

BIOLOGY MINOR

<https://colsa.unh.edu/biological-sciences/program/minor/biology>

Description

The Biology Minor is designed to give students a broad background in basic biological understanding of life processes, while providing experiences in ecology, evolution, and organismal diversity. Five courses are required for completion of the minor, of which no more than two can overlap with major requirements.

Requirements

Code	Title	Credits
Required Courses		
BIOL 411	Introductory Biology: Molecular and Cellular	4
BIOL 412	Introductory Biology: Evolution, Biodiversity and Ecology	4
BIOL 541	Ecology (both are writing intensive)	4
or ZOO 690	Evolution	
Two courses dealing with organismal surveys ¹		
Animal Survey Course: Choose one		4-5
MEFB 628	Marine Invertebrate Evolution and Ecology	
ZOO 542	Ornithology	
ZOO 710	Sharks and Bony Fishes	
NR 712	Mammalogy	
Plant or Fungus Survey Course: Choose one		4
Plant Survey Course:		
BIOL 566	Systematic Botany	
Fungus Survey Course:		
BIOL 752	New England Mushrooms: a Field and Lab Exploration	

¹ One must focus on animals, and the other on plants or fungi
