SECURITY STUDIES MINOR

https://cola.unh.edu/political-science/program/minor/security-studies

Description

The security studies minor will provide students with the opportunity to explore the many dimensions of security through the interdisciplinary study of political science, anthropology, communication, geography, history, humanities, justice studies, sociology, women’s and gender studies, economics and aerospace studies. This well-rounded curriculum will enable students to build upon their interest in political science by specializing in an area of increasing importance — domestic and global security.

The field of security studies has always been important within the discipline of political science, but the concept of security has broadened and become more problematized in recent years. Following the terrorist attacks of 9/11, federal, state and local governments created thousands of jobs that require knowledge of security issues and the ability to conduct research. Leaders at all levels count on staff with analytical skills to design and conduct research to support decision-making, and communicate the results of this research effectively to policy-makers. Individuals who understand the national security environment and have the ability to design and conduct research are in critical demand in the public sector, private sector and not-for-profit entities.
