HEALTH MANAGEMENT AND POLICY (HMP)

Health management and policy is an interdisciplinary program providing students with a broad view of health care organizational structure and health care policy, while developing analytical skills that are integrated within classes and computer laboratories throughout the curriculum. Students are prepared to pursue careers in a wide range of healthcare organizations focusing on the business aspects and public health aspects within healthcare. Graduates work in private practice, long-term care, rehabilitation facilities, hospitals, private practices, and other managed care organizations in such areas as finance, information systems, management, marketing, and operations, project management, as well as public health departments, community health, community-based and home-health agencies, mental health facilities, regulatory bodies, consulting companies, and insurance companies.

The department's undergraduate program maintains full certification by the Association of University Programs in Health Administration (AUPHA). Students have the opportunity to become student members in the American College of Healthcare Executives (ACHE), the Health Care Financial Management Association (HFMA), and the American Public Health Association (APHA), and the New Hampshire Public Health Association (NHPHA) to establish a professional network and be informed on current issues within the field. The Health Management and Policy curriculum is approved under the New England Regional Student Program.

Programs

- Health Management and Policy Major (B.S.)
- Health Management Minor
- Public Health Minor

Courses

**Health Management & Policy (HMP)**

**HMP 401 - United States Health Care Systems**

**Credits:** 4

Nature and functions of health care services and health professionals; impact of social, political, economic, ethical, professional, legal, and technological forces on health care systems. Current health policy issues. Does not count as Social Science Discovery for HMP majors.

**Attributes:** Social Science (Discovery)

**Equivalent(s):** HAP 401, HMP 401H, HMP 401W

**HMP 403 - Introduction to Public Health**

**Credits:** 4

This course describes and defines “what is public health” and seeks to convey its critical importance and relevance to both public and individual (personal) wellbeing. It presents an overview of the structure, function, and organization of the public health system/services (government, proprietary, and voluntary sectors) and how they operate, emphasizing core functions and major divisions (public health administration, epidemiology and biostatistics, environmental health, social and behavioral health). Addresses the social, ethical, issues; bioterrorism; epidemics; obesity; tobacco, alcohol, and opioid use; violence. Seeks to challenge students to think critically about existing and emerging U.S. and global public health issues. Introduces public health careers.

**Equivalent(s):** HAP 403

**HMP #440A - Honors/Global Public Health Issues**

**Credits:** 4

This course is designed to provide students with an introduction to and overview of the key areas of global health by addressing the major determinants of health and how health status is measured to determine the burden of disease in the developing world. This course is part of the Honors Symposium titled: Reinventing Healthy Communities Nationally and Globally: Medical, Legal, and Cultural Perspectives. This course is the same course as HMP 444A Honors/Global Public Health Issues, that was approved by the Discovery Program as an Inquiry, World Cultures Category course. HMP #440A will not be offered as an Inquiry course, but will maintain the World Cultures Category. Prereq: Permission.

**Attributes:** Honors course; World Cultures(Discovery)

**Equivalent(s):** HMP 444A

**HMP 444 - From Frankenstein to Dolly, and Beyond**

**Credits:** 4

This course is an interdisciplinary introductory course designed specifically for first year students. It seeks to stimulate, provoke, and support student inquiry, discussion, and exploration of a wide variety of social and ethical issues associated with scientific research and advances, with an emphasis on ones related to the biomedical and health sciences. It explores the value-laden questions that they often precipitate, and their impact on individuals, population groups, and society at large.

**Attributes:** Environment, TechSociety(Disc); Inquiry (Discovery)

**HMP 444A - Global Public Health Issues**

**Credits:** 4

This course is designed to provide students with an introduction to and overview of the key areas of global health by addressing the major determinants of health and how health status is measured to determine the burden of disease in the developing world. Using the perspectives of public health, the course will cover factors associated with the development of health problems and efforts to prevent disease in impoverished areas. Students will also explore the role of social communication, politics, religion, economics, education and culture in contributing to global public health issues and will integrate these factors and values in developing solutions to the widespread public health issues impacting communities worldwide. Students will learn about the magnitude of disease in the developing world (e.g., communicable and non-communicable disease, women and child health, nutrition, and unintentional injuries), how health is assessed and how health systems effectively work together to improve global health.

**Attributes:** World Cultures(Discovery); Inquiry (Discovery)
HMP 622 - Epidemiology and Community Medicine
Credits: 0 or 4
The distribution and determinants of disease, illness, and health in the community. Community health and illness measures, health status, and source of data. Development of hypotheses and study designs to reduce community health problems using epidemiological reasoning, methods, and analyses. Lab.
Attributes: Biological Science(Discovery); Discovery Lab Course
Equivalent(s): HAP 402, HAP 501, HMP 501H
HMP 610 - Survey of Health Information Systems
Credits: 2
This course introduces you to the nomenclature and foundations of health information technology and systems in health care delivery settings and the management and strategic uses for those systems. It is relevant for those studying health care management and individuals using or installing clinical health information systems. Time will be spent examining health care information flow, data capture, storage within information systems, technology standards, information security, and data usages both internally and externally. Prereq: Junior, HMP 401.
Equivalent(s): HMP 511, HMP 611
HMP 611 - Introduction to Health Information Systems
Credits: 4
This course introduces the student to the nomenclature and foundations of health information technology and systems in health care delivery settings and the management and strategic uses for those systems. It is relevant for those studying health care management and those using clinical health information systems. It examines health care information flow, information systems, technology standards and information security, and presents relevant examples, practical applications and case studies.
Equivalent(s): HMP 511, HMP 610
HMP 621 - Pre-practicum Seminar
Credits: 1-2
Preparation for field practicum experience, orientation to experiential learning and competency development.
Repeat Rule: May be repeated for a maximum of 2 credits.
Equivalent(s): HAP 621
HMP 622 - Field Practicum in Organizational and Project Analysis, and Management Skills Development
Credits: 3
Experiential learning in a health care organization; application of theories to practice. Planned learning objectives are accomplished through three distinct components. Organizational Analysis, Project Analysis and Management Skills Development, with Supervision by agency personnel. This will include analysis of assigned health care agency, from external and internal viewpoints, development of the basic quantitative and interpersonal skills required for a health services manager, and demonstration of knowledge and analysis of specific problem-solving skills. Prereq: HMP 621, GPA 3.0 or higher; Approved practicum site.
Equivalent(s): HAP 622, HMP 622A, HMP 622B, HMP 622C
HMP 624 - Post Practicum Seminar
Credits: 2
Summary and conclusion from field practicum experience. Individual analysis and panel discussions to include site assessment, project description and methodologies employed, critique of individual skills and knowledge base in relation to internship. Major only. Prereq: HMP 621, HMP 622.
HMP 631 - Health Issues Seminar
Credits: 2
Discussion of current issues in the fields of health management, health policy and public health. Prereq: HMP 624, HMP 712, HMP 723, HMP 735, HMP Senior.
HMP 635 - Social Marketing Fundamentals
Credits: 2
This is a course that introduces the vocabulary and tools of social marketing and outlines the structure to develop a social marketing plan with a goal to encourage changes to individuals or groups behaviors that have a negative impact on health or public policy. Throughout the course there will also be an introduction to marketing concepts in healthcare and the legal structure required to launch new services and campaign regulatory rules. Prereq: Junior, HMP 401.
Equivalent(s): HMP 735
HMP 642 - Health Economics
Credits: 0 or 4
Theoretical and empirical analysis of the U.S. health care delivery sector. Topics include health insurance markets and their effects on patients demand, uninsured populations and their access to health care services, breakdowns in the principal/agent relationship between patients’ and providers, competition in the medical sector, technology, pharmaceuticals and the scope and effect of government involvement in the delivery of health care. Prereq: HMP 624, HMP 712, HMP 723.
HMP 669 - Human Behavior and the Public Health
Credits: 4
Provides a grounding in fundamental concepts of the behavioral sciences as they illuminate public health. Individual and community responses to prevention, identification of symptoms, diagnoses, treatments, chronic ailments, and rehabilitation are discussed. In each of these areas, the course explores the interaction between community, family, patient, and health care provider.
Equivalent(s): HMP 569
HMP 702 - Programming in Healthcare Environments
Credits: 4
This course covers using Python as a programming language to write, implement, and design programs that are relevant to various aspects of programming in a health setting. After completion of this course, students should be comfortable with the basic data structures in Python and R (including arrays, dictionaries and dataframes), conditional logic and iterators, writing Python and R functions, and using Python libraries to read external data and perform data manipulations and data analysis. Prereq: Junior or Senior and Permission.
HMP 703 - Translation of Health Data
Credits: 4
This course will give you the skills you need to leverage data to reveal valuable insights and advance your career. This course teaches you the visualization skills necessary to be effective Data Storytellers which helps engage your audience in a story about the data. This course focuses on concepts as well as hands-on experience of presenting data from initial concepts to final presentation by creating meaningful displays of quantitative and qualitative data to facilitate peer/managerial decision making. Prereq: Junior or Senior or Permission.
HMP 711 - Health Systems Research I
Credits: 4
Introduces intermediate techniques for data manipulation and analysis for the health care field. Also introduces methods for survey research and large data set manipulation and analysis. There is a lab section utilizing a statistical software package where students perform tasks from a large national data set. Prereq: HMP 401, Statistics.

HMP 712 - Health Analytics
Credits: 4
This course introduces students to the field of health analytics and data science. It expands upon introductory statistical and data manipulation methods to include data mining, predictive analytics, cluster analysis, trend and pattern recognition, and data visualization. It couples data skills with interpretive and communication skills. Students will also be exposed to basic statistical programming. There will be a graduate component of the course (812) where students will work on advanced concepts and complete a separate culminating project. Prereq: HMP 401, HHS 540 Health Statistics or Equivalent or Permission.

HMP 715 - Environmental Health
Credits: 4
This course offers a general introduction to environmental health from the community, regional, and global perspective by addressing fundamental topics and current controversies such as air pollution, water pollution, built environment/urban sprawl, food safety, waste disposal, and occupational health. Students learn about environmental health assessment methods. Major issues in environmental health and related regulatory efforts and public health policy reform are examined.

HMP 721 - Managing Health Care Organizations
Credits: 4
Organizational characteristics of ambulatory, acute, and long-term care facilities. Management issues and strategies involving governance, clinical services, human and fiscal resources, and community-based services. Prereq: HMP 401.
Equivalent(s): HAP 721

HMP 722 - Health Care Management II
Credits: 4
A continuation of HMP 721 - Managing Health Care Organizations with specific lectures and assignments devoted to organizational behavior, leadership, and managerial skills. Case studies and examples will relate specifically to health care organizations. Prereq: HMP 721; HMP majors only.

HMP 723 - Health Planning
Credits: 0 or 4
Theoretical and historical foundations of health planning; the relationship of health planning and regulation; the application of planning methods; and the utilization of strategic planning and its relationships to marketing. Prereq: major or permission.
Equivalent(s): HAP 723

HMP 724 - Long-Term Care Management
Credits: 4
Exploration of the different components of the long-term care service delivery system to apply contemporary management theory, concepts, and models to the entities that make up the long term care service delivery system. Prereq: HMP 401, HMP 721.

HMP 735 - Social Marketing
Credits: 4
An introduction to the vocabulary and tools of social marketing. Expanding upon the traditional principles of marketing and consumer behavior, students are exposed to the challenges of trying to effect behavior change. Prereq: HMP 401, HMP 403, HMP 501, HMP 711, HMP 740, Statistics.
Equivalent(s): HMP 635

HMP 740 - Health Care Financial Management
Credits: 4
Equivalent(s): HAP 740

HMP 741 - Health Care Financial Management II
Credits: 4
This course focuses on issues related to effective financial management of health care organizations and programs, building upon material covered in HMP 740, Health Care Financial Management. Topics include the time value of money, long-term debt, stocks and equity, and evaluation of capital projects. Prereq: HMP 740, HMP Seniors or Permission.

HMP 742 - Strategic Management for Health Care Organizations
Credits: 4
Attributes: Writing Intensive Course
Equivalent(s): HAP 742

HMP 744 - Health Ethics and Law
Credits: 4
Ethical theories, core legal principles and cases, and decision-making models; patient’s rights and professional responsibilities; social justice and resource allocation; critical ethical dilemma’s facing health care managers, policy makers, and executives; managerial versus medical care conflicts. Prereq: HMP 401, HMP 403, HMP 501.

HMP 746 - Health Policy
Credits: 4
Analysis of the public policy process, the development of health policies in the U.S., and discussion of specific health policy issues. Prereq: HMP 401, HMP 403, HMP 501, HMP Junior or Senior, or permission.
Attributes: Writing Intensive Course

HMP 796 - Independent Study
Credits: 1-4
In-depth study with faculty supervision. Prereq: permission of major adviser and faculty in the area concerned.
Repeat Rule: May be repeated for a maximum of 12 credits.

HMP 798H - Honors Project/Research Design
Credits: 2
Examines selected research designs and methods used in health services research/program evaluation. Establishes theoretical and methodological foundation for honors-in-major research project to be conducted during the subsequent semester under a faculty member's supervision. Prereq: senior honors-in-major status and permission.
Attributes: Honors course
HMP 799H - Honors Project/Research
Credits: 2-4
In-depth research project (conducting and analysis) under supervision of faculty member. Includes scholarly presentation of findings to faculty and other interested parties and preparation of manuscript suitable for publication in peer-viewed journal. Prereq: HMP 798H and permission. Writing intensive.
Attributes: Honors course; Writing Intensive Course
