GEOGRAPHY (GEOG)

Geography, as the study of place, space and environment, addresses the “why of where” by uniting social and biophysical sciences, humanities and technology to examine the factors that make a place or environment unique. Connecting academic inquiry to real-world problem solving, our courses teach critical thinking skills that prepare students to transfer classroom and field experience into a wide range of careers. With interests ranging from globalization to climate change and sustainability, urbanization to community development at home and abroad, geography majors gain the knowledge, techniques and perspectives needed to meet current and future challenges.

Geography at UNH is an undergraduate-only department offering both major and minor degree programs. With small class sizes, personalized advising by department faculty, and opportunities for independent study, our students receive a high degree of individual attention. UNH geography graduates are prepared to enter a variety of careers or professional and graduate degree programs.

Programs

• Geography Major (B.A.)
• Geography Minor

Courses

Geography (GEOG)

GEOG 401 - Regional Geography of the Western World
Credits: 4
An introduction to the people, places, and problems of six Westernized regions of the world – Europe, Russia, Latin America, the Caribbean, North America, and Australia and Oceania. The course emphasizes five themes: environmental geography, population and settlement, cultural coherence and diversity, geopolitical framework, and economic and social development.
Attributes: World Cultures(Discovery)
Equivalent(s): GEOG 401H

GEOG 402 - Regional Geography of the Non-Western World
Credits: 4
Major culture areas of the non-Western world and the unique interaction of human and physical phenomena that produces the distinctive character of these areas. Emphasizes the manner in which people of different cultures have made use of opportunities and solved problems existing in the major regions occupied by non-Western cultures: the Middle East and North Africa, Africa south of the Sahara, Oriental Asia and the Pacific Islands.
Attributes: World Cultures(Discovery)
Equivalent(s): GEOG 402H

GEOG 405 - There Is No Planet B
Credits: 4
Introduces human-environment relations as a central focus of geography, spanning social and environmental sciences. Considers mapping, natural resource use, commons and markets, hazards, political ecology, and land use change. Case studies link core concepts with examples from local to international scales.
Attributes: Environment, TechSociety(Disc)

GEOG 473 - Elements of Weather
Credits: 4
Basic principles of weather phenomena and the physical processes underlying these phenomena. Emphasis on weather patterns of New England. Lab.
Attributes: Discovery Lab Course; Physical Science(Discovery)

GEOG 500 - Making Change: Environmental Justice Practicum
Credits: 4
Provides students with opportunities to link a personal philosophy and professional action plan for environmental justice, thereby bridging understandings of both social justice and environmental conservation. Spanning theoretical and practical perspectives, students will learn basic grant writing skills that are useful in a range of careers, particularly in the non-profit and government sectors.

GEOG 530 - China: People, Politics and Economy
Credits: 4
This course examines China’s diverse physical environments, politics, economies, and cultures across the vast territory. Students learn to adopt a relational and spatial perspective to study the contemporary issues in China.
Attributes: World Cultures(Discovery)
Equivalent(s): GEOG #530W

GEOG #530W - China: People, Politics and Economy
Credits: 4
This course examines China’s diverse physical environments, politics, economies, and cultures across the vast territory. Students learn to adopt a relational and spatial perspective to study the contemporary issues in China.
Attributes: World Cultures(Discovery); Writing Intensive Course
Equivalent(s): GEOG 530

GEOG 540 - Geography of the Middle East
Credits: 4
Environmental, cultural, political-geographic, and ecological foundations of the Middle East. Selected regional problems and issues, e.g., geographical dimensions of the Arab-Israeli conflict, oil, urbanization, population growth, and nomadism.
Attributes: World Cultures(Discovery)

GEOG 550 - Sub-Saharan Africa: Environmental Politics and Development
Credits: 4
Explores the political ecologies of development in sub-Saharan Africa. Provides a historical and spatial perspective on sub-Saharan Africa’s environments and the politics that influence the region’s conservation and development choices. Students will critique conventional knowledge, ideas, and explanations to develop a deeper understanding of environment-development linkages in sub-Saharan Africa over time.
Attributes: World Cultures(Discovery)
GEOG 560 - Natural Hazards and Human Disasters  
Credits: 4  
A survey of natural hazards, including earthquakes, volcanoes, tsunami, floods, drought, hurricanes, and severe weather, and the human disasters they cause. The geography of community vulnerability to natural hazards and the factors that influence risk and recovery are also examined.  
Attributes: Environment, TechSociety(Disc)  

GEOG 565 - Designing Sustainable Places  
Credits: 4  
Introduces sustainable design of the built environment, including small towns, cities, suburbs, and rural areas. From neighborhood to regional scales, thoughtful place-making can link economic growth, justice, and environmental sustainability. Readings, discussions, writings, and hands-on field visits and design activities integrate human, environmental, and aesthetic perspectives to consider key challenges and identify a range of practical solutions.  

GEOG 572 - Geography of the Natural Environment  
Credits: 4  
Provides an introduction to geography of the natural environment, including landforms, weather and climate, water resources, and biogeography. Examines the processes that shape the different elements of the environment and the relationships between them.  
Attributes: Physical Science(Discovery)  

GEOG 574 - Global Geomorphology  
Credits: 4  
A survey of earth's major landforms and the geographic factors that influence their development, distribution, and morphology. Topics include mountain building, river systems, desert migration and expansion, glacial and periglacial environments, and shoreline evolution. Emphasizes how these processes interact to form surface features that are unique to their geographic environment.  
Attributes: Physical Science(Discovery)  

GEOG 581 - Human Geography  
Credits: 4  
Differentiation of the world in terms of population, race, language, religion, political territory, and economic life. Collection and critical use of empirical data; emphasis on spatial and ecological analysis.  
Attributes: Social Science (Discovery); Inquiry (Discovery)  

GEOG 5810 - Human Geography  
Credits: 4  
Differentiation of the world in terms of population, race, language, religion, political territory, and economic life. Collection and critical use of empirical data; emphasis on spatial and ecological analysis.  
Attributes: Social Science (Discovery)  

GEOG 582 - Global Trade and Local Development  
Credits: 4  
This course examines the ways in which global trade interacts with local development across the world. It studies the special organization of economic activities through basic approaches in economic geography. It also studies the history and contemporary state of international competition and collaboration.  
Attributes: Social Science (Discovery)  
Equivalent(s): GEOG #582W  

GEOG #582W - Global Trade and Local Development  
Credits: 4  
This course examines the ways in which global trade interacts with local development across the world. It studies the special organization of economic activities through basic approaches in economic geography. It also studies the history and contemporary state of international competition and collaboration. Writing intensive.  
Attributes: Social Science (Discovery); Writing Intensive Course  
Equivalent(s): GEOG 582  

GEOG 584 - Political Geography  
Credits: 4  
Interactions between geographic and political phenomena at the sub-national, national, and international levels. Emphasis on geographical aspects of current political problems within and between states. (Not offered every year.) Writing intensive.  
Attributes: Writing Intensive Course  

GEOG 590 - Field Research  
Credits: 4  
Explores a range of research methods, emphasizing collection and analysis of field data to understand human-environment dynamics and/or spatial relations. Topics include ethics, sample design, surveys, interviews, participant observation, and qualitative and quantitative analyses. Students complete hands-on research activities.  
Equivalent(s): GEOG 650  

GEOG 591 - Making Maps  
Credits: 4  
Introduces how to make a map from start to finish, designed for students with no background in computer technology. Covers basic knowledge and skills in geographic information system, graphic design, and computer visualization. Walks students through some of the most popular applications for map making.  

GEOG 595 - Statistics for Spatial Science  
Credits: 4  
Introduces elementary statistics to students of social sciences from a spatial perspective. It is designed to help students approach introductory-level quantitative analysis using basic statistical problem-solving techniques with social and physical science data models. These elementary statistical tools and concepts will be explained during classroom lectures and proficiency obtained during practical exercises.  

GEOG 658 - Introduction to Geographic Information Systems  
Credits: 4  
Introduces the use of geographic information systems (GIS) for natural resources and related fields. Data models/structures, map projections, data input/output/storage, data analysis/modeling, interpolation, and data quality/standards. Hands-on lab using ArcGIS software. Students are strongly encouraged to complete an introductory course in statistics before enrolling in course. Restricted to GEOG majors or permission. (Also offered as NR 658).  
Equivalent(s): NR 658  

GEOG 670 - Climate and Society  
Credits: 4  
An introduction to climate science and the interaction between humans and climate. Examines the processes that control climate, the mechanisms that drive climate change, and the impact of climate change on society. Writing intensive.  
Attributes: Writing Intensive Course  
Equivalent(s): GEOG 570
GEOG #671 - Weather Forecasting  
Credits: 4  
Examines in depth, the physical processes that govern the development and movement of weather systems. Topics include the relationship between surface and upper-level winds, vertical motion and pressure systems, storm development, and techniques used in weather forecasting.

GEOG 673 - Political Ecology  
Credits: 4  
Examines human-environment relations through the geographic subfield of political ecology, integrating social and biophysical sciences. Emphasizes cross-scalar relationships in resource decisions and community development, with substantial coverage of rural, non-US contexts. Seminar-style course with regular readings, writings and discussion. Writing intensive.

Attributes: Writing Intensive Course  
Equivalent(s): GEOG 573

GEOG 685 - Population and Development  
Credits: 4  
A regional approach to the study of population geography with concern for the interaction between the focus of economic growth and the components of population change and development. Considers the environmental impact of developing trends in the developed and developing worlds and the relationship of these trends to sustainable growth and population patterns.

Attributes: Writing Intensive Course

GEOG 686 - World Economy and Globalization  
Credits: 4  
Emphasizes the spatial development of the world economy and the evolution into today's "globalized" economy. Topical emphasis includes the processes of global economic production changes, the role of transnational corporations, and the role of the state in globalization. Writing intensive.

Attributes: Writing Intensive Course

GEOG 695 - Internship  
Credits: 1-4  
Internships provide an opportunity for on-the-job skill development and practical experience in a closely supervised work setting. The student must provide a written proposal to a supervising faculty member before an internship program is approved. At the end of the semester, the student must make a presentation, provide work samples, or submit a detailed report, log, or portfolio describing the internship experience. Cr/F.

Repeat Rule: May be repeated for a maximum of 8 credits.

GEOG 759 - Digital Image Processing for Natural Resources  
Credits: 4  
Introduces digital remote sensing including multispectral scanners (Landsat and SPOT) radar, and thermal imagery. Hands-on image processing including filtering, image display, ratios, classification, registration, and accuracy assessment. GIS as it applies to image processing. Discussion of practical applications. Use of ERDAS image-processing software. Knowledge of PCs required. Prereq: GEOG 757 or equivalent and permission. (Also offered as NR 759).

Equivalent(s): NR 759

GEOG 760 - Geographic Information Systems in Natural Resources  
Credits: 4  
This course in geographic information systems (GIS), covers advanced theory, concepts, and applications of GIS for natural resource and related disciplines. Discussion of database structures, data sources, spatial data manipulation/analysis/modeling, data quality and assessment. Students conduct a project of their design exploring aspects of GIS most useful to them. Lecture emphasizes concepts and applications through a text and selected peer reviewed articles. Lab uses the latest version of ArcGIS software and provides hands on experience. Prereq: Introductory GIS course. Permission required. (Also listed as NR 760).

Equivalent(s): NR 760

GEOG 795 - Special Project  
Credits: 2 or 4  

Attributes: Writing Intensive Course

GEOG #796 - Special Topics  
Credits: 4
