HEALTH & WELLNESS

The University has a nationally accredited health and wellness program.

Our Mission

Health & Wellness provides whole person-centered care and services, illness prevention and health promotion, co-curricular learning opportunities, and public health leadership and expertise. All are tailored to support our students’ health, well-being, and personal development, the health of the campus community and the mission of our University. Health & Wellness is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC).

Health & Wellness Fee

All UNH students who take five or more credit hours/semester are required to pay the UNH Health & Wellness fee. This fee allows students to access services at Health & Wellness on campus, and covers many services at no or reduced cost. When combined with a student’s health insurance coverage, the Health & Wellness fee provides for a complete health care package. A student’s health insurance is never billed for services covered by the UNH Health & Wellness fee.

Health Insurance

UNH requires health insurance as a condition of enrollment for full-time degree students at its Durham, Manchester, and Concord campuses. Some students have the option of waiving this requirement if they present proof of adequate coverage; alternatively, students can acquire an affordable health benefits plan sponsored by the University. International students with F-1 and J-1 visas are required to purchase the UNH Student Health Benefits Plan (SHBP). Learn more about the SHBP and the waiver process here.

Health Record Requirement

Undergraduate students who have been formally accepted to a degree program are required to have health information on file with UNH Health & Wellness. The three requirements to be completed and submitted by the student online are:

1. a physical assessment,
2. immunization form, and
3. a health history form.

Prior to matriculation at a member institution within the University System of New Hampshire (USNH), all undergraduate and graduate students are required to provide proof of immunization or demonstrate their immunity to specific vaccine-preventable diseases as outlined below.

Required*:  

- Measles, Mumps, Rubella (MMR): 2 doses at least 28 days apart, initiated after 12 months of age, or immune titers
- Meningococcal (ACWY): 1 dose required within 5 years of enrollment; a booster dose required if initial dose administered prior to age 16
- Tetanus, Diphtheria, Pertussis (Tdap): within 10 years, after completion of primary series
- Chicken Pox (Varicella): two doses of vaccine, separated by four to eight weeks, or immune titer

Strongly Recommended:

- Staying up-to-date on COVID-19 vaccination recommendations
- Influenza: annually
- Hepatitis B: series of 3 doses

Documentation of proof of vaccination or immunity (detailed below) is required (UNH Academic Policy 02.14) and is typically shown on the immunization form. It is the responsibility of students to provide the documentation before attending any classes. Any student failing to complete these requirements may be prevented from registering for future classes.

These health forms are required before moving into residence halls and starting classes. Failure to submit forms may prohibit students from moving into their residence halls until they are compliant.

Learn more about incoming student health record requirements here.

Medical Services

UNH Health & Wellness provides comprehensive, student-focused, primary medical care through a team approach. The clinical staff consists of board-certified physicians, nurse practitioners, nurses, and medical assistants who are committed to prevention and holistic care. Primary medical care is provided for a variety of common concerns. Examples include respiratory illnesses (including asthma), infections, injuries, skin concerns, digestive disorders, allergy/immunization services and travel health consultation, mental health, and gender-affirming care. Sexual/reproductive health services include family planning/contraceptive services, cervical cancer (Pap smears) screening/prevention, testing and treatment for sexually transmitted infections, pregnancy testing and counseling, limited sexual assault services, and more. Health resource nurses provide chronic illness support and assist with problems arising from hospitalization.

Students may speak by telephone with a health resource nurse for advice at any time, and after-hours nurse consultation is available when UNH Health & Wellness is closed. On-site clinical support services include laboratory services, radiology, and pharmacy. Not all services are available during the summer or breaks. Read more about medical services.

For emergencies and after-hours care, well-staffed and well-equipped urgent care centers and community hospitals are nearby, and an emergency ambulance service is available in Durham at all times.

Living Well Services

Living Well Services coordinates health promotion activities on campus. Services provided include educational programs, workshops, and classes; individual wellness counseling and coaching to promote healthy lifestyle choices, including alcohol and other drug counseling, nicotine cessation services, nutritional counseling, wellness coaching (e.g., stress, sleep, behavior change, etc.); and integrative mind-body services, including biofeedback, light therapy, and massage therapy.
