

ELECTRICAL ENGINEERING MAJOR (B.S.)

<https://ceps.unh.edu/ece/electrical-engineering-bs>

Description

In addition to the university's mandatory Discovery Program requirements, degree candidates must complete our core program (freshman through junior years). In the senior year, students select professional technical electives in the areas of their interest. They also carry out a student-designed project to acquire both breadth and depth of study and to integrate knowledge across course boundaries.

For a detailed semester by semester list of requirements for the four years of study, please refer to the Degree Plan tab.

Requirements

In addition to Discovery Program requirements, the department has a number of grade-point average and course requirements.

1. Any electrical engineering major whose cumulative grade-point average in ECE courses is less than 2.0 during any three semesters will not be allowed to continue as an electrical engineering major.
2. Electrical engineering majors must achieve a 2.0 grade-point average in ECE courses as a requirement for graduation.

To make an exception to any of these departmental requirements based on extenuating circumstances, students must petition the department's undergraduate committee. Mindful of these rules, students, with their adviser's assistance, should plan their programs based on the distribution of courses found in the Degree Plan tab.

Required Courses

Code	Title	Credits
CS 410C or CS 415	Introduction to Scientific Programming/C Introduction to Computer Science I	4
ECE 401	Perspectives in Electrical and Computer Engineering	4
ECE 541	Electric Circuits	4
ECE 543	Introduction to Digital Systems	4
ECE 548	Electronic Design I	4
ECE 562	Computer Organization	4
ECE 602	Engineering Analysis	4
ECE 603	Electromagnetic Fields and Waves I	4
ECE 617	Junior Laboratory I	4
ECE 618	Junior Laboratory II	4
ECE 633	Signals and Systems I	3
ECE 634	Signals and Systems II	3
ECE 647	Random Processes and Signals in Engineering	3
ECE 651	Electronic Design II	4

¹ Students who wish to preserve the option of transferring to the computer engineering major without incurring a delay in graduation should consult with their academic adviser before electing these courses. It is recommended that such students take CS 415 Introduction to Computer Science I in the fall semester and CS 416 Introduction to Computer Science II in the spring semester in place of the listed courses.

² Four professional electives must be selected from the following categories of courses:

- At least two from: ECE 7XX not including ECE 795 Electrical and Computer Engineering Projects and ECE 796 Special Topics
- Any of these: ECE 795 Electrical and Computer Engineering Projects, ECE 796 Special Topics
- No more than one from: , DS 773 Database Management and Systems Analysis, DS 774 E-Business
- Honors students who complete ECE 791H Senior Honors Project I and ECE 792H Senior Honors Project II satisfy one professional elective requirement as well as the requirements for ECE 791 Senior Project I and ECE 792 Senior Project II.

³ ECE 791 Senior Project I and ECE 792 Senior Project II fulfill Discovery Program Capstone Experience.

⁴ Math/Science Elective approved courses: MATH 644 Statistics for Engineers and Scientists, MATH 647 Complex Analysis for Applications, CHEM 405 Chemical Principles for Engineers, MS #762 Electronic Materials Science, PHYS 505 General Physics III, PHYS 615 Classical Mechanics and Mathematical Physics I, ME 523 Introduction to Statics and Dynamics.

Students are required to take either ECON 402 Principles of Economics (Micro) or EREC 411 Environmental and Resource Economics Perspectives to fulfill the Social Science Category of the Discovery Program.

Fulfilling the EE Program curriculum automatically meets Discovery Category, "Environment, Technology and Society."
