EDUCATION (EDUC)

Basic Programs
At the undergraduate level, students can begin to take courses in teacher preparation programs that lead to teacher licensure and a master’s degree in elementary, secondary, early childhood, early childhood special needs and special education during a 5th-year graduate experience. Students can also wait to take teacher preparation courses solely at the graduate level, however, this usually takes more than a single year.

Students majoring in music, mathematics, pre-K through 3rd grade, and health and physical education also have the option to participate in a five-year program leading to licensure and a master’s degree. Or, they may choose the four-year options in these areas, which leads to licensure at the undergraduate level. Students interested in one of these four-year options should contact the respective department for information and advising.

Students typically begin preparation for teaching at the undergraduate level with a semester of field experience (EDUC 500: Exploring Teaching) and other professional coursework in education.

Accelerated Master’s Program
UNH undergraduate students with a 3.2 or higher cumulative grade-point average (GPA) can apply for "early admission" to the Graduate School either one or two semesters prior to their final semester as an undergraduate. Admitted students may register for a maximum of 12 credits of dual-credit coursework (undergraduate & graduate level coursework, e.g., 700/800) prior to completing their bachelor’s degree. To receive graduate credit, students must be admitted to the Graduate School before the start of the semester in which the course(s) will be taken and need to maintain a 3.2 GPA or higher until their undergraduate degree is awarded. Applying for early admission involves the regular Graduate School application at www.gradschool.unh.edu.

Program Philosophy
The following conceptual framework guides all of the programs that prepare professionals in education at the University of New Hampshire:

The professional education unit at the University of New Hampshire seeks to prepare practitioners who will become leaders in their own practice settings and within their profession, applying knowledge to improve education for all students and enrich the lives of clients. Immersion in subject matter, research, theory and field-based experience provide a base for our graduates to make well-reasoned judgments in complex situations, render informed decisions, model exemplary practice, and take initiative for planned change.

Students learn to establish caring and thoughtful environments that celebrate individual differences and backgrounds while fostering cooperation and educational improvement. We stress reflective critical inquiry as a mode of study and community-building as a means to promote change. We value and support both our students’ local practice and their broader leadership within the profession.

Mission Statement of Programs in Educator Preparation
The following mission statement gives direction to the basic and advanced programs in teacher education:

We seek to prepare beginning teachers who demonstrate excellence in classroom practice and who will become educational leaders. Our graduates will possess the knowledge, skills, and dispositions required for outstanding classroom practice and eventual leadership within the local school community and the larger education community.

Undergraduate Work toward Teacher Certification in Elementary & Secondary Education

Step I. Enroll in Exploring Teaching: Education 500
Students are encouraged to take EDUC 500: Exploring Teaching, as a sophomore, however, completion during junior or senior year also can leave enough time for other education course requirements.

Step II. Professional Coursework in Education at the Undergraduate Level
Education 500 is a prerequisite to further work in the teacher education program. An undergraduate receives a co-adviser in the Department of Education (usually the Exploring Teaching instructor). Along with the major adviser, this co-adviser works with the student to plan the undergraduate portion of the five-year teacher education program.

Step III. Admission to the Internship and Graduate Phase of our Educator Preparation Programs
Undergraduate students apply to the Graduate School second semester of their junior year or first semester of their senior year. As mentioned above, students admitted to the Accelerated Master’s Program begin their graduate degree coursework senior year, earning a maximum of 12 graduate credits over one or two semesters.

The final phase of the program includes a full-year internship, electives, and an inquiry research project. This phase normally takes an academic year, plus a few summer courses to complete.

The year-long internship and inquiry research project (EDUC 900: Internship and Seminar in Teaching / EDUC 901; Internship and Seminar in Teaching) comprises the final stage of the five-year program. The elementary internship also includes a two-course sequence in literacy instruction (EDUC 808 & 809, or ENGL 816 and EDUC 812 or ENGL 815).

The internship is a teaching and learning experience in which the intern works in an elementary or secondary school over the course of an entire school year. It typically begins in late August and runs through late April / early May. Due to the intensive time commitment, it is recommended that, at most, only one course be taken in addition to the internship each semester. Interns become a part of the school staff, sharing appropriate instructional tasks and often carrying the full instructional duties in one or more classes.

Interns are mentored and supervised by a school staff member who is designated as a “cooperating teacher” or “CT”, along with a UNH faculty member who collaborates in intern supervision and conducts a weekly two-hour seminar for all interns with whom s/he is working.

Before the internship, students have completed a bachelor’s degree with a major outside of education. Because of this, they possess depth of knowledge in a subject area and a broad general education, in addition to substantive course preparation for teaching. Secondary education candidates must have completed an approved major, or its equivalent, in the subject that they intend to teach. Elementary education candidates may pursue an undergraduate major in any area, though majors in the core disciplines taught in elementary schools are desirable.
Undergraduates apply for the internship in the fall of their senior year and participate in a school placement process early spring semester. Starting the process early will facilitate finding the best setting for students’ needs and goals. The director of field experiences in Durham and the associate director of teacher education in Manchester play a major role in identifying internship sites and prospective CT’s, and they consult regularly throughout the placement process.

Internship applications are available at the Department of Education, Durham, and the Office of Teacher Education, Manchester. Admission to the internship requires a completed application to the internship, admission to the UNH Graduate School, and a consultation with the director of field experiences.

Programs

- Education Four-Year, Undergraduate Option
- Educational Studies Dual Major
- Education Minor
- Special Education Minor

Courses

Education (EDUC)

EDUC 400 - Careers in Education: Exploring Professional Contexts
Credits: 1
Designed for students interested in learning about careers in education, this survey course explores professional opportunities in both formal and informal education settings within P-12 teaching and beyond (i.e., research, museum director, counseling, social work, educational software developer, etc.). Faculty from multiple disciplines and local professionals will present seminars and lead discussions about their role in addressing contemporary issues in education. Students will consider pathways that can be taken to pursue professional goals. Cr/F.

EDUC 401 - Current Issues in Education
Credits: 2
This survey course explores current issues in education through multiple professional lenses. Students will consider the relationship between their career pathways and key issues impacting educational settings including social media, poverty, curriculum, assessment and evaluation. Cr/F.

EDUC 402 - Introduction to Educational Studies: Social Change and Education in Local and Global Contexts
Credits: 4
This course introduces students in the Dual Major in Educational Studies to the social, cultural, and political factors that influence education outside of conventional school settings. We examine the relationship between education and social change in local and global contexts. Guiding questions include: How does schooling produce certain kinds of citizens? How do grassroots movements use education to resist colonial/colonizing agendas? What role does education play in promoting democracy, and social and economic equality? Prereq: Permission required for non-majors.

EDUC 444B - Public Issues, Democratic Schooling & Active Citizenship in a Global Context
Credits: 4
This is a first-year inquiry course intended primarily for students participating in the Common Purposes residential living program. The course offers multidisciplinary content focused on active citizenship in a pluralistic democracy. The primary organizing concept of the course is community; assignments focus on deliberative dialogue, public reasoning, collective action, and social justice. The course is taught as a seminar and includes on-campus and off-campus applied projects.
Attributes: Social Science (Discovery); Inquiry (Discovery)

EDUC 500 - Exploring Teaching
Credits: 4
For students considering a teaching career. In-school experiences to develop introductory skills in teaching. On-site seminars for analysis and evaluation. Assessment and advising related to teaching as a career. Prerequisite for further work toward teacher licensure. Minimum of 7 hours a week, plus travel time, required. Prereq: permission. Special fee. Cr/F.
Repeat Rule: May be repeated for a maximum of 8 credits.

EDUC 506 - Literacy Tutoring at the Elementary School Level
Credits: 2
Supports students volunteering as reading and writing tutors in local elementary schools. Explores student-tutor relationships, student engagement, mentoring, literacy best-practices, and lesson-planning. Includes a weekly tutoring commitment through Seacoast Reads.
Repeat Rule: May be repeated for a maximum of 6 credits.

EDUC 520 - Education, Poverty, and Development
Credits: 4
An examination of the human and institutional relationships among education, poverty, and social development. This course will emphasize the ways in which access to universal, effective education is correlated with the incidence of childhood poverty and its reduction in the US and selected countries in the developing world. Interactive, discussion-based classes. Prior coursework in social or political sciences, economics, international affairs, health sciences, or related fields suggested. A minimum of 15 hours of fieldwork beyond classroom time is required. Students can fulfill this requirement through a variety of experiences on and off campus.
Attributes: Social Science (Discovery)

EDUC 525 - Teaching Race
Credits: 4
This course examines the idea of race from the perspective of science, history, and lived experience to help the student properly evaluate the power of racial ascription, of color, and whiteness and b) to figure out how the power of educational institutions can best be used to promote equality and racial justice in society.
EDUC 550 - Language and Linguistic Diversity in Schools
Credits: 4
The course offers a broad examination of language and linguistic diversity and identities, drawing from education, sociolinguistics, anthropology, child development, and related fields. Content includes a critical examination of the evolution of the laws and policies affecting linguistic minorities in the U.S. and how they inform the educational rights of emerging and developing bilingual learners. A minimum of 20 hrs of fieldwork beyond classroom time is required. Students have the opportunity to identify age group preference for field placement.

EDUC #556 - Mentoring Adolescents with Disabilities in the Transition to Work
Credits: 2
Open to undergraduate with an interest in mentoring and diversity expansion at UNH. The primary goal is to introduce undergraduates with and without disabilities to a mentoring experience. Students will develop an understanding of the importance of expanding the diversity on campus. Each mentor/mentee relationship will be individualized based on the needs of the students enrolled and mentoring relationships will be a personalized matched.
Repeat Rule: May be repeated for a maximum of 12 credits.

EDUC 605 - Educational Perspectives in Critical Times
Credits: 4
In this course students inquire, reflect on and teach ethical dilemmas in the practice of education. Students will establish a foundation of knowledge on which to build philosophies of education in preparation for a career in which they face policies influenced by political agendas, fads, and economic interests. Through readings, discussions and field experiences, students will become more practiced and comfortable in having difficult discussions related to pressing issues of education and equity. Special Fee.
Attributes: Writing Intensive Course

EDUC 610H - Field Experience in Educational Studies
Credits: 1-4
Work with an agency, institution, or organization to gain technical and/or professional competence not otherwise available. Student plans experience with departmental adviser. Credit approval subject to recommendation of faculty members and performance of student.
Prereq: permission.
Repeat Rule: May be repeated for a maximum of 8 credits.

EDUC #625 - Anthropological Thinking on Education
Credits: 4
Education is about, by, and for human beings. It takes place in a sociocultural context. It involves learning and, in many societies of the world, schooling. Education should, therefore, be understood from the viewpoint of what is known about human beings, i.e., from the viewpoint of anthropology. This course introduces the student to five key ideas in anthropology that help us think about education. The ideas are: Evolution, Culture, Structure, Function, and Relativism. The course is organized that the introduction of each idea is followed by select readings that illustrate how the idea bears on education. It is hoped that the course will provide the student with conceptual framework for analyzing educational policies and practices.

EDUC 694 - Courses in Supervised Teaching
Credits: 8
EDUC 703F - Teaching Elementary School Science
Credits: 4
This course is designed to increase pre-service teachers' pedagogical content knowledge and enthusiasm with respect to teaching science at the elementary level. Throughout this course, students will familiarize themselves with reform-based approaches to elementary science instruction through inquiry, readings, and class discussions. Science will be explored not only as an important element of elementary education, but also as a means by which to support a diverse class of elementary students in literacy and mathematics learning.

EDUC 703M - Teaching Elementary Social Studies
Credits: 4
Social Studies Methods explores practical teaching models, techniques of implementation, and relationships to curricula in elementary classroom instruction. The New Hampshire Social Studies Frameworks and Common Core Curriculum Standards for instruction are identified and implemented in creating lesson plans for a mini unit.

EDUC 705 - Contemporary Educational Perspectives
Credits: 4
Students formulate, develop, and evaluate their own educational principles, standards, and priorities. Writing intensive.
Attributes: Writing Intensive Course

EDUC 706 - Introduction to Reading in the Elementary School
Credits: 4
Methods in reading and writing instruction; current procedures and materials; diagnostic techniques. Course satisfies reading/language arts requirement for prospective elementary teachers in the five-year teacher education program. Special fee.

EDUC 707 - Teaching Reading through the Content Areas
Credits: 2
Approaches and methods for teaching reading through content materials; coursework includes practical applications through development of instructional strategies and materials. Required for candidates seeking certification in art, biology, chemistry, earth science, general science, physical science, physics, or social science.

EDUC 710E - Workshop in Adult and Occupational Education
Credits: 1-4
Modularized instruction of in-service education. Focus varies with the needs of the student. May be repeated for up to 8 credits.
Equivalent(s): AOE 700

EDUC 710F - Investigations
Credits: 1-4
Topics may include informal learning, public pedagogies, secondary education, post-secondary education, adult education, extension education, cooperative education, or teaching experiences. Student-selected in one of the areas listed. Electives after consultation with instructor.
Repeat Rule: May be repeated for a maximum of 8 credits.

EDUC 712 - Teaching Multilingual Learners
Credits: 4
This course is for people interested in teaching in schools and/or community agencies serving multilingual populations. Topics include: theories of first and second language acquisition, translanguaging, language policies and laws, strategies for teaching academic content to emerging bilinguals in mainstream classroom, creating classroom/school cultures that invite all students into learning, and the role of advocacy and professional collaboration in linguistically diverse public schools. In addition to designing and exploring a variety of teaching activities and techniques, students conduct a rich collection of field assignments including interviewing bi-/multilingual adults; visiting community agencies; and collaboratively designing community engagement activities.

EDUC #717 - Growing up Male in America
Credits: 4
An integrative view of growing up male in the American culture from birth through adulthood. Analysis of major perspectives on male development and the implications in parenting with specific emphasis on male education. Participants are expected to develop awareness of their own development as a male or alongside males, using current male development perspectives as a guide. They also create an awareness of how this will affect their behavior toward boys in their classrooms.

EDUC 718 - Critical Social Justice in and Beyond Education
Credits: 4
Students will become familiar with key concepts and principles of critical theory, critical pedagogy, and social justice education so that they may use this body of work to inform their teaching, leadership, and scholarship. We will examine the role of a) schools in providing equity of educational access and outcomes, b) teacher agency to change unjust conditions, and c) micro experiences within schools and the macro layer of context (i.e., history, politics, economics, culture).

EDUC 720 - Educational Technology
Credits: 4
Educators with any experience level will develop the skills and mindset to find and use technology tools that can enhance student learning. Assignments and online discussions focus on foundational educational technology topics, including ethical and social justice considerations, best practices, and national technology standards. Assignments are completed using each week's tech tool category, such as presentations, image/video editing, and website creation. Participants will curate educational technology tools that fit their preferences and needs. This class will include the focus on facilitating remote learning.

EDUC 733 - Teaching Writing in the 21st Century
Credits: 4
An examination of the challenges to teaching writing in the present age of high stakes testing and audit culture. The course addresses theories and methods for teaching writing in a complex society that values a range of expressive forms, including digital technologies, social media, film and video. Special emphasis on multi-model literacies in K-12 classrooms. Exploration of language diversity, the relationship among reading, writing, and literacy development in content-specific areas, and student-centered assessments.
Attributes: Writing Intensive Course

EDUC 734 - Children's Literature
Credits: 4
Interpretive and critical study of literature in elementary and middle school settings. Applications of children's literature in educational settings.
EDUC 741 - Exploring Mathematics with Young Children
Credits: 4
A laboratory course offering those who teach young children mathematics, and who are interested in children's discovery learning and creative thinking, offers a chance to experience exploratory activities with concrete materials, as well as mathematical investigations, on an adult level, that develop the ability to provide children a mathematically rich environment, to ask problem-posing questions, and to establish a rationale for doing so. Prereq: MATH 601.

EDUC 745 - Math with Technology in Early Education
Credits: 2
The primary goal of this course is that students gain knowledge of learning standards and teaching methods for the instruction of mathematics in early education settings with infants through 3rd grade. In addition, participants gain experience in applying their newfound knowledge in the areas of mathematics with technology through a combination of teaching and digital experiences. On-line course; no campus visits required. Please note the minimal technical requirements for a UNH e-course.

EDUC 750 - Introduction to Exceptionality
Credits: 4
A life span perspective of the social, psychological, and physical characteristics of individuals with exceptionalities including intellectual, sensory, motor, health, and communication impairments. Includes implications for educational and human service delivery.

EDUC 751A - Educating Exceptional Learners: Elementary
Credits: 4
Foundations of special education and an introduction to a variety of service delivery models with an emphasis on educating all learners in heterogeneous classrooms. Instructional strategies and supports for all students, particularly those with mild and moderate disabilities, will be the primary focus. Special fee.

EDUC 751B - Educating Exceptional Learners: Secondary
Credits: 4
Foundations of special education and an introduction to a variety of service delivery models with an emphasis on educating all learners in heterogeneous classrooms. Instructional strategies and supports for all students, particularly those with mild and moderate disabilities, will be the primary focus. Preparation for students’ transitions to post-secondary life will be included. Special fee.

EDUC 751C - Educating Exceptional Learners: Related Services
Credits: 4
An overview of special education and related services in an educational setting. Focus on support services provided to general education and special education teachers, including laws relating to special populations, how related services interact with classroom and special educators, IEPs, and other topics that impact services provided to students with special needs.

EDUC 752 - Contemporary Issues in Learning Disabilities
Credits: 4
Critical analysis of current and historical conceptions of learning disability in the areas of definition, supporting theories, assessment practice, and teaching methodologies. Focus on contemporary issues in the field that relate to working with students labeled as learning disabled at both elementary and secondary levels.

EDUC 756 - Supporting Families of Individuals with Exceptionalities
Credits: 4
An introduction to family system theory and the implications for families having members with exceptionalities. Issues addressed include diagnosis and prognosis, coping strategies, communication and team collaboration, cross-cultural competence, and agency and school delivery of services. Emphasis is on proactive collaboration with family members. Equivalent(s): EDUC 949

EDUC #757 - Contemporary Issues in Autism Spectrum Disorders
Credits: 4
The goal of this course is to enhance students’ understanding of contemporary issues related to educating students with autism spectrum disorders (ASD). The course is grounded in a theoretical foundation that values the perspectives of individuals with ASD in academic, research, policy, and clinical endeavors. Learning outcomes focus on strategies for identifying opportunities for learning, communication, literacy, and social relationships in a variety of inclusive environments.

EDUC 760 - Introduction to Young Children with Special Needs
Credits: 4
Needs of children (birth to eight years) with developmental delays or who are at risk for disabilities. Strengths and special needs of such children; causes, identification, and treatment; current legislation; parent and family concerns; program models.

EDUC 761 - Inclusive Curriculum for Young Children with Special Needs
Credits: 4
Classroom applications of constructivist theory. Curriculum planning and implementation; overview of research and theory related to teaching and learning of specific content areas, with emphasis on integrated approach to early childhood curriculum. Stresses the reciprocal nature of student-teacher relationship.

EDUC 762 - Curriculum for Young Children with Special Needs: Evaluation and Program Design
Credits: 4
Overview of evaluation and intervention issues relevant to early childhood special education, focusing on ages three through eight. Norm-referenced and criterion-referenced assessment tools. Judgment-based evaluation and observation skills. Translation of evaluation information into goals and objectives for individual education programs. Developing appropriate programs in inclusive settings. Equivalent(s): EDUC 947

EDUC 767 - Students, Teachers, and the Law
Credits: 4
Our public schools play a vital role in our society. What shall be taught and who shall teach our children are perennial questions. This course explores how the law impacts the educational lives of students and teachers, including issues of church-state relations, free speech, dress codes, and search and seizure. (Also offered as JUST 767.) Equivalent(s): JUST 767

EDUC 784 - Educators as Community-Engaged Researchers
Credits: 4
With the guidance and support of the instructor, students work in collaborative teams to conduct a systematic inquiry into a current educational studies issue and present their findings and interpretations at a professional or community forum open to the public. Students are encouraged to conduct their research in non-formal education settings including but not limited to community agencies, museums, and after-school programs. Note: EDUC 784 is the principal option for the DMES capstone. Permission required.
EDUC #791 - Methods of Teaching Secondary Science
Credits: 4
This course is designed to provide experiences and resources that will support individuals who are planning to teach middle or high school science. Through interactive activities, readings, and class discussions, the class explores key elements and challenges of secondary science teaching and provide a foundation for continued growth and reflection throughout the students’ teaching careers. Some of the main topics discussed in this course are national and state science standards, reform-based approaches to instruction, the use of technology in science teaching, laboratory safety, curriculum evaluation, and assessment.

EDUC 795 - Independent Study
Credits: 2 or 4
Juniors and seniors only, with approval by appropriate faculty member. Neither course may be repeated.

EDUC 797 - Special Topics in Education
Credits: 1-4
An experimental course for the purpose of introducing a new course or teaching a special topics for a semester in an area of specialization in Education.
Repeat Rule: May be repeated up to 2 times.

Faculty

https://cola.unh.edu/education/faculty-staff-directory
