

PUBLIC HEALTH MINOR

<https://chhs.unh.edu/health-management-policy/program/minor/public-health>

Description

The department of Health Management and Policy offers a minor in public health. Public health deals with the health of populations and focuses on health promotion and disease prevention, as well as access to the medical system. The minor introduces students to many of the foundation areas of public health and provides basic exposure to key concepts and skills in the five core disciplines of public health, as articulated by the Council on Education for Public Health. The minor is open to baccalaureate students outside of the Health Management and Policy major at UNH. Students interested in this field may decide to continue their education with the Master of Public Health (MPH), which is also offered through the Department of Health Management and Policy.

Requirements

Academic policies related to Minors.
