Description

Bachelor of Science to Advanced MS/OTD Program

The University of New Hampshire Department of Occupational Therapy offers a Bachelor’s Degree leading to an entry with Advanced Standing into our MS or OTD program. Students in the Bachelor of Science (BS) program smoothly enter into one of the graduate programs by completing professional level OT courses as part of their BS degree. The BS and MS degree programs are completed in five and half years, while the BS and OTD programs require 6 years with two summer terms. Students declare their intent to graduate with an Advanced Standing MS or an Advanced Standing OTD at the end of their Sophomore year. Students may enter the BS program as first-year students or apply to transfer within UNH into the BS program during their sophomore year, space permitting. Students interested in transferring into this program should contact the Department of Occupational Therapy for information about transfer requirements, the application process and deadlines.

Students’ academic advisor guides them through a stream-lined application process to enter the Occupational Therapy: Advanced Standing MS or OTD Program during the senior year. Students must have a minimum of a 3.0 grade point average, earned a B- or above in all professional level OT courses (700 level or higher), with no more than 8 credits at B-, pass level I fieldwork, and meet professional behavioral standards, which are detailed in the OT Department Policy and Procedure Manual, available to all OT students on the department’s learning platform, MyCourses.

The Accreditation Council for Occupational Therapy Education (ACOTE), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929; telephone: 301-652-AOTA; website: www.acoteonline.org grants accreditation to entry level MS and OTD programs in the United States. Our Master’s degree program is currently accredited by ACOTE.

The OTD program at the University of New Hampshire has received candidacy for accreditation from the ACOTE. The program must have a pre-accreditation review, complete an onsite evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the National Certification examination.

After completing the Master’s degree or OTD in occupational therapy, including 24 weeks of Level II Fieldwork, students will be eligible to sit for the national certification examination offered by the National Board for Certification in Occupational Therapy (NBCOT), which is required to practice as an occupational therapist. Detailed information regarding the Occupational Therapy: Advanced Standing MS and OTD Program may be found in the UNH Graduate Catalog. A felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Requirements

Students begin the BS curriculum with preprofessional courses, which include courses in biological and social sciences as well as occupational therapy. In addition to meeting the University Discovery Program requirements, students take the following courses during the first three years of the program.

Core Curriculum

Details on satisfying these requirements are provided by the student’s academic adviser and are outlined in the OT Department Policy and Procedure Manual. All students receive an electronic copy of the manual in their first year, and it is also available on the Occupational Therapy Student Resources site on the University learning platform.

Volunteer or work experience in a health and human service organization is recommended, although not required.

Professional Curriculum

Students in the BS-MS or BS-OTD curriculum with a GPA of 3.0 or higher transition into the professional program and take professional level courses during their undergraduate education. The following courses are required.

Total credits for BS-MS: 38-39

Student Learning Outcomes

Student Learning Outcomes: BS in Occupational Therapy focuses on the
study of human participation in life occupations and prepares students
for an entry-level graduate degree to become registered occupational
therapists. Occupations are the activities that people do every day
across the lifespan, including but not limited to self-care, employment,
volunteer work, leisure, and play. The aim of the BS program is to prepare
students for employment in health services fields, or for graduate study in
occupational therapy, or other varied fields and disciplines.

Upon graduation with a BS in OTS degree from UNH, students will:

- Critically evaluate biological, psychosocial, and educational theories
  that influence human behavior and occupational participation.
- Demonstrate an understanding of the value of human occupation in
  health and wellness.
- Demonstrate critical appraisal of how disease and disability
  influences health promotion and occupational well-being.
- Recognize the role of culture, socioeconomic status, abilities, and
  other factors on occupational performance and participation of all
  members of society.
- Demonstrate an understanding of concepts of occupational
  deprivation and occupational justice as related to health and well
  being for all people.
- Demonstrate competency in information and basic research literacy.
- Demonstrate professional behaviors and skills in written and oral
  communication.
- Be prepared to apply for graduate study in the field of occupational
  therapy or other disciplinary area of graduate study.

This course is an elective for students advancing to the BS-MS
program and a requirement for students advancing to the BS-OTD
program. Total credits for BS-MS is 38-39.

This course also fulfills the writing intensive in major course.

Students need to declare their choice for Advanced Standing MS or
OTD by the end of their sophomore year. At the end of the senior year,
students are awarded a Bachelor of Science Degree in Occupational
Therapy. However, students must earn a graduate degree (MS or OTD)
to become registered occupational therapists. Students apply to the
Graduate School for Occupational Therapy. Advanced Standing MS or
the OTD Program during their senior year. An overall minimum grade point
of 3.0 is required for admission to the MS Program or OTD program, and
students must earn a minimum grade of B- in all OT classes at the 700
level, with no more than 8 credits of B- in OT courses at the 700 level,
pass Level I Fieldwork, and meet professional behavior expectations.
Please refer to the Graduate Catalog for additional information about the
Advanced Standing MS and OTD Programs and the graduate portion of
the professional occupational therapy curriculum including Fieldwork
Level II requirements.

1 This course is an elective for students advancing to the BS-MS
program and a requirement for students advancing to the BS-OTD
program. Total credits for BS-MS is 38-39.

2 This course also fulfills the writing intensive in major course.
