APPLIED ANIMAL SCIENCE (AAS)

# Course numbers with the # symbol included (e.g. #400) have not been taught in the last 3 years.

AAS 421 - Large Animal Behavior and Handling Techniques
Credits: 2
Introduction to domestic large animal behavior and handling techniques. Cattle, horses, swine, and sheep are used in this course. Students perform routine health-related procedures and gain valuable hands-on skills and safe animal handling techniques which can be applied to the fields of veterinary medicine, animal research, commercial agriculture, and animal control. 1 lec/1 lab.
Equivalent(s): AAS 221, ANSC 408, ANSC 508
Grade Mode: Letter Grade

AAS 423 - Dairy Selection
Credits: 2
Selection techniques used in cattle for purchase, breeding, and genetic improvement through the use of visual evaluation, pedigrees, production, and progeny information. 1 lec/1 lab. Special Fee.
Equivalent(s): AAS 223
Grade Mode: Letter Grade

AAS 425 - Introduction to Dairy Herd Management
Credits: 4
The course explores economic, scientific and practical aspects of dairy herd management. The topics covered include history, cattle selection, nutrition, housing, milking, and disease prevention strategies. There are a number of field trips and weekly labs emphasizing management and hands-on experience.
Equivalent(s): AAS 244, ANSC 409, ANSC 410
Grade Mode: Letter Grade

AAS 428 - Anatomy and Physiology of Domestic Animals
Credits: 4
An overview course describing the anatomy (structure) and physiology (function) of domestic animals, focusing on canine, feline, equine, and bovine species. Anatomic and physiologic topics are intertwined as the course progresses through each body system. Relevant species differences are stressed. Focus is on applied concepts appropriate for animal-related careers. Special Fee.
Equivalent(s): AAS 228
Grade Mode: Letter Grade

AAS 428B - Anatomy and Physiology of Domestic Animals Lab for VTEC majors
Credits: 1
Reinforces material presented in AAS 428 lecture and introduces students to the animal body by hands-on study of anatomy. Anatomical relationships and concepts that are important for the medical care of animals are presented. The feline species will be the primary anatomical model used. Comparative anatomy of bovine, equine, and avian species will also be covered. Course is required of Veterinary Technology majors and is designed to be taken along with AAS 428 lecture.
Co-requisite: AAS 428
Grade Mode: Letter Grade

AAS 432 - Introduction to Forage and Grassland Management
Credits: 0-3
Introduction to grasslands of the world and their management. Special emphasis on the identification, production, and utilization of New England forage crops for feeding domestic farm animals. The course includes the selection of local plant species and varieties, including their management and recommended harvesting practices. The course also includes a basic introduction to soils, as well as nutrient and fertility management.
Equivalent(s): AAS 232
Grade Mode: Letter Grade

AAS 434 - Equipment and Facilities Management
Credits: 0 or 3
Operation of agricultural equipment and maintenance of agricultural facilities as found in New England. Development of the essential skills and technical information needed to manage and supervise agricultural facilities and equipment. 2 lec/1 lab.
Equivalent(s): AAS 234
Grade Mode: Letter Grade

AAS 439 - Fundamentals of Animal Health
Credits: 2
Covers the principles of maintaining animal health by preventing and managing disease via husbandry, immunization, diagnostic testing and treatment. Focus is on domestic species; primarily dogs, cats, horses and cows. Topics include external and internal parasitology, microbiology, immunology including vaccination, and disease treatment. Course is designed to be taken along with the appropriate lab section: AAS 439A for Applied Animal Science majors or AAS 439B for VTEC majors, respectively. No credit earned if credit was received for VTEC 439.
Equivalent(s): AAS 239, VTEC 439
Grade Mode: Letter Grade

AAS 591 - Studies
Credits: 1-3
Students who have the ability and adequate preparation to work independently may propose a contract to design a course or research project on a topic not available through existing course offerings. The purpose of this research is to explore new areas in the student's field of study or to pursue course material in greater depth. Work is supervised by an appropriate faculty/staff member and credit varies depending on the proposed project/research. Areas may include dairy, light horses, livestock, poultry, meats, forages, management, small animals, or general animal science. Permission required.
Repeat Rule: May be repeated for a maximum of 6 credits.
Equivalent(s): AAS 291
Grade Mode: Letter Grade

AAS #592 - Studies
Credits: 1-3
Students who have the ability and adequate preparation to work independently may propose a contract to design a course or research project on a topic not available through existing course offerings. The purpose of this research is to explore new areas in the student's field of study or to pursue course material in greater depth. Work is supervised by an appropriate faculty/staff member and credit varies depending on the proposed project/research. Areas may include dairy, light horses, livestock, poultry, meats, forages, management, small animals, or general animal science. Permission required.
Repeat Rule: May be repeated for a maximum of 6 credits.
Equivalent(s): AAS 292
Grade Mode: Letter Grade
AAS 597 - Applied Animal Science Work Experience

Credits: 0

Employment (12 weeks, generally in the summer following the first year) in an approved animal-related position. Cr/F.

Equivalent(s): AAS 297

Grade Mode: Credit/Fail
