

PREREQUISITES

Course prerequisites are those courses that are required to have been successfully completed prior to enrolling in another course and must be so described in the University catalog.

Before registering for a course, students should check the course catalog to determine course prerequisites.

Students who fail a prerequisite to a course for which they are registered must drop the course. This policy applies to degree and non-degree students. It is the responsibility of the student to ensure all prerequisites or other requirements for a course have been met.
