

# CHEMICAL ENGINEERING MAJOR: BIOENGINEERING OPTION (B.S.)

<https://ceps.unh.edu/chemical-engineering/program/bsche/chemical-engineering-major-bioengineering-option>

## Description

Under this option, the required courses deal with the application of basic biological sciences and chemical engineering principles to the design and operation of large-scale bioprocesses for the production of high-value medicinal, food and beverage, pharmaceutical, biomedical, genetic engineering, and health care products. The elective courses permit the student to study topics of special interest in more depth or gain a broader perspective in bioengineering or some closely related subjects such as biochemistry or biotechnology experience in manufacturing or research. Three courses are required, and a minimum of two additional courses of at least three credits each should be selected from the electives list. Students interested in the bioengineering option should declare their intention to the department faculty during [the sophomore year](#).
