-educated persons and lifelong, engaged students in the twenty-first century.
Attributes: Critical Inquiry (Gen Ed); Inquiry (Discovery); Writing Intensive Course
Prerequisite(s): ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D- or ENGL 401 with a minimum grade of D-.
Equivalent(s): CRIT 501G
Grade Mode: Letter Grading

CRIT 602 - Advanced Critical Analysis and Strategic Thinking
Credits: 4
What is the link between an academic degree and one's career or professional development? In this course, students explore trends in their field of study and connect them to their academic and professional context. Students synthesize and present their research findings though a variety of formal and informal written communication formats. This course reinforces critical analysis and strategic thinking skills for students developing their course of study, seeking professional advancement, or preparing for future graduate study. Students with a regionally-accredited associate degree do not have to take either ENG 420 or CRIT 501 as prerequisites for CRIT 602.
Attributes: Critical Inquiry (Gen Ed); Writing Intensive Course
Prerequisite(s): (ENG 420 with a minimum grade of D- or ENG 500G with a minimum grade of D-) and (CRIT 501 with a minimum grade of D- or CRIT 501G with a minimum grade of D-) or (Has Accred Associate Deg with a score of WAIV).
Equivalent(s): CRIT 502G, CRIT 602G
Grade Mode: Letter Grading

CRIT 603 - Critical Inquiry in Prior Learning Assessment
Credits: 4
This course is designed for adults who have identified prior experiential learning equivalent to outstanding degree requirements through a systematic process of goal-setting and self-assessment in the context of degree-planning. Students use the conceptual framework of critical inquiry to demonstrate this learning in an eportfolio. For each course-equivalent credit request, the portfolio will identify the context for the student's learning in the subject matter, trace the progression of the learning over time, and explain how the learning is equivalent to a degree requirement. The student will demonstrate mastery of each learning outcome for the credit request and integrate the learning outcomes in a relevant personal case study in decision-making. Two credit requests that meet the criteria to be submitted to Academic Affairs for evaluation are required to pass CRIT 603. NOTE: Students within 16 credits of their projected degree completion date are not eligible to take CRIT 603.
Attributes: Writing Intensive Course
Prerequisite(s): CRIT 602 with a minimum grade of D- or CRIT 502G with a minimum grade of D- or CRIT 602G with a minimum grade of D-.
Equivalent(s): CRIT 503G, CRIT 603G
Grade Mode: Letter Grading

Data Analytics (DAT)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

DAT 510 - Introduction to Data Analytics
Credits: 4
Data analytics is defined as a scientific process that produces actionable insights. Students will be introduced to the concepts of data analysis, what the role of a data analyst will do, and the tools that are used to perform daily functions. This course will cover data analytics and data governance where students will learn about the fundamentals of data gathering, data mining, and how the decision-making process can be affected. This course also addresses the skills that are required to effectively communicate data to co-workers, leadership, and stakeholders. Excel proficiency is expected prior to enrollment in this course. Students should consider completing CMPL 402 Excel if they have not completed an Excel course in transfer.
Equivalent(s): DATA 510G
Mutual Exclusion: No credit for students who have taken BUS 515.
Grade Mode: Letter Grading

DAT 535 - Data Mining, Cleaning, and Visualization
Credits: 4
This course immerses students in virtual lab environments for hands-on experience with concepts in data modeling, data cleaning, data mining, and data visualization. Students will use industry-standard applications like Power BI to prepare data for customized dashboards and graphical representations using various data types. The applications will focus on creative, personalized data storytelling in culminating presentations.
Prerequisite(s): DAT 510 with a minimum grade of D- or DATA 510G with a minimum grade of D- or BUS 675 with a minimum grade of D-.
Equivalent(s): DATA 520G
Grade Mode: Letter Grading

DAT 610 - Data Analytics and Technologies
Credits: 4
Students will have the opportunity to explore contemporary systems and technologies impacting the field of data analytics, including the cloud, AI, and machine learning. This course will also explore areas of technology that provide opportunities for future professional specialization, such as emerging Big Data technologies that support the work of data analysts, and the role of Information Technology (IT).
Prerequisite(s): DAT 535 with a minimum grade of D- or DATA 520G with a minimum grade of D-.
Equivalent(s): DATA 610G
Grade Mode: Letter Grading

DAT 620 - Data Analytics in Business Intelligence
Credits: 4
This course will examine the role of data analysis through the lens of multiple business disciplines such as business, health care, and marketing. Students will have the opportunity to explore key areas in the analytical process, including how data are created, stored, and accessed. The course covers how businesses and organizations work with data to create environments in which analytics can drive effective and efficient decision making.
Prerequisite(s): DAT 610 with a minimum grade of D- or DATA 610G with a minimum grade of D-.
Equivalent(s): DATA 620G
Grade Mode: Letter Grading

DAT 670 - Advanced Data Analytics
Credits: 4
Students will have the opportunity to explore more advanced data analytics methods such as collaborating on hypothesis testing and performing root cause analysis and practice presenting visualizations of data analysis that highlight the insights gained from analysis. The handling of imperfect data will also be covered.
Prerequisite(s): (DAT 620 with a minimum grade of D- or DATA 620G with a minimum grade of D-).
Equivalent(s): DATA 630G
Grade Mode: Letter Grading

Decision Sciences (DS)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

DS 444 - Meaning of Entrepreneurship
Credits: 4
This course explores the idea and ideals of entrepreneurship, the creating of value through individual initiative, creativity and innovation. The idea of entrepreneurship is of significant relevance in the highly dynamic and competitive 21st century global economy. It is an idea that is important for students to understand and to critically consider and apply. Encourages the development of multiple views of entrepreneurship, and uses a broad, not just business, approach to the study as it engages students in the subject matter. Open to all majors.
Attributes: Environment,TechSociety(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

DS 520 - Topics in Entrepreneurship/Decision Sciences
Credits: 4
Special topics in entrepreneurship, information systems and business analytics. Vary by semester.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

DS 550 - Introduction to Angel and Venture Capital Investing
Credits: 2
This course serves as the foundational course for students entering the Mel Rines Student Angel Investment Fund as Associates. This introductory course provides students with essential knowledge and skills in private equity, angel investing, and venture capital, preparing them for hands-on participation in the Rines Angel Fund in DS 650. The course offers a comprehensive overview of the private equity landscape, with particular emphasis on early-stage investing from both the entrepreneur's and investor's perspectives. Students will learn the fundamental processes involved in evaluating startup companies, conducting preliminary research, and supporting investment analysis activities.
Repeat Rule: May be repeated for a maximum of 8 credits. May be repeated up to 4 times.
Grade Mode: Credit/Fail Grading

DS 620 - Topics in Decision Sciences
Credits: 1-4
Special topics, vary by semester.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

DS 650 - The Mel Rines Student Angel Investment Fund
Credits: 2
The Mel Rines Student Angel Investment Fund is a cross-disciplinary, undergraduate, student-managed private equity fund. The Fund allows students to learn angel and venture capital investment strategies through the first-hand experience of investing in start-up companies. Students evaluate entrepreneur pitches, conduct due diligence on potential investments, work with angel partners, and present to an investment committee their recommendations to invest capital. Students interested in joining the Fund must submit an application and undergo an interview process. Students in good standing may retake the course.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Credit/Fail Grading

DS 652 - Artifex
Credits: 2
Artifex aims is to equip its members with the essential skills of a data scientist. The course delivery is a mix of lectures and project-based learning. Lectures and course content are tailored to the business analytics project(s) we are working on in any given semester. Artifex is also an active and growing student club. As such, Artifex is a great opportunity to network with other students and professionals who are passionate about using data to improve the way businesses work.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Credit/Fail Grading

DS 654 - Sports Analytics Lab
Credits: 2
This course will explore "real-world" applications of data and insights to UNH athletics and outside sports organizations. You will learn terms commonly used in sports analytics and begin to understand some of the complex decisions that an athletic organization makes with data, because you will be helping them do it! This course is group project oriented with a few whole class meetings to share best practices and outcomes. Students will be split into teams of 3-5and be assigned to a sports client.
Repeat Rule: May be repeated for a maximum of 12 credits. May be repeated up to 6 times.
Grade Mode: Credit/Fail Grading

DS 662 - Programming for Business
Credits: 4
Introduces students to programming concepts. Covers fundamentals including functions, variable types, conditionals, and data structures. Students apply these concepts to a variety of business analytics problems including data collection, wrangling, reshaping, summarizing , and visualization.
Prerequisite(s): ADMN 410 with a minimum grade of C-.
Equivalent(s): DS 562
Grade Mode: Letter Grading

DS 671 - Data Visualization and Prescriptive Analytics
Credits: 4
The course focuses on Descriptive and Prescriptive Analytics. Students gain modeling and data analysis and visualization skills necessary to address a wide variety of business problems. In Descriptive Analytics, students learn principles of data visualization, data cleanup and wrangling, advanced data analysis and visualization tools, and dashboard design. In Prescriptive Analytics, students learn advanced spreadsheet modeling/programming, formulating and solving a variety of optimization problems, and performing sensitivity analysis.
Prerequisite(s): (ADMN 410 with a minimum grade of C- or CS 415 with a minimum grade of C-) and (ADMN 510 with a minimum grade of C- or MATH 539 with a minimum grade of C- or MATH 540 with a minimum grade of C-).
Equivalent(s): DS 766
Mutual Exclusion: No credit for students who have taken SC 671.
Grade Mode: Letter Grading

DS 673 - Database Management
Credits: 4
Provides students with the skills necessary to understand the database environment of the firm. Topics include data models, normalization, SQL, data warehouses, and nosQL databases. Students learn to design and implement moderately complex relational databases in multi-user, client/server environments.
Prerequisite(s): ADMN 410 with a minimum grade of C-.
Equivalent(s): DS 773
Grade Mode: Letter Grading

DS 720 - Topics in Decision Sciences II
Credits: 4
Introduces students to commonly used predictive analytics techniques and necessary programming with focus on regression analysis and model building. The course coverage is supported with real data applications and illustrations. The topics include linear and non-linear regression model building/selection, residual analysis, search algorithms, generalized linear models/classification, and clustering algorithms.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

DS 741 - Startup Analytics
Credits: 4
This course introduces students to data analytics for startup capital management, with a special focus on leveraging AI and machine learning (ML) to optimize financial strategies, funding decisions, and investor relations. Through a hands-on approach, students will learn how to use data and machine learning techniques to forecast capital needs, evaluate funding sources, track startup performance, and optimize investor interactions. The course blends fundamental concepts of startup capital management with modern data-driven tools to help students make informed, data-centric decisions at each stage of startup growth.
Prerequisite(s): ADMN 570 with a minimum grade of C-.
Grade Mode: Letter Grading

DS 742 - Internship in Entrepreneurial and Management Practice
Credits: 4
Involves working for leading companies and dynamic entrepreneurs, as well as classroom instruction. The priority experiential, real-world, and real-time learning in the high-growth environment of entrepreneurial ventures. Focus on several topic areas, including venture capital.
Grade Mode: Letter Grading

DS 743 - Venture Scaling Strategies
Credits: 4
"Venture Scaling Strategies" is an entrepreneurship course designed to equip students with the essential tools and frameworks to scale a business successfully. Based on Verne Harnish's book Scaling Up, this course dives into the critical areas of People, Strategy, Execution, and Cash to help students develop comprehensive scaling strategies. Through practical applications, case studies, and interactive discussions, students will learn how to navigate the complexities of growth, create effective strategic plans, manage financial resources, build high-performing teams, and implement operational systems to support expansion. Ideal for aspiring entrepreneurs and business leaders, this course provides the roadmap to take ventures to the next level. The course will include a practical, hands-on, engagement project.
Grade Mode: Letter Grading

DS 772 - Predictive Analytics and Modeling
Credits: 4
The course introduces students to commonly used predictive analytics methods and necessary programming with a focus on regression analysis, classification, and model building. The course coverage is supported using real data applications and illustrations. The topics include linear and non-linear regression model building/selection, residual analysis, search algorithms, generalized linear models/classification, and applied machine learning methods for business use.
Prerequisite(s): ADMN 510 with a minimum grade of C- or MATH 539 with a minimum grade of C- or MATH 540 with a minimum grade of C-.
Grade Mode: Letter Grading

DS 774 - AI and Emerging Technologies in Business
Credits: 4
This course immerses students in the intersecting realms of technology and business. Students will explore key domains such as Artificial Intelligence, Cybersecurity, Global e-Business, Application Design, and Enterprise Systems, engaging in a hands-on, collaborative curriculum. Students will develop a strategic perspective on using IT innovations to drive business value, tackle real-world challenges, and build in-demand skills for dynamic technology careers.
Prerequisite(s): ADMN 410 with a minimum grade of C-.
Grade Mode: Letter Grading

DS 775 - Corporate Project Experience
Credits: 4
Provides real-life experience in organizations. Work in groups on information systems and/or business analytics projects identified by sponsoring organizations. Integrate concepts and skills learned in prior business, analytics, and information systems courses. Learn project management concepts, work with project management tools, and use presentation techniques. Two ISBA Electives required prior to taking this course.
Attributes: Writing Intensive Course
Prerequisite(s): DS 673 with a minimum grade of C-.
Grade Mode: Letter Grading

DS 799H - Honors Thesis in Decision Sciences
Credits: 4
Supervised research leading to the completion of an honors thesis or project in decision sciences; required for graduation from the honors program in business administration.
Attributes: Honors course; Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

Earth Sciences (ESCI)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ESCI 400 - First-year Experience
Credits: 1
Meet your peers, connect with faculty, and discover key resources in the Department of Earth Sciences. Through weekly sessions, we'll explore exciting research being undertaken in the department, professional opportunities, and campus support while building your ESCI cohort. Required for all first-semester Earth Science majors.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

ESCI 401 - Dynamic Earth
Credits: 4
In this course we study the minerals, rocks and fluids which make up the Earth; the landforms on the surface of the Earth such as mountains, flood plains and stratovolcanoes; and processes such volcanism, earthquakes, erosion and glaciation that create and alter them. The rock cycle and plate tectonics are used to integrate activity at the surface of the Earth with processes in the Earth's interior. Campus field exercises. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Mutual Exclusion: No credit for students who have taken ESCI 409.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 402 - Earth History
Credits: 4
Course provides knowledge and skills necessary to interpret, understand, and appreciate the Earth's 4.6 billion-year history. The first third of the course introduces basic principles, including geological materials, plate tectonics, geological time, fossil preservation, and biological evolution. The remainder of the course tells the story of Earth history through case studies that illustrate scientific methods used to reconstruct critical events in our planet's evolution through time. Topics include the origin of the Earth, the Cambrian explosion of life, building of the Appalachians, assembly of Pangaea, the rise and fall of dinosaurs, the formation of the Rocky Mountains, mammalian evolution, human origins, and Pleistocene glaciation. Students gain experience in making geological observations through laboratory exercises and during one afternoon field trip. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 405 - Global Environmental Change
Credits: 4
Human activity rivals nature as an agent of change in the global environment. Explores evidence of environmental degradation in Earth's crust, hydrosphere, and atmosphere; considers prospects for future sustainable human health, diversity, and economic development. Problem solving through critical analysis of environmental variables.
Attributes: Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 409 - Geology and the Environment
Credits: 4
Environmental impact of geologic processes; natural hazards, landslides, earthquakes, volcanoes, flooding, erosion, and sedimentation; land exploitation and site investigations; environmental considerations of water-supply problems; the recovery of energy and mineral resources. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Mutual Exclusion: No credit for students who have taken ESCI 401.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 410 - Earth Hazards
Credits: 4
Introductory-level physical science course concerning Earth processes that impact humanity, with natural disasters as the focus. Topics include the causes and effects of earthquakes, tsunamis, volcanic eruptions, floods, and landslides. The course covers basic concepts of physical geology using hands-on-activities, small-group discussions, and in-class demonstrations and is intended for students with little or no previous experience in Earth sciences.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 420 - Our Solar System
Credits: 4
Course focuses on the nature and formation of our solar system and the planets associated bodies it contains, with emphasis on the physical and chemical processes significant in the system's origin and evolutionary history. Our approach provides the basis for understanding key differences between the Earth-like terrestrial planets and those farther out in the solar system (the gas giants). We also explore recent discoveries on Mars and moons of the gas giant planets and their implications for the search for life elsewhere in our solar system.
Attributes: Discovery Lab Course; Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 444A - Philosophy of Earth Science
Credits: 4
Course provides an introduction to the discipline of Philosophy of Science, but from an Earth Science perspective. Considers various philosophical perspectives on the nature of science and scientific progress, drawing from works by thinkers such as Aristotle, Popper, Kuhn and Lakatos. Particular attention is given to the following questions: What is scientific knowledge? Is the acquisition of scientific knowledge a rational process? And, what makes some scientific discoveries "revolutionary"? These questions are considered using examples from the history of scientific progress in the Earth Sciences, focusing on groundbreaking discoveries such as the age of the earth, the evolution of organisms as observed in the fossil record, sea-floor spreading, and modern-day global warming.
Attributes: Environment,TechSociety(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

ESCI 451 - Earth in Film
Credits: 4
Introductory-level focusing on interactions between Earth system and its inhabitants, with special emphasis on understanding societal implications of Earth system processes. Topics include Earth's interior processes, volcanism, earthquakes, climate change, storms, tornadoes, and biological change. Students are expected to learn about Earth system processes and critique cinematic portrayal of such processes. Taken together this approach affords building a foundation in the natural sciences and provides insights into societal portrayal of scientific ideas.
Attributes: Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 501 - Introduction to Oceanography
Credits: 4
Introduces students to the four oceanographic disciplines: the geology of the ocean basins, including the creation of oceans and continents. The physics of the seas, including the origin of the ocean currents and their effect on the Earth's climate. The chemistry of the ocean waters, including how the distribution of elements reflects circulation and biology. The life in the ocean, including animals, plants and microbes, and humanity's influence on them. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery); Inquiry (Discovery)
Mutual Exclusion: No credit for students who have taken SCI 480.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 502 - Beaches and Coasts
Credits: 4
Introductory-level physical science course on ocean, air, and landform dynamics affecting beaches and coasts, with considerations of natural processes associated with waves and currents, wind and rain, sediments and rocks, and ecology. Emphasis is placed on impacts on ecosystem and human health, the economics of coastal industry, and consequences of pollution and engineering practices. Topics are approached via real world examples, small-group discussions, and field trips to local sites. Recitation.
Attributes: Physical Science(Discovery)
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 512 - Principles of Mineralogy
Credits: 4
Minerals record variations in chemistry, pressure, temperature, and time in the Earth. This course emphasizes minerals and mineral assemblages in rocks, sediments and soils; their identification, symmetry, chemistry, equilibria, and physical properties. Introduction to x-ray diffraction and optical techniques. Special fee for field trips. Lab.
Prerequisite(s): CHEM 403 with a minimum grade of D- or CHEM 405 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 514 - Introduction to Climate
Credits: 3
The climate as a system controlled by the fluid, chemical, geological, and biological dynamics of the earth. Investigation of natural and man-made climate change over the period of 100 to 100 million years, including the greenhouse effects, tectonic climate forcing, astronomic (Milankovitch) cycles, deep ocean circulation, and biological feedback. How past climate is measured.
Prerequisite(s): ESCI 401 with a minimum grade of D- or ESCI 409 with a minimum grade of D- or ESCI 402 with a minimum grade of D- or ESCI 501 with a minimum grade of D-.
Grade Mode: Letter Grading

ESCI 530 - Geological Field Methods
Credits: 4
An introduction to basic geologic field mapping of bedrock and surficial materials using pace and compass, surveying and GPS techniques. Observational data plotted on topographic maps and/or aerial photographs, accompanied with stratigraphic measurements and sampling sites where appropriate, provide the basis for interpretative maps, cross sections and written reports and a field context for more advanced Earth sciences course work and independent research. One weekend field trip to western or northern New England.
Attributes: Writing Intensive Course
Prerequisite(s): (ESCI 401 with a minimum grade of D- or ESCI 409 with a minimum grade of D-) and ESCI 402 with a minimum grade of D-.
Equivalent(s): ESCI 534
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 534 - Techniques in Environmental Sciences
Credits: 3
Elementary mapping and monitoring methods. Map interpretation, preparation of maps; survey techniques including pace and compass, leveling, and global positioning systems; environmental monitoring. Field lab. Cannot receive credit if taken after receiving credit for ESCI 530 or NR 542.
Attributes: Writing Intensive Course
Equivalent(s): ESCI 530, NR 542
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 561 - Landscape Evolution
Credits: 4
This course focuses on the processes that shape the Earth's surface. Lectures discuss the development and evolution of landscapes in a wide variety of climatic and geologic settings, with an emphasis on understanding the processes that create surficial deposits and landforms. Labs involve topographic and digital map interpretation, geomorphic data analysis, and short field exercises. Students also gain practical experience in geomorphic research by teaming up and completing a required term project. During the final week of classes, student research teams present their findings to the class.
Prerequisite(s): ESCI 401 with a minimum grade of D- or ESCI 402 with a minimum grade of D- or ESCI 409 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 614 - Introduction to Petrology
Credits: 0 or 4
Description, classification and formation of igneous, sedimentary, and metamorphic rocks in the field, hand specimen, and thin section. Lab and field trips.
Prerequisite(s): (ESCI 401 with a minimum grade of D- or ESCI 409 with a minimum grade of D- or ESCI 402 with a minimum grade of D- or ESCI 501 with a minimum grade of D-) and ESCI 512 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 630 - Earth's Crust: Formation and Deformation
Credits: 4
In this course students will learn to identify the major rock types of Earth's crust, discuss how they form and learn to identify and measure geologic strain indicators in rocks and use them to interpret the paleo- or modern stress fields responsible for their deformation. Students will learn to portray and visualize petrologic and structural data sets on stereonets, geologic maps, and in cross sections.
Prerequisite(s): ESCI 512 with a minimum grade of D- or NR 501 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 631 - Structural Geology
Credits: 4
Structural units of the Earth's crust and mechanics of their formation. Lab and fieldwork.
Prerequisite(s): ESCI 530 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 633 - Sea Level Rise and Fall
Credits: 4
Explore sea-level change from the origin of Earth's oceans to today's climate crisis. Examine the connection between solid-Earth dynamics and past climate. Learn to analyze geological and instrumental records, model sea-level processes, and consider archaeological and societal impacts. Through case studies and hands-on projects, we examine how Earth processes and human experiences shape our understanding of past, present, and future sea-level change. Course has a lab component.
Prerequisite(s): (MATH 426 (may be taken concurrently) with a minimum grade of D- or MATH 426H (may be taken concurrently) with a minimum grade of D-) and (PHYS 407 (may be taken concurrently) with a minimum grade of D- or PHYS 407S (may be taken concurrently) with a minimum grade of D- or PHYS 407H (may be taken concurrently) with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 642 - Biogeosciences in the Earth System
Credits: 3
This interdisciplinary course applies concepts from chemistry, physics, biology and geology to understand biogeochemical cycles in the Earth system. Course topics includes terrestrial, ocean and freshwater environments; water and energy cycles; carbon, nitrogen, phosphorous and sulfur cycles; biogeochemical cycles through Earth history and a synthesis of how humans have impacted the Earth system. Students will use quantitative methods to explore relationships between causes and effects, positive and negative feedbacks, and thresholds in the Earth systems.
Prerequisite(s): (MATH 426 with a minimum grade of D- or MATH 424B with a minimum grade of D-) and (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D- or NR 561 with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 654 - Fate and Transport in the Environment
Credits: 4
An introduction to the basic processes controlling the migration and transformation of chemicals in surface water, groundwater, and the atmosphere, including advection, diffusion, dispersion, retardation, and chemical reaction. Extensive practice with quantitative problem solving in the environmental sciences, including constructing and using box models.
Prerequisite(s): (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D- or NR 561 with a minimum grade of D-) and (MATH 425 with a minimum grade of D- or MATH 424B with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 690 - Capstone & Professional Development
Credits: 1
Students in ESCI 690 will develop (via participation, assignments and question-asking) insights into potential capstone and post-graduate career and academic opportunities in the Earth Sciences. The course is designed to help students gain experience in learning different ways of communicating scientific research and material to a variety of audiences. Finally, students also expected to develop, collaboratively with a capstone mentor, a capstone plan.
Grade Mode: Credit/Fail Grading

ESCI 701 - Quantitative Methods in Earth Sciences
Credits: 4
Introduces quantitative tools necessary for upper level Earth Science courses. Includes basic statistical descriptions of spatially and temporally varying data, curve fitting, and time-series analysis with emphasis on atmospheric, oceanic and terrestrial data sets. Students learn to construct simple numerical models of Earth Systems. Instruction in data analysis and modeling in Python.
Prerequisite(s): MATH 426 with a minimum grade of D- and (ESCI 401 with a minimum grade of D- or ESCI 402 with a minimum grade of D- or ESCI 409 with a minimum grade of D- or ESCI 501 with a minimum grade of D- or ESCI 514 with a minimum grade of D- or OE 490 with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 705 - Principles of Hydrology
Credits: 4
Basic physical principles important in the land phase of the hydrologic cycle, including precipitation, snowmelt, infiltration and soil physics, evapotranspiration, and surface and subsurface flow to streams. Problems of measurement and aspects of statistical treatment of hydrologic data. Field trips. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): ESCI 654 with a minimum grade of D- or ((MATH 425 with a minimum grade of D- or MATH 424B with a minimum grade of D-) and (PHYS 401 with a minimum grade of D- or PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-)).
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 710 - Groundwater Hydrology
Credits: 4
Principles for fluid flow in porous media with emphasis on occurrence, location, and development of groundwater but with consideration of groundwater as a transporting medium. Major topics include well hydraulics, regional groundwater flow, exploration techniques, and groundwater modeling. Laboratory exercises involve use of fluid, electrical, and digital computer models to illustrate key concepts. Lab.
Prerequisite(s): ESCI 654 with a minimum grade of D- or CEE 650 with a minimum grade of D- or NR 504 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 715 - Hydrologic Data Analysis
Credits: 4
Introduction to data analysis techniques necessary to quantify and explore terrestrial water budgets, including rates of precipitation, evapotranspiration, and runoff; recurrence intervals; and construction of rating curves. Topics will include data importation, data cleaning, data manipulation, and curve-fitting, with an emphasis on visual and exploratory analysis. Project-based labs will involve active application of newly learned techniques to publicly available USGS and NOAA datasets. Students will gain experience using Python Pandas and artificial intelligence (AI) coding tools for hydrological applications. No programming experience required.
Grade Mode: Letter Grading

ESCI 720 - Ocean Measurements Lab
Credits: 4
Measurements of fundamental ocean processes and parameters. Emphasizes understanding typical coastal and estuarine measurements their applications, and the use of acquired data in terms of the effects on structures and processes in the ocean.
Equivalent(s): OE 710
Grade Mode: Letter Grading

ESCI 726 - Igneous and Metamorphic Petrology
Credits: 4
This course focuses on the origin and evolution of igneous and metamorphic rocks from field, petrographic mineral chemistry, experimental, and theoretical studies. Igneous systems include volcanic and plutonic suites, with emphasis on mineralogic records of magma chamber systematics. Metamorphic systems include pelitic, mafic, and calc sillcate rocks, with special emphasis on closed- and open-system reactions, mutl-systems, reaction space, and pressure-temperature-time paths. Field trips. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): ESCI 614 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 734 - Global Geophysics
Credits: 4
This course focuses on the structure of the Earth and dynamic processes within it. Topics include: plate tectonics, earthquakes and seismic waves, mantle convection, rheology and ice age dynamics, Earth's gravity field and geodesy, and the geodynamo. Lab.
Prerequisite(s): MATH 426 with a minimum grade of D- and PHYS 408 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 741 - Geochemistry
Credits: 4
Course focuses on the application of chemical principles to solve problems in the Earth sciences. Students learn the chemical tools of thermodynamics and kinetics, element partitioning, conservation of mass, and isotope geochemistry. Explore geochemical properties/ processes in the deep Earth and the Earth surface, atmosphere and marine systems, and cosmo-chemistry and investigate the interactions between these components of the Earth system. Lab.
Attributes: Writing Intensive Course
Prerequisite(s): (MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 745 - Isotope Geochemistry
Credits: 4
Course focuses on the application of radiogenic, radioactive and stable isotopes to improve students' knowledge about the processes and timescales relevant to the formation of the planet and solar system, the evolution of the Earth system and interactions in the hydrosphere and biosphere. Topics include geochronology, tracer applications, Earth surface applications, as well as applications in the hydrosphere and biosphere. Systems discussed include the classic radiogenic systems (K-Ar, Rb-Sr, Sm-Nd, Lu-Hf and U-Th-Pb), traditional (H, C, N, O) as well as nontraditional (e.g., Mg, Ca, Fe) stable isotope systems, and radioactive isotopes (e.g., radiocarbon). Course consists of lecture, where students are exposed to these applications, and a lab section to work through any questions on the homework assignments, discuss relevant papers from the literature, and carry out a project. Lab.
Prerequisite(s): (MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 747 - Aqueous Geochemistry
Credits: 4
The chemical processes that determine the composition of aquatic systems such as rivers, lakes, groundwater and the ocean. The goal is to quantitatively understand the behavior of inorganic species such as carbon dioxide, nutrients, trace metals and inorganic pollutants in natural waters. Topics include, acid-based equilibria, carbonate chemistry, reduction-oxidation reactions, organic complexation and mineral precipitation and dissolution. Lab. Prereq: one year college chemistry or geochemistry or permission.
Prerequisite(s): (MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 749W - Ocean Biogeochemistry
Credits: 3
This course focuses on the elemental cycles of the major bioactive elements carbon, nitrogen, phosphorus, oxygen, and iron in the ocean. Topics include the biological and microbial carbon pumps, nitrogen fixation, iron fertilization, the carbon-climate system, ocean acidification, and deoxygenation. This course will provide insight and corresponding critical review of the current outstanding scientific questions being pursued by ocean biogeochemists. Students will become familiar with data analysis and visualization using open-source software.
Attributes: Writing Intensive Course
Prerequisite(s): ESCI 501 with a minimum grade of D-.
Grade Mode: Letter Grading

ESCI 752 - Chemical Oceanography
Credits: 3
This course investigates the physical and biogeochemical processes that determine the composition of seawater. Topics include biological effects on chemistry, ocean nutrient cycles, air-sea gas exchange, radiogenic and stable isotopes as tracers of ocean processes, sediment and trace-metal chemistry.
Prerequisite(s): (MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D- or MATH 425H with a minimum grade of D-) and (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 754 - Sedimentology
Credits: 4
This course focuses on modern sedimentary processes and ancient sedimentary records through the examination, identification, and interpretation of sediments and sedimentary rocks. Topics such as sediment transport mechanisms, depositional environments, and time in sedimentary records will provide a strong framework for any student studying Earth processes and sedimentary systems. Lab and field trips.
Prerequisite(s): (ESCI 401 with a minimum grade of D- or ESCI 402 with a minimum grade of D- or ESCI 409 with a minimum grade of D- or ESCI 501 with a minimum grade of D-) and ESCI 512 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 756 - Geotectonics
Credits: 3
The geological record of plate tectonics past and present. The first part of the course focuses on modern tectonic settings with an emphasis on plate geometries, geodynamical processes, and sedimentary products. The second part of the course focuses on reconstructing ancient tectonic settings with an emphasis on methodology (paleomagnetism, basin analysis, provenance) and case studies (e.g. India-Asia collision). Field trip.
Attributes: Writing Intensive Course
Prerequisite(s): ESCI 614 with a minimum grade of D- or ESCI 631 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 758 - Introductory Physical Oceanography
Credits: 3
Descriptive treatment of atmosphere-ocean interaction; general wind-driven and thermo-haline ocean circulation; waves and tides; continental shelf and near-shore processes; instrumentation and methods used in ocean research. Simplified conceptual models demonstrate the important principles.
Prerequisite(s): (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D-) and ESCI 501 with a minimum grade of D-.
Grade Mode: Letter Grading

ESCI 759 - Geological Oceanography
Credits: 4
Major geological features and processes of the ocean floor; geological and geophysical methods; composition of the earth, sedimentary processes, plate tectonics and paleoceanography.
Attributes: Writing Intensive Course
Prerequisite(s): ESCI 501 with a minimum grade of D-.
Grade Mode: Letter Grading

ESCI 760 - Paleoceanography
Credits: 3
This course introduces the basic principles of paleoceanography, such as the preservation of ocean history in sediment archives and the analysis/interpretation of paleoceanographic data. The course focuses on the capabilities and limitations of paleoceanographic techniques, and empowers students to critically assess the strengths and weaknesses of results presented in scientific journals. Topics include Milankovitch cycles, faunal assemblages, temperature and circulation proxies, linear and non-linear responses to climate forcings, abrupt climate events, atmospheric teleconnections and monsoons.
Prerequisite(s): ESCI 514 with a minimum grade of D- and (CHEM 404 with a minimum grade of D- or CHEM 405 with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 762 - Glacial Geology
Credits: 4
This course covers almost everything you always wanted to know about glaciers. More specifically, the course provides a survey of glacier dynamics and processes, with an emphasis on understanding the origin and significance of glacial deposits and landforms. The first half of the course examines the physics of glaciers, and the second half focuses on glacial geologic processes. Lectures discuss glaciers and ice sheets as key agents of geomorphic change and their central role in the Earth's climate system. Labs involve analysis of glaciological data, glacial-geomorphic map interpretation, and short field exercises. A required term project involves a written report and class presentation on a topic of active research in glacial geology.
Attributes: Writing Intensive Course
Prerequisite(s): ESCI 561 with a minimum grade of D-.
Grade Mode: Letter Grading
Special Fee: Yes

ESCI 764 - Spectral Analysis of Geophysical Time Series Data
Credits: 4
This course considers basic exploratory techniques and in-depth spectral analysis for estimation with geophysical time series data, including calculations of confidence intervals and significance testing. This course prepares students for interpreting time series data with science and engineering applications. Topics include sampling theory, filtering, statistics, probability, spectral analysis, and empirical orthogonal functions. Students gain experience in code-writing for the analysis of time series data.
Prerequisite(s): MATH 426 with a minimum grade of D-.
Equivalent(s): OE 764
Grade Mode: Letter Grading

ESCI 765 - Paleoclimatology
Credits: 3
Course reviews the study of past changes in the Earth's climate system. Main discussion topics include astronomical theories of ice ages, Quaternary dating methods, Antarctic and Greenland ice core records, greenhouse gases, marine-based climate proxies, glacial mega-floods, and linkages between ocean circulation and abrupt climate change. Emphasis on climate variability during the Quaternary period (the last approximately 2.6 million years), a time interval dominated by cycles of global glaciation. Lectures include discussion of recent and emerging scientific papers in order to keep pace with the latest findings in paleoclimatic research.
Attributes: Writing Intensive Course
Grade Mode: Letter Grading

ESCI 770 - Geodesy for Ocean Mapping
Credits: 3
Ocean mapping requires precise positioning and navigation. For this we need to precisely know Earth's shape, gravity field, and orientation in space. Data used for this purpose include satellite-based positioning, gravity measurements, and ground surveys. Reference frames can then be created allowing the integration of geometric observations for the creation of mapping products.
Prerequisite(s): (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-) and (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 401 with a minimum grade of D-).
Grade Mode: Letter Grading

ESCI 771 - Positioning for Ocean Mapping
Credits: 4
Ocean mapping necessitates accurate positioning and navigation, which, in turn, rely on a comprehensive grasp of measurement methodologies. This course will comprehensively examine various positioning techniques, including spirit leveling, total stations, Global Navigation Satellite Systems (GNSS), inertial navigation systems (INS), and underwater acoustic positioning systems. Emphasis will be placed on the observational methodologies associated with each technology, along with the propagation of observation uncertainty.
Prerequisite(s): (ESCI 770 with a minimum grade of D- or OE 770 with a minimum grade of D-) and (MATH 426 with a minimum grade of D- or MATH 426H with a minimum grade of D-) and (PHYS 407 with a minimum grade of D- or PHYS 407S with a minimum grade of D- or PHYS 407H with a minimum grade of D- or PHYS 401 with a minimum grade of D-).
Equivalent(s): OE 771
Grade Mode: Letter Grading

ESCI 777 - GIS for Earth & Environmental Sciences
Credits: 4
Geospatial technologies provide insight into spatial and temporal aspects of environmental and earth systems. Students will master basic skills of a geographical information system. Weekly laboratory exercises will build upon a foundation of conceptual knowledge and data processing skills. Focus on applied research questions and projects will be addressed. The course will use the opensource program QGIS. Additional work will develop programming skills using the python language. Programming background is not a requirement but beneficial.
Grade Mode: Letter Grading

ESCI 778 - Remote Sensing Earth & Environmental Sciences
Credits: 4
Remote sensing provides insight into spatial and temporal aspects of environmental and Earth systems. Students will examine digital image processing techniques, different sensor and platform technologies, and new trends and frontiers in remote sensing science. Weekly laboratory exercises build upon conceptual knowledge, data processing skills, and development of programming skills. Applied research questions and projects will use Google Earth Engine. Hyperspectral, lidar, and unmanned aerial systems will be presented.
Grade Mode: Letter Grading

ESCI 795 - Topics
Credits: 1-4
Geologic, hydrologic, and oceanographic problems and independent studies by means of conferences, assigned readings, and field or laboratory work fitted by ESCI faculty to individual student needs; or new or specialized courses. Topics include geochemistry; geomorphology; geophysics; glaciology; groundwater; structural and regional geology; crystallography; mineralogy; petrology; thermodynamics; ore deposits; earth resource policy; paleontology; sedimentation; stratigraphy; water resources management; chemical, physical, and geological oceanography; earth systems. Also, senior synthesis and earth science teaching methods.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 3 times.
Grade Mode: Letter Grading

ESCI 796 - Topics
Credits: 1-4
Geologic, hydrologic, and oceanographic problems and independent studies by means of conferences, assigned readings, and field or laboratory work fitted by ESCI faculty to individual student needs; or new or specialized courses. Topics include geochemistry; geomorphology; geophysics; glaciology; groundwater; structural and regional geology; crystallography; mineralogy; petrology; thermodynamics; ore deposits; earth resource policy; paleontology; sedimentation; stratigraphy; water resources management; chemical, physical, and geological oceanography; earth systems. Also, senior synthesis and earth science teaching methods. Special fee on some topics.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 3 times.
Grade Mode: Credit/Fail Grading
Special Fee: Yes

ESCI 799 - Senior Thesis
Credits: 1-4
Students work under the direction of a faculty sponsor to plan and carry out independent research resulting in an oral presentation and a written thesis. Research projects should include the development of a research question; collection analysis, and synthesis of data; and interpretation and presentation of results. A copy of the written thesis must be submitted to the Chair of the Department of Earth Sciences prior to graduation. A total of 4 credits is required and may be completed over multiple semesters.
Attributes: Writing Intensive Course
Repeat Rule: May be repeated for a maximum of 4 credits.
Grade Mode: Letter Grading

EcoGastronomy (ECOG)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ECOG 401 - Introduction to Ecogastronomy
Credits: 0 or 4
This interdisciplinary course introduces students to the principles and practices of EcoGastronomy. It provides students with a foundation for understanding the connections among food production, ecology, ethics, cuisine, nutrition and health within the framework of sustainability. The course includes guest lectures, class discussion, film reviews, activities, and food tastings.
Attributes: Environment,TechSociety(Disc)
Grade Mode: Letter Grading

ECOG 695 - Independent Analysis
Credits: 1-4
Study and research project for students to advance knowledge in EcoGastronomy fields.
Repeat Rule: May be repeated for a maximum of 8 credits.
Grade Mode: Letter Grading

ECOG 696 - Supervised Student Teaching Experience
Credits: 4
Participants are expected to perform such functions as attending classes, leading discussion groups, assisting faculty, presenting information in undergraduate courses that they have successfully completed, holding office hours, grading papers and exams. Enrollment is limited to juniors and seniors who have had above average GPAs.
Prerequisite(s): ECOG 401 with a minimum grade of C-.
Grade Mode: Credit/Fail Grading

ECOG 701 - EcoGastronomy Capstone
Credits: 2-4
This is a one to two-semester course in which students will synthesize their EcoGastronomy experience with their undergraduate education, including their primary major, and will explore an integrated outlook on their professional future. Filed trips, guest lecturers, experimental activities, and related readings and research will provide the foundation for the completion of a portfolio. A research paper is presented at the Undergraduate Research Conference in the spring.
Attributes: Writing Intensive Course
Prerequisite(s): ECOG 401 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 4 credits. May be repeated up to 1 time.
Grade Mode: Letter Grading

Economics (ECN) CPSM

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ECN 410 - History of Literary Economics
Credits: 4
An examination of the contributions of fiction writers to the history of economic thought. Novels and short stories are analyzed in conjunction with studying influential and heterodox schools of economic thought. Fiction writers will vary by semester (e.g., Mark Twain, Edith Wharton, Charlotte Perkins Gilman, Theodore Dreiser, Jack London, Ayn Rand, F. Scott Fitzgerald and Louisa May Alcott). Schools of economic thought examined include critics as well as advocates of free market capitalism.
Attributes: Humanities(Disc); Inquiry (Discovery); Writing Intensive Course
Grade Mode: Letter Grading

ECN 411 - Introduction to Macroeconomic Principles
Credits: 4
Studies how an economy functions. Develops measures and theories of economic performance to study such issues as unemployment, inflation, international trade and finance, and the level of national production. Examines government policies designed to correct for unemployment and inflation with close attention to the use of fiscal and monetary policies in the U.S.
Attributes: Social Science (Discovery)
Equivalent(s): ECN 411W, ECON 401, ECON 401H
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECN 411W - Introduction to Macroeconomic Principles
Credits: 4
Studies how an economy functions. Develops measures and theories of economic performance to study such issues as unemployment, inflation, international trade and finance, and the level of national production. Examines government policies designed to correct for unemployment and inflation with close attention to the use of fiscal and monetary policies in the U.S.
Attributes: Social Science (Discovery); Writing Intensive Course
Equivalent(s): ECN 411, ECON 401, ECON 401H
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECN 412 - Introduction to Microeconomic Principles
Credits: 4
Studies the behavior and interaction of fundamental decision-making units in an economy, especially consumers and business firms. Applies such economic principles as scarcity, supply and demand, and elasticity to a variety of social issues. Topics include the resource allocation problems of households and business firms, economic theories of social problems (such as crime, divorce, and discrimination), and the economic implications of government policies affecting the environment, the workplace, and industrial organization.
Attributes: Social Science (Discovery)
Equivalent(s): ECN 412W, ECON 402, ECON 402H, EREC 411, NR 411
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECN 412W - Introduction to Microeconomic Principles
Credits: 4
Studies the behavior and interaction of fundamental decision-making units in an economy, especially consumers and business firms. Applies such economic principles as scarcity, supply and demand, and elasticity to a variety of social issues. Topics include the resource allocation problems of households and business firms, economic theories of social problems (such as crime, divorce, and discrimination), and the economic implications of government policies affecting the environment, the workplace, and industrial organization.
Attributes: Social Science (Discovery); Writing Intensive Course
Equivalent(s): ECN 412, ECON 402, ECON 402H, EREC 411, NR 411
Mutual Exclusion: No credit for students who have taken ECON 402, ECON 402A, ECON 402H, EREC 411.
Grade Mode: Letter Grading

ECN 640 - Business Law and Economics
Credits: 4
A study of the legal environment of business. Emphasis is on using economic analysis to examine laws of property, contract, and tort affecting business. Includes the ethical foundations of law and ethical issues involving business. Specific topics may include commercial free speech, white collar crime and managerial responsibility, product liability, cyberlaw, copyright, trademark and patent law.
Attributes: Writing Intensive Course
Prerequisite(s): BUS 400 with a minimum grade of D- and ECN 412 with a minimum grade of D-.
Equivalent(s): ECN 540
Grade Mode: Letter Grading

ECN 650 - Economics for Managers
Credits: 4
Examines how economic principles can be applied to resource allocation problems confronted by managers in a variety of industry settings. Emphasis on both theory and application. Topics include cost analysis, production decisions, and pricing policies of business managers within perfectly competitive, monopolistic, oligopolistic, and monopolistically competitive environments.
Prerequisite(s): BUS 400 with a minimum grade of D- and ECN 412 with a minimum grade of D-.
Grade Mode: Letter Grading

Economics (ECO) CPSO

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ECO 470 - Principles of Economics
Credits: 4
Economics is the study of how we coordinate our wants and needs as a society. The economic perspective includes three main concepts: scarcity and choice, rational behavior, and marginal analysis. Pertinent and relevant examples of current events may be used to illustrate economic principles. Students will relate international trade and trade policies to the concept of comparative advantage and the impact on production of goods and services in various countries. This survey course addresses both macroeconomic and microeconomic principles.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): ECO 512G
Grade Mode: Letter Grading

ECO 580 - International Economics
Credits: 4
This course is an in-depth look at how the international market for goods and services works. Students may investigate the workings of tariffs and non-tariff restrictions on trade, trade regulations, and industrial policies, first in the developed economies and then in the developing countries. Regional and multilateral trade agreements are examined. The course may examine an investigation of international monetary relationships, including balance of payments, foreign exchange and exchange rate of determinants, and how balance of payments adjustments are made.
Attributes: HumanBehavSocial Sys (Gen Ed)
Prerequisite(s): ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D-.
Equivalent(s): ECO 600G
Grade Mode: Letter Grading

ECO 635 - Economics of Artificial Intelligence
Credits: 4
This course examines Artificial Intelligence (AI) as an enhancement to human intelligence in business practice in terms of various senses and processes such as language, vision, analysis and decision-making. This course has a focus on developing strategies for maximizing the revolutionary power of AI as it impacts functions within businesses and economies. Selected topics may include productivity, prediction, innovation, labor, leadership and privacy. The primary course objective is to design an AI based plan for successfully leading your life, your career and your organization. Students may evaluate how AI is being employed in the private and public sectors such as in healthcare, engineering, culture, entertainment, hospitality, agriculture, law, journalism, politics, and in government.
Attributes: HumanBehavSocial Sys (Gen Ed)
Equivalent(s): ECO 605G
Grade Mode: Letter Grading

ECO 707 - Resource Economics
Credits: 4
This course examines sustainable resource use and acquisition. In an ever-changing, increasingly volatile global environment, consistent access to quality labor, materials, and political capital is paramount. Real-world data analysis and the use of evidence-based models enables forward-thinking organizations to identify the essential resources required for their progress. The interdependence among material resources, human talent, and political capital may also be addressed.
Prerequisite(s): ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D-.
Equivalent(s): ECO 607G
Grade Mode: Letter Grading

ECO 710 - Behavioral Economics
Credits: 4
Behavioral economics integrates the business of life, which is economics, with the science of human behavior, which is psychology. The economics model holds that people are rational and act in their own best interests. Psychology focuses on the cognitive, cultural, and biological influences in decision-making. This course may cover the insights of behavioral economics toward developing solutions to the real-world challenges experienced in management, marketing, IT, entrepreneurship, strategy, communications, finance, and other domains.
Prerequisite(s): ECO 470 with a minimum grade of D- or ECO 512G with a minimum grade of D- or ECO 635 with a minimum grade of D- or ECO 605G with a minimum grade of D- or PSY 410 with a minimum grade of D- or PSY 501G with a minimum grade of D- or SOCI 410 with a minimum grade of D- or SOC 501G with a minimum grade of D-.
Equivalent(s): ECO 610G
Grade Mode: Letter Grading

Economics (ECON)

Visit the Course Schedule Search website to find out when courses will be offered during the academic year.

Read more about the courses within this subject prefix in the descriptions provided below.

ECON 401 - Principles of Economics (Macro)
Credits: 0 or 4
Basic functions of the United States economy viewed as a whole; policies designed to affect its performance. Economic scarcity, supply and demand, the causes of unemployment and inflation, the nature of money and monetary policy, the impact of government taxation and spending, the federal debt, and international money matters. ECON 401A emphasizes applications to the international economy. ECON 401H is open to students in the Honors Program.
Attributes: Social Science (Discovery)
Equivalent(s): ECN 411, ECN 411W, ECON 401H
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECON 401H - Honors/Principles of Economics (Macro)
Credits: 4
Basic functions of the United States economy viewed as a whole; policies designed to affect its performance. Economic scarcity, supply and demand, the causes of unemployment and inflation, the nature of money and monetary policy, the impact of government taxation and spending, the federal debt, and international money matters. ECON 401A emphasizes applications to the international economy. ECON 401H is open to students in the Honors Program.
Attributes: Honors course; Social Science (Discovery); Inquiry (Discovery)
Equivalent(s): ECN 411, ECN 411W, ECON 401
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECON 402 - Principles of Economics (Micro)
Credits: 4
Functions of component units of the economy and their interrelations. Units of analysis are the individual consumer, the firm, and the industry. Theory of consumer demand and elasticity, supply and costs of production, theory of the firm under conditions of perfect and imperfect competition, demand for and allocation of economic resources, general equilibrium, and basic principles and institutions of international trade. ECON 402A emphasizes applications to the international economy. ECON 402H is open to students in the Honors Program.
Attributes: Social Science (Discovery)
Equivalent(s): ECN 412, ECN 412W, ECON 402H, EREC 411, NR 411
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECON 402H - Honors/Principles of Economics (Micro)
Credits: 4
Functions of component units of the economy and their interrelations. Units of analysis are the individual consumer, the firm, and the industry. Theory of consumer demand and elasticity, supply and costs of production, theory of the firm under conditions of perfect and imperfect competition, demand for and allocation of economic resources, general equilibrium, and basic principles and institutions of international trade. ECON 402A emphasizes applications to the international economy. ECON 402H is open to students in the Honors Program.
Attributes: Honors course; Social Science (Discovery); Inquiry (Discovery); Writing Intensive Course
Equivalent(s): ECN 412, ECN 412W, ECON 402, ECON 402A, EREC 411, NR 411
Mutual Exclusion: No credit for students who have taken .
Grade Mode: Letter Grading

ECON 501 - Business and Economic History
Credits: 4
This course studies the historical influence of business enterprises on the global development of capitalist economies, their ancient and medieval predecessors, and their modern alternatives. Topics include the impact of climate and disease on economic growth, the rise of manufacturing, the development of financial institutions and markets, innovation and the role of the entrepreneur, the history of slavery and colonialism, and the impact of government policy on business development. Because this is an Inquiry course, each student will pursue a major research project. Does not satisfy Economics Minor requirements.
Attributes: Historical Perspectives(Disc); Inquiry (Discovery)
Grade Mode: Letter Grading

ECON 565 - Predictive Modeling: Data Driven Economic Analysis
Credits: 4
This course expands upon core topics in statistics through the study and practice of data management, data analysis, and statistical programming. Statistical programming and analytical skills are the key components of predictive modeling. Students will develop tools for collecting, organizing, interpreting, presenting, and analyzing business information. As an economics course an emphasis will be placed on how to use data to improve the information needed to make sound economic and business decisions based on marginal analysis.
Prerequisite(s): (ADMN 420 with a minimum grade of C- or ADMN 510 with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 605 - Intermediate Microeconomic Analysis
Credits: 4
Analysis of supply and demand. Determination of prices, production, and the distribution of income in noncompetitive situations and in the purely competitive model. General equilibrium.
Prerequisite(s): ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-.
Mutual Exclusion: No credit for students who have taken ECON 606.
Grade Mode: Letter Grading

ECON 606 - Intermediate Microeconomics with Calculus
Credits: 4
Consumer theory. Determination of prices, production, and the distribution of income in perfectly and imperfectly competitive markets. Demand and supply analysis. Welfare analysis of public policies. General Equilibrium. Topics employ calculus.
Prerequisite(s): (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-) and (MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D-).
Mutual Exclusion: No credit for students who have taken ECON 605.
Grade Mode: Letter Grading

ECON 611 - Intermediate Macroeconomic Analysis
Credits: 4
Macroeconomic measurement, theory, and public policy determination.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 620 - Topics in Economics
Credits: 4
Special topics cover a variety of areas in economics, often of special interest to the instructor.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

ECON 620W - Topics in Economics
Credits: 4
Special topics cover a variety of areas in economics, often of special interest to the instructor.
Attributes: Writing Intensive Course
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C-).
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

ECON 625 - Economic History of the United States
Credits: 4
This course studies the development of the U.S. economy from colonial times to the 21st century. The role that institutions, innovations and government policy play in economic development is a central theme of the course. Western settlement, slavery and abolition, the rise of manufacturing and the corporate business, emergence of affluence and consumer society, and the Great Depression are some of the topics addressed.
Prerequisite(s): ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C- or ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 626 - Supervised Student Teaching
Credits: 2-4
Participants are expected to perform such functions as leading discussion groups, assisting faculty in undergraduate courses that they have successfully completed. For juniors and seniors with 3.0 or better cumulative GPA. No more than four credits may be earned as an instructional assistant in any one course. Permission of instructor and undergraduate programs office required.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Credit/Fail Grading

ECON 633 - Microfinance
Credits: 4
Microfinance focuses on features of the informal economy in developing countries especially small-scale changes in finance, commerce, technology, and in social and environmental organization that have led to transformational economic breakthroughs. Besides financial services, the course examines innovative customer segments, market-based solutions, the role of government subsidies, a range of development issues, and how to measure success for projects, programs, and institutions.
Grade Mode: Letter Grading

ECON 635 - Money and Banking
Credits: 4
Study of how the financial sectors of globally interconnected economies impact real economic activity. It includes interrelationships of interest rates, exchange rates, expectations, financial markets, financial institutions, central banks, systemic crises, the supply and demand for money and other financial instruments, and an introduction to monetary theory, policy and regulation.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 645 - International Economics
Credits: 4
Covers both international trade theory and open-economy macroeconomics. Some of the major issues include whether free trade is always preferred to restricted trade, the controversy over industrial policy and how best to structure the international financial system. Students gain an understanding of topics including currency exchange rate movements, and trade policy, among others.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Equivalent(s): ECON 645W
Grade Mode: Letter Grading

ECON 652 - Economics of Artificial Intelligence
Credits: 4
This course will provide students with a survey of economic models, applied to Artificial Intelligence (AI). The course is divided into three sections. In the first one, we introduce the concept of AI as a General-Purpose Technology that can improve prediction. In the second part, we look at how improved prediction can help decision-making under uncertainty. Finally, we analyze how AI can impact several aspects of business, society, and in particular the labor market.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C- or ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 653 - Law and Economics
Credits: 4
Introduces the field of Law and Economics. Focuses on the legal system and the economic consequences of property, contract, tort, criminal law and mediation.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 654 - Industrial Economics and Business Innovation
Credits: 4
This course will provide students with a survey of economic models in industrial organization, applied to innovation-related issues. The course is divided into three sections. In the first one, we introduce the concept of innovation, its measurement and how it is related to knowledge. In the second part, we look at innovation at the firm level. In particular, we delve into the "knowledge- creating" company and its strategies. Finally, we analyze the structure and evolution of several hi-tech industries, in terms of survival of existing firms and creation of new firms.
Attributes: Writing Intensive Course
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 655 - Innovation in the Global Economy
Credits: 4
This course will provide students with a survey of economic models in international trade, applied to innovation-related issues. The course is divided into three sections. In the first one, we look at the role that industry, universities, and the government play in the national innovation system. In the second part, we look at innovation from an international perspective. In particular, we delve into the relationship between globalization and innovation. Finally, we analyze the role of externalities in the knowledge economy and particularly network effects in the diffusion of new technologies.
Attributes: Writing Intensive Course
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 656 - Labor Economics
Credits: 4
Functioning of labor markets from theoretical and policy perspectives. Labor demand and supply, wages and employment. Welfare programs, human capital, discrimination in the labor market, unions, wage differentials.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-) and (ECON 605 with a minimum grade of C- or ECON 606 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 676 - Economics of Sports
Credits: 4
Focuses on the major economic aspects of North American professional and collegiate sports and special topics like the Olympics, discrimination, and tournament sports drawing from public finance, labor economics, and industrial organization.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 704 - Economics of Health
Credits: 4
This course in intermediate health economics applies the analytical tools of microeconomics to various issues in health and healthcare. The first half of the course focuses on patient demand, and the second half focuses on provider supply. Topics covered in the former include the demand for health and healthcare, the demand for insurance, externalities associated with certain health behaviors, cost-effectiveness analyses, and health equity considerations. Topics covered in the latter half of the course include the role of nonprofits, provider agency, provider competition versus concentration, insurer behavior, and the effects of government regulation of insurance.
Prerequisite(s): ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or NR 411 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 706 - Economics of Climate Change
Credits: 4
Explores the economics and public policy of global climate change and develops the economic theory including the concepts of externalities, stock pullutant models, the social discount rate, and complicating factors such as information, uncertainty, technological progress, and risk. Students use economic analysis to compare different policy instruments such as administrative regulation, marketable permits, tax incentives, and direct subsidies. Also covers the political economy of international environmental agreements, including an analysis of the Kyoto Protocol.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 402 with a minimum grade of D- or ECON 402H with a minimum grade of D- or EREC 411 with a minimum grade of D- or NR 411 with a minimum grade of D-.
Grade Mode: Letter Grading

ECON 720 - Economic Problems
Credits: 4
Special topics cover a variety of areas in economics, often of special interest to the instructor.
Prerequisite(s): (ECON 401 with a minimum grade of C- or ECON 401H with a minimum grade of C-) and (ECON 402 with a minimum grade of C- or ECON 402H with a minimum grade of C- or EREC 411 with a minimum grade of C- or NR 411 with a minimum grade of C-).
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

ECON 720W - Economic Problems
Credits: 4
Special topics cover a variety of areas in economics, often of special interest to the instructor.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 401 with a minimum grade of C- and ECON 402 with a minimum grade of C-.
Repeat Rule: May be repeated for a maximum of 16 credits.
Grade Mode: Letter Grading

ECON 725 - Independent Study
Credits: 1-4
Individual research projects that are student designed. Initial sponsorship of a Paul College faculty member must be obtained followed by approval of Paul advisor and Dean's Office. Special permission required to earn more than 4 credits in one semester. For Paul College Juniors and Seniors with 3.0 or better cumulative GPA.
Repeat Rule: May be repeated for a maximum of 12 credits.
Grade Mode: Letter Grading

ECON 725W - Independent Study
Credits: 1-4
Individual research projects that are student designed. Initial sponsorship of an economics faculty member must be obtained followed by approval of PAUL advisor and dean.'s office. Special permission required to earn more than 4 credits in one semester. For Paul College juniors and seniors in with 3.0 or better cumulative GPA.
Attributes: Writing Intensive Course
Equivalent(s): ECON 695W
Grade Mode: Letter Grading

ECON 726 - Introduction to Econometrics
Credits: 0 or 4
Introduces regression techniques as used in economics and management; estimation and statistical inference in the context of the general linear model; discussion of problems encountered and their solutions; extensions of the general linear model.
Prerequisite(s): (ADMN 420 with a minimum grade of C- or ADMN 510 with a minimum grade of C- or MATH 539 with a minimum grade of C- or BIOL 528 with a minimum grade of C- or EREC 525 with a minimum grade of C- or MATH 644 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 727 - Advanced Econometrics
Credits: 0 or 4
Method of least squares estimation with treatments for hereogeneity and endogeneity. Method of maximum likelihood estimation. Binary choice models. Panel data models. Survival analysis. Topics employ calculus.
Prerequisite(s): ECON 726 with a minimum grade of C- and (MATH 424A with a minimum grade of D- or MATH 424B with a minimum grade of D- or MATH 425 with a minimum grade of D-).
Grade Mode: Letter Grading

ECON 760 - Game Theory
Credits: 4
Game theory is the study of strategic interactions. In order for a decision-maker to decide the best course of action, he must take into account the actions of others, including how his own behavior influences the thinking and payoffs of others. Game theory helps us develop an understanding of how people actually behave and how they should be advised to behave in strategic situations. Game theory models conflict and cooperation between rational decision-making agents and has applications in a wide variety of areas, including statistical decision theory, artificial intelligence, economics and business, biology, political science and philosophy.
Prerequisite(s): (ECON 605 with a minimum grade of C- or ECON 606 with a minimum grade of C- or ADMN 580 with a minimum grade of C-).
Grade Mode: Letter Grading

ECON 765 - Machine Learning for Economics
Credits: 4
Machine Learning for Economics bridges economic reasoning with the computational power of AI. Rather than treating machine learning as a black box, this course opens it - training students to think like economists who engineer algorithms with purpose and interpretability. Students will learn to use Python to build, test, and explain machine learning models grounded in economic theory and data. The goal is to equip future economists with the skills to not only apply machine learning responsibly, but also to extend and adapt these methods in pursuit of rigorous economic research and policy evaluation.
Prerequisite(s): ECON 606 with a minimum grade of B- and ECON 726 with a minimum grade of B-.
Grade Mode: Letter Grading

ECON 774 - Senior Economics Seminar
Credits: 4
Capstone experience for students enrolled in the Economics B.A. program. Topics and format of the class depends on the interests and expertise of the faculty member and students of the course. The course is organized around a "big" idea and focuses on an important topic that has broad interest and social consequences.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 605 with a minimum grade of C- and ECON 611 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 775 - Applied Research Skills for Economists
Credits: 4
Capstone course for students enrolled in B.S. in analytical economics. Students conduct economic research by bringing their understanding of economic theory and empirical/analytical skills to investigate contemporary economic problems, issues, and phenomena. Presentations are calculus-based. The topics and course design vary depending on the instructor.
Attributes: Writing Intensive Course
Prerequisite(s): ECON 606 with a minimum grade of C- and ECON 611 with a minimum grade of C- and ECON 726 with a minimum grade of C-.
Grade Mode: Letter Grading

ECON 795 - Internship
Credits: 1-16
On-the-job skill development through fieldwork in an organization (business, industry, health, public service, etc.). Normally, supervision is provided by a qualified individual in the organization, with frequent consultation by a faculty sponsor. Written report required. Internships may be part or full time, with course credits assigned accordingly. May not be used as a major elective.
Grade Mode: Credit/Fail Grading

ECON 799 - Honors Thesis
Credits: 4-8
Supervised research leading to the completion of an honors thesis; required for graduation from the honors program in economics.
Attributes: Honors course; Writing Intensive Course
Grade Mode: Letter Grading

EDC 500 - Foundations of Education
Credits: 4
This course is the introductory course to the education programs. The purpose is to examine the theoretical foundations of education in the United States. Historical, political, and social influences on the development of the education system are examined. Students develop their own educational philosophy and compare it to the philosophies which have shaped American education. A twenty-hour practicum is required.
Attributes: Writing Intensive Course
Equivalent(s): EDU 510G
Grade Mode: Letter Grading

EDC 501 - Foundations of Early Childhood Education
Credits: 4
This course provides an overview of the historical, philosophical, and social foundations of the early childhood profession and how these roots influence current practice. Students examine and write about the issues facing children, families, early childhood programs, and professionals. A variety of educational theories and models are reviewed with regard to how effectively they address the needs of children, parents, and communities. Students establish their own sense of professionalism with connections to the literature, organizations, and resources in the field and by writing their personal philosophies of early childhood education.
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): EDU 550G
Grade Mode: Letter Grading

EDC 502 - Creative Arts in Early Childhood Education
Credits: 4
This course provides a hands-on approach to facilitating the creative development of children. Students explore their own creativity through a variety of media, including art, music, drama, and creative movement. The focus is on the creative process rather than products. Topics include definitions of creativity, how it affects domains of development, and ways it enhances learning. Students apply knowledge of developmentally appropriate practices and integrate them with creative experiences into a well-rounded curriculum that incorporates a variety of learning styles.
Prerequisite(s): PSY 470 with a minimum grade of D- or PSY 508G with a minimum grade of D-.
Equivalent(s): EDU 553G
Grade Mode: Letter Grading

EDC 503 - Language and Literacy Development
Credits: 4
